  • Students who can add content courses without affecting their tuition bill will be encouraged to do so.

  • Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.

• The 6 credits may be comprised of the following combinations:

  • Two language courses (* see notes below)

  • A language course (* see notes below) and a content course

  • Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLS, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, **at least nine (9) credits of the course work used to complete the certificate requirements must be in addition to the credits used to complete the student's primary degree program.** At least 3 of these credits must be in content coursework. **All 9 cannot be language course credits.**

• For a listing of approved courses, click here.

• Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.

• **Language proficiency:** Students must have three years of progressive college-level instruction in a West European language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.

• Be awarded a graduate or professional degree.

For the full requirements for the graduate certificate, please click here.

**Graduate Certificate**

**Mediterranean Studies Advanced Certificate**

The Advanced Certificate in Mediterranean Studies provides students with interests in Mediterranean history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes include immigration, regional politics and security, ancient civilizations, and Mediterranean arts and architecture.

**Required Courses**

• CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1
• ENGLIT 2851 - GENDER, TECHNIQUES, AND MEDIA: FROM PLATO TO VIDEO GAMES
• FR 2761 - FRENCH STUDIES GENDER STUDIES
• HAA 2131 - ROMAN ART
• HIST 2729 - SEAS, PEOPLES, AND EMPIRES
• ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
• LAW 2351 - EUROPEAN UNION LAW
• PHIL 2070 - ANCIENT PHILOSOPHY
• THEA 2205 - WORLD THEATRE: 500 BCE TO 1640
Mediterranean Studies Certificate

The Certificate in Mediterranean Studies provides students with interests in Mediterranean history, culture, politics, and languages to complement their major with a regional specialization, and to explore the interconnectedness of North Africa, the Levant, Anatolia, Southern Europe, and the Balkans. The certificate is self-designed, and students may choose any theme to organize their studies and class choices. Examples of possible themes include immigration, regional politics and security, ancient civilizations, and Mediterranean arts and architecture.

Required Courses

- CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS I
- ENGLIT 2851 - GENDER, TECHNIQUES, AND MEDIA: FROM PLATO TO VIDEO GAMES
- FR 2761 - FRENCH STUDIES GENDER STUDIES
- HAA 2131 - ROMAN ART
- HIST 2729 - SEAS, PEOPLES, AND EMPIRES
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- LAW 2351 - EUROPEAN UNION LAW
- PHIL 2070 - ANCIENT PHILOSOPHY
- THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Transatlantic Studies Advanced Certificate

The Transatlantic Studies Advanced Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.

Required Courses

- ADMPS 3006 - SOCIAL THEORIES & EDUCATION IN GLOBAL CONTEXT
- ANTH 2516 - CHIEFDOMS
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- EDUC 2100 - EDUCATION AND SOCIETY
- ENGLIT 2353 - POST COLONIAL THEORY AND CULTURE CRITIQUE
- FR 2765 - COMPARATIVE FRANCOPHONE CULTURE
- HAA 2025 - HISTORY AND ETHICS OF COLLECTING
- HIST 2540 - EUROPEAN EMPIRES IN THE WORLD
- HPS 2522 - SPEC TOPICS-HISTORY OF SCIENCE
- ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES
- LAW 2910 - HOW LAW BEGAN
- LING 2235 - LANGUAGE, GENDER AND SEXUALITY
- MUSIC 2038 - MUSIC, CULTURE & TECHNOLOGY
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PS 2312 - COMPARATIVE PARTIES AND ELECTIONS
- SOC 2035 - RACE & ETHNICITY
- SPAN 2410 - DISCOVERY AND CONQUEST
- THEA 2207 - WORLD THEATRE: 1890-Present

Transatlantic Studies Certificate

The Transatlantic Studies Certificate lets students pursue a comparative study of Europe and the United States, as well as countries that touch the Atlantic. Primary areas of study include governance, policy and security issues in the context of the transatlantic relationship, the history of colonialism, humanities and culture, and the comparative study of various professional fields such as business and medicine.
Requirements

- ADMPS 3006 - SOCIAL THEORIES & EDUCATION IN GLOBAL CONTEXT
- ANTH 2516 - CHIEFDOMS
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- EDUC 2100 - EDUCATION AND SOCIETY

Global Studies Program

Contact Information

Graduate Advisor: Elaine Linn
Assistant Director for Global Studies
Global Studies Program
4101 Wesley W. Posvar Hall
412-648-2113
Fax: 412-624-4672
E-mail: global@pitt.edu
www.ucis.pitt.edu/global

The Global Studies Program provides students with a "global competence," the ability to communicate effectively across cultural and linguistic boundaries and to focus on issues that transcend cultures and continents. The global studies graduate certificate is a joint offering of the University Center for International Studies (UCIS) and the Graduate School of Public and International Affairs (GSPIA), and is open to all students enrolled in a graduate program at the University.

The Global Studies Program draws on the strengths of the Area Studies Centers within the University Center for International Studies and the departments and schools at the University of Pittsburgh. The Asian Studies Center, the Center for Latin American Studies, the Center for Russian and East European Studies, and the Center for West European Studies have been designated by the U.S. Department of Education as National Resource Centers. The University Library System possesses extensive holdings of books and journals to support research and study in these world areas.

Admission to Global Studies Program

Applications to the Global Studies Program may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, students cannot be accepted until they have received notification of admission to the University of Pittsburgh.

Students holding a master's degree from an accredited institution may obtain the Graduate Certificate in Global Studies. They may apply directly to the program if they wish to enroll only for the graduate certificate.

Global Studies is an exciting - and evolving - interdisciplinary field. It is concerned with transnational structures, processes, and interactions, and how these affect social, economic, cultural, political, and ecological environments. Scholars of Global Studies understand and analyze how these structures, processes, and interactions both connect people and places and disrupt established norms, communities, institutions, and relationships. That is, they think globally about these processes.

Within the Global Studies Certificate, graduate students from the Dietrich School of Arts and Sciences can tailor a unique plan of interdisciplinary study within their field of interest drawn from more than 200 courses across 6 global concentrations. The certificate allows students to adopt a transnational lens that can inform their research projects, and to conduct research in one of 35 languages offered at Pitt.

Global Concentrations: To complete the certificate, student choose one of five global concentration/themes:

- Cultural Dynamics
- Peace, Conflict, and Security
- Ecology and Sustainability
- Health and Well-Being
- Politics and Economy

In addition to the certificate, the Global Studies Center offer numerous complementary programs and opportunities that support students' intellectual and personal development: research skills, career exploration and career readiness, experiential education and civic engagement, and a critical understanding of current events. The center offers tuition remission for students studying less commonly taught languages and internship positions.

Certificate Requirements

Six Global Thematic Courses (18 credits): After students select a global concentration, they choose from a comprehensive and dynamic list of courses ensuring three disciplines are represented to provide an interdisciplinary perspective on their chosen global concentration.

- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS must be in addition to the credits used to complete the student’s primary degree program. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
  - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
  - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
  - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.
- The 6 credits may be comprised of the following combinations:
  - Two language courses (* see notes below)
  - A language course (* see notes below) and a content course
Two content courses

* Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, at least nine (9) credits of the course work used to complete the certificate requirements must be in addition to the credits used to complete the student's primary degree program. At least 3 of these credits must be in content coursework. All 9 cannot be language course credits.

Language Proficiency: Building on Pitt's vast offering of over 30 languages, a minimum of three years of college-level study (six semesters) in a foreign language is required. Students can fulfill this requirement by passing a proficiency exam at the Intermediate mid proficiency level.

Global Studies Capstone Research Paper: This research paper is the culmination of a student's learning experience related to their global concentration. It demonstrates analytical skills within a transnational context. It must be written as part of a course and graded by a faculty member.

Center for Latin American Studies

Contact Information

University of Pittsburgh
University Center for International Studies
Center for Latin American Studies
Luis G. Van Fossen Bravo, Undergraduate Advisor
4202 Wesley W. Posvar Hall
Pittsburgh, PA 15260
412-648-7393
bravo@pitt.edu
www.ucis.pitt.edu/clas

The Center for Latin American Studies (CLAS), established in 1964, is internationally recognized for excellence in undergraduate, graduate, and professional education. In 1979 the U.S. Department of Education designated CLAS as a comprehensive National Resource Center (NRC) on Latin America-a distinction it has retained continuously to the present.

CLAS' programs cover the entire Latin American and Caribbean region. Two academic programs are especially noteworthy: The Latin American Archaeology Program, housed in the Department of Anthropology, involves research, training, and publications and emphasizes collaboration between North American and Latin American archaeologists. Fellowships and a bilingual publication series (funded by the Howard Heinz Endowment and The Andrew W. Mellon Foundation) further enhance this exceptional program. The Latin American Social and Public Policy Program draws on the impressive array of faculty and student expertise on Latin American policy issues available at the University of Pittsburgh. The program brings together researchers from different fields with the goal of contributing information of relevance to policy decisions facing Latin America. Social and Public Policy Fellowships are annually awarded to scholars interested in studying various dimensions of social policy at the University of Pittsburgh. The Latin American Social and Public Policy Graduate Certificate is available to students in this more specialized program.

Admission to the Center for Latin American Studies

http://www.ucis.pitt.edu/clas/grad_admissions

Applications to the Center for Latin American Studies may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, the center cannot accept students until they have received notification of admission to the University.
Latin American Library Collection

http://www.library.pitt.edu/eduardo-lozano-latin-american-collection

One of the major resources on Latin America available to students at the University of Pittsburgh is the Eduardo Lozano Latin American Library Collection. Its resources include exceptional collections on Bolivia and Cuba as well as extensive holdings on Argentina, Brazil, Ecuador, Guatemala, Mexico, Peru, and Venezuela.

Financial Assistance

Latin American Studies offers a variety of financial assistance to students in its certificate programs. Please visit http://www.ucis.pitt.edu/clas/grad_funding for further details.

Requirements for Certificates

CLAS offers two graduate certificates: the Certificate in Latin American Studies and the Certificate in Latin American Social and Public Policy. Requirements for each are detailed below. GPA requirement is 3.0 for all courses to be counted toward any Latin American Studies Certificate. For a list of approved courses, click here.

- **Graduate students should complete a minimum of 6 unique credits of coursework.** In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS must be in addition to the credits used to complete the student's primary degree program. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
  - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
  - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
  - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for "additional work beyond the graduate degree.
- The 6 credits may be comprised of the following combinations:
  - Two language courses (* see notes below)
  - A language course (* see notes below) and a content course
  - Two content courses
- *Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.
For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, at least nine (9) credits of the course work used to complete the certificate requirements must be in addition to the credits used to complete the student's primary degree program. At least 3 of these credits must be in content coursework. All 9 cannot be language course credits.

Graduate Certificate in Latin American Studies

To fulfill the requirements for this certificate, students must complete six Latin American area studies courses: two courses in the student's major department or school and four courses in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language of the area and to submit a research paper as detailed below.

Graduate Certificate in Latin American Social and Public Policy

To fulfill the requirements for this certificate, students must complete six courses focusing on social and public policy issues of Latin America: three courses should be in the student's major department or school and three courses should be in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language in their area and to present a research paper as detailed below.

Language Proficiency

The certificates in CLAS require three years, or the equivalent, of college-level Spanish, Portuguese, or an Amerindian language of the area. Students must have adequate proficiency to converse and conduct research in Latin America. A standardized examination is given to each candidate by a faculty member of the Department of Hispanic Languages and Literatures.

Interdisciplinary Research Paper

Students in CLAS certificate programs must complete a research paper on Latin America that reflects competence in at least two disciplines. The master's thesis or a revised research paper may be used to fulfill this requirement.

Center for Russian and Eastern European Studies

Contact Information

Graduate Advisor: Andrew Behrendt
Associate Director
Center for Russian and Eastern European Studies
4402 Wesley W. Posvar Hall
Phone: 412-648-7403
aeb72@pitt.edu
www.ucis.pitt.edu/crees

Established in 1965, the Center for Russian and Eastern European Studies (REES) at the University of Pittsburgh is designated by the U.S. Department of Education for Title VI funding as a National Resource Center.

There are three broad focus areas for the research conducted by faculty and graduate student specialists in the REES program. They are (1) contemporary Russian, East European, and Eurasian cultures, (2) politics, economics, and societies of Russia, Eastern Europe, and Eurasia (3) foreign policy issues as they relate to the REES world area.
The Center for Russian and East European Studies offers graduate certificates in East European Studies, Russian Studies, or Soviet Studies to students who successfully combine second language expertise and multidisciplinary area-focused courses.

**Admission Information**

Application for admission to graduate study is made directly to the academic department or graduate/professional school of the student's choice. The applicant should include a statement requesting admission to the REES certificate program.

To enroll in one of the certificate programs, admitted students should make an appointment with the REES graduate advisor as soon as possible after their arrival at the University.

**Financial Assistance**

The Center for Russian and East European Studies offers several means of financial assistance to students in its certificate program. Please visit http://www.ucis.pitt.edu/main/scholarships for further details.

**Certificate**

**Russian, East European, and Eurasian Studies Certificate**

**Contact Information**
Center for Russian, Eastern European, and Eurasian Studies  
4415 Wesley W. Posvar Hall  
Phone: 412-648-7403  
reesadv@pitt.edu  
www.ucis.pitt.edu/crees

**Overview**

REEES is one of a select few National Resource Centers for Russian, East European, and Eurasian Studies funded by the US Department of Education. REEES has 72 affiliated faculty members and has programs with 14 Arts and Sciences departments and five professional schools. Our many areas of focus include subjects such as the transformations of post-communist societies, history, foreign policy and international relations, anthropology, music, film, and contemporary culture and literatures. Recognizing that regional boundaries are constantly contested and redefined, our geographic scope includes Russia, Ukraine, Belarus, the Baltic states, Central Asia and the Caucasus, the Western Balkans, Poland, Hungary, Slovakia, Czech Republic, Romania, Bulgaria, Moldova, Mongolia, and Turkey. REEES currently offers Certificates in Advanced East European Studies, Russian Studies, or Soviet Studies, which may be earned in conjunction with most masters and doctoral programs in the School of Arts and Sciences and a number of professional schools.

**Requirements for REEES Certificates**

The requirements for each of the REEES graduate certificates are as follows:

- Completion of **six approved Russian, East European, and Eurasian area studies courses**, including four courses from at least two departments other than the student's home department, for a total of 18 credits.
- Graduate students should complete a minimum of 6 unique credits of coursework. In other words, at least 6 credits of the course work used to complete the requirements of any graduate level certificate in UCIS must be in addition to the credits used to complete the student's primary degree program. In consultation with the academic advisor, students may fulfill these standards through one of the following options:
  - Students may contextualize non-credit bearing internships that are required in various graduate degree programs as credit bearing experiences for UCIS certificate programs. Prior approval must be received from the academic advisor to pursue this option.
  - Students who can add content courses without affecting their tuition bill will be encouraged to do so.
  - Students who are exempt from the language requirement because of previous coursework or heritage language skills may use language course credits towards the requirement for additional work beyond the graduate degree.
• The 6 credits may be comprised of the following combinations:
  • Two language courses (* see notes below)
  • A language course (* see notes below) and a content course
  • Two content courses
  * Language courses may be used in the following circumstances:

For certificate programs that require three years of language proficiency, students may count language courses in the third year (i.e. grammar, conversation, courses taught in target language) that are above the intermediate level.

For students in any certificate program who are exempt from the language requirement due to previous coursework or as a heritage speaker, the introductory courses in a second language (either LCTLs, or a commonly taught language with a clear and stated relevance to their research or professional goals) will count.

For students completing two graduate level UCIS certificates, at least nine (9) credits of the course work used to complete the certificate requirements must be in addition to the credits used to complete the student's primary degree program. At least 3 of these credits must be in content coursework. All 9 cannot be language course credits.

• Demonstration of language proficiency equivalent to three years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish).
• Completion of a research paper of at least 15 pages in length, based substantially on primary sources in one or more languages of the REEES world area.
• Students must maintain a minimum GPA of 3.0 in REEES-related coursework.

Special Academic Opportunities

Special academic opportunities provide students with ways to augment their education and experience with expanded study programs both on and off campus, in both university and professional settings.

Area of Concentration (subplans) and Minors (plans)

Some graduate programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. A graduate minor offered by the faculty at the Pittsburgh campus is available to any graduate student enrolled in an academic degree program on the campus provided that the school from which the student is graduating recognizes this minor. See the Schools, Departments, and Programs section of this bulletin for available areas of concentration and minors.

Certificate Programs

Students may enrich their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed at the start of the Schools, Departments, and Programs section of this bulletin.

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. Most certificate programs require a minimum of 15 credits, of which 12 credits must be earned at the University of Pittsburgh. The certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

A student must be formally admitted into a certificate program. The requirements for each certificate vary and students should contact the certificate program director.

Cross-Registration

Carnegie Mellon University, Duquesne University, the Pittsburgh Theological Seminary, Robert Morris University, and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the five institutions in the fall and spring terms. See Cross-Registration in the Registration section of this bulletin for further details.
Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These programs may result in a student earning two separate master's degrees, a master's and a first-professional degree, or a master's or first-professional degree and a doctoral degree, but never result in a student earning two separate doctoral degrees. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the joint- or dual-degree program approved by the University.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must graduate from both degree programs at the same time. Students are advised to see the individual school for other specific requirements that apply.
Course Information

Please note, when searching courses by Catalog Number, an asterisk (*) can be used to return mass results. For instance a Catalog Number search of ’2*’ can be entered, returning all 2000-level courses.

Admin and Policy Studies

ADMPS 2004 - THEORIES OF EDUCATIONAL INEQUALITY

Minimum Credits: 3  
Maximum Credits: 3  
This course is the first of a required two-course sequence designed for students to explore the meaning and expectations of doctoral study in the department of administrative and policy studies. The doctoral core is planned with a curriculum for radical transition to doctoral studies as students increasingly are called upon to take responsibility for their doctoral experience. Students have the opportunity to organize their own learning proclivities by managing resources such as study group and faculty-led deliberations, readings, computer-based technologies, individual research, and field activities. Students cultivate their identities as practitioner/scholar/citizens.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 2050 - RACE AND RACISM IN EDUCATION AND SOCIETY

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on issues of equity in education based upon the divisions of American society by social constructs of "race". The course is designed to expose students to conceptual frameworks of culture, society, race, class and gender from the social sciences and humanities for understanding the experiences of subordinated minority groups in school and society. The practical problems of social and school reform in American communities and schools will be addressed.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Attributes: African Studies

ADMPS 2052 - M. ED INTERNSHIP IN HIGHER EDUCATION

Minimum Credits: 3  
Maximum Credits: 3  
This course is a practicum experience for med in the higher education management. The internship course is unique in that students are required to be working in an institution of higher education while enrolled. An on-site supervisor will provide learning opportunities to students in conjunction with the course instructor, while the instructor will enhance the experience through weekly activities and course assignments. The course is also an opportunity to combine research and practice and to develop the professional skills necessary for a fruitful career in academic or student affairs or management in higher education.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Admin and Policy Studies

ADMPS 2053 - MANAGEMENT & ORGANIZATION EFFECTIVENESS

Minimum Credits: 3  
Maximum Credits: 3  
This is one of a two course series (ADMPS 2053 & 2054) for M.Ed. students in the higher education management specialization. The Organization and Management effectiveness course provides students a professional foundation of the practical application of managerial skills required of first and second-line supervisors in higher education. Course topics devote special attention to: the mission and challenges of HE organizations,
organization structures and environments, responsibilities and expectations of managers, financial management, budget development and oversight, time and resource management, process improvement, the role of technology in complex organizations, decision making and communicating. In addition, the course will explore the role of supervisors in budget creation and resource management within a broader functional and institutional context.

**ADMPS 2054 - ORGANIZATION DEVELOPMENT & LEADING CHANGE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This is one of a two course series (ADMPS 2053 & 2054) for M.Ed. students in the higher education management specialization. The Organization development and Leading Change course explores the practical challenges of strategic planning and the role managers play in its implementation. In addition, the course builds students essential managerial skills in: people and process oversight, understanding and leading transformational change, building competencies through creating measurable performance objectives, developing staff accountability, human resource management and the role of technology as an agent of change.

**ADMPS 2055 - STUDENT DEVELOPMENT THEORY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course provides foundational knowledge about the nature and history of student development theory, focusing on both a solid overview of theory and the application of theory in the design of effective practice in academic and student services contexts. This course also explores developmental issues facing college students as well as factors that promote and impede development. An understanding of student development theory is integral to working in higher education and this course is designed for students pursuing both scholarly and practitioner focused careers.

**ADMPS 2056 - STUDENT SERVICES PROGRAM ASSESSMENT**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course introduces the subject of assessment and program evaluation in colleges and universities. Issues related to assessment theory, assessment and evaluation models and methodologies, as well as the political and social contexts of assessment are explored. Students complete a hands-on assessment project from start to finish as a part of the course. Students need to have completed student development theory or an equivalent course prior to enrolling in this course.

**ADMPS 2059 - ADVISING AND SUPPORTING SKILLS FOR HIGHER EDUCATION PROFESSIONALS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course offers an overview of the skills, strategies, and functions associated with advising and supporting college students. This foundational course regards advising and supporting skills as cultivated across functional areas and considers techniques and strategies applicable to a range of student services units, such as academic advising, career counseling, study abroad advising, student conduct facilitation, and student organization group advising. Additionally, students engage with recent developments associated with advising and supporting students through the evolving technological, legal, and ethical landscapes of higher education.
Course Component: Lecture  
Grade Component: Grad Letter Grade

ADMPS 2086 - CURRICULUM IN SCHOOLS

Minimum Credits: 5  
Maximum Credits: 5  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ADMPS 2089 - SPECIAL TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This course is for administrative and policy studies newly instituted and experimental courses.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 2090 - RESEARCH SEMINAR

Minimum Credits: 3  
Maximum Credits: 3  
Final seminar for candidates for the master of education degree in which each student prepares an original research paper.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

ADMPS 2093 - SUPERVISOR CURRICULUM AND INSTRUCTION INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
The practicum reviews the field based clinical experience of curriculum and instruction students for state certification.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SU3 Basis

ADMPS 2097 - INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 12  
Each candidate for an educational leadership certification in pa is linked with schools/ for 360 hours of university supervised and principal-mentored internship/fieldwork experiences over the 12-month lifecycle of the school. Mentors are from various geographical locations at all levels; elementary, middle, and secondary. Candidates register for one credit of internship for each of the four consecutive terms of the k-12 principal program.  
Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad SN Basis

ADMPS 2098 - DIRECTED STUDY

Minimum Credits: 1  
Maximum Credits: 6  
Study approved and directed by an academic advisor.  
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ADMPS 2099 - GUIDANCE IN THE MASTER'S DEGREE

Minimum Credits: 1
Maximum Credits: 6
A registration unit for students preparing a master's overview and thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ADMPS 2101 - PENNSYLVANIA SCHOOL LAW

Minimum Credits: 3
Maximum Credits: 3
The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2104 - LATIN AMERICA SOCIAL & PUBLIC POLICY

Minimum Credits: 3
Maximum Credits: 3
This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, gonadal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2106 - INTERNATIONAL AND GLOBAL EDUCATION

Minimum Credits: 3
Maximum Credits: 3
The course introduces different perspectives of the world as well as various conceptions of global development. Students consider these issues in examining how formal and non-formal education programs, as well as the media, contribute to developing individual's views of and engagement in local, national, international, and global communities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: African Studies, Global Studies, Russian & East European Studies

ADMPS 2115 - SUPERVISION AND TEACHER LEARNING
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on skills and strategies school leaders need to know to supervise teachers and develop structures for on-going teacher learning and development. Students study the history of supervision and how it continues to evolve. They analyze their own district's induction and professional development plans and design supervision models appropriate for a differentiated teaching staff.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ADMPS 2117 - DIFFERENTIATED INSTRUCTIONAL PRACTICES

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to give practitioners a strong theoretical background in differentiated modes of instruction and the skills needed to work with teachers as they strive to improve and expand their pedagogy. Discussions and readings will explore classroom strategies that improve student achievement, the elements of effective instruction, instructional design related to state standards, and ways to use assessment to drive instruction. Finally, the course will discuss ways that school leaders can work with teachers to enhance their instruction and student learning.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ADMPS 2120 - CAPSTONE SEMINAR IN STUDENT SERVICES

Minimum Credits: 3  
Maximum Credits: 3  
Students will learn about the knowledge & skills required of a college or University student services administrator. It is assumed students will have administrative responsibility in future aspect of student services. Responsibilities may include development of vision & mission statement, designing organizational structure & budget. Focus on strategies to effectively manage & administer student services of diverse college & University campuses. Explore how organizational theory can be applied to improve policy making, personnel mgt, resource allocation & organization of administrative units.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 2123 - SUMMER LEADERSHIP INSTITUTE

Minimum Credits: 3  
Maximum Credits: 3  
Students learn to diagnose adaptive leadership challenges while developing a foundation of individual and group communication skills and a disciplined practice of reflection. The leadership institute will offer a coherent experience of teaching and learning about and for leadership supported by an approach to adult development as meaning/making (Kegan, 1994). The institute develops skills in: team building, problem framing analysis, group process skills, interpersonal skills, communication skills, writing (annotated bibliography, art of critique), shared decision-making, multicultural education/diversity (awareness of diversity, classroom interactions, and diversity in schools), school culture, and reflective practice.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

ADMPS 2128 - LEADERSHIP

Minimum Credits: 3  
Maximum Credits: 3  
This course examines theories about leadership and provide students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior: and plan for their own leadership development.  
Academic Career: Graduate
ADMPS 2131 - HIGHER EDUCATION ADMINISTRATION

Minimum Credits: 3
Maximum Credits: 3
This course addresses major organizational theories and how they relate to higher education institutions. Students will develop conceptual frameworks that can be utilized as a generic base for the practice of administration and as a diagnostic tool that will assist in identifying organizational problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

ADMPS 2133 - GENDER AND EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This seminar examines the role that gender plays in the lives as students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in k-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment, gender and the educational professions; feminist and anti-bias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: African Studies

ADMPS 2140 - HIGHER EDUCATION CAPSTONE SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This course serves as the culminating experience for Higher Education M.Ed. students. As the capstone for the program, this course provides students with the opportunity to consider and apply theoretical and conceptual knowledge from this course as well as all Higher Education courses to practical situations. Through course content, classroom discussions, and the capstone project, students advance their development of essential higher education competencies gained throughout the M.Ed. curriculum.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2181 - DECONSTRUCTING THE UNIVERSITY

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2305 - SOCIOLOGY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.
Academic Career: Graduate
ADMP 2306 - HISTORY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Both a chronological order and a thematic/conceptual investigation will constitute the structure of this course. The literature on past and contemporary historical developments will be compared. Emphasis will be placed on the ideas that prevailed in different time periods. Students will examine the conflicting organizational arrangements, competing theories, and growing external pressures on education.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course surveys the perennial forces which have shaped the character of America's colleges and universities. In situational control and governance. Curricular goals and organization, and faculty and student life are examined against the background of political, economic, religious, social and intellectual developments in American culture.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMP 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Examines how philosophies of education can contribute to one's vision of educative experience. Central educational concepts (e.g., Knowing, learning, thinking, valuing, and being) are analyzed in alternative ways.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMP 2342 - EDUCATION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
The active experiences in the course are intended to challenge students to investigate and analyze the dynamic relationship between schooling, education, popular culture and society by addressing the normalizing effects of cultural narratives and images that influence our taken-for-granted assumptions, beliefs and actions. Class activities involve considering the moral, social and political dimensions of our educational practice by expanding our sense of what happens outside of schools and classrooms that contribute to shaping our worldviews. We work to better understand the dynamics of culture and the relationships among culture, history, power, language and knowledge. Thus we are challenged to become informed and invigorated professionals that can help reverse the patterns of dehumanization and social control that are often overlooked in the everyday world of practice.

Academic Career: Graduate
Course Component: Lecture

Course Attributes: African Studies, Asian Studies, Global Studies

ADMP 2343 - EDUCATION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
ADMPS 2352 - ANTHROPOLOGY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This introductory course provides an overview of anthropological approaches to the study of education. Ethnographic cases drawn from many cultures, knowledge systems, and time periods help to provide a broad, holistic view of education in diverse community and institutional contexts. Modules may include: nurturing a sense of place; comparing folk, popular, and elite cultures; understanding cultural continuity and change; celebrating rituals and holidays; fostering cultural resilience and responsive reform policies; framing multicultural education; and appreciating the sociolinguistics of schools and home. Students have opportunities to participate in authentic schooling activities, to draft public advocacy pieces, to create team presentations, and to refine a personalized synthesis of a topic of interest. Anthropological field research methods are discussed as a means to craft compelling analytical accounts, but research training is not part of this course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: African Studies, Asian Studies, Global Studies, West European Studies

ADMPS 2353 - APPLIED ANTHROPOLOGY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This advanced seminar explores practical applications of anthropology to educational programs in varied cultural settings around the world. Topics may include: theories of development and social change, the role of schooling in cultural continuity and change, globalization and transnational influences on curriculum and policy; public advocacy and scholarship; school reform and social inequities. Authentic professional activities and meaningful case studies help students to see themselves in the field. Demonstrations of professional skills such as constructive criticism, teamwork, meeting methodological challenges, and critical analysis of texts help students to enhance their academic cv and engaged scholarship portfolio.

Academic Career: Graduate

ADMPS 2355 - ADVANCED QUALITATIVE RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2356 - FIELD METHODS

Minimum Credits: 3
Maximum Credits: 3
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ADMPS 2359 - GENDER IN EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This seminar examines and critiques the international division of labor, focusing on the roles and status of women in western as well as non-western and "less-developed" societies. Participants will examine the intersection of gender, development, and education. Education is discussed in its broadest sense, as socialization, knowledge transmission, and institutionalized training.

**ADMPS 2398 - ECONOMICS OF EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
This class introduces students to the economic analysis of education in the U.S. And developing countries. Among the topics to be covered are: human capital theory, educational production functions. Rate of return analysis, various issues in educational policy and finance.

**ADMPS 2399 - POLITICAL ECONOMY OF EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
In this class students will continue (from "economics of education") to develop techniques for economic analysis. The subject is placed in a broader intellectual and political context. Particular attention is given to critique of neoclassical economic analysis, to alternative frameworks for economic analysis, including class-conflict and institutional approaches and the applications of economic analysis in the educational policy process. The course covers issues in industrialized and developing countries.

**ADMPS 2402 - HEALTH, MENTAL HEALTH AND SAFETY**

Minimum Credits: 2  
Maximum Credits: 2  
Within the leader as learner block in leadership initiative for transforming schools (lifts), a k-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.

**ADMPS 2403 - TEACHER SUPERVISION AND EFFECTIVENESS**

Minimum Credits: 2  
Maximum Credits: 2  
The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

**ADMPS 2404 - INSTRUCTIONAL LEADERSHIP**
ADMPS 2405 - PUBLIC LEADERSHIP: SCHOOL LAW

Minimum Credits: 1
Maximum Credits: 1
The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.

Academic Career: Graduate
Course Component: Lecture

ADMPS 2406 - PUBLIC LEADERSHIP: ASSESSMENT AND ACCOUNTABILITY

Minimum Credits: 2
Maximum Credits: 2

ADMPS 2407 - POLITICS OF EDUCATION: SCHOOL COMMUNITY PARTNERSHIP

Minimum Credits: 1
Maximum Credits: 1
A major premise of this course is that to serve as a community leader, one must have a clear vision and a strong organizational style that mirrors a community's social, political, economic and organizational profile. A second premise is that to be truly effective within a community, a community leader must epitomize Aristotle's belief that we have the responsibility to be 'political animals'.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2408 - POSITIVE BEHAVIOR SUPPORT

Minimum Credits: 1
Maximum Credits: 1

ADMPS 2410 - INSTITUTIONAL LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

Grade Component: Grad Letter Grade

ADMPS 3001 - RESEARCH METHODS IN EDUCATION POLICY AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
The disciplinary and methodological bases for knowledge and associated inquiry in educational administration and policy study are addressed. Examples of research from various paradigms, disciplines, and professional fields are used to show the relationship among theory, method, and knowledge. The relative importance of substantive and methodological concerns in doing research are emphasized. Positivistic, interpretive, and critical theory inquiry can be addressed by students in their required pilot study.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3003 - THEORIES OF EDUCATIONAL INEQUALITY

Minimum Credits: 3
Maximum Credits: 3
This course is the first of a required two-course sequence designed for students to explore the meaning and expectations of doctoral study in the department of administrative and policy studies. The doctoral core is planned with a curriculum for radical transition to doctoral studies as students increasingly are called upon to take responsibility for their doctoral experience. Students have the opportunity to organize their own learning proclivities by managing resources such as study group and faculty-led deliberations, readings, computer-based technologies, individual research, and field activities. Students cultivate their identities as practitioner/scholar/citizens.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3006 - SOCIAL THEORIES & EDUCATION IN GLOBAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3
Ultimately, this course is about the student, and the student situating herself in an increasingly global context, driven by technology and globalization. As a consequence, the course is designed to guide the student in exploring a range of social theories that may be helpful in informing how the student understands and operates in educational institutions in local, national, and global economic, political and cultural contexts. By examining and comparing a variety of theories and contexts, the student will be encouraged to develop/define her own theories of a) how and why society and education are organized as they are; b) how and why education and/or society have or have not changed; and c) how and why education and/or society should be changed. What do you believe in passionately? How can social theories help strengthen and challenge your views? How can they help you gain a deeper and richer understanding of society's past, present and future? Far from being dry, academic reading, they drive policy - politics, business, and many other aspects of the student's everyday life. What kind of leadership role does the student want to create for herself in your career? What is the student willing to advocate for? How can this course help? Many students have very jumbled thinking about the things they feel most strongly about. They know what is right for them, but often can't explain how very clearly. This makes it difficult to convince anyone besides those who already agree with the student. This will limit the student's political success, as contested issues need complicated, but clear thinking. How can the various social theories help guide the student's thinking and understanding of the issues from multiple perspectives? One of SCAE's international strengths is learning how to manage multiple perspectives, a critical skill in a globalizing world. How do people construct the world so that it makes sense to them? How do we negotiate the contested meanings that arise? Finally, how does the next generation learn about its cultural endowments?
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
ADMPS 3007 - EDUCATION AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course will explore a wide range of contemporary social issues and trends in educational development from historical as well comparative perspective. We will read and analyze educational problems and seek to design policy that can have impact in solving the problems. A central focus of this course is social analysis emphasizing educational issues in schools and colleges not only in the United States, but in other global contexts as well. We will critically explore key themes, definitions and approaches to education in individuals' lives across the lifespan, and examine how education helps shape social life in urban/rural areas and other settings from a comparative perspective. We will interrogate theoretical approaches used to understand the problems and current debates in the field of education by all stakeholders including institutions involved with educational development in diverse global settings, such as the United Nations and the World Bank.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3008 - COMMUNITY ENGAGEMENT IN EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course explores a range of contemporary issues and trends in community engagement in education. It addresses educational issues in schools and colleges, not only in the United States but in global contexts as well. It explores critically key themes, definitions and approaches to community engagement in education in individuals' lives across the lifespan, and examines how education helps shape social life in urban/rural areas and other settings. It interrogates policy documents used to understand the problems and current debates related to community engagement in education by individual stakeholders and policymakers as well institutions involved with educational development in diverse local, national and global settings, including the UNESCO "Incheon Declaration." This course is designed to provide students with the grounding they need to perform confidently and competently in areas of their professional practice. It is an opportunity for the critical study of community engagement in education that is relevant to students' professional goals. The course provides tools to explore and assess the theories, ideologies and issues of education from multiple perspectives as well as to situate students' thinking about the issues in searching for policy and practice interventions. Students will frame the discussions within the contextual and practical realities of life in schools and other educational institutions through a range of conceptual lenses, exploring the debates over the meaning and nature of social justice in education, debates that intersect with questions about the person, society, education and knowledge as they strive to understand the complex issues in the field of education. Goals and objectives are aligned with SCAE program commitments to developing in students: deep specialized knowledge; intellectual/practical skills in innovation; taking personal/social responsibility for change; applying/integrating knowledge/understanding to problems of practice; understanding/embracing a commitment to equity; active, intentional, and ongoing engagement with diversity.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3012 - QUALATATIVE DATA MANAGEMENT ANALSYS AND PRESENTATION

Minimum Credits: 3
Maximum Credits: 3
This course introduces software and technological tools to organize, conceptualize, systematically analyze, and effectively present qualitative data of diverse kinds in varied media. Students work in teams with real data in this project-based lab course. Technological skills are paired with conceptual discussions of such key operations as coding, thematic analysis, reflexive and analytical notes, framing questions, and assessing significance. Critiques of core readings, demonstrations, and iterative formal presentations provide opportunities to model professional skills.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3014 - DOCTORAL SEMINAR IN EDUCATION AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course is designed for those seeking to enhance their professional careers with scholarship. The EDD degree offers an intensive cohort experience and preparation for rigorous, applied research based on a broad, but in-depth acquaintance with the contexts within which phenomena,
issues, policies and practices have emerged in the past and continue to evolve in our times. First, students will have the opportunity to develop an enhanced scholarly knowledge base encompassing the various facets of education/society relations by exploring the social, political, economic and cultural contexts within which education/educating take place and within which government agencies, educational institutions, policy-makers, educators and other stakeholders are situated or situate themselves when considering, fashioning, implementing, or reacting/responding to educational phenomena and policies/practices/reforms. Second, preparation for rigorous applied research should follow from understanding the rationales for and challenges of undertaking any of a number of possible research approaches to studying specific phenomena or problems of policy/practice and considering the complications imposed by these contexts in terms of what must be taken into consideration when applying research methods to human conditions and environments.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ADMPS 3015 - ETHICAL ISSUES IN HIGHER EDUCATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The ethical issues that present themselves in the educational setting are examined. Students are expected to recognize and evaluate these ethical issues in terms of their own value system as well as that of others. Each student is expected to prepare a case study that questions the ethical issues involved.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### ADMPS 3016 - INTRODUCTION TO QUALITATIVE RESEARCH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course introduces students to distinct discourse communities that have coalesced around different inquiry traditions (e.g., Empirical, interpretive, critical) and modes of research (e.g., Narrative, ethnographic, historical, rhetorical, and linguistic). Emphasis given to interpretive tradition, in which techniques of data collection and data analysis strategies are secondary to the ways in which researchers make meaning of their data.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### ADMPS 3087 - SPECIAL TOPICS 2

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students in this one credit course will have the opportunity to concentrate their efforts on writing for publication. We will attend to editing and revising drafts that members are working on (such as manuscripts for journal articles, conference proposals, CVS, dissertation proposals, etc.). As well as essentials of publishing, topics may include: identifying voice and stance; framing propositions and arguments; portraying evidence; reviewing relevant discourses, and other syntax at hand. Class organization is intended to encourage self-reflection, analysis, and revision as a result of instructor and peer-review, and whole group discussion.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis

### ADMPS 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Knowledge management considers knowledge as a strategic asset within emerging contexts. Using technologies and systems, KM deals with the policies, tools and practices that an organization uses to classify, produce, implement, and safeguard information. Contemporary school districts and non-profit organizations are increasingly dedicating resources to knowledge management in their educational, business, technology, and human resource operations. Knowledge management focuses on organizational goals such as improved student performance, data management, organizational development and innovation.
Academic Career: Graduate
Course Component: Lecture

ADMPS 3089 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
A course listing for newly instituted and experimental courses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3090 - DISSERTATION RESEARCH SEMINAR

Minimum Credits: 3
Maximum Credits: 3
A seminar for doctoral students developing research prior to the preparation of a dissertation overview.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ADMPS 3092 - HIGHER EDUCATION INTERNSHIP

Minimum Credits: 1
Maximum Credits: 6
An internship in administration in higher education.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Admin and Policy Studies

ADMPS 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION

Minimum Credits: 1
Maximum Credits: 3
Provides an opportunity for the student to gain practical experience and demonstrate the knowledge, skills, and competencies obtained during the process of the training program in educational administration. It also furnishes the context of reality within which the student may acquire additional knowledge skills, and competencies as theory translated in the working world of the school system.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

ADMPS 3097 - SUPERVISED RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Doctoral study initiated by the student with advisor's approval and related to the student's program of study.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

ADMPS 3098 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
Doctoral study approved and directed by an academic advisor.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ADMPS 3099 - GUIDANCE IN THE DOCTORAL DEGREE

Minimum Credits: 1
Maximum Credits: 18
A registration unit for students preparing a doctoral dissertation or dissertation overview.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ADMPS 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Minimum Credits: 3
Maximum Credits: 3
This is a required course for all students in administrative studies which reviews and analyzes major issues and the means for managing institutional resources in education. Emphasis is placed on fiscal, human, and physical resources in both basic and higher education.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3104 - HIGHER EDUCATION INSTITUTIONAL STRATEGIC PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course will provide a framework for the development of an integrated institutional strategic plan. It will examine the emergence of higher education planning, the development of preplanning activities, situational analysis, and the establishment of a planning process for the preparation of institutional and department plans.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES

Minimum Credits: 3
Maximum Credits: 3
Schools have a responsibility for students' health and safety while they are at school. Students who successfully complete this course will demonstrate their knowledge of research-based approaches to apply in accordance with Pennsylvania law in the areas of health, mental health, safety, and crisis management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Minimum Credits: 3
Maximum Credits: 3
This course presents a review of organization theories as they apply to schools and universities. Topics include organizational typologies, competing models of organizational structure, organization-environment linkages, and the evaluation of organizational effectiveness.
Academic Career: Graduate
ADMPS 3127 - CURRICULUM: PERSPECTIVES AND ISSUES (K-12)

Minimum Credits: 3  
Maximum Credits: 3  
The course draws on current content in the field of curriculum studies. Contemporary approaches to development and research draw on increasingly diverse disciplinary perspectives and diverse methods of inquiry. Curriculum perspectives and issues are central to the often contentious educational discourses in the public arena as well as in the academy as curriculum decisions are being made related to policy, practice and research, informed points of view are crucial to those engaged in such work. This course is intended to capture some of the contentious local, national and international discourses for which the curriculum field is known and, in particular, how these discourses influence curriculum policy and practice toward intended and unintended consequences.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis

ADMPS 3128 - HIGHER EDUCATION BUDGET MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the sources of revenues available to colleges and universities and various methods for allocating these funds to academic and administrative functions. Specific attention will be given to topics of fund accounting, sources of revenue, the budget process, fiscal controls and monitoring.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 3129 - HIGHER EDUCATION HUMAN RESOURCE MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the development of human resource systems that facilitate the conduct of activities in colleges and universities through the effective and efficient utilization of faculty and staff. It will include such topics as human resource strategic planning, position control and monitoring systems, recruitment and selection procedures, evaluation procedures, development and training, incentive systems, salary administration, and fringe benefits administration. Various human resource policies and practices will be explored.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 3130 - HIGHER EDUCATION PROGRAM MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course is concerned with faculty and staff within an academic institution. It focuses on how faculty should be managed in order to achieve optimal organization performance. Specific topics addressed include: organizational theory, institutional goals, faculty and staff responsibilities and workload, research curriculum and academic organization. Special attention is also given to faculty and administrative evaluation and development. Group discussion and case studies are the principal instructional formats utilized.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

ADMPS 3131 - STUDENT, CAMPUS, AND SOCIETY

Minimum Credits: 3  
Maximum Credits: 3
A seminar focusing on current research dealing with the impact of campus environments, experiences on and off campus, and family background on achievement, values, personal development, and life goals of students in higher education.

**ADMPS 3134 - CONTEMPORARY LATINX ISSUES IN US HIGHER EDUCATION**

- Minimum Credits: 3
- Maximum Credits: 3
- This course focuses on current issues for Latinx people within a higher education context. This includes a look at the overall ecology into and through higher education, from the K-12 setting into the postsecondary context. The course is taught through the perspective of leading Latinx scholars, theorists, and practitioners who are developing cutting edge solutions for best serving the fastest growing demographic in the United States. The course includes a look at the experiences of students, faculty, and staff within postsecondary contexts as well as a focus on understanding the colleges and universities enrolling a large percentage of the Latinx population, including community colleges and Hispanic-Serving Institutions.

**ADMPS 3135 - SEMINAR IN COLLEGE TEACHING**

- Minimum Credits: 3
- Maximum Credits: 3
- The course is intended to provide a practicum-like experience for graduate students in the professions and disciplines who are teaching or expect to teach in higher education. Challenging topics include: analyzing and critiquing current syllabuses of class members; structuring the curriculum; teaching for understanding; process and content; teaching and learning in groups; becoming a dialogic classroom; encountering and responding to contentious discussion; and evaluating learning. Although topics will be considered conceptually through readings, the primary curriculum will develop as members of the class present specific issues from their emergent work. Participants will have the opportunity to explore their beliefs in teaching and learning as they consider a web between themselves, their subject and their students, in order to help their students learn how to weave a world for themselves.

**ADMPS 3136 - COMPARATIVE HIGHER EDUCATION**

- Minimum Credits: 3
- Maximum Credits: 3
- This seminar focuses on contemporary problems in post-secondary education throughout the world. The seminar will begin with a brief historical introduction, followed by a review of case studies and other documents on higher education in the United States and other countries. Special attention will be given to an examination of comparative and contrasting policies and issues in higher education as they unfold in various developing regions and in the United States.

**ADMPS 3137 - CULTURE, INNOVATION & ORGANIZATION PERFORMANCE**

- Minimum Credits: 3
- Maximum Credits: 3
- Whether leading a department of 50 people or a division of 500, leaders need to understand the concepts, skills and practices that build strong organizational cultures. This course explores the cultural facets of organizational life in universities with special emphasis on improvement opportunities such as values clarification, cultural norms, innovation, process and people integration, key performance indicators, the balanced scorecard and the alignment of human resources systems such as hiring, faculty and staff development, performance management and career development. Students are introduced to a variety of methods used to encourage creative problem solving in teams; diffusion of innovation is
explored in depth. Students work in teams with an actual University client to implement a benchmarking project, an important tool in improving organizational performance.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMP 3139 - LEGAL ASPECTS OF HIGHER EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
The focus of the course is on federal and state law and higher education in the United States. Although time will be devoted to historical issues pertaining to higher education, most of the time will be devoted to in-depth discussions of contemporary issues. Issues that will be discussed include promotion and tenure, academic freedom, faculty dismissal, sexual harassment, research integrity, campus violence, and student affairs.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMP 3141 - POLICY STUDIES IN HIGHER EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
After broad consideration of key policy issues in higher education--finance, quality, and access--this course considers organization theories in relation to theories of governance, decision-making processes in various institutions, and policy outcomes of these processes are also considered. American higher education is the major focus, international policy perspectives are included, as well.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMP 3151 - THEORETICAL FRAMEWORKS FOR THE STUDY OF HIGHER EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides doctoral and advanced master's students with a general understanding of theory and its application to the study of higher education. This includes an overview of major paradigms, schools of thought, and theoretical frameworks commonly used in the study of higher education. Through an examination of both conceptual and empirical work, students gain an understanding of important theoretical bodies of knowledge and how to apply them to their scholarship and practice. The course has an interdisciplinary orientation, drawing on sociology, psychology, anthropology, gender studies, cultural studies, and race studies.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**ADMP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION**

Minimum Credits: 3  
Maximum Credits: 3  
Provides a general overview of evaluation, which is defined as "providing information useful to decision-making". The various purposes of evaluation are identified, and the use of different types of information for each purpose are discussed. The variables that affect the usefulness of information are emphasized. Both evaluation theory and practical experience are utilized to prepare people who will be fulfilling an evaluation function, or using evaluation results for professional decision making.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMP 3207 - SECTOR ANALYSIS AND PROJECT DESIGN**
Minimum Credits: 3
Maximum Credits: 3
This is a reading and discussion seminar in which participants examine selected analytical and technical approaches used by multilateral and bilateral agencies in the design of appropriate policy meant to intervene in school systems around the world. The class will survey a number of examples of sector studies, projects, and project evaluations. Visiting lecturers will contribute experiences from their own international work in this area.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: African Studies, Global Studies

ADMPS 3208 - CASE STUDY METHODS IN EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the use of case study research methods in investigations of educational policy and practice. The limitations and possibilities of different approaches are considered. Knowledge and skills are acquired through field-based projects.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 3209 - HIGHER EDUCATION INSTITUTIONAL ASSESSMENT & ACCREDITATION

Minimum Credits: 3
Maximum Credits: 3
Course addresses processes and criteria used for evaluation and accreditation of post-secondary and higher education in situations and programs. How to identify, obtain, and use meaningful information for organizational decision-making, such as institutional assessment, program evaluation, and benchmarking are investigated.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3301 - SOCIAL THEORIES AND EDUCATION GLOBAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3
Students will explore a range of social theories that may be helpful in informing how they understand and operate in educational institutions in local, national, and global economic, political, and cultural contexts. By examining and comparing a variety of theories and contexts, students will be encouraged to develop/refine their own theories of a) how and why society and education are organized as they are; b) how and why education and/or society have or have not changed; and c) how and why education and/or society should be changed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Attributes: African Studies

ADMPS 3311 - WAYS OF KNOWING

Minimum Credits: 3
Maximum Credits: 3
In making a distinction between ways of knowing and procedures for knowledge generating, students in this seminar will examine various epistemological, ontological and axiological schools of thought that are the basis for educational inquiry. The focus will include assumptions that form the logics of justification for truth claims embedded in educational research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 3314 - EDUCATIONAL REFORM
This course examines the recurrent phenomenon of educational reform in a variety of settings and from a variety of social scientific perspectives. Focus is placed on the analysis of competing explanations of educational reform and the investigation of case studies from a variety of countries and time periods. Emphasis is given to examining whether reform campaigns are structurally similar and whether a general theory of educational reform is possible.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**ADMPS 3343 - COMPARATIVE EDUCATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This seminar introduces participants to the complementary fields of comparative, international, and development education (CIDE). Emphasis is on social justice issues in CIDE and the comparative analysis of policies and practices that constitute the organization, content, processes of education systems and institutions. Selected topics of continuing interest to educational researchers, policy makers, and practitioners are examined in relation to national and global cultural, economic, and political dynamics. Historical and contemporary examples are used to highlight the contributions of and challenges for those involved in CIDE.

  **Academic Career:** Graduate  
  **Course Component:** Seminar  
  **Grade Component:** Grad Letter Grade  
  **Course Attributes:** African Studies, Global Studies

**ADMPS 3347 - INTERNATIONAL ORGANIZATION DEVELOPMENT EDUCATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This seminar reviews policies and practices of key international organizations and actors in the complementary fields of comparative, international, and development education (CIDE) and examines their impact on national and regional educational policies. Multilateral organizations (such as UNESCO, UNICEF, and the World Bank), bilateral organizations, nongovernmental organizations, faith-based organizations, community-based organizations, and regional agencies (e.g., the inter-American development bank, the Asian development bank, and the European union) will be among the organizations and actors studied.

  **Academic Career:** Graduate  
  **Course Component:** Lecture  
  **Grade Component:** Grad Letter Grade  
  **Course Attributes:** African Studies, Global Studies, Latin American Studies, Russian & East European Studies

**Anthropology**

**ANTH 2000 - RESEARCH AND THESIS MA DEGREE**

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
- This course involves directed research and writing oriented towards the completion of a master's thesis.

  **Academic Career:** Graduate  
  **Course Component:** Thesis Research  
  **Grade Component:** Grad SN Basis

**ANTH 2441 - FIELD METHODS IN LINGUISTICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 4  
- This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (indo) European language.
Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

**ANTH 2490 - LINGUISTICS ANTHROPOLOGY CORE COURSE**

Minimum Credits: 4
Maximum Credits: 4
This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language as a framework for ethnography, for textual research, and for the study of material culture.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

**ANTH 2491 - LINGUISTICS ANTHROPOLOGY CORE COURSE**

Minimum Credits: 3
Maximum Credits: 3
This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**ANTH 2513 - SELECTED ARCHEOLOGICAL PROBLEM**

Minimum Credits: 3
Maximum Credits: 3
Examines current topics and controversies in anthropological archaeology. Special problem areas vary from year to year.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

**ANTH 2516 - CHIEFDOMS**

Minimum Credits: 3
Maximum Credits: 3
Chiefdoms are defined more by what they are not than by what they are: societies whose hierarchical organization makes them non-egalitarian, but that lack the bureaucratic institutions of the state. Seen as stepping stones in the evolution of states or as part of another evolutionary trajectory entirely, chiefdoms are the subject of debate, including just in what sense, or even whether, the word "chiefdom" has any utility. This seminar discusses how chiefdoms can be investigated and understood archeologically, using materials from all the Americas, Polynesia, Europe, and other areas.

Academic Career: Graduate
Course Component: Lecture
ANTH 2517 - ARCHEOLOGICAL METHOD AND THEORY

Minimum Credits: 3
Maximum Credits: 3
This course surveys contemporary method and theory in anthropological archeology. It begins with varieties of high level theoretical approaches to a study of prehistory, including cultural historical, cultural evolutionary, cultural ecological systems-oriented, Marxist and post-Procession Archaeologies. It covers several methodological problems; construction of research designs, uses of analogy, style, classification and site level or regional level spatial analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2524 - ARCHEOLOGICAL DATA RECOVERY AND ANALYSIS 2

Minimum Credits: 4
Maximum Credits: 4
Advanced analysis of archeological data, primarily quantitative. This course carries on where ANTH 1534 leaves off. Topics include sampling, design of variable sets, advanced database management, computer graphics (plotting, contouring, fishnet surfaces), multivariate statistics (factor analysis, cluster analysis, multi-dimensional scaling), and analysis of spatial distributions (nearest neighbor, clustering, and graphical approaches).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2531 - HOUSEHOLD ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the role of the household as an important analytical unit in anthropological archaeology. Topics to be addressed include: archaeological definition of residential units, modeling the evolution of domestic life, analysis of spatial patterns at the household level, and proxemic and symbolic approaches to the prehistoric dwelling. The seminar will also consider the relationship between households and larger societal structures and the cross-cultural compositional and dynamic characteristics of households will be examined.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies

ANTH 2532 - ADVANCED TOPICS IN GIS: ANALYSIS OF REGIONS AND RESOURCES

Minimum Credits: 3
Maximum Credits: 3
A brief introduction to GIS techniques in the context of archaeological analysis. The focus will be on how to accomplish analytical tasks of proven utility in archaeology, using autocad map when a vector-based program is most useful and Idris when a raster-based is better. The course is designed to complement ant 2541: regional settlement patterns, although the GIS techniques dealt with are applicable to other scales of analysis as well.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2533 - ANCIENT STATES IN THE NEW WORLD

Minimum Credits: 3
Maximum Credits: 3
Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among pre-
Hispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4
Maximum Credits: 4
An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2536 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 1

Minimum Credits: 1
Maximum Credits: 1
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the fall term, and is concluded during the spring term in ANTH 2537: special topics in comparative archaeology ii. In order to receive credit students must complete both parts of the seminar (I and II).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2537 - SPECIAL TOPICS IN COMPARATIVE ARCHEOLOGY PART 2

Minimum Credits: 2
Maximum Credits: 2
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the spring term, and is the conclusion of ANTH 2536: special topics in comparative archaeology i offered during the preceding fall term. In order to receive credit students must complete both parts of the seminar I and II.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2541 - REGIONAL SETTLEMENT PATTERNS

Minimum Credits: 3
Maximum Credits: 3
This seminar will take up both theoretical and methodological aspects of regional settlement pattern studies in archeology. Appropriate objectives for settlement patterns will be discussed. Advantages and disadvantages of different field and analytic methodologies in terms of their effectiveness in achieving clearly defined goals will be explored. This exploration will be pursued primarily through critical examination and reanalysis of data from primary reports of regional settlement patterns studies from different parts of the world.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies

ANTH 2550 - ETHNOARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will focus on issues in ethnoarchaeology and archaeological implications. Some of these issues have to do with theory and the role of analogy in understanding the past. Others concern how we can use material remains to make inferences about social groups including kinship, organization, ethnicity, work groups, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

**ANTH 2551 - PEOPLES IN CONTACT**

Minimum Credits: 3
Maximum Credits: 3
This course will examine contact between native and European cultures in the Americas from an archaeological and historical perspective. Prehistoric patterns of interaction including exchange and communication networks will be considered. The impact of this contact on both cultures will also be considered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

**ANTH 2553 - ARCHAEOLOGICAL CERAMICS**

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ANTH 2554 - HUMAN BEHAVIORAL ECOLOGY**

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

**ANTH 2555 - WORKSHOP IN PUBLISHING**

Minimum Credits: 2
Maximum Credits: 2
This one-credit graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

Academic Career: Graduate
ANTH 2608 - PRIMATE BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2612 - EVOLUTIONARY THEORY 1: A HISTORY OF ALTERNATIVE IDEAS 18TH CENTURY UNTIL THE SYNTHESIS

Minimum Credits: 3
Maximum Credits: 3
This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2614 - HISTORY OF PALEOANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
In this course we will read primary literature that is relevant to the study of human evolution, both neo and paleobiologically. After a brief overview of the separate histories, and thus foci, of paleontology in general and human paleontology specifically, we will begin formal reading with Blumenbach's two major works, some Buffon, Linnaeus, and Lankester (and probably a few others), Huxley's essays of 1863, Darwin's descent these basically on the topic of "man's place in nature" and then delve into specific articles and monographs on the discovery, naming, and acceptance of human fossils. These readings will cover (but not necessarily be limited to) the debate between Schaffhausen and Fuhlrott, the naming by William, king of the first new hominid species (homo neanderthalensis), the works of Eugene DuBois (homo erectus) and Raymond Dart (australopithecus) and reactions to them, the Leakeys' discoveries at Olduvai Gorge, and some of the more recent finds. We will also discuss ramapithecus and its relevance to the still not satisfactorily answered question, "what is a homind?" The thrust of the course will be to tease apart fact from assumption as they were cobbled together in promoting one's favorite scenario on human evolution. Students will be expected to hand in annotated bibliographies based on the readings, and to take turns in leading discussion. Each student will also produce a term paper that will expand on a topic relevant to the course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2617 - PALEOPATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Paleopathology is the study of disease and its process among ancient peoples using primary evidence from Human Skeletal remains. Additional lines of inquiry draw on archaeological, ethnographical, clinical and documentary sources to aid in our interpretation. In this course you will learn how to recognize abnormal bone, differentiate between disease processes, describe abnormal bone changes, evaluate recording methods and investigate the epidemiological history of various disease processes. The impact of disease upon the individual and ancient societies will be considered throughout the course and in student research. The combined lecture, seminar and laboratory format provides a comprehensive foundation of skeletal pathology, experience with recording methods and an understanding of the impact of disease on the individual and their community.
Academic Career: Graduate
ANTH 2619 - ADVANCED SKELETAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., Age, sex, stature, ancestry, handedness, etc.) of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2630 - PHYSICAL ANTHROPOLOGY RESEARCH

Minimum Credits: 3
Maximum Credits: 3
The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in biological anthropology.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2680 - BIOARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an impression on the skeleton. We will assess how the individual experienced life and death through skeletal analysis, ethnography and the funerary context.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2687 - CORE COURSE IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2688 - BIOLOGICAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.
ANTH 2715 - DIMENSIONS OF AGING: CULTURE AND HEALTH

Minimum Credits: 2
Maximum Credits: 2
Provides an overview of the aging experience from a cross-cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

ANTH 2720 - POETICS AND POLITICS OF ETHNOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
The 1980s was described as "an experimental moment" in the human sciences and as a time of "crisis of representation" when anthropology has taken a literary, experimental, reflexive, modern, late-modern, postmodern, textualist turn. This seminar examines this experimental moment, its history and anthropological precursors, the critiques that have followed, and the suggestions for the future of ethnography and anthropological writing that have ensued. Readings include a number of recent experimental ethnographies as well as a sample of older "classics".

ANTH 2724 - THE ANTHROPOLOGY OF SCIENCE: GLOBAL PERSPECTIVES

Minimum Credits: 3
Maximum Credits: 3
Science and technology are integral to contemporary societies. Understanding how science is produced and how it shapes daily life is a crucial challenge for anthropologists, who have studied the production of scientific knowledge in labs, hospitals, field sites, and elsewhere. While early studies of science as a cultural practice focused primarily on the U.S. and Europe, science and technology are produced and consumed globally. Through analyses of case studies of biotechnology, medicine, genetics, conservation, agriculture, energy, climate science, and computing around the world, this class will investigate the global dynamics of science and technology. Juxtaposing readings on different scientific fields from around the globe, we will look for recurring themes that connect these studies. What happens when science and technology travel, and how do new places emerge as centers of knowledge production? How are culture, identity, technology, and science linked?

ANTH 2731 - MEDICAL ANTHROPOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course deals with topics surveyed in medical anthropology 1, looking at them in more ethnographic depth and with greater attention to current research findings.

ANTH 2735 - ECONOMIC ANTHROPOLOGY
This course focuses on major trends and debates in economic anthropology, with an emphasis on economic change and the impact of industrialization and capitalism on the "third world" peoples. Particular attention will be placed on economic theory in anthropology, the nature and "future" of peasants as an analytical category, markets and market places, "moral economy" approaches, agricultural intensification, development and underdevelopment, and anthropological approaches to political economy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2737 - ANTHROPOLOGY OF FOOD

This course surveys the general subject of culinary anthropology. Topics include food exchanges and the construction of social groups, food and social boundaries, food taboos, symbolism of food, folk conceptions of food, sacrifice and food in religious contexts, world standardization of food preferences. Thus, the focus is on social aspects of food, eating, and exchange.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2741 - ANTHROPOLOGY OF LAW

This course will examine anthropological analyses of law and law-like phenomena in a number of different societies, concentrating on the development of theory in this field. Since this theory reflects larger theoretical developments in anthropology and in post-war social science, the study of the anthropology of law is a case study in the development of modern theoretical paradigms.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies

ANTH 2744 - GRANTS AND RESEARCH DESIGN

This seminar will focus on the formulation of individual research problems and research designs in preparation for thesis research. Course requirements center around the development of a research proposal which will include a research design, area and theoretical background, field techniques and procedures, methodology, data analysis, and significance of the research. Grantsmanship, including how to submit proposals to various agencies, will be explored.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2750 - CONTEMPORARY ANTHROPOLOGICAL THEORY

This seminar surveys recent developments in anthropological theory, with emphasis on social and cultural anthropology. Topics covered vary with interests of students and the instructor. The course centers on the close reading of several contemporary texts.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: African Studies, Global Studies
ANTH 2753 - CONFLICT AND VIOLENCE

Minimum Credits: 3
Maximum Credits: 3
This course surveys a number of anthropological theories regarding conflict and violence, with critical attention to the question of biological versus cultural determinants. Ethnographic materials are drawn from the Pacific and elsewhere. The focus is largely on tribal societies, but not exclusively so, and factors influencing peace-making as well as war are considered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2755 - THE ART OF PUBLICATION

Minimum Credits: 3
Maximum Credits: 3
This graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students’ revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2763 - FIELD METHODS

Minimum Credits: 4
Maximum Credits: 4
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2782 - SPECIAL TOPICS IN CULTURAL ANTH

Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

ANTH 2788 - CULTURAL ANTHROPOLOGY CORE COURSE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the anthropological study of human culture and society. We will examine how different modes of description and explanation in contemporary cultural anthropology are applied to various domains (e.g., How different peoples feed themselves, mate and have children, cooperate and fight with one another, deal with the inevitability of death, etc.). By comparing the ways the human beings cope with the natural environment and each other, we will seek a better understanding of ourselves and what it is to be human.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2902 - DIRECTED STUDY FOR MA STUDENTS

Minimum Credits: 1
Maximum Credits: 9
This course involves directly supervised research-related activities such as fieldwork or artifact analysis. Reading is not a major component of the work for this course.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2980 - READINGS IN SELECTED FIELDS

Minimum Credits: 1
Maximum Credits: 9
This course involves student preparation of a selected bibliography on a specialized topic, reading of the materials according to a prepared schedule, and discussions of the readings with the course instructor.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
This course involves research-related activities that are indirectly supervised by the instructor, such as fieldwork or library research.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

ANTH 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
This course involves directed research and writing oriented towards the completion of a doctoral dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Architectural Studies

ARC 1999 - SENIOR THESIS

Minimum Credits: 3
Maximum Credits: 3
In this course a senior major in the history of art will research and write a research paper and present it as if for publication. The area and topic will be decided upon in consultation with a specific faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
ARC 2118 - ARCHITECTURE SINCE 1945

Minimum Credits: 3  
Maximum Credits: 3

Treats the key developments in architecture throughout the world since World War II, including theory as well as practice. The course will focus on such figures as Frank Lloyd Wright, Miles Van der Rohe, Le Corbusier, James Stirling, Eero Saarinen, Louis Kahn, Kenzo Tange, Robert Venturi, Richard Rogers, and Norman Foster.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ARC 2136 - EARLY AMERICAN ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3

Architecture often serves as a prime document and indicator of America's past and future. The theme of this course is the search for identity in American architecture in the centuries from the colonial settlements to the Civil War. The course studies both the recorded history of American architecture and the unrecorded millennium before that, to show its surprising cohesion in the fact of great cultural and territorial diversity.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ARC 2137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Minimum Credits: 3  
Maximum Credits: 3

By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes only partially mask some major problems; both constitute the underlying themes of this course.  
Academic Career: Graduate  
Course Component: Lecture  
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

ARC 2152 - ROMAN ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3

The course will examine the development of roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 AD). Special attention will be given to the relationship of architectural forms, types and functions to changes in roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a roman imperial "koine" will be treated only in passing.  
Academic Career: Graduate  
Course Component: Lecture  
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

ARC 2154 - EARLY GOTHIC ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3

A seminar focusing on problems in gothic architecture in France and/or England.  
Academic Career: Graduate  
Course Component: Seminar
ARC 2156 - HIGH RENAISSANCE ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
The architecture of the high Renaissance and mannerism (from about 1500 to about 1580 in Rome and other centers of Italy) changed forever the face of architecture. This course focuses on the roman projects of Bramante, Raphael, Michelangelo and Leonardo da Vinci. It then follows the mutation of high Renaissance ideals into mannerism and the spread of both styles in Northern Italy, particularly in town planning and in the villas and churches of Andrea Palladio around Venice.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

ARC 2158 - ARCHITECTURE AND ENLIGHTENMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ARC 2180 - WORLD CITIES

Minimum Credits: 3  
Maximum Credits: 3  
This course establishes a set of issues and a chronological context through which to understand the main patterns of city development. Thus the paring of St. Petersburg and Brasilia, London and Los Angeles, Amsterdam and Chicago, points out similarities and differences in their shape and social context. Student reports on individual cities are an integral element of the course, and influence the choice of cities to be studied in detail.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ARC 2181 - PITTSBURGH ARCHITECTURE/URBANISM

Minimum Credits: 3  
Maximum Credits: 3  
The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on images of individual buildings from fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial,
domestic, etc.) or integrate the physical development of the region with its political and social history.

**ARC 2330 - GLOBAL PRESERVATION**

Minimum Credits: 3  
Maximum Credits: 3  
The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'the modern cult of monuments,' art historian alois reigl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.

ASTRON 3550 - STELLAR STRUCTURE

Minimum Credits: 3
Maximum Credits: 3
Stars are the most common astrophysical objects. They create most of the atomic elements and most of the observable optical light in the sky. This class provides an overview of the physics of stars and the interstellar medium. Topics will include hydrostatic equilibrium, nuclear processes, radiative transfer, metallicity and opacity, convection, stellar evolution, stellar explosions, properties of the interstellar medium, and energy feedback from stars.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3580 - GALACTIC AND EXTRAGALACTIC ASTRONOMY

Minimum Credits: 3
Maximum Credits: 3
Galaxies are the fundamental building blocks of the present universe. This class will give an overview of galaxies, their properties, and their formation and evolution with an emphasis on current research areas. Topics will include observational properties (morphology, masses, colors, concentrations), scaling relations, evolution with redshift, stellar populations, gas and dust, dynamics and dark matter, evolution and mergers, and active galaxies.
ASTRON 3705 - ASTRONOMICAL TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This class will expose students to the basics of astronomical data analysis, with an emphasis on statistical techniques and the development of practical programming skills. Topics may include the nature of random and systematic errors, fitting and likelihood techniques, hypothesis testing, astronomical instrumentation and data reduction, and the use of large survey data sets.

ASTRON 3785 - COSMOLOGY

Minimum Credits: 3
Maximum Credits: 3
This class will give an overview of the standard cosmological model and the wide range of observational tests. Topics include the expansion history of the universe, thermodynamic history, nucleosynthesis, recombination, inflation, perturbations and the microwave background, structure formation, evidence for dark matter and dark energy, and future probes of dark energy.

ASTRON 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 15

ASTRON 3907 - DIRECTED RESEARCH

Minimum Credits: 1
Maximum Credits: 12

Behavioral & Community Health Sci

BCIS 2135 - LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Concepts regarding organization leadership are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations. The two major assignments require that the students work in teams with other students.

Academic Career: Graduate
BCHS 2503 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Short term field placement relevant to the student's area of interest in an operating organization or agency.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Attributes: Community Element - Building Understanding, Community Element - General Community Impact

BCHS 2504 - OVERVIEW OF HEALTH COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Health communication is the art and technique of informing, influencing, and motivating individual, institutional and public audiences about important health issues. The scope of health communication includes disease prevention, health promotion, health care policy and the business of health care as well as enhancement of the quality of life and health of individuals in the community. This class will introduce the theories and research that underlie health communication. The course will examine health communication campaigns, planning health communication and developing a health communication campaign.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)
Course Attributes: Community Element - Building Understanding, Community Element - General Community Impact

BCHS 2509 - SOCIAL AND BEHAVIORAL SCIENCES AND PUBLIC HEALTH

Minimum Credits: 3
Maximum Credits: 3
The core course provides an overview of the social and behavioral sciences and their importance in the inter-disciplinary field of public health. A primary emphasis is on the social-ecological model, its application to public health issues, and its use in the development of policies, strategies, interventions and programs. The course content will introduce students to several relevant social and behavioral theories as well as a range of community health assessment and planning models used by public health professionals in both domestic and international venues. Through a series of assigned readings, discussion exercises, group projects, quizzes and written assignments, students will enhance their knowledge and awareness of the role of social and behavioral sciences in public health and its relevance to their specific discipline. At the conclusion of the course students will be able to: identify the important social and behavioral determinants of health; describe the inter-relationships between the social, behavioral, biomedical, physiological, and environmental factors related to individual and community health; identify the major health disparities related to social, behavioral and economic factors; describe the role of culture and socio-economic status in health behavior, access to services, and decision-making; and understand the importance of community partnerships and participatory approaches in the development, implementation, management and evaluation of community policies and programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2511 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
Students with major interests in specialty areas participate in courses of individual study, research activities, or advanced readings with a specified faculty member.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
**BCHS 2515 - WORKSITE HEALTH PROMOTION**

Minimum Credits: 2  
Maximum Credits: 2  
This course covers the design and implementation of worksite health promotion programs. The course will examine both the benefits of worksite health promotion and the challenges of implementing a meaningful program. Students will review various planning models and plan theory-based incentive programs designed to promote health within the worksite setting.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BCHS 2516 - VIDEO FOR HEALTH PROMOTION**

Minimum Credits: 3  
Maximum Credits: 3  
Video is an increasingly important media for the distribution of health promotion messages. The purpose of this class is to provide students with basic principles of script development and the video production process to be able to produce educational and persuasive short-form videos for health promotion. Students will develop, direct, and produce short-form health promotion videos for distribution on social media platforms.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BCHS 2520 - THEORIES OF HEALTH BEHAVIOR AND HEALTH EDUCATION**

Minimum Credits: 1  
Maximum Credits: 1  
The course is designed as an introduction to the major theories that are the foundation for most health promotion and health education interventions. It will provide the student with exposure to the current theories that are being used in health behavior and health promotion educational interventions. Also it will provide students with a theoretical foundation for designing, implementing and evaluating health promotion and education programs.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)  
Course Attributes: Global Studies

**BCHS 2521 - ESSAY**

Minimum Credits: 1  
Maximum Credits: 3  
The essay requirement is designed to provide the student with an opportunity to integrate the major components of the public health learning experience. The student is expected to demonstrate verbal and technical proficiency in expository writing.

Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

**BCHS 2523 - PUBLIC HEALTH PROGRAM PLANNING AND PROPOSAL WRITING**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to expose students to critical health program planning, implementation and evaluation tools and strategies in a format that models actual program implementation. It is a required course for BCHS master's students and has been developed in response to requests from students for guidance in developing the skills necessary for the effective execution of public health interventions. This class complements other bchs coursework in that it gives the student the opportunity to apply theories and models learned in other classes. In particular, the socio-ecological theory heavily influences the content of this course. Through discussions, presentations, written assignments, and in-class activities, students will learn resources for, and gain practice in, the stages of program development, including budgets and use of logic models. Students will learn how to present their program proposals in both written and oral formats.
BCHS 2524 - OVERVIEW OF HEALTH EQUITY

Minimum Credits: 3
Maximum Credits: 3
Achieving health equity and understanding health disparities involve a critical analysis of historical, political, economic, social, cultural, and environmental conditions that have produced an inequitable health status for vulnerable populations in the United States. Health disparities are an important focus on improving population health and one of healthy people 2020's overarching goal is 'to achieve health equity, eliminate disparities, and improve the health of all groups'. The purpose of this class is to introduce basic issues that underlie health disparities. This course will include an overview of current literature and foster discussions that will examine health disparities, explore social and environmental determinants of those disparities, critically review measurement issues, and determine public health's response to addressing these disparities and achieving health equity. Students should seek to critically reflect on their personal and professional roles in eliminating health disparities and achieving health equity.

BCHS 2525 - INTRODUCTION TO APPLIED RESEARCH

Minimum Credits: 3
Maximum Credits: 3
The goal of the course is to give students a basic understanding of social and behavioral sciences research principles, as well as how these methods are implemented in the field of public health. Relationship of applied research to program evaluation, the link of theory to research, and the translation of research information to applied public health programs and policies will be emphasized. Participatory research will be highlighted. Quantitative and qualitative strategies, research designs, data collection methods, participant selection, and data analysis will be covered.

BCHS 2526 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Minimum Credits: 3
Maximum Credits: 3
This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

BCHS 2528 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Minimum Credits: 1
Maximum Credits: 1
This one credit seminar serves as the integrative course for the health equity certificate. Students build upon and apply the knowledge and experiences gained from all of the previous certificate core and elective courses to specific public health problems while considering a health policy framework. The seminar is designed to expose students to the critical analysis of a health policy as it affects health equity, as well as provides an
opportunity for students to network with a variety of academic and community leaders that can potentially further their knowledge and practical skills in this area.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 2532 - DIMENSIONS OF AGING: CULTURE AND HEALTH**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Asian Studies, Global Studies

**BCHS 2534 - CLINICAL ASPECTS OF DEMENTIA CARE**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed as an independent study for students in the public health and aging program. Its focus is on the methods and technology for diagnosis and treatment of Alzheimer's Disease.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2551 - SOCIAL NETWORKS & HEALTH**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2554 - INTRODUCTION TO COMMUNITY HEALTH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course uses strengths-based and social ecological approaches to prepare students for practicing public health with communities. Through in-class activities, discussions, community-based experiences and written assignments students will learn appropriate ways to engage communities and assist them in building their own capacity to identify and address health issues. Students will also learn techniques for conducting community health assessments using both primary and secondary data.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Behavioral & Community Hlth Sc (PHD, DPH, MPH)  
**Course Attributes:** Community Element - Building Understanding

**BCHS 2558 - HEALTH PROGRAM EVALUATION**
Surveys the evaluation and policy research methods applied to health. Students learn to critically assess the adequacy of evaluations and how to plan and pilot test an evaluation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2560 - INTRODUCTION TO POPULATION PROBLEMS**

Minimum Credits: 3  
Maximum Credits: 3  
The impact of population growth, distribution, and change on social, economic, environmental, and health relationships is presented with a focus on the sociopolitical responses to population dynamics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Global Studies

**BCHS 2562 - SEMINAR IN FAMILY PLANNING**

Minimum Credits: 3  
Maximum Credits: 3  
Participants explore the history of contraception and the birth control movement. Issues related to contraceptive care and the broader concerns of women's health are discussed.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 2572 - RISK COMMUNICATION**

Minimum Credits: 3  
Maximum Credits: 3  
The course focuses on risk communication within the context of terrorism and natural disasters. The didactic and experiential course will include core principles of risk communication, examine special challenges of risk communication with diverse audiences and media, and prepare students to create risk and crisis communication campaigns.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2575 - SEMINAR MATERNAL AND CHILD HEALTH**

Minimum Credits: 3  
Maximum Credits: 3  
Seminar deals with current issues in society affecting the health of children and their families. For example, problems of adolescent pregnancy, child abuse and neglect, emotional abuse and sexual abuse; prevailing attitudes and responses; etiology and risk factors; and multidisciplinary preventive strategies.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 2598 - SOCIAL INEQUALITIES IN HEALTH**

Minimum Credits: 3  
Maximum Credits: 3  
This course critically evaluates social science and epidemiological theory and research on social inequalities in health. A consistently important
finding is the positive gradient between socioeconomic position and health. Is this gradient socially patterned? This question is examined by drawing on research from U.S., Other industrialized countries, and the third world. This course devotes special attention to conceptual and measurement issues, the social context of health, hierarchical linear modeling or multilevel analysis, and ecological and life course perspectives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2011 or EPIDEM 2110

BCHS 2599 - PUBLIC HEALTH APPROACHES TO WOMEN'S HEALTH

Minimum Credits: 3
Maximum Credits: 3
Public health problems affecting women, i.e., Alcoholism, smoking, occupational health, reproductive health, aging and cancer, as well as health and social problems relating primarily to women are discussed. Etiology of health problems, prevention and treatment, high-risk groups, and controversies related to care are covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 2600 - HARM REDUCTION APPROACHES IN HEALTH AND PUBLIC HEALTH SETTINGS

Minimum Credits: 1.5
Maximum Credits: 1.5
The aims of this seven week course are to introduce students to harm reduction (HR) principles as a conceptual approach to care rather than simply as a set of strategies, like syringe exchange, and to challenge them to consider how HR-informed approaches to care may improve participant and provider outcomes. The approach to care builds on lessons learned from community and provider settings that have demonstrated success in engaging and caring for marginalized populations including those who use substances. However, this course extends the conversation about harm reduction to aspects of care that can promote health improvement among all patient and client populations, not just those who use drugs. Concepts that will be discussed include universal harm reduction and herd harm reduction. The course will incorporate a number of speakers who will address the application of HR in specific settings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2605 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Minimum Credits: 1
Maximum Credits: 1
This workshop introduces students to the focus group as a data collection strategy and prepares them to use focus groups as a research tool. The workshop uses lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics covered include the theoretical basis of focus groups, formulating questions, recruiting participants, designing sampling schemes, facilitating the discussion, taking notes and applying/reporting out on the data. Students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2608 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research (CBPR). The goal of this course is to familiarize students with CBPR. Students will become conversant in seminal CBPR literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.
BCHS 2609 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1  
Maximum Credits: 1  
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in translating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in KT as an aspect of community-partnered research.

BCHS 2610 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1  
Maximum Credits: 1  
This course provides hand-on training in the participatory research method known as concept mapping (cm). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cm and the associated strengths and limitations.

BCHS 2612 - PROJECT MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 2  
Maximum Credits: 2  
The purpose of the course is to prepare students to effectively manage a range of public health projects. The course is lecture/discussion/laboratory/application based. Project management software is used including Microsoft Project and Visio. Industry standard body of knowledge is the foundation of the course further illustrated with case studies and examples. There are no pre-requisite courses or software skills.

BCHS 2990 - SOCIAL DYNAMICS IN PUBLIC HEALTH

Minimum Credits: 1  
Maximum Credits: 1  
This course is an introduction to historic and current concepts about complex, dynamic systems in public health research and practice. We will discuss the rationale for adopting systems thinking - an approach to analyzing the impact of systems within their social, spatial, and temporal context - in behavioral and community health research and practice and illustrate how this approach is critical for the development of public health policy. The course will include didactic sessions, guest lectures, hands-on engagement with tools that allow us to represent dynamic social systems, as well
as seminar-style discussions of studies that examine dynamic social systems in public health. (Note: BCHS 2520 is recommended.)

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate Sch of Public Health

**BCHS 2991 - MULTILEVEL ANALYSIS IN PUBLIC HEALTH**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Multilevel analysis is an essential statistical tool in public health that can simultaneously investigate the effects of factors at multiple social ecological levels on individual-level outcomes. In this course, students will learn to identify scientific problems that necessitate the use of multilevel statistical modeling techniques and understand the essential theoretical underpinnings of multilevel analysis. Students will conduct multilevel statistical modeling procedures using Stata and interpret the statistical and practical meaning of fixed and random effect coefficients from the output of these models. Special emphasis will be placed on the strengths and limitations of multilevel analysis in investigating social and group-level determinants of health. BIOST 2041, PSYED 2018, or permission to enroll from the instructor required. Knowledge of linear regression, logistics regression or ANOVA strongly preferred.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2992 - SYSTEMS THEORIES AND APPROACHES**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Systems science approaches were developed to understand connections between a system's structure and its behavior over time. The use of such approaches within public health research and practice has grown tremendously over the past decade. Identifying and understanding the dynamic relationships between individuals and their social and physical environments can help us identify potential leverage points for intervention. This course provides an introduction to systems thinking and models in public health, explores the importance of associated theories and underscores the utility of systems science approaches within public health research and practice. We will highlight current systems science public health research and encourage students to think critically about the utility of systems theories and approaches within public health.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2995 - GLOBAL PERSPECTIVES ON WOMEN'S HEALTH: EMPOWERMENT, GENDER EQUALITY, AND HEALTH**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Limited educational opportunities, financial dependence, and gender bias and discrimination are intersecting factors that contribute to poor health status and well-being among women around the world. This course examines the relationship between such macro-level factors and women's health and explores promising interventions and policy changes aimed at promoting women's empowerment, gender equality, and improved and sustained health outcomes for women. Specific attention is given to examining the connection between women's health and educational and legal initiatives and microfinance programming. Illustrative case examples are drawn from instructor global experience conducted on related research in Thailand, India, and Peru and relevant readings. Key health issues discussed will include gender-based violence, reproductive and sexual health, and pregnancy outcomes. To emphasize key points, guest speakers from diverse fields, including women's studies, ethics, law, and economics will be invited to provide additional insights regarding the complexities associated with the topic and with effective and innovative intervention development.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 2999 - MODELING COLLECTIVE BEHAVIOR**

**Minimum Credits:** 3  
**Maximum Credits:** 3
Students will learn how to create dynamic models of health behavior in social context. We will study social ecological models of individual and collective action emphasizing the collective properties such as cooperation and policy resistance that often emerge. Students will learn how to: apply these models to plan and evaluate health interventions and policy; use systems thinking to model health problems; use simple software to create agent models; interpret results and describe public health implications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3002 - HEALTH SURVEY METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
Introduces techniques for the collection of health data through survey methods.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3003 - SEMINAR IN ADVANCED EVALUATION TECHNIQUES**

Minimum Credits: 3  
Maximum Credits: 3  
Evaluates theory and methodology with emphasis upon human service organizations.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 3004 - INTEGRATIVE RESEARCH SEMINAR: GRANT WRITING**

Minimum Credits: 1  
Maximum Credits: 1  
Every graduate of a doctoral program needs to know how to write a successful grant application to fund their work. Whether you are a senior manager leading a public health program in the public or non-profit sectors or you are a researcher working in an academic setting, you will need funding to support your work! We begin this doctoral seminar by asking the question, "how do you write a grant proposal that will attract the attention of a funding agency and convince them that your application is significant and should be a priority for funding?" building on the ideas articulated in BCHS doctoral students’ preliminary examination, we will focus on writing the specific aims and significance sections for an NIH grant proposal. The students’ written work will be shared with and critiqued by other students and faculty participating in the seminar. Finally, we will review and critique examples of successful and unsuccessful grant applications *both program and research grants (especially research grants that the students will most likely be writing at the beginning of their academic careers” namely, ro-3s or r-21s).  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis  
**Course Attributes:** Global Studies

**BCHS 3006 - INTEGRATIVE RESEARCH SEMINAR: WRITING FOR PUBLICATION**

Minimum Credits: 1  
Maximum Credits: 1  
The Integrative Research Seminar: Writing for Publication focuses on the process of developing a manuscript for publication in a peer-reviewed journal. All doctoral students must develop the skills to enable them to write and publish the results of their work. The goal of this seminar is to provide students with the requisite knowledge and skills to develop a manuscript for submission to an appropriate journal for publication. As part of this process students will also learn about the peer review process and how reviewers rate manuscripts submitted for publication. It is expected that students in this seminar will work closely with their academic mentor(s) on the development of manuscripts throughout their doctoral program. And, this seminar will assist students in fulfilling the requirement to submit at least one first-authored manuscript-- ideally based on their dissertation research, before they graduate. The seminar content will be delivered via a series of faculty presentations and discussions. There are no prerequisites for this seminar.  
**Academic Career:** Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PhD or DPH)

**BCHS 3007 - ETHNOGRAPHIC AND QUALITATIVE METHODS**

Minimum Credits: 3
Maximum Credits: 3
Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

**BCHS 3010 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**BCHS 3015 - COMMUNITY MAPPING AND INTRODUCTORY SPATIAL ANALYSIS**

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the use of spatial data in public health. The two main goals are (1) to familiarize students with the use of geographic data in public health research and practice; and (2) to introduce basic spatial analytic skills applied to geographic and spatial data. Students will be taught how to use geographic information systems (GIS) to inform both community practice and research. They will learn how to create, manage, and analyze geographic data and gain hands-on experience applying these techniques to research questions. No previous knowledge of mapping or GIS is assumed. One lecture and one lab per week.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

**BCHS 3030 - MEASUREMENT IN THE SOCIAL AND BEHAVIORAL SCIENCES**

Minimum Credits: 2
Maximum Credits: 2
The goal of this two-credit course is to provide you with fundamental skills to identify, use and create scales and indices for research and evaluation. The course will be primarily based on classical measurement theory, yet we will discuss item response theory as well. We will also cover good measurement processes, including establishing and evaluating validity and reliability. We will address communication of measurement principles and applications to lay and scientific audiences. Throughout the course, materials will highlight the influence that culture and socio-demographics have on measurement tools and their validity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**BCHS 3503 - PREVENTION SCIENCE: TRANSLATING KNOWLEDGE TO PRACTICE**

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a solid grounding in basic concepts, theories, practical approaches and methods associated with prevention
(defined here as both problem prevention and health promotion). The course will focus on behavioral and psycho-social areas including substance abuse, mental health, victimization, and sexually transmitted infections, including HIV.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Attributes:** Community Element - Building Understanding, Community Element -General Community Impact

**BCHS 3504 - DOCTORAL SEMINAR ON HEALTH COMMUNICATIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This doctoral seminar provides an opportunity for in depth exploration of health communication topics with a particular emphasis on critical analysis of past and current health communication techniques and the application of current best practices in health communication. This class is required for DRPH students in BCHS and will allow students to explore health communication issues within their individual fields of interest.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

**BCHS 3506 - IMPLEMENTATION SCIENCE IN PUBLIC HEALTH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to prepare students with the knowledge and skills to conduct implementation science within the field of public health. Although evidence-based interventions are widely available, they are underutilized to address a wide variety of public health challenges. We will examine barriers that exist with respect to the implementation of evidence-based interventions (EBIs) and strategies to overcome these barriers. Specific topics include strategies to identify EBIs, assessing and strengthening organizations' and communities' readiness to utilize EBIs, dissemination and scaling up, cultural adaptation of EBIs, and implementation science theories and conceptual frameworks.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**BCHS 3555 - DOCTORAL SEMINAR IN BEHAVIORAL AND COMMUNITY HEALTH SCIENCES THEORIES AND MODELS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a requirement for students in the doctoral program in the department of behavioral and community health sciences. The seminar is designed to stimulate critical thinking about specific public health issues from within the framework of various behavioral and community theories and models. The purpose of this doctoral seminar is to critically apply and evaluate specific conceptual models and theoretical frameworks to particular significant public health problems or issues. This requires that seminar participants acquire close working familiarity with various conceptual tools and substantive issues. One goal underlying the selection of the substantive issues has been to select those which challenge, provoke, confront, excite, and stimulate seminar participants about economic and political controversies in contemporary healthcare and public health. Similarly, the selection of issues and reading materials dealing with those issues, challenge taken-for-granted assumptions with respect to health and illness, public health and medical care as well as health policies and health politics. A final objective of the seminar is to challenge participants to reassess their conception of the field of public health and their place in it. Is it a profession? A discipline? An applied social science? What are the implications/consequences of each?

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Behavioral & Community Hlth Sc (PHD or DPH)

**BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM**

**Minimum Credits:** 1  
**Maximum Credits:** 3
The purpose of the executive management practicum is to provide a structure for students in the DRPH program to gain experience in the application of the core set of competencies in high level practice settings. The association of schools of public health has identified seven competencies that students are expected to master during their doctoral study. Four of these are the focus of the practicum: advocacy, communication, leadership, and management. Practicum sites will be chosen based on the mission of the organization and the opportunity for the student to be able to exercise and refine their skills in the areas of management, leadership, communication and advocacy.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis

**BCHS 3707 - APPLIED MULTIPLE REGRESSION ANALYSIS AND CAUSAL MODELING FOR THE BEHAVIORAL AND COMMUNITY HEALTH SCI**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course was designed to teach advanced graduate students how to use applied multivariate regression analysis to design, propose, and test complex research questions using a causal modeling framework. The course will include a brief review of simple linear regression, and quickly move to advanced multiple regression analysis topics including multiple predictor regression, stepwise regression approaches, the analysis of longitudinal data with regression, and examining mediators, moderators and confounding variables and their relationship to the independent and dependent variables of interest. The course will also include several other brief seminars on regression diagnostics, dichotomous predictors and outcome variables, power analysis, and an introduction to other multivariate analysis frameworks including structural equation modeling and longitudinal growth modeling. Students will be required to bring their own multivariate data set and research questions to use for class assignments, preferably data directly related to their dissertation project.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Behavioral & Community Hlth Sc (DPH or PhD)

**BCHS 3888 - PREPARATION FOR COMPREHENSIVE EXAMINATION**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course is designed to be an independent study for BCHS doctoral students in order for them to be able to read and prepare for their comprehensive exam. The purpose of the BCHS comprehensive examination is to "to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline".

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**Bioengineering**

**BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
All you don't want to miss in mathematics will be covered in this first course of bioengineering graduate students. Solving systems of linear equations and ordinary differential equations will be covered with engineering examples and assignments. Finite difference methods for boundary value problems, Laplace equation, Poisson equation, parabolic partial differential equations, and hyperbolic differential equations will be discussed along with project assignments. Fourier series will be introduced as well.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering
BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

Minimum Credits: 3
Maximum Credits: 3
The course will cover topics related to applied electromagnetics in medicine. Topics such as Maxwell equations, wave equations, transmission lines, electromagnetic theorems, introduction to antennas, and introduction to computational electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications such as MRI, biological sensors, RF ablation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE

Minimum Credits: 3
Maximum Credits: 3
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology. Introduction to materials science and engineering would be preferred but is not a prerequisite.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

BIOENG 2023 - BIOENGINEERING SEMINAR SERIES

Minimum Credits: 1
Maximum Credits: 1
Selected, bioengineering-related topics are presented in a one hour lecture format by members of the bioengineering community of both the university of Pittsburgh and other institutions.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2024 - BIOENGINEERING SEM FOR PROF MS

Minimum Credits: 0
Maximum Credits: 0
One hour lecture format by members of the bioengineering community of both the university of Pittsburgh and other institutions.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS

Minimum Credits: 4
Maximum Credits: 4
Biomedical and chemical engineering graduate students require a similar comprehensive understanding of the underlying principles of heat transfer,
chemical species transfer, and momentum transfer or fluid mechanics. This graduate course provides a unified treatment to heat, mass, and momentum transfer at the graduate level. The first part of the course covers the constitutive relations that describe the diffusive flux of material properties, including thermal energy, chemical species concentration, and momentum. Conservation principles and boundary conditions are covered for these material properties and numerous example paradigm problems of steady-state unidirectional (1-D) transport in biomedical and chemical engineering applications are reviewed. The second part of the course covers more advanced concepts including non-Newtonian rheology, unsteady state and 2-D transport, convective transport processes, turbulence, and creeping flow. The focus throughout is on extensive problem-solving and computer simulation using Comsol multi-physics using both biomedical and chemical engineering examples.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Bioengineering 2045 computational case studies in Biomedical Engineering this is an interdisciplinary course that will combine: basic sciences such as electromagnetics and thermodynamics applied sciences such as numerical methods and simulations biomedical research and applications such as magnetic resonance imaging, hypothermia, heat transfer in biological bodies, and cardiac action potential, and mathematical concepts such as optimizations, linear and nonlinear equations. This course will be based on solving computational biomedical engineering problems using simulations. Some of the numerical topics will include: numerical solutions of matrices, finite element and finite-difference methods. These topics will be described with emphasis on their use in solving these problems. The course will cover setting up the mathematical description of the models and solving these problems using advanced computer codes and the supercomputer center at Pittsburgh. There will be 1d, 2d, and 3d modeling projects.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### BIOENG 2055 - BIOMEDICAL FLUIDS MECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Biomedical Fluid Mechanics is an upper-level undergraduate / graduate course designed to study how momentum (i.e. fluid flow) principles arise and are applied in the biological, physiological, and medical sciences. The course is not exhaustive but focuses instead on several specific systems in which 1) the application of fluid mechanics enhances understanding of the underlying biomedical process; and/or 2) the biomedical process itself teaches an important and sometimes novel fluid mechanical principal. The principal means of analyzing biofluid mechanics in this course will be through the application of differential mass and momentum balances. These principles will be applied only after the student has gained a qualitative understanding of the biomedical process and they will take the student to a quantitative understanding. The course will primarily study principles of fluid mechanics in the cardiovascular system, respiratory system, and in several medical devices in which fluid mechanics plays an important role in relevant design principles. Students will have the opportunity to select topics relative to fluid mechanics that may be relevant to their research projects.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### BIOENG 2061 - ERGONOMICS & OCCUPNTL BIOMECHNC

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Fundamentals of ergonomics as applied to the industrial workplace. Specific topics include: occupational biomechanics, anthropometry, work physiology, cumulative trauma disorders and slip and fall prevention applied to the organization and physical design of the workstation, effects of hand tool design on workers, and analysis of manual material handling jobs.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering
BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS

Minimum Credits: 3
Maximum Credits: 3
Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Bioengineering(PHD, MBE)

BIOENG 2095 - GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Individual study program under guidance of faculty member.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 2150 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3
Maximum Credits: 3
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by fad and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ‘ design for manufacture, workflows)

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2150; PROG: Swanson School of Engineering
BIOENG 2154 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1  
Maximum Credits: 1  

Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/customer satisfaction. Students will employ modern software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives: Students will gain hands-on experience incorporating the DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modern quality control concepts and approaches.

Academic Career: Graduate  
Course Component: Workshop  
Grade Component: Grad SN Basis

BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP

Minimum Credits: 3  
Maximum Credits: 3  

Medical product ideation, prototyping, and development are cornerstones for identifying unmet clinical needs and navigating the complexities of the development process. But how does one translate new medical products into the marketplace? Entrepreneurship is a discipline with established tools and methods that must be properly harnessed in order to translate medical products into a startup or an incumbent company (big or small.) After the completion of this course students will be able to understand and differentiate between 'right sized' entrepreneurial methodologies for both startups and existing companies.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2166 - MANAGING MEDICAL PRODUCT RESEARCH AND DEVELOPMENT

Minimum Credits: 4  
Maximum Credits: 4  

This course will provide the student a theoretical and practical knowledge of professional project management for medical product development in industry. Through lectures, workshops, and industry seminars, students will acquire skills in the following areas: 'project engineering, project management, and innovation management. 'Managing product portfolios. Strategic planning and product planning. 'Creating and managing effective project teams. 'Stage gate process and lean methodology. 'Concurrent engineering. 'Project management tools, including: 'systems engineering 'work breakdown structures' budgeting' resource allocation and scheduling 'monitoring and control of product development students will be introduced to project management tools developed by PDMA (product development and management association) and the PMI (project management institute). The course will be taught by industry professionals with long experience in the medical products industry.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

BIOENG 2170 - CLINICAL BIOENGINEERING

Minimum Credits: 3  
Maximum Credits: 3  

This graduate level course focuses on the early stages of the innovation process; strategic analysis of complex clinical problem solving through the needs finding, concept generation and refinement. Students, under the mentorship of participating CMI faculty (SSEO, SHS, business, law), interview and observe clinical personnel at the University of Pittsburgh school of medicine performing clinical work in order to rigorously define and document clinical needs in the environment of use. Using principles articulated in BIOENG 2150 (medical product ideation), the students produce a document that clearly defines and communicates one or more clinical problems and prioritized feasible solution paths.

Academic Career: Graduate  
Course Component: Lecture
BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on the later stages of the innovation process; prototyping, market analysis, strategic planning, intellectual property protection, and business planning. Students, under the mentorship of participating CMI faculty (SSOE, SHS, business, law), will apply the principles and techniques from BIOENG 2151 (medical product development) and prioritize clinical needs identified in BIOENG 2170 (clinical bioengineering) and, using the resources of the swanson innovation center, create a prototype for pre-clinical and clinical evaluation. Students will use basic principles of intellectual property (IP) for engineers and publicly available search tools to determine patentability, freedom to operate, and patent strength. Students will then produce a medical device/product prototype and complete documentation set suitable for technology transfer.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2150; PROG: Swanson School of Engineering

BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES

Minimum Credits: 3
Maximum Credits: 3
Human Factors Engineering (HFE) is the application of knowledge about human behavior, abilities and limitations to the design and evaluation of products and systems. HFE draws upon a number of disciplines, such as biomechanics, anthropometry, design, physiology and psychology to improve performance, reduce human error and enhance safety. The application of HFE to medical devices is critical to their effective and safe use. This is recognized by industry and regulatory agencies. In fact, all medical devices that are used by patients or clinicians are required to have a human factors evaluation in order to be approved by the Food and Drug Administration (FDA). This course focuses on the application of HFE in design, development and evaluation of medical devices. The educational goals are: a) to learn the fundamentals of HFE relevant to medical devices, and b) to understand the HFE process in medical device design and evaluation according to the Food and Drug Administration (FDA). The course will include didactics and hands-on experience.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2186 - NEURAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Neural engineering is an emerging discipline that seeks first, to understand brain function using computational and engineering principles; second, to improve health through nervous system interventions; and third, to discover principles of biological information processing that can improve computing technologies. Students will learn the principles of neuroscience and the computational tools needed for original research in neural engineering. They will develop the ability to critically evaluate scientific evidence. They will design novel experiments and approaches in neuroscience and neural engineering.

Academic Career: Graduate

Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2230 - CARDIO ORGAN REPLACEMENT

Minimum Credits: 3
Maximum Credits: 3
A one semester course in which three organ replacement systems will be discussed - vascular prostheses, artificial hearts/ventricular assist devices, and extracorporeal/ intravenous oxygenators.

Academic Career: Graduate
Course Component: Lecture
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course teaches students the conceptual tools needed to identify, articulate and resolve practical, everyday, ethical dilemmas inherent in the diverse field of bioengineering. A learning environment where practical ethics can best be understood is fostered. This includes the use of case-based instruction, small group discussion and out of class practical ethics activities including a department-sponsored "field trip" to observe an FDA Panel Meeting in DC. Guest speakers discuss current cases and issues in bioethics. These speakers include: BIOENG post docs as well as faculty with experience in industry, academic research, applied ethics and the FDA. The capstone project requires students, working in groups, to author an ethics case study based on their research and analyze it using methods taught in the course.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2242 - SOCTL, POL & ETHCL ISS BIOTEC 2**

Minimum Credits: 3  
Maximum Credits: 3  
This second semester course continues the topics as introduced in biotechnology 1.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2250 - CARDIO CLINICAL INTERNSHIPS**

Minimum Credits: 1  
Maximum Credits: 6  
Professional application training in cardiovascular medicine and surgery. Students will spend three months each in bioengineering practice training programs within cardiology, cardiothoracic surgery, and vascular surgery.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2265 - BIOMEDICAL FLUID MECHANICS**

Minimum Credits: 3  
Maximum Credits: 3  
Biomedical Fluid Mechanics is an upper-level undergraduate/graduate course designed to study how momentum (i.e. fluid flow) principles arise and are applied in the biological, physiological, and medical sciences. The course is not exhaustive but focuses instead on several specific systems in which 1) the application of fluid mechanics enhances understanding of the underlying biomedical process; and/or 2) the biomedical process itself teaches an important and sometimes novel fluid mechanical principal. The principal means of analyzing biofluid mechanics in this course will be through the application of differential mass and momentum balances. These principles will be applied only after the student has gained a qualitative understanding of the biomedical process and they will take the student to a quantitative understanding. The course will primarily study principles of fluid mechanics in the cardiovascular system, respiratory system, and in several medical devices in which fluid mechanics plays an important role in relevant design principles. Students will have the opportunity to select topics relative to fluid mechanics that may be relevant to their research projects.

**Academic Career:** Graduate  
**Course Component:** Lecture

BIOENG 2330 - BIOMEDICAL IMAGING

Minimum Credits: 3
Maximum Credits: 3
Biomedical imaging introduces the major imaging modalities (x-ray, cat-scan, MRI, ultrasound) used in clinical medicine and biomedical research, as well as the fundamentals of images, from a signals and systems standpoint.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2333 - FUNDAMENTALS OF FINITE ELEMENT METHODS

Minimum Credits: 3
Maximum Credits: 3
Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Introduction to Medical Imaging and Image Analysis presents the physics of image formation as well as methods for tomographic image reconstruction for major medical imaging modalities, including X-ray Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). Also introduced are fundamentals of digital image processing, with particular emphasis on medical applications, including basic techniques to enhance image quality, image de-noising, methods for extracting, classifying, and tracking features of and objects in images, etc. Students will learn how to implement these techniques in MATLAB (The MathWorks Inc., Natick, MA) to solve practical image processing problems. MATLAB exercises will demonstrate to students how filtering operations applied in the image domain or the Fourier domain affect medical images. In addition to these fundamentals, more advanced algorithmic approaches for image segmentation and image as well as point-cloud registration techniques will also be reviewed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2351 - COMPUTER APPLICATIONS IN BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to teach you c++ programming in the context of real-world tasks that you will likely encounter in future academic or industrial work. In these applications, project management, working with different compilers and operating systems, and learning to effectively use source code that was written by other developers is no less important than programming theory. In this course we will cover the fundamentals of c++, object oriented design, programming with graphical user interfaces, and a basic 3d graphics. By the end of this class, you will know how to effectively use c++ to solve real-world computing problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Bioengineering (MBE, PHD)

BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

Minimum Credits: 3
Maximum Credits: 3
Computational simulation is increasingly utilized as a method to assess the performance of medical devices. The course provides students with a hands-on learning experience on how to use computational simulation in the modeling and design of medical devices. The course details the important steps in computational simulations from preprocessing to solution to post-processing and data presentation. Commercially available software programs are introduced and used to simulate a variety of physical phenomena (solid, fluid, transport) pertinent to medical device design. Upon completing the course, the student should be able to simulate the solid, fluid, and transport phenomena that are useful in medical device design. Particular attention will be placed on avoiding common mistakes in the preprocessing and interpretation of computational results. Topics covered: geometry creation; discretization; appropriate assignment of material properties; solver management; error mitigation and debugging; post-processing and data presentation; data interpretation; introduction to design optimization.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to teach the basic principles and applications of optical microscopy and imaging techniques commonly used in biomedical research. The enormous growth of optical microscopy has become an essential tool to investigate biological processes, diagnose diseases and quantitatively measure the biological system at unprecedented cellular and molecular level. It has become increasingly important for biomedical researchers to learn the proper use of optical microscopy, understand the advantages and limitations of each type of optical microscopy and how to apply them for specific biomedical applications. In this course, we will cover the physical principles involved in basic light, basic and advanced optical microscopy techniques. Strong emphasis will be given to biomedical applications for each type of optical microscopy. At the end of the course, a student will have a thorough understanding of basic principles of optical imaging and optical microscopy, learn how to apply optical microscopy to address biological questions and perform basic quantitative image analysis.

**Academic Career:** Graduate  
**Course Component:** Lecture

**BIOENG 2385 - ENGINEERING MEDICAL DEVICES FOR QUANTITATIVE IMAGE ANALYSIS AND VISUALIZATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BIOENG 2411 - MATHEMATICAL METHODS IN CHEMICAL ENGINEERING 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course some newly evolving multi-modal imaging techniques and analysis methods in biomedical applications will be introduced. The course will briefly cover the fundamental physics, core signal processing, image reconstruction of a variety of current standalone imaging modalities such as...
X-Ray, computer tomography (CT), magnetic resonance imaging (MRI), nuclear imaging (PET, SPECT), optical imaging (fluorescence, optical diffuse tomography, bioluminescence), and ultrasound. Subsequently, the concept, fundamental physics, and image analysis of some exemplary multi-modal imaging techniques and systems will be introduced. Their applications in Biomedicine in different scales from organ to cellular and molecular level, and from structural to functional imaging will be discussed. The course will also briefly address the issues related to image-based diagnosis, intervention and therapy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2515 - CARDIO SYSTM DYNAMICS & MODELING**

Minimum Credits: 3  
Maximum Credits: 3  
The mechanical behavior of the cardiovascular system will be explored in a quantitative manner. The goal is to understand the behavior of each component in isolation and the interactions among various components. Mathematical modeling will be used with an emphasis on model development, validation, and application. The function of the intact organ will be correlated with underlying structural and cellular processes, both for normal and pathological states. Student projects will contribute to the existing library of cardiovascular models.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2520 - MOL CELL BIOLOGY & BIOPHYSC 1**

Minimum Credits: 6  
Maximum Credits: 6  
Topics covered in this course are bio-macromolecules, protein purification and microscopic techniques, genetics (chromatin organization, DNA replication, recombination, transcription, translation and control of gene expression), molecular perturbation, membrane biophysics and bioenergetics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Bioengineering (MBE or PhD)

**BIOENG 2525 - APPLIED BIOSTATISTICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide an understanding of basic statistics through application. Descriptive and inferential statistics, encompassing both parametric and non-parametric methods will be taught.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to introduce students to an advanced understanding of biomaterials and tissue engineering specialized in neural applications. It will review biomaterials used for neural prosthesis, drug delivery devices, and tissue engineering scaffold. The student will gain a fundamental understanding of the biocompatibility issues relevant to a variety of neural implantable devices and the current strategies to solve these issues. Topics will include basic material science, neural tissue biocompatibility with implant, BBB and CNS drug delivery, tissue engineering and regenerative medicine for PNS, tissue engineering and regenerative medicine for CNS, neural electrode/tissue interface (including both simulating and recording electrodes, both peripheral and cortical neural interface). The student should have some exposure to biomaterials and tissue engineering before taking
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlying each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application.

BIOENG 2610 - INTRODUCTION TO MEDICAL CORROSION AND MICRODEVICES

This is an elective course for the engineering research center consisted of North Carolina A&T State University, University of Cincinnati, and University of Pittsburgh to help provide new technologies to study biodegradable metallic implant science. This course will cover the following topics: 1) microfabrication of silicon, glass, polymer devices, 2) microfluidics and electro kinetics, 3) biosensors, 4) actuators and drug delivery, 5) lab on a chip and micro total analysis systems (-tas), 6) genomics and proteomics related chip, 7) corrosion science, and 8) corrosion sensing devices and measurement systems.

BIOENG 2615 - INTRODUCTION TO NEURAL ENGINEERING

The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.
BIOENG 2630 - METHODS IN IMAGE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Current research topics in biomedical image analysis will be explored with an emphasis on applying geometry and statistics to image segmentation, registration, and visualization. The goal is for computers to recognize and measure anatomical structures automatically in 2d, 3d, and 4d from prior knowledge and image features. Student projects will use (and contribute to) the national library of medicine visible human toolkit, a new C++/OpenGL Library of proven and experimental methods being developed by a consortium of research institutions including our own.

BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT

Minimum Credits: 3
Maximum Credits: 3
Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2D and 3D inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, matlab, to perform computations on kinematic data.

BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

Minimum Credits: 3
Maximum Credits: 3
This is the second part of a two semester advanced graduate course that uses the application of bio solid mechanics to describe the mechanical behavior living structures. The course will be separated into the following: 1) fundamental concepts: a. Kinematics, stress, strain b. Balance principles, objectivity c. Hyperelastic materials 2) biological applications a. Mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) b. Growth and remodeling using mixture theories c. Approaches used to model cells (e.g. Blood cells, myofibroblasts)

BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT
The course will blend robotics, probability, and neuroscience to better understand the human motor system, particularly motor learning and control of movement. While motor control will be discussed as a feedback control problem, these theories will be compared during the entire course to what we know about the motor system. We will begin by studying muscle activation and forces, muscle sensory organs, spinal control structures, and inertial dynamics of a multi-joint limb. This will give us a sense of the machinery that the nervous system must control in order to generate coordinated movements. Probability foundations will be used as a framework to model how the nervous system updates estimates of limb position and sensory feedback during movements. Finally we will consider how disease can inform us about principles of movement control and motor learning. The course material and associated homework will require the students to use matlab to simulate control of biomechanical systems. This will allow students to appreciate the value of models to generate hypothesis and possible explain biological behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Bioengineering (MBE or PhD)

**BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES**

Minimum Credits: 3
Maximum Credits: 3
This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy, transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOENG 2080; PROG: Swanson School of Engineering (PENG)

**BIOENG 2704 - FUNDMS REHAB ENGR AND TECHN 1**

Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental principles and practices related to multiple areas of assertive technology. The technology area include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic and man/machine modeling. In addition, common terminology, disability, ethics and models of service delivery related to assistive technology are discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2705 - PRACT REHAB ENGR & ASSISTV TECHN**

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to develop the clinical skills needed to apply at and resolutions to help persons with disabilities achieve their goals in the areas of productivity, education, employment, communication, and environmental access. Students will match knowledge of at products gained in BIOENG 2704 to the needs of individuals. This will be taught using a model for assessing the individual, the context, the technology-user interface and an interdisciplinary team approach.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2708 - INDIV & SOCIAL EXPRN DISABILITY**
Course investigates psychological and sociological issues of viewing disability not as solely located within the individual but instead as the outcome of interaction between the impaired individual and society. Course focuses on the experience of being disabled, emphasis on both adjustment to disability and relationship to community foundations of stigmatization and discrimination toward people with disabilities and their pervasive and effect throughout all do mains of life will be examined.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2724 - ASSISTIVE TECHN FUNDING & POLICY**

Minimum Credits: 3

Maximum Credits: 3

Students to develop knowledge and skill in the process and strategies necessary to acquire assistive technology devices and services for people with disabilities. Course content will focus on the process of gathering information, assessment procedures, documentation, and funding sources. Advocacy and procedures for due process will also be reviewed for situations when funding sources are limited.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2725 - DESIGN FOR INJURY PREVENTION**

Minimum Credits: 3

Maximum Credits: 3

This course provides instruction for how to design a workplace to prevent occupational injuries. The course will primarily focus on preventing the three types of injuries, the injury mechanism, risk factors, tools for quantifying risk and engineering solutions will be covered. Upon completion of a course, students will be expected to develop custom engineering design solutions to prevent occupational injuries. Students will complete a project where they will design a solution to eliminate or reduce an existing hazard.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2731 - MOLECULAR MECHANISMS OF TISSUE GROWTH AND DIFFERENTIATION**

Minimum Credits: 3

Maximum Credits: 3

The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade
BIOENG 2751 - EXPERIMENT AND DESIGN ANALYSIS 2

Minimum Credits: 3
Maximum Credits: 3
The analysis of observations and measurements is a key component to determine the outcome of an experiment and typically provide the basis for interpretation of results. This course will allow students to learn about different approaches to analyze experiments, as well as provide a solid foundation of statistical analysis. The limitations of these approaches will be discussed and development of critical thinking by the student is encouraged.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2800 - NEUROTECHNOLOGY: CONCEPTS, PATIENTS, AND DEVICES

Minimum Credits: 3
Maximum Credits: 3
This survey course will introduce students to biomedical devices that interface with the nervous system. Course instructors and guest lecturers will discuss fundamental neurostimulation and recording concepts, patients who may benefit from these devices, and both existing and in-development technologies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY

Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties of Orthopaedic and Cardio Vascular Biomaterials, wear and corrosion of implant materials; fracture healing, inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOENG 3003 - TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Teaching practicum.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3020 - DESIGN AND SYNTHESIS OF BIOMEDICAL MATERIALS

Minimum Credits: 3
Maximum Credits: 3
This advanced biomaterials course targets graduate students already familiar with general concepts in biomaterials and organic chemistry, and want to learn more on how to design and modify or synthesize new biomaterial for specific biomedical applications. The course will be student driven using a guided literature search and question-and-answer format with minimal lecturing. The students are expected to be actively engaged in discussions and presentations. There will be 3-4 design modules, at the end of which a presentation and a paper will be submitted to summarize the rationale of the design and propose a feasible material synthesis route. The grade will be based on performance of these assignments. The class will meet twice a week for a 90 minute session.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3095 - GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Individual study program under guidance of faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 3602 - TMJ REGENERATION AND MECHANICS

Minimum Credits: 3
Maximum Credits: 3
The primary educational goal of this course is to instruct students in the anatomy and physiology of the temporomandibular joint (TMJ), which serve as gold standards for tissue regeneration approaches. Students will be exposed to current diagnosis and treatments of temporomandibular joint diseases, and TMJ occlusion. Major emphasis will be given to understanding biomechanics of musculoskeletal systems and mechanical testing of tissues, in order to apply this knowledge to enhance the function of the TMJ through the design of better therapies. Furthermore, students will also be instructed in tissue engineering efforts to regenerate the tissues of the temporomandibular joint, such as the TMJ disc and mandibular condyle.
Academic Career: Graduate
BIOENG 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 3760 - RES SEM: REGENERATIVE MEDICINE

Minimum Credits: 1
Maximum Credits: 1
Research seminar in regenerative medicine is geared towards providing updates information on topics in the field of regenerative medicine, tissue engineering and stem cell applications. Through biweekly seminars, the students will be acquainted to the recent advances in the ever-growing field of regenerative medicine. Experienced faculty will deliver lectures in this seminar series.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3944 - COMPOSITION, STRUCTURE, AND FUNCTION OF MINERALIZED TISSUES

Minimum Credits: 3
Maximum Credits: 3
Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 3997 - RESEARCH, PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOENG 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15
Ph.D. Dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Bioethics
BIOETH 2001 - ETHICS AND AGING

Minimum Credits: 3
Maximum Credits: 3
This course offers an overview of ethical issues in aging. Early sessions will explore the ethical implications of stereotypes and myths regarding aging. Turning to the context of health care, students will identify and analyze moral dilemmas that arise in the long-term and end-of-life care of older adults. Concepts and topics to be critically examined include: autonomy, dependency, elder abuse, and just resource allocation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2604 - CLINICAL PRACTICUM 1

Minimum Credits: 3
Maximum Credits: 3
Placements in different clinical settings to observe clinical ethics and medical sociology discussions.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2606 - CLINICAL PRACTICUM 2

Minimum Credits: 3
Maximum Credits: 3
Intensive observation experience in one clinical setting.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2658 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Issues in philosophy of medicine, with reference to American health care, including concepts of health and disease, normativity, causation, error, clinical diagnosis, prevention, and epidemiological risk.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2661 - THEORETICAL FOUNDATIONS

Minimum Credits: 3
Maximum Credits: 3
Survey of contemporary ethical thought with reference to its historical bases, intended to prepare students to read and think critically and creatively about the literature in applied ethics, especially bioethics and health policy.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2664 - BIOETHICS

Minimum Credits: 3
Maximum Credits: 3
Survey of major topics and methods in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.
BIOETH 2667 - BIOPower: Biopolitical Readings of the Body

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2668 - Sustainability in Latin America

Minimum Credits: 3
Maximum Credits: 3
Latín America hosts some of the most biologically diverse and productive ecosystems on Earth, yet economic and social development are frequently at odds with efforts to conserve and use these ecosystems sustainably. This upper-level seminar focuses on the issues surrounding environmental sustainability in Latin America from a holistic, interdisciplinary perspective. The course will start with a general introduction to the three legs of sustainability and sustainable development theory, as well as the ecology and evolution of Neotropical biodiversity. We will use published primary literature to explore the particular complexities of Latin American sustainable development, and analyze case studies of moments through history in which environmental issues were either championed or de-emphasized. The course will feature several guest lectures, optional seminars for extra credit, and discussions of current sustainability news. Students will be responsible for a final research project and presentation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOETH 2698 - Special Topics in Bioethics

Minimum Credits: 3
Maximum Credits: 3
Seminar on particular topics in bioethics; topics vary from term to term.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2902 - Directed Reading in Bioethics

Minimum Credits: 1
Maximum Credits: 3
Students discuss with instructor set readings in bioethics. Topics and readings may vary.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

BIOETH 2904 - MA Thesis in Bioethics

Minimum Credits: 1
Maximum Credits: 6
Research under the supervision of the advisor which culminates in the master's thesis.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOETH 2905 - MA Thesis Prospectus in Bioethics
BIOETH 2906 - MA THESIS RESEARCH IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

BIOETH 2907 - MA THESIS DEFENSE IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad HSU Basis

BIOETH 2990 - INDEPENDENT STUDY IN BIOETHICS

Minimum Credits: 1
Maximum Credits: 3
Students pursue a course of independent study under the supervision of a faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

Biomedical Informatics

BIOINF 2011 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, tele health, decision theory, and decision support, human-computer interfaces, system integration, the digital library, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2014 - BIOMEDICAL INFORMATICS PROJECT COURSE

Minimum Credits: 3
Maximum Credits: 3
The course consists of three main parts. In the first part of the course the projects are conceived. In the middle part, the projects are defined and designed. In the final part, the projects are carried out, analyzed, and reported. In all three phases, students will first have classroom discussions among themselves and the instructor about their ideas for that phase of the project. Next, they will work outside of the classroom on that project phase and write a report. Finally, they will orally present the main ideas of their report to the class. The instructor will provide written and oral feedback on each stage of the project, as it occurs.
Academic Career: Graduate
The field of translational bioinformatics emerged because of the recent advances in biotechnology with which several new types of patient and disease specific data are being created for large subpopulations. Computer science methods are being rapidly adapted to process and analyze this data, with the goal of drawing biologically and medically-relevant inferences. By analyzing these different types of data individually or integratively, it is now feasible to attempt deciphering biological root cause of a disease (at least the 'why' of the disease if not 'how'), to identify biomarkers, and to design personalized medicine.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Science is increasingly inter-disciplinary, and programming has become a valuable skill in many investigations. This course is designed to empower you with the ability to solve scientific problems through writing computer programs. Emphasis is placed on using the R language to solve biology problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

This course meets once each week for one hour. The research being presented will be taken from recent journal papers.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (people, data and knowledge, and evaluation).
BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information management, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).

BIOINF 2101 - PROBABILISTIC METHODS

Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks. Although other probabilistic models also will be studied. Medical applications are emphasized; however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. Understanding basic probability theory is helpful.

BIOINF 2103 - DESIGN AND ANALYSIS OF BIOMARKER STUDIES

Minimum Credits: 2
Maximum Credits: 2
The objective of this course is to identify, describe, and apply the statistical and epidemiological knowledge, tools, and perspectives necessary for effectively designing, analyzing, and interpreting biomarker studies (which may include diagnostic and medical tests, prognostic markers for prediction of future disease outcomes, and/or predictive markers for treatment response). The course will also focus on writing a funding proposal; students will develop a 3-4 page concept proposal as the class project.

BIOINF 2110 - CONCP SOFTWR PROJ ENGR HLTH CARE

Minimum Credits: 3
Maximum Credits: 3
This course examines how health care organizations implement both clinical and financial information systems. The course will study the implementation process and how to integrate systems to create the computerized patient record (CPR). Students will have the opportunity to learn about the industry-wide implementation data standards and how to manage them.

