Covers the technology, concepts, issues and principles that are important in the design and implementation of secure e-commerce systems. Examines technology for protecting electronic commerce. It will include discussion of basic security principles, as well as the issues, policy and standards particular to e-commerce applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INFSCI 2560; CREQ: (INFSCI 2150 or TELCOM 2810); PROG: School of Information Science or Sch Computing and Information

INFSCI 2739 - WEB SERVICES AND DISTRIBUTED COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Looks at advanced techniques to client server computing. Covers design techniques necessary for organizing very large web sites. Integrates the knowledge and skills from e-business and web technologies to develop a functioning distributed application using web services, RMI, RSS, AJAX, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INFSCI 2550 and 2730; PROG: School of Information Science

INFSCI 2750 - CLOUD COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the concepts and design principles behind existing cloud solutions. Topics include large scale data processing techniques such as mapreduce/hadoop and its related ecosystem, overview of virtualized commercial cloud models, system virtualization, hypervisors and virtualized platforms. Design of cloud storage systems such as key-value stores and geographically distributed storage systems. Introduction to security and privacy issues in cloud computing, issues of data and execution privacy in modern commercial cloud services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1)); PLAN: School of Information Sciences

INFSCI 2780 - INTERACTIVE GRAPHICS

Minimum Credits: 3

Maximum Credits: 3

Computer graphics, point plotting techniques, line drawing display, clipping and windowing, display lines, geometric models, picture structure, graphic input devices and techniques, event handling, raster graphics, solid area scan conversion, three-dimensional graphics, shading, and user-interface design related to the associated behavioral factors in INFSCI 2300 and INFSCI 2350.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Minimum Credits: 3

Maximum Credits: 3

Introduction to geographic information system (GIS) concepts and technology including spatial data sources, spatial data models and structures, spatial database management, map projection systems, geocoding and Georeferencing, spatial analysis, spatial data visualization (maps), GIS applications (e.g., Address-location finding, navigation, routing), and commercial GIS software packages.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2802 - LOCATION-BASED SERVICES

Minimum Credits: 3

Maximum Credits: 3

Internet GIS, distributed geo-processing on the internet, mobile GIS, location-based services, navigation systems and services, social networking, and a selection of emerging applications possible through mobile GIS and location-based services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

INFSCI 2809 - SPATIAL DATA ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

Geospatial data collection, geospatial data structures and indexing, geospatial analysis, data quality, geospatial data structures and algorithms for surfaces, spatiotemporal databases, and digital terrain modeling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

INFSCI 2821 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

INFSCI 2872 - E-BUSINESS

Minimum Credits: 3

Maximum Credits: 3

Conceptualization of e-business in the context of markets, business practices, and information theoretic contexts. Implementation of e-business websites and services via various programming languages. End-user e-commerce, business-to-business e-commerce, and enterprise computing--e.g., supply chain models. Related technologies in document processing, telecommunications, and security.

Academic Career: GRAD

Course Component: Lecture

Independent studies are intended to cover advanced material outside of or beyond the scope of current course offerings.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2980 - PRACTICUM

Minimum Credits: 3
Maximum Credits: 6
For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

INFSCI 2982 - INFORMATION SCIENCE COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

INFSCI 2995 - THESIS

Minimum Credits: 3
Maximum Credits: 3
The thesis is a report of original, theoretical, or laboratory work suitable for publication.
Academic Career: Graduate

Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

Minimum Credits: 3

Maximum Credits: 3

An introduction to the purpose and nature of doctoral studies in information science, theories and processes in scholarly research and the current state of research in the discipline. Graduate faculty in the program will present and discuss their current interests with students.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

INFSCI 3150 - SEMINARS: SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Analysis of journal articles, books, and conference proceedings involving issues in information science. Techniques for preparing for the preliminary and comprehensive examinations.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Plan: Information Science (PhD)

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Information Science (PHD); CUM GPA: 3.25

Integrative Molecular Biology

IMB 2000 - LABORATORY RESEARCH ROTATIONS

Minimum Credits: 1

Maximum Credits: 9

Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. To capitalize on the cross campus nature of the program, students are required to distribute the rotations between participating laboratories in the Department of Biological Sciences and the School of Medicine.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

IMB 2050 - PIMB RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

IMB 2080 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

IMB 2090 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

IMB 3090 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a dissertation for a doctoral degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

Integrative Systems Biology

ISB 2000 - LABORATORY RESEARCH ROTATION

Minimum Credits: 1

Maximum Credits: 9

Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. There will be two 1.5 hour lectures a week which will often include an in-class practical exercise. There are weekly programming assignments and a final project and presentation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2035 - SYSTEMS BIOLOGY II

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the use of model organisms and cell systems as research models. General and specific imaging approaches and imaging tools used to study these models will be covered. Model systems to be discussed include mouse, zebrafish, cell culture, yeast and *C. elegans*. Emphasis will be placed on the strengths that specialized techniques of each organism provide to the biomedical research community

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2050 - ISB RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.

Academic Career: GRAD

Course Component: Seminar

Grade Component: Grad HSU Basis

ISB 2055 - SCIENCE WRITING

Minimum Credits: 1

Maximum Credits: 1

This course will help students prepare to write their comprehensive exam proposals and will address other essential science communication skills, including research papers, oral and poster presentations, pitching ideas to industry, and web-based communication platforms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2060 - ISB CONFERENCE

Minimum Credits: 1

Maximum Credits: 1

This course will present an opportunity for students to become familiar talking about critical aspects of being a researcher that they deem important including but not limited to, current scientific literature, biological, biostatistical, or computational principles, laboratory techniques, and research-in-progress (RIP) reports. Each week, two students will lead 30 minute discussions either on their own primary research, or on topics of their choosing. For each presenter, time is allocated for questions and discussion of the relevant conclusions to allow development of presentation skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

ISB 2061 - PRACTICAL TRAINING COURSE

Minimum Credits: 1

Maximum Credits: 3

This course introduces graduate students to training in applied, real-world studies. Course topics can include any of the following: renal-electrolyte, cardiology, cancer, computational biology, bioinformatics, systems biology, pulmonology, infectious disease, endocrinology, neurology, rheumatology and immunology, hepatology and liver disease, gastroenterology, geriatrics and/or hematology/oncology. Course work includes practical studies and additional work that will be developed and approved by the course instructor.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

ISB 2070 - THE BEDSIDE TO BENCH

Minimum Credits: 2

Maximum Credits: 2

This course introduced graduate students to biomedical research in a comprehensive format integrating organ system biology and clinical medicine with critical developments in the basic science research literature. Course topics include renal-electrolyte, cardiology, cancer, pulmonology, infectious diseases, endocrinology, neurology, rheumatology, and immunology, hepatology and liver disease, gastroenterology, geriatrics, and hematology/oncology. Course work includes an overview of each biomedical field, clinical tours, discussions with leading physicians on the current challenges in patient care, and analysis of the basic science literature in a journal club forum.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

ISB 2075 - EVOLUTIONARY BIOLOGY OF HUMAN DISEASE

Minimum Credits: 3

Maximum Credits: 3

Evolution is a fundamental unifying principle of biology. This class takes a broad approach to illustrate how an evolutionary perspective augments medical research and practice. Topics covered range from the evolution of human populations, to antibiotic resistance, and include medical conditions as diverse as diabetes, cardiovascular disease, cancer or aging.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2080 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Systems Biology (PHD)

ISB 2090 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

ISB 3090 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a dissertation for a doctoral degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Systems Biology (PHD)

Intelligent Systems

ISSP 2000 - MS RESEARCH

Minimum Credits: 1

Maximum Credits: 9

Research and thesis MA degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2015 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2016 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (people, data and knowledge, and evaluation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ISSP 2017 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2

Minimum Credits: 3

Maximum Credits: 3

This course serves as an introduction to core methods and topics in biomedical informatics using the context of the Learning Health System (LHS). A LHS combines data and information managements, discovery, and application of discoveries to clinical and population health. Discussion of the challenges associated with the construction of a LHS will be used to contextualize and motivate content to be covered in the course (challenges and analysis and interpretation to create knowledge).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (CS 1501 Algorithm Implementation; MIN GRADE C or TRANSFER) and (CS 2710 Foundations of Artificial Intelligence; MIN GRADE B or TRANSFER)

ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS

Minimum Credits: 1

Maximum Credits: 1

This course is an immigration course for the intelligent systems students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2030 - ADVANCED TOPICS IN INTELLGENT SYSTEMS

Minimum Credits: 1

Maximum Credits: 1

This course is a continuance of ISSP 2020. It is an immigration course for the intelligent systems students. Students continue with this course by carrying out their projects developed in ISSP 2020 and giving presentations presenting their results.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2070 - PROBABILISTIC METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ISSP 2081 - FOUNDATIONS OF BIOINFORMATICS

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2083 - BIOMEDICAL INFORMATICS JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This course meets once each week for one hour. The research being presented will be taken from recent journal papers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2090 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1

Maximum Credits: 6

This course is designed for people who want a practicum experience in working with advanced information technology in the center for biomedical informatics.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2130 - INFORMATION STORAGE & RETRIEVAL

Minimum Credits: 3

Maximum Credits: 3

Problems and techniques related to storing and accessing unstructured information with an emphasis on textual information. Overview of several approaches to information access with a primary focus on search-based information access. Covers automated retrieval system design, content analysis, retrieval models, result presentation, and system evaluation. Examines applications of retrieval techniques on the web, in multimedia and multilingual environments, and in text classification and event tracking.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ISSP 2160 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

The principal topics of AI are: representation knowledge, reasoning and problem solving, knowledge acquisition and machine learning, robotics, and natural language understanding. This course surveys these areas in order to provide an understanding of artificial intelligence methods and research problems. Specific topics include: action and object-centered representations, the search paradigm, planning and constraint satisfaction, qualitative reasoning, analogical reasoning, default reasoning, induction, other methods of learning, and knowledge engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2170 - MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2180 - COMPUTER VISION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (PhD)

ISSP 2221 - HUMAN INFORMATION PROCESSING

Minimum Credits: 3

Maximum Credits: 3

Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with implications for user interface design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG

Minimum Credits: 3

Maximum Credits: 3

Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall systems architectures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2240 - DECISION ANAL & DECISN SUPRT SYS

Minimum Credits: 3

Maximum Credits: 3

Rationality and rational behavior; uncertainty, probability, decision making. Psychology of decision making. Decision theory and decision analysis, structuring decision problems, elicitation of probabilities and utilities. Conflicting objectives, multi-attribute decision theory. Probabilistic methods in artificial intelligence. Group and team decision making. Decision support systems.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2280 - ADAPTIVE INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2430 - SOCIAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 3

A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

Directed study.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

Independent study.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 9

Research and dissertation Ph.D.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3120 - ADV TOPCS NATURAL LANG PROCSSNG

Minimum Credits: 3

Maximum Credits: 3

Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more deeply, and to discuss recent advances in (NLP).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: ISSP 2230 or CS 2731 or INFSCI 2420; PLAN: Intelligent Systems (MS, PHD)

ISSP 3180 - VISUAL LANGUAGES AND PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

This course will include fundamentals of formal language theory, iconic and symbolic representations, formal theory of iconic systems, icon operators and semantics, icon oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual database systems, iconic indexing, and advanced topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3535 - ADV TOPICS IN MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: ISSP 2170 or CS 2750; PLAN: Intelligent Systems (MS, PHD)

ISSP 3565 - ADV TOPICS ARTIFICIAL INTELLGNC

Minimum Credits: 3

Maximum Credits: 3

This course will survey current topics in artificial intelligence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

Interdis Biomed Grad Prog

INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE

Minimum Credits: 8

Maximum Credits: 8

Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD) or Interdis Biomedical (UNK)

INTBP 2001 - FOUNDATIONS OF BIOMEDICAL SCIENCE STRUCTURAL BIOLOGY

Minimum Credits: 7

Maximum Credits: 7

Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

INTBP 2005 - FOUNDATIONS CONFERENCE

Minimum Credits: 4

Maximum Credits: 4

Contemporary approaches to problem-solving in biology, as well as principles underlying modern methods of biomedical research will be integrated with the lecture component of the course through an analysis of mechanisms underlying biological phenomena. Students will present papers, critically analyze data and devise experimental approaches to biomedical problems considered in lecture.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

INTBP 2010 - LABORATORY RESEARCH ROTATION

Minimum Credits: 1

Maximum Credits: 1

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/ her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

Academic Career: Graduate

INTBP 2011 - LAB RESEARCH ROTATION SUPPLEMENT

Minimum Credits: 2

Maximum Credits: 4

Course supplement to INTBP 2010 for those students initiating their first rotation in summer.