BIOINF 2117 - APPLIED CLINICAL INFORMATICS
This course is designed to provide an overview of the field of applied medical informatics. Students will learn about the myriad issues that arise when deploying information technology into clinical environments. Practical, real world solutions to the challenges of HIT will be addressed by experts involved in the day-to-day operations of these types of systems.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS**

Minimum Credits: 3  
Maximum Credits: 3  
This is an introductory probability and statistics course intended primarily for biomedical informatics students. The first part of the course covers probability, including basic probability, random variables, univariate and multivariate distributions, transformations, expectation, numerical integration, and approximations. The second part of the course covers statistics, including study design, classical parametric inference, hypothesis testing, Bayesian inference, non-parametric methods, classification, ANOVA, and regression. We will use R for statistical computing and applications. Examples and applications will focus on biomedical informatics and related discipline.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2119 - PROBABILISTIC METHODS IN ARTIFICIAL INTELLIGENCE**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations of artificial intelligence methods in search, probabilistic knowledge representation and reasoning, and machine learning with applications to biomedical informatics.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2120 - SYMBOLIC METHODS IN ARTIFICIAL INTELLIGENCE**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations of artificial intelligence methods in logical knowledge representation and reasoning, biomedical ontologies and terminologies and information retrieval. Prerequisites for this course include introductory mathematics and programming.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: BIOINF 2012 and 2015

**BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects. Topics include: critical success factors, test plan development and user interface design.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
BIOINF 2122 - CRITL REFLCTN BIOMD INFORMTCS

Minimum Credits: 3  
Maximum Credits: 3  
This course will showcase presentations from DBMI researchers and invited speakers from across campus and beyond. Session will be videotaped and presented as weekly one-hour recording. The on-site Q/A session afterwards will be substituted by a facilitated asynchronous online discussion in blackboard. Special emphasis will be put on peer- and self-assessment of the contributions to the online discussion which will promote higher-level thinking among the students.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Minimum Credits: 3  
Maximum Credits: 3  
This course explores challenges and opportunities in developing and supporting health information systems in developing-world settings by examining differences, and ways to both integrate and sustain systems in an appropriate way in low-resource settings. The course will review the current "state-of-the-art" in this field by looking at examples of systems currently deployed in the developing world, and explore opportunities for advancing this work through a series of case studies and hands-on exercises based on real-world scenarios.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

BIOINF 2125 - INFORMATICS AND INDUSTRY

Minimum Credits: 1  
Maximum Credits: 1  
The focus of the class is to provide an opportunity for students to interact with leading industry representatives and to learn techniques/tools that would enable them to market their skills in non-academic environments. We will invite speakers from various local, regional, national, and international industry relationships that we have established.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad SN Basis

BIOINF 2129 - INTERNSHIP IN GLOBAL HEALTH INFORMATICS

Minimum Credits: 3  
Maximum Credits: 3  
The internship in global health informatics will be expanded to accommodate 5 students from the US. Students will travel to Malawi to study global health informatics in low-resource settings alongside Malawian health and technology professionals. Students will have an opportunity to propose, design and develop a product or intervention relevant to solving a particular problem the group has identified.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

BIOINF 2131 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1  
Maximum Credits: 6  
This course is designed for people who want a practical experience in working with advanced information technology in the center for biomedical informatics.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis
BIOINF 2132 - SPECIAL TOPIC SEMINAR IN MEDICAL INFORMATICS

Minimum Credits: 1
Maximum Credits: 3
This course is designed for faculty to offer small groups of students a study course on a topic of mutual interest and concern in the faculty member's area of expertise.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2133 - PRACTICUM IN ADVANCED INFECTIOUS DISEASE AND PUBLIC HEALTH SURVEILLANCE (BIOSURVEILLANCE) TECHNOLOGY

Minimum Credits: 1
Maximum Credits: 6
This course is designed for people who want a practical experience in working with advanced bio surveillance technology in the real time outbreak and disease surveillance (rods) laboratory.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2134 - PUBLICATION AND PRESENTATION IN BIOMEDICAL INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course provides a practical overview of how to write a research manuscript and how to give a scientific talk. It is usually taken after completing the project course (BIOINF 2014). Students taking this course must have a completed research project that can be used to complete the course exercises. Each week, we will target a specific section of the manuscript or scientific talk. Didactic sessions describing common problems and approaches will alternate with student presentation and peer critique. The course also covers the details of the publication process. At the end of the course, a special presentation workshop gives students the opportunity to improve their talks using videotaping and debriefing methods. By the end of the course, students will have completed a research paper and a finalized colloquium presentation.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOINF 2204 - INT HLTH INFROMTCS TEC DENTY

Minimum Credits: 3
Maximum Credits: 3
An introduction to health information technology (HIT) for dentists, dental team members and others involved in dentistry with three objectives: (1) understand how hit can support the activities and processes of clinical dental care; (2) select and evaluate hit applications; and (3) plan, administer and manage hit implementations. Course covers topics such as dental care workflow and analysis; electronic dental records; dental data and their representation; controlled vocabularies and terminologies; human computer interaction; information design; computer-based decision support; strategic planning; requirements analysis; evaluating technology; managing human resources for it; planning and implementing hit; basics of hardware and software; and privacy, confidentiality and security of patient information.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2025 - RESEARCH ROTATION 1

Minimum Credits: 1
Maximum Credits: 6
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
BIOSC 2026 - RESEARCH ROTATION 2

Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2027 - RESEARCH ROTATION 3

Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. BIOSC 2040 - SEMINAR IN MCDB

Minimum Credits: 2
Maximum Credits: 2
Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data. A writing component is also included.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BIOSC 2050 - STUDENT RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
In this course, students present their research to faculty, students and postdocs.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2055 - SCIENCE COMMUNICATION: PREDOCTORAL FELLOWSHIPS & GRANTS

Minimum Credits: 1
Maximum Credits: 1
The goals of this course are to inform students about the tools and background needed to prepare for seminar and poster presentations and submit pre-doctoral fellowships and grants.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2056 - SCIENCE COMMUNICATION: SEMINAR & POSTER PRESENTATIONS
Minimum Credits: 1
Maximum Credits: 1
The goals of this course are to prepare students for oral and written presentation of their work. Topics will include seminar preparation, maintaining linear train of thought, balancing data with context, data presentation as a reinforcement tool, preparing for 15-, 30- and 45-minute talks, preparing for broad and narrow scientific audiences, speaking with the general public, preparation of useful abstracts, assembly of effective posters, effective presentation of posters, tips and tricks for fielding questions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2057 - SCIENCE COMMUNICATION: PAPERS

Minimum Credits: 1
Maximum Credits: 1
This course covers the process of writing scientific papers, including primary data papers, review articles, and general opinion pieces. Topics include strategies for data organization, figure preparation, targeting the introduction for the audience, logic flow in the results, and focusing the discussion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2058 - ETHICAL PRACTICES IN SCIENTIFIC RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course familiarizes students with areas of ethical concern in scientific research, including data integrity, intellectual property, plagiarism, collaboration and cooperation, data sharing, treatment of animal and human subjects, and responsibilities to the general public.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2075 - MOLECULAR EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2090 - ADVANCED DEVELOPMENTAL BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
BIOSC 2100 - CELLULAR STRUCTURE AND MORPHOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will explore biological processes within eukaryotic cells. Topics include: mechanotransduction/biomechanics; cellular interactions; polarity; cytoskeletal dynamics; cell-matrix interactions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2105 - CELL SIGNALING

Minimum Credits: 2
Maximum Credits: 2
This course will examine the pathways used to transmit information within and between cells. Topics include: receptors with enzymatic activity; RTK and map kinase; protein scaffolds; BMP-, WNT- and SHH-pathways; g-protein coupled receptors; calcium and camp-dependent signaling; excitation and ion channels; mechanisms of cell death.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2110 - MICROBIAL DIVERSITY

Minimum Credits: 2
Maximum Credits: 2
This course will survey important genetic, genomic, physiological, cell biological and developmental processes that distinguish viral, prokaryotic and unicellular eukaryotic organisms. Topics include: bacteriophages, plants and animal viruses; bacterial intracellular pathogens, parasites and symbionts of plants and animals; eukaryotic pathogens.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOSC 2121 - BIOSTATISTICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2130 - GENETICS OF MODEL ORGANISMS

Minimum Credits: 2
Maximum Credits: 2
This course will compare genetic approaches in a variety of model systems. Topics include: genetics screens and selections; linkage mapping; genetic manipulation in haploid and diploid model systems; epigenetics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2140 - GENOMICS

Minimum Credits: 2
Maximum Credits: 2
Advances in molecular biology have enabled the collection of a great deal of sequence data. Genomic studies seek to understand the organization of, and information embedded within, entire genomes. Students will learn a variety of techniques in structural genomics (finding information within genomes), functional genomics (describing gene function and interaction), comparative genomics (assessing how that information changes) and metagenomics (assessing the gene content of multiorganism communities) directed at using genome sequence data to address questions of interest.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### BIOSC 2147 - PROTEIN STRUCTURE AND FUNCTION

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will focus on the biophysical and biochemical characterization of proteins. Topics include: methods for determining protein structure; protein folding; molecular dynamics and modeling protein movement; linking structure and function; protein-DNA interactions.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### BIOSC 2150 - NUCLEIC ACIDS

**Minimum Credits:** 2  
**Maximum Credits:** 2  
BIOSC 2150 focuses on the molecular biology of DNA and RNA, and how biological information is stored, replicated, recombined, and processed. Topics to be discussed include: DNA replication and its regulation; DNA segregation; homologous, illegitimate and site-specific recombination; DNA repair; structural and functional roles of RNA in the activity and regulation of telomerase; small nuclear RNAs and the spliceosome; processing of ribosomal and transfer RNAs; regulation by micro RNAs and long non-coding RNAs. There will be an emphasis on the primary literature.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### BIOSC 2155 - GENE EXPRESSION

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will examine the regulation of gene expression from a variety of standpoints. Topics to be discussed include: transcriptional mechanisms and regulation in prokaryotes and eukaryotes; MRNA splicing; RNA processing; RNAI; chromatin.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### BIOSC 2200 - TEACHING BIOLOGICAL SCIENCES

**Minimum Credits:** 1  
**Maximum Credits:** 3  
Teaching biology is a complex and multi-faceted challenge. It requires the integration of deep disciplinary knowledge with a functional understanding of learning theory and the development of practical skills for working with students. Teaching biological sciences is designed to help you explore multiple strategies for effective teaching and learning and refine your own understanding of biology through efforts to become a better science communicator. The course has both seminar and project based components. You are encouraged to coordinate your work in this course with existing teaching opportunities but this is not required.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis

### BIOSC 2320 - POPULATION BIOLOGY
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on ecological and evolutionary processes at the population level. We will learn how to represent ecological and evolutionary dynamics using increasingly realistic mathematical models. We will first explore population ecology including models of single populations, metapopulations, and interactions between species. We then shift to population and evolutionary genetics studying how the mechanisms of evolution interact with each other. Finally, we will study the explicit interaction between ecological and evolutionary processes that can occur over short timescales.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**BIOSC 2350 - EVOLUTION**

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to biological evolution. The first half of the course will address the history of evolutionary theory, inheritance and variation, population genetics, natural selection, speciation, and adaptation. The second part will cover evolutionary history, with an emphasis on the fossil record, phylogenetics, and the origin of evolutionary novelties, including molecular characters. Emphasis throughout will be placed on how the history of life is studied in the context of scientific methodology.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Biological Sciences (PHD)

**BIOSC 2351 - ADVANCED EVOLUTION**

Minimum Credits: 2  
Maximum Credits: 2  
This course explores factors that influence inheritance. Topics include: gene-by-environment interactions; polymorphism and polyphenism; sexual dimorphism; causes and consequences of individual variation; extended phenotypes; nutrition and the phenotype; fitness landscapes; mutation and novelty; trait mapping onto phylogenies.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**BIOSC 2355 - SPECIES INTERACTIONS**

Minimum Credits: 2  
Maximum Credits: 2  
This course examines the interactions between species in a variety of contexts. Topics include: coevolution, mutualism & parasitism; plant-herbivore coevolution; cospeciation; hybridization and signaling of species identity; predation, predator-avoidance and aposematism; predator-prey interactions; foraging ecology; competition; tri-tropic level interactions; herbivory; context-, condition- and trait-dependent species interactions.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**BIOSC 2361 - ADVANCED ECOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This course examines the relationship between organisms and their environment. Topics include: colonization strategies; succession; biogeography; climate change; trait-mediated assemblages; spatial models; trophic cascades.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
**BIOSC 2370 - EVOLUTIONARY GENETICS**

Minimum Credits: 2  
Maximum Credits: 2  
This course will cover a wide variety of traits and model organisms in which genetic and developmental studies of evolution have been performed. Topics and concepts will include phylogenetics, population genetics, the evolution of novelty, host-pathogen interactions, and multicellularity. The course will consist of lectures, journal article discussions, and essays relevant to the lecture topic.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**BIOSC 2435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS**

Minimum Credits: 3  
Maximum Credits: 3  
This course in ecophysiology is a physiology course taught from an ecological and evolutionary perspective. The organismal, ecological, and evolutionary significance of physiological function will be emphasized along with molecular and cellular mechanisms.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**BIOSC 2450 - BIOLOGICAL SCIENCES SEMINAR**

Minimum Credits: 2  
Maximum Credits: 2  
Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Biological Sciences (PHD)

**BIOSC 2500 - CURRENT TOPICS IN ECOLOGY**

Minimum Credits: 1  
Maximum Credits: 3  
This course will cover population ecology, community ecology, and ecosystem ecology. A strong undergraduate background in ecology will be assumed. Some lectures will be included, but most emphasis will be placed on reading and discussing papers from the primary literature, including papers of both historical and current interests.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2540 - SEMINAR IN ECOLOGY AND EVOLUTION**

Minimum Credits: 2  
Maximum Credits: 2  
Students will participate in the critical review of the current literature relating to a topic in ecology. Specific topic is to be selected later.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Global Studies

**BIOSC 2545 - THE MATHEMATICS OF BIOLOGY**
This course uses examples from across biology to illustrate how simple mathematical models can increase our understanding of biological systems. We will focus on several foundational modeling approaches, including systems of difference equations, matrix models, probability, and statistical data analysis. Students will discover how these approaches are used, their strengths and limitations, and how they could be extended to more complex problems. Students should be prepared to use both spreadsheet programs and scripts, written in a language such as Python or R, to explore these models.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2570 - ENVIRONMENTAL SCIENCE TEACHER'S WORKSHOP**

Minimum Credits: 1  
Maximum Credits: 3  
Teachers spend five days at Pymatuning Laboratory of Ecology exploring the relationship between land use, water quality and aquatic community structure. Lectures, field work, data analysis, interpretation of results. Includes development of modules for classroom use.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis

**BIOSC 2810 - MACROMOLECULAR STRUCTURE AND FUNCTION**

Minimum Credits: 3  
Maximum Credits: 3  
Course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; the size, shape and general properties of the biopolymers in aqueous systems; and the relation between structure and function, particularly in transport (hemoglobin) and in catalysis (enzymes).  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2840 - REGULATION OF MEMBRANE TRAFFIC**

Minimum Credits: 2  
Maximum Credits: 2  
Course analyzes membrane/protein traffic along both the biosynthetic and endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g proteins (both heterotrimeric and small), coat proteins (coatamer 1 and 2 and adaptors), signal transduction cascades (pkc, pka, ip3, etc), and snare complexes in protein trafficking.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2940 - MOLECULAR BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into MA, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation relates to the observed properties and behavior of the organism.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
BIOSC 2950 - SEMINAR JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
Research papers will be discussed prior to departmental seminar.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

BIOSC 2960 - DEPARTMENTAL SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students will attend lectures on selected topics of current research in the biological sciences. The lecturers will primarily be invited scientists from outside the university, with a few lectures by faculty from within the department or other departments in the university.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2970 - TEACHING OF BIOLOGICAL SCIENCES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2972 - TEACHING MINOR BIOLOGICAL SCIENCES

Minimum Credits: 1
Maximum Credits: 4
Graduate students in the department of biological sciences have the option of completing the requirements for a teaching minor, to be awarded concomitant with receipt of their advanced degree from this department.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1
Maximum Credits: 1
This seminar series is designed for Ph.D. students and post-doctorate fellows interested in pursuing an academic career and wish to gain didactic knowledge and skills related to teaching in a science, technology, engineering and mathematics (STEM) classroom. Experienced faculty provide topics and discussion based seminars.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOSC 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1
Maximum Credits: 1
Designed for graduate students and postdocs preparing for academic careers in the stem disciplines, this course provides an introduction to the scholarship of teaching and learning (SOLT). This is the second course in a series; however, the former course (3001) is not a required prerequisite. The course will utilize material presented in a massive open online course (MOOC) available through coursera.org and sponsored by the center for the integration of research, teaching and learning (CIRTL). Participants will learn about effective teaching strategies and the research that supports them in addition to learning how to collect, analyze, and act upon their own evidence of student teaching. Topics include but are not limited to: 1. Learning through diversity, 2. Cooperative learning/peer instruction, 3. Inquiry-based labs, 4. Problem-based learning, 5. Flipped classroom pedagogy. Further, participants will learn the process for developing a teaching as research plan as well as the role of human subjects consent for classroom based research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

BIOSC 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

Biomedical Sciences

MSBMS 2010 - BIOCHEMISTRY AND PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2020 - COMPREHENSIVE ANALYSIS OF DISEASE

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
MSBMS 2021 - COMPREHENSIVE ANALYSIS OF DISEASE 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to give the students the opportunity to integrate all the knowledge accumulated during the program in a comprehensive study of disease states. Small groups of students will work collaboratively to develop an in-depth analysis of a specific disease, from the diagnosis to the pathogenesis, the molecular and cellular basis and treatment options currently available. Students will also identify and analyze the gaps in knowledge and critical needs to be filled. Each group of students will work in a web-based platform to develop an knowledge-based teaching/research study. Class activities will include presentations by each group of students and critical discussions of the current topics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2030 - HISTOLOGY AND CELL FUNCTION IN HEALTH AND DISEASE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2040 - METHOD AND LOGIC IN BIOMEDICINE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2050 - HUMAN ANATOMY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2060 - FOUNDATIONS OF SUCCESSFUL BIOMEDICAL CAREER PLANNING AND DEVELOPMENT

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)
MSBMS 2061 - FOUNDATIONS OF SUCCESSFUL BIOMEDICAL CAREER PLANNING AND DEVELOPMENT II

Minimum Credits: 1
Maximum Credits: 1
The course provides foundational training in career planning and professional development. Key skills that students build are: Increasing your capacity for self-directed career development; Fostering life-long career management habits; Maximizing your scholarly training success; Shaping positive career outcomes. Students will engage in experiential learning, small-group discussions, and peer mentoring. These different approaches enable individually relevant and self-constructed understandings of career development, consistent with expectations of independence in scholarly activities. Areas for discussion include: self-assessments, exploration of different career options, how to set goals, career adaptability, and other topics identified by students. A final self-authoring paper will be required.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2062 - PROFESSIONALISM AND NON-COGNITIVE DEVELOPMENT 1

Minimum Credits: 1
Maximum Credits: 1
The course provides foundational training in professionalism and non-cognitive development: students will engage in experiential learning, small-group discussions, peer mentoring, and journaling. Students will explore a wide range of topics such as burnout prevention, health disparities, and narrative interviewing. Non-cognitive skills will also be developed such as emotional intelligence through journaling. This course is required for the "BMP-Scope" experiential program.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2063 - PROFESSIONALISM AND NON-COGNITIVE AND DEVELOPMENT PART 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSBMS 2074 - EXPERIENTIAL LEARNING

Minimum Credits: 1
Maximum Credits: 10
The bmp offers experiential learning activities in the areas of community service, patient volunteering, laboratory research and clinical shadowing. For this course, the bmp student and instructor plan onsite experiential learning activities designed to provide goal oriented outcomes for the student. Students are expected to take initiative to find suitable matches and schedule several experiential sessions. Available opportunities are posted on the bmp website and matches are made each term to optimize the experiential benefit for all bmp students. Students are responsible for documenting all experiential dates and hours, along with what was learned in each activity. Students are also responsible for ensuring all activities are approved by the instructor. Students will also provide a five page maximum reflect on the experiences at the end of the term and a laboratory report for any research conducted, both of which are graded. Students are also required to ensure they complete the appropriate onsite requirements for the number of credits they are registered for.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2075 - INDEPENDENT STUDY TOPIC EXPLORATION
Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

MSBMS 2080 - CELL BIOLOGY PATHWAYS IN TREATMENT OF DISEASE

Minimum Credits: 2
Maximum Credits: 2
This course will explore how basic cell biology and genetic investigations have revealed the theoretical underpinnings of, and revolutionized approaches to the understanding of, the basis of selected diseases and uncover tractable approaches to treatments or cures. A set of major cell pathways will be used to illustrate how new drug targets can be identified and can lead to dramatic advances in medical treatments. The course blends traditional lectures with self-directed student activities to prepare the students for interactive lecture discussions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2090 - CELL SIGNALING AND PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course examines the principles of drug action. The course covers the basic principles of pharmacodynamics and pharmacokinetics. Particular emphasis is placed on the concept that the rational use of drugs is based on the understanding of the interactions, signaling mechanisms, and functional outcomes at the modular and cellular level.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Biomedical Sciences (BIOSCI-MS)

MSBMS 2101 - BIOMEDICAL MASTERS PROGRAM PROFESSIONAL COMMUNICATION REFLECTION

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

MSBMS 2110 - ORGAN SYSTEMS PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course discusses the integrative physiology of all of the major organ systems, including the cardiovascular system, respiratory system, renal system, gastrointestinal system, and reproductive system. The systems will be considered in the context of the function of the body as a whole, and how they respond during challenges (e.g. exercise) and pathological states. Current research related to the functioning of these systems will be emphasized throughout the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

MSBMS 2200 - CLINICAL PHARMACOLOGY

Minimum Credits: 2
Maximum Credits: 2
This is an elective course in Clinical Pharmacology mostly based on clinical cases. These will include cases in clinical (applied) pharmacokinetics,
drug-drug interactions and evidence-based pharmacotherapy. This course uses a combination of pre-class preparation and in-class discussion and analysis of each case.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Satisfactory/No Credit

## Biostatistics

### BIOST 2000 - TEACHING PRACTICUM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide doctoral students with an opportunity to obtain teaching experience. This course is intended for doctoral students during their dissertation stage. Teaching experience will enhance the professional growth of students. Students will further develop oral and written communication skills and an art for explaining material, which is an integral part of a biostatistician's career.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package (Minitab) as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Graduate School of Public Health; PLAN: Excluded Plans = Biostatistics(DPH, PHD, MPH, MS, MSH)  
**Course Attributes:** Global Studies

### BIOST 2016 - SAMPLING DESIGN AND ANALYSIS

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is an applied statistical methods course designed to provide students with a working knowledge of introductory and intermediate-level sample designs and associated methods of statistical analysis along with a basic understanding of the theoretical underpinnings. Emphasis is placed on sampling human populations in large communities. Students will also learn statistical software used in survey data analysis, including sample selection and survey procedures in the STATA software package. Lecture topics include: simple probability samples, stratified sampling, ratio and regression estimation, cluster sampling, sampling with unequal probabilities, variance estimation and weighting in complex surveys, two-phase sampling, estimating population size and estimation of rare populations and small areas. The course will consist of one weekly 2-hour lecture and one class devoted to student presentations related to a term project assigned at midterm.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BIOST 2011 or 2039 or 2041; PROG: Graduate Sch of Public Health (PPBHL)

### BIOST 2021 - SPECIAL STUDIES

**Minimum Credits:** 1  
**Maximum Credits:** 15  
Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.

**Academic Career:** Graduate
BIOST 2025 - BIOSTATISTICS SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Biometry seminars introduce the students to current health problems involving the application and development of biostatistics methods and theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

BIOST 2036 - INTRODUCTION TO HEALTH DATA SCIENCE

Minimum Credits: 2
Maximum Credits: 2
This course will teach students methods and concepts in data science that are motivated by real life problems in public health. Students will become familiar with data science terms such as data wrangling. Students will learn the concepts of exploratory data analysis, data cleaning, data wrangling, and visualization. Students will learn the necessary skills to tidy, manage, and visualize data and communicate results. This course will mainly use the R programming language but will also teach certain concepts in SQL and Python. The course lectures will cover the following general themes: data structures and representation, data wrangling and processing, computational tools and techniques, and case studies illustrating steps of analysis of real data, including examples from public health.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biostatistics (MS or PHD)

BIOST 2038 - FOUNDATIONS OF STATISTICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
The course covers basic theory of probability and statistical inference with a focus on appropriate use of standard methods and construction of new statistical inference tools. Topics covered in the first half include joint, marginal, and conditional probabilities; random variables and functions thereof; distribution characteristics of random variables; basic asymptotic theory and univariate theorems including Chebyshev's inequality, law of large numbers, and central limit theorem. Topics covered in the second half include principles and methods of constructing estimators (e.g., MLE, MME, CRLB), confidence intervals, and hypothesis testing (including Neyman-Person and Generalized Likelihood Ratio tests); data reduction principles and techniques, and their relationship to optimal statistical inference (e.g., sufficiency, Rao-Blackwell principle); basic likelihood-based, exact, conditional, and asymptotic statistical inference.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biostatistics (MS)

BIOST 2039 - BIOSTATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
This course is an introductory biostatistics methods course for biostatistics graduate students, other quantitative public health students, and health career professionals who will make use of statistical methods in research projects, interpreting literature and possibly develop new biostatistical methods in the future. This class is intended for students needing a more research-oriented approach than that provided in BIOST 2011 and an approach with a greater emphasis on mathematical foundation than provided in BIOST 2041. Students in BIOST 2039 are expected to have a working knowledge of calculus, including multivariable differentiation and integration. Topics covered in this course include exploratory and descriptive analyses, probability, estimation and hypothesis testing. One and two sample problems will be considered for both continuous and discrete variables. ANOVA, regression, correlation and nonparametric methods will be discussed. R will be used extensively for data analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: BIOST-MS, PHD

BIOST 2040 - ELEMENTS OF STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Covers generating functions and convolutions of random variables, the poison and compound poison distributions, branching processes, random walk, and the gambler's ruin problem, Markov chains, and simple birth and death processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2043

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2

Minimum Credits: 3
Maximum Credits: 3
More techniques are given for the application of statistics to actual data with emphasis on distribution-free and multivariate methods. Interpretation of results and concepts will be stressed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2041

BIOST 2043 - INTRODUCTION TO STATISTICAL THEORY 1

Minimum Credits: 3
Maximum Credits: 3
Covers joint, marginal, and conditional probabilities; distributions of random variables and functions of random variables; expectations of random variables and moment generating functions; law of large numbers; central limit theorem.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BIOST 2044 - INTRODUCTION TO STATISTICAL THEORY 2

Minimum Credits: 3
Maximum Credits: 3
Covers elements of statistical inference; sampling distributions of estimators; Rao-Cramer's Inequality; problems of testing statistical hypotheses; Neyman-Pearson lemma; likelihood ratio tests.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2043
BIOST 2046 - ANALYSIS OF COHORT STUDIES

Minimum Credits: 3
Maximum Credits: 3
This introductory applied course in statistical modeling focuses on maximum likelihood and related regression methods for the analysis of cohort data. Topics include generalized linear models, generalized estimating equations, and generalized linear mixed models. The course emphasizes logistic and poisson regression, and discrete survival models with time-dependent covariates. Students analyze several cohort data sets, assess the adequacy of their models, and interpret their results.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2042 and 2049

BIOST 2049 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in statistical modelling intended for Masters or PhD students in biostatistics or other disciplines who have already had basic training in statistical methods. The course focuses on all types of regression methods with the following learning objectives: To fit and interpret linear regression models with multiple continuous and/or categorical predictors. To fit and interpret generalized linear models (GLMs) with emphasis on logistic and Poisson regression. To justify and apply standard modelling procedures using data, including model interpretation and assessment of model adequacy. To analyze data sets taken from the fields of medicine and public health. To develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2039 or BIOST 2041

BIOST 2050 - LONGITUDINAL AND CLUSTERED DATA ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
This introductory course in statistical modeling is intended for MS students in biostatistics and PhD students in biostatistics or epidemiology in their second year of graduate work. This course may be thought of as the third methods course in Biostatistics following BIOST 2041/2039 and BIOST 2049. The course focuses on regression methods for the analysis of longitudinal or more generally clustered data with emphasis on generalized estimating equation. The course objectives are to introduce generalized estimating equations (GEEs), mixed models, and generalized linear mixed models from an applied perspective to analyze longitudinal and clustered data, to understand the justification and applicability of standard procedures to standard problems, including model interpretation and assessment of model adequacy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049; PROG: Graduate Sch of Public Health

BIOST 2051 - STATISTICAL ESTIMATION THEORY

Minimum Credits: 3
Maximum Credits: 3
Fisher's information; Rao-Cramer Inequality and Sufficient Statistics; Bhattacharyya Bounds; Rao-Blackwell Theorem; Methods of Moments; the Method of Maximum Likelihood; Newton-Raphson Method and Rao's Scoring for Parameters; estimation of several parameters; order statistics and life testing problems; estimation with censored data and survival analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2039 and 2044; PLAN: Biostatistics (PHD)

BIOST 2052 - MULTIVARIATE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Multivariate normal distribution, estimation of the mean vector and covariance matrix, distributions and uses of simple, partial and multiple
correlation correlation coefficients, generalized T2 statistic, distribution of the sample generalized variance, Multivariate Analysis of Variance and the
Multivariate Behrens-Fisher problem. Multivariate methods applied to repeated measures analysis, factor analysis, and discriminant analysis.
Beginning of the course emphasizes theory; later, applications and computational methods emphasized. Lectures are of current and classical
literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2044

BIOST 2054 - SURVIVAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Introduces the student to the design considerations and statistical analysis of clinical trials. Covers the theoretical aspects of various models in
reliability theory and the proportional hazards model, as well as the more applied problems of interpreting specific data sets and designing large-scale
trials.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIOST 2039 and 2044

BIOST 2055 - INTRODUCTORY HIGH-THROUGHPUT GENOMIC DATA ANALYSIS 1: DATA MINING
AND APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level introduction and overview of modern high-throughput genomic data analysis. It is designed for graduate students in
biostatistics and human genetics who are interested in the technology and elementary data mining of high-throughput genomic data (including but not
limited to classical expression arrays, various array-based applications, next-generation sequencing and proteomics). The course is also helpful for
biology students with basic quantitative training (e.g. two elementary statistics courses and R programming) who have interests in understanding the
intuition and logic underlying the data analysis methods. R is the major language used in the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039; PLAN: Biostatistics (MS or PHD)

BIOST 2056 - INTRODUCTION TO DIAGNOSTIC TEST EVALUATION AND ROC ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
The course offers an introduction to concepts and approaches for statistical assessment of diagnostic systems and ROC analysis. The covered
material includes different measures of diagnostic accuracy, aspects of the design of accuracy studies, statistical estimation and hypothesis testing,
sample size calculation and some advanced topics. General prerequisites include knowledge of basic statistical concepts and approaches related to
estimation and hypothesis testing; some knowledge of regression modeling and SAS is desirable.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 and 2044; PLAN: Biostatistics (PHD,MS)

BIOST 2058 - SCIENTIFIC COMMUNICATION SKILLS

Minimum Credits: 2
Maximum Credits: 2
This course is meant to help students develop oral, visual and written scientific communication skills and to familiarize students with research resources. Students may use their own research topic, including work on a thesis or dissertation, or help will be provided in selecting one.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BIOST 2059 - CONSTRAINED STATISTICAL INFERENCE WITH APPLICATIONS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is an applied biostatistics course for biostatistics graduate students, other quantitative public health students, and health career professionals who will make use of statistical methods in research projects and possibly develop new biostatistical methods in the future. While this course is intended to be an application oriented course motivated by real scientific problems, it will rely on some statistical theory. Students are expected to have basic understanding of statistical theory at the level of BIOST 2044 (Introduction to Statistical Theory 2) and have applied analysis skills at the level of BIOST 2049 (Applied Regression Analysis). Additionally, students are expected to have working knowledge of the programming language R. Topics covered in this course include: (a) Brief review of some important concepts from BIOST 2043, BIOST 2044 and BIOST 2049, such as parametric and nonparametric estimation and testing of hypotheses, linear fixed and mixed effects models, best linear unbiased predictor (BLUP) and generalized linear models. (b) Some real world motivating examples of various types of constraints on parameter spaces. Reasons for constrained inference. (c) Estimation of parameters and testing of hypotheses under inequality constraints in a variety of settings - challenges and solutions. Various estimation and testing procedures such as Pool Adjacent Violators Algorithm (PAVA), Restricted Maximum Likelihood Estimation (RMLE), Isotonic Regression, Likelihood Ratio Test (LRT), Williams' test, Dunnett's test, Jonckheere-Terpstra test. Substantial reduction in samples sizes and gain in power when using constrained inference based methods in comparison to standard methods. (e) Resampling methods for constrained inference, why they fail for confidence intervals but are suitable for some testing problems. (f) Nonparametric problems - various notions of orderings of random variables, univariate and multivariate analysis. (g) Applications in clinical trials, toxicology, high dimensional gene expression studies, microbiome, cell-cycle and circadian clock.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: BIOST 2044 and BIOST 2049

**BIOST 2061 - LIKELIHOOD THEORY AND APPLICATION**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The purpose of this course is to introduce the student to modern likelihood theory and its applications. The course will cover maximum likelihood theory, profile likelihood theory, pseudo likelihood theory and generalized estimating equations. The course is taught at a doctoral level and much of the theory is illustrated through applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PREQ: BIOST 2044

**BIOST 2062 - CLINICAL TRIALS: METHODS AND PRACTICE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course lectures integrate web-based material covering fundamental concepts in the design and conduct of modern clinical trials. Topics include: experimental designs, interim monitoring, analysis methods for comparative clinical trials, ethical, organizational, and practical considerations of design, case studies, and international guidelines for publication of trials in major journals, and meta-analyses.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PREQ: BIOST 2039 and 2093; PLAN: Biostatistics (MS,MPH, or PHD)

**BIOST 2063 - BAYESIAN DATA SCIENCE**
Minimum Credits: 3
Maximum Credits: 3
This is a course in Bayesian methods for applied statistics and data science whose broad goal is to provide students with the skills needed to be able to select, conduct, report and interpret appropriate Bayesian analyses for a wide variety of applied problems. General topics covered include Bayesian concepts of statistical inference, Markov chain Monte Carlo and other computational methods, linear, hierarchical and generalized linear models, model selection and diagnostics, and Bayesian learning. The course explores the use of the popular and free software packages R, JAGS and Stan for conducting Bayesian analyses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (BIOST 2039 or 2041) and BIOST 2049

BIOST 2065 - ANALYSIS OF INCOMPLETE DATA

Minimum Credits: 3
Maximum Credits: 3
This course will present missing-data problems in statistics and discuss naive methods such as complete-case analysis, available-case analysis and imputation; standard likelihood-based methods, theory and application of multiple imputation, data augmentation, Gibbs sampler, and some recently developed methodologies in the missing-data literature and related fields.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049 and 2051 and 2061

BIOST 2066 - APPLIED SURVIVAL ANALYSIS: METHODS AND PRACTICE

Minimum Credits: 2
Maximum Credits: 2
This course covers fundamental concepts and methods important for analysis of datasets where the outcome is the time to an event of interest, such as death, disease occurrence or disease progression. Topics include: basic methods for summarizing and presenting time-to-event data in tabular form and graphically as life tables, non-parametric statistical techniques for testing hypotheses comparing life tables for two or more groups; approaches to fitting the semi-parametric Cox proportional hazard model and other commonly used parametric models that incorporate study co-variables, methods for assessing goodness-of-fit of the models, and sample size considerations. In addition to didactic lectures, there are group projects that involve analysis of datasets and presentation of analytic reports in the classroom.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049; PLAN: Biostatistics (PHD,MS)

BIOST 2069 - STATISTICAL METHODS FOR OMICS DATA

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to cover popular statistical and computational methods for high-throughput omics data analysis. With the rapid advances of many omics technologies, the course will focus on the fundamental concepts of various topics (e.g. data preprocessing, association analysis, causal mediation analysis, differential analysis, statistical learning, pathway analysis, etc.) and their specific applications to different omics data types (e.g. microarray, next-generation sequencing, single cell sequencing, mass spectrometry, microbiome, etc.). The major target audience is graduate students (master or PhD students) interested in omics data analysis and related research. Through homework problem sets, computer labs and a final project, students train with hands-on materials to understand the methods, implement the algorithms and interpret results in real omics applications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pre-reqs: BIOST 2049; AND BIOST 2038 OR BIOST 2043. PLAN: BIOST-MS or BIOST-PHD Students are required to have basic R programming ability, which is provided through the three prerequisite courses.
BIOST 2078 - STATISTICAL LEARNING IN HIGH-DIMENSIONAL DATA WITH OMICS APPLICATIONS

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to introduce theories and algorithms for statistical analysis of high-throughput genomic data. Emphases will be given to high-dimensional data analysis and theories behind the commonly used methods. This course is designed for graduate students who already have sufficient statistical background, have basic knowledge of various high-throughput genomic experiments (e.g. already finished BIOST 2055 or MSCBIO 2070) and wish to learn advanced statistical theories for bioinformatics and genomics research. Students are expected to have programming experiences in R (e.g. BIOST 2094) or in other low-level languages such as C, C++, Java and Fortran. The course will meet four hours per week for half a semester.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 and 2043; PLAN: Biostatistics (MS, PHD)

BIOST 2079 - INTRODUCTORY STATISTICAL LEARNING FOR HEALTH SCIENCES

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is a graduate level course to introduce basic concept and methods for statistical learning with emphasis on modern health science applications. The syllabus includes linear regression with regularization, supervised machine learning, unsupervised clustering, dimension reduction and other special topics (e.g. Bayesian network and hidden Markov model). Target audience will be second year Biostatistics master students or early PhD students with interests in statistical learning techniques for health science data. Through homework problem sets, computer labs and a final project, students train with hands-on materials to implement methods and interpret results in real applications.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2039 and 2043 and 2049; PLAN: Biostatistics(MS or PHD); Students are expected to have programming experiences in R or in some low-level languages such as C, C++, Java and Fortran.

BIOST 2080 - ADVANCED STATISTICAL LEARNING

Minimum Credits: 2
Maximum Credits: 2
This is a 2-credit course in advanced statistical learning, covering topics related to the statistical interpretation and theory behind machine learning models/methods. Emphases will be given to in-depth derivation of models/algorithms from topics covered in BIOST 2079 (Introductory Statistical Learning for Health Sciences) as well as additional topics on modern statistical learning methodologies, with special focus on methods for health science applications. This course is designed for graduate students in the Department of Biostatistics and other interested graduate students who already have sufficient statistical and programming background. Students are expected to be familiar with R. Experience in C/C++, Python or Matlab may be helpful, but is not required. Programming skills/training shall be demonstrated by previous programming (or programming heavy) courses in R, Python, Matlab, C/C++, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049 and BIOST 2079; Special Instructions: Programming skills/training shall be demonstrated by previous programming (or programming heavy) courses in R, Python, Matlab, C/C++, etc.

BIOST 2081 - MATHEMATICAL METHODS FOR STATISTICS

Minimum Credits: 3
Maximum Credits: 3
Differentiation and integration of functions of several variables. Infinite sequences and series. Fundamentals of matrix algebra. Class examples and homework problems will emphasize applications to probability and statistics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biostatistics (PHD, MS, MPH)

**BIOST 2083 - LINEAR MODELS**

Minimum Credits: 3  
Maximum Credits: 3  
Acquaints students with linear model techniques for analyzing both balanced and unbalanced data. The topics covered include generalized inverses, orthogonal contrasts with unbalanced data, and analysis of covariance. Analysis with computer packaged programs is discussed.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: BIOST 2044

**BIOST 2086 - APPLIED MIXED MODELS ANALYSIS**

Minimum Credits: 3  
Maximum Credits: 3  
Mixed model analysis provides a new approach to modeling which allows one to relax the usual independence assumptions and take into account complicated data structures. This course will consider all types of mixed models into a general framework and consider the practical implications of their use. Topics will include; normal mixed models, generalized mixed models, and mixed models for categorical data, repeated measures data analysis and cross-over trials with mixed models. Software for fitting mixed models will be discussed.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: BIOST 2083

**BIOST 2087 - BIOSTATISTICS CONSULTING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
Provides advanced students (second-year masters and doctoral) with exposure and practical experience in consulting on the bio statistical aspects of research problems arising in the biomedical or other allied fields. Students initially under the supervision of a faculty member participate in discussions with investigators leading to the design and/or analysis of a current research problem.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade

**BIOST 2093 - SAS FOR DATA MANAGEMENT AND ANALYSIS**

Minimum Credits: 2  
Maximum Credits: 2  
The goal of this course is to provide students with an understanding of the SAS program environment as well as the skills needed to use SAS as a tool to conduct research, prepare data, and perform analyses. Upon completion of the course the student will have an understanding of SAS at the intermediate level. The course covers the utility of SAS as a data management, data manipulation, and data analysis tool. The focus will not be statistical analysis, but rather how to use SAS as a programming tool. Emphasis will be placed on program code writing. Concepts will be illustrated with numerous examples from basic descriptive analysis.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis  
Course Requirements: PREQ: BIOST 2039; PROG: Graduate Sch of Public Health

**BIOST 2094 - ADVANCED R COMPUTING**

Minimum Credits: 2  
Maximum Credits: 2
An advanced statistical computing course using R designed for graduate level biostatistics students with programming experience in R or other low-level languages such as C, C++, Java, and/or Fortran. Experience in SAS and/or Stata does not qualify. The course will cover topics, including but not limited to, R in modeling and optimization, advanced R graphics, functional programming, object-oriented field guide, efficient computing in R, GUI for R-shiny, embedding C/C++, R package/documentation, Julia, Github etc. The course will also include real life application for students to practice the programming techniques learned in class.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BOST 2039 and 2043; PLAN: Biostatistics

### BIOST 2096 - NUMERICAL METHODS BIOSTATISTICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose is to familiarize students with a broader range of numerical methods which are useful in bio statistical research. Selected computational techniques used in statistical research will be covered. Background will be provided to facilitate understanding of a few numerical algorithms widely used in statistics. The following are covered: recurrence relations, power series and asymptotic expansions, generating pseudo-random deviates, basic simultaneously methodology, solutions of nonlinear equations, newton's method, vector and matrix norms, linear regression and matrix inversion.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BOST 2044 and 2049

### BIOST 2099 - CAPSTONE

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The capstone course is a heavily directed and mentored statistical data analysis project course leading to an ETD formatted thesis and formal oral presentation of the work. This course will be an intense data analysis and writing course with the goal of producing an ETD formatted thesis document containing rigorous analytic methods, appropriately summarized analysis results with logical, statistically and scientifically valid conclusions. The Capstone course will ensure that the written thesis milestone demonstrates the student's competency in biostatistics (and area of concentration if applicable) as well as oral and written communication skills in general.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Biostatistics (MS); Required to have passed MS comprehensive exam.

### BIOST 3010 - RESEARCH AND DISSERTATION PHD

**Minimum Credits:** 1  
**Maximum Credits:** 15  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### Business Accounting

### BACC 2060 - INDEPENDENT STUDY IN ACCOUNTING

**Minimum Credits:** 1  
**Maximum Credits:** 9  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.
BACC 2100 - MACC INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3

To enroll for an IFC through the MACC program, you must be a MACC student and work for a minimum of 10 hours a week for 10 weeks during the semester you intend to take the internship for credit. You may receive up to six internship credits, but only three per semester, and no more than three credits for an experience. The grade for these credits will be pass/fail (satisfactory/unsatisfactory). The deadline to apply for an internship for credit is the date the add/drop period ends for that given semester. All internship offers must be approved by the MACC office prior to enrollment for that experience. Performance appraisals must be submitted to your faculty advisor and to career services and your employer must complete a midpoint and final performance appraisal.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

BACC 2251 - FORENSIC ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3

"Fraud is extremely costly to our society, and the costs seem to be growing. The AICPA recently called forensic accounting one of the seven hot, new, "sizzling" career areas in accounting. It is estimated that there will be a shortage of between 25,000 and 50,000 professionals working in this area in the next few years in the U.S., So there are many opportunities for students knowledgeable in fraud to work in various federal agencies (e.g. FBI), major corporations, and professional service firms. The objectives of the forensics course are to familiarize students with several forms of fraud and the methods that fraud examiners use to prevent and detect it. Students will develop expertise in detecting financial statement fraud from the external auditor perspective, and learn how to use technology to detect fraud. They will acquire a basic understanding of how interviews are conducted in order to detect deception. The class will also provide a historical view of financial statement fraud. The tools used in the class will include interviewing, document examination, and public records searches, which will be helpful to students wanting to become consultants, auditors, tax professionals, managers, etc. The class, of course, includes an ethics component. It will help students to understand the common ethical dilemmas that they might encounter in the business world, and will help prepare them to resist pressure to commit fraud."

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2252 - CORPORATE TAX ACCOUNTING AND PLANNING

Minimum Credits: 3
Maximum Credits: 3

The objective of this course is to help students understand how important features of the internal revenue code influence decisions regarding how to organize and structure business operations and select the most appropriate form of doing business. The course begins with a comparison of the issues surrounding the choice of taxable business entity, comparing the regular corporation (C corporation), the small business corporation (S corporation), the partnership, and the sole proprietorship. After this, the course focuses primarily on the C corporation and the S corporation and the underlying principles that determine their respective tax bases and resulting tax obligations. Tax planning is an integral part of the course. Income shifting, tax deductions, tax credits, and income exclusions are discussed in detail. The course uses case studies (including some reflecting an international tax perspective) and tax return preparation to help students to apply the theory and detail of the tax code. Course materials are updated as tax laws change.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2253 - INTERNATIONAL ACCOUNTING

Minimum Credits: 2
Maximum Credits: 2

This course will explore the rapid movement toward a set of internationally consistent financial reporting methods in the global marketplace. The financial accounting standards board (FASAB) and the international accounting standards board (IASB) have formally agreed to harmonize reporting standards over time. In addition, the securities and exchange commission (SEC) is currently considering a proposed time-line for the adoption of
international financial reporting standards (IFRS) in the US. The course will examine the substantive differences between US generally accepted accounting principles (US GAAP) and IFRS, which have already been adopted by many other countries. The course will also provide a framework for understanding the theory and application of IFRS versus US GAAP and explore some of the ethical issues inherent in international business reporting.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2254 - ADVANCED FINANCIAL ACCOUNTING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course covers topics that are of particular interest to financial report preparers and auditors. Special emphasis is placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Accounting (MS)

**BACC 2255 - INTERNAL CONTROLS AND ACCOUNTING DISCLOSURES FOR DERIVATIVES**

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  
This accounting elective will focus on derivative instruments and their impact on accounting and internal controls. The course will cover various topics tied to derivative instruments including the benefits, hedging, the risks, cash flow implications, internal controls, accounting & reporting requirements, taxation, and regulations. The course will analyze various incidents where internal controls were compromised and the implications. Upon successful completion of this course, the student will have the knowledge and background required to account for, audit, and monitor the use of derivative products. This course will also help those students who plan on sitting for the CPA examination.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BUSACC 1238

**BACC 2256 - STRATEGIC COST MANAGEMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will include cost measurement issues in both conventional and modern manufacturing environments.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Accounting (MS)

**BACC 2258 - STRATEGIC COST MANAGEMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The quality, timeliness and credibility of the cost information used in corporate decision-making can have a significant impact on value creation. This is because cost information is important not only in strategy formulation and in the development and implementation of action plans that link strategies to value creation, but also because such data serve as measures of financial performance for products, processes, organizational sub-units and managers. In particular, product and service cost estimates have a major influence on corporate strategic decisions such as pricing, resource allocation, product development, supply chain design and customer focused management. In addition, product costs are informative signals of operational efficiency. Therefore, they constitute financial measures of the success of management actions such as continuous improvement and business process reengineering. Over-aggregate or obsolete cost systems can have a significant adverse impact on cost reduction in particular and
overall corporate strategy and competitiveness in general. The objective of this course is to develop an integrated approach to analyzing these issues. In particular, we will study (a) how product cost measurement affects strategy and resource allocation decisions; (b) how to be sophisticated users of cost feedback and how to understand the strategic distortions that are induced by flaws in cost system design; (c) the strategic role of value-driver information and the relationship between process improvement and cost reduction; (d) the use of budgetary control systems and financial measures in performance evaluation and management and (e) incentive conflicts in organizations and their mitigation through appropriate mechanisms.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BACC 2401 - FINANCIAL ACCOUNTING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements, and what can be inferred from these reports about the firm's past activities, present position and the future prospects.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SU3 Basis  
- **Course Requirements:** Katz Grad School of Business students only.

### BACC 2402 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis

### BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- This course will be valuable to MBA and mac students interested in working for global businesses, regardless of their desired career paths. As business organizations continue to seek growth in markets outside the United States and Western Europe, they will face increasingly complex and difficult challenges, including compliance with U.S. And foreign criminal and civil laws in places that are corrupt. Compliance with the U.S. Foreign corrupt practices act, which forbids businesses from providing certain benefits to government officials, is essential for global organizations, as penalties are severe. And to succeed in their careers, auditors will need to understand that businesses in certain geographic areas maintain multiple sets of books and hide bribery and tax fraud schemes. Strategic planners and supply-chain professionals will face cross-border risks, including demands by government customs and tax inspectors for bribe payments. Energy executives will confront violence, corruption and supply-chain problems in many oil and gas-producing areas. Sales professionals will confront demands for kickbacks. The course will cover these issues, and will provide students with the knowledge and compliance tools necessary to advance their professional careers in a global economy.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis  
- **Course Requirements:** Katz Grad School of Business students only.

### BACC 2510 - INTERMEDIATE FINANCIAL REPORTING AND ANALYSIS 1

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- This financial accounting elective is designed for accounting and finance majors who plan to be financial analysts or heavy users of financial reports. Topics covered include accounting procedures for recording and presenting financial information, asset valuations, revenue recognition and financial
Accounting data analytics exposes macc students to the role of big data in accounting and the information technology tools and techniques used by accountants and auditors to produce more timely and accurate reports. Topics include advanced excel, data modeling, statistical sampling and cluster analysis, business intelligence, and xbrl generation and analysis. The course will cover data analytics covering four major themes: financial reporting, performance evaluation, audit analytics, and tax. Each theme will include hands-on instruction using commercial and open source software and requires students to complete a related data analysis project. Accounting data analytics is different from other database and information systems courses in that it will show students how to use specific tools to complete projects and develop an analytical mindset with a specific focus on accounting and auditing processes. This is primarily a project-based course. The students will complete three projects, showing their mastery of the tools, decisions, and the steps they followed to reach their conclusions. The final exam would be used to evaluate general understanding of the concepts discussed throughout the semester. There is potential for additional ebl components including field trips if we can work out logistics. I'm currently developing relationships with the accounting firms to bring in local experts and to work on real-world cases.

BACC 2524 - INTERNAL AUDIT: RISK & ADVISORY

Students are introduced to generally accepted auditing standards (GAAS). Internal control is studied in detail with emphasis on how to test for its effectiveness. Audit objectives, planning and sampling techniques are developed as a basis for the audit opinion.

BACC 2525 - FINANCIAL STATEMENT ANALYSIS

Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.

BACC 2528 - MANAGERIAL ACCOUNTING

Students learn how the costs of products and services are determined in cost accounting systems and how this data is used in managerial decisions and in planning and control of business operations.
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BACC 2401; PROG: Katz Graduate School of Business

---

**BACC 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Accelerated intermediate financial reporting fulfills the prerequisites of intermediate financial reporting 1 and intermediate financial reporting 2 for students who are entering the MACC program. This course studies the preparation, communication, interpretation and analysis of financial data with emphasis on the information needs of users of financial information prepared under US GAAP. General topics covered in this course include revenue recognition, inventory accounting, long term assets and impairment, investments, current liabilities and contingencies, long term liabilities, capital and retained earnings, leases, pensions and postretirement benefits, income taxes, and preparation of the statement of cash flows. Students are expected to have an accounting background. This course is designed to sit on top of an existing foundation in accounting and will assume students already have taken several financial accounting courses or knowledge obtained through work experience. It is expected that students are fluent with accrual accounting and the accounting cycle and that they have already studied some of the topics in the course in depth. The course will move quickly.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**BACC 2534 - CONTROLLERSHIP**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This accounting elective is designed for MAcc students seeking a role in corporate accounting and controls. The course will cover the changing role of the controller and the major functions managed by the controller of a typical company. Topics covered include: role of the controller, general accounting, cash management, accounts receivable, accounts payable, payroll, financial planning and budgeting, management reporting and designing well-controlled financial processes and systems. The content will focus not only on the processes managed by the controller, but also the optimization of these processes, policies and procedures and leadership issues. The use of experts from the accounting community will be used as a complement to the theoretical materials presented to illustrate the practical applications and challenges of controllership. Because the course is practical in nature, an experience-based learning group project will be a large part of the curriculum and learning experience offered to students.

**Academic Career:** Graduate  
**Course Component:** Lecture

---

**BACC 2537 - TAXES AND MANAGEMENT DECISIONS**

**Minimum Credits:** 2  
**Maximum Credits:** 2

Designed as an introduction to business taxation for majors in areas such as finance or financial planning. Focuses on how managers and analysts can recognize tax problems, consequences and opportunities associated with common business events.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BACC 2401; PROG: Katz Graduate School of Business

---

**BACC 2540 - INTERNATIONAL TAXATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course is an introduction to the U.S. law of international taxation. It is designed to provide those entering the global marketplace with a basic understanding of how international transactions are taxed. The course will focus on: (1) fundamentals of international taxation, (2) U.S. activities of foreign taxpayers, and (3) foreign activities of U.S. taxpayers.

**Academic Career:** Graduate  
**Course Component:** Lecture
BACC 2541 - SEC REPORTING AND DISCLOSURE

Minimum Credits: 3
Maximum Credits: 3
This accounting elective is designed for MACC students as a capstone course in financial accounting. The course covers the rules for financial disclosures under the U.S. Securities and Exchange Commission and is meant to expose students to the financial reporting processes followed by public companies. The fundamentals of the following processes will be covered: earnings releases; quarterly reporting; annual reporting; proxy statements; comment letters and company responses; benefit plan reporting; working with the Division of Corporation Finance and working the division of enforcement. Hot topics in SEC reporting and advanced disclosure topics, such as special areas of revenue recognition, management's discussion and analysis, asset retirement obligations, leasing, corporate restructurings, business acquisitions/spin offs, forward looking statements and disclosures about market risk will be covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2559; PROG: Katz Graduate School of Business

BACC 2542 - ACCOUNTING AND FINANCE LAW

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide MACC and MBA candidates with advanced legal information that is necessary for effectuating management level responsibilities in the contemporary business environment. This course will enhance a business student's knowledge of the law (past that of the three credit business law elective course that is offered) in a manner that strategically is consistent with the content of the CPA exam.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2254 and BUSACC 1238; PROG: Katz Graduate School of Business

BACC 2543 - TAX POLICY 1

Minimum Credits: 2
Maximum Credits: 2
Our nation was born from a revolution over taxation without representation. Nearly 250 years later, the debate over tax policy continues to dominate political debates and presidential campaigns. Why the tax system attracts all this attention is no mystery. It is the aspect of government that directly affects more people than any other. This course will explore the history of tax policy in the United States, the tax legislative process in Congress, how our tax policies influence people's decisions and behavior, international tax considerations, and ideas for future tax reform. Students will discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy. This course is for any student that wants to become a more educated citizen (and voter!) With respect to our nation's ongoing debate over tax reform.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BSEO 2315 or 2528; PROG: Joseph M. Katz Grad Sch Bus

BACC 2544 - TAX POLICY 2

Minimum Credits: 2
Maximum Credits: 2
This course will build upon tax policy I by taking a more in-depth look at our federal tax system. Students will also be introduced to international tax policies and provisions. Students will continue to discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy.
BACC 2549 - STRATEGIC COST ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.

BACC 2557 - ACCOUNTING RESEARCH AND WRITING

Minimum Credits: 2
Maximum Credits: 2
This course focuses on improving students' writing, deductive reasoning, and problem-solving skills as they conduct research to make a recommendation on the accounting treatment for transactions for which no direct or clear guidance currently exists. Weekly writing assignments are evaluated on both content and the quality of the writing.

BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on financial reporting and disclosure for not-for-profit and governmental entities based on the standards and principles promulgated by the financial accounting standards board (FASB) and the governmental accounting standards board (GSAB). Students will learn how such entities prepare their financial reports and how to interpret and use such information. The course covers financial reporting for not-for-profit entities, balancing the focus on internal operations with fiduciary responsibility. In addition, the course examines the objectives of financial reporting for governmental units and the preparation and use of the financial statements for such entities. A sample of specific entities will be reviewed to illustrate the preparation and use of their financial statements. In addition, accounting software for governmental transactions will be introduced.

BACC 2559 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on individual tax return preparation and planning. Students will learn how to calculate the taxes associated with a variety of personal, investment, property, and sole-proprietorship transactions. Concepts will be reinforced through the preparation of actual tax returns that reflect different combinations of such transactions. Students will develop tax planning skills by considering how various transactions can be restructured to minimize the current or future tax liability.

BACC 2801 - FINANCIAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements and what can be inferred from these reports about the firm's past activities, present position and the future prospects.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2802 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

BACC 2901 - ACCOUNTING AND CONTROL FOR HEALTH CARE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
In this course you will develop an understanding of the various roles that accounting information plays in healthcare organizations. We will begin by analyzing the needs of managers, healthcare professionals, healthcare consumers and other parties for financial information concerning a healthcare organization's financial position, current financial performance and cash generating ability. You will learn how standard financial statements (balance sheet, income statement, and statement of cash flows) address these needs, and the strengths and weaknesses of the statements in supplying this information. Financial statement analysis concepts and techniques will be introduced as cost-effective tools that enable healthcare decision makers to draw appropriate inferences from published financial statements. We will also study key issues that arise in accounting for a healthcare organization's operations, investing and financing decisions. The final part of the course will analyze specific uses of accounting information in support of organizational decisions. We will study how accounting systems measure the cost and profitability of healthcare services, the effect of volume on profitability, and the proper use of accounting cost information in supporting decisions such as whether to invest in new equipment and whether or not to expand existing services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3001 - INTRODUCTION TO ACCOUNTING RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to provide new accounting doctoral students with an overview of accounting research. The course will discuss the variety of topics and methods addressed by accounting scholars, and will seek to provide insight into the characteristics that distinguish the highest quality research. Analytical research methods and topics, as well as applications in managerial accounting, will receive particular emphasis in the first half of the course. In the second half, we will read and analyze representative accounting research employing capital markets, archival managerial and experimental methods.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3005 - ACCOUNTING THEORY

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

BACC 3014 - EXPERIMENTAL RESEARCH IN ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
The course covers recent experimental studies that apply behavioral decision theory, psychology, and economics to address a variety of accounting research questions. The course focuses most heavily on recent work. The goals of this course are to (1) familiarize students with recent experimental research in accounting, (2) help students develop the skills necessary to critically evaluate such research, and (3) generate ideas for future experimental research topics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3017 - ACCOUNTING WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
Presentation of research papers in various aspects of accounting and related areas by faculty and distinguished visitors. The student is expected to attend the workshop, participate in discussions, and present a workshop paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3021 - ARCHIVAL RESEARCH IN MANAGERIAL ACCOUNTING

Minimum Credits: 2
Maximum Credits: 2
This seminar will focus on studying management control and performance measurement issues largely from an economics perspective using archival methods. Topics discussed will include, but not be limited to, analysis and economic impact of cost systems, use of financial measures for performance evaluation and compensation, impact of incentive systems on organizational performance, non-financial measures and balanced scorecard. The course materials will consist of papers in accounting. Course requirements include active class participation, presentations/discussions/summary reports of papers, replication of earlier studies (where data are available), and a final examination.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BACC 3024 - ECONOMIC MODELS OF INCENTIVES AND CONTROLS

Minimum Credits: 2
Maximum Credits: 2
This seminar provides students with an introduction to incentive problems in firms and markets and how contractual arrangements serve to mitigate these problems. Students are introduced to the classic papers in agency research and current working papers spanning economics, accounting and corporate finance.
BACC 3025 - CAPITAL MARKETS RESEARCH IN ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a solid understanding of capital market research in accounting and empirical research training. The class will cover topics such as the relation between stock prices and earnings, stock market anomalies, and analyst and management forecasts. Students will also replicate some classic finance and accounting papers in order to provide them with some hands-on experience working with compustat, crsp, ibes, and sdc data using sas statistical programming. The class will help students to better evaluate research in workshops, develop new ideas and do empirical tests.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3028 - ARCHIVAL RESEARCH IN AUDITING

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BACC 3050 - CRITICAL THINKING IN ACCOUNTING

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Business Administration

BUSADM 3001 - BEHAVIORAL RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3

The primary objective of this course is to familiarize you with and develop an appreciation for business research methodology. Research skills will be an important determinant of your success as an academic. The course will introduce you to a variety of research approaches, allow you to develop an understanding to effectively use these approaches in your own research, and prepare you to evaluate research done by others. The course will also provide you with an introduction to causal modeling techniques (lisrel, pls). By the end of the course you should develop a sound appreciation of the research process and a range of research approaches that can be applied to management problems. In addition, you should have an appreciation for what constitutes "good" research so that you can constructively critique and make use of research done by others.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3006 - MULTIVARIATE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

Examines the theory of and applications for multivariate statistical methods of analysis including, but not limited to, multiple regression, multiple discriminant analysis, and factor analysis. Emphasis on the use and limitations of these tools and upon the meaning and interpretation of results. Students are expected to gain first-hand experience with several techniques by applying canned computer programs to appropriate data sets and by discussing appropriateness of applications in published literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3013 - WORK AND ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3

This seminar is intended for Ph.D. students who wish to develop an understanding of the theoretical underpinnings of research on the management of knowledge and work in organizations. It reviews the major theoretical perspectives, but places a particular emphasis on the current empirical literature related to human resource management. Because of the multi-disciplinary nature of this research space, readings draw on a broad range of material including studies from sociology, organization theory, strategy, economics, and policy. These are used to develop an integrative understanding of the underpinnings of work and employment-related research published in top tier management journals.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BUSADM 3021 - BEHAVIORAL SCIENCE RESEARCH PRACTICUM

Minimum Credits: 3
Maximum Credits: 3

The primary objective of this course is to provide a hands-on experience in the development, design and execution of rigorous behavioral science research. Students will be asked to design and execute a theory-based research project. We will explore a variety of different methodological approaches and discuss the fit between students' specific research questions and different techniques. Our goal is two-fold: (1) to help students develop a sophisticated understanding for what constitutes rigorous research within the field; and (2) to coach students through the research process in order to create a high-quality empirical paper for publication.
BUSADM 3030 - MANAGING THE TRIPLE BOTTOM LINE

Minimum Credits: 3  
Maximum Credits: 3  
Issues such as climate change and global warming, human rights, and health and sanitation for all have garnered significant attention in recent years. Leading businesses realize that it is no longer enough to maximize profits and cater to shareholders but as well critical to integrate the wellbeing of the planet and its people into their business models. Such a transformation to managing the triple bottom line of people, planet and profit requires us to look at business and its operations through a new lens. This doctoral seminar will focus on theories, concepts and methodologies that we can use to understand the role of the firm in 21st century society and develop strategies for long run sustainability. The course will be interdisciplinary, drawing on literatures in strategy, marketing, organizational behavior, operations, and finance as well as methods spanning lab experiments to structural equation models to understand the conditions under which creating social and environmental value can drive business value. The course will feature academic guest speakers from the aforementioned disciplines of business to highlight the interdisciplinary nature of sustainability research.

BUSADM 3050 - METHODS FOR BEHAVIORAL BUSINESS RESEARCH

Minimum Credits: 2  
Maximum Credits: 2  
Experienced behavioral business researchers usually fall into a pattern that emphasizes a subset of diverse methods and approaches. But both new and experienced researchers must depend on a vast literature that makes use of a diverse set of methods, many of which are outside of their expertise. Therefore, drawing from a limited set of approaches would disadvantage any researcher who desires to understand, the literature of his or her chosen field. Another by-product of following only a limited set of approaches is a likely narrowed understanding of trade-offs necessary in any choice of research method. Because no single method can answer all questions, it is important to make good decisions about those trade-offs. This course provides a "hands on" survey of research methods, covering phases from developing research ideas, theorizing, collecting data, identifying what to measure, and determining how it should be measured. A rolling writing assignment throughout the course will provide opportunities for feedback at each step of the way. As a result of this course, you should be a better consumer, critic, and provider of research results in your field.

BUSADM 3199 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1  
Maximum Credits: 9

Business Economics

BECN 2019 - ECONOMICS FOR INTERNATIONAL BUSINESS

Minimum Credits: 3  
Maximum Credits: 3  
Investigates key aspects of the international economics environment. The first half introduces the international monetary system. Reviews the balance of payments, foreign exchange rate systems, adjustment mechanism, the foreign exchange market, and international money and capital markets. In the second half, topics include theories of international trade and investment restrictions on trade, commercial policies of the United States.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BECN 2401; PROG: Katz Graduate School of Business
Course Attributes: Russian & East European Studies

BECN 2060 - INDEPENDENT STUDY IN MANAGERIAL ECONOMICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS

Minimum Credits: 3
Maximum Credits: 3
This course develops an understanding of how market-based economic systems reconciles the separate needs of consumers and producers, and provides an economic framework for managerial decisions. Topics include: pricing, output, and quality decisions; the impact of productivity improvements on costs; quality-cost tradeoffs; transactions costs as a determinant of the boundaries of the firm; market imperfection and the role of regulation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2509 - GLOBAL MACROECONOMICS: INSTITUTIONS AND POLICY

Minimum Credits: 1.5
Maximum Credits: 1.5
This elective course focuses on the forces which drive or determine overall national/global economic activity. The course is organized around the progressive development of an "open economy" macroeconomic model which is capable of handling a number of key policy and other variables.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2510 - MACROECONOMICS AND GROWTH IN EMERGING ECONOMIES

Minimum Credits: 1.5
Maximum Credits: 1.5
This follow-up course continues the focus on the forces which drive or determine overall national/global economic activity. This course expands the "open economy" macroeconomics framework developed in BECN 2509.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BECN 2509; PROG: Katz Graduate School of Business

Business Finance

BFIN 2015 - SHORT-TERM FINANCING

Minimum Credits: 2
Maximum Credits: 2
Focuses on short-term financial management. Major topics include cash management, investment in money market instruments, banking regulations, liquidity policy, financial statement forecasting and simulation credit policy and credit management, and working capital management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2030 - VALUATION 1

Minimum Credits: 2
Maximum Credits: 2
This course provides students with the skills and framework for measuring and managing the value of companies. The course begins by describing how firms create value and then develops the tools required to measure value. Students are required to demonstrate their facility with the techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2031 - CREATING VALUE THROUGH RESTRUCTURING

Minimum Credits: 2
Maximum Credits: 2
Building on concepts developed in valuation (BFIN 2030), this course examines how and why different types of corporate restructuring affect firm value. The course uses both case studies and readings from the applied corporate finance literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2030; PROG: Katz Graduate School of Business

BFIN 2036 - CORPORATE FINANCE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to corporate financial management. The course builds on BFIN 2006 (introduction to financial management) to provide students with the conceptual framework and analytical tools necessary to appreciate, understand, and analyze the problems facing corporate financial managers. The course consists of four main parts. The first part develops the tools necessary to conduct the analysis of corporate finance problems. These tools include the analysis of data reported on financial statements, building pro-forma financial statements, the basics of put and call options, and an introduction to corporate valuation techniques. The second part of the course examines how managers set the two primary corporate financial
policies: capital structure and payout policy (e.g. Dividends and share repurchases), and the process of restructuring in financial distress and bankruptcy. The third part of the course analyzes the process of issuing securities in the capital markets, including the role of the investment banker. Finally, the fourth part explores several aspects of mergers and acquisitions, including the motives for these transactions, the structure of the deal, and the role of private equity firms.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

**BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Focuses on security analysis, portfolio analysis, and the fundamentals of investment theory. Topics include bond and stock valuation, determination of interest rates, effects of inflation and taxes on security values.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

**BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The course will provide an introduction to the acquisition of privately held companies along with strategies for value creation in the acquired business. The course, which is exclusively taught using the case method, takes lessons taught in the valuation courses extending these concepts to the valuation of privately held business, the structuring of the acquisition balance sheet and the execution of the acquisition process. While a discussion of secured financing alternatives will be included, the application of junior capital, both mezzanine debt and equity will be the focus of the course. A risk analysis of the target will be performed and an investment thesis intended to illustrate value creation techniques will be central to each class discussion. Upon completion, students will be better prepared how to assess both operational and financial forms of risk, develop techniques intended to reduce both forms of risk, and consider value creation strategies in marketing, operations, finance and management. Each case will involve a real company acquired over the years by PNC equity partner along with actual selling memorandum, diligence prepared by PNC principals, market research firms, accounting firms and law firms employed by PNC as part of their diligence process.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

**BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The conceptual foundation of international financial management. Begins with a review of foreign exchange markets followed by the asset decision. Analyzes capital budgeting decisions of multinationals and taxation of international transactions. Discusses risk management in a global environment, international sources of financing, analysis of the nature of foreign, money and capital markets; and analysis of international banking.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

**BFIN 2051 - INTRODUCTION TO DERIVATIVES**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Organization of markets for put-and-call options on stocks, commodities, indices, and foreign exchange. Specific topics include arbitrage and hedging relationships, the valuation of options, and the implications of trading strategies in options.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2060 - INDEPENDENT STUDY IN FINANCE

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2061 - INDEPENDENT STUDY IN FINANCE 2

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2062 - INDEPENDENT STUDY IN FINANCE 3

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2066 - FINANCE PROJECT COURSE

Minimum Credits: 2
Maximum Credits: 2
Brief description: project will focus is on valuation of potential acquisitions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2068 - MARKETS AND TRADING

Minimum Credits: 2
Maximum Credits: 2
This course is designed to give participants a broad understanding of the operations of various financial markets with special focus on liquidity, market structure and trading. With this objective in mind, the course will concentrate on the operations of exchanges, trading systems and broker-dealer intermediaries. Participants will be exposed to a range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide hands-on experience with making tactical trading decisions in different market structure environments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus
BFIN 2069 - FIXED INCOME SECURITIES

Minimum Credits: 2
Maximum Credits: 2
This course examines the concepts that are most frequently encountered in the market for fixed income securities. Specifically, the course describes the most important fixed income securities and markets and develops tools for valuing these securities and managing their interest rate and credit risk. Historically, "fixed-income" refers to securities which promise fixed cash flows over their lives such as a fixed-rate coupon bond. Now, it is generally accepted that a fixed income instrument is one whose value is driven by the level of interest rates and/or the value of a related underlying asset. This classification would include floating rate bonds, callable bonds, bond futures, bond options, caps, floors and collars, interest rate swaps, credit derivatives and asset-backed securities. The analysis of fixed income securities is quantitative in nature. We will focus on the intuition behind the various concepts presented in class but there will be a fair amount of computation involved. Students should be comfortable with linear algebra, calculus, probability distributions, regression analysis and statistical concepts like mean, variance and correlation (covariance). The course will also assume a high level of familiarity with a spreadsheet package like microsoft excel.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2123 - COMMERCIAL BANKING

Minimum Credits: 2
Maximum Credits: 2
This course examines the role commercial banks play in facilitating the flow of capital between providers of capital (i.e. Depositors) and users of capital (i.e. Borrowers).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2124 - INVESTMENT BANKING AND VENTURE CAPITAL

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will examine financing transactions from the viewpoints of managers of these financial institutions and managers of firms seeking financing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2129 - ENERGY PROJECT FINANCE

Minimum Credits: 2
Maximum Credits: 2
This course will cover all aspects of infrastructure project finance with a focus on the energy industry. We will look in depth at why project finance exists and who the players are, how deals are structured and investors evaluate opportunities, the unique contractual issues and risks in the transactions and the specialized financial modeling and analysis. This course is designed to provide students who are interested in the energy and other infrastructure-reliant industries (like transportation or real estate development) with a practical understanding of how large-scale projects are financed in today's marketplace.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2409 and BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2130 - VALUATION 2
Minimum Credits: 2
Maximum Credits: 2
This is a continuation of valuation 1.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BFIN 2030; PROG: Katz Graduate School of Business

**BFIN 2140 - REAL ESTATE FINANCE**

Minimum Credits: 2
Maximum Credits: 2
This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.

Academic Career: Graduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

**BFIN 2145 - FINANCIAL MODELING**

Minimum Credits: 3
Maximum Credits: 3
The course will apply finance theory to solve various problems in financial management and investments. It will take a hands-on approach in building financial spreadsheet models using Microsoft excel. Students will learn to address issues that arise in various areas of financial analyses. These issues include but are not limited to discounted cash flow valuation, cost of capital estimation, asset return calculations, portfolio theory, index models, option pricing models, bond pricing and investment performance analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or 2410; PROG: Joseph M. Katz Grad Sch Bus

**BFIN 2150 - RISK MANAGEMENT**

Minimum Credits: 3
Maximum Credits: 3
This course examines financial risk management from the perspective of the corporate manager. We will examine three issues. The first is why a corporation should manage risk. To understand this, we need to consider how corporations create value for shareholders and the frictions they face that create wedges between what the corporation produces and what is ultimately passed through to shareholders. The second issue is how a corporation should manage risk. This requires an understanding of certain financial instruments that are generally referred to as derivatives - instruments whose values derive from other more fundamental assets such as commodities, currency exchange rates, stocks (equities) and bonds (interest rates). The building blocks for many of these financial instruments are two basic derivative instruments, forwards/futures and options. The third issue is the cost of risk management. We will start by pricing forwards/futures and options under the assumption that markets are efficient and there is no arbitrage. We will then use Monte Carlo simulation as a tool for pricing more exotic derivatives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**BFIN 2306 - FINANCIAL MANAGEMENT**

Minimum Credits: 3
Maximum Credits: 3
An introduction to the tools used in corporate financial decision making. Develops two basic valuation models commonly used in finance--present
value models and the capital asset pricing model and focuses on the use of these models in corporate decision making. Examines capital budgeting, corporate structure policy, and corporate dividend policy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2409 - FINANCIAL MANAGEMENT 1**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The main objective of this course is to gain understanding of the theory and practice of financial decision making. This course develops the tools and framework necessary to address the question what investment projects should be undertaken to maximize shareholder wealth? To examine this question, we will learn how to value an uncertain stream of cash flows and apply the concept of the time value of money in valuing bonds and equity. The course covers a number of market-based investment criteria and develops an entity valuation model, based on discounted cash flows (DCF) used for standard capital budgeting decisions. We will conclude with a short introduction to the concept of risk and return, resulting in the cost of capital. We will cover a case discussion on capital budgeting to put our framework in a more realistic environment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: BACC 2401 or BQOM 2401; PROG: Joseph M. Katz Grad Sch Bus

**BFIN 2410 - FINANCIAL MANAGEMENT 2**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course builds on financial management i and develops an asset pricing framework used in corporate finance based on the trade-off between risk and return. We use modern portfolio theory to determine a suitable asset pricing model and arrive at determining the relevant discount rate to reflect the risk associated with the cash flow we focused on in financial management i. Finally, we will address how financing and capital structure choices affect project and firm value using the above techniques and methods. The course will conclude with three valuation methods: WACC, APV, and FTE and an extensive case discussion. Financial management i & ii are prerequisite courses for any other finance elective in the curriculum.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BFIN 2409; PROG: Joseph M. Katz Grad Sch Bus

**BFIN 2555 - PRACTICUM PORTFOLIO MANAGEMENT AND SECURITY ANALYSIS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The students in this class will have hands-on experience in the areas of security analysis, security selection and portfolio management.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BFIN 2410 and 2030; CREQ: BFIN 2039; PROGRAM: Joseph M. Katz Grad Sch Bus

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

**BFIN 3018 - MARKET MICROSTRUCTURE**

Minimum Credits: 3
Maximum Credits: 3
Analyzes the process and results of trading assets under a set of explicit trading rules. Research in this area examines the structure provided by various market mechanisms to model how rules for price setting evolve in markets. The purpose of this seminar is to provide an introduction to the basic paradigms that are used to explain the behavior of markets and their participants. In addition to discussing the theory underlying market microstructure, we will examine a variety of empirical papers that use tick-by-tick data on bonds, stocks, options and futures.

**BFIN 3034 - CORPORATE FINANCE SEMINAR 3**

Minimum Credits: 2
Maximum Credits: 2
BFIN 3035 - FINANCIAL EMPIRICAL METHODS

Minimum Credits: 2
Maximum Credits: 2
This doctoral seminar covers the empirical techniques used most often in the analysis of financial markets and their application to actual market data. Topics covered include the statistical properties of asset returns and the efficient markets hypothesis, empirical tests of asset pricing models (CAPM, APT, intertemporal CAPM, consumption CAPM), and tests of conditional asset pricing models. Topics of related interest may also be covered.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BFIN 3036 - EMPIRICAL ASSET PRICING

Minimum Credits: 2
Maximum Credits: 2
This doctoral seminar covers empirical research on institutional investors. Both asset pricing and corporate finance topics will be addressed.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BFIN 3037 - FINANCE SEMINAR IN MARKET MICROSTRUCTURE

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BFIN 3038 - PROPERTY RIGHTS AND THEORY OF THE FIRM

Minimum Credits: 2
Maximum Credits: 2
This doctoral seminar covers the theoretical and empirical literature on transactions costs, property rights, theory of the firm, ownership, and compensation. Topics of related interest may also be covered.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BFIN 3099 - READINGS IN FINANCE

Business Human Resources Mgt

BHRM 2023 - HUMAN RESOURCES PLANNING/STRATEGY 1
Personnel policies and programs as well as the available skills, knowledge and attitudes can provide particular opportunities or limitations to management as an organization's strategic goals and plans are defined. This seminar is designed to examine organizational human resources management from a strategic perspective. The key focus will be on exploring human resources planning and strategy concepts, developing an understanding of the related analytical tools, & determining how these concepts and tools can be used to enhance an organization's position.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2024 - HUMAN RESOURCES PLANNING/STRATEGY 2**

Minimum Credits: 2
Maximum Credits: 2
A continuation of "Human Resources Planning/Strategy 1".
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2060 - INDEPENT STUDY HUMAN RESOURCES MANAGEMENT**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 3010 - INDEPENT STUDY HUMAN RESOURCES MANAGEMENT**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

**BHRM 3099 - READINGS HUMAN RESOURCES MGT**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

**Business Marketing**

**BMKT 2031 - MARKETING RESEARCH**

Minimum Credits: 3
Maximum Credits: 3
Emphasizes the understanding of research purposes and processes from the viewpoint of a consumer of research. Topics include problem analysis and hypothesis formulation, research design, implementation of research, and analysis of research results.
Academic Career: Graduate
BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce students to the theory and application of "behavioral economics," a sub-domain that has gained considerable practical popularity across a range of fields, including marketing, finance, accounting, human resources and public policy. Popularized by books such as "Predictably Irrational" by Dan Ariely and "Nudge" by Cass Sunstein and Richard Thaler, Behavioral Economics focuses on the ways that humans' natural psychological tendencies can be used or overcome in ways that lead to desirable outcomes. Importantly, behavioral economics acknowledges that humans generally do not conform to the assumptions that underlie classical economics and that the ways in which we fail to be rational, self-interested, perfect information processors can be used to our benefit, rather than to our detriment.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE

Minimum Credits: 3  
Maximum Credits: 3  
A variety of social and psychological theories and concepts related to consumer behavior as well as their practical application to the field of marketing are examined and discussed. Students have the opportunity to further apply what they learn through case presentations.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BMKT 2060 - INDEPENDENT STUDY IN MARKETING

Minimum Credits: 1  
Maximum Credits: 6  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BMKT 2061 - INDEPENDENT STUDY IN MARKETING MANAGEMENT 2

Minimum Credits: 1  
Maximum Credits: 9  
Self designed elective course in marketing management.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SNC Basis  
Course Requirements: Katz Grad School of Business students only.

BMKT 2062 - INDEPENDENT STUDY IN MARKETING MANAGEMENT 3

Minimum Credits: 1  
Maximum Credits: 9  
Self designed elective course in marketing management.  
Academic Career: Graduate  
Course Component: Independent Study
BMKT 2306 - MARKETING MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Topics include the role of marketing in a developed society, consumer behavior, competitive behavior, social and technological change, demand analysis and measurement, marketing research and model building, and marketing planning, strategy, and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2409 - MARKETING MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
This course examines the role of marketing in creating value for the firm. It helps students answer the central question of marketing strategy, what value to provide and to whom, using the tools of segmentation, targeting, and positioning (STP) of brands. The course shows how central aspects of marketing mix programs, product, place, pricing, and promotion, all follow from an effective STP program, and how marketing support functions such as marketing research, advertising, and new product development can support effective marketing decisions. Emerging trends in digital marketing, competition and globalization are examined. The course emphasizes experience-based learning to develop the necessary marketing knowledge and skills among students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2509 - MARKETING PLANNING & STRATEGY

Minimum Credits: 2
Maximum Credits: 2
Designed to create an understanding of marketing problems and perspectives and the contexts in which they arise. The ability to structure and analyze marketing problems is reviewed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BMKT 2513 - CONSUMER BEHAVIOR 1

Minimum Credits: 2
Maximum Credits: 2
Examines a wide variety of social science concepts as they relate to the behavior of consumers. Although consumer research methodology is not a main focus, students will be expected to become familiar with the more common research techniques used to study consumers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BMKT 2411 or BMKT 2409; PROG: Joseph M. Katz Grad Sch Bus

BMKT 2522 - SALES MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
This course is somewhat unique in that it stresses hiring characteristics that should be sought by the sales manager and various recruiting techniques...
that have proven effective. The entire course will provide assistance to the student in sales positions following graduation and will form the basis for sales management decisions in future years.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

**BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with the development of new products. It focuses on the set of decisions that need to be made in the development of new products and tools useful for making these decisions. This course will also introduce the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

**BMKT 2528 - ADVERTISING**

Minimum Credits: 2  
Maximum Credits: 2  
Advertising is a complex phenomenon - at once leading, lagging and reflecting the values of society. The pragmatic, operational and decision-making aspects of advertising are emphasized.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

**BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS**

Minimum Credits: 2  
Maximum Credits: 2  
The intention of the course is to provide a managerial frame work of services marketing for managers and students with an interest in the services sector. Its focus is primarily on services businesses but much of it is relevant to services in the manufacturing businesses. The course focus is on problem solving through discussion and analysis of contemporary service marketing cases. The course is appropriate for: 1) any student seeking a follow up course to the basic marketing course and 2) students who plan marketing careers with service firms.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

**BMKT 2532 - PRICING STRATEGIES AND TACTICS**

Minimum Credits: 2  
Maximum Credits: 2  
The course focuses on an important element of the marketing mix. While product, promotion and distribution are aspects of the mix that will help create value to consumers, the price creates value to the firm in the form of profits.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

**BMKT 2533 - BUSINESS TO BUSINESS**
Most MBA graduates will join organizations that market their products and/or services to other businesses, institutions or government agencies. Such marketing is referred to as business-to-business (B2B) marketing. In this class we will look at those management activities that enable a supplier firm to understand, create and deliver value to other businesses, governments and/or institutional customers.

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

---

**BMKT 2544 - SHOPPER ANALYTICS**

**Minimum Credits:** 2

**Maximum Credits:** 2

To achieve the objectives of this course, we will be using several methods during the semester, including lectures, guest speakers, readings, and class assignments/presentations. The philosophy underlying this course may be a bit different than you are accustomed to. While lectures will be a component, the general approach will be that of a practicum. That is, you will be exposed to a concept or database, then apply those concepts and databases via a project which is presented to the class. Readings are drawn from both business publications and academic journals. You are strongly encouraged to bring in other relevant materials that you encounter.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

---

**BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media. Covering the three main media types of paid, owned, and owned media, students will learn about frameworks and methods that allow them to take data from sources such as google, Facebook, and twitter to be able to generate valuable and actionable managerial insights. The focus is on learning how to use digital and social media activity data to make better decisions, not on statistical methodologies (however, familiarity with excel is needed). The course will involve a combination of lectures, guest speakers, and hands-on workshops. This course is part of the digital marketing certificate and complements the "marketing and social media strategy" course.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

---

**BMKT 2553 - SOCIAL MEDIA STRATEGY**

**Minimum Credits:** 2

**Maximum Credits:** 2

Social media is changing how business is done around the world in almost every industry. How does social media effect your business? This course provides students with a detailed and up-to-date understanding of social media from a business strategy perspective. Through a series of lectures, case studies, and workshops, students learn how to identify opportunities for using social media in a variety of business areas, including marketing, operations, advertising, services, and human resources. The course takes a broad perspective and considers how social media it can be used successfully for business-to-consumer, business-to-business, and intra-company purposes. A central theme in this course is for students to apply what they learn to their own businesses and industries in order to identify opportunities for strategic, value creating uses of social media in their companies. After taking this course students will see how social media impacts business in many different ways and goes beyond simply using Facebook, twitter, or other popular social platforms for basic marketing purposes.

**Academic Career:** Graduate

**Course Component:** Lecture

---

**BMKT 2554 - MARKETING DESIGN AND ANALYSIS**
Minimum Credits: 3
Maximum Credits: 3
This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BMKT 2569 - BRAND MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
This course explores the role played by brands in influencing consumers' choices, and investigates how to move effectively manage such brands. The course uses a variety of tools including lectures, cases, simulations, in-class exercises, hands-on, industry visitors and individual projects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BMKT 2411 or BMKT 2409; PROG: Katz Graduate School of Business

BMKT 3001 - CONSUMER BEHAVIOR 1

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BMKT 3002 - CONSUMER BEHAVIOR 2

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BMKT 3010 - INDEPENDENT STUDY IN MARKETING

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

BMKT 3014 - MARKETING STRATEGY

Minimum Credits: 3
Maximum Credits: 3
Identifies the foundations of all aspects of marketing including product development and management distribution channel activity, sales force management, sales promotion, pricing, planning and strategy, information systems, and marketing organization and management, among other topics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 3015 - FOUNDATIONS OF CONSUMER BEHAVIOR
This seminar seeks to provide students a broad overview of the literature in consumer decision making and behavior. Students will also be encouraged and expected to delve more deeply into areas of their particular interest. Further, students will increase their ability to develop and present their research ideas.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BMKT 3017 - MARKETING MODELS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Examines applications of management science techniques and methodology to improve marketing decision making. Emphasis will be on the use and interpretation of multivariate statistical methods and/or the application and implementation of operations research rather than their theoretical development. Students develop knowledge of at least one managerially relevant problem area and apply or critique the application/implementation of management science techniques through real data analysis or simulation.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BMKT 3018 - SPECIAL TOPICS IN MARKETING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Intended to cover a few current topics in marketing in depth. Topics will be those emerging in the field as critical issues.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BMKT 3025 - MARKET BEHAVIOR RESEARCH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BMKT 3099 - READINGS IN MARKETING

**Minimum Credits:** 1  
**Maximum Credits:** 9  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

### Cardiothoracic Surgery

**CTSURG 5461 - PEDIATRIC CARDIOTHORACIC SURGERY**
Four-week elective with clinical experience on pediatric cardiothoracic surgery service. Student will actively participate in care of pediatric cardiac surgery patient and attend weekly med/surg cardiology conference. Covers types of congenital heart disease, physiology and pathophysiology and current methods of operative intervention for palliation or repair. Time can be spent participating in clinical or laboratory research in progress.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**CTSURG 5462 - ADULT CARDIAC SURGERY**

Minimum Credits: 0  
Maximum Credits: 0  
Clinical experience on adult cardiac surgical service. Students will participate in preoperative, intraoperative and postoperative care of patients suffering from acquired cardiac diseases. Students will be expected to work in the cardiac ICU and on the wards assisting house staff managing day-to-day patient care issues.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**CTSURG 5463 - ADULT THORACIC SURGERY**

Minimum Credits: 0  
Maximum Credits: 0  
Students will be assigned to the thoracic service of UPMC. Participation will be in operative experiences, clinic setting and ward work. Focuses will be on benign and malignant surgical problems of the lungs, esophagus, mediastinum, chest wall and diaphragm. Students will be exposed to minimally invasive approaches including esophagostomy, lobectomy and others.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**CTSURG 5650 - INDIVIDUALIZED CLINICAL COURSE**

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**CTSURG 5840 - CARDIOTHORACIC SURGERY RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0  
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.  
**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**CTSURG 5899 - INDEPENDENT STUDY IN CARDIOTHORACIC SURGERY**
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/L/S/U  
**Course Attributes:** School of Medicine Year 4

**CTSURG 5900 - EXTRAMURAL CARDIOTHORACIC SURGERY**

Minimum Credits: 0  
Maximum Credits: 0  
A clinical experience in cardiothoracic surgery may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/L/S/U

**Cell Biol & Molecular Physio**

**MSCBMP 2800 - MS THESIS RESEARCH**

Minimum Credits: 1  
Maximum Credits: 14  
A directed research project which results in a thesis for a master's degree.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC**

Minimum Credits: 2  
Maximum Credits: 2  
Course analyzes membrane/protein traffic along both the biosynthetic & endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g-proteins (both heterotrimetric & small), coat proteins (coatamer 1 & 2 & adaptors), signal transduction cascades (pkc, pka, ip3, etc.), & Snare complexes in protein trafficking. Also, we will discuss the role of the cytoskeleton in transporting cargo & signal transduction. Membrane traffic in several specialized cell types will be covered including polarized epithelial cells, cells of the immune system, & neurons.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSCBMP 2852 - RESEARCH SEMINAR IN CELLULAR BIOLOGY**

Minimum Credits: 1  
Maximum Credits: 1  
Advanced research seminar with journal club format specializing in current aspects of membrane trafficking.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**MSCBMP 2853 - RESEARCH SEMINAR IN REPRODUCTIVE PHYSIOLOGY**
MSCBMP 2855 - RESEARCH SEMINAR IN MOLECULAR PHYSIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Advanced research seminar with journal club format specializing in current aspects of molecular and cellular physiology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSCBMP 2860 - MULTIPARAMETRIC MICROSCOPIC IMAGING

Minimum Credits: 3
Maximum Credits: 3
A lecture/lab course which immerses students in the theory and practical aspects of modern microscopic imaging. The fields will cover the theory and implementation of all types of light and electron microscopy and computer-aided imaging. Students will be expected to reach a functional capability in a selected technology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2870 - HISTOLOGY

Minimum Credits: 5
Maximum Credits: 5
The objective of this lecture/lab course is student comprehension of the relationship between cell structure and organ function, and the application of this knowledge to the identification of light and electronmicroscopic images of cells and organs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2875 - EXPERIMENTS AND LOGIC IN CELL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
The purpose of experiments and logic in cell biology (ELCB) is to engage the students of the cell and molecular physiology graduate program in a self-directed seminar structured to stimulate the students' ability to think scientifically and critically as future scientists. The iterative, collaborative and collegial process of ELCB is the same used by teams of collaborating scientists to develop and solve biomedical projects.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: School of Medicine (PMEDS)

MSCBMP 2880 - CELLULAR BIOLOGY OF NORMAL AND DISEASE STATES

Minimum Credits: 4
Maximum Credits: 4
This one-term course will explore the cellular basis of multiple disease states. The course, which meets twice a week (two hours each session), will be taught through both lecture and in class discussion of primary literature. Each of seven modules will examine normal cell biology and function and then define how defects in these processes lead to the spectrum of pathologies associated with each disease. Discussion of how bench top findings
can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. The seven modules are as follows: the first examines insulin secretion and signaling and how these events are perturbed in diabetes mellitus. The second module focuses on cell-cell adhesion and its role in cancer progression and epithelial barrier function. The third module defines how defects in endocytosis of the low-density lipoprotein receptor leads to hypercholesterolemia. The fourth analyzes the cellular basis of hypertension and how altered internalization of the epithelial sodium channel leads to elevated blood pressure. The fifth module investigates the role of apical membrane recycling and how defects in aquaporin-2 traffic leads to nephrogenic diabetes insipidus. The sixth module appraises the current state of our understanding of cystic fibrosis and how degradation of defective cystic fibrosis transmembrane conductance regulator by the quality control machinery in the endoplasmic reticulum and cell periphery leads to disease. The last module examines cell migration in wound healing and angiogenesis. At the end of the course students will have an increased understanding of normal cellular function and how research in cell biology can lead to a deeper understanding of diseases that impact millions of people each year.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS**

**Minimum Credits:** 3  
**Maximum Credits:** 3

The focus of this new course will be to study relevant problems in cell biology, immunology, developmental biology and neurobiology and how they have been solved using imaging approaches. For example at the cell level we will investigate how techniques such as TIRF and high speed confocal have addressed basic problems in endocytosis; at the organismal level we will use multiphoton, confocal, fret, and other approaches to understand aspects of cell biology in cell polarity, respiration and organ development in c. Elegans, Drosophila, Zebra fish and mice. In each case the application will focus on how imaging tools are used to study defined problems in living systems. The course will follow a lecture/demo/journal club format. Lectures will be two part, the first 1/3 will be a description of the technology, how it was developed and how it works (10-15 minutes) followed by description of the scientific problem and how it was solved. This will be followed by lab demonstrations showing the approach in action. Lectures will be interspersed with a journal club discussion of a relevant paper on each technology. Students will prepare the journal club presentations in an alternating fashion. Examination will be a combination of class participation, journal club and written exam.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSCBMP 2890 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cell biology or physiology.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Cell Biol & Molecular Physio (PHD) or Interdis Biomedical (UNK)

**MSCBMP 2895 - CELLULAR PHYSIOLOGY OF THE KIDNEY**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This summer course will provide an introduction to the kidney and lower urinary tract, with emphasis on kidney structure and function. The course, which meets once a week (two hours each session), will be taught through both lecture and in class discussion of the primary literature. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. You will first learn about the specialized cell types that comprise the kidney and lower urinary tract. Subsequently, you will be introduced to renal stem cells and how they lead to kidney development. Next, you will learn the functions of the kidney, including regulation of water and ion balance. This will be followed by a discussion of the lower urinary tract. Finally, you will learn how drugs can be used to treat kidney dysfunction and how kidney transplants can be used to treat those patients with end-stage renal disease.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
MSCBMP 3800 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of forty credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Cell Biol & Molecular Physio (PHD)

MSCBMP 3835 - DNA REPAIR JOURNAL

Minimum Credits: 1
Maximum Credits: 1
The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).
Academic Career: Graduate

Grade Component: Grad HSU Basis

MSCBMP 3840 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS

Minimum Credits: 2
Maximum Credits: 2
This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INTBP 2000

Cellular & Molecular Pathology

MSCMP 2700 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN
The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**MSCMP 2740 - MOLECULAR PATHOBIOLOGY**

**Minimum Credits:** 3

**Maximum Credits:** 3

Some representative of major disease categories (autoimmune, inflammatory, toxic, degenerative, infectious, genetic, and neoplastic) will be examined in terms of patient demographics (who), gross and microscopic morphology (what), and etiology/molecular mechanisms (why).

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**MSCMP 2750 - RESEARCH SEMINAR**

**Minimum Credits:** 1

**Maximum Credits:** 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**MSCMP 2760 - INTRODUCTION TO TISSUE ENGINEERING**

**Minimum Credits:** 3

**Maximum Credits:** 3

The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five-part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**MSCMP 2770 - BIOMATERIALS AND BIOCOMPATIBILITY**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course serves as an introduction to biomaterials and biocompatibility and assumes some background in organic chemistry and biology. The first half of the course connects biomaterial applications. The second part of the course introduces biocompatibility issues as they follow from protein adsorption, thrombosis, inflammation and infection are primary interest. Throughout the course ties are made between the topic of student and clinically relevant material and device performance.

**Academic Career:** Graduate
course component: lecture
grade component: grad lg/snc basis

MSCMP 2780 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Students will focus on a selected topic in cellular and molecular pathology and write a paper under the direction of a faculty advisor.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MSCMP 2790 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cellular and molecular pathology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Cellular & Molecular Pathology (PHD) or Interdis Biomedical (UNK)

MSCMP 3700 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS

Minimum Credits: 3
Maximum Credits: 3
This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral oncogenesis, breast and prostate cancer, chemotherapy, radiotherapy, gene therapy, tumor immunology, and nutrition and cancer.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3715 - BIOINF CANCER BIOL & THERPUTCS

Minimum Credits: 1
Maximum Credits: 1
Reading and discussion on bioinformatics resources available to enhance research on cancer biology and therapeutics. We will discuss bioinformatics databases and other resources related to: regulatory networks and signal transduction pathways, genes associated with cancer risk and the progression of cancer; cytogenomics, sources of information on the distribution of cancer occurrence and trends in the us population, databases DNA repair genes, their structure & function, models of cancer progression & responses to therapy, biomarkers for cancer detection, treatment & prevention.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
MSCMP 3730 - TOPICS IN EXPERIMENTAL NEUROPATH

Minimum Credits: 1  
Maximum Credits: 1

This course critically evaluates the latest scientific literature concerning diseases of the central nervous system. Emphasis will be placed on methodologies as they are applied to the study of human neurologic diseases. Participants will present scientific papers and lead the classroom discussions. This course is open to students of all levels and will include both basic scientists and clinicians (residents, faculty).

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING

Minimum Credits: 3  
Maximum Credits: 3

Extracellular matrix (ECM) is an important structural and signaling component of all tissues. It plays a defining role in how differentiated cells and tissues respond to homeostatic signals, tissue regeneration, response to inflammation, and wound healing. Indeed one can generalize and state that there is no aspect of the biology or function of any given tissue in which ECM does not play an important role. The objective of the proposed course is to bring to students the knowledge of fundamental aspects of ECM, its importance for tissue function and its potential use in bioengineering applications. The course will start by providing information about structure and gene expression regulation of the main protein and glycosaminoglycan components of ECM. This will be followed by lectures describing the mechanisms by which ECM components interact with their receptors (integrins) and the intracellular signaling cascades and multiple protein allosteric interactions mediating the transmission of the signal from integrins to multiple intracellular targets affecting cell proliferation, function and cell-cell communication. TGF-beta is an important regulator of ECM synthesis and a special lecture will be devoted to gene regulation of ecm components and the role of TGF-beta. Subsequent lectures will focus on histologic techniques for visualization of ECM and specific tissue examples in which ECM changes define a particular biological model. ECM is known to be remodeled early in liver regeneration and re-synthesized at the end of the regenerative process. ECM signaling is defining the regulation of liver size and termination of regeneration. This will provide an example to illustrate the multifaceted aspects of ecm and cell interaction in a well-known model of tissue biology. Specific targeted lectures will also be given on ECM in wound healing, and repair of tissue in central nervous system, bone and cartilage. ECM is important as a potential barrier for cancer invasion. The mechanisms by which cells invade ECM will be examined in the context of cancer and also in the context of organ building and tissue morphogenesis in embryonic development. The cellular approaches utilizing ECM in bioengineering and tissue reconstruction will be also presented. These will include preparation of decellularized organs (a technique currently applied to liver with partial success in cell recolonization); functions of hyaluronic acid in tissue reconstruction and aspects of its signaling; ECM in vascular reconstruction, and biology of joints; ECM in muscle biology and reconstruction. The course is addressed to graduate students of the interdisciplinary biomedical science program of the school of medicine as well as the bioengineering graduate program. We are expecting a roughly equal proportion of students from those two groups in a class of 20 students. Even though both groups of students are highly sophisticated, particular attention will be given to ensure that the differences in backgrounds do not interfere with assimilation of the fundamental concepts imparted from the lectures. It is also anticipated that some of the concepts to will be presented will be summaries of a vast amount material of biomedical literature. To facilitate full development of lectures and topics which chose a format of 1.5 hours per lecture, to give the lecturers the opportunity of covering all relevant issues in proper depth. To our knowledge, there is no comparable course fully dedicated to ECM biology and bioengineering applications in either the school of medicine or the bioengineering curriculum. It should also be noted that the reviewers of the Catter Training grant noticed the absence of such a course and expressed a desire to have one developed. We believe this course will be important in generating an interest and a depth of knowledge in issues related to matrix biology as well as support the mission of the catter training grad.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSCMP 3740 - STEM CELLS

Minimum Credits: 3  
Maximum Credits: 3

This course will provide a comprehensive overview of stem cell biology - an intriguing & a most-debated research area. The course will focus on the biology of stem cells & their role in health & disease with emphasis on development & carcinogenesis. Trans-differentiation of stem cells for tissue engineering applications will also be discussed. Lectures & student presentations will cover: embryonic as well as fetal & adult stem cells in blood, liver, brain, muscle, kidney, pancreas & gut. Students will also be educated on bioethical issues & existing laws governing stem cell research.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
MSCMP 3750 - ANGIOGENESIS

Minimum Credits: 3  
Maximum Credits: 3  
Angiogenesis/vasculogenesis is one of the important research areas in biomedical sciences. This course will provide extensive basic knowledge of develop, cellular, mol biology of angiogenesis and most recent advances in its clinical applications. Topics include: 1. Angiogenesis in physiological and pathological process; 2. Molecular and cellular regulation of angiogenesis; 3. Current advances in angiogenic therapies. Recent outstanding research publications will also be discussed.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

MSCMP 3760 - RESEARCH SEMINAR: REGENERATIVE MEDICINE

Minimum Credits: 1  
Maximum Credits: 1  
Research seminar in regenerative medicine is geared towards providing updates information on topics in the field of regenerative medicine, tissue engineering and stem cell applications. Through biweekly seminars, the students will be acquainted to the recent advances in the ever-growing field of regenerative medicine. Experienced faculty will deliver lectures in this seminar series.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

MSCMP 3770 - CELL THERAPY

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on cellular therapy, which includes technologies and strategies applied to the isolation, expansion and preservation of cells for use in regenerative medicine and transplantation, and the use of cellular therapy techniques to a variety of disease states. The overall topic of this course closely interfaces with the areas of gene therapy, stem cell biology, immunology and tissue engineering. Students will also critically read and review the literature in the field of cellular therapy.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION

Minimum Credits: 2  
Maximum Credits: 2  
This course is focused on particular topics of great biologic complexity in critical illness, where modeling has the potential to translate in improved patient care. Lectures are provided by basic (biological and mathematical sciences) and clinical faculty, in conjunction with members of industry and speakers from outside institutions. This information will be communicated within the framework of defined themes that describe the complexity of inflammation in acute and chronic illnesses.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE

Minimum Credits: 3  
Maximum Credits: 3  
Personalized medicine is becoming a reality that is being driven by ongoing discoveries in cell biology, genomics, proteomics, and metabolomics. The translational speed of these discoveries, particularly in the diagnostic, prognostic, and theragnostic arenas, is rapid. We believe that in the future personalized medicine diagnostics will involve both physicians and basic scientists. A major obstacle to this approach is the lack of training components for basic scientists in this area. This course aims to close that gap and provide an appreciation for, and understanding of, key principles of clinical development and testing in order to help bridge this gap. The course will be designed to delve into concepts of personalized medicine.
using focused topic areas. The first week will introduce the principles and overriding concepts of clinical test development, which differ qualitatively from investigational research. Next there will be six 2-week sessions, with each section focusing on a separate testing modality. Topics will include inherited genetic diseases and predispositions, acquired genetic changes (cancer), metabolomic profiles of endocrine diseases, immune networks for transplant and rejection, proteomic profiling in blood disorders, and proteomic detection of shock and organ failure.

**Academic Career:** Graduate  
**Course Component:** Lecture

**Petroleum Engineering**

**PETE 2004 - PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2160 - PETROLEUM RESERVOIR ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers the principles of reservoir engineering and material balance calculation in petroleum reservoirs. The topics include petroleum origin and oil occurrence and migration; oil, gas, and gas-condensate reservoirs; basic drilling of oil and gas wells; p-v-t behavior of natural gas; material balances in gas reservoirs; oil reservoirs under simultaneous dissolved gas drive, gas cap drive, and water drive; generalized material balance in petroleum reservoirs; basic equations for fluid flow in reservoirs, absolute, effective, and relative permeabilities; and a design project on reservoir calculations.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2201 - RECOVERY OF OIL BY WATERFLOODING**

Minimum Credits: 3  
Maximum Credits: 3  
Theory of immiscible fluid displacement starting with frontal advance theory and applying it to waterflooding, fluid patterns, sweep efficiency, stratified reservoirs, etc. Relative permeability experiments are simulated.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2204 - ENHANCED OIL RECOVERY PROCESSES**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers different topics on enhance oil recovery processes (co2, thermal, miscible fluids and surfactants); coal-bed methane, enhanced methane recovery, and underground coal gasification; surface and in-situ heavy oil, tar sand and oil shale production; and co2 capture, sequestration and disposal. The fundamentals, thermodynamics, reaction kinetics and transport phenomena as well as the environmental issues and regulations related to these topics are also covered.

**Academic Career:** Graduate
PETE 2205 - PETROLEUM PRODUCTION ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and chock performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.

Academic Career: Graduate

PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING

Minimum Credits: 3
Maximum Credits: 3
The course covers different topics on natural gas, petroleum and petrochemical processing. The topics include natural gas cleanup, methane reforming for h2 production, partial oxidation of ch4 for synthesis gas production, and chemicals from methanol; refinery feedstocks, crude distillation and refinery products, alkylation, hydrotreating, catalytic reforming and isomerization, catalytic cracking, resid, tar sands and oil shale processing; and methanol/other alcohols, ethylene, fertilizer, and plastic production plants.

Academic Career: Graduate

PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course covers different topics related to drilling operations; directional drilling techniques; completion operations; and work-over operations. The drilling operations encompass drilling rig components, bit selection program, drilling fluid types, cementing program design and well control/safety. The directional drilling techniques include: well-path design/applications, downhole motor components, directional surveys, and logging while drilling. The well completion operations contain: formation evaluation tools, open-hole log interpretation, coring tools, flow testing, perforating, hydraulic fracturing and other stimulation techniques. The work-over operations comprise work-over rig components, cased hole log interpretation, plugs/packers/fishing tools, squeeze job design, casing integrity tests and stimulation evaluation. A special project on casing design is also included.

Academic Career: Graduate

PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Course description: this class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

Academic Career: Graduate
PETE 2211 - RESERVOIR SIMULATION

Minimum Credits: 3
Maximum Credits: 3
This course introduces the students to the simulation process of fluid flow in petroleum reservoirs. Governing equations required to describe fluid flow in porous media are derived, numerical techniques for solving the equations are introduced. Students will learn how reservoir flow simulators can be used in assessment studies of hydrocarbon reservoirs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

PETE 2212 - CO2 FOR ENHANCED OIL RECOVERY AND FRACKING

Minimum Credits: 3
Maximum Credits: 3
This course will cover the physical properties of CO2 that make it an attractive solvent for enhanced oil recovery (EOR), the natural and anthropogenic sources of CO2, the types of fields that are suitable for CO2 EOR, and the mechanisms responsible for CO2 increasing oil recovery. The current status of CO2 EOR in the United States will also be reviewed, along with its potential for future expansion. The foremost technical challenges of CO2 EOR, namely mobility control and conformance control, will be discussed along with current research efforts. The course will conclude with a brief review of how CO2 has been used as a hydraulic fracturing, whether as a pure fluid, as the gaseous component of foams, or as an energizing component.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

PETE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

PETE 2910 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 12
Individual study programs at M.S. Level.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

PETE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.

Academic Career: Graduate
PETE 2982 - ISSUES IN RESEARCH AND TRAINING

Minimum Credits: 2
Maximum Credits: 2
This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PETE 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Chemical Engineering

CHE 2013 - MOLECULAR MANUFACTURING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE METALLIC ALLOYS

Minimum Credits: 3
Maximum Credits: 3
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CHE 2017 - CHEMICAL ENERGY AND THE NATURE OF THE CHEMICAL BOND

Minimum Credits: 3
Maximum Credits: 3
An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate
physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.

CHE 2018 - INTRODUCTION TO SURFACE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Surface and interface engineering is critical to many important applications, e.g., coating, composite, biomedical device and membrane. With the fast growth of nanotechnology, understanding the surface properties becomes even more important since nano-sized materials, e.g., graphene, have no bulk phase but surfaces. This course combines elements of physical chemistry and materials of surface and interface in order to serve as the introduction to the surface engineering. The course spans from surface tension, capillary, superwettability to lubrication as well as 2D materials, allowing a comprehensive view to both classic surface science and cutting-edge surface technology. By the end of this class, students will understand both the fundamental principles of surface science and engineering approaches on tailor a given solid surface.

CHE 2043 - ELECTRON MICROSCOPY IN MATERIALS SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, Laue conditions, structure factor, Ewald construction, double diffraction, twinning, Kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.

CHE 2052 - CARBON CAPTURE & STORAGE

Minimum Credits: 3
Maximum Credits: 3
Introduction to carbon capture; compression, transport and storage of CO2; analyzing absorption and adsorption carbon capture; analyzing carbon capture membranes; introduction to direct air capture.

CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS

Minimum Credits: 3
Maximum Credits: 3
In-depth development of basic thermodynamic relations for macroscopic systems is covered. Emphasis on mathematical foundation and application of free energy concepts to system analysis. Topics in solution theory are covered.

CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
Minimum Credits: 3  
Maximum Credits: 3  
The basic principles for the analysis of reaction rates in heterogeneous reacting systems will be discussed with special emphasis on three-phase reaction systems. The fundamentals of multiphase reactor design will also be presented as time permits.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 2250 - CARDIO CLINICAL INTERNSHIPS

Minimum Credits: 1  
Maximum Credits: 6  
Professional application training in cardiovascular medicine and surgery. Students will spend three months each in bioengineering practice training programs within cardiology, cardiothoracic surgery, and vascular surgery.

Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1

Minimum Credits: 4  
Maximum Credits: 4  
A systematic development of the basic concepts and equations for heat, mass, and momentum transfer. Extensive problem solving of fundamental and practical natures.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

Minimum Credits: 3  
Maximum Credits: 3  
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 2475 - STATISTICS AND COMPUTATIONAL METHODS FOR SYS BIO

Minimum Credits: 3  
Maximum Credits: 3  
Statistics and computational modeling are major drivers of the modern economy and critical tools for discovery in scientific research. These two fields are linked in a common goal: how do we make competent decisions in uncertain, complex, and connected environments? With the rapid expansion of machine learning technologies, it has become incredibly important for engineers and scientists to understand the basic methods underlying these algorithms and to be able to critically assess algorithm performance. This course will cover the basic theory and application of three related areas: statistics, dynamic simulation and machine learning classification. While theory will be discussed, the proper application of these tools and the methods for critically analyzing the results will be the primary focus of the course. The statistical and computational tools to be discussed are agnostic in their application, important to all research areas. However, in the course, the application of these tools will be to problems in biology and medicine. By the end of the course, students will be able to identify the proper statistical tests to be used for various scenarios, be able to develop customized tests for non-standard data types (bootstrapping), understand the computational challenges related to dynamic simulations of nonlinear systems, and be able to apply and evaluate off-the-shelf machine learning algorithms.
CHE 2540 - PRACTICAL ELECTROCHEMISTRY

Minimum Credits: 3  
Maximum Credits: 3  
This graduate-level elective focuses on the practice of electrochemistry in laboratory analysis and in a wide range of technological applications. We will begin with a brief overview of the fundamentals of electrochemistry in terms of thermodynamics, kinetics, and transport processes. We will then dive immediately into practical concepts with a survey of laboratory methods and technological/industrial applications of electrochemistry.

CHE 2550 - SOLVING ENGINEERING PROBLEMS WITH COMPUTATIONAL CHEMISTRY

Minimum Credits: 3  
Maximum Credits: 3  
This course will discuss theoretical and computational methods in chemistry and their applications to chemical engineering problems. Emphasis will be given on performing computational chemistry calculations for the prediction of chemical structures, properties, reaction mechanisms, etc., connecting molecular with macroscopic level behavior. This course will keep a balance between lectures on basic computational chemistry theories/models and hands-on experience with computational chemistry calculations. Students will have a class project, and will be encouraged to identify a project related to their own research interests.

CHE 2600 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS

Minimum Credits: 3  
Maximum Credits: 3  
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlining each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application.

CHE 2754 - PRINCIPLES OF POLYMER ENGINEERING

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with the elements of polymer science and engineering necessary for entry-level understanding of polymer technology. While the chemistry determines macromolecular microstructure, an understanding of polymer manufacture and processing requires the addition of physical chemistry and transport phenomena. The essential material covered in this class includes the elements of polymers thermodynamics, rheology, mechanical behavior, and equipment design.
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2811 - BIOMATERIALS & BIOCOMPATIBILITY

Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties of orthopaedic and cardiovascular biomaterials. Wear and corrosion of implant materials; fracture healing; inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2870 - SOLIDS PROCESSING AND TRANSPORT

Minimum Credits: 3
Maximum Credits: 3
Particle technology affects as much as 80% of the chemical process industry, yet is often omitted from the undergraduate curriculum of chemical engineers. This course is designed to give advanced undergraduates as well as early-term graduate students an introduction to this rich and diverse field. Topics will range from fundamentals (particle classification, properties, and flow) to applied (hopper design, mixing, etc. Industry related examples and designs with be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

CHE 2910 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 12
Individual study programs at MS Level.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

CHE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
CHE 2982 - ISSUES IN RESEARCH AND TEACHING

Minimum Credits: 2
Maximum Credits: 2
This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3001 - GRADUATE SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3004 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3460 - ADVANCED SCIENTIFIC VISUAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
This fast-paced course will train students to produce professional scientific visual work, suitable for publications, presentations, and communicating to the public. Advanced topics, such as 3d modeling & animation, handling and visualizing large datasets, interactive displays, and 3d printing will be covered. The course will emphasize the importance of producing high quality artwork in scientific communication. The primary tools used will be gimp, inkscape, and blender, all of which are open source, and the python programming language for large dataset visualization. PowerPoint for presentations and limited figure production will also be used.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3910 - INDIVIDUAL STUDY
Minimum Credits: 1
Maximum Credits: 3
Individual study program at Ph.D. Level.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

CHE 3921 - SPECIAL TOPICS IN CHEMICAL ENGINEERING

Minimum Credits: 1
Maximum Credits: 1
Covers a variety of topics of specialized interest to chemical engineering including topics in thermodynamics, reaction engineering, mathematics, electrochemistry, materials science, and biological engineering.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3922 - MODELING OF SOFT MATTER

Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of several contemporary research topics pertaining to modeling soft and biological materials. Lectures will focus on self-assembly and phase transitions, colloidal dispersions, polymers, gels, liquid crystals. A brief introduction to flow of complex fluids (rheology) and computer simulation methods (such as dissipative particle dynamics, cell dynamics systems, lattice Boltzmann simulations and others) will also be provided. Special attention will be given to point out how methods learned during this course are applied in current frontier research in soft condensed matter: from studies focusing on the origin of life to studies aiming to design soft synthetic biomimetic materials. Along with the lectures the course will include short in-class implementation workshops of some of the methods using mathematical software.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 3980 - PHD RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of Ph.D. dissertation research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3990 - ADVANCED GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 15
Preliminary work for Ph.D. Dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
CHEM 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1
Maximum Credits: 12
Course designed to be taken by master's degree students who are writing their thesis.
Academic Career: Graduate
Grade Component: Thesis Research
Grade Component: Grad SN Basis

CHEM 2090 - SEMINAR IN CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
This course is created for graduate students to register for their thesis seminar when they do not declare a division or do not satisfy divisional requirements. Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Grade Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING

Minimum Credits: 3
Maximum Credits: 3
Group theory and molecular symmetry, with emphasis on their application to the theoretical aspects of bonding in inorganic and organometallic complexes, as well as to the experimental techniques (electronic, vibrational, and photoelectron spectroscopy) typically used to elucidate the nature of intramolecular interactions.
Academic Career: Graduate
Grade Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide a solid background in modern inorganic chemistry for those doing research in all branches of chemistry. Much of the course material is descriptive, but the objective of the selection and presentation of the material will be to develop an understanding of the principles controlling the structures and reactivity of inorganic materials. Aspects of all areas of inorganic chemistry will be discussed, including main group, transition metal, and organometallic chemistry.
Academic Career: Graduate
Grade Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2180 - INORGANIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.
CHEM 2190 - SEMINAR IN INORGANIC CHEMISTRY

Minimum Credits: 1  
Maximum Credits: 1  
Only students planning to present a seminar should register for this course. Others may attend without registering.

CHEM 2210 - ELECTROANALYTICAL CHEMISTRY

Fundamental electrode processes common to all electrochemical methods; thermodynamics and kinetics of electrode processes; reaction coordinate diagrams for faradaic currents; exchange current and activation polarization; non-faradaic currents and electric double layer. Mass transfer processes. Linear sweep, cyclic and pulse voltammetric methods and their application to analysis as well as the study of reaction mechanisms and problems in battery technology, electrocatalysis, photovoltaic cells and chemically modified electrodes.

CHEM 2220 - CHEMICAL SEPARATIONS

A broad thermodynamic and kinetic framework encompassing all chemical separations is used to classify techniques. Concepts such as separation efficiency are generalized. The most powerful and widely used separations techniques are chromatographic, thus solution chemistry will be discussed to provide a chemical framework for chromatography. The use of gas and liquid chromatography will be presented.

CHEM 2230 - ANALYTICAL SPECTROSCOPY

Fundamentals of optical spectroscopic methods of analysis for determining composition and structure. The course includes analytical applications as well as mechanisms and instrumentation. Recent developments such as Fourier Transform IR Spectroscopy and the use of lasers in spectroscopy are emphasized.

CHEM 2240 - MASS SPECTROMETRY

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
CHEM 2290 - SEMINAR IN ANALYTICAL CHEMISTRY

Minimum Credits: 1  
Maximum Credits: 1  
Only students planning to present a seminar should register for this course. Others may attend without registering.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

CHEM 2310 - ADV ORGANIC CHEMISTRY 1

Minimum Credits: 3  
Maximum Credits: 3  
A qualitative discussion of modern mechanistic interpretations of relations between structure and reactivity. Special emphasis is placed on the roles of reactive intermediates such as Carbonium ions, carbanions, carbenes and radicals. Study of the factors that influence the equilibria and reaction mechanisms of organic molecules.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CHEM 2320 - ADV ORGANIC CHEMISTRY 2

Minimum Credits: 3  
Maximum Credits: 3  
A course designed to cover modern synthetic methods for the assembly of complex organic molecules (stereospecific olefin synthesis, cycloaddition reactions, sigmatropic rearrangements, organometallic chemistry, natural product synthesis.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CHEM 2330 - ORGANOMETALLIC CHEMISTRY

Minimum Credits: 2  
Maximum Credits: 2  
A single-semester two-credit lecture course focusing on the mechanistic and synthetic aspects of state-of-the-art organometallic chemistry will be offered. Understanding how organometallic structure and electronics influence reactivity patterns will provide students with predictive tools for interpreting and exploiting organometallic reactivity. The course will focus on the thermodynamics, kinetics and stereoselectivity of main group- and transition metal-mediated reactions having applications in organic synthesis.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CHEM 2370 - SYNTHETIC ORGANIC CHEMISTRY

Minimum Credits: 2  
Maximum Credits: 2  
This early graduate level course builds onto sophomore organic I and II courses by applying the learned principles to the synthesis of FDA-approved drug molecules. The emphasis of the course will be on analyzing the molecular structures of drugs in a retrosynthetic fashion, followed by developing suitable synthetic routes to these molecules. The reaction mechanisms of key steps of these syntheses will be discussed in detail. Further discussion will include fundamental functional group interconversions, chemoselectivity, and protecting group use, enantioselective synthesis, and organometallic chemistry. Students will learn about the complexities of modern drug molecules, how their structures can be analyzed, and how they are synthesized.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH

Minimum Credits: 2
Maximum Credits: 2
A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2390 - SEMINAR IN ORGANIC CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2430 - QUANTUM MECHANICS AND KINETICS

Minimum Credits: 3
Maximum Credits: 3
Basic quantum mechanics, with emphasis on the theory of chemical structure and dynamics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2440 - THERMODYNAMICS & STATISTICAL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Development of equilibrium statistical mechanics and thermodynamics. Applications to chemical systems. These applications include solutions, phase transitions (Ising Model) and reaction theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2490 - SEMINAR IN PHYSICAL CHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2540 - INTRO TO MASS SPECTROMETRY

Minimum Credits: 3
Maximum Credits: 3
A basic, yet comprehensive, introduction to mass spectrometry is presented including a summary of instrumentation, spectral interpretation procedures, and data handling. Applications of mass spectrometry to geology, biochemistry, energy research and the environment are emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
CHEM 2600 - SYNTHESIS & CHARACTERZTN POLYMERS

Minimum Credits: 3
Maximum Credits: 3
Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (FIr, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2620 - ATOMS, MOLECULES AND MATERIALS

Minimum Credits: 3
Maximum Credits: 3
This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between "small molecule" intuition and the solid-state perspective on large molecules, clusters and solids.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2700 - GRADUATE RESEARCH SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Seminar given by faculty on graduate research opportunities in chemistry. This course is designed especially to help students in their selection of a research adviser.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 2710 - CHEMISTRY RESEARCH ROTATION EXPERIENCE

Minimum Credits: 1
Maximum Credits: 1
First year graduate students will spend a term carrying out research in various laboratories in order to make a well informed decision about choosing a PhD research adviser.

Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 2810 - BIOLOGICAL CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
This course considers the chemical properties of amino acids, oligopeptides, and proteins; the biosynthesis of proteins; the physical interactions that determine the proper ties of proteins; the conformational properties of polypeptide chains and biomacromolecules, integral membrane proteins and ion channels; interactions between proteins and other molecules; enzyme kinetics; catalytic antibodies; and biosynthesis of small molecules.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2820 - BIOLOGICAL CHEMISTRY 2
This course will discuss select biological systems and problems and the chemical tools that are being developed in order to study and address them. In addition to an introduction to cell biology and molecular and cell biological techniques, topics may include: conditional control of gene editing, forward and reverse chemical genetics, sensors of cellular processes, protein bioconjugation, small molecule inhibitors of kinase function, activity-based probes, small molecule dimerizers of proteins, and targeted protein degradation. This will lead to the following expected learning outcomes: basics of cell biology, biological techniques and vocabulary relevant to the field of chemical biology, important research topics and research areas in the field of chemical biology, navigating and critical reading of chemical biology primary articles and review articles, and knowledge of key labs that are major contributors to the field of chemical biology.

**CHEM 2830 - SYNTHETIC BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 2890 - SEMINAR IN BIOLOGICAL CHEMISTRY**

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**CHEM 2970 - TEACHING OF CHEMISTRY**

Minimum Credits: 1  
Maximum Credits: 1  
This course is for graduate students who are teaching assistants/fellows in the department.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**CHEM 2990 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 12  
Research credits towards a MS and Ph.D. degree.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis

**CHEM 3000 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1  
Maximum Credits: 12  
Research credits for the Ph.D. Degree.  
Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad SN Basis
CHEM 3001 - PREPARATION FOR THE STEM CLASSROOM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

CHEM 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING

Minimum Credits: 1
Maximum Credits: 1
This course consists of a MOOC offered by Coursera, jointly developed at Boston University, Vanderbilt, Michigan State and Wisconsin-Madison, combined with in-person class meetings of the local learning community at the University of Pittsburgh. Students will meet with the facilitator for the course, Dr. Mary Besterfield-Sacre, four times during the semester to go over the material in the online sessions, and to relate it to their teaching experiences in labs, discussions, and classrooms. The course will draw on the expertise of experienced stem faculty, educational researchers, and staff from University teaching centers, many of them affiliated with the center for the integration of research, teaching and learning (CIRTL), a network of 22 research universities collaborating in the preparation of stem graduate students and post-docs as future faculty members.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Attributes: Hybrid

CHEM 3100 - ADVANCED TOPICS INORGANIC CHEM 1

Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term, but all focus on some aspect of inorganic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3110 - ADVANCED TOPICS INORGANIC CHEM 2

Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term, but all focus on some aspect of inorganic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1

Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
CHEM 3380 - ORGANIC GROUP MEETING

Minimum Credits: 1  
Maximum Credits: 1  
A weekly meeting to discuss the most recent advances in organic chemistry.

CHEM 3390 - SYNTHETIC ORGANIC COLLOQUIUM

Minimum Credits: 1  
Maximum Credits: 1  
A weekly workshop on current synthetic organic chemistry literature and state of the art research.

CHEM 3410 - ADVANCED TOPICS PHYSICAL CHEM 2

Minimum Credits: 2  
Maximum Credits: 2  
Minicourse. Topics vary from term to term but all consider some specific aspect of physical chemistry.

CHEM 3430 - INTRO MODERN COMPUTATIONAL CHEM

Minimum Credits: 3  
Maximum Credits: 3  
This advanced quantum mechanics course will cover the treatment of angular momentum in electronic stages, scattering and spectroscopy. The use of Clebsch-Gordon and Wigner coefficients to analyze angular momentum coupling and recoupling will be discussed, as will be methods to create and measure polarization and alignment in molecules.

CHEM 3450 - MOLECULAR MODELING AND GRAPHICS

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce the student to computational methods to determine molecular structures and stabilities, Monte Carlo and Molecular Dynamics Simulation Methods, and the use of graphics for displaying structures, charge densities, and other properties. Use will be made of both microcomputers and the Cray XMP at the Pittsburgh Super Computing Center.

CHEM 3460 - INTRO MODERN COMPUTATIONAL SCI
Minimum Credits: 3
Maximum Credits: 3
This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, least squares fitting, eigenvalue problems, solution of nonlinear equations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3480 - KINETICS AND MOTION IN CHEM RXNS

Minimum Credits: 3
Maximum Credits: 3
A general treatment of the rates of gas phase reactions with emphasis on theories and experimental measurements of elementary rate processes. Principle topics include data handling, mechanisms, and transport effects; two-body unimolecular, and recombination reactions; and special topics such as explosions, flames, shock tube kinetics, excited states, and energy transfer.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3700 - SCIENTIFIC PROPOSAL WRITING

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 3800 - ADVANCED TOPICS BIOLOGICAL CHEMISTRY 1

Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all consider some specific aspect of biological chemistry.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
Directed study in a specific area of chemistry to enhance preparation for graduate research.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

Chinese

CHIN 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1
Maximum Credits: 6
This course recognizes work performed in the course of preparing the thesis.

Academic Career: Graduate
Course Component: Thesis Research
CHIN 2025 - ASPECTS OF THE CHINESE LANGUAGE

Minimum Credits: 3  
Maximum Credits: 3  
Aspects of the Chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to Chinese to enable students to use the right tool to describe and critically analyze the features of a language; (3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of Chinese; (4) to inspire interest in a range of topics including differences in modern and classical Chinese, philosophical belief embodied in the language, Chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CHIN 2041 - LITERARY CHINESE 2 CLASSICAL

Minimum Credits: 3  
Maximum Credits: 3  
A continuation of Chinese 1040, this course will further develop the student's knowledge of vocabulary and syntactical patterns of classical Chinese.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CHIN 2047 - CHINESE AND WESTERN POETRY

Minimum Credits: 3  
Maximum Credits: 3  
A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: China and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Asian Studies, West European Studies

CHIN 2059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

CHIN 2083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN

Minimum Credits: 3  
Maximum Credits: 3  
This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose
(historical, philosophical and literary texts, legends and myths of the remote past, anecdotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the T'ang and Sung periods).

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CHIN 2084 - MASTERPIECES OF CHINESE LITERATURE: MODERN**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- A critical analysis of some of the most representative literary works in modern China from a literary and socio-political perspective.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis

**CHIN 2088 - NEW CHINESE CINEMA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis

**CHIN 2089 - THE WORLD OF CHINA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Various topics are covered.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis

**CHIN 2090 - GREAT MINDS OF CHINA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- First segment on Confucianism, including the Analects and Menicus, will be studied with relevant commentaries, stressing implications for chinese culture, especially in ethical and socio-political dimensions. Second segment on Taoism, Lao Tzu and Chuang Tzu, will be studied with emphasis on impact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, diamond sutra and texts from the Chan (Zen) master's.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis

**CHIN 2700 - TRANSLATION THEORY AND PRACTICE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SNC Basis
CHIN 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
Tutorial for advanced graduate study.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

Civil & Environmental Engineer

CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2100 - NUMERICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
Finite difference methods and finite element methods for parabolic, elliptic and hyperbolic differential equations. Also included are numerical methods for structure analysis and dynamics of vibration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2105 - ADV CIVIL ENGRNG MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Advanced topics in material behavior - fatigue, creep, fracture, etc. - As applied to high performance civil engineering materials; high strength low alloy steel, high strength concrete, composite materials, laminated timbers, etc., With special emphasis upon infrastructure rehabilitation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2106 - NONCONVENTIONAL ENGINEERING MATERIALS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on materials science topics relevant to the application of nonconventional materials in [civil] engineering structures, infrastructure and products. Increasingly, engineers are looking to [often locally-sourced] nonconventional materials to augment or replace resource-intensive conventional engineered materials, such as steel and concrete. This is especially true in resource-scarce regions of the planet. This course will address a broad range of nonconventional materials falling into three categories: i. advanced reinforced polymer composites (GFRP, CFRP, BFRP, pGFRP) and metals (Al and Ti); ii. traditional and vernacular materials such as earth-based materials and bamboo; iii. historic materials (and the repair and restoration thereof); Course deliverables are partially project driven, allowing students to pursue materials issues of interest to their plan or study or research. This course is open to all Engineering and Architecture students (as a technical elective).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 1105 or ENGR 0022; CEE and ENGR Undergraduates must have at least 75 credit hours completed and a GPA greater than 3.2.; BS (Architecture) students may take course with permission

CEE 2201 - CONSTRUCTION COST ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2202 - CONSTRUCTION SCHEDULING

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2203 - CONSTRUCTION METHODS AND EQUIPMENT

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2205 - CONSTRUCTION FINANCE & COST CONTROL
This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate School of Engineering

**Course Attributes:** Global Studies

### CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY

This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS

This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2217 - GREEN BUILDING DESIGN AND CONSTRUCTION

Understanding the design and construction of green buildings are key elements in green and sustainable engineering. This course teaches all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The United States green building council's leadership in energy and environmental design green building rating system is used to demonstrate one possible green building rating system. Life cycle thinking will be discussed to expand the focus from not only design and construction, but also use, operations, and decommissioning.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2230 - BUILDING INFORMATION MODELING

The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.
CEE 2320 - ADVANCED MECHANICS OF MATERIALS

Minimum Credits: 3
Maximum Credits: 3
The fundamentals of elasticity are introduced and related to various problems such as beams and bars on elastic foundations, unsymmetrical bending, torsion of thin walled members, curved bars, failure theories, and stability.

CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This course provides first-year graduate students with the fundamentals regarding mathematical derivations, mechanical models and numerical analyses in elasticity, plasticity and fracture mechanics. It is aimed at laying the foundations for the students for their future study and research in advanced mechanical problems. The main topics of this course include: 1) equilibrium and compatibility in elastic domains; 2) complex potential method for elasticity problems; 3) plasticity fundamentals; 4) linear elastic fracture mechanics; 5) stress intensity factors; 6) cohesive crack model and crack band model; 7) size effect and scaling; 8) probabilistic fracture mechanics; and 9) micromechanics.

CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

CEE 2331 - PLATES AND SHELLS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the theory of plates and shells and the analytical and numerical solutions to problems associated with plates and shells. Topics covered include classical plate and plate buckling theories and solution methods including Navier, Levy, Ritz and the finite difference method. Topics in shell theory will include membrane and bending stresses. Examples will include cylindrical shells, pipes, tanks and pressure vessels.

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Minimum Credits: 3
Maximum Credits: 3
Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2340 - CONCRETE STRUCTURES 2**

Minimum Credits: 3  
Maximum Credits: 3  
Advanced behavior, strength and design of reinforced concrete structures, including column and frame stability effects, two-way slabs, and serviceability criteria. Introduction to earthquake design concepts.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

**CEE 2341 - STEEL STRUCTURES 2**

Minimum Credits: 3  
Maximum Credits: 3  
Advanced design criteria for steel structures, including composite beams, columns, and frames; member and system stability; first- and second-order analysis of frames; and serviceability criteria.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

**CEE 2343 - PRESTRESSED CONCRETE**

Minimum Credits: 3  
Maximum Credits: 3  
Design of prestressed concrete beams and slabs, including shear and torsion effects.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate Engineering Students

**CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction and use of performance-based design concepts. Analysis and modeling techniques for existing and repaired structures. Gravity and lateral load retrofit procedures. Selection, modeling and design of repair and/or retrofit measures for a variety of structures and building materials. Retrofit for blast loads.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2347 - BRIDGE ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO IRFD
specifications for the analysis and design of highway bridge superstructure components.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

---

**CEE 2350 - MACHING LEARNING IN INFRASTRUCTURE ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers theory and practical algorithms in machine learning from a variety of perspectives, with applications to solve problems in civil infrastructure engineering. The topics include linear methods for regression and classification, regularization, kernel smoothing methods, bayesian inference, sampling, decision tree learning, support vector machines, statistical learning methods, unsupervised learning and deep learning, as well as their field applications. This course is designed to give graduate-level students a thorough grounding in methodologies, technologies and algorithms in machine learning and push field applications in, but not limited to, civil infrastructure engineering.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**CEE 2360 - DYNAMICS OF STRUCTURES**

Minimum Credits: 3  
Maximum Credits: 3  
Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

---

**CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING**

Minimum Credits: 3  
Maximum Credits: 3  
The course aims at providing an overview of the different techniques for the nondestructive evaluation (NDE) and the structural health monitoring (SHM) of civil and aerospace structures. Techniques such as electrical resistance strain gauges, fiber optic sensing and ultrasonics will be described within the framework of the NDE. Applications to materials characterization and defect detection will be discussed with emphasis on steel and composite structures. Global and local methods for SHM will be introduced with emphasis on vibration and ultrasonic methods, respectively. The course will also provide the essential tools necessary for the digital signal processing of ultrasonic data. Mat lab and laboratory exercises on recent researches will be investigated.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

---

**CEE 2401 - OPEN CHANNEL HYDRAULICS**

Minimum Credits: 3  
Maximum Credits: 3  
Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate Engineering Students
**CEE 2410 - WATER RESOURCES ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
This course addresses fundamental and practical issues of water resources engineering. The increasing demand for sufficient water quantity and quality that is distributed in time and space forces engineers and policy makers to develop more comprehensive, complex, and ambitious plans for environmental and water systems. This course emphasizes understanding, formulating, and approaches of solving problems of water resources engineering. Quantitative overview of the water resources development, water resources problems, impacts of climate variability and global warming on water resources, and the fundamental principles and basic tools to solve these problems will be covered. Topics to be discussed also include introduction to basic concepts of hydrology, GIS (Geographic Information Systems) applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers, introduction to rainfall-runoff analyses, and watershed modeling.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate Engineering Students

**CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers a wide range of topics related to current issues and challenges related to water resources, especially those associated with climate changes. Through this course, the students are expected to gain in-depth understanding of the fundamentals as well as the up-to-date advances. Students are required to study selected research articles and participate in guided discussions. Topics covered include floods, droughts, winter storms, accurate forests of precipitation and streamflow, urban hydrology and its sustainability. Contemporary and new frontiers in modeling and data processing are also part of the curriculum.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**CEE 2416 - SEDIMENT TRANSPORT**

Minimum Credits: 3  
Maximum Credits: 3  
This course describes the interaction of fluid and sediment transport processes. This interaction causes morphodynamic changes in open channel flows. This course covers topics such as boundary layer flow and distribution of flow velocities and shear stresses in open channel flows; physical properties of sediments; types of sediment transport (bed-load and suspended-load) for uniform and mixture; dynamics of bed forms, modulation of bedforms into hydrodynamics and morphodynamics; review of the state-of-the-art in sediment transport research, review of the importance of sediment transport processes into engineering projects. This course serves contains computational, analytical and some experimental projects.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 2500 - ENVRMNTL ENGRG MICROBIOL**

Minimum Credits: 3  
Maximum Credits: 3  
Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering  
Course Attributes: Global Studies

**CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY**
CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2505 - WATER TREATMENT AND DISTRIBUTION SYSTEMS DESIGN

Minimum Credits: 3
Maximum Credits: 3
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2511 - ENVIRONMENTAL ENGINEERING PROCESS LABORATORY

Minimum Credits: 3
Maximum Credits: 3
Chemical and biological laboratory procedures and techniques for instrumental analysis applied to evaluation of liquids and gases for environmental assessment and operation and control of environmental quality control systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: Graduate School of Engineering

CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
Course Attributes: Global Studies

CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering  
**Course Attributes:** Global Studies

### CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3  
Maximum Credits: 3  
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### CEE 2612 - DESIGN AND ANALYSIS OF EXPERIMENTS

Minimum Credits: 3  
Maximum Credits: 3  
Principles of designing experiments, analysis of variance techniques for hypothesis testing, simultaneous confidence intervals, robust design and Taguchi methods, block designs, factorial experiments, random effects and mixed models, split plot designs, analysis of covariance, response surface design.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION

Minimum Credits: 3  
Maximum Credits: 3  
This course first provides an overview all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The course then focuses on energy modeling, indoor environmental quality monitoring, and post-occupancy evaluations.

**Academic Career:** Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 2700 - TRAFFIC MGMNT AND OPERATIONS

Minimum Credits: 3
Maximum Credits: 3
Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2710 - TRAFFIC CONTROL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic signal systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; traffic signal systems selection (adaptive traffic signal systems versus traditional systems) and design and implementation. Pre-requisite CEE 1703 for 1710 and CEE 2700 for 2710
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

CEE 2711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES

Minimum Credits: 3
Maximum Credits: 3
This is a management-oriented course that covers key aspects of how government transportation agencies operate their transportation systems. Focus is on the strategies that are used to improve public safety and mobility, including traffic incident management, traffic management, traveler information and pricing. Emphasis is also placed on processes, including planning, performance management and systems engineering, that agencies apply in advancing programs and projects. The course concludes with a look at the future, including the effects that automated vehicles and Smart City concepts will have on the future of transportation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2714 - PAVEMENT DESIGN AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2715 - PAVEMENT MAINTENANCE AND REHAB

Minimum Credits: 3
Maximum Credits: 3
Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and
flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Soils, soil stabilization, aggregates, bituminous materials and mixtures. Advanced topics in selection and design of bituminous materials. Asphalt cement, rheology, emulsions, chip seals, hot-mix asphalt design, visco-elasticity characterization.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2720 - URBAN TRANSPORTATION PLANNING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2721 - TRAVEL DEMAND ANALYSIS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The analysis of travel demand. Aggregate and disaggregate models. Activity and time budgets.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROQ: CEE 2700; PROG: Swanson School of Engineering

### CEE 2725 - PUBLIC TRANSPORTATION SYSTEMS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation
systems within the context of the overall transportation system.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering (PENGR)

### CEE 2730 - HIGHWAY ENGINEERING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2800 - ENGINEERING GEOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering  
**Course Attributes:** Global Studies

### CEE 2801 - ADVANCED SOIL MECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2802 - GEOTECHNICAL ANALYSIS
Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering  
**Course Attributes:** Global Studies

### CEE 2805 - EARTHQUAKE ENGINEERING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Earthquake hazard assessment, time domain and frequency domain analysis of multi-degrees of freedom systems, response spectrum, material nonlinearity, stochastic response and failure assessment, soil-structure interaction.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2809 - HYDRAULIC FRACTURING MECHANICS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2814 - SLOPES & EARTH RETAINING STRUCT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

**Academic Career:** Graduate
Course Component: Workshop  
Grade Component: Grad SN Basis

CEE 2996 - SPEC INVSTGTN FOR M.S. STUDENTS

Minimum Credits: 1  
Maximum Credits: 9  
A special project course in which students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member. 
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

CEE 2997 - RESEARCH, M.S.

Minimum Credits: 1  
Maximum Credits: 15  
Non-thesis option research project for the MS Degree under the guidance of a civil engineering faculty member.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

CEE 2999 - M.S. THESIS

Minimum Credits: 1  
Maximum Credits: 15  
Scheduled discussion periods with the student's advisor. Literature survey, selection of thesis topic, development of research methods and procedures, and preparation of thesis under the guidance of a civil engineering faculty member.  
Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

CEE 3330 - STRUCTURAL STABILITY

Minimum Credits: 3  
Maximum Credits: 3  
An upper level graduate course focusing on classical solutions for column and frame buckling.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Swanson School of Engineering (PENGR)

CEE 3361 - STRUCTURAL WIND & EARTHQ ENGRNG

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to nature of wind, aerodynamic wind loading and design. Investigation of the response of structures to dynamic and pseudo-dynamic wind, earthquake, shock waves, and other deterministic and random loading. Design criteria for buildings and nuclear power stations, special topics in lifeline, computer applications.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CEE 2360

CEE 3408 - ADVANCED ENVIRONMENTAL FLUID MECHANICS
Minimum Credits: 3  
Maximum Credits: 3  
This course describes the theory behind fluid mechanics processes for environmental flows. Topics to be covered are: a review of boundary layer flow and distribution of flow velocities and shear stresses in open channel flows; turbulence in open channel flows, shear layer flows, hydrodynamics of lakes and reservoirs, stratified flows, geophysical flows. This course contains computational, analytical and some experimental homework and projects.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 3414 - ADVANCED HYDROLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Fundamental and advanced theories and processes of hydrology. Topics to cover include processes of water in the atmosphere, over land surface, and within soil; advanced representation of infiltration and evapotranspiration processes; partitions of water and energy budgets at the land surface; snow and snowmelt processes; applications of remote sensing (e.g., Satellite and radar), and flood and drought analysis.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 3501 - ENVRNMTL ENGRG PROCESSES 1**

Minimum Credits: 3  
Maximum Credits: 3  
Theory and applications of physical and chemical principles to water and wastewater treatment and disposal. Mixing, equalization, coagulation, sedimentation, filtration, disinfection and solids handling.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering  
Course Attributes: Global Studies

**CEE 3502 - ENVRNMTL ENGRG PROCESSES 2**

Minimum Credits: 3  
Maximum Credits: 3  
Theory and applications of aerobic, anoxic and anaerobic biological processes in environmental quality control.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering or (PREQ: CEE 1503 or CET 1141; PROG: Undergraduate School of Engineering)  
Course Attributes: Global Studies

**CEE 3609 - ADVANCED TOPICS IN LIFE CYCLE ASSESSMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.
CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL

Minimum Credits: 3
Maximum Credits: 3
Theoretical models for analysis of pavement systems. Design and analysis of pavements through the use of transfer functions relating pavement response to pavement performance. Evaluation of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

CEE 3805 - ROCK MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Behavior and properties of rock as an engineering material; failure of rock; design and construction of underground structures and slopes in rock; design of rock abutments for dams.

CEE 3996 - SPECIAL INVESTGN FOR PH.D. STDNT

Minimum Credits: 1
Maximum Credits: 6
A special project course in which advanced students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.

CEE 3997 - RESEARCH, PH.D

Minimum Credits: 1
Maximum Credits: 15
Directed research and study for the preparation of the Ph.D. Dissertation proposal.

CEE 3999 - PH.D. DISSERTATION

Minimum Credits: 1
Maximum Credits: 15
Scheduled discussion periods with the student's advisor. Literature survey, selection of dissertation topic, development of research methods and procedures, and preparation of the dissertation, under the guidance of a civil engineering graduate faculty member.
Classics

CLASS 2019 - GLOBAL ISSUES THROUGH CLASSICS 1

Minimum Credits: 1
Maximum Credits: 1

This course represents the first half of a two-semester graduate proseminar introducing students to global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, and to prepare materials for discussions of ancient and contemporary global issues.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2020 - GLOBAL ISSUES THROUGH CLASSICS 2

Minimum Credits: 2
Maximum Credits: 2

This course is the continuation of a two-semester graduate proseminar investigating contemporary global issues through ancient Greek and Roman sources in translation. The course proposes that global issues are not only transnational but in fact transhistorical: that is to say, the processes of connection and disruption, inequality, precarity, and violence, associated with the uneven flows of people and power through space and over time can be found operating around the ancient world as much as in the modern. Consequently, not only can ancient texts, sources, and ideas be used to enrich our understanding of today's global issues, but methods from Global Studies can also be usefully applied to probe these same processes in antiquity. Topics may include: poverty and inequality; war, peace, and diplomacy; citizenship and xenophobia; indigeneity and nationalism; migration and mobility; center versus periphery; terrorism; imperialism; conceptions of race and ethnicity; and the organization of knowledge and circulation of information. Students are expected to complete weekly readings of ancient texts, to prepare materials for discussions of ancient and contemporary global issues, and to develop an independent research project or paper.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2090 - TOPICS IN CLASSICS

Minimum Credits: 3
Maximum Credits: 3

Close study of selected topics in classical studies. Course may be repeated for credit provided material covered is different.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2140 - ANCIENT POETRY AND RECEPTION

Minimum Credits: 3
Maximum Credits: 3

Students will read, in translation, a selection of Greek and Roman poets and the reception of their works across varying genres, cultures and timeframes. Particular focus will be placed on the specific literary, cultural and historical contexts, those in which the authors wrote and those in which their works were received.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
CLASS 2301 - ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2319 - FROM PHILO TO PHILOPONUS: AN INTRODUCTION TO THE HISTORY OF PHILOSOPHY IN LATE ANTIQUITY

Minimum Credits: 3
Maximum Credits: 3
This course is designed thematically and historically to expand the course offerings of the Departments of Classics and Philosophy. The history of philosophy in Late Antiquity is lamentably neglected by historians of ancient philosophy, even though the thinkers of this period made crucial and formative contributions to the development of Western philosophy, theology, and science. The aim of this course is to provide students with a clear sense of the cultural and social forces that shaped the doctrinal and philosophical debates and concerns of the first six centuries CE, and to familiarize them with the roots of what was to become medieval and Renaissance philosophy.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2320 - CLASSICS, PHILOSOPHY, AND ANCIENT SCIENCE GREEK AND LATIN SEMINAR 1

Minimum Credits: 3
Maximum Credits: 3
Bringing together students and faculty members, the aim of this course is to read and discuss a variety of Ancient Greek and Latin authors in their original language. The format of the course is flexible. Each participant translates a portion of text and singles out topics for discussion, whether philological, philosophical or methodological in nature. All members are encouraged to interrupt and participate as the mood strikes. We attempt to cover authors both central and at the margins of the curriculum, depending on students' interest. The course alternates weekly between Greek and Latin authors.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

CLASS 2321 - CLASSICS, PHILOSOPHY, AND ANCIENT SCIENCE GREEK AND LATIN SEMINAR 2

Minimum Credits: 3
Maximum Credits: 3

CLASS 2390 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

### CLASS 2392 - ARISTOTLE'S CONCEPT OF NATURAL SCIENCE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

### CLASS 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### CLASS 2990 - INDEPENDENT STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
Independent study on classical topics for graduate students.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis

### CLASS 2992 - DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 3  
Directed study on classical topics for students in the graduate program.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### CLASS 2995 - DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
Directed study on classics topics for students in the graduate program.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis
Clinical Nurse Specialist

**NURCNS 2161 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 3  
Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis

**NURCNS 2350 - GROUP THERAPY THEORY**

Minimum Credits: 2  
Maximum Credits: 2  
This course examines models of group interventions in psychiatric mental health nursing from a holistic perspective and incorporates theory and research from nursing and related sciences to develop a framework for guiding advanced nursing practice. Clinical therapeutics focus on the use of group interventions across the life cycle with different populations in altering human responses associated with mental and emotional problems. Various classifications of systems of nursing phenomena are considered in relation to advances in psychobiology and in relation to use of group interventions with specific client populations. Group management skills are explored within the context of a selected clinically-related management role and case management.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: NURCNS 2351

**NURCNS 2351 - GROUP THERAPY PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
This clinical practicum is taken concomitantly with NURCNS 2350 and includes practice and a weekly clinical conference. Clinical applications of theoretical knowledge focus on experiences in short-term group interventions and in the clinically related role of manager.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: NURCNS 2350

**NURCNS 2352 - FAMILY THEORY/ THERAPY TECHNIQUES**

Minimum Credits: 2  
Maximum Credits: 2  
This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NURCNS 2353 - FAMILY THERAPY ROLE SEMINAR AND CLINICAL PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
This clinical practicum is taken concomitantly with NURCNS 2352 and includes clinical experiences as a family therapist. Experiential seminars are
Knowledge gained from theory course is applied and synthesized into a conceptual framework for advanced nursing practice.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

### NURCNS 2354 - INDIVIDUAL PSYCHOTHERAPY THEORY

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- **Course Description:** This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: NURCNS 2355; PROG: Graduate School of Nursing

### NURCNS 2354D - INDIVIDUAL PSYCHOTHERAPY THEORY

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- **Course Description:** This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Distance Education

### NURCNS 2355 - INDIVIDUAL PSYCHOTHERAPY PRACTCM

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- **Course Description:** The goal of this practicum is to provide the student with an opportunity to gain skills in the practice of individual psychotherapy with patients across the life span and in different populations. The student will be expected to provide psychotherapy to patients through the beginning, middle, and end phases of treatment, utilizing concepts learned in NURCNS 2354 individual psychotherapy theory.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: NURCNS 2354

### NURCNS 2361 - INDEPENDENT STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
- **Course Description:** An in-depth study in a particular area of interest by arrangement with a designated faculty member.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

### NURCNS 2850 - CNS ROLE IMPLEMENTATION

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- **Course Description:** This course is designed to provide a framework for clinical nurse specialist (CNS) practice that is organized around the three spheres of influence (patient, nursing personnel, organization/network) that encompass consumers of CNS services. Students are introduced to unique competencies in each sphere of influence as operationalized in acute care. Emphasis will be placed on acquisition of skills needed to develop population-based
programs of care; facilitate systems that promote innovative, cost-effective and comprehensive care; develop and implement evidence-based practice initiatives; and collaborate with health team members to improve health care delivery and patient outcomes. Using model cases and problems derived from their practice, students examine how leadership, consultation and collaboration skills can be used to solve problems for patients/populations, health team members, and organizations/systems.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**NURCNS 2851 - CNS CLINICAL PRACTICUM 1**

Minimum Credits: 4  
Maximum Credits: 5  
Practicum is the first of two clinical practica designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on enhancing competencies within the three spheres of influence of the CNS (patient, nursing personnel, organization/network) and developing characteristics essential to CNS practice.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: NUR 2850

**NURCNS 2852 - CNS CLINICAL PRACTICUM 2**

Minimum Credits: 1  
Maximum Credits: 4  
This practicum is designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on further refinement of characteristics essential to CNS practice and competencies.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade

**NURCNS 2853 - CLINICAL EMPHASIS SPECIALTY**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with dysfunctions/alterations in the selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: NUR 2004; PROG: NURS

**NURCNS 3039 - DNP-CNS ROLE PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 10  
This course is designed to provide a culminating practicum experience for the DNP clinical nurse specialist (CNS). Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies within the three spheres of influence of the cans (patient, nursing personnel, and systems) and further development of characteristics essential to CNS practice at the doctoral level.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad HSU Basis
Clinical Rehab and Mental Health Counseling

COUN 2716 - MEDICAL & PSYCHOSOCIAL ASPECTS OF DISABILITY

Minimum Credits: 2
Maximum Credits: 2
This course is designed to prepare counseling professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2723 - ASSISTIVE TECHNOLOGY TO PROMOTE MENTAL & PHYSICAL FUNCTIONING

Minimum Credits: 2
Maximum Credits: 2
This course will address aspects of assistive technology for use at home, in education and the workplace. Topics will include legislation, computer access, ergonomics, mobility, and adaptations for visual, auditory, motor, cognitive and mental health impairments. Field trips and guest speakers will provide unique experiences and insights.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2724 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on theory and practice of career and vocational counseling. Module 1 of this course focuses on models of theories of career development and career counseling, with cultural considerations taken into account. Students learn to incorporate theory into career counseling practice. Module 2 emphasizes vocational issues including job placement, pre-placement analysis, client-readiness, job development, job modification, and employer culture and attitudes. Module 2 content includes sources of occupational data, labor market analysis, job analysis, job seeking skills, and procedures for analyzing transferable work skills. Students learn various employment alternatives including competitive employment, supported employment, self-employment, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2725 - FOUNDATIONS OF COUNSELOR ROLES & RESPONSIBILITIES

Minimum Credits: 1
Maximum Credits: 1
This course provides additional instructional material regarding counselor roles and responsibilities. Various practice settings and functions of counselors, as well as organizational structures, standards, and case management, will be highlighted.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2726 - SUBSTANCE ABUSE AND ADDICTIONS COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to substance abuse counseling. The expected student outcomes of the course include: develop understanding of
substance use disorders; develop evidence-based addiction counseling competencies; and increase competence in providing substance abuse evaluation, education, and treatment services. Students are introduced to the theories of etiology and intervention for alcohol and substance use, abuse, and addiction. Students explore community resources proving substance use intervention.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COUN 2728 - FOUNDATIONS OF REHABILITATION & MENTAL HEALTH COUNSELING

Minimum Credits: 2
Maximum Credits: 2
The course provides an overview of the professional practice of counseling. The content includes the origins of counseling and rehabilitation, the professions associated with rehabilitation and mental health counseling through the philosophy, legislative, and clinical history of the disciplines. The goal of studying history and foundations is to gain perspective on the nature and scope of counseling practice. Students are exposed to the requisite knowledge and skills for effective practice. Students understand need for, and develop skills for professional and sociopolitical advocacy for the counseling professions and service recipients. The course also provides fundamental knowledge about psychosocial aspects of disability, including models of disability and adjustment to disability.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2729 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN

Minimum Credits: 2
Maximum Credits: 2
The course provides an in-depth study of human development from a disability and multicultural perspective. The content will cover theories of physical, cognitive, social, cultural, and emotional human development from the prenatal period through aging and death. Clinical approaches for each stage of development will be reviewed. Multi-cultural competencies, personal biases, and client preferences will be explored, tested, and applied to clinical work. Students are expected to develop knowledge of human development, disability, and culture that will inform future case conceptualization and treatment as a clinical rehabilitation mental health counselor. Application of these skills and knowledge will be evaluated through direct observation in the community.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2730 - CULTURAL CONSIDERATIONS IN COUNSELING

Minimum Credits: 2
Maximum Credits: 2
This course is designed to increase multicultural awareness, knowledge, and skills in the competencies necessary to effectively work with and relate to ethnically and culturally diverse clients. Students will examine their own culture, attitudes, beliefs and internalized messages. Knowledge and skills in the area of multicultural counseling will be explored and practiced. Application of these skills and knowledge will be evaluated through direct observation in the community. Students will learn about a variety of topics including theories and models of multicultural counseling, intersectionality, social justice and advocacy, implicit bias, cross-cultural communication, microaggressions and generational trauma. Cultural humility will be introduced as a process to help build authentic relationships with clients of different cultural and ethnic backgrounds. The course will also expose students to historic and current cultural events.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2731 - FOUNDATIONS OF REHABILITATION & MENTAL HEALTH COUNSELING
Minimum Credits: 3
Maximum Credits: 3
The course provides an overview of the professional practice of counseling. The content includes the origins of counseling and rehabilitation, the professions associated with rehabilitation and mental health counseling through the philosophy, legislative, and clinical history of the disciplines. The goal of studying history and foundations is to gain perspective on the nature and scope of counseling practice. Students are exposed to the requisite knowledge and skills for effective practice. Students understand need for, and develop skills for professional and sociopolitical advocacy for the counseling professions and service recipients. The course also provides fundamental knowledge about psychosocial aspects of disability, including models of disability and adjustment to disability.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2732 - HUMAN DEVELOPMENT ACROSS THE LIFESPAN

Minimum Credits: 3
Maximum Credits: 3
The course provides an in-depth study of human development from a disability and multicultural perspective. The content will cover theories of physical, cognitive, social, cultural, and emotional human development from the prenatal period through aging and death. Clinical approaches for each stage of development will be reviewed. Multi-cultural competencies, personal biases, and client preferences will be explored, tested, and applied to clinical work. Students are expected to develop knowledge of human development, disability, and culture that will inform future case conceptualization and treatment as a clinical rehabilitation mental health counselor. Application of these skills and knowledge will be evaluated through direct observation in the community.

Academic Career: Graduate

Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2733 - COUNSELING SKILLS & TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This is an experiential course where students will learn advanced counseling skills and apply them into clinical practice. The class will consist of three themes, including: (1) listening skills, building trust and rapport, and multicultural competencies; (2) development and application of counseling skills; (3) clinical documentation and progress reports. Class time will be utilized for practicing counseling techniques and styles through class activities, demonstrations, and role-plays. This course requires students to conduct, video-record, and document ongoing counseling sessions with a simulated client. Students are expected to effectively conduct 50-minute goal-directed counseling sessions with a cross-theoretical approach by the end of the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2734 - COUNSELING THEORIES AND TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth overview of major counseling theories, principles and techniques. Theories and techniques are explored with an emphasis on multicultural considerations. Emphasis is on both theory and practical applications of the various approaches. Students are encouraged to learn the theoretical principles of counseling theories and begin to integrate various theories to develop their own understanding and approach to counseling. Instruction includes experiential learning such as in-class role-plays and recorded counseling sessions with individualized feedback.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)
COUN 2735 - CAREER COUNSELING & VOCATIONAL ISSUES

Minimum Credits: 2
Maximum Credits: 2
This course focuses on theory and practice of career and vocational counseling. Module 1 of this course focuses on models of theories of career development and career counseling, with cultural considerations taken into account. Students learn to incorporate theory into career counseling practice. Module 2 emphasizes vocational issues including job placement, pre-placement analysis, client-readiness, job development, job modification, and employer culture and attitudes. Module 2 content includes sources of occupational data, labor market analysis, job analysis, job seeking skills, and procedures for analyzing transferable work skills. Students learn various employment alternatives including competitive employment, supported employment, self-employment, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2736 - CRISIS COUNSELING, RISK MANAGEMENT AND DIASER PREPAREDNESS

Minimum Credits: 2
Maximum Credits: 2
The course provides guidelines and parameters for risk assessment and risk management of harm to self and/or others. Students will demonstrate proficiency in establishing risk assessment/management plans for clinical practice. Students examine research on crisis theory, resolution, and resilience. Students will learn the effects of crises, disasters, and other trauma-causing events on persons of all ages. The course examines diverse crisis situations and the assessment and treatment strategies used by counselors to assist individuals, groups, and organizations in managing and resolving crises. Students learn how people deal with crises, explore personal crisis experiences, and develop crisis intervention competency.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

COUN 2737 - CLINICAL, DIAGNOSTIC AND FUNCTIONAL ASSESSMENT IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is focused on the psychometric qualities, indications for use, administration and interpretation of various assessment procedures. Procedures include interview and mental status examination, psychological and neuropsychological testing, functional assessment, vocational testing and vocational evaluation, and specialized assessments such as EMA. Professional and ethical standards and the effect of culture and disability on assessment are included. Students learn to apply assessment findings to goal setting and intervention planning through a series of case studies that require interpretation of test data in the context of a client's life (as presented in the case study). Students are required to demonstrate proficiency in written and oral reporting and communicating assessment results to professionals and clients. The course includes a lab where student teams develop, norm administer and interpret naturalistic assessment tool.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

COUN 2738 - DIAGNOSIS & TREATMENT OF COGNITIVE AND MENTAL HEALTH DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course contains three modules: 1) dsm-5 and differential diagnosis, 2) cognitive rehabilitation, and 3) psychiatric rehabilitation. Students develop skills in diagnostic formulation and clinical intervention planning and implementation. The influence of multicultural identity in diagnosis and treatment is addressed. In module 1, students learn about the diagnosis of cognitive, behavioral, and mental health disabilities through extensive review of the current edition of the diagnostic and statistical manual and related information. In module 2, students learn specialized counseling techniques for individuals with cognitive impairments and behavioral issues. Students demonstrate use of techniques such as external cognitive aids, metacognitive strategies, and social skills training. In module 3, students learn interventions for mental health disorders such as psychiatric rehabilitation day programming, assertive community treatment and case management, and self-help and peer-delivered services.
COUN 2739 - GROUP COUNSELING

Minimum Credits: 3
Maximum Credits: 3
In this course, students are introduced to group work, including theoretical approaches, personal and professional characteristic of an effective group leader, guidelines for forming a group, and leader and participant tasks and behaviors throughout the stages a group. Group counseling ethical, professional, and legal considerations, as well as multicultural issues are discussed throughout the course. Experiential and interactive learning is supplemented by lecture and video demonstration. Using evidence-based practice techniques, students research and evaluate a group intervention of their choice. Students develop a group proposal and demonstrate proficiency in leading a group of their choice. Participation in a 10-week experiential group is required (lab).

COUN 2740 - CLINICAL APPLICATIONS IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course is divided into two modules designed to provide students with basic skills needed for 1) interviewing for intake and assessment purposes and engaging clients in a therapeutic relationship, and 2) application of evidence-based counseling using cognitive behavioral therapy (cbt). The course will employ brief didactic presentations, discussion of readings, video review, and role-play. Students will have the opportunity to conduct a clinical interview and a brief course of cbt with an actor playing the role of the client. These sessions will be video recorded. Evaluation by self, peers, and instructor will occur. Student performance will be evaluated to determine competency for entry-level practice and specific detail for student remediation will be provided if needed.

COUN 2741 - CASE CONCEPTUALIZATION & TREATMENT PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course presents the process of synthesizing relevant client information including client history, interview, and assessment results, along with contextual information (environmental and demand information) in order to achieve accurate case conceptualization. Students learn and demonstrate proficiency in goal setting, treatment planning, case monitoring, and measurement-based care using individual, evolving client case studies. Students explore and develop a compendium of community resources.

COUN 2742 - LEGAL, ETHICAL & PROFESSIONAL ISSUES IN COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to legal, ethical, and professional issues pertaining to the practice of clinical rehabilitation and mental health counseling. This course will offer an in depth focus on the relevant knowledge, awareness and skills necessary to practice safely and responsibly in counseling. Students will examine a variety of complex legal and ethical issues that confront clinical rehabilitation and mental counselors as they work with clients and colleagues within difference counseling systems. Aca, nbcc, and crcc codes of ethics will be examined, as well as decision
making models that will facilitate students informed decision making when faced with ethical and legal issues in the workplace. Clinical rehabilitation and mental health counselor standards of practice will be examined.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

COUN 2743 - FAMILY AND COUPLES COUNSELING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course, a broad theoretical and practical foundation for counseling couples and families is emphasized. The course includes an introduction to theories of family therapy, counseling strategies and techniques, and research in family counseling and functioning. Using a family systems approach, the course exposes students to the dynamics of contemporary family structures, living patterns, and lifestyles. Students learn the family development framework and common family issues across the family life cycle. Students are challenged to better understand their own family system and to examine some of their beliefs and values about what constitutes a family. Learning methods include readings, didactic presentations, discussions, role-playing, and case reviews.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clin Rehab and Mntl Hlt Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

COUN 2744 - EVIDENCE BASED PRACTICE IN COUNSELING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course prepares students to be competent counselors that utilize evidence-based practice in their clinical practice. Students will learn to (1) understand the rationale for using evidence-based practice, (2) use guidelines for determining acceptable evidence, (3) effectively locate free access ebp articles, and (4) create program evaluation plans. At the end of the course, students are required to make evidence-based practice recommendations for clinical case studies. Students also must effectively design a program evaluation protocol for a complex counseling intervention.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** HRS PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

COUN 2746 - COUNSELING PRACTICUM

**Minimum Credits:** 1  
**Maximum Credits:** 6  
Students participate in a minimum of 100 hours of counseling practicum with at least 40 hours of direct clinical service. Students receive supervision from an assigned on-site clinical supervisor, and clinical supervision from a designated faculty clinical mentor. Practicum students increase their awareness and understanding of the differences in values, beliefs, and behaviors of individuals from diverse populations.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

COUN 2749 - CLINICAL COUNSELING INTERNSHIP

**Minimum Credits:** 1  
**Maximum Credits:** 6  
Students participate in a minimum of 600 hours of counseling internship with at least 240 hours of direct clinical service. Students receive supervision from an assigned on-site clinical supervisor with requisite credentials, and clinical supervision from a faculty clinical mentor with the requisite credential and/or license. Internship students increase their awareness and understanding of the differences in values, beliefs, and behaviors of individuals from diverse populations. The internship reflects the comprehensive work experience of a clinical rehabilitation and mental health
professional counselor. This course is the final preceptorship prior to the completion of the degree.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### COUN 2751 - CLINICAL COUNSELING CAPSTONE EXAM

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

The clinical counseling capstone courses serve as the comprehensive examination. The courses focus on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first 1-credit course (clinical capstone i) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. The second 2-credit course will serve as their competency evaluation (clinical capstone ii). Successful completion of this comprehensive examination is needed for the student to demonstrate mastery of graduate study in clinical rehabilitation and mental health counseling.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Clinical Rehab & Mental Health Counseling (CRMHC-MS) or Rehabilitation Counseling (MSRC-SP)

### COUN 2752 - SPECIAL TOPICS IN COUNSELING

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

A special topics course. Content will vary from term to term depending on instructor.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### COUN 2753 - SPECIAL TOPICS IN COUNSELING 1

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

A special topics course. Content will vary from term to term depending on instructor.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### COUN 2755 - CLINICAL COUNSELING MENTORSHIP

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

This course provides a structure for clinical oversight and guidance through structured student-advisor interaction over the course of the program's first year of study. The objective of the course is to facilitate the clinical application of knowledge and skills students have acquired from didactic coursework. This course involves mentoring and ongoing formal and informal evaluation to ensure that students achieve the required level of competency for clinical counseling practice.

**Academic Career:** Graduate  
**Course Component:** Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

COUN 2760 - CLINICAL COUNSELING CAPSTONE

Minimum Credits: 0
Maximum Credits: 3
The clinical counseling capstone courses serve as the comprehensive examination. The courses focus on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first course (Clinical Counseling Capstone) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. The second course will serve as their competency evaluation (Clinical Counseling Capstone Exam). Successful completion of this comprehensive examination is needed for the student to demonstrate mastery of graduate study in clinical rehabilitation and mental health counseling.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

COUN 2761 - CLINICAL COUNSELING CAPSTONE EXAM

Minimum Credits: 0
Maximum Credits: 0
The clinical counseling capstone courses serve as the comprehensive examination. The courses focus on student demonstration of knowledge and skills that reflect the competencies of the clinical rehabilitation and mental health counselor as defined by this program. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The courses require students to synthesize and apply advanced concepts into clinical practice. The courses implement a case study approach. Students are providing real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. The courses are delivered over two terms with the first course (Clinical Counseling Capstone) focusing on preparation and practice. If students do not demonstrate readiness for competency evaluation, remediation will be prescribed and deficiencies resolved prior to proceeding. Grade Component: Grad HSU Basis

Clinical Research

CLRES 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH
Minimum Credits: 1
Maximum Credits: 1
The course provides instruction on the use of computerized methods for clinical research. Dataset manipulation, descriptive statistics, and the graphical presentation of data will be presented using a standard statistical package.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2010 - CLINICAL RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
Clinical research methods provides an overview of the basic research strategies, methods, and goals of clinical research. Topics include study design, data analysis and interpretation, and determination of appropriate methodologies to answer different research questions. Bias and confounding in observational research, the clinical value of diagnostic tests, appropriate use of cross-sectional, case control and cohort study designs, and various statistical modeling used in clinical research will be presented.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2011 - ADVANCED OBSERVATIONAL EPIDEMIOLOGICAL METHODS

Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce students to advanced observational study design and analysis and to provide students with tools and resources to carry out independent research using observational study design. Lectures will focus on case-control, cohort, case-cohort, nested case-control, and case-crossover design and methods. We will discuss recent manuscripts and apply statistical concepts in hands-on computer sessions to aid in the learning of concepts covered in class. The following goals are proposed to teach investigators to: 1. Critically evaluate literature using case-control, cohort, case-cohort, nested case-control and case-crossover design. 2. Understand and address concepts of study design, bias, matching, stratification, propensity score matching, and inverse probability weighting. 3. Identify methods for handling missing data, rare outcomes and count data. 4. Understand modern techniques for addressing confounding, mediation, and effect modification. 5. Conduct and interpret results from appropriate statistics using Stata.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2020 - BIOSTATISTICS

Minimum Credits: 4
Maximum Credits: 4
This course focuses on basic concepts and statistical methods and their application to problems in the health and biomedical sciences. Topics include data description and summarization, basic probability theory, estimation, and hypothesis testing with emphasis on one- and two-sample comparisons involving continuous and categorical data. Linear regression and analysis of variance will be introduced. Students will develop their analytic skills through the analysis and discussion of large clinical studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2005; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2021 - REGRESSION AND ANOVA
The course is designed for medical researchers who are not biostatistics majors. Topics covered include multiple linear regression, regression diagnostics, ANOVA, analysis of covariance, confounding, mediation, moderation, and model selection. At the completion of the course, trainees should be able to understand the appropriate uses of ANOVA and linear regression, to assess their appropriateness and adequacy, to analyze simple datasets taken from the fields of medicine and public health, and to summarize results from regression models via written communication.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

---

### CLRES 2022 - LOGISTIC REGRESSION

This introductory course in logistic regression modeling is intended for physicians in fellowship training programs and other researchers with a limited background in statistics. The course focuses on regression methods for binary data and on the basics of maximum likelihood inference. At the completion of the course, trainees should be able to understand how logistic regression can be used to address a variety of epidemiologic and clinical questions; to interpret models and assess their appropriateness and adequacy; to develop analytic skills through the analysis of datasets taken from the fields of medicine and public health; and to develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

---

### CLRES 2023 - SURVIVAL ANALYSIS

This is an introductory course in regression modeling of time-to-event data. It is intended for physicians in fellowship training programs and other researchers with a limited background in statistics. The course focuses on descriptive methods for survival data, survival analysis, and issues pertaining to time-dependent covariates. At the completion of the course, trainees should be able to recognize when it is necessary to account for time in the analysis of yes/no outcomes and appropriately summarize time-to-event data; be able to interpret the survival analysis model and assess the appropriateness and adequacy of the model; be familiar with issues in the design, analysis, and interpretation of studies involving time-dependent covariates; be able to apply analytic skills to the analysis of datasets taken from the fields of medicine and public health; and be able to develop oral and written communication skills through the description of analytic strategies and the summarization and interpretation of results.

**Academic Career:** Graduate

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** CREQ: (CLRES 2005 and 2020 and 2021 and 2022) or (MEDEDU 2005 and 2020 and CLRES 2021 and 2022); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

---

### CLRES 2025 - DESIGN AND ANALYSIS OF BIOMARKER STUDIES

The objective of this course is to identify, describe and apply the statistical and epidemiological knowledge, tools and perspectives necessary for effectively designing, analyzing and interpreting biomarker studies. Only a brief introduction is provided on clinical and laboratory aspects of biomarker development as these issues are typically very specific to the individual's field of interest; instead, the course will focus on the study design and associated analysis issues given a particular biomarker, or panel of biomarkers, and a corresponding set of clinical outcomes in a manner that is generalizable to a wide range of research studies. Although applications and perspectives will somewhat focus on cancer research, the described methods are broadly applicable to a range of clinical and epidemiological settings.

**Academic Career:** Graduate

**Course Component:** Lecture
CLRES 2026 - ANALYSIS OF CORRELATED DATA

Minimum Credits: 1
Maximum Credits: 1

CLRES 2026 will provide information on statistical methods for analyzing data arising from multilevel or longitudinal studies. The first half of the course lectures will focus on models for continuous data, including mixed effects models, fixed effects models, and generalized estimating equations. The second half of lectures will extend to analysis in the generalized linear model setting (binary outcomes, count data, etc.) We will show students how to investigate data graphically and descriptively before beginning statistical modeling and will introduce students to topics on missing data, group trajectory modeling, and sample size estimation. We will use homework assignments and articles from multilevel and longitudinal studies to facilitate learning of concepts discussed in class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2010 and 2021 and 2022; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2040 - MEASUREMENT IN CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1

The course focuses on properties of good measurement that are integral to the research process. Specific objectives are to analyze methods for testing psychometric properties (reliability and validity) of psychological instruments and physiological instruments; to evaluate the adequacy of selected scaling methodologies used in research; to apply knowledge of instrumentation to the description of a psychosocial instrument and a physiological instrument for a research proposal; and to synthesize course content with statistical criteria for scale evaluation and make decisions regarding scale revision. The domain sampling model is presented as the major theory of measurement error, with the parallel test model presented as a special case of the domain sampling model. The construct, criterion, and content validity of psychosocial instruments are explored, and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies, as well as the principles involved in the design and formatting of questionnaires, will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2020 and 2021 and 2022; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2045 - SURVEY DESIGN AND DATA ANALYSIS

Minimum Credits: 1
Maximum Credits: 1

Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2040 or MEDEDU 2040; PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci (PHD)
CLRES 2050 - ETHICS & RESPONSIBLE CONDUCT OF RESEARCH (ONLINE)

Minimum Credits: 1  
Maximum Credits: 1  

It's far too easy to relegate egregious ethical violations to the past. We reassure ourselves these could never happen now. After all, we have IRBs and rules and regulations we have to follow when conducting research on human subjects and animals. IRBs, and those rules and regulations, like the Belmont Report and the Declaration of Helsinki, are important, helpful, and a good start, but researchers need more. Many of the problems researchers will face during their careers will not be black and white, and it's really important to learn to navigate through the shades of gray. In this fully online course, we will read important foundational texts and a work of fiction, and we'll engage with case studies. You'll interact with fellow course participants on discussion boards, and submit written answers to questions taken from the readings. This course presents an in-depth examination of ethical issues in the conduct of clinical research. Topics include issues related to privacy, confidentiality, protection of human and animal subjects, informed consent and the role of the IRB in ensuring the responsible conduct of research.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2071 - ADVANCED GRANT WRITING PART 1

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of the integrated methods course is to build on the skills learned in the methodological core and provide a hands-on research experience. Trainees will learn the phases of the research process from conception to design and, ultimately, to implementation of the research. Through a combination of group sessions and independent work, trainees will use a research topic of their choice to develop their own research proposal in the form of an NIH grant application. The application will include sections on specific aims, background and significance, previous work, and methods. In addition, trainees will review and critique the work of their peers. Mentor must be identified prior to enrollment.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2072 - ADVANCED GRANT WRITING PART 2

Minimum Credits: 1  
Maximum Credits: 1  
The purpose of the integrated methods course is to build on the skills learned in the methodological core and provide a hands-on research experience. Trainees will learn the phases of the research process from conception to design and, ultimately, to implementation of the research. Through a combination of group sessions and independent work, trainees will use a research topic of their choice to develop their own research proposal in the form of an NIH grant application. The application will include sections on specific aims, background and significance, previous work, and methods. In addition, trainees will review and critique the work of their peers. Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: CREQ: (CLRES 2005 and 2010 and 2020 and 2040 and 2071) or (MEDEDU 2005 and 2010 and 2020 and CLRES 2040 and 2071); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2075 - SEMINAR FOR UNDERSTANDING PRINCIPLES AND PRACTICES OF RESEARCH TECHNIQUES (SUPPORT)

Minimum Credits: 0.5  
Maximum Credits: 0.5  
The SUPPORT Seminar is a mandatory twice-monthly series for medical students in the Clinical Scientist Training Program. The purpose of SUPPORT is to provide a forum for medical students to learn about careers in clinical investigation, to present their research in oral and written form, to explore case studies in the responsible conduct of research and the ethics and regulation of human subjects research, and to consecutively peer
review colleagues' research products.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2076 - INTRODUCTION TO GRANT WRITING**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
Obtaining peer-reviewed grant support is one of the most critical determinants to academic and career success, yet the process is highly challenging. Through select readings and podcasts, the writing of a draft grant application to request funds from one of the many seed programs available to Pitt students and faculty, and class discussions led by a long-time NIH-funded clinical investigator, Introduction to Grant Writing CLRES 2076 will provide CEED trainees, clinical fellows, post-doctoral students, and junior faculty without any prior grant writing experience with useful knowledge, insights, and skills in the grant writing process to improve their chances of later funding and subsequent career success. Please note that this course is NOT INTENDED for Master's Degree students.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci or Graduate Career Development (GCD-ND)

**CLRES 2077 - STRATEGIC LEADERSHIP IN ACADEMIC MEDICINE**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
Health care professionals regularly occupy leadership roles in research, educational, and clinical arenas, and leadership opportunities abound in academic settings. Yet clinicians have been described as “accidental administrators,” lacking training in skills necessary to be an effective leader. Given the current challenges facing healthcare, increasing reliance on interdisciplinary teams to provide care, and greater emphasis on cost control and quality improvement, the need for clinicians to develop effective leadership skills is paramount. This course is designed for clinician-educators and researchers who want to understand the basics of leadership and management. Through selected readings, this course will develop participants' leadership skills across a variety of domains. Topics covered include understanding how academic medical centers function and how to set team culture, run a meeting, manage time, lead across difference, and create/maintain a five year plan. At the completion of the course, trainees will understanding of the basic principles of leadership and management in the context of academic medicine. *Please note in previous terms, this course was titled "Managing Your Career in Clinical & Translational Science" and "Strategic Leadership".*

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2080 - MASTERS THESIS RESEARCH**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Trainees may register for this course with approval from the mentor and selected faculty of the Degree Granting Programs in Clinical Research Curriculum Committee. The course is designed for trainees who are prepared to undertake their thesis or substantive research project.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2085 - DIRECTED RESEARCH/INDEPENDENT STUDY IN CLINICAL RESEARCH**
Minimum Credits: 1  
Maximum Credits: 3  
For Master of Science and Doctoral Certificate in Clinical and Translational Science students. An independent study project is designed by the student to pursue an area of study within clinical research that is not covered by the established curriculum. It cannot be used to replace required or core courses. The project is designed by the student and requires that an Institute for Clinical Research Education (ICRE) faculty member supervise the project. The student will complete the directed research independent study form, and the faculty preceptor and Director of Academic Programs must approve it. An independent study project may carry 1-3 graduate semester credits, assigned at the faculty member's discretion based on the project proposed. Doctoral CTS students may only register for a maximum of 2 credits.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2086 - CLINICAL RESEARCH TEACHING PRACTICUM**

Minimum Credits: 0  
Maximum Credits: 3  
The objective of this teaching practicum is to provide students the opportunity to design and/or implement a curriculum. This practicum involves curriculum development and implementation (i.e instruction). Each year the course directors will assess whether substantive curriculum development/refinement is necessary prior to instruction.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2095 - PHARMACOEPIDEMOIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This course is an introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population. In addition to formal lectures, students will be given the opportunity to examine and critique the literature in this area.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**CLRES 2107 - COMPARATIVE EFFECTIVENESS RESEARCH AND PCOR**

Minimum Credits: 2  
Maximum Credits: 2  
This course will define Comparative Effectiveness Research (CER) and Patient-centered Outcomes Research (PCOR) and highlight the history and current national efforts in promoting CER/PCOR for drugs, devices and other interventions. The curriculum will include topics on the conceptualization, outcome measurements, engagement of patients and stakeholders, study designs, and analysis methods used in CER/PCOR studies. The course is project based and students learn how to define their own CER/PCOR research question and design a research project to answer the question.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2108 - PATIENT REGISTRIES & ELECTRONIC HEALTH RECORDS IN CER**

Minimum Credits: 1  
Maximum Credits: 1
This course explores the role of research registries that include electronic health record data in comparative effectiveness research. Students will gain an understanding of different registry models, including establishing a registry, evaluating a registry, using registry data and the strengths and weaknesses of different registry models. We will discuss the use of registries with both identifiable and de-identified data. Ethical issues surrounding the use of these data sources for research will be discussed. We will use case studies to facilitate the learning of concepts discussed in class.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2120 - COST EFFCTVNS ANAL HLTH CARE**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
CLRES 2120 provides an introduction to the methods used in the economic analysis of health care programs. The course will discuss economic principles that serve as the foundation of cost-effectiveness analysis, will describe the various ratios and methodologies used in cost-effectiveness studies, will highlight the current controversies in cost-benefit analysis, and will explore issues regarding the appropriate use of cost-effectiveness in making medical decisions concerning patients and populations. Additional topics include concepts of perspective, utility analysis, discounting, and the definition of various costs and benefits.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2121 - CLINICAL DECISION ANALYSIS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents an overview of the theory of medical decision making. Topics include the incorporation of uncertainty and risk into medical decision making; the use of decision-making techniques in both population and individual patient settings; the design, structure, and evaluation of decision trees generated by software packages; sensitivity analysis and the stability of model outputs; and controversies concerning the perspective of the analysis and the discounting of costs and benefits. The course will help trainees become skilled in structuring and analyzing decision-making problems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2122 - COMPUTER METHODS IN DECISION AND COST-EFFECTIVENESS ANALYSIS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course expands upon topics introduced in CLRES 2120 (cost effectiveness analysis) and CLRES 2121 (clinical decision analysis) and provides additional guidelines for using decision sciences in larger, more complex applications. Topics include modeling clinical processes and systems; discrete event simulation; advanced sensitivity analysis and confidence limits; controversies surrounding the use of cost-effectiveness analyses; and multi-attribute utility theory.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2124 - DIRECTED STUDY IN DECISION ANALYSIS AND COST EFFECTIVENESS ANALYSIS**
Minimum Credits: 1
Maximum Credits: 3
There are no formal class meetings. Each student will meet independently with their chosen faculty members; develop a timeline and schedule of meetings and milestones for various components of the particular project, or topic review. It is expected that the trainee and faculty member will meet every one-two weeks during the duration of the course.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2122; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2140 - BEST PRACTICE OF CLINICAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
CLRES 2140 covers the basic operations of conducting a health services research project, from developing realistic timelines and schedules to building tracking databases, training interviewers and data collectors, monitoring data collection and budgets, reporting, and closing out a study.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2141 - MEDICAL WRITING AND PRESENTATION SKILLS (ONLINE)

Minimum Credits: 1
Maximum Credits: 1
Medical educators and researchers must be able to present their work clearly and effectively. However, important educational material and research data are sometimes obscured by poorly delivered presentations or poorly written manuscripts. The main objective of this course is to help students develop excellent medical writing and presentation skills. This objective will be achieved through a combination of videos, readings, individual assignments, and team projects in which students will practice specific skills. Students will craft an abstract, write a discussion section of a manuscript, practice methods of disseminating their science to the lay public, create a poster, construct a table or figure, and develop a PowerPoint presentation and record themselves delivering a 10-minute talk.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2155 - MEDICAL PRODUCT IDEATION

Minimum Credits: 3
Maximum Credits: 3
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2156 - MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by fad and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR, codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2160 - BIG DATA & HEALTHCARE ANALYTICS: A PATH TO PERSONALIZED MEDICINE

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2170 - MAKING THE MOST OF MENTORING

Minimum Credits: 1
Maximum Credits: 1
We strongly believe that effective mentoring is the cornerstone of a successful academic career, whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and to provide strategies for making the most out of the experience. Topics will include communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, postdocs, other Institute for Clinical Research Education (ICRE) trainees, and junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience both for the mentees and the mentors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2200 - INTRODUCTION TO RESEARCH DISPARITIES ON HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course will provide knowledge and skills to understand and apply the basic principles of healthcare disparities research. Students will be introduced to a variety of healthcare disparities that have been identified in the literature. They will learn about a 3-phase conceptual framework for advancing disparities research that involves detecting (phase 1), understanding (phase 2), and reducing/eliminating (phase 3) disparities. They will become familiar with methodological and conceptual issues that pertain to research designed to detect healthcare disparities, understand multi-level factors that contribute to disparities, and reduce or eliminate healthcare disparities. Students will use their knowledge and skills from the course to develop and present a research proposal focused on a healthcare disparities topic of their choice. The course will consist of didactic lectures, interactive discussions, and homework assignments to establish basic knowledge of research on disparities in health care. It will also include guest presentations by faculty with experience conducting research focused on disparities in health care.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's, MS, Not Candidate for Degree), Clinical Research (CERT-Master's, MS, Not Candidate for Degree) , Clinical and Translational Sci (PHD)
**CLRES 2300 - INTRODUCTION TO SYSTEMIC REVIEWS AND META ANALYSIS**

Minimum Credits: 1  
Maximum Credits: 1  
The course is an overview of the concepts necessary for performing systematic reviews and meta-analyses, covered in sufficient detail to enable students to conduct their own reviews and analyses after completion of the course. Students will learn about the individual steps involved in conducting systematic reviews and meta-analyses, including developing a focused research question, assembling a team to perform the study, designing a study protocol, defining inclusion and exclusion criteria, identifying relevant literature databases (including Cochrane databases and Medline), developing literature search strategies, performing the literature search, creating a data abstraction form, handling data abstraction and management, and using statistical methods for meta-analysis. We will discuss important topics such as criteria for meta-analysis, exploration of heterogeneity, choice of a meta-analytic method, study quality assessment, sensitivity and subgroup analysis, evaluation of potential sources of bias, presentation of results, and application of review results. Each class will have both a didactic component and a hands-on component that allows students to immediately apply the concepts introduced during the session. Students will use concepts learned in this course to evaluate and update a published systematic review and meta-analysis.  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: (CLRES 2005 or MEDEDU 2005) and (CLRES 2020 or MEDEDU 2020); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2320 - CLINICAL TRIALS PRACTICUM**

Minimum Credits: 2  
Maximum Credits: 3  
The purpose of the clinical trials practicum is for trainees (fellows and junior faculty) who are (or want to be) involved with a clinical trial to obtain course credit for their research experience. Each trainee is required to work with an experienced clinical researcher (investigator) who formally agrees to provide the trainee mentorship. The investigator must be planning a clinical trial, conducting a clinical trial, or have conducted a clinical trial. Trainees are expected to become part of the research team and learn how studies or trials are actually designed, implemented, managed, and analyzed. Trainees are expected to provide an outline of readings relevant for the practicum objectives and at the end of the practicum provide summaries of their experiences and reading materials. They may also receive credit by taking a specific question and analyzing a dataset from the trial. They can write up their findings for possible publication under the supervision of the investigators and are expected to provide a written summary of their involvement that is validated by their mentors at the end of the experience. Please see the link below for the NIH's definition of clinical trials: [http://grants.nih.gov/grants/peer/tree_glossary.pdf](http://grants.nih.gov/grants/peer/tree_glossary.pdf). (Prerequisites: CLRES 2800, CLRES 2810, and CLRES 2820 or instructor permission)  

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: CLRES 2800 and 2810 and 2820; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2400 - QUALITATIVE RESEARCH METHODS I : THEORY & DESIGN**

Minimum Credits: 1  
Maximum Credits: 1  
What are the theoretical frameworks, study designs, data collection methods, and analytical approaches used by qualitative researchers? How should the quality and rigor of qualitative research be assessed? In this course, you will learn the theoretical frameworks guiding qualitative inquiry as well as study designs, ethical issues, data collection methods, analysis strategies, and criteria for evaluating qualitative studies.  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 2401 - QUALITATIVE RESEARCH METHODS II: APPLICATIONS**
Minimum Credits: 1
Maximum Credits: 1
In this course, you will develop and hone the skills of a qualitative researcher. You will practice designing qualitative and mixed methods research studies, creating interview guides and focus group protocols, applying different data collection methodologies, developing a codebook, and conducting thematic analysis. Finally, you will write a thorough and compelling methodology section for a grant or manuscript. The focus throughout the course will be applying the tools of qualitative research and reflecting on your experience. Prerequisite: Qualitative Research Methods I: Theory and Design (or equivalent).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2430 - INTRODUCTION TO COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research and practice (CBPRP). The goal of this course is to familiarize students with community-based participatory research and practice. Students will become conversant in seminal community-based participatory research and practice literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cbpr and the associated strengths and limitations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2431 - TRANSLATING RESEARCH FOR POLICY AND PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in transLating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in KT as an aspect of community-partnered research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2432 - CONCEPT MAPPING: A PARTICIPATORY RESEARCH METHOD

Minimum Credits: 1
Maximum Credits: 1
This course provides hand-on training in the participatory research method known as concept mapping (CM). Cm gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)

CLRES 2600 - SOCIAL NETWORKS & HEALTH

Minimum Credits: 1  
Maximum Credits: 1  
This course is an introduction to the theory, methods, and procedures of network analysis with emphasis on applications to health and social behavior. The goal of the course is to provide a working knowledge of concepts and methods used to describe and analyze social networks so that professionals and researchers can understand the results and implications of this body of research. The course also provides the training necessary for scholars to conduct network analysis in their own research and practice careers.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

CLRES 2601 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 1

Minimum Credits: 1  
Maximum Credits: 1  
The broad objectives of this course are to provide trainees with an overview of the basic and clinical sciences underlying the professional care of dying patients, and to introduce them to the primary reference sources in the field of palliative medicine. The course will be taught in a small-group, discussion format, with faculty drawn from content-experts throughout the medical center. Discussions will combine analysis of the evidence base for a wide range of palliative care interventions with clinical case discussions. Cases will be drawn from the literature, faculty experience, and current clinical activities of the trainees themselves.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2602 - PRINCIPLES AND PRACTICES OF PALLIATIVE CARE PART 2

Minimum Credits: 1  
Maximum Credits: 1  
The broad objectives of this course are to provide trainees with an overview of the basic and clinical sciences underlying the professional care of dying patients, and to introduce them to the primary reference sources in the field of palliative medicine. The course will be taught in a small-group, discussion format, with faculty drawn from content-experts throughout the medical center. Discussions will combine analysis of the evidence base for a wide range of palliative care interventions with clinical case discussions. Cases will be drawn from the literature, faculty experience, and current clinical activities of the trainees themselves.  
Academic Career: Graduate

CLRES 2610 - RESEARCH METHODS IN PALLIATIVE CARE

Minimum Credits: 1  
Maximum Credits: 1  
This special methods course will provide the critical bridge between the more general research skills and the particular challenges of doing patient-oriented research in palliative care. It consists of the following components: discussion of the use of specific research methods and their strengths and limitations in palliative care and review OIF landmark research articles in palliative care and a critical appraisal of the methodologies. The course is taught in a graduate seminar fashion with an emphasis on discussion and critical analysis. Sessions are often co-moderated by a palliative care physician and a researcher with the particular methodological expertise under discussion.  
Academic Career: Graduate  
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2700 - FUNDAMENTALS OF BENCH RESEARCH

Minimum Credits: 2
Maximum Credits: 2
The course is designed to teach fellows in training and future clinician scientists the core principles of scientific investigation. The course is organized such that fellows can learn the theory behind most of the common research approaches as well as new and innovative approaches of current scientific endeavors. In addition, participants acquire laboratory technical skills via a "learning by doing" approach in a two-week period.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2715 - UNDERSTANDING AND APPLYING OMICS

Minimum Credits: 1
Maximum Credits: 1
This required course for the translational research track will provide information on resources available at university of Pittsburgh to facilitate high throughput research techniques and will involve in-depth discussions of definitions and applications of genomics, proteomics and glycomics. Issues important to tissue processing, sample collection, limitations of techniques and special ethical issues related to storage of samples will be covered. Translational researchers will present 'real-life' examples of application of these technologies and students will be required to develop an 'omics' approach to a relevant translational research question pertinent to their own field of study.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2725 - TRANSLATIONAL RESEARCH PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The major objective of the Translational Research Practicum is to obtain individualized laboratory-based training and acquire proficiency in scientific methodology, experimental design, data presentation, and analysis tailored to achieve pre-defined goals within the scope of the student's thesis work. The Translational Research Practicum must define a translatable component originating from the laboratory training (i.e., application of laboratory-based methodologies/techniques, gain proficiency with pre-clinical studies) with the ultimate goal of addressing questions pertaining to human studies. This work is usually conducted within the research mentor's laboratory.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2729 - IDEA 2 IMPACT

Minimum Credits: 1
Maximum Credits: 1
This practical course guides academic researchers step by step through the experience of developing an entrepreneurial idea. It is designed for early-career scientists (e.g., MDs, PhDs, fellows, medical students, faculty, post docs) who are new to entrepreneurship and commercialization, but interested in translating research into practical applications. Each week, participants will focus on one discrete stage of the translational process as they identify a problem, analyze stakeholders, define a solution, describe its benefits, research the competition, articulate differentiators, and create an action plan. The course will be taught in a hybrid format, with self-paced, online modules to provide participants with key concepts and
information, and class meetings where they present specific deliverables, receive feedback from colleagues, and engage in focused discussion. On the last day of class, participants will present their fully formed idea to an invited audience.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

---

**CLRES 2730 - FROM BENCHTOP TO BEDSIDE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This 12-week course, commonly known as B2B, is offered by the Innovation Institute, which encourages and supports innovation and entrepreneurship across campus to all faculty, staff, and students. More information on B2B can be found on the Innovation Institute website. B2B is designed to give research scientists, clinicians, graduate students, and other interested parties the basic information necessary to assess the business potential of basic science research discoveries. The B2B course will help scientists develop additional focused information, including proof of concept and validation experiments, that increase the value of the technology and reduce the investment risk. B2B will also provide insight into how intellectual property and other differentiators can create a barrier to entry for the competition. The course will cover the fundamentals of investment from the private sector to help finance the climb over regulatory hurdles and meet critical developmental milestones. The course is designed to give graduate students, research scientists, faculty, and clinicians the basic information necessary to assess the commercial potential of basic science discoveries.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

---

**CLRES 2750 - SEMINAR IN HEALTH SYSTEMS LEADERSHIP**

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course will consist of a series of case-based examinations of specific managerial and leadership problems and decisions that have faced local health systems leaders in Western Pennsylvania. Health care reimbursement, licensing, and accreditation, and measuring health care quality has become more complicated and more important as pressures to reduce expenses and improve quality increase. Simultaneously, there has been a steady increase in the number of clinicians who have assumed managerial positions, such as medical directors of clinical units, directors of quality measurement and improvement programs, utilization review and many others, as well as the appearance of clinicians in the "C-suite" of many hospitals and health care organizations. Utilizing adjunct faculty who are currently (or very recently have been) executive leaders in health systems, this course will examine a series of collaborations, problems, conflicts, and solutions that developed between health system administrators and clinical leadership in health care organizations in the Western PA area. The mechanics of the course will be a series of cases, based on an actual recent issue in health care management in which the senior adjunct faculty member was involved. Students (individually or in groups) will evaluate the case, prepare a response, and make a short presentation of their "solution" to the problem to the health system executive and clinical leader involved in that case. An interactive discussion will follow.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

---

**CLRES 2800 - FUNDAMENTALS IN CLINICAL TRIALS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Fundamentals in clinical trials course will provide information on the first three phases (phases i-iii) of drug development and fundamental components of randomized clinical trials. A majority of lectures will focus on aspects of phase iii parallel group designs with discussions on topics including developing research questions and defining endpoints, recruitment, randomization, blinding, data management and quality, monitoring, study closeout, and presentation/interpretation of results. The student will be introduced to the good clinical practice guidelines and the principles of planning and implementing clinical research protocols including: ethical issues and regulatory imperatives designed to protect human subjects in clinical research, adverse event reporting, protocol/proposal development, and publications. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. It is highly recommended that you have taken ANOVA and logistic
The course will provide in-depth information about conducting randomization, planning sample size, analyzing clinical trials (including phase I, II, and III designs), and reporting and interpreting results of studies. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. We highly recommend that students take analysis of variance (ANOVA) and logistic regression courses before taking this course.

CLRES 2820 - SPECIAL TOPICS IN CLINICAL TRIALS

Minimum Credits: 1
Maximum Credits: 1
The special topics course will provide information on the different types of clinical trials beyond the phase III superiority parallel group design. We will use manuscripts on special types of clinical trials to facilitate learning of concepts discussed in class. We highly recommend that students take analysis of variance (ANOVA) and logistic regression courses before taking this course.

CLRES 2981 - EPIDEMIOLOGY OF AGING-METHODS

Minimum Credits: 2
Maximum Credits: 2
This course will introduce the methodological aspects of epidemiologic research in the field of aging and to critically evaluate research in older adults. The course will focus on: demography, study design, sampling, recruitment, retention, measurement of key variables and special populations. Students will write a critical review of a published article and comment on proposed future directions for epidemiologic studies addressing these questions in older populations. Throughout the course, a Problem Solving Learning Method will be applied by prompting the students to solve pragmatic issues. Examples include: How to measure a specific outcome? What type of chronic health conditions may be related to the research question? How to operationalize specific measures of interest (e.g.: how to create a composite score for co-morbidity assessment?). The course has been formulated to provide the students with the building blocks of the epidemiological study of aging. By the end of the course, the students will be able to critically evaluate various components of a study to further address the research questions in aging populations.

CLRES 3010 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Independent Study provides an opportunity for the student to pursue/research a subject in more depth and in a more independent manner than would
be possible in a traditional course. Students completing an Independent Study must identify a sponsor faculty member who will closely work with the student in meeting defined learning objectives and goals.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**CLRES 3020 - DIRECTED STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 9

This course provides the student an opportunity to carry out a specific project in any area of interest in clinical and translational science.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Clinical and Translational Sci

**CLRES 3040 - PHD DISSERTATION RESEARCH**

- **Minimum Credits:** 1  
- **Maximum Credits:** 14

Dissertation research credits towards Ph.D. in clinical and translational science.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Clinical and Translational Sci

**CLRES 3140 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN HEALTH SCIENCES**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**Comm Science and Disorders**

**CSD 2000 - RESEARCH & THESIS MASTER'S DEGR**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6

After successful completion of the master's level comprehensive examination, students may elect to become master of science candidates. A thesis is required for the MS. Degree. During the planning, execution, writing, and defense of the thesis, the student may register for thesis credits under the supervision of thesis committee chair person.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CSD 2020 - AUDIOLOGICAL ASSMNT SLP STUDENTS

Minimum Credits: 1
Maximum Credits: 1
Students will learn basic audiologic assessment techniques, interpretation of test findings and investigate the impact of hearing loss on communication.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2021 - CLINICAL PROCEDURES LAB 1-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2022 - CLINICAL PROCEDURES LAB 2-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2029 - IMPLANTABLES IN CLINICAL PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This course will provide students with hands on opportunities to select, fit, map/program, and assess implantable devices in a lab setting. Cases will be used to promote critical thinking related to decisions related to test selection, signal procession selection, feature selection, mapping and programming, counseling, and auditory training. Students will be able to identify appropriate candidates for implantable technology and have a basic understanding of the components of selection, fitting, and delivering these technologies in a patient-centered manner.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2038 - PHYSIOLOGICAL AND PSYCHOLOGICAL ACOUSTICS

Minimum Credits: 3
Maximum Credits: 3
Clinical diagnostic tests and our general understanding of how the auditory system works find their bases in physiological and psychological acoustics. The former includes the functional anatomical, neurophysiological, and electrophysiological parameters/measures of auditory function, and the latter embraces the sensory psychology and psychophysics of audition and auditory capabilities. While touched upon briefly in other courses, this course provides concentrated treatments of these areas with the goal of helping the student to better understand test methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2039 - MOTOR SPEECH DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with an understanding of the nature of dysarthria and apraxia of speech. Material will include anatomy and pathophysiology, common neurologic diseases, structure and function of the speech production mechanism, instrumental assessment, diagnosis and prognosis, and development of treatment goals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2040 - AUDIOLOGICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Basic orientation to audiology for speech pathology majors. Introduction to audiological concepts and audiometry including pure-tone audiometry, speech audiometry, impedance and hearing screening.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2041 - MANAGEMENT OF HEARING LOSS

Minimum Credits: 3
Maximum Credits: 3
Audiologists and Speech-Language Pathologists provide therapeutic, consultative, and referral services for adults with hearing loss. This course provides students with the foundation and technical skills to offer these services. Specifically, the areas of hearing assistance technology, evidence based auditory rehabilitation and related legislation will be covered, in the context of patient and family centered care.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB

Minimum Credits: 1
Maximum Credits: 1
Lab for Audiological Assessment.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2043 - FUNDAMENTALS OF SPEECH-LANGUAGE PATHOLOGY FOR AUDIOLOGISTS

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide audiology students with an understanding of the nature of speech, language, cognition and swallowing disorders across the lifespan. Students will acquire a basic understanding of the diagnosis and treatment of these disorders by speech-language pathologists, and the role of audiologists in early identification and referral. Students also will develop the resources and skills necessary to more effectively evaluate and adapt their communication strategies during audiological assessment, treatment and counseling, in order to ensure the highest
quality of service delivery for patients and their families.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**CSD 2044 - DIFFERENTIAL DIAGNOSIS**

Minimum Credits: 4  
Maximum Credits: 4  
Introduction to immittance audiometry, traditional special tests for diagnosing cochlear and retrocochlear site of lesion, non-organic hearing loss, and evaluation of central auditory disorders.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2045 - PHYSIOLOGICAL ASSESSMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Study of auditory evoked potentials with emphasis on the auditory brainstem responses (ABR). Use of ABR in audio logic and neurologic diagnosis.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2046 - PEDIATRIC EVALUATION**

Minimum Credits: 3  
Maximum Credits: 3  
The mission of this course is to familiarize students with factors associated with heavy loss in infants and children as well as the application of audiology diagnostic procedures with this population.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2047 - AMPLIFICATION 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an initial look at hearing aid evaluation, selection, validation, and orientation. Students will discuss historic as well as current topics in hearing aid selection and validation techniques.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2048 - SOUND AND VIBRATION: MEASUREMENT AND MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course presents basic principles in the operation and configuration of instrumentation and related concepts of signal production and analysis. For sound and vibration measurements, a special focus of interest will be the measurement and management of noise and its adverse auditory and nonauditory effects.  
**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2049 - AGING AUDITORY SYSTEMS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
  - The development of the auditory system across the lifespan will be investigated. Changes due to aging will be discussed in terms of their impact on diagnostic and rehabilitative audiology. This course takes a seminar format.
  - **Academic Career:** Graduate
  - **Course Component:** Seminar
  - **Grade Component:** Grad Letter Grade
  - **Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2051 - CLINICAL PROCEDURES LAB 1-2**

- **Minimum Credits:** 1
- **Maximum Credits:** 1
  - Laboratory experience covering clinical procedures addressed in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
  - **Academic Career:** Graduate
  - **Course Component:** Clinical
  - **Grade Component:** Grad Letter Grade
  - **Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2052 - CLINICAL PROCEDURES LAB 2-3**

- **Minimum Credits:** 1
- **Maximum Credits:** 1
  - Laboratory experience covering clinical procedures addressed in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
  - **Academic Career:** Graduate
  - **Course Component:** Clinical
  - **Grade Component:** Grad Letter Grade
  - **Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2053 - CLINICAL PROCEDURES LAB 2-1**

- **Minimum Credits:** 1
- **Maximum Credits:** 1
  - **Academic Career:** Graduate
  - **Course Component:** Clinical
  - **Grade Component:** Grad Letter Grade
  - **Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2054 - SCIENCE OF IMPLANTABLES**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
  - This course will explore non-traditional amplification solutions that are emerging or established technologies for implantable hearing devices. Topics will include such devices as cochlear implants to newer implantable bone conduction devices. Theoretical and practical considerations of these communication solutions will be discussed. Students will leave the course with a working knowledge of the development and current status of these devices, patient candidacy, and clinical considerations.
  - **Academic Career:** Graduate
  - **Course Component:** Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2055 - PEDIATRIC AUDIOLOGIC REHABILATATION

Minimum Credits: 3
Maximum Credits: 3
This course is for students interested in the treatment of infants and children with hearing loss. The course focuses on the speech, language, and auditory characteristics of infants and children with hearing loss, their rehabilitative needs, and the effectiveness of various types of treatment approaches.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2056 - AUDIOLOGY PRACTICUM NETWORK - AUD

Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2057 - AUDIOLOGY PRACTICUM OUTPLACEMENT

Minimum Credits: 1
Maximum Credits: 6
Supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience may be obtained within the university speech and hearing clinic network or in community clinic facilities associated with the department.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Communication Science and Disorders MA, Communication Science and Disorders MS, Audiology

CSD 2059 - AUDIOLOGY PRACTICUM NETWORK - SLP

Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2060 - PROSEMINAR - MA

Minimum Credits: 0
Maximum Credits: 0
Variable content. Speakers from the communication department, other areas of the university and the general professional community present issues of concern to speech pathologists and audiologists.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2062 - INTRODUCTION TO CLINICIAN-CLIENT COMMUNICATIONS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Audiology (AUD) or Speech-Language Pathology (CSD) or SBPLAN: Audiology (Comm Science and Disorders-MA, or MS) or Speech-Language Pathology (Comm Science and Disorders-MA or MS)

CSD 2063 - DEVELOPING CLINICIAN-CLIENT COMMUNICATIONS

Minimum Credits: 1
Maximum Credits: 1
This course builds upon CSD 2062 and is designed to develop the graduate student's knowledge and skills in clinician-client communications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2064 - INTRO CLINICAL DECISION-MAKING

Minimum Credits: 3
Maximum Credits: 3
This course prepares students for their first clinical practicum, by orienting them to the principles and procedures underlying assessment, remediation and documentation activities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2065 - SPEECH PRACTICUM NETWORK

Minimum Credits: 1
Maximum Credits: 3
Student clinicians assess clients presented with various communication disorders, under supervision of certified speech-language pathologists in the university speech and hearing clinic.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2066 - SPEECH PRACTICUM OUTPLACEMENT

Minimum Credits: 1
Maximum Credits: 9
Student clinicians provide intervention to communicatively impaired clients, under supervision of certified speech language pathologists, in the university speech and hearing clinic.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)
CSD 2067 - CLINIC PRACTICE IN SCHOOLS

Minimum Credits: 1
Maximum Credits: 6
Student clinicians provide clinical services to communicatively impaired children in school settings, under supervision of certified speech-language pathologists.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2068 - SPEECH PRACTICUM NETWORK - AUD

Minimum Credits: 1
Maximum Credits: 3
Student clinicians assess clients presented with various communication disorders, under supervision of certified speech-language pathologists in the University speech and hearing clinic.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2069 - SLP MASTERS COMPREHENSIVE

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2070 - ARTICULATION AND PHONOLOGICAL DISORDERS

Minimum Credits: 3
Maximum Credits: 3
Students learn the principles and procedures needed to identify, evaluate and remediate articulation and phonological disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2071 - CHILD LANGUAGE DISORDERS 1

Minimum Credits: 3
Maximum Credits: 3
This course will advance students' knowledge of models of normal and impaired language development. Students will learn to evaluate the underlying bases, the merits, the limitations of, and the empirical support for various approaches to the evaluation and management of childhood language disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2072 - FLUENCY DISORDERS
Minimum Credits: 3
Maximum Credits: 3
An introduction survey of basic information about stuttering. It includes theories of causation, diagnostic procedures, measurement procedures, dynamics and correlates to stuttering as clinical management procedures.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2073 - VOICE DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course covers information regarding the nature and causes of common pathologies affecting voice, voice measurement, and treatment approaches for voice disorders. Traditional as well as non-traditional approaches are emphasized. The course uses a problem-based learning methodology, in which students are required to adopt critical thinking in solving clinical problems based on material covered in the course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2074 - CLEFT PALATE

Minimum Credits: 3
Maximum Credits: 3
An overview of communication problems associated with palatal clefting and interdisciplinary treatment including embryology, anatomy, classification, neonatal problems, hearing, surgery, speech, and social, mental, and emotional development.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2075 - APHASIA

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the nature, appraisal, differential diagnosis, and management of aphasia, a neurologically-based communication disorder.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2076 - DYSPHAGIA

Minimum Credits: 3
Maximum Credits: 3
Principles and practices necessary to provide counseling, evaluation and treatment to clients with alaryngeal speech and/or swallowing disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2077 - AUGMENTATIVE COMMUNICATION
Minimum Credits: 3  
Maximum Credits: 3  
Serving the needs of nonspeaking individuals by augmenting their residual communication skills or by providing alternate systems of communication is the focus of this course. Considered in the course are the history of augmentative communication, the evaluation and assessment of nonspeakers, the fitting of nonspeakers with augmentative communication devices, the training of nonspeakers who have been fitted with devices, and the team approach to meeting the needs of nonspeakers. Implementation is by lecture, discussion, and demonstration.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2078 - PHYSICS, PHYSIOLOGY AND PSYCHOLOGY OF SOUND

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2079 - SWALLOWING, DYSPHAGIA AND FEEDING DISORDERS IN CHILDREN

Minimum Credits: 1  
Maximum Credits: 1  
This course will explore development of the aerodigestive tract from the embryonic and fetal stages of gestation to full-term and childhood, with emphasis on the development of and interactions between the aerodigestive (respiratory and digestive) systems and swallowing function. Other topics include: typical neonatal and pediatric oropharyngeal swallowing and feeding function during postnatal growth and development, comparisons and contrasts between neonatal and pediatric swallowing anatomy and physiology and those of adults, the range and natural histories of medical, surgical, and developmental conditions leading to feeding and swallowing disorders in children, factors leading to delayed or disordered feeding in children, clinical and instrumental assessment of swallowing and feeding in children, and management/treatment of pediatric feeding disorders. The interdisciplinary nature of managing pediatric feeding disorders will be explored along with the role of parent/caregiver counseling/education and parental/caregiver involvement in management and treatment.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

CSD 2080 - CLEFT PALATE AND CRANIOFACIAL DISORDERS

Minimum Credits: 2  
Maximum Credits: 2  
An overview of communication problems associated with palatal clefting and interdisciplinary treatment including embryology, anatomy, classification, neonatal problems, hearing, surgery, speech, and social, mental, and emotional development.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

CSD 2081 - RESEARCH STRATEGIES AND TACTICS

Minimum Credits: 3  
Maximum Credits: 3  
This course will advance students' knowledge of scientific approaches to the study of communicative processes and disorders. Students will learn a variety of strategies that guide scientific inquiry, and will examine tactics for implementing those strategies. This course will teach students skills needed to be wise consumers and potential producers of research.  
Academic Career: Graduate  
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2082 - PROFESSIONAL ISSUES 1

Minimum Credits: 1
Maximum Credits: 1
Students address practical and current issues necessary for ethical and informed professional services in the field of speech-language pathology and audiology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2083 - PROFESSIONAL ISSUES 2

Minimum Credits: 1
Maximum Credits: 1
Students address practical and current professional issues, including interprofessional practice and intercultural competence, in preparation for employment and professional practice in the field of speech-language pathology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2084 - SCIENCE OF IMPLANTABLES

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the underlying physiology and psychoacoustics that contribute to the development and implementation of electrical and bone conducted stimulation as an input to the hearing system. A historical perspective will inform current research and clinical application in this area. Students will leave this course able to compare and contrast current signal processing strategies used in implantable devices. In addition, students will be able to critically evaluate future signal processing strategies in a patient-center manner based on the knowledge provided through this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2101 - STATISTICAL METHODS IN CLINICAL RESEARCH 1

Minimum Credits: 3
Maximum Credits: 3
This is the first of a two-course series for health career professionals who will make use of statistical methods in research projects or in interpreting literature. The first course will provide an introduction to descriptive and inferential statistics. Topics covered include measurement, frequency distributions, histograms, bar graphs, stem-and-leaf displays, boxplots, scatterplots, measures of central tendency, measures of variability, point estimation, interval estimation, sampling distributions, one and two sample t-tests of hypotheses for means as well as an introductions to non-parametric tests.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2102 - STATISTICAL METHODS CLINICAL RESEARCH 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course series for students in the health professions who will make use of statistical methods in research projects or when interpreting literature. Topics covered include one and two-way analysis of variance, correlation, simple linear regression, multiple regression, and logistical regression, regression diagnostics, confounding and effect modification and model selection. Students will develop analytic skills through the use of clinical datasets where they will learn to analyze data and explain their findings.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: CSD 2101; PROG: SHRS

### CSD 2110 - NEUROSCIENCE OF COMMUNICATION

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** School of Health and Rehabilitation Sciences students only.

### CSD 2120 - PRINCIPLES OF AUDIOLOGY FOR SPEECH-LANGUAGE PATHOLOGISTS

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** School of Health and Rehabilitation Sciences students only.

### CSD 2130 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** School of Health and Rehabilitation Sciences students only.

### CSD 2162 - COUNSELING STRATEGIES FOR AUD AND SLP

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** School of Health and Rehabilitation Sciences students only.

### CSD 2230 - NEUROGENIC LANGUAGE AND COGNITIVE COMMUNICATION DISORDERS 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2250 - CHILD LANGUAGE DISORDERS 2

Minimum Credits: 3
Maximum Credits: 3
This course concerns advanced topics in the etiology, diagnosis, and remediation of developmental and acquired language disorders in children.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2251 - VESTIBULAR ASSESSMENT AND REHABILATATION

Minimum Credits: 3
Maximum Credits: 3
Evaluation of the functioning of the vestibular system and its associated neural pathways. Special attention is given to differentiation of peripheral and central vestibular disorders.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2252 - ADVANCED PHYSIOLOGICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Lectures and discussions on advanced topics in auditory evoked potentials including auditory brainstem response, middle latency and late evoked potentials.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2275 - COGNITIVE COMMUNICATIVE DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course will address the nature, assessment, and management of cognitive and communicative disorders in three populations: adults with right hemisphere brain damage, traumatic brain injury, and dementing conditions. In the first portion of the class, students will become familiar with current concepts, models, and measures of cognitive functions that are associated with, or potentially underlie, the neurologic communication disorders in these three populations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2454 - AMPLIFICATION 2

Minimum Credits: 3
Maximum Credits: 3
This course allows for in depth discussion of topics related to hearing aid evaluation, fitting, and selection and signal processing. This course takes a seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2456 - SPEECH PERCEPTION ACROSS THE LIFESPAN

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the development and potential decline of speech perception across the life span. The relationships between speech perception and audition, vision, speech production, cognitive function, language, and literacy will be explored for typically developing and aging populations. The implications of hearing loss and auditory therapies and technologies on speech perception will be explored, as well as common clinical tests of speech perception.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2479 - SEMINAR IN SPEECH-LANGUAGE PATHOLOGY

Minimum Credits: 1
Maximum Credits: 3
Content varies across the spectrum of speech and language disorders. Each term has a special and specific focus. Students view the literature and present and discuss specific topics of interest.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Speech-Language Pathology (CSD) or SBPLAN: Speech-Language Pathology (Comm Science and Disorders-MA) or Speech-Language Pathology (Comm Science and Disorders-MS)

CSD 2500 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 3

Minimum Credits: 1
Maximum Credits: 3
The course is designed to enhance the skill and knowledge base of medical speech language pathology. Topics include, but are not limited to, pathophysiology of neurogenic communication and swallowing disorders, tracheotomy management, neurological assessment and advanced applied neuroscience, pediatric feeding assessment and management, structure and function of respiratory and digestive systems, and medical ethics. Active participant learning is essential and performance is judged based on regular participation.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2503 - APPLIED AERODIGESTIVE PHYSIOLOGY 1
Minimum Credits: 3  
Maximum Credits: 3  
These courses are designed to provide advanced study of the physiological processes involved in speech production and swallowing. Clinical methods used to measure speech production and swallowing physiology will be addressed. Instrumentation will be used to give students hands-on experience in the acquisition, measurement and interpretation of acoustic and physiologic data.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD)

CSD 2504 - APPLIED AERODIGESTIVE PHYSIOLOGY 2

Minimum Credits: 2  
Maximum Credits: 2  
These courses are designed to provide advanced study of the physiological processes involved in speech production and swallowing. Clinical methods used to measure speech production and swallowing physiology will be addressed. Instrumentation will be used to give students hands-on experience in the acquisition, measurement and interpretation of acoustic and physiologic data.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD)

CSD 2505 - PROFESSIONAL WRITING 1

Minimum Credits: 1  
Maximum Credits: 1  
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. The nature of "the readership" will be examined and how writing style must be modified to suit a specific audience. Assessment will be based on the production of several items including a scientific abstract for conference peer review, an administrative work such as an evidence based business plan for specific service development, and an information leaflet for careers (lay language use). Some of these may require submission to an outside body if appropriate. The third credit in this series will be a scholarly work in which the student will be mentored by a departmental faculty member on the development of a specific project. It is a requirement that this scholarly component be submitted to an outside institution for peer review. Class waivers will be considered on an individual basis, provided the student can demonstrate writing skills consistent with the outcomes of this course.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2506 - PROFESSIONAL WRITING 2

Minimum Credits: 1  
Maximum Credits: 1  
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. The nature of "the readership" will be examined and how writing style must be modified to suit a specific audience. Assessment will be based on the production of several items including a scientific abstract for conference peer review, an administrative work such as an evidence based business plan for specific service development, and an information leaflet for careers (lay language use). Some of these may require submission to an outside body if appropriate. The third credit in this series will be a scholarly work in which the student will be mentored by a departmental faculty member on the development of a specific project. It is a requirement that this scholarly component be submitted to an outside institution for peer review. Class waivers will be considered on an individual basis, provided the student can demonstrate writing skills consistent with the outcomes of this course.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2507 - PROFESSIONAL WRITING 3
Minimum Credits: 1
Maximum Credits: 1
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. The nature of "the readership" will be examined and how writing style must be modified to suit a specific audience. Assessment will be based on the production of several items including a scientific abstract for conference peer review, an administrative work such as an evidence based business plan for specific service development, and an information leaflet for careers (lay language use). Some of these may require submission to an outside body if appropriate. The third credit in this series will be a scholarly work in which the student will be mentored by a departmental faculty member on the development of a specific project. It is a requirement that this scholarly component be submitted to an outside institution for peer review. Class waivers will be considered on an individual basis, provided the student can demonstrate writing skills consistent with the outcomes of this course.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (MA, MS) or Speech-Language Pathology (CSD)

**CSD 2508 - RESEARCH AND CLINICAL FORUM**

Minimum Credits: 0  
Maximum Credits: 0  
This component encourages residents (and clinical fellows) to attend clinical and research meetings offered by CSD/Pitt/UPMC/VA etc. to gain experience of the various aspects of clinical and research fields relevant to the discipline of communication science and disorders. (Residents and clinical fellows) will attend 4 documented events per semester from the full range of activities available throughout the University of Pittsburgh and its associated medical center's extensive network of institutional and regional clinical, research, and scientific educational offerings.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2509 - HEAD AND NECK ANATOMY**

Minimum Credits: 2  
Maximum Credits: 2  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2510 - COMPLEX DECISIONS**

Minimum Credits: 3  
Maximum Credits: 3  
A problem based learning format will be used to explore situations encountered in medical speech-language pathology. Problems relevant to an array of theoretical, diagnostic and management issues will be presented in a format whereby students will assume complete responsibility for collecting, analyzing, interpreting and summarizing findings with class members.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**CSD 2511 - ORAL DISSEMINATION SKILLS**

Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.
CSD 2512 - HEAD AND NECK ANATOMY LAB FOR CLINICAL DOCTORATE IN MEDICAL SPEECH LANGUAGE PATHOLOGY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2513 - NON SLP CLINICAL ROTATIONS

Minimum Credits: 1
Maximum Credits: 7
This course provides the csc.d student with the opportunity to develop theoretical and clinical knowledge and skills through observation, discussion, and participation with other health professionals via the completion of three 10-week half-time clinical rotations. These experiences may include such disciplines as physical medicine and rehabilitation, neurology, and other related clinical services.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2514 - SCHOOL BASED SERVICE DELIVERY

Minimum Credits: 1
Maximum Credits: 1
This course is designed to enhance the skill and knowledge base of speech language pathology services provided in an educational setting. Content focuses on current educational topics and issues encountered in school-based settings that may impact professional decision-making and service delivery. Topics include, but are not limited to, educational terminology, federal and state laws and legal mandates, educational reform initiatives, designing specialized services aligned with educational curriculum and standards, service delivery models, and intervention considerations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2516 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2517 - MEDICAL SPEECH-LANGUAGE PATHOLOGY 2

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2520 - MENTORED CLINICAL INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
The focus of these internship assignments is to further develop, refine and enhance the CScD student's knowledge, skills and abilities as they pertain to the assessment and management of communication and swallowing disorders in the context of their weekly caseload. Mentoring will be facilitated through weekly interactions with designated faculty members.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2521 - CLINICAL EDUCATION 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2522 - CLINICAL EDUCATION 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2523 - CLINICAL EDUCATION 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2524 - CLINICAL CASE EDUCATION
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2572 - COMPREHENSIVE EXAMS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)
CSD 2600 - INTER-PROFESSIONAL ROTATION

Minimum Credits: 1
Maximum Credits: 1
This course includes a clinical rotation where students accompany physicians engaged in clinical examination, diagnosis, and treatment of otology/vestibular patients. Students meet with medical residents in otology conferences and grand rounds. This course exposes students to basic ear anatomy and surgical procedures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2601 - SUPERVISION

Minimum Credits: 1
Maximum Credits: 1
Students will explore activities associated with supervising students through readings and examples presented in class. This course provides future professionals with tools to be effective audiology supervisors. Material is presented in a manner to convince students that supervising future practitioners is a professional responsibility.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2602 - EDUCATIONAL AUDIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course takes a lifespan approach to educational audiology. Laws, working within the educational environment and with other educators, developmental needs, room acoustics, and technology will be explored in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2603 - HUMAN GENETICS FOR HEARING AND SPEECH DISORDERS

Minimum Credits: 2
Maximum Credits: 2
An examination of the mechanisms involved in producing genetic variation in humans and the medical/clinical aspects of genetic variation and disease. Students will learn genetics terminology, patterns of inheritance, DNA/RNA structure and transcription and translation, characteristics of major human syndromic and non-syndromic hearing loss and communication disorders. We will discuss the ethical, legal and social issues associated with our growing knowledge of human genetics and the potential for misuse.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2652 - ADVANCED CLINICAL SEMINAR 3-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2654 - PRACTICE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Students will investigate the professional, legal, and ethical issues related to practice management. In-depth exposure and critical discussion will be focused on professional issues that impact licensure, occupational codes, and reimbursement. Students will understand CMS and other government agencies that impact how they manage their audiology practices. Billing as it relates to CPT codes, ICD-9 CM codes, third party payment, etc. will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Audiology (AUDIO-AUD; MACAUD-SP; MSKAUD-SP) or Comm Science and Disorders (PHD)

CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2656 - ADV AUDLGY CLN PRACTICE-NETWORK

Minimum Credits: 1
Maximum Credits: 4
Third year audiology students engage in advanced clinical practicum under the supervision of university faculty. Practicum activities target the development of independence in higher level clinical skills such as clinical decision making, diagnostic and treatment planning, case management, and professional oral and written communication skills.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3

Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3

Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning. Participants will access the course via the chat function on course web.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2659 - AUDIOLOGY EXTERNSHIP

Minimum Credits: 1
Maximum Credits: 9
Consists of full-time supervised work at sites offering diagnostic and rehabilitative audiology within and outside the Pittsburgh region. Students are expected to gain at least 2000 hours of clinical activity through the internship.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Under the direct supervision of a faculty member, the student carries out specific research (library or experimental) pertinent to the student's and/or faculty member's interests.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

CSD 2970 - TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
Student is supervised in gaining experience in various aspects of university classroom instruction, including preparation of materials, lecturing and discussion, test construction and evaluation and student evaluation.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

CSD 2971 - RESEARCH PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
This variable credit experience provides opportunities for students to be involved in research studies under the supervision of faculty members.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

CSD 2972 - EXAMINATION

Minimum Credits: 1
Maximum Credits: 3
Examination credit registration gives official registration status to a student who will be taking an examination but who may not be registered for any other courses.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

CSD 2973 - PRACTICUM IN CLINIC SUPERVISION

Minimum Credits: 1
Maximum Credits: 3
This course provides advanced graduate students with the opportunity to obtain experience supervising first year masters students. The advanced students, in turn, will work in consultation with the director or the assistant director of the university speech-language and hearing clinic.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders (CSD-MA; CSD-MS; CSD-PhD; SLPATH-CSD)

CSD 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Independent study credits are taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

CSD 3000 - DISSERTATION RESEARCH PHD DEGREE

Minimum Credits: 1
Maximum Credits: 9
Students will formulate, design, propose, carry out, analyze, interpret, and write up an approved research project, under the direction of a dissertation committee, and in particular the chairperson.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CSD 3048 - INTRODUCTION TO PHD STUDIES

Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on professional concerns such as the scientific method, research design and evaluation, effective scientific writing and presentation, funding sources, and the grant writing process. Among the options for a final product are a research proposal, or a publishable paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
Audiology Ph.D. students will participate in this seminar series.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

CSD 3060 - PHD PROSEMINAR

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD) or Audiology (AUD)

CSD 3479 - RESEARCH SEMINAR IN SPEECH AND LANGUAGE PATHOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
Content varies across the spectrum of research issues in speech and language disorders. Each term has a special and specific focus. Students will review research literature and present and discuss specific topics of interest.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

CSD 3902 - DIRECTED STUDY

Minimum Credits: 1  
Maximum Credits: 9  
Students will explore theoretical or applied questions related to their area of interest by analyzing relevant literature under the direction of an appropriate faculty advisor.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

CSD 3971 - RESEARCH PRACTICUM FOR PHD STUDENTS

Minimum Credits: 1  
Maximum Credits: 9  
A prerequisite to CSD 3000; doctoral students are involved in research projects under the super vision of faculty members.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

**Communication: Rhet & Comm**

COMMRC 2000 - THESIS FOR MASTERS DEGREE
After successful completion of the master's level comprehensive examinations, students may elect to write a master's thesis.

**COMMRC 2014 - ARGUMENTATION**

Minimum Credits: 3  
Maximum Credits: 3  
This course interrogates argument as a product, process, and method of inquiry, using a variety of theoretical approaches as points of departure, including pragma-dialectics, speech act theory, controversy studies, informal logic, visual communication, and forensics, as well as critical perspectives such as invitational rhetoric and feminist argumentation theory.

**COMMRC 2201 - RHETORICAL CRITICISM**

Minimum Credits: 3  
Maximum Credits: 3  
This course is focused on the history and practice of rhetorical criticism in America during the twentieth century. The student writes several in-depth criticisms of a significant message designed to influence belief and action.

**COMMRC 2202 - HISTORICAL METHODS IN RHETORIC**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the various rhetorical functions that traditional histories of rhetoric serve and introduces students to recent theories of historiography and the rhetorics of historiography.

**COMMRC 2203 - SEMNR IN PHILOSOPHY AND RHETORIC**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar concerns itself with the conflict between philosophy and rhetoric. The conflict will be considered both historically and critically. We will ask: how did the conflict come about? What important changes did it undergo in subsequent centuries? How does it exist today?

**COMMRC 2212 - VISUAL RHETORIC**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar concentrates on scholarship concerning visual rhetoric and its various synonyms, primarily produced in the United States during the last few decades. Through classroom exercises, readings, and writings, graduate students will become familiar with various practices of message analysis and evaluation pertaining to pictorial persuasion. Seminar participants prepare and present original research concerning visual rhetoric, including the formulation of research questions, developing an appropriate literature review, and, ultimately, inventing sustained argumentation for a thesis
concerning the rhetoric of pictorial works.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2215 - RHETORIC AND HUMAN RIGHTS

Minimum Credits: 3
Maximum Credits: 3
This graduate course focuses on key concepts which are useful for describing, analyzing, and interpreting significant public texts and symbols concerning human rights controversies domestically and internationally. The central objective is to strengthen the seminar participants' awareness of qualitative techniques for interpretive and critical studies of public advocacy about human rights. It concentrates on 20th-century controversies within the US concerning "hate" or bias crimes. Considerations of race, sexuality, gender, sex, and economic class will be interwoven throughout the materials and discussions.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2218 - CONTEMPORARY RHETORICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Study of selected theorists from roughly the last fifty years who explicitly thematize rhetoric or whose work helps to shape the intellectual landscape for thinking about rhetoric. Key theorists would include Kenneth Burke, Chaim Perelman, Michael McGee, Celeste Condit, Michel Foucault, Martha Nussbaum, Michael Billings, Richard Weaver, Jeanne Fahnestock, Thomas Farrell, Lloyd Bitzer, and Stephen Toulmin. Specific content will vary.
Short response papers and one longer research paper required.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2220 - READINGS IN CRITICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/knowledge, desire and the subject. Each year a different area or topic is chosen.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2226 - MEDIA AND CULTURAL STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course traces the history and development of british cultural studies and the role it has played in redefining the study of media in Britain, the US, and Australia. The course examines cultural studies as both a methodology and a political stance by studying its theoretical struggles with Marxism, structuralism, semiotics, social science research, and ethnographic techniques.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2285 - SCIENCE AND ITS RHETORIC

Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the following questions: what role, if any, do rhetorical interpretations play in the discourse of science? Can the acceptance
of scientific ideas be exhaustively explained in terms of epistemic criteria alone, or is there always necessarily recourse to rhetorical topoi? What role does rhetoric play in the internal dialogues of science, and how is rhetoric mobilized when science addresses its lay audience? These questions will be explored through exemplary cases chosen from both the natural and the human sciences.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**COMMRC 2296 - PROSEMINAR**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  Introduction to graduate study in communication. Required for all new graduate students.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**COMMRC 2298 - RESEARCH COLLOQUIUM**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
  The research colloquium provides a forum in which graduate students, faculty, and invited lecturers present research in progress.

**Academic Career:** Graduate  
**Course Component:** Colloquium  
**Grade Component:** No Grade Required

**COMMRC 2902 - DIRECTED STUDY FOR MA STUDENTS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  This course, for individual instruction under a research faculty member, must be within an identifiable area of study in the fields of rhetoric and/or communication. Topics vary. May be taken only once. Open only to students yet to take ma comprehensive examinations.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**COMMRC 2990 - INDEPENDENT STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
  Independent study is taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings. Topics vary.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**COMMRC 3000 - DISSERTATION RESEARCH PHD DEGREE**

- **Minimum Credits:** 1  
- **Maximum Credits:** 12  
  The student will propose and design a research project and then carry out that project through research and writing. The project must be approved by a dissertation committee and executed under the direction of the chair of the committee.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis
COMMRC 3001 - PROSPECTUS RESEARCH

Minimum Credits: 3  
Maximum Credits: 3  
Under individual guidance of a designated research faculty member, students design, propose, and execute a research and writing project related to their prospective dissertation topic. May be used for prospectus preparation.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis

COMMRC 3002 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
Under individual guidance of a designated research faculty member, students design, propose, and execute a major professional development activity (e.g., Article, conference paper, or grant proposal) or related set of them, not necessarily related to their dissertation topic.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis

COMMRC 3306 - SEM IN RHETORIC AND CULTURE

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the role rhetoric plays in the formation of culture, reading some interdisciplinary texts (rhetorical, philosophical, historical, literary) which represent the intellectual elite of a specific time period. These texts will furnish us with an occasion to inquire into the ways in which intellectuals mobilize rhetoric to perpetuate or transform existing socio-political formations: the kinds of cultural self-understanding shaping their discourses and the kinds of spaces their discourse opens to their audiences. Topics vary.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

COMMRC 3314 - SEMINAR IN PUBLIC ARGUMENT

Minimum Credits: 3  
Maximum Credits: 3  
This is an advanced course dealing with specialized topics in the employment of argument in the public sphere. Textual analysis will serve as the primary mode of analysis for dissecting the way policy issues are considered in the public realm.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

COMMRC 3316 - SEMINAR ON RHETORIC OF SOCIAL MOVEMENTS

Minimum Credits: 3  
Maximum Credits: 3  
Social movements have been perennial subjects of rhetorical inquiry. What are social movements? How and why do movements form, grow, and dissipate? Can approaches to rhetorical inquiry traditionally reserved for the analysis of lone speakers and single texts shed useful light on the process through which movements attempt to persuade various audiences? This seminar considers the manner in which early social movement scholars in the field of rhetoric grappled with these and other controversial questions. After developing working knowledge of the rhetorical tradition of social movement scholarship, students will engage other theoretical viewpoints from fields such as sociology and political science to illuminate aspects of movement activity that may be less apparent from within the rhetorical horizon. Consideration of specific case studies will anchor such explorations, and the pedagogical approach guiding such study will privilege direct engagement with movement actors. The goals of the course are to provide students with a grasp on the tradition of social movement inquiry in the field of rhetoric, familiarize them with fruitful interdisciplinary perspectives on movement study, and stimulate reflexive awareness of their own status as agents in the field of social action.

Academic Career: Graduate
COMMRC 3317 - SEMINAR IN RHETORICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3326 - SEMINAR IN MEDIA STUDIES

Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to familiarize students with some of the core issues being debated within contemporary media studies. A number of theoretical perspectives will be incorporated, and topics will vary.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

COMMRC 3384 - TEACHING PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
This course focuses on principles and methods for teaching public speaking. It covers such matters as syllabus design; diversity and inclusion in the classroom; lecture preparation and presentation; small and larger group discussions; speech assignments, evaluation and feedback; general classroom management; and techniques for referring troubled students to counseling; and surveys the instructional team approach to teaching large lecture courses and recitations.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

COMMRC 3902 - DIRECTED STUDY FOR PHD STUDENTS

Minimum Credits: 3
Maximum Credits: 3
This course, for individual instruction under a research faculty member, must be within an identifiable area of study in the fields of rhetoric and/or communication. Topics vary. May be taken only twice. Open only to students yet to defend their Ph.D. comprehensive examinations.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Community Dentistry

CDENT 2113 - DENTAL RESEARCH METHODOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be applied and, as such, students will be required to employ statistical software packages for the analysis of dentally relevant data files. Students will be encouraged to develop, collect, encode and analyze their own data sets. Particular emphasis will be placed on analysis of variance techniques involving repeated measures and factorial designs. The interpretation of computer printouts will be paramount. A very brief introduction to the concept of multivariate analysis will also be presented.
Academic Career: Graduate
CDENT 2114 - DENTAL RESEARCH METHODOLOGY 2

Minimum Credits: 2
Maximum Credits: 2
Course familiarizes students with concepts and methods of research design and measurement in dental medicine. Various systems employed for classifying types of research are presented, including biological and behavioral science approaches. Particular emphasis will be placed on proper design of clinical trials, research paradigms, scientific writing, and methods that can be employed to control for sources of extraneous variance. As a result, students will understand how clinical research becomes a foundation for clinical practice, be able to critically review dental research literature.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 2183 - SCIENTIFIC WRITING

Minimum Credits: 1
Maximum Credits: 1
The component parts of the research paper will be presented and the differences between writing for the thesis or dissertation and a journal manuscript will be presented.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 2900 - INDEPENDENT STUDY

Minimum Credits: 2
Maximum Credits: 2
This course will provide the opportunity for dental residents to pursue the independent study of topics of interest in Dental Public Health.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

CDENT 5111 - DATA INTERPRETATION

Minimum Credits: 1
Maximum Credits: 1
The primary emphasis of this course is to give students an understanding of statistical issues as a basis for interpreting the dental literature. Emphasis is placed on understanding how research designs and statistical analysis of research articles relate to the conclusions that can be drawn.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 5114 - CARIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 5116 - EVIDENCE BASED DENTISTRY

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade
Minimum Credits: 2
Maximum Credits: 2
In this course, students will be introduced to concepts of Evidence-Based Dentistry (EBD) as a foundation for developing high-quality evidence-based treatment decisions. The course presents quantitative thinking concepts (biostatistics) with an emphasis on developing the skills required to become an evidence-based practitioner (including critical thinking, asking clinical questions, searching for relevant evidence, assessing quality of evidence, using evidence to assist in clinical decision-making). Students will have an opportunity for hands-on experience in searching online literature for evidence. Assessing evidence quality and its relation to clinical care will be addressed. This course includes small group practice (using Process Oriented Guided Inquiry Learning (POGIL) groups in most sessions), lectures, and class discussions.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  

**CDENT 5117 - PROFESSIONALISM IN DENTAL MEDICINE**

Minimum Credits: 2  
Maximum Credits: 2  
In this course, students will be provided with foundational knowledge in professionalism, including ethical, legal, social and cultural factors in oral health and disease prevention. The goal of the course is to prepare students for clinical dental practice by introducing principles of ethics and professional behavior that are essential to providing the highest level of oral health care in a clinical setting and throughout a career in dentistry. Concepts that are introduced in this course will be reinforced and expanded upon in the Health Promotion and Disease Prevention course series, which is also offered in the first year predoctoral curriculum. This course includes lectures, small group discussions, in-class and homework assignments.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  

**CDENT 5145 - HEALTH PROMOTION AND DISEASE PREVENTION 2**

Minimum Credits: 2  
Maximum Credits: 2  
In this course, students will prepare for their first clinical experience in the Adolescent Clinic in the summer term. Students explore concepts in health promotion and disease prevention and behavioral principles related to clinical practice. Students continue to examine the nature of oral health and disease. All of these concepts are developed and reinforced through the use of readings, online and in-class exercises, pre-clinical and clinical assignments, and oral and written presentation of a case that requires integration of the concepts and effective demonstration of the skills as they apply to patient care. The goals of the course are to prepare the student for clinical dental practice by introducing important concepts and developing skills required for the provision of effective dental care; to introduce students to ethical and behavioral principles related to clinical practice; and to provide students with their first exposure to the nature of oral health and disease.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF  

**CDENT 5146 - CARIOLOGY**

Minimum Credits: 1  
Maximum Credits: 1  
In this didactic course, students will be introduced to current concepts of the etiology, epidemiology, and clinical prevention and management strategies of dental caries. Students will be provided with actual clinical experience in diagnosing caries in subsequent courses. Successful completion of this course will provide students with the foundational knowledge for prevention and conservative management of caries appropriate for the general dental practitioner. The course includes lecture and small group Process Oriented Guided Inquiry Learning (POGIL) activities aimed at providing an in-depth understanding of the disease of dental caries. Several guest lectures are planned. Rationale: Caries is the most prevalent disease of children and one of the most prevalent diseases at all ages. The majority of dentists spend the majority of their patient contact time addressing caries-associated problems. Having an in-depth understanding of caries etiology, prevention, and management strategies is the foundation for ethical and appropriate patient care. This course provides for a contemporary understanding of these issues and reflects currently updated approaches to caries prevention and management (such as those now being disseminated under the title of: The International Caries Classification and Management System).

**Academic Career:** Dental Medicine
Course Component: Lecture
Grade Component: ABCF with +/- Values

CDENT 5173 - HEALTH PROMOTION AND DISEASE PREVENTION 3

Minimum Credits: 1.5
Maximum Credits: 1.5

In this course, students will work with peers, adolescent and/or young adult patients in a clinical setting where they will focus on developing practical skills related to risk assessment, oral disease prevention, and health promotion. This course is the capstone experience of the first year of the dental curriculum, preparing students to enter the second year by applying the foundational skills acquired in health promotion and disease prevention. This course includes a variety of activities and assignments such as lectures, in-class discussions, journaling, providing clinical care as doctor and assistant, clinical record management, quizzes, quizzes, readings, and self-evaluation of clinical communication. The goals of the course goals are to prepare students for clinical dental practice by applying important concepts and developing skills required for the provision of effective dental care; to introduce students to ethical and behavioral principles related to clinical practice; and to provide students with their first exposure to the nature of oral health and disease in patients.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

CDENT 5174 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION 1: COMMUNITY OUTREACH

Minimum Credits: 1.5
Maximum Credits: 1.5

Mission statement: To increase the workforce of dental professionals who treat underserved and at-risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. The SCOPE program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE service-learning model helps to enable 1) development of relationships and interactions with others, 2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of "giving back" to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

CDENT 5274 - SCOPE 2: COMMUNITY OUTREACH

Minimum Credits: 1.5
Maximum Credits: 1.5

The course is a continuation of activities started in SCOPE 1 of the first year. Mission statement: To increase the workforce of dental professionals who treat underserved and at-risk patients by creating a learning environment in the School of Dental Medicine where students expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. The SCOPE program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE service-learning model helps to enable 1) development of relationships and interactions with others, 2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of "giving back" to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients. The mission and goals also reflect the fostering and development of some of the fifteen core skills identified by Community-Campus Partnerships for Health. These skills are considered minimally necessary for health professionals to effectively meet the needs of the public and include the following*: caring for the community's health; promoting healthy lifestyles; participating in racially and culturally diverse society; understanding the role of the physical environment; involving patients and families in the decision-making process; continuing to learn; improving the health care system; and developing cultural competence.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis
CDENT 5280 - CARIOLOGY AND MANAGEMENT OF CARIES

Minimum Credits: 2
Maximum Credits: 2
This course will present instruction in the management of caries. Topics covered include remineralization, provisional resin restorations and fluoride treatment. The design of cavity preparations for root caries will be discussed.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 5281 - SCOPE 1

Minimum Credits: 3
Maximum Credits: 3
The SCOPE community service program is designed to help cultivate health care professionals who are caring, socially responsible and capable of behaving as patient advocates in all practice environments. The SCOPE I service-learning model helps to enable 1) development of relationships and interactions with others, 2) the defining of community, and 3) the maintenance of a balance between personal and professional life. It also aims at developing student cultural competence, communication skills, and enabling a sense of giving back to the community as a crucial part of professional development. Course goals include the following: creating an atmosphere of community-minded oral-health professionals; creating more empathic, personally committed dentists; and improving the willingness of students to treat underserved and at-risk patients.

Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5282 - CLINICAL APPLICATION OF PROBLEM-SOLVING SKILLS

Minimum Credits: 1
Maximum Credits: 1
This course is designed to support the continued development of evidence-based and critical thinking skills applied to clinical decision-making. The course is designed for 2nd year predoctoral students and supports the theme for the year (diagnosis and treatment planning) by guiding students in the process of applying evidence to support clinical decisions. The course will build and reinforce student understanding of the basic principles of clinical and translational research (i.e., how such research is conducted, critically evaluated, applied to clinical practice, disseminated and shared with patients). The course is taught as a Process Oriented Guided Inquiry Learning (POGIL) series. (POGIL is a student-centered strategy with students working in small groups with individual roles to ensure that all students are engaged in the process.) The course is designed to repeat and build upon information and skills developed from the Evidence Based Dentistry Course and the Oral Diagnosis and Treatment Planning Course. Information acquired during Oral Pathology, Oral Histology and Head and Neck Anatomy may be applied (repeated) during class. The goals of the course are to prepare students for clinical dental practice by further developing their ability to identify clinical problems and plan for clinical care; to provide students an opportunity to further develop skills for the practice of evidence based dentistry; practice intellectual breadth by thinking with an open mind, recognizing and evaluation assumptions, implications, and consequences; and to develop the ability to communicate professionally and work as a team member.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

CDENT 5342 - INTRODUCTION TO BEHAVIORAL DENTISTRY

Minimum Credits: 1
Maximum Credits: 1
Introduction to behavioral dentistry is designed to guide students in increasing awareness of the behavioral component of oral health care, increasing commitment to the biopsychosocial model, and strengthening the behavioral skills necessary to provide oral health care.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF with +/- Values

CDENT 5411 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 2 (FALL)
Minimum Credits: 1.5
Maximum Credits: 1.5
Mission statement: To increase the workforce of dental professionals who treat under-served and at-risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. SCOPE 2 is an experiential process whereby students are able to shape and develop their clinical skills by providing clinical dentistry to patients in Federally Qualified Health Centers (FQHCs) and non-profit clinics throughout western Pennsylvania and parts of Ohio. The selected extramural clinics provide opportunities to work with patients in under-served communities, where both professional and personal growth are enabled, along with the development of other culturally competent skills.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

CDENT 5440 - SCOPE 2

Minimum Credits: 3
Maximum Credits: 3
This course is open to third and fourth year dental students and is structured to: 1) foster civic and social responsibility; 2) foster a sense of caring for others; 3) focus on family and patient centered care; and 4) identify community needs and provide care to these populations. Each participant must participate in five days (40 hours) of clinical dentistry at a SDM related community facility, maintain a reflective journal regarding their community clinical experience, attend community health forums presented by the SOM and public health seminars given by either the SDM's department of community dentistry, or public health related seminars given by other members of the schools of the health professions.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

CDENT 5441 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 2 (SPRING)

Minimum Credits: 1.5
Maximum Credits: 1.5
Mission statement: To increase the workforce of dental professionals who treat under-served and at-risk patients by creating a learning environment in the School of Dental Medicine where students are able to expand their personal and professional insights and gain experience by working in a variety of cultural and community settings. SCOPE 2 is an experiential process whereby students are able to shape and develop their clinical skills by providing clinical dentistry to patients in Federally Qualified Health Centers (FQHCs) and non-profit clinics throughout western Pennsylvania and parts of Ohio. CDENT 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
This independent externship is for a senior dental student who seeks a dental school approved rotation which is individually prescribed to address a particular interest the student wants to pursue within dentistry. The program which is often tailored to one aspect of dentistry allows enrichment to the student's education which none of our established programs in school or externships provide.

Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

CDENT 5910 - LITERATURE AND FILM TO UNDERSTAND PATIENT-PRACTITIONER EXPERIENCES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
CDENT 5916 - CONTEMPORARY ISSUES IN DENTAL PUBLIC HEALTH

Minimum Credits: 2
Maximum Credits: 2
This course is for students wishing to expand their knowledge of the current issues in dental public health. Students will be given directed reading assignments and will search the literature for information on current and controversial topics in dentistry so that group discussions, debates and presentations may successfully be done in class. Topics covered may include: new oral health care delivery and management models, prevention and primary care systems, and dental health services research. Emphasis on evidence-based methodology is highlighted.

Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5930 - OVERVIEW AND PRACTICE OF DENTAL PUBLIC HEALTH

Minimum Credits: 1
Maximum Credits: 1
This selective course will be available for second, third, and fourth year students. The course material will cover common primary preventive interventions and its incorporation at a community level such as fluoridation, school-based programs, health promotion, sealant programs, health policy initiatives, etc. It will also include discussion on an interdisciplinary approach to community level preventive practices. Finally, the course will also discuss the role of dental public health outside traditional dental practice - such as in federal and national health organizations, as well as underserved areas.

Academic Career: Dental Medicine

Community Org and Soc Admin
SWCOSA 2040 - GRANT PROPOSAL WRITING

Minimum Credits: 3  
Maximum Credits: 3  
Provides students with some insight into the operation of several primary sources of funds for social welfare programs.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: (SWCOSA 2084 or 2088) (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2054 - LEADERSHIP

Minimum Credits: 3  
Maximum Credits: 3  
This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: SWCOSA 2084 or 2088 (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2084 - HUMAN SERVICE ORGANIZATION MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course seeks to train professionals to develop, manage, and lead community and human service organizations that address human service needs and revitalize communities. This course will address the social work leadership and management competencies as defined by the Network of Social Work Management, which include: (1) social and public policy context; (2) advocacy; (3) public/community relations and marketing; (4) governance, (5) planning; (6) program development and management; (7) financial development and management; (8) program and organizational evaluation; (9) human resource management and (10) staff development.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWBEH 2063 and SWWEL 2081 and SWGEN 2098; CREQ: SWRES 2021; SBPLAN: COSA (Social Work-MS)

SWCOSA 2086 - HUMAN RESOURCE/SUPERVISION AND FINANCIAL MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This skill elective focuses upon the techniques, processes, methods and resources employed by supervisors, managers and other administrators to assure the highest quality social services are delivered in the most effective manner. Historical roots and trends; organizational and administrative theories; and research findings and conclusion provide the foundation for examining current supervisory and personnel management practices and financial management. Practical applications are included to enhance competency-based for mid-level human service management learning in this course.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWCOSA 2084 or 2088; Minimum grade of B-

SWCOSA 2087 - SPECIAL TOPICS

Minimum Credits: 1  
Maximum Credits: 3  
Given the changing nature of social work practice, the MSW program occasionally offers courses in new and/or unique content areas. When offered,
this course is designed to provide skill and knowledge content not covered in other community organization and social administration skill courses

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWCOSA 2088 - COMMUNITY ORGANIZING AND PLANNING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course seeks to train professionals to develop, manage and lead community service organizations that address human service needs and revitalize communities. This course will provide a framework of systems, power, and inter-organizational network theories, and will define communities in terms of issues, identity and place. Social work values of social and economic justice, participation, democratic practices, social inclusion, empowerment and capacity building will serve as a foundation for this course. This course will explore models of community organizing, including: locality development, social planning and social action, as well as transformative, participatory, feminist, community building and power-based models. Students will examine consensus, campaign, and contests strategies and tactics relative to these models and the techniques for recruiting and mobilizing citizens and constituencies to address social issues and build on local assets. In addition, students will learn: 1) frameworks and tools for assessment, analysis and planning; 2) development of human, social, and economic capital; 3) community capacity building for leadership, organizational, and partnership development; 4) settings of community practice, including unions, environmental, community and faith-based organizations, community development corporations, collaborations and coalitions, enabling and intermediary organizations, and policy and social action groups; 5) roles and skills in community organizing; 6) concepts and issues related to urban communities, including racism, poverty, neighborhood/commercial revitalization, workforce development, housing, and crime. Students will produce a major field project to demonstrate community assessment, analysis and action planning competencies and frameworks learned in class.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081; CREQ: SWRES 2021; SBPLAN: COSA (Social Work-MS)

**SWCOSA 2090 - WORKING WITH GROUP AND INTERGROUP RELATIONS: FACILITATION/NEGOTIATION/MEDIATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Organizers and administrators must be able to work with a range of group processes and interpersonal relationships in community and organizational practice. This course focuses on enhancing student knowledge and skills of group dynamics and processes, as well as the individual relationship management that can be challenging for macro practice. It will also provide a social work values and ethical context for practicing these skills. Three over-arching skill areas will comprise the knowledge and practice base of this modular course: 1) facilitation of task group processes of all types and sizes, 2) negotiating and bargaining, 3) mediation, including conflict mediation and resolution.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWCOSA 2084 or 2088 (MIN GRADE 'B-' for Listed Courses)

**SWCOSA 2096 - COMMUNITY PLANNING AND DEVELOPMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will introduce the student to a community participation approach to local economic development carried out by a nonprofit organization. It would focus on the practical steps for putting together nonprofit housing developments and commercial and industrial business enterprises under participation conditions.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWCOSA 2084 or 2088 (MIN GRADE 'B-' for Listed Courses)

**SWCOSA 2097 - DIRECTED STUDY - COSA**
Minimum Credits: 1
Maximum Credits: 3
This course is designed for those students who are interested in exploring a specific administration and/or policy issue of their choice. The course is appropriate for students with a new and developing interest area or for the student prepared to do advanced work. The course assumes the student's capacity for independent work under the guidance of a faculty member with extensive knowledge and experience in the subject area.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWCOSA 2099 - FIELD WORK

Minimum Credits: 1
Maximum Credits: 8
The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skill interest.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PREQ: SWGEN 2099; SBPLAN: COSA (Social Work-MSW)

Computational Biomedicine and Biotechnology

COBB 2010 - FOUNDATIONS OF COMPUTATIONAL BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the essential concepts, tools and techniques of modern computational biology, with real-world examples. It covers mathematical concepts, such as linear algebra, differential equations, and statistics, that are central to modeling biological systems. Students will learn the basic theory behind widely-used techniques like automated clustering, parameter estimation, sampling, and numerical integration. Project-based assignments in R and Python center around real-world computational biology problems from genomics, structural biology, and systems modeling. Prerequisites: Although there are no official prerequisites, it is highly recommended that students wishing to enroll in this course have an understanding of differential calculus and at least one semester of programming. This course is open to graduate students and upper-level undergraduates.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2020 - SYSTEMS BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to genomic data and basic analytical principles pertaining them. Students will learn about high-throughput sequencing methods and applications, genomic variation, transcriptomics and epigenomic data. At the end of the course, the students will be able to analyze efficiently these types of data sets using existing algorithms or algorithms they will develop.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and
introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**COBB 2030 - COMPUTATIONAL STRUCTURAL BIOLOGY**

**Minimum Credits:** 4  
**Maximum Credits:** 4

Topics covered include: applying computational and statistical methods to the analysis of DNA and protein structures representing protein, DNA and RNA structure; homology modeling and protein structure prediction; theoretical description of basic interactions, along with computational methods to estimate them; statistical mechanical theory of molecules; molecular dynamics and other sampling methods; modeling protein flexibility, from side chains to loops to slow modes; reaction paths and basics of path sampling; protein-protein and protein-small molecule docking; supramolecular assembly; introduction to Quantitative Structure Activity Relationship (QSAR) in drug design.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**COBB 2040 - CELL & SYSTEMS MODELING**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course introduces students to the theory and practice of modeling biological systems from the molecular to the population level with an emphasis on intracellular processes. Topics covered include kinetic and equilibrium descriptions of biological processes, systematic approaches to model building and parameter estimation, analysis of biochemical circuits modeled as differential equations, modeling the effects of noise using stochastic methods. A range of biological models and applications are considered, including gene regulatory networks, cell signaling, molecular motors, and developmental biology.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**COBB 2055 - PROFESSIONAL DEVELOPMENT**

**Minimum Credits:** 1  
**Maximum Credits:** 1

This course addresses aspects of skills essential for establishing and maintaining a career in computational biomedicine and biotechnology. Topics covered include preparation of a CV and resume, interview skills, research ethics, mentoring, and communicating with managers and team members.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**COBB 2065 - SCALABLE MACHINE LEARNING FOR BIG DATA BIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Machine learning (ML) has become an integral part of computational thinking in the era of big data biology. This course focuses on understanding the statistical structure of large-scale biological datasets using ML algorithms. We cover the basics of ML and study their scalable versions for implementation on a distributed computing framework. We pursue distributed ML algorithms for matrix factorization, convex optimization, dimensional reduction, clustering, classification, graph analytics and deep learning, among others. This course is project driven (3 to 4 small projects) with source material from genomic sciences, structural biology, drug discovery, systems modeling and biological imaging. Students are expected to design, implement and test their ML solutions in Apache Spark.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade
COBB 2070 - COMPUTATIONAL GENOMICS

Minimum Credits: 3
Maximum Credits: 3

Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. This course introduces classical approaches and the latest methodological advances in the context of the following biological problems: 1) Computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 3) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 4) Systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

COBB 2080 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 4

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in computational biology.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: Satisfactory/No Credit

COBB 2595 - MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3

Machine learning (ML) has become an integral part of computational thinking in the era of big data biology. This course focuses on understanding the statistical structure of large-scale biological datasets using ML algorithms. We cover the basics of ML and study their scalable versions for implementation on a distributed computing framework. We pursue distributed ML algorithms for matrix factorization, convex optimization, dimensional reduction, clustering, classification, graph analytics and deep learning, among others. Computational Biology

CMPBIO 2010 - SEMINAR IN COMPUTATIONAL BIOLOGY

Minimum Credits: 1
Maximum Credits: 1

Seminar series of the joint Pitt-CMU Ph.D. program in computational biology. Nationally and internationally recognized researchers in the field of computational biology present scientific findings. Students meet informally with each speaker to discuss key areas of computational biology, including: computational structural biology, computational genomics, cellular and systems modeling, bio image informatics, and computational neurobiology.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis
The recent explosion of next-generation, high-content, high-throughput spatial imaging technologies for intact tissues measuring protein expressions, DNA and RNA probes for investigating systems biology challenges has attracted the interest of NIH and other international agencies in funding precision medicine efforts, including Human Tumor Atlas Network (HTAN), Immuno-Oncology Translation Network (IOTN), Human BioMolecular Atlas Program (HuBMAP), Human Cell Atlas (HCA) and Human Protein Atlas (HPA). In this course, we will study these spatial imaging technologies in greater depth, from low-resolution, spatially barcoded approaches for spatial transcriptomics to high-resolution in situ approaches for imaging proteins, DNA and RNA (CODEX, MIBI, IMC-CyTOF, Seq-FISH, MERFISH) expressions. We will focus on several key aspects of these technologies requiring evaluation and benchmarking in the context of spatial approaches: validation of reagents; comparison to gold-standard methods; comparison between related techniques; and relation to analyses on dissociated cells. We will discuss the technologies in terms of: tissue preparation and reagent validation, imaging development and optimization, and computational inference to allow for high-resolution systems biology analysis of large tissues sections. We will include experimental hands-on lectures using in-house hyperplexed immunofluorescence imaging apparatus. Prerequisites: No biological background is expected. The assignments will cover the necessary biology. Experience in programming and some software engineering is preferred. Knowledge of probability, statistics, linear algebra and algorithms will be useful. Prior introduction to machine learning and imaging is a bonus. Strong interest in cancer imaging informatics is a plus. The class is open to senior year undergraduates and graduate students.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

This course is a graduate level course designed primarily for those students who want to learn about the computational methods and tools that are used in the analysis of promoter regions and transcription regulation data. Students with a biological background and knowledge of introductory level statistics can participate as well as students of quantitative background. The course will primarily focus on the methods that are used for the identification of transcription factor binding sites in the promoter regions of the genes. Both sequence-based and structure-based methods will be discussed. Various technologies for data collection will also be presented, including DNA arrays, SELEX, CHIP, and their derivatives.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills. The course is designed for first-year graduate students in the corresponding fields of study. There will be a 1-hour lecture a week with time allocated for two 1-hour recitations. Both the lecture and recitations need to be scheduled in a computer lab (such as our classroom).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and
key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

---

**CMPBIO 2040 - CELLULAR AND SYSTEMS MODELING**

**Minimum Credits:** 3

**Maximum Credits:** 3

A graduate-level introduction into mathematical modeling and analysis of biological systems on the cellular and other levels. This condensed and broad course conveys the unity of the modeling methodology in biology. It spans a range of perspectives derived from the different disciplines from which this new area of research originated: biology, mathematics, engineering, and computer science. The systems covered include quantitative physiology, quantitative cell biology, biological networks, dynamic systems, cell mechanics, and systems modeling of critical illness. The quantitative physiology topics to be covered include hemodynamics, musculoskeletal systems, endocrinology, neuroendocrinology, gastrointestinal/renal, transport phenomena, and pathophysiological conditions. Quantitative cell biology topics surveyed are mathematical models of the cytoskeleton dynamics, intracellular transport, cell locomotion, spatially-distributed models of cell signaling, approaches to whole-cell modeling, and role of modeling in cell-biological research. Models of cellular mechanics will also be addressed. Mathematics of dynamic systems is presented in application to enzyme reactions, bistability in cellular signaling, programmed cell death, and the mechanisms behind the circadian and cell-division rhythms. Biological network theory is presented as it applies to metabolism, protein interactions, regulation of gene expression, and reverse engineering of the biological systems. Theoretical aspects of application of systems modeling to clinical research are also presented on an example of quantitative systems approach to inflammation, sepsis, and trauma. In addition, the course will survey computational methods and models that are broadly useful across the various systems types examined. These will include random walk models, master equations, and continuous and discrete models of chemistry within the cell. Finally, the course will include a presentation of general discrete and continuous models broadly useful in cell and systems modeling as well as computational methods for optimization and parameter tuning on such models. Across the entire range of topics, the universality of the systems modeling methodology and its role in biomedical research are emphasized.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**CMPBIO 2045 - SPECIAL TOPICS IN COMPUTATIONAL BIOLOGY**

**Minimum Credits:** 4

**Maximum Credits:** 4

This course will focus on advanced methods for modeling and reasoning about the dynamics of biological systems. Emphasis will be placed on emerging techniques that complement those based on differential equations and machine learning. Examples include: rule-based modeling, process algebras, hybrid systems, as well as applications of model checking and type theory. Students will be asked to present and provide written summaries of recent papers, and to complete a course project of their own design.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

---

**CMPBIO 2050 - LABORATORY METHODS FOR COMPUTATIONAL BIOLOGY**

**Minimum Credits:** 2

**Maximum Credits:** 2

Computational biologists frequently focus on analyzing and modeling large amounts of biological data, often from high-throughput assays or diverse sources. It is therefore critical that students training in computational biology be familiar with the paradigms and methods of experimentation and measurement that lead to the production of these data. This one-semester laboratory course gives students a deeper appreciation of the principles and challenges of biological experimentation. Students learn a range of topics, including experimental design, structural biology, next generation sequencing, genomics, proteomics, bio imaging, and high-content screening. Class sessions are primarily devoted to designing and performing experiments in the lab using the above techniques. Students are required to keep a detailed laboratory notebook of their experiments and summarize their resulting data in written abstracts and oral presentations given in class-hosted lab meetings. With an emphasis on the basics of experimentation and broad views of multiple cutting-edge and high-throughput techniques, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have and are looking for introductory training in more advanced approaches. Touches upon a range of topics, including structural biology, genomics, proteomics, and bio imaging a different laboratory method is covered each week, in the lab of...
a host faculty member who uses that method. The theory and practical aspects of each method are covered during a lecture session prior to each lab session. Students are required to submit a short lab report each week, summarizing the goals of the experiment, the critical steps and sources of error, and the analysis of the resulting data. With an emphasis on instrumentation and high-throughput data collection, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have.

**Academic Career:** Graduate

### CMPBIO 2055 - QUANTITATIVE ELEMENTS OF CELL FORM AND MOVEMENT

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course covers the basic as well as certain selected topics pertaining to the Physico-chemical origins of architecture and motility of biological cells. It is aimed at graduate students pursuing degrees in various fields of biology (and also in mathematics, physics, chemistry, or engineering), who have taken university-level courses in mathematics, physics, and chemistry. This course material draws upon the variety of quantitative disciplines but maintains a biological perspective. Physical properties and chemical kinetics that determine the structure and function of the cytoskeleton (the assembly of non-covalent polymers at the base of the cellular architecture) will be covered, as will the Physico-chemical mechanisms of motility driven by biological force-generating macromolecules. The didactic material will be presented from the perspective of a practical researcher, and the problem sets will emphasize developing a sense of what makes for a good research strategy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CMPBIO 2060 - CURRENT TOPICS IN COMPUTATIONAL BIOLOGY

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will offer an overview of faculty research in computational biology, a field of tremendous growth and excitement. It will also offer a sampling of current literature in this field, as well as an opportunity for students to develop and practice their presentation skills. The course will meet once a week, and will follow a seminar-style format, with a PowerPoint presentation, followed by a question-and-answer session. To familiarize students with alternative presentation formats, and to allow for more flexibility, the course may also include one or more webinar/teleconference sessions. Throughout the semester, students will take turns serving as introducer, presenter, and moderator of question-and-answer sessions. The topics covered in this course will be in line with the five specialization areas of the joint CMU-Pitt Ph.D. program in computational biology: computational genomics, computational, structural biology, cellular and systems modeling, bio image informatics, and computational neurobiology. The initial meeting will feature an icebreaker exercise and a refresher on professional presentation skills.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### CMPBIO 2065 - SCALABLE MACHINE LEARNING FOR BIG DATA BIOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### CMPBIO 2070 - COMPUTATIONAL GENOMICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. In this course we will discuss classical approaches and latest methodological advances in the context of the following biological problems: 1) computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Medical and populational genetics, focusing on polymorphism analysis, linkage analysis, pedigree and genetic
demography, 3) analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 4) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 5) systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CMPBIO 2075 - MOLECULAR EVOLUTION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CMPBIO 2080 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in computational biology.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**CMPBIO 2085 - COMPUTATIONAL BIOLOGY INTERNSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis

**CMPBIO 2090 - MS THESIS RESEARCH**

**Minimum Credits:** 1  
**Maximum Credits:** 14  
A directed research project which results in a thesis for a master's degree.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**CMPBIO 3090 - PHD DISSERTATION RESEARCH**

**Minimum Credits:** 1  
**Maximum Credits:** 14  
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of
which will provide the substance of their doctoral dissertation.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Computational Biology (PHD)

### MSCBIO 2010 - SEMINAR IN COMPUTATIONAL BIOLOGY

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Seminar series of the joint Pitt-CMU Ph.D. program in computational biology. Nationally and internationally recognized researchers in the field of computational biology present scientific findings. Students meet informally with each speaker to discuss key areas of computational biology, including: computational structural biology, computational genomics, cellular and systems modeling, bio image informatics, and computational neurobiology.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

### MSCBIO 2015 - COMPUTATIONAL IMAGING FOR SPATIAL SYSTEMS BIOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The recent explosion of next-generation, high-content, high-throughput spatial imaging technologies for intact tissues measuring protein expressions, DNA and RNA probes for investigating systems biology challenges has attracted the interest of NIH and other international agencies in funding precision medicine efforts, including Human Tumor Atlas Network (HTAN), Immuno-Oncology Translation Network (IOTN), Human BioMolecular Atlas Program (HuBMAP), Human Cell Atlas (HCA) and Human Protein Atlas (HPA). In this course, we will study these spatial imaging technologies in greater depth, from low-resolution, spatially barcoded approaches for spatial transcriptomics to high-resolution in situ approaches for imaging proteins, DNA and RNA (CODEX, MIBI, IMC-CyTOF, Seq-FISH, MERFISH) expressions. We will focus on several key aspects of these technologies requiring evaluation and benchmarking in the context of spatial approaches: validation of reagents; comparison to gold-standard methods; comparison between related techniques; and relation to analyses on dissociated cells. We will discuss the technologies in terms of: tissue preparation and reagent validation, imaging development and optimization, and computational inference to allow for high-resolution systems biology analysis of large tissues sections. We will include experimental hands-on lectures using in-house hyperplexed immunofluorescence imaging apparatus. Prerequisites: No biological background is expected. The assignments will cover the necessary biology. Experience in programming and some software engineering is preferred. Knowledge of probability, statistics, linear algebra and algorithms will be useful. Prior introduction to machine learning and imaging is a bonus. Strong interest in cancer imaging informatics is a plus. The class is open to senior year undergraduates and graduate students.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### MSCBIO 2019 - CPCB WRITING WORKSHOP

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The CPCB Writing Workshop is designed to introduce students to the basics of descriptive scientific writing, grantsmanship, the grant review process, and other related topics that will help them present their research and ideas in an impactful and persuasive way. This summer mini-course held in the second 4-week summer session is a required 1-credit, pass/fail course for CPCB students.

**Academic Career:** Graduate  
**Course Component:** Workshop  
**Grade Component:** Satisfactory/No Credit

### MSCBIO 2020 - GENE EXPRESSION REGULATION: DATA AND ALGORITHMS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a graduate level course designed primarily for those students who want to learn about the computational methods and tools that are
used in the analysis of promoter regions and transcription regulation data. Students with a biological background and knowledge of introductory level statistics can participate as well as students of quantitative background. The course will primarily focus on the methods that are used for the identification of transcription factor binding sites in the promoter regions of the genes. Both sequence-based and structure-based methods will be discussed. Various technologies for data collection will also be presented, including DNA arrays, SELEX, chip, and their derivatives.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSCBIO 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills. The course is designed for first-year graduate students in the corresponding fields of study. There will be a 1-hour lecture a week with time allocated for two 1-hour recitations. Both the lecture and recitations need to be scheduled in a computer lab (such as our classroom).

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSCBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSCBIO 2040 - CELLULAR AND SYSTEMS MODELING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A graduate-level introduction into mathematical modeling and analysis of biological systems on the cellular and other levels. This condensed and broad course conveys the unity of the modeling methodology in biology. It spans a range of perspectives derived from the different disciplines from which this new area of research originated: biology, mathematics, engineering, and computer science. The systems covered include quantitative physiology, quantitative cell biology, biological networks, dynamic systems, cell mechanics, and systems modeling of critical illness. The quantitative physiology topics to be covered include hemodynamics, musculoskeletal systems, endocrinology, neuroendocrinology, gastrointestinal/renal, transport phenomena, and pathophysiological conditions. Quantitative cell biology topics surveyed are mathematical models of the cytoskeleton dynamics, intracellular transport, cell locomotion, spatially-distributed models of cell signaling, approaches to whole-cell modeling, and role of modeling in cell-biological research. Models of cellular mechanics will also be addressed. Mathematics of dynamic systems is presented in application to enzyme reactions, bistability in cellular signaling, programmed cell death, and the mechanisms behind the circadian and cell-division rhythms. Biological network theory is presented as it applies to metabolism, protein interactions, regulation of gene expression, and reverse engineering of the biological systems. Theoretical aspects of application of systems modeling to clinical research are also presented on an example of quantitative systems approach to inflammation, sepsis, and trauma. In addition, the course will survey computational methods and models that are broadly useful across the various system types examined. These will include random walk models, master equations, and continuous and discrete models of chemistry within the cell. Finally, the course will include a presentation of general discrete and continuous models broadly useful in cell and systems modeling as well as computational methods for optimization and parameter tuning on such models. Across the entire range of topics, the universality of the systems modeling methodology and its role in biomedical research are emphasized.