Academic Career: Graduate

Course Component: Practicum
Grade Component: Grad SN Basis

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Experimental biologists formulate hypotheses and models, design experiments, collect data and conduct analyses to draw conclusions. Deep understanding on biological principles requires D2K- the translation of data into knowledge that transcends first-order conclusions. This course for first year Ph.D. students in the biomedical sciences will examine basic principles of experimental design, together with measurement and sources of experimental error. The course will provide practical 'hands on' introduction to the quantitative tools required for experimental research using cellular, molecular, and systems based methods. Topics will include: goals of experimental design, making measurements, principles of parametric and non-parametric statistical inference, use of MS excel, graphpad prism and R, design of publication graphics and a brief introduction to big data approaches. Students will work in small groups to construct capstone projects by making 'you tube' style videos to illustrate key principles of experimental design and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

INTBP 2090 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in degree-granting programs under the interdisciplinary biomedical graduate program.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

INTBP 2100 - BIOLOGY OF VISION

Minimum Credits: 3

Maximum Credits: 3

This course is being designed to meet the requirements of the t-32 training grant (t32 ey017271-01 interdisciplinary visual science training program) from NIH. The target students are the graduate students, fellows and residents in the department of ophthalmology. In addition, the post-doctoral fellows working in the department of ophthalmology will be encouraged to take this course. We are planning to cover a wide array of subjects including the ocular anatomy, embryology, biochemistry, pharmacology, immunology, microbiology and genetics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1

Maximum Credits: 1

The course is an introduction to the basic ethical issues which arise in the course of conducting scientific research. It is intended for graduate students and fellows in the biomedical sciences who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by discussion of issues in small groups.

Academic Career: Graduate

Interdisciplinary

BIND 2024 - CONSULTING FIELD PROJECT

Minimum Credits: 3

Maximum Credits: 3

This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by Katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported through Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & Company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey cup.

Academic Career: Graduate

BIND 2070 - HEALTH CARE LAW FOR MANAGERS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will introduce students to legal, ethical, and policy issues relevant to those in management roles in the health care system. Topics explored will include an overview of the U.S. legal system and policymaking, health care ethics, public health law, liability of health care providers and their institutions, health care reform and access to care, health care fraud and abuse, antitrust, consent for treatment and withholding of consent, fraud and abuse, and health privacy in the digital age.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

BIND 2071 - LEADING EVIDENCE-BASED ORGANIZATIONAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the key processes of effective organizational change and the acquisition of the best available evidence from science, organizations, stakeholder, etc. to inform the change process. Our objective is to provide evidence-based frameworks and tools for successfully introducing and sustaining organizational change in healthcare organizations.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

BIND 2072 - ENTREPRENEURSHIP START-UP ESSENTIALS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course introduces students to the journey of starting a firm. Students will learn through experience how to prepare and deliver an "elevator pitch", put together a team and a team contract, think about stakeholders and conduct stakeholder interviews, and learn how to design small experiments that give insight into the product/service and potential customers.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

BIND 2073 - BUSINESS DEVELOPMENT IN THE LIFE SCIENCES

Minimum Credits: 1.5

Maximum Credits: 1.5

This intensive course is designed for students seeking an in depth understanding of the management challenges inherent in life science firms. We will examine molecules and medical devices as well as cutting edge IT services in the health care sector. We will cover the major strategic issues facing investors, entrepreneurs, and managers of small companies as well as global medical entities. This is not a science course per se and it does not require a background in medicine or molecular biology. The only prerequisites are a strong interest in the field and a willingness to learn about this important and dynamic sector of the global economy.

Academic Career: Graduate

Course Component: Lecture

Minimum Credits: 6

Maximum Credits: 6

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

BIND 2105 - PRACTICUM FOR EMBA STUDENTS

Minimum Credits: 1

Maximum Credits: 3

Students prepare a major research project on a business problem to demonstrate the knowledge, tools and skills learned through the program. This experience-based learning opportunity challenges students to solve a real business issue within their company or industry. At the end of the program, students present their findings and recommendations to a panel of faculty and business leaders.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

BIND 2111 - LANGUAGE ASSESSMENT WORKSHOP

Minimum Credits: 0

Maximum Credits: 0

This 12 week workshop is designed to enhance international students speaking and comprehension abilities. Students will engage in various exercises and real life scenarios.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad HSU Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2123 - CONSULTING FIELD PROJECT 2

Minimum Credits: 3

Maximum Credits: 3

This course is to provide MBA students with a meaningful and measurable business experience. Students should view projects as providing a unique opportunity to apply the various analytical tools and concepts taught at KATZ, in such a way as developing creating and useful business solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BIND 2024; PROG: Joseph M. Katz Grad Sch Bus

BIND 2131 - GLOBAL CONSULTING PROJECT 1

Minimum Credits: 1.5

Maximum Credits: 1.5

Intent of the course is, through experiential learning, to guide students in addressing global business problems. This is accomplished by providing students with a real corporate problem or issue whose roots are cross-functional, and whose solution requires global research and a global perspective. Students should expect global travel. The course is conducted across the fall and spring terms, providing the student with travel time during the various school breaks during Thanksgiving, the Christmas holidays and at other times as agreed.

BIND 2200 - INTEGRATED PROJECT FOR MBA/MS IN ENGINEERING PROGRAM

Minimum Credits: 2

Maximum Credits: 2

All students in the MBA/MS in engineering joint degree program are required to complete an integrated project for a company or some other facility. Oversight of this project will be the joint responsibility of a faculty member from KGSB and one from the student's engineering department. It is the student's responsibility to identify these faculty members; program advisors will assist the student in this effort. Students must present a one or two page proposal prior to the start of the project outlining what they plan to do over the course of the project. Ideally, the project should blend skills learned from the business and engineering components of the program. The proposal must be approved by the business and engineering faculty

members overseeing the project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2203 - ORGANIZATIONAL TRANSFORMATION

Minimum Credits: 2

Maximum Credits: 2

This course recognizes the interrelated web of economic, social, political, and technological forces in the global economy that require organizations to transform their systems and processes--continuously and radically--if they wish to survive and succeed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BIND 2204 - MANAGING THE PROFESSIONAL SERVICES FIRM

Minimum Credits: 2

Maximum Credits: 2

This 1.5 Credit course is intended for MBA and masters of accounting (MACC) students interested in professional consulting. By the end of this course, students should be able to intelligently discuss the practice of professional consulting, be their intent in business, it or accounting professions. Additionally, the student will gain an understanding for the highly fluid and evolving environment in which professional advisors operate, and how these professionals add value to their clients. Finally, students are made aware of key issues in managing the professional services firm, including scoping out client engagements, organizing and directing professional staff, handling clients and developing practical recommendations. Clinical professor bud smith is instructor, assisted by practicing professionals from the field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BIND 2231 - GLOBAL CONSULTING PROJECT

Minimum Credits: 3

Maximum Credits: 3

Intent of the course is, through experiential learning, to guide students in addressing global business problems. This is accomplished by providing students with a real corporate problem or issue whose roots are cross-functional, and whose solution requires global research and a global perspective. Students should expect global travel. The course is conducted across the fall and spring terms, providing the student with travel time during the various breaks during Thanksgiving, the Christmas holidays, and at other times as agreed.

BIND 2402 - INTRO TO QUANTITATIVE METHODS

Minimum Credits: 1.5

Maximum Credits: 1.5

The 1.5-credit "Fundamentals of MBA Quantitative Methods" course is designed to cover fundamental quantitative methods that are critical to an MBA students' academic success. The course is designed to provide a refresher to students who already have a relatively strong math foundation, and to provide support to those students who may not yet be familiar with probability, statistics and/or time value of money concepts. The material will be delivered both synchronously and asynchronously. The course is organized in three parts: 1) Business Math 2) Probability & Statistics 3) Time Value of Money

Academic Career: Graduate

Course Component: Lecture

Grade Component: Satisfactory/No Credit

BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS

Minimum Credits: 0.5

Maximum Credits: 0.5

The 0.5 credit "Probability & Statistics: Fundamentals of MBA Quantitative Methods" course is designed to cover fundamental quantitative methods that are critical to an MBA students' academic success. The course provides a refresher to students who already have a relatively strong foundation in statistics, and provides support to those students who may not yet be familiar with the concepts. The material will be delivered both synchronously and asynchronously. (co-requisite BQOM 2401)

Academic Career: Graduate

Course Component: Lecture

BIND 2421 - INTEGRATED LEARNING ACADEMY

Minimum Credits: 3

Maximum Credits: 3

The Integrated Learning Academy (ILA) is an executive-level, seminar-style course in which students engage in analysis, synthesis, and evaluation of contemporary business issues in a specific industry/sector. This engagement is both in-depth within the specific industry/sector as well as comprehensive across the breadth of business functional subject areas that form the Katz MBA core. ILA contemplates the overarching industry structure as well as the role of non-profits, privately-held firms, publicly-traded firms, and government/regulatory bodies within that same industry context. Throughout the course, students gain direct exposure to Katz faculty experts, executive-level industry experts, contemporary case studies, and self-directed research. In turn, students memorialize their learnings in an executive-level white paper on the implications of their learnings for their future career paths.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

BIND 2444 - MANAGEMENT SIMULATION CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

The Management Simulation Capstone course has students perform the role of an executive in a simulated competitive industry over numerous fiscal years in order to apply and demonstrate the academic and professional development skills acquired in other core courses. The course expects that

students will develop and implement a strategic management process in a complex competitive environment using a range of business tools and skills to compete successfully against other talented management teams. This is accomplished through interpreting/analyzing market data and diagnosing the factors affecting a company's prior-year performance; evaluating the strategies and actions of rival companies; identifying strategic actions with good prospects for improving company performance; and identifying promising ways to build competitive advantage, improve operating efficiency, and cope effectively with fluctuating exchange rates, tariffs, and other global market factors. Furthermore, this capstone course provides a platform for professional development as students develop their strengths, give and receive feedback, and communicate effectively to influence a wide range of stakeholders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BACC 2401 and BQOM 2401 and BFIN 2409 and BMKT 2409

BIND 2454 - INTEGRATED MBA CAPSTONE

Minimum Credits: 1.5

Maximum Credits: 1.5

The Integrated MBA Capstone (IMC) is a capstone experiential learning course in which students engage in comprehension, analysis, and synthesis of contemporary business issues clustered around a specific theme and US location/region. As the MBA capstone, the course integrates the knowledge and skills developed throughout the MBA core, focusing on developing a horizontal (rather than vertical) mindset across business functional areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS

Minimum Credits: 0.5

Maximum Credits: 0.5

The 0.5 credit "Time Value of Money: Fundamentals of MBA Quantitative Methods" course is designed to cover fundamental quantitative methods that are critical to an MBA students' academic success. The course provides a refresher to students who already have a relatively strong foundation in time value of money concepts, and provides support to those students who may not yet be familiar. The material will be delivered both synchronously and asynchronously. (co-requisite BFIN 2409)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

BIND 2526 - BUSINESS PROCESS REDESIGN

Minimum Credits: 2

Maximum Credits: 2

Using a cross functional perspective, the course presents tools for the redesign of business processes, shows participants how to diagnose process problems, and explains how to generate and implement process redesign projects in different types of organizations. After the course, participants should be able to generate and implement business process redesign projects of their own.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2533 - ACCELERATED INTERMEDIATE FINANCIAL REPORTING

Minimum Credits: 3

Maximum Credits: 3

Accelerated Intermediate Financial Reporting fulfills the prerequisites of Intermediate Financial Reporting 1 and Intermediate Financial Reporting 2 for students who are entering the MACC program. This course studies the preparation, communication, interpretation and analysis of financial data with emphasis on the information needs of users of financial information prepared under USGAAP. General topics covered in this course include revenue recognition, inventory accounting, long term assets and impairment, investments, current liabilities and contingencies, long term liabilities,

capital and retained earnings, leases, pensions and postretirement benefits, income taxes, and preparation of the statement of cash flows. Students are expected to have an accounting background. This course is designed to sit on top of an existing foundation in accounting and will assume students already have taken several financial accounting courses or knowledge obtained through work experience. It is expected that students are fluent with accrual accounting and the accounting cycle and that they have already studied some of the topics in the course in depth. The course will move quickly.