**Academic Career:** Graduate
MSCBIO 2045 - SPECIAL TOPICS IN COMPUTATIONAL BIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course will focus on advanced methods for modeling and reasoning about the dynamics of biological systems. Emphasis will be placed on emerging techniques that complement those based on differential equations and machine learning. Examples include: rule-based modeling, process algebras, hybrid systems, as well as applications of model checking and type theory. Students will be asked to present and provide written summaries of recent papers, and to complete a course project of their own design.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBIO 2050 - LABORATORY METHODS FOR COMPUTATIONAL BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
Computational biologists frequently focus on analyzing and modeling large amounts of biological data, often from high-throughput assays or diverse sources. It is therefore critical that students training in computational biology be familiar with the paradigms and methods of experimentation and measurement that lead to the production of these data. This one-semester laboratory course gives students a deeper appreciation of the principles and challenges of biological experimentation. Students learn a range of topics, including experimental design, structural biology, next generation sequencing, genomics, proteomics, bio imaging, and high-content screening. Class sessions are primarily devoted to designing and performing experiments in the lab using the above techniques. Students are required to keep a detailed laboratory notebook of their experiments and summarize their resulting data in written abstracts and oral presentations given in class-hosted lab meetings. With an emphasis on the basics of experimentation and broad views of multiple cutting-edge and high-throughput techniques, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have and are looking for introductory training in more advanced approaches. Touches upon a range of topics, including structural biology, genomics, proteomics, and bio imaging a different laboratory method is covered each week, in the lab of a host faculty member who uses that method. The theory and practical aspects of each method are covered during a lecture session prior to each lab session. Students are required to submit a short lab report each week, summarizing the goals of the experiment, the critical steps and sources of error, and the analysis of the resulting data. With an emphasis on instrumentation and high-throughput data collection, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have.

COEE 2120 - HARDWARE DESIGN METHODOLOGIES 1

Minimum Credits: 3
Maximum Credits: 3
This course teaches hardware design processes through use of industry tools. Students use graphical tools to design, simulate and synthesize designs using hardware description languages (e.g. VHDL/Verilog). High-level design and problem decomposition are also taught. Optimization, simulation and synthesis of combinatorial functions, data paths, and finite state machines are covered in depth. Architecture encapsulation and reuse through 'Intellectual Property' (IP) modules is described and covered in detail. Students will work individually and as a part of a team to create, simulate, model, document, and test IP models.
Academic Career: Graduate
Course Component: Lecture

Computer Science

CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Minimum Credits: 4
Maximum Credits: 4
This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using the java programming language. This is a first course for students who intend to major in computer science.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CS 0441 - DISCRETE STRUCTURES FOR CS

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to understand and use (abstract) discrete structures that are backbones of computer science. In particular, this class is meant to introduce logic, proofs, sets, relations, functions, counting, and probability, with an emphasis on applications in computer science.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: MATH 0220 or 0230 or 0235

CS 0445 - DATA STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language included in this study are programming techniques which use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and also expected to develop an intuitive understanding of the complexity of these algorithms.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0401 (MIN GRADE 'C')

CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to study the components of computing systems common to most computer architectures. In particular, this class is meant to introduce data representation, types of processors, memory types and hierarchy, and device drivers. The students will learn MIPS assembly language, the design of arithmetic and logic units, and basic designs for RISC processors.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: CS 0445

CS 1510 - ALGORITHM DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.

Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC
Course Requirements: PREQ: [(CS 1501 or COE 1501) and CS 1502] or (CS 0458 and CS 1710); MIN GRADE 'C' FOR ALL COURSES LISTED

CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
Understanding the theory of computation provides deeper insights into various topics in computer science. This is an introductory level theory course. The aim of this course is to study the power (or lack of it) of various models of computation. Topics to be covered include: automata, formal languages, computability, and computational complexity.

Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC
Course Requirements: PREQ: CS 1502 or 1710; (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Various programming paradigms will be studied using java and scripting languages. The use of java in programming web based applications, network applications, and the use of the extensive java libraries will be studied. The programming paradigm of building software by gluing components will be explored through the use of scripting languages such as perl and JavaScript. Applications include developing gui's and internet programming.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C'); PROG: Dietrich Sch Arts and Sciences or Sch Computing and Information

CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to basic concepts of operating systems, common to most computer systems, which interfaces the machine with upper-level programs. This course will introduce processes as processing unit, process management, concurrency, communication, memory management and protection, and file systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0447 or COE 0447) and (CS 0449 or COE 0449) or (0456 and 1750); MIN GRADE 'C' FOR ALL COURSES LISTED; PROG: Dietrich Sch Arts and Sciences or Sch Computing and Information

CS 1621 - STRUCTURE PROGRAMMING LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
An analytical examination of modern high-level programming language structures; including design specification and implementation. Advanced forms of data types, expressions, and control primitives. Relationship of storage management techniques and language design.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CS (0441 and 0445) or (0406 and 0455); (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 1651 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3  
Maximum Credits: 3  
To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an understanding of these advanced issues, as well as to bring awareness of the known solutions to these problems and to the limitations of these solutions.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CS 1550 or 1312 or 1792; (MIN GRADE 'C' FOR ALL COURSES LISTED)

CS 2000 - MS THESIS RESEARCH

Minimum Credits: 1  
Maximum Credits: 6  
Master's thesis research.  
Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

CS 2001 - RESEARCH TOPICS/COMPUTER SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the students to the research being conducted in the computer science department. Active, state-of-the-art research topics will be covered.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CS 2002 - RESEARCH EXPERIENCE/COMPUTER SCI

Minimum Credits: 3  
Maximum Credits: 3  
In this course, each student will perform exploratory research topics covered in CS 2001. The research will be supervised and directed by faculty members working in the area of the topic chosen by the student.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CS 2001

CS 2003 - COMPUTER SCIENCE COLLOQUIUM

Minimum Credits: 1  
Maximum Credits: 1  
The computer science colloquium is offered as a one unit graduate class, with a satisfactory/no credit (S/NC) grading option. The aim of this weekly meeting is to discuss the most recent advances in computer science.  
Academic Career: Graduate  
Course Component: Colloquium  
Grade Component: Grad SN Basis
CS 2012 - ALGORITHM DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2045 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to the architecture of and software techniques for parallel and high performance computing systems. The content includes fundamental aspects of vector processing, shared-memory and distributed-memory systems. Students will be expected to complete a number of projects demonstrating specific applications in parallel processing paradigms.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY

Minimum Credits: 3  
Maximum Credits: 3  
This course will provide the necessary conceptual background and hands-on experience to understand the most common cryptographic algorithms and protocols and how to use them to secure computers networks and distributed applications. Topics include: cryptographic algorithms for data confidentiality, authentication, and integrity, user authentication methods (secure tokens and biometrics), internet security protocols, security in local area networks, firewalls, and intrusion detection systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2055 - DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to provide an in-depth knowledge of database systems design. Thus, the emphasis is on how to model one's own data and how to use available database management systems effectively. Towards this end, the relational and the object-relational models are discussed in great detail and object-oriented and other data models are also presented. Commercial database management systems are examined and students get practical experience through the use of such systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2056 - INTRODUCTION TO DATA SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science or Computer Engineering

CS 2074 - INTRODUCTION TO COMPUTER VISION

Minimum Credits: 3
Maximum Credits: 3
In this class, students will learn the basics of modern computer vision. The course will cover topics such as image filtering, edge detection, feature extraction, description and matching, grouping and clustering, object detection, activity recognition, and recognition with a human in the loop.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2110 - THEORY OF COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
This course deals with computability theory, automata theory and formal languages. Various models of computation will be examined, their relations to each other and their properties will be studied. Topics include models for computable functions and church's thesis, models for recognizers and their relation to formal grammars, algorithmically solvable and unsolvable problems, and the complexity of computations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

Minimum Credits: 3
Maximum Credits: 3
This course deals with the analysis of algorithms and the relevance of such analysis to the design of efficient algorithms. The derivation of results that are primarily of theoretical significance shares importance with the practical task of designing efficient algorithms. Topics covered: searching and sorting, graph algorithms, arithmetic, np-completeness, and lower bound techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2210 - COMPILER DESIGN

Minimum Credits: 3
Maximum Credits: 3
The design and implementation of current high level languages. Emphasis is placed on the structure of compilers. Lexical, syntax and semantic analysis as well as target code generation and register allocation. Storage management techniques for recursive and retentive control structures. Formal specification techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2310 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course will examine the software engineering process in general, the considerations for large software projects in particular, and then will focus on the conversion of software specifications into production code. Topics will include modern design methods, safety-critical software, verification and validation, testing theory and methods, reengineering of legacy software.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2410 - COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
A study of the hardware structure of computer systems and subsystems. Topics include: processor architecture, parallelism and pipelining, cache and main memory organization, i/o controllers and i/o processors, and interconnection structures.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2510 - COMPUTER OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An in-depth study of the control abstractions in modern operating systems and the issues involved in efficient implementation of those abstractions. Topics will include concurrency and its control, memory management, resource management, and structure of distributed and parallel operating systems. These topics will be developed through the lectures, assigned readings from the literature, and an examination of actual operating systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2520 - WIDE AREA NETWORKS

Minimum Credits: 3
Maximum Credits: 3
The course provides an understanding of the basic principles of broadband networks. It will introduce protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and smds, will be discussed. The course will also address important design issues for high speed networks including characterizations of (a) network traffic and its implications on network design, and (b) application performance objectives, traffic policing, and congestion control algorithms that can meet those diverse objectives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2530 - COMPUTER AND NETWORK SECURITY
The goal of the proposed course is to provide our graduate students the necessary background and hands on experience to do well in systems research or advanced development with an emphasis on security. The instructor will lecture on cryptographic algorithms for data confidentiality, authentication, and integrity, security protocols for the internet and local area networks, firewalls, intrusion detection systems, defense against denial of service attacks, user authentication methods, cryptographic file systems, secure email stenography and usable security.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

The main objective of this course is to provide an in-depth knowledge of database management systems design. Topics covered at length are concurrency control including concurrency on structured data, recovery and query optimization. Some important aspects of distributed databases are discussed, including distributed concurrency control and fault tolerance.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2610 - INTERFACE DESIGN & EVALUATION

This course covers methodology for the modeling, specification, design, measurement, and evaluation of Human-Computer Interfaces (HCI). Included topics are: interaction models and modes, conceptual/logical/physical interface structures, objectively measurable interface patterns, and criteria for interface evaluation. HCI relationships to software engineering and artificial intelligence are highlighted.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2620 - INTERDISCIPLINARY MODELING AND VISUALIZATION

This course discusses computer graphics, modeling and visualization techniques used to solve scientific problems. Focus falls on identifying scientific problems, proposing solutions involving graphical modeling and visualization, and designing, implementing, and evaluating the solutions. Examples include interactive software systems, quantitative analysis tools, or new applications of existing visualizations methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

This course covers the foundational techniques in artificial intelligence, including: problem definition and analysis, heuristic search, adversarial search, knowledge representation, planning and constraint satisfaction, and methods for reasoning under uncertainty. Attention will be given to the roles of these techniques in the design of intelligent agents.
CS 2731 - INTRO NATURAL LANGUAGE PROCESSING

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an introduction to the field of Natural Language Processing (NLP) - the creation of computer programs that can understand, generate, and learn natural language. Natural language understanding will be used as a vehicle to introduce the three major subfields of NLP: syntax, semantics, and pragmatics. The course will introduce both knowledge-based and statistical methods for NLP, and will illustrate the use of such methods in a variety of application areas.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2750 - MACHINE LEARNING

Minimum Credits: 3  
Maximum Credits: 3  
This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2770 - COMPUTER VISION

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Computer Science or Computer Engineering

CS 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 1  
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.

Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad SN Basis

CS 2905 - COMPUTER SCIENCE COOPERATIVE PROGRAM
CS 2910 - MS PROJECT

Minimum Credits: 1
Maximum Credits: 3
A project under the supervision of a faculty member or a group of faculty members.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

CS 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
This course involves study which is approved by the faculty adviser but carried out independently by student.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

CS 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
Any adjunct or full member of the graduate faculty of the department may direct doctoral dissertations.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

CS 3150 - ADV TOPCS DSGN & ANALYS ALGORITHM

Minimum Credits: 3
Maximum Credits: 3
This course covers recent results in the design and analysis of algorithms. The contents change from term to term.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2150

CS 3210 - ADV TOPICS PROGRAMMING LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
Advanced program representations & program analysis techniques for compilers, optimizers, software tools & parallel systems. Analysis techniques include advanced register allocation algorithms, data flow frameworks & techniques, optimizing algorithms & slicing techniques. Program representations include various types of dependence graphs & static single assignment. Analyses & code improving transformations for various types of parallel architectures including VLIW, superscalar, shared memory & distributed memory machines. Current research topics in prog languages.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2210
CS 3220 - COMPILING TECHNQS/PARALLEL SYMS

Minimum Credits: 3  
Maximum Credits: 3
This course will study techniques used in the design of parallelizing compilers. Techniques for computing dependencies and program representations suitable for parallelizing software will be presented. Topics will include detection of fine and coarse parallelism, program transformations and scheduling techniques to exploit parallelism, on shared and distributed memory architectures, and techniques for debugging parallel software.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CS 2210

CS 3410 - ADV TOPICS COMPUTER ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3
This course will survey current topics in computer architecture.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CS 2410

CS 3510 - ADV TOPICS IN OPERATING SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3
An in-depth study of specific topics of modern operative systems, the theory behind them, and their implementation. Topics may include advanced concepts in distributed systems, multimedia systems, file systems, resource management, distributed shared memory, among others.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CS 2510

CS 3521 - ADV TOPCS SENSING/UBIQUITOUS TEC

Minimum Credits: 3  
Maximum Credits: 3
This course will focus on the fundamental issues related to designing and analyzing sensor networks and applications. Topics include but are not limited to: driving applications for sensor nets; wireless networking issues; directed diffusion, aggregation, and data dissemination; power aware routing computing and communication; hardware and software platform and tools.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CS 2520 or TELCOM 2321

CS 3525 - ADVANCED TOPICS IN SUCURITY AND PRIVACY

Minimum Credits: 3  
Maximum Credits: 3
This course covers current research topics in computer security and privacy. The topics covered will change from term to term.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

CS 3530 - ADV TOPCS DISTBD & REAL-TIME SYS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the students to the foundations of real-time systems. The emphasis is on understanding predictability and resource management, at the level of the processor, network, memory, disks, i/o devices, etc. Fault tolerance is another main emphasis of the course, since it is a requirement for real-time behavior. Specific real-time fault-tolerant schemes will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3550 - ADV TOPICS IN MANAGEMENT OF DATA

Minimum Credits: 3
Maximum Credits: 3
The course is devoted to a reevaluation of traditional database techniques and the examination of emerging approaches for the reliable and efficient data management in large distributed systems. Examples of such systems include multi databases, mobile and multimedia databases, and advanced OS and AI. Topics include object management, workflows and extended transactions, semantics-based concurrency control and recovery, active and real-time database techniques. The concepts will be examined within the context of a state-of-the-art system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3551 - ADV TOPICS IN DISTBD INFOR SYS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on emerging technologies for large scale, distributed information systems. Topics to be examined include data and information modeling, heterogeneous data integration, data distribution, caching and replication, web databases, distributed query processing and searching, multimodal access, quality of data, content networks, and pervasive data management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2510 and 2550

CS 3570 - ADVANCED TOPICS IN USER INTERFACE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CS 3580 - SEM: ADV TOPC PARALLEL COMPUTING

Minimum Credits: 3
Maximum Credits: 3
Different topics related to parallel and systolic computations will be covered at various levels of details. Example of such topics are: architectures of parallel processors and VISI computational networks, languages and programming environments for parallel systems, the design and analysis of parallel and systolic algorithms, reconfigurable and data driven processor arrays, complexity measures of VISI computations, and the application of parallel processors to supercomputing.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3650 - VISUAL LANGUAGES AND PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
This course covers the fundamentals of visual language theory, iconic and symbolic representations, parsing techniques, semantics and pragmatics of visual languages, visual programming systems, visual querying systems, visual information systems and knowledge-based visualization.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3710 - ADV TOPICS ARTIFICIAL INTELLGNC

Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in artificial intelligence.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2710

CS 3720 - ADVANCED TOPICS IN INTERNET OF THINGS

Minimum Credits: 3
Maximum Credits: 3
A practical course in expert systems involving discussions of fundamentals of building expert systems, discussion of open problems, and designing and building a prototype expert system.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

CS 3730 - ADV TOPCS NATURAL LANG PROCSSNG

Minimum Credits: 3
Maximum Credits: 3
Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more deeply, and to discuss recent advances in (NLP).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2731

CS 3750 - ADV TOPICS IN MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2750

CS 3790 - ADVANCED TOPICS IN EDUCATIONAL TECHNOLOGY: PERSONALIZED LEARNING ENVIRONMENTS

Minimum Credits: 3
Maximum Credits: 3
The 2010 National Educational Technology Plan outlined how “The challenge for our education system is to leverage the learning sciences and modern technology to create engaging, relevant, and personalized learning experiences for all learners.” While instruction has traditionally been one-size-fits-all, the rise of web-based and mobile technologies provide an opportunity to automatically detect what learners need and adapt instruction to their unique prior knowledge, motivation, and preferences. In this seminar course, we survey different types of personalization in educational technologies (e.g., cognitive, metacognitive, social, motivational), computational modeling techniques for representing learners and their needs, and best practices in designing personalized supports for learners. Students will lead one or more class discussions, participate in the other discussions, and complete a group course project. Students must have a foundational knowledge of algorithms and data structures before enrolling in this course.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### CS 3800 - ADVANCED TOPICS IN COMPUTING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course aims to provide students with an introduction to a range of advanced topics in computing. It will explore the current and future challenges facing the emerging computing paradigms. These will also be used to illustrate the many different influences and trade-offs involved in computing and information systems.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### CS 3900 - PHD DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
The course may involve a project under the supervision of a faculty member.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

### Computing and Information

### CMPINF 0401 - INTERMEDIATE PROGRAMMING

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This is an intermediate programming course that focuses on programming via an object-oriented paradigm. Students entering CMPINF 0401 are expected to have some previous concepts and then focus on object-oriented programming, including classes, encapsulation and abstraction, inheritance, polymorphism and interfaces. Some introductory data structures and algorithms will also be covered in this course. This class is a programming-intensive course, and students will be expected to complete several non-trivial programming projects throughout the term.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** ANTI-REQ: Enrollment not permitted if previously enrolled in CS 0401 OR INFSCI 0017.

### CMPINF 2100 - DATA-CENTRIC COMPUTING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Description: This course will provide an introduction to programming, data processing, and data mining, and applied machine learning using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the basics of Python programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, basic machine learning, data mining, and fundamentals of computational modeling.  
**Academic Career:** Graduate

**CMPINF 2120 - APPLIED PREDICTIVE MODELING**

Minimum Credits: 3  
Maximum Credits: 3  
The ability to collect, store and process large amounts of detailed data in a variety of fields has led to a surge in the use of data in various decision making tasks, ranging from governmental policy making to drafting players in sports. Data literacy is thus important and in this first introductory course we will focus on shifting the traditional mode of deterministic (yes/no) thinking to probabilistic thinking. In this course, we will review concepts from applied probability and statistics and explore how they can be used in building a data-driven infrastructure with applications ranging from understanding a variety of everyday phenomena (e.g., descriptive modeling) to making decisions based on data (e.g., predictive modeling). In particular, we will focus on the principles and best practices in dealing with data, including understanding (a) the bias-variance tradeoff, (b) how to avoid overfitting, (c) how to choose the most appropriate model for your data and (d) how to evaluate your model's performance. While the main focus of the course is on supervised learning, we will also introduce unsupervised learning and in particular the problem of clustering. We will also explore the concept of Monte Carlo simulations and resampling, and how they can be used to make predictions for systems that are too complicated to be solved in closed form. We will also provide an overview of analytical methods for specialized form of data including time series and relational data.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CMPINF 2130 - THE ART OF DATA VISUALIZATION**

Minimum Credits: 3  
Maximum Credits: 3  
Visualization is a language of art to discover, understand, and communicate meanings. This course introduces how to speak in the visual style in the era of big data by programming on the elements of arts: lines, forms, and colors. This course is designed to break the boundaries between art, science, and engineering and teach creative coding to students of all kinds of backgrounds.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**Critical Care Medicine**

**CCM 5430 - CRITICAL CARE MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
The goal of this elective is to provide a multi-disciplinary experience in care of the critically ill. Rounds conducted each morning result in a plan of treatment for each day. The medical student will participate in all aspects of care of the patients in ICU. Emphasis is placed on bedside titration of care. Recognition and appropriate treatment of respiratory failure, arrhythmias, and hyperalimentation are emphasized. The student participates in cardiopulmonary resuscitations. Students participate in night call.  
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: Grad LG/SU5  
Course Attributes: School of Medicine Year 4

**CCM 5650 - INDIVIDUALIZED CLINICAL COURSE**

Minimum Credits: 0  
Maximum Credits: 0  
Academic Career: Medical School  
Course Component: Directed Studies
CCM 5840 - CRITICAL CARE MEDICINE RESEARCH

Minimum Credits: 0
Maximum Credits: 0
These electives provide opportunities to learn basic research methodology, including approach to experimental design, protocol development, data analysis and evaluation of results. Student participates in ongoing research in the lab and on patients. Opportunities for research in resuscitation high frequency jet ventilation, patient monitoring, hemorheology, brain pathophysiology, and pharmacology of anesthesia-related drugs are available. Many other topics are also possible.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

CCM 5899 - INDEPENDENT STUDY IN CRITICAL CARE MEDICINE

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

CCM 5900 - EXTRAMURAL CRITICAL CARE MEDICINE

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in critical care medicine may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Cross-Disciplinary Dental Education

DMED 5001 - DIRECTED STUDY IN PERSON-CENTERED CARE

Minimum Credits: 1
Maximum Credits: 1
A customized course of study in concepts related to person-centered care for students who transfer to the School of Dental Medicine.

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DMED 5110 - FOUNDATIONS OF PERSON-CENTERED CARE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Dental Medicine
DMED 5111 - FOUNDATIONS OF PERSON-CENTERED CARE (BIOMEDICAL MASTERS PROGRAM)

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5112 - PRINCIPLES OF PROFESSIONAL PRACTICE

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5113 - FOUNDATIONS OF PERSON-CENTERED CARE LAB (BIOMEDICAL MASTERS PROGRAM)

Minimum Credits: 1
Maximum Credits: 1
This course is the lab component of course DMED 5111 Foundations of Person-Centered Care and is limited to students enrolled in the Biomedical Masters Program.
Academic Career: Graduate
Course Component: Practicum
Grade Component: ABCF

DMED 5140 - CARIOLOGY AND CARIES MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5141 - CARIOLOGY AND CARIES MANAGEMENT 1 LAB

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

DMED 5142 - FOUNDATIONS OF PERSON-CENTERED CARE 2

Minimum Credits: 2
Maximum Credits: 2
In this course, students will build upon foundational knowledge of person-centered care, including social and cultural factors in oral health, interpersonal communication skills, disease prevention, and evidence-based care.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF
DMED 5143 - PRINCIPLES OF PROFESSIONAL PRACTICE 2

Minimum Credits: 2
Maximum Credits: 2
The primary goal of the Principles of Professional Practice course series is to teach students how essential practice management concepts contribute to the development and maintenance of a successful professional dental practice. This first- and second-year course series will focus on integrating the new student practitioner into their first practice, which begins with their clinical exposure at the School of Dental Medicine. Corollaries will be made from School practice-to-practice opportunities as an entry-level dental professional. Concepts that are introduced in this course series will be reinforced and expanded upon in the Successful Practice Management course series, which is offered in the third- and fourth-years of the predoctoral curriculum. Course material will be presented through lectures, in-class discussions, and assignments that relate to the clinical application of presented topics.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5170 - CARIOLOGY AND CARIES MANAGEMENT 2

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5171 - CARIOLOGY AND CARIES MANAGEMENT 2 LAB

Minimum Credits: 1.5
Maximum Credits: 1.5
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

DMED 5172 - APPLICATIONS OF PERSON-CENTERED CARE

Minimum Credits: 2
Maximum Credits: 2
In this course, students will work with peers in a clinical setting where they will focus on developing practical skills related to risk assessment, head and neck examination, dental examination, gingival examination, oral disease prevention, and health promotion. This course is the capstone experience of the first year of the dental curriculum, preparing students to enter the second year by applying the foundational skills acquired in Foundations of Person-Centered Care 1 and 2, as well as other courses, such as Caries Management, Practice Management, Periodontics 1, Periodontal Instrumentation, and Head and Neck Anatomy.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DMED 5212 - APPLICATIONS OF PROFESSIONAL PRACTICE 1

Minimum Credits: 2
Maximum Credits: 2
This course will build on concepts taught in the first year predoctoral program.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DMED 5243 - APPLICATIONS OF PROFESSIONAL PRACTICE 2
Minimum Credits: 2
Maximum Credits: 2
This course will build on concepts learned in the second year fall term.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

Cultural Studies

CLST 2006 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course entails the exploration of a special topic chosen by the instructor.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLST 2009 - DIRECTED STUDIES

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLST 2050 - CULTURAL STUDIES COMMON SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This annual seminar focuses on a single topic crossing disciplinary and departmental boundaries. Cultural studies faculty with a broad range of research interests participate in weekly talks and discussions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Cultural Studies

Dental Anesthesiology

DSANE 2114 - PATH AND MANAGEMENT OF MEDICAL EMERGENCY

Minimum Credits: 2
Maximum Credits: 2
This course covers the prevention, recognition, and treatment of medical emergencies that can occur in the dental setting. Differential diagnosis is presented according to the presenting signs and symptomatology. Emphasis is placed on the proper office protocol during an emergency, including the assembly of an emergency drug kit. Experience with IV and IM techniques is included.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2242 - PRINCIPLES OF ANESTHESIA

Minimum Credits: 2
Maximum Credits: 2
This is the second course in a series of three didactic courses dealing with the philosophy and methods of pain and anxiety control in dentistry.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DSANE 2243 - POST-DOCTORAL MODERATE SEDATION CLINIC**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- This course is designed to integrate with the didactic course series dealing with the philosophy and methods of pain and anxiety control in dentistry. In this clinical course, under the supervision of the anesthesia faculty, students will select and administer the various pain and anxiety control techniques learned in the classroom.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**DSANE 2260 - POST-DOCTORAL MODERATE SEDATION 1**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- The course will foster an appreciation for the important role of pain and anxiety control in dentistry. The resident will demonstrate proficiency in technical aspects of nitrous oxide anxiolysis, conscious sedation, patient management, and the pharmacologic use of medications. All aspects of anesthesia will be undertaken in the clinic. The resident will experience hands-on management of intravenous sedation from pre-operative evaluation to discharge.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**DSANE 2270 - POST-DOCTORAL MODERATE SEDATION 2**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
- The course will foster an appreciation for the important role of pain and anxiety control in dentistry. The resident will demonstrate proficiency in technical aspects of nitrous oxide anxiolysis, conscious sedation, patient management, and the pharmacologic use of medications. All aspects of anesthesia will be undertaken in the clinic. The resident will experience hands-on management of intravenous sedation from pre-operative evaluation to discharge.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**DSANE 2400 - INTRODUCTION TO ADVANCED ANESTHESIOLOGY 1**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- This course introduces advanced techniques in anesthesiology that apply to the dental anesthesiology resident/student entering the initial segment of advanced, post-doctoral training. This didactic instruction is to provide preliminary instruction concerning hospital and out-patient based anesthesiology that will prepare the student/resident for advanced anesthesiology beyond the pre-doctoral level.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**DSANE 2500 - INTRODUCTION TO DENTAL ANESTHESIOLOGY 2**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- **Academic Career:** Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

**DSANE 5241 - ANESTHESIA 1: LOCAL ANESTHESIA**

Minimum Credits: 2
Maximum Credits: 2
A comprehensive course on local anesthesia. Topics include theories of pain, medicolegal considerations, pharmacology of local anesthetics and vasoconstrictors; techniques of local anesthetic administration, armamentarium, complications, and alternative techniques.

**Academic Career:** Dental Medicine
**Course Component:** Lecture
**Grade Component:** ABCF

**DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB**

Minimum Credits: 0
Maximum Credits: 0

**Academic Career:** Dental Medicine
**Course Component:** Practicum
**Grade Component:** Grad HSU Basis

**DSANE 5247 - ADVANCED LOCAL ANESTHESIA TECHNIQUE LAB**

Minimum Credits: 0
Maximum Credits: 0
This course will foster an appreciation for the important role of local anesthesia in dentistry. The student will demonstrate proficiency in the technical aspects of local anesthetic administration, with particular attention to advanced techniques of local anesthetic administration.

**Academic Career:** Dental Medicine
**Course Component:** Clinical
**Grade Component:** Grad HSU Basis

**DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES**

Minimum Credits: 1
Maximum Credits: 1
In this course, students are provided with information pertaining to the prevention, recognition, and treatment of selected medical emergencies occurring in the dental office. Emphasis is placed on patient evaluation and prevention. Emergency drugs and equipment are specified, as well as clinical their application. Lifesaving management of the medically compromised patient is incorporated into the dental treatment plan. Course lectures will include concepts endorsed by the American Dental Association and introduce the student to resources available through the Journal of the American Dental Association. This course will offer foundational knowledge in emergency medicine which will enable the student to assess and manage patients experiencing a medical emergency in the dental office.

**Academic Career:** Dental Medicine
**Course Component:** Lecture
**Grade Component:** ABCF

**DSANE 5275 - MEDICAL EMERGENCIES LAB**

Minimum Credits: 0
Maximum Credits: 0

**Academic Career:** Dental Medicine
**Course Component:** Practicum
**Grade Component:** Grad HSU Basis

**DSANE 5311 - PATIENT MANAGEMENT: ENTERAL SEDATION**
Minimum Credits: 1
Maximum Credits: 1
In this course, students will be expected to meet the educational requirements for predoctoral dental students set forth in the October, 2007 the American Dental Associations Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students. In combination with course material presented in pharmacology, physiology, and clinical medicine, satisfactory completion of this course, along with subsequent clinical exposures, will place the student in compliance with the ADA guidelines for enteral sedation. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5313 - ANESTHESIA 3: PAIN AND ANXIETY CONTROL

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be presented with methods of pharmacologic management of pain and anxiety. It is presented as essentially two separate sections: 1) anxiety control with nitrous oxide sedation and 2) pain control with analgesics. Anxiety control encompasses current pharmacologic management in anxiety control for dentistry. This section of the course focuses on the techniques that a general practice dentist can provide in an office setting. The methods of anxiety reduction and sedation that will be presented were selected on the basis of efficacy and safety. Inhalation sedation (nitrous oxide) techniques are covered in depth. Sedation and general anesthesia with respect to the role of the dental anesthesiologist is described. Pediatric management techniques are not covered. Pain control encompasses an introduction to prescription writing and establishes prescribing protocols for both non-steroidal anti-inflammatory and opioid analgesics. Often pain medications are prescribed to the dental patient in an empirical sense; the goal of this portion of the course is to impart a clinical rational for prescribing pain medications. A method is established so that the student can make a therapeutic choice based on the needs of the patient and contemporary dental practice. A focus is placed with respect to drug diversion and responsible opiate prescribing. Atypical analgesics for oral-facial neuropathic pain will also be presented. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DSANE 5315 - NITROUS OXIDE LAB

Minimum Credits: 0
Maximum Credits: 0
In this course, students will reinforce the knowledge of nitrous oxide gained didactically by engaging in hands-on use of the machines and self-experience of the medication, if desired, in a small group educational setting. This course will serve to assess preclinical competence in order to allow students to progress to the administration of nitrous oxide to dental patients. This course includes small group lab sessions.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5317 - ADVANCED LOCAL ANESTHESIA TECH LAB

Minimum Credits: 0
Maximum Credits: 0
In this course, students will gain an appreciation for the important role of local anesthesia in dentistry. Students will develop and practice techniques in advanced and alternative delivery of local anesthesia. This course also evaluates competency in the standard technique of administering local anesthesia. This course includes one lecture and two small group lab sessions.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5342 - CLINICAL MEDICINE

Minimum Credits: 1
Maximum Credits: 1
This course in clinical medicine is directed to first professional dental students. Utilizing a combination of dental and medical faculty, the course will
provide a better understanding of some common medical conditions and its current treatment, preparing students with the basics in providing dental care to the growing population of aging patients with complex medical conditions in conjunction with their physician colleagues.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF

**DSANE 5344 - MEDICAL EMERGENCIES - WISER CENTER**

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**DSANE 5345 - NITROUS OXIDE SEDATION LAB**

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**DSANE 5375 - NITIOUS OXIDE SEDATION LAB**

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**DSANE 5810 - RESEARCH & WRITING IN DENTAL ANESTHESIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** Dental Medicine  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**DSANE 5811 - PRINCIPLES OF CARDIOLOGY IN ANESTHESIA**

Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** Dental Medicine  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**DSANE 5812 - PRINCIPLES OF PULMONOLOGY IN ANESTHESIA**

Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**DSANE 5900 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 3
An individualized program of advanced studies in anesthesia.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

**DSANE 5912 - CLINICAL ANESTHESIOLOGY 2**

Minimum Credits: 1
Maximum Credits: 1
This is a one year undergraduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Concepts of pain and anxiety, as well as, the principles of their psychologic and pharmacologic modifications are explored. Modalities ranging from non-drug and regional analgesic to enteral and parenteral sedative medication techniques are administered by the student under the supervision of the anesthesia faculty. The advantages, disadvantages, and complications associated with these techniques are compared.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

**DSANE 5914 - DRUG INTERACTIONS**

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

**DSANE 5943 - CLINICAL ANESTHESIOLOGY 3**

Minimum Credits: 4
Maximum Credits: 4
This is a one year undergraduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Concepts of pain and anxiety, as well as, the principles of their psychologic and pharmacologic modifications are explored. Modalities ranging from non-drug and regional analgesic to enteral and parenteral sedative medication techniques are administered by the student under the supervision of the anesthesia faculty. The advantages, disadvantages, and complications associated with these techniques are compared.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

**DSANE 5971 - CLINICAL ANESTHESIOLOGY 1**

Minimum Credits: 1
Maximum Credits: 1
This is a one year undergraduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Concepts of pain and anxiety, as well as, the principles of their psychologic and pharmacologic modifications are explored. Modalities ranging from non-drug and regional analgesic to enteral and parenteral sedative medication techniques are administered by the student under the supervision of the anesthesia faculty. The advantages, disadvantages, and complication associated with these techniques are compared.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

**Dental Microbiology**

**DSMIC 5941 - IMMUNOLOGY ORAL FACIAL COMPLEX**
This course uses literature reviews, student presentation, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### Dental Physiology

**DSPHL 2243 - SCIENTIFIC BASIS FOR CLINICAL THERAPEUTICS**

Minimum Credits: 1  
Maximum Credits: 1  
The basis for dental therapeutics is presented in this graduate course. The course emphasizes the elements of controlled trials by critiquing published articles relevant to dental therapeutics. Pharmacologic agents of interest include local anesthetics, nonsteroidal anti-inflammatory analgesic drugs, opioid analgesics, sedatives/hypnotics and antibiotics.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### Dental Medicine

**DENT 2001 - FULL-TIME GRADUATE DENTAL MEDICINE STUDY**

Minimum Credits: 0  
Maximum Credits: 0  
Students who are working full-time in a school of dental medicine graduate program may register for this course.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**DENT 2019 - GRADUATE PATIENT CARE**

Minimum Credits: 0  
Maximum Credits: 0  
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**DENT 2049 - GRADUATE PATIENT CARE**

Minimum Credits: 0  
Maximum Credits: 0  
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SNC Basis
DENT 2119 - GRADUATE PROSTHODONTICS PATIENT CARE

Minimum Credits: 0
Maximum Credits: 0
This course serves to provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of prosthodontics.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2130 - APPLIED HEAD AND NECK ANATOMY

Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce graduate students in clinical specialties to applied (surgical) head and neck anatomy. The course is comprised of didactic and dissection components, in addition to required readings. The dissection portion is planned to meet the specific needs of the various clinical specialties.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

DENT 2150 - ETHICS IN THE DENTAL SPECIALTIES

Minimum Credits: 0.5
Maximum Credits: 0.5
The Ethics in the Dental Specialties course is designed to provide the first year advanced education student with a review of the general principles of ethics and the application of ethical principles in the interactions between general dentists, dental specialists and the patients whose care they share. The students will be provided the opportunity to identify and work through ethical dilemmas specifically involving their chosen dental specialty.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 2201 - MASTERS RESEARCH 1

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2202 - MASTERS RESEARCH 2

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
DENT 2203 - MASTERS RESEARCH 3

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2204 - MASTERS RESEARCH 4

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data, and submit a final thesis and scientific paper for peer review.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2205 - MASTERS RESEARCH 5

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2206 - MASTERS RESEARCH 6

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2207 - MASTERS RESEARCH 7

Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.
DENT 2917 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

DENT 2947 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

DENT 3111 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2
Maximum Credits: 2
Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

DENT 3142 - INTRODUCTON TO TRANSLATIONAL RESEARCH

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

DENT 5000 - FULL-TIME DENTAL MEDICINE STUDY

Minimum Credits: 0
Maximum Credits: 0
Students who are working full-time for their doctor of dental medicine degree may register for this course.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5001 - PART TIME DENTAL MEDICINE STUDY
Minimum Credits: 1
Maximum Credits: 8
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

DENT 5002 - QUALITIES OF A GENERAL DENTIST

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5115 - HEALTH PROMOTION AND DISEASE PREVENTION 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5118 - QUALITIES OF A GENERAL DENTIST 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5146 - CARIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 5148 - QUALITIES OF A GENERAL DENTIST 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5173 - HEALTH PROMOTION AND DISEASE PREVENTION 3

Minimum Credits: 2
Maximum Credits: 2
This is the third of a three course series which collectively helps to prepare the student for clinical dental practice by introducing important concepts and developing skills required for the provision of effective dental care. Students explore concepts in health promotion and disease prevention, ethical and behavioral principles related to clinical practice and are also provided with a foundation in evidence-based dentistry. Students continue to examine the nature of oral health and disease. All of these concepts are developed and reinforced through the use of readings, pre-clinical and clinical assignments and case presentations that require integration of the concepts and effective demonstration of the skills as they apply to patient care.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 5178 - QUALITIES OF A GENERAL DENTIST 3

Minimum Credits: 1
Maximum Credits: 1
This course will follow student progression each term in the non-technique sensitive behaviors that the faculty members of the University of Pittsburgh School of Dental Medicine (SDM) deem are essential qualities to becoming a successful general dentist. As the student advances through the four years of the curriculum, SDM faculty will evaluate the students ability to demonstrate the knowledge, skills, and values in the outlined categories that represent expected professional behaviors. This assessed conduct will include all actions displayed in all locations within the school as well as in all external curricular locations. In addition to the areas listed above, this series of courses will include evaluating the students adherence to all SDM directives and/or University guidelines, requirements, policies and procedures.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5211 - DIAGNOSIS AND TREATMENT PLANNING 1

Minimum Credits: 1
Maximum Credits: 1
This course parallels the curricular theme of the second year, providing the opportunity to acquire and practice basic clinical skills and to prepare students to conduct comprehensive patient evaluations. Topics include: obtaining and interpreting medical, dental and medication histories; assessing the patient's health status; and assessing risk. The course will utilize previously acquired knowledge related to the examination of oral, dental and periodontal structures. Students will apply knowledge from their periodontology courses to diagnose gingivitis and periodontitis. Students will continue to develop their skills in oral disease prevention and health promotion. This course includes lecture, clinical assignments with an upperclassman, and case-based learning activities.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DENT 5218 - QUALITIES OF A GENERAL DENTIST 4

Minimum Credits: 1
Maximum Credits: 1
This course will follow student progression each term in the non-technique sensitive behaviors that the faculty members of the University of Pittsburgh School of Dental Medicine (SDM) deem are essential qualities to becoming a successful general dentist. As the student advances through the four years of the curriculum, SDM faculty will evaluate the students ability to demonstrate the knowledge, skills, and values in the outlined categories that represent expected professional behaviors. This assessed conduct will include all actions displayed in all locations within the school as well as in all external curricular locations. In addition to the areas listed above, this series of courses will include evaluating the students adherence to all SDM directives and/or University guidelines, requirements, policies and procedures.
Academic Career: Dental Medicine
DENT 5242 - DIAGNOSIS AND TREATMENT PLANNING 2

Minimum Credits: 1
Maximum Credits: 1
This course will provide the second year dental student with the ability to successfully perform in the primary care clinic. Specifically, the student will become competent in addressing the patient's chief complaint with consideration to the following: medical history/physical status determination, soft tissue examination, radiologic interpretation and appropriate treatment planning.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DENT 5248 - QUALITIES OF A GENERAL DENTIST 5

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5278 - QUALITIES OF A GENERAL DENTIST 6

Minimum Credits: 1
Maximum Credits: 1
This course will follow student progression each term in the non-technique sensitive behaviors that the faculty members of the University of Pittsburgh School of Dental Medicine (SDM) deem are essential qualities to becoming a successful general dentist. As the student advances through the four years of the curriculum, SDM faculty will evaluate his/her progression in the behaviors that demonstrate the students knowledge, skills, and values in the outlined categories, to include professionalism and ethics. This assessed conduct will include all actions displayed in all locations within the school as well as in all external curricular locations. In addition to the areas listed above, this series of courses will include evaluating the students adherence to all SDM and/or University guidelines, requirements, policies, and procedures.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3

Minimum Credits: 2
Maximum Credits: 2
In this course, second year students will be provided with an opportunity to apply foundational knowledge in diagnosis and treatment planning to a patient case. The student will work as part of a group to assess, diagnose, treatment plan and present a case to faculty and peers. Students will work within their group to write a written case report. After faculty review of the case report, each group of students will present their case orally during a 20-minute oral presentation. The presentation is followed by faculty questions. Students will also attend one implant conference to gain exposure to multi-disciplinary treatment planning and will then write a journal entry reflecting on this experience. Finally, the student's behavioral skills will be assessed as he/she discusses a treatment plan with a patient through the use of a standardized patient competency examination.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5310 - SPECIAL NEEDS DENTISTRY

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be provided with an introduction to the arena of special needs dentistry; material presented will demonstrate the management and treatment of patients with disabilities/special needs. The primary goals of this course are to introduce the pre-doctoral dental student
to common developmental and acquired disabilities, and to provide an increased understanding regarding barriers to care for individuals with disabilities. The focus of the course is to enable the student to understand the necessary parameters of care and modifications to dental treatment to best accommodate individuals with disabilities. The material presented will aid the student in assessing, planning, implementing and monitoring treatment for the patient with special needs. Speakers will include SDM faculty members, as well as guests from various disciplines within the University and external organizations. This course includes lectures, required assignments (reading and/or audio-video) and class discussions.

**Academic Career:** Dental Medicine

**Grade Component:** ABCF

---

**DENT 5313 - ONGOING PERFORMANCE EVALUATION 1**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
As first- and second-year students, the Global Assessment (GA) program at the University of Pittsburgh School of Dental Medicine (SDM) helps provide guidance and learning opportunities for predoctoral students to grow and develop the knowledge, skills and values related to professional and ethical decision-making. The GA program utilizes a two-pronged approach: 1) The Qualities of a General Dentist (QGD) course series tracks the students ability to meet the professional and ethical expectations of developing health professionals as they progress through all terms of the four-year curriculum. 2) The Ongoing Performance Evaluation (OPE) course series tracks third- and fourth-year students ability to meet the expected clinical quality care standards, in addition to monitoring their clinical productivity as they provide services to their assigned patients outside rotations. The primary goal of the Ongoing Performance Evaluation (OPE) course series is to follow and assess student clinical progression each term in the third and fourth years of the predoctoral program. The foundation of this course recognizes that the primary goal of the predoctoral dental program is to provide a teaching and learning platform that allows the student to gain the knowledge, skills and values to competently perform as an entry-level general dentist. In doing so, the student is expected to gain clinical experience and advance through the clinical curriculum as s/he provides dental services to SDM patients. It is an expectation of the school that each student will work beyond minimal requirements and subsequent departmental competencies continuing to gain experience and knowledge each semester until graduation, thereby allowing his/her skills to improve.

---

**DENT 5318 - QUALITIES OF A GENERAL DENTIST 7**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will follow student progression each term in the non-technique sensitive behaviors that the faculty members of the University of Pittsburgh School of Dental Medicine (SDM) deem are essential qualities to becoming a successful general dentist. As the student advances through the four years of the curriculum, SDM faculty will evaluate the students ability to demonstrate the knowledge, skills, and values in the outlined categories that represent expected professional behaviors. This assessed conduct will include all actions displayed in all locations within the school as well as in all external curricular locations. In addition to the areas listed above, this series of courses will include evaluating the students adherence to all SDM directives and/or University guidelines, requirements, policies and procedures.

DENT 5383 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the areas of oral diagnosis and treatment planning, evidence-based dentistry and the treatment of adult and geriatric patients for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in diagnosing and treatment planning, in providing evidence-based care to patients and in the treatment of adult and geriatric patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in these areas.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

DENT 5388 - CLINICAL SPECIAL NEEDS DENTISTRY 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of special needs dentistry for pre-doctoral dental students. By the end of the third year of the curriculum, students will be able to demonstrate competence in assessing the needs of and in providing care to dental patients with special needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with special needs.

Academic Career: Dental Medicine

Dermatology

DERM 5380 - DERMATOLOGY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in the outpatient clinics at Flak Clinic, Children's Hospital and the VA Hospital. These activities will be complemented by grand rounds, kodachrome conference, dermatopathy conference, and journal club conference. There are lectures in the basic sciences.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

DERM 5420 - BASIC DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in our outpatient clinics at Falk Clinic, Children's Hosp, and the VA Hosp. In addition, the student may participate with hospital consultations, clinical therapeutic trials, the pigmented lesion and melanoma program, the cutaneous ulceration and rehabilitation, and the technique of Mohm's microscopic-controlled excision of skin cancer. These activities will be complemented by weekly grand rounds, Kodachrome conf, dermatopath conf, and journal club conf. There are weekly lectures in basic sciences.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5425 - ADVANCED DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
Students are expected to develop skills necessary to independently complete a history and physical examination, identify required laboratory studies, develop a rationale differential diagnosis, and articulate and defend an appropriate treatment plan. The didactic portion will include regular participation in all dermatology department conferences and didactic sessions, and a weekly lecture and q a session with the course director. Students are expected to formally present one patient at grand rounds and are encouraged to write a case report for publication. Evaluation is based on an exam given on the last day of the elective as well as clinical performance.
Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 4

DERM 5430 - DERMATOLOGIC AND PLASTIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
This elective will split time with plastic surgery and dermatology. Such an exposure will provide the optimal learning experience in cutaneous surgery.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

DERM 5440 - DERMATOPATHOLOGY
Minimum Credits: 0  
Maximum Credits: 0

Interact with dermatology and pathology residents as well as dermatopathology fellows and participate in lectures and weekly grand rounds. Participation in case review and sign out sessions. Additional slides available for optional independent study. Independently study at microscope available. Students attempt diagnosis of cases & present them to faculty. Students gain understanding of skin as a separate organ having unique pathobiologic responses. Acquire adequate diagnostic proficiency with response processes seen in dermatopathology. Final evaluation on overall performance.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**DERM 5650 - INDIVIDUALIZED CLINICAL COURSE**

Minimum Credits: 0  
Maximum Credits: 0

An individualized course of study may be arranged with the department of dermatology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**DERM 5810 - DERMATOLOGY RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0

Research projects in dermatology are available to interested and motivated students. Project areas include 1) various aspects of wound healing; 2) skin microbiology; 3) biological behavior and causes of skin cancer; 4) dermal biochemistry; 5) epidermal cell biology; 6) clinical studies; 7) mycosis fun guides and immune modulation; 8) scleroderma fibroblast study; 9) pigmented lesions and cutaneous immunology. These activities will be complemented by departmental conferences. At the end of the project, the student will present a seminar on his/her results.

**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**DERM 5899 - INDEPENDENT STUDY DERMATOLOGY**

Minimum Credits: 0  
Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

**DERM 5900 - EXTRAMURAL DERMATOLOGY**

Minimum Credits: 0  
Maximum Credits: 0

A clinical experience in dermatology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Diagnostic Sciences

**DIASCI 2110 - ADVANCED ORAL PATHOLOGY 1**

Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course in oral pathology is to provide the student a logical approach to the differential diagnosis of oral lesions. The definitive information necessary for the establishment of a final diagnosis is then provided. The course consists of a series of lectures augmented by laboratory sessions and clinical pathologic conferences.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis

**DIASCI 2140 - ADVANCED IMAGING**

Minimum Credits: 1  
Maximum Credits: 1  
The course on advanced imaging reinforces the importance of right way of using technology and understanding the usage of advanced techniques like CT, MRI and ultrasound in dentistry. It also helps them to understand the digital radiography and its advantages and disadvantages over the film based technique. It helps them to choose appropriate imaging modality for treatment planning for procedures like implants. The diagnostic part of the course should help residents in describing, interpreting and developing most relevant differential diagnosis for the systemic and bone pathology that is seen on the radiographs. Literature component of the course will help them in knowing the latest research in the field and promotes ideas to develop research integrating imaging.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**DIASCI 2142 - ADVANCED ORAL PATHOLOGY 2**

Minimum Credits: 1  
Maximum Credits: 1  
This conference provides the essential information for histologic diagnosis of oral pathologies. This individualized program provides concentrated instruction in the microscopic aspects of those oral diseases related to the specific clinical specialty in which the resident is enrolled.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis

**DIASCI 2191 - PATHOBIOLOGY 1**

Minimum Credits: 2  
Maximum Credits: 2  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**DIASCI 2282 - PATHOBIOLOGY 2**

Minimum Credits: 2  
Maximum Credits: 2  
Applied pathobiology provides the venue wherein residents apply pathobiology to their field of specialization. Utilizing an investigative approach, residents identify a topic of interest and demonstrate by means of a powerpoint presentation pathobiological concepts as they apply to patient care.
DIASCI 5141 - INTRODUCTION TO RADIOLOGY 1

Minimum Credits: 0.5  
Maximum Credits: 0.5  
This course introduces the basics of Radiology and students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics and Cariology courses. This course offers the first-year dental student instruction in the fundamentals of theory and practice that include the following: 1. A working knowledge of the dental radiological physics, and safety as they apply to dentistry; 2. Understand and recognize factors affecting image quality of radiographs and how to correct them; 3. Understand concepts and equipment used in digital radiography. This course includes a self-paced online component (recommended lecture completion dates and test freezing dates will be posted), and mandatory in class sessions on select topics.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis

DIASCI 5170 - GENERAL AND SYSTEMIC PATHOLOGY

Minimum Credits: 5  
Maximum Credits: 5  
This course is organized to present the pathologic processes which underlie a variety of human disease states. Topics in general pathology include cell injury and cell death, inflammation and repair, hemodynamic disorders, neoplasia, and autoimmune, environmental, genetic, and pediatric diseases. Topics in systemic pathology include disease of vasculature, heart, kidneys, lungs, and blood. Oral implications of systemic disease are introduced. This course includes lectures and class discussions. The goal of teaching general pathology is to provide a foundation of the basic processes of disease, such as cellular pathology, inflammation and repair, fluid and hemodynamic derangements, and neoplasia. The study of metabolic deficiencies, environmental, pediatric and genetic disease processes is also included. The student should be able to understand inflammation and repair throughout the body, including the oral cavity. The goal of teaching systemic pathology to the dental student is to educate him/her in the diseases affecting specific organ systems such as cardiovascular, blood, hematopoietic, lymphoreticular and immune systems, respiratory, gastrointestinal, hepatobiliary, pancreatic, genitourinary, male reproductive, breast and female reproductive, endocrine, musculoskeletal and central and peripheral nervous systems. The student should complete the course with a fundamental knowledge of common systemic diseases. They should be able to identify how their patients diseases can affect dental treatment.

Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: Grad Letter Grade

DIASCI 5171 - INTRODUCTION TO RADIOLOGY 2

Minimum Credits: 0.5  
Maximum Credits: 0.5  
In this course, students will continue to build on the concepts addressed in the Introduction to Radiology 1, Dental Anatomy, Periodontics and Cariology courses. This course offers the first-year dental students instruction in the fundamentals of theory and practice that include the following: 1. A working knowledge of the dental radiological technique, and interpretation as they apply to dentistry; 2. A pre-clinical laboratory exercise to develop practical skills in the area of dental x-ray procedures; 3. Self-instruction materials that cover normal radiographic anatomy. This course includes a self-paced online component (recommended lecture completion dates and test freezing dates will be posted), mandatory in class sessions on select topics, and a preclinical radiology technique rotation.

Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: Grad HSU Basis

DIASCI 5211 - INTRODUCTION TO RADIOLOGY PHYSICS AND BASIC INTERPRETATION

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics and Cariology courses. This course
offers the second year dental student instruction in the fundamentals of theory and practice that include the following: 1) a working knowledge of the dental radiological physics, technique, safety and interpretation as they apply to dentistry; 2) a pre-clinical laboratory exercise to develop practical skills in the area of dental x-ray procedures; 3) self-instruction materials that cover normal radiographic anatomy; and 4) small group exercises in basic radiographic interpretation of caries and periodontium to serve as the foundation for future radiographic interpretation and patient care. This course includes a self-paced online component, small group interpretation exercises, and a preclinical radiology technique rotation. In-class sessions are available upon request for any topics that the class would like to review with the course director.

**Academic Career:** Dental Medicine

**Course Component:** Lecture

**Grade Component:** Grad HSU Basis

### DIASCI 5212 - ORAL AND MAXILLOFACIAL PATHOLOGY

**Minimum Credits:** 4

**Maximum Credits:** 4

The practice of dentistry requires the ability to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment. Oral and Maxillofacial Pathology is aimed at the recognition of the etiologic, clinical, radiographic, microscopic features of abnormalities, and disease processes unique to the oral perioral structures, as well as those which reflect systemic disease. Where appropriate, treatment of oral diseases will be addressed. The course integrates material learned in the basic science curriculum, including embryology, biochemistry, histology, cell biology, and physiology, and applies it to the diseased state (pathology). Where appropriate, treatment of oral diseases will be addressed. By the end of the course, you will be able to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment, which is essential to the practice of dentistry. This course includes lectures, class discussions, and case-based learning activities.

**Academic Career:** Dental Medicine

**Course Component:** Lecture

**Grade Component:** ABCF with +/- Values

### DIASCI 5213 - INTRODUCTION TO RADIOLOGY 3

**Minimum Credits:** 0.5

**Maximum Credits:** 0.5

In this course, students will continue to build on the concepts addressed in the Dental Anatomy, Periodontics, and Cariology courses as well as Introduction to Radiology 1 and 2. This course offers the second year dental student instruction in the fundamentals of theory and practice that include the following: 1) a working knowledge of the dental radiological interpretation as they apply to dentistry; 2) a pre-clinical/shadowing exercise to develop practical skills in the area of dental x-ray procedures; and 3) small group exercises in basic radiographic interpretation of caries and periodontium to serve as the foundation for future radiographic interpretation and patient care. This course includes a self-paced online component, small group interpretation exercises, and a preclinical/shadowing exercise on radiology technique. In-class sessions are available upon request for any topics that the class would like to review with the course director.

**Academic Career:** Dental Medicine

**Course Component:** Practicum

**Grade Component:** Grad HSU Basis

### DIASCI 5214 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 1

**Minimum Credits:** 2

**Maximum Credits:** 2

The practice of dentistry requires the ability to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment. Oral and Maxillofacial Pathology and Radiology are aimed at the recognition of the etiologic, clinical, radiographic, microscopic features of abnormalities, and disease processes unique to the oral perioral structures, as well as those which reflect systemic disease. Selection criteria for prescribing radiographs and advanced imaging modalities are incorporated to prescribe the right imaging and to be able to diagnose on all appropriate methods of dental related imaging. Where appropriate, treatment of oral diseases will be addressed. The course integrates material learned in the basic science curriculum, including embryology, biochemistry, histology, cell biology, and physiology, and applies it to the diseased state (pathology). Where appropriate, treatment of oral diseases will be addressed. By the end of the course, you will be able to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment, which is essential to the practice of dentistry. This course includes lectures, class discussions, and case-based learning activities.

**Academic Career:** Dental Medicine
DIASCI 5241 - RADIOLOGY, IMAGING AND INTERPRETATION 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF with +/- Values

DIASCI 5244 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 2

Minimum Credits: 2
Maximum Credits: 2
The practice of dentistry requires the ability to distinguish normal oral anatomy from oral abnormalities, and to determine implications for treatment. Oral and Maxillofacial Pathology and Radiology are aimed at the recognition of the etiologic, clinical, radiographic, microscopic features of abnormalities, and disease processes unique to the oral perioral structures, as well as those which reflect systemic disease. Selection criteria for prescribing radiographs and advanced imaging modalities are incorporated to prescribe the right imaging and to be able to diagnose on all appropriate methods of dental related imaging. Where appropriate, treatment of oral diseases will be addressed. The course integrates material learned in the basic science curriculum, including embryology, biochemistry, histology, cell biology, and physiology, and applies it to the diseased state (pathology). Where appropriate, treatment of oral diseases will be addressed. This course is a continuation of DIASCI 5214, Oral and Maxillofacial Pathology and Radiology 1.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF with +/- Values

DIASCI 5319 - CLINICAL RADIOLOGY 1

Minimum Credits: 1
Maximum Credits: 1
This course is designed to allow the student to acquire the skills for performing intraoral and panoramic dental radiographic examinations. The student will demonstrate these skills first on mannequins and develop them doing radiographic examinations on patients. The student will also be taught to recognize and correct common imaging and processing errors encountered in dental radiography. The student will also be introduced to other maxillofacial imaging techniques as patient needs permit.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5320 - MANAGEMENT OF DENTAL EMERGENCIES

Minimum Credits: 1
Maximum Credits: 1
In this course, students will learn the principles and procedures for the examination, diagnosis, treatment and documentation of the patient with a dental emergency. Students will be provided with numerous examples of dental emergencies that encompass the various dental disciplines. The goal of this course is to provide students with the foundational knowledge needed to properly evaluate and treat dental emergencies in an expeditious and efficient manner. Students will apply the skills acquired in this didactic course when treating patients during their clinical rotations in the Emergency Care Clinic. This knowledge and experience is intended to help the student manage their patients while in dental school, and after graduation when in a private practice setting. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

DIASCI 5329 - EMERGENCY CLINIC ROTATION 1
Minimum Credits: 1
Maximum Credits: 1
This course will provide the third year dental student with the opportunities to evaluate, diagnose, and manage patients requiring immediate intervention.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5341 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE

Minimum Credits: 1
Maximum Credits: 1
This course will help students develop diagnostic and management skills as they pertain to oral and maxillofacial pathology by building on the basic knowledge acquired in systemic and oral pathology. This course will focus on the recognition, description and management of clinical and radiographic entities which is encountered by general dentists. The course format will be clinical-pathologic correlations (CPCS) seminars. The students will be provided with cases to review.

Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: ABCF with +/- Values

DIASCI 5359 - CLINICAL RADIOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
This course is designed to allow the student to acquire the skills for performing intraoral and panoramic dental radiographic examinations. The student will demonstrate these skills first on mannequins and develop them doing radiographic examinations on patients. The student will also be taught to recognize and correct common imaging and processing errors encountered in dental radiography. The student will also be introduced to other maxillofacial imaging techniques as patient needs permit.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5369 - EMERGENCY CLINIC ROTATION 2

Minimum Credits: 1
Maximum Credits: 1
This course will provide the students the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5373 - RADIOLOGY, IMAGING AND INTERPRETATION 2

Minimum Credits: 1
Maximum Credits: 1
In this course, students will build on the concepts addressed in the anatomy, dental anatomy, oral surgery, oral pathology, and radiology courses taken previously. This course follows DIASCI 5241, (Radiology, Imaging and Interpretation 1), a basic interpretation course which focused on selection criteria to appropriately prescribe radiographs and the identification of the most clinically relevant radiographic pathology (including caries, periodontal conditions, cysts, tumors, systemic conditions, and fibro-osseous conditions). This course is designed to familiarize students with technological advancements in the field of radiology. Application of those advancements to the appropriate prescription of radiographs in a clinical setting will be addressed. Small group interpretation exercises will be implemented throughout the course to aid student learning. The pathology component of the cases will help students develop an understanding of the disease process and correlate disease with radiographic findings. Students will develop an understanding of the various disease processes of the head and neck and will develop skills to prescribe the appropriate imaging technique for further analysis of the disease process. This course will also serve as a review of radiographic features of intraoral pathology, basic imaging principles, and their applications for the National Board Dental Examination (NBDE) Part II. The course includes lecture, class discussions, and small group interpretation exercises.
DIASCI 5388 - CLINICAL RADIOLOGY 3

Minimum Credits: 1
Maximum Credits: 1
The oral and maxillofacial radiology clinical rotation provides the clinical environment for students to become competent in the technical and clinical aspects of radiographic procedures. Acquisition of radiographs and critiquing will constitute the bulk of this course. In addition, students will be required to acquire at least 5 panoramic or other extra-oral radiographs by the end of the term.

DIASCI 5389 - CLINICAL EMERGENCY 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of emergency dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with emergent needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with emergent dental needs.

DIASCI 5419 - EMERGENCY CLINIC ROTATION 4

Minimum Credits: 1
Maximum Credits: 1
This course will provide the fourth year dental student with additional opportunities to evaluate, diagnose, and manage patients requiring immediate intervention in a more self-guided environment.

DIASCI 5459 - CLINICAL RADIOLOGY

Minimum Credits: 3
Maximum Credits: 3

DIASCI 5469 - CLINICAL EMERGENCY 2

Minimum Credits: 2
Maximum Credits: 2
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.

DIASCI 5877 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

**DIASCI 5900 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 3
This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in dentistry.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

**DIASCI 5911 - DENTAL EMERGENCY SELECTIVE**

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

**DIASCI 5912 - DIAGNOSIS & PHARMACOLOGICAL MANAGEMENT OF OROFACIAL PAIN**

Minimum Credits: 1
Maximum Credits: 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

Digital Studies and Methods

DSAM 3000 - DIGITAL STUDIES AND METHODS: SEMINAR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

This seminar addresses the relationships between digital computing and the humanities and allied social sciences, both as a subject of both historical interest and contemporary practical concern. We engage in ongoing theoretical discussions but also fully engage with what it takes to implement interpretive research in the digital environment. Students leave this class having gained a personally significant understanding of current debates in the field of digitally-oriented interpretive research as well as having built a digital project of their own. This course serves as one of the core requirements for the graduate certificate in digital studies and methods.

DSAM 3100 - DIGITAL STUDIES AND METHODS: PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
This course provides a studio-based, semi-structured learning environment in which students focus exclusively on producing and sharing their own, more advanced, work using digital computing within the context of the humanities and allied social sciences. In this practicum, the students begin to
investigate more fully the particular digital tools and methods that seem most promising to their longer-term research agenda. It is designed as a collaboration with the university library system, co-led by and taught in digital scholarship services. This course serves as one of the core requirements for the graduate certificate in digital studies and methods.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**DSAM 3200 - DIGITAL STUDIES AND METHODS: CAPSTONE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course, which serves as the final required course for the graduate certificate in digital studies and methods, will require three major efforts on the part of the student. First, the student will undertake (or substantially add to) a large-scale, independent research project that reflects the mindful use of digital technologies in their field of research that contributes meaningful scholarly knowledge. Second, they will produce an annotated portfolio of the work that they have done during the DSAM certificate that also includes methodological reflections on the use of digital methods in the humanities and allied social sciences. Finally, they will present this portfolio and their capstone work at the end of the term in a DSAM showcase.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**DSAM 3999 - DIRECTED STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
This course allows students to work on individual digital projects under the direction of a faculty advisor. This course requires instructor approval and is used only in exceptional circumstances for the graduate certificate in digital studies and methods.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**East Asian Languages & Literature**

**EAS 2000 - RESEARCH AND THESIS MA DEGREE**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Preparation of thesis.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Attributes:** Asian Studies

**EAS 2005 - APPROACHES TO EAST ASIA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will center on how to use library materials for research on China and Japan. Students will be trained in bibliography, library techniques, and the use of text and reference works for East Asian studies. Students will also be encouraged to familiarize themselves with the range of new technologies available for advanced level research, including library databases and internet resources.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Asian Studies
EAS 2701 - READING JAPANESE 1

Minimum Credits: 3
Maximum Credits: 3
This course represents the first part of a two-course sequence (with EAS 2702) designed specifically to deepen the student's understanding and skills in reading written Japanese. Students must have a knowledge of the characters used in Japanese to at least the 4th year level in the departmental sequence. The course will be taught in English.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

EAS 2702 - READING JAPANESE 2

Minimum Credits: 3
Maximum Credits: 3
A continuation of EAS 2701. Students will continue to develop reading skills by reading a variety of literature relevant to their fields of research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

EAS 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
The student undertakes a course of study under the direct supervision of a department faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

EAS 2990 - INDEPENDENT STUDY

Minimum Credits: 3
Maximum Credits: 3
Individual study under the guidance of a department faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Attributes: Asian Studies

Economics

ECON 2000 - THESIS AND RESEARCH MA DEGREE

Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ECON 2020 - INTRO TO ECONOMETRIC THEORY
Minimum Credits: 3
Maximum Credits: 3
This course covers elements of inferential statistics necessary for the study of econometric theory. It emphasizes estimation theory and its applications. Illustrations are drawn from several areas of economics. Students are expected to understand the theory of statistical inference mathematically as well as intuitively when applied to economic problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)

ECON 2100 - ADVANCED MICROECONOMIC THEORY 1

Minimum Credits: 3
Maximum Credits: 3
Theories of consumer behavior, producer behavior, market equilibrium, industry structure.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)

ECON 2110 - ADVANCED MACROECONOMIC THEORY 1

Minimum Credits: 3
Maximum Credits: 3
The course covers the comparative static approach to macroeconomics. The objectives include both an understanding of past and recent literature on theory and empirical evidence.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)
Course Attributes: Global Studies

ECON 2120 - ADVANCED MICROECONOMIC THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This course will present the Arrow-Debreu-McKenzie Theory of competitive equilibrium, the theory of imperfect competition, and economics of uncertainty. The presentation will be self-contained, including a discussion of the mathematical techniques used. As time permits, special topics will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

ECON 2130 - ADVANCED MACROECONOMIC THEORY 2

Minimum Credits: 3
Maximum Credits: 3
The first part of the course will be devoted to studying models of economic growth and the role money plays in the growth process. The second part of the course will consist of an introduction to the macro-economic rational expectations literature. Both theoretical as well as empirical contributions will be surveyed and discussed in this area.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies
ECON 2150 - GENERAL ECONOMETRICS

Minimum Credits: 3
Maximum Credits: 3
Surveys standard econometric models, their estimation, hypothesis testing and other inferential problems of, among others, (1) classical linear regression, (2) generalized linear regression models, including sur an pooled regression models, (3) dynamic models with spherical and nonspherical errors, (4) qualitative and limited dependent variable models, (5) simultaneous equations models--static and dynamic, (6) use and analysis of econometric models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2170 - EMPIRICAL METHODS 2

Minimum Credits: 3
Maximum Credits: 3
This course will cover methods to cope with selection bias and external validity (e.g.: imperfect IV, plausibly exogenous IV, weighting matrix), decomposition methods, multiple hypothesis testing, methods for spatial analysis (ARGIS), causal mediation analysis, an introduction to machine learning and big data in economic research, discrete choice models and dynamic choice model applications. Many examples will come from development, health, labor, public economics, and political economy, but the material will be useful to any applied researcher. The course will focus also on the implementation of econometric techniques learning the basic tools of programming and coding. We will use STATA, ARCGIS, R, and Matlab. The goal of this class is to provide students with the tools needed to become critical readers of empirical work and teach them techniques that they can apply to their own original research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2230 - PUBLIC ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This is a survey course of topics in public finance. The purpose is to acquaint students with a broad range of classical and contemporary issues in public finance. The course will be divided into several topic areas; taxation; expenditure analysis; economics of political processes; control of externalities; regulation; and fiscal federalism.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2250 - INDIVIDUAL RESEARCH

Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

ECON 2260 - ADVANCED ECONOMETRICS 1

Minimum Credits: 3
Maximum Credits: 3
This course is the first of two courses in the graduate advanced econometrics field. It consists of an introduction to the econometric analysis of time series. Topics include: Exogeneity and causality; Likelihood inference (estimation and testing); Monte Carlo simulation; Optimization; Stationarity; VAR, MA and ARMA processes; Dynamic equations; Multipliers; Unit roots; Cointegration; Error Correction Mechanisms (ECMs); Dynamic state space models; Kalman filter, Sequential importance sampling and particle filters.
Academic Career: Graduate
ECON 2320 - TOPICS IN URBAN AND ENVIRONMENTAL ECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
The first portion of the course is devoted to examining the allocation of resources within and between urban areas. The second portion of the course examines the relationship between this resource allocation and various urban problems including poverty, discrimination, housing, transportation, and urban public finance.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2400 - LABOR MARKET ANALYSIS 1

Minimum Credits: 3  
Maximum Credits: 3  
This course covers topics in areas of labor economics such as: labor supply; household production and labor force participation; labor demand; minimum wages; schooling and earnings; human capital externalities; wage inequality, and skilled biased technological change. The purpose of the sequence (this course and econ 2410) is to familiarize students with the economic models and empirical strategies used in the labor economics literature, and teach them to critically analyze empirical research in preparation of doing their own applied work. By the end of the course, students should have the background necessary to start developing their own independent research interests in the field.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2410 - LABOR MARKET ANALYSIS 2

Minimum Credits: 3  
Maximum Credits: 3  
This course covers topics in areas of labor economics such as: immigration; labor market discrimination; compensating wage differentials; incentives, effort and monitoring; efficiency wages; and the economics of marriage and childbearing. The purpose of the sequence (econ 2400 and this course) is to familiarize students with the economic models and empirical strategies used in the labor economics literature, and teach them to critically analyze empirical research in preparation of doing their own applied work. By the end of the course, students should have the background necessary to start developing their own independent research interests in the field.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2450 - ECONOMIC HISTORY

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the economic history of the United States from European settlement up to the recent past. Topics covered will include: the origins of American industrial growth; the political economy of the constitution and constitutional ratification; economic and environmental change; the welfare effects of industrialization; the industrial organization of the great trusts, such as standard oil and American tobacco; the sources and consequences of regulatory change; and the great depression and the new deal. The course will train students in the tools and methods of the economic historian. In this way, the course will consider a wide body of theory and empirical tools that can be applied to the study history and historical change. The course readings will be mix of old classic articles and more recent work.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2510 - INTERNATIONAL FINANCE
Minimum Credits: 3
Maximum Credits: 3
Rigorous survey of the theory of international finance, the applications to international economic policy. Assumes thorough knowledge of micro and macroeconomic theory at the graduate level, and some acquaintance with mathematical techniques. Topics covered include: balance-of-payments adjustment under various change-rate regimes; theory of economic policy in an open economy; international capital movements; the monetary approach to the balance of payments; and empirical evidence on many of the above topics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2530 - ECONOMIC DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
A comprehensive survey of the major analytical literature of development economics. Covers approaches to and theories of development; dualistic models of the development process; the impact of the international economy; and development planning. Both major theoretical literature and empirical findings in each area are covered. Primary focus will be on the analytical techniques and literature, though some time will be spent on discussion of researchable topics in the area.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2540 - GROWTH & POLICY MODELS OF ECON

Minimum Credits: 3
Maximum Credits: 3
For students interested in the more formal mathematical approaches to economic development and to related quantitative methods for planning and decision making. Topics will include applications of growth theory, input-output analysis, linear programming, computable general equilibrium, and project analysis in a development context. Problem exercises will be assigned.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2701 - GREEN INFRASTRUCTURE IMPLEMENTATION: A CASE STUDY OF THE PITTSBURGH REGION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to exercise the student's academic knowledge, passions, and skills to facilitate real-world problem solving in a collaborative setting. It will improve the students' skills in these areas: analytical; collaborative work; project management; communication; experimentation; and decision analysis. Differences in baseline skills and interests will be recognized in assignments and grading.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2710 - EMPIRICAL METHODS II

Minimum Credits: 3
Maximum Credits: 3
This course will cover cutting-edge methods typically used in applied micro-economic research and it is designed to help you learn how to apply the econometric techniques learned in the econometrics sequence. It is a natural prosecution of the empirical methods class. The course will cover methods for spatial analysis introducing students to the use of ArcGIS for applied microeconometric research. Furthermore, it will introduce students to scraping and data mining techniques using Python and R. The goal of this class is to provide students with the tools needed to become critical readers of empirical work and teach them techniques that they can apply to their own original research.
Academic Career: Graduate
ECON 2730 - SEMINAR EXPERIMENTAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
There is a small, but rapidly growing literature in which behavioral experiments are used to test central propositions of various economic theories. This course will review the experimental literature that exists in several areas of economics, including industrial organization, social choice and preference revelation, behavior of decentralized markets and bargaining. A number of experiments will be replicated. Students will be expected to design their own experiments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2801 - COMMUNICATING ECONOMIC INSIGHTS

Minimum Credits: 3
Maximum Credits: 3
Communicating Economic Insights helps students develop written and oral communication and presentation skills essential for career success. Students practice writing documents for a variety of professional audiences, collaborative writing as well as multi-author revising skills. Students also learn presentation skills to enhance clear communication of ideas. Written and oral skills will emphasize the importance of one's audience as it determines style, tone, organization, and depth of concepts.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2811 - INDIVIDUALS, FIRMS, AND MARKETS

Minimum Credits: 3
Maximum Credits: 3
Individuals, Firms, and Markets provides a rigorous introduction to contemporary microeconomic theory, with a focus on optimization techniques, the development of modeling skills and critical thinking strategies needed to understand and evaluate a wide variety of economic contexts. Topics covered include consumer and producer theory, decision making under uncertainty, choice over time, welfare analysis, competitive markets, monopoly, externalities, and public goods. The course stresses application of theory to economics and business problems, and a substantial amount of class work is devoted to examining scenarios based on such problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2812 - INCENTIVES AND INFORMATION

Minimum Credits: 3
Maximum Credits: 3
Incentives and Information are central to modern economics, and this course studies the question of how individuals and firms respond to incentives. These incentives are shaped, in large part, by the information possessed by each relevant party. In this course we study how such informational issues can lead to market inefficiencies, and what can be done to exploit or combat them. How should a seller design an auction, or the products available, to extract as much revenue as possible from buyers? How can firms design compensation schemes to get efficient effort from employees? What are the limits of what can be achieved through regulation? Students will learn how to address these and other similar questions using rigorous economic tools.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2813 - GLOBAL ECONOMICS AND FINANCE

Global Economics and Finance presents the main topics in modern macroeconomics and touches important questions in international economics and finance. Among the first set of topics, the course covers economic growth and business cycles, unemployment and labor market frictions, inequality, nominal frictions and monetary policy, and fiscal policy. The course also studies international linkages, including global imbalances, capital account sustainability, international capital market integration, international trade, nominal and real exchange rate determination, external debt, and the relationship between inequality and international trade.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2814 - EVIDENCE-BASED ANALYSIS IN LABOR, PUBLIC AND HEALTH ECONOMICS**

Evidence-Based Analysis in Labor, Public and Health Economics affords an opportunity for students to further develop their MQE toolkits through exposure to both seminal and frontier applied research on a diverse set of topics such as education, environmental sustainability, the non-profit sector and employment compensation. In addition to reviewing extant applied research, students will hone their own analytical approach working both individually and in groups to apply economic thinking and analysis to a broad set of business and policy problems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2821 - QUANTITATIVE METHODS**

Quantitative Methods presents a framework for data-driven decision making under conditions of uncertainty and partial information, and it covers data analysis methods and techniques used in economic applications. The class will use R throughout; among the topics covered are graphical and descriptive data analysis, conditional probability, random variables, distribution functions, sampling, estimation, confidence intervals, hypothesis testing, and an introduction to regression methods.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2822 - ECONOMIC INFERENCE FROM DATA**

Economic Inference from Data provides hands-on experience with applied econometric methods, allowing the student to establish empirical relationships of cause and effect. The course will cover advanced methods in regression analysis as well as a full toolkit of quasi-experimental methods that will allow the study of causal relationships even in the absence of a randomized control trial. The course includes hands-on empirical applications to solidify the concepts, with many examples from business and public policy settings. It will also focus also on learning the basic tools of programming and coding in R.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2823 - APPLICATIONS OF ECONOMIC ANALYSIS TECHNIQUES**

Applications of Economic Analysis Techniques moves beyond ordinary regression to look at more-specialized models and data that are important to economists. The course expands students' knowledge of econometric methods to account for qualitative and selected dependent variables via maximum likelihood, and presents more structured estimation models. Throughout, the focus is on building students' experience with more advanced techniques, both for estimation and inferences; their understanding of the methods' pros and cons of these methods; and, importantly, how best to
Big Data and Forecasting in Economics covers cutting-edge methods typically used in statistical learning and is designed to help students learn how to apply the econometric techniques learned in the previous courses in big data environments. The course introduces students to machine learning, text learning analysis, as well as scraping and data mining techniques using R. Some methods encountered in this course are classification, resampling, regularization, tree-based methods, supporting vector machines, deep learning, and unsupervised learning.

Data Design for Economic Applications (Capstone) helps students formulate questions that are critical for an organization and then, guided by economic theory, deliver informative answers using data. The first portion of the course rounds out the data science toolbox of students by training them in techniques for data creation, including survey design and the design and implementation of randomized control trials. The second portion of the course provides students with examples of problems facing real organizations, so they can apply what they have learned in the MQE program, working in groups to identify questions, analyze data, and present results.

Intensive mathematics preparation for first year Ph.D. students.

This course introduces the key mathematical tools needed to do economic research: static and dynamic optimization, fixed point theorems, differential equations among others.

This course covers elements of inferential statistics necessary for the study of econometric theory. It emphasizes estimation theory and its
applications. Illustrations are drawn from several areas of economics. Students are expected to understand the theory of statistical inference mathematically as well as intuitively when applied to economic problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3030 - MICROECONOMIC THEORY 1

Minimum Credits: 3
Maximum Credits: 3
Theories of consumer behavior, producer behavior, market equilibrium, industry structure.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3040 - MACROECONOMIC THEORY 1

Minimum Credits: 3
Maximum Credits: 3
Introduction to dynamic macroeconomic theory with emphasis on dynamic optimization, dynamic competitive equilibria, and solution methods for dynamic models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3050 - ECONOMETRIC THEORY 2

Minimum Credits: 3
Maximum Credits: 3
Surveys standard econometric models, their estimation, hypothesis testing and other inferential problems of, among others, (1) classical linear regression, (2) generalized linear regression models, including sur and pooled regression models, (3) dynamic models with spherical and nonspherical errors, (4) qualitative and limited dependent variable models, (5) simultaneous equations models--static and dynamic, (6) use and analysis of econometric models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3060 - MICROECONOMIC THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This course will present the Arrow-Debreu-McKenzie Theory of competitive equilibrium, the theory of imperfect competition, economics of uncertainty, and game theory. The presentation will be self-contained, including a discussion of the mathematical techniques used.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3070 - MACROECONOMIC THEORY 2

Minimum Credits: 3
Maximum Credits: 3
The first part of the course will be devoted to studying models of economic growth and the role money plays in the growth process. The second part of the course will consist of an introduction to the macro-economic rational expectations literature. Both theoretical as well as empirical contributions will be surveyed and discussed in this area.
Academic Career: Graduate
ECON 3080 - EMPIRICAL METHODS

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover empirical methods typically used in applied microeconomic research and it is designed to help you apply the techniques learned in the econometrics sequence. We will focus on techniques used in applied microeconomics to identify causal estimates. The course will cover data issues and distributional estimators in some detail along with matching and propensity scores, local regressions, instrumental variables, regression discontinuity designs, and inference issues. Many examples will come from development, health, labor, public economics, and political economy, but the material will be useful to any applied researcher. The course will focus also on the implementation of econometric techniques learning the basic tools of programming and coding. The goal of this class is to provide students with the tools needed to become critical readers of empirical work and teach them techniques that they can apply to their own original research.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 3100 - SEMINAR IN MICROECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
This is a seminar in microeconomic theory and analysis. Speakers from outside and inside the university will present state of the art research in microeconomic theory.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ECON 3110 - SEMINAR IN MACROECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
This is a seminar in modern macroeconomic theory and analysis. Speakers from outside and inside the university will present state of the art research in macroeconomics.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ECON 3120 - SEMINAR IN EXPERIMENTAL AND BEHAVIORAL ECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
There is a small, but rapidly growing literature in which behavioral experiments are used to test central propositions of various economic theories. This course will review the experimental literature that exists in several areas of economics, including industrial organization, social choice and preference revelation, behavior of decentralized markets and bargaining. A number of experiments will be replicated. Students will be expected to design their own experiments.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ECON 3140 - SEMINAR IN LABOR AND DEVELOPMENT ECONOMICS

Minimum Credits: 3  
Maximum Credits: 3  
This is a seminar in labor and development economics. Speakers from outside and inside the university will present state of the art research in labor and development economics.
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  

ECON 3160 - ECONOMETRICS SEMINAR  
Minimum Credits: 3  
Maximum Credits: 3  
Advanced topics in econometrics. Each student is assigned a special topic and is asked to present research results.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  

ECON 3210 - TEACHING ECONOMICS  
Minimum Credits: 1  
Maximum Credits: 1  
A required course for newly appointed ta/tfs in economics. The object is to develop teaching skills that are essential for effective communication between instructor and college students in economics. Theory and pedagogy, as well as practicum and demonstrations are part of this course.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad SN Basis  

ECON 3220 - RESEARCH METHODS IN ECONOMICS  
Minimum Credits: 1  
Maximum Credits: 1  
This is a mandatory course for second-year PhD students. The course will introduce students to strategies for identifying interesting research ideas, to determine whether the idea is worth pursuing, to effectively review the literature, and to plan how to conduct the research. Insights into how these strategies change across fields within economics will be provided by relevant faculty guests. Other topics discussed in the course will include the typical difficulties involved in conducting research and how to address them; how to deal with advisors; academic etiquette; techniques for presenting work in progress at seminars; and how to write and submit academic papers. Requirements will include the drafting of the second-year paper proposal (PhD Comprehensive Research Paper) and the selection of two faculty readers.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

ECON 3310 - TOPICS IN URBAN ECONOMICS  
Minimum Credits: 3  
Maximum Credits: 3  
The course will introduce students to the fundamental papers and concepts in spatial economics.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

ECON 3320 - TOPICS IN ENVIRONMENTAL ECONOMICS  
Minimum Credits: 3  
Maximum Credits: 3  
The first portion of the course with focus on empirical attempts to quantify the damages of air pollution and climate change. The second portion of the course will focus on quantitative analysis of policies to mitigate pollution in the developed and developing world.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
ECON 3330 - TOPICS IN ECONOMIC HISTORY

Minimum Credits: 3
Maximum Credits: 3
This course explores the economic history of the United States from European settlement up to the recent past. Topics covered will include: the origins of American industrial growth; the political economy of the constitution and constitutional ratification; economic and environmental change; the welfare effects of industrialization; the industrial organization of the great trusts, such as standard oil and American tobacco; the sources and consequences of regulatory change; and the great depression and the new deal. The course will train students in the tools and methods of the economic historian. In this way, the course will consider a wide body of theory and empirical tools that can be applied to the study of history and historical change. The course readings will be a mix of old classic articles and more recent work.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3340 - TOPICS IN PUBLIC ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This is a survey course of topics in public finance. The purpose is to acquaint students with a broad range of classical and contemporary issues in public finance. The course will be divided into several topic areas: taxation; expenditure analysis; economics of political processes; control of externalities; regulation; and fiscal federalism.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3400 - APPLIED MICROECONOMIC SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The primary aim of this course is to introduce Ph.D. Students to a sampling of the current professional research in various applied microeconomics fields such as labor economics, health economics, public finance, industrial organization, development economics or political economy. Students learn and critically analyze the range of empirical approaches used to study topics within these areas, in preparation of doing their own applied work. This course requires attendance to the joint CMU/Pitt applied microeconomics workshop, where renowned guest speakers will be presenting their current working papers.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 3410 - TOPICS IN LABOR ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This course covers topics in areas of labor economics such as: labor supply; household production and labor force participation; labor demand; minimum wages; schooling and earnings; human capital externalities; wage inequality, and skilled biased technological change. The purpose of the sequence (this course and econ 2410) is to familiarize students with the economic models and empirical strategies used in the labor economics literature, and teach them to critically analyze empirical research in preparation of doing their own applied work. By the end of the course, students should have the background necessary to start developing their own independent research interests in the field.

Academic Career: Graduate

ECON 3420 - LABOR DEVELOPMENT SEMINAR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
**ECON 3430 - TOPICS IN LABOR AND HEALTH ECONOMICS**

**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will cover frontier applied work in labor and health economics with a particular focus on the economics of family, economic behavior related to children, child health and child economic and social well-being, and the economics of risky health behaviors. The first part of the course will be focused on the economics of family and children. The second part of the course will be focused on health capital emphasizing the long-run effects of health at birth, the economic models of determinants of health, and the economics of risky health behaviors. The course will cover a range of different methods from structural analysis of marriage markets and health investments to reduced-form analysis of policy interventions, and experimental work. We will also explore the recent use of machine learning methods in these domains. There will be data-intensive hands-on sessions devoted to the replication of some of the key studies in the literature.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3440 - TOPICS IN DEVELOPMENT ECONOMICS**

**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces topics at the frontier of development economics. Lectures and readings will review empirical methods, some seminal papers and current open questions in the field. The goal is for students to learn how to (1) identify gaps in the existing literature, (2) design and implement valid identification strategies, and (3) interpret empirical findings. The first half of the course covers micro-based issues including health and education; credit and savings; labor markets; and behavioral development economics. The second half takes a micro-macro approach and studies long run persistence of bad and good institutions; the impact of social media in autocracies on growth and corruption; quantifying the value and impact of political connections; and the functioning and impact of state-owned firms.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3500 - INTERNATIONAL ECONOMICS SEMINAR**

**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Global Studies

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The seminar will be used to promote student and faculty research, especially doctoral dissertations.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Global Studies

**ECON 3520 - COMPARATIVE & DEVELOP ECON SEM**

**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The seminar will focus on the most recent theoretical and empirical studies that are being carried out by specialists in these areas. It will consist of presentations both by the university of Pittsburgh and outside faculty.  
**Academic Career:** Graduate  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis

**ECON 3610 - EXPERIMENTAL AND BEHAVIORAL ECONOMICS 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3
The course is designed to familiarize the student with experimental methodology and the range of application of experimental methods in economics. Students will devise and execute (in consultation with the instructor) a "pilot" experiment in a substantive area of interest. This can be done in small groups of 2 or 3 or be a solo project. The object is to provide hands-on experience in conducting an economics experiment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3620 - EXPERIMENTAL AND BEHAVIORAL ECONOMICS 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course is designed to familiarize the student with current experimental research in various economic topics. Students will work together with the instructor on an experiment from design to implementation to data analysis to write. The objective is to provide hands-on experience with conducting economic experiments and writing a publishable paper.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3660 - ADVANCED ECONOMETRICS 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Covers qualitative choice models, censored and truncated models, duration models, time series models - univariate and multivariate, causality analysis, dynamic models, cointegration, time series macroeconometrics.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3710 - TOPICS IN MICROECONOMIC THEORY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an advanced level course in microeconomic theory. It deals with a broad range of topics, some drawn from recent papers, chosen to prepare students to tackle the literature on their own.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3720 - POLITICAL ECONOMY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course, we will take a formal look at various environments where a group of individuals (committee, society, congress, etc) takes a binding decision through some institutional mechanism (consensus, elections, jury deliberations, legislative bargaining etc). The course will have a strong formal, positive focus on how the varied political, social and legal institutions that define the 'rules' of collective decision-making determine the nature of collective outcomes. On the normative side, the course would focus on certain 'desirable properties' (e.g. Respecting minority preference) of collective decision-making and analyze whether and to what extent the existing institutional arrangements satisfy such properties. While we shall start out using concepts of co-operative game theory, for most part of the course we will be in the realm of non-cooperative game theory. This course will provide a starting point for research in formal political theory and political economy. As such, it might be of interest to students of both economics and political science.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 3750 - TOPICS IN MACROECONOMICS**
A field course designed to initiate original research projects in areas categorized under the broad heading of macroeconomics. Students select an area in which to specialize (asset pricing theory, growth theory, business cycle theory, etc.). And present one to three lectures summarizing the literature in the area. A short reading list of seminal papers in the area would be provided for the class to follow. Students begin an original research project to be presented at the end of the term, and to be summarized in a paper.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Attributes:** Global Studies

**ECON 3810 - COMPUTATIONAL METHODS ECONOMICS**

This class is intended to familiarize Ph.D. students with numerical methods to solve economic models. Topics covered depend on instructor. Example topics include approximation methods, fixed point problems, solving functional equations like dynamic programs, Monte Carlo methods. Such methods are used in differentiated product models in industrial organization, political economy models in macroeconomics, and dynamic private information models. Heavy use is made of the computer.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**ECON 3820 - INTERNATIONAL TRADE**

This course is a rigorous introduction to the pure theory of international trade. The material requires a background in microeconomic theory.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**ECON 3830 - SPECIAL TOPICS**

Current topics of particular interest to economics graduate students are discussed and analyzed.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**ECON 3900 - COMPREHENSIVE PREPARATION**

Graduate students pursue study independently to prepare for comprehensive examinations.

**Academic Career:** Graduate

**Course Component:** Independent Study

**Grade Component:** Grad SN Basis

**ECON 3902 - DIRECTED STUDY**

Students pursue study or research under the direct supervision of a faculty member.

**Academic Career:** Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ECON 3950 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

ECON 3990 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 12
Graduate students pursue study or research under the supervision of faculty.
Academic Career: Graduate

Education

EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course focuses on those areas of development and learning which have relevance for educators. The course covers preschool through old age. For each age range, typical behaviors and competencies that are learned or developed are considered from a number of domains (cognitive, affective, psychomotor, social). Attention is also given to appropriate research methods. An interactionist perspective is utilized; the course may be team taught.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2003 - RESEARCH METHODS IN EDUCATION POLICY AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course presents psychological theory, research and analytical methods applicable to the variety of settings in which adults learn and to the variety of objectives adults have for learning. The roles of memory, prior knowledge and self-regulated learning in these and other task domains are considered. Students should emerge with an understanding of how to analyze what is involved in selected domains of learning and how to identify the more important questions for research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2007 - HUMAN LEARNING

Minimum Credits: 3
Maximum Credits: 3
Presents an overview of theories and of kinds of learning that educational professionals should know. Also considered are recent developments in cognitive psychology, such as information processing and knowledge-based approaches in transition from novice to expert, and from poorly to well adjusted states.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2008 - CONCEPTION TO EARLY CHILDHOOD

Minimum Credits: 3
Maximum Credits: 3
Focuses on developmental pathways from conception through early childhood within contexts of family, daycare/school, community and culture. Pathways are considered with regard to developmental changes in transactions between individuals and social life conditions, with focus on patterns of change in participation in social-cultural practices. Besides a review of current literature, students will be engaged in qualitative investigations of the social lives of young children.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/adolescence

Minimum Credits: 3
Maximum Credits: 3
Course focuses on developmental pathways from middle childhood through adolescence (ages 7-18) within the contexts of family, school, community and culture. Pathways are considered in regard to developmental changes in transactions between individuals and social life conditions, with regard to patterns of change in participation in social cultural practices. Students will be engaged in qualitative investigations of the social lives of children and adolescents.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2011 - CULTURALLY RESPONSIVE PEDAGOGY

Minimum Credits: 3
Maximum Credits: 3
The course, culturally responsive pedagogy, introduces students to theory, research, and especially practice related to developing and enacting curriculum and instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers develop meaningful relationships with students, how teachers learn from and about a school and local community, how teachers develop and implement culturally responsive classroom management, and how teachers develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as mathematics, science, art, language arts, and social studies). A recurrent and central question of the course is: how do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students learning opportunities?

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

EDUC 2046 - SPECIAL TOPICS-THE URBAN ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with an introduction to the social, historical, and political factors shaping urban life and communities in the united states. The course is primarily, but by no means exclusively, intended for education students and is designed to help students develop a more sophisticated understanding of the contexts in which urban education occurs and the relationship between urban processes and urban education. More specifically, the course will focus on the history of cities, including 20th and 21st century urban transformation, the development and persistence of residential segregation, urban poverty, the criminalization of urban communities, immigration, and trends in theory and practice around urban redevelopment. In all cases, we will consider the implications for urban families, communities, and schools.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
EDUC 2088 - URBAN EDUCATION REFORM

Minimum Credits: 3
Maximum Credits: 3
The course is designed to provide both a background understanding of urban education, as well as expose students to particular urban education reforms. Students will examine selected historic and contemporary reform efforts in education, in particular studying the theories of change, implementation challenges and critiques associated with these different reforms as they apply to urban districts and schools. We will look at the theoretical underpinnings of particular reforms, as well as why education policies have succeeded or failed, and the consequences of these outcomes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2089 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 12
An experimental course with a flexible curriculum oriented to special research topics or current issues of concern to educators. Topics vary.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2100 - EDUCATION AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
The course focuses on the interaction between educational institutions and their social context. Situated in the field of study known as social foundations of education, the content reflects disciplinary methods in the examination of such policy issues as the role of the schools in social change, the influence and consequences of formal and non-formal educational forces, and the economics and politics of school reform efforts. Students are challenged to consider the relationships between culture and power and the value-laden character of all educational endeavors. Thus the role of schooling is considered in cultivating the habits necessary for democratic citizenship which include ongoing efforts to secure equitable and just social relations, and to advance the common good.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

EDUC 2102 - HISTORY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Both a chronological order and a thematic/conceptual investigation will constitute the structure of this course by juxtaposing past and contemporary historical developments. Emphasis will be placed on the ideas that prevailed in different time periods. Conflicting organizational arrangements, competing theories, and growing external pressures in different eras will be traced and analyzed in order to develop an educational historiography.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2103 - RACE AND RACISM IN EDUCATION AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues of equity in education based upon the divisions of American society by social constructs of "race". The course is designed to expose students to conceptual frameworks of culture, society, race, class and gender from the social sciences and humanities for understanding the experiences of subordinated minority groups in school and society. The practical problems of social and school reform in American communities and schools will be addressed.
Academic Career: Graduate
EDUC 2105 - SOCIETY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
An analysis of the development of modern social institutions with special reference to the sociology of the schools. The school is studied as a social system and in the context of broad social organization.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2106 - EDUCATION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
The active experiences in the course are intended to challenge students to investigate and analyze the dynamic relationship between schooling, education, popular culture and society by addressing the normalizing effects of cultural narratives and images that influence our taken-for-granted assumptions, beliefs and actions. Class activities involve considering the moral, social and political dimensions of our educational practice by expanding our sense of what happens outside of schools and classrooms that contribute to shaping our worldviews. We work to better understand the dynamics of culture and the relationships among culture, history, power, language and knowledge. Thus we are challenged to become informed and invigorated professionals that can help reverse the patterns of dehumanization and social control that are often overlooked in the everyday world of practice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

EDUC 2107 - EVIDENCE BASED HEALTH PROGRAM PLANNING

Minimum Credits: 3
Maximum Credits: 3
The course focuses on the roles of schools in responding to the health needs of children in collaboration with the family and community. Examined is how schools and communities compliment and support health and social services needed to overcome the conditions that put a young person at educational risk.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2109 - GENDER IN EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This introductory course provides an overview of anthropological approaches to the study of education. Ethnographic cases drawn from many cultures, knowledge systems, and time periods help to provide a broad, holistic view of education in diverse community and institutional contexts. Modules may include: nurturing a sense of place; comparing folk, popular, and elite cultures; understanding cultural continuity and change; celebrating rituals and holidays; fostering cultural resilience and responsive reform policies; framing multicultural education; and appreciating the sociolinguistics of schools and home. Student's have opportunities to participate in authentic schooling activities, to draft public advocacy pieces, to create team presentations, and to refine a personalized synthesis of a topic of interest. Anthropological field research methods are discussed as a means to craft compelling analytical accounts, but research training is not part of this course
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: African Studies, West European Studies
EDUC 2110 - GENDER AND EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This seminar examines the role that gender plays in the lives as students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in K-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment; gender and the educational professions; feminist and antibias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2112 - POLITICS AND HISTORY OF HIGHER EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course surveys the perennial forces which have shaped the character of America's colleges and universities. Institutional control and governance. Curricular goals and organization, and faculty and student life are examined against the background of political, economic, religious, social, and intellectual developments in American culture.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2200 - DISCIPLINED INQUIRY

Minimum Credits: 3
Maximum Credits: 3
This course deals both with methods used in educational research and with the underlying theories, assumptions, and limitations. Students will do various inquiry activities, including sampling, observation and other data collection activities, as well as critical analysis of literature relevant to an important educational problem. These inquiry activities and study provide a foundation for further study of epistemological issues on which educational research and theory are based.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

EDUC 2205 - FIELD METHODS

Minimum Credits: 3
Maximum Credits: 3
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT

Minimum Credits: 3  
Maximum Credits: 3  
Foundations 1 and Practitioner 1 represent an integrated 6-credit experience that is designed to help you begin your doctoral adventure. The courses provide an understanding of becoming a Scholarly Practitioner and the tools to identify, frame, and consider ways to thoughtfully engage in systematic inquiry focused on important Problems of Practice in education. Practitioner Inquiry focuses on Improvement Science, our signature method in the EdD. At the center of practitioner inquiry is the ability to use data to understand the effects of innovations that seek to improve problems found in practice. It is the process of posing significant questions, using various research, theories, and professional wisdom, and designing innovative solutions to address complex problems of practice.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis

EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER

Minimum Credits: 3  
Maximum Credits: 3  
Foundations 1 and Practitioner 1 represent an integrated 6-credit experience that is designed to help you begin your doctoral adventure. The courses provide an understanding of becoming a Scholarly Practitioner and the tools to identify, frame, and consider ways to thoughtfully engage in systematic inquiry focused on important Problems of Practice in education. Foundations 1 will help you establish your identities as scholarly practitioners and leaders. Scholarly practitioner is defined by the Carnegie Project on the Education Doctorate as one who blends practical wisdom with professional skills and knowledge to name, frame, and solve problems of practice; uses practical research and applied theories as tools for change; addresses problems of practice by collaborating with key stakeholders, including the university, the educational institution, the community, and individuals.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 3003 - FOUNDATIONS 2: LEADERSHIP IN GROUPS AND ORGANIZATIONS

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the leadership of pre-20 institutions, and other educationally-related entities in an environment characterized by socioeconomic, political, technological, and demographic change. It will examine the breadth of leadership theories and styles in education, including traditional, entrepreneurial, behavioral, and relationship-based models. Course participants will learn how to lead system- and institutional-level changes, drawing upon strategic, human resources, financial management, and quality assurance skills. Emphasis is given to leadership models that focus on student-centric solutions, sustainable excellence, equity and social justice within education institutions at all levels.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the leadership of pre-20 institutions, and other educationally-related entities in an environment characterized by socioeconomic, political, technological, and demographic change. It will examine the breadth of leadership theories and styles in education, including traditional, entrepreneurial, behavioral, and relationship-based models. Course participants will learn how to lead system- and institutional-level changes, drawing upon strategic, human resources, financial management, and quality assurance skills. Emphasis is given to leadership models that focus on student-centric solutions, sustainable excellence, equity, and social justice within education institutions at all levels.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

EDUC 3005 - FOUNDATIONS 4: POLICY AS A LEVER FOR CHANGE
Students in this core course will learn the principles of policy development; experience the views of decision-makers about how public policies are created; highlight notable examples of both effective and ineffective policies in education, human services, and healthcare; critically examine policies which are evident in local, national, and international realms for critical examination; and respond to problem-based learning (PBL) scenarios to form and modify real-world examples of policies and regulations in education and related settings; and understand the links among effective policy, leadership, advocacy for children and families, and systems reform.

**Educational Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### EDUC 3006 - PRACTITIONER INQUIRY 2

**Minimum Credits:** 3  
**Maximum Credits:** 3

The course will introduce concepts, tools and methods of quantitative analysis commonly used in research. The course will emphasize real world applications, including data preparation and analysis. Some concepts include: variables and their measurement; measures of central tendency and variability; sampling; tests of statistical significance; causal inference and research design; data reduction; bivariate relationships: correlation and cross-tabulation; multivariate relationships: inference using regression analysis.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### EDUC 3007 - PRACTITIONER INQUIRY 3

**Minimum Credits:** 3  
**Maximum Credits:** 3

The course will introduce approaches, strategies, and practices commonly used in qualitative research. The course will emphasize real world contexts and phenomena. Key areas of study include: researcher perspective, stance and voice. Making use of observations, survey, interviews, focus groups, artifact analysis, and other forms of gathering and using 'data'. Applying various research and analytic strategies such as case study, action research, grounded theory, and thematic analysis. Considering emergent genre of research including narrative study, arts-based research and others.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

**Minimum Credits:** 3  
**Maximum Credits:** 3

This final course in the research series provides students the opportunity to engage in practice-based research with real-world issues and problems of practice. The seminar will begin with the opportunity to review a number of studies representing quantitative, qualitative, and mixed approaches. Students will then collaborate with colleagues pursuing the same and/or similar research methods and approaches through small workgroups. Each small group will be organized to support students in conducting pilot work in the methods/approaches they plan to use for their practice-based dissertation. Student groups will work with advanced PhD students who have expertise in the methods and who will act as a consultant. Students will be expected to finalize their dissertation overview proposal through this course (in conjunction with their Arco advisor and faculty).

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY

**Minimum Credits:** 3  
**Maximum Credits:** 3

Ed.D research seminar is a faculty-led inquiry group focused on developing deep knowledge in an area of interest.

**Academic Career:** Graduate
EDUC 3010 - INTRODUCTION TO THE HISTORY & SOCIAL CONTEXTS OF URBAN EDUCATION

Minimum Credits: 3  
Maximum Credits: 3
In this course, students will develop an introductory and foundational understanding of the dynamics of urban education. The course will address the history of urban life, communities, and schools in the U.S., as well as provide an introduction to policy and practices in the field of urban education. Additionally, the course will take an interdisciplinary approach through readings and activities that are designed to help students establish a basis for lifelong learning through normative and critical reflection on urban education within its historical, philosophical, cultural and social contexts. This includes a focus on the history of cities, including 20th and 21st century urban transformation, the development and persistence of residential segregation, urban poverty, the criminalization of urban communities, and current trends in urban redevelopment, which may shape the future of urban education.
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

EDUC 3011 - PEDAGOGIES AND PRACTICES IN URBAN EDUCATION

Minimum Credits: 3  
Maximum Credits: 3
This course introduces students to theory, research, and especially practice related to developing and enacting curriculum and instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers can develop meaningful relationships with students, how teachers can learn from and about the school and local community, how teachers can develop and implement culturally responsive classroom management, and how teachers can develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as Mathematics, Science, Art, Language Arts, and Social Studies). A recurrent and central question of the course is: How do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students' learning opportunities?
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

EDUC 3012 - LABORATORY OF PRACTICE

Minimum Credits: 3  
Maximum Credits: 3
Students may complete one of three internship experiences: Job-embedded internship: students already working in their field of choice may elect to have their current responsibilities reviewed for eligibility for a full-time job-embedded internship. If the advisor and student agree that the student's current responsibilities represent relevant and meaningful internship experiences, then a plan will be developed that will engage the student in analysis of practice and leadership activities. Aspirant internship: students will have an apprenticeship experience in which they shadow and collaborate with a trained mentor in their discipline. Global studies experience: students will have the opportunity to design an international experience that provides direct observation or experience with practice or policy in another country.
Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad HSU Basis

EDUC 3013 - EDUCATION LAW, POLICY & SCHOOL REFORM

Minimum Credits: 3  
Maximum Credits: 3
The United States is a country built on a foundation of laws, which are supposed to be a system of rules and procedures designed for the common good of our society. Historically, however, the U.S. legal system has not always considered what is good or just for serving all members of society, particularly in education. This course examines the evolution of education laws and policies in the U.S., as well as their influence on school reform efforts pre- and post-Brown v. Board of Education from an equity and social justice perspective. In this course, students will learn to understand the
interplay between the three branches of government - the legislative, executive, and judicial branches - how the U.S. Supreme Court selects education cases, interprets the law, and makes its decisions given the political and social climate of the country. Furthermore, this course studies how the Court's decisions influence school reform policies, with a particular emphasis on urban schools, stakeholders, and society.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 3014 - URBAN SCHOOLS, LAW, & SOCIAL POLICY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the evolution of education laws and policies in the U.S., as well as their influence on school reform efforts, both pre- and post-Brown v. Board of Education, while also examining current empirical research on important topics in educational policy today. In this course, students examine the intersections of law and social policy in the context of contemporary education issues, including finance reform, accountability, school choice, and diversity plans. This course will also examine the effectiveness of specific social policy interventions (e.g., health care reforms, housing vouchers, income transfers, promise neighborhoods, expanded Pre-K) in lowering barriers to academic success in urban areas.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 3015 - CRITICAL PERSPECTIVES IN URBAN EDUCATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines major sociological, historical and philosophical ideas that together constitute the discourse known as "Urbanized Education." The course will provide both an opportunity for rigorous engagement with philosophical and cultural issues in the study of an Urbanized education and society. Through course readings and class discussions, we explore the following: (1) the broader sociopolitical urban context of K-12 schools and the communities they are situated, (2) the possibilities of education as the practice of freedom; and (3) (re)form and (re)imagining urban education. It will also provide a space for personal encounters with the ways in which ideology and culture insinuate themselves into our lives, beliefs, values and emotional being.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**EDUC 3016 - URBAN SCHOOLS AND SOCIAL POLICY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course examines current empirical research on important topics in educational policy today with an explicit focus on the improvement of urban schools. Students will first deepen their understanding of the ways socioeconomic circumstances contribute to persistent and growing gaps in academic outcomes along lines of race and income. Second, this course will evaluate the effectiveness of specific social policy interventions (e.g. healthcare reforms, housing vouchers, income transfers, promise neighborhoods, expanded pre-k) in lowering barriers to low-income children's academic success and narrowing inequities. Finally, students will examine the intersections of inequality, social policy, and contemporary education policy trends, including finance reform, accountability, and school choice and diversity plans.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 3045 - CRITICAL RACE THEORY IN EDUCATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on foundational scholarship, theories and germinal texts that inform critical race theory. By introducing central tenets, principles and tensions, we will provide an historical overview of critical race theory and consider the following interrelated questions: how are racial inequities produced, reproduced, and maintained in education and society? In what ways is critical race theory used as an analytic tool to explain policy, reform, practice and other phenomena? In what ways is critical race theory used as a framework to conceptualize research? Students interested in the
intersections of race, racism, equity, justice and education should find the course useful in helping them conceptualize and develop research projects.

**EDUC 3046 - SPECIAL TOPICS-THE URBAN ENVIRONMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide students with an introduction to the social, historical, and political factors shaping urban life and communities in the United States. The course is primarily, but by no means exclusively, intended for education students and is designed to help students develop a more sophisticated understanding of the contexts in which urban education occurs and the relationship between urban processes and urban education. More specifically, the course will focus on the history of cities, including 20th and 21st century urban transformation, the development and persistence of residential segregation, urban poverty, the criminalization of urban communities, immigration, and trends in theory and practice around urban redevelopment. In all cases, we will consider the implications for urban families, communities, and schools.

**EDUC 3088 - URBAN EDUCATION REFORM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course is designed to provide both a background understanding of urban education, as well as expose students to particular urban education reforms. Students will examine selected historic and contemporary reform efforts in education, in particular studying the theories of change, implementation challenges and critiques associated with these different reforms as they apply to urban districts and schools. We will look at the theoretical underpinnings of particular reforms, as well as why education policies have succeeded or failed, and the consequences of these outcomes.

**EDUC 3089 - SPECIAL TOPICS**

**Minimum Credits:** 3  
**Maximum Credits:** 12  
An experimental course with a flexible curriculum oriented to special research topics or current issues of concern to educators. Topics vary.

**EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE**

**Minimum Credits:** 1  
**Maximum Credits:** 15  
Students will enact an applied inquiry plan and write a report of the enactment under the supervision of a research advisor. The report becomes the basis for a culminating demonstrations of excellence for the doctor of education degree.

**EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar prepares students to conduct descriptive and inferential statistics about a population using data collected under complex survey design. The emphasis throughout the course is on real world data preparation and analysis using the SPSS/STRATA/SAS statistical software package.
EDUC 3102 - FIRST YEAR SEMINAR 1

Minimum Credits: 1
Maximum Credits: 1
This seminar addresses professional issues germane to doctoral skills and competencies. Topics addressed in the seminar include guidelines for constructing a literature review, IRB requirements, ethical and legal issues pertaining to conducting research, preparing professional presentations and research proposals.

EDUC 3103 - QUANTITATIVE METHODS 2

Minimum Credits: 3
Maximum Credits: 3
The primary focus of this course is single predictor and multiple regression analysis for continuous and binary outcomes. The pedagogical strategy will be to learn statistical analysis by doing statistical analysis. We will rely primarily on the stata statistical software package. Over the course of the semester, we will examine a variety of data sets, each of which can be used to address substantive research questions by fitting increasingly sophisticated regression models. As we build understanding about how to use these methods in practice, we will discuss the regression model's purpose, mathematical representation, assumptions, implementation, interpretation, presentation, relationship to other statistical methods, implications for research design, and limitations. Additional principles of research design will be incorporated throughout the semester. The course will also include introductory coverage of more advanced topics, such as: multi-level modeling, structural equation modeling, regression discontinuity and propensity score matching. Introduction to these topics is meant primarily to inform students about upper-level courses that they might consider and not necessarily to prepare students to execute these methods on their own.

EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
This seminar introduces students to the inquiry traditions (e.g. empirical, interpretive, critical) and modes of research (e.g. narrative, ethnographic, historical, rhetorical, linguistic) associated with qualitative research in the social sciences. Students will gain experience with various elements in the research process (formulation of questions; research design; data organization and reduction; data analysis; validity and reliability issues) and with research methods characteristic qualitative research. This course should be completed by the end of the students' second year.

EDUC 3105 - FIRST YEAR SEMINAR 2

Minimum Credits: 2
Maximum Credits: 2
This seminar for beginning Ph.D. students addresses professional issues germane to doctoral skills and competencies. Topics addressed in this seminar include guidelines for constructing a literature review, IRB requirements, preparing professional presentations, and research proposals.

EDUC 3107 - WAYS OF KNOWING
Minimum Credits: 3
Maximum Credits: 3
In making a distinction between ways of knowing and procedures for knowledge generating, students in this seminar will examine various epistemological, ontological and axiological schools of thought that are the basis for educational inquiry. The focus will include assumptions that form the logics of justification for truth claims embedded in educational research.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**EDUC 3109 - SOCIAL CONTEXT OF URBAN EDUCATION**

Minimum Credits: 3
Maximum Credits: 3
Examines Urban Education with an emphasis on social context (e.g. red lining, gentrification, theories of home) and how communities are working toward empowering their respective neighborhoods. This course draws its theoretical and social action foundation from a spatial justice lens. As such, geography and space are sites of struggle and opportunity. Unjust geographies can contribute to language, policies, research, pedagogical constructs, and narratives that impact Urban Education.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad LG/SU3 Basis

**EDUC 3114 - BLACK EDUCATIONAL THOUGHT**

Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to engage Black education discourse critically, as a popular-cultural idea, and as an area of intellectual thought and scholarly study. Our course readings will include critical social and cultural theory drawing from such areas as Black feminisms, Black cultural studies, Afropessimisms, Critical Race Theory, Black literary studies, Black queer studies, Black education history and philosophy, and empirical analyses and policy studies related to Black educational opportunities, experiences and outcomes. Poetry, music, film and other arts forms will also serve as texts to help us in our attempt to more clearly articulate a critical Black studies in the field of education, and a critical engagement of education in Black studies.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**EDUC 3595 - SPECIAL TOPICS - LSAP**

Minimum Credits: 3
Maximum Credits: 3
This doctoral level course covers a specially selected learning science and policy topic. Topics vary from section to section and from term to term.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**Electrical and Computer Engineering**

**ECE 2043 - ELECTRON MICROSCOPY IN MATERIALS SCIENCE**

Minimum Credits: 3
Maximum Credits: 3
Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, Laue conditions, structure factor, Ewald construction, double diffraction, twinning, Kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.

**Academic Career:** Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2120 - HARDWARE DESIGN METHODOLOGIES 1

Minimum Credits: 3
Maximum Credits: 3
This course teaches hardware design processes through use of industry tools. Students use graphical tools to design, simulate and synthesize designs using hardware description languages (e.g. VHDL/Verilog). High-level design and problem decomposition are also taught. Optimization, simulation and synthesis of combinatorial functions, data paths, and finite state machines are covered in depth. Architecture encapsulation and reuse through 'Intellectual Property' (IP) modules is described and covered in detail. Students will work individually and as a part of a team to create, simulate, model, document, and test IP models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

ECE 2130 - TOPICS IN VLSI CAD

Minimum Credits: 3
Maximum Credits: 3
The course introduces state-of-the-art computer-aided design algorithms with application to VLSI. The course starts with a review of fundamental algorithms, from graph theory, sorting, searching and hashing, and then proceeds to focus on major CAD application areas in architectural, logical, and physical design. Major topics discussed are multiple level combinational logic synthesis and optimization, sequential logic optimization (retiming, clock scheduling), convex optimization and its applications, testing test pattern generation and design for testability, placement and routing, simulated annealing. Hot current research topics will be surveyed briefly.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2192; PROG: Swanson School of Engineering

ECE 2140 - SYSTEMS-ON-A-CHIP DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is a full semester project involving the entire class in one System on a Chip design experience. This includes requirements definition, high-level design, system specification, algorithm modeling, decomposition, IP selection and/or IP creation for re-use, synthesis simulation and testing. The system will be a true SoC with at least one processor core with associated system and application software. Lectures will be the philosophy of SoC as well as the practical issues involved in the SoC design methodology. State of the art CAD software will be used for design and co-simulation of the hardware/software platform.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2120; PROG: Swanson School of Engineering

ECE 2141 - VALIDATION AND VERIFICATION TECHNIQUES OF DIGITAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course presents state of the art methodologies and tools for simulation based validation and formal verification of complex digital systems implemented as systems on a chip. Topics include testing strategies, test bench design, coverage, and model checking.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2121 or 2140; PROG: Swanson School of Engineering
ECE 2160 - EMBEDDED COMPUTER SYSTEM DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
Design and implementation of embedded microprocessor systems. Topics include 'C' language, top down iteration for assembly language programming, data structures, co-routines, I/O software structures and real time operating systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Graduate School of Engineering

ECE 2161 - EMBEDDED COMPUTER SYSTEM DESIGN 2

Minimum Credits: 3  
Maximum Credits: 3  
Organized as a full term project carried out by student design groups. A complex embedded system will be designed, implemented and tested using Altera and other cad tools. Grade will be based on project reviews and the final project report. Proper design process will be emphasized.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: ECE 2160; PROG: Swanson School of Engineering

ECE 2162 - COMPUTER ARCHITECTURE 1

Minimum Credits: 3  
Maximum Credits: 3  
Review of basic architecture concepts, data representation, microprocessor and minicomputer architectures, memory and i/o subsystems, stack computers, parallel and pipelined computers.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Graduate School of Engineering

ECE 2165 - DEPENDABLE COMPUTER ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
The field of dependable computing has recently emerged as one of the most important areas of study in computer and electrical engineering. Modern computer systems are susceptible to a broad range of potential faults, errors, and failures, and increasing chip density and design complexity exacerbate the problem. Novel methods in hardware, information, network, software, and time redundancy are now available to mitigate these threats in the form of resilient computer architectures, apps, and systems. The focus of studies here is the design and analysis of dependable machines, from small embedded systems to space-based platforms to high-end supercomputers, in terms of reliability, availability, performability, testability, and safety metrics, and more.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 2166 - PARALLEL COMPUTER ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to fundamental and newly developing hardware and software topics in parallel computer architecture (PCA) including concepts, models, methods, metrics, systems, and applications. PCA has become one of the most challenging and important areas of ECE, and it is now a dominant theme throughout computer architecture, systems, and programming, from low-power embedded systems to high-end supercomputers, and featuring various forms of fixed-logic (e.g., CPU, DSP, GPU), reconfigurable-logic (e.g., FPGA), and hybrid (e.g., CPU+DSP, CPU+FPGA, CPU+GPU, CPU+FPGA+GPU) processing devices. Prerequisite: Completion ECE 2162 Computer Architecture, with B or better grade, or consent of professor
ECE 2170 - EMERGING MEMORY TECHNOLOGIES AND SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Emerging memory and technology systems discussions on the modern computer system designs and simulations. Topics cover multi-core architecture, CPU, 3D integration, emerging memory hierarchy, solid state data storage, etc. Students are required to read the latest technical references, give seminars, learn how to use simulators and do the self-proposed research projects.

ECE 2192 - INTRODUCTION TO VLSI DESIGN

Minimum Credits: 4
Maximum Credits: 4
Introduction to the concepts and techniques of modern integrated circuit design. Use of computer aided design (cad) tools for circuit design and simulation.

ECE 2193 - ADVANCED VLSI DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS and bicmos digital design techniques, as well as the group design process itself. Students form groups that design and implement different VLSI projects which are then fabricated by NSF Mosis facility and returned for testing. Focus is on group projects with written and oral/reviews and reports.

ECE 2195 - SPECIAL TOPICS: COMPUTERS

Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in computer engineering.

ECE 2231 - FUNDAMENTALS OF SEMICONDUCTOR AND QUANTUM ELECTRONIC DEVICES

Minimum Credits: 3
Maximum Credits: 3
Fundamental quantum theory, electron in potential well, harmonic oscillator, band theory of solids, Kronig-Penny Model.
ECE 2233 - FOCUSED ION BEAM SCANNING AND ELECTROMICROSCOPY

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the basic theory of FIB, SEM, X-EDS, and EBSD instrumentation, milling, deposition, and analytical capabilities. It discusses and presents the theory directly related to applications and techniques used in FIB/SEM dual beam platform instruments. Throughout the course, the students will be exposed to these methods and required to apply them to real research projects either provided by the instructor or from their research supervisors.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 2235 - MONOLITHIC INTEGRATED CIRCUITS

Minimum Credits: 3  
Maximum Credits: 3  
Fabrication of integrated silicon monolithic circuits, thermal oxidation, solid state diffusion, epitaxial growth, ion implantation, photo and electron lithography, design considerations, active and passive elements in monolithic blocks, surface effects.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 2240 - NANO-OPTICS

Minimum Credits: 3  
Maximum Credits: 3  
A graduate level course designed for students who want to understand the mechanisms of interaction of light and matter at the nanometer scale, and become acquainted with nano-optics-based technologies. Topics include: electromagnetic theory of optical interaction with matter, optical waves in periodic media, photonic bandgap structures, surface plasmons, optical interaction with metal nanostructures (metal nanoapertures and arrays, and metal nanoparticles), surface plasmon resonance spectroscopy, plasmon coupling and concentration/funneling of electromagnetic energy, surface-enhanced raman scattering, near-field imaging and microscopy, and negative refraction. Prerequisite: junior or senior level em theory course.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 2250 - POWER ELECTRONICS

Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to cover the fundamental concepts in the field in sufficient depth to allow students to analyze and design power electronics circuits. The course covers dc-dc converters and dc-ac converters.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 2260 - SCANNING PROBE MICROSCOPY-BASED CHARACTERIZATION AND NANOFABRICATION

Minimum Credits: 3  
Maximum Credits: 3  
The course concentrates on both theoretical and practical issues of advanced scanning problem microscopy (SPM) techniques. It introduces concepts,
The theoretical backgrounds, and operation principles of varieties of scanning probe microscopies; addresses the fundamental physical phenomena underlying the SPM imaging mechanism; covers the practical aspects of SPM characterization of a wide range of materials as well as operation devices; discusses SPM-based approaches to nanofabrication and nanolithography such as dip-pen nanolithography and nano-robotic manipulation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

---

**ECE 2262 - LOW-DIMENSIONAL NANOELECTRONIC DEVICES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate course discusses the electrical transport, electrothermal interactions, and power dissipation in emerging low-dimensional (1D and 2D) nanoelectronics. Topics include band structures, electronic transport in 1D nanowire and nanotubes as well as layered 2D materials (graphene, transition metal dichalcogenides, black phosphorus, and etc.), electrothermal interactions in nanoelectronics, power dissipation in nanoelectronics, thermometry, and system-level power dissipation issues (breakdown, heat sink, etc.). This course is intended to bridge a gap between device operations, solid-state physics, thermal transport, and materials science.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ECE 2263 - EMERGING MEMORY TECHNOLOGY FROM DEVICE TO APPLICATIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In today's big data era, trillions of sensors will connect every aspect of our lives to the Internet, constantly producing and processing an overwhelming amount of data. Conventional charge-based memory technology such as DRAM and Flash memory will not sustain the increasing demand for scalable, high-speed, energy-efficient and high density memory devices. In this special topic class, we will discuss the prospect and challenges of various emerging memory technology such as spin transfer torque random access memory (STT RAM), phase change memory (PCM), resistive random access memory (RRAM), conductive bridge random access memory (CBRAM) and possible applications in neuromorphic computing.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

---

**ECE 2264 - FLEXIBLE ELECTRONICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to provide an understanding of scientific and technical aspects of the flexible electronics and to enable students to contribute to the rapidly developing flexible electronics information. The course aims to introduce graduate level students to semiconductor devices, modern electronic devices on flexible substrate, and wearable and stretchable devices.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ECE 2270 - FUNDAMENTALS OF PHOTOVOLTAICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course concentrates on both theoretical and practical issues of advanced scanning problem microscopy (SPM) techniques. It introduces concepts, theoretical backgrounds, and operation principles of varieties of scanning probe microscopies; addresses the fundamental physical phenomena underlying the SPM imaging mechanism; covers the practical aspects of SPM characterization of a wide range of materials as well as operation devices; discusses SPM-based approaches to nanofabrication and nanolithography such as dip-pen nanolithography and Nano-robotic manipulation.

**Academic Career:** Graduate
ECE 2295 - SPECIAL TOPICS: ELECTRONICS

Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in electronics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2372 - PATTERN RECOGNITION

Minimum Credits: 3
Maximum Credits: 3
Emphasis on machine pattern recognition and learning; Bayes decision theory, parameter estimation, Bayesian belief networks, discriminant functions, supervised learning, nonparametric techniques, feature extraction, principal component analysis, hidden Markov models, expectation-maximization, support vector machines, artificial neural networks, unsupervised learning, clustering, and syntactic pattern recognition.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2390 - IMAGE PROCESSING AND COMPUTER VISION

Minimum Credits: 3
Maximum Credits: 3
This first level graduate course covers essential elements of image processing for computer vision and introductory subjects in computer vision; image segmentation: region-based, edge detection, scale space, active contours; shape description, deformable templates; textures; perspective camera model and its parameters; geometry of multiple (2) views, fundamental matrix; scene planes and homographies; consistent labeling; locating objects in 3-d space; motion analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Probability theory, random variables, sums and limits of random variable sequences, time and frequency domain, modeling of continuous and discrete random signals, least square estimation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2523 - DIGITAL SIGNAL PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Discrete-time signal processing, discrete Fourier transform and FFT implementation, design and stability considerations of FIR and IIR filters, filter implementation and finite register effects.

Academic Career: Graduate
ECE 2525 - DETECTION AND ESTIMATION THEORY

Minimum Credits: 3
Maximum Credits: 3
A study of optimal techniques for extracting information from the observation of random variables or random signals. This includes hypothesis testing, estimation theory, optimal receiver design, wiener and Kalman-Bucy filtering, and applications such as digital communications and medical imaging.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2555 - BIOMEDICAL SIGNAL PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2570 - ROBOTIC CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of control theory in robotics. Topics to be covered include: review of classical and modern control design methods such as PID control, state feedback, optimal control, adaptive control, and hybrid system control; control of mobile robots; control of robot manipulators; and cognitive robotics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2595 - SPEC TOPCS: SIGNL PROCSSNG/COM

Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in signal processing/communications.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2646 - LINEAR SYSTEM THEORY

Minimum Credits: 3
Maximum Credits: 3
Linear spaces and operators, mathematical descriptions of linear systems, controllability and observability, irreducible realization of rational transfer-function matrices, canonical forms, state feedback, and state estimators, stability.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
ECE 2647 - INTRODUCTION TO NONLINEAR CONTROL DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to nonlinear control design methods. The main topics include: Lyapunov stability analysis, feedback linearization, sliding mode control, and integrator backstepping. The content will be mathematical, supplemented with application examples from nonlinear systems such as robotic manipulators and human musculoskeletal system.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2654 - DIGITAL CONTROL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Transform domain approach to analysis and design of digital computer control systems, linear discrete dynamic systems analysis and the z-transform, discrete equivalents to continuous transfer functions, sampled data systems, design of digital control systems using transform techniques, quantization effects, sample rate selection. Prerequisite: ECE 1673
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

ECE 2671 - OPTIMIZATION METHODS

Minimum Credits: 3
Maximum Credits: 3
Analytical and computational aspects of finite dimensional optimization, unconstrained and equality constrained problems, basic descent methods, conjugate direction methods, nonlinear programming and the Kuhn-Tucker Theorem, linear programming, dynamic programming, multicriteria optimization.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2680 - ADAPTIVE CONTROL

Minimum Credits: 3
Maximum Credits: 3
Adaptation and learning play an essential role in biological systems, and these characteristics have been widely incorporated in modern control systems. This course introduces the general principles of adaptive control and learning. Topics to be covered include: real-time parameter estimation, self-tuning regulators, model-reference adaptive systems, adaptive control of nonlinear systems, practical aspects and implementation of adaptive control systems, introduction to computational learning theory and learning in neural systems, and an example of adaptive control by the cerebellum.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2695 - SPECIAL TOPICS: ADAPTIVE CONTROL

Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in control.
Academic Career: Graduate
Course Component: Lecture
ECE 2774 - POWER SYSTEMS ANALYSIS 2

Minimum Credits: 3
Maximum Credits: 3
Steady state phenomena, matrix transformations, system parameters, system unbalances, digital methods, and numerical analysis techniques applied to load flow, state estimators, and fault studies in the large power systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2775 - ADVANCED ELECTRIC MACHINES AND DRIVES

Minimum Credits: 3
Maximum Credits: 3
This is a course in electric machine and drive analysis and modeling, along with their control systems. The course will cover the dq0 transformation, reference frame theory, saturation, unbalanced operation and dynamics in electric machines. Then cover the converter topologies typically used in machine drives, power electronic device characteristics, pulse-width modulation techniques, current regulation, torque and speed control, and space vector control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course describes fundamental concepts related with the development of microgrids and the integration of distributed generation. Technical topics are divided into three modules. The first module introduces microgrid components and discusses the main types of microsources. The second focuses on energy storage technologies. The third includes system integration topics, such as power electronics interfaces; dc and ac architectures; economics, operation, stabilization, and control; reliability aspects; grid interconnection, and microgrids as part of the "smart" grids. This course also aims at preparing students to conduct research or helping them improve their research skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2777 - POWER SYSTEMS TRANSIENTS 1

Minimum Credits: 3
Maximum Credits: 3
Lumped parameter analysis, switching transients in ac/dc systems, arc modeling, damping, current suppression, traveling wave phenomena, line discontinuities, Ferro resonance, transient recovery voltage.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

ECE 2778 - FACTS AND HVDC TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
Advanced Power Electronics (FACTS and HVDC) is a comprehensive course in the area of large-scale power electronics systems, circuits, devices, and the ever-advancing areas of applications. This course will provide graduate students with an understanding of the how the broad spectrum of
power electronics is integrated into a wide variety of industries, with an emphasis on utility scale FACTS and HVDC technologies and applications, as well as how applications of power electronics circuits, devices, and systems are utilized for control and operation of various processes and business fields. The course will cover, from a ground-up approach, devices and their characteristics, conversion techniques and circuits, and applications of power electronics with an emphasis on power conversion fundamentals for FACTS and HVDC applications.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

### ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers an in-depth analysis and understanding of various renewable and alternative energy technologies' including wind, solar, biomass, thermal, wave, hydro, and other sources and systems. Investigation of applications, integration, markets, policy, and other aspects of renewable development will be studied. Supporting technologies, such as energy storage, power electronics, and controls as applied to renewable and alternative energy applications are also explored.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a comprehensive course designed to introduce students to new technologies dedicated to reliably, efficiently and safely managing electric power across utility, commercial, industrial, and residential networks. The course will cover the application of smart grid technologies from power generation through power consumption including grid automation, smart meters, demand response, communication, electric vehicle integration, grid connectivity, renewable energy, cyber security, microgrids and the business processes. Students will gain an understanding of the how the broad spectrum of smart grid technologies is integrated into the electrical energy industry, with an emphasis on distribution systems within homes, buildings, factories, transportation systems, and the utilities serving them.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ECE 2795 - SPECIAL TOPICS POWER

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An MS level course in special topics of current interest in power.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ECE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-Writing Workshop

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

**Academic Career:** Graduate  
**Course Component:** Workshop  
**Grade Component:** Grad SN Basis

### ECE 2990 - MBA/MS GRADUATE PROJECTS

1622
Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ECE 2997 - RESEARCH, MS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Electrical and Computer Engineering MS

ECE 2998 - GRADUATE PROJECTS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Electrical and Computer Engineering MS

ECE 2999 - MS THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Electrical and Computer Engineering MS

ECE 3000 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
For full-time graduate students interested in industrial internships as a means of gaining practical experience in their areas of research. Students are responsible for arranging practicum with industry. See practicum guidelines and application. Requires permission of graduate coordinator.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

ECE 3162 - ADVANCED COMPUTER MICROARCHITECTURE

MinimumCredits: 3
MaximumCredits: 3
This upper level graduate course aims to cover the state-of-the-art advances and hot topics in computer architecture research. Topics include emerging non-volatile memory technologies, massive parallel architectures (e.g. GPU), accelerators, optimizing architecture for data analytics, etc. Students are required to read contemporary research papers, and present them throughout a semester. One term project, done either individually or in a team, is required. Prerequisite: ECE 2162 or equivalent.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
ECE 3195 - ADVANCED TOPICS-COMPUTERS

Minimum Credits: 3  
Maximum Credits: 3  
A Ph.D. level course in advanced topics of current interest in the area of computer engineering.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

ECE 3233 - SEMICONDUCTOR DEVICE MODELING

Minimum Credits: 3  
Maximum Credits: 3  
Topics of current interest in the field of solid-state electronic devices.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

ECE 3235 - SEMICONDUCTOR LASERS

Minimum Credits: 3  
Maximum Credits: 3  
Properties of heterojunctions, stimulated emission in semiconductors, carrier and optical confinement, fabrication and operating characteristics of semiconductor lasers including double-heterostructure lasers, quantum well lasers, distributed feedback lasers, surface emitting lasers, various modulation techniques of semiconductor lasers.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: ECE 2231; PROG: Swanson School of Engineering

ECE 3374 - APPLICATIONS OF WAVELET TRANSFORMS

Minimum Credits: 3  
Maximum Credits: 3  
This course presents applications of wavelet transforms to multiresolution signal/image processing and pattern recognition. Topics include basic notions of basis functions with compact support, localization property, multiresolution analysis, continuous wavelet transform, discrete wavelet transform, wavelet packets, image compression, signal/image demising, edge localization, texture feature extraction, and multiresolution data fusion.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: ECE 2390 or ECE 2523; PROG: Swanson School of Engineering

ECE 3526 - MODERN SPECTRAL ESTIMATION

Minimum Credits: 3  
Maximum Credits: 3  
An overview of concepts of modern spectral analysis covering traditional approaches and modern estimation methods. The properties, advantages and disadvantages of each estimator will be covered in detail and demonstrated using computer experiments. Also covered are applications of spectral estimation to signal detection and beam forming.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: ECE 2521; PROG: Swanson School of Engineering
ECE 3557 - STATISTICAL SIGNAL PROCESSING

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521 and 2523 and 2646; PROG: Swanson School of Engineering

ECE 3650 - OPTIMAL CONTROL

Minimum Credits: 3
Maximum Credits: 3
Variation calculus and optimality conditions, linear quadratic problems, the Riccati equation, Pontryagin maximum principle, time optimal control, dynamic programming and the Hamilton-Jacobi equation, numerical methods, decentralized control, multicontroller-multiobjective systems, differential games.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2646; PROG: Swanson School of Engineering

ECE 3776 - POWER SYS CONTROL & STABILITY

Minimum Credits: 3
Maximum Credits: 3
The power system model for stability studies, response to disturbances, the behavior of machines, the effect of excitation, and mathematical techniques for stability studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3777 - POWER ELECTRONICS CONVERSION 2

Minimum Credits: 3
Maximum Credits: 3
This course discusses selected topics in power electronics systems and circuits at a medium graduate level. The course content includes advanced modeling techniques of power electronic components and switched circuits. It also includes advanced concepts in power electronic circuits design, such as thermal and reliable based designs, and controls, including both time domain and geometric based controllers. Some primary applications include microgrids, renewable and alternative energy, sustainable systems, reliable power conversion circuits, smart grids, motor control, and others.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 3778 - POWER SYSTEMS TRANSIENTS 2

Minimum Credits: 3
Maximum Credits: 3
Project-based course in simulation and modeling techniques for power system electromagnetic transients. Frequency-dependent and non-linear component models, with applications to transmission, distribution, power electronic and measurement systems.

Academic Career: Graduate
Course Component: Lecture
ECE 3779 - HIGH FREQUENCY POWER ELECTRONICS

Minimum Credits: 3  
Maximum Credits: 3  
This course addresses the motivations and inherent design issues associated with high frequency switched mode power supply design. Origins and dependencies of frequency dependent losses will be reviewed, with specific emphasis on potential design approaches which reduce energy loss and facilitate high frequency operation. Resonance and its application to power converters will be discussed. Students will learn steady-state and dynamic modeling techniques which allow the analysis and design of converters containing significant resonant intervals, for which traditional small ripple assumptions do not hold.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

ECE 3795 - ADVANCED TOPICS POWER

Minimum Credits: 3  
Maximum Credits: 3  
A Ph.D. level course in advanced topics of current interest in power.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

ECE 3893 - GRADUATE SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
A weekly series of presentations by engineers and scientists, visiting researchers, faculty, and graduate students.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad SN Basis  
Course Requirements: PROG: Swanson School of Engineering

ECE 3995 - RESEARCH TOPICS IN ELECTRICAL AND COMPUTER ENGINEERING

Minimum Credits: 3  
Maximum Credits: 15  
A research course for PhD students that focuses on specific skills required by students to conduct original research in a particular area of Electrical and Computer Engineering. Students will complete a project, such as a full journal paper, a proposal for research funding, or a complete patent application, as specified by the faculty teaching the course. The project should be beyond material to be included in the student's dissertation. This course requires approval by the Program Conference Committee, based on a 1-2 page proposal citing the topic, rationale for the course, the professor, and the specific project to be completed.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade

ECE 3997 - RESEARCH, PHD

Minimum Credits: 1  
Maximum Credits: 12  
Academic Career: Graduate  
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Electrical and Computer Engineering PHD

ECE 3998 - PHD PROJECT

Minimum Credits: 3
Maximum Credits: 15
Independent study
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Electrical and Computer Engineering PHD

ECE 3999 - PHD DISSERTATION

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Emergency Medicine

EMED 5376 - SPECIALTY CARE CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
The specialty care clerkship is a four (4) week rotation that includes a combination of one week experiences in the disciplines of ENT, ophthalmology, adult emergency medicine and pediatric emergency medicine. In addition to four weeks of clinical time, students will attend weekly lectures, workshops and lab activities. This required clerkship begins with orientation and a suturing and splinting session followed by a simulation-based session in phone communication (how to best communicate medical information over the telephone to patients). One morning each week there will be an ophthalmology lecture and an ENT lecture. Additional morning workshops include dermatology, EKG cases, dizziness and audiology, musculoskeletal exam and rehab and musculoskeletal radiology. The lecture will be followed by clinical responsibilities. Students are evaluated by each specialty area based on clinical performance and will take an on-line proctored examination. One grade will be assigned for the entire four week rotation.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

EMED 5450 - EMERGENCY MEDICINE

Minimum Credits: 0
Maximum Credits: 0
This 4 week elective is designed for the student desiring added experience in acute care medicine as practiced both in and out of the hospital. Student will become part of mobile intensive care unit field team operating in the city of Pittsburgh's system. Students are responsible for gaining experience in initial on-scene assessment and intervention, rescue, extrication techniques and cases for follow-up and presentation. Module 2 is spent in emergency department with the goal of providing experience and supervision in the initial evaluation and treatment of wide variety of patient problems.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5460 - MEDICAL TOXICOLOGY
This four week clinical elective will provide students with experience in the assessment and treatment of toxicology patients. Students will spend time with toxicology faculty in consultation, examination, treatment, and follow-up of patients in the emergency, inpatient and outpatient settings. The clinical experience will include daily clinical rounds on inpatients, outpatient consults, and Pittsburgh poison center case review. Students will be on-call daily with the rotating residents and medical toxicology staff member and will be expected to join the resident and attending on cases presenting to UPMC Presbyterian and Children's Hospital of Pittsburgh. A portion of the rotation will be at the Pittsburgh poison center, where students will learn from current patient cases and summary case reviews. Daily teaching sessions will be provided by members of the medical toxicology service on the spectrum of toxicology subjects. Sample topics include: initial approach to the toxicology patient, decontamination, acetaminophen, salicylates, toxic alcohols, antidepressants, iron and digoxin. Students will also attend the medical toxicology service lectures. Additionally, the student will be encouraged to participate in on-going research projects if available (e.g. chart review). Students will also be encouraged to prepare interesting cases for scientific presentation and publication. The overall curriculum will help students develop their knowledge base in medical toxicology, and improve their ability to diagnose and treat a poisoned patient.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### EMED 5465 - POINT OF CARE ULTRASONOGRAPHY

Minimum Credits: 0  
Maximum Credits: 0  
This elective serves as an introduction to the use of point of care ultrasonography (POCUS) over the course of four weeks. The course will expose students to the use of focused, point of care ultrasonography to make bedside clinical decisions for the care of acutely ill patients. POCUS as serve as an extension of the physical exam to aid physicians narrow their differential diagnosis, provide direct visualization of pathophysiology as well as tracking changes to medical interventions, improve accuracy and safety in procedural skills and obtain direct visualization of pathology without the need for transportation to specialized suites or the use of radiation. These skills are essential in the present medical climate where poccus can aid in improved safety, cost-savings and even patient satisfaction. As the use of this technology expands, it is crucial for medical trainees to have exposure.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### EMED 5466 - POST CARDIAC ARREST SERVICE

Minimum Credits: 0  
Maximum Credits: 0  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 3

### EMED 5470 - SENIOR ELECTIVE IN QUALITY AND PATIENT SAFETY

Minimum Credits: 0  
Maximum Credits: 0  
The quality and patient safety elective is designed for the motivated learner with self-study modules and learning activities facilitated by preceptors remotely. The course complements busy months of interviewing and travel through the use of on-line media, case reviews, videos, podcasts and blog discussions. Instead of in-person meetings, course directors employ on-line meetings and electronic touch points to ensure progress throughout the course. Learning in this course is asynchronous, so timing is at the convenience of the individual learner. Participants will spend at least 2 hours per day completing required on-line learning modules. In addition, students will work independently to research, understand and create a root cause analysis and a rapid process improvement plan. Students will review the RCA and QI plans of their peers, provide feedback and participate in discussion of their work.

**Academic Career:** Medical School  
**Course Component:** Lecture  
**Grade Component:** S/U Basis
EMED 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of ophthalmology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5735 - SCIENCE OF RESUSCITATION (ILS)

Minimum Credits: 0
Maximum Credits: 0
This 4-week elective will satisfy requirement for integrated life science course of senior year. Course objectives: 1) identify major physiological influences affecting resuscitation and trace their implementation into clinical guidelines; 2) critique clinical study of resuscitation; 3) become confident conducting medical resuscitation, including use of relevant equipment; 4) appreciate practical/ethical issues surrounding research on emergency interventions. Small group sessions, live animal/simulator sessions and written research critique is required.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5740 - EXERCISE IS MEDICINE

Minimum Credits: 0
Maximum Credits: 0
This is a four week selective that meets the requirement of an integrated life science course. The principles of the exercise is medicine program are shared by the American medical association (AMA) and the American college of sports medicine (ACSM) and they are the focus of this course. At the end of this course, the student will have an understanding of the evidence for the role of exercise in the treatment and prevention of chronic disease and how to apply the evidence to their practice. There are multiple learning modes in this course, including didactic, laboratory, and independent study. The didactic portion will be an active participation exercise in a journal-club format. The goal of the didactic portion will be to critically evaluate the evidence for the role of exercise in chronic disease providing the foundation for understanding, creating, and employing comparative effectiveness research (CER). Through these reviews, the student will evaluate the ACSM/aha exercise recommendations. Laboratory experiences in exercise science will provide insight into the acute response to exercise and exercise stress testing reinforcing principles of physiology learned in the first two years of the curriculum. Students will participate in the labs, wear activity monitors and pedometers at various times during the course to track daily activity to appreciate how these devices can be used to motivate and modify patient lifestyle. Finally, each student will complete an independent study on an aspect of exercise and chronic disease treatment or prevention.

Academic Career: Medical School
Course Component: Workshop
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5750 - GET READY FOR RESIDENCY BOOT CAMP

Minimum Credits: 0
Maximum Credits: 0
This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

Academic Career: Medical School
EMED 5898 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0
Maximum Credits: 0
This is a senior-level elective offering. This is a four week elective for the student interested in participating in clinical or basic science research in emergency medicine. The student will be offered the opportunity to choose a research project which interests him or her. The student will work closely with the emergency department attending staff as well as the clinical research coordinator for the department of emergency medicine. The coordinator will meet weekly with the student to provide guidance as well as education materials.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5899 - INDEPENDENT STUDY IN EMERGENCY MEDICINE

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

EMED 5900 - EXTRAMURAL EMERGENCY MEDICINE

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in emergency medicine may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Endodontics

ENDOD 2000 - GRADUATE ENDODONTICS

Minimum Credits: 6
Maximum Credits: 6
General studies of various clinical endodontic techniques and procedures.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

ENDOD 2011 - TEACHING/EMERGENCY CARE 1

Minimum Credits: 2
Maximum Credits: 2
The student is involved in teaching clinical endodontics to pre-doctoral dental students. This will include consultation in the pre-doctoral clinics, and
assisting the dental student with clinical techniques in endodontics. The resident will also be involved in the diagnosis and treatment of difficult cases in the pre-doctoral emergency clinic.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### ENDOD 2021 - TEACHING/EMERGENCY CARE 2

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The student is involved in teaching clinical endodontics to pre-doctoral dental students. This will include consultation in the pre-doctoral clinics, and assisting the dental student with clinical techniques in endodontics. The resident will also be involved in the diagnosis and treatment of difficult cases in the pre-doctoral emergency clinic.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### ENDOD 2043 - ENDODONTIC SURGERY 3

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed so that the student will be knowledgeable and competent in surgical endodontic procedures so that he or she is capable of utilizing them in practice. The resident will be knowledgeable of hospital policies, and admitting patient protocol.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### ENDOD 2111 - ENDODONTOLGY 1

**Minimum Credits:** 2  
**Maximum Credits:** 2  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ENDOD 2112 - ENDODONTOLGY 3

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is the study of the scientific rational for endodontic treatment. The dental pulp and periapical tissues will be studied at the most basic cellular level. This course will include the embryological development of all related structures; a study of the pathologic/physiologic occurrences of the pulp and periapex; and an understanding of the biological basis for endodontic treatment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ENDOD 2115 - ENDO MICROSCOPE 1

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

### ENDOD 2121 - ENDODONTOLGY 2
This course is the study of the scientific rational for endodontic treatment. The dental pulp and periapical tissues will be studied at the most basic cellular level. This course will include the embryological development of all related structures; a study of the pathologic/physiologic occurrences of the pulp and periapex; and an understanding of the biological basis for endodontic treatment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2122 - ENDODONTOLOGY 4**

**Minimum Credits:** 2  
**Maximum Credits:** 2

**ENDOD 2131 - ENDODONTOLOGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2

**ENDOD 2211 - CASE PRESENTATION 1**

**Minimum Credits:** 2  
**Maximum Credits:** 2

**ENDOD 2212 - CASE PRESENTATION 3**

**Minimum Credits:** 2  
**Maximum Credits:** 2

**ENDOD 2221 - CASE PRESENTATION 2**
Minimum Credits: 2
Maximum Credits: 2
This course will provide each resident with the experience of presenting clinical cases in a formal setting. The cases will be discussed in detail, and the student must be prepared to answer questions regarding the general medical condition of the patient, as well as present an evidence based rationale for the endodontic treatment provided.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**ENDOD 2222 - CASE PRESENTATION 4**

Minimum Credits: 2
Maximum Credits: 2
This course will provide each resident with the experience of presenting clinical cases in a formal setting. The cases will be discussed in detail, and the student must be prepared to answer questions regarding the general medical condition of the patient, as well as present an evidence based rationale for the endodontic treatment provided.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**ENDOD 2280 - CASE PRESENTATION**

Minimum Credits: 2
Maximum Credits: 2
This course will provide each resident's with the experience of presenting clinical cases in a formal setting. The cases will be discussed in detail, and the student must be prepared to answer questions regarding the general medical condition of the patient, as well as present an evidence based rationale for the endodontic treatment provided.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**ENDOD 2281 - CASE PRESENTATION**

Minimum Credits: 2
Maximum Credits: 2
This course will provide each resident's with the experience of presenting clinical cases in a formal setting. The cases will be discussed in detail, and the student must be prepared to answer questions regarding the general medical condition of the patient, as well as present an evidence based rationale for the endodontic treatment provided.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**ENDOD 2282 - CASE PRESENTATION**

Minimum Credits: 2
Maximum Credits: 2
This course will provide each resident's with the experience of presenting clinical cases in a formal setting. The cases will be discussed in detail, and the student must be prepared to answer questions regarding the general medical condition of the patient, as well as present an evidence based rationale for the endodontic treatment provided.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**ENDOD 2301 - TOPICAL LITERATURE**
Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2302 - TOPICAL LITERATURE

Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2325 - ENDO MICROSCOPE 3

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

ENDOD 2345 - ENDO MICROSCOPE 4

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

ENDOD 2351 - CURRENT LITERATURE 1

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to familiarize the student with current endodontic literature so that he/she is abreast of what is taking place in the specialty of endodontics. The student will identify research that is pertinent and of quality. The student will have a knowledge of current endodontic literature and will be able to critically analyze the literature and help decide what is pertinent.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

ENDOD 2375 - ENDODONTIC CLINIC 5

Minimum Credits: 1
Maximum Credits: 1
Endodontic resident clinical patient care. This treatment will include all phases of endodontics, such as conventional surgical and emergency endodontic treatment.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
ENDOD 2380 - TOPICAL LITERATURE 1

Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2381 - TOPICAL LITERATURE 2

Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2382 - TOPICAL LITERATURE 3

Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2383 - TOPICAL LITERATURE 4

Minimum Credits: 2
Maximum Credits: 2
This class will cover specific areas of endodontics through the review of classic and current literature. The resident will be given reading assignments and will be required to present a narrative of the reading for further discussion in a small seminar format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2410 - CURRENT LITERATURE

Minimum Credits: 2
Maximum Credits: 2
This class will entail the reading of current periodicals. The student will abstract assigned articles and then present the abstract for discussion in a round table format.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2411 - CURRENT LITERATURE 1

Minimum Credits: 2
Maximum Credits: 2
This class will entail the reading of current periodicals. The students will abstract assigned articles and then present the abstract for discussion in a
round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2412 - CURRENT LITERATURE 3**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This class will entail the reading of current periodicals. The students will abstract assigned articles and then present the abstract for discussion in a round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2420 - CURRENT LITERATURE**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This class will entail the reading of current periodicals. The student will abstract assigned articles and then present the abstract for discussion in a round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2421 - CURRENT LITERATURE 2**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This class will entail the reading of current periodicals. The student will abstract assigned articles and then present the abstract for discussion in a round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2422 - CURRENT LITERATURE 4**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This class will entail the reading of current periodicals. The student will abstract assigned articles and then present the abstract for discussion in a round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2430 - CURRENT LITERATURE**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This class will entail the reading of current periodicals. The student will abstract assigned articles and then present the abstract for discussion in a round table format.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
**ENDOD 2510 - CLINICAL TREATMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical as well as surgical proficiency in the field of endodontics.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**ENDOD 2511 - CLINIC 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical, as well as surgical proficiency in the field of endodontics.  
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad Letter Grade

**ENDOD 2512 - CLINIC 3**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical, as well as surgical proficiency in the field of endodontics.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**ENDOD 2520 - CLINICAL TREATMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical as well as surgical proficiency in the field of endodontics.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**ENDOD 2521 - CLINIC 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical, as well as surgical proficiency in the field of endodontics.  
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad Letter Grade

**ENDOD 2522 - CLINIC 4**

Minimum Credits: 3  
Maximum Credits: 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical, as well as surgical proficiency in the field of
endodontics.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2530 - CLINICAL TREATMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will involve the actual treatment of patients. The resident will demonstrate both nonsurgical as well as surgical proficiency in the field of endodontics.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2610 - CLINICAL CONCEPTS IN ENDODONTICS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is the study of the scientific rational for endodontic treatment. The dental pulp and periapical tissues will be studied at the most basic cellular level. This course will include the embryological development of all related structures; a study of the pathologic/physiologic occurrences of the pulp and periapex; and an understanding of the biological basis for endodontic treatment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2611 - CLINICAL CONCEPTS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will provide the clinical aspect of endodontic treatment. By presenting various techniques used to diagnose and treat the patient in the endodontic practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2612 - CLINICAL CONCEPTS 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will provide the clinical aspect of endodontic treatment. By presenting various techniques used to diagnose and treat the patient in the endodontic practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ENDOD 2613 - CLINICAL CONCEPTS 3**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**ENDOD 2614 - CLINICAL CONCEPTS 4**
ENDOD 2620 - CLINICAL CONCEPTS IN ENDOdontics

Minimum Credits: 2
Maximum Credits: 2
This course is the study of the scientific rationale for endodontic treatment. The dental pulp and periapical tissues will be studied at the most basic cellular level. This course will include the embryological development of all related structures; a study of the pathologic/physiologic occurrences of the pulp and periapex; and an understanding of the biological basis for endodontic treatment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2721 - TRAUMATOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course will detail various types of dental trauma; the methods of treatment and possible long-term effects trauma have on oral structures.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2821 - SPECIAL LECTURES SERIES

Minimum Credits: 2
Maximum Credits: 2
This course will include an array of lectures that will be presented by experts in various fields, exposing the students to a wide variety of topics and ideas including practice management, dental jurisprudence, and teach methodology

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

ENDOD 2921 - ENDOdontIC SURGERY

Minimum Credits: 2
Maximum Credits: 2
This course will provide the surgical aspect of endodontic treatment. Proficiency in the treatment planning of endodontic surgery, as well as evidence based foundation for all aspects of surgical treatment will be explored. 1) Develop the skills for proper case selection and treatment planning of surgical cases. 2) Understand soft tissue management, and flap design as it pertains to endodontic surgery. 3) Demonstrate knowledge of guided tissue techniques and materials. 4) Demonstrate an understanding of wound healing of both soft and mineralized tissues as they pertain to endodontic surgery. 5) Discuss methods of hemostasis and crypt control during periapical surgery. 6) Understand the possible postoperative complications associated with endodontic surgery and how to manage these situations. 7) Have a strong knowledge of the head and neck anatomy. 8) Understand possible periodontal considerations with the various flap designs. 9) Discuss various suture techniques for specific for the conditions that present themselves.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2999 - RESEARCH PROJECT

Minimum Credits: 1
Maximum Credits: 1
This course involves independent or joint research in the field of endodontics. The completion of this class, oral presentation and written paper must be submitted.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

ENDOD 5210 - ENDODONTICS 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students will learn the morphology, physiology, and pathology of the human pulp and periapical tissues and the diagnosis, prevention and treatment (to include access preparation, instrumentation and temporization) of diseases and injuries related to these tissues. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

ENDOD 5216 - ENDODONTICS 1 LAB

Minimum Credits: 1.5
Maximum Credits: 1.5
In this course, students will develop clinical skills for endodontic treatment in a simulation/laboratory environment. This course includes small group simulation and laboratory sessions.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

ENDOD 5247 - ENDODONTICS 2 LAB

Minimum Credits: 1.5
Maximum Credits: 1.5

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

ENDOD 5252 - ENDODONTICS 2

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

ENDOD 5313 - ENDODONTICS 3

Minimum Credits: 1
Maximum Credits: 1
In this course, students will learn about endodontic microbiology, endodontic therapeutics, preventive endodontics, procedural accidents, evaluation of endodontic outcomes, nonsurgical retreatment, bleaching of discolored teeth, management of incompletely formed roots, management of traumatic dental injuries, longitudinal tooth fractures, endodontic and periodontal interrelationships, endodontic surgery and differential diagnosis of orofacial pain. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF
ENDOD 5348 - CLINICAL ENDODONTICS 1

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad Letter Grade

ENDOD 5388 - CLINICAL ENDODONTICS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of endodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to endodontic dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the endodontic patient.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

ENDOD 5448 - CLINICAL ENDODONTICS 2

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

ENDOD 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

ENDOD 5911 - ADVANCED ENDODONTICS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

Energy Resources

ENRES 2096 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
ENRES 2097 - GRADUATE PROJECTS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ENRES 2998 - CASE STUDY

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ENRES 2999 - M. S. THESIS

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Engineering

ENGR 2007 - SUSTAINABILITY CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
Building upon students' previous experience and skills, this course will focus on enabling interdisciplinary student teams to synthesize comprehensive solutions to complex real-world Sustainability challenges. This is a project-based course. Project topics will be developed in consultation with instructors and sustainability stakeholders. Innovative solutions will require the application of critical thinking and collaboration to resolve. By the end of the course the students will have a deeper understanding of 1) the multi-faceted nature of Sustainability solutions 2) approaches to problem solving across fields and 3) how to communicate sustainable solutions and concepts in an interdisciplinary team environment. This course serves as a capstone course for the Sustainability certificate and M.S. in a Sustainable Engineering degree and is a required course for these two programs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENGR 2017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL

Minimum Credits: 3
Maximum Credits: 3
What is flexible device manufacturing? What is green manufacturing? What is cybermanufacturing? Importantly, how do these emerging "types" of manufacturing differ from traditional manufacturing? It is important to recognize that global manufacturing is undergoing major transformations nowadays. The confluence of new advanced materials, emerging fabrication technologies, and connected cyber-physical systems is creating paradigm shifts for the ways products are conceived, made, distributed, used, and disposed. In the ever-increasing competition of "making things" of value to consumers, many industries are now reinventing themselves to cope with this new reality. This class covers the fundamentals behind major global trends, and their implication for the future of manufacturing from an engineering perspective. Topics covered include the following: (1) How the need for flexible and wearable devices is driving innovation in new materials and fabrication processes beyond the traditional microfabrication techniques adopted in the semiconductor industry. (2) How protein-based materials, degradable polymers, and novel recycling technologies are paving the way for more sustainable manufacturing of consumer products. (3) How data analytics and internet of things (IoT) technologies are enabling a new generation of digital manufacturing systems referred to as Industry 4.0, and beyond.
ENGR 2050 - TECHNICAL WRITING

Minimum Credits: 3
Maximum Credits: 3
This course is designed for non-native English speaking advanced graduate students preparing to write thesis or dissertation proposals in engineering. Topics covered include: format and content of reports needed in technical writing, abstracts and summaries, project proposals and research reports; correcting language problems encountered by non-native English writers and technical writers in particular.

ENGR 2051 - PRODUCT REALIZATION

Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course considers diverse aspects of product realization processes. Aspects include defining user requirements, creation of computer based models and designs of a product from an existing product, rapid prototyping techniques and development of a manufacturing plan. Teams of 3-4 students from engineering and business will take a product with a microsystem or mems technology feature from concept to working prototype. In doing this students will address issues of market analysis, design, manufacturing design and product planning.

ENGR 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
An introduction to technical writing and oral presentation skills using Word, Powerpoint, Mendeley, InkScape and LaTeX.

ENGR 2060 - SOCIAL ENTREPRENEURSHIP - ENGINEERING FOR HUMANITY

Minimum Credits: 3
Maximum Credits: 3
The course will explore the concepts of social entrepreneurship through the three tenets of sustainability: environment, economy, and equity in the context of complex or 'wicked' problems. An introduction will provide a foundation in sustainability and social entrepreneurship while exploring the impact of innovative business models, such as disruptive innovation and Prahalad and Hart's fortune at the bottom of the pyramid. Additional class time will explore different examples and challenges in the developed and developing worlds. Through weekly readings, the course will focus on classroom discussions about the tenets of sustainability and the relevance of engineering in crafting 'solutions'. The course project will provide students with an opportunity to work with a multi-disciplinary team to design an engineering-based business plan targeting a specific challenge either locally or in the developing world.

ENGR 2061 - INTRAPRENEURSHIP: ENTREPRENEURSHIP WITHIN THE CORPORATION
This course explores the developing practice of intrapreneurship which is defined as the application of entrepreneurial principles in a corporate environment for the creation of new products and businesses. The focus will be on providing the student with the needed awareness of cultural and political barriers while providing a specific tool set targeted at maximizing new business as well as career success. The course is designed for junior and senior engineering students who have already had some work experience.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### ENGR 2062 - STARTUP FUNDAMENTALS FOR ENGINEERS

This course is offered within the Swanson School of Engineering to undergraduate and graduate students. At the undergraduate level, the class is part of the new Certificate in Innovation, Product Design and Entrepreneurship. The class is designed to introduce the student to the core business concepts behind innovation and entrepreneurship. The class is highly interactive, and students will be required to participate in groups and individually. Grading is heavily weighted around participation in the group project which will be ongoing throughout the semester. The class is taught by Babs Carreyer, Director of Education & Outreach, Innovation Institute at Pitt. Guest speakers, who are experts in their fields, will supplement the core teaching. Topics covered will include: ideation, problem/solution, market opportunity, competitive analysis, customer discovery, pitching, funding, finance, legal issues, team building, and innovation within existing companies.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### ENGR 2080 - LEAN LAUNCHPAD: EVIDENCE-BASED ENTREPRENEURSHIP

Conventional wisdom regarding starting a business is dead wrong. This conclusion led Steve Blank and others to develop the lean startup method, an approach for systematically exploring the business model needed to make an idea into a success. In Blank's own words: 'existing companies execute a business model, startups search for one. This distinction shapes the lean definition of a startup: a temporary organization designed to search for a repeatable and scalable business model.' In this course, we discuss the basic elements of the lean startup method and apply them to the domain of engineering product and customer development. Students are expected to come to the class with their own idea(s) for potential product offering(s), which they will then test using the lean startup approach over the course of the term.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

### ENGR 2090 - GRADUATE ENGINEERING COOPERATIVE PROGRAM

**Minimum Credits:** 1

**Maximum Credits:** 1

**Academic Career:** Graduate

**Course Component:** Independent Study

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

### ENGR 2092 - GRADUATE ENGINEERING INTERNATIONAL COOPERATIVE PROGRAM

**Minimum Credits:** 1

**Maximum Credits:** 1

**Academic Career:** Graduate

**Course Component:** Independent Study

**Grade Component:** Grad LG/SNC Basis
ENGR 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to application of theory to practical aspects of nuclear science and technology. It is intended as a ramp-up course for non-nuclear engineers who wish to pursue additional graduate level courses in nuclear engineering at the University of Pittsburgh. Graduate level content will be assured by the use of rigorous quantitative homework assignments, take-home exams, and an individual research project to be presented at the end of the semester. This course is designed to accommodate working adults who must travel from time to time though it is not designed to be taken completely asynchronously. Topics will include: atomic and nuclear physics, nuclear reactions and radiation, radiation protection, fission reactor basics, neutron diffusion, time-dependent reactors, reactor thermal-hydraulics including nuclear heat generation, conductive and convective heat transfer, ideal and non-ideal fuel rod analysis, thermodynamics, and a review of major nuclear criticality and power plant accidents.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Engineering (PENGR)

ENGR 2101 - NUCLEAR CORE DYNAMICS

Minimum Credits: 3
Maximum Credits: 3
This course reviews the mathematics of nuclear reactor kinetics. Linear systems of ordinary differential equations are solved by state vector techniques, Laplace transform techniques, or finite difference techniques including the treatment of discretization errors resulting from various finite differencing approximations. A review of the physics of nuclear kinetics is followed by treatments of the kinetics equation including the effect of uncertainties, approximate solutions, and the interpretation of experiments to measure kinetics parameters. Representations and the physical basis of reactivity feedback mechanisms are treated. Lumped and distributed parameter models of fuel, coolant, fission products, and selected plant components are derived and applied to develop quantitative static relationships and qualitative dynamic results for transient conditions. The course provides an introduction to reactor protection and safety analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course provides an integrated engineering examination of a nuclear power plant from the perspective of instrumentation and control systems used to infer the condition of the nuclear plants and its systems, control its normal operation, and provide protection during transient situations as well as assess core damage during severe accident situations. Students will apply previous knowledge of analog, digital, and microprocessor electronics techniques to nuclear power plant design and operation and reactor protection and safety considerations that influence the design of the reactor plant. A major outcome of this course will be an integrated understanding of the interaction between the physics of nuclear plant control (reactivity and heat balance) and the control and protection systems. This integrated plant understanding will be essential for the successful completion of the integrated nuclear power plant operations course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE

Minimum Credits: 3
Maximum Credits: 3
This course examines design bases for major systems and components in a nuclear plant and evaluates how the systems function in an integrated fashion. The student will examine a typical nuclear power plant and those components and systems of the nuclear plant complex that have the potential for affecting core power, and whose failure could be an initiating event for a plant transient. Dynamic relationships for the systems developed in the companion nuclear courses will be transformed into stable, numerical algorithms for computer solutions and system interactions will
be illustrated using a major industry transient analysis code. Emphasis is on how operations of and faults in systems and components can influence reactivity and core behavior. Through classroom discussions the students will assess engineering problems and operational problems that have been experienced in historical nuclear plant operations. The intended outcome is an aptitude for predicting complex transient behavior of the integrated nuclear plant considering factors that are important for safe and efficient operation: reactivity management and control, coolant inventory control, and core heat removal.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Nuclear power is an abundant and renewable power source with unique characteristics which require special attention in its design, licensing and operation. This course explains the fundamental plant processes: nuclear fission, neutron kinetics, heat transfer, chemistry and feedback mechanisms, showing how variations in one plant parameter can propagate effects in the others in ways not seen in fossil, solar, wind, or other systems. The student will also learn methods for analyzing these processes, and the relationship of their features to normal and off-normal plant operations, up to and including postulated severe accidents. Both deterministic analysis and Probabilistic Risk Assessment (PRA) will be employed, with exercises provided in both approaches. Similar concepts will also be applied to the design, manufacture and utilization of nuclear fuel. Stress is placed throughout on the defense in depth concept, and the nuclear safety cultural approach - a necessary point of view regarding how tasks are approached and conducted, whether they be analytical or operational.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ENGR 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course promotes understanding of how the integrated nuclear plant works and what challenges the operator faces, and helps an engineer 'speak operations' with interfacing groups. Use of the replica simulator is an effective way for students to understand accident control, emergency operating procedures, and how the control room interfaces with the rest of the plant. Emphasis is placed on understanding plant characteristics and controls, rather than on developing control manipulation skills. Intended outcomes are an aptitude for predicting transient behavior of the integrated plant and a command of reactivity management and control that is important for efficient operation of a nuclear plant complex. The course presumes knowledge of the major systems in a nuclear power plant and will emphasize how operations of and faults in those systems and components can affect reactivity and core transient behavior.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ENGR 2110 - NUCLEAR MATERIALS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

In this course, materials principles are taught in the initial lectures; students do not need to have prior understanding of them. The course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well as the effects of irradiation on corrosion performance, and the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

**Academic Career:** Graduate  
**Course Component:** Lecture
ENGR 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Nuclear and radiochemistry are subdisciplines of nuclear science that focus on the study of radioactive materials and their applications. The course will provide students with knowledge of fundamental nuclear science concepts that are key to the understanding of nuclear power plant safety, spent fuel and nuclear waste management, environmental radioactivity, nuclear forensics, radionuclide production, medical imaging, nuclear pharmacy, and medical and health physics. The proposed course will consist of lectures on nuclear science fundamentals that include: atomic structure, nuclear models and properties, phenomenon of radioactive growth and decay, radiation emissions, nuclear reactions, radiation interactions with matter, radiation detection and measurement, radiation dosimetry and biological effects, and applications of nuclear and radiochemistry in science, engineering, and medicine.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2113 - RADIATION DETECTION AND MEASUREMENT

Minimum Credits: 3
Maximum Credits: 3
This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical basis of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ME 2100 or ENGR 2100; PROG: Swanson School of Engineering

ENGR 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS

Minimum Credits: 3
Maximum Credits: 3
This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY

Minimum Credits: 3
Maximum Credits: 3
BWR Thermal-Hydraulics and Safety is a course that focuses on the Boiling Water Reactor (BWR), design, operation, transient response, and abnormal operating conditions and accidents; boiling water heat transfer and two-phase flow; applications with respect to the Fukushima Daiichi BWR's. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. Thermal-hydraulics (T/H) and safety portions of the lectures cover boiling heat transfer and two-phase flow in BWR systems, T/H performance and thermal
limits. BWR abnormal operating conditions and accidents are studied in theoretical response followed by hands-on simulator program exercises. Finally, accident evaluations and overview of the state-of-the-art safety analysis techniques for licensing applications are reviewed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 2118 - COMPUTATIONAL RADIATION TRANSPORT**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course provides an in-depth review of modern computational techniques used for solving the linear boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte carlo methods for the simulation of radiation transport, a first-principles derivation of the boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also places a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Graduate students will develop the graphics/simulation framework and the underlying mathematical models for simulating nuclear power plants in ME/ENGR 2120 mathematical modeling of nuclear plants. Models will be developed in Matlab/Simulink(tm) and configured to run on a PC so that students can both examine the mathematical models on which the simulation is based and use the simulation program in laboratory-like sessions to study the effect of design changes on plant behavior. The simulation model fidelity developed is suitable for educational purposes and provides students with a desktop tool to realistically model and better understand reactor performance under various conditions. While it would not be intended to replace or duplicate the high-fidelity dynamic simulation used in major accident analysis codes such as Relap, Trac, and Trace, the course will provide the student with an introduction and a working knowledge what is embodied in these industry standard codes.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course will teach management theory and best practices associated for a successful manager in the nuclear industry. The following topics presented and discussed: management theory and practice; ethics; generation economics across the U.S.; dispatch curves; implications of economic factors for existing and new nuclear plants and likely future changes; compensation theory and best practices; labor law issues and challenges common to the nuclear industry; contract law issues and challenges in the nuclear industry; management techniques for dealing with the diverse age groups; change management techniques and best practices in corporations; ethics challenges and issues in the nuclear field; management interactions with inpo and the nrc; project management techniques and practices; management's role in nuclear safety and security culture. Case studies of actual business situations will be studied.

**Academic Career:** Graduate  
**Course Component:** Lecture
ENGR 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS

Minimum Credits: 3
Maximum Credits: 3
Presentation of major issues associated with systems and component engineering relative to the nuclear power industry and the industry's consensus codes and standards. The course provides an explanation of the necessity of consensus codes and standards, a high-level view of codes and standards organizations, and shows how codes and standards promotes the safe operation of nuclear power plants. The course discusses how the NRC adopts and makes use of consensus codes and standards. It covers codes and standards for current, advanced and next generation, and high-temperature reactors, including global conformity assessment requirements. Relevant codes and standards from other communities, including nuclear quality assurance, are also summarized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2130 - THE NUCLEAR FUEL CYCLE

Minimum Credits: 3
Maximum Credits: 3
Studies the entire nuclear fuel cycle, beginning with the mining of uranium ores and progressing through the chemical and physical processes supporting enrichment, subsequent chemical conversion to uranium dioxide, and design and fabrication of fuel assemblies for use in a power reactor core. Aspects associated with fuel core management, operation and utilization in the reactor core along with the regulatory licensing requirements are presented. Following fuel operation the areas of fuel onsite handling, transportation of spent nuclear fuel and options for diverse long term secure storage are reviewed and evaluated. Reprocessing and recycling are discussed which includes fuel resource utilization, proliferation control, and waste volume minimization. Discussion of regulatory issues completes the picture, enabling the student to understand not only the processes, economics and industry drivers, but also the benefits and issues that have been addressed with nuclear power generation. In all phases of the cycle, the student is acquainted with the quantitative techniques and methods employed in the nuclear fuel cycle.

ENGR 2131 - SPECIAL TOPICS IN NUCLEAR ENGINEERING, METAL COOLED REACTORS

Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide you with an understanding of the technology associated with high-energy neutron reactors (most often called fast reactors). The course materials consist primarily of archival papers from literature, the GENIV International Forum materials, my slides, and the time we spend together during lectures; a bibliography of papers relevant to these reactors is provided in the course syllabus. Although many nations' sodium-cooled reactor programs continue to be based on oxide fuel, there is a better way—metal fuel. In this course, the student will become more aware of the state of high-energy neutron reactor technology. Moving nuclear power from low-energy neutron fission (water-cooled reactors) to high-energy neutron fission (metal-, salt-, or gas-cooled reactors) will revolutionize fission, just as jet engines and fracking revolutionized commercial air transportation and oil/gas production, respectively. We will focus on metal-cooled high-energy neutron reactors, but you can easily transpose this knowledge to salt or gas systems.

ENGR 2210 - UNDERSTANDING BRAZIL-PREPARATIONS FOR RESEARCH AND STUDY IN BRAZIL

Minimum Credits: 2
Maximum Credits: 2
This seminar is specifically designed for students who will be doing research and/or studying in Brazil. It introduces the economic, political, social,
and cultural aspects of Latin America in general and Brazil in particular. The seminar is organized and conducted by the center for Latin American studies, and features guest lectures from on Brazil, readings from current popular literature and news sources (available from the Eduardo Lozano Latin American collection, a library resource of over 340,000 volumes spanning 30 years), and contemporary films (such as decade of destruction: killing for land and Brazilian populations: stories and myths). The first half of the course will introduce students to day-to-day life in Brazil, as well as its current socio-economic situation, the influence of politics and ethnic relations, and the many aspects of Brazilian culture. The second half will focus on disciplinary perspectives that allow students to explore regional issues from a variety of viewpoints. The final seminars in the semester will be used for the presentation of individual student reports on a topic related to Brazilian life, such as the governmental structure, university system, or integration of technology with indigenous lifestyles and traditions. This course is required for all Igert fellows.

**ENGR 2230 - PORTUGUESE 3 FOR ENGINEERS**

Minimum Credits: 3
Maximum Credits: 3
This third semester of Brazilian Portuguese is specifically designed for engineering students who will be doing research and/or studying in Brazil. The course covers technical and educational terminology through examination of Brazilian sustainable engineering case studies while further advancing the students' knowledge and ability in Brazilian Portuguese. The course will further enhance the cognitive skills of engineering students, and give them an appreciation of the interrelation of career paths, language skills, and cultural awareness. This course is required for all fellows.

**ENGR 2282 - GERMAN ENGINEERING CULTURE GRAD**

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the day-to-day business issues facing German engineers. The course will cover service businesses in Germany, workplace culture, digital factories, engineering law in Germany and a project that will tackle solving real engineering problems. Students learn to analyze typical German cultural aspects in order to understand differences in the social system of a company and use the knowledge to improve the processes and structures. Students work with appropriate analytical methods and apply their knowledge on real business examples, given by experienced international Managers.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

**ENGR 2450 - ENGINEERING- THE GERMAN WAY**
Minimum Credits: 1
Maximum Credits: 18
This course highlights the German approach to engineering from various perspectives. It is designed as a mixture of in-class lectures and industrial experience in the form of factory tours. Four broad topics are addressed from the German perspective: (1) R&D management, (2) production and manufacturing systems, (3) digital factory layout and factory simulation, and (4) product-ergonomics and ergonomic aspects in manufacturing. In addition, students select one of two additional options dealing with unique aspects of the German business economy: (1) the nature of cooperation between trade unions and employers or (2) the impact on technology law and harmonization on engineering in Europe.

ENGR 2600 - GLOBAL ENGINEERING TECHNOLOGY: INNOVATION AND LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
Globalization and innovation will be studied with a particular emphasis on China in conjunction with the Innovate 2011 conference. As such the course provides both the preparation for the conference and the post-conference synthesis of what was learned during the conference. The course will be jointly taught by University of Pittsburgh and rice University faculty exclusively for those students who will be delegates to the innovate conference. Guest lecturers will be invited from the two participating universities who will discuss the history, government, religion, business climate and culture of China. This course requires participation in the Innovate 2011 symposium that will visit Beijing, Suzhou, Hangzhou and Shanghai China from March 3 - 13.

ENGR 2625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA

Minimum Credits: 3
Maximum Credits: 3
This course will focus on studying modern engineering and business principles, methods, and tools, within the context of the Indian environment. The three focal areas of study are: manufacturing systems, service engineering operations, and call centers. A visit to India will showcase challenges and opportunities available at the corporate level and at the individual level in this rapidly growing economy. It will also focus on the societal impacts of new technologies and rapid expansion of engineering industries in India. Students can utilize this forum to analyze and visualize service manufacturing engineering challenges and opportunities around the world. Plant visits and interfaces with engineering students and practicing engineers will allow students to appreciate the following professional characteristics: ethics, the ability to work with others, an appreciation for other disciplines, adaptability, and an appreciation for life-long learning.

ENGR 2631 - INTRODUCTION TO MINING ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The course introduces students to: 1) the history and importance of mining, 2) the exploration and development of surface and underground mines, 3) modern mining methods and operations, 4) common mining equipment, 5) fundamentals of mine ground control and ventilation, 6) elements of coal
preparation and mineral processing plants, and 7) mine health and safety management. It is designed to provide students with basic understanding of the primary elements of a mining operation and the engineering issues associated with operating a mine in a safe, effective, and sustainable manner. The mining industry is replete with technical jargon and specialized processes and machinery that require mastery by students prior to exploration of more technically complex engineering coursework. Introductory lectures and field trips help to prepare students for the rigors of studying the other mining engineering courses offered within the Swanson School of Engineering. Course Requirements: (PROG: Swanson School of Engineering) or (PLAN: Geology (BS or BPH))

ENGR 2632 - SUSTAINABLE DEVELOPMENT AND THE MINERAL INDUSTRY

Minimum Credits: 3
Maximum Credits: 3
The course begins by examining the needs of society and commercial entities engaged in mineral production. Well conceived and designed mineral or solid fuel projects exercise a balance between economic prosperity, environmental health, and social equality. These concepts are then integrated into a case study, where the feasibility of a proposed mining project is analyzed. This examination forms the underpinnings of a course project report.

Academic Career: Graduate

ENGR 2633 - MINERALS INDUSTRY RISK MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Explores the concepts, models and methods used to create and support the implementation of risk management within minerals industry organizations. Models and methods include life cycle model, work process model, risk analysis methods and risk assessment methods used to implement a minerals industry risk management framework.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2634 - ENVIRONMENTAL CONTROLS IN MINING

Minimum Credits: 3
Maximum Credits: 3
The course is designed to study the environmental impact of coal, stone, and other mining operation and examine the engineering controls used to mitigate these impacts. The examination begins with the exploration and permitting of the mine site, emphasizing important environmental issues. Next, the impacts of active mining on land and water use are outlined. Most of these issues are related to subsidence impacting surface structures and water movement both at the surface and underground. To complete the mine's life cycle, closure and remediation issues are investigated. Lastly, a detailed examination of the issues associated with abandoned mined-lands, i.e. Acid-mine drainage, mass-wasting, fires, etc., Are studied. Throughout the course, engineering controls that focus on mitigating the environmental impacts of mining are acknowledged and assessed.
ENGR 2635 - MINE VENTILATION ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course provides the skills needed to analyze and design ventilation systems for underground mines based on 1) regulatory requirements, 2) health concerns for workers, 3) levels of dusts and toxic or explosive gases present, 4) mining methods used, and 5) splitting and delivery of different quantities of air to various workplaces.

Academic Career: Graduate
Course Component: Lecture

ENGR 2801 - INTRODUCTION TO CYBER-PHYSICAL SYSTEMS

Minimum Credits: 1
Maximum Credits: 1
This course is an introductory course to be taken with hacking for defense (h4d). It will introduce lean startup concepts used (h4d), and will present fundamental and necessary background information in cyber-physical systems (more generally described as mechatronics and the internet of things). Topics covered include: embedded systems and micro-controllers, interfacing with physical systems, networks, communications, and mobile platforms.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ENGR 2811 - HACKING FOR DEFENSE
Minimum Credits: 3
Maximum Credits: 3
This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

ENGR 2900 - GRADUATE FELLOWSHIPS & PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad HSU Basis

ENGR 2905 - CURRENT ISSUES IN SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce the core principles of sustainability (i.e. Social, economic, and environmental) from the perspective of several disciplines and research fields. Covering a variety of topics such as urban infrastructure, energy policy and the environment, sustainable water-use, habitat sustainability and biodiversity, the curriculum and schedule are updated annually to reflect advancements in the field of sustainable engineering and
science, and to continually incorporate current topics. While the course is primarily taught by the sustainability faculty fellows it will also consist of various guest lectures by sustainability faculty and senior practitioners working throughout the Pittsburgh region. Course assignments will consist of a series of essays and assignments and culminate in a team term project. This is a required course for the undergraduate sustainability certificate and the M.S. in Sustainable Engineering.

**Minimum Credits:** 1  
**Maximum Credits:** 1

Designed for graduate students and postdocs preparing for academic careers in the stem disciplines, this course provides an introduction to the scholarship of teaching and learning (SOLT). This is the second course in a series; however, the former course (3001) is not a required prerequisite. The course will utilize material presented in a massive open online course (MOOC) available through coursera.org and sponsored by the center for the integration of research, teaching and learning (CIRTL). Participants will learn about effective teaching strategies and the research that supports them in addition to learning how to collect, analyze, and act upon their own evidence of student teaching. Topics include but are not limited to: 1. Learning through diversity, 2. Cooperative learning/peer instruction, 3. Inquiry-based labs, 4. Problem-based learning, 5. Flipped classroom pedagogy. Further, participants will learn the process for developing a teaching as research plan as well as the role of human subjects consent for classroom based research.

**Academic Career:** Graduate

**ENGR 3004 - ADVANCED PREPARATION FOR FUTURE STEM FACULTY**

**Minimum Credits:** 1  
**Maximum Credits:** 1

This seminar series is designed for Ph.D. students and post-doctorate fellows interested in pursuing an academic career. Specific topics can vary
depending on interest, but may include preparing for faculty job applications and interviews, research mentoring practices, and advanced best practices and pedagogy in STEM teaching. Experienced faculty provide topics and discussion based seminars.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: ENGR 3001 and ENGR 3002 or EQUIVALENT; PROG: PENG

ENGR 3100 - ENGINEERING RESEARCH LEADERSHIP AND MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course teaches the necessary skills to be a successful researcher including skills in research formulation, funding, proposal writing, peer-review, and research management. Topics include project management, team leadership, professional communication, and professional expectations for independent researchers. A peer-review aspect of the course actively teaches the editorial and review process, and how to take a critical view of writing. This course is intended for students who intend to be independent researchers and engineering research leaders.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

ENGR 3200 - ENGINEERING SUSTAINABILITY CAPSTONE DEFINITION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Two-semester, interdisciplinary, team-based Ph.D.-Level capstone design course sequence required by IGERT students and other interested graduate students. The courses will require the application of rigorous analytical thinking and research investigation techniques in order to address a real-world, complex problem. The first term of the course will be at Pitt with the second term at unicamp. Project topics will be developed in combination with recommendations from various stakeholders. Research will be firmly rooted in industrial needs. The problem will build upon the combined students' acquired engineering knowledge and will require collaboration to resolve. The capstone courses will reinforce the community-building aspect of the IGERT, since students will work in teams both at Pitt and unicamp.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

ENGR 3210 - ENGINEERING SUSTAINABILITY CAPSTONE REALIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A two-semester, interdisciplinary, team-based Ph.D.-Level capstone design course sequence required by IGERT students and other interested graduate students. The courses will require the application of rigorous analytical thinking and research investigation techniques in order to address a real-world, complex problem. The first term of the course will be at Pitt with the second term at unicamp. Project topics will be developed in combination with recommendations from various stakeholders. Research will be firmly rooted in industrial needs. The problem will build upon the combined students' acquired engineering knowledge and will require collaboration to resolve. English Film Studies

ENGFLM 2425 - BLACK TIME: AFROFUTURISM, AFROPESSIMISM, AND BEYOND

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2451 - FILM HISTORY/THEORY

Minimum Credits: 3
Maximum Credits: 3
This course will explore issues relating to film theory, history and research methodology. We will discuss dominant modes of film criticism and explore the creation of "cinema history". We will examine different formulations of this history, tracing how certain explanations of events in cinema have come to prevail, and how certain methods of writing about film have become institutionalized.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies, Global Studies

ENGFLM 2452 - FILM HISTORY/THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g. Cavell, Deleuze, Frampton, Kluge, Gunning, Mulvey), there will be special attention paid to historical and theoretical arguments within film studies, such as: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from Imax to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2455 - FILM HISTORIOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
This course will look into theories of film history exploring philosophies behind their social, political, economic, technological, and textual stakes. We will analyze how various forms of film history, intellectual and popular, assert their truth and credibility, and discuss how these kinds of claims might be supported and contested. We will explore the problems of writing film history, particularly in eras where little material survives for any kind of study or where language becomes a major barrier.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

ENGFLM 2456 - FILM STUDIES AS A DISCIPLINE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2458 - ESSAY FILM/DOCUMENTARY FILM

Minimum Credits: 3
Maximum Credits: 3
This course will explore documentary from critical and creative vantage points. Key theoretical texts from the interdisciplinary field of documentary studies will address the pertinent ethical, formal and thematic concerns.
ENGFLM 2459 - DOCUMENTARY THEORY & PRACTICE

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore documentary film and video from critical and creative vantage points. Students will be introduced to key discussions from within the interdisciplinary field of documentary studies while also working on individual and collaborative short documentary projects and exercises. Hands-on training in audiovisual recording and editing techniques will be provided. No prior production experience is required.

ENGFLM 2467 - CINEMA AND TRAUMA

Minimum Credits: 3  
Maximum Credits: 3  
Trauma studies now stands at the forefront of contemporary cultural theory, straddling such disciplines as history, psychology, philosophy, and literary criticism. This seminar encourages graduate students to examine and contribute to the rapidly emerging sub-field of cinema/trauma studies. We will focus on the two mid-twentieth century events that continue to anchor many definitions of historical trauma: the Holocaust and Hiroshima. What do films that address these events teach us about the politics and ethics of representing experiences often referred to as unrepresentable? How does cinema force us to refigure debates about the "limits of representation" and the nature of "the event" itself? Is cinema an agent of memory or memory's eraser? A broad range of films will inform our discussion of such questions - documentary and fiction, tragedy and comedy, mass cultural successes and lesser-known art films or genre films, films from the past and present.

ENGFLM 2471 - CINEMA AND PSYCHE

Minimum Credits: 3  
Maximum Credits: 3  
From the earliest years of film theory, writers have likened the discourse of cinema to the workings of the human mind. In 1916, for instance, Hugo Munsterberg (in "the photoplay") drew parallels between film language and recollection, attention, and anticipation. This course (through readings and film screenings) will pursue such comparisons between cinema and the mind, investigating such topics as dream, memory, fantasy, nostalgia, perception, cognition, affect, etc.

ENGFLM 2480 - WAR AND CINEMA

Minimum Credits: 3  
Maximum Credits: 3  
This course theorizes the convergence of military and cinematic technologies, focusing on the logistics of perception, bio-politics, and the relation of cinematic/military technologies to the body. Topics include the military, medical, and cinematic uses of the scope and the screen, theories of human vision and ocularcentrism, new conceptions of space and time, the temporal convergence of production and exhibition (speed and acceleration), new media technologies, and the blurred boundaries of war and entertainment.

ENGFLM 2485 - GENRE AND FILM MELODRAMA
Minimum Credits: 3
Maximum Credits: 3
Course will interrogate the cultural impact of melodrama through the media. We will explore the various expressions of melodrama in gothic narratives, the "woman's film", historical films, "tragic" melodramas, family melodramas, and TV docudramas. Topics addressed include questions about common sense/folklore and the nature of mass and popular cultural representation, the problematic nature of genre, the relation between melodrama, history, and the construction of narratives of national identity in relation to race, gender and sexuality.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

ENGFLM 2491 - FILM SOUND: HISTORY, THEORY, AESTHETICS

Minimum Credits: 3
Maximum Credits: 3
Questions framing the course include the relation of sound and image, aural and visual pleasures, soundscapes and theories of shock and modernity, the relation of voice and body to subject formation, sound in silent cinema, the aesthetics of analog and digital sound in cinema, sound technologies and imperialism, theories of non-cinematic audio technology such as radio and gramophone, debates over the ontological status of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2493 - MEDIA/ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
This seminar with explore media theory and practice through the lens of ecology. From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems, the technological assemblages with which they are intertwined, and the human (and non-human) subjects that are produced molded within these structures. This seminar will explore both media that interface with natural ecosystems as well as works and theory that approach mediation from an ecological and systems theoretical perspective. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment and an important frontier in media studies of the present. Graduate students from all disciplines are welcome. Participants may optionally produce creative projects in lieu of a seminar paper, in any medium.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2494 - KEY CONCEPTS IN NEW MEDIA

Minimum Credits: 3
Maximum Credits: 3
What exactly is "information"? What is an "interface"? What does it mean when we speak of a "media platform"? These terms and concepts form the backbone of the major theories and discourses in new media, which produce a rich vocabulary that has yet to be rigorously defined. This course aims to provide a theoretical map to navigate the rapidly expanding fields of media studies by critically interrogating a set of key concepts that have been extensively used to deal with the technologies, forms, materials and cultures of new media. We will discuss the meaning, usage, and genealogy of such concepts as "network," "cybernetics," "hardwire," "infrastructure," and "system," which have animated a wide range of researches and debates. By critically engaging with these key concepts, we hope to not only reconstitute a framework for theorizing contemporary media, but to explore the very notion of "media" as a discursive formation.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGFLM 2496 - MEDIA AND MOBILITY

Minimum Credits: 3  
Maximum Credits: 3  
Mobility has been one of the central functions and consequences of media technologies, from papyrus in ancient history to mobile phones in the digital era. This seminar seeks to conduct a thorough theoretical mapping between media and mobility, creating a productive framework in which media can be examined through the ways in which they facilitate, mediate, and regulate various modes of mobility of humans, things, and ideas.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGFLM 2500 - WOMEN DIRECTORS IN FILM AND TELEVISION

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGFLM 2660 - SEXUAL REPRESENTATION AND CINEMA

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Film Studies

ENGFLM 2661 - QUEER THEORY, QUEER CINEMA

Minimum Credits: 3  
Maximum Credits: 3  
This seminar explores film (also TV and theater) textuality and reception from a "queer" perspective. What is the relationship among queer authors, queer textuality and the subcultures that consume these texts? What place does non-heteronormative sexuality occupy within the production and reception of mass culture? The course will cover: foundational works in the history of sexuality; camp and gay subcultural reception; gay and lesbian authorship of both Hollywood and avant-garde films; the rise of queer television drama; and queer critical practices.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGFLM 2695 - HORROR FILM

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will investigate the key films and critical discussions surrounding the genre from its beginnings to the present, but not merely to perform a genre survey—instead we will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film studies in profound ways.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGFLM 2700 - ANIMATION THEORY

Minimum Credits: 3  
Maximum Credits: 3
This course will approach animation as a method, a way to rethink film theory beyond the assumption of an essentially photographic medium, and to unearth and explore the previously underdeveloped territories in theorizing and making sense of moving images.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2710 - GLOBAL FILM STARDOM

Minimum Credits: 3
Maximum Credits: 3

Historically, film stardom was examined from an American perspective (where it originated in Hollywood in the first decades of the last century), and theories of stardom emerged from an implicitly Hollywood-based understanding of cinematic fame. Instead, while not ignoring the American cinema, this course will take a global perspective on stardom, in terms of performers, films, and theories. Our approach to stardom will be a combination of the historical, the theoretical, and the textual. This means that in addition to studying individual stars, we will also 1) consider the phenomenon of stardom in terms of its origins and the cultural and national institutional conditions that support it, 2) analyze stardom as a public phenomenon to be understood in the context of specific cultures and audiences, 3) discuss various theories of stardom, celebrity, and public fame, 4) consider the manner in which issues of gender and sexuality impact notions of stardom, and 5) consider the relationship between stardom and spectator subjectivity. Although the course will be focused on cinema stardom, we will also briefly consider theoretical overlaps with the broader category of celebrity studies. In general, when we look at individual stars in the course, we will consider their broad "star text" which involves the interrelationship of screen roles, off-screen information, publicity material, and cultural context. Questions raised will include: what constitutes a "star text" in different historical contexts and ideas about the public and the private? What specifically do the media of photography and film bring to public fame? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? What does stardom mean in old and new transnational contexts? What is the relation between stardom, nation, and politics?

English Literature

ENGLIT 2001 - STUDIES IN THE HUMANITIES

Minimum Credits: 1
Maximum Credits: 1

In this course, graduate students read and discuss new scholarship in an area of the humanities that will be the subject of a one-week seminar sponsored by the humanities center.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

ENGLIT 2002 - INTERDISCIPLINARY METHODS IN THE HUMANITES

Minimum Credits: 3
Maximum Credits: 3

This course will theorize and practice interdisciplinary research methods. A central focus of inquiry is how interdisciplinary research might shift the content and scope of our scholarship. How might it shift our disciplines? What are the gains, losses, and syntheses entailed in that shift? (For example, how might fieldwork benefit literary critical projects?) Readings will address debates in anthropology on fieldwork; oral history methods; and the applicability to the humanities of qualitative research methods from the social sciences. Students will write a final paper in which they launch or develop an interdisciplinary research project that fits their research interests. The paper could be a step towards their manuscripts or dissertations or a more contained project.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2003 - LITERARY STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course examines topics in literary studies in relation to current developments in the field of literary studies.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2005 - SPECIAL TOPICS IN LITERARY STUDIES

Minimum Credits: 3
Maximum Credits: 3
This seminar studies the most important recent developments in the fields of literary and cultural criticism. It both introduces students to a range of topics, methods, and theories and explores deeply the historical, conceptual, and societal significance presented by all these. The course introduces students to, and helps them learn to evaluate, the most important contemporary work in English studies.
Academic Career: Graduate
Course Component: Seminar

Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2009 - DIGITAL/CRITICAL INTERDISCIPLINARY METHODS

Minimum Credits: 3
Maximum Credits: 3
This collaboratively taught seminar exposes students to interdisciplinary and evolving methods for discovery and knowledge construction in the humanities and social sciences. In particular, it focuses on how information flows in and out of sociotechnical systems, the ways that researchers access, arrange, organize and describe information for use in their disciplinary context and how that shapes critical inquiry. Students will do hands-on work with data and methods and interrogate their affordances and limitations. Mini units in this course will be led by faculty from History, Political Science, Economics, English, Sociology, Information Science, and History of Art and Architecture who are involved in the Mellon grant-funded Sawyer Seminar, Information Ecosystems: Creating Data (and Absence) From the Quantitative to the Digital Age, which will feature invited speakers and support several post-docs and grads in AY 2019-2020.

ENGLIT 2020 - SCALE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2041 - PUBLIC HUMANITIES

Minimum Credits: 3
Maximum Credits: 3
This course has two goals: 1.) to explore what the term "public humanities" means; and 2.) to help graduate students in the humanities connect their academic work to public spaces and organizations. With regard to the first goal, our readings and discussions will focus on questions such as: What are the humanities? Are they publicly valuable? If so, are they publicly valuable in ways that differ from other academic disciplines? With regard to the second goal, the course will involve frequent guests and site visits to cultural institutions that will allow students to see the humanities at work in local spaces. Students will also be responsible for designing and executing a public humanities project during the term. The projects will require that students engage with public spaces in developing their work, but will depend on students' prior experience with public humanities for their specific content. Students with a significant degree of public humanities experience may wish to create and implement a collaborative humanities- or arts-based project with a local cultural institution. Those just beginning to think about the relationship between their academic work and non-academic spaces may wish to explore opportunities for public engagement that fit their research interests and methods. Whatever the case, students will work to better formulate the relationship between their academic work and public spaces, and design and/or execute projects based on these formulations.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2064 - THE BODY NOW: MATTER, FORM, AND TEXT

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate

ENGLIT 2131 - SHAKESPEARE, GENDER AND SEXUALITY

Minimum Credits: 3
Maximum Credits: 3
This course will read some of Shakespeare's plays, emphasizing criticism and theory dealing with gender and sexuality. It will also consider historical difference and related controversies, through such means as reading other early modern texts and history, studying the influence of both dominant and dissident perspectives in later interpretations of his works, or analyzing how recent productions in film and other media deal with gender and sexuality in his plays.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Medieval & Renaissance Studies
ENGLIT 2135 - KEYWORDS: HISTORY AND PRACTICE OF CROSS DISCIPLINARY RESEARCH

METHOD

Minimum Credits: 3
Maximum Credits: 3
Keywords: a vocabulary of culture and society by Raymond William (1976, 2nd ed., 1983) is one of the most important works by one of the founders of cultural studies. Keywords is made up of short essays that take crucial terms in contemporary social and political debate and use their philological history as a means of engaging with their contradictory current issues and meanings. Its combination of scholarship with relevance has proved inspiring and offers a model of how academic work can prove socially significant. A group of scholars from Pitt with colleagues from other universities is working to update Williams's work. See the website: this course aims to introduce students both to methodological and substantive issues that formed Williams's work and the uses to which it may be put.

Maximum Credits: 3
Academic Career: Graduate
ENGLIT 2192 - OSCAR WILDE AND THE 1890S

Minimum Credits: 3
Maximum Credits: 3
This graduate course presents the major works of Oscar Wilde in the context of other texts from European and Anglophone writers at the end of the nineteenth century. Wilde's writing is considered in the contexts of literary and theoretical movements such as aestheticism and realism as well as in relation to philosophical and scientific discourses.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

ENGLIT 2239 - BLACK CRITIQUE AND THE BLACK RADICAL TRADITION

Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the advent and unfurling within modernity of a distinctive set of critical practices and thought that have over the centuries given expression to radical political events, such as the Haitian Revolution, as well as political movements, such as the Black Panther Party, and Black Lives Matter. In other words, we shall engage two questions: that of critique, asking whether it is an activity essential to the continued pertinence of the concept of revolutionary republicanism. Second, whether at this current conjuncture, radicalism is the best purchase from which to engage critique. In taking up this interrogation, we shall engage a wide array of texts, from political theory and social critique to literary representation, across multiple media, including those of image and sound.

Academic Career: Graduate

ENGLIT 2245 - STUDIO IN AFRICAN-AMERICAN POETRY AND POETICS

Minimum Credits: 3
Maximum Credits: 3
Explores the interplay of social history and literary texts in the emergence of modern black literature. Readings range from slave narratives to modern novels.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2260 - BLACK WOMEN'S PRINT CIRCUITS

Minimum Credits: 3
Maximum Credits: 3

Whether described as a flourishing, an explosion, or a blossoming, the renaissance of African American women's writing that began in the 1970s is now commonly accepted as the starting point, if not a signature feature, of what we consider the long era of contemporary African American literature. Engaging in bibliographic, archival, and critical work situated at the intersection of textual scholarship and African Americanist criticism, we will examine the gendered dimensions of late-twentieth-century African American print culture by studying the conditions of publication and distribution of black women's novels, short stories, poetry, drama, manifestos, periodical work, anthologies, and essays.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2261 - QUEER WOMEN OF COLOR RADICALISM

Minimum Credits: 3
Maximum Credits: 3

What if we approached the historical and theoretical traditions of activism, feminism, and Marxism using queer women of color as our starting point? We will address intersectional theory derived from Kimberly Crenshaw's legal discourse and how questions of subjectivity have been raised by scholars such as Jennifer Nash and Maria Lugones. However, the course takes its departure from earlier writings by queer women of color in the 1970s and 1980s that resisted multiple oppressions and placed class struggle as a central to social change, including Audre Lorde, Cherrie Moraga, Alice Walker, Gloria Hull, Patricia Hill Collins, and the collective writings from This Bridge Called My Back, the Combahee River Collective Statement, The Black Woman Anthology, and Keeanga-Yamahtta Taylor's How We Get Free. Using this collection of voices as our starting point, we will then look at recent issues and debates in activism studies, contemporary Marxist theory, and the crises of global capitalism, privileging indigenous and grassroots approaches to social change.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2321 - TRANSLATION AND WORLD LITERATURE

Minimum Credits: 3
Maximum Credits: 3

This seminar will examine the role of translation in the construction of world literature, defined for our purposes as a mode of circulation and of reading (David Damrosch). We will operate with an expanded concept of translation, not limited to issues of linguistic or cultural equivalence and attuned to multiple contexts of literary production and reception. Drawing on the work of Damrosch, Lefevere, Casanova, Venuti, and Apter (among others), we will trace key debates and consider factors that shape the global politics of translation today. We will discuss selected case studies and pursue our own translation-based scholarly projects.

ENGLIT 2380 - GLOBAL LITERATURE: POSTCOLONIAL FICTIONS

Minimum Credits: 3
Maximum Credits: 3
This course will explore postcolonial literature about both our contemporary moment and longer histories of globalization. Together we will ask: How does it illuminate current debates about world literature, the global south, globalization, planetarity, and the Anthropocene? What are the historical and theoretical dilemmas that each literary text responds to, and what formal resolutions does it fashion? What resources, what forms of dissent, do particular narrative modes and genres afford it? How does it deepen our understanding of actual and possible relationships between the local and the global? Where does it locate its literary genealogies, allies, affiliations, and audiences? What forms of collectivity does it imagine?

Minimum Credits: 3
Maximum Credits: 3
This course provides the opportunity for first-year teaching assistants and teaching fellows to develop strategies for teaching, to reflect on those strategies, and to consider the larger social, historical and institutional contexts that shape their teaching. The seminar will place students' work in the course they are teaching into dialogue with texts that focus on current critical questions and pedagogical theory and practice across English studies curricula.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2506 - WOMEN AND LITERACY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENGLIT 2507 - QUEER INSCRIPTIONS
Minimum Credits: 3
Maximum Credits: 3

Students consider inscription as a hermeneutic for exploring topics related to bodies, identity, and institutional language. Students will gain tools for analyzing & writing subjectivity. Topics include queer legal theory; rhetoric's of state punishment; and race and sexuality in labor negotiation. Course readings are likely to include authors such as b. Allen; j. Alexander; J. Butler; c. Cohen; q. Driskill; s. Mckinnon; e. Meiners; J. Halley; k. Ono; c. Rankine; c. Reddy; i. Reed; b. Smith; D. Spade; s. Somerville; & I. Volpp.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2509 - ORDINARY LANGUAGE

Minimum Credits: 3
Maximum Credits: 3

The purpose of the seminar will be to consider ordinary language theory and its bearing on composition and the teaching of writing. Readings will include an anthology of student essays, some standard work in composition (Mina Shaughnessy, Joe Williams, Jim Slevin, William Coles, Peter Elbow), and a selection of work in rhetoric and philosophy, with particular attention to IA Richards, Stanley Cavell, JI Austin and Ludwig Wittgenstein.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2524 - RHETORICAL GESTURES

Minimum Credits: 3
Maximum Credits: 3

This course explores historical, theoretical, and methodological approaches to gesture as a component of rhetorical invention. Topics to be considered include affect, kinesthesia, sympathy, and other modes and manifestations of bodily suggestion.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2525 - COMPOSITION STUDIES

Minimum Credits: 3
Maximum Credits: 3

This course will provide a general introduction to composition as an area of professional study. The purpose of the course is to introduce key texts (and forgotten texts) since the turn of the century, and to situate those texts in the development of English studies, the history of post-secondary education, and history of related work on writing. We will be looking at how the field has represented the subject as its own and at how the field has constituted itself as a "discipline".

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2528 - FOUR RHETORICAL THEORISTS: ARISTOTLE, KENNETH BURKE, MIKHAIL BAKHTIN, BRUNO LATOUR

Minimum Credits: 3
Maximum Credits: 3

The seminar will read key texts of four major theorists whose work has been and continues to be fruitful for composition, literature, and criticism and will sample some recent inquiries and arguments informed by their work. These thinkers cross our current disciplinary boundaries in ways that would interest students of composition, literature, criticism, and writing, and student inquiries engaging them in those fields would be all welcome course projects.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2532 - HISTORY OF RHETORIC

Minimum Credits: 3
Maximum Credits: 3
Figurative language has had, from the outset, a vexed status in Western philosophical/rhetorical systems, conceived by some as an aberrant form of representational discourse, by others as the most foundational unit of meaning. This course will examine three specific historical moments, each of which handles the conundrum of metaphor in a different manner: the classical period (Plato, Aristotle, Longinus, Quintilian); the romantic period (Coleridge, Shelley, Emerson, Whitman) and the modern period (T. S. Eliot, Wallace Stevens, I. A. Richards and Cleanth Brooks).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2542 - BLACK RHETORICS: "ALLS MY LIFE I HAS TO FIGHT" : STORYING BLACK RESISTANCE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2543 - ACTIVIST WRITING AND RADICAL RHETORIC

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2544 - RHETORICAL KNOWLEDGE, N PRODUCTION, AND PROFESSION CRAFT

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2547 - CRITICAL LITERACIES AND PEDAGOGIES ACROSS URBAN EDUCATION AND HIGHER EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course examines historical, theoretical, and practical relationships among reading, writing, language, culture, and schooling. Specifically, these connections are explored across urban education and higher education learning sites, both in-school and out-of-school. Ultimately, students will be expected to examine the curricular, pedagogical, and theoretical contexts that shape teaching and learning as a bridge to the continued development of their own pedagogical identities.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2549 - RHETORICAL METHODS IN COMPOSITION STUDIES

Minimum Credits: 3
Maximum Credits: 3
"Rhetorical Methods in Composition Studies" is an advanced introduction in rhetorical techniques for performing scholarship and creative work in
and around English departments. Participants will read recent and anti/canonical works of rhetorical scholarship and public-facing work (drawn from composition studies as well as poetry, public address, critical media studies, queer of color critique, fiction, and other textual fields) to build an archive of methods for composing rhetorical criticism and theory in University and other institutional contexts. Course assignments invite students to practice critical contributions to the question of what it means to do rhetoric work in and around University composition programs. Writers across all modes and disciplines are welcome.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2551 - TRANSLINGUALISM AND MULTILINGUALISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate seminar explores translingualism and multilingualism from the perspective of composition, rhetoric, and literacy studies.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2555 - THEORIES OF TEACHING/WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course we will examine intersections between teaching and writing theories in a number of ways. We will look at key transitional moments in the history of teaching/writing theory in the 20th century. In each case we will consider scholarly texts, companionable textbooks, and cultural constructs within which the teaching of writing gets framed. We will also look closely at a diverse array of contemporary textbooks, focusing specifically on the ways they pre-construct not only what good writing is and is for, but what a good student and a good teacher are supposed to do and believe to best promote it.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2560 - NARRATIVES OF TEACHING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will explore a wide range of narrative strategies, representing teaching and learning both in pedagogical scholarship and literary texts. We will study how scholars and writers portray their own teaching and that of others, paying special attention to how teachers characterize their students’ learning. The basic premise of the course is that representations of teaching and learning are inevitably problematic, because of all they omit from their narratives. Students will develop research projects, represent moments in teaching and learning.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2569 - HISTORY OF THE BOOK**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar is designed to encourage reflection on the assumptions that underlie our own scholars by investigating modern and post-modern conceptions of writing history, and their use value for both literary and cultural studies.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 2570 - MATERIALITIES OF WRITING**
ENGLIT 2607 - ECOCRITICISM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2608 - GENRES AND GENRE THEORY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: English (MFA) or Department Consent

ENGLIT 2800 - CHILDREN'S LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

This course is an introduction to the critical study of children's literature at the graduate level. Sometimes the syllabus will be centered on a particular historical period or genre; other times, around a specific theme or critical controversy. But the course will inevitably engage with theoretical issues raised by a genre whose practitioners inhabit a different subject position than its intended readers, as well as focusing on literary, philosophical, and cultural constructions of childhood.

ENGLIT 2802 - CRITICAL APPROACH TO CHILDREN'S LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

This course examines a variety of children's books from a number of theoretical perspectives; historical, feminist, transactional, structuralist, etc. The implications of theory will be emphasized. We will place children's books and reading in the wider context of the emotional, cognitive, and moral development of the child, the popular culture of childhood, and contemporary multicultural society.
ENGLIT 2850 - COMPUTATIONAL MEDIA

Minimum Credits: 3
Maximum Credits: 3
In this course, we will: interact with videogames, electronic literature, online journalism and other computational artifacts; read Bogost, Galloway, Chun, Brunton, Losh, C. Crawford, and J. Brown; and, via texts that we explore and create, consider the affordances, processes, protocols and potential of computational media.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2851 - GENDER, TECHNIQUES, AND MEDIA: FROM PLATO TO VIDEO GAMES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2852 - DIGITAL HUMANITIES APPROACHES TO TEXTUAL OBJECTS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2860 - DIGITAL ARCHIVES, BOOK HISTORY, AND LITERARY CIRCULATION

Minimum Credits: 3
Maximum Credits: 3
This seminar will investigate circulation as a crucial mediation between production and reception. Much of its materials will be drawn from the long nineteenth century, mainly works situated in trans-Atlantic systems of exchange, esp. Children's literature and the emergent canon of poetry in English, and we will be exploring digital archives in pursuit of the practices of print culture. As a result, we will need to think through issues of the digital at the present moment, of the uses and limits of various digital databases and digitally enabled methods of investigation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2861 - INTERSECTIONALITY IN THE ARCHIVES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2862 - BOOK HISTORY AND ITS USES

Minimum Credits: 3
Maximum Credits: 3
This seminar examines printed books as material, commercial, and expressive objects. We will investigate some ways that historical practices of book making have mediated the production, circulation and reception of writing. Much of the course will involve hands-on work with materials housed in Special Collections at Hillman Library, where we will examine a broad range of printed materials, including variously formatted literary editions, children's books, broadsides, artist's books, and facsimiles. We will be considering such topics as exchanges between the printed word and
the printed image; the conditions and goals of textual editing at the present moment; the uses of digital archives for book history; and the political economy of publication practices. There will also be several opportunities to experiment with making printed artifacts with a small proof press.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2902 - DIRECTED STUDY FOR MA AND MFA STUDENT

Minimum Credits: 1
Maximum Credits: 6
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ENGLIT 2907 - LITERATURE INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ENGLIT 2960 - ENGLISH GSA

Minimum Credits: 3
Maximum Credits: 3
This course provides credits for English department graduate students who have been appointed as a graduate student assistant.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

ENGLIT 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
In order to register for this course a student must work with a faculty member under one of the following circumstances: a) faculty-graduate student shared research project; b) special study in relation to pedagogical problems; c) defined areas of study in relation to comprehensive examinations.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

ENGLIT 2991 - PUBLISHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This workshop will help English graduate students to prepare previously-drafted seminar papers for journal publication. Students will read and workshop each other's manuscripts and discuss journals in relevant fields, the politics of publishing, the submission and publication process, and other relevant topics.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ENGLIT 2992 - DIGITAL PEDAGOGY PRACTICUM
Minimum Credits: 1  
Maximum Credits: 1  
This collaborative workshop for experienced teaching fellows focuses on developing assignments with digital production components. Participants will present and discuss detailed unit plans and assignments. Attention will be paid to crafting rationales to help pedagogical initiatives gain institutional support. Each participant will produce several documents for inclusion in a teaching portfolio.  
Academic Career: Graduate  
Course Component: Workshop  
Grade Component: Grad SN Basis

ENGLIT 2993 - INTRODUCTION TO GRADUATE STUDIES

Minimum Credits: 1  
Maximum Credits: 1  
This course will introduce MA and Ph.D. students to important practices and genres of graduate studies and to department programs and resources.  
Academic Career: Graduate  
Course Component: Workshop  
Grade Component: Grad LG/SNC Basis

ENGLIT 2995 - DISSERTATION WORKSHOP

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2996 - WRITING PEDAGOGY I

Minimum Credits: 3  
Maximum Credits: 3  
This course is a practicum designed to instruct and support graduate students who are beginning their work as teachers in the department. New TFs will teach a section of Seminar in Composition from a shared staff syllabus, will be mentored by CEAT (the Committee for the Evaluation and Advancement of Teaching), and will take this seminar. In the spring term, they will take a graduate Writing Pedagogy II, and continue with the support and mentorship of CEAT. This seminar will meet once a week to discuss a range of issues that frame the teaching of composition. We will focus on reading student writing, revision, pedagogy, and the design of writing assignments. Topics will include: the relationship of reading and writing, writing conventions, social contexts for writing, digital modes of composition, assignments and sequences, evaluation and assessment of writing.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

ENGLIT 2997 - WRITING PEDAGOGY II

Minimum Credits: 3  
Maximum Credits: 3  
This course is a practicum designed to instruct and support graduate students who are beginning their work as teachers in the department, following the completion of Writing Pedagogy I. New TFs will teach a section of Seminar in Composition from a shared staff syllabus, will be mentored by CEAT (the Committee for the Evaluation and Advancement of Teaching), and will take this seminar. This seminar will meet once a week to discuss a range of issues that frame the teaching of composition. We will focus on reading student writing, revision, pedagogy, and the design of writing assignments. Topics will include: the relationship of reading and writing, writing conventions, social contexts for writing, digital modes of composition, assignments and sequences, evaluation and assessment of writing.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

ENGLIT 3000 - DISSERTATION FOR THE PH.D. DEGREE
Minimum Credits: 1
Maximum Credits: 12
For advanced doctoral students who have completed or nearly completed their formal course work and are pursuing independent research leading to the dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ENGLIT 3902 - DIRECTED STUDY FOR PH.D. STUDENT

Minimum Credits: 1
Maximum Credits: 6
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ENGLIT 3910 - COMPREHENSIVE EXAM

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

English Writing

ENGWRT 2010 - FICTION WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
This course enables students to master the particular prose fiction forms they are working in. It helps them focus on their manuscript--either a short story collection or a novel-- and to work seriously on it. Close examination of student writing and revision of submitted work are essential parts of the course.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: English (ENG-MFA)

ENGWRT 2094 - READINGS IN CONTEMPORARY FICTION

Minimum Credits: 3
Maximum Credits: 3
This course acquaints students with a variety of contemporary writers. This study helps students raise questions about their own developing esthetics as they are reflected in form and take into account their dual roles as creative writers and critics. It also helps students access their relationship to reviewing and criticism, including its benefits to a creative writer developing a career, and to discover techniques of reviewing and criticism which aid and do not transgress upon their esthetics and its expression.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2110 - NARRATIVE AUDIO WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
ENGWRT 2210 - POETRY WORKSHOP

Minimum Credits: 3  
Maximum Credits: 3
This graduate seminar emphasizes an intensive consideration of student poems, both first drafts and revisions, in an informal workshop setting.

ENGWRT 2245 - STUDIO IN AFRICAN-AMERICAN POETRY AND POETICS

Minimum Credits: 3  
Maximum Credits: 3
Intended for graduate students and advanced undergraduates, Studio in African American Poetry and Poetics will be a course in interdisciplinary making, as we investigate the evolving fields of African American poetry and poetics through a critical and a creative lens.

ENGWRT 2290 - READINGS IN CONTEMPORARY POETRY

Minimum Credits: 3  
Maximum Credits: 3
This course focuses on American poets who have come to prominence since 1963. We will read widely in the poetry of this period to understand its unique contribution to the development of poetic form and its relationship to the culture that produced it.

ENGWRT 2310 - NON-FICTION WORKSHOP

Minimum Credits: 3  
Maximum Credits: 3
A workshop in non-fiction reporting for magazine publication. Students will research, write, revise and re-write articles. Emphasis will be placed on style, fluidity, organization, suitability for market, and ultimately, on publication.

ENGWRT 2390 - READINGS IN CONTEMPORARY NON-FICTION

Minimum Credits: 3  
Maximum Credits: 3
This course familiarizes students with a number of different forms of and approaches to contemporary non-fiction writing.

ENGWRT 2399 - TOPICS IN NONFICTION: NEW YORK TRIP
ENGWRT 2403 - STRUCTURES AND TECHNIQUES IN NONFICTION

Minimum Credits: 3  
Maximum Credits: 3  
This is a grad level course required for NF MFAs. The course is designed to examine and develop advanced research skills for the nonfiction writer, and to explore and practice story structure through required readings and creative exercises. Students will design and participate in immersion research projects, produce one long-form narrative or research-based essay using field research, interview and textual sources. The classwide project will be produced in digital form.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGWRT 2405 - PUBLISHING PRACTICUM

Minimum Credits: 3  
Maximum Credits: 3  
This practicum is for nonfiction M.F.A.S in their third year of study. We will survey current trends in book, magazine, journal, and online publishing, as we design a trip to New York City to meet editors and agents. Students must have manuscripts and/or other completed work ready for publication in order to be accepted into the class, which is offered by special permission only.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

Course Attributes: Hybrid

ENGWRT 2430 - LITERARY AND ONLINE PUBLISHING

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGWRT 2501 - TOPICS IN CREATIVE WRITING

Minimum Credits: 3  
Maximum Credits: 3  
This course concerns itself with matters of interest in creative writing: form and technique, contemporary production, issues in teaching and pedagogy, and/or the relation of the creative writer to society.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGWRT 2900 - MANUSCRIPT WRITING FOR THE MFA

Minimum Credits: 1  
Maximum Credits: 9  
For advanced MFA students who have completed or nearly completed their coursework and are completing the MFA manuscript. Can be taken only once toward the 36 credits required for the degree, only in the last year of study, and counts as elective credits.  
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ENGWRT 2905 - PRACTICUM IN COMMUNITY TEACHING

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ENGWRT 2907 - WRITING INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

ENGWRT 2960 - ENGLISH GSA

Minimum Credits: 3
Maximum Credits: 3
This course provides credits for English department graduate students who have been appointed as a graduate student assistant.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

ENGWRT 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
In order to register for this course a student must work with a faculty member under one of the following circumstances; a) faculty-graduate student shared research project; b) special study in relation to pedagogical problems; c) defined areas of study in relation to comprehensive examinations.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

ENGWRT 3009 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study with a member of the graduate faculty willing to supervise the work.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Environmtal & Occupatnal Hlth

EOH 2013 - ENVIRONMENTAL HEALTH AND DISEASE

Minimum Credits: 2
Maximum Credits: 2
This is the graduate school of public health core curriculum course in environmental and occupational health. The world health organization defines environmental health as “those aspects of human health, including qualities of life that are determined by physical, biological, social, and psychosocial factors in the environment.” The discipline of environmental and occupation health refers to the “theory and practice of assessing, correcting, controlling, and preventing those factors in the environment that can adversely affect the health of present and future generations.” This course will familiarize the students with current issues and practice in environmental and occupational health, as well as assessment of the risk of environmental exposures. It is designed to introduce the students to knowledge basic to public health focusing on chemical and physical environmental factors affecting the health of the community.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 2021 - SPECIAL STUDIES

Minimum Credits: 1
Maximum Credits: 15
Properly qualified students may undertake advanced study under the guidance of a faculty member.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

EOH 2022 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
Properly qualified students may undertake advanced study under the guidance of a member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

EOH 2108 - ENVIRONMENTAL AND OCCUPATIONAL HEALTH PRACTICUM

Minimum Credits: 2
Maximum Credits: 2
This practicum provides an opportunity for EOH MPH students to demonstrate integration and application of knowledge in the area of environmental and occupational health, through a culminating experience. This is a faculty supervised applied research or problem solving project in consultation with a health environment related agency or organization. Student participates after completion of course work. The practicum includes preparation, contribution to field work, and a final written report which may be the basis for a master's essay.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

EOH 2109 - MOLECULAR TOXICOLOGY JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
This course is for students to gain experience in the presentation and discussion of topics of current interest in the fields of industrial and environmental health sciences and toxicology. The format is journal club presented by the students. Our goals are to expose students to the most exciting research in our field of interest. Secondly, to provide a forum to hone skills in organizing and presenting scientific data, as well as critically discussing published work.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad LG/SU3 Basis

EOH 2110 - ROTATION/PRACTICUM
This course is designed to be a practical research experience for Ph.D. students, goals of which are for students to gain research experience within laboratories of faculty within the molecular toxicology training program. Each laboratory rotation will be eight (8) weeks in duration with 2 rotations. Students will be required to write a report on their research project upon completion of the laboratory component.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

### EOH 2122 - TRANSPORT AND FATE OF ENVIRONMENTAL AGENTS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents in a quantitative fashion the movement, transformation, bioaccumulation, and fate of various physical, biological, and chemical agents through the environment, home, and occupational settings. Chemical degradation, atmospheric transport, surface and groundwater transport, deposition on terrestrial surfaces and in sediments, and concentration by biological systems are described, including movement through food chains; also indoor transport and ventilation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EOH 2309; PLAN: For EOH-MPH; MS: PHD (Instructions: Instructor Consent as some students from Engineering apply.)  
**Course Attributes:** Global Studies

### EOH 2175 - PRINCIPLES OF TOXICOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to the principles governing the interaction of chemicals within the human body. Major organ systems will be described with regard to anatomy, physiology and effects from interactions with chemicals.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### EOH 2180 - INTRODUCTION TO RISK SCIENCES

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Course will explore issues surrounding environmental and occupational risks with focus on adverse human health effects. Will provide overview of risk sciences including: risk assessment, risk perception, risk communication and risk management. Detailed attention to methods for qualitative and quantitative characterization of risks to human health. Qualitative and quantitative approaches for risk assessment will consider methods for assessment of cancer and non cancer health risks using four step paradigm by national academy of sciences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: EOH 2181; PROG: Graduate Sch of Public Health (PPBHL)

### EOH 2181 - RISK ASSESSMENT PRACTICUM

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Practicum will provide the student opportunity to conduct a quantitative risk assessment for human health endpoint (either cancer or non-cancer) from an environmental or occupational exposure. Students will learn to identify human health hazards, characterize dose response relationships and site and mechanisms of action, conduct an exposure characterization dose response relationships and site and mechanisms of action, conduct an exposure characterization and use that data to characterize risks to human health.

**Academic Career:** Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: EOH 2180; PROG: Graduate Sch of Public Health (PPBHL)

EOH 2309 - ENVIRONMENTAL HEALTH CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
The organic, inorganic and mechanistic biochemical details of interactions of toxins and biological systems will be presented. Emphasis on chemical understanding of potential toxicological sequelae of such interactions. Students present one lecture on bioorganic toxicological topic synthesized from recent scientific literature.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 2310 - MOLECULAR FUNDAMENTALS

Minimum Credits: 3
Maximum Credits: 3
Course is designed to be a review of the fundamentals of biochemistry, molecular biology, and cell biology. There is significant time devoted to techniques, with the goal of providing background for Ph.D. students beginning their research careers, and a perspective for mph students on the availability and utility of modern biological research methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2504 - PRINCIPLES OF ENVIRONMENTAL EXPOSURE

Minimum Credits: 3
Maximum Credits: 3
This course introduces concepts inherent in recognition of sources, contaminant generation, transport and uptake of chemical, biological and physical stresses in the context of potential environmental exposures related to human health. This course prepares students to understand exposure assessment in anticipation, recognition, evaluation and intervention as utilized in risk assessment and composition of matter, exposure pathways, pathway assessment methods including measurement, analogy and exposure modeling.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2805 - EPIGENETICS AND EPIGENOMICS OF ENVIRONMENTAL HEALTH

Minimum Credits: 3
Maximum Credits: 3
Gene environment interactions are important determinants of disease risks. This course will present how environmental stressors (such as chemicals, microbiota or lifestyle) modulate the epigenetic regulation of gene transcription and chromosome stability, which ultimately produce an array of unique phenotypes controlling cell differentiation, growth and cell death. Students will be provided with a fundamental understanding of basic epigenetic processes related to the mechanisms by which exposure to environmental stressors causes environmental diseases not limited to neurological dysregulation, cardiopulmonary and inflammatory diseases, metabolic diseases and cancer. This course will present the concept of epigenetic modulation of cellular signal pathways involved in protection from effects of environmental stressors, including responses to stress and oxidative damage. In addition, we will present the most recent and advanced genetic and epigenetic techniques to study the impact of the environmental stressors on disease pathogenesis, which includes microarrays, next-generation-sequencing and genetic models. The course will also discuss how to apply the 'omic' data and pathway analysis tools for the identification and validation of disease biomarkers and exposure markers from environmental and occupational health research. Course will be conducted by in class lectures, hand-on practices for epigenomic data analysis and paper discussion. A college level background in the molecular biological sciences is required for taking this course. Course of Molecular Fundamentals (EOH 2310) or Principles of Toxicology (EOH 2175) is suggested.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: EOH 2310 OR EOH 2175; PROGRAM: Graduate School of Public Health A college level background in the molecular biological sciences is required for taking this course.

EOH 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Includes doctoral study under the various programs within the department.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

EOH 3210 - PATHOPHYSIOLOGY OF ENVIRONMENTAL DISEASE

Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on the etiology and pathogenesis of human disease and how the disease process affects normal physiologic function. The course will include a didactic component covering the normal anatomy and function of the major organ systems and a series of student-led presentations and discussions of the nature and cause of commonly encountered diseases and or injuries. Students will be expected to apply basic mechanistic physiologic principles of each organ system in current public health and environmentally relevant topics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 3305 - GENOME INSTABILITY AND HUMAN DISEASE

Minimum Credits: 3
Maximum Credits: 3
Mechanisms that maintain genome stability allowed the origin of species. DNA damage is omnipresent and DNA repair and DNA damage tolerance mechanisms are interwoven in systems that control transcription, replication, cell division, signal transduction, cell death and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndRomes of impaired development, immunodeficiency, cancer predisposition, neurodegeneration, and premature aging. This course will emphasize the molecular biology and biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes as they pertain to health and disease. Environmental, clinical and endogenous sources of DNA damage will be discussed. An understanding of the fundamental role of DNA repair mechanisms in immunology, oncology, neurology, and aging will be central to all lectures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Envrl Influence Management

BENV 2115 - MARKET MANIPULATIONS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

Epidemiology

EPIDEM 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EPIDEM 2012 - WRITING IN POPULATION NEUROSCIENCE

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to write a manuscript or grant proposal in a theme related to population neuroscience. Population neuroscience consists of the application of state of the art population science and neuroscience to better understand the pathogenesis and etiology of a given disease of the central nervous system. This course provides a practical opportunity to write a proposal or a manuscript using neuroepidemiological methods that focus on a specific CNS disease/condition. Emphasis is placed on: a. factors that influence vulnerability to onset, progression and response to treatment of neurological diseases, including geographic variations; b. methodologies to assess disorders of the central nervous system (CNS), including neuropsychological and post-mortem assessments. Neuroimaging methods will not be covered, as it is covered in EPIDEM2019. In addition to students pursuing Doctoral and Master level degrees in Epidemiology and Neuroscience, including Psychology, this course is designed to reach pre- and postdoctoral trainees in neurology, psychiatry, rehabilitation and data sciences. Prior to registering, students have to consult with the instructor to identify the base knowledge of epidemiology methods (descriptive, analytic, experimental), and neuroscience and arrange for separate sessions as needed. Students are expected to be proficient in at least one of these two disciplines as well as in scientific writing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EPIDEM 2017 - POPULATION NEUROSCIENCE SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on the methods and current literature in population neuroscience. Population neuroscience draws from multiple fields, including epidemiology, neuroimaging, and cognitive psychology, to understand the intrinsic (e.g. genetic) and extrinsic (e.g. environmental) factors that contribute to brain structure and function in various populations (healthy, aging, and diseased).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

EPIDEM 2019 - INTRODUCTION TO MULTIMODAL NEUROIMAGING AND APPLICATIONS IN POPULATION NEUROSCIENCE

Minimum Credits: 2
Maximum Credits: 2
There have been great advances in neuroimaging techniques, which allow neuroscientists to visualize molecular, cellular and system physiology and functions. The Introduction to Multimodal Neuroimaging course will teach the underlying principles of neuroimaging techniques, including data modeling and visualization. Special emphasis will be on the discussion of the strengths and limitations of each technique, and on novel approaches to utilize complementary imaging modalities. The course will teach the principles and research applications of neuroimaging modalities via basic lectures and workshops that emphasize the integration of multiple imaging modalities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY
Epidemiology is a scientific discipline which seeks to identify and describe patterns of disease occurrence, identify determinants of disease, and evaluate disease prevention and health care treatment efforts. With its focus of study in human populations, epidemiology is directly linked with public health research, policy, and practice. This course provides an introduction to the fundamental definitions, terminology, concepts, methods, and critical thinking used in epidemiology. The material presented in this course is designed to lay the foundation for future study and practice in public health activities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**EPIDEM 2141 - BEHAVIORAL LIFESTYLE INTERVENTION TRAINING - THEORY OF PREVENTION EFFORTS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Translating the findings of clinical trials of lifestyle intervention for disease prevention into community settings is increasingly important. This course will provide the conceptual foundation needed for such public health initiatives and serves as a key component of the Prevention, Lifestyle Intervention, and Physical Activity Area of Emphasis within the Department of Epidemiology. The background and rationale for behavioral lifestyle intervention will be covered in this course, as well as the relationship of lifestyle behaviors to chronic disease, with a focus on diabetes and cardiovascular disease. By attending this lecture-style course, students will receive behavioral lifestyle intervention training based upon a modified version of the Diabetes Prevention Program intervention protocol, called the Group Lifestyle Balance (DPP-GLB) program, which was adapted for use in the community setting. Upon successful completion of this class, each student will also receive a Certificate confirming that he/she was officially trained as a coach for the DPP-GLB intervention program.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate Sch of Public Health  
**Course Attributes:** Hybrid

**EPIDEM 2142 - LIFESTYLE INTERVENTION PRACTICUM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course follows the lifestyle intervention training theory course. The foundation for this practicum is the group lifestyle balance (GLB) program, a behavioral lifestyle intervention training based upon a modified version of the diabetes prevention program intervention protocol. The GLB has already been developed and evaluated by the course instructors. The lifestyle intervention training practicum will provide students with the opportunity to utilize their theoretical knowledge for behavioral lifestyle intervention with hands-on application in the field. This course will be a key component in the new prevention/lifestyle intervention area of concentration within the department of epidemiology, providing the practical experience needed to deliver the group lifestyle balance program independently.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: EPIDEM 2141

**EPIDEM 2143 - SOCIAL EPIDEMIOLOGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to introduce students to a broad overview of the field of social epidemiology related to the history and development of the field including the theoretical underpinnings, conceptual approaches, current topic areas, and research methods. Social epidemiology reveals how social processes are intrinsically linked to the health of populations and individuals. Social epidemiology takes into account the social, psychological, biological, and medical determinants of disease and health and uses a multidisciplinary approach to analyzing and solving complex contemporary social issues. This course will emphasize the role of social determinants of health in relation to health equity. Teaching methods include lectures, readings, class discussions, and written assignments.

**Academic Career:** Graduate
EPIDEM 2150 - EPIDEMIOLOGY CARDIOVASCULAR DISEASES

Minimum Credits: 2
Maximum Credits: 2
In this course, we hope not only to guide you to a better understanding of cardiovascular disease and its epidemiology, but also to help develop your critical and presentation skills. We will do this by "critiquing" an article most sessions and having a twenty-minute student presentation based on recent statements of the American Heart Association.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041); PROG: Graduate Sch of Public Health

EPIDEM 2151 - PHYSICAL ACTIVITY EPIDEMIOLOGY

Minimum Credits: 2
Maximum Credits: 2
Physical inactivity is a major risk factor for many chronic diseases as identified in the Surgeon General's Report. This course will provide an up-to-date overview of the area of physical activity epidemiology, from the evidence of the relationships between physical activity and/or sedentary behavior and various chronic diseases, to methodological issues pertaining to the assessment of physical activity and/or sedentary behavior, to lifestyle efforts that includes physical activity in population studies, all of which will have a special emphasis on minority groups.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041)

EPIDEM 2152 - STUDENT WORKSHOP IN CARDIOVASCULAR DISEASE EPIDEMIOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course is designed to be a supplement to the standard epidemiology coursework. It is a "hands on" workshop that will provide the opportunity for students to practice many of the concepts that they learn in class in the context of CVD epidemiology. It will also cover some areas which are not covered by the current curriculum, including an introduction to subclinical CVD, professional development, reliability analyses, and formal presentations of analysis results.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad Letter Grade

EPIDEM 2160 - EPIDEMIOLOGY OF INFECTIOUS DISEASES

Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to provide students with a basic understanding of epidemiologic techniques used to describe patterns of infectious disease transmission and risk for infection. In addition, students will learn about the epidemiology, public health impact, and prevention and control measures for selected infectious diseases. This course includes a series of lectures and practical exercises to introduce students to both the application of epidemiologic skills pertaining to infectious diseases and the public health concepts associated with specific infectious diseases.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110
Course Attributes: Global Studies

EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPIDEMIOLOGY
Minimum Credits: 1
Maximum Credits: 1
Covers important topics in infectious diseases epidemiology, including public health surveillance, emerging infectious diseases, the role of infectious diseases in the etiology of chronic diseases, and epidemiologic study designs and laboratory methods used in infectious diseases epidemiology. Course includes lectures, readings, and mid-term (take home) and final examinations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and 2160
Course Attributes: Global Studies

EPIDEM 2163 - GLOBAL EPIDEMIOLOGY OF VACCINES AND VACCINATION

Minimum Credits: 2
Maximum Credits: 2
This course will provide students with knowledge and skills related to the study of vaccines and vaccination programs in the US/EU and in low- and middle income countries. This course will prepare students for entry-level positions in vaccine research or programming for academic, government, or private sector institutions. This course will provide a broad introduction to a wide range of vaccine related topics ranging from biological mechanisms of vaccines to vaccine financing. Within this range of topics, the course will focus heavily on the epidemiological study of vaccine efficacy, safety, effectiveness, and impact. The course is organized around four themes: 1) introduction; 2) vaccines; 3) research and development; and 3) vaccination programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110; PROG: Graduate Sch of Public Health

EPIDEM 2166 - GLOBAL CONTROL OF AIDS/HIV AND TUBERCULOSIS

Minimum Credits: 1
Maximum Credits: 1
This course will deal with the epidemiology of infection with human immunodeficiency virus (HIV) and Tuberculosis (TB). Current knowledge of the natural history, biology, virology or microbiology, epidemiology and clinical aspects of AIDS as well as treatment and vaccine efforts against HIV and TB will be reviewed. Descriptive, analytic and experimental epidemiologic studies will be critically reviewed to provide a synthesis of our current understanding of the pathogenesis of these infectious diseases.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110

EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will reinforce epidemiological concepts, research skills and public health concepts in the context of the study of chronic diseases and associated risk factors. The course will provide an overview of the prevalence, incidence and risk factors for major chronic diseases that face the U.S. population and the population around the world.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BOST 2101 or 2041)

EPIDEM 2171 - CANCER EPIDEMIOLOGY

Minimum Credits: 2
Maximum Credits: 2
The course reviews basic cancer biology, reviews classic descriptive cancer epidemiology, considers the role for modern biomedical techniques in
studies of cancer etiology, and reviews the active hypotheses regarding the etiology of common and uncommon human cancers. Specific topics include biomarkers and intermediate endpoints, tobacco and alcohol associated cancer, viral associated cancer, endocrine related cancer, and nutrition related cancer.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110

**EPIDEM 2180 - EPIDEMIOLOGICAL METHODS 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This intermediate epidemiology methods course will focus on the use of standard study designs and statistical methods for answering research questions, the interpretation of results obtained from these methods, and consideration of these issues from a causal inference perspective. Students are expected to have some statistical knowledge and will use SAS, a statistical software package, to analyze data sets. Students will be expected to participate in class discussions that extend and apply the topics covered in lectures to epidemiology research articles and to exercises involving epidemiology in practice.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110 and BIOST 2041; PROG: Graduate Sch of Public Health

**EPIDEM 2181 - DESIGN AND CONDUCT OF CLINICAL TRIALS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The course surveys methods in the design and conduct of clinical trials. Clinical trials require successful collaboration of clinical, organizational and statistical skills. This course will focus on clinical and organizational issues, such as patient selection, recruitment, endpoint definition and protocol development. Throughout the semester, students develop a clinical trial proposal that emphasizes the application of the concepts learned. The course will complement courses in biostatistics on the statistical analysis of clinical trials.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110

**EPIDEM 2183 - READING, ANALYZING AND INTERPRETING PUBLIC HEALTH MEDICAL LITERATURE**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course provides the opportunity to analyze, interpret and critique original research articles. Assignments consist of oral and written reviews of recently published papers. A literature review paper on a topic chosen by the student is also required. Lecture topics include assessing study validity, subject selection, bias, confounding, laboratory methods, results presentation, quality control, statistical analyses, library searches, and bibliographic data base development.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110 and EPIDEM 2180 and (BIOST 2042 or BIOST 2049)

**EPIDEM 2185 - INTRODUCTION TO SAS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course is an introduction to SAS, a statistical software package commonly used to perform data preparation, statistical analysis, and graphical presentation of results. The course consists of lectures and four lab sessions, where students will practice in a guided manner what was taught during the preceding lectures. The aim of this course is to teach students how to write basic SAS programs to import data, export data, create data sets within
SAS, clean data, prepare data sets for analysis and apply statistical, as well as graphical, procedures. Students will also learn to make informed decisions regarding the appropriate SAS commands and options to use for these tasks and will be asked to use SAS for solving a set of simple specific research questions. Upon completion of this course students will feel comfortable using SAS as a tool to conduct research and know how to subsequently further develop their own SAS programming skills.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Epidemiology (MS or MPH or PHD or DPH)

**EPIDEM 2189 - EPIDEMIOLOGICAL METHODS OF LONGITUDINAL & TIME-TO-EVENT ANALYSES**

Minimum Credits: 3
Maximum Credits: 3
This course will introduce the students to advanced regression methods used to address research questions involving longitudinally collected data from an epidemiological perspective. It serves as the second epidemiological methods course in the Department of Epidemiology following EPIDEM 2180. The course content includes an introduction to standard analytical methods of longitudinal data and time-to-event outcomes as well as missing data in this study setting. Sample size and power calculations involved when using these methods will be presented. Causal inference framework within the longitudinal study setting will be briefly introduced late in the course. SAS, a statistical software package, will be used in all presented examples and class notes. This course will not cover statistical theories of longitudinal data and survival analyses. It is an applied course of those two methodological approaches.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2180 and BOST 2049; PLANS: EPIDEM-DPH; EPIDEM-PHD; EPIDEM-MPH; EPIDEM-MS

**EPIDEM 2210 - SPECIAL STUDIES - ESSAY**

Minimum Credits: 1
Maximum Credits: 15
Research credits for master's essay. Also applies to credits for doctoral research prior to passing the doctoral comprehensive exam.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**EPIDEM 2213 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 12
Properly qualified students may undertake special study or research which does not apply to the master's essay or doctoral dissertation. This study must be done with permission of the specific faculty member who will supervise the work.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

**EPIDEM 2214 - PUBLIC HEALTH INTERNSHIP**

Minimum Credits: 1
Maximum Credits: 4
This internship provides an opportunity to gain valuable knowledge and experience that would not normally be available through coursework. Placements may be outside of the University of Pittsburgh (e.g., in health services organizations, clinics, health departments, community based organizations working with "at risk" populations) or within the University. Each specific placement is to be agreed upon by each student and his/her faculty advisor, based on the strengths, needs and career/academic goals of students. Internship sites should provide a minimum of 200 hours of public health oriented work (generally 20 hours/week for 10 weeks). Students are encouraged to pursue placements beyond the online list and to think creatively about the domestic and international possibilities. Students are encouraged, but not required, to develop their master's essay based on their internship experience.

Academic Career: Graduate

1688
Course Component: Internship  
Grade Component: Grad HSU Basis  
Course Requirements: PREQ: EPIDEM 2110 and BIOST 2041

**EPIDEM 2215 - TEACHING PRACTICUM**

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to provide doctoral students with opportunities to develop practical skills in teaching and mentoring students taking epidemiology courses. As teaching assistants, students may lecture, grade homework and exams, lead review sessions, hold office hours or maintain course blackboard sites. They may also help plan, update or expand course syllabi or teaching materials. Course goals include improvement in oral and written communication skills and exposure to the process of planning and implementing a course.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad HSU Basis

**EPIDEM 2221 - GEOSPATIAL MAPPING AND SPATIAL ANALYSIS IN EPIDEMIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course is to provide a conceptual understanding of the field of environmental epidemiology and to provide the spatial statistical tools for geospatial analysis. The course will provide "hands on" training in software and tools for analysis of spatio-temporal variations in health and disease with respect to demographic, environmental, behavioral, socioeconomic, genetic, and infectious risk factors. Basic tutorials in Arc GIS (10.3) and Geoda freeware will be provided. There will be 7 assignments over the term and 1 final project. The course is meant for all interested master's and doctoral students who have taken an introduction to Biostatistics and Introduction to Epidemiology.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: BIOST 2041 and EPIDEM 2110

**EPIDEM 2223 - INTRODUCTION TO ENVIRONMENTAL EPIDEMIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course is to provide a conceptual understanding of the field of environmental epidemiology. Topics will include: study design and approaches in environmental epidemiology investigations, statistical issues in the analysis and interpretation of such studies, and class assignments related to specific environmental exposures linked to health outcomes and methods of data collection and analysis. The course will provide an overview of health effects of environmental exposures. This includes the investigation of cancer and other disease clusters, health effects of water and air pollution, radiation threats and exposures, and proximity to toxic waste sites, as well as behavioral and socioeconomic elements which often are found to be effect modifiers in disease outbreaks. There will be seven specific exercises linked to WHO outbreaks which were investigated by well-known environmental epidemiologists that will be presented to the class as assignments, and discussed. Examples will include environmental justice, health disparities, Marcellus shale and air pollution exposure issues, the built environment and linkage of these elements to outcomes such as obesity, heart disease, cancer, lifestyle, etc. This course is designed to be a companion course for EPIDEM 2221.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BIOST 2041)

**EPIDEM 2230 - SECONDARY DATA ANALYSIS: A CAPSTONE COURSE**

Minimum Credits: 2  
Maximum Credits: 2  
This course covers methods for obtaining and presenting data from existing sources. Classes will cover data management, effective practices for statistical programming when analyzing data, and presenting results of a research project in the context of large public-use datasets. Students will work in groups on a secondary analysis research project that will be presented in seminar format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2180

EPIDEM 2250 - SEMINAR IN EPIDEMIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Areas of current epidemiology interest in research are presented. Often a general theme such as epidemiology of aging, women's health issues, disorders of immunity, is chosen. All departmental majors are expected to take this course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

EPIDEM 2260 - EPIDEMIOLOGICAL BASIS DISEASE CONTROL

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to gain understanding of the principles underlying disease prevention and the ability to apply these principles to the design, implementation and evaluation of prevention interventions for chronic and infectious diseases. The first part of the course will be devoted to learning the principles of surveillance and risk assessment development, the second part to application of observational data and efficacy and effectiveness studies to populations. The third part will focus on the evaluation of prevention strategies for chronic and infectious disease. Throughout the course, there will be an emphasis on the interaction of biologic and clinical information with epidemiologic data and analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041)

EPIDEM 2261 - APPLIED EPIDEMIOLOGY FIELD INVESTIGATION METHODS

Minimum Credits: 2
Maximum Credits: 2
This course introduces students to the methods of applied field epidemiology used in applied epidemiology settings such as federal, state, local and tribal government agencies. Upon completion of this course, students will be prepared to conduct urgent public health investigations and write reports for public consumption. This course will also introduce students to applied epidemiology topic areas and their respective analytic methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and EPIDEM 2180; PLAN: EPIDEM - MS or MPH

EPIDEM 2295 - BIOCHEMICAL AND EPIDEMIOLOGICAL ASPECTS OF NUTRITION

Minimum Credits: 2
Maximum Credits: 2
Students and teachers select published manuscripts to evaluate as a group. Topics have included, but have not been limited to, adipokines, antioxidants, arginine and nitric oxide, cytokines, fructose, metabolism, hormones, isoflavones, lipoprotein metabolism, polynsaturated fatty acids and vitamins. Basic biochemical characteristics of each species are reviewed, nutritional aspects discussed and population implications assessed with respect to cardiovascular disease, diabetes, HIV infection, and obesity.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

EPIDEM 2310 - PSYCHIATRIC EPIDEMIOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will review the classification systems and methodological issues in psychiatric epidemiology, the research methodologies used, and the distribution of specific psychiatric disorders.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2340 - PEDIATRIC EPIDEMIOLOGY**

Minimum Credits: 2
Maximum Credits: 2
This course will focus on epidemiologic approaches to the study of disorders that occur during childhood and will provide an overview of common physical and psychiatric childhood disorders. In addition to describing the epidemiology of the disorders, consideration will be given to the risk factors, research methods, and methodological issues in pediatric epidemiology.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2400 - PSYCHOSOCIAL FACTORS IN DISEASE**

Minimum Credits: 2
Maximum Credits: 2
This course focuses on psychosocial and behavioral factors that influence the development and course of physical disease. Some of these factors can be modified, so identification can lead to improved health. This course is directed towards students who want to learn about the most common psychosocial factors implicated in disease, how they are measured, psychometric issues, and how to incorporate them into studies of disease and physical health. Students will also learn how to analyze and evaluate the strengths and limitations of studies that include psychosocial factors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110; PROG: Graduate Sch of Public Health

**EPIDEM 2525 - BIOCHEMICAL, DIETARY, AND PHYSIOLOGICAL METHODS IN AN EPIDEMIOLOGY LABORATORY**

Minimum Credits: 2
Maximum Credits: 2
Students are introduced to analytical methods that support exercise and nutritional initiatives. Initially students will attend a laboratory safety course. Biochemical assays will include measurements of antioxidants, fatty acids, hormones and vitamins using elisa, gc-ms, hplc, ria, spectrophotometric and turbidimetric methods. Sub-clinical tests will involve evaluation of intima-media thickness and pulse-wave velocity. Dietary protocols will encompass behavioral and surgical approaches to weight loss and the maintenance and interpretation of food records. Physiological techniques will target exercise interventions, the determination of energy expenditure, and appraisals of fatigue, power and strength. Anthropometric methods will involve bodpod, bioelectric impedance, dexam, skinfolds and underwater weighing. Imaging studies will evaluate brain images in relation to dementia. Results will be discussed with respect to aging, cvd, diabetes, obesity and osteoporosis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**EPIDEM 2560 - NUTRITIONAL EPIDEMIOLOGY**

Minimum Credits: 2
Maximum Credits: 2
This interactive course, involving lectures and in-class learning activities, provides students with the skills and knowledge necessary to understand and critically evaluate the nutritional epidemiology literature and design studies in nutritional epidemiology. The course reviews current methods of assessing nutritional status, with a focus on dietary assessment, as well as biological markers, supplement use, anthropometry, and obesity. The course addresses the application of epidemiologic methods to studies of nutrition and disease, highlighting methodological issues and interpretation
of findings.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: EPIDEM 2110 and (BIOST 2011 or 2041)

---

**EPIDEM 2600 - INTRODUCTION TO MOLECULAR EPIDEMIOLOGY**

**Minimum Credits:** 3

**Maximum Credits:** 3

To provide students with an introduction to the key concepts in genetics and molecular biology, and the diverse ways they are used to solve practical problems in the epidemiology of disease and risk identification. This course will deliver the working knowledge of genetics and molecular biology necessary for critical assessment of molecular epidemiological studies. It will provide suitable preparation for more advanced and specialized study in molecular epidemiology. The student will develop familiarity with the ways molecular epidemiology is used to determine susceptibility to disease and response to interventions. The main topics covered are: genetic susceptibility, the use of biomarkers, and molecular association studies.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: EPIDEM 2110

---

**EPIDEM 2601 - MOLECULAR EPIDEMIOLOGY TOOLS & TECHNIQUES**

**Minimum Credits:** 3

**Maximum Credits:** 3

There is a steady stream of new methods and technologies entering the biomedical sciences that can be used to generate high-quality, quantitative data on the molecular and biochemical aspects of health and disease. There is tremendous value in applying these methods in epidemiologic studies to interrogate the molecular underpinnings of associations within populations, generate hypotheses on the mechanisms involved, to monitor the effects of interventions and to increase confidence in causal inferences. This course will be an opportunity for students to be exposed to methods for measuring the biologic processes that are relevant to DNA variation in populations, and to exposure effects that impact RNA and protein (and other molecule) expression. This course will go beyond the standard level of awareness of how to receive and analyze data from a laboratory. We will engage students in rigorous thought on how to pose questions on the underlying biology, conduct biomarker selection, design assays, and analyze and interpret data. We will spend ~50% of the time exposing students to hands-on experimentation at the laboratory bench. While, we will discuss 'omics' and high-dimensional methods in lectures, the hands-on work will be limited to single molecule analyses.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: EPIDEM 2600 and EPIDEM 2180 and EPIDEM 2185

---

**EPIDEM 2602 - APPLICATION OF MOLECULAR BIOMARKERS IN EPIDEMIOLOGY**

**Minimum Credits:** 2

**Maximum Credits:** 2

This course will advance the learning of students interested in molecular epidemiology by teaching practical aspects of measuring, quantifying and modeling levels of RNA and protein in human biological specimens (blood, tissue,etc). Some topics will include: selecting and validating biomarkers of RNA and protein for application in epidemiologic study design, candidate molecule vs. omics (high-dimensional) approaches, basic know-how in the design and execution of bioassays, and statistical issues in biomarker data analysis. Students will observe the work of a molecular epidemiology laboratory, and have opportunities for hands-on learning.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad HSU Basis

**Course Requirements:** PREQ: Undergraduate Biology, more than one EPIDEM course, one BIOST course, and EPIDEM 2600.

---

**EPIDEM 2640 - INJURY PREVENTION AND CONTROL**

**Minimum Credits:** 2

**Maximum Credits:** 2
Injuries and violence are leading causes of morbidity and mortality in the United States and globally. This course is directed towards individuals with an interest in learning more about this burden and the current approaches being taken to reduce it. It provides an example of how the disciplines of public health can be used to study, understand, and address a significant public health issue. The course will provide an overview of the basic principles and practice underlying injury prevention and control. Lectures will identify the burden underlying major categories of unintentional and intentional injuries and review the multi-disciplinary approaches being used to reduce injuries and violence, in general, and with respect to specific injury and violence issues. In class discussion and problems will be utilized to enhance understanding of approaches to prevention.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EPIDEM 2670 - INJURY EPIDEMIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to provide an introduction to and understanding of the epidemiology of injuries. The class will review the fundamentals underlying injury data and the methods used in injury research studies. Research in major injury topics; motor vehicle crash, violence, sports injury, and other topics will be discussed in depth. Through instruction and practice with data, participants will become familiar with the importance of injury as a public health problem, the strengths and weaknesses of injury data sources and injury surveillance systems, and injury research methods.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110

**EPIDEM 2710 - EPIDEMIOLOGY OF WOMEN'S HEALTH**

Minimum Credits: 2  
Maximum Credits: 2  
This course presents an introduction to the influences of health and disease among women. It reviews epidemiologic approaches to understanding the basic etiology and primary prevention of diseases unique to or more common among women. There is a strong focus on life course approaches to understanding health and disease, including methods, study design and analytics appropriate for studies across the lifespan, from in utero to old age. Course includes lectures, seminars, and discussion.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110

**EPIDEM 2720 - REPRODUCTIVE EPIDEMIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This course first presents a solid background of female and male anatomy and physiology, as well as fetal development. The course subsequently covers critical approaches and methodologic challenges unique to reproductive epidemiology. Specific topics include contraceptives, infertility, ectopic pregnancy, spontaneous abortion, gestational weight gain, preeclampsia, preterm birth, low birth weight, intrauterine growth restriction, infant mortality, and breastfeeding. Case studies of selected exposures and reproductive outcomes are discussed.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110 and (BIOST 2011 or 2041)  
**Course Attributes:** Global Studies

**EPIDEM 2725 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS**

Minimum Credits: 2  
Maximum Credits: 2  
This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course
highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: PUBHLT 2015 or EPIDEM 2004

---

**EPIDEM 2850 - PHARMACOEPIDEMIOLOGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The purpose of this course is to provide an introduction to the field of pharmacoepidemiology, which uses epidemiologic methods to examine the benefits or risk of medications in the population. This course will: explain what pharmacoepidemiology is and what types of study designs are used within this methodology, discuss the roles that pharmacoepidemiology studies have regarding drug use and health outcomes; describe the threats to validity that are possible in pharmacoepidemiologic studies and the variety of solutions available to avert or control for these threats. This information will prepare students to both interpret and critique, in writing and through presentations, studies from the pharmacoepidemiology literature.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

---

**EPIDEM 2900 - ADVANCED EPIDEMIOLOGY OF AGING**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is an advanced course targeted towards Epidemiology PhD students. The purpose of this course is to understand in depth the current epidemiologic research findings regarding common health conditions and geriatric syndromes in the aging population. The course will focus on the common age related processes and chronic health conditions that contribute to disability and frailty and on enhancing successful aging and preventing disability. Advanced research methods will be reviewed as part of each class.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110 and 2981 and (BIOST 2011 or 2041); PROG: Graduate Sch of Public Health

---

**EPIDEM 2921 - GRANT WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
During this course, students will develop a grant proposal on a research topic of their choice. The proposal will be written in the format of the National Institutes of Health (NIH) National Research Service Award (NRSA) Individual Predoctoral Fellowship (Parent F31) grant application. The application will include specific aims and a research plan that includes significance, innovation, and approach. The proposal will also include a research training plan as required by the NIH. Students will also participate in a mock study section (grant review). Students are encouraged to use this opportunity to develop an application for submission to the NIH for support of their dissertation work.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110 and 2180 and 2183. RECOMMENDED: EPIDEM 2160 and 2170.

---

**EPIDEM 2950 - EPIDEMIOLOGY OF AGING WORKSHOP**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The workshops are designed as practical professional skill development to supplement to the additional coursework for the Epidemiology of Aging trainees and students. The workshop will include sessions on: presentations by the students from their research, journal article reviews, longitudinal analyses techniques, and professional skills sessions. The presentation sessions provide an opportunity for students to present and refine their interim research and data analyses by obtaining feedback from peers, faculty and mentors on their work in progress. Journal article review sessions will
provide an opportunity for students to identify and share current articles relevant to the epidemiology of aging and develop proficiency in the critical review of scientific literature. Emphasis will be placed on understanding emerging and novel methods in the field, particularly longitudinal statistical analyses techniques (e.g. handling missing data longitudinally; interpreting changes in slopes over time; joint modeling). A faculty member will help student leaders select articles (distributed before the meeting) and will work with students to encourage questions and discussion among the group. Professional skill sessions will vary by semester and cover topics such as post-doctoral career development, grant and professional medical writing, and longitudinal data analysis.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad HSU Basis

EPIDEM 2980 - BIOLOGY AND PHYSIOLOGY OF AGING

Minimum Credits: 1
Maximum Credits: 1
This course introduces students to the aging process as a foundation for research in the epidemiology of aging. Some topics for the course will include: Overview of aging physiology, molecular and biological processes of aging, model systems of aging and study designs that are currently relevant to human population research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2004 or 2712

EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS

Minimum Credits: 2
Maximum Credits: 2
This course will introduce the methodological aspects of epidemiologic research in the field of aging and to critically evaluate research in older adults. The course will focus on: demography, study design, sampling, recruitment, retention, measurement of key variables and special populations. Students will write a critical review of a published article and comment on proposed future directions for epidemiologic studies addressing these questions in older populations. Throughout the course, a Problem Solving Learning Method will be applied by prompting the students to solve pragmatic issues. Examples include: How to measure a specific outcome? What type of chronic health conditions may be related to the research question? How to operationalize specific measures of interest (e.g.: how to create a composite score for co-morbidity assessment?). The course has been formulated to provide the students with the building blocks of the epidemiological study of aging. By the end of the course, the students will be able to critically evaluate various components of a study to further address the research questions in aging populations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110

EPIDEM 3100 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Research and dissertation for the doctoral degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Faculty Development

FACDEV 2200 - PRACTICUM ON UNIVERSITY TEACHING

Minimum Credits: 1
Maximum Credits: 3
This course in university teaching is designed for people who are teaching independently for the first time, or who have the flexibility in a recitation
to design course materials and teach subject matter. It features the application of instructional principles to course development and materials.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

## Family Medicine

### FM 5316 - FAMILY MEDICINE CLERKSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Family medicine clerkship is a four week experience in primary care discipline that deals with comprehensive care of individuals and families with special focus on preventive medicine, addressing psychological and social determinants and consequences of illness. Clerkship has five goals: 1) improve and evaluate student clinical skills; 2) provide students with fundamental knowledge of diagnosis and management of common problems; 3) provide rational and scientific approach to preventive medicine; 4) learn unique aspects of family medical care; 5) economic influences of health care delivery and care of patient.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 3

### FM 5401 - FAMILY MEDICINE ACTING INTERN

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week experience which fulfills the acting internship requirement in which students participate in a family practice teaching service at the level of a first year resident under direct supervision of senior residents and attending physicians. Students are responsible for initial patient evaluation and implementation of care, including writing orders and following up on evaluations. Students participate in night call and weekend coverage as well as all conferences. This is primarily an inpatient experience.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### FM 5406 - EXTRAMURAL ACTING INTERNSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Students will register for this course when participating in a family medicine acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### FM 5420 - INDIAN HEALTH SERVICE

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This clerkship is offered at hospitals on the Navajo and other Indian reservations. Each student participates in a project, using clinical epidemiology or health survey techniques. Students may also have some clinical experience at hospitals or clinics; and opportunities to observe various aspects of the IHS field program. Students live in government quarters and work under the direct supervision of us public health service physicians. Overall coordination and research supervision is provided by clinical epidemiology and preventive medicine faculty.