Academic Career: Graduate

BIND 2602 - CPT INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

This course prepares the student for their internship opportunity and helps them to leverage the internship experience by focusing on career management, organization and people skills in the context of global executive mobility. Students are provided with a unique opportunity to apply the skills taught at Katz in a practical manner. Each student completes a project during an internship or co-op experience for an employer, which may be a for-profit, non-profit or governmental agency. The employer will sign-off that the student has completed the project. A faculty advisor is assigned to the student. The student is required to attend a one-hour orientation session prior to the internship. The student will attend a full-day global executive skills workshop upon completion of the internship, where the student will provide an executive level presentation to the class. The emphasis is on practical skills to enhance professional success in today's globally mobile business environment for managers. This course is for Katz students only.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad HSU Basis

BIND 2603 - INTERNSHIP

Minimum Credits: 1.5

Maximum Credits: 1.5

This course prepares the student for their internship opportunity and helps them to leverage the internship experience by focusing on career management, organization, and people skills, while requiring them to draw connections to the academic content of their degree program. Students are provided with a unique opportunity to apply the skills taught at Katz in a practical manner, and then to think reflectively about how the practical experience of their internship relates to the knowledge and skills discussed in their other courses. This course is for Katz students only.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

BIND 2702 - GLOBAL RESEARCH PRACTICUM: LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course is tied closely to field study abroad, providing a hands-on experience in a foreign culture. Main objectives are to challenge students to consider business issues from a global perspective and to expose them to actual business environments abroad. Requirements include a team research project and an individual cultural report. The course includes a 9-day trip to various businesses in Chile. Students develop a research question in areas of managerial specialization and draw evidence from the field study to support their project report. While abroad, students visit a number of selected organizations and/or companies, and explore current business practices/issues. The group meets for three, 3-hour class sessions prior to the trip. Portions of these classes will focus on developing the research project. Also, to help prepare for the trip, selected outside speakers will share their experiences and perspectives on Latin American business and culture. At the final class session after the trip, projects are presented in both written and oral forms.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2708 - GLOBAL RESEARCH PRACTICUM: SOUTH ASIA

Minimum Credits: 3

Maximum Credits: 3

This course is tied closely to field study abroad, providing a hands-on experience in a foreign culture. Deliverables from the practicum include a team research project and a professional portfolio designed to capture the international experience. The course includes a trip at the end of the fall semester to various businesses in the host country. Students develop a research question in areas of managerial specialization and draw evidence from the field study to support their project report. While abroad, students visit a number of selected organizations and/or companies, and explore current business practices/issues. Students will be required to attend a module preparing them for the class. This will be scheduled during the fall semester. During the spring semester, the group meets for 3-hour class sessions on Friday evenings as determined by the professors. Portions of these classes will focus on developing the research project. Selected outside speakers may also join the class to share their experiences and perspectives on business and culture.

BIND 2731 - GLOBAL RESEARCH PRACTICUM - ASIA FULL-TIME

Minimum Credits: 3

Maximum Credits: 3

This course is tied closely to field study abroad, providing a hands-on experience in a foreign culture. Main objectives are to challenge students to consider business issues from a global perspective and to expose them to actual business environments abroad. Requirements include a team research project and an individual cultural report. The course includes a 9-day trip to various businesses in Asia. Students develop a research question in areas of managerial specialization and draw evidence from the field study to support their project report. While abroad, students visit a number of selected organizations and/or companies, and explore current business practices/issues. The group meets for three, 3-hour class sessions prior to the trip. Portions of these classes will focus on developing the research project. Also, to help prepare for the trip, selected outside speakers will share their experiences and perspectives on Latin American business and culture. At the final class session after the trip, projects are presented in both written and oral forms. Logistics: travel typically takes place over the Katz spring break. Expenses related to all academic/group aspects of the course/trip are covered by the Katz school. Students are required to cover individual expenses such as tuition, airfare, ground transfers, hotel, and meals.

BIND 2740 - GLOBAL RESEARCH PRACTICUM: EUROPE

Minimum Credits: 1.5

Maximum Credits: 3

The main objective of this course is to challenge students to consider business issues from a global perspective. Requirements include a team research project and an individual portfolio designed to capture the experience. Students develop a research question in their areas of managerial specialization and draw evidence from interactions with global business professionals. Class meetings will feature a combination of lecture, case studies and guest speakers who will share their experiences and perspectives on Europe. Portions of these classes will also focus on developing the

research project. At the final class session, projects are presented in both written and oral forms. This class may include a study abroad component (8-10 days), designed to expose students to actual business environments abroad. While abroad, students will visit a number of selected organizations and/or companies, and explore current business practices/issues. The number of credits for any section of the course will be determined based on the combined contact hours of on-campus and any travel components, complying with all applicable academic requirements.

Grade Component: Grad Letter Grade

Course Requirements: PLAN: EMBA Healthcare Program

BIND 2903 - PREDICTIVE ANALYTICS IN HEALTH CARE

Minimum Credits: 1.5

Maximum Credits: 1.5

Healthcare is on a precipice of change. More health care-related data has been generated in the past five years than in the entire history of mankind, and this is expected to increase 50 times over the next few years. The overall objective of this course in Predictive Analytics in Health Care is to familiarize students with large data analytic techniques, and their wide-applicability in guiding decisions in such areas as patient care, research & development, policy, and cost effectiveness. For the most common techniques, the objective is to acquire sufficient mastery through hands-on analyses of data so that students are prepared to apply these techniques in future career positions. For other, more advanced techniques, the objective will be to develop a familiarity about how these methods are used and what questions they can answer.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRACT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize students with the basic terminology and models of pharmacokinetics, and the role of social workers in medication management. The development of psychopharmacology from a historical and sociological perspective as well as an overview of neurochemistry and biological-psychological functioning will be addressed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2009 - FAMILY CONFERENCE AND TEAMING

Minimum Credits: 3
Maximum Credits: 3

This course will familiarize students with Family Group Decision Making (FGDM), a cross system practice that builds on the strengths of families by supporting prevention strategies and planning for and ensuring the safety, permanency and well-being of children. Family group decision making recognizes the importance of involving family groups in decision making about children who need protection or care, and emphasizes family empowerment by acknowledging that families should be given the opportunity and responsibility to make their own decisions regarding their children and family members.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082; Minimum grade of B-

SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES

Minimum Credits: 3
Maximum Credits: 3

This course explores various basic models used by social workers for examining, understanding, and intervening in family processes. Video, role play, and case material are used in developing skills for advanced practice in working with families.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2018 - CLINICAL SKILLS IN SOCIAL WORK PRACTICE FOR MENTAL HEALTH RECOVERY

Minimum Credits: 3
Maximum Credits: 3

The course teaches concepts and techniques employed in social work practice with individuals with mental illness and their families to promote recovery. Conditions addressed in this course include schizophrenia, other psychoses, bipolar disorder, personality disorders and co-occurring substance use and mental illness. The overall purpose is to equip the beginning practitioner with the knowledge, values, and skills requisite for working with the types of clients commonly seen at public mental/behavioral health services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: SWINT 2082 and SWBEH 2065 (MIN GRADE 'B-' for Listed Courses)

SWINT 2025 - SOCIAL WORK PRACTICE IN INTEGRATED HEALTH

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the clinical and administrative skills, roles and functions of social work practice which take place in a wide range of community based agencies and institutions at the primary, secondary and tertiary levels of intervention with and on behalf of a diverse population. Knowledge skills and ethics are integrated toward promoting readiness for employment in the healthcare field.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2030 - DIRECT PRACTICE WITH OLDER ADULTS

Minimum Credits: 3

Maximum Credits: 3

The range of interpersonal practice with, and on behalf of, older adults is defined in terms of primary, secondary and tertiary levels of preventive intervention. The social work roles and interventive skills used in case management are taught. Psychosocial/systems, cognitive/behavioral and other treatment approaches central to social work are examined and evaluated for their application to an eclectic-based intervention with older clients.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL

Minimum Credits: 3

Maximum Credits: 3

Building on the student's knowledge of cognitive/behavioral theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2032 - ADV DRCT PRAC: SOCIAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Building on the student's knowledge of social systems theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC

Minimum Credits: 3

Maximum Credits: 3

Building on the student's knowledge of psychosocial theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2035 - INTIMATE PARTNER VIOLENCE

Minimum Credits: 3

Maximum Credits: 3

This course examines the dynamics and treatment implications of working with family members who have experienced various forms of physical and/or sexual maltreatment from other family members. Physical and sexual child abuse, spouse abuse and marital rape are topics of concern.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2042 - SOCIAL WORK WITH SUBSTANCE USE AND OTHER ADDICTIVE DISORDERS

Minimum Credits: 3

Maximum Credits: 3

This course will provide a basic orientation to substance use and addictive disorders as issues requiring social work interventions. Emphasis will be placed on examining a variety of evidence-based treatment approaches in providing services to individuals and families struggling with substance use and gambling disorders. Special Effort will be made to focus the content on assessment, treatment, and making appropriate referrals for individuals and families experiencing problems related to addiction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2046 - PLANNED SHORT-TERM TREATMENT

Minimum Credits: 3

Maximum Credits: 3

A pluralistic theoretical framework for planned short-term treatment, highlighting contributions from interpersonal and social learning orientations is examined, and major research studies supporting short-term intervention are reviewed. Attention is given to the goals and process of the initial interview and major change strategies (behavioral rehearsal, task assignment, skill training, and cognitive restructuring) are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2049 - DIRECT PRACTICE WITH CHILDREN

Minimum Credits: 3

Maximum Credits: 3

This course prepares students to work directly with children in social work settings. A variety of teaching techniques are used to help students: utilize different theories and models of working with children; differentiate fact from inference and normal from deviant development; be comfortable with a variety of play media; and examine in-depth the theme of separation and its effect on the child.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2050 - COUPLES THERPY: THERY & TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This course concentrates on theory and techniques of treatment with the marital dyad. Emphasis is on empirically validated methods, with particular focus on developing an eclectic approach for advanced social work practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2053 - GROUP INTERVENTIONS WITH HIGH-RISK POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Theory and concepts related to advanced social work practice with groups, including knowledge of group types, processes, selection, and composition, as well as group leader roles and functions are all considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS

Minimum Credits: 3

Maximum Credits: 3

This course provides a knowledge base for the practice of social work in school or school-related settings. Focus is on application of knowledge, and values and skills of social work practice toward resolution of diverse problems encountered by pupils, schools and communities in the effort to achieve educational goals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2063 - ISSUES IN CHILD MALTREATMENT

Minimum Credits: 3

Maximum Credits: 3

This course will provide a comprehensive examination of child sexual maltreatment issues at the micro, meso, and macro levels: etiology; identification; child welfare system response; treatment; the impact the maltreatment has upon individuals, families, groups, and the community (including those coming into contact with maltreatment in the course of their work) and resilience in the face of maltreatment. Emphasis will be on the student's development of assessment skills, knowledge of the therapeutic process of recovery, and the role and function of organizations. Social work interventions and treatment modalities, including outcome data, will be presented. Students will be offered information about maltreatment among diverse populations. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS

Minimum Credits: 3

Maximum Credits: 3

This course addresses theories of primary and secondary (vicarious) traumatic stress; the nature of traumatic events and environments; and the potential impacts on individuals, families, groups, and communities. Students will be offered information about traumatic exposure and stress among diverse populations. Interventions and treatment modalities for working with those affected by traumatic stress using the person-in-environment perspective will be presented. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics. Emphasis will be on the student's development of practice competencies such as critical thinking, supporting the therapeutic process by the use of research-informed and strengths-based practice, identifying opportunities for advocacy, effective self-care, and understanding the role and function of organizations in creating trauma-informed human services environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082, Minimum grade of B-