**Academic Career:** Medical School  
**Course Component:** Independent Study
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

**FM 5430 - FAMILY PRACTICE-MANAGED CARE**

Minimum Credits: 0  
Maximum Credits: 0  
Clinical education course combining comprehensive clinical experience with an opportunity to learn about the organization and operation of a large group model HMO. Majority of time spent seeing outpatients under direct supervision of practicing physician, regular inpatient rounds and one or more extended hours sessions to participate in the care of urgently ill patients. Time scheduled each week to become familiar with health education, quality assurance, utilization, claims, marketing, and consumer affairs components of an HMO.  
Academic Career: Medical School  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4  

**FM 5431 - TOPICS IN FAMILY MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
4 week elective consisting of 2 two week rotations selected from the following three options: 1) healthcare for the homeless, 2) managed care-how an HMO works, 3) medical care for the chronically mentally ill. Each student will also concurrently participate in the following two subjects during the 4 weeks: 1) preventive medicine and 2) critical review of the medical literature. Course objectives are to 1) see how the homeless obtain health care, 2) see how HMO control costs, 3) improve skills in managing medical illness in psych pts, 4) learn role of prevention in primary care.  
Academic Career: Medical School  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4  

**FM 5440 - CLINICAL EPIDEMIOLOGY INTERNSHIP**

Minimum Credits: 0  
Maximum Credits: 0  
The student will design a sub-study related to one of the ongoing epidemiologic projects in the department, and participate in all aspects of the study from data collection to the analysis and presentation of the results. The student will work closely with the epidemiologists, clinicians, and biostatisticians involved in the project.  
Academic Career: Medical School  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4  

**FM 5448 - FAMILY CENTERED MATERNITY CARE**

Minimum Credits: 0  
Maximum Credits: 0  
This elective is intended to offer medical students the opportunity to develop a wide view of family centered maternity care on a community basis. Through a series of inpatient and outpatient clinical experiences, directed readings, and a "mini-project," students will extend their understanding of integrated, interdisciplinary family centered maternity care; barriers to prenatal care; creative programs for reducing low birth weight infants; use of doulas, midwives and others in prenatal and intrapartum care; the role of health insurers in augmenting systems of prenatal care; and the abuse of detrimental drugs in pregnancy, such as alcohol, tobacco, and cocaine. The student will be evaluated by various faculty members and the course director based on oral examination of the knowledge of the readings, the "mini-project," and engagement in the topic.  
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4
FM 5450 - COMMUNITY FAMILY MEDICINE

Minimum Credits: 0  
Maximum Credits: 0
This elective is intended to offer medical students opportunity to experience family medicine in a remote community setting which is realistic to how family physicians practice. The student will focus on developing the skills necessary to evaluate and treat patients in a community office setting. The student will participate in a SWPA AHEC community or practice project during the elective. The student will choose one SWPA AHEC family practice site for the duration of the elective. The SWPA AHEC preceptor will be responsible for clinical evaluation of the student. 
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

FM 5451 - RURAL FAMILY MEDICINE

Minimum Credits: 0  
Maximum Credits: 0
Elective is intended to offer medical students the opportunity to experience family medicine in a rural community setting. Student will focus on developing skills necessary to evaluate and treat patients in a rural office setting. The use of technology to overcome distance and educational issues will be emphasized. Responsibilities will be determined by the knowledge and skills of the student, but in general will focus on both the inpatient and outpatient settings with a practicing family physician, a dentist, and a nurse practitioner.  
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

FM 5455 - PRIMARY CARE SPORTS MEDICINE

Minimum Credits: 0  
Maximum Credits: 0
This four-week elective is for the student who is interested in learning more about sports medicine. The musculoskeletal system, its exam and their treatment. Students will be exposed to a variety of sports/musculoskeletal injuries in a multi-provider outpatient sports medicine team approach. The course objectives are: to improve the student's musculoskeletal system exam skills; to assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; to develop an appreciation of the roles of surgeons.  
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

FM 5460 - FAMILY PRACTICE

Minimum Credits: 0  
Maximum Credits: 0
Clinical experience, intensive exposure to comprehensive primary care. Multiple sites, general association with community hospitals, family practice residency program. 50-100% Clinical ambulatory, variable inpatient. Emphasis on development of problem-oriented interview and exam, formulation of cost-effective diagnostic approach, and establishment of comprehensive management plans. Knowledge of diagnostic and management strategy, presenting symptoms and chronic problems in office practice stressed.  
Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

FM 5461 - EXTRAMURAL FAMILY PRACTICE

Minimum Credits: 0  
Maximum Credits: 0
Clinical experience, intensive exposure to comprehensive primary care in primarily outpatient office settings. These family practice experiences will take place in community settings or medical schools away from the university of Pittsburgh but within the United States.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5462 - COMBINED FAMILY MEDICINE AND FAMILY PSYCHIATRY**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
This four-week elective focuses on psychiatric and general medical problems in a variety of patients. Student will work on the consultation/liaison service at St. Margaret's Hospital where the student will respond to requests from physicians for psychiatric evaluation of patients on inpatient units. The student conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patients family in the clinical problem, makes treatment recommendations and when appropriate does follow up during the patient's hospital stay. The multidisciplinary team on the service attempts to integrate the biological with the psychosocial perspective to achieve a comprehensive view of patient care. Students will participate in family medicine case conferences, attend outpatient experiences at primary care clinics, participate in palliative care interventions and work on the medical care of the psychiatry patient (MCPP) service at WPIC. Learning opportunities include: supervised clinical assessments; hospital rounds; case conferences and seminars. This elective can prepare a student for combined family medicine/psychiatry residency programs.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5465 - INTEGRATIVE MEDICINE**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
This elective is designed to give students a broad exposure to complementary & alternative medicine (cam) modalities & a more in-depth exposure to somatic oriented approaches and pain management. Students will be exposed to practitioners and physicians in clinical settings covering disciplines including: acupuncture, chiropractic, osteopathic manipulative treatment, integrative medicine, integrative pain management and mind-body approaches. Students are expected to pick one clinical problem and explore the evidence-basis for cam modalities that may offer benefit in treatment.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5470 - PRACTICE-BASED PHARMACOTHERAPY**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
This is a 4-week elective where students will participate in a variety of activities (direct patient care, group/individual case-based discussions, chart reviews, and projects to improve skills in prescribing and management of medications. Special emphasis will be placed on obtaining a thorough medication and history and using evidence-based drug information databases. The student will learn rational prescribing strategies based on cost, formulary guidelines, effectiveness and individual patient characteristics. Contact will be with clinical pharmacists and family physicians.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5485 - CULTURAL COMPETENCY**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
Course objectives: to create better understanding of different health beliefs in different culture, resulting in students with facility in operating in a multicultural environment; foster an understanding of the challenges to physicians and the health care system of varying cultural beliefs and
practices; improve the recognition of health beliefs and practice as they present in the clinical setting. The medical student will be introduced to a variety of cultural issues as they relate to medical care. Directed readings will be assigned to expose students to major health beliefs, disparities, challenges and practices of members of a variety of culture groups, including native Americans, African Americans, Arab Americans, eastern European immigrants, Latino Americans, and Asian Americans. Students will spend time with UPMC medical translators, attending to inpatients and outpatients, both in clinics and on house calls, learning both from the medical reasons for the patient seeking care, and the background health belief. Students will also attend health education events as available in community settings, including steps to a healthy community programs, center for minority health programs, Jewish community center programs, and other opportunities. The student will be expected to do a complete family health belief study on a selected patient's family, including recommendations for improvement of the quality of their health experience. Students will have a weekly meeting with the course director to discuss suggested readings and how the content applied to the clinical experiences.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5500 - INTERNATIONAL FAMILY MEDICINE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is intended to give some structure and guide lines for students wishing to experience medical care in other countries. Although the department has some contacts in other countries, students are strongly encouraged to pursue their own interests and contacts. Students should focus on the practice of medicine in other countries as well as the epidemiology and public health issues within the country.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5505 - FAMILY MEDICINE IN HONDURAS**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This is a four week elective to expose the student to a global health experience in a community based project working with shoulder to shoulder San Jose in Honduras. It will consist of 2 weeks in Pittsburgh and 2 weeks in San Jose del Negrito, Honduras, under the direction of shoulder to shoulder Pittsburgh and the UPMC family medicine global health (GH) team. In select situations a student with fluency in Spanish and prior international travel experience may construct a four week rotation entirely in Honduras. Each student will have an opportunity to practice clinical medicine and preventative care in a low resource setting in rural Honduras. There will be structured educational objectives in public health, tropical medicine and community oriented primary care. The team traveling to San Jose will work with the local nurse and physician in the local clinic setting as well as the various community projects. Each student will be active not only in the clinic setting but in the wider community as the project focuses on community development and community health.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5650 - INDIVIDUALIZED CLINICAL COURSE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5812 - COMMUNITY-BASED PBLC HLTH POLICY**

**Minimum Credits:** 0  
**Maximum Credits:** 0
This is a 4-week elective during which students will learn the basic principles of identifying health problems from a population perspective & developing policies to help solve problems. Activities include required reading, working on existing projects with community based organizations, using health databases to answer questions about the health of communities & preparing a written & oral report based on each person's own assessment of a community, one particular problem within that community, & a rational approach to developing health policies to address it.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5815 - BIOETHICS CONFERENCE AND READINGS IN BIOETHICS AND FAMILY MEDICINE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The student will attend at his/her own expense, two (2) weeks of conference (s) in bioethics that is accredited (one week option can be discussed). The rotation is offered for four (4) weeks of credit. Independent readings, writings and discussion with Dr. Zimmerman or other faculty of the readings will be needed to complete the course. The student is encouraged to attend any lectures by the center for bioethics and health law. Objectives: use various ethical theories to analyze bioethical issues related to family medicine; understand perspectives on bioethical issues at the beginning of life and/or the end of life; interact with other professionals from a variety of backgrounds on bioethical issues; identify resources for understanding bioethical issues.  
**Academic Career:** Medical School  
**Course Component:** Seminar  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5840 - RESEARCH IN FAMILY MEDICINE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.  
**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**FM 5899 - INDEPENDENT STUDY FAMILY MEDICINE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.  
**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

**FM 5900 - FAMILY MED INDEPENDENT STUDY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Students interested in pursuing a particular course of independent study and/or research may choose this elective. Topic to be determined by student and preceptor.  
**Academic Career:** Medical School  
**Course Component:** Directed Studies
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

**FM 5910 - LEADERSHIP/MANAGEMENT/ADMINISTRATION**

Minimum Credits: 0  
Maximum Credits: 0  
This elective will offer the opportunity to develop a wide view of medical leadership and management. Through a series of directed readings, guided experiences, and a "mini-project," students will extend their understanding of clinical managerial sciences: quality management and improvement; utilization management; the US health care system; cost benefit analysis and the distribution of the health care dollar; medical staff administration and function; managed care systems, incentives and trends; measuring physician performance; and introductory accounting and financial management concepts. The student will be evaluated by various faculty members and the course director based on oral examination of the knowledge of the readings, the "mini-project," and engagement in the topic.

Academic Career: Medical School  
Course Component: Practicum  
Grade Component: H/HS/S/LS/U

**Film and Media Studies**

**FMST 2151 - FILM HISTORY/THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore issues relating to film theory, history and research methodology. We will discuss dominant modes of film criticism and explore the creation of "cinema history". We will examine different formulations of this history, tracing how certain explanations of events in cinema have come to prevail, and how certain methods of writing about film have become institutionalized.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**FMST 2151 - FILM HISTORY/THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore issues relating to film theory, history and research methodology. We will discuss dominant modes of film criticism and explore the creation of "cinema history". We will examine different formulations of this history, tracing how certain explanations of events in cinema have come to prevail, and how certain methods of writing about film have become institutionalized.

**FMST 2152 - FILM HISTORY/THEORY 2**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g. Cavell, Deleuze, Frampton, Kluge, Gunning, Mulvey), there will be special attention paid to historical and theoretical arguments within film studies, such as: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from Imax to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.

FMST 2153 - PROSEMINAR IN FILM AND MEDIA STUDIES

Minimum Credits: 1  
Maximum Credits: 1
All students in the Film and Media Studies Ph.D. program are required to complete a one credit proseminar in film and media studies prior to taking their comprehensive examinations. Enrolled students attend a designated lecture by invited scholars, as well as an associated ninety-minute seminar conducted by a Film and Media Studies faculty member concerning the work of the speaker or the topic addressed. The faculty member conducting the seminar will typically choose pertinent readings to be completed prior to the lecture and seminar. The proseminar is usually offered twice a year: once during the fall term and once during the spring, with a lecture and its associated seminar scheduled each term. Invited scholars may or may not participate in the seminar meetings. Dates and times of visiting speakers and the associated seminars will be announced well in advance so that students may plan their schedules accordingly. A student in the program may repeat the proseminar for up to three credits. The proseminar in film and media studies seeks to expand and enhance our graduate students' experience of the critical exchange of ideas, by involving them more fully in the contemporary research being conducted by film and media scholars from around the world.

FMST 2155 - FILM HISTORIOGRAPHY

Minimum Credits: 3  
Maximum Credits: 3
This course will look into theories of film history exploring philosophies behind their social, political, economic, technological, and textual stakes. We will analyze how various forms of film history, intellectual and popular, assert their truth and credibility, and discuss how these kinds of claims might be supported and contested. We will explore the problems of writing film history, particularly in eras where little material survives for any kind of study or where language becomes a major barrier.

FMST 2220 - NEW CHINESE CINEMA
Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**FMST 2235 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA**

Minimum Credits: 3
Maximum Credits: 3
This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.

**FMST 2327 - RUSSIAN FILM SYMPOSIUM**

Minimum Credits: 3
Maximum Credits: 3
In additional to analyzing Russian films released between 2016 and 2019, the course will have a heavy concentration on the professional training of graduate students. This will include selecting a week-long schedule of films to be screened, handling arrangements for visa applications and airline tickets, hotel reservations, the writing of program notes, and much more. By the end of the course, students will be able to handle the logistics of inviting individual speakers to campus, as well as organizing a week-long conference that includes dozens of participants.

**FMST 2416 - CINEMA AND TRAUMA**

Trauma studies now stands at the forefront of contemporary cultural theory, straddling such disciplines as history, psychology, philosophy, and literary criticism. This seminar encourages graduate students to examine and contribute to the rapidly emerging sub-field of cinema/trauma studies. We will focus on the two mid-twentieth century events that continue to anchor many definitions of historical trauma: the Holocaust and Hiroshima. What do films that address these events teach us about the politics and ethics of representing experiences often referred to as unrepresentable? How does cinema force us to refigure debates about the "limits of representation" and the nature of "the event" itself? Is cinema an agent of memory or memory's eraser? A broad range of films will inform our discussion of such questions - documentary and fiction, tragedy and comedy, mass cultural successes and lesser-known art films or genre films, films from the past and present.

FMST 2417 - QUEER THEORY, QUEER CINEMA

Minimum Credits: 3
Maximum Credits: 3
This seminar explores film (also TV and theater) textuality and reception from a "queer" perspective. What is the relationship among queer authors, queer textuality and the subcultures that consume these texts? What place does non-heteronormative sexuality occupy within the production and reception of mass culture? The course will cover: foundational works in the history of sexuality; camp and gay subcultural reception; gay and lesbian authorship of both Hollywood and avant-garde films; the rise of queer television drama; and queer critical practices.

Academic Career: Graduate

FMST 2418 - CINEMA AND PSYCHE

Minimum Credits: 3
Maximum Credits: 3
From the earliest years of film theory, writers have likened the discourse of cinema to the workings of the human mind. In 1916, for instance, Hugo Munsterberg (in "the photoplay") drew parallels between film language and recollection, attention, and anticipation. This course (through readings and film screenings) will pursue such comparisons between cinema and the mind, investigating such topics as dream, memory, fantasy, nostalgia, perception, cognition, affect, etc.

FMST 2420 - CINEMA AND COUNTER-HISTORY

Minimum Credits: 3
Maximum Credits: 3
This graduate course focuses on visual media's connection to historicizing. It is concerned with theoretical writings that can be understood as offering
versions of the past that run counter to received perceptions about historical forms through visual media. The readings and the films pay specific attention to various, often conflicting, theories, forms, and styles to identify the philosophic, aesthetic, and political stakes in activating the past. Among the texts to be studied that are related to philosophies of history are those of Walter Benjamin, Michel Foucault, Gilles Deleuze, Jacques Rancière, Hayden White, Carlo Ginzburg, and Fredric Jameson as well texts on André Bazin, Jean-Luc Godard. Philip Rosen, Mary Ann Doane, Robert Rosenstone, and Vivian Sobchack. The films proposed for screening are Cabiria, Abel Gance's Napoleon, Scipione Africanus, Roberto Rossellini's the Rise to Power of Louis XIV, Pasolini's Mamma Roma, Kubrick's Paths of Glory, Carry on up the Khyber, Monty Python and the Holy Grail, The Camp at Thiaroye, Hyenas, Morfia, a History of Violence, the White Ribbon, and Il Divo.

**FMST 2421 - GLOBAL FILM STARDOM**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Historically, film stardom was examined from an American perspective (where it originated in Hollywood in the first decades of the last century), and theories of stardom emerged from an implicitly Hollywood-based understanding of cinematic fame. Instead, while not ignoring the American cinema, this course will take a global perspective on stardom, in terms of performers, films, and theories. Our approach to stardom will be a combination of the historical, the theoretical, and the textual. This means that in addition to studying individual stars, we will also 1) consider the phenomenon of stardom in terms of its origins and the cultural and national institutional conditions that support it, 2) analyze stardom as a public phenomenon to be understood in the context of specific cultures and audiences, 3) discuss various theories of stardom, celebrity, and public fame, 4) consider the manner in which issues of gender and sexuality impact notions of stardom, and 5) consider the relationship between stardom and spectator subjectivity. Although the course will be focused on cinema stardom, we will also briefly consider theoretical overlaps with the broader category of celebrity studies. In general, when we look at individual stars in the course, we will consider their broad "star text" which involves the interrelationship of screen roles, off-screen information, publicity material, and cultural context. Questions raised will include: what constitutes a "star text" in different historical contexts and ideas about the public and the private? What specifically do the media of photography and film bring to public fame? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? What does stardom mean in old and new transnational contexts? What is the relation between stardom, nation, and politics?

**FMST 2422 - MEDIA AND MOBILITY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- Mobility has been one of the central functions and consequences of media technologies, from papyrus in ancient history to mobile phones in the digital era. This seminar seeks to conduct a thorough theoretical mapping between media and mobility, creating a productive framework in which media can be examined through the ways in which they facilitate, mediate, and regulate various modes of mobility of humans, things, and ideas.

**FMST 2425 - BLACK TIME: AFROFUTURISM, AFROPESSIMISM, AND BEYOND**

FMST 2485 - FILM AND ETHNOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
This course will engage the visual and narrative strategies of the "ethnographic imagination" addressing issues of cultural representation, truth, visuality, and epistemological implications of how anthropologists and documentary filmmakers construct other cultures. We will start with the history of ethnographic cinema so as to stage a broader inquiry into forms of popular and everyday ethnography that have accompanied anthropological practice since its inception. In addition to problematizing distinctions such as science and entertainment, authenticity and hybridity, non-fiction and fiction, and self and other.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2508 - TELEVISION STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course will examine the emergence of television studies out of film studies during the 1980s and beyond. We will read key texts and examine approaches that have characterized this new orientation to the study of television: theories of television spectatorship, program and audience history, genre studies, and others. There will be screenings of key texts that have been considered crucial to the development of these ideas. The main emphasis will be to distinguish the televisual from the cinematic.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2510 - ANIMATION THEORY

Minimum Credits: 3
Maximum Credits: 3
This course will approach animation as a method, a way to rethink film theory beyond the assumption of an essentially photographic medium, and to unearth and explore the previously underdeveloped territories in theorizing and making sense of moving images.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
FMST 2520 - FILM COMEDY

Minimum Credits: 3
Maximum Credits: 3
Since the earliest days of the cinema, film comedy has been one of the most profitable, prevalent and persistent genres-ranging from the primitive burlesques of Edison or Lumiere to the popular features of today. While comedy appeals to a viewer's sense of pleasure, it also addresses her intellect, for as Ousmane Sembene once said, comedy "makes people laugh but it also makes them think." That is precisely what we will do in this course: think through comedy. Here, it is interesting to note that, in 2010, the academic journal comic studies began publication.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2524 - GENRE AND FILM MELODRAMA

Minimum Credits: 3
Maximum Credits: 3
Course will interrogate the cultural impact of melodrama through the media. We will explore the various expressions of melodrama in gothic narratives, the "woman's film", historical films, "tragic" melodramas, family melodramas, and TV docudramas. Topics addressed include questions about common sense/folklore and the nature of mass and popular cultural representation, the problematic nature of genre, the relation between melodrama, history, and the construction of narratives of national identity in relation to race, gender and sexuality.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2525 - HORROR FILM

Minimum Credits: 3
Maximum Credits: 3
This seminar will investigate the key films and critical discussions surrounding the genre from its beginnings to the present, but not merely to perform a genre survey- instead we will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film studies in profound ways.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Grade Component: Grad LG/SNC Basis

FMST 2526 - WAR AND CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course theorizes the convergence of military and cinematic technologies, focusing on the logistics of perception, bio-politics, and the relation of cinematic/military technologies to the body. Topics include the military, medical, and cinematic uses of the scope and the screen, theories of human vision and ocularcentrism, new conceptions of space and time, the temporal convergence of production and exhibition (speed and acceleration), new media technologies, and the blurred boundaries of war and entertainment.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2540 - ESSAY FILM/DOCUMENTARY FILM

Minimum Credits: 3
Maximum Credits: 3
This course will explore documentary from critical and creative vantage points. Key theoretical texts from the interdisciplinary field of documentary studies will address the pertinent ethical, formal and thematic concerns.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
FMST 2542 - DOCUMENTARY THEORY & PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course will explore documentary film and video from critical and creative vantage points. Students will be introduced to key discussions from within the interdisciplinary field of documentary studies while also working on individual and collaborative short documentary projects and exercises. Hands-on training in audiovisual recording and editing techniques will be provided. No prior production experience is required.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2570 - KEY CONCEPTS IN NEW MEDIA

Minimum Credits: 3
Maximum Credits: 3
What exactly is "information"? What is an "interface"? What does it mean when we speak of a "media platform"? These terms and concepts form the backbone of the major theories and discourses in new media, which produce a rich vocabulary that has yet to be rigorously defined. This course aims to provide a theoretical map to navigate the rapidly expanding fields of media studies by critically interrogating a set of key concepts that have been extensively used to deal with the technologies, forms, materials and cultures of new media. We will discuss the meaning, usage, and genealogy of such concepts as "network," "cybernetics," "hardwire," "infrastructure," and "system," which have animated a wide range of researches and debates. By critically engaging with these key concepts, we hope to not only reconstitute a framework for theorizing contemporary media, but to explore the very notion of "media" as a discursive formation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FMST 2660 - SEXUAL REPRESENTATION AND CINEMA
**FMST 2760 - THEORY/TECH/MEDIA PLATO-GAMES**

Minimum Credits: 3
Maximum Credits: 3

This course will examine a number of key theoretical debates in the history of visual and verbal media, beginning with the technology of writing itself and moving into the invention of the codex, the printing press, and 19th and 20th century forms of imagistic production. Of particular concern will be modes of competition and symbiosis among various technologies of representation at particular historical moments, such as the relations between speech and print, poetry and theater, painting and photography, and cinema and digital media. Although case studies will be drawn from a number of historical periods, special attention will be paid to the Renaissance and to recent decades, when media of all kinds have come under increasing technological and theoretical pressure. Students will have the opportunity to extend the seminar's concerns to their own areas of research.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FMST 2760 - THEORY/TECHNOLOGY/MEDIA FROM PLATO TO VIDEO GAMES**

Minimum Credits: 3  
Maximum Credits: 3

Film Studies - Graduate Program

FILMG 2451 - FILM HISTORY/THEORY 1

Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema up to 1960, taking up such topics as: the origins of cinema; the development of narrative; the rise of Hollywood and its global appeal; national and international cinemas; the relation between film and the other arts; the coming of sound; arguments between realist and modernist movements; the avant-garde; and the technological and social history of cinema. These topics will be addressed through consideration of major film movements and significant films. Students will also be introduced to key theorists from this time, including Kuleshov, Vertov, Eisenstein, Balz, Mnsterberg, Lindsay, Epstein, Kracauer, Benjamin, Arnheim, Bazin, and others.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FILMG 2452 - FILM HISTORY/THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g., Cavell, Deleuze, Frampton, Kluge, Gunning, Mulvey), there will be special attention paid to historical and theoretical arguments within film studies, such as: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from Imax to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.

Academic Career: Graduate

Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

FILMG 2905 - PROSEMINAR IN FILM AND MEDIA STUDIES

Minimum Credits: 1
Maximum Credits: 1
All students in the Ph.D. Film studies program are required to complete a one credit proseminar in film and media studies prior to taking their comprehensive examinations. Enrolled students attend a designated lecture by invited scholars, as well as an associated ninety-minute seminar conducted by a film studies faculty member concerning the work of the speaker or the topic addressed. The faculty member conducting the seminar will typically choose pertinent readings to be completed prior to the lecture and seminar. The proseminar is usually offered twice a year: once during
the fall term and once during the spring, with a lecture and its associated seminar scheduled each term. Invited scholars may or may not participate in the seminar meetings. Dates and times of visiting speakers and the associated seminars will be announced well in advance so that students may plan their schedules accordingly. A student in the program may repeat the proseminar for up to three credits. The proseminar in film and media studies seeks to expand and enhance our graduate students' experience of the critical exchange of ideas, by involving them more fully in the contemporary research being conducted by film and media scholars from around the world.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FILMG 3902 - DIRECTED STUDY FOR THE PHD**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
In exceptional circumstances, a student who wishes to pursue a topic for which no course is available can arrange for directed study with a faculty member.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**Finance and Economics**

**BFAE 2801 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course develops an understanding of how a market-based economic system reconciles the separate needs of consumers and producers and provides an economic framework for managerial decisions. Additionally, the course provides tools of analysis and concepts which are used in the MBA program's functional fields.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFAE 2850 - HEALTHCARE ECONOMICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Business Administration (EMBA-MBA)

**BFAE 3001 - MICROECONOMICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a Ph.D. level course in microeconomics with special emphasis on business applications. We will use decision and game theoretic models to analyze the decision making process of business firms. Both the neoclassical and industrial organization theories of the firm will be analyzed. Special attention will be devoted to issues of incomplete information as they pertain to signaling in markets, to the internal organization of the firm and to models of regulation.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.
French

FR 2000 - INTRODUCTION TO GRADUATE STUDIES IN MODERN LANGUAGES AND CULTURES

Minimum Credits: 1
Maximum Credits: 1
This one-credit course offers an introduction to graduate study in modern languages and cultures. It will help you adjust to your graduate program and will cover the nuts and bolts of how to take seminars, do readings, teach, balance your various obligations and meet the emotional and life challenges of graduate school. What matters most in teaching is not skills but a sense of personal identity and a strong relationship to the disciplinary knowledge. We will engage with the latest research in positive psychology, resilience, pedagogy, deep learning, creativity, sociology of work and executive coaching. The class will prepare you better to move among different kinds of professional situations within and outside academia.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2101 - MEDIEVAL FRENCH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
In this course we shall examine some outstanding works representing a variety of genres: the saint's life, the chanson degeste, the Romance, the theater, lyric poetry, the fable, etc. A sense of the evolution of literature in France over the course of five centuries and the rich variety this first flourishing of vernacular writing has to offer will be developed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2102 - MEDIEVAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2105 - SEMINAR: MEDIEVAL TOPIC

Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2106 - SEMINAR: CHRISTINE DE PIZAN

Minimum Credits: 3
Maximum Credits: 3
In this course, we read a wide range of the writings of Christine de Pizan (c. 1364-C. 1430), Europe's first professional woman writer. Christine wrote in many genres: from lyric poetry to allegories and political texts. We will focus especially on the creation of an authoritative female poetic voice; Christine's protofeminism; and her role in the politics of her time.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
FR 2225 - SEMINAR: SIXTEENTH CENTURY TOPIC

Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's St

FR 2305 - SEMINAR: 17TH CENTURY TOPIC

Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2402 - TOPICS 17TH AND 18TH CENTURY FRENCH CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course, broad in scope, will treat some aspect of 17th and 18th century French culture.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

FR 2409 - 18TH CENTURY THEATRE

Minimum Credits: 3
Maximum Credits: 3
A seminar in the theatre of England, France, Germany, and Italy during the rise of the middle class to economic, political, and cultural power. The course will explore such topics as bourgeois drama, sentimentality, the baroque, and the enlightenment as related to the dramatic theories and literature, as well as theatre history and practices of the period.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2505 - SEMINAR: 19TH CENTURY TOPIC

Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

FR 2510 - FRENCH ROMANTICISM

Minimum Credits: 3
Maximum Credits: 3
This course focuses on some of the most important features of Romantic prose from Rousseau to Flaubert: the relationship between the individual
and society, the concern with politics and major historical events, the growing of the literary form of the novel.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**FR 2601 - DISSERTATION WORKSHOP**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This seminar will allow the students to work on their dissertation while receiving continuous feedback from a faculty and their peers. They will share writing strategies, research accomplishments and professional tips.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FR 2605 - SEMINAR: 20TH CENTURY TOPIC**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

**FR 2648 - CONTEMPORARY FRENCH CINEMA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This seminar examines the history of recent French cinema and/or emerging trends in contemporary French film production. Topics covered vary greatly with instructor and term.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FR 2703 - SEMINARS: TOPICS, GENRES, THEMES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
These seminars are subject - rather than author - or century - specific. Examples might be Vichy France, Baroque religious poetry, or Don Juan in French literature.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FR 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.

**Academic Career:** Graduate  
**Course Component:** Seminar
FR 2715 - TOPICS IN LITERARY AND CULTURAL THEORY

Minimum Credits: 3
Maximum Credits: 3
In this course, students will examine a special topic in literary and cultural theory. The course may be organized around a given theoretician, a theoretical movement, or a problematic. Students are expected to have some background in literary and cultural theory.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2761 - FRENCH STUDIES GENDER STUDIES

Minimum Credits: 3
Maximum Credits: 3
What does it mean to put gender/sexuality studies and French studies into productive dialogue? This course treats selected topics related to gender and sexuality in French/Francophone studies. Texts studied might include film, theater, news media, literature, autobiography, and others. Texts may come from a variety of time periods from the middle ages to the twenty-first century. Gender/sexuality will be understood in a broad sense, including women/feminism, masculinity, queer and trans*.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's St

FR 2765 - COMPARATIVE FRANCOPHONE CULTURE

Minimum Credits: 3
Maximum Credits: 3
This seminar examines 'Francophonie' through the juxtaposition of francophone cultural production and theory from different areas of the world

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2766 - TOPICS-MEDITERRANEAN STUDIES

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on francophone Mediterranean culture and transitional studies

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
This course enables M.A. Candidates to do research under the direction of a faculty member, on a topic of mutual interest.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

FR 2903 - MA RESEARCH PAPER DIRECTED STUDY
Minimum Credits: 3  
Maximum Credits: 3  
MA students write a research paper (6000-8000 words), typically during their final semester in the program.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  

FR 2910 - COMPREHENSIVE EXAMINATION MA  
Minimum Credits: 1  
Maximum Credits: 3  
This course is intended for ma candidates in their last term of study when they present themselves for the ma comprehensive examination.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis  
Course Attributes: West European Studies  

FR 2970 - TEACHING OF FRENCH  
Minimum Credits: 3  
Maximum Credits: 3  
Teaching French, Italian, and Spanish supports the concept that instructional expertise is developed in and through practice-based projects, teaching experiences, and the study of the research evidence and theories on additional language learning. The course is designed for language teaching at the university level and is primarily intended for teaching assistants, although part time instructors may enroll in this class for credit. In the course, four major areas associated with contextualized instruction are presented: 1) situations and themes as context, 2) culture as context, 3) academic subject matter as context, and 4) literature as context. All assignments are project-based and include analytical and reflective reports on the students' own teaching and lesson development projects intended to be used and evaluated in actual foreign language classes. Teaching assistants and instructors in other language are welcome to register for the course but examples are primarily in Spanish, French, Italian, and English.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis  

FR 2973 - ISSUES IN FOREIGN LANGUAGE ED  
Minimum Credits: 3  
Maximum Credits: 3  
The course deals with current issues in foreign language teaching in terms of procedures and techniques. This course is a more practical approach to the theories of foreign language methodology.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Attributes: Global Studies  

FR 2975 - ADVANCED TOPICS IN FOREIGN LANGUAGE LEARNING AND TEACHING  
Minimum Credits: 3  
Maximum Credits: 3  
In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

FR 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
This independent course is for ma students who have completed, or are completing in their last term of study, all course requirements for the ma degree.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Attributes: West European Studies

FR 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Students register for this course while doing research for their Ph.D. Dissertations.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Attributes: West European Studies

FR 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
This course enables Ph.D. Students to do research under the direction of a faculty member, on a topic of mutual interest.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

FR 3905 - TEACHING APPRENTICESHIP

Minimum Credits: 1
Maximum Credits: 12
Available to Ph.D. students who will work with a faculty member in teaching an upper level literature, language or civilization course.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

FR 3910 - COMPREHENSIVE EXAMINATION

Minimum Credits: 1
Maximum Credits: 12
This course is intended for Ph.D. Candidates the term they present themselves for their Ph.D. Comprehensive examination.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Attributes: West European Studies

Full-Time Administrative Study

**Gender, Sexuality, and Women's Studies**
GSWS 2058 - FEMINIST SOCIAL WORK

Minimum Credits: 3
Maximum Credits: 3
This course focuses on gender and social work, beginning with a critical examination of the concept of feminist practice, with attention to oppression, power, and privilege in helping relationships and in women's lives more broadly. It explores meanings of gender as it intersects with race/ethnicity, class, sexuality, age, and ability in the lives of women in general and specifically as social workers and clients. Taught in a seminar format, this course examines topics such as work, welfare, family, violence, justice system involvement, health, mental health, and women as agents of change and is appropriate for students concentrating in micro or macro levels of practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Gender, Sexuality & Women's Studies

GSWS 2150 - TRANSNATIONAL FEMINISMS

Minimum Credits: 3
Maximum Credits: 3
This class will look at the situation of women in international perspective. We will examine how feminist organizations operate in difficult national and local contexts and how women's rights have been addressed through international organizations such as the united nations and the world court. Through case studies, we will consider a number of contentious issues in global feminism, including sexual assault, sex tourism, and the global assembly line, and the role of feminism in national liberation movements.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GSWS 2240 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
This graduate course addresses a current topic in gender, sexuality, or women's studies. Topic varies by instructor.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Gender, Sexuality & Women's Studies

GSWS 2242 - FEMINIST THEORY

Minimum Credits: 3
Maximum Credits: 3
This course is an interdisciplinary introduction to feminist theory. It will examine a wide range of feminist theories and theories of gender, drawing from works in history, social sciences, philosophy, legal studies, and literary theory.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Gender, Sexuality & Women's Studies, Global Studies

GSWS 2252 - THEORIES OF GENDER AND SEXUALITY

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of important current topics and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship and the foundational readings that have prepared the way for them. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines and sampling a range of methodologies, this course works through some of the key moments, movements, and problems that shape contemporary thinking about gender and sexuality. The course invites students to think through materials and ideas in relation to their own research, interests, and
commitments.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SU3 Basis

**Course Attributes:** Gender, Sexuality & Women's Studies

**GSWS 2262 - GENDER, ETHICS, AND THE BODY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar explores what it means to take a feminist approach to something, particularly ethics, and what it means to examine the gendered nature of something, particularly bodies, ethics, and even feminist approaches themselves.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Attributes:** Gender, Sexuality & Women's Studies

**GSWS 2270 - QUEER THEORIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of recent theories of sexuality, emphasizing work in lesbian, gay, transgender, and queer studies. Consideration of the development of ‘queer’ as critical category (including its limitations), and of the history of queer theory and LGBT studies.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Attributes:** Gender, Sexuality & Women's Studies

**GSWS 2902 - DIRECTED STUDY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Individual study on a topic related to gender, sexuality, or women's studies under supervision of a faculty member from the program. A variety of individual research and reading projects not covered in other courses may be undertaken.

**Academic Career:** Graduate

**Course Component:** Directed Studies

**Grade Component:** Grad Letter Grade

Minimum Credits: 3  
Maximum Credits: 3  
Models allow scientists and others to represent features and behaviors of environmental systems in order to promote inquiry, develop insight, test hypotheses, and consider solutions to problems. The class will use primary literature and hands-on experiences with computer models to introduce environmentally relevant modeling tools. Topics covered will include process-based models of disease, climate, ice, ecosystems, ecosystem services, hydrology, predator-prey systems, and competition among species for resources. Students will have the opportunity to conduct original research projects either by developing their own environmental model or by using existing models. No programming experience is required. Students should have some upper level undergraduate coursework in environmental studies, science, biology, geology, physics or chemistry and be comfortable thinking quantitatively.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2015 - GEOLOGY COLLOQUIUM**

Minimum Credits: 1  
Maximum Credits: 1  
Geology colloquium is a required course for MS and PhD students in geology and planetary science each term. It is a formalization of the seminar series with weekly guest speakers from industry, academia, and government. Each seminar will focus on a different research topic in the earth sciences and describe active and on-going projects of immediate interest to students.  
**Academic Career:** Graduate  
**Course Component:** Colloquium  
**Grade Component:** Grad SN Basis

**GEOL 2020 - ANSWERING REGIONAL CHALLENGES IN WATER SUSTAINABILITY**

Minimum Credits: 3  
Maximum Credits: 3  
A graduate-level seminar class devoted to examining local/regional challenges in water sustainability. Course components will include guest presentations by water practitioners, hands on data synthesis and analysis, group/class projects, and development of infographics and briefing sheets for key water challenges.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
GEOL 2021 - ADVANCED PETROLOGY

Minimum Credits: 3
Maximum Credits: 3
The origin and characteristics of the common igneous rocks and minerals are studied in light of natural and synthetic rock systems. Main topics covered are equilibrium relations of the main silicate systems, petrogenesis of the principal igneous rock types and their relation to plate tectonic regimes, and generation and source of magma.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2025 - ADVANCED VOLCANOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will provide an in-depth discussion of the generation of magma beneath the Earth's surface, the processes by which different volcanic eruptions occur and the deposits that are left behind. We will also discuss the monitoring and mitigation of volcanic hazards, through remote sensing and modelling techniques, as well as the volcanic processes that occur and have occurred on other planetary bodies in our solar system.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2045 - STATISTICS FOR EARTH SCIENCE

Minimum Credits: 3
Maximum Credits: 3
A statistics course geared toward environmental science and geology majors with an emphasis on applying data analysis and statistical techniques to environmental data. Topics will include: visualizing data, summary statistics, correlation, selected parametric statistics (t-tests, general linear models), selected non-parametric methods, statistical inference, and experimental design.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2049 - PALEOCLIMATOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course presents the different types of data used to study the earth's climatic history and long-term climatic variability. Particular emphasis is given to the climatic changes during the last Cenozoic -- the so called glacial ages. Topics of discussion include time scales of climatic change, types of paleoclimatic records and their limitations, numerical climate models, the causes of climatic change, and the importance of paleoclimatic research in forecasting the future.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2054 - SOILS: GEOBIOCHEMICAL LANDSCAPES

Minimum Credits: 4
Maximum Credits: 4
An overview of soils with a strong emphasis on landscape scale process. The course consists of lecture and laboratory/field work. The lecture will include description of physical and chemical soil properties and processes, discussion of major soil classifications and description of ramifications at the landscape scale.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
GEOL 2060 - GEOMORPHOLOGY

Minimum Credits: 4  
Maximum Credits: 4  
This course is a survey of the major landform features found on the earth's surface. Each landform type is first described qualitatively and then examined in terms of the processes, such as stream flow or glacial activity, which cause its development. The purpose of the course is to familiarize students with geomorphic principles.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

GEOL 2110 - PLATE TECTONICS

Minimum Credits: 3  
Maximum Credits: 3  
The geometry and kinematics of plate tectonics are developed together with the geophysical evidence for plate motions in the first half of the course. The second half involves a geological examination of convergent, divergent, and transform-dominated terranes.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2120 - BASIN ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
The integrated study of sedimentary basins as geodynamic entities, including tectonic environment, geologic history and associated strength of the lithosphere, rock weathering and erosion, and sediment transport. The class will give students a background in driving mechanisms for basin formation and subsidence, sedimentary record preservation and alteration, sedimentary geometry, facies and petrology and provide a basic understanding of the continuum mechanics equations that approximate basin formation.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: GEOL 1100 and GEOL 1020; LVL: Graduate or PhD

GEOL 2150 - SURFACE WATER HYDROLOGY

Minimum Credits: 4  
Maximum Credits: 4  
This course shall provide an Earth systems science overview of the processes that govern the hydrologic cycle including precipitation, evapotranspiration, runoff and discharge, infiltration, and groundwater. The course shall emphasize the movement of water through the atmosphere, over the land surface, and within the unsaturated and saturated zones.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2151 - GROUNDWATER GEOLOGY

Minimum Credits: 4  
Maximum Credits: 4  
This course focuses on physical and chemical processes controlling water movement and composition in sub-surface environments. The lab focuses on practical field methods for the characterization of groundwater.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade
GEOL 2446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM

Minimum Credits: 3
Maximum Credits: 3
Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: GEOL 2449

GEOL 2447 - GEOPHYSICAL WELL LOGGING

Minimum Credits: 3
Maximum Credits: 3
This course introduces the eriaview tool. Numerous computer workstation based assignments introduce the student to gis landbases and gis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2449 - GIS, GPS, AND COMPUTER METHODS

Minimum Credits: 3
Maximum Credits: 3
The goals of this course are to gain expertise in spatial analysis and geographical information systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
Designed as a follow on to the introduction to remote sensing course this advanced class emphasizes field-oriented problems, data collection, and validation. The ultimate goal is to explore the connection between remotely-gathered imagery and the real-world factors which influence those data. Students taking the course should have had at least 1 semester of high school or college physics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2461 - ADVANCE REMOTE SENSING

Minimum Credits: 3
Maximum Credits: 3
This course is offered in conjunction with the introduction to remote sensing (geol-1460) - this course provides a foundation in the theory and techniques of remote sensing and geospatial data visualization spanning the electromagnetic spectrum from the ultraviolet to microwave wavelength region. Topics will include light/matter interaction, optics and sensor design, image analysis using commercial software, as well as current applications of remote sensing to science and engineering problems. The course and integrated image-processing laboratory are designed to provide you with an appreciation of current remote sensing issues, the geologic and human processes that impact remotely-gathered data, and how those processes can be measured using remote sensing. Students taking this course will participate in an independent research project involving remote sensing theory/data analysis. Students with no prior remote sensing background will also be required to participate in the geol-1460 lecture and computer labs.

Academic Career: Graduate
Course Component: Lecture
GEOL 2462 - GEOMORPHOLOGY: DYNAMIC EVOLUTION OF EARTH'S SURFACE

Minimum Credits: 4  
Maximum Credits: 4  
This course aims to introduce students to the geomorphologic processes that shape the surface of Earth, the physical mechanisms by which they operate, and the landforms they create. It will combine qualitative and quantitative descriptions of land-shaping processes such as river erosion, glaciers motion, and landslides. The course builds on in class discussions and assignments to train students in applying basic physical and mathematical tools to explore geomorphological processes.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2468 - QUANTITATIVE RESEARCH METHODS IN EARTH SCIENCE IN MATLAB

Minimum Credits: 4  
Maximum Credits: 4  
Quantitative methods are essential for solving problems in Geologic and Environmental Sciences and are often implemented by programming in specialized software. This course focuses on methods for quantitative data exploration and hypothesis testing with Mat lab. The course will introduce students to programming with Mat lab, and use Mat lab to implement and explore a variety of quantitative methods, including: uni- and multi- variate statistics, dimensional analysis, signal processing, spatial extrapolation, and numerical modeling. Classes will include lectures and group assignments that will use various methods to detect patterns in data, pose hypotheses regarding these patterns, and test them.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2469 - TOPOGRAPHIC ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
Topographic analysis: Landscape topography can reveal valuable information about the processes, evolution, and external conditions that formed a landscape. This class will introduce students to different methods of topographic analysis and the information they can provide. It will include examination of algorithms for analysis of digital elevation models (DEMs), ways for filtering DEMs for features of interest, and analysis of different topographic attributes and how they relate to factors such as climate, tectonics, and anthropogenic modifications. Methods will be executed and developed using Matlab and ArcGis. The class will focus on the analysis of a specific environment (the specific environment/s will vary from year to year and may include: urban areas, mountain ranges, Arctic vs Tropical topography etc.). It will use the analyses methods we will learn, together with literature on this specific environment to explore questions regarding the topographic characteristics and environmental conditions that prevail in this environment. Knowledge of Arc GIS and Matlab required.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2470 - CONSERVATION LAWS AND EARTH SURFACE DYNAMICS

Minimum Credits: 4  
Maximum Credits: 4  
Earth's topography is shaped by interactions between surface, tectonics and climatic processes. This course combines literature reviews with analytical and numerical models to examine how these processes act to modify Earth's surface over long time periods.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2501 - ORGANIC AND STABLE ISOTOPE BIOGEOCHEMISTRY
This is mainly a lecture course that will examine the carbon cycle and the life cycle of the organisms that are responsible for the eventual accumulation of organic materials in sediments. The processes involved in the simultaneous preservation and transformation of organic materials into coal, petroleum, natural gas, kerogen and other dispersed organics will be reviewed in light of modern concepts of thermal maturation processes. The structures of naturally-occurring organic materials in sediments will be discussed.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**GEOL 2510 - AQUATIC AND SEDIMENTARY GEOCHEMISTRY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine the chemistry and geochemistry of modern and ancient aquatic and sedimentary systems, including oceans and fresh waters. Students will gain an understanding of the biogeochemical processes occurring in aquatic systems, and the geochemical signatures they leave in the sedimentary record.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: (CHEM 0110 and GEOL 0055) or GEOL 0800 or 0860

**GEOL 2515 - ENVIRONMENTAL GEOCHEMISTRY**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the complex interactions of earth's rock, water, air, and life systems that determine the chemical characteristics of our environment. We will examine the distribution, cycling, and transport of chemical compounds in the atmosphere, hydrosphere, and terrestrial environment on local and global scales. Topics will include water chemistry, organic and inorganic pollution and related toxicology, hazardous wastes, acid rain, acid mine drainage, photochemical smog, ozone depletion, and global climate change. A class project involves chemical analysis of student-provided water samples.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**GEOL 2520 - RADIOGENIC ISOTOPE GEOLOGY AND GEOCHRONOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to isotope systematics (including mass dependent fractionation, radioactive decay, generation of cosmogenic nuclides, and nucleosynthesis), and application of isotope systems to problems in geochronology, geology, hydrology, oceanography, biology, and Cosmochemistry.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**GEOL 2525 - STABLE ISOTOPES**

Minimum Credits: 3  
Maximum Credits: 3  
This course will provide students with a thorough introduction to the stable isotope systematics of light elements (hydrogen, carbon, nitrogen, oxygen, and sulfur). The course examines the fundamental concepts of isotope equilibrium and kinetics, physiochemical and biogenic mechanisms of isotope exchange, and the principles of mass spectrometry and stable isotope extraction techniques.

**Academic Career:** Graduate

**Course Component:** Lecture
GEOL 2640 - ADV GEOHAZARDS & RISK MGMNT

Minimum Credits: 3  
Maximum Credits: 3  
The geological and natural processes that affect the human environment in catastrophic ways are examined in this class in terms of science, prediction, mitigation, avoidance and the policy/safety issues involved. These problems commonly result from human activity modifying and impinging the natural geologic processes. Detailed topics covered include the four primary hazards that are common in the United States: earthquakes, hurricanes, wildfires, and flooding.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

GEOL 2750 - VOLCANOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on a specific but different topic of volcanology each time it is offered. The course is offered dependent on student demand. Courses that have been offered in the past include: describing and interpreting pyroclastic rocks, exploring explosions and glaciovolcanism. All the courses include discussion in the classroom, especially of recent volcanological literature, study of hand samples and microscope study of thin-sections.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

GEOL 2853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY

Minimum Credits: 3  
Maximum Credits: 3  
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

GEOL 2990 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 12  
This course permits graduate students to explore specific topics in the geological sciences. The course is designed in a more flexible format than a directed study, stressing a higher degree of independent library research.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis

GEOL 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1  
Maximum Credits: 12  
This course is designed to permit graduate students the opportunity to accomplish research necessary for the completion of a PhD degree in geology.  
Academic Career: Graduate

1734
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Geology and Planetary Science (PHD) or Geology and Environmental Sci (PHD)

GEOL 3010 - PLANETARY PETROLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 3410 - EXPLORATION GEOPHYSICS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on exploration geophysics including reflection seismic, well log, gravity, electromagnetic, magnetic, electrical, and other methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3853 - ECOSYSTEMS: LAND-WATER-ATMOSPHERE INTERACTIONS

Minimum Credits: 3
Maximum Credits: 3
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

GEOL 3901 - TOPICS IN SEDIMENTOLOGY

Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of sedimentology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 12
This is a course designed to permit graduate students an opportunity to explore facets of research possibly leading to project/thesis/dissertation topic.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3904 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
This is a course designed to permit graduate students an opportunity to explore facets of research possibly in the area of information science systems related to their project/thesis/dissertation topic.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3906 - TOPICS IN GEOLOGY

Minimum Credits: 2
Maximum Credits: 2
This is a course designed to permit the teaching of new and significant developments in the field of geology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3908 - TOPICS GEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of geology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3924 - TOPICS IN GEOMORPHOLOGY

Minimum Credits: 2
Maximum Credits: 2
This is a course designed to permit the teaching of new and significant developments in the integrated fields of geomorphology, tectonics, and climate. The theory, techniques and applications are emphasized as is the use of current data sets through a combination of readings, lectures and analyses. Field trip is associated with this course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3925 - TOPICS IN PALEOLIMNOLOGY

Minimum Credits: 3
Maximum Credits: 3
This graduate class will focus on the study lake sediments as archives of climatic change. Lake deposits form a significant part of the geologic record and contain high resolution records of past climatic and environmental changes in continental environments. Because lake deposits are the product of diverse geochemical experiments they provide a framework to discuss numerous problems which are of general interest in both chemical sedimentology and general sedimentology. Readings assigned from current journal articles.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3931 - TOPICS IN PALEOENVIRONMENTAL

Minimum Credits: 1
Maximum Credits: 1
This is a course designed to permit the teaching of new and significant developments in the field of paleo environmental analysis. It permits...
maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 3946 - PYTHON SCRIPTING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of this course is to gain expertise in programming methods using environmental systems research incorporated arcobjects and the visual studio .net programming environment of microsoft. Arcobjects is a software technology based on the com protocol and can be used within any com-compliant programming language. Our goal in this class is to gain fundamental skills in visual basic programming using the microsoft developers studio visual basic environment through applied examples and homeworks. After students have gained some programming expertise they will immediately begin programming the arcgis desktop using arcobjects technology.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: GEOL 2449

**GEOL 3948 - TOPICS IN GIS 2**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This is a course designed to permit the teaching of new and significant development in the field of GIS. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: GEOL 2449

**GEOL 3949 - ANALYTICAL APPLICATIONS IN THE GEOSCIENCES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis  
**Course Requirements:** LVL: GRAD

**GEOL 3951 - TOPICS IN GEOCHEMISTRY 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is a course designed to permit the teaching of new and significant developments in the field of geochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 3952 - TOPICS IN BIOGEOCHEMISTRY & GEOBIOLOGY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is a course designed to permit the teaching of new and significant developments in the field of geochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** Graduate
GEOL 3953 - TOPICS IN GEOCHEMISTRY: GEOCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course will focus on modeling fluid-rock interaction under low (Earth surface) to moderate (hydrothermal) temperature conditions. We will cover basic equilibrium and kinetic reactions, sorption and ion exchange, dissolution and precipitation, and reactive transport modeling. Students will use The Geochemist's Workbench® software as a tool to generate stability diagrams, to understand and manipulate equilibrium systems, and to produce more complex reactive transport models on systems of interest to their research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3954 - TOPICS IN HYDROLOGY

Minimum Credits: 2
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

GEOL 3956 - TOPICS IN NITROGEN BIOGEOCHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
This is a course designed to permit the teaching of new and significant developments in the field of nitrogen biogeochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3957 - EXPLORING NITROGEN IN THE EARTH'S PAST

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

GEOL 3970 - REMOTE EXPLORATION OF THE MOON AND MARS

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the theory, technology and science of the recent remote sensing data sets from the moon and mars. Numerous missions from rovers to orbiters have produced datasets that span the electromagnetic spectrum, and these will be the focus of this graduate-level, seminar-style class. Students should have had a remote sensing course and will also complete an independent study utilizing either lunar or mars remote sensing data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 3971 - TOPICS IN REMOTE SENSING: ORBITAL IMAGING OF THE EARTH
Orbital remote sensing of the earth has been a reality since the first imaging satellites were launched in the early 1960's. Hundreds of satellites and thousands of sensors are now currently in orbit measuring diverse data sets important for geological, weather, environmental, and climate processes. This graduate-level, seminar style course will explore many of these missions and sensors by the way of directed journal articles and in-depth discussions. Students will also complete an independent project using one or more of these datasets and present the results at the end of the semester.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**GEOL 3974 - TOPICS IN VOLCANOLOGY - HAZARD OBSERVATION, MODELLING AND GIS**

Minimum Credits: 3
Maximum Credits: 3
This course will provide an in-depth analysis of the image processing, modelling and GIS techniques used in volcanic hazard prediction and mitigation. Students will gain insight and experience in image processing techniques for detecting precursory and syn-eruptive activity. Additionally students will learn the operation of computer models designed to predict volcanic phenomena, such as the propagation of ash clouds, the dynamics of lava flows, and run-out distances of pyroclastic flows. Finally students will learn how GIS is used to mitigate and prepare for volcanic disasters.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**GEOL 3980 - TOPICS IN IGNEOUS PETROLOGY**

Minimum Credits: 2
Maximum Credits: 2
This course is designed to permit the teaching of new and significant developments in the field of geophysics. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**German**

**GER 2000 - MA THESIS RESEARCH**

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Attributes: West European Studies

**GER 2110 - INTRODUCTION TO LITERARY AND CULTURAL THEORY**

Minimum Credits: 3
Maximum Credits: 3
This course offers selected readings in 20th century literary theory, with emphasis on the German tradition. We examine such "schools" of literary theory as psychoanalytic (Freud), Marxist (Lukacs, Benjamin, Brecht), and reception theory (Jauss, Iser). Each is discussed within its historical context; moreover, the implications of each is tested in relation to a selected work of literature. In addition, we study the critical reception of these schools of thought, as well as their relevance to contemporary debates.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies, West European Studies
GER 2112 - THEORY IN CULTURAL STUDIES

Minimum Credits: 3
Maximum Credits: 3
From its inception, cultural studies has examined culture as practice and artifacts through the categories of social class, gender, race/ethnicity, collective and individual identity, ideology and power by utilizing theoretical models from across the disciplines. This seminar allows students to familiarize themselves with key theoretical moments that shaped cultural studies and explore critically the significance of theory in cultural studies.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

GER 2882 - TOPICS IN GERMAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course will use the German cinema to examine the relationship between films, social change, and questions of national identity and to assess the emergence of certain artistic movements, film genres, and models of authorship along these lines. Depending on the semester in which it is taught, the course will address these issues through topics like the representation of the masses, gender anxieties, film and the other arts, the historical film, film auteurs, images of the other, or war and cinema.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

GER 2892 - APPARATUS THEORY

Minimum Credits: 3
Maximum Credits: 3
Apparatus Theory was central to the debates that generated contemporary film studies. This seminar will review the history of those debates and engage contemporary efforts to reinvigorate discussions of the full apparatus that brings the moving image to the screen.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

GER 2902 - DIRECTED M.A. STUDY

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

GER 2904 - MA PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This practicum is for students involved in organized graduate coursework (not independent or directed study) that is less than a 3-credit seminar, but that merits academic credit (i.e. Mini-seminars, lectures, films, or similar events).
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

GER 2970 - TEACHING OF GERMAN
This course examines and evaluates current pedagogical theories in language teaching and gives practical information on subjects such as teaching the four basic skills, lesson planning, vocabulary building, pattern drills, games, student-teacher interaction, textbook evaluation, testing, grading, visual aids, and culture. Theoretical discussions are augmented by practical sessions devoted to micro teaching demonstrations.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### GER 2975 - ADVANCED TOPICS IN FOREIGN LANGUAGE LEARNING AND TEACHING

Minimum Credits: 3  
Maximum Credits: 3  
In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### GER 2990 - M.A. INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 15  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

### GER 3000 - PH.D. DISSERTATION RESEARCH

Minimum Credits: 1  
Maximum Credits: 15  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Attributes:** West European Studies

### GER 3110 - PROSEMINAR IN LITERARY THEORY

Minimum Credits: 3  
Maximum Credits: 3  
This course offers selected readings in 20th century literary and cultural theory. We examine such "schools" as psychoanalysis, marxism, feminism, queer theory, reception theory, cultural studies, post-colonial studies, among others. Each is discussed within its historical context. Students will be encouraged to apply these readings to their own research and writing.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Russian & East European Studies

### GER 3112 - THEORY IN CULTURAL STUDIES

Minimum Credits: 3  
Maximum Credits: 3  
From its inception, cultural studies has examined culture as practice and artifacts through the categories of social class, gender, race/ethnicity, collective and individual identity, ideology and power by utilizing theoretical models from across the disciplines. This seminar allows students to familiarize themselves with key theoretical moments that shaped cultural studies and explore critically the significance of theory in cultural studies.
GER 3882 - TOPICS IN GERMAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course will use the German cinema to examine the relationship between films, social change, and questions of national identity and to assess the emergence of certain artistic movements, film genres, and models of authorship along these lines. Depending on the semester in which it is taught, the course will address these issues through topics like the representation of the masses, gender anxieties, film and the other arts, the historical film, film auteurs, images of the other, or war and cinema.

GER 3892 - APPARATUS THEORY

Minimum Credits: 3
Maximum Credits: 3
Apparatus Theory now, more than ever! Once the heart of Anglo-American Screen Theory, Apparatus Theory generated lively debates about the relation of the moving image and the mechanisms of production that brought it to the screen. Having run into certain impasses regarding gender and ideology, AT became quiescent in the English-speaking world. Outside, however, it continued to develop in new dynamic directions. This seminar will review the multifaceted history of AT and deploy it in analyses of a series of international moving images from mainstream to experimental. The course will be in English. Films will have English subtitles. Public screenings will take place separately outside seminar meetings. Students are asked to sign up for the lab at that time.

GER 3902 - PH.D. DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

GER 3904 - PHD PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This practicum is for students involved in organized graduate coursework (not independent or directed study) that is less than a 3-credit seminar, but that merits academic credit (i.e. Mini-seminars, lectures, films, or similar events).

GER 3975 - ADVANCED TOPICS IN FOREIGN LANGUAGE LEARNING AND TEACHING

Minimum Credits: 3
Maximum Credits: 3
In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**GER 3990 - PH.D. INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 15  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SNC Basis  
Course Attributes: West European Studies

**Gerontology**

**GERON 2000 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 6  
A student initiated educational experience, guided by a faculty member, that significantly supplements the core curriculum of the certificate and provides specialized, focused training in aging.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Univ Center Social & Urban Res

**GERON 2001 - ETHICS AND AGING**

Minimum Credits: 3  
Maximum Credits: 3  
This course offers an overview of ethical issues in aging. Early sessions will explore the ethical implications of stereotypes and myths regarding aging. Turning to the context of health care, students will identify and analyze moral dilemmas that arise in the long-term and end-of-life care of older adults. Concepts and topics to be critically examined include: autonomy, dependency, elder abuse, and just resource allocation.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Univ Center Social & Urban Res

**GERON 2002 - PREVENTION AND HEALTHY AGING**

Minimum Credits: 3  
Maximum Credits: 3  
Prevention and healthy aging is an online course that provides the guidance and rationale for promoting health, prevention, and effective risk factor management in the adult population (50+) in respect to rising health care costs, decreasing benefits, and the aging of our population. This course offers a general overview of various aging issues (physical, cognitive, social, cultural, and economic) that impact the individual, community, and society. This course will prepare students to integrate optimal preventive practice into their professional context and translate evidence-based strategies into community outreach services that are designed to prevent or delay the common conditions of aging and ones that emphasize the importance of healthy behaviors throughout the lifespan.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Univ Center Social & Urban Res  
Course Attributes: World Wide Web

**GERON 2003 - INTERGENERATIONAL STUDIES**
Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Univ Center Social & Urban Res

GERON 2004 - MENTAL HEALTH AND MENTAL ILLNESS IN LATE-LIFE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Univ Center Social & Urban Res

GERON 2005 - PERSPECTIVES IN AGING

Minimum Credits: 3
Maximum Credits: 3
Designed as an upper level course for students to learn about the aging process in our society.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Univ Center Social & Urban Res

GERON 2006 - MULTI-DISCIPLINARY ASPECTS OF DEMENTIA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Univ Center Social & Urban Res

GERON 2008 - HUMAN PERFORMANCE, NUTRITION AND AGING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GERON 2009 - AGING AND COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GERON 2010 - SEMINAR IN AGING

Minimum Credits: 1
Maximum Credits: 1
GERON 2011 - NAVIGATING GRIEF AND LOSS IN OLDER ADULTS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

GERON 2012 - ETHICS AND AGING FOR SCHOOL OF HEALTH AND REHABILITATION SCIENCES STUDENTS

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

GERON 2013 - EVIDENCE-BASED APPROACHES TO SUPPORT FAMILY CAREGIVERS

Minimum Credits: 3
Maximum Credits: 3
Evidence-Based Approaches to Support Family Caregivers is an online course that provides a more in-depth look at research-informed approaches and interventions in supporting family caregivers. By delving into these approaches, which is based on the most recent research, helping professionals will be better equipped to assist family caregivers in providing care, maximizing self-efficacy, and infusing increased knowledge to family caregivers who are the primary source of support for older adults with chronic illness and disability. By investigating evidenced-based interventional approaches, students will examine psychosocial, psychotherapeutic, technologically-based interventions, as well as coordination care services & resources. Our study will also focus on the experiences of family caregivers and walking the journey alongside them, while also being able to assist in interventional approaches and tools for best care practices. In this work, students will envelope a view of holistic approaches of caring for the caregiver, but also in giving voice to the care recipient and understanding their needs during this journey of being cared for. The exploration of several dimensions and approaches to caregiving will include psychological and physical health, as well as social relationships and support. In focusing on these areas, we will not only look at risk factors for adverse outcomes but also positive aspects of caregiving. This course will briefly touch on special populations for caregiving which will include looking at families who care for their children due to illness or disability. The information attained in this course will enable helping professionals to apply approaches and concepts learned to carers and care recipients in comprehending the multi-faceted dynamics that come along with the role of caregiving.

Academic Career: Graduate
Course Component: Lecture

**GERON 2014 - CAREGIVING IN AGING**

Minimum Credits: 3  
Maximum Credits: 3

This course is designed for students to learn about the evolving role of caregiving in our society. This course will examine the challenges and responsibilities associated with caring for an older adult in the home setting, and the supportive options and resources that are available.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GERON 2015 - DIGITAL INEQUALITY IN OLDER ADULTS**

Minimum Credits: 3  
Maximum Credits: 3

As the world population ages, older adults comprise a growing proportion of current and potential Internet users. Yet outdated attitudes about older adults prevent markets and institutions from seeing them as worthy and relevant consumers and citizens. This course will examine the state of research on Internet use among older adults including how social inequalities have both evolved and remain in relation to who goes online and what they do once connected. We will explore generational differences in the ways people use the Internet as well as examine the relationship between Internet use and well-being. The goal is for students both to gain exposure to this area of work and identify aspects of Internet use among older adults that warrant further inquiry.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**Greek**

**GREEK 2250 - GREEK SEMINAR: EPISTOLOGRAPHY**

Minimum Credits: 3  
Maximum Credits: 3

This seminar combines a general introduction to ancient epistolography with specific topical inquiries, such as the epistolary relationships between tyrant and sage, letters of moral instruction or letters that are embedded into genres including epic, historiography, tragedy and novel. Our focus throughout will be on questions concerning the authenticity, narrative strategy and reception of the letters under focus.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GREEK 2902 - DIRECTED STUDY FOR M.A. STUDENTS**

Minimum Credits: 1  
Maximum Credits: 9

Directed study on classical topics for students in the M.A. Program.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**GREEK 2990 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes study in Greek in consultation with a member of the faculty.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

GREEK 2992 - PHD READING EXAMINATION

Minimum Credits: 0
Maximum Credits: 0
Permits graduate students from other departments to demonstrate competence in the reading of ancient Greek through examination.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

GREEK 2995 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Directed study on Greek topics for students in the graduate program.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Health Informatics

HI 2011 - ANATOMY, PHYSIOLOGY, PATHOPHYSIOLOGY, PHARMACOLOGY, AND MEDICAL TERMINOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course has multiple topics, including an introduction to the structure of human cells, tissues, organs and organ systems, and functions associated with them; a general overview of the predisposing factors and direct causes of disease, as well as their effects on the human body; an introduction to pharmacology; and word construction, pronunciation, spelling, definition and use of terms related to all areas of medical science, hospital service and health related professions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to HI Online Students

HI 2020 - PRACTICAL STATISTICS & PROGRAMMING USING PYTHON AND R

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to statistical methods and computer programming that are essential for data scientists. This course covers fundamental statistics from the perspective of data science in health care and how to apply various statistical methods to data science. This course provides introduction to the two of the most widely used statistical programming tools in data science: R and Python. Prior experience in R and Python is not expected in this course, however, familiarity with basic statistical concepts and modern programming language will be very useful. The approach of this course is practical, hands-on and project oriented. The goal of the course is to provide students with skills of solving various problems in health informatics using R and Python.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
HI 2210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM

Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to the healthcare system and health information management as well as the integrity of the health data that is used by healthcare organizations. It will also introduce the student to the importance of the quality of healthcare and health information and the need for risk management and patient safety in healthcare organizations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2230 - FINANCIAL MANAGEMENT AND HEALTH CARE REIMBURSEMENT

Minimum Credits: 3
Maximum Credits: 3
This course introduces key principles of financial management and reimbursement in the health care industry. The aim is to provide an understanding of financial and reimbursement language, concepts, and processes to enhance the daily management performance of current and future leaders in healthcare. Students will be offered tools to develop a working knowledge of financial statements, dashboard metrics and industry financial issues. Students will learn reimbursement methodologies, health care compliance regulations and tools for managing all aspects of the revenue cycle. Course modules and exercises offer insight into the development of operational budgets, understanding financial trends and variances, developing financial negotiating strategy, quantifying productivity, interpreting reimbursement analytics, ensuring compliance, understanding healthcare reimbursement, and managing the revenue cycle.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2231 - TALENT MANAGEMENT AND HUMAN RESOURCES

Minimum Credits: 3
Maximum Credits: 3
This course is a practical guide to human resource management in health care, and covers topics such as recruitment, compensation and benefits, training, discipline, termination, legal issues, labor unions, and multi-human interactions that emerge in the workplace. It is also an overview of the laws and regulations that guide every decision related to managing people in the complex society that we exist in today.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2250 - FOUNDATIONS OF HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces health informatics, providing an overview of the important topics and a foundation for other courses in the master's and certificate programs in health informatics. Students will learn what health informatics is, the challenges in health informatics, career in and profession of health informatics. Students will be briefly introduce to important concepts in health informatics including computing and networking in health informatics, digital health, data analytics and machine learning, data science, health technology intervention, electronic health record, healthcare standard, privacy and security, and bioinformatics and digital imaging.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2410 - HEALTH VOCABULARY, TERMINOLOGY AND CLASSIFICATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course aims to evaluate the reference terminologies that are currently used in health care settings (SNOMED-CT, LOINC) as well as applications of data capture technologies (such as natural language processing, voice recognition, document imaging). Further, the course intends to introduce the students to computer assisted coding technology applications and evaluate the use of health care terminologies, vocabularies and classification systems found both nationally and internationally. A more focused review on format, guidelines and application for ICD-10-CM, ICD-10-PCS and HCPCS/CPT will take place. Students will utilize online coding tools to obtain hands-on practice with each of these 3 systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2450 - SECURITY, PRIVACY, LEGAL, AND ETHICAL ISSUES IN HEALTH INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce basic knowledge of security, privacy, legal and ethical issues in health information systems. In the first half of the course, the major focus will be on security techniques, including basic concepts, encryption and decryption methods, program operating systems, databases, and network security. In the second half of the course, we will shift our attention to the application of the concepts of privacy and security in the healthcare industry. Legal and ethical issues around the privacy and security of health information will also be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2451 - DATABASE DESIGN AND BIG DATA ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
The ability to capture, organize, and analyze data is critical to healthcare organizations and to biomedical research. Database is arguably the most important tool in supporting data capture, organization, and analysis of outcomes, both for regular, transactional data as well as big data. This course will provide students with opportunities to learn data and big data management skills: principles in database, approaches to manage data, as well as provide a place to discuss and analyze key issues in data management. The course will have two sections. The first section will emphasize on the theoretical and technical aspects of database, specifically in data modeling, design of database, as well as learning the 'language' to manage database. The second section will address advanced topics in database and big data, including transforming data, data warehousing and data mining, as well as analysis and visualization of data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only

HI 2452 - DIGITAL HEALTH

Minimum Credits: 3
Maximum Credits: 3
The advancement of informatics in health has allowed a convergence of digital technologies with health and healthcare, with the goal of improving the efficiency and effectiveness of health services as well as making medicines more personalized and precise. These technologies include solutions for both healthcare providers and patients, ranging from Electronic Health Records, Telemedicine, Mobile Health, Wearable Devices, as well as many emerging Internet-of-Things devices and sensors. Interventions through digital health require a multi-disciplinary domain team involving both informatics and social sciences. This course will provide students with opportunities to explore, analyze, and discuss key issues, principles (both from technical and social science perspectives), approaches, and policies surrounding digital health. The final assignment of this course will task student to work with key health service stakeholders (who would actually share their knowledge throughout the course as well) to investigate and propose a practical digital health solution to tackle a specific health issue.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Restricted to Health Informatics students only
HI 2453 - DATA ANALYTICS AND MACHINE LEARNING IN HEALTH SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students who want to learn data analytics and machine learning, and their applications in health science. Data analytics tools and methods, machine learning procedure and tools, and their applications in health science will be discussed in this course. Students who finish this course should be able to use statistical and machine learning methods and tools to analyze various types of data sets in health science, and make predictions and recommendations according to the obtained results.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: HI 2020; PLAN: Restricted to Health Informatics students only

HI 2454 - DATA SCIENCE IN HEALTH INFORMATICS

Minimum Credits: 3  
Maximum Credits: 3  
This is an introductory course to data science. Data sources, types, data collection methods, data processing and analysis methods, and analysis result interpretation will be covered in this course. Students will learn these skills by finishing several assigned projects. By finishing the course, students will have the skills to analyze various types of data sets using different methods and have the ability to interpret the meaning the results.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: HI 2020; PLAN: Restricted to Health Informatics students only

HI 2632 - LEADERSHIP AND PROJECT MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
Leadership and Project Management is a course designed to introduce and develop leadership behaviors as well as manage the project management process. The goal of this course is to advance the capabilities in meeting current healthcare organizations challenges through both leader and leadership development. It is not intended to provide a background on the evolution of thought on leadership or leadership theory. The course takes a developmental "not training" approach by providing a leadership development framework that helps guide one in acquiring the characteristics and behaviors associated with good leadership. This course will study how technology, people, and economics of software projects interact and the impact these elements have on managing software projects.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

HI 2650 - PRACTICAL RESEARCH AND EVALUATION METHODS

Minimum Credits: 3  
Maximum Credits: 3  
The ability to measure and describe issues in health informatics is vital in the process of decision making in healthcare. The process of evaluation itself depends on the questions and the contexts in which the issue arises. This course will study the methods of evaluation in health informatics, specifically the practical application of well-established research and evaluation techniques to problems in health informatics. Different situations in healthcare will necessitate the use of different evaluation methods, therefore in this course students will be exposed to approaches to develop measurement instruments, design study, analyze result, as well as presenting the result of the study in health informatics evaluations. Case studies will be used to facilitate active learning, including conducting usability evaluation and cost evaluation of health informatics resource. By the end of the course, students will be able to develop a working evaluation 'contract', which can be used to guide the evaluation process as well as to validate the result of the evaluation process itself -that the result is indeed what the stakeholders want/need to know to make a decision.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

HI 2670 - HEALTH INFORMATICS CAPSTONE/INTERNSHIP
Minimum Credits: 3
Maximum Credits: 3
Supervised practical experience providing an opportunity for students to learn new skills and to apply previously learned skills and theories in the analysis, design, implementation, and evaluation of health information systems.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade

HI 2902 - DIRECTED STUDIES

Minimum Credits: 1
Maximum Credits: 9
Under the direct supervision of a faculty member, the student carries out specific research pertinent to the student's and/or faculty member's interests.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HI 2999 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

Health and Physical Activity

HPA 2040 - HEALTH AND WELLNESS FOR INFANT, TODDLERS AND YOUNG CHILDREN

Minimum Credits: 3
Maximum Credits: 3
This class provides the future pre-k' grade 4 classroom teacher with a knowledge base in motor development, health and physical education curriculum planning, and appropriate selection of health knowledge and skills and physical activities for infants, toddlers, and young children. Included are labs and field experiences in the pre-k-grade 4 classroom setting.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2267 - PHYSIOLOGICAL BASIS-FITNESS AND SPORT CONDITIONING

Minimum Credits: 3
Maximum Credits: 3
This course is aimed at developing an understanding of the physiological adaptations to fitness or long term physical training with emphasis on metabolic, strength and conditioning principles. Through the awareness of the body's responses to chronic and acute exercise. The student will be able to organize and design a physical training or fitness program for young adults, athletes and special populations. This course provides preparation for the American college of sports medicine health fitness instructor or national strength and conditioning exams.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 2268 - PHYSICAL ACTIVITY AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to expose the student to the topics related to the role of physical activity in the prevention and treatment of chronic diseases and additional health-related outcomes according to the most current literature. Students will become aware of all aspects of physical activity epidemiology, including the different methods to measure physical activity, evaluating the strengths and weaknesses of each, and understanding the analysis of physical activity data and research. In addition, this class will cover the physiology and mechanisms through which physical activity and exercise may affect the primary and secondary prevention and/or treatment of various health conditions, and will examine the risks and benefits associated with physical activity participation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2269 - OBESITY PREVENTION AND TREATMENT

Minimum Credits: 3
Maximum Credits: 3
This course will provide students opportunities to understand issues related to obesity. Topics may include prevalence rates, dietary considerations, exercise considerations and special population considerations. Behavioral strategies to enhance obesity treatment outcomes will also be addressed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH

Minimum Credits: 3
Maximum Credits: 3
This course will increase students' understanding of the diverse personal, socio-cultural, and institutional factors that influence health, physical activity, and nutrition-related behaviors, and ultimately intervention design and approach. The course will cover the social determinants of health and health disparities, theoretical models of health behavior change, and intervention/behavior change strategies and tools. Students coming away from this course will have a better understanding of how to apply health behavior change models to promote physical activity and healthy eating in diverse populations through tailored interventions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING

Minimum Credits: 3
Maximum Credits: 3
Team based course designing health promotion programs at local large, medium and small organizations. The course presents students an opportunity to design a real health promotion program that has the potential to impact their career trajectory. Students are encouraged to seize the opportunity with enthusiasm. To maximize the opportunity students need to be flexible and demonstrate initiative to travel to the organizational site to meet according to staff schedules. The course is linked with the HPA 2990 course offered in the Spring.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2371 - ADVANCED EXERCISE PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Theory experiences relating to the mechanisms by which the body adapts physiologically to selected conditions of muscular performance within the context of (1) physical education and sport, (2) work environments and (3) disease prevention and rehabilitation.
HPA 2373 - INTRODUCTION TO EXERCISE ASSESSMENT AND PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
This course examines exercise therapy for the cardiac patient and individuals with chd risk factors. Topics include functional capacity assessment (central and peripheral adaptations, graded exercise testing, electrocardiography), exercise prescription (dosage, format, energy cost, case studies), exercise supervision (phase 1, 2 and 3, practical leadership experiences, emergency procedures, nutritional counseling, psychological considerations) and factors that influence the exercise responses are presented.

HPA 2374 - EXERCISE TESTING, PRESCRIPTION, AND SUPERVISION

Minimum Credits: 3
Maximum Credits: 3
An introductory lecture, laboratory course in cardiac rehabilitation. Topics presented include: the pathophysiology and epidemiology of coronary artery disease, coronary anatomy, basic and advanced electrocardiography, principles of graded exercise testing, exercise prescription and supervision, nuclear diagnostic techniques, current considerations in pharmacological treatment of coronary artery disease and cardiac rehabilitation in a clinical setting.

HPA 2375 - RESEARCH AND EXPERIMENTAL DESIGN IN EXERCISE PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the development of experimental design and methodologies in exercise physiology research. The designs are explored within the context of ergogenic aids, training strategies, selected disease states, temperature regulation, and isokinetic strength and energy metabolism.

HPA 2380 - BEHAVIOR CHANGE AND HEALTH COACHING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on applying evidence-based behavioral strategies to interactions with health-fitness participants and patient populations to enhance engagement, adherence, and sustainability of lifestyle behaviors related to health. The course will include interaction strategies with patients, listening skills of health coaches, strategies to enhance compliance, strategies for working with non-compliant patients, and application to specific health-fitness and healthcare setting.

HPA 2381 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course in clinical exercise physiology designed to provide knowledge and understanding of the most recent advances in exercise physiology for the healthy adults as well as for special populations across the lifespan. Emphasis will be placed on mechanisms underlying metabolic and cardiorespiratory responses and adaptation to exercise and on the metabolic determinants of human adaptation and performance under normal conditions as well as during various environmental and physiological changes. Additional emphasis will be on taking in depth look at the acute and chronic responses to exercise in children and adolescents, pregnancy, and older adults. Instruction includes both didactic and laboratory experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HPReD-MS

HPA 2382 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course is an extension of the Clinical Exercise and Physical Activity Physiology 1 course. This is an advanced course in clinical exercise physiology designed to provide knowledge and understanding of the most recent advances in the application of exercise physiology to clinical populations. Particular emphasis is placed on the acute and chronic responses to exercise in patients at risk for or having cardiovascular, endocrine, pulmonary, and metabolic diseases. Additional topics include clinical exercise physiology for cancer, disorders of the bone/joints, and neuromuscular disorders. Instruction includes both didactic and laboratory experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2383 - ADVANCED CLINICAL HEALTH AND PHYSICAL ACTIVITY ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
This course includes training on advanced assessment of fitness and health-related measures that can be implemented across various settings including clinical, public health, health-fitness, worksite, etc. Measures will include fitness, physical activity and sedentary behavior, body composition, and a variety of health-related measures. Instruction will include both didactic and laboratory-based experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2384 - MOVEMENT SCIENCE IN HEALTH AND PHYSICAL ACTIVITY

Minimum Credits: 3
Maximum Credits: 3
This course examines human movement across the lifespan (youth, adults, older adults), health conditions, and exercise-related activities. Students will learn how to assess movement patterns and how to apply this knowledge to prevention, treatment, and rehabilitation situations. This course will be a combination of classroom and laboratory experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HPRED-MS

HPA 2385 - PRACTICUM IN HEALTH AND PHYSICAL ACTIVITY

Minimum Credits: 3
Maximum Credits: 3
Supervised experience for the master's degree student. Student placement is to a clinical setting, applied health-fitness setting, or health promotion setting that is appropriate to the pursuit of the intended degree. Students are also required to attend didactic and online course-related sessions with the instructor throughout this experience. Students intending to take this course need to coordinate the placement with the supervising faculty instructor at least 1 term in advance of registering for this course to allow for appropriate placement.
**HPA 2386 - HEALTH AND PHYSICAL ACTIVITY PROMOTION AND MARKETING**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides students with the conceptual background and practical skills necessary to address how to introduce and market health and physical activity programs and initiatives, and how to identify and implement channels of distribution of these programs and initiatives. This course will include both didactic and practical experiences for students to obtain and apply the necessary knowledge.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HPA 2387 - MEDIA AND TECHNOLOGY IN HEALTH AND PHYSICAL ACTIVITY**

Minimum Credits: 3  
Maximum Credits: 3  
This course address the application of media and technology in health and physical activity program implementation. Examples include the application of video, audio, online programming, etc. Students will have opportunities to uses the various technologies across various applications related to health and physical activity programming.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: HPRED-MS

**HPA 2390 - NUTRITION IN SPORT AND EXERCISE**

Minimum Credits: 3  
Maximum Credits: 3  
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise. Topics presented include energy release and substrate utilization, energy metabolism during exercise, fluid intake and athletic performance, body composition, ergogenic aids, vitamins and minerals, the pre-game meal, sports anemia, nutritional considerations for the diabetic individual, lipid metabolism and coronary heart disease.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Health and Physical Activity (MS)

**HPA 2410 - STATISTICS IN HPA RESEARCH**

Minimum Credits: 3  
Maximum Credits: 3  
A general knowledge of computer hardware/software and its use in physical education research is the major focus of this class. Software packages are examined for word processing and statistical analysis. An introduction to basic programming is given.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Health and Physical Activity (MS)

**HPA 2990 - RESEARCH SEMINAR IN HPA**

Minimum Credits: 3  
Maximum Credits: 3  
This course is required of all non-thesis master's degree candidates and includes the development and presentation of an original research paper.

1755
student works in cooperation with a graduate advisor in their area of content specialization. The nature of acceptable projects includes the following: data based research; expanded literature review; development of software and/or hardware; development of instructional materials (i.e., Video tapes, slide series, films, etc.); Journal article.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**HPA 2996 - CLINICAL INTERNSHIP**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Supervised clinical experience for the master's degree student. The student is placed in a clinical setting appropriate to his/her degree interests and career goals and must complete a minimum of 25 hours of clinical work per credit hour. Supervision is provided by the cooperating clinical supervisor and the university clinical advisor.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad Letter Grade

**HPA 2998 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 9

The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**HPA 2999 - MASTER'S THESIS RESEARCH**

**Minimum Credits:** 1  
**Maximum Credits:** 9

He student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes proposed project, and defends the completed report in a thesis final oral examination.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**HPA 3114 - EVIDENCE BASED LIFESTYLE PROGRAM DESIGN AND EVALUATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Health and Physical Activity (HPRED-EDD)

**HPA 3115 - HEALTH PROMOTION POLICY AND PROGRAM IMPLEMENTATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course investigates the impact of legislation, policies, and implementation on individuals' and populations' physical activity (pa) and nutrition. Centering on students' conceptualizations of their problem of practice, this course will explore: a) pa and nutrition program implementation and challenges to implementation, b) evidence-based policies, practices, interventions, and services and c) advocacy partnerships and organizations. This course will also integrate discussions of social justice and diversity in pa and nutrition policy and program implementation. Students will analyze these problems and their causes with the goal to craft and advocate for policies that promote pa and nutrition health equity for individuals and populations.
HPA 3116 - RESOURCE AND FUNDING ACQUISITION FOR HEALTH PROMOTION PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
The course presents the process of developing and submitting extramural grants related to health, physical activity and nutrition. Students develop an idea and write a grant proposal linked to a funding source with the aim of providing higher quality, more efficient and less expensive health promotion and health care to populations. The potential funding sources are public sector, private sector, and non-profit sector. Furthermore, students incorporate into the grant proposal alternative funding strategies.

HPA 3117 - HEALTH PROMOTION PROGRAM TRANSLATION AND SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Grade Component: Lecture
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HPRED-EDD (Health and Physical Activity)

HPA 3374 - ADVANCED LABORATORY TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Educational Administration Ed.D.

HPA 3377 - CHRONIC DISEASE CASE STUDIES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 3400 - ADVANCED RESEARCH METHODS IN MOVEMENT SCIENCE

Minimum Credits: 1
Maximum Credits: 1
Provides the Ph.D. student with a team oriented process to develop, implement, present and publish experimental research in exercise physiology and health-fitness.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Health and Physical Activity (PhD)

**HPA 3404 - COLLEGE TEACHING PRACTICUM**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides the Ph.D. student the opportunity to teach an undergraduate specialization course in this area of expertise while exploring appropriate teaching methodology and theory.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**HPA 3405 - GRANT WRITING IN HEALTH AND PHYSICAL ACTIVITY**

Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to provide guidance to doctoral level students on the process of developing a grant proposal for extramural funding. This course will be modeled from the NIH submission and review process.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Health and Physical Activity (HPRED-PHD)

**HPA 3406 - PROFESSIONAL WRITING IN HPA**

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to expose the student to the process of developing professional abstracts and manuscripts that can be submitted for peer-review related to health and physical activity. This course will focus on developing empirically-based abstracts, manuscripts, the submission process, the peer-review process, and considerations for resubmission. The culminating experiences will include the submission of an abstract and manuscript for professional presentation and publication.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HPA 3995 - SPECIAL TOPICS**

Minimum Credits: 3  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within either developmental movement and sport studies or exercise physiology.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Health and Physical Activity

**HPA 3998 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
HPA 3999 - DOCTORAL DISSERTATION RESEARCH

Minimum Credits: 1  
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad HSU Basis

Health and Rehabilitation Scs

HRS 1000 - INTRODUCTION TO RESEARCH

Minimum Credits: 3  
Maximum Credits: 3
The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs; PLAN: Clinical Dietetics -Nutrition (BS, BOH, BS-H) or (NDEUTR-ND) or (NS-BS)

HRS 1020 - ANATOMY AND PHYSIOLOGY

Minimum Credits: 4  
Maximum Credits: 4
Introduces the structure of human cells, tissues, organs and organ systems, and functions associated with them. Range of topics extends from gross anatomical features to considerations of chemical processes that serve as the basis for cellular controls, gene expression and energy metabolism. Emphasis on relationship of structure to function and on understanding how structural or functional disturbances can become the basis for disease processes.

Academic Career: UGRD  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1023 - HUMAN PHYSIOLOGY

Minimum Credits: 4  
Maximum Credits: 4
This course has been designed in an effort to provide pre-clinical students with a foundational scientific knowledge base and conceptual understanding of physiological processes. Each organ system, and its contribution to the maintenance of homeostasis, will be discussed. Further, the essential components of each system will be explored, to the extent that life is supported. Some disease states will be discussed, in order to exhibit certain processes.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Clinical Dietetics-Nutrition(BS or BSH or BPH)

HRS 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4  
Maximum Credits: 4  
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2008 - ENTREPRENEUR SKILLS FOR NUTRITION PROFESSIONALS

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the components of business planning, implementation and marketing for dietetics related products and services in a variety of settings. Working in teams and independently, students will identify potential products and services, develop business and marketing plans including financial and staffing considerations and present their plan to a panel of their peers and potential "buyers".  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: (Coordinated Master in Dietetics); or SUBPLAN: (Clinical Dietetics & Nutrition) or (Wellness and Human Performance)

HRS 2017 - INJURY EPIDEMIOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This introductory course in injury epidemiology will address injury epidemiology, and concepts in basic epidemiology and biostatistics related to injury surveillance, prevention and control. The epidemiological perspective of injuries will address the concepts in the Haddon's matrix and classic epidemiologic triad; current injury epidemiology research needs and injury as a public health issue. Topics addressed will include epidemiology of injuries in developed and developing countries, and injuries in vulnerable populations.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Sports Medicine (MSSPM-SP)

HRS 2020 - ANATOMY AND PHYSIOLOGY

Minimum Credits: 2  
Maximum Credits: 2  
Introduces the structure of human cells, tissues, organs and organ systems, and functions associated with them. Range of topics extends from gross anatomical features to considerations of chemical processes that serve as the basis for cellular controls, gene expression and energy metabolism. Emphasis on relationship of structure to function and on understanding how structural or functional disturbances can become the basis for disease processes.  
Academic Career: Graduate  
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2022 - HUMAN ANATOMY

Minimum Credits: 3
Maximum Credits: 3
Emphasizes the understanding and application of knowledge of human anatomy in diagnostics of clinical conditions commonly encountered by an occupational therapist. The practical component includes the use of prospected cadavers, skeletal models, and palpation of surface anatomical features in live models.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Occupational Therapy (MOT)

HRS 2079 - CHILDREN W/DISABILITIES: CLIN 1

Minimum Credits: 2
Maximum Credits: 2
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2084 - SPECIAL TOPICS IN OSTEOARTHRITIS

Minimum Credits: 1
Maximum Credits: 2
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2089 - CHILDREN W/DISABILITIES: CLIN 2

Minimum Credits: 2
Maximum Credits: 2
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2090 - LEADERSHIP SEMINAR IN MATERNAL AND CHILD HEALTH 2: FROM BIOLOGY TO POLICY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2128 - LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2305 - ADVANCED NEUROSCIENCE

Minimum Credits: 4
Maximum Credits: 4
This course will provide the student with an in-depth study of neuroanatomical structures and functions. Brain anatomy, function, and interrelationships especially as they relate to movement dysfunction will be reviewed. The clinician will have an opportunity to "revisit" how anatomy and movement are interrelated.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2306 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION

Minimum Credits: 3
Maximum Credits: 3
Principles of motor learning and motor control will be discussed as they relate to persons with disability. Models of disability will be shared with ideas of how to incorporate some of the principles of motor learning/control into interventions. Health promotion and fitness for persons with neuromuscular disorders will be emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2307 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with the knowledge and skills to provide advanced assessment and management of persons with balance and vestibular disorders, including those at risk for falls. Students will discuss and practice using assessment tools. Lecture, laboratory practice, case studies, and discussion will be included. This course is offered on 4-5 weekends throughout the semester.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2308 - CLINICAL PRACTICE SEMINAR
Minimum Credits: 2
Maximum Credits: 2
This course will cover basic concepts of physical examination of the patient with neuromusculoskeletal dysfunction. Fundamental examination skills and knowledge will be covered, including issues related to screening, review of systems, history, physical examination and clinical decision making. An introduction to radiology and diagnostic imaging will be provided. Concepts related to pain and the inflammatory process, boney healing and remodeling, and how these concepts impact clinical practice will also be covered.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2309 - ANALYSIS OF NEUROMUSCULAR SIGNS AND SYMPTOMS IN CLINICAL DECISION MAKING

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the analysis of the process and knowledge necessary for identifying the neuromuscular tissue or system representing the origin of disorders in patients. Signs and symptoms from history and physical examination will be the focus with appropriate ancillary testing necessary to confirm hypotheses regarding neuromusculoskeletal pathology. The intent is for clinicians to be able to differentiate clusters of signs and symptoms and to make appropriate clinical decisions regarding same.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2310 - ADVANCED MUSCULOSKELETAL DISSECTION ANATOMY

Minimum Credits: 2
Maximum Credits: 2
This course will provide students with an opportunity to study and dissect specified anatomical regions of the human musculoskeletal system and present their dissection to the class with particular emphasis given to clinical applications of that anatomy. Students will be given guidelines and basic instruction in the dissection process and will then work independently throughout the semester to complete their dissections. Through this experience students will gain a mastery of select regions of musculoskeletal anatomy and a greater understanding of the clinical applications of that anatomy.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HRS 2312 - SEMINAR IN NEUROLOGIC PHYSICAL THERAPY

Minimum Credits: 2
Maximum Credits: 2
A series of papers will be presented with interactive discussion related to novel interventions. Students will be responsible for reviewing the paper and presenting the case to the class. Each student will "teach" the class once and lead the discussion. Topic areas will be assigned by the instructor.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2313 - PHYSICAL THERAPY SPECIAL TOPICS SEMINAR

Minimum Credits: 2
Maximum Credits: 2
This course is designed to foster discussion of current physical therapy clinical issues, such as prospective payment for medical rehabilitation, healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2314 - FUNDAMENTALS OF NEUROSCIENCE FOR THE ORTHOPEDIC CLINICIAN**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** Students in the School of Health and Rehabilitation Sciences only.

**HRS 2356 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** Students in the School of Health and Rehabilitation Sciences only.

**HRS 2361 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LUMBOPELVIC SPINE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** Students in the School of Health and Rehabilitation Sciences only.

**HRS 2362 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LOWER EXTREMITY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** Students in the School of Health and Rehabilitation Sciences only.
HRS 2364 - EVIDENCE BASED MEDICAL AND PHYSICAL THERAPY INTERVENTIONS FOR PERSONS WITH NEUROMUSCULAR DISEASE

Minimum Credits: 3
Maximum Credits: 3
This course will focus on an evidence based comparison of newer vs. Older 'techniques' used in the field of neurologic rehabilitation. Students will be asked to explore the evidence basis that supports or refutes use of these various approaches and techniques currently in use. Newer approaches to neurorehabilitation will also be discussed-these include: constraint induced movement therapy, virtual reality, robotics, and deweighting. Lab and clinic visits will be incorporated into this course so that students will be able to see some of the techniques 'in action'.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2365 - CASE STUDIES OF PERSONS WITH NEUROMUSCULAR DISORDERS

Minimum Credits: 3
Maximum Credits: 3
A series of cases will be presented with interactive discussion related to interventions that have been shown to demonstrate evidence and efficacy to address the person's functional limitations and impairments. Students will be responsible for preparing for the case prior to each session and will bring 'evidence' to support ideas for intervention. Innovative physical therapy and medical interventions will be discussed. Lecture and interactive discussion are the teaching methods of choice. Advanced clinicians will participate in the course to bring 'real life' cases to the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2372 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER

Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the lumbo-pelvic spines and the lower extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2373 - ADVANCED MUSCULOSKELETAL CLINICAL PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the cervico-thoracic spine and the upper extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2374 - CLINICAL ROUNDS AND CASE PRESENTATION
Weekly rounds will be presented by various speakers/clinicians/researchers in both the fall and spring terms. These presentations will consist of case presentations, relevant clinical and/or research updates pertaining to the clinical practice of physical therapy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2380 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR CERVICAL AND THORACIC SPINE**

Minimum Credits: 3  
Maximum Credits: 3  
This course will include evaluation and treatment of musculoskeletal conditions involving the cervical spine, the temporo mandibular joint, the thoracic spine and rib cage. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills into the plan of care for the patient. Classes will consist of lecture, laboratory, and clinical experiences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2381 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR UPPER EXTREMIT Y**

Minimum Credits: 3  
Maximum Credits: 3  
This course will include evaluation and treatment of the musculoskeletal conditions involving the shoulder, elbow, wrist and hand. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2391 - PHYSICAL THERAPY CLINICAL ROTATION 2**

Minimum Credits: 1  
Maximum Credits: 3  
This clinical opportunity will provide students the ability to observe and participate in assessment and management of various musculoskeletal disorders. Students will have an opportunity to work with an experienced clinician to learn more about advanced skills in the treatment of neuromuscular dysfunction in the out-patient setting.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: HRS 2305 (MIN GRADE 'C'); SBPLAN: Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2392 - PHYSICAL THERAPY CLINICAL ROTATION 3**

Minimum Credits: 1  
Maximum Credits: 3  
**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis
HRS 2403 - MEDICAL TERMINOLOGY, PHARMACOLOGY, & PATHOPHYSIOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course is a basic study of the professional language of medicine. It is designed to include word construction, pronunciation, spelling, definition, and use of terms related to all areas of medical science, hospital service, and health related professions. This ONLINE course is designed to give the student a knowledge of words frequently used in the medical field and provides examples through the review of basic anatomy, physiology, surgical procedures, diagnostic procedures, and symptomatology. Coverage of the pathology of each body system is will take place along with an introduction to pharmacology, and the pharmacological treatment of frequently occurring conditions of each body system.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2416 - INTRODUCTION TO HEALTH INFORMATION & THE HEALTH CARE SYSTEM

Minimum Credits: 3
Maximum Credits: 3
An introduction to Health Information Management and the historical development of the health care field with emphasis on the organizational structure of health institutions, as well as federal, state, and local agencies and allied health associations. Student will be introduced to Health Information Management operations and key functions, with an overview of the American Health Information Management Association (AHIMA). Emphasis will be placed on the use of technology in health care, Electronic Health Record, and data quality. An in-depth look at privacy, confidentiality and security will occur. The laboratory experience provides students with hands-on opportunities to apply the theory and concepts of health information. The content, format, purpose, confidentiality, adherence to regulations/standards and technology applications for health information will be emphasized. Laboratory activities, group discussions, and case studies will supplement basic instructions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Rehabilitation Scs or SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS)

HRS 2420 - INTRO TO HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
Introduction to the basic concepts of the analysis, design, implementation, and evaluation of health information systems. The student will be provided opportunity to develop skills and ability in defining information needs, interpreting the capabilities of health information systems, setting forth the feasible alternatives, and guiding the appropriate diffusion of information science technology into the health care system.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2421 - SECURITY, PRIVACY, LEGAL AND ETHICAL ISSUES IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Students in this course will explore legal, security, and privacy issues related to health information systems. Data availability, integrity and confidentiality of databases and networks, computer security, public key infrastructure, encryption/decryption techniques, and data recovery will be addressed as well as risk assessment, security policies, HIPAA, privacy, applicable health laws, and ethical issues in the management of health information.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2422 - COMPUTER PROGRAMMING FOR HEALTH INFORMATICS
This course is designed to introduce advanced computer programming technologies. The course will provide students with skills of solving real health informatics problems using computer programs. This course is not designed as first computer programming class. The instructor assumes that students have taken and are familiar with one or a few programming languages (such as BASIC, C/C++, JAVA, C#, PERL, PYTHON, RUBY) prior to taking this class. One or multiple programming languages may be used in this class to solve health informatics problems. This course is hands-on and project-oriented.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2423 - CLOUD COMPUTING, HL7 AND ANALYTICS IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Information technology (IT) is in an era of change from local servers, rigid data structures, and centralized computing to a remote distributed cloud computing architecture. Health care IT likewise is following this pattern. To optimize health care strategies, the use of information technology is playing an ever increasing role. Modern medicine is driven by use of information and IT capabilities. This course will discuss HL7 and other common protocols for data exchange. Data analytics will also be covered with some data mining and OLAP (Online Analytic Processing) and data visualization. Understanding of the underlying principles of networks, data storage, data protection, "big data" and the capabilities of modern computer architecture and software will be covered. This course has a primary focus of creative use of common IT tools and applying them in ways related to health care computing, information processing and management. Natural Language Processing, Precision Medicine and genomics will be discussed and applied to medical applications and data analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2424 - DATABASE DESIGN AND MANAGEMENT IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Objectives are to provide students with an in-depth knowledge of database design and provide skills on how to use available database management systems. First part emphasis on how to analyze a healthcare problem and model its data effectively using the entity-relationship model. Students learn to implement the model using relational DBMS. Commercial systems Access, RDB, Sybase, DBase IV systems are studied. Students gain practical experience by designing and implementing database projects in a healthcare setting.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2425 - DATA ANALYTICS: APPLICATION IN GENOMICS AND PERSONALIZED CARE

Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introductory-level course to data analytics and its application in genomics. In this course, students will learn techniques on data collection, data processing, modeling, data visualization, and result interpretation. Specific examples from genomics will be used to demonstrate the details of these techniques. Students will work on individual projects to extensively practice their data analytics skills. A number of web-based data analysis tools will be used in this course; therefore, students are not required to write their own data analysis programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2426 - EVALUATION OF CLASSIFICATION SYSTEMS, REFERENCE TERMINOLOGIES & DATA CAPTURE TECHNOLOGIES IN HC

Minimum Credits: 3  
Maximum Credits: 3  
This course aims to evaluate the reference terminologies that are currently used in health care settings (SNOMED-CT, LOINC) as well as applications of data capture technologies (such as natural language processing, voice recognition, document imaging). Further, the course intends to introduce the students to computer assisted coding technology applications and evaluate the use of health care terminologies, vocabularies and classification systems found both nationally and internationally.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2428 - CONCP SOFTWR PROJ ENGR HLTH CARE

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine how health care organizations manage the software development process. This course will study how technology, people and economics of software projects interact and the impact these elements have on managing software projects. Topics include: system life cycle models, requirements management, and system design and software quality assurance. The student will have the opportunity to learn about industry implementation data standards and the impact of regulations for planning and managing health information systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2429 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3  
Maximum Credits: 3  
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2431 - EVALUATION METHODS IN HEALTH INFORMATICS

Minimum Credits: 3  
Maximum Credits: 3  
This course will study the application of well-established evaluation techniques specific to problems in health informatics. No previous knowledge of health informatics evaluation is required or presumed. This interactive course will provide students with opportunities to discuss and analyze the key issues, principles, and approaches in health informatics evaluation. Emphasis of the course will be on theoretical, clinical, technical, and pragmatic issues of health informatics evaluation. Course will address issues such as design, development, and standards of evaluations. Case study analyses will be used to facilitate active learning. This is a hybrid course; i.e., it has on-line modules as well as face-to-face classes. This course is open to graduate students and has no prerequisites.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2432 - TELEMEDICINE, TELEREHABILITATION, AND E-HEALTH

Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare students for a telemedicine project leadership role. This highly interactive course will provide the students with opportunities to discuss and analyze the key issues, principles and approaches, in telemedicine. Students will study how technology, people, economics and policies of telemedicine, telerehabilitation & e-health interact and the impact these have on healthcare systems. This is a hybrid course, i.e., it has Online modules as well as Face-to-Face classes. Case studies, telemedicine lab visits and projects will be used to facilitate active learning. This course is open to graduate students and has no prerequisites.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2433 - CLASSIFICATION SYSTEMS IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
An introduction to the principles of taxonomy, purposes of classifying diseases and operations. An in-depth study of ICD-10-CM, ICD-10-PCS and CPT-4 will be undertaken along with a summary review of ICD-9-CM. The interaction of Diagnosis Related Groups (DRG's) with classification systems will be emphasized. Data quality, the Uniform Hospital Discharge Data Set as well as coding/sequencing guidelines for both inpatient and outpatient coding will be examined. This laboratory will provide students with "hands-on" experience in ICD-10-CM, ICD-10-PCS and ICD-9-CM Coding, proper application of UHDDS guidelines, DRG assignment and CPT-4 coding. Laboratory practice exercises will provide the principal method of instruction with great emphasis on learning ICD-10-PCS. The impact of coding accuracy and its relationship to reimbursement will be stressed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Sci-SP)

HRS 2434 - BUSINESS ISSUES AND DATA ANALYTICS IN HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course focuses on analytics and management of business issues within the health care industry. Professional skills, such as negotiations, productivity tracking, and data analysis are explored. Practical application of leadership techniques and analytics is assisted through the use of published case studies, which allow students to thoroughly navigate common business issues and dilemmas in health care management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Sci-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Sci-MS)

HRS 2435 - FINANCIAL MANAGEMENT IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Introduction to selected finance and accounting topics of health care professional, supervisor and department head. No previous knowledge of accounting or financial management required. First half emphasis on basic financial accounting concepts to provide organization-level understanding language, concepts, processes and functions of financial management. Second half emphasizes managerial accounting principles and techniques including cost accounting and budgeting. Focus shifts to departmental level financial management and role of supervisor process include budget development and control.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2439 - HEALTH INFOR SYSTEMS INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
Supervised practical experience providing an opportunity for students to learn new skills and to apply previously learned skills and theories in the analysis, design, implementation, and evaluation of health information systems.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2445 - HUMAN RESOURCE MGT/LABOR RELTN

Minimum Credits: 3
Maximum Credits: 3
Course encompasses supervisory management and labor relations concepts, processes, and issues presented within a broad human resource management perspective. Topics include human resource planning, employee recruitment and selection, performance appraisal, compensation management, collective bargaining, contract administration, and the legal/regulatory framework affecting human resource management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2454 - LEAN SIX SIGMA AND OTHER IMPROVEMENT METHODOLOGIES IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
This class will explore the concepts of process management and improvement methodologies including Six Sigma, Lean/Toyota production system/operational excellence, theory of constraints, PDCA, Baldrige and others and their application to healthcare management. The student should be prepared for the American Society for Quality (ASQ) lean six sigma green belt at the end of the class. The focus will be on practical applications in addition to the art, theory, principles, statistics and science of these concepts. The foundation of the class will be understanding the key contributions of each of these approaches.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2456 - REIMBURSEMENT SEMINAR

Minimum Credits: 1
Maximum Credits: 1
An introduction to topics relating to reimbursement in the health care environment. The course will build on topics covered in Classification Systems including the role of coding in reimbursement and minimizing health care fraud. Additional areas include payment methodologies, revenue, and payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS)

HRS 2457 - QUALITY MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
Focuses on principles and approaches to assessment of quality in health care and how this impacts the role of the health information manager. Theoretical and pragmatic issues related to quality management, utilization review, and risk management is addressed. Responsibilities of governing
board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management is presented. This quality management laboratory focuses on the practical applications of managing the quality of health care, resource use, and risk. Students will design, implement, and present a quality management study at designated clinical facilities. Also, several in-class/online assignments will be required

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

**HRS 2465 - LEADERSHIP SKILL DEVELOPMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Various areas related to a leader's personal development in the health-care environment will be explored. The course will include didactic and experiential work in the following topics: stress management, self-assessment, caring concepts, mentoring, creative problem solving, and personal styles of learning or teaching, leadership.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2475 - DISABILITY RELATIONS AND SERVICES INTERNSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.  
**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2480 - DIMENSIONS OF AGING: CULT & HLTH**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course provides an overview of the aging experience from a cross-cultural and public health perspective. An understanding of the aging process and the different strategies that people use in the Western and non-Western societies to cope with this universal phenomenon will be the theme of the course. Within this framework, multiple facets of aging including the demographic, biological, environmental and socio-cultural aspects are identified and discussed. This course will provide core knowledge for professionals who will work with/on behalf of the aged.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.  
**Course Attributes:** Global Studies

**HRS 2482 - LEGAL ASPECTS OF HEALTH CARE**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Discusses principles of hospital law and aspects of handling confidential and health records information. Actual cases and statutes are discussed.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
**HRS 2490 - ELECTRONIC HEALTH RECORDS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course addresses theoretical and pragmatic issues related to EHR technology, such as design and development, standards and clinical terminologies, privacy and security issues, model EHR systems, evaluation of EHR software systems, and outcomes research using the EHR. The responsibilities of the health information management professional, as well as the requirements of accrediting and licensing agencies related to EHR, will also be discussed. The responsibilities and involvement of various members of the health care team in the development, use, evaluation, and dissemination of EHR technology will be emphasized.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

**HRS 2501 - FUNCTIONAL ASSESSMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course focuses on functional assessment from the perspective of body structures and functions, activity and participation as defined by the international classification of functioning, disability, and health of the world health organization. Students may focus on infants, children, adults, or older adults.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

**HRS 2502 - HUMAN PERFORMANCE: ANALYSIS**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
Course focuses on diagnostic decision-making using neuroscience concepts as an exemplar. Clinical reasoning is emphasized while developing knowledge and skills for the evaluation of individuals with neurological impairments.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

**HRS 2503 - HUMAN PERFORMANCE: ADAPTATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course focuses on locating and synthesizing evidence supporting rehabilitation interventions.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

**HRS 2504 - DIRECTED READINGS IN OT**
Minimum Credits: 3
Maximum Credits: 3
This course focuses on research design for evidence hierarchies in the context of occupation therapy research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2510 - FUNDAMENTALS EVIDENCED-BASED OT

Minimum Credits: 3
Maximum Credits: 3
Course focuses on the skills for asking occupational therapy clinical questions, searching for the best evidence to answer questions, and critically appraising the evidence. It emphasizes the research methodologies associated with hierarchies of evidence.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2514 - HUMAN PERFORMANCE: COMPENSATION

Minimum Credits: 3
Maximum Credits: 3
Course examines the interface between functional impairment, activity, and societal participation. Emphasis is on person-task environment analysis and adaptation to compensate for dysfunction during self-care, home management, school/ work, and play/leisure occupations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS)

HRS 2525 - SPECIAL TOPICS SEMINAR

Minimum Credits: 3
Maximum Credits: 3
Course focuses on the principles and practices of therapeutic use of self, clinical reasoning, and evidence-based practice as they are applied in diverse practice environments (e.g., Hospital, school systems, community agencies).
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS)

HRS 2555 - BIOMECHANICS OF BALANCE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs or School of Medicine or Swanson School of Engineering; LEVEL: Graduate

HRS 2579 - OT AND HEALTH POLICY

Minimum Credits: 2
Maximum Credits: 2
Course content focuses on healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS)

### HRS 2582 - ANAL CLIN DATA/EVDNC FUNCT CHNG

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Course focuses on how to design and carry out single-subject design studies and use quantitative methods of analysis (celeration line, 2 SD band, c-statistic) to document functional changes in client performance.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

### HRS 2583 - OT MANAGEMENT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HRS 2590 - SPECLZD PRECEPTORSHIP: CLINICAL

- **Minimum Credits:** 1  
- **Maximum Credits:** 6

Course provides experiential learning in a specialized area of occupational therapy practice (e.g., pediatrics, assistive technology, home healthcare, hand therapy, case management) for the purpose of developing advanced skills related to a specialty practice area.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

### HRS 2591 - SPECLZD PRECEPTSHIP: EDUCATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 6

Course provides experiential learning in the teaching-learning process applied to entry-level professional education, distance education, client/patient education, consumer education, or knowledge application to clinical settings.

**Academic Career:** Graduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Grad LG/SU3 Basis

### HRS 2592 - SPECIALIZED PRECEPTORSHIP: MANAGEMENT

- **Minimum Credits:** 1  
- **Maximum Credits:** 6

This course addresses the role of the occupational therapist as manager of occupational therapy services. The focus is on the principles and practices of administration and supervision as they are applied in diverse practice environments (e.g., hospital, school systems, and community agencies).

**Academic Career:** Graduate
HRS 2594 - SPECLZD PRECEPTORSHIP: RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Course provides experiential learning in coordinating occupational therapy research, including obtaining IRB approval, getting informed consent, participating in data collection, and managing data quality.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SU3 Basis

HRS 2600 - NUTRITION RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 3
An opportunity for students to investigate and formulate potential research topics. Students will be exposed to possible research ideas, discuss technical requirements and identify proper format for presenting research projects, written and verbal.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2621 - ADVANCED SEMINAR IN CLINICAL DIETETICS

Minimum Credits: 3
Maximum Credits: 3
In-depth study of the nutritional management of hospitalized patients. Students will be required to research the appropriate literature, to survey current practices, and to make presentations at a seminar session.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1

Minimum Credits: 3
Maximum Credits: 3
This is the first of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from her/his undergraduate coursework and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology and treatment, nutrition implications, nutrition assessment and diagnosis, and nutrition interventions for acute and chronic diseases based on evidence-based research and guidelines. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class discussions, and problem-based learning through case studies.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: ND-MS (NSBS-TR) Restricted to Nutrition and Dietetics (MS) students only.

HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2

Minimum Credits: 2
Maximum Credits: 2
This is the second of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from her/his undergraduate coursework and HRS 2623 and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology and treatment, nutrition implications, nutrition assessment and diagnosis, and nutrition...
interventions, including nutrition support, for acute and chronic diseases based on evidence-based research and guidelines. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class discussions, and problem-based learning through case studies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

### HRS 2625 - COUNSELING METHODS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an advanced course that emphasizes counseling as a supportive process, characterized by a collaborative counselor-patient relationship that involves behavior and attitudinal change. It will focus on the conceptual foundations and philosophy of behavior change theories, with an emphasis on motivational interviewing, including application in practice to provide the learner with a collection of evidence-based strategies and counseling skills to promote behavior change in patients/clients.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Nutrition and Dietetics (ND-MS)

### HRS 2626 - SPECIAL TOPICS IN EATING BEHAVIOR

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This class will introduce students to a range of eating behaviors, eating disturbances and body weight issues in the general populations. A primary aim of the course is expose students to the many factors that influence eating behaviors including lifestyle, environment, sport, and pathology. A second aim is to enable students to synthesize and evaluate current research on disordered eating in the general population, and in athletes, with the goal of coming to understand the role of the scientific literature in evidence-based practice. A third aim of this course is to empower students to develop, implement and evaluate presentations and programs on special topics related to eating behavior.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HRS 2627 - DIET & EXERCS CHRONC DISEASE MGT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Theory and practical application of the use of diet and exercise therapies in the prevention and treatment of chronic diseases including, diabetes mellitus, hypertension, coronary heart disease, obesity, and arthritis/osteoporosis.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HRS 2628 - NUTRITION AND PERFORMANCE WITH LAB

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise. Topics presented include energy release and substrate utilization, energy metabolism during exercise, fluid intake and athletic performance, body composition, vitamins and minerals, nutrition for training and competition, sports specific considerations, fitness and nutrition assessment in athletes, and special issues, such as vegetarian diets, and environmental obstacles.

**Academic Career:** Graduate  
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

---

**HRS 2629 - DIETARY SUPPLEMENTS FOR HEALTH AND PERFORMANCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will integrate classroom lecture and discussion to help students learn how research evidence supports or negates the use of dietary supplements for health and performance. Emphasis of course will be interpreting research evidence on dietary supplements, ergogenic aids and other performance enhancing methods, and adapting the evidence into clinical practice recommendations/guidelines.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

---

**HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to professional knowledge and skills in nutrition focused physical examination. The course is based on the knowledge/application of the NCP and Model in professional practice. Learning experiences will include formal class presentations, class discussions, case-based problem solving and simulation laboratory sessions. Knowledge based learning leading to examination technique simulations for anthropometric measurements for body composition, nutrition focused physical examination for malnutrition diagnosing and examination techniques, e.g., vital signs, head and neck exam, intra and extra-oral exams, heart and lung auscultation, as well as, abdominal auscultation and palpation are included. At the completion of the course competency in application of nutrition focused physical examination techniques will be assessed on an individual basis.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS) or Nutrition and Dietetics (MS)

---

**HRS 2632 - PRINCIPLES OF NUTRITION EDUCATION AND COUNSELING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

---

**HRS 2633 - PROFESSIONAL DEVELOPMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides students with opportunities to explore through study, discussion and practical application, the issues and trends that are affecting food and nutrition professionals and the profession of dietetics. Included is an introduction to the history and structure of the profession of dietetics and to existing and emerging roles.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

---

**HRS 2634 - FOOD SERVICE MANAGEMENT WITH LAB**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents the basic principles and skills of food service management and leadership. Learning experiences include lectures, discussions,
and required field trips. Please note, no other courses can be scheduled during the break between the morning and afternoon class sessions as this time will be needed for travel to field trips sites.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2635 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 2
Maximum Credits: 2
This course provides students with opportunities to explore through study, discussion and practical application, the issues and trends that are affecting food and nutrition professionals and the profession of dietetics. Included is an introduction to the history and structure of the profession of dietetics and to existing and emerging roles.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: ND-MS

HRS 2637 - PRACTICAL APPLICATIONS OF MEDICAL NUTRITION THERAPY 1

Minimum Credits: 1
Maximum Credits: 2
This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, guest lectures, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the practice of food service management and the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics (MS)

HRS 2638 - PRACTICAL APPLICATIONS OF MNT 2

Minimum Credits: 1
Maximum Credits: 1
This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, peer review exercises, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2639 - ADVANCED MATERNAL AND PEDIATRIC NUTRITION

Minimum Credits: 3
Maximum Credits: 3
This seminar course provides students with an evidence-based understanding of the anatomical, physiological, and biochemical changes that occur during pregnancy, human lactation, and development from infancy to adolescence. Students will learn about nutritional and lifestyle factors associated with fertility, pregnancy outcomes, and other high-risk groups in the pediatric population. Students will obtain advanced knowledge on the
medical nutrition therapy for management of diseases specific to these life-stages. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class activities and discussions, and site visits.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Nutrition and Dietetics (ND-MS)

**HRS 2640 - SUPERVISED PRACTICE: COMMUNITY NUTRITION**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is a combination of dietetics related classroom, observation and supervised practice experiences in community settings. Emphasis is on delivering food and nutrition services in community based settings with a focus on wellness. Core rotations are in the following areas: child and adult day care, WIC and breastfeeding support, congregate and home delivered meals (Meals-On-Wheels), schools, the Western Pennsylvania School for Blind Children, food banks and pantries and community-based wellness programs. Students are required to complete the core rotations and to meet course requirements through special projects in sites of their choice across the lifecycle. Course minimum: 120 hours.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Nutrition and Dietetics (MS)

**HRS 2641 - SUPERVISED PRACTICE: FOOD SERVICE MANAGEMENT**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will provide supervised practice experience in the area of food service management. The purpose of the learning activities and assignments is to provide the student with the opportunity to apply knowledge and skill in food service management in a health care setting. The student will observe and then model the functions of a food service manager. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in food service management by completing a Food Service Management Staff Relief: management of food service to hospitalized patients. The student will function as a Food Service Supervisor at the site and will independently conduct all phases of the job role for the last three days of the rotation. The student will attend and participate in any food service management meetings or hospital management meetings attended by food service managers.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

**HRS 2642 - SUPERVISED PRACTICE: CLINICAL I**

**Minimum Credits:** 5  
**Maximum Credits:** 5  
This course will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 2623: Advanced Medical Nutrition Therapy 1. It provides the students with the opportunity to apply their knowledge of the nutrition care process and medical nutrition therapy (MNT) to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. This course is the first of two courses which will provide clinical dietetics supervised practice experience. In this course the initial skills required for the nutrition care process will be mastered: nutrition assessment, diet interviewing, developing a care plan, written documentation, and nutrition education/counseling. Supervised practice experience caring for patients with the following disease states will be provided: feeding difficulties, energy imbalances, cardiovascular diseases, diabetes mellitus, and renal disease. During this course the student will begin to develop and construct their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will continue into HRS 2643: Supervised Practice: Clinical II.

**Academic Career:** Graduate  
**Course Component:** Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics (MS)

HRS 2643 - SUPERVISED PRACTICE: CLINICAL 2

Minimum Credits: 5
Maximum Credits: 5
This course is the second of two courses which will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 264: Advanced Medical Nutrition Therapy 2. It provides the students with the opportunity to apply their knowledge of nutrition assessment and medical nutrition therapy to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients of all ages at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. Students will be assigned to their same primary site as the fall term; however selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2642 and will provide the students supervised practice experiences to develop and master new skills including calculating and assessing enteral and parenteral nutrition regimens. Supervised practice experience caring for patients with the following disease states/conditions will be provided: gastrointestinal, pancreatic, and liver disorders, cancer, critical illness, and patients requiring nutrition support. During this course the student will complete their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will build on the project content from HRS 2642.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2644 - SUPERVISED PRACTICE: MANAGEMENT OF NUTRITION CARE

Minimum Credits: 2
Maximum Credits: 2
The supervised practice experience activities for HRS 2644: Management of Nutrition Care are planned to provide the student with the opportunity to assume increased responsibility for the management of nutrition care to hospitalized patients. In this course, the student will function as a clinical dietitian at the clinical site and will independently conduct all phases of the nutrition care process. Students will continue in the same primary supervised practice facility where they were assigned for Supervised Practice: Clinical 1 and 2.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2645 - SUPERVISED PRACTICE MANAGEMENT IN LONG-TERM CARE

Minimum Credits: 2
Maximum Credits: 2
This course provides supervised practice experience in a long-term care setting. The course will provide supervised practice experience is in the areas of food service management and also clinical dietetics to allow the student to carry out the nutrition care process for patients/residents in this population.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2646 - INTRODUCTION TO FUNCTIONAL NUTRITION WITH LAB

Minimum Credits: 3
Maximum Credits: 3
This introductory course to functional nutrition is based on a food first approach to promotion of optimal health. Lectures and class activities will
explore the scientific basis of medicinal foods and herbs used in cooking. Students will demonstrate practical application by incorporating 'health promoting foods and herbs' into meal planning and preparation with the goal of optimizing health for the prevention and treatment of diet and lifestyle related diseases.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Cord Master in Nutr and Dietics (CMD-MS) or Wellness and Human Performance (MSNUTR-SP)

HRS 2647 - EXPERIENTIAL PRACTICE: COMMUNITY NUTRITION

Minimum Credits: 3
Maximum Credits: 3
This course is a combination of dietetics related classroom, observation and experiential practice experiences in community settings. Emphasis is on delivering food and nutrition services in community based settings with a focus on wellness. Core rotations are designed to meet course requirements through special projects in sites that span across the lifecycle.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2648 - EXPERIENTIAL PRACTICE 1

Minimum Credits: 10
Maximum Credits: 10
This course will provide experiential practice experience in the area of food service management and clinical nutrition. The purpose of the learning activities and assignments is to provide the student with the opportunity to apply knowledge and skill in food service management and clinical nutrition in a health care setting.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2649 - QI RESEARCH PROJECT DEVELOPMENT

Minimum Credits: 1
Maximum Credits: 1
During this course the student will begin to develop and construct their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the student's specialty rotation.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2650 - EXERCISE PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2651 - EXPERIENTIAL PRACTICE 2

Minimum Credits: 7
Maximum Credits: 7
This course provides advanced experiential practice experience in clinical nutrition and long-term care setting. It provides the students with the opportunity to apply their knowledge of nutrition assessment and medical nutrition therapy to the practice of dietetics in the acute care setting. 
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2652 - EXPERIENTIAL PRACTICE 3

Minimum Credits: 3
Maximum Credits: 3
The experiential practice experience activities for HRS 2652 are planned to provide the student with the opportunity to assume increased responsibility for the management of nutrition care to hospitalized patients. In this course, the student will function as a clinical dietitian at the clinical site and will independently conduct all phases of the nutrition care process.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2653 - QI RESEARCH PROJECT

Minimum Credits: 1
Maximum Credits: 1
During this course the student will complete their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the student's specialty rotation.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2654 - PRACTICUM IN DIETETICS 1

Minimum Credits: 1
Maximum Credits: 1
This weekly course prepares students for their planned, experiential practicums completed at an assigned clinical facility. Virtual teaching approaches include online lectures/presentations, group discussions, student presentations, and problem-based learning through case studies. Course exercises simulate experiential practice assignments and provide opportunity for students to apply didactic content to the practice of food service management and the nutrition care process used in patient care. During group discussions, students will report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting. Active participation in the online components is a requirement of the course.
Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS

Minimum Credits: 3
Maximum Credits: 3
This introductory course in research methods and applied statistics will address research study design and descriptive and inferential statistics related
to the research process. Inferential statistics will include one-sample, two-sample and multi-sample inference. Topics covered will include issues related to measuring variables (reliability/validity), an introduction to epidemiology and measures of association, and interpreting scientific literature. The course will include hands-on practice in running statistical tests previously taught in class. This course provides awareness about research methods and statistical analysis considerations needed by health sciences students. There are no pre-requisites.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2656 - PRACTICUM IN DIETETICS 2**

| Minimum Credits: | 1 |
| Maximum Credits: | 1 |

This weekly course prepares students for their planned, experiential practicums completed at an assigned clinical facility. Hybrid teaching approaches include online and in-class lectures/presentations, group discussions, student presentations, and problem-based learning through case studies. Course exercises simulate experiential practice assignments and provide opportunity for students to apply didactic content to the practice experience nutrition care process used in clinical and long-term care patient care. During group discussions students report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting. Active participation in the online and residential components is a requirement of the course.

Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nutrition and Dietetics MS

**HRS 2660 - ADVANCED HUMAN PERFORMANCE AND TESTING**

| Minimum Credits: | 3 |
| Maximum Credits: | 3 |

This course will provide students with advanced knowledge in the field of human performance training and evaluation through classroom lectures and laboratory/filed experiences. Topics include developing and testing strength, speed, power, agility, endurance, stability, and flexibility.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2661 - SPORTS SCIENCE PRACTICUM 1**

| Minimum Credits: | 3 |
| Maximum Credits: | 3 |

This course will provide supervised practical experience in the area of sports science. It provides the students with the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate an increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. This course is the first of three courses which will provide sports science practical experience. In this course the initial skills required of a sports scientist will be mastered: sport/athlete assessment, performance testing, developing a training plan, athlete monitoring/tracking, and data management. During this course, the student will begin to develop and construct their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the field of sports science or the site's Sports Science/Performance Department's goals. This is a 3 term project that will continue into HRS 2627: Sports Science Practicum 2 and HRS 2630: Sports Science Practicum 3.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2662 - SPORTS SCIENCE PRACTICUM 2**
Minimum Credits: 3
Maximum Credits: 3
This course is the second of three courses which will provide supervised practical experience in the area of sports science. It provides the students with the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have the opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. Students will be assigned to their same primary site as the fall term; however, selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2626 and will provide the students supervised practical experiences to develop and master new skills including calculating and assessing athlete data and training regimens. During this course, the student will continue their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the field of sports science or the site's Sports Science/Performance Department's goals. This is a three-term project that will build on the project content from HRS 2626.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2663 - SPORTS SCIENCE PRACTICUM 3

Minimum Credits: 3
Maximum Credits: 3
This course is the third of three courses which will provide supervised practical experience in the area of sports science. It provides the students with the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have the opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate an increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. Students will be assigned to their same primary site as the fall and spring term; however, selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2626 and HRS 2627 and will provide the students supervised practical experiences to develop and master new skills including interpreting athlete/team data, implementing training plans, and evaluating outcomes. During this course, the student will complete their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the site's Sports Science/Performance Department and/or the field of sports science. This is a three-term project that will build on the project content from HRS 2626 and HRS 2627.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2704 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
Introduction to fundamental principles and practices related to multiple areas of assertive technology. The technology area includes: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic, and man/machine modeling. In addition, common terminology, dis ability, ethics, and models of service delivery related to assistive technology are discussed. **This course has been 3 credits in the past, which included a hands-on lab component. Due to the need for social distancing, this course is now 2 credits with an optional 1-credit lab component. If you wish to take the lab component, please also register for HRS 2701.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Rehabilitation Sci & Tech (Health and Rehabilitation Scs-MS)

HRS 2705 - PRACT REHAB ENGR & ASSISTV TECHN

Minimum Credits: 3
Maximum Credits: 3
Develop the clinical skills needed to apply at and re solutions to help persons with disabilities achieve their goals in the area of productivity, education, employment, communication, and environmental access. Students will match knowledge of at products gained in HRS 2704 to the needs of individuals. Taught using a model for assessing the individual, the context, the technology-user interface and an interdisciplinary team approach. A 3 hour a week commitment to serving learning & a journal is integrated with lectures, guide learning and semester case-based learning project.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2706 - INTRODUCTION TO REHABILITATION ENGINEERING DESIGNS**

Minimum Credits: 4
Maximum Credits: 4
This course is the first course in a two-course sequence on Rehabilitation Engineering Design. HRS 1706/2706 is in the Fall, and 1718/2718 is in the Spring. HRS 1706/2706 covers the fundamentals of product design and development with a particular emphasis on assistive and rehabilitative technologies. The goal of this course is for students to learn both the process and the tools necessary to develop high-quality designs. The tools we focus on include sketching, computer aided drafting, fabrication and programming. The design process is discussed throughout the class, and relies on a textbook and a series of videos that can be accessed through the internet.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2708 - INDIVIDUAL, SOCIAL, AND CULTURAL EXPERIENCE OF DISABILITY**

Minimum Credits: 3
Maximum Credits: 3
Course investigates psychological and sociological issues of impairment with regard to viewing disability not as solely located within the individual, but instead as the outcome of interaction between the impaired individual and society. Course focuses on the experience of being disabled, with emphasis on both adjustment to disability and relationship to community. Foundations of stigmatization and discrimination towards people with disabilities and their pervasive ness and effect throughout all domains of life will be examined.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2709 - MANUAL WHEELCHAIR DESIGN**

Minimum Credits: 2
Maximum Credits: 2
Covers the basic nomenclature used to describe and order wheelchairs. Wheelchair adjustment, assembly, training and operation will be covered. Students will be introduced to wheelchair standards and government controls. The focus on manual wheelchairs. Various types of manual wheelchairs will be used during the course. Students will participate in lectures and laboratory experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2711 - COMPUTER ACCESS**

Minimum Credits: 3
Maximum Credits: 3
This course surveys the hardware and software that can make personal computers accessible to persons with mobility and sensory disabilities. Topics include keyboard modifications, expanded and mini keyboards, key set redefinitions, virtual keyboards, direct selection and scanning strategies, mouse emulation and an intro to the use of augmentative communication aids for computer access. Both Macintosh and intel computers will be addressed. Course time will be equally divided between lecture/theory and hands-on set up of actual computer systems.
HRS 2718 - PROJECT BASED TECHNOLOGY DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is the second course in a two-course sequence on Rehabilitation Engineering Design. HRS 1706/2706 is in the Fall, and 1718/2718 is in the Spring. HRS 1718/2718 is a project-based design course in which students use design methods and tools learnt in 1706/2706, follow an iterative design and testing process with clients and experts, and develop assistive technology device prototypes for their clients.

HRS 2719 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1 LAB COMPONENT

Minimum Credits: 1
Maximum Credits: 1
This is the 1-credit lab component associated with HRS 2704. It is optional, for those who wish to get the hands-on experience in a clinic setting. Do not register for this course if you have not also registered for HRS 2704. Introduction to fundamental principles and practices related to multiple areas of assistive technology. Technology areas include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomics, and man/machine modeling. In addition, common terminology, disability ethics and models of service delivery related to assistive technology are discussed.

HRS 2722 - NEUROCOGNITIVE, SPEECH/LANGUAGE, AND SENSORY PROFILES IN AUTISM SPECTRUM DISORDER

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2724 - ASSISTIVE TECHNOLOGY FUNDING AND POLICY

Minimum Credits: 3
Maximum Credits: 3
Course for students to develop knowledge and skill in the process and strategies to find and acquire assistive technology devices and services for people with disabilities as well as understand the underlying policies that govern funding. Course focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, strategies for preparing letters of necessity and advocacy efforts.

HRS 2727 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS
Minimum Credits: 1
Maximum Credits: 2
The capstone for P&O course is completed as part of the research requirement for the MSPO program. This course is taken in two different semesters as students work to formulate ideas and further conceptualize that idea into a cohesive research project under the guidance of faculty. The capstone is then presented to peers and faculty prior to graduation.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2747 - JOB PLACEMENT PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
Practicum involves a minimum of 100 clock hours of supervised rehabilitation counseling vocational interventions, with specific involvement in placement of rehab consumers in employment. Practicum designed to provide specific experience and supervision in job development and placement and work adjustment activities.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2748 - ASSISTIVE TECHNOLOGY PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
Practicum involves a minimum of 100 clock hours of supervised assistive technology experience including assessment, development, training, evaluation and follow-up regarding rehab technology. Practicum designed to provide specific experience and supervision in the provision of assistive technology to rehab consumers.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2771 - FUNCTIONAL ANATOMY AND KINESIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is the study of the structure and function of the human body, with special emphasis on the musculoskeletal and peripheral nervous systems. Cadavers and anatomical models will be utilized. Palpation of anatomical landmarks, actions of individual muscles and muscle groups, and normal joint motions will be studied using the students' own surface anatomy. The concepts of measuring muscle strength and length, measurement of joint range of motion, and identification of postural or structural deviations will be introduced. The roles of muscles and types of muscle contraction during movement and exercise will be discussed. The basics of normal gait will be studied, and some common pathological gaits will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2772 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a general overview of the pre-disposing factors and direct causes of disease, as well as their effects on the human body. It will also include a systemic approach to the basic disease processes, in terms of etiology, symptomatology, general pathological changes, diagnostic procedures, and types of treatment. Universal precautions to be used in patient care will also be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Prosthetics and Orthotics (MS)  

**HRS 2773 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION**

Minimum Credits: 2  
Maximum Credits: 2  
This course will introduce the student to the concepts of general material properties, the common materials used in orthotics and prosthetics, and the specific properties of these materials. The student will be introduced to equipment and fabrication techniques as well as safety precautions for handling and using materials and equipment.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Prosthetics and Orthotics (MS)  

**HRS 2774 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is a basic introduction to biomechanics of human motion for individuals in the health and rehabilitation fields. It is designed for individuals with a non-technical background, but a basic knowledge of mathematics, physics, and kinesiology is expected and will be utilized. Topics covered include statics, dynamics, anthropometry, motion analysis, electromyography, and soft-tissue biomechanics. Applications to rehabilitation will be emphasized.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Prosthetics and Orthotics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Rehabilitation Sci & Tech (Health and Rehabilitation Scs-MS)  

**HRS 2775 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS**

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Prosthetics and Orthotics (MS)  

**HRS 2776 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS**

Minimum Credits: 1  
Maximum Credits: 1  
Issues and organizations relevant to the practice of orthotics and prosthetics will be presented and discussed.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Prosthetics and Orthotics (MS)  

**HRS 2777 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS**

Minimum Credits: 2  
Maximum Credits: 2  
This course will provide knowledge of all the facets of running or managing the business end of an orthotics and prosthetics department or company.  
Academic Career: Graduate  
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2778 - RESEARCH SEMINAR IN PROSTHETICS AND ORTHOTICS

Minimum Credits: 1
Maximum Credits: 1
This course includes reading and discussion of research related to the practice of orthotics and prosthetics. Case studies, along with the evidence for the chosen or alternative orthotic or prosthetic treatments, will be presented by students and faculty. Students will formulate a research or scholarly paper topic related to orthotics and prosthetics, identify a mentor, and begin research on the topic.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2779 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS

Minimum Credits: 1
Maximum Credits: 1
Study of new concepts, devices, and manufacturing techniques in orthotics and prosthetics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2781 - UPPER EXTREMITY ORTHOTICS

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2783 - SPINAL ORTHOTICS

Minimum Credits: 3
Maximum Credits: 3
Topics to be covered include: conditions and symptoms indicating treatment with spinal orthotics; evidence for effectiveness of treatment; patient evaluation for prescription and design of spinal orthoses; fabrication of spinal orthoses, including techniques for taking measurements and impressions; fitting, evaluation of effectiveness, and modification of spinal orthoses.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Sch Hlth & Rehabilitation Ses

HRS 2785 - LOWER EXTREMITY ORTHOTICS 1

Minimum Credits: 5
Maximum Credits: 5
**HRS 2786 - LOWER EXTREMITY ORTHOTICS 2**

- Minimum Credits: 3
- Maximum Credits: 3
- Academic Career: Graduate
- Course Component: Lecture
- Grade Component: Grad Letter Grade

The objectives of the course are to let the students to observe and practice prosthetics and orthotics techniques of fabrication and clinical assessment in the treatment of patients with limited sources in Ecuador. Review of conditions and symptoms indicating treatment with lower extremity prosthetics below and above the knee as well as upper extremity prosthetics below and above the elbow, lower extremity orthotics for the foot, ankle, knee and hip as well as spinal orthoses. Review of evidence for effectiveness of treatment. Patient evaluation for prescription and design of spinal orthoses, upper and lower extremity prostheses and orthoses. Impressions, measurements and fabrication of the prosthetic and orthotic devices. Fitting, delivery and evaluation of effectiveness. A local prosthetics and orthotics company in that country will provide the logistic support of equipment and tools during the program. This experience will reinforce the concepts and knowledge acquired during the past terms in prosthetics and orthotics, and also prepares those who decide to take advantage of this opportunity with better tools of experience before their residence.