SWINT 2073 - INTEGRATED HEALTHCARE AND PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop general knowledge of medical terminology and the social worker's role in medication management. Students learn how to educate and support patients in adhering to recommended medication treatment and in being knowledgeable about possible side effects. Social workers have an extremely important role to play in the patient's ability to adhere to medication requirements. They can support patient compliance with medication by providing information and education that allows that patient to have realistic expectations for what may be achieved with medication. In addition, they can also work with patients to achieve their goals for improving medication adherence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: SWINT 2082; Minimum grade of B-

SWINT 2074 - SPIRITUALITY AND SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

This course explores the role, nature, and impact of spirituality in and upon social work practice and the populations that social workers serve. It builds upon an understanding of spirituality and religious practice as aspects of human diversity which occurs in the context of ecosystems theory, theories of human development, and models of helping. Students will gain spiritual assessment and intervention skills within the scope of social work practice including micro, mezzo and macro levels of practice. Course will highlight themes of cultural competence, variety of spiritual and/or religious practices and traditions, potential harms and benefits, professional development, and ethical considerations for practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082; Minimum grade of B-

SWINT 2076 - HUMAN SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course presents current research about human sexuality, discusses the range of sexual life-styles, and develops a treatment typology for therapists working with couples and individuals with sexual dysfunctions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

Course Attributes: Gender, Sexuality & Women's St

SWINT 2082 - MODELS OF INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

The course provides a framework for understanding and differentially using treatment models in interpersonal social work practice. It examines four basic treatment models: psychosocial, crisis intervention, behavior modification, and an interpersonal approach based upon either communication theory, the client-centered approach, or an experiential humanist approach. These basis models are compared and contrasted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWGEN 2034; CREQ: SWRES 2021; SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2087 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Given the changing nature of social work practice, the MSW program occasionally offers courses in new and/or unique content areas. When offered, this course is designed to provide skill and knowledge content not covered in other direct practice skill courses.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWINT 2096 - CLIN SOCL WRK AFRCN AMERCN FMLY

Minimum Credits: 3

Maximum Credits: 3

The overall objective of this course is to provide a knowledge base on African-American families within a community context that is the basis for developing methods and skills relevant for clinical intervention with African American families. It will provide the student with the opportunity to expand on concepts, skills and assumptions about clinical transactions learned in basic clinical method courses. Conceptual models for assessment/intervention will assist students to clarify and become comfortable with theoretical and practice approaches with black families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Italian

ITAL 2000 - INTRODUCTION TO GRADUATE STUDIES IN MODERN LANGUAGES AND CULTURES

Minimum Credits: 1

Maximum Credits: 1

This one-credit course offers an introduction to graduate study in modern languages and cultures. It will help you adjust to your graduate program and will cover the nuts and bolts of how to take seminars, do readings, teach, balance your various obligations and meet the emotional and life challenges of graduate school. What matters most in teaching is not skills but a sense of personal identity and a strong relationship to the disciplinary knowledge. We will engage with the latest research in positive psychology, resilience, pedagogy, deep learning, creativity, sociology of work and executive coaching. The class will prepare you better to move among different kinds of professional situations within and outside academia.

ITAL 2088 - TOPICS IN ITALIAN DIASPORA STUDIES

Minimum Credits: 3

Maximum Credits: 3

This graduate-level seminar explores the notion of Italian Diaspora, possibly addressing any of the following questions: the history of emigration from Italy; the languages, literatures, cinemas, and/or cultures of Italian emigration, in Italian or any of the languages of destination countries; the materiality of the Italian Diaspora; the critical human geography of the Italian Diaspora; Italian emigration from the perspective of any destination

culture (Italian American, Italian Argentinian, and so forth); italianità, or globally-inflected notions of Italianness created through or in diasporic movements initiating in Italy; comparative studies of Italian Diasporas and other migratory phenomena that engage Italy (over the Mediterranean, from Eastern Europe, or from Asia, for example).

ITAL 2092 - ITALIAN TRANSLATION STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course explores the field of Translation Studies from the Italian perspective. It may address any or all of the following issues: the history of translation as a literary practice, editorial projects that involve translation, the ethics of translation, translation between standard and dialect languages, translation and power relations, the relative primacy of source and target texts, the relationship between translation and global literatures. Students will develop and pursue final projects that involve commentary on published translation or new translation projects with annotation.

Course Attributes: Global Studies, West European Studies

ITAL 2605 - BOOKS OF ISLANDS: MEDITERRANEAN NETWORKS AND TEXTS, 1300-1700

Minimum Credits: 3

Maximum Credits: 3

In this graduate-level seminar we will study a range of medieval and early-modern texts about islands, archipelagos, and maritime travel, with particular attention to what these texts can reveal about the networks that linked Italy to the broader Mediterranean world and the globe - networks of knowledge exchange, commerce, travel and migration. We will examine the rise and development of the books known as the "isolari" ("Books of Islands") - a popular genre between the fifteenth and seventeenth centuries that introduced readers to the world's islands and archipelagos through a curious blend of text and image. We will also study accounts of islands and travels by major medieval and early modern Italian authors including Marco Polo, Francesco Petrarca, Giovanni Boccaccio, and Tommaso Campanella. Relevant critical work in the areas of transnational and environmental studies, media and materiality (with attention to the material realities that shaped the production and circulation of books and maps, in manuscript and in print), and spatial theory will enrich our approaches to these texts. The class will include an introduction to digital tools that can fruitfully be used by humanists for geographically, spatially, and network-oriented work, and students will collaborate on a digital humanities project using the ArcGIS Online mapping platform.

ITAL 2607 - CULTURES OF FASCISM

Minimum Credits: 3

Maximum Credits: 3

This graduate level seminar explores the cultural and political landscape that fostered Italian Fascism (1922-1945) and facilitated its progression from a revolutionary movement to a political party and finally a dictatorial regime. In particular, we examine the close connection between a Fascist national culture and political control, manifested in Fascism's ability to shape the ideal Fascist political subject and create broad and unlikely political consensus through a dizzying array of popular cultural forms and products. We will dedicate the last weeks of the semester to Italian Fascism's afterlives and the ways in which post-war culture has looked back on the period in complex and often contradictory ways.

Academic Career: Graduate

ITAL 2620 - BORDERLESS ITALY?: POWER, MIGRATION, TRAVEL, AND MOBILITY

Minimum Credits: 3

Maximum Credits: 3

This graduate-level seminar approaches the study of post-Unification Italy from the perspective of Italy's various internal and external borders within national, transnational, colonial, and diasporic contexts, and the identities that are generated in their definition, enforcement, and crossing. Drawing on the fields of space and place, border theory, and geocriticism, our study will consider a selection of literary, cinematic, and historical/documentary texts from the Risorgimento; Italy's Fascist Empire; and periods of diasporic and internal migrations, from and to Italy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ITAL 2650 - ITALIAN HORROR CINEMA: INFLUENCE, TRANSNATIONALISM, ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

The seminar focuses on three crucial figures of Italian horror cinema: Mario Bava (1914-1980), Lucio Fulci (1927-1996), and Dario Argento (1940). As a product of genre fiction, the cinema of Bava, Fulci and Argento is at once influenced by the transnational canon and yet influential on the themes, on the aesthetics, and on the language of horror cinema. The seminar is divided in two parts: the first section provides the students with a comprehensive knowledge of the three authors' works, filmic styles, influences, and impact. The second part of the seminar, instead, is conducted as an archival research laboratory: students are guided in a research project of their choosing as they collect and analyze archival materials in light of what they have learned during the first portion of the course. In particular, students will be encouraged to take advantage of the George A. Romero Archival Collection, the Archive of the National Cinema Museum in Turin, and the Archive of the Cineteca in Bologna.

ITAL 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY

Minimum Credits: 3

Maximum Credits: 3

In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all

readings will be available in English.

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ITAL 2801 - HISTORY OF ITALIAN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course will explore the historical roots of the modern Italian language, and the lively cultural debates around linguistic issues that have shaped Italian language and culture from the Middle Ages to the present day. Issues that we will examine include the relationship of the Italian language with Latin, and with the numerous regional languages (or dialects) spoken in Italy; the linguistic influence of Italy's "Three Crowns" and the dominance of Tuscan; the interplay between written and spoken varieties of Italian; and the political dimensions of language use in Italy. The course will be conducted in Italian. Advanced undergraduate Italian majors can enroll in this graduate-level course with the instructor's permission.

ITAL 2970 - TEACHING OF ITALIAN

Minimum Credits: 3

Maximum Credits: 3

Teaching French, Italian, and Spanish supports the concept that instructional expertise is developed in and through practice-based projects, teaching experiences, and the study of the research evidence and theories on additional language learning. The course is designed for language teaching at the university level and is primarily intended for teaching assistants, although part time instructors may enroll in this class for credit. In the course, four major areas associated with contextualized instruction are presented: 1) situations and themes as context, 2) culture as context, 3) academic subject matter as context, and 4) literature as context. All assignments are project-based and include analytical and reflective reports on the students' own teaching and lesson development projects intended to be used and evaluated in actual foreign language classes. Teaching assistants and instructors in other language are welcome to register for the course but examples are primarily in Spanish, French, Italian, and English.

Academic Career: Graduate

Course Component: Practicum

Japanese

JPNSE 2023 - ASPECTS OF THE JAPANESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the Japanese language through a study of its structure, vocabulary and cultural heritage. Some topics discussed include word order, basic structural patterns, particles such as Wa and Ga, sexism, and word formation. This course is useful for the Japanese studies student wishing to have a deeper understanding of the language as well as the linguistics student interested in gaining knowledge of a non-Indo-European language.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2035 - PRAGMATICS OF JAPANESE

Minimum Credits: 3
Maximum Credits: 3

This course will provide an introduction to the usage aspects of Japanese by reading articles on pragmatic aspects of the language. The instructor will lecture on salient points and lead discussion on specific issues and the appropriate use of the language.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2040 - INTRODUCTION TO CLASSICAL JAPANESE 1

Minimum Credits: 3
Maximum Credits: 3

This classical Japanese language course is studied through readings of prose and poetry texts written during and immediately after the Heian period. Literary and linguistic techniques are discussed and points of contrast with the modern language are analyzed. Also introduced are reference materials dealing with classical Japanese language and literature. Students are encouraged, but not required, to complete JPNSE 1023 Aspects of the Japanese Language before enrolling in this course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2056 - JAPANESE LITERATURE AND THE WEST

Minimum Credits: 3
Maximum Credits: 3

A critical study of modern Japanese works and selected modern Western literary materials with special emphasis on intensive analysis by means of modern Western criticism. The course is designed to encourage the student to examine significant similarities and differences between Japanese and non-Japanese materials and to judge the content from an oriental as well as a Western perspective.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA

Minimum Credits: 3
Maximum Credits: 3

This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Film Studies

JPNSE 2058 - WESTERNS AND SAMURAI FILMS

Minimum Credits: 3
Maximum Credits: 3

A focus on the critical comparative study of two filmic genres--the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of

approaching films from an intercultural standpoint.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2059 - JAPANESE LITERATURE ON SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course will investigate how literature and film treat some major ideological and socio-cultural issues in Japanese society. Readings of pre-modern tales, modern fiction and contemporary novels. Film adaptations will represent the best of Japan's postwar cinematic tradition. The course is designed for the student interested in Japanese society, culture and intellectual currents through film and literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2070 - WORLD OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

Students will receive a grounding in basic principles of Japanese classical literature, poetry and aesthetics. They will read the entire text in English of the Tale of the Genji and examine important works in Japanese literature composed in later periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2071 - THE WORLD OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course covers the period between 1570 and 1870. Beginning with the unification of Japan under sixteenth century military war lords and ending with the collapse of the Tokugana Shogunate. Students will read selections from the major scholarly literature on the period.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Asian Studies

JPNSE 2080 - GHOSTS, MASKS AND ACTORS

Minimum Credits: 3

Maximum Credits: 3

A critical study of three major dramatic genres of Japan--noh, bunraku and kabuki--in cultural origins. Areas to be explored are the use of masks in the world of the noh theatre, the kabuki with its female impersonators and the near-lifesize puppets of the bunraku. Also discussed is the impact that noh and kabuki have had on modern Japanese and non-Japanese theatrical and film genres.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2081 - FORMS OF JAPANESE THEATRE

Minimum Credits: 3

Maximum Credits: 3

This course will provide a survey of various major forms of Japanese theatre using English language materials. Students will have access to relatively ancient forms of Japanese theatre such as kagura and no, kabuki drama and the bunraku puppet theatre through film and videocassette. The modern and avant-garde theatre are also accessible through translation and videocassette material. This course is designed for upperclass majors in theatre

arts and non-majors in related fields.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2085 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course that answers to a growing interest in the theory and practice of translation from Japanese to English. The genres of texts that will be dealt with include literary works of various kinds (novels, poems, children's books), magazine and newspaper articles, web posts, manga, subtitling of anime and other videos, and texts of technical nature. Students will first learn broadly about the discipline of translation studies, including a history of translation and issues in translation (invisibility of the translator, culturally specific translatability issues, etc.). Students will then learn specific types of translation issues that come up when translating Japanese into English, using excerpts from a variety of genres as case studies. Special attention is paid to the structural differences between Japanese and English, cross-cultural differences in stylistics, writing with clarity, reference work, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

JPNSE 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

The student undertakes a course of study under the direct supervision of a department faculty member.

Law - JD course offerings

LAW 5020 - CONTRACTS

Minimum Credits: 4

Maximum Credits: 4

What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5024 - PROPERTY

Minimum Credits: 4

Maximum Credits: 4

Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible

objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5038 - ENERGY LAW AND REGULATION

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to energy law with emphases on public utility regulation, electricity, and the effect of fuel choice on electricity regulation. The course consists of four modules. The first module on public utility regulation addresses the basic function of public utilities; the contemporary public utility scheme for energy; the basics of ratemaking economics. The second module on electricity regulation addresses the evolution of electricity regulation from the monopoly model to modern restructuring and competition; a technical understanding of electricity generation, transmission, and distribution; the functioning of electricity markets; Pennsylvania's framework for regulating electricity markets. The third module on the relationship between fuels and electricity regulation addresses the conversion of fuels to electricity; a comparative analysis of coal, wind and solar power; major issues in public utility regulation and litigation that relate to the transition from traditional to renewable fuels; Pennsylvania's framework for renewable energy. The fourth module consists of a brief introduction to natural gas regulation at the federal level and in Pennsylvania. The course provides students with an understanding of (1) public utility regulation of energy, with a focus on electricity; (2) the relationship between electricity regulation and fuels, especially coal and renewables; (3) the public utility regulation of natural gas; (4) the regulatory framework for electricity and natural gas in Pennsylvania.

Academic Career: LAW
Course Component: Lecture

Course Requirements: PROG: School of Law (LAWSC)

LAW 5041 - LAWYERING: A HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendancy of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, its championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

LAW 5043 - INT'L COMMERCIAL ARBITRATION

Minimum Credits: 3

Maximum Credits: 3

This course will begin with coverage of basic aspects of the law of international commercial arbitration, including arbitral jurisdiction, arbitration procedure, choice of law, and enforcement of awards. This will include coverage of the New York Arbitration Convention and the U.S. Federal Arbitration Act, along with a focus on the UNCITRAL Model Law on International Commercial Arbitration and the UNCITRAL Arbitration Rules. In order to provide a practical context for consideration of arbitration law and policy, we will work with the problem for the *vis international* arbitration moot that will become available the first week of October. After a review of the problem, we will catalogue the major issues and each student will be assigned a topic from that list for his or her course paper. We will work through all of the arbitration procedure issues as a class, using the contributions of each student to build the arguments and analysis for each side in the *vis* problem. We will also cover the basic substantive law issues raised under the United Nations Convention on Contracts for the International Sale of Goods (CISG). Each student will also be assigned a position to be presented in a mock arbitration at the end of the semester, using the *vis* problem studied during the semester. The Pitt Law *vis* moot team for the following year may be selected at the end of the semester from the J.D. students in the course, consistent with announcements made prior to the beginning of the semester.

LAW 5061 - PITT LAW ACADEMY

Minimum Credits: 0

Maximum Credits: 0

This speaker series on lawyers' roles will provide students, at the beginning of their law school careers, with exposure to and understanding of the variety of roles that lawyers play in the profession and society. The series consists of six programs over the course of the academic year, and first-year students (beginning with the class entering Fall 2019) are required to attend at least five of those programs. Each program, moderated by a full-time faculty member, features multiple presenters with law degrees who work in various professional settings, including practicing attorneys with widely varying specialties, judges, or other professionals working outside of law practice. The presentations should help first-year students gain a better appreciation of the practical and intellectual aspects of different professional roles and to preview some of the important personal and professional issues and concerns that may confront them in the course of their careers.

LAW 5062 - PITT LAW ACADEMY

Minimum Credits: 0

Maximum Credits: 0

This speaker series on lawyers' roles will provide students, at the beginning of their law school careers, with exposure to and understanding of the

variety of roles that lawyers play in the profession and society. The series consists of six programs over the course of the academic year, and first-year students (beginning with the class entering Fall 2019) are required to attend at least five of those programs. Each program, moderated by a full-time faculty member, features multiple presenters with law degrees who work in various professional settings, including practicing attorneys with widely varying specialties, judges, or other professionals working outside of law practice. The presentations should help first-year students gain a better appreciation of the practical and intellectual aspects of different professional roles and to preview some of the important personal and professional issues and concerns that may confront them in the course of their careers.

LAW 5075 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 4

Maximum Credits: 4

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards. Registration in this course is limited to spring term transfer students.

LAW 5079 - THE LAW OF AMATEUR SPORTS

Minimum Credits: 2

Maximum Credits: 2

This course covers various legal issues related to amateurism and the regulation of intercollegiate athletics. Each topic area will highlight the impact that regulating bodies have on the sport, the athletes, and the sports and entertainment industry. The course will examine the system of governance over amateur sports, including the enforcement of NCAA rules and bylaws, as well as the structure of conferences, leagues, and collegiate institutions. The course will also analyze the legal issues facing student-athletes, from recruitment and eligibility to student privacy and gender equity. Finally, the course will address the business context of amateurism, with legal issues covering intellectual property, branding, pay-for-play, and antitrust litigation.

LAW 5082 - CLIMATE CHANGE AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the Kyoto protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "Boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.

LAW 5089 - PUBLIC HEALTH LAW

Minimum Credits: 3

Maximum Credits: 3

Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information, emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.

LAW 5090 - CONSTITUTIONAL LAW: FREEDOM OF RELIGION

Minimum Credits: 2

Maximum Credits: 2

This course will examine the Establishment and Free Exercise Clauses of the First Amendment to the United States Constitution. We will examine the history and purposes of the clauses. We will also examine the Supreme Court's doctrinal tests to analyze how the Court's theories regarding the clauses have changed over time and how to approach litigation strategy. Classroom discussion will focus on the application of these tests, the limitations of each test, and whether each test fulfills the purposes of the Religion Clauses. We will discuss majority, concurring, and dissenting opinions to flesh out the issues. Throughout the course, we will discuss how the requirements of the Establishment Clause and Free Exercise Clause can be reconciled and whether any of the current tests or theories can provide a workable solution and balance.

LAW 5100 - PRACTICAL LAWYERING

Minimum Credits: 1

Maximum Credits: 1

This course provides students with practical skills that enable them to "hit the ground running" as an intern and/or as an attorney when they begin their career. The course focuses upon foundational skills necessary for success in private or in-house practice, in government, or in public interest organizations. Emphasized skills may include professional writing, oral communication, client relations, legal marketing and networking, managing the culture and expectations of law practice, understanding the relationship between technology and law practice, wellness and resilience, managing others, and navigating conflicts of interest. The course will include lectures as well as active student participation in the form of in-class presentations, role-playing exercises, simulations, and outside-of-class work including reading assignments, problem sets, and the creation of work product using Excel, Word, and PowerPoint.

LAW 5105 - FEDERAL INCOME TAXATION

Minimum Credits: 4

Maximum Credits: 4

This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.

LAW 5116 - COMPARATIVE LEGAL CULTURES

Minimum Credits: 3

Maximum Credits: 3

The course is designed to introduce students to the civil law tradition, with specific reference to French and German civil law tradition. Constant reference will also be given to the Italian civil law tradition. The introduction to the civil law will mostly avail itself of comparisons between civil law and common law traditions. This approach will therefore call for a previous investigation on the theoretical underpinnings of "comparative" law as a legal discipline. Emphasis will be placed on the historical ancient and more recent roots that help explaining why civil law systems have developed features that distinguish the two law systems. Attention will also be given to the supposed converging trends between the two legal families. In a world that is globalizing universal structures are on the increase and the exponential growth of technologies poses new challenges that need to be addressed by giving prompt and creative answers, without waiting for legislative solutions. The course will consider topics such as legal reasoning the education of lawyers, the system of the civil codes, the judicial interpretation of statutes, the force of precedents and the role of judicial review. Firsthand experience of the civilian every day legal life will be shared as much as possible. The ultimate goal will be the student not only to "learn" but also, to some extent, to "experience" how civil lawyers approach the law.

LAW 5124 - THE CIVIL LAW TRADITION IN U.S. COURTS

Minimum Credits: 3

Maximum Credits: 3

The civil law is the legal tradition of all of continental Europe and many other parts of the world. In our time of globalization, lawyers have increasing contacts with colleagues and clients from abroad. This course is designed to introduce you to the civil law legal tradition, and to familiarize you with foreign legal assumptions, institutions and reasoning through an examination of various areas of law, including civil and criminal. The cases and codifications studied will be principally those of France and Germany. The course also seeks to develop in students a comparative law approach to understanding foreign law more generally.

LAW 5125 - APPLIED APPELLATE ADVOCACY

Minimum Credits: 1

Maximum Credits: 1

This course is for students who will represent Pitt Law in an appellate-style external competition. The course will support and enhance both the brief-writing and oral argument aspects of competition participation. You will deepen your skills in identifying a theme for your case, crafting a compelling story, effectively teaching through your writing, and editing your own work product. You will also learn and practice oral advocacy skills with a focus on careful listening, persuasive response, and smooth transitions. Through class exercises, reflection, and self-assessment, you will prepare both for your competition and for the most exciting aspect of your legal career: continuous learning and growth.

Course Requirements: PREQ: LAW 5112 or LAW 5141 ; PROG: School of Law (LAWSC)

LAW 5129 - FEDL COURTS & FEDL LITIGATION

Minimum Credits: 3

Maximum Credits: 3

One of the defining features of the American legal system is federalism, the division of powers between the national and the state governments. This course deals primarily with two recurring problems in civil practice that have their roots in this division of powers. First, do one or both litigants have a choice between federal and state court, and, if so, how can the litigants maximize the likelihood of securing the preferred forum? Second, when does federal law trump state law? A dominant theme of the course is the relationship between legal doctrines and the practical consequences of those doctrines in light of existing (and possible future) institutional arrangements. In particular, defendants in civil cases often prefer federal court; plaintiffs tend to prefer state court. But the rules and doctrines that determine which side gets its preferred forum will often be invisible to the average lawyer. One purpose of this course is to alert students to the pitfalls that can trap the unwary; here, more than in other areas of the law, a little learning can be a dangerous thing. Representative topics include: the prerequisites for Supreme Court review of state-court judgments; elements of federal question jurisdiction; removal of cases from state to federal court; and the power of the federal courts to apply rules of law different from those applied in state courts. Attention will be given to litigation strategy (especially the choice of forum) as well as to critical analysis of the doctrines and statutes.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5132 - LAW AND HUMAN BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

In order to be effective, lawyers must understand both their clients and the operation of the legal system. Often, legal analysis imbues both clients and the legal system with the qualities of rationality: clients engage in cost-benefit calculations of success and the standard of the legal system is the "reasonable person." Recent developments in the social and natural sciences raise questions about the sufficiency of these models. The standard definition of rationality may be too narrow - a client may want an apology from an adversary rather than just a monetary award - and clients and legal systems do not always act in rational ways. This course will provide students with concrete insights from the social and natural sciences to help them become lawyers better able to assess both clients and the workings of the legal system as a whole. Examples will be drawn from a wide array of legal contexts: from client contacts to jury selection to subtle forms of discrimination to judicial ideology. Emphasis will be on understanding human behavior both as a predicate for effective legal regulation and as a predicate for the values - including economic, ideological, and religious values - that inform voting and legislative determinations. Several school faculty who employ these insights in their scholarship will visit the class to discuss their work. The course's goal is to provide students with a richer set of analytic and practical tools for them to become more effective attorneys in whatever area they may come to practice.