**HRS 2828 - STUDY ABROAD PROGRAM IN PROSTHETICS AND ORTHOTICS**

- Minimum Credits: 1
- Maximum Credits: 1
- Academic Career: Graduate
- Course Component: Practicum
- Grade Component: Grad Letter Grade

The objectives of the course are to let the students to observe and practice prosthetics and orthotics techniques of fabrication and clinical assessment in the treatment of patients with limited sources in Ecuador. Review of conditions and symptoms indicating treatment with lower extremity prosthetics below and above the knee as well as upper extremity prosthetics below and above the elbow, lower extremity orthotics for the foot, ankle, knee and hip as well as spinal orthoses. Review of evidence for effectiveness of treatment. Patient evaluation for prescription and design of spinal orthoses, upper and lower extremity prostheses and orthoses. Impressions, measurements and fabrication of the prosthetic and orthotic devices. Fitting, delivery and evaluation of effectiveness. A local prosthetics and orthotics company in that country will provide the logistic support of equipment and tools during the program. This experience will reinforce the concepts and knowledge acquired during the past terms in prosthetics and orthotics, and also prepares those who decide to take advantage of this opportunity with better tools of experience before their residence.

**HRS 2866 - PSYCHOLOGY OF SPORT**

- Minimum Credits: 3
- Maximum Credits: 3
- Academic Career: Graduate
- Course Component: Lecture
- Grade Component: Grad Letter Grade
- Course Requirements: School of Health and Rehabilitation Sciences students only.

Course designed to address a variety of current issues and technical advancements in sports medicine. Course divided into three units including a medical, legal, and ethical issues in sports medicine unit. The second unit will focus on the unique and newly developed technical advances in the
field supported by the current research. Final unit will address the research and clinical application of isokinetic testing devices.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2869 - ANATOMICAL BASIS SPORTS MEDICINE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Course will include dissection of the human cadaver and will emphasize the musculoskeletal, articular, nervous, and vascular systems. Dissection experiences will be supplemented with classroom lectures. The role of anatomical structures as they relate to athletic injury mechanism, evaluation, and rehabilitation will be emphasized.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** SBPLAN: Sports Medicine (Health and Rehabilitation Scs-MS)

**HRS 2881 - UPPER EXTREMITY PROSTHETICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade

**HRS 2883 - TRANS-TIBIAL PROSTHETICS**

- **Minimum Credits:** 5  
- **Maximum Credits:** 5  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** PLAN: Prosthetics and Orthotics (MS)

**HRS 2885 - TRANS-FEMORAL PROSTHETICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade

**HRS 2901 - INTRO TO RESEARCH METHODOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Designed to introduce research concepts to the HRS student. Content emphasis is placed on the basic concepts and terminology associated with research methodology. Through the readings and discussion it is hoped that the student will develop an idea of the role of research design measurement and statistics in the research process and thus gain the ability to interpret and evaluate published research.  
- **Academic Career:** Graduate  
- **Course Component:** Lecture  
- **Grade Component:** Grad Letter Grade  
- **Course Requirements:** SHRS STUDENTS ONLY
HRS 2902 - TOPICS IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course will be to present to all graduate students in SHRS a thorough review of the most current and pertinent issues confronting the health-care industry today. Discussion and assignments will be designed to require students to investigate critical issues which affect health-care delivery, quality of service, cost of health care, manpower utilization, and the effects of various federal and state legislation on health-care delivery.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2903 - ISSUES IN THE HEALTH SYSTEM

Minimum Credits: 2
Maximum Credits: 2
This course will present current and predicted future issues faced by America in the maintenance of the good health of its citizens. Options for resolution of the issues will be identified and pros and cons investigated and discussed both from the standpoint of the lay public and from that of the health professional. The course is required for all advanced degrees, and the enrollment will be composed of students from all professions represented in SHRS.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Health and Rehabilitation Sciences

HRS 2905 - ETHICAL ISSUES IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
This course examines a variety of complex ethical issues which confront health-care practitioners and researchers as they work with clients and colleagues within the health-care system and society. By analyzing actual cases, health-care workers are enabled to make informed choices when faced with these issues.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2906 - HIST MED AND HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
This course examines the origins and evolution of both traditional medical systems and alternative health-care patterns in West civilization from the earliest society to the present. Particular attention is placed on the impact of religion, warfare, and other societal factors on the development of medicine. Special sessions cover the role of the physician in defining society's treatment of women, minorities, and the mentally retarded.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: Global Studies

HRS 2907 - CLINICAL INVESTIGATIONS

Minimum Credits: 2
Maximum Credits: 2
This course will focus on all aspects of clinical investigation, including developing and populating a clinical data base for the purposes of quality improvement, clinical description and clinical research. Interviewing skills, diagnosis, management, outcome and keeping up to date will be covered
in depth with a particular focus on evidence-based practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2908 - MUSCULOSKELETAL ASSESSMENT AND INJURY PREVENTION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The first part of the course will present the assessment and evaluation techniques necessary to accurately diagnose and prevent musculoskeletal injury. The student will be presented with the necessary information regarding the tissue(s) involved (anatomy/functional anatomy); the signs and symptoms in relation to the injury and tissue(s); and the evidence for determining the most sensitive and specific assessment and evaluation techniques/tools. The second part of the course will include lecture/demonstrations by the students enrolled in the course. Students will select a specific condition or pathology and lead a lecture and lab demonstration providing an overview of the objectives related to the course content.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SUBPLAN: Sports Medicine

**HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Provides an introduction to statistical concepts, methods and applications useful for health care and rehabilitation professionals. Emphasis on application of statistical tools to support clinical and managerial decision making and identifying statistical tests and methods appropriate for the data and research design. Use of a computer-based statistical package will be required.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2915 - TELEMEDICINE, TELEREHABILITATION, AND E-HEALTH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a combination of didactic survey and applied skill development/experiential case-based learning. The curriculum includes: history of telemedicine, telehealth and tele rehabilitation; survey of research findings related to tele rehabilitation; guidelines for implementation of rehabilitation services using tele rehabilitation technology; review of policy related to tele rehabilitation; funding and reimbursement issues and strategies; privacy and security of tele rehabilitation; standards for tele rehabilitation; review and experience with tele rehabilitation technologies including but not limited to tele video (ips, high bandwidth ISDN, IP conferencing) web-based resources (e.g., Email, discussion boards, instant messaging, listserv), data logging and body media, pdas and other devices (e.g., GPS), etc., And a case-based tele rehabilitation trial experience.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2920 - ADMINISTRATIVE INTERNSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
Supervised practical experience providing an opportunity to learn new skills in administration of a service or facility and permitting the application of previously learned skills and theories.

**Academic Career:** Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

**HRS 2921 - CLINICAL INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 6  
Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

**HRS 2922 - TEACHING INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 6  
Supervised experience in a health-related educational program permitting the student to develop and present instructional materials, to experiment with innovative methods of instruction, and to evaluate the effectiveness of the presentations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

**HRS 2924 - GRADUATE RESEARCH PROPOSAL**

Minimum Credits: 1  
Maximum Credits: 6  
Graduate student writes thesis proposal, receives committee approval and institutional review board (IRB) approval for thesis study.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad LG/SU3 Basis

**HRS 2925 - GRADUATE RESEARCH**

Minimum Credits: 1  
Maximum Credits: 6  
An original in-depth investigative study of a selected area of professional interest. A research report suitable in format and content for publication is required.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**HRS 2926 - SCHOLARLY PAPER**

Minimum Credits: 1  
Maximum Credits: 6  
A research oriented paper based on work the student has done in his or her area of study. Students will be encouraged to submit honors papers for publication or presentation at a national or state professional meeting. The adviser and an appropriate faculty reader will supervise the student's work on the scholarly paper.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

**HRS 2927 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 1**
Minimum Credits: 3
Maximum Credits: 3
Statistical methods for health science research. This is the first of a two-course series in statistical methods. Topics covered include measurement, frequency distributions, histograms, bar graphs, stem-and-leaf displays, boxplots, scatterplots, measures of central tendency, measures of variability, point estimation, interval estimation, sampling distributions, one and two-sample tests of hypotheses for means and an introduction to non-parametric tests.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: CSD-PHD (Comm Science and Disorders), or REHSCI-PHD (Rehabilitation Science), or AUDIO-AUD (Audiology), or SLPATH-CSD (Speech-Language Pathology), or PT-DP (Physical Therapy), or OT-CSD (Occupational Therapy) or MACAUD-SP (Audiology)

HRS 2928 - STATISTICAL METHODS FOR HEALTH SCIENCE RESEARCH 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course series in statistical methods. Topics covered include one and two way analysis of variance, multiple comparisons for main effects and interactions, analysis of co-variance, multiple comparisons for adjusted means, correlation, simple linear regression, multiple regression, and meta-analytic methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: CSD-PHD (Comm Science and Disorders), or REHSCI-PHD (Rehabilitation Science), or AUDIO-AUD (Audiology), or SLPATH-CSD (Speech-Language Pathology), or PT-DP (Physical Therapy), or OT-CSD (Occupational Therapy) or MACAUD-SP (Audiology)

HRS 2930 - ADVANCED TOPICS IN STATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
Advanced topics in statistical methods. This course focuses on applied longitudinal data analysis. Topics include: the multilevel model for change, with an emphasis on individual change over time; applied data analysis using the multilevel model with random and fixed effects; evaluation of model fit; and the discrete-time hazard model.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: REHSCI-PHD or CSD-PHD

HRS 2932 - MASTER OF PROSTHETICS AND ORTHOTICS CLINICAL INTERNSHIP

Minimum Credits: 6
Maximum Credits: 8
This course is reserved for second year MSPO students needing to earn their clinical internship hours prior to graduation.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade

HRS 2933 - UPPER EXTREMITY ORTHOTICS

Minimum Credits: 1
Maximum Credits: 3
Upper Extremity Orthotics Variable credit option due to COVID-19 Lab Restrictions
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
HRS 2934 - UPPER EXTREMITY PROSTHETICS

Minimum Credits: 1
Maximum Credits: 3
Upper Extremity Prosthetics for Variable Credit due to COVID-19 lab restrictions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2999 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HRS 3000 - DOCTORAL SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Faculty and students in the rehabilitation doctoral program will participate in this seminar series. Research will be presented and critiqued by faculty and students. Topics related to grantmanship, ethics in research, and issues related to survival in an academic/research environment will be addressed in this seminar series. Doctoral students must present their research for critique by faculty prior to their dissertation defense.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Rehabilitation Science (PhD)

HRS 3001 - DISSERTATION RES PHD DEGREE

Minimum Credits: 1
Maximum Credits: 12
Students will formulate, design, propose, carry out, analyze, interpret, and write up an approved research project, under the direction of a dissertation committee, and in particular the chairperson.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Rehabilitation Science (PhD)

HRS 3002 - METHODS OF INQUIRY FOR REHABILITATION SCIENCES I

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (REHSCI-PHD) or (CSD-PHD) or; SUBPLAN: (PHDHIM-TR) or (PHDOT-TR) or (PHDPT-TR) or (PHDRST-TR) or (PHDSMN-TR)

HRS 3003 - CORE CONCEPTS IN DISABILITY AND REHABILITATION 1
Minimum Credits: 2
Maximum Credits: 2
This course is the first course in a two-course sequence examining core knowledge in disability and rehabilitation sciences. In this first course, we will review models of disability and rehabilitation. We will focus on aspects of concepts of functioning and disability, including body structures, body functions, activities and participation. We will examine how these concepts are applied in ongoing research within field of rehabilitation sciences. Students will learn through faculty presentations (from among the various research programs throughout the school of health and rehabilitation sciences), facilitated discussion, assigned readings, short written papers, short oral presentations, and peer-review of written products.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (REHSCI-PHD) or (CSD-PHD) or; SUBPLAN: (PHDHIM-TR) or (PHDOT-TR) or (PHDPT-TR) or (PHDRST-TR) or (PHDSMN-TR)

HRS 3004 - METHODS OF INQUIRY FOR REHABILITATION SCIENTISTS II

Minimum Credits: 1
Maximum Credits: 1
Course focuses on foundational knowledge regarding methods of inquiry for rehabilitation science. The first segment emphasizes outcome measures and the second segment emphasizes prognostic studies.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 3002 (MIN GRADE "B"); PLAN: Rehabilitation Science(PHD) or Comm Science and Disorders(PHD); SUB: PHDHIM-TR or PHDOT-TR or PHDPT-TR or PHDRST-TR or PHDSMN-TR

HRS 3005 - CORE CONCEPTS 2

Minimum Credits: 2
Maximum Credits: 2
This course is the second course in a two-course sequence examining core knowledge in disability and rehabilitation sciences. In this second course, we will focus on individual and contextual factors that influence disability and rehabilitation, and implications for research. We will examine how these concepts are applied in ongoing research within field of rehabilitation sciences. We will also synthesize concepts and principles and discuss their application in individual student research programs. Students will learn through faculty presentations (from among the various research programs throughout the school of health and rehabilitation sciences), facilitated discussion, assigned readings, short written papers, short oral presentations, and peer-review of written products.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 3003 (MIN GRADE "B"); PLAN: Rehabilitation Science(PHD) or Comm Science and Disorders(PHD); SUB: PHDHIM-TR or PHDOT-TR or PHDPT-TR or PHDRST-TR or PHDSMN-TR

HRS 3140 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2
Maximum Credits: 2
Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 3702 - SOFT TISSUE BIOMECHANICS

Minimum Credits: 3
Maximum Credits: 3
Soft tissue responses to external mechanical loading are of interest in the prevention and treatment of pressure-related tissue injuries. These injuries include ulcers occurring on the plantar surface of diabetic feet, wounds at the inter face between a PROSTHeses and a residual limb and pressure ulcers over the bony prominences of immobile individuals with neuromuscular impairments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3703 - ARCHITECTURAL ACCESSIBILITY

Minimum Credits: 2
Maximum Credits: 2
Provides a basic working knowledge of architectural design and construction systems, procedures and terminology related to accessibility and universal design. Topics include: understanding architectural drawings, planning phases of the construction process, translating human needs into construction terms, building codes and ADA accessibility standards. Student project will involve measuring for and designing a home or workplace modification. Access to architectural graphic standards by the American institute of architects is recommended.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3705 - WHEELCHAIR BIOMECHANICS

Minimum Credits: 1
Maximum Credits: 1
Discuss all areas of wheelchair biomechanics including stability of wheelchairs and propulsion biomechanics. Students will use kinetic and kinematic analysis to determine the forces and moments occurring in upper extremity joints during the propulsive stroke. Clinical correlates to the biomechanical studies will be presented.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3709 - INTRODUCTION TO REHABILITATION ROBOTICS

Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introduction to topics related to rehabilitation robotics. The course will cover areas including intelligent mobility aids, robotic manipulation aids, and therapeutic robots. Clinical applications of these technologies are also discussed. The course will be a mix of lectures and projects where students can engage in hands-on learning skills relevant to the design and evaluation of rehabilitation robotics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3710 - CLINICAL APPLICATIONS AND SEATING

Minimum Credits: 4
Maximum Credits: 4
Course will cover the clinical aspects of seating and mobility intervention for four diverse populations. First, the special needs of children will be addressed. Include various disability specific goals of intervention. Second are people with acquired spinal cord lesions. Seating and mobility intervention from the time onset - through rehab to independent living. The final two populations are people with musculoskeletal disorders and the
HRS 3713 - REHABILITATION ENGINEERING DESIGN

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2704 and 2705; PROG: Sch Hlth & Rehabilitation Scs

HRS 3895 - RDG NEUROMUSCLR ASPCT SPRT INJRY

Minimum Credits: 3
Maximum Credits: 3
The course contains in depth study, readings, and critical discussion related to the role of the sensorimotor system in providing joint stability and how these sensorimotor mechanism are altered with orthopedic sport injury.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HRS 3896 - RESEARCH SEMINAR SPORTS MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Course is designed to introduce student to critical review of research in sports medicine. Students will critique research problems, methodology, analysis and clinical application of published manuscripts. Course will provide student with an opportunity to present and discuss paradigms and specific research proposals that are being developed for completion of thesis and dissertation requirements.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HRS-MS (MSSPM-SP), HRS-MS (MSSPSC-SP) Restricted to MS-Sports Medicine and MS-Sports Science students only.

HRS 3897 - LAB TECHNIQUES SPORTS MEDICINE 2

Minimum Credits: 3
Maximum Credits: 3
Advance graduate level course into the mechanical, neuromuscular and anatomical bases of human movement. Course is to expand the prerequisite knowledge in basic biomechanics as applied to sports medicine. Students will learn quantitative techniques in kinematics, inverse dynamics, and energetic of human movement. Students will also expand on their basic knowledge of programming so as to be able to process data in an autonomous manner.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 3898 - LAB TECHNIQUES SPORTS MEDICINE 1

Minimum Credits: 3
Maximum Credits: 3
Course is designed to provide an overview of clinical research paradigms within sports medicine. Student will be introduced to lab testing techniques related to neuromuscular mechanisms associated with sport and orthopedic injuries and develop lab proficiency with components on neuromuscular profiling. Will provide student with acquire data management and analysis techniques and develop research related writing skills necessary to
complete thesis and dissertation requirements as well as provide a basis for future scholarly activities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: HRS-MS (MSSPM-SP), HRS-MS (MSSPSC-SP) Restricted to MS-Sports Medicine and MS-Sports Science students only.

**HRS 3999 - DOCTORAL INDEPENDENT STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**Health Policy and Management**

**HPM 2001 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The core course is designed to give students an overview of the disciplines and competencies associated with the field of health policy and health care management. Understanding the role of leadership in a public health environment is a unifying theme in this course.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HPM 2004 - COMPARATIVE GLOBAL HEALTH SYSTEMS AND POLICY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This two credit course will focus on an understanding of the structures and processes of the health system and the health policies at its foundation from the perspective of 'true access' as defined by application of the of the eight-factor model of Lovett-Scott and Prather. The complexity of health systems will be manifest by comparative studies of national health systems ranging from low-to high income nations. A secondary emphasis will be placed on a retrospective analysis of the UN Millennium Development Goals and a prospective view of the UN's post-2015 Development Goals as an aspirational framework for advocating community development and sustainability with implications for global health policy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HPM 2005 - CURRENT ISSUES IN HEALTH LAW**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
Current Issues in Health Law is an interdisciplinary course for students of public health and law. In this course, students will be introduced to cutting-edge issues in public health law, health law and policy. The course focuses on developments in health care and public health, particularly as they affect medically under-served populations, with implications for lawyers and public health practitioners as policy makers. It will also introduce students to the variety of settings in which lawyers and public health practitioners are involved in law. Classes will be taught by leading experts in the field as well as student led discussions.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
HPM 2010 - ORGANIZATION STUDIES: THEORY AND APPLICATIONS TO HEALTH CARE SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Focus on the understanding and application of fundamental concepts, principles and models associated with organization theory within healthcare, rehabilitation, and long-term care. Content will encompass the traditional foci of organization theory, e.g. Structure and functions, authority relationships, coordination and control processes, as well as constructs associated with related disciplines of organization behavior e.g motivation theory, leadership, etc. Emphasis on real-world applications. Organization design discussed in contemporary organization structures and processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2012 - FINANCIAL MANAGEMENT FOUNDATIONS HEALTH CARE AND PUBLIC HEALTH

Minimum Credits: 3
Maximum Credits: 3
Introduction to selected finance and accounting topics of health care professional, supervisor and department head. No previous knowledge of accounting or financial management required. First half emphasis on basic financial accounting concepts to provide organization-level understanding language, concepts, processes and functions of financial management. Second half emphasizes managerial accounting principles and techniques including cost accounting and budgeting. Focus shifts to departmental level financial management and role of supervisor process including budget development and control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: PPBHL; PLAN: HPM-MHA or HPM-MPH

HPM 2014 - APPLICATIONS AND ISSUES IN FINANCIAL MANAGEMENT OF HEALTH CARE INSTITUTIONS

Minimum Credits: 3
Maximum Credits: 3
This curriculum is designed to expand on the concepts presented in the financial management foundations for health care and public health course (HPM 2012). The focus of the instruction will be less book-learning and, instead, primarily be comprised of real-life, practical situations faced in today's healthcare industry. Teachings will be a mix of guest speakers from the local area's leaders and the instructor's experiences. The first part of the semester will revolve around understanding what's behind the data contained in an organization's financial statements. The course will also cover alternative revenue opportunities, such as philanthropic initiatives and investment earnings. Once these concepts have been presented, the instruction will change its focus to managing within a healthcare organization concentrating on budgeting, determining how/what programs to invest in or implement, and balance sheet management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2017 - QUANTITATIVE METHODS: DECISION TECHNOLOGIES AND OPERATIONS MANAGEMENT IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
This course gives an introduction to decision technologies and to the art of successfully using them in practice. Part i: focus on methodologies for optimizing and for predicting the consequences of decisions. Health care applications are considered: resource allocation, scheduling, project management. Part ii: focus on operations management issues in health care. Topics include: forecasting, inventory management and quality control.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy & Management (MHA or MPH or LAW) or Health Services Res and Policy (PHD)

1802
HPM 2020 - PROFESSIONAL DEVELOPMENT SEMINAR 1

Minimum Credits: 1  
Maximum Credits: 1  
The Professional Development Seminar is designed to optimally prepare students to enter the health industry workforce. The primary goal of the Professional Development Seminar is to help ensure that all students fully leverage the career services provided by the university, are exposed to the broad array of settings and roles within the health industry, and gain exposure to health industry professionals from our key external stakeholder organizations. 

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

HPM 2021 - PROFESSIONAL DEVELOPMENT SEMINAR 2

Minimum Credits: 1  
Maximum Credits: 1  
The Professional Development Seminar is designed to optimally prepare students to enter the health industry workforce. The primary goal of the Professional Development Seminar is to help ensure that all students fully leverage the career services provided by the university, are exposed to the broad array of settings and roles within the health industry, and gain exposure to health industry professionals from our key external stakeholder organizations. 

Academic Career: Graduate

HPM 2025 - HPM PRACTICUM

Minimum Credits: 1  
Maximum Credits: 3  
The student may register for the HPM practicum upon approval of the faculty of the department of health policy and management. The HPM practicum is designed to provide the student already employed in a healthcare organization with exposure to executive management, leadership, and policy-making processes and activities. Typically, the student will complete the practicum at their employing organization. 

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SU3 Basis

HPM 2028 - MICROECONOMICS APPLIED TO HEALTH

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to microeconomics, the study of resource allocation with particular emphasis on the role of markets. The course focuses on the competitive model. Examples of the use of economic concepts are drawn primarily from the health and medical care delivery systems. 

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

HPM 2029 - HEALTH MANAGEMENT INFORMATION SYSTEMS

Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course is to provide future health care managers and policy-makers a conceptual framework for understanding and managing an integrated health management information system (HMIS). Primary attention will be given to the overall architecture of HMIS and issues related to health information management. The course focuses on the health care manager's role in the design, implementation and control of an effective HMIS. Instructional methods include lectures by regular faculty and guest resources, class discussion, case analyses and an applied field site study. 

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade
HPM 2037 - ESSAY-HA

Minimum Credits: 1
Maximum Credits: 3
The essay is designed to provide the student with an opportunity to integrate the major components of the health administration learning experience. The student is expected to demonstrate analytical ability and technical proficiency in expository writing.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

HPM 2049 - HUMAN RESOURCES MANAGEMENT FOR HEALTH CARE AND PUBLIC HEALTH PROFESSIONALS

Minimum Credits: 2
Maximum Credits: 2
This course encompasses both personnel administration and labor relations concepts, processes and issues presented within a broad human resource management perspective. The emphasis of the course is on behavioral implications of legal-regulatory, economic, cultural, and technical forces affecting the management of people in health care organizations viewed as an open system. Perspectives of organization theory and behavior, personnel and labor law will be applied to the analysis of human resource/labor relations problems and effective management and supervisory practice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2050 - HEALTH SYSTEMS ENGINEERING SEMINAR

Minimum Credits: 1
Maximum Credits: 1
The seminar supplements the education provided by health policy and management and industrial engineering departments by creating a forum for exposure and discussion of healthcare systems engineering issues. Students become aware and are exposed to the role of vendors/consultants that bring solutions for healthcare delivery processes. The standards for professional leadership required for health management are reinforced.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

HPM 2055 - MANAGING HEALTH PROGRAMS AND PROJECTS

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to prepare students to effectively manage health programs and projects. The course is lecture/discussion based, but with ample analytical and written assignments. Extensive use is made of internet resources. A conceptual model of core (strategizing, designing, and leading) and facilitative (communicating, managing quality, marketing, and decision-making) management activities is used to structure the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy & Management (MPH)

HPM 2063 - THE POLITICS OF HEALTH POLICY

Minimum Credits: 2
Maximum Credits: 2
This 2-credit course is designed to provide an understanding of the key political dimensions of the health policy-making process in the United States. The course is designed for students with an interest in health policy, although no previous formal training in policy or politics is required. We will examine the roles of government institutions and political actors both inside and outside government in developing and implementing health policy. Past and present health care policy debates will be used to illustrate the concepts and theories discussed in class. Students will acquire an
understanding of the political processes in which health policies are considered, and gain practical experience executing political strategies in the context of health policy campaigns.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2064 - HEALTH POLICY ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
The aims of this course are to provide students with 1) an overview of the U.S. Health care delivery system and current policy challenges, and 2) an introduction to policy analysis tools useful for defining policy problems, assessing alternative solutions and examining effects of health policies. The framework used for achieving these aims will be to consider health policy from the perspective of the main stakeholders in the system: patients, providers, health plans, suppliers (e.g. Pharmaceutical and manufacturing industry), and payers. Course materials include a policy analysis text book, peer-reviewed articles, and case studies of contemporary health policy issues.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2075 - NAVIGATING THE PHYSICIAN-ADMINISTRATOR RELATIONSHIP

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide the student with an introduction to the role of physician administrators in the emerging healthcare matrix based organizational model. Physicians, by virtue of their training and clinical experience, bring a background and orientation to administrative roles that differs significantly from the traditional orientation of the non-physician administrator. This often results in a clash of cultures which if not properly managed can negatively impact organizational efficiency. It is imperative that non-physician administrators develop the skill sets that will facilitate the merging of the physician's primarily clinical culture with the non-physician administrator's more traditional business and operational culture in support of an organization's overall mission. The course will emphasize the physician administrator's approach to C-Suite management and provide the student with exposure to and practical knowledge of the administrative and operational issues which commonly engage physician administrators. This course should prepare the student to function within a C-Suite environment that is led or populated by physicians in either a combined clinical and administrative or purely administrative role. Additionally, the student will gain exposure to the myriad of regulatory, quality/safety and patient centric issues for which physician administrators commonly assume overall responsibility. Commonly, while these issues are championed by the physician administrator, the day to day responsibility for the design and implementation of focused resolution strategies becomes the responsibility of the non-physician administrator. This mandates the development of the ability to prioritize, for strategic planning purposes, and to have sufficient competency with the identification and analysis of relevant metrics and the ability to utilize this type of data to formulate effective action plans. This course focuses upon this skill set and is structured to afford the student the opportunity to develop project specific strategies based upon operational metrics for clinical initiatives that impact operational efficiency and excellence. The student will also be provided the opportunity to develop resolution strategies based upon operational metrics for clinical initiatives that impact operational efficiency and excellence.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2081 - PUBLIC HEALTH AGENCY MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
The course public health agency management focuses on the areas of knowledge and skills necessary to manage public health agencies. The course covers topics such as core functions and public health practice, legal basis for public health, public health interventions, configuring health departments, fundamentals of management theory and application, agency budgeting and public health constituencies. Classes include a lecture and class discussion of a case study or related question. The class ends with a final group report and group presentation of a class project relative to the development of a county health department.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1

Minimum Credits: 1
Maximum Credits: 1
Introduction to the US Healthcare Delivery System 1 is a required course for first year HPM MHA and MPH students. This course is the first of a two part sequence that will: provide an historic and current overview of basic elements of the US healthcare delivery system, review HPM practical experiences in the context of professional and leadership competencies, and include current perspectives provided by selected guest healthcare executives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy and Management (HPM-MHA or HPM-MPH or HPMLAW-MPH) or Healthcare Systems Engineering (HSEPH-ACM)

HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2

Minimum Credits: 1
Maximum Credits: 1
This is a required spring course for the first year MHA that covers additional elements of us healthcare system. Review in great depth of the management residency process, expectations and opportunities continues in this course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy and Management (MHA or MPH) or Law (LAWMPH-JD)

HPM 2108 - LEADERSHIP

Minimum Credits: 1
Maximum Credits: 1
This is a required course for MPH and MHA students related to the fundamentals of three areas: leadership, which focuses on teamwork, managing and leading people, and communication best practices. The second, professionalism, focuses primarily on principles of etiquette, professional dress, communication best practices and setting oneself apart in the professional setting. Finally, career development principles are covered and this touches on career paths, decision making for career success, and optimizing various work and professional organization experiences for professional growth. The course is primarily interactive in lectures and also requires the students to keep a journal for self-reflection on the topics. A dinner etiquette consultant joins the class as well as an executive from the field to give their perspectives on the three main principles. Accountability, communication, leadership, self-development, and professionalism are the competencies covered in the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2115 - HEALTH POLICY AND MANAGEMENT RESIDENCY

Minimum Credits: 1
Maximum Credits: 1
The course is designed to provide the student with an educational experience in the student's field of interest. It is a field experience performed under the supervision of a preceptor (i.e., A respected professional manager in the health field). Potential sites include a broad range of organizations such as hospitals, multi-unit systems, HMO's, consulting firms, insurance organizations, health policy and planning agencies, and health divisions of corporations.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

HPM 2123 - ADVANCED TOPICS IN DECISION AND COST-EFFECTIVE ANALYSIS IN HEALTHCARE

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate/advanced level course on using simulation models in health decision sciences and cost-effectiveness analyses. Simulation models have been used widely in healthcare to address important policy questions, such as cancer screening recommendations and efficient organ allocations among transplant patients. The emphasis of this course is on applications and methods that are particularly applicable to issues of medical decision making and public health. Students will learn how to choose a model that best fits their applications. They will learn how to construct, parameterize, and analyze complex decision models, including calibration and validation. In addition, the student will be introduced to state-of-the-art methods in uncertainty analysis, value-of-information analysis, and diagnostic test evaluations. Although advanced topics will be discussed, the focus will not be on programming and mathematical notations will be kept to a minimum. Some familiarity with programming and linear algebra are helpful, but not required. Class sessions will be a combination of lecture format, case discussion, and computer labs with expectations of class participation. It is expected that all students will keep up with the required readings and homework assignments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**HPM 2130 - HEALTH LAW AND ETHICS**

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to the legal and ethical issues which impact the administration and delivery of health services. This course is designed to provide students with the practical knowledge needed to identify legal issues inherent in health care and public health administration and to understand the legal ramifications of administrative and management decisions. Through lecture and class discussion four main subject areas are presented: an introduction to the legal system, legal issues in managing health care organizations, regulating quality of care and public health legal authority. Specific course topics include: sources of law, the court system and legal procedures, professional and institutional liability, governmental regulatory methods, antitrust law, corporate compliance programs, emergency care, and issues concerning informed consent, credentialing of medical professionals, confidentiality of health information, and termination of care, family planning, and public health law.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**HPM 2131 - PUBLIC HEALTH LAW AND ETHICS**

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to public health law and policy and the legal environment in which public health is practiced. The course is designed to familiarize students with the process by which laws are created, interpreted and enforced, and to introduce them to the substantive areas of law most relevant to the field of public health. Through lecture, case analysis, class discussion and student presentations, five main content areas will be presented. 1) The legal basis for public health practice; 2) the law and core public health functions; 3) the law and controlling and preventing diseases, injuries, and disabilities; 4) public health emergency law; and 5) the ethical issues impacting public health practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**HPM 2133 - LAW IN PUBLIC HEALTH PRACTICE**

Minimum Credits: 2
Maximum Credits: 2
Local health departments play increasingly pivotal roles in the provision of community public health services; however, they also are experiencing diminished funding and reduced workforces. This course is the first of its kind offered at the University of Pittsburgh: a practice-based, collaborative learning experience for public health and law students. Together, students will develop interventions to address an issue identified by the Allegheny county health department as requiring the expertise of both cohorts.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Community Element -General Community Impact

**HPM 2134 - INTRODUCTION TO HEALTH CARE COMPLIANCE**
This course will provide an overview of the legal landscape regarding health care compliance and demonstrate the importance of compliance for health care organizations. As one of the most highly regulated industries in the United States, health care entities are required to comply with numerous statutes and regulations at the federal and state level, with harsh penalties for non-compliance. Thus, individuals involved in the administration and delivery of health care must be well-versed in these laws and regulations, as well as the strategies health care entities employ to address particular compliance concerns. Specific topics include fraud and abuse; data privacy and security; the elements of effective compliance programs; audits, investigations, and self-disclosures; and significant compliance risk areas for various health care entities.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**HPM 2135 - HEALTH POLICY**

Minimum Credits: 2
Maximum Credits: 2

An introduction to federal and state legislative, administrative, and budget systems as they affect health services. The course focuses on the study of selected health policies, considering them in their historical perspective, present status, and future direction within their social, economic, and political contexts.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**HPM 2141 - MANAGERIAL EPIDEMIOLOGY**

Minimum Credits: 3
Maximum Credits: 3

Epidemiology is concerned with the measurement of the health of populations and understanding the determinants of that health. It is one of the fundamental disciplines of public health, and provides the basis for much of what we know about health and disease. As a required MHA course, managerial epidemiology takes a broad view of the definition of population, and will include the study of multiple populations of interest, such as the population: cared for in the service area of a hospital, covered by a particular insurance carrier, and larger populations such as a state, nation and the world. The course provides students with the knowledge and skills required to analyze, understand and interpret the data produced by health care organizations and identify the managerial implications of the data by summarizing data appropriately, understand the characteristics of mechanisms (methodologies) that created the data, and know when data observed is a common/expected or rare occurrence.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**HPM 2143 - PUBLIC HEALTH SYSTEMS: LEGAL, ECONOMIC, AND OPERATIONAL FOUNDATIONS**

Minimum Credits: 2
Maximum Credits: 2

This is a required course for the mph degree in health policy & management. The U.S. public health system is comprised of both public-sector and private-sector entities whose interdependencies and competing interests must be understood by those responsible for decision making and problem solving. This course orients students to the governmental and organizational systems that support population health in the United States and, for purposes of comparison and global operations, in other countries as well. The course examines critical public health system problems with emphasis on health disparities and vulnerable populations. Students will hear lectures, engage in case study discussions, and conduct problem-based learning.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**HPM 2145 - MARKETING HEALTH SERVICES STRATEGY AND BUSINESS PLANS**

Minimum Credits: 3
Maximum Credits: 3

Analysis of concepts vital to the creation of superior competitive marketing planning strategies for health services providers. Emphasis, using
principles of epidemiology, on effective measurement of need in service area.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2150 - STRATEGIC MANAGEMENT OF HEALTH SERVICE ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This "capstone" course for the program stresses the application and integration of knowledge and techniques learned in the context of specific functions and disciplines focuses on identifying strategic issues in complex environments, and formulating realistic responses. The emphasis throughout is on understanding how to improve the major patterns of resource allocation within the organization in order to create lasting value.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HPM-MHA; SUBPLAN: MHAMBA-TR

HPM 2205 - INDEPENDENT STUDY-HA

Minimum Credits: 1
Maximum Credits: 3
Students with major interests in specialized areas participate in individual study, research activities, or advanced readings with a specified faculty member.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY

Minimum Credits: 3
Maximum Credits: 3
Examines the definition of quality in healthcare from the perspectives of providers, health plans and consumers. Healthcare standards of JCAHO, NCQA, and HEDIS are reviewed. The role of clinical pathways, outcome measures, technology and the internet are explored as they impact the quality of healthcare.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2214 - FUNDAMENTALS OF HEALTHCARE GOVERNANCE

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide students with a sense of the responsibilities of governing boards of voluntary hospitals and to enable them to interrelate with their boards appropriately and constructively. The substance of interrelationships between governing boards and managements is as varied as are the forms of the organizations to which they relate and the personalities of the individuals involved. Subjective perceptions are often more important than formal rules and effective governance is more art than science. The course provides guidelines to this art.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2215 - COMPUTER METHODS IN DECISION AND COST-EFFECTIVENESS ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This course expands on topics introduced in cost-effectiveness analysis in health care and in clinical decision analysis and provides additional guidelines for using decision sciences in larger, more complex applications. Topics include modeling clinical processes and systems; discrete event
simulation; advanced sensitivity analysis and confidence limits; controversies surrounding the use of cost-effectiveness analyses; and multi attribute utility theory.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2216 - HEALTH INSURANCE: FINANCING HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Course examines the concerns and practices of private health insurance; the relationships and activities established by the insurance contracts among the insurer, insured, and providers; the insuring process of marketing, underwriting and pricing; the interrelationships of private and public insurance programs; and the varied government activities related to insurance. The objective of this course is to increase understanding of the access, funding, and insuring issues surrounding health care and to explore the alternate strategies being pursued in response to environment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2217 - CLINICAL DECISION ANALYSIS

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to the use of decision sciences in health care. In addition to developing a conceptual understanding of medical decision-making, the course will develop technical skills in decision analysis including the creation/evaluation of decision trees, the use of sensitivity analysis, and the incorporation of specific patient preferences through the use of utility analysis. The advantages and disadvantages of formal mathematical models for the analysis of clinical conditions will be presented. Examples from current medical literature will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2218 - INTEGRATED DELIVERY SYSTEMS NETWORK

Minimum Credits: 2
Maximum Credits: 2
Course will explore three aspects of integrated delivery systems: 1) efforts to develop vertically integrated services 2) integration of physician and hospital services, and 3) integration of payer and providers. Students enrolled in the course will complete an in-depth analysis of a successfully operating integrated system.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE

Minimum Credits: 1
Maximum Credits: 1
Provides an introduction to and develops technical skills in the economic evaluation of health care programs. A brief introduction to the economic foundation of cost effectiveness and cost benefit analysis is followed by an examination of the methodologies involved in performing cost effectiveness analyses. Topics include: definitions of cost and benefits, effect of the perspective of the analysis, calculation of cost-effectiveness ratios, performance of sensitivity analysis, discounting of costs and benefits, and discussions of current controversies in conduct of cost-effectiveness analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2240 - CASE STUDY ANALYSIS AND PRESENTATION IN HEALTHCARE MANAGEMENT
The purpose of this course is to foster crucial skills for healthcare leaders including persuasive public speaking, assessment and analysis skills of case studies, as well as the ability to work in teams to solve problems. This course focuses not only on the ability to increase skill in these areas but also develop professionally by presenting in front of healthcare executives and conveying messages effectively and creating buy-in on their proposed solutions to problems. The course is a prep course for the students to also attend the University of Alabama at Birmingham case competition in the winter, a prestigious competition of most mha programs in the country. The course will include three cases, analyzed and prepared by students broken into teams, where after preparation and analysis will present to executives in the community for scoring and judging. The team will be selected based on student performance from the course.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**HPM 2275 - HPM SPECIAL STUDIES**

Minimum Credits: 1

Maximum Credits: 3

Properly qualified students may undertake advanced study under the guidance of an HPM faculty member(s).

**Academic Career:** Graduate

**Course Component:** Directed Studies

**Grade Component:** Grad Letter Grade

**HPM 2300 - HEALTH LAW FIELD EXPERIENCE**

Minimum Credits: 3

Maximum Credits: 3

Required placement in a law firm or in a house counsel office in a health organization or system, a public health agency, or a health policy agency.

**Academic Career:** Graduate

**Course Component:** Practicum

**Grade Component:** Grad HSU Basis

**HPM 2700 - SEMINAR IN HEALTH SYSTEMS LEADERSHIP**

Minimum Credits: 2

Maximum Credits: 2

This course will consist of a series of cased-based examinations of specific managerial and leadership problems and decisions that have faced local health systems leaders in Western Pennsylvania. Health care reimbursement, licensing and accreditation, and measuring health care quality has become both more complicated and more important as pressures to reduce expenses and improve quality increase. Simultaneously, there has been a steady increase in the number of clinicians who have assumed managerial positions, such as medical directors of clinical units, directors of quality measurement and improvement programs, utilization review and many others, as well as the appearance of clinicians in the "c-suite" of many hospitals and health care organizations. Utilizing adjunct faculty who are currently (or very recently have been) executive leaders in health systems, this course will examine a series of collaborations, problems, conflicts and solutions that developed between health system administrators and clinical leadership in health care organizations in the Western pa area. The mechanics of the course will be a series of cases, based on an actual recent issue in health care management in which the senior adjunct faculty member was involved. Students (individually or in groups) will evaluate the case, prepare a response, and make a short presentation of their 'solution' to the problem to the health system executive and clinical leader involved in that case. An interactive discussion will follow. This is a required course for students in the certificate in health systems leadership and management program, and can be used as an elective course by other students with permission of the instructor.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**HPM 2905 - QUASI-EXPERIMENTAL DESIGN FOR HEALTH SERVICES RESEARCH**

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students with the research design skills drawn from the social science tradition as applied to the delivery of
health services. This course provides a survey of research design, selection and development of research questions, conceptualization, measurement, and data collection/acquisition. The focus is on the application of quasi-experimental and observational approaches to research in applied health care settings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 3000 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 1

Minimum Credits: 1.5
Maximum Credits: 1.5
The purpose of this two-term Doctoral seminar is to provide a forum for HPM Doctoral and MS students to (a) gain exposure to current research in the field of health services research and policy and closely related disciplines, (b) develop and enhance professional competencies in preparation for post-graduate job search and career pathing, and (c) critically review and present topical articles in the field to faculty and peers. Doctoral and MS students will be required to enroll for two terms (3 credits) of this seminar, typically during their 1st year in the Program.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

HPM 3001 - DOCTORAL RESEARCH AND PROFESSIONAL DEVELOPMENT SEMINAR PART 2

Minimum Credits: 1.5
Maximum Credits: 1.5
The purpose of this two-term Doctoral seminar is to provide a forum for HPM Doctoral and MS students to (a) gain exposure to current research in the field of health services research and policy and closely related disciplines, (b) develop and enhance professional competencies in preparation for post-graduate job search and career pathing, and (c) critically review and present topical articles in the field to faculty and peers. Doctoral and MS students will be required to enroll for two terms (3 credits) of this seminar, typically during their 1st year in the Program.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

HPM 3010 - SEMINAR ON ORGANIZATIONAL STUDIES: HEALTHCARE ORGANIZATIONS AND ENVIRONMENTS

Minimum Credits: 3
Maximum Credits: 3
This seminar is intended to facilitate the mastery of conceptual approaches to health care organizations. Through a combination of in-class discussions, self-directed research, written analyses, and oral presentations, students will clarify complex issues and evaluate innovative ideas. The course content will include such topics as organizational design, organizational behavior, and organizational environments. The primary approach to analyzing organizational phenomena will be the theoretical basis of causality, and the level(s) of analysis addressed by the theory.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPM 3064 - HEALTH POLICY ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course is the doctoral version of HPM 2064. Doctoral students have supplemental reading and writing requirements for this course. The aims of this course are to provide students with 1) an overview of the U.S. Health care delivery system and current policy challenges, and 2) an introduction to policy analysis tools useful for defining policy problems, assessing alternative solutions and examining effects of health policies. The framework used for achieving these aims will be to consider health policy from the perspective of the main stakeholders in the system: patients, providers, health plans, suppliers (e.g. Pharmaceutical and manufacturing industry), and payers. Course materials include a policy analysis text book, peer-reviewed articles, and case studies of contemporary health policy issues.

Academic Career: Graduate
Course Component: Lecture
HPM 3065 - ADVANCED HEALTH POLICY ANALYSIS: IMPLEMENTATION, EVALUATION, AND TRANSLATION

Minimum Credits: 2
Maximum Credits: 2
This course is designed to build on the principles learned in HPM 3064: health policy analysis. It is an advanced course for doctoral students in health policy and other disciplines with a focus on policy evaluation, translating the results of policy research for policy makers, and challenges to implementing health policies. Students will be expected to examine four current health policy topics in depth by examining the challenges to policy implementation, critiquing large-scale evaluations of health policies, and tracking the influence of research evidence on the policymaking process. The perspectives of policy analysts, practitioners implementing (or responding to) policies, and policy makers will be examined for each of four topics. The course format will include a combination of student-led discussions and formal presentations, lectures by the instructor, and guest lectures.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPM 3125 - INTERMEDIATE HEALTH ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to expand on intermediate microeconomic principles and apply these more sophisticated dynamics to the health care market, both domestic and international. Familiarity with introductory economics and calculus is assumed. Course time will be spent on a combination of lectures and discussions of seminal papers to explore theoretical frameworks and their empirical applications.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 3135 - HEALTH POLICY

Minimum Credits: 3
Maximum Credits: 3
This course is the doctoral version of HPM 2135. Doctoral students have supplemental reading and writing requirements for this course. The course assists students in developing or enhancing key 'packets' of knowledge, skills, and abilities (which form competencies) sufficient to permit them to better analyze and credibly predict results of the health policymaking process in the United States and to learn more about how to exert influence in the health policymaking process as part of their professional roles.

Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 3501 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 1

Minimum Credits: 3
Maximum Credits: 3
This is part one of a two-part course for doctoral students enrolled in health services research and policy. Other doctoral students may register with permission of the instructor. The course will cover two related competencies: research design and writing skills. The second part of the course will continue with grant proposal writing skills. The purpose of the course is to cover basic aspects of research design, selection and development of research questions, conceptualization, measurement, and data collection/acquisition. Students will also gain experience conducting literature reviews, critically reviewing manuscripts and grant proposals, and writing research questions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
HPM 3502 - SEMINAR IN HEALTH SERVICES RESEARCH METHODS 2

Minimum Credits: 3
Maximum Credits: 3
This is part two of a two-part course for doctoral students enrolled in health services research and policy. Other doctoral students may register with permission of the instructor. The course will cover two related competencies: research design and writing skills. The second part of the course will continue with grant proposal writing skills. The purpose of the course is to cover basic aspects of research design, selection and development of research questions, conceptualization, measurement, and data collection/acquisition. Students will also gain experience conducting literature reviews, critically reviewing manuscripts and grant proposals, and writing research questions.

Grade Component: Grad Letter Grade

HPM 3505 - ADVANCED EMPIRICAL MICROECONOMICS METHODS WITH APPLICATIONS FOR HEALTHCARE RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course is designed to cover applied econometrics and regression methods at a fairly advanced level. The course reviews the fundamentals of econometrics, summarizes empirical microeconomics methods and discusses the applications for unique issues in healthcare research. This course will provide students with advanced tools necessary to evaluate and conduct empirical research using existing datasets. The focus is on the 'hands-on' use of economic and health data.

History

HIST 2000 - PROFESSIONALIZATION SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This one hour one-credit course introduces graduate students to the discipline of history and to Pitt's graduate program in history. In addition, the course will enable students to commence work on their MA essays. Our main goals are to gain a better understanding of: a) the principal intellectual strengths of the history department; b) degree requirements such as the MA thesis and the comprehensive exams; c) various methodological approaches, such as social and gender history; d) fundamental analytical skills, such as how to write a historiographical essay, how to use databases, and how to edit your own work; and e) professional issues, such as participation in conferences and academic associations.

HIST 2009 - GRADUATE TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
HIST 2010 - GRADUATE TEACHING SEMINAR

Minimum Credits: 1
Maximum Credits: 1

This seminar provides graduate students, particularly Master's students, with the opportunity to design, research and write a research paper based on primary sources that will form the basis for the research paper that is required for one's Master's degree. Students will work with the instructor and another faculty member who is a specialist in their area of interest to design the topic and to discuss issues relating to researching the paper. Students are expected to write a proposal explaining the topic and justifying its importance; and to submit periodic drafts.

HIST 2012 - GRADUATE WRITING SEMINAR

Minimum Credits: 3
Maximum Credits: 3

This seminar provides graduate students, particularly Master's students, with the opportunity to design, research and write a research paper based on primary sources that will form the basis for the research paper that is required for one's Master's degree. Students will work with the instructor and another faculty member who is a specialist in their area of interest to design the topic and to discuss issues relating to researching the paper. Students are expected to write a proposal explaining the topic and justifying its importance; and to submit periodic drafts.

HIST 2015 - HISTORIOGRAPHY

Minimum Credits: 3
Maximum Credits: 3

This seminar studies major trends in modern historiography, from the Annales School to the present.

HIST 2020 - DIGITAL/Critical INTERDISCIPLINARY METHODS

Minimum Credits: 3
Maximum Credits: 3

This advanced graduate course unites students from widely varying disciplines to share the work of learning new disciplines. It explores humanities, social and natural sciences. Specific course objectives are: (1) to introduce students to a wide range of disciplines, theories, and methods; (2) to enable individual students to develop substantial strength in a new discipline and method of their choice; (3) to emphasize the historical discipline and the factor of time; and (4) to compare and contrast the various disciplines in topic, framework, data, method, analysis, and philosophy.

HIST 2023 - HISTORICAL METHODS AND APPROACHES

Minimum Credits: 3
Maximum Credits: 3

HIST 2025 - TEACHING WORLD HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course provides training for teaching world history surveys. Students will engage with the content of an existing world history survey and learn about available resources for the teaching of world history. Simultaneously, an ongoing dialogue between the existing survey, the analysis of the teaching resources, and the student's own ideas will result in the formulation of new world history surveys by each student based on their evolving understanding of the field, strengths, and preferences. History and education students are warmly welcome to join this workshop.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2042 - SOCIOLOGY OF REVOLUTION

Minimum Credits: 3
Maximum Credits: 3
Through readings and discussion of (usually) recent studies, this course will survey a variety of questions concerning the causes, unfolding and consequences of revolution. Some of the topics to be treated: the causes of rural revolts; political crises of old regimes; the rise and significance of revolutionary parties; the institutionalization of new regimes; reigns of terror; the molding of new men and women.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2043 - SOCIAL MOVEMENTS

Minimum Credits: 3
Maximum Credits: 3
Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements. Their development over time and what changes, if any, are brought about to the social system in which the movements occurred.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2045 - MEMORY POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the study of memory. We will be reading classic works on collective memory, including Maurice Halbwachs, Pierre Nora and Jan Assmann. We will explore how societies remember and how they decide what is included in official history books. Our discussions will focus on how the politics of memory are shaped by actors such as the state, the media, lobbying groups as well as different political agendas. We will read case studies concentrating on Modern Europe with additional readings from classical antiquity, the medieval world, Asia and the Americas for comparative perspectives.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2130 - GENDER, SEXUALITY, + MASCULINITY IN HISTORICAL PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
The seminar will examine Modern European history through the lens of gender, analyzing how gender roles and expectations and the social, economic and political participation of men and women evolved over the course of the 18th to the 20th centuries. We will look at a wide variety of political trends nationalism, feminism the welfare state, liberalism, communism and fascism, and at the impact of powerful events such as revolutions and wars on the development of gender roles. The course format is guided discussion of assigned literature. Evaluation based on discussion, presentations and essays.

Academic Career: Graduate

**HIST 2240 - SPECIAL TOPICS**

Minimum Credits: 3  
Maximum Credits: 3  
This graduate course addresses a current topic in gender, sexuality, or women's studies. Topic varies by instructor.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HIST 2400 - APPROACHES TO ASIAN HISTORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course approaches Asia not as a geographic place but as a malleable object of study. In exploring "Asia," each week will adopt a different guide. One week will ask about the map of Asia that various Asian religions would create, depending on which religion did the mapping. Another week will ask how various modern pan-Asian movements imagined Asia. What happens to our conception of Asia if we adopt Confucianism as our guide? Or the Chinese writing system, the Devanagari writing system, the Arabic alphabet, or non-Latin alphabets put together? What happens if we think of Asia in terms of its physical environment? How have the ways in which we understand environmental history changed our understanding of what Asia might, or might not, consist of? What about early modern empires, old and new trade networks, or Asian diasporas? In this way, this course will explore a multiplicity of Asias, each of which is created as much by Asia as an object of study as by the position from which we approach it. Classes will consist of two parts. The first will discuss key works of recent scholarship and the second will think critically about primary sources. This will include thinking about what types of primary sources each of the readings has used, where these sources might be found, what they reveal, and what they obscure. But it will also encourage students to think about what other sources, whether textual, visual, quantitative, or otherwise, could provide alternative perspectives. This will include looking for datasets that can be used to think about each approach to Asia systematically. What datasets could help us map languages in Asia? How have scholars used big data to trace Confucian networks? How could data provide a different approach to Asian diasporas. In addition to weekly readings and short response papers, students will write a final paper that will seek to integrate into their own research some of the approaches discussed in the course.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2440 - ENVIRONMENTAL HISTORY AS WORLD HISTORY: NEW TRENDS**

Minimum Credits: 3  
Maximum Credits: 3  
This reading seminar will provide an introduction to the field of in environmental history in world historical perspective. In order to ground our understanding of environmental history, the course will begin with a review of foundational works written since the birth of the field in the mid-1970s. After establishing this intellectual foundation, we will spend the rest of the semester reading more recently published books and articles that focus on the most important themes within the field of environmental history today. We will consider how these themes have been shaped by, and shape, ongoing discussions of globalization and world historical perspectives. We will consider traditional historical categories such as race, class, and gender, but will also examine more global themes including migration, imperialism and colonialism, the spread of epidemic diseases, and global capitalism, among others.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2509 - WOMEN, GENDER AND BLACK INTERNATIONALISM

Minimum Credits: 3
Maximum Credits: 3
This seminar explores the complex dynamics of black internationalism, focusing on the global visions; transnational activities; and transracial political alliances of people of African descent in the United States and in other parts of the globe. Highlighting the writings, speeches, activism, and overseas travel of a diverse group of men and women, this course employs a gender analysis and moves black women from the margins to the center of the black internationalist story. The seminar examines varied expressions of black internationalism in the United States and abroad from the late 19th century to the Civil Rights-Black Power era. It engages two key questions: how was black women's engagement in internationalism similar to and/or different from their male counterparts? And to what extent did black women merge internationalism with issues of women's rights and/or feminist concerns? Course readings will represent a combination of primary and secondary sources that reflect the geographical breadth of the African Diaspora including Africa, the Americas, and Europe.
Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

HIST 2510 - BRAZIL

Minimum Credits: 3
Maximum Credits: 3
A reading seminar, covering historical and social scientific literature on Brazil.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2530 - TRANSNATIONAL LABOR AMERICAS

Minimum Credits: 3
Maximum Credits: 3
This seminar explores the transnational history of labor in North America, Latin America, and the Caribbean across the 19th and 20th centuries. How have geopolitical shifts and international capital flows remade local communities and regional economies? How have the actions of workers and potential workers shaped investors' possibilities? What role have ideologies of race and gender played in labor control -or struggle? To what extent have different states been able to impact outcomes within this supranational system? How different is the "globalized" present from this past?
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2540 - EUROPEAN EMPIRES IN THE WORLD

Minimum Credits: 3
Maximum Credits: 3
This seminar offers a survey of European empires in comparative perspective. The sequence is loosely chronological, beginning with hegemonic powers from the 16th through 18th centuries, then lingering in the long nineteenth century of European global dominance, and ultimately examining how that age of empires shaped our own world. Geographically, it ranges from Britain to Russia to European colonies in India, Africa, and Latin America. Thematically, the seminar singles out, first and foremost, geopolitics, but also engages topics such as political economy, networks and
exchange, warfare, and the development of "modern" categories of knowledge. Although rooted in historical methodology, the seminar also considers questions relevant to political science and anthropology.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2626 - U.S. IN THE WORLD**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- The purpose of the course is to look at American foreign policy in the sense of its now-expanded conception (cultural, social, and political). It will examine both governmental and non-governmental influences on the role of the U.S. in the world and also examine how those in the world perceived the U.S. and its efforts. It should prepare students to have a sense of the trajectory of scholarship (Williams to Gaddis to more recent works) while also examining more contemporary discourses on how to assess American interventions.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2640 - GLOBAL APPROACHES TO THE CONCEPT OF MODERNITY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- When did modernity start? Is our society postmodern? Are some societies more modern than others? Should we altogether jettison the word "modernity"? Modernity is not only a word whose use you may one day be asked to justify, it is also a gateway unto debates about whether humanity has progressed, about Western expansion, and about how to compare global societies. The first part of this class will give you an overview of three key debates surrounding the concept of modernity: 1) whether modernity is primarily related to capitalism, to the nation-state system, or to transformations in forms of subjectivity, 2) how the temporal markers of modernity, early modernity, and postmodernity have been debated, and 3) how people in societies on the receiving end of Western expansion wrote about modernity and about its twin concept, tradition. The second part of this class will look at actual uses of the concept of modernity by inviting half a dozen faculty members to discuss how they use modernity in their own work. Although based in the history department, this seminar seeks to foster an inter-disciplinary conversation among students from a broad array of disciplines.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2699 - POWER AND INEQUALITY IN AMERICAN HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- "Power and Inequality in American History" is a readings course that covers the full sweep of American history from early Native America to the near-present. The course will concentrate on four themes within the broader rubric of power and inequality: race, class, gender, and capitalism. We will pay special attention to transnational approaches and to the ever-shifting politics of American historical writing. We will read classic and newer works to demonstrate how historical practice has changed over time. The course will serve as a broad survey for graduate students in any department or discipline who study any period or theme in American history.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2704 - APPROACHES TO GLOBAL HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- World history has a history. While universal history and world history lost ground to national histories in the nineteenth centuries, historians in the past half century are again experimenting with "global", "international", and "transnational" histories. This seminar reads some of the key texts in a long historiography.

**Academic Career:** Graduate
HIST 2709 - AGE OF REVOLUTION IN GLOBAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3
The Age of Revolution has long been considered the beginning of western, and therefore of global, political modernity, the period in which liberal democracy declared victory over absolute monarchy, citizens over subjects, and imperial nation-states over composite empires, the bourgeoisie over the nobility, industrialists over landowners, and capitalism over feudalism, and wage-labor over slavery. But the rise of world history has complicated this view, drawing attention to the worldwide dimensions of many of these processes on the one hand, while questioning the utility of potentially Eurocentric frameworks within this broader global context on the other (for example, "democratic," "Atlantic," "bourgeois," or "Industrial" Revolution). This course plans to engage with these debates by probing the conceptual, geographic, and chronological boundaries of this so-called "Age of Revolution." It is designed to appeal to students from across multiple thematic and regional fields, including power and inequality, Atlantic, world, Europe, US, Latin America, and East Asia.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2718 - WORLD HISTORY: CORE SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This core seminar inaugurates the Pitt graduate theme in world history. It is an overview of the literature, debates, resources and directions of world-historical studies. It addresses a wide range of time, space, and topics, plus the interactions of world history with other fields of study. Readings include major recent contributions to the literature, some earlier works, and a world-historical synthesis in preparation by the instructor. The seminar is organized both chronologically and topically, and includes introduction to major research resources in world history, including cross-disciplinary links.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2720 - THEORY AND METHOD IN ATLANTIC HISTORY

Minimum Credits: 3
Maximum Credits: 3
An intensive readings course with a dual focus: classics in Early American history, such as Edmunds, Morgan's American Slavery, American Freedom and Gary B. Nash's Urban Crucible, and newer scholarship that locates Early American history in its Atlantic context, such as Jack P. Greene's Pursuits of Happiness and Robin Blackburn's, The Making of New World Slavery.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2721 - ATLANTIC HISTORY TO 1800: READINGS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This readings seminar will introduce students to work in Atlantic History. The focus will be on popular and laboring classes, gender, race and ethnicity.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** African Studies, Global Studies, West European Studies

**HIST 2724 - RETHINKING THE 20TH CENTURY BLACK ATLANTIC: CIRCUITS, SPHERES, SOCIAL MOVEMENTS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
How has the African diaspora shaped the modern world? What role did afro-diasporic intellectuals and social movements play in the post-emancipation Atlantic world? Recent scholarship in multiple disciplines has traced how men and women from the Caribbean, North America, Brazil, West Africa, and beyond remade 20th C. politics and culture on an international as well as national level. Exploring performance, ritual, literature, social movements, and everyday life, we trace evolving ideas of race and nation, ancestry and authenticity, belonging and rights.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** African Studies

**HIST 2729 - SEAS, PEOPLES, AND EMPIRES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course focuses on interactions between seas, peoples, and empires in historical and comparative contexts. Using maritime history as its point of departure, the course explores the multiple ways in which contact with the sea shaped the lives of peoples and empires across the world. Beginning with Braudel's pioneering regional study of the Mediterranean and the Mediterranean World, the course moves into the Atlantic, Indian, and Pacific Oceans. In each of these contexts, students will consider how the lives of people across social hierarchies were mediated through the interpenetration of empires and maritime regions. The course also considers the extent to which enclosed maritime worlds make sense historically - as the voluminous literature on specific basins suggest that they do - and if so, what distinguished one such world from that of another? Students will explore these lines of inquiry through readings that concentrate predominantly, though not exclusively, on the early modern and modern periods.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2732 - POWER AND INEQUALITY CORE SEMINAR**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
How are systematic patterns of inequality generated and sustained? What roles do cultural beliefs, social practice, political institutions, and macroeconomics play? How do different kinds of inequality, such as those around class, racism, ethnicity, and gender interact? How do differently scaled systems of inequality within the household, community, nation, and international system interrelate? We survey four decades of theoretical debate and empirical findings from history, sociology, anthropology, geography, and other disciplines regarding power and inequality.

**Academic Career:** Graduate
HIST 2734 - MIGRATION, INEQUALITY AND EXCLUSION

Minimum Credits: 3
Maximum Credits: 3
This course will explore select aspects of the vast history of migration. It will take a broad approach to the topic, linking labor migration with expulsion, displacement, and exile; and connecting the process and experience of migration with the making and remaking of communities and cities after migration. Focusing on the nineteenth to the twenty-first centuries, we will consider movements of people from Europe, Asia, and the Middle East to the Americas; from Latin America to the United States; within Europe and within Latin America. Multidisciplinary perspectives will inform our discussions, as will some of the central methodological questions and debates marking historical work today. The course welcomes students from diverse disciplines, programs, and fields.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2735 - INTELLECTUAL AND CULTURAL HISTORY

Minimum Credits: 3
Maximum Credits: 3
One of two core courses in the texts & contexts theme offered in history. Students from other units are welcome to take it. We will examine different approaches to intellectual and cultural history & their application to the study of historical cases that fit under the rubric of material culture, cartography, statistical practice, archives and memoirs, national identities & discourse, the evolution of academic disciplines, literature & censorship, etc. Readings & cases will range over different historical periods & spaces. Some sessions will feature invited guests.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2736 - WORLD HISTORY METHODS SEMINAR: DIGITAL METHODS FOR SPATIAL ANALYSIS OF THE PAST

Minimum Credits: 3
Maximum Credits: 3
Over the past two to three decades, scholars in the humanities and social sciences have increasingly referred to a "spatial turn" of increasing attention to the place of geography and landscape in understanding society and culture. At the same time, historians have taken up the term spatial history to describe the ways in which they articulate geographical perspectives from their particular disciplinary approach. The reach of approachable desktop GIS and database design platforms, accessible satellite imagery, and online spatial visualization has amplified these trends. This seminar is an introduction to exemplary projects, applied methods, and techniques and tools for spatial analysis of the human past. At the same time, it is an effort to bring together several approaches that are not yet frequently joined. For instance, spatial history theory, method and exemplar are not well integrated, and we will approach the field from all three of these perspectives. Moreover, spatial history is seldom practiced at the global scale. World historians have not yet "put the world in world history." This class combines reading in theory and exemplars, interaction with online projects, and hands-on work with digital archives and tools. By the end of the class, students will understand the state of the art and possible future trajectories of spatial history as a field and its relationship with the field of world history. They will also be able to plan a spatial history project at the global scale, articulate its significance and scholarly contribution, and identify the sources, tools and expertise needed to complete it. Student work will include reading responses and archive and website assessments throughout the semester, and will culminate in a large-scale project prospectus.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2737 - HISTORY FROM BELOW

Minimum Credits: 3
Maximum Credits: 3
"History from Below" - also called Peoples' History and Radical History - has been an important part of the appearance and spectacular growth of social history over the past half century and one of the most important developments in the discipline and profession of history. This course is
designed to introduce graduate students in a broad variety of disciplines, departments, and programs to the key theories, methods, and issues in history from below, from its origin in the 1930s, through the New Left of the 1960s and 1970s, to the present. The course will concentrate on four major themes: race, class, gender, and capitalism. We will read classic and newer works to demonstrate how historical practice has changed over time. Special emphasis will also be given to sources, especially archival research, and to writing.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2739 - CITY AS TEXT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The 'City as Text' seminar focuses on analyzing cities as readable realities that can be interpreted, so as to enable students to appreciate the ways in which cities (the built environment) can be understood as physical and symbolic manifestations of those forces (be they ideological, cultural, political, economic, social or technological) that shaped them and were, in turn, shaped by those forces. Following a series of readings on methodological and conceptual issues, the seminar focuses on case studies from various geographical areas and time periods, although the major focus is on 19th and 20th century cities.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2805 - HISTORY OF SEXUALITY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is intended as a general introduction to the historiography on the history of sexuality. Students will familiarize themselves with the most influential works from the previous decades as well as recent significant publications in the field so that students get a sense of the evolution of history of sexuality as a field. The readings are organized thematically. There will be no particular geographical focus so students will have the opportunity to read about history of sexuality in different contexts. Students will also propose themes/readings for the last two sessions so that the course also reflects their own research interests.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2902 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 12  
M.A. candidates wishing to do independent reading with a professor on a subject not dealt with in a seminar may take this course, as May M.A. candidates who wish to do one of their papers independently, rather than in a seminar.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**HIST 2990 - INDEPENDENT STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 12  
Candidates with M.A. degrees who are preparing for their Ph.D. Comprehensive examination may register for HIST 2990, a course of independent reading and study with one faculty member.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**HIST 3000 - RESEARCH AND DISSERTATION PHD**
Ph.D. candidates who have passed their comprehensive examination may register for HIST 3000 with their advisor as they undertake their research for the doctoral thesis.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**HIST 3902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 12  
History 3902 is a special course designed only for one type of student and one type of work. Candidates for the Ph.D. degree who have entered this program with a M.A. from another institution register for HIST 3902 when they undertake individual study with a faculty advisor to complete the research paper required for them.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**History and Phil of Science**

**HPS 2497 - TEACHING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
This is a survey course designed specifically for teaching assistants and fellows. The focus will be on practical teaching methods and techniques used in classroom recitations and lectures.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**HPS 2501 - PHILOSOPHY OF SCIENCE CORE SEM**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, and the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: History and Philosophy of Science (MA, PHD) or Philosophy (PHD)

**HPS 2502 - HISTORY OF SCIENCE 1**

Minimum Credits: 3  
Maximum Credits: 3  
This is the first of two "core" seminars designed to survey the development of scientific thought in Western civilization. In this first seminar, Greek medicine, astronomy, mathematics, biology and physics, its disappearance in the West, its preservation and development in Islam and finally the emergence of modern science in the renaissance, are the main focus.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: History and Philosophy of Science (MA, PHD)  
**Course Attributes:** West European Studies
HPS 2503 - HISTORY OF SCIENCE 2

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will provide an overview of some of the major developments in the sciences from the second half of the seventeenth century to the first half of the Twentieth Century, considering the physical, chemical, biological, geological and social sciences. It will deal with the work of individuals, of general movements and their institutional and national settings.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: History and Philosophy of Science (MA, PHD)

HPS 2504 - HISTORY OF GENETICS: MENDEL TO METHYLATION

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

HPS 2505 - PHILOSOPHICAL FOUNDATIONS OF COGNITIVE SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

HPS 2509 - SPECIAL TOPICS IN THE HISTORY OF THE PHILOSOPHY OF SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

HPS 2515 - PERSPECTIVES IN HISTORY OF SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This seminar investigates perspectives of history of science by drawing on recent literature in the field. The emphasis and selection of topics will vary from year to year according to the instructor's selection.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

HPS 2519 - CONTROVERSY, CRISIS, AND CONSENSUS

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade
HPS 2520 - NEWTON

Minimum Credits: 3
Maximum Credits: 3
This seminar will consider the establishment of dynamical astronomy with the publication of Newton's principia in 1687. The development and significance of Newton's early thought will be analyzed in relation to his mature "system of the world". Some aspects of the work of Newton's principal predecessors—especially Descartes and Kepler—will also be considered.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2521 - HISTORY OF PARTICLE PHYSICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2522 - SPEC TOPICS-HISTORY OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
A variety of archival resources are available for investigating the history of science, and the internet will continue to make more and more of these materials accessible on-line. In this seminar we will be exploring issues such a how to make intelligent use of resources and how to determine which questions they can help to answer. In particular, can such resources give us insight into the creative proves often referred to as scientific discovery? We will explore such questions in the context of archival collections, for example those related to Galileo and Darwin.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2527 - ORGANIZATION, LEVELS AND EMERGENCE

Minimum Credits: 3
Maximum Credits: 3
Biology is a science where both reductive and holistic approaches have frequently been championed. In this seminar we will consider reductive vs emergentist strategies and specific debates including gene-centric vs levels-of-selection accounts of evolution by natural selection, molecular vs systems biology. How can we specify different levels in biology? What types of organization support emergent explanation? Requirements include class participation and presentation, plus the option of 4 short papers or a longer, term paper.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPS 2530 - READING SEM HIST OF SCIENCE

Minimum Credits: 1
Maximum Credits: 6
This seminar is designed as an intensive reading of one or a small number of texts in the history of science. The text(s) is to be selected by the instructor. Ordinarily this will be a chance to do a directed reading of texts not studied in the department's regular course offerings.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

HPS 2531 - FREUD AND PSYCHOANALYSIS
Minimum Credits: 3
Maximum Credits: 3
An intense reading of the works of Freud and selected secondary works. Emphasis will be on psychoanalytic theory rather than therapy.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2532 - HISTORY OF OLD QUANTUM THEORY

Minimum Credits: 3
Maximum Credits: 3
This course surveys the development of the old quantum theory from its origins in Planck's work on black body radiation, through Bohr's atomic model to the emergence of modern quantum theory in the mid 1920's.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2533 - DESCARTES

Minimum Credits: 3
Maximum Credits: 3
An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

HPS 2540 - LOCKE AND LEIBNIZ

Minimum Credits: 3
Maximum Credits: 3
John Locke's Essay Concerning Human Understanding is often considered to be one of classics of early modern philosophy. It was first published in 1690, though many of Locke's famous doctrines, like the association of ideas were not developed in the original edition of the Essay but were added to later editions (e.g., the association of ideas comes in the 4th edition of the Essay (1700). The image of Locke grows during the Enlightenment. Yet very quickly, Locke's vision and specific doctrines were disputed. Most notably by G.W. Leibniz in his New Essays Concerning Human Understanding; [Nouveaux essais sur l'entendement humain] (finished in 1704, but suppressed on Locke's death). This is a chapter by chapter rebuttal of Locke's ideas. This seminar will carefully examine these two books, plus a little supplementary material.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPS 2541 - HISTORY OF NEUROSCIENCES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2555 - ARISTOTLE'S CONCEPT OF NATURAL SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Medieval & Renaissance Studies, West European Studies

HPS 2559 - THERMDYNMC AND STATISCAL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This course will treat topics in the history and foundations of thermodynamics and statistical mechanics, such as the nature of entropy and irreversibility.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2562 - PROBABILITY AND STATISTICS

Minimum Credits: 3
Maximum Credits: 3
We shall review the development of the notion that uncertainty and the chaos of chance may be tamed by the application of numbers. We trace its birth in the 17th century as a device for bloodlessly resolving gambling disputes; its growth through statistical theory into one on science's most important analytic tools; and its ascendance in the work of philosophically minded Bayesians as the framework of all belief.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2565 - THE GENE: TRANSFRM/FRAGMNT CONCEPT

Minimum Credits: 3
Maximum Credits: 3
The course covers the period from Gregor Mendel to the molecular gene of the 1990s. We explore its status as a hypothetical construct, and as a spatial concept in terms of its localization in the cell. Discussion of its status as a fundamental unit in biology leads to consideration of its place in the theoretical biology, in speculations about the origin of life, and in debates over the levels at which natural selection acts.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2571 - GOING MOLECULAR

Minimum Credits: 3
Maximum Credits: 3
The course is given to an examination of the impact of molecular biological methods and concepts upon the biomedical sciences. Has molecular biology become just a bag of tricks with which to carry on "business as usual"? Have these sciences, perhaps, changed their outward appearance but not their hearts? Consider the neutral theory, the home box, jumping genes, or prions. We take examples like these and explore the nature of the concepts, the degree of discontinuity in their history, and the dependence of these changes on the molecular approach.
Academic Career: Graduate
HPS 2580 - MODERN COSMOLOGY

Minimum Credits: 3
Maximum Credits: 3
In 1917 Einstein asked his new general theory of relativity how the universe might look on the largest scale. So was born the modern tradition in cosmology--rich in wild speculation, technical physics and controversy. We shall review its history and philosophy.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2590 - EINSTEIN 1905

Minimum Credits: 3
Maximum Credits: 3
1905 was the year for Einstein the patent examiner. In papers in Annalen der Physik, he proposed the special theory of relativity, e=mc², the molecular account of Brownian motion and that light energy came in quanta. In preparation for the centenary of 1905, we will study these papers which laid the foundations of modern physics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2622 - RECENT TOPICS IN PHIL OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2626 - TOPICS IN PHILOSOPHY OF PHYSICS

Minimum Credits: 3
Maximum Credits: 3
The course will examine some of the fascinating problems to which the modern physical theories of quantum mechanics and relativity have given rise. No previous formal training in physics or mathematics will be presupposed.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2627 - PHILOSOPHY OF PHYSICS

Minimum Credits: 3
Maximum Credits: 3
This seminar investigates philosophical issues in the foundations of fundamental theories of physics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2633 - PHILOSOPHY OF COGNITIVE SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2634 - TOPICS IN PHILOSOPHY OF COGNITIVE SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This class focuses on advanced topics that have been recently debated in the philosophy of cognitive science. Students will acquire an in-depth understanding of these debates.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2635 - CENTRAL PROBLEMS IN SYSTEMS NEUROSCI

Minimum Credits: 3
Maximum Credits: 3
This course will examine the theoretical foundations of systems and behavioral neuroscience, asking what progress has been made towards a general account of neural processing and discussing obstacles to theoretical unification. Example seminar topics are: the neuron doctrine, information theory and the brain, the Bayesian brain, dynamic representation, understanding intrinsic activity.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2643 - PHILOSOPHY OF CLIMATE SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course will explore philosophical questions about climate science. It will begin with central epistemological questions that arise in distinctive ways for climate science: e.g. questions concerning evidence in the historical sciences; the use of simplifying models of complex systems; and the interpretation of computer simulations. It will then broaden the picture by considering the interplay between perspectives emerging from difference sciences (e.g. ecology vs physics) and different varieties of expertise and practical knowledge; the place(s) and problems of values in climate science; choices concerning geoengineering and adaptation research; and scientific thinking about existential risk.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPS 2646 - TOPICS IN HISTORY AND PHILOSOPHY OF BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course aims to examine a variety of philosophical issues that arise in the biological sciences in historical context. Topics that may be covered, depending on which faculty member is teaching it, include: teleological explanation in biology; the nature of selection and/or levels of selection; debates over the gene concept or the species concept; biological individuality; whether there are ‘laws of nature’ in the biological sciences; mechanistic explanation; biological classification and systematics; biological kinds and natural kinds; integration of development and evolution; etc.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2649 - SCIENCE AND VALUES
Minimum Credits: 3
Maximum Credits: 3
This course will examine values as they appear in scientific reasoning and practice. It will deal with issues such as the distinction between cognitive and social values, and how values enter into the selection of theories and research projects, and their subsequent applications. It will also take up the ethical assumptions and implications of scientific judgments and policy decisions.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2650 - PHILOSOPHY OF PSYCHIATRY

Minimum Credits: 3
Maximum Credits: 3
This course examines conceptual, methodological, and some historical issues in psychiatry. General analyses of psychiatric disorders and classifications, and their reliability and validity, will lead to a consideration of the DSM and ICD. The function of etiological, reductive, and mechanical dimensions (including genetic and neuroimaging research) will be discussed. Historical topics include the contrast between and transition from psychoanalytical, narrative approaches to the rise of bio-chemical psychiatry. Extended consideration of schizophrenia and depressive disorder will be course themes. The seminar closes with a discussion of legal and ethical issues in psychiatry.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2653 - MODELS AND MODELING IN SCIENCE

Minimum Credits: 3
Maximum Credits: 3
There is increasing interest in representing scientific knowledge by means of models. Some (Suppes, Giere, Vanfraasssen) have argued for model theoretic rather than axiomatic formulations in defending a semantic account of theories. For others, models are understood in light of scientific practice, autonomous from theory, or mediating between theory and observation (Morrison, Morgan). This seminar will examine recent philosophical literature (cartwright and others) on related topics including, the relation of model to theory and to observation, the nature of abstraction, idealization, analogy and isomorphism in modeling, and different types of models including physical and scale models, mathematical models and computer simulations.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2657 - PHILOSOPHY OF BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This seminar will consider foundational conceptual issues in biology including the nature and structure of biological explanation, the possibility of laws in biology and the relationship of biology to other sciences, natural kinds and the classification of species, teleology and biological function. In addition we will explore cutting edge topics of robustness in complex biological systems and the challenges raised for causal inference, emergence and multi-level organization as well as the relationship between unity of science and pluralism.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2658 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3
Maximum Credits: 3
This seminar course provides a graduate level introduction to the philosophy of medicine. We will explore both classic and recent work. In line with the orientation of the field, we will examine metaphysical/conceptual and epistemic questions in medicine and medical research rather than the kinds of questions traditionally asked in the field of bioethics. Also following the contemporary focus of philosophy of medicine, readings are situated in the philosophy of science.
HPS 2660 - CAUSALITY

Minimum Credits: 3
Maximum Credits: 3
Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2663 - PERCEPTION

Minimum Credits: 3
Maximum Credits: 3
An in-depth analysis of contemporary theoretical and experimental issues in perception.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2665 - PHILOSOPHY OF MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HPS 2666 - ARTIFICIAL INTELLIGENCE AND PHILOSOPHY OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This seminar will consider artificial intelligence and machine learning (AI/ML) from the perspective of philosophy of science. Issues addressed by the course may vary from year to year, but they will require critical engagement with several of the following themes: â€¢ the role of AI/ML in the historical and philosophical foundations of cognitive science and robotics; â€¢ AI/ML as models of nervous system function, cognitive capacities, and psychological phenomena such as consciousness; â€¢ explainability or transparency of AI/ML systems; â€¢ ethical and other value issues relating arising in scientific and commercial applications of AI/ML; â€¢ the prospects for automating scientific discovery and scientific reasoning through AI/ML.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2667 - PHILOSOPHY OF QUANTUM MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to philosophical problems of quantum theory including variously the EPR paper, Bell's inequalities, the measurement problem and quantum logic.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2668 - TOPICS IN PHILOSOPHY OF BIOLOGY
In this seminar we will read both philosophy and biology concerning issues that have led to the development of a new discipline 'systems biology.' Robustness is a system level property of central significance for systems biology. Robustness can refer to the character of a theory or explanation, the evidence for a theory or explanation or a feature of phenomena themselves. In this course it is the latter ‘robustness as a feature of complex phenomena’ that we will examine. Kitano (2002, science) suggests that robustness occurs in 'adaptation, which denotes the ability to cope with environmental changes; parameter insensitivity, which indicates a system's relative insensitivity to specific kinetic parameters; and graceful degradation, which reflects the characteristic slow degradation of a system's functions after damage, rather than catastrophic failure.' How does a system maintain robustness, how does robustness evolve? How does robustness analysis affect our understanding of causality in flexible networks, modularity, and feedback control, as well as the empirical access to this form of dynamic stability? We will explore a wide variety of examples from bacterial chemotaxis to brain reorganization. In addition to robustness, biological systems also display multi-level organization, and are subject to multi-level explanations. We will consider alternative views about the relationships among the levels, and how experimental and explanatory strategies manage the multiple levels. For example, we will investigate if system-level properties are emergent and whether causal mechanisms can be multi-level.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2669 - REALISM**

Minimum Credits: 3  
Maximum Credits: 3  
What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truth? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2673 - STUDIES IN ARISTOTLE**

Minimum Credits: 3  
Maximum Credits: 3  
Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

**HPS 2679 - PHILOSOPHY OF MATHEMATICS**

Minimum Credits: 3  
Maximum Credits: 3  
Historical perspectives in philosophy of mathematics, by historical study of philosophical views about mathematics or by philosophical analysis of episodes in the history of mathematics.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2680 - READING SEM IN PHIL OF SCIENCE**

Minimum Credits: 1  
Maximum Credits: 6  
Selected texts in the philosophy of science.  
**Academic Career:** Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

HPS 2681 - AUTHORITY: POLITICAL & SCIENTIFIC

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2682 - THEORIES OF CONFIRMATION

Minimum Credits: 3
Maximum Credits: 3
Survey of accounts of the confirmation of scientific hypotheses, including both Bayesian and non-Bayesian approaches.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2687 - THE EPISTEMOLOGY OF EXPERIMENTAL PRACTICES

Minimum Credits: 3
Maximum Credits: 3
Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and inferences involved in reasoning about experimental results.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2690 - HISTORY AND PHIL OF PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Examination of historical and/or philosophical texts dealing with the nature of psychology and its theories, experiments and methodology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2699 - EXPERIMENT & SCIENTIFIC PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This will be a course on the epistemology of science. An honest way to do epistemology of science is to ask, given a theory and a set of evidence: to what extent does this evidence support this theory? In this course we will not investigate the topography of evidential warrant so directly. We will turn instead to some recent studies of the experimental practices through which particular pieces of evidence emerge as evidence.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2720 - PRAGMATISM

Minimum Credits: 3
Maximum Credits: 3
The course focuses on key pragmatic texts from C.S. Pearce to the present. But it will also give some consideration to the historical background of
pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings 'especially in semantics, epistemology and philosophy of science' that bear on currently controverted issues.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### HPS 2902 - PRE MA DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides credit for supervised research on an approved master's thesis topic.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### HPS 2990 - INDEPENDENT STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This is an opportunity for a student and instructor to determine a topic in history and/or philosophy of science which is of special interest. Reading assignments are established by individual instructors.  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

### HPS 2999 - PROSPECTUS RESEARCH

**Minimum Credits:** 1  
**Maximum Credits:** 6  
This course is intended for students who are preparing for their prospectus meeting.  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

### HPS 3000 - DISSERTATION RESEARCH

**Minimum Credits:** 1  
**Maximum Credits:** 12  
Students work on a dissertation topic guided by dissertation director.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### HPS 3902 - ADVANCED DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 12  
Topics to be selected by students in consultation with faculty advisors.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**History of Art & Architecture**
HAA 2000 - RESEARCH AND THESIS MA DEGREE

Minimum Credits: 1
Maximum Credits: 6
Independent research for m. A. Paper.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2001 - SPECIAL TOPICS: ART HISTORY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP

Minimum Credits: 3
Maximum Credits: 3
This is the introductory seminar for entering graduate students in the history of art and architecture. As such it has two goals: 1) to explore, through use, the bibliography of reference works central to the history of art; 2) to consider the intellectual history of the discipline, with the various approaches to the work of art revealed in art historical literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2006 - ART HISTORY WRITING PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
This graduate seminar will give students the opportunity to think critically about the process of art-historical writing and to get constructive, detailed feedback on their own written work.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2007 - HISTORIOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
This class examines the history of analytic approaches to art objects, doing so with an eye to the department's array of research constellations.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2008 - CONSTELLATIONS OF ART HISTORY

Minimum Credits: 3
Maximum Credits: 3
This is a graduate reading course tied to HAA's constellations. Readings will address one of the constellations from multiple perspectives. In lieu of a research paper there will be a series of shorter response papers that vary in format and goals, from brief "blog" entries on a particular reading to
longer essays that compare several readings to exploratory papers that apply readings to the interpretation of specific works of art.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HAA 2009 - PROSEMINAR FOR GRADUATE STUDIES IN ART HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This course aims to familiarize students with the professional landscape they will confront as art historians, and to give them the tools they need to succeed as they do so. Topics covered will concern such subjects as writing grant applications, turning seminar papers into publishable essays, composing successful research statements, working in the digital humanities, and exploring the range of professional outcomes and career paths available to students in the 21st century.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HAA 2010 - APPROACHES TO ART HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- HAA 2010 is the capstone research seminar required of all HAA majors and is an official w-course. Students in this class will conduct extensive readings on a special topic devised by the course instructor. Each student in the class will be required to produce a substantive research paper under the guidance of the instructor. Students will work to master the skills that are fundamental to the discipline and broader arts related professions: critical thinking, research, and written and oral communication.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HAA 2019 - CURATORIAL DEVELOPMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This museum studies course draws on the University Art Gallery collection to develop an exhibition that will be realized in the Fall by students in the Exhibition Presentation Seminar. Within a defined thematic or collection-area focus, students will survey the holdings of the gallery to develop an exhibition concept and conduct in-depth research into a single work of art to contribute to a catalogue for the exhibition. Students will explore the key texts related to the subject of the exhibition and identify potential loans to complement its storyline.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2021 - INSIDE THE MUSEUM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This course will enable students, particularly those who are pursuing the Museum Studies Minor, to gain behind-the-scenes knowledge of museum practices with sessions taught on location at the various Carnegie Museums of Pittsburgh. The course will provide students interested in museum careers with a rich variety of hands-on, practical, and experience-based learning in addition to theoretical exploration and connect students to professionals working in these institutions. Specific topics will vary depending on the opportunities provided by initiatives and projects that are underway at the time the class is offered.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2022 - EXHIBITION PRESENTATION**
Minimum Credits: 3  
Maximum Credits: 3  
This course teaches museum practice through practical experience with the permanent collection and with special exhibitions. Students will help in all aspects of exhibitions, from writing labels and/or catalogue copy, deciding how to best display the works, participating in the actual installation of exhibitions and planning related events such as tours.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  

HAA 2025 - HISTORY AND ETHICS OF COLLECTING  
Minimum Credits: 3  
Maximum Credits: 3  
This course will critically examine the history of public and private collecting practices, the cultural and scholarly rationales behind collecting, and the legal and ethical challenges that collections face. Case studies will include the British museum and the Louvre, Pittsburgh's private collectors Frick and Mellon, the fate of art in Europe during World War II, the antiquities trade, and ethnographic collections. Using these and other examples, we will evaluate the arguments for and against universal art museums, the repatriation of works to source nations or original owners, and the protection of cultural heritage during times of conflict.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

HAA 2026 - EXHIBITIONS: FROM WORLD'S FAIRS TO GLOBAL BIENNIALS  
Minimum Credits: 3  
Maximum Credits: 3  
This course surveys the Western origins of museums, world's fairs, and biennials in the 19th century and traces the increasingly global development of exhibitions of visual and material culture up through the present day. Our focus in this long and varied history will be on those shows that have sought, not without controversy, to shape viewers' knowledge of the past, while also structuring their sense of self and relationship to others in national, international, universal, and/or global terms. We'll critically assess the motivations behind these exhibitions and the changing "world picture" each presented in relation to modernizing and globalizing tendencies of the past two centuries. We'll also take a close look not only at what these shows presented, but also how and for what purpose(s) our chosen exhibitions were organized. Whose worldview, ideology, and/or political interests did they serve? How in each case did the very arrangement of objects and the physical context of their presentation seek to articulate those interests? What sort of public did they envision and attempt to create? We'll also address how and to what extent the achievements and shortcomings of earlier exhibitions have informed the character of subsequent shows down to today. Throughout the course, we'll measure our understanding of this history against local examples of Pittsburgh's rich and extensive museum culture. Written assignments will involve students in exploring these and other local installations as we assess what role museums can and should continue to play in fostering understanding of ourselves and others now and into the future.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

HAA 2030 - SPECIAL TOPICS: MUSEUM HISTORIES  
Minimum Credits: 1  
Maximum Credits: 3  
This course will discuss specific subjects in museum studies.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis  

HAA 2031 - SPECIAL TOPICS: MUSEUM PRACTICES  
Minimum Credits: 1  
Maximum Credits: 3  
This course will discuss specific subjects in museum studies.
**HAA 2040 - DIGITAL/CRITICAL INTERDISCIPLINARY METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This advanced graduate course unites students from widely varying disciplines to share the work of learning new disciplines. It explores humanities, social and natural sciences. Specific course objectives are: (1) to introduce students to a wide range of disciplines, theories, and methods; (2) to enable individual students to develop substantial strength in a new discipline and method of their choice; (3) to emphasize the historical discipline and the factor of time; and (4) to compare and contrast the various disciplines in topic, framework, data, method, analysis, and philosophy.

**HAA 2051 - WORLD ART: CONTACT AND CONFLICT**

Minimum Credits: 3  
Maximum Credits: 3  
This course, an advanced undergraduate seminar, is a counterpart to the introductory core course Introduction to World Art and invites students to think more critically about 'World Art' as a disciplinary enterprise as it emerged in the last several decades with the ‘global turn', post-colonialism, and a call for art history to be more inclusive. Students will be introduced to key terms that are employed by this discourse (contact zones, planetarity, world-picturing, cosmopolitanism). The course works through these ideas by focusing its attention on specific sites and art objects, case studies that explicitly circulate within or take as their subject the meeting point of different cultures and groups. First and foremost, this course regards 'the contact zone' as a messy and complicated place. To inhabit the earth as a human being, people encounter, perceive, collaborate with and often resist others. Through the spaces and material objects humans create, boundaries are established and individuals and communities are defined and circumscribed. Art objects and constructed spaces not only arise from but define the contact point of individuals or groups occupying different worlds. By studying these works as a space of encounter, students will learn that boundaries between people are porous, with cultural contact a zone of potentially productive collaboration but also power inequity and strife. How do works of art and built spaces incite, mediate, or instantiate such strife? How have people traditionally perceived to reside at the periphery employed artistic expression or rhetorical strategies to subvert existing power structures (the center) and formulate identity? Students who have taken the HAA 0010 Introductory version of this course are encouraged to take this more advanced version, but it is not necessary to have had HAA 0010 to enroll in HAA 1050.

**HAA 2060 - SPECIAL TOPICS PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 3  
Practicum courses will focus on critical skills, cognitive competencies or disciplinary topics central to advancing the professional expertise of students.

**HAA 2061 - SPECIAL TOPICS WORKSHOP**

Minimum Credits: 1  
Maximum Credits: 3  
Workshops will focus on critical skills, cognitive competencies or disciplinary topics central to advancing the professional expertise of students.
HAA 2101 - SPECIAL TOPICS: ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
Course varies from term to term.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HAA 2102 - SPECIAL TOPICS-ANCIENT

Minimum Credits: 3
Maximum Credits: 3
Special topics in ancient art.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2111 - GREEK ART

Minimum Credits: 3
Maximum Credits: 3
The study of Greek art begins ca. 3000 B.C. In the so-called "age of bronze" and traditionally ends in 30 B.C. With the completion of the roman conquest of the eastern Mediterranean. The course will trace the development of architecture, sculpture and painting in mainland Greece and to a lesser extent in the Greek colonies of Asia minor and Italy, emphasizing the changes in style and taste which took place over this period.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2131 - ROMAN ART

Minimum Credits: 3
Maximum Credits: 3
Roman art served as the funnel through which the principles of Greek art passed into European culture, but the principles were transformed in the process of transmission. The course will trace the beginnings and subsequent development of the arts of painting, sculpture, and architecture in Italy from the period of the kings to the middle years of the empire (ca. 150 A.D.).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2200 - SPECIAL TOPICS-MEDIEVAL

Minimum Credits: 3
Maximum Credits: 3
Special topics in medieval art.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2231 - EARLY MEDIEVAL ART

Minimum Credits: 3
Maximum Credits: 3
This course examines the art of the early middle ages, paying particular attention to the slow disintegration of the roman empire, the rapid rise of Christianity, and the evolving identity of Europe and the Mediterranean in a period of migration, crisis, and transformation. Special attention will be paid to the roles played by emperors and kings in this period, including Constantine, Justinian, Clovis and Charlemagne, and the peculiar blend of Pagan and Christian cultures that defined early medieval art.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2232 - PAGANS AND CHRISTIANS: THE EARLY MIDDLE AGES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the art of the early middle ages, paying particular attention to the slow disintegration of the roman empire, the rapid rise of Christianity, and the evolving identity of Europe and the Mediterranean in a period of migration, crisis, and transformation. Special attention will be paid to the roles played by emperors and kings in this period, including Constantine, Justinian, Clovis and Charlemagne, and the peculiar blend of pagan and Christian cultures that defined early medieval art.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2240 - ROMANS AFTER ROME**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Romanesque architecture, evolving from the building practices of about A.D. 800 in the Carolingian Empire, marks the coming of age of European culture in the post-Antique era. Most of what survives was ecclesiastical in purpose and consists predominantly of monastery churches and their claustral structures. This course will treat both formal and functional issues in the development of the Romanesque tradition and will emphasize the mature period, 1050-1140.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2300 - SPECIAL TOPICS-RENAISSANCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Special topics in Renaissance art.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**HAA 2308 - EARLY RENAISSANCE ARCHITECTURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The early Renaissance (1420-1500) marked a fundamental change in the way mankind saw and thought about the world. This course examines the buildings, cities, projects, and theories of that period through its major designers. It concentrates on the new acceptance of rationality and modular linkage in building, which prefigures the rationality and scientific method so characteristic of the modern world.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**HAA 2400 - SPECIAL TOPICS-MODERN ART**

**Minimum Credits:** 3  
**Maximum Credits:** 3
Special topics in modern art.

**HAA 2401 - SPECIAL TOPICS-CONTEMPORARY**

- Minimum Credits: 3
- Maximum Credits: 3
- Special topics in contemporary art.
- **Academic Career:** Graduate
- **Course Component:** Seminar
- **Grade Component:** Grad Letter Grade

**HAA 2404 - SPECIAL TOPICS: MODERN-LECTURE**

- Minimum Credits: 3
- Maximum Credits: 3
- Special topics in modern art.
- **Academic Career:** Graduate
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**HAA 2411 - MODERNISM**

- Minimum Credits: 3
- Maximum Credits: 3
- Something happened in the history of art around the time of Manet which set painting upon a new course. This change has been described as a kind of skepticism or uncertainty about the nature of representation in art, characterized by an attention to the material means by which illusions and likenesses are made. This course will examine several monuments in the history of modernism, in an attempt to define the political ambitions of modernism and to confront the issue of whether modernism has become simply an aesthetic or is still a viable artistic strategy in the "post-modern" era.
- **Academic Career:** Graduate
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**HAA 2412 - REALISM AND IMPRESSIONISM**

- Minimum Credits: 3
- Maximum Credits: 3
- These movements in 19th century European art were important in the formation of later modern art currents. The course will consider the major developments in Romanticism, then study Courbet, Manet and Degas, and finally move to the major impressionist masters, Monet, Renoir, Sisley, and Pissarro. Much attention will be given to the literary and scientific framework for the art of the period.
- **Academic Career:** Graduate
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**HAA 2441 - EXPRESSIONISM**

- Minimum Credits: 3
- Maximum Credits: 3
- A history of the development of modernist art in Germany from the founding of the "bridge" group in 1905 to the "death" of German expressionism in 1920. Although primarily focused on the art of the "bridge" and "blue rider" groups, the course will also situate this art within the broader context of German art production during these years (academic art, Jugendstil, secession, dada).
- **Academic Career:** Graduate
HAA 2451 - ART IN THE WEIMAR REPUBLIC

Minimum Credits: 3
Maximum Credits: 3
The course will examine art and architecture in Germany from the end of World War I to the rise of the national socialist dictatorship in 1933. Emphasis will be on a chronological study of the ways in which art developed in Germany under democratic social concepts and a new internationalist outlook in the early years of the republic, and the ways art became embedded in the political structures.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2455 - ART OF THE THIRD REICH

Minimum Credits: 3
Maximum Credits: 3
This course examines national socialist art and the fate of modernism under Hitler in the years between 1933 and 1945. As we will explore, Hitler's regime enlisted the arts and architecture, through party rallies, art exhibitions, building programs, and film, in enforcing its dictatorial policies on everything from the extermination of the Jews to sexuality and the war effort. We shall also consider the impact of the purge of modern art under Hitler on the work of such noted modernists as Otto Dix and Kiki Kollwitz, who chose to remain in Germany, and on the art of those who fled into exile, among them John heart field, George Grosz, and Max Beckmann. The final weeks of the course will consider critical issues involved in recent-and invariably controversial-attempts in museum building, sculpture, and site-specific installations to memorialize the holocaust and examine Germany's Nazi past.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2491 - ART SINCE 1945

Minimum Credits: 3
Maximum Credits: 3
This course will present a review of art movements in America and Europe form 1905-1945 in the introduction, followed by a more intensive study of post-World War II art movements in Western Europe and America from 1945 to the 1980's. We will give special attention to: a) different styles of art which fit into the label "abstract expressionism" b) different styles under "pop(ular) art" c) conceptual art movements d) issues in critical evaluations of contemporary art.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2600 - SPECIAL TOPICS-CHINESE

Minimum Credits: 3
Maximum Credits: 3
Special topics in Chinese art.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies

HAA 2601 - SPECIAL TOPICS-JAPANESE

Minimum Credits: 3
Maximum Credits: 3
Special topics in Japanese art.
HAA 2612 - SPECIAL TOPICS-ASIAN

Minimum Credits: 3
Maximum Credits: 3
Special topics in Asian art.

HAA 2630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE

Minimum Credits: 3
Maximum Credits: 3
The design of Chinese cities is guided by philosophical principles established in the early dynastic period. Imperial cities follow a regular grid pattern that faces south, and includes an inner city, open only to the imperial leaders and aristocrats, and an outer city in which the business is carried out. The design and use of the city is guided by Confucian and Daoist ideals. Religious centers follow palace designs, but are tied to Buddhist, Confucian and Daoist practice. Village centers are arranged according to Daoist ideas about nature called Fengshui.

HAA 2640 - 20TH CENTURY CHINESE ART

Minimum Credits: 3
Maximum Credits: 3
The 20th century in China was a period of tremendous change. Artists and the society in which they lived crashed into the modern world to struggle with the weight of tradition as well as the draw of the new. We will consider this period and artistic visions of it by looking at arts including printmaking, painting, film, installation and other synthetic and combined forms. All artistic production will be contextualized within the political and cultural history of the period.

HAA 2641 - CONTEMPORARY CHINESE ART

Minimum Credits: 3
Maximum Credits: 3

HAA 2650 - CHINA'S ARCHAEOLOGICAL PAST

Minimum Credits: 3
Maximum Credits: 3
HAA 2652 - JAPAN: BUDDHIST ART & RITUAL

Minimum Credits: 3
Maximum Credits: 3
This course will examine forms of Japanese art dating from the Heian (794-1185) and Kamakura (1185-1333) periods. Course content may be altered to incorporate new research and publications.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2653 - ANCIENT EAST ASIAN VISUAL TRADITIONS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to look at early cultures of East Asia through the study of material culture. It is arranged in chronological order, beginning with the Paleolithic and including the Neolithic, through the formation of states and empires in China, Korea and Japan. We will consider the artifacts as cultural documents and learn how to explain why they look the way they do based on an understanding of their patron's input, their function, use and time of manufacture.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2680 - JAPAN: ARTIST AND CITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2901 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Directed study for M.A. Students.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Directed study for M.A. Students.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

**HAA 2903 - GRADUATE INTERNSHIP**

Minimum Credits: 3  
Maximum Credits: 3  
Academic credit is awarded for experience gained through a directed internship. The internship is arranged by the student in consultation with the director of graduate studies in the history of art and architecture department. 
Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad SN Basis

**HAA 2905 - COMPREHENSIVE EXAM PREPARATION**

Minimum Credits: 1  
Maximum Credits: 9  
This course is an independent study for Ph.D. students who are actively preparing for their comprehensive exams. The student works under the supervision of a dissertation advisor, with the assistance of other members of the dissertation committee. Committee and student agree on bibliographies in advance, and the student is encouraged to discuss the readings on a regular basis with his or her advisor and other members of the committee if necessary.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

**HAA 2906 - DISSERTATION PROSPECTUS**

Minimum Credits: 1  
Maximum Credits: 9  
This course is an independent study for Ph.D. students who are preparing their dissertation prospectus. Working under the supervision of a dissertation advisor, the student writes a prospectus that summarizes the dissertation topic, its original contribution to the field, and its methodology. The prospectus should also include a brief chapter outline, a research plan, and a bibliography - the whole document totaling approximately 10 to 20 pages.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

**HAA 2951 - MENTORING INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 3  
This course provides an opportunity for graduate students to mentor undergraduates under the supervision of a faculty instructor. The course is designed to enable graduate interns to mentor individual undergraduates, or small groups, who are engaged in advanced research or other projects in the University art gallery or digital media workshop or elsewhere under faculty supervision. Supervising faculty will meet regularly with the graduate intern to design and monitor the mentoring experience, and to discuss the practice of mentoring.  
Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad SN Basis

**HAA 2970 - TEACHING OF ART HISTORY**

Minimum Credits: 1  
Maximum Credits: 3  
Taken simultaneously with independent teaching by graduate students.
HAA 2991 - 20THC RUSSIAN ART: BETWEEN EAST/WEST

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
Dissertation research for Ph.D.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 3901 - INDIVIDUAL RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Human Behavior

SWBEH 2008 - HUMN BHVR: URBAN ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
This course deals with collective behavior and societal values relative to key urban issues, particularly race, gender, and poverty. Guest experts will lecture, with the course drawn together, coordinated, and enriched by a single instructor of wide experience, both in teaching and in running a large innovative agency.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: COSA (Social Work-MS)

SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK

Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the strengths and needs of children and families at risk. The effects on parent and child development of poverty, unemployment, drug and alcohol abuse, family violence, child maltreatment, inadequate housing, inadequate health care, inferior educational opportunities and other micro and macro factors will be examined.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

SWBEH 2063 - HUMAN BEHAVIOR & SOCIAL ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
Using systems theory as an organizing framework, human behavior and its determinants are studied from the societal systems through the group, family, and individual systems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH

Minimum Credits: 3
Maximum Credits: 3
This course addresses the etiology, nature, course and treatment of mental disorders across the life cycle. Some mental illnesses begin early in life, and may continue throughout life, being modified by growth and development; others begin later in life or are specific to a particular stage in the life cycle; while others occur in response to environmental circumstances and stressors. Furthermore, gender, race, culture, ethnicity, socioeconomic status and other aspects of diversity shape how symptoms of mental illness are experienced, interpreted and expressed. A selection of the major categories of mental disorder and abnormal behavior will be addressed although it will not be possible to examine all of them in class. Understanding and applying the DSM-IV-TR manual as a clinical assessment tool, an introduction to psychopharmacology, and the nature and role of risk and protective factors associated with suicidal and violent behavior will also be addressed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

SWBEH 2066 - HUMAN BEHAVIOR: HEALTH/MENTAL HEALTH

Minimum Credits: 3
Maximum Credits: 3
The overall purpose of this course is to expand student knowledge of physical health and mental health interactions which impact individuals and target populations during the life cycle process. This knowledge is used to design theory driven health promotion interventions. This course will investigate selected physical and public challenges that impact the overall health and well-being of individuals from early childhood to late adulthood. Definitions of health and well-being from both a social work and public health perspective will be defined and discussed to more fully understand the state of physical and mental issues in the western society. Understanding the integration of health education, health behavior, health promotion, is required to facilitate the development of theory driven interventions. Special attention is focused on how values, historical experience, cultural norms and environmental factors such as race, gender, socioeconomic status, and access to resources impact the public's health and their access to service delivery. Students will develop the ability to apply their knowledge and understanding of the interactions between physical health and mental health status across the lifespan to their own work with clients, organizations and policy initiatives.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

SWBEH 2077 - HUMN BHVR: ADULT DVLP AGING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on substantive content during adulthood (early and middle age) and old age. This course offers a framework for understanding mid-life and old age from a life-span developmental perspective and examines physical, social (environmental), and personal factors that influence the developing personality. The knowledge is integrated and appraised for its usefulness in working directly with and/or in behalf of middle-aged and older persons.
Human Genetics

HUGEN 2010 - BIOINFORMATIC RESOURCES FOR GENETICISTS

Minimum Credits: 1  
Maximum Credits: 1  
The focus of this course is the online bioinformatic resources available to geneticists. Students will learn to locate and use such resources and interpret the data therein to inform the development of research questions, aid in clinical decision-making, and enhance the understanding and contextualization of research results.

HUGEN 2011 - SCIENTIFIC WRITING IN HUMAN GENETICS

Minimum Credits: 1  
Maximum Credits: 1  
Writing and communication skills are amongst the most important assets for any human genetics researcher and/or public health genetics professional. By facilitated discussions and reading and writing exercises/assignments, Scientific Writing in Human Genetics is designed to empower Human Genetics students to establish the communication mindset to write clear and compelling scientific narratives in plain language, utilize the writing resources available on campus and online, improve their scientific writing skills, and complete a solid draft of the Background/Introduction section of their MPH essay, MS Thesis, or PhD research proposal/comprehensive exam document (and possibly, additional sections, including methods, results, or the entire MPH essay) or another academic work with permission of the instructor. The ability to write and use standard English language is required. Whether English is your first or second language, if you are not comfortable writing grammatically correct and properly punctuated English, an "ESL course" is recommended.

HUGEN 2021 - SPECIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 15  
Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.

HUGEN 2022 - HUMAN POPULATION GENETICS

Minimum Credits: 2  
Maximum Credits: 2  
This survey course covers the principles of population genetics as applicable to human populations, including (1) the laws of inheritance that govern the organization of the genomes in populations, (2) the evolutionary forces and phenomena that impact genetic diversity in human populations, and (3) the foundational concepts of genetic epidemiology and gene discovery.
HUegen 2025 - Human Genetics Seminar

Minimum Credits: 0
Maximum Credits: 0
Human genetics seminars present current genetics methodology, theory, and data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

HUegen 2026 - Special Studies Human Genetics

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide advanced undergraduates and graduate students with directed, intensive training in laboratory, statistical or clinical research methods relevant to human genetics. These specialized skills are not available in regularly taught courses in the university. Each special study is designed in consultation with an individual member of the human genetics faculty.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUegen 2027 - Human Genetics Fall Journal Club

Minimum Credits: 1
Maximum Credits: 1
Human genetics journal club meets once a week during the fall semester to give students and faculty a chance to present exciting research which they feel is relevant to the department. The audience is other students and faculty from the department and other departments of the schools of health sciences. Presentations are informal and meant to give students the experience necessary to be an effective communicator, and to teach them critical skills for evaluating research publications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUegen 2028 - Human Genetics Journal Club and Peer Review

Minimum Credits: 1
Maximum Credits: 1
Human genetics journal club provides students and faculty with an opportunity to present and discuss exciting research in an informal format. The purpose of the course is to hone students' oral and written critical evaluation skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUegen 2029 - Introduction to Gene Mapping

Minimum Credits: 3
Maximum Credits: 3
This course presents a literature-based approach to understanding and interpreting results from gene mapping papers in the field of human genetics. Traditional and state-of-the-art genetic mapping methodologies will be explored.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2022 and 2034 and 2040 and BIOST 2041

HUegen 2031 - Chromosomes and Human Disease
Minimum Credits: 3
Maximum Credits: 3
The role of chromosomes in human disease is discussed after a thorough background on chromosome structure and function is presented. Topics covered include cytogenetic methodology, aneuploidy, chromosome rearrangements, chromosomes and cancer, chromosome breakage syndromes, and fragile sites on human chromosomes.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2032 - GENETIC TECHNIQUES

Minimum Credits: 2
Maximum Credits: 2
Students participate in laboratory exercises to become acquainted with cytogenetics laboratory procedures including cell culture, chromosome preparation, chromosome banding, and karyotyping. Chromosome analysis and karyotype interpretation are practiced.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: HUGEN 2031; Graduate Sch of Public Health Students Only

HUGEN 2034 - BIOCHEMICAL AND MOLECULAR GENETICS OF COMPLEX DISEASES

Minimum Credits: 3
Maximum Credits: 3
This course provides students with an overview of the molecular and biochemical genetic approaches to determine the underlying genetic architecture of common diseases that account for a large portion of the public health burden of disease. The genetic, environmental and epigenetic factors that influence susceptibility to common disease will be illustrated using selected examples, such as cardiovascular disease, neurodegenerative diseases, mental health diseases, autoimmune diseases and eye diseases.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2035 - PRINCIPLES OF GENETIC COUNSELING

Minimum Credits: 3
Maximum Credits: 3
This course addresses fundamental concepts important to genetic counseling principles and practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2036 - GENETIC COUNSELING INTERNSHIP

Minimum Credits: 4
Maximum Credits: 4
For this course, students will participate in supervised genetic counseling clinical rotations in a variety of specialty areas. The lectures that are part of the course will address topics relevant to clinical genetics and counseling.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Genetic Counseling (MS)

HUGEN 2038 - INTERVENTION SKILLS FOR GENETIC COUNSELING

Minimum Credits: 3
Maximum Credits: 3
Focuses on the understanding of theories of intervention, skill development and application to genetic counseling. The course aims at sensitizing students to the ethical dilemmas faced by affected families and health-care providers.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Genetic Counseling (MS)

**HUHEN 2039 - RISK CALCULATION GENETIC COUNSELING**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course provides hands-on training in calculating risk of disease or carrier status in a variety of typical genetic counseling situations, as well as discussion of the limitations of those calculation methods.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: HUHEN 2022

**HUHEN 2040 - MOLECULAR BASIS OF HUMAN INHERITED DISEASE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an overview of selected human inherited disorders and integrate clinical descriptions with recent genetic, molecular genetics and biochemical insights. Current state of the art molecular genetics methodologies will be integrated into the overviews.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HUHEN 2041 - BIOETHICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is an advanced treatment of significant problems in medical ethics. Topics may include euthanasia, rights to health care, competency, allocation of resources, and other issues of medical ethics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HUHEN 2047 - CLINICAL GENETICS CASE CONFERENCE**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
With clinical cases and specimens from various clinical genetics service units, this seminar illustrates and provides insights into the biologic, medical, ethical, and emotional aspects of genetic disorders.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis

**HUHEN 2049 - INTRODUCTION PUBLIC HEALTH GENETICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a framework in which to assess how advances in genomics may be applied to public health practice and policies that affect both individuals and society. In addition, the ethical, legal, and social consequences of historical, current, and future interventions are considered.

**Academic Career:** Graduate
**HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 6  
The practicum is a short term field placement (minimum 200 hours of public health oriented work) with an organization or agency that is relevant to the student's area of interest. Each placement must be agreed upon by the student and the MPH program advisor.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PLAN: Public Health Genetics (MPH or CERT)  
Course Attributes: Community Element -General Community Impact

**HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT**

Minimum Credits: 2  
Maximum Credits: 2  
This course focuses on the connections between human development and inherited disease. The course will include core principles of development of the body plan and signaling pathways involved in development and differentiation. These biological processes will be used to categorize inherited human diseases, understand disease mechanisms, and the current efforts to develop targeted treatments.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**HUGEN 2052 - ETHICAL ISSUES IN CLINICAL AND PUBLIC HEALTH GENETICS**

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to explore ethical issues as they relate to genetics and genomics in both the clinical and public health contexts. This seminar series provides an ethical framework for analyzing arguments in the literature and cases arising in clinical and research contexts and proceeds throughout the semester with a discussion-based format that encourages students to assume responsibility for engaging in ethical analysis.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad SN Basis  
Course Requirements: CREQ: HUGEN 2035 or 2049; PLAN: HUGEN-MS or GNCSLG-MS or PHGEN-CR4 or PHGEN-MPH

**HUGEN 2053 - APPLICATIONS IN PUBLIC HEALTH GENETICS AND GENOMICS**

Minimum Credits: 2  
Maximum Credits: 2  
This graduate level course builds on the basic components of public health genetics and genomics and provides students with the opportunity to discuss and apply these concepts to public health. The goal of this course is for students to apply knowledge and skills learned across public health disciplines, especially the use of genetic principles, in a public health practice setting. Using current issues in public health genetics, students will also demonstrate mastery of essential competencies through data analysis, and oral and written communication.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: BIOST 2041 or BIOST 2011; CREQ: HUGEN 2049; PLAN: Human Genetics or Genetic Counseling or Public Health Genetics

**HUGEN 2060 - CHROMOSOMES - STRUCTURE AND FUNCTION**

Minimum Credits: 2  
Maximum Credits: 2
Chromosomes are the primary means of biologically organizing and manipulating nuclear DNA within the cell, across cell generations, and across sexual generations. In this course we will investigate how differences in chromosome structure and function affect the roles chromosomes play as dynamic "megamolecules" in reproduction, development, health and disease.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2061 - CANCER GENETIC COUNSELING

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide students with the knowledge and skills fundamental to the practice of cancer genetic counseling. The overall goal of the course is to allow students to apply cancer genetics knowledge to clinical situations. The course will cover hereditary cancer syndromes, cancer risk assessment models, and germline and somatic genomic testing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2035 and COREQ: HUGEN 2060; PLAN: HUGEN-MS, HUGEN-PHD, PHGEN-MPH, GNCSLG-MS, or PHGEN-CR4

HUGEN 2071 - GENOMIC DATA PROCESSING AND STRUCTURE

Minimum Credits: 3
Maximum Credits: 3
Bioinformatics involves an in-depth understanding of data and a substantial amount of data processing. This course focuses on the manipulation and management of human genetic and genomic data via two platforms: the R statistical computing environment and the Unix operating system. The course will also cover the major data formats and structures used to store human genetic and genomic data. A key component of the course will be hands-on analyses of example data sets in a variety of formats.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: Pre-reqs: HUGEN 2022 AND BIOST 2041 for MS-GB plan; or approval of instructors.

HUGEN 2080 - STATISTICAL GENETICS

Minimum Credits: 3
Maximum Credits: 3
An advanced course which discusses the principles and practice of statistical genetics in the area of genetic epidemiology of human diseases and traits. The course will cover statistical modeling and methodology in familial aggregation, linkage analysis and association analysis; the course includes hands-on experience with current computer programs used in these research areas.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2022 and BIOST 2041

HUGEN 2090 - GENETICS OF COMPLEX DISEASES 1

Minimum Credits: 2
Maximum Credits: 2
This course provides students with an overview of the molecular and biochemical genetic approaches to determine the underlying genetic architecture of common diseases that account for a large portion of the public health burden of disease. The genetic, environmental and epigenetic factors that influence susceptibility to common disease will be illustrated using selected examples, such as cardiovascular disease, neurodegenerative diseases, and mental health diseases.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
HUGEN 2091 - GENETICS OF COMPLEX DISEASES II

Minimum Credits: 1
Maximum Credits: 1
This course will provide an overview of genetic and molecular basis of complex human diseases with primary focus on immune-mediated conditions, autoimmune diseases, and common eye disorders. Common human disorders largely contribute to the public health burden of disease and are influenced by a complex interplay of genetic, epigenetic, demographic, and environmental risk factors. Selected examples will be used in the classroom to illustrate the multifactorial nature of complex human diseases. Identifying multiple genetic variants/loci involved in common disease susceptibility and understanding the biological functions/pathways impacted by complex interactions of these genetic factors with other risk factors/exposures constitute an essential step towards improving the prevention, diagnosis, and management of these common conditions. This course will also provide an overview of the immune system and microbiome as related to their emerging important role in influencing the development and/or prognosis of a diverse array of complex human diseases.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: COREQ: HUGEN 2090; PLAN: HUGEN-MS; HUGEN-PHD; PHGEN-MPH; GNCSLG-MS; or PHGEN-CR4

HUHEN 3010 - RESEARCH AND DISSERTATION PH.D.

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Immunology

MSIMM 2000 - PRINCIPLES OF MICROBIOLOGY AND IMMUNOLOGY

Minimum Credits: 6
Maximum Credits: 6
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSIMM 2200 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSIMM 2210 - COMPREHENSIVE IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2
This is a lecture course that will introduce the students to the fundamental concepts of modern immunology. The course will cover cells, tissues and organs of the immune system. Furthermore in-depth analysis of the development, activation, effector functions and regulation of immune response will be presented in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MSIMM 2230 - EXPERIMENTAL BASIS OF IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course will expose the students to classical and contemporary literature in modern immunology. Emphasis will be on paper analysis and critical evaluation of primary data. This course will parallel the topics presented in comprehensive immunology lecture course which must be taken before or simultaneously with experimental basis of immunology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: MSIMM 2210

MSIMM 2240 - INTRODUCTION TO IMMUNOBIOThERAPEUTICS

Minimum Credits: 2
Maximum Credits: 2
This course will provide a comprehensive overview of the principles and the technology upon which immunobiotherapeutics are based. The course will focus on the overall aims of using small molecules, antibodies, genes and cells as immunotherapeutic agents. It will cover the use of viral and non-viral agents as gene delivery vehicles, cells as therapeutic agents and small molecules as delivery and therapeutic vehicles. The course will also cover diseases and disorders in which immunobiotherapy has proven safety and demonstrated successful outcomes like cancer, Mendelian disorders and autoimmunity. Lectures and student presentations will cover: genes and cells as drugs, peptides, antibodies and small molecules as therapeutics and delivery vehicles, viral and non-viral vectors, stem cells, and specific diseases where immunotherapy has shown safety and efficacy. Students may also be educated on bioethical issues and existing laws governing biotechnology and molecular medicine approaches.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSIMM 2250 - TA: MEDICAL MICROBIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Immunology (PHD)

MSIMM 2260 - IMMUNOLOGY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Graduate students and faculty present their current research in a seminar format.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSIMM 2290 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in immunology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Immunology (PHD) or Interdis Biomedical (UNK)
MSIMM 3200 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Immunology (PHD)

MSIMM 3220 - CONTEMPORARY TOPICS - IMMUNOLOGY

Minimum Credits: 1
Maximum Credits: 1
This is an advanced level course in which students will read, present and evaluate the primary literature in immunology. Each semester will feature an integrated set of papers addressing a current issue of interest to modern immunologists. The course may be taken more than once by each student, since the topic addressed will change each semester.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSIMM 3230 - IMMUNOLOGY AND HUMAN DISEASE

Minimum Credits: 2
Maximum Credits: 2
This course surveys basic immunological principles as they impact our understanding of the causes or treatments of human disease. The course consists of a series of lecture blocks. Background reading is required and the course relies heavily on the reading of original articles. Classes are regularly devoted to paper discussions, and each student will be responsible for introducing one paper.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSIMM 3260 - IMMUNITY AND THE NEUROENDOCRINE AXIS

Minimum Credits: 2
Maximum Credits: 2
This course will consider the interaction among the immune, nervous and endocrine systems. It will prepare the students for a critical understanding of how endocrine organs and the hormones they produce affect immune cell function, how the nervous system and nEuropeptides/neurohormones and neurotransmitters modify immunity and how the immune system (cells and their secreted molecules) affect the endocrine and the nervous system. The course will also permit the students to critically appraise and understand how drug therapy aimed at immunostimulation or immunosuppression may be affected by, and affect the neuroendocrine axis and how pharmacologic manipulation of the neuroendocrine axis can affect the immune system and the outcome of immunotherapies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: MSIMM 3230

MSIMM 3270 - INNATE IMMUNITY

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens. Courses like molecular virology and
comprehensive immunology are highly recommended but not a prerequisite for the course.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSIMM 3280 - IMMUNOLOGY OF INFECTIOUS DISEASE**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course examines the immune responses to pathogens, as well as on immune evasion of microbes. The organisms studied include bacteria, parasites, and viruses. Topics focus on host-pathogen interaction and include innate immunity, modulation of antigen processing and presentation, pathogenic strategies for subversion of immune responses, effector functions of immune cells, and immunopathology.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: MSIMM 2210

**MSIMM 3290 - AUTOIMMUNITY & IMMUNOPATHOLOGY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: MSIMM 2210 and 2230

**MSIMM 3440 - VACCINES AND IMMUNITY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Vaccines are widely regarded as one of the major contributors to increased life expectancy. The purpose of this course is to (1) explore the history of vaccines; (2) underscore the successful role of current vaccines in the management of infectious diseases; (3) present strategies for a new generation of safe and effective molecular vaccines; and (4) discuss the ethical and economic realities of vaccine use and development.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**Industrial Engineering**

**IE 2000 - FUNDAMNTLS OF INDUSTRIAL ENGR**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course will provide an overview of basic industrial engineering principals, primarily for those students who have not had prior exposure to industrial engineering. Topics will include, but are not limited to, flow charts, work methods, and work measurement including work sampling and most.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 2001 - OPERATIONS RESEARCH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

1858
The operations research method; linear programming; network flows; CPM/pert; integer programming formulations. A group project is required.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering (IE-MIE or IE-PHD)

### IE 2003 - ENGINEERING MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Concepts and processes of qualitative engineering management applied to the management of technical and scientific organizations. Topics include: (1) general systems theory; (2) management and the systems concept; (3) strategic planning and management systems; (4) systems analysis; (5) project management systems; (6) organizational design; (7) evaluation and control of systems; and (8) managing technical professionals.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering (IE-MIE or IE-PHD)

### IE 2004 - DATA BASE DESIGN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces the fundamental aspects of database design and management within the context of a relational data base management system (DBMS). Covered topics include: relational model, database design life-cycle, database design optimization, client/server architecture, data modeling, SQL, database security, database management, data warehousing, internet database environment. Students will gain hands-on experience in analysis, design, implementation, and management of relational data base systems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Probability, random variables, common discrete and continuous probability distributions, expected values, central limit theorem, distributions derived from the normal distribution (x2, t and f), estimation of parameters and fitting of probability distributions, testing hypothesis and assessing goodness of fit, comparing two samples.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering (IE-MIE or IE-PHD)

### IE 2006 - INTRO TO MANUFACTURING SYSTEMS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to provide students that have a background in advanced manufacturing technologies with an opportunity to learn about fundamentals of micro and Nano machining processes. The course represents a good balance between theoretical problems and practical considerations related to the advanced manufacturing processes.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering (IE-MIE or IE-PHD)

### IE 2007 - STATISTICS AND DATA ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Analysis of variance, experiments with one factor, experiments with two or more factors, regression analysis, multiple linear regression, response surface methods, analysis of categorical data, nonparametric statistics.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Industrial Engineering; PREQ: IE 2005

### IE 2011 - FUNDAMENTAL OF MICRO AND NANOMANUFACTURING

Minimum Credits: 3
Maximum Credits: 3

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Industrial Engineering; PREQ: IE 2005

### IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS

Minimum Credits: 3
Maximum Credits: 3

Description: this course covers contemporary research topics on the design and manufacture of nanostructured materials. In addition to design and manufacturing, this course would also emphasize the nanometer-scale phenomena that make nanostructured materials particularly attractive for structural applications. Topics such as dislocation theory, large strain plasticity phenomena, super plasticity and kinetics of coarsening will be discussed in the context of structural nanomaterials.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Industrial Engineering; PREQ: IE 2005

### IE 2013 - MOLECULAR MANUFACTURING

Minimum Credits: 3
Maximum Credits: 3

You often hear in the news about the potential societal impact of nanotechnology, which is simply described as the science and technology of manipulating matter in the 10-100 nm length-scale. However, with the continued miniaturization of material building blocks approaching the atomic scale, a paradigm shift is needed in the way of thinking about how to synthesize and assemble atomically precise units that integrate various different components, which eventually build a functioning device or material. This bottom-up approach to fabrication with atomic level precision is the focus of this course. The course will include molecular fabrication methods such as DNA origami, protein assembly, chemical synthesis of carbon materials, block copolymer self-assembly, and scanning probe methods that are capable of atomic level manipulation.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Industrial Engineering; PREQ: IE 2005

### IE 2014 - MANUFACTURING PROCESS ENGINEERING

Minimum Credits: 3
Maximum Credits: 3

The objective of this course is to instill a fundamental understanding of manufacturing processes by focusing on the processes, metallurgy and mechanics of deformation in metal forming. To this end, analysis techniques will be developed from solid mechanical principles (stress-strain relationship, deformation and failure) which would then be applied bulk deformation and material removal processes. The course assumes no prerequisites except basic concepts of stress, strain and strength of materials.

**Academic Career:** Graduate
**Course Component:** Lecture
IE 2023 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
This is an undergrad/grad level course in medical product development covering fundamentals, regulatory processes, intellectual property management, and commercialization strategies. This course will provide basic knowledge on the development of medical devices including designing, manufacturing and testing medical devices. This course will also provide an overview of the medical product commercialization (i.e., bench to bedside). This course will develop the student’s ability to select and properly use the biomaterials and manufacturing processes for developing medical devices, instruments, biomedical sensors and artificial organs. Students will also learn how to commercialize the medical products to the market through intellectual property management and regulatory processes.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IE 2025 - FACILITY LAYOUT AND MATERIAL HANDLING

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to facility layout and location. Topics including activity relationships, space and personnel requirements, computer algorithms for constructing layouts, and both single and multiple facility location methodologies; material handling methods and equipment including conveyors, lift trucks, carousels, automated guided vehicles, and automated storage and retrieval systems are also discussed.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IE 2039 - ENTREPRENEURSHIP FOR ENGINEERS

Minimum Credits: 3  
Maximum Credits: 3  
This course considers the development of a new technology company from ideation and opportunity evaluation to capital generation and launch. It includes an understanding of accounting principles, budgeting, capital markets, venture capital, operating in the development stage, executive and employee requirements, product development, and growing the company.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IE 2042 - ENGINEERING DERIVATIVES MARKET

Minimum Credits: 3  
Maximum Credits: 3  
The basic building blocks for engineering futures contracts, call and put options, and swaps are studied within the context of real-world environments. By the end of this course learners will have a good understanding of how these tools are built for the purposes of hedging risks and formulating portfolio strategies, all within the goal of managing financial risk.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IE 2044 - INVESTMENT SCIENCE
This course is an introduction to basic concepts of modern quantitative finance and investment. Group projects involving financial market data. Topics: basic interest rate; evaluating investments: scenario-based analysis and Monte Carlo simulation; fixed-income markets: bonds, yield, duration, and portfolio immunization; measuring risk: volatility and value at risk; the concept of investment diversification in the presence of uncertainty; designing optimal security portfolios; the capital asset pricing model, practical implementation of the concepts, including comparison of loan (e.g., house and auto) terms, credit card financial terms; derivative market and option pricing. No prior knowledge of finance required.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IE 2061 - ERGONOMICS & OCCUPNTNL BIOMECHNC

Fundamentals of ergonomics as applied to the industrial workplace. Specific topics include: occupational bio mechanics, anthropometry, work physiology, cumulative trauma disorders and slip and fall prevention applied to the organization and physical design of the workstation, effects of hand tool design on workers, and analysis of manual material handling jobs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2062 - DATA MINING

This is an introductory data analytics class that requires probability as a prerequisite. The objective is to prepare students to effectively collect and analyze data and to teach data-driven thinking, problem-solving and decision-making. In this class, we will cover various statistics and data mining methodologies and use them to analyze real-world problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2005; PROG: Swanson School of Engineering

IE 2064 - DATA SCIENCE

Data Science involves working with complicated and messy data to build prediction models for use in making decisions. This course covers data processing and exploratory data analysis; regression, classification, and clustering models; and model evaluation methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2005

IE 2065 - STATISTICAL ANALYSIS AND OPTIMIZATION

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2007 or 2064 or 1072 or STAT 1152

IE 2072 - PROBABILITY
Minimum Credits: 3
Maximum Credits: 3
Interpretations of probability, counting methods, conditional probability, Bayes theorem, random variables and distributions, functions of random variables, expectations, special discrete and continuous univariate distributions, law of large numbers and central limit theorems, multivariate distributions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2076 - TOTAL QUALITY MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Introduces the total quality management philosophies and practices of Deming, Juran, and others. We will focus on the use of statistical process control, understanding variability and process capability, acceptance sampling, as well as managing supplier relationships. Research papers and student teaching projects allow students to explore additional topics such as Kaizen, Taguchi methods, FMEA, etc.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2005

IE 2079 - LOGISTICS & SUPPLY CHAIN ENGRNG

Minimum Credits: 3
Maximum Credits: 3
Modern supply chains are based on networks with a number of actors from manufacturer to distributor to retailer. This course covers the use of modeling for coordinating production, inventory, distribution, and transportation across a supply chain network.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2081 - NONLINEAR OPTIMIZATION

Minimum Credits: 3
Maximum Credits: 3
Necessary and sufficient conditions for an optimal solution to the non-linear programming problem; convex sets and functions; numerical solution of non-linear equations; search methods; unconstrained optimization including gradient, metric and penalty methods; algorithms for constrained optimization; quadratic and geometric programming.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2082 - LINEAR OPTIMIZATION

Minimum Credits: 3
Maximum Credits: 3
Review of linear algebra, matrices and the simplex methods; revised simplex method; generalized bounds; product form of inverse; pricing and pivot selection; duality and sensitivity analysis; separable programming; linear complementarity; Dantzig-Wolfe decomposition; column generation; generalized LP; semi-infinite LP, stochastic LP; interior point methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
IE 2084 - STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Reviews probability theory; conditional probability and expectations; discrete-time and continuous time Markov chains; Poisson process and exponential distributions; renewal theory and its applications; queuing theory; stochastic systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2072

IE 2086 - DECISION MODELS

Minimum Credits: 3
Maximum Credits: 3
Decision making under uncertainty is the key to understanding a variety of problems from industry, including inventory control, revenue management, energy, healthcare, and logistics. This course covers the fundamentals of stochastic (sequential) decision models, including data-driven and risk-averse methods, with applications to real-world problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: IE 2005; PROG: Swanson School of Engineering

IE 2088 - DIGITAL SYSTEMS SIMULATION

Minimum Credits: 3
Maximum Credits: 3
Nature of simulation; discrete event simulators; modeling complex systems; input data reduction; random number generation; output data analysis; validation of simulation models; experimental design; variance reduction techniques; comparing alternative systems; overview of simulation languages.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2005 or IE 1071 or ENGR 0020; PROGRAM: SSOE

IE 2089 - ADDITIVE MANUFACTURING

Minimum Credits: 3
Maximum Credits: 3
In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2006

IE 2090 - M. S. PROJECT

Minimum Credits: 3
Maximum Credits: 3
This is the capstone project course for M.S. Students. Students working in teams of 3 or 4 will solve a real world problem in conjunction with a company liaison and a faculty advisor.