LAW 5133 - UNDST LGL SERVC MKTPLC

Minimum Credits: 2

Maximum Credits: 2

Today's increasingly competitive marketplace demands that new attorneys have an understanding of the commercial landscape of the legal services industry as complement to their substantive legal knowledge and as a means towards making a contribution to their firm, company or organization. This course is an exploration of the industry from three perspectives. The first is a birds-eye view that will examine macro-trends in the industry. The second is the view from the demand side of the industry where we will explore the types of issues driving demand for legal services, factors driving the decisions to procure legal services, and how legal services purchasers/users evaluate the services rendered. Throughout the course we will evaluate real-life, contemporary scenarios and interact with practicing attorneys, clients, and judges. The third is the view from the supply side of the

industry where we explore the sales, marketing, operations and soft skills associated with the provision of legal services in the law-firm and in-house contexts.

LAW 5135 - COMMERCIALIZING NEW TECS

Minimum Credits: 3

Maximum Credits: 3

The key challenge addressed in this joint project course between the Katz Business School and the Law School is how to commercialize new technologies. Commercialization is the process of transforming an invention (i.e. A new technique or artifact that performs a useful function) into an innovation (i.e. A product or service that creates value in a specific use). Whether a new technology originates in a university, in an established company, or with an individual inventor, several issues must be addressed in order to determine whether it is worth investing in further, and to decide how the technology can be commercialized for maximum long-term value. We will focus on four types of analyses as input to a commercialization strategy: (i) technology analysis, (ii) market analysis, (iii) competitive assessment, and (iii) business model evaluation. For each, you will be provided with one or two practical articles, which outline an analytical tool or approach, and we will discuss their application to one of the cases. Although we'll walk through these steps in the order listed, they will need to be conducted iteratively (e.g. As you learn more about market opportunities you may wish to revisit your initial assessment of the technology's core elements). Throughout the course, law students will have the opportunity to assist the team in assessing legal matters that impact commercialization (from intellectual property matters, to regulatory landscape impacts, to alliance considerations) while also gaining an understanding of key business goals, strategies and tactics.

LAW 5138 - FEDERAL APPELLATE ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

This course in Federal Appellate Advocacy will select a recent case on appeal from a Circuit Court, where Certiorari has been granted by the U.S. Supreme Court. There will be an emphasis in the course on the Federal Rules of Appellate Procedure, an examination of jurisdiction and standards of review. Students will be paired up to write a brief, present oral argument, decide the case and write an opinion. Students who register for this course will automatically be registered for Pitt Law's Appellate Advocacy competition. By presenting the required oral argument for class, students will also participate in the first round of the competition. Participation after the first round of the competition is not required for the course, though it is encouraged. There may be an opportunity to view oral argument before the Third Circuit in Pittsburgh and arrangements will be made to allow students to visit the U.S. Supreme Court to hear oral argument on the selected case.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5142 - LEGAL WRITING FOR THE TRANSACTIONAL LAWYER

Minimum Credits: 2

Maximum Credits: 2

This course will introduce students to the craft of drafting transactional agreements. This course is meant to fill a void that currently exists between formal law school education and actual work as a practicing attorney. Oftentimes, the first experience that young transactional lawyers have with drafting agreements follows a familiar pattern, the young lawyer is given a form as a starting point, then asked to make changes to the form to "draft" the needed document. The young lawyer may successfully edit the party names and dates, but usually has little understanding of the rest of the agreement or even the basic business terms that the agreement must memorialize. Unfortunately, the realities of modern law practice may preclude inexperienced drafters from taking the time to properly hone their craft. This course will prepare students for entering a transactional practice by allowing students to practice drafting and editing agreements, examine strategies for avoiding ambiguities by crafting precise language, and work in a fast paced, team-oriented environment.

LAW 5143 - WATER & SHALE GAS DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

Water plays a critical role in the development of our shale gas resources. This course will examine the relationship between water and shale gas extraction. The emphasis will be on the life cycle of water used in shale gas well development, beginning with common law, statutory and regulatory rights and requirements governing the ownership and allocation of water resources, with particular attention paid to interstate compacts and basin wide water allocation mechanisms. The course will place an emphasis on emerging issues that attorneys face in practice and will include guest lectures by hydro-geologists, geochemists, and other professionals. Some of the issues that will be covered include: common law water quantity rights; basin commission water quantity regulations, and their impact on shale development's significant water withdrawals; the application of the clean water act and the state version of it (the clean streams law) to the shale extraction process; treatment and disposal of wastewater; groundwater contamination; local zoning and land use; and trends in shale-based litigation.

LAW 5145 - SECTION 1983 LITIGATION: CONSTITUTIONAL LAW IN ACTION

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced constitutional rights litigation brought pursuant to 42 USC §1983-- the federal statute which puts constitutional rights in action. It focuses on the means by which constitutional rights claims are actually litigated in lawsuits against public officials and local governments. Topics will include what it means to act "under color of state law;" absolute and qualified immunities; government liability for the acts of individual officials; remedies for constitutional violations, including monetary and injunctive relief; structural reform litigation; and the award of attorney's fees. The objective of the course is to provide students with the threshold substantive knowledge-- to be able to bring or defend a § 1983 case--- with the presentation facilitated by using "real-life cases" actually litigated by the instructors-- who between them have over 80 years of combined §1983 federal court trial and appellate litigation experience; and--who accordingly--expect to provide practical insights into how §1983 cases are litigated.

LAW 5148 - THE LAWS OF INTIMACY

Minimum Credits: 2

Maximum Credits: 2

So much throughout the history of our nation, federal, state and local governments have attempted in various ways to regulate our society's most intimate relationships and decisions. Challenges to laws regulating marriage, sexual conduct, reproduction, health and other very personal decisions permeate our country's jurisprudence. These "laws of intimacy," provide a historical window through which one can view the evolution of some of America's greatest and most enduring societal and civil rights conflicts. This course will provide students with an overview of the history underlying various "laws of intimacy" and the legal principles that have come to shape the debates concerning these issues. Students will apply these legal principles in their own analyses of continued efforts to regulate the most personal of human behaviors and decision-making.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5149 - LAW OF ARMED CONFLICT

Minimum Credits: 2

Maximum Credits: 2

The Law of Armed Conflict (LOAC), also known as International Humanitarian Law (IHL), is an area of public international law. It is responsible for regulating the conduct of armed hostilities, and balances the desire of states to prevent unnecessary suffering and destruction on one hand with the need to permit the effective waging of battle on the other. LOAC makes special provision for the protection of civilians, prisoners of war, the wounded, sick, and shipwrecked. LOAC applies to international armed conflicts (conflicts between states) and to non-international armed conflicts (conflicts between states and certain non-state groups). This course will explore: how conflicts are characterized (as IACs/NIACs or purely "domestic" actions); the main rules underlying the conduct of hostilities; and how those rules are enforced. Real-world examples and case studies will be used to elucidate theory.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5151 - HUMAN DIGNITY RIGHTS UNDER LAW

Minimum Credits: 1

Maximum Credits: 1

This class is an introduction to the substantive law of dignity rights, a new and important emerging field of law in the U.S. and throughout the world. Dignity is the root idea that every person, everywhere has human dignity and the human right to have their dignity respected and protected under law. Dignity is a foundational value and a legal right in international law (e.g. as reflected by the 1948 Universal Declaration of Human Rights), regional law (e.g., the American Declaration of Human Rights), in nearly 160 domestic constitutions throughout the world, and in thousands of juridical opinions spanning the globe. Dignity is also an emerging constitutional value in the United States, reflected in jurisprudence regarding equality, same sex marriage, reproductive rights, capital punishment, substantive and procedural due process, and climate crisis. Moreover, in August 2019 the 400,000-member American Bar Association adopted the advancement of human dignity as a core function and ingredient of the rule of law in the U.S. and around the globe. This course would be a rare opportunity to learn more about this important new area of law.

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide students with an understanding of current negotiation theory and practice. Students will study negotiation theories, research and techniques. As a result of taking this course, students will have an understanding of how to negotiate effectively in transactions, as managers, and to build effective teams. The materials for this course will consist of readings, negotiation scenarios, and real-life examples. Students will engage in skill-building exercises, actual negotiations, classroom and online discussions, individual presentations, self-reflection, self-assessment, giving and receiving feedback, and close reading of assigned texts and other materials. Students will have an opportunity to explore negotiation theory, practice different styles and techniques, and develop their own strategic approaches to negotiations.

LAW 5155 - EHEALTH LAW

Minimum Credits: 2

Maximum Credits: 2

Virtual Health, Telehealth, Artificial-Intelligence-Driven-Care, Healthcare Data Analytics Systems, are all descriptors of healthcare technology delivery systems and platforms: together, eHealth. This course will arm students with the knowledge, skills, and resources needed to approach legal solutions to eHealth challenges.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5156 - UNDERSTANDING ORDINARY CONTRACTS

Minimum Credits: 2

Maximum Credits: 2

Most 1L contracts courses give little attention to the structuring of actual contracts. While this is commonly remedied in upper level courses, even there the major focus tends to be on larger corporate deals (mergers and acquisitions, construction contracts, credit and financing arrangements, etc.). In fact, a large number of contracts in the world that lawyers negotiate and draft are smaller in dollar value, and yet extraordinarily important to understand and master. This class will introduce you to these contracts, and show you how they are structured and drafted. In so doing, we will discuss terms and conditions that are frequently subject to negotiation. We will also discuss different drafting alternatives to resolve such issues.

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5158 - COMPARATIVE PRIVACY LAW

Minimum Credits: 3

Maximum Credits: 3

This course compares information privacy laws from a global perspective. The topics discussed in this class include the basic structure of the European General Data Protection Regulation (GDPR), the evolution of privacy protection in the U.S., select provisions in the California Consumer Privacy Act, FTC regulations, differences in the protection of online users' personal information and data in various countries, cross-border data transfer, information fiduciary duty, and the future of privacy protection. This course will also study the privacy laws of other legal systems, such as those in civil law countries, from the perspective of comparative law.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5159 - STATE CONSTITUTIONAL LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the nature and significance of state constitutional law. We begin with a brief examination of the nature of our States and the historical role of their constitutions. Then we will consider the rights protected by the state constitutions and compare them to those protected by the federal constitution. This gives us the occasion to take up the most active debate in state constitutional law over the last several decades: the responsibilities of state courts when interpreting state constitutional provisions that live in the shadow of their counterparts in the federal Constitution, especially the weight to be given to the U.S. Supreme Court's interpretations of the federal provisions. Next we compare the constitutional structures of the state governments, both to one another and to the federal government. We finish up by covering issues of popular control over state governments, including the means of amending state constitutions and the methods for selecting state judges. While the course will provide a sampling of state constitutions nationwide, special attention will be paid to the Constitution of Pennsylvania.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5160 - THE LAW OF NIL DEALS

Minimum Credits: 2

Maximum Credits: 2

This course exposes students to the legal issues faced by college athletes engaging in name, image, and likeness ("NIL") deals. Students will learn about corporate, contract, transactional, and intellectual property law. Students will engage in case studies and hear from industry experts, including agents, athletic department administrators, and potentially college athletes/retired college athletes. The course is experiential, interdisciplinary and immersive. Experiential assignments will be simulation(s) including "client" interviews, negotiation exercises on behalf of the "client," and drafting and redlining a contract for the "client." Interdisciplinary classroom discussions will focus on creative, business and creative issues encountered in the entertainment and sports industries. Immersive experiences include meetings with entertainment professionals and their lawyers and legal assignments for entertainment organizations.

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5161 - STARTUP LAW & VENTURE CAPITAL

Minimum Credits: 2

Maximum Credits: 2

This course addresses financial and legal challenges facing early-stage companies. In this way, it complements, and is distinct from, the existing course Business Planning, Entrepreneurship & Technology, which covers the life of a company from inception to public offering. The Start Up Law course will begin by examining various considerations involved with the formation of a company that anticipates seeking venture capital, including but not limited to corporate governance, restricted stock and stock incentive plans. The course then will shift to various aspects of venture capital, starting with seed financings through to preferred stock priced rounds; included within this examination will be an emphasis on how to read and build out pro forma capitalization tables, translating term sheets into long-form agreements, negotiation tactics, and how to handle activist and angel investors. The course's primary form of assessment will be a final examination at the end of the semester based on a hypothetical growth stage company that seeks to raise capital. By the end of the course students will have encountered material that will advance all six of the Law School's Learning Outcomes. Specifically, students will be exposed to substantive law concerning early-stage companies and venture capital; as a result, they will be able to identify and articulate various legal issues surrounding these companies, as well as formulate and apply various legal rules and strategies. Students also will engage in problem solving and learn how to communicate their ideas in negotiation settings, with an awareness of the relevant standards for professionalism and ethics. Finally, students will develop competencies in numerous other professional skills, including but not limited to collaboration, document drafting, interpersonal communication, and self-evaluation.

LAW 5189 - HOW LAWYERS MADE AMERICA

Minimum Credits: 3

Maximum Credits: 3

This course examines the role of American lawyers as nation-builders from colonization to the present day. It explores not only how lawyers crafted the domestic legal and constitutional structure, but also how they shaped American settlement, politics, business, letters, education, rhetoric, race relations, immigration, communication, diplomacy, war-waging and peace-making over more than four centuries, allowing lawyers (not businessmen, not doctors, not professors, not clergy, not engineers) to largely define what it means to be an American. It considers how ordinary citizens and members of other professional groups have reacted to lawyers in their many social capacities, and it assesses how embracing and occasionally rejecting their self-appointed status as "essential Americans" has affected lawyers themselves. It concludes with an investigation of where lawyers stand in today's America, assessing whether they have succeeded or failed in their larger ambitions to build and to lead, and how they might better serve their country and themselves in uncertain times.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5197 - ADVANCED TORTS

Minimum Credits: 2

Maximum Credits: 2

An in-depth study of the practical considerations and specialized rules which lawyers need to employ when handling cases such as auto accidents, product liability, medical malpractice, local and state government torts claims, and premises liability. The course will not only concentrate on various

types of torts actions, but also on considerations which may be involved in all of those actions such as insurance coverage, emotional distress, bystander claims, damages, apportionment of fault and special duties. The course also will cover tort reform issues.

Academic Career: LAW

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5028; PROG: School of Law (LAWSC)

LAW 5198 - ANIMAL LAW

Minimum Credits: 2

Maximum Credits: 2

This course will examine the rapidly-growing and diverse field of animal law. Topics include the legal status of various non-human animal species, animals as property, animals in agriculture and food systems, animals in entertainment, animal protection laws, wildlife and endangered species, service animals, veterinary malpractice, and more. Applicable legal principles involve administrative law, contracts, torts, constitutional law, and civil and criminal procedure. Recent developments and current events in animal law will be discussed, including efforts to create and reform animal laws and the challenges faced when litigating and legislating on behalf of animals.

LAW 5200 - INT TO ACCOUNTING FOR LAWYERS

Minimum Credits: 1

Maximum Credits: 1

Introductory accounting for lawyers will provide students with a fundamental understanding of the principles underlying financial accounting. Additionally, students will gain an understanding of the development and analysis of financial statements including the balance sheet, income statement and statement of cash flow. Other topics will include a discussion of financial analysis and financial theory. The course is intended to equip students with the basic mechanics to review and analyze an entity's financial statements, identify significant issues and to form a general familiarity with financial statements to aid in preparing for litigation or assisting with business transactions.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROGRAM: School of Law

LAW 5201 - ADMINISTRATIVE LAW

Minimum Credits: 3

Maximum Credits: 3

It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.

LAW 5203 - STUDY ABROAD AT HOME:INTERNATIONAL TOPICS

Minimum Credits: 1

Maximum Credits: 1

This course offers an opportunity to "study abroad" while "at home," for students from Pitt Law as well as from the University of Belgrade, Serbia, and other law schools. The course will begin the first week of March, in order to match schedules at the two principal schools: the University of Pittsburgh and the University of Belgrade. Session topics will be (subject to change): International Arbitration and Dispute Resolution Using Private International Law Rules in Transaction Planning International Human Rights Law Foreign Law in US Courts International Bankruptcy and related Corporate Issues Islamic Law in the International Legal Order To Be Determined

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5206 - AGENCY AND PARTNERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course introduces principles of agency law and surveys fundamental aspects of partnership-based entities (i.e., General partnerships, limited partnerships, limited liability partnerships). Covered agency topics include actual authority, apparent authority, fiduciary duties, respondent superior, and sub agency. Covered partnership-based entity topics include formation, fiduciary duties, liability schemes, management, and dissolution.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5207 - ANTITRUST

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the law of antitrust. The course examines practices by which firms allegedly eliminate competition among themselves (e.g., Cartels, conspiracies, horizontal mergers), as well as exclude actual or potential competition from their markets (e.g., Boycotts, price discrimination, tying arrangements, vertical integration). The course will cover the Clayton, Sherman, and Robinson-Patman acts. No exposure to corporate/securities law, economics, or finance is necessary or presumed.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5210 - PATENT LAW

Minimum Credits: 2

Maximum Credits: 2

For over two hundred years the United States patent system has stimulated innovation by conveying time-limited exclusionary rights to inventors who adequately disclose their novel and nonobvious inventions to the public. Throughout this time, technological advancements in various industries have repeatedly confronted the patent system with fascinating policy and doctrinal challenges. In a constant effort to keep up with the pace of innovation and ensure that the patent system fulfills its constitutional purpose to promote the progress of useful arts, patent case law has become one of the most rapidly evolving and adapting areas of American law. Through study of judicial decisions and statutory provisions, this course will examine the substantive legal doctrine and policy underlying two primary aspects of United States patent law: (1) the requirements for obtaining a patent; and (2) the means by which an issued patent is enforced (and its validity challenged). Specific topics include patentable subject matter (including computer-implemented inventions and biotechnology), novelty, nonobviousness, utility, loss of right, disclosure requirements, patent claim interpretation, literal infringement, the doctrine of equivalents, prosecution history estoppel, defenses to patent infringement resulting in invalidity and/or unenforceability, injunctive relief, damages, and the unique role of the United States court of appeals for the federal circuit in shaping patent law.

Academic Career: LAW

Course Component: Lecture

Course Requirements: PROG: School of Law (LAWSC)

LAW 5212 - BUS PLANNING, ENTREP & TECHN

Minimum Credits: 2

Maximum Credits: 2

This course will address key legal and business issues faced by entrepreneurs when establishing a commercial enterprise. Specifically it will address the protection and development of ideas, the commercialization of technology, and the legal and business aspects involved in forming, funding, operating, and managing the emerging business enterprise. The course will be taught from a business planning perspective. Through participation in the course students will be exposed to advanced business law concepts applicable to emerging companies in the business, technology, and medical fields.

Course Requirements: PREQ: LAW 5112 or LAW 5141 ; PROG: School of Law (LAWSC)

LAW 5213 - CONFLICT OF LAWS

Minimum Credits: 3

Maximum Credits: 3

Disputes between parties from different states or countries and disputes having contacts with multiple jurisdictions raise a host of challenging legal questions, including: (1) which jurisdiction's law will govern the dispute; (2) whether and in what circumstances a judgment rendered in one state or country will be recognized and enforced in other jurisdictions; and (3) how courts should make these determinations. State laws, the federal constitution, and international and foreign law all play a role in deciding these issues, which can have a profound impact on the ultimate resolution of the controversy.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5216 - EMPLOYMENT DISCRIMINATION

Minimum Credits: 3

Maximum Credits: 3

This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion and age. The most prominent statutes in this area are title vii of the civil rights act of 1964, the age discrimination in employment act, and an older civil rights statute from the reconstruction era, 42 U.S.C. §1981. The course will explore the substantive meanings of "discrimination" under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5218 - WHITE COLLAR CRIMES

Minimum Credits: 2

Maximum Credits: 2

This course will examine the prosecution and defense of federal white collar crimes, including mail and wire fraud, Rico, criminal tax violations, bank fraud, health care fraud, perjury, obstruction and false statements. Close examination will also be given to the law enforcement techniques used by federal prosecutors in white collar cases, including the grand jury, immunity, search warrants and subpoenas. The fifth amendment self-incrimination privilege and the attorney-client privilege will also be studied. Emphasis will be given to providing students with the background and tools to reason through practical problems faced by white collar practitioners.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5219 - FAMILY LAW

Minimum Credits: 3

Maximum Credits: 3

An introduction to the conceptual and practical issues involved in the modern practice of family law. Topics include: the legal definition of marriage, of family; the rights, powers, duties and obligations among family members; the extent and means of state involvement in the family's conduct of its own affairs; dissolution of the family, and the continuing obligations among family members thereafter; problems of jurisdiction and choice of law.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5221 - JURISPRUDENCE

Minimum Credits: 3

Maximum Credits: 3

"Jurisprudence -- philosophy of law -- explores the nature of law and its role in society. This course tackles classic jurisprudential questions, focusing around what is known as "theory of adjudication" - the theory of how judges actually do decide cases and how they should decide them. Do legal rules and doctrines really constrain legal decision making (and if so, how)? What makes something a legal rule? Is there some necessary connection between law and morality (perhaps inherent in the concept of rights)? Is judicial decision-making really different from political decision-making (and if so, how)? Most of our readings will be from twentieth- and twenty-first century writers: legal positivists (e.g., H.L.A. Hart), natural law theorists (e.g., Ronald Dworkin), legal realists (e.g., Felix Cohen and Karl Llewellyn), and critical theorists (e.g., Duncan Kennedy and Patricia Williams). But we will also dip into some older classics, e.g., William Blackstone and Jeremy Bentham. Some of the reading will be challenging, but no prior experience with either jurisprudence or philosophy will be assumed. What will be useful is the knowledge of legal doctrine and decision making that you've acquired in law school so far. We will look back at some of the classic cases that you read in con law, civil procedure, and property and see how they reflect different jurisprudential approaches. In fact, at some point in the semester you will probably find yourself thinking something like, "So that's what Professor X was trying to get at when we read that case"! We will also look at how jurisprudence informs current political and social issues in legal decision making. For instance, consider those driverless cars you see all around Oakland. Besides being programmed to avoid collisions, they must be instructed to follow traffic laws. Exactly what should those instructions entail? When you have finished this course you won't be writing briefs that say, "you should rule for me because the legal positivists say so." But in another sense jurisprudence is of immense practical use: Jurisprudence brings to the surface conflicting assumptions lurking within different legal arguments and conclusions. When you learn to recognize those ideas, you understand something about how legal decision making operates on a deep level, and that makes you a better lawyer."

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5223 - ADVANCED TRIAL EVIDENCE

Minimum Credits: 2

Maximum Credits: 2

This course will focus on evidentiary issues that arise frequently in trials. Each week a vignette or series of vignettes, which address common trial evidence situations, will be assigned. The vignettes will be based on case files, in order to provide continuity throughout the course and for students to see the impact of evidentiary rulings on continuing cases. Each student will be responsible for weekly written assignments, which may include motions in limine or outlines of direct and/or cross-examination of the witness(es) for vignettes(s). Each student will also be responsible for preparing to offer timely and well-stated objections to the evidence sought to be introduced. Students will be required to understand the rationale for both the introduction of evidence and the objections thereto.

Course Requirements: PREQ: LAW 5103; PROG: School of Law (LAWSC)

LAW 5225 - INTERNATNL BUSINESS TRANSACTNS

Minimum Credits: 3

Maximum Credits: 3

This course analyzes basic international business transactions and the effects of U.S. Law, specific foreign law, and treaties on the conduct of the parties involved. The course covers issues of commercial law, regulation of cross-border transactions, dispute resolution, tax considerations, and antitrust law. Although a basic understanding of each of the areas of the law in the domestic context is helpful, there are no course prerequisites. Students are expected to develop an understanding of the U.S. Laws applicable to private international transactions and an awareness of the risks inherent in doing business in or with other countries and their nationals.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

Course Attributes: Russian & East European Studies

LAW 5226 - INTERNATIONAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course explores how international law regulates, or attempts to regulate, relations between states, and between states and individuals. It therefore examines both classical and contemporary topics such as the sources of international law, rights and responsibilities of states, jurisdiction, the incorporation of international law into domestic law, individuals as bearers of rights and obligations at the international level (in particular human rights law and humanitarian law), the law of treaties, the law on the use of force and the role of the united nations and the international court of justice in the peaceful settlement of international disputes. Several specific topics will be examined to illustrate the increasing impact of international law on domestic legal practice, and the influence of the United States on the development of modern international law.