Academic Career: Graduate
Course Component: Lecture
IE 2100 - SUPPLY CHAIN ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
An overview of supply chain management with an emphasis on operations and strong quantitative orientation. Supply chain strategies; sourcing decisions; demand forecasting; aggregate planning; managing supply and demand; production and inventory control systems including MRP and JIT; dealing with uncertainty; distribution networks; coordination and integration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2102 - LEAN SIX SIGMA I (GREEN BELT)

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to lean and six sigma principles with an emphasis on the application of statistics to quality control. Topics include value stream mapping, various lean tools, DMAIC methodology, data collection and measurement, and applications of ANOVA and DOE. A project is required and the student should be prepared for green belt certification at the end of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2001 & 2005

IE 2103 - LEAN SIX SIGMA II (BLACK BELT)

Minimum Credits: 3
Maximum Credits: 3
This is a follow up course in lean and six sigma covering topics such as influence principles and techniques, systems analysis, design for six sigma, lean enterprise analysis and response surface methods. Several projects are required and the student should be prepared for black belt certification at the end of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2102; PROG: Swanson School of Engineering

IE 2105 - GEOGRAPHIC INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Explore the concepts and history of geographic information systems and learn to effectively use the most utilitarian GIS software, ArcGIS.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE

Minimum Credits: 3
Maximum Credits: 3
This course leads students to apply basic industrial engineering tools to healthcare operations, with a focus on healthcare providers. This includes data gathering, process mapping, system analysis and modeling, work sampling, work study and workflow improvement. This course will provide an overview of the differences between healthcare and other more traditional industrial engineering settings (e.g., manufacturing, retail), and the
opportunity to apply industrial engineering techniques, while developing and understanding basic healthcare operations and systems in the United States. (This class is designed to be a complement to IE 1108/2108.)

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering

### IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course leads students to apply basic industrial engineering tools to healthcare, with a focus on the financial aspect of healthcare (payers and reimbursement, revenue cycle, and other financial analytics). This course familiarizes students with healthcare financial data, demographic and population health information, quality ratings, and other key data and measures. Students will access data from commercial payers, government healthcare programs and/or hospitals, and utilize data analysis and industrial engineering tools to better understand the financial aspect of healthcare systems in the United States. (This class is designed to be a complement to IE 1106/2106.)

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering

### IE 2110 - HEALTH SYSTEMS ENGINEERING SEMINAR

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
The seminar supplements the education provided by health policy and management and industrial engineering departments by creating a forum for exposure and discussion of healthcare systems engineering issues. Students become aware and are exposed to the role of vendors/consultants that bring solutions for healthcare delivery processes. The standards for professional leadership required for health management are reinforced.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2122 - FUNDAMENTALS OF SYSTEMS ENGINEERING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will focus on the fundamentals of systems engineering, including technical processes (e.g., requirements definition, architecture design, system verification), technical management processes (e.g., project planning, risk management), agreement processes (acquisition and supply) and project-enabling processes (e.g., life-cycle model management, quality management). Key systems engineering techniques and methods (e.g., system modeling and simulation, function-based systems engineering) will also be discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering (MIE or PHD)

### IE 2123 - PROJECT MANAGEMENT FOR ENGINEERS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The focus of the course will be to understand professional project management in achieving strategic organizational objectives and mitigating risks. The process for obtaining professional project management (PMP) certification will be the foundation. The six domains of project management that will be addressed include: initiating the project planning the project, executing the project, monitoring and controlling the project, project transition and closure, professional and social responsibility.

**Academic Career:** Graduate  
**Course Component:** Lecture
IE 2125 - PROJECT MANAGEMENT AND STRATEGY: DESIGN AND IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2003; PROG: Swanson School of Engineering

IE 2144 - DISCRETE OPTIMIZATION: MODELING AND COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2155 - DISCRETE OPTIMIZATION AND APPLICATIONS IN INFRASTRUCTURE SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2001; PLAN: Industrial Engineering

IE 2184 - STOCHASTIC MODELING AND DATA ANALYTICS IN HEALTHCARE OPERATIONS MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (IE 1070 and IE 1071 or IE 2005) and (IE 1081 or IE 2001)

IE 2186 - REINFORCEMENT LEARNING
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course on reinforcement learning (RL), a set of techniques used for learning sequential decision making policies from data. The basics of Markov decision processes necessary for RL will be covered, but a firm grasp of undergraduate level probability and basic programming ability (in Python and MATLAB) will be assumed. A wide range of methods (e.g., TD learning, Q-learning, policy gradients) that perform evaluation and control will be covered. The focus in this course will be on applications, implementation, intuition and some theory.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2005 or IE 1070 or Equivalent and IE 1082 PLAN: Industrial Engineering

IE 2188 - SIMULATION MODELING AND APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Introductory graduate course to the concepts, technology and applications of discrete-event and hybrid simulation. Covers the foundational concepts of simulation and the application of those concepts using commercial software. Topics include simulation, modeling, validation, input/output analysis, animation, and project success skills. Students will learn to use the Simio commercial simulation product as well as how to conduct/manage simulation projects. Practical experience will be gained in a simulation project.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2001 and 2005; PROG: Swanson School of Engineering

IE 2201 - BIOMATERIALS AND BIOMANUFACTURING

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students having a background in biomaterials and biomanufacturing with an opportunity to learn about the many modern aspect of biomaterials from basic science to clinical applications, across the formulations and chemistry of polymers, ceramics, metals and their use in various biomedical devices and implants, as well as their clinical performance and host responses. Students will also gain knowledge and experiences with designing and manufacturing biomedical devices through team projects. This one-semester, graduate course is intended for students majoring in the industrial engineering, or those who contemplating such a major (or minor). Students enrolled in the class should have an understanding of various biomaterials, and the ability to understand biological phenomena and manufacturing processes.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2006

IE 2301 - INTRODUCTION TO SAFETY ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduction to safety engineering” provides a basis to assist students in understanding and applying the scientific and engineering principles associated with the field of safety engineering. Specifically, the course will provide a background in, information on and application exercises in the natural, chemical and physical laws and forces associated with safe design and implementation of work-related tasks and industrial and construction projects. These involve soils and excavation, trenching and shoring, permanent and temporary work platforms and scaffolding, cranes, rigging, ropes, slings and chains, fall protection, pressure vessels, confined space entry, energy isolation and preparation of equipment, hot work, welding, personal protective equipment and non-destructive testing. The course will also address safety related issues associated with building and facility design and layout, job, task and work setting layout. The course will stress the importance of safety engineering as part of both the corrective process and the design process.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
IE 2302 - ENGINEERING FOR PROCESS SAFETY

Minimum Credits: 3
Maximum Credits: 3
Engineering for process safety provides for a basic understanding of the quantitative and qualitative analysis methods of process safety engineering and process safety management. The course also provides guidance in planning, implementing and managing an overall process safety management program. It includes coverage of such applicable science and engineering principles as risk, human reliability, fault logic, failure modes, incident cost and prediction. The course is presented in an applied format where several different types of industries are discussed such as oil and chemical, pharmaceuticals, defense, nuclear, aerospace, paper, information technology and manufacturing industries. Regulatory influence on process safety is discussed. Quantitative aspects of the course include application of risk analysis, fault tree analysis, hazard and operability analysis, vapor-cloud dispersion modeling, human reliability analysis, failure modes and effects analysis, etc. This course is also intended to provide a background in managing an overall system safety program and its application to several industries, therefore, cost and effectiveness measurement are covered in the material.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2303 - WORK DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students the opportunity to learn and use standard industrial tools commonly used in analyzing, troubleshooting, and designing work spaces and work processes. It includes the concepts of cost effectiveness, functional effectiveness, human interface design and characterization, analysis and improvement of productivity. These tools and design methodologies include human information processing, basic auditory and visual displays, cost models, facility layout and network transportation and delivery systems, cognitive engineering, anthropometry and musculoskeletal principles, cumulative trauma disorders, work measurement and time and motion analysis. Students taking this course should be familiar with basic engineering economics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering; PLAN: Industrial Engineering (IE-MIE, IE-PHD)

IE 2725 - DESIGN FOR INJURY PREVENTION

Minimum Credits: 3
Maximum Credits: 3
This course provides instruction for how to design a workplace to prevent occupational injuries. The course will primarily focus on preventing the three types of injuries, the injury mechanism, risk factors, tools for quantifying risk and engineering solutions will be covered. Upon completion of a course, students will be expected to develop custom engineering design solutions to prevent occupational injuries. Students will complete a project where they will design a solution to eliminate or reduce an existing hazard.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis
IE 2997 - RESEARCH, M. S.
Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

IE 2998 - GRADUATE PROJECTS/PRACTICUM
Minimum Credits: 1
Maximum Credits: 12
This course is granted as part of the curriculum for work that is done on well-defined projects on campus or in the form of an internship in a company, the end result will be a final technical report and a presentation.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IE 2999 - M. S. THESIS
Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IE 3051 - COMPUTATIONAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course addresses issues arising in the implementation of optimization algorithms. Computational strategies and techniques will be explored. A major emphasis will be placed on implementing various algorithms for large-scale linear, nonlinear, and integer programs. Such algorithms include benders' decomposition, Dantzig-Wolfe decomposition, Lagrangian relaxation and algorithms for specially-structured problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3053 - GLOBAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course to the theory and applications of global optimization. The topics covered in this course include properties of convex/non-convex sets and functions, convex envelopes, duality, local and global optimality conditions, algorithms and their convergence and finiteness, computational complexity of global optimization, cutting planes, outer approximation, convexification, decomposition, branch and bound, DC Programming, Lipschitzian programming.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3055 - ROBUST OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
Today the modeling of uncertain phenomena in both theory and practice is done via probability theory, the foundation of which is based on the axioms set forth by Kolmogorov in 1933. While it offers insights into understanding uncertainty, probability theory (in contrast to optimization) has not been developed with computational tractability as an objective when the dimension increases. Correspondingly, some of its major areas of application remain unsolved when the underlying systems become multidimensional. The goals of this course will be to propose an alternative via robust optimization (RO) for modeling uncertain phenomena, to develop RO as a tractable methodology for solving optimization problems under uncertainty, and to expose students to a large number of applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IE 3056 - OPTIMIZATION UNDER UNCERTAINTY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course, students will learn popular formulations and algorithms for stochastic programming, robust optimization, chance constrained optimization, stochastic dual dynamic programming, and VaR and CVaR based models, as well as some interesting applications. Students should have knowledge of Matlab, Python, C, or C++ programming languages, a doctoral level linear programming background, good mathematical reasoning ability, and a good understanding of integer programming and computational optimization.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IE 3057 - BILEVEL OPTIMIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a course on the theory, algorithms and applications of bilevel optimization. Bilevel optimization models are motivated by various real-life settings (e.g., in transportation, energy, defense, network design) that involve independent decision-makers, referred to as the leader and the follower, who interact in a hierarchical manner. Specifically, the leader (the upper-level decision maker), whose perspective is modeled, needs to take into account the decisions of the other (lower-level) decision-maker, i.e., the follower, who solves his/her own optimization problem that, in turn, also depends on the decisions of the leader. In this class we will overview basic modeling concepts of bilevel programming, computational complexity issues, solution algorithms and several notable applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IE 3072 - NANOMECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Mechanics at the nanometer-scale often greatly diverges from that observed in the macro-scale. This course will elucidate how under different physicochemical condition, different coupled nanoscale phenomenon are dominant. For example, length-scale dependence can be introduced in both elastic and plastic deformation. Topics covered in this course will include size-effects in nanoindentation, their associated strain-gradient dependent phenomena, surface and interface stress dependent phenomena in nanowires and bulk nanomaterials, switch-overs in deformation-modes with shrinking length-scales, implications of interfacial diffusion phenomena in microstructure evolution, thermomechanical response of nanomaterials, diffusion-driven solid-state dewetting, force-controlled mechanochemistry, and elastocapillary of nanofilaments.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering Graduate

### IE 3078 - CONVEX OPTIMIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course develops a modern framework for convex optimization. The topics covered in this course include concepts of convex analysis, smooth
convex optimization, non-smooth convex optimization, structural optimization, duality theory.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 3080 - ADV TOPICS IN OPERATIONS RES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
May cover various topics at the leading edge of technology in the area of operations research. Course content is announced by the professor.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 3085 - QUEUING THEORY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 3087 - NETWORK-BASED OPTIMIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers graphs, digraphs and related concepts, node and edge covering problems, Euler tours, Hamiltonian cycles, tsp, set covering and matching problems, shortest path problems, maximum flow problems and minimum cost network flow problems.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 3088 - INTEGER PROGRAMMING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Polyhedral theory, computational complexity, super additive duality, and integral polyhedral.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 3089 - REPAIRABLE SYSTEMS MODELING AND ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A repairable system is a system that can be restored to a satisfactory condition through some intervention by a decision maker. In a manufacturing setting, such actions might include inspections, part replacements or setting adjustments; in a medical context, such actions might include disease screening, surgery or drug therapy. In this course, we consider applications of probability, simulation and optimization in the: (a) mathematical modeling of the performance of repairable systems, and (b) designing of optimal inspection and maintenance policies for repairable systems. In each
IE 3093 - STOCHASTIC PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
This course considers stochastic programming, a technique for making optimal decisions under uncertainty. Will consider theory, algorithms and applications. Extensions to multi-stage problems and stochastic integer programs will be discussed.

IE 3094 - MARKOV DECISION PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Introduces the fundamentals of discrete sequential models when outcomes are uncertain. Covers formulation and analysis of stochastic dynamic programs under several objective criteria; developing and enhancing solution algorithms; applications in the areas of inventory control, vehicle routing, and resource allocation; development of approximate solution techniques.

IE 3095 - GRADUATE SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Speakers from universities and industry discuss research topics and state-of-the-art material in the areas of operations research, engineering management, and manufacturing systems. Enrollment in this course is mandatory for all full-time Ph.D. students.

IE 3097 - ALGORITHMS FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
This course will develop students' ability to understand algorithms and use them appropriately for real-world and theoretical problems. Our discussion will be geared towards topics and example arising in IE applications, in particular, in the context of optimization problems. Topics covered will include introduction to complexity theory, running times and performances measures, common ideas in algorithmic design including randomized algorithms, approximation algorithms, and heuristics.

IE 3099 - THEORY OF STOCHASTIC STIMULATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the theoretical foundations of simulation methodology and its recent advances with an emphasis on stochastic processes. Topics include: generating random objects, output analysis (autoregressive, regenerative, spectral, and stationary times series methods), variance reduction techniques (antithetic variable, common random numbers, control variables), Markov chain Monte Carlo (MCMC), rare-event simulation techniques, stochastic optimization (likelihood ratio method, perturbation analysis, stochastic approximation), sampling of stochastic differential equation, exact simulation and prefetch sampling. Some of the motivating applications that will be discussed are drawn from the domain of finance and risk management, insurance modeling, and queuing networks.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2084

IE 3186 - APPROXIMATE DYNAMIC PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the theory and application of large-scale dynamic programming with emphasis on a broad spectrum of applications in finance, revenue management, and health policy. The first part of the course emphasis more on approximate dynamic programming algorithms. The second part of the course is devoted to the recent advances in reinforcement learning. Topics include Markov decision processes, dynamic programming algorithms, simulation-based algorithms, q-learning, theory and algorithms for value function approximation and policy search methods, stochastic approximation, r-max algorithm, online learning and regret minimization, and posterior sampling method.

Academic Career: Graduate

Infct Disease & Microbiology

IDM 2001 - MOLECULAR BIOLOGY OF MICROBIAL PATHOGENS
Minimum Credits: 3
Maximum Credits: 3
Students will develop a comprehension of (1) bacterial anatomy, metabolism, regulation of gene expression, genetics, and the action of anti-microbial agents at the molecular level; and (2) the relevance of this knowledge to understanding microbial pathogenesis and the host response. In addition, prokaryotic and eukaryotic model system of gene regulation will be compared to emphasize the conceptual aspects and application of molecular biology to infectious disease.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IDM 2002 - MOLECULAR VIROLOGY

Minimum Credits: 3
Maximum Credits: 3
The intent of this course is to provide a comprehensive coverage of the animal virus families and a few selected examples of bacterial viruses. The emphasis of the course will be to provide an in depth coverage of the viral life cycle, including the fundamental mechanisms of viral replication and gene regulation. Representative members of each virus family will be selected for the lecture material.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: IDM 2001 or INTBP 2000

IDM 2003 - HOST RESPONSE TO MICROBIAL INFECTION

Minimum Credits: 2
Maximum Credits: 2
Students will develop a comprehension of the concepts and knowledge of resistance and immune responses of humans to microbial infection. The role of phagocytic cells; complement; lymphocytes; the development of humoral and cell mediated immunity at the molecular, cellular, and organ level; and the consequences in controlling and enhancing disease are covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2004 - VIRAL PATHOGENESIS

Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to integrate the lectures given on a particular virus in the comprehensive virology course with two additional lectures which expand the basic biology of the virus life cycle to the level of virus-host interactions. The first lecture will address the pathogenic properties of the virus from the perspective of disease manifestations, immunology, and the natural history of infection. This will be followed by a second lecture which will address the molecular basis of viral pathogenesis and current advances in antiviral research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: LEVEL: Second Year Graduate Students and above

IDM 2007 - PUBLIC HEALTH COMMUNICABLE DISEASE PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The practicum, through structured and educationally super vised assignments at an approved site with an experienced professional, is aimed at providing a means to identify and to apply a variety of theories and skills discussed and demonstrated in the classroom to the real life experiences to which the student is assigned in the field under professional supervision. The assignments and choice of site are determined by the director of the program and the program requirements and career goals of the student.
Academic Career: Graduate
Course Component: Practicum
IDM 2010 - PATHOGEN BIOLOGY

Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to teach the basic biology and pathogenesis of many of the most important infectious diseases that are public health challenges in the 21st century. It is intended for students with a background in biological sciences, and will review those features that make these pathogens so successful as agents of disease. Topics covered will include: the interaction between the pathogen and the host genome, the strategies used by each pathogen to evade the host response, and the ways in which the pathogen defends itself against treatments and vaccines. The course will be taught using a combination of didactic lectures and paper discussions based on the current primary research literature.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PUBHLT 2015; PLAN: Infect Disease & Microbiology (MS or PHD); SUBPLAN: Infect Dis Path Erad Lab Pract or Inf Dis Mgmt Interv Comm Pract or Peace Corps (IDM)

IDM 2014 - FUNCTIONAL GENOMICS OF MICROBIAL PATHOGENS

Minimum Credits: 3
Maximum Credits: 3
Functional genomics involves the systematic study of genes and their function. This course will introduce many of these innovative technologies for the systematic analysis of gene function including gene discovery, transcriptome analysis, random and targeted gene disruption strategies, proteomics, metabolomics, and integrative systems approaches with a particular emphasis on their application to infectious disease pathogens and their interaction with their host cells. We will also examine the genomes of well-studied pathogens and explore how these technologies have been used to study their biology and pathogenesis and the application of these techniques for drug and vaccine targeting and development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IDM 2001

IDM 2019 - THE EMERGENCE AND GLOBAL SPREAD OF COVID-19

Minimum Credits: 2
Maximum Credits: 2
In this course of IDM 2019, students will learn about the emergence of the SARS-CoV-2 virus in November 2019, and its global spread to the present date. This course will be taught with an infectious disease prevention and control focus, but will cross-cut each major discipline within public health, including modules related to epidemiology; statistical modeling of the COVID-19 pandemic; health policy; behavioral and community health; genetics; and occupational health.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY

Minimum Credits: 1
Maximum Credits: 15
Properly qualified students may undertake special study, experience in a clinical laboratory, or research with the approval and under the guidance of a member of the faculty. Part or all of such study may be used as the basis for the essay or dissertation requirement for the master's and doctoral degrees.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IDM 2022 - SPECIAL TOPICS
Minimam Credits: 1
Maximum Credits: 3
Properly qualified students may undertake special study under guidance of a faculty member to acquire knowledge and skill to use independently a specific laboratory research tool, e.g., Gene cloning, DNA sequencing, cell sorting, oligonucleotide synthesizer, polymerase chain reaction, statistical analysis with pc.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IDM 2023 - MICROBIOLOGY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
A series of laboratory exercises introduces the student to microbiological procedures, especially as they apply to virology and bacteriology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2025 - MICROBIOLOGY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
In this course students are going to present scientific journal articles dealing with virology, immunology, molecular biology, and epidemiology and drug therapy of viral diseases. In addition, students will present similar aspects of bacterial diseases. In some sessions students may be shown video presentation of diagnosis and clinical management of a particular viral or bacterial disease.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

IDM 2032 - HUMAN DIVERSITY AND PUBLIC HEALTH

Minimum Credits: 2
Maximum Credits: 2
This course will provide a theoretical framework for designing policy, research, and programs for diverse populations. Opportunities for expanding understanding and examining attitudes about human diversity will be presented. Community organizing and marketing methods related to program design and recruiting and sustaining volunteer or patient participation in programs will be a major focus of the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2034 - CONTROL AND PREVENTION OF HIV/AIDS

Minimum Credits: 2
Maximum Credits: 2
This graduate level course on HIV disease prevention and control is aimed at providing an in-depth study of the HIV disease. The course goal is to provide advanced knowledge base of information on the complex clinical, preventive, treatment, and policy issues on HIV/aids.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate Sch of Public Health (PPBHL) or School of Medicine (MEDSC)
Course Attributes: Global Studies

IDM 2038 - PREVENTION, TREATMENT, AND CONTROL OF GLOBAL INFECTIOUS DISEASES

Minimum Credits: 3
Maximum Credits: 3
This course is aimed to prepare the student to demonstrate knowledge of the prevention, treatment, and control of infectious diseases throughout the world. Students will develop knowledge in the pathogenesis, treatment, individual, and environment intervention in prevention and spread of infectious diseases.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate Sch of Public Health (PPBHL) or School of Medicine (MEDSC)

**IDM 2041 - RESEARCH ETHICS AND SCIENTIFIC COMMUNICATION**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will introduce students to ethical considerations associated with public health research. Topics will include research on human and animal subjects, conflicts of interest, data management and transparency in reporting, authorship and peer review, and mentorship. Students will also learn how to improve their communication skills by identifying their target audience, refining their technical writing and graphics preparation skills, and developing their oral presentation skills. Classes will include lectures and small group discussions on assigned readings. Class attendance and participation are required. Satisfactory letter grades will be contingent upon the student's in-class contributions, completion of out-of-class homework assignments and projects, and performance on quizzes based on the course topics.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: IDM [IDM-PHD; IDM-MS--(IDMSEA-TR); IDM-MPH--(IDMBID-TR; IDMCHID-TR; IDMMICA-TR; IDMPELA-TR)]

**IDM 2068 - INFECTION PREVENTION AND CONTROL PRACTICUM/INTERNSHIP**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course in infection control practice is a clinical and institutional experience within a hospital or other clinical settings aimed at providing the student practice experience and skills to potentially function as an infection preventionist within a health care setting. Students in this course must take Infection Prevention Course (IDM 2069) as a prerequisite for this practicum/internship. Students may complete a minimum 200 hours within a clinical setting within an infection control department which also meets the requirements for the MPH program in the Graduate School of Public Health. This internship aims at assisting students to become proficient in addressing hospital-acquired infections, patient isolation practices, infection surveillance, documentation, reporting, medical record review and collaboration with the infection control practitioners through on-site, experiential learning. Acceptance into the practicum will be competitive and include an application process with the course directors and selected infection prevention specialists. Students who complete the 2 credit course, IDM 2069, Infection Prevention and Control in Healthcare Settings will be considered for this internship and accepted by permission only.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad Letter Grade

**IDM 2069 - INFECTION PREVENTION AND CONTROL IN HEALTH CARE SETTINGS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course in infection control is aimed at building knowledge and skills as well as critical thinking through evidenced-based and case-based learning to provide students with a foundation in infection prevention and control in a healthcare settings. As the end of this course, successful students will have current knowledge of hospital acquired infections, patient isolation practices, infection surveillance, documentation, monitoring, reporting, and outbreak investigations. The course will be taught by expert practitioners, researchers, and clinicians in infection prevention. Students may enroll in this course only or they may combine it with an optional practicum/internship of a minimum of 200 hours within a clinical setting if accepted into IDM 2068 (Infection Prevention and Control Practicum/Internship)

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IDM 2161 - METHODS OF INFECTIOUS DISEASE EPIDEMIOLOGY**
Minimum Credits: 1
Maximum Credits: 1
Covers important topics in infectious diseases epidemiology, including public health surveillance, emerging infectious diseases, the role of infectious diseases in the etiology of chronic diseases, and epidemiologic study designs and laboratory methods used in infectious diseases research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

IDM 2420 - EXPERIMENTAL VIROLOGY

Minimum Credits: 2
Maximum Credits: 2
This course is designed for graduate students training in molecular virology research and is designed to provide a more in-depth study of molecular virology through a critical analysis by the student of seminal research publications in various virus systems. Paper discussion format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: IDM 2002

IDM 3010 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IDM 3440 - VACCINES AND IMMUNITY

Minimum Credits: 2
Maximum Credits: 2
Vaccines are widely regarded as one of the major contributors to increased life expectancy. The purpose of this course is to (1) explore the history of vaccines; (2) underscore the successful role of current vaccines in the management of infectious diseases; (3) present strategies for a new generation of safe and effective molecular vaccines; and (4) discuss the ethical and economic realities of vaccine use and development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: IDM 2003; PROG: School of Public Health

IDM 3441 - EPIDEMIOLOGY AND CONTROL OF SEXUALLY TRANSMITTED INFECTIONS

Minimum Credits: 1
Maximum Credits: 1
The purpose of IDM 3441 is to provide students with an understanding of the major sexually transmitted infections (STIs) in the U.S. This course will focus on the underlying transmission dynamics, history, risk factors, public health impact and current strategies for control. The method of teaching will be to provide STI-specific lectures and promote critical discussion about the strategy and control limitations thereof. Approximately 50% of class time will be lecture and the remaining 50% will be devoted to a critical review of the assigned papers (2) for each class period.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Information Science

HIM 1405 - MEDICAL TERMINOLOGY LAB
Minimum Credits: 1  
Maximum Credits: 1  
This course is a basic study of the professional language of medicine. It is designed to include word construction, pronunciation, spelling, definition, and use of terms related to all areas of medical science, hospital service, and health related professions. This ONLINE course is designed to give the student a knowledge of words frequently used in the medical field and provides examples through the review of basic anatomy, physiology, surgical procedures, diagnostic procedures, and symptomatology. Coverage of the pathology of each body system is will take place along with an introduction to pharmacology, and the pharmacological treatment of frequently occurring conditions of each body system.  
Academic Career: UGRD  
Course Component: Mass Media  
Grade Component: Letter Grade  
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)  

**INFSCI 0017 - FUNDAMENTALS OF OBJECT-ORIENTED PROGRAMMING**  
Minimum Credits: 3  
Maximum Credits: 3  
First programming course for is majors, designed for students with little or no programming experience. Basic principles and concepts of object-oriented programming using java. Classes, interfaces, operators, program control, arrays, testing, debugging, inheritance, polymorphism, and event handling. Techniques for simplifying the programming process and improving code quality. Activity-based learning.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: CREQ: INFSCI 0010  

**INFSCI 1430 - USER EXPERIENCE ENGINEERING**  
Minimum Credits: 3  
Maximum Credits: 3  
This course presents the fundamental principles of user experience (UX) engineering across three broad categories of designs and products - digital products, virtual worlds, and physical spaces. This course will cover a broad range of topics, including specifying, designing, and evaluating user experiences, understanding the role of user experience in the design of digital products, virtual environments, and physical spaces, and the roles of psychology, sociology, and psychometrics in user experience design. This is an active learning course where students will be expected to read research papers, participate in class discussions, and work with external stakeholders.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019); Minimum C grade or Transfer  

**INFSCI 1450 - GAME DESIGN**  
Minimum Credits: 3  
Maximum Credits: 3  
Games have become ubiquitous in our modern world. In addition to entertainment, elements of games are present in everything from promotional advertisements to university classrooms. This course focuses on the exploration of game design in its many permutations. Join us as we critique and design all manner of entertainment and serious game. The class itself is designed as a multiplayer game experience to immerse and engage the student in game design on a fundamental level. One of the final goals of this class is for each student to have designed two separate games in their entirety. These games may be useful in the follow-up course, Immersive Media Technologies.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: INFSCI 0410 or INFSCI 1044; Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1060  

**INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES**
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the design and development of immersive media technologies, such as interactive narratives, digital games, augmented/mixed reality and virtual reality experiences. Students will develop skills in user experience design, user interface design, storytelling, and animation, as well as gain technical knowledge required to program, optimize, and deploy media experiences for multiple platforms/devices.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (INFSCI 0410 or INFSCI 1044) and (INFSCI 0510 or INFSCI 0419 or INFSCI 0019) and (INFSCI 0610 or INFSCI 1070); Minimum C grade or Transfer; and Enrollment not permitted if currently or previously completed INFSCI 1061

INFO 2000 - INTRODUCTION TO INFORMATION SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Overview of the history, academic roots, conceptual structure, and methodology of information science. Explores principles and concepts that underlie information processing, including information theory, models of information storage and retrieval, and human cognition. Basic processes of information systems analysis, design and development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)
Course Attributes: Global Studies

INFSCI 2020 - MATHEMATICAL FOUNDATIONS FOR INFORMATION SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Basic concepts of theoretical mathematics needed to understand theoretical work in information science with the exception of probability and statistics; in particular, concepts from set theory, graph theory, combinatorics, logic, abstract algebra, topology, and mathematical analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2040 - RESEARCH DESIGN

Minimum Credits: 3
Maximum Credits: 3
Beginning research design with emphasis on the basic process of inquiry. Identifying and articulating research problems, determining and describing procedures for conducting research, designing data collecting procedures, formulating testable hypotheses, interpreting and drawing conclusions from data analysis, and reporting research findings and implications.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or School of Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2120 - INFORMATION AND CODING THEORY

Minimum Credits: 3
Maximum Credits: 3
Includes measures of information, information sources, joint and conditional uncertainty, noiseless and deterministic channels, reliable messages through unreliable channels, channel capacities, properties of codes, minimal codes, and error-detecting and error-correcting codes. Examines
entropy as a measure of semantic content.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**INFSCI 2125 - NETWORK SCIENCE & ANALYSIS**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: ISCI-MSI, ISCI-AC, BDAL-ACG, SAISYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

**INFSCI 2130 - DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to decision analysis with elements of human cognition under uncertainty, including structuring decision problems and developing creative decision options, quantifying uncertainty and preferences, and combining uncertainty and preferences to arrive at optimal decisions. Foundations needed for applying the methods of decision analysis in decision support systems. Note: can also be used to fulfill distribution requirement in cognitive science area.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**INFSCI 2135 - PROBABILISTIC METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL**

Minimum Credits: 3  
Maximum Credits: 3  
Problems and techniques related to storing and accessing unstructured information with an emphasis on textual information. Overview of several approaches to information access with a primary focus on search-based information access. Covers automated retrieval system design, content analysis, retrieval models, result presentation, and system evaluation. Examines applications of retrieval techniques on the web, in multimedia and multilingual environments, and in text classification and event tracking.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)
INFSCI 2149 - INTRODUCTION TO INFORMATION SECURITY

Minimum Credits: 3  
Maximum Credits: 3  
Introductory information security and privacy course for non-SCI students enrolled in the Graduate Certificate Program in Cybersecurity, Policy and Law. Covers fundamental issues and first principles of security and information assurance, including security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. The course will introduce students to risk management, security assurance, secure design principles, organizational security policy, legal and ethical issues in security, and standards and methodologies for security evaluation and certification.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: Plan = CPL-ACG, CSPL-ACG, CSPL-MN, or PLAW

INFSCI 2150 - INFORMATION SECURITY AND PRIVACY

Minimum Credits: 3  
Maximum Credits: 3  
Fundamental issues and first principles of security and information assurance. Security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Basics of cryptography such as key management and digital signatures, etc. And network security such as PKI, IPsec, intrusion detection and prevention. Risk management, security assurance and secure design principles. Issues such as organizational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: TELCOM 2000 or INFSCI 1070; PROG: School of Information Science or Sch Computing and Information

INFSCI 2160 - DATA MINING

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to data mining techniques, including data preprocessing, data mining primitives, association rules, decision trees, cluster analysis, classification and machine learning, data visualization, and data warehousing. Detailed applications from a wide variety of domains.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: INFSCI 2020 (B or greater) or INFSCI 2725 (B or greater) or INFSCI Exemption-Analytics Component (Test Score 6 or higher);

INFSCI 2170 - CRYPTOGRAPHY

Minimum Credits: 3  
Maximum Credits: 3  
Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (DES, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (RSA, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC), digital signatures, certificates and authentication protocols. Cryptanalytic methods (known, chosen plaintext etc.) For secret and public key schemes (linear and differential cryptanalysis, pollard's rho method, number field sieve, etc.).

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

INFSCI 2204 - INTRODUCTION TO TECHNICAL COMMUNICATIONS FOR INFORMATION SCIENCE
Minimum Credits: 3
Maximum Credits: 3
An English language support course for international students in SIS who are non-native speakers of English. Introduces students' to strategies and skills for comprehension and production in academic English contexts. Also addresses issues of academic integrity and plagiarism.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

INFSCI 2205 - TECHNICAL COMMUNICATIONS FOR INFORMATION SCIENCE

Minimum Credits: 3
Maximum Credits: 3
An English language support course for international students in SIS who are non-native speakers of English. Helps develop students' strategies and skills for comprehension and production in academic English contexts. Also addresses issues of academic integrity and plagiarism.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

INFSCI 2230 - CYBERCRIME

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

INFSCI 2300 - HUMAN INFORMATION PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with emphasis on modeling human cognition and implications for user interface design and design of intelligent systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2350 - HUMAN FACTORS IN SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Introduces principles for analysis of human performance in human-machine systems. Emphasis on principles of human factors as applied to the design of systems other than the graphical user interface (GUI) that is covered in interactive systems INFSCI 2470.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS

Minimum Credits: 3
Maximum Credits: 3
Introduces mathematical and computer techniques used in constructing models of information processing by parallel distributed processing (PDP)
networks; principles of input-output functions and adaptation (learning) functions in single units and in networks; examines the relation between PDP networks, neurobiology, artificial intelligence, and cognition.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**INFSCI 2415 - INFORMATION VISUALIZATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**INFSCI 2420 - INTRODUCTION NATURAL LANGUAGE PROCESSING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall system architectures.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2300 and (INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1)); PROG: School of Information Science or Sch Computing and Information

**INFSCI 2430 - SOCIAL COMPUTING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**INFSCI 2440 - ARTIFICIAL INTELLIGENCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
With the focus on the machine intelligence technologies around processing, representing, modeling, and learning from large quantity of data in the current web context, this course serves as a broad introduction to students of the theories, algorithms and applications of modern Artificial Intelligence (AI). Taking a data science oriented perspective, this course aims to help students to develop a broad theoretical knowledge and practical experience in AI. With the understanding that modern AI is actually a discipline of theories and techniques around the idea of data driven model-based machine intelligence, this course consists of four broad modules: 1) representation of knowledge, 2) uncertainty-based modeling and reasoning, 3) improvements with machine learning, and 4) communication with natural language processing, all of which are necessary components for an intelligent agent to engage intelligently with other agents or people in the real world. The goal of this course is to prepare students to work creatively and productively in current data-driven and intelligence-rich environment, and it is ideal for students who would like to be introduced to the techniques of modern AI. Topics include: search, logic and deduction, knowledge representation and memory organization, production systems, expert systems, planning, language understanding, and machine learning.
INFSCI 2460 - SPATIAL REASONING FOR GIS

Minimum Credits: 3
Maximum Credits: 3
Fundamental issues in qualitative spatial reasoning, spatial languages, and spatial decision-making. Applications of spatial reasoning including problems of navigation and interface issues for GIS.

INFSCI 2470 - INTERACTIVE SYSTEM DESIGN

Minimum Credits: 3
Maximum Credits: 3
The environments that can or should be provided for interactive use of computers. Necessary hardware, software, and behavioral components of an interactive system; data structure considerations for various types of interactive applications; operating system fundamentals, functions, and characteristics. Emphasis on interactive operating systems, human machine dialogues, interactive graphics, programming languages, and application(s) design.

INFSCI 2480 - ADAPTIVE INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.

INFSCI 2500 - DATA STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
Theory and application of data structures. Data and file structures and their appropriateness to various applications.

INFSCI 2510 - INFORMATION SYSTEMS ANALYSIS AND DESIGN
Minimum Credits: 3
Maximum Credits: 3

The focus of this course is on studies of specifications of the information systems development process. The course covers fundamental topics on two main stages of information systems development life cycle: analysis, and design. Students will become familiar in techniques to investigate, collect, organize, and structure requirements for an information system as well as understanding how to design different component of the information system to satisfy the requirements. The course hands-on experiences such as working directly with real-world clients to address an information need challenge. Students are evaluated through regular assignments, quizzes, and a course project.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2511 - INFORMATION SYSTEMS DESIGN

Minimum Credits: 3
Maximum Credits: 3
Object-oriented design best practices; principles of system architecture; design patterns; requirements traceability; construction of uml-compliant models (class, sequence, communication and package diagrams); refactoring; iterative development of system prototype. Requires knowledge of fundamental of programming concepts including abstract classes, interfaces, inheritance, polymorphism, and message passing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2510; PROG: School of information Science or Sch Computing and Information
Course Attributes: Global Studies

INFSCI 2540 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Critical analysis of leading iterative software development processes; TSP/PSP, unified process, extreme programming and related agile processes; enterprise management and control of software projects (CMM and COBIT); configuration and change management; quality assurance and testing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2545 - SOFTWARE QUALITY ASSURANCE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

INFSCI 2550 - CLIENT-SERVER SYSTEMS

Minimum Credits: 3
Maximum Credits: 3

Analysis and design of distributed systems. Emphasis on distributed applications and various protocols used in such applications. Explores algorithms for various iterative and concurrent server designs as well as the design of application level protocols. Includes various languages and operating systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
INFSCI 2560 - NETWORK AND WEB DATA TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
Covers core technologies and standards for distributed systems, especially web-based distributed systems. Includes an overview of the standardization process and the standards organizations. Looks at network and data standards with significant attention to HTML, XML, HTTP, URL and other web technologies including APIs to programming with them. Topics covered include: Web and Restful protocols (HTTP, COAP), Publish-Subscribe protocols (MQTT), Web services (SOAP, etc.), and Web programming with CSS, JS, and HTML5.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2591 - ALGORITHM DESIGN

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of algorithm design including greedy algorithms, divide-and-conquer algorithms, dynamic programming, heuristics and approximate algorithms, parallel and distributed algorithms, multi-dimensional data structures, time complexity of algorithms, and development of programs from algorithms.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science or Sch Computing and Information

INFSCI 2595 - MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
Introduction to machine learning, includes algorithms of supervised and unsupervised machine learning techniques, designing a machine learning system, bias-variance tradeoffs, evaluation metrics; Parametric and non-parametric algorithms for regression and classification, k-nearest-neighbor estimation, decision trees, discriminant analysis, neural networks, deep learning, kernels, support vector machines, ensemble methods, regularization techniques; Dimensionality reduction, principle component analysis, LDA, t-SNE; Clustering methods such as k-means, hierarchical clustering, spectral clustering, DBSCAN; Mathematical foundations including linear algebra, probability theory, statistical tests, statistical learning theory; Best practices and application to real-world problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

INFSCI 2620 - DEVELOPING SECURE SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Design and implementation of secure systems. Principles and practice of trustworthy computing, secure and high assurance software development process and lifecycle models. Secure software design using UMLSEC, secure design of operating systems and network services, database and applications. Secure webs services, cots-based and service-oriented systems. Software assurance tools and techniques such as code analysis and testing, evaluation and certification of software. Secure programming techniques.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2150 or TELCOM 2810; PROG: School of Information Science or Sch Computing and Information
INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3
Maximum Credits: 3
Administration and management of security of enterprise information systems and networks. Principles and tools related to intrusion detection systems, vulnerability analysis, anomaly detection, computer forensics, application logging, auditing and data management, risk management, contingency planning and incident handling, digital immune systems, and alarms and responses. Security standards, evaluation and certification process; security planning, ethical and legal issues in information; privacy, traceability and cyber-evidence.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (INFSCI 2150 or TELCOM 2810) and TELCOM 2821; PLAN: ISCI-MSI, ISCI-AC, BDA-ACG, BDAL-ACG, SAISYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

INFSCI 2625 - CYBERSECURITY AND PRIVACY REGULATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

INFSCI 2629 - CAPSTONE IN SECURITY

Minimum Credits: 3
Maximum Credits: 3
Integrative class for master's students in their final semester of the sais track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (INFSCI 2150 or TELCOM 2810) and TELCOM 2821; PLAN: ISCI-MSI, ISCI-AC, BDA-ACG, BDAL-ACG, SAISYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

INFSCI 2710 - DATABASE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Basic graduate course on database systems. Centralized relational database systems with emphasis on database design, implementation, and administration. Comprehensive coverage of SQL, data modeling, normalization, storage management, transaction management, and query evaluation. Students will develop practical skills in building and maintaining realistic medium-scale database systems. Also covers more advanced topics including data warehousing and OLAP.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption(Exemption Score=1);PLAN:IIS-MS or INFSCI-AC or INFSCI-MSI or INFSCI-PHD or IIISCI-MS or ISCI-AC or ISCI-MSI or ISCI-PHD or SAISYS-AC or SAISYS-ACG or TCOMM-MST or TCOMM-AC)or(SUBPLAN:MLISDL-TR or MLISDLI-SP or MLISDLIM-SP)

INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Advanced graduate course on database systems. Key issues that typically arise in the context of large-scale enterprise database management in
heterogeneous wide-area environments including distributed and non-relational database systems, network-centric data management, web-based information systems, heterogeneous databases, information integration, and wireless data management.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2710; PLAN ISCI-MSI, ISCI-AC, BDA-ACG, BDAL-ACG, SAISSYS-ACG, SAIS-ACG, ISCI-PHD, INFSCI-MSI, INFSCI-AC, INFSCI-PHD

**INFSCI 2725 - DATA ANALYTICS**

*Minimum Credits: 3  
Maximum Credits: 3*

Introduction to fundamental technologies underlying distributed storage and efficient analysis of very large amounts of data. An overview of approaches to extracting information and knowledge from data, verification, testing, and presentation of results.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**INFSCI 2730 - E-BUSINESS**

*Minimum Credits: 3  
Maximum Credits: 3*

Conceptualization of e-business in the context of markets, business practices, and information theory. Implementation of e-business websites and services via various programming languages. Examines various models for online consumer systems, business-to-business systems, and enterprise computing—e.g., Supply chain models. Covers related technologies in document processing, telecommunications, and security.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2560 and 2710; PROG: School of Information Science or Sch Computing and Information

**INFSCI 2731 - SECURITY IN E-COMMERCE**

*Minimum Credits: 3  
Maximum Credits: 3*

Covers the technology, concepts, issues and principles that are important in the design and implementation of secure e-commerce systems. Examines technology for protecting electronic commerce. It will include discussion of basic security principles, as well as the issues, policy and standards particular to e-commerce applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2560; CREQ: (INFSCI 2150 or TELCOM 2810); PROG: School of Information Science or Sch Computing and Information

**INFSCI 2739 - WEB SERVICES AND DISTRIBUTED COMPUTING**

*Minimum Credits: 3  
Maximum Credits: 3*

Looks at advanced techniques to client server computing. Covers design techniques necessary for organizing very large web sites. Integrates the knowledge and skills from e-business and web technologies to develop a functioning distributed application using web services, RMI, RSS, AJAX, etc.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2550 and 2730; PROG: School of Information Science

**INFSCI 2750 - CLOUD COMPUTING**
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the concepts and design principles behind existing cloud solutions. Topics include large scale data processing techniques such as mapreduce/hadoop and its related ecosystem, overview of virtualized commercial cloud models, system virtualization, hypervisors and virtualized platforms. Design of cloud storage systems such as key-value stores and geographically distributed storage systems. Introduction to security and privacy issues in cloud computing, issues of data and execution privacy in modern commercial cloud services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1)); PLAN: School of Information Sciences

INFSCI 2780 - INTERACTIVE GRAPHICS

Minimum Credits: 3
Maximum Credits: 3
Computer graphics, point plotting techniques, line drawing display, clipping and windowing, display lines, geometric models, picture structure, graphic input devices and techniques, event handling, raster graphics, solid area scan conversion, three-dimensional graphics, shading, and user-interface design related to the associated behavioral factors in INFSCI 2300 and INFSCI 2350.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Minimum Credits: 3
Maximum Credits: 3
Introduction to the fundamentals of GIS. Topics include GIS components, geospatial data structures, geospatial databases, geospatial data integration and conversion, overlay analysis, proximity analysis, network analysis, buffering, topology, and GIS tools (hardware and software).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2802 - LOCATION-BASED SERVICES

Minimum Credits: 3
Maximum Credits: 3
Internet GIS, distributed geo-processing on the internet, mobile GIS, location-based services, navigation systems and services, social networking, and a selection of emerging applications possible through mobile GIS and location-based services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science or Sch Computing and Information

INFSCI 2809 - SPATIAL DATA ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
Geospatial data collection, geospatial data structures and indexing, geospatial analysis, data quality, geospatial data structures and algorithms for surfaces, spatiotemporal databases, and digital terrain modeling.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science or Sch Computing and Information
INFSCI 2821 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science or Sch Computing and Information

INFSCI 2872 - E-BUSINESS

Minimum Credits: 3
Maximum Credits: 3
Conceptualization of e-business in the context of markets, business practices, and information theoretic contexts. Implementation of e-business websites and services via various programming languages. End-user e-commerce, business-to-business e-commerce, and enterprise computing--e.g., supply chain models. Related technologies in document processing, telecommunications, and security.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

INFSCI 2910 - INDEPENDENT STUDY: FOUNDATIONS

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2915 - SPECIAL TOPICS: FOUNDATIONS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2930 - INDEPENDENT STUDY: COGNITIVE

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2935 - SPECIAL TOPICS: COGNITIVE

Minimum Credits: 1
Maximum Credits: 3
An independent study intended to cover advanced material outside of or beyond the scope of current course offerings, specifically within the Cognitive Science or Cognitive Systems academic area.

**Academic Career:** Graduate
**Course Component:** Independent Study
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

### INFSCI 2950 - INDEPENDENT STUDY: SYSTEMS

- **Minimum Credits:** 1
- **Maximum Credits:** 3
- **Academic Career:** Graduate
- **Course Component:** Independent Study
- **Grade Component:** Grad LG/SNC Basis

### INFSCI 2955 - SPECIAL TOPICS: SYSTEMS

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Graduate
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

### INFSCI 2960 - STUDY ABROAD

- **Minimum Credits:** 1
- **Maximum Credits:** 15
- **Academic Career:** Graduate
- **Course Component:** Independent Study
- **Grade Component:** Grad SN Basis

### INFSCI 2965 - SEMINARS: SPECIAL TOPICS

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- Analysis of journal articles, books, and conference proceedings involving issues in information science. Techniques for preparing for the preliminary and comprehensive examinations.
- **Academic Career:** Graduate
- **Course Component:** Seminar
- **Grade Component:** Grad LG/SNC Basis

### INFSCI 2970 - INDEPENDENT STUDY

- **Minimum Credits:** 1
- **Maximum Credits:** 3
- Independent studies are intended to cover advanced material outside of or beyond the scope of current course offerings.
- **Academic Career:** Graduate
- **Course Component:** Independent Study
- **Grade Component:** Grad LG/SNC Basis

### INFSCI 2980 - PRACTICUM

- **Minimum Credits:** 3
- **Maximum Credits:** 6
For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**INFSCI 2982 - INFORMATION SCIENCE COOPERATIVE PROGRAM**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- **Academic Career:** Graduate  
- **Course Component:** Independent Study  
- **Grade Component:** Grad HSU Basis

**INFSCI 2995 - THESIS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  The thesis is a report of original, theoretical, or laboratory work suitable for publication.  
- **Academic Career:** Graduate  
- **Course Component:** Directed Studies  
- **Grade Component:** Grad LG/SNC Basis

**INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  An introduction to the purpose and nature of doctoral studies in information science, theories and processes in scholarly research and the current state of research in the discipline. Graduate faculty in the program will present and discuss their current interests with students.  
- **Academic Career:** Graduate  
- **Course Component:** Seminar  
- **Grade Component:** Grad LG/SNC Basis

**INFSCI 3150 - SEMINARS: SPECIAL TOPICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  Analysis of journal articles, books, and conference proceedings involving issues in information science. Techniques for preparing for the preliminary and comprehensive examinations.  
- **Academic Career:** Graduate  
- **Course Component:** Seminar  
- **Grade Component:** Grad LG/SNC Basis  
- **Course Requirements:** Plan: Information Science (PhD)

**INFSCI 3250 - RESEARCH SEMINAR**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Graduate  
- **Course Component:** Seminar  
- **Grade Component:** Grad LG/SNC Basis

**INFSCI 3350 - DOCTORAL SEMINAR**
Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Plan: PhD students in Information Sciences, Library & Information Science, or Intelligent Systems

INFSCI 3990 - DISSERTATION

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Information Science (PHD); CUM GPA: 3.25

Institute for Practice & Research in Education

IPRE 9257 - EAST ASIA: YESTERDAY AND TODAY

Minimum Credits: 3
Maximum Credits: 3
The course is designed for middle and high school teachers of world cultures, world history, geography, economics, and literature. This seminar will provide students with the content and resources needed to implement the study of East Asia into their curriculum in accordance with various approaches to "standards". The seminar will include an analysis of the recently posted Pennsylvania civics and government standards. It will also reference to the latest national geography, world history, as well as NCSS standards.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad HSU Basis
Course Attributes: Asian Studies

Instruction and Learning

IL 2002 - INTRODUCTION TO URBAN EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Students will explore the systemic issues unique to urban education historically as well as uncover how urban education is/can be a vehicle for social justice and equity in our country. The course will include the impact of policies, national movements, systemic racism, and their implications for students in urban schools over time in the united states as well as a deep understanding of the condition of students today with a focus on race, socioeconomic status, equity, etc.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2003 - UNDERSTANDING TEACHING THROUGH A SOCIAL WORKERS LENS

Minimum Credits: 3
Maximum Credits: 3
One critical key to being an effective teacher is being able to delve deep into seeing and understanding people's lived experiences. To do so well, requires that one adopt the 'lens' of a social worker in addition to that of a teacher. Diverse urban school students often have experiences that our predominately white, suburban, middle class teaching force haven't, the knowledge of which can assist teachers in better interpreting behaviors and contextualizing their work. Such topics as trauma, health, family dynamics, violence, and poverty are addressed. This course is a collaboration with the school of social work faculty.
Academic Career: Graduate
IL 2004 - RELATIONSHIP BUILDING: STUDENTS, FAMILIES AND COMMUNITIES

Minimum Credits: 3  
Maximum Credits: 3  
Students will learn ways to develop and nurture meaningful relationships with the students, families and communities they serve. This course provides opportunities and assignments designed to actively engage in the relationship development process as well as document it along with evidence of studying about demographics and historical content and contexts that provide the anchor for their work with and perspectives of the urban spaces in which they learn and educate.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2005 - URBAN SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
This seminar series provides a deep dive into some of the most salient issues of teaching in urban schools. It is designed to take the students on a journey that begins in the summer with an examination of identity, their own as well as a lens in which to see and understand their students in personal and contextualized ways. The fall seminar takes their newfound understanding and wraps it into meaningful relationship building between the self and student as the foundation for developing classrooms as communal learning spaces for all to thrive. Doing such work in understanding identity and relationships with students in urban spaces includes an explicit look at power and privilege in powerful ways that helps teachers understand their and their students lived experiences in ways that lead to opportunities to more clearly see where inequities lie in our educational and broader systems. This then builds to be the foundation for the spring seminar that provides framing and support in becoming a change agent in educational institutions in ways that disrupt such aspects of the environment, such as systemic institutionalized racism.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

IL 2006 - CULTURALLY RESPONSIVE TEACHING

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on STEAM-based instructional approaches, which includes the ways in which teachers structure the classroom environment, tasks, and resources to facilitate deep learning. These instructional approaches include problem-based, student-driven, authentic tasks, and technology integration, as well as support for equitable participation (the ways in which the classroom facilitates access and engagement in learning for all students, with specific attention to abilities and resources).

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2008 - STEAM: INSTRUCTIONAL DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the instructional content of STEAM, which includes subject-matter alignment (the ways in which teachers present material
from multiple disciplines or content areas in clear and connected ways), discipline integration (the selection of material across disciplines - including concepts, methods, and approaches - as well as how they are synthesized to support deeper learning), and ways to employ problem-solving skills. These skills include cognitive skills (modeling, analyzing, interpreting), collaborative skills (communication, problem-solving), and creative skills (designing, creating) necessary for 21st century learning.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IL 2009 - STEAM: ASSESSMENT

<table>
<thead>
<tr>
<th>Minimum Credits:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Credits:</td>
<td>3</td>
</tr>
</tbody>
</table>

This course focuses on assessment practices that support learning. This includes the iterative process of refining instruction and evaluating learning in real-world contexts using multiple forms of data. Assessment types explored include formative and summative assessment and ways to make assessments authentic, embedded, with regular feedback that drives adjustments to teaching. Another key component of this course is peer supports including peer review and self-reflection.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IL 2010 - STEAM: IMPLEMENTATION

<table>
<thead>
<tr>
<th>Minimum Credits:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Credits:</td>
<td>3</td>
</tr>
</tbody>
</table>

This course investigates the ways to implement STEAM teaching and develop collegial support outside of the classrooms. Participants will implement STEAM practices and critically reflect on ways to refine teaching. The course utilizes peer evaluation from other instructors, peer and instructor feedback, and encourages refining teaching practice during implementation of the unit.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IL 2041 - INTRO TO EARLY CHILDHOOD ED

<table>
<thead>
<tr>
<th>Minimum Credits:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Credits:</td>
<td>3</td>
</tr>
</tbody>
</table>

The course is a general introduction to the theoretical, political, economic, and social issues that are inherent in the conduct and development of services for young children. The primary thrust is intended to provide students with both an overview of current issues and a basis for assessment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### IL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

<table>
<thead>
<tr>
<th>Minimum Credits:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Credits:</td>
<td>3</td>
</tr>
</tbody>
</table>

An introduction to language and literacy for children birth through grade 4. Includes applied theories and stages of language development, transitions from oral to written expression, family literacy, and guidelines for the selection and use of quality literature.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### IL 2045 - YOUNG ENGLISH LANGUAGE LEARNERS

<table>
<thead>
<tr>
<th>Minimum Credits:</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum Credits:</td>
<td>3</td>
</tr>
</tbody>
</table>

Prospective early childhood education teachers will identify, investigate and assess impacts of a variety of social agencies, organizations and current
issues in early childhood education through planned interviews as well as class lectures, discussions and reports.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2047 - INTEGRATED CURRICULUM PRE-K-4**

Minimum Credits: 3  
Maximum Credits: 3  
The second half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2091 - SUPERVISED RESEARCH - SCIENCE**

Minimum Credits: 1  
Maximum Credits: 3  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**IL 2098 - DIRECTED STUDY - SCIENCE**

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**IL 2203 - LANGUAGE AND LANGUAGE SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an overview of literacy research and instructional approaches that relate to language and language systems with emphasis on the historical development of English, linguistic and sociocultural perspectives on second language learners and speakers of dialects, and instructional approaches for encoding and decoding.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2208 - READING/Writing METHODS 1: PRE K - GRADE 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the first in a two-course sequence that focuses on classroom teaching methods for literacy. It is also part of a set of courses that focus on literacy development and instruction. Other courses in the set include reading/writing methods 2: grades 2-4, language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 1 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) oral language development, (b) emergent literacy, (c) concepts about print, (d) comprehension, and (e) writing. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in pre-kindergarten - grade 1.
IL 2209 - READING WRITING METHODS 2: GRADE 2-4

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the second in a two-course sequence and builds on concepts introduced in reading/writing methods 1. It is also part of set of courses that focus on literacy development and instruction. Other courses in the set include language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 2 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) word study- decoding, spelling, and vocabulary, (b) comprehension, and (d) composition, including handwriting. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in grades 2-4.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2211 - COMPREHENSION AND VOCABULARY

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an in-depth consideration of reading processes related to comprehension and learning from text, and instructional approaches that support student text comprehension, including vocabulary instruction.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an overview of reading processes and assessments of those processes with a focus on phonology, fluency, vocabulary, and comprehension. The course also provides an introduction to the response to intervention model and its application in various contexts.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS

Minimum Credits: 3  
Maximum Credits: 3  
This course engages candidates in working with students in kindergarten through grade 3 to assess students' literacy abilities in decoding, spelling, vocabulary, fluency, and comprehension, and to design instruction targeted to support students' literacy development. The course is also an opportunity for candidates to videotape and analyze their interactions with students.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade

IL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS

Minimum Credits: 3  
Maximum Credits: 3  
This course involves working with middle school students who are experiencing difficulties with reading. The course takes place at a school site for 3 weeks, 9:00-12:00, Monday through Friday, students meet at the University of Pittsburgh, 9:00-12:00, for three specific dates to prepare for the practicum sessions.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2219 - DISCIPLINARY LITERACY
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the literacy development of adolescents with particular attention to the demands of discipline-specific reading and writing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2226 - SPECIAL TOPICS - WRITING
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2228 - SUMMER INSTITUTE FOR TEACHERS
Minimum Credits: 6
Maximum Credits: 6
An intensive, teacher-centered, teacher-led professional development program in the teaching of writing, based on the highly successful national writing project model. Open to teachers in all grade levels (k-16) and all content areas.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
Minimum Credits: 3
Maximum Credits: 3
In this course, teacher candidates are introduced to current issues and effective teaching practices in secondary English language arts education. Teacher candidates will learn the characteristics of English language arts classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for adolescents.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2235 - THEORY AND PRACTICE IN TEACHING LANGUAGE, GRAMMAR AND USAGE
Minimum Credits: 3
Maximum Credits: 3
The purpose of this seminar is to teach students current best practices for the teaching of language, grammar and usage in multicultural and multilingual secondary English language arts classes. The course will introduce students to basic linguistic concepts and will help students understand how language and grammar are intertwined with all four language arts (reading, writing, listening and speaking). Students will practice developing language and grammar curriculum that is imbedded in reading and writing instruction and developmentally appropriate, explaining grammar and usage concepts clearly and appropriately, and assessing students’ understanding of language, grammar, and usage concepts.

Academic Career: Graduate
IL 2239 - THEORY AND PRACTICE IN TEACHING NEW MEDIA AND LITERACIES

Minimum Credits: 3
Maximum Credits: 3
Teaching new literacies, multimodal forms of expression and technology in the English classroom will be the emphasis of the course. Students will follow a media literacy framework to learn theory into practice as they review and research current literature on digital tools such as wikis, blogs, social networking sites, and digital audio and video production applications. Methods for incorporating new literacies in the classroom will be explored and shared by the students.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2240 - THEORY AND PRACTICE: ASSESSMENT IN ENGLISH EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Il 2240 theory & practice: assessment in English education this course will be a survey of the range of assessment tools and practices appropriate for use in evaluating student learning in the secondary English classroom. Students will explore the purposes, methods, and uses of classroom assessment as well as state and national assessments. Topics explored in this course will include standardized testing, formative and summative assessments, designing writing and project-based assessments and rubrics, providing feedback on student writing, analyzing the results of assessments in order to guide instruction, and other topics related to the design and use of assessments.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2243 - THEORY & PRAC IN TCHNG WRITING

Minimum Credits: 3
Maximum Credits: 3
This seminar critically studies various approaches to the teaching of writing from both theoretical and applied perspectives. Students are expected to have had some experience teaching writing.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2

Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon English language arts classroom research, learning theory, and knowledge of adolescent development to design and implement effective English language arts instruction. The course will emphasize the design and implementation of cognitively challenging reading and writing tasks as well as the appropriate instructional supports to help students succeed at those tasks. Teacher candidates will have opportunities to develop instructional plans and practice teaching techniques while receiving feedback from peers and the course instructor.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2246 - THRY & PRAC: MULTI-CULTURAL LIT

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide teachers with a multicultural philosophical perspective, criteria for selecting multicultural literature, and strategies
and techniques for infusing literature from diverse cultures into a literature program.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Global Studies

**IL 2250 - TECHNOLOGY IN FOREIGN LANGUAGE EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** Asian Studies

**IL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
A basic introduction course dealing with the most current issues in foreign language education in elementary, middle and secondary schools.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1**

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to introduce students to foreign language classroom instruction, management, and methodology. Students will be introduced to the ACTFL national standards for foreign language learning and will explore instructional practices for helping learners develop proficiency in the target language and culture.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Global Studies

**IL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT**

Minimum Credits: 3  
Maximum Credits: 3  
In this course, students become familiar with the most current language testing and assessment principles and procedures through discussion and hands-on practice. Topics covered include test usefulness, validity, reliability, practicality, impact, interactivity, and so on. Students' practice creating tools ranging from multiple choice and short answer to portfolio and performance assessments.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3**

Minimum Credits: 3  
Maximum Credits: 3  
In this course, students discuss a variety of issues that relate to the ACTFL national standards for foreign language learning. In addition, teaching techniques that address these issues are modeled and practiced.

**Academic Career:** Graduate
IL 2255 - TECHNQ/PROCNR FOREIGN LANG TCH

Minimum Credits: 3
Maximum Credits: 3
The course will present strategies and techniques for teaching the four skills (listening, speaking, reading and writing), culture, and generic principles for effective proficiency-oriented instruction. The emphasis of this course is on practical applications.

Academic Career: Graduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

IL 2256 - ISSUES IN FOREIGN LANGUAGE ED

Minimum Credits: 3
Maximum Credits: 3
The course deals with current issues in foreign language teaching. Issues are determined by the current concerns and research in the field.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

IL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3
Maximum Credits: 3
This course will explore strategies for teaching English language learners (ELL's) in formal and informal education settings. Students will be introduced to foundational theories and current research on the social and academic factors that influence ELL's learning experiences. The class will include a video component so students can observe instructional approaches for working with linguistically and culturally diverse ELL's.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2

Minimum Credits: 4
Maximum Credits: 4
In this course, students discuss and practice a variety of teaching techniques and assessment tools that support the ACTFL national standards for foreign language learning. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1

Minimum Credits: 3
Maximum Credits: 3
In this course, students will draw upon research, policy, and curriculum documents to develop an overview of current issues in social studies education. The course is organized around three guiding questions: (1) what are the key practices of social studies educators? (2) What do classrooms in which powerful teaching and learning in social studies look like? And (3) what do teachers need to know and be able to do in order to engage students in powerful learning in social studies?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies

IL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2

Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support social studies instruction. Teacher candidates utilize various curricular resources (e.g., Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates will have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2265 - ISSUES IN HISTORY EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Students will explore the historical development of approaches to teaching us history and world history.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2268 - SOCIAL STUDIES METHODS PRE-K - 4

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2269 - SPECIAL TOPICS: SOCIAL STUDIES

Minimum Credits: 3
Maximum Credits: 3
Students will research social studies topics of special interest. Content varies based on professional expertise and students' needs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL

Minimum Credits: 3
Maximum Credits: 3
To introduce preservice classroom teachers to art and music contents and processes with relevance to their expected role in integrating authentic arts learning experiences in their instruction. Emphasis placed on developmental aspects of children's' responsive and expressive skills in art and music.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2277 - COMPARATIVE AND GLOBAL PERSPECTIVES ON EDUCATION
This course, held on the campus of the University of Cape Town in Cape Town, South Africa, explores and compares the 20th century human/civil rights-related histories of the United States and South Africa, and examines implications these histories have had on the education systems (particularly in a context of social studies education) of each country. In their comparative survey of historical, social, and educational contexts, instructors will place special emphases on the philosophies, work, and legacies of key historical individuals including Mohandas K. Gandhi, Dr. Martin Luther King, Jr., Nelson Mandela, among others. Study will incorporate a critical analysis of the universal declaration of human rights (1948), lectures by noted historical experts, visits to sites of historical significance, visits to schools and other learning environments, and group discussions of relevant texts and experiences.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

### IL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad HSU Basis

### IL 2281 - LEADERSHIP SCHOOL LITERACY PROGM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines theories about leadership of the school literacy program. Leadership skills are defined and applied. Leadership theory and research as related to literacy curriculum and instruction are discussed; example of how reading specialists and others (principal, teachers) can fulfill a leadership role as described. Course combines theory with practical application.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

### IL 2282 - FOREIGN LANGUAGE IN ELEMENTARY SCHOOL

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This purpose of this course is to introduce students to the various types of elementary foreign language programs, to review and apply instructional practices that are appropriate for young foreign language learners, and to discuss topics that are unique to teaching foreign language in K-8 school settings.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

### IL 2290 - RESEARCH SEMINAR FOR MED STUDENTS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade
IL 2291 - SUPERVISED RESEARCH - READING

Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 2296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Minimum Credits: 1
Maximum Credits: 9
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Full Time Dissertation
Grade Component: Grad SN Basis

IL 2298 - DIRECTED STUDY - READING

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2391 - SUPERVISED RESEARCH IN ENGLISH

Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in carrying out a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2398 - DIRECTED STUDY IN ENGLISH

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to action research as a method of improving their practice. Students will learn what action research is, how it is carried out, and where it falls in the spectrum of research methodologies. The role of literature in supporting practitioners and their action research and how to develop a literature review will be addressed. Students will design an action research project on a topic relevant to their own practice.
Academic Career: Graduate
IL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1

Minimum Credits: 3
Maximum Credits: 3
In this course, teacher candidates will draw upon research, policy, and curriculum documents to develop an overview of current issues in science education. The course is organized around three guiding questions: (1) what are some key practices of scientists? (2) what do classrooms in which students engage in key science practices look like? And (3) what do teachers need to know and be able to do in order to support learning in classrooms where students learn science ideas through engagement in science practices?
Academic Career: Graduate
Grade Component: Grad Letter Grade

IL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2

Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support science instruction. Teacher candidates utilize various curricular resources (e.g. Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.
Academic Career: Graduate
Grade Component: Grad Letter Grade

IL 2432 - TEACHING & LEARNING IN SECONDARY SCIENCE 3

Minimum Credits: 3
Maximum Credits: 3
Designed to develop an overall rationale for dealing with classroom science instruction; students design, teach and evaluate teaching strategies for secondary school; specific materials for teaching science and strategies for their effective use are examined.
Academic Career: Graduate
Grade Component: Grad Letter Grade

IL 2433 - MATH/SCIENCE INSTRUCTION FOR YOUNG LEARNERS 1 (PREK - GRADE 4)

Minimum Credits: 3
Maximum Credits: 3
The first half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.
Academic Career: Graduate
Grade Component: Grad Letter Grade

IL 2434 - MATH AND SCIENCE METHODS 2 (PRE K - GRADE 4)

Minimum Credits: 3
Maximum Credits: 3
The first half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.
IL 2445 - ASSESSMENT AND EVALUATION IN MATH EDUCATION

Minimum Credits: 3
Maximum Credits: 3

In this course we will examine current assessment practices in mathematics education, both historically and in terms of their forms and purposes in today's educational and political climate. Most importantly, however, we will focus on improving current assessment practices to support students' learning in the mathematics classroom. Based on an integrated view of assessment and instruction, students will be expected to employ ideas from the course to improve their own assessment practices.

IL 2452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1
Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

IL 2470 - REASONING AND PROVING IN SECONDARY MATH

Minimum Credits: 3
Maximum Credits: 3

This course focuses on addressing three overarching questions: 1) what is reasoning-and-proving? 2) How do secondary students benefit from engaging in reasoning-and-proving? 3) How can teachers support the development of students' capacity to reason-and-prove? Teachers explore these questions through engagement in a variety of activities that include: solving and discussing challenging mathematical tasks; analyzing narrative cases that make salient the relationship between teaching and learning and the ways in which student learning can be supported; examining and interpreting student work that features a range of solution strategies, representations, and misconceptions; and making connections to their own teaching practice.

IL 2473 - MATH FOR ELEMENTARY TEACHERS

Minimum Credits: 3
Maximum Credits: 3

Students will improve their mathematics knowledge of concepts and skills in numeration systems, integers, rationales, geometry, probability/statistics, and other selected topics.

IL 2474 - PROPORTIONAL REASONING IN MIDDLE SCHOOL MATHEMATICS
Minimum Credits: 3  
Maximum Credits: 3  
Focuses on developing teacher's ability to reason proportionally and capacity for designing instructional experiences that foster's child understanding of proportional relationships. Includes solving math tasks related to proportional reasoning and analyzing teaching and learning situations that highlight pedagogical approaches that support student learning in this domain.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2476 - TEACHING AND LEARNING IN SECONDARY MATH 1

Minimum Credits: 3  
Maximum Credits: 3  
Basic orientation to the issues, lectures, and resources in the field of mathematics education. Issues currently affecting the teaching and learning of mathematics focused on middle and secondary schooling.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2477 - TEACHING AND LEARNING IN SECONDARY MATH 2

Minimum Credits: 4  
Maximum Credits: 4  
Topics include learning, instruction and assessment, planning lessons, effective learning environments, successful teaching strategies, and materials and resources. Responsibilities and professionalism will also be discussed.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2478 - TEACHING AND LEARNING IN SECONDARY MATH 3

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the development and support of learning contexts in which adolescents have opportunities to engage in challenging mathematical practices. Drawing on cognitive change learning theory, teacher candidates learn to select and develop various assessments that reveal students' thinking and to draw upon their understanding of students' ideas to scaffold learning experiences in the classroom. Emphasis is placed on strategies that build and support students' capacity to engage in mathematical discourse.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2484 - MATH PROBLEM SOLVING K-12

Minimum Credits: 3  
Maximum Credits: 3  
Students will become familiar with various theories of problem solving. They will solve challenging mathematical problems, discuss strategies, and identify ways to translate what they learn into their own mathematics classrooms.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

IL 2491 - SUPERVISED RESEARCH - MATH

Minimum Credits: 1  
Maximum Credits: 3  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 2495 - INTERNSHIP - MATH

Minimum Credits: 1
Maximum Credits: 9
Interns (mat program) work with cooperating teachers in a school setting to master teaching skills and to enhance their professional attitudes. Responsibility includes half-day teaching.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2496 - INTERNSHIP - SCIENCE

Minimum Credits: 1
Maximum Credits: 9
Interns assume half-time teaching in a secondary school working with cooperating teachers and supervisors to master concepts, skills and professional attitudes. Career goal orientation is rigorously tested.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

IL 2498 - DIRECTED STUDY - MATH

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2500 - FOUNDATIONS OF SPECIAL EDUC

Minimum Credits: 3
Maximum Credits: 3
Course provides an overview of the field of special education. It includes such topics as 1) identification; 2) placement; 3) programming; 4) inclusion; 5) advocacy; and other topics relating to individuals with disabilities, and gifted and talented individuals. The course examines the various philosophical views of exceptionality.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2501 - STUDENT W/DISAB IN ELEM CLSSRM

Minimum Credits: 3
Maximum Credits: 3
Course is an introduction to teaching students with disabilities in elementary general education classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding inclusive educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, and (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
IL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Minimum Credits: 3  
Maximum Credits: 3  
Course is an intro to teaching students with disabilities in sec level general EDUC classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding INCL educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges, & adapting instruction & curricula.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

IL 2503 - STUDENT TEACHING FOR DUAL CERTIFICATION IN SECONDARY SCHOOLS

Minimum Credits: 3  
Maximum Credits: 3  
Student teaching for dual certification in secondary schools teacher candidates engage in fieldwork five days a week in secondary school sites for 14 weeks. Teacher candidates will collaborate with both content area and special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the term, assume responsibility for the majority of provided instruction and classroom management. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad HSU Basis

IL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Minimum Credits: 3  
Maximum Credits: 3  
This course will present information on the characteristics of and intervention approaches for children with autism spectrum disorders (ASDS). Introductory material will include diagnosis criteria and characteristics of ASDS. Current research on theories of etiology will be explored and analyzed. Screening tools and assessments specific to this population will be examined in detail. Intervention approaches (e.g., LBI/Discrete Trial, ABBLS, precision teaching, teach) will be described and analyzed in terms of basic premises, research base, associated curricula, and evaluative guidelines from the autism society of America and national institute of mental health. Representatives from local education and behavioral health systems serving children with ASDS will present services/intervention models available in the area.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM

Minimum Credits: 3  
Maximum Credits: 3  
The course will consider programming and strategies for facilitating the communication and social development of young children with autism. Communication strategies will include a focus on nonverbal children, echolalic, and verbal children. Strategies will include sign language, picture systems, developmental approaches, naturalistic teaching, and discrete trial formats. Social interventions will examine play, peer interactions, and peer relationships. For both areas, assessment tools and strategies; published curricula; and a range of intervention procedures will be covered.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: IL 2505

IL 2507 - EARLY INTERVENTION CONSULTATION
Minimum Credits: 1
Maximum Credits: 1
This module focuses on providing students with skills for consulting with families, childcare providers, related service personnel, other teachers and paraprofessionals, to assist them in carrying out interventions for young children with autism, in homes, inclusive classrooms, and the community. The class will place special emphasis on classroom-based services. The module emphasizes a collaborative approach to consultation. Communication and interpersonal skills, relationship-building, the inclusion of families in all consultations, and techniques for assisting others to carry out interventions are considered. Finally issues related to interagency collaborations with emphasis on strategies to overcome challenges that occur in the daily life of a consulting professional in a variety of settings will be investigated.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT

Minimum Credits: 3
Maximum Credits: 3
The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group and class room-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills and providing positive behavior support for changing behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2511 - CURR PRG DVLP-LOW INCDCNC DISABS

Minimum Credits: 3
Maximum Credits: 3
This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community, vocational, and functional academics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2512 - ASSMNT INSTRUC-HIGH INCDCNC DISAB

Minimum Credits: 3
Maximum Credits: 3
Course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with mild disabilities, with emphasis on assessment for teaching reading, written language and mathematics. Course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

IL 2513 - INSTRNL METH-HIGH INCIDNC DISABS

Minimum Credits: 3
Maximum Credits: 3
This course explores the methods and procedures for developing literacy for students with learning disabilities, mild mental retardation, and behavioral disorders. The focus of the first 5 sessions is on learning to teach young students who have extraordinary difficulty; the next sections address the literacy needs of older students.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
IL 2518 - POSITIONING, HANDLING AND MOBILITY: YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 1  
Maximum Credits: 1  
Focuses on knowledge and recognition of normal and abnormal gross motor development of children, aged birth to 5, with an emphasis on analysis and facilitation of movement, handling and positioning, adaptive equipment, and safety.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2519 - ORAL MOTOR AND FEEDING STRATEGIES: YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 1  
Maximum Credits: 1  
Provides an overview of medical, motor, sensory, psychological and social aspects of feeding children. The class reviews the development of normal oral motor and self-feeding skills and the impact that disabilities may have on these processes. Use of descriptive, criterion-referenced evaluations and clinical observations to identify a child's level of oral motor control will be reviewed. Students will have an opportunity to use assessment procedures and devise treatment plans to address oral motor and feeding needs of children.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM

Minimum Credits: 3  
Maximum Credits: 3  
General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their secondary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general secondary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2522 - ED STDNT EMOTIONAL DISTURBANCE

Minimum Credits: 3  
Maximum Credits: 3  
The course provides knowledge of curriculum content, teaching techniques and instructional materials for children and youth with emotional disturbance through a focus upon academic content areas and social skills. The utilization of instruction as therapeutic programming will be the central theme.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
Minimum Credits: 3
Maximum Credits: 3
General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their elementary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general elementary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM: VI

Minimum Credits: 5
Maximum Credits: 5
This course is required by the PA department of education for certification to become a teacher of the visually impaired. Placements for this clinical experience are arranged by the vision studies program faculty and may be conducted in the student's home area. The approximate length of the placement is 14-weeks serving children who are blind or visually impaired ages three to 21-years.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

IL 2525 - TECHNOLOGY FOR CHILDREN WITH VI

Minimum Credits: 3
Maximum Credits: 3
This course evaluates many facets of assistive technology for individuals who are blind or visually impaired. Coursework includes projects and a weekend workshop for direct experiences with adapted software, hardware, and peripheral devices.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2527 - LEVEL 1 OBSERVATIONAL PRACTICUM: VI

Minimum Credits: 1
Maximum Credits: 1
This clinical experience requires students to engage in observations of practitioners serving a wide range of needs of individuals who are blind or visually impaired.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 2529 - BRAILLE

Minimum Credits: 3
Maximum Credits: 3
This course places emphasis on reading and writing braille. It emphasizes proficiency in reading and writing contracted and uncontracted braille, as well as teaching pre-braille and braille readiness to individuals who are blind or visually impaired.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2530 - INTRODUCTION TO THE EYE AND LOW VISION

Minimum Credits: 3
Maximum Credits: 3
This course presents an overview on the anatomy and physiology of the eye. It also presents information about visual pathology and its effect upon learning and function.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2531 - EDUCATION OF CHILDREN WITH VI 1

Minimum Credits: 3
Maximum Credits: 3
This methods course reviews the concepts and philosophies of educating children who are blind or visually impaired. It presents information on serving the needs of children in public schools, with emphasis on the itinerant model of delivery. This methods course examines assessment, programming, instructional materials and methods, and their theoretical and research basis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2532 - EARLY INTERVENTION FOR CHILDREN WITH VI

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the topics unique to children aged birth through five who are blind and visually impaired and their families. Focus will be on typical and atypical development as a basis for assessing the child's needs and designing appropriate interventions and family supports. The course includes individual and collaborative work in the areas of family-centered practices and collaboration among professional agencies across disciplines. Emphasis will be placed on assessment and intervention in the areas of sensory, cognitive, motoric, and communicative development as well as providing developmentally appropriate orientation and mobility.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2533 - ORIENTATION AND MOBILITY FOR THE TVI

Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare teachers of the visually impaired with the knowledge and skills to provide initial level sensory, cognitive, and motor skill development to children who are blind or visually impaired. Students will learn the basic skills of sighted guide and self-protective techniques including assessment and remediation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY

Minimum Credits: 3
Maximum Credits: 3
This fully on-line course is taken prior to IL 2750. It integrates relevant aspects of the process of teaching O&M (I. E., Sensory, cognitive) to individuals who are blind or with visually impaired who may also possess additional disabilities. In addition the history, philosophy, and aspects of professional ethics are covered. Service delivery models are discussed along with O&M resources, supervision, and program administration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

1915
IL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY

Minimum Credits: 3
Maximum Credits: 3
This fully on-line is taken prior to IL 2752. This course builds upon the knowledge students acquired in IL 2540 to understand assessment and instructional strategies for teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Aspects related to research in the field of O&M are also presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2542 - WEB CURRNT ISSUES & TRENDS SP ED

Minimum Credits: 3
Maximum Credits: 3
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: World Wide Web

IL 2545 - EDUCATION OF CHILDREN WITH VI 2

Minimum Credits: 3
Maximum Credits: 3
This course builds on the concepts presented in IL 2531 for developing teaching methodologies and adaptation techniques for children who are blind or visually impaired who may also possess additional disabilities. Curricular and classroom adaptations and modifications are stressed with emphasis placed on teaching academic and functional skills.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2547 - NEMETH CODE/ABACUS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide instruction in the mathematical braille code (Nemeth code) as well as the Cranmer abacus. Students will be instructed in arithmetic computation and mathematical problem solving using both systems. Students will also learn instructional strategies to assist students who are blind or visually impaired to obtain mathematical literacy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2548 - SPECIAL TOPICS SPECIAL EDUCATION

Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
IL 2552 - STUDENT TEACHING-SPECIAL EDUCATION IN SECONDARY SCHOOLS

Minimum Credits: 3
Maximum Credits: 3
Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2561 - PROGRAMMING IN EARLY INTERVENTION

Minimum Credits: 3
Maximum Credits: 3
Focuses on the development of curriculum and instructional strategies for children under five years of age with disabilities and their implementation in a variety of settings, including inclusive classrooms, home-based programs, and clinical settings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2562 - ASSESSMENT YOUNG CHILDREN DISABLTY

Minimum Credits: 3
Maximum Credits: 3
Focuses on the identification and assessment of children with disabilities under five years of age and the use of assessment information to plan programs for children in partnership with families and other professionals.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2563 - SEM: INCLUSION EARLY CHILDHOOD

Minimum Credits: 2
Maximum Credits: 3
This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals from other disciplines.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

Minimum Credits: 3
Maximum Credits: 3
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES

Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

IL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

IL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

IL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in
a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACH) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.

**Academic Career:** Graduate
**Course Component:** Internship
**Grade Component:** Grad HSU Basis

### IL 2575 - TRANSITION PROCESSES AND SPECIAL EDUCATION PROCEDURES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course covers critical information related to transition and special education services for students with disabilities in secondary settings.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### IL 2577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4

**Minimum Credits:** 2  
**Maximum Credits:** 3  
This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

### IL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in ABA I through ABA V. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: IL 2564 and 2565

### IL 2579 - TREATMENT FIDELITY AND COACHING: AUTISM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

**Academic Career:** Graduate  
**Course Component:** Lecture
IL 2582 - WORKING WITH FAMILIES

Minimum Credits: 3  
Maximum Credits: 3  
Course focuses on understanding family systems theory and its application to early intervention, including the development of individualized family service plans. Family centered practices, cultural, ethnic, racial, educational, and economic diversity among families, and accessing community resources will be covered.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

IL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: IL 2505

IL 2586 - AUTISM INTERVENTIONS IN SCHOOL AND COMMUNITY SETTINGS

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to prepare graduate students to teach school-aged students with ASD in a range school and community settings, with a particular focus on interventions and strategies appropriate for inclusive classrooms. Through readings, presentations, class discussions, and activities, students will acquire information and skills needed to implement evidence-based interventions approaches to assessment and intervention for students with ASD. As part of the final project, students will develop and deliver an assessment-based intervention for one of the suggested outcome areas.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: IL 2505

IL 2587 - SPECIAL TOPICS - INCLUSION

Minimum Credits: 3  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

IL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Minimum Credits: 3  
Maximum Credits: 3  
This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis
of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2591 - LITERACY TUTORING**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LSU Basis

**IL 2594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**IL 2596 - INTERNSHIP IN SPECIAL EDUCATION**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis

**IL 2598 - DIRECTED STUDY IN SP ED**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2690 - RESEARCH SEMINAR ONLINE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a required three-credit course for graduate level students in education. It offers opportunities for students to investigate research questions, collect and interpret data and present research documents. Overall, students will be expected to write and submit a research proposal, conduct the research described in the proposal, and use information in the proposal to write a research paper that describes their research. Students will also write an abstract of their research paper.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis
IL 2691 - SUPERVISED RESEARCH - EARLY CHILDHOOD

Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2698 - DIRECTED STUDY - EARLY CHILDHOOD

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

IL 2700 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues in or about the arts that are of concern to educators.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2701 - FIELD SEMINAR: PRIMARY PLUS

Minimum Credits: 1
Maximum Credits: 1
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies

IL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate
**IL 2710 - ADVANCED SOCIAL STUDIES METHODS**

Course Component: Seminar  
Grade Component: Grad Letter Grade

Minimum Credits: 3  
Maximum Credits: 3  
This course explores and examines theoretical discourses and advanced methods and materials for improving social studies instruction in the secondary (grades 7-12) social studies classroom. Course content, procedures, and activities focus on effective strategies for engaging and teaching learners from diverse backgrounds and developmental levels. Approaches include investigation and analysis of constructionist ideas, student empowerment, historical thinking, historiography, global citizenship, real-world connectedness, and various technologies as they apply to teaching and learning in the secondary social studies classroom.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2711 - SPECIAL TOPICS - FOREIGN LANGUAGE EDUCATION**

Course Component: Seminar  
Grade Component: Grad Letter Grade

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2712 - HISTORICAL THINKING AND HISTORIOGRAPHY: SECONDARY SOCIAL STUDIES CLASSROOM**

Minimum Credits: 3  
Maximum Credits: 3  
This online course is an examination of teaching strategies and techniques related to historical thinking and historiographical analysis in the secondary social studies classroom. Course participants will investigate recent research supporting historical thinking and historiographical analysis strategies and techniques, engage in various projects intended to increase their knowledge and skills in these strategies and techniques, and explore creative ways to enrich their own classroom instruction by getting students engaged in "doing" history.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** World Wide Web

**IL 2722 - PRACTICUM IN FOREIGN LANGUAGE**

Course Component: Practicum  
Grade Component: Grad HSU Basis

Minimum Credits: 1  
Maximum Credits: 3  
Prospective teachers experience the reality of teaching the foreign languages in a public school setting.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**IL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION**

Minimum Credits: 1  
Maximum Credits: 1  
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.
IL 2729 - PRACTICUM IN K-12 FOREIGN LANGUAGE 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction. In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction.

IL 2740 - PRACTICUM IN SECONDARY MATHEMATICS

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

IL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1

Minimum Credits: 3
Maximum Credits: 3
This first part of this two part methods course, which is offered on-campus in summer two, is designed to introduce the student to the elementary level travel skills (e.g., Use of human guidance) and procedures (e.g., Sensory development) used when teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Students begin their knowledge of teaching travel skills indoors and gradually transition to the introductory level outdoor environment. Students wear simulation materials designed to fully or partially occlude vision while traveling.

IL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES

Minimum Credits: 3
Maximum Credits: 3
This course is designed for students entering the teacher preparation program in mental and physical disabilities. Instruction concerning how to prepare for instruction, write lesson plans, and implement lessons is provided. Field observations and micro-teaching experiences are also provided.

IL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
Minimum Credits: 3
Maximum Credits: 3
This second part of a two part methods course, which builds upon the knowledge gained in IL 2750, is offered on-campus in summer two. It introduces the student to developing instructional strategies for teaching more complex o & m travel skills (e.g., Use of public transportation systems) and procedures (e.g., Use of tactile maps) to individuals who are blind or visually impaired who may also possess additional disabilities who travel in a variety of indoor and outdoor environments. The course also covers teaching strategies for serving the o & m needs of children as well as adults through simulated teaching activities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS

Minimum Credits: 3
Maximum Credits: 3
The focus of this online course is on designing assessment and instructional strategies for various populations of individuals who are blind or visually impaired. Specific populations to be examined include: persons with low vision, individuals with dual sensory loss (deaf blindness), infants and preschoolers, school-aged students, individuals with cognitive impairments, students with cortical visual impairments, and dog guide users.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: World Wide Web

IL 2780 - AUTISM ENDORSEMENT PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
As part of this practicum course, students will get practical experience working with students with ASD of various age groups in different educational and community settings. They will also get an in-depth experience at their primary practicum placement by working closely with a mentor teacher and a University supervisor on a variety of application-based projects. All practicum activities will be completed at an approved practicum site (E.G., Autistic support classroom in a public school; general education classroom). Students will acquire competencies related to assessment, intervention, and collaboration with professionals, families, and community organizations. The practicum meetings will be used for group supervision and sharing of the experiences, ideas, and challenges with a team of peers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505 and 2586

IL 2791 - SUPERVISED RESEARCH -FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
IL 2800 - STUDENT TEACHING-EARLY CHLDHD ED

Minimum Credits: 1
Maximum Credits: 10
Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 2803 - STUDENT TEACHING SEMINAR - PRIMARY PLUS

Minimum Credits: 1
Maximum Credits: 1
This course supports student teaching. Students work on topics such as instructional management, behavior management, lesson planning, addressing student needs for the department of education.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

IL 2804 - STUDENT TEACHING - PRIMARY PLUS

Minimum Credits: 2
Maximum Credits: 5
This is a 14-week student teaching experience under the guidance of a mentor teacher and a supervisor from the university. Students are expected to learn to plan for and teach all four elementary subject areas for an extended period of time during the course of the term. Towards the end of the term, the student teachers are also expected to take on primary teaching responsibility for all subject areas for two weeks.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3

Minimum Credits: 3
Maximum Credits: 3
This course builds upon teaching and learning in secondary English language arts 2 by emphasizing the role of assessment, long-term curricular planning, language and grammar instruction, process drama, and technology in effective English language arts instruction. The course will also introduce current controversies in English language arts instruction and ways that teachers can address them. Teacher candidates will have opportunities to develop instructional plans and practice teaching techniques while receiving feedback from peers and the course instructor.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2822 - INTERNSHIP IN FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 10
Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

IL 2824 - STUDENT TEACHING SEMINAR

1926
Minimum Credits: 1
Maximum Credits: 3
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2826 - STUDENT TEACHING SEMINAR-FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 2
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Attributes: Global Studies

IL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the development and support of learning contexts in which adolescents have opportunities to engage in challenging social studies learning. Drawing on cognitive change learning theory, teacher candidates learn to select and develop various assessments that reveal students’ thinking and to draw upon their understanding of students' ideas to scaffold learning experiences in the classroom. Emphasis is placed on instructional strategies that build and support students' capacity to engage in powerful social studies discourse.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 2
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

IL 2834 - SPECIAL TOPICS - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2842 - STUDENT TEACHING SEMINAR-MATHEMATICS

Minimum Credits: 1
Maximum Credits: 3
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

This course involves direct contact with preschoolers with disabilities. Students are placed in various types of supervised community settings where preschoolers with disabilities and their families are served. A seminar will be held weekly.

This course involves direct contact with infants and toddlers with disabilities. Students are placed in various types of supervised community settings where infants and toddlers with disabilities and their families are served. A seminar will be held weekly.

Teacher candidates engage in fieldwork five days a week in school sites with students with high incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.
Course Component: Internship
Grade Component: Grad HSU Basis

**IL 2854 - STUDENT TEACHING WITH LOW INCIDENCE OF DISABILITIES**

Minimum Credits: 3
Maximum Credits: 3
Teacher candidates engage in fieldwork five days a week in school sites with students with low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

Minimum Credits: 6
Maximum Credits: 6
Full or part-time clinical experience, minimum 350 clock hours of direct instruction is necessary to fulfill this course requirement. Students must be supervised by an on-site, full-time ACVREP certified O&M specialist, with supplemental support provided by university faculty. Placements are arranged by the vision studies program faculty. Students must be able to demonstrate teaching competence with a variety of individuals who are blind and visually impaired (i.e., Ages, cognitive level), as well as teaching competence in a variety of environments (i.e., Simple as well as complex travel settings) successfully in order to apply to take the national certification exam in O&M.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION

Minimum Credits: 2
Maximum Credits: 2
This weekly seminar is offered concurrently with the full-time student teaching requirement. The seminar permits teacher candidates to discuss and process situations and problems as they arise in the field and assists teacher candidates in the completion of program and student teaching requirements. A focus on the preparation of a professional portfolio prepares teacher candidates for the job search and interview process.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

IL 2860 - PRACTICUM IN SECONDARY SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher. Teacher candidates will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment, and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

IL 2861 - PRACTICUM IN SECONDARY SPECIAL EDUCATION - SPECIAL EDUCATION TEACHER PREPARATION
Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher and will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. This practicum experience will support the completion of assignments from coursework as well as prepare teacher candidates for the full-time student teaching experience.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**IL 2881 - INTERNSHIP-ENGLISH OR COM EDUC**

Minimum Credits: 1  
Maximum Credits: 9  
School-based practicum for graduate students seeking teacher certification and the master of arts in teaching degree. Requires a half-time placement for the entire year under the supervision of a mentor. Interns observe, analyze, and practice basic teaching skills in different grade levels and subject fields.  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad LG/SU3 Basis

**IL 2882 - INTERNSHIP - FOREIGN LANGUAGE**

Minimum Credits: 1  
Maximum Credits: 7  
In this course, students engage in supervised field work in a local school district. Students co-plan with their assigned mentor teacher and receive feedback from a university supervisor.  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Instruction and Learning (MAT)

**IL 2883 - INTERNSHIP - SOCIAL STUDIES**

Minimum Credits: 1  
Maximum Credits: 9  
School-based practicum for students seeking teacher certification and the master of arts in teaching degree. Requires placement for the entire school academic year under the supervision of a mentor teacher. Interns observe, analyze, and practice basic teaching skills while teaching the social studies at the secondary level.  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

**IL 2890 - ADVANCED TEACHING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 9  
Course designed for students seeking additional field teacher certification. Includes a school-based practicum in accordance with the student's experience and interests.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**IL 2891 - SUPERVISED RES - SOCIAL STUDIES**
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

IL 2898 - DIRECTED STUDY - SOCIAL STUDIES

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS

This course provides the foundation for teaching infants, toddlers, and preschoolers, in group settings in centers outside the home. Topics include developmentally appropriate curriculum and instruction, program design and implementation, legal compliance and program enhancement, family and community relations, professionalism, and advocacy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES

This interdisciplinary course focuses on the role of the professional in supporting families of young children with and without disabilities by linking them with formal and in formal community resources. The course explores rationale; family-centered principles; models and practices for supporting families; and considerations in the development of community resources. It surveys available resources through guest speakers, on-site visits, and the development of a resource directory.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

This course will focus on the role of the professional in supporting families of young children (pre-k - grade 4), including families of children with
disabilities and other diverse characteristics. Students will learn about family systems, including how family characteristics affect the development of children, how to communicate, interact, and collaborate with families in school settings, and how to link families with formal and informal community resources.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2928 - WEB LEGL & LEGISLTV FDS OF SP ED**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This web-based course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** World Wide Web

---

**IL 2990 - RESEARCH SEMINAR FOR MAT INTERNS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

---

**IL 3002 - CLASSROOM DISCOURSE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The purpose of this course is to introduce students to the theoretical underpinnings, methodological concerns, and pedagogical implications of the study of classroom discourse - the study of who can say what to whom, when and where, for what purposes, under what conditions, and with what outcomes in a range of classroom contexts. The course critically reviews empirical research on classroom discourse (both recent and classical investigations), and covers the accepted methods for conducting research on classroom discourse including different approaches to collecting, recording, and analyzing both verbal and nonverbal discourse. A range of theoretical approaches to analyzing discourse are also covered.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 3003 - RESEARCH INTERVIEWING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to introduce doctoral students to the theories and methodologies of research interviewing in the social sciences. The course introduces students to aspects of research interviewing such as designing research questions that can be answered through interview data, identifying potential participants, creating interview protocols, transcribing interviews, coding interviews, and recognizing the role/bias of the interviewer. The course will also teach students how to critically analyze the representation and use of interview data in educational research. Students are expected to read published studies, collect and analyze data from interviews, and critically evaluate various approaches in light of their own research questions.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 3004 - IDENTITY IN EDUCATIONAL SETTINGS**
Minimum Credits: 3
Maximum Credits: 3
Recent approaches to conceptualizing and studying identity in complex social environments will be reviewed through course readings and discussions. The historical background of this work will also be addressed. Particular attention will be paid to the identity development of students who are often marginalized in educational settings. Qualitative and interpretive methods for studying identity will also be covered. Students will be expected to actively participate in discussions and complete a term project (either a review of the literature or a small-scale study of identity formation).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3007 - CULTURE AND COGNITION

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the field of cultural psychology and its perspective on the language and thinking of children, adolescents, and adults. Research conducted from a cultural psychology perspective will be reviewed and applied to the assessment of the thinking, speaking, and acting of people from diverse ethnic, racial, economic, and national backgrounds. Instructional practices that have been employed with multicultural populations will be reviewed and evaluated. Students will be expected to actively participate in discussions and complete several short papers and one in-class presentation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3011 - THE STUDY OF TEACHING

Minimum Credits: 3
Maximum Credits: 3
Advanced graduate course for students interested in research on teachers and teaching. Covers mainstream and alternative paradigms, including behavioral, cognitive, and ethnographic modes of pedagogical inquiry. Offers a critical analysis of recent studies on the nature of expertise in teaching, and new approaches to teacher performance assessment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3012 - CRITICAL READING IN LANGUAGE LITERACY AND CULTURE 1

Minimum Credits: 3
Maximum Credits: 3
This course is part of a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3013 - CRITICAL READINGS IN LANGUAGE, LITERACY, AND CULTURE 2

Minimum Credits: 3
Maximum Credits: 3
This course is the second in a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate
IL 3014 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 1

Minimum Credits: 3  
Maximum Credits: 3  
This course is the first in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

IL 3015 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 2

Minimum Credits: 3  
Maximum Credits: 3  
This course is the second in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 3016 - PHD WRITING SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
This course is a writing workshop designed to provide LLC Ph.D. students beyond their first year of study with regular feedback on their academic writing, including research articles, grant proposals, and milestone documents.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

IL 3091 - SUPERVISED RESEARCH - SCIENCE

Minimum Credits: 1  
Maximum Credits: 6  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

IL 3098 - DIRECTED STUDY - SCIENCE

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

IL 3099 - DOCTORAL DISSERTATION RESEARCH - SCIENCE
Minimum Credits: 1  
Maximum Credits: 15  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

**IL 3248 - SPECIAL TOPICS-LANGUAGE AND LITERACY**

Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SU3 Basis

**IL 3291 - SUPERVISED RESEARCH-LANGUAGE, LITERACY, AND CULTURE**

Minimum Credits: 1  
Maximum Credits: 6  
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad HSU Basis

**IL 3295 - DIRECTED STUDY IN LANGUAGE, LITERACY, AND CULTURE**

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

**IL 3296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE**

Minimum Credits: 1  
Maximum Credits: 9  
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.  
Academic Career: Graduate  
Course Component: Full Time Dissertation  
Grade Component: Grad HSU Basis

**IL 3298 - DIRECTED STUDY - READING**

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis
IL 3299 - DOCTORAL DISSER RES - READING

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3391 - SUPERVISED RESEARCH IN LLC

Minimum Credits: 1
Maximum Credits: 9
The student works collaboratively with a sponsoring faculty member in carrying out a research project.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

IL 3398 - DIRECTED STUDY IN LLC

Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3399 - DOCTORAL DISSERTATION RES IN ENG

Minimum Credits: 1
Maximum Credits: 18
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1
Maximum Credits: 1
In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

IL 3470 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
In this course students will draw on the research literature and their own professional experiences to examine current practices of large- and small-scale assessment and teacher evaluation in mathematics and science education - both historically and in terms of their forms and purposes in today's educational and political climate. Current research and practice will be examined with respect to equity, theories of learning, methodology, and policy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3471 - INSTRUCTIONAL ISSUES IN MATH AND SCIENCES EDUCATIONS

Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to introduce students to current approaches to understanding and studying instructional practices in mathematics and science education. A historical perspective on the use of observations to document effective teaching will be reviewed. Students will be introduced to recent research on increasing students' agency, authority, and accountability through classroom discourse. Additional topics will include: the impact of high cognitive demand tasks on student learning and fostering equity in instruction. Students will apply course readings to the analysis of classroom artifacts and videotapes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3474 - COLLEGE SCIENCE TEACHING PRACTCM

Minimum Credits: 3
Maximum Credits: 3
Issues associated with higher education in the science disciplines are explored to develop a perspective for the college science instructor. Supervised teaching handout preparation, cognitive patterns of the adult, and evaluation of learning are studied.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

IL 3475 - PROFESSIONAL LEARNING IN MATH-SCIENCE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3476 - ASSESSMENT & EVAL IN MATH & SCIENCE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
International, national, and local perspectives on mathematics assessment will be presented. Areas include classroom and large-scale assessment and curriculum and program evaluation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

IL 3491 - SUPERVISED RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a
research project.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

---

**IL 3498 - DIRECTED STUDY - MATH**

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

---

**IL 3499 - DOCTORAL DISSERTATION RESEARCH - MATH**

Minimum Credits: 1  
Maximum Credits: 15  
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad LG/SU3 Basis

---

**IL 3501 - WEB FINANCING SPECIAL EDUCATION**

Minimum Credits: 1  
Maximum Credits: 1  
This web-based course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** World Wide Web

---

**IL 3509 - ADV SEMINAR: EARLY INTERVENTION**

Minimum Credits: 3  
Maximum Credits: 3  
This course will acquaint students with the latest research in early education and will apply those findings to infants, toddlers and preschoolers with disabilities.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

---

**IL 3526 - PRACTICUM IN COLLEGE TEACHING**

Minimum Credits: 1  
Maximum Credits: 3  
Students prepare and teach a course under the direct supervision of a faculty member.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade
IL 3536 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3  
Maximum Credits: 3  
Course covers single subject research methodology applied in studies involving exceptional populations. 
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade

IL 3541 - WEB INSTRNL PRACTICES SP EDUC

Minimum Credits: 3  
Maximum Credits: 3  
This web-based course focuses on the most current research on instructional practices for students with disabilities and prepares the prospective supervisor for what should be happening in special education classrooms and in the provision of special education services. 
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Attributes: World Wide Web

IL 3542 - WEB CURRNT ISSUES & TRENDS SP ED

Minimum Credits: 3  
Maximum Credits: 3  
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Attributes: World Wide Web

IL 3548 - SPECIAL TOPICS-SPEC EDUCATION

Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within program.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

IL 3564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

Minimum Credits: 3  
Maximum Credits: 3  
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 3565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES

Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN ABA

Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACB) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as
well as to seek support and ideas from classmates.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

---

**IL 3571 - SUPERVISION AND FINANCING OF SPECIAL EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
This course reviews problems and practices in special education supervision. Emphasis is placed in increasing interpersonal skills and developing technical skills in observing, planning and evaluating instruction. The course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Online

---

**IL 3577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4**

Minimum Credits: 2  
Maximum Credits: 3  
This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

---

**IL 3578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS**

Minimum Credits: 3  
Maximum Credits: 3  
This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in aba i through aba v. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: IL 3564 and 3565

---

**IL 3579 - TREATMENT FIDELITY AND COACHING: AUTISM**

Minimum Credits: 3  
Maximum Credits: 3  
This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: IL 2505
IL 3585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

IL 3591 - SUPERVSD RESEARCH IN SPECIAL EDUC

Minimum Credits: 1
Maximum Credits: 9
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3592 - SUPERVISION PRACTICUM IN SP ED

Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional supervision skills. This practicum may be completed in conjunction with the professional sequence of coursework in supervision at approved educational sites.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 3593 - RESEARCH PRACTICUM IN SPEC EDUC

Minimum Credits: 1
Maximum Credits: 3
Course is a field-based internship in research methodology. Purpose of the course is to provide opportunities for students to get hands-on experience and direct supervision in the development, implementation and dissemination of educational research.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

IL 3594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1
Minimum Credits: 1
Maximum Credits: 3
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 3596 - INTERNSHIP IN SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 3
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

IL 3598 - DIRECTED STUDY IN SP ED

Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3599 - DOCTRL DISSER RES - SPECIAL ED

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3702 - SPECIAL PROJECT FOREIGN LANGUAGE EDUCATION PHD

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Attributes: Asian Studies

IL 3791 - SUPERVISED RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IL 3798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3799 - DOCTORAL DISSERTATION RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3891 - SUPERVISED RES - SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

IL 3898 - DIRECTED STUDY - SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3899 - DOCTRL DISSER RES-SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3928 - WEB LEGL & LEGISLTV FDS OF SP ED

Minimum Credits: 3
Maximum Credits: 3
This course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Integrative Molecular Biology**

**IMB 2000 - LABORATORY RESEARCH ROTATIONS**

**Minimum Credits:** 1  
**Maximum Credits:** 9  
Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. To capitalize on the cross campus nature of the program, students are required to distribute the rotations between participating laboratories in the Department of Biological Sciences and the School of Medicine.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**IMB 2050 - PIMB RESEARCH SEMINAR**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**IMB 2080 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

**IMB 2090 - MS THESIS RESEARCH**

**Minimum Credits:** 1  
**Maximum Credits:** 14  
A directed research project which results in a thesis for a master's degree.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**IMB 3090 - PHD DISSERTATION RESEARCH**

**Minimum Credits:** 1  
**Maximum Credits:** 14
A directed research project which results in a dissertation for a doctoral degree.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

## Integrative Systems Biology

### ISB 2000 - LABORATORY RESEARCH ROTATION

**Minimum Credits:** 1  
**Maximum Credits:** 9  
Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. To capitalize on the cross campus nature of the program, students are required to distribute the rotations between participating laboratories in the Department of Biological Sciences and the School of Medicine.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

### ISB 2010 - APPROACHES IN MOLECULAR BIOLOGY

**Minimum Credits:** 5  
**Maximum Credits:** 5  
The semester-long approaches in molecular biology course is divided into three separate modules and will meet three times a week. Each week there will be two 1.5-Hour lectures and a 2-hour discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three modules are: 'cancer: regulation and misregulation of cell growth and control', 'heart disease: molecular and cellular foundations', and 'viral diseases: life cycle and evolution of prokaryotic and eukaryotic viruses'. The course will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ISB 2011 - APPROACHES IN MOLECULAR BIOLOGY 1: CANCER

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

### ISB 2012 - APPROACHES IN MOLECULAR BIOLOGY 2: HEART DISEASE

**Minimum Credits:** 2  
**Maximum Credits:** 2
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

### ISB 2013 - APPROACHES IN MOLECULAR BIOLOGY 3: VIRAL DISEASES

**Minimum Credits:** 2  
**Maximum Credits:** 2  

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

### ISB 2020 - SYSTEMS BIOLOGY 1

**Minimum Credits:** 3  
**Maximum Credits:** 3  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ISB 2022 - APPROACHES IN MOLECULAR BIOLOGY 2: MODELING HUMAN DISEASE

**Minimum Credits:** 2  
**Maximum Credits:** 2  

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be one day of lecture and two discussion sections at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, modeling human disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PhD, ND) or Integrative Molecular Biology (PhD, ND)

### ISB 2023 - APPROACHES IN MOLECULAR BIOLOGY 3: COMPUTATIONAL SYSTEMS BIOLOGY OF DISEASES

**Minimum Credits:** 2  
**Maximum Credits:** 2  

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, modeling human disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PhD, ND) or Integrative Molecular Biology (PhD, ND)
are analyzed. The titles of the three course modules are: cancer, heart disease, and computational systems biology of disease. Although each module is distinguished by its focus on the molecular basis of human diseases, in module 3 we will use disease paradigms as means to explore questions of fundamental significance in the field of modern computational and systems biology. We will cover a variety of topics, from collection and analysis of high-throughput disease data, to viral diseases and drug design. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental and computational methods in modern biomedical research.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (MSIMB-PHD or IMB-PHD)

### ISB 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills. The course is designed for first-year graduate students in the corresponding fields of study. There will be a 1-hour lecture a week with time allocated for two 1-hour recitations. Both the lecture and recitations need to be scheduled in a computer lab (such as our classroom).  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ISB 2035 - SYSTEMS BIOLOGY II

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to the use of model organisms and cell systems as research models. General and specific imaging approaches and imaging tools used to study these models will be covered. Model systems to be discussed include mouse, zebrafish, cell culture, yeast and C. elegans. Emphasis will be placed on the strengths that specialized techniques of each organism provide to the biomedical research community.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ISB 2050 - ISB RESEARCH SEMINAR

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

### ISB 2055 - SCIENCE WRITING

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course will help students prepare to write their comprehensive exam proposals and will address other essential science communication skills, including research papers, oral and poster presentations, pitching ideas to industry, and web-based communication platforms.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ISB 2060 - ISB CONFERENCE
This course will present an opportunity for students to become familiar talking about critical aspects of being a researcher that they deem important including but not limited to, current scientific literature, biological, biostatistical, or computational principles, laboratory techniques, and research-in-progress (RIP) reports. Each week, two students will lead 30 minute discussions either on their own primary research, or on topics of their choosing. For each presenter, time is allocated for questions and discussion of the relevant conclusions to allow development of presentation skills.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**ISB 2070 - THE BEDSIDE TO BENCH**

This course introduced graduate students to biomedical research in a comprehensive format integrating organ system biology and clinical medicine with critical developments in the basic science research literature. Course topics include renal-electrolyte, cardiology, cancer, pulmonology, infectious diseases, endocrinology, neurology, rheumatology, and immunology, hepatology and liver disease, gastroenterology, geriatrics, and hematology/oncology. Course work includes an overview of each biomedical field, clinical tours, discussions with leading physicians on the current challenges in patient care, and analysis of the basic science literature in a journal club forum.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis

**ISB 2075 - EVOLUTIONARY BIOLOGY OF HUMAN DISEASE**

Evolution is a fundamental unifying principle of biology. This class takes a broad approach to illustrate how an evolutionary perspective augments medical research and practice. Topics covered range from the evolution of human populations, to antibiotic resistance, and include medical conditions as diverse as diabetes, cardiovascular disease, cancer or aging.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ISB 2080 - DIRECTED STUDY**

This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Integrative Systems Biology (PHD)

**ISB 2090 - MS THESIS RESEARCH**

A directed research project which results in a thesis for a master's degree.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**ISB 3090 - PHD DISSERTATION RESEARCH**
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a dissertation for a doctoral degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Integrative Systems Biology (PHD)

Intelligent Systems

ISSP 2000 - MS RESEARCH

Minimum Credits: 1
Maximum Credits: 9
Research and thesis MA degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2015 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2016 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (people, data and knowledge, and evaluation).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ISSP 2017 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (CS 1501 Algorithm Implementation; MIN GRADE C or TRANSFER) and (CS 2710 Foundations of Artificial Intelligence; MIN GRADE B or TRANSFER)

ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS

Minimum Credits: 1
Maximum Credits: 1
This course is an immigration course for the intelligent systems students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Minimum Credits: 1
Maximum Credits: 1
This course is a continuance of ISSP 2020. It is an immigration course for the intelligent systems students. Students continue with this course by carrying out their projects developed in ISSP 2020 and giving presentations presenting their results.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2070 - PROBABILISTIC METHODS

Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ISSP 2081 - FOUNDATIONS OF BIOINFORMATICS

Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2083 - BIOMDCL INFORMATICS JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
This course meets once each week for one hour. The research being presented will be taken from recent journal papers.
Academic Career: Graduate
ISSP 2090 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1
Maximum Credits: 6
This course is designed for people who want a practicum experience in working with advanced information technology in the center for biomedical informatics.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2130 - INFORMATION STORAGE & RETRIEVAL

Minimum Credits: 3
Maximum Credits: 3
Problems and techniques related to storing and accessing unstructured information with an emphasis on textual information. Overview of several approaches to information access with a primary focus on search-based information access. Covers automated retrieval system design, content analysis, retrieval models, result presentation, and system evaluation. Examines applications of retrieval techniques on the web, in multimedia and multilingual environments, and in text classification and event tracking.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ISSP 2160 - FOUNDTS OF ARTIFICIAL INTELLGNCE

Minimum Credits: 3
Maximum Credits: 3
The principal topics of AI are: representation knowledge, reasoning and problem solving, knowledge acquisition and machine learning, robotics, and natural language understanding. This course surveys these areas in order to provide an understanding of artificial intelligence methods and research problems. Specific topics include: action and object-centered representations, the search paradigm, planning and constraint satisfaction, qualitative reasoning, analogical reasoning, default reasoning, induction, other methods of learning, and knowledge engineering.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2170 - MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2180 - COMPUTER VISION
Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (PhD)

ISSP 2221 - HUMAN INFORMATION PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with implications for user interface design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2230 - INTRO NATURAL LANGUAGE PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall systems architectures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2240 - DECISION ANAL & DECISION SUPPORT SYS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2280 - ADAPTIVE INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2430 - SOCIAL COMPUTING
Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS or PHD)

**ISSP 2900 - GRADUATE INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 3  
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

**ISSP 2902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Directed study.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

**ISSP 2990 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Independent study.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

**ISSP 3000 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1  
Maximum Credits: 9  
Research and dissertation Ph.D.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

**ISSP 3120 - ADV TOPCS NATURAL LANG PROCSSNG**

Minimum Credits: 3  
Maximum Credits: 3  
Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more.
deeply, and to discuss recent advances in (NLP).

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: ISSP 2230 or CS 2731 or INFSCI 2420; PLAN: Intelligent Systems (MS, PHD)

**ISSP 3180 - VISUAL LANGUAGES AND PROGRAMMING**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will include fundamentals of formal language theory, iconic and symbolic representations, formal theory of iconic systems, icon operators and semantics, icon oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual database systems, iconic indexing, and advanced topics.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

**ISSP 3535 - ADV TOPICS IN MACHINE LEARNING**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: ISSP 2170 or CS 2750; PLAN: Intelligent Systems (MS, PHD)

**ISSP 3565 - ADV TOPICS ARTIFICIAL INTELLIGENCE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will survey current topics in artificial intelligence.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

**Interdis Biomed Grad Prog**

**INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE**

- **Minimum Credits:** 8
- **Maximum Credits:** 8

Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PLAN: Molecular Biophy & Struct Bio (PHD) or Interdis Biomedical (UNK)

**INTBP 2001 - FOUNDATIONS OF BIOMEDICAL SCIENCE STRUCTURAL BIOLOGY**
Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue, and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

**INTBP 2005 - FOUNDATIONS CONFERENCE**

Minimum Credits: 4
Maximum Credits: 4
Contemporary approaches to problem-solving in biology, as well as principles underlying modern methods of biomedical research will be integrated with the lecture component of the course through an analysis of mechanisms underlying biological phenomena. Students will present papers, critically analyze data and devise experimental approaches to biomedical problems considered in lecture.

**INTBP 2010 - LABORATORY RESEARCH ROTATION**

Minimum Credits: 1
Maximum Credits: 1
This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/ her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

**INTBP 2011 - LAB RESEARCH ROTATION SUPPLEMENT**

Minimum Credits: 2
Maximum Credits: 4
Course supplement to INTBP 2010 for those students initiating their first rotation in summer.

**INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS**

Minimum Credits: 3
Maximum Credits: 3
Experimental biologists formulate hypotheses and models, design experiments, collect data and conduct analyses to draw conclusions. Deep understanding on biological principles requires D2K- the translation of data into knowledge that transcends first-order conclusions. This course for first year Ph.D. students in the biomedical sciences will examine basic principles of experimental design, together with measurement and sources of experimental error. The course will provide practical “hands on” introduction to the quantitative tools required for experimental research using cellular, molecular, and systems based methods. Topics will include: goals of experimental design, making measurements, principles or parametric and non-parametric statistical inference, use of MS excel, graphpad prism and R, design of publication graphics and a brief introduction to big data approaches. Students will work in small groups to construct capstone projects by making ‘you tube’ style videos to illustrate key principles of experimental design and analysis.
Course Component: Lecture  
Grade Component: Grad Letter Grade

**INTBP 2090 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in degree-granting programs under the interdisciplinary biomedical graduate program.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**INTBP 2100 - BIOLOGY OF VISION**

Minimum Credits: 3  
Maximum Credits: 3  
This course is being designed to meet the requirements of the t-32 training grant (t32 ey017271-01 interdisciplinary visual science training program) from NIH. The target students are the graduate students, fellows and residents in the department of ophthalmology. In addition, the post-doctoral fellows working in the department of ophthalmology will be encouraged to take this course. We are planning to cover a wide array of subjects including the ocular anatomy, embryology, biochemistry, pharmacology, immunology, microbiology and genetics.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH**

Minimum Credits: 1  
Maximum Credits: 1  
The course is an introduction to the basic ethical issues which arise in the course of conducting scientific research. It is intended for graduate students and fellows in the biomedical sciences who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by discussion of issues in small groups.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Computational Biology (PHD) or Molecular Biophy & Struct Bio (PHD) or Computational Biology (PHD) or Integrative Molecular Biology (PHD) or Interdis Biomedical (UNK)

**INTBP 3240 - GRANT WRITING FOR GRADUATE STUDENTS**

Minimum Credits: 2  
Maximum Credits: 2  
This course teaches fundamental grantmanship skills using actual NIH training grant submissions. Students construct a competitive research training grant and are instructed on methods to identify funding sources. This course consists of introductory lectures followed by a series of workshops staffed by the IBGP training faculty. Workshops cover peer scientific review and study section operation, avoidance of common pitfalls in grant writing, grant writing ethics and scientific community service.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

**Interdisciplinary**

**BIND 2024 - CONSULTING FIELD PROJECT**
This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by Katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported three Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey cup.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

**BIND 2035 - APPLICATION GAME THEORY MANAGING DECISION MAKING**

This course demonstrates how insights of game theory can be utilized by managers to address important decisions confronting the firm. The interaction of a business firm with its competitors, customers and suppliers can be formalized as a game situation. We will utilize game theoretic reasoning to analyze issues to entry into new markets or exit from established businesses, investment in research and development, the extent of product differences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BECN 2401; PROG: Katz Graduate School of Business

**BIND 2060 - INDEPENDENT STUDY BUSINESS ADMINISTRATION**

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BIND 2061 - INDEPENDENT STUDY ENTREPRENEURSHIP/SMALL BUSINESS**

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BIND 2063 - INDEPENDENT STUDY INTERNATIONAL BUSINESS**

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BIND 2064 - INDEPENDENT STUDY ENTREPRENUERSHIP**
Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BIND 2065 - INDEPENDENT STUDY IN BUSINESS ADMINISTRATION 2

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BIND 2066 - KATZ EXCHANGE: WHU

Minimum Credits: 3
Maximum Credits: 3
The WHU MBA European Summer Program comprises a two-week course on "The Changing Environment for International Business in Europe" on the attractive campus in Vallendar, located just outside of Koblenz in the valley of the Rhine River. The program is designed for MBA students of WHU's partner schools in their second year who are interested in International Business, Finance, and Corporate Strategy. Students who successfully complete the course will be able to transfer back three (3) credits. In order to be eligible for consideration, students must apply through the Pitt Study Abroad website, www.abroad.pitt.edu.
Academic Career: Graduate
Course Component: Independent Study

Grade Component: Grad SN Basis
BIND 2070 - HEALTH CARE LAW FOR MANAGERS

Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course will introduce students to legal, ethical, and policy issues relevant to those in management roles in the health care system. Topics explored will include an overview of the U.S. legal system and policymaking, health care ethics, public health law, liability of health care providers and their institutions, health care reform and access to care, health care fraud and abuse, antitrust, consent for treatment and withholding of consent, fraud and abuse, and health privacy in the digital age.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade

BIND 2071 - LEADING EVIDENCE-BASED ORGANIZATIONAL CHANGE

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the key processes of effective organizational change and the acquisition of the best available evidence from science, organizations, stakeholder, etc. to inform the change process. Our objective is to provide evidence-based frameworks and tools for successfully introducing and sustaining organizational change in healthcare organizations.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade

BIND 2072 - ENTREPRENEURSHIP START-UP ESSENTIALS

Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course introduces students to the journey of starting a firm. Students will learn through experience how to prepare and deliver an "elevator pitch", put together a team and a team contract, think about stakeholders and conduct stakeholder interviews, and learn how to design small experiments that give insight into the product/service and potential customers.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade

BIND 2101 - PRACTICUM FOR EMBA HEALTHCARE STUDENTS

Minimum Credits: 6  
Maximum Credits: 6  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad Letter Grade

BIND 2111 - LANGUAGE ASSESSMENT WORKSHOP

Minimum Credits: 0  
Maximum Credits: 0  
This 12 week workshop is designed to enhance international students speaking and comprehension abilities. Students will engage in various exercises and real life scenarios.  
Academic Career: Graduate  
Course Component: Workshop  
Grade Component: Grad HSU Basis  
Course Requirements: Katz Grad School of Business students only.

BIND 2123 - CONSULTING FIELD PROJECT 2
Minimum Credits: 3
Maximum Credits: 3
This course is to provide MBA students with a meaningful and measurable business experience. Students should view projects as providing a unique opportunity to apply the various analytical tools and concepts taught at KATZ, in such a way as developing creating and useful business solutions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIND 2024; PROG: Joseph M. Katz Grad Sch Bus

BIND 2131 - GLOBAL CONSULTING PROJECT 1

Minimum Credits: 1.5
Maximum Credits: 1.5
Intent of the course is, through experiential learning, to guide students in addressing global business problems. This is accomplished by providing students with a real corporate problem or issue whose roots are cross-functional, and whose solution requires global research and a global perspective. Students should expect global travel. The course is conducted across the fall and spring terms, providing the student with travel time during the various school breaks during Thanksgiving, the Christmas holidays and at other times as agreed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIND 2024; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BIND 2132 - GLOBAL CONSULTING PROJECT 2

Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BIND 2131.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

BIND 2163 - GLOBAL ISSUE WORKSHOP

Minimum Credits: 0
Maximum Credits: 0
This number will serve as a billing course for the Global Issue Workshop (BIND 2263). May also serve as billing course for (BIND 2164 and BIND 2165).

Academic Career: Graduate
Course Component: Workshop
Grade Component: Non-Graded Component

BIND 2164 - GLOBAL ISSUE WORKSHOP 1

Minimum Credits: 1.5
Maximum Credits: 1.5
Students conduct an extensive analysis of a structural or external issue affecting an organization or industry abroad. A student team carries out in-depth international business research in the U.S. and travels abroad to conduct field research and speak to industry and organization experts.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

BIND 2165 - GLOBAL ISSUE WORKSHOP 2

Minimum Credits: 1.5
Maximum Credits: 1.5
Continuation of BIND 2164
BIND 2200 - INTEGRATED PROJECT FOR MBA/MS IN ENGINEERING PROGRAM

Minimum Credits: 2  
Maximum Credits: 2
All students in the MBA/MS in engineering joint degree program are required to complete an integrated project for a company or some other facility. Oversight of this project will be the joint responsibility of a faculty member from KGSB and one from the student's engineering department. It is the student's responsibility to identify these faculty members; program advisors will assist the student in this effort. Students must present a one or two page proposal prior to the start of the project outlining what they plan to do over the course of the project. Ideally, the project should blend skills learned from the business and engineering components of the program. The proposal must be approved by the business and engineering faculty members overseeing the project.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

BIND 2203 - ORGANIZATIONAL TRANSFORMATION

Minimum Credits: 2  
Maximum Credits: 2
This course recognizes the interrelated web of economic, social, political, and technological forces in the global economy that require organizations to transform their systems and processes—continuously and radically—if they wish to survive and succeed.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BOAH 2401 or 2409; PROG: Katz Grad School of Business (PKATZ)

BIND 2204 - MANAGING THE PROFESSIONAL SERVICES FIRM

Minimum Credits: 2  
Maximum Credits: 2
This 1.5 Credit course is intended for MBA and masters of accounting (MACC) students interested in professional consulting. By the end of this course, students should be able to intelligently discuss the practice of professional consulting, be their intent in business, it or accounting professions. Additionally, the student will gain an understanding for the highly fluid and evolving environment in which professional advisors operate, and how these professionals add value to their clients. Finally, students are made aware of key issues in managing the professional services firm, including scoping out client engagements, organizing and directing professional staff, handling clients and developing practical recommendations. Clinical professor bud smith is instructor, assisted by practicing professionals from the field.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

BIND 2231 - GLOBAL CONSULTING PROJECT

Minimum Credits: 3  
Maximum Credits: 3
Intent of the course is, through experiential learning, to guide students in addressing global business problems. This is accomplished by providing students with a real corporate problem or issue whose roots are cross-functional, and whose solution requires global research and a global perspective. Students should expect global travel. The course is conducted across the fall and spring terms, providing the student with travel time during the various breaks during Thanksgiving, the Christmas holidays, and at other times as agreed.

BIND 2263 - GLOBAL ISSUE WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
Students conduct an extensive analysis of a structural or external issue affecting an organization or industry abroad. A student team carries out in-depth international business research in the U.S. and travels abroad to conduct field research and speak to industry and organization experts.

Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

BIND 2444 - MANAGEMENT SIMULATION CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
The Management Simulation Capstone course has students perform the role of an executive in a simulated competitive industry over numerous fiscal years in order to apply and demonstrate the academic and professional development skills acquired in other core courses. The course expects that students will develop and implement a strategic management process in a complex competitive environment using a range of business tools and skills to compete successfully against other talented management teams. This is accomplished through interpreting/analyzing market data and diagnosing the factors affecting a company's prior-year performance; evaluating the strategies and actions of rival companies; identifying strategic actions with good prospects for improving company performance; and identifying promising ways to build competitive advantage, improve operating efficiency, and cope effectively with fluctuating exchange rates, tariffs, and other global market factors. Furthermore, this capstone course provides a platform for professional development as students develop their strengths, give and receive feedback, and communicate effectively to influence a wide range of stakeholders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2401 and BQOM 2401 and BFIN 2409 and BMKT 2409

BIND 2510 - EXECUTIVE BOARDROOM SERIES 1

Minimum Credits: 1
Maximum Credits: 1
This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->p.m.->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on the potential contribution(s) of this course to the student's education and/or career goals.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BIND 2511 - EXECUTIVE BOARDROOM SERIES 2

Minimum Credits: 1
Maximum Credits: 1
This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in earlier courses including part 1 of this course. Students are engaged in a structured understanding of the "businesses of pharmacy in health care, and related fields that impact the profession in an executive boardroom format. This (one credit) is the second part of an elective series (offered on alternating years) which focuses on "entrepreneurship in medicines and health care". This course analyzes the fundamentals of entrepreneurship amongst successful executive finders, binders, and minders.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.
BIND 2526 - BUSINESS PROCESS REDESIGN

Minimum Credits: 2
Maximum Credits: 2
Using a cross functional perspective, the course presents tools for the redesign of business processes, shows participants how to diagnose process problems, and explains how to generate and implement process redesign projects in different types of organizations. After the course, participants should be able to generate and implement business process redesign projects of their own.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BIND 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING

Minimum Credits: 3
Maximum Credits: 3
Accelerated Intermediate Financial Reporting fulfills the prerequisites of Intermediate Financial Reporting 1 and Intermediate Financial Reporting 2 for students who are entering the MACC program. This course studies the preparation, communication, interpretation and analysis of financial data with emphasis on the information needs of users of financial information prepared under USGAAP. General topics covered in this course include revenue recognition, inventory accounting, long term assets and impairment, investments, current liabilities and contingencies, long term liabilities, capital and retained earnings, leases, pensions and postretirement benefits, income taxes, and preparation of the statement of cash flows. Students are expected to have an accounting background. This course is designed to sit on top of an existing foundation in accounting and will assume students already have taken several financial accounting courses or knowledge obtained through work experience. It is expected that students are fluent with accrual accounting and the accounting cycle and that they have already studied some of the topics in the course in depth. The course will move quickly.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

BIND 2554 - ENTERING FOREIGN MARKETS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to enhance students' awareness of the operational and legal challenges associated with three types of market-entry strategies: exporting, licensing/franchising, and foreign direct investment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BIND 2556 - DOING BUSINESS IN CHINA

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: EMBA Worldwide

BIND 2560 - PROFESSIONAL COMMUNICATION IN MANDARIN 1

Minimum Credits: 2
Maximum Credits: 2
This language course is offered by the international business center (IBC) and the graduate school of public and international affairs (GSPIA) and is specifically designed for graduate students in business, public administration, and international affairs.

Academic Career: Graduate
**BIND 2561 - PROFESSIONAL COMMUNICATION IN MANDARIN 2**

- **Course Component:** Seminar
- **Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This language course is offered by the international business center (IBC) and the graduate school of public and international affairs (GSPIA) and is specifically designed for graduate students in business, public administration, and international affairs. This is a continuation of BIND 2560, Professional Communication in Mandarin 1.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIND 2560 or PIA 2029; PROG: Joseph M. Katz Grad Sch Bus

**BIND 2600 - MIB PRACTICUM COURSE**

- **Course Component:** Practicum  
- **Grade Component:** Grad LG/SU3 Basis  
- **Course Requirements:** Katz Grad School of Business students only.

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is intended to give students in the MBA/MIB dual degree program practical experience in their fields (finance marketing, MIS, etc.). Students will work fulltime for a period of approximately 4 months in an organization located in countries other than their own native countries. The internship location will be based on near-native competence in a second language.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Course Requirements:** Katz Grad School of Business students only.

**BIND 2602 - CPT INTERNSHIP**

- **Course Component:** Credit Laboratory  
- **Grade Component:** Grad HSU Basis  
- **Course Requirements:** Katz students only.

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course prepares the student for their internship opportunity and helps them to leverage the internship experience by focusing on career management, organization and people skills in the context of global executive mobility. Students are provided with a unique opportunity to apply the skills taught at Katz in a practical manner. Each student completes a project during an internship or co-op experience for an employer, which may be a for-profit, non-profit or governmental agency. The employer will sign-off that the student has completed the project. A faculty advisor is assigned to the student. The student is required to attend a one-hour orientation session prior to the internship. The student will attend a full-day global executive skills workshop upon completion of the internship, where the student will provide an executive level presentation to the class. The emphasis is on practical skills to enhance professional success in today's globally mobile business environment for managers. This course is for Katz students only.

**Academic Career:** Graduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Grad HSU Basis

**BIND 2700 - MIB INTERNSHIP SEMINAR**

- **Course Component:** Lecture  
- **Grade Component:** Grad LG/SU3 Basis  
- **Course Requirements:** Katz Grad School of Business students only.

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Exclusively designed for MIB students post internship experience.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BIND 2702 - GLOBAL RESEARCH PRACTICUM: LATIN AMERICA**
Minimum Credits: 3  
Maximum Credits: 3