Course Attributes: Global Studies, West European Studies

LAW 5232 - LAW & LEGAL PROCESS IN LATIN AMERICA

Minimum Credits: 2

Maximum Credits: 2

This is a two-credit introduction to the legal tradition, juridical institutions, and legal processes of the countries of Latin America. The first several weeks of the course will be devoted to the Roman origin of the Civil Law tradition (of which, of course, the countries of Latin America are part), the development of that tradition in Medieval Europe (with special attention to Spain), the growth of legal and governmental institutions in Spain's American colonies, and the influence of the U.S. and the French Revolutions and of German Legal Science on the newly-independent countries of Latin America and on the present-day legal systems of those countries. As the course proceeds, the students will be introduced to procedural devices created in Brazil, Mexico, and Argentina to adjust portions of those countries' Civil Law systems to the selective introduction of Anglo-American constitutional concepts. Finally, some time will be allocated for study and discussion of relevant special interests of students enrolled in the course.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5247 - ENVIRONMENTAL POLICY, POLITICS, AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

In many areas of law, the daily practice is not black-letter analysis and trial practice, but interdisciplinary collaboration and policy development. This is particularly true of environmental law, which combines legal issues in the common law, statutory frameworks, administrative law, private governance, constitutional law, and other legal areas along with scientific understanding, public communications, political persuasion, and ethics. Focusing on environmental issues, this course will provide students with a chance to explore interdisciplinary policy practice through an open-ended semester-long simulation. The simulation is paired with a regular discussion to consider a variety of issues in environmental law and policy.

Academic Career: Law

Course Attributes: Global Studies

LAW 5251 - BIOTECHNOLOGY LAW

Minimum Credits: 2

Maximum Credits: 2

Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Franken foods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5258 - CAPITAL PUNISHMENT, THRY & PRA

Minimum Credits: 2

Maximum Credits: 2

There are few areas of law whose jurisprudence has been fully developed within a period of the last forty years. Eighth amendment jurisprudence relative to the death penalty in the United States is such an area of law. We will explore how the United States supreme court has approached the development of this jurisprudence, and include within our examination some elements of due process as well, to see how the court, out of whole cloth, has created a practical jurisprudence for analyzing the constitutionality of capital punishment, and why the court was motivated to do so. This jurisprudence provides students with a window to the tug between justices who view the constitution as a 'living' document that adapts to the times and the society, and those who view the constitution as a static outline of the powers of respective governments within a federal system to be understood as the framers of the document would have understood it. Additionally, this jurisprudence provides students with a window to the strengths and weaknesses of a federal system in which the interplay between the power of the federal government and the power of the state governments must be understood and respected, even within the context of a constitutional jurisprudence that recognizes the imperative of the supremacy clause.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5259 - ESTATE AND GIFT TAX

Minimum Credits: 3

Maximum Credits: 3

This course involves a study of the federal transfer taxes imposed on gifts and estates. With respect to the gift tax, we will explore the transfers that are subject to tax as well as the annual exclusion and gifts to minors. With respect to the estate tax, we will explore the transfers (both during life and at death) that are included in a decedent's "gross estate," as well as certain of the deductions that are available to reduce the size of the gross estate (and, ultimately, the estate tax owed).

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5260 - INTELLECTUAL PROPERTY

Minimum Credits: 3

Maximum Credits: 3

In the information age, intellectual property (IP) law has taken on even greater significance. IP law is designed to encourage the production of certain forms of information by granting property rights to the producers, enabling them to appropriate the value of the information they produce. In this course, we survey state intellectual property law (e.g., Unfair competition and trade secrets) as well as federal intellectual property law including trademark, patent and copyright. We examine some of the ramifications of recent technological developments on intellectual property law and some of the problems of international protection of intellectual property.

Academic Career: LAW

Course Attributes: Global Studies

LAW 5265 - LABOR LAW: PRIVATE SECTOR

Minimum Credits: 2

Maximum Credits: 2

This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes, picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining

agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

LAW 5268 - CONSTITUTIONAL LAW 2: GOVERNMENT POWERS, FEDERALISM AND THE PRESIDENCY IN THE TRUMP ERA

Minimum Credits: 3

Maximum Credits: 3

This upper-level constitutional law course advances issues raised by the structural parts of the United States Constitution, as opposed to individual rights. Attention will be given to the relationships of the three federal branches of government, with emphasis on some of the powers and limitations of the executive, legislative and judicial bodies that arise from principles of separation of powers and national checks and balances. The course will also consider federalism and the respective roles of the national and state governments in some detail. These structural aspects of the Constitution will be discussed against the backdrop of the Trump Presidency, including, but not limited to, questions concerning judicial processes of indictment, Presidential pardons, the Emoluments Clause, the 25th Amendment, plenary powers over foreign affairs, the constitutionality of an international wall, congressional impeachment processes, and the legitimacy of sanctuary cities. Students will be expected to discuss the issues in a dispassionate, civil and academic fashion.

LAW 5272 - BANKRUPTCY

Minimum Credits: 3

Maximum Credits: 3

The study of bankruptcy law is the study of how the prospect and availability of bankruptcy affects legal relationships; therefore, bankruptcy attorneys must understand the full range of law, to determine the impact an insolvency proceeding has on the parties in interest and community at large. This course provides an introduction to federal bankruptcy law under the bankruptcy code of 1978 as amended, title 11 U.S.C.A. the code was substantially changed in 2005 and the course will deal with the revisions. The course focuses on substantive provisions of the bankruptcy code that apply in all varieties of bankruptcy proceedings and some of the associated rules of procedure. Covered topics include eligibility for federal bankruptcy relief; commencement of bankruptcy proceedings; jurisdiction and procedure; defining property of the bankruptcy estate; the automatic stay; adequate protection; discharge and discharge ability of debts; priorities; allowing, valuing and estimating claims; selected issues usually encountered in business, such as executory contracts and leases; the trustee's avoiding powers; set-off and recoupment; professionals. The course proceeds by analysis of problems and cases. Familiarity with the law of secured transactions (especially article 9 of the uniform commercial code) is necessary.

LAW 5276 - PATENT LITIGATION

Minimum Credits: 2

Maximum Credits: 2

This is an advanced, participation-oriented course that addresses issues that arise in patent litigation. The participation activities will include preparation and argument of preliminary and procedural motions, discovery practice, for example, preparation of protective orders, written discovery, participation in mock depositions, and preparation and argument of pretrial and dispositive motions, and a brief introduction to trial and appellate work in patent cases. Class time will involve both lecture and discussion, with substantial time devoted to mock situations using an adversarial team structure.

LAW 5282 - NATIONAL SECURITY LAW

Minimum Credits: 2

Maximum Credits: 2

The Preamble to the U.S. Constitution, which famously begins "We the People," makes clear the high value our founders placed on national security and the role of law. The Preamble describes the Constitution's very purpose as including "establish[ing] Justice, insur[ing] domestic Tranquility, provid[ing] for the common defence,... and secur[ing]... Liberty." Today, national security remains a priority responsibility for our federal leaders. Our nation continues to strive for the right balance between security and liberty, mixed with a healthy dose of Justice, all in the name of "form[ing] a more perfect Union." The Constitution has continued to provide a framework for our government's exercise of national security powers. At the same time, the field of national security law has witnessed rapid growth and significant change, particularly over the past fifteen years. The coming years will be no less dynamic. This course examines national security law through a study of essential legal sources, historical precedents, and current and emerging national security issues. Topics include: each branch's role (and limitations) in national security decision-making, war powers and military force, crime and counterterrorism, and the role of information in national security. Together, we will aim to better understand the role of law in keeping our homeland safe, and the relationship (and necessary balance) between security, liberty, and justice.

LAW 5288 - TAX CONTROVERSY PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course will walk students through the representation of a client during various administrative and judicial proceedings concerning compliance with federal tax law. Students will become familiar with the rules for practicing before the Internal Revenue Service (IRS) as well as the Rules of Practice and Procedure for the United States Tax Court. In addition, students will consider ethical issues that arise while representing clients before the IRS. During the semester, students will advise their clients with respect to an IRS examination, prepare a Tax Court petition, draft other documents and filings associated with a Tax Court proceeding and the collections process, and prepare an administrative ruling request. Each student will be responsible for weekly reading and research assignments as well as periodic written assignments including client communications, communications with the IRS, and Tax Court filings.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5291 - TRANSACTIONAL PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This course will offer an experiential learning opportunity in that all students will observe and perform many "lawyering" tasks normally entrusted to legal counsel who work on complex corporate and financing transactions. These tasks often require execution of instructions from a client or senior lawyer. Some require bilateral bargaining and judicious compromise. Some require collaboration or teamwork. The course will be cast primarily in the setting of a proposed acquisition of a "target company", as a going concern, by a so-called "private equity" investment firm. Students will be exposed to, and will engage by simulated participation in, the legal and practical dynamics by which transactions in this milieu are created, including: Negotiation of terms and bargaining over allocation of risks and uncertainties. Disclosure processes and protocols, for fulfillment of one party's appetite for information and the other's protective needs. Choice of transaction structure. Preparation of contract documents and drafting techniques. Dealing with "stakeholder" needs.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5112 or LAW 5141

LAW 5294 - MINING LAW, HISTORY & PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Mining law may seem a niche area- a "world apart which one can quite easily go through life without ever hearing about," as George Orwell said of mining-however, it is a unique combination of administrative law, employment law, contract law, tort law, and health and safety regulatory law. Federal regulatory agencies are increasingly the site of where the action is, and using mining law as a means of understanding this vast area of law will be of use to all students.

Over the period of this course, students would be introduced to the three primary aspects of mining law: 1) The history of mining, mining disasters, and passage of mining legislation in the United States; 2) Key elements of federal mining legislation; 3) The interpretation and evolution of mining law in the Commission and Courts.

Academic Career: LAW

Course Component: Lecture

Grade Component: GradLG/SU3

LAW 5295 - EXPERT WITNESS

Minimum Credits: 2

Maximum Credits: 2

In recent years, the use of expert witnesses has proliferated as both civil and criminal litigation have become more complex and technical. In this course, students will learn when expert testimony is needed; where to find appropriate experts; how to work with the expert to develop a theory of the case; and many more issues leading up to the actual trial of the case. Once the case reaches the courtroom, students will learn how to organize and present their own expert's testimony in a clear and concise fashion, and how to pursue the challenging task of "doing battle" with the opposing expert. In the end, students will achieve a greater appreciation for the subtleties of expert testimony, while at the same time acquiring the tools to deal with witnesses who speak in technical and unfamiliar language.

LAW 5296 - CORPORATE GOVERNANCE

Minimum Credits: 2

Maximum Credits: 2

This course will examine the internal structures, processes and standards of behavior that are required by law in the governance of corporate organizations, utilizing a series of hypothetical problems. Particular attention will be given to the corporate director's duties of oversight, care and loyalty, to the shareholders' ability to enforce those duties, and to the concept of fiduciary "independence." Some features of the Sarbanes-Oxley act of July 2002 and related rules will also be considered.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5297 - WORKERS' COMPENSATION

Minimum Credits: 2

Maximum Credits: 2

This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a

unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

LAW 5319 - LAWYERS IN AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

Lawyers like to think of themselves as members of one of the most helpful and important professions in American society. All too often, however, we encounter suspicion, derision or open hostility, not to mention nasty jokes. Public and private criticism of lawyers in the United States has become noticeably more intense in recent decades, but we have rarely attempted to survey its range, explore its roots, assess its legitimacy, or evaluate our own responses to it. This course proposes to do these things by examining characterizations and representations of lawyers in American culture from colonial times to the present day. We will relate changing views of American lawyers and lawyering to shifting social and professional circumstances; we will also explore the impact of those circumstances on fictionalized depictions of lawyers in American plays, novels, films, radio and TV, humor, art and song. We will consider what members of other prominent groups in American society, from 17th Puritan clergy to 20th century businessmen ' have said or alleged about lawyers. We will also discuss how, where and with what effect lawyers have presented, promoted and defended themselves before the American public. We will conclude the course by considering how lawyers might learn from past experience and leverage the opportunities and challenges of 21st century law practice to restore or at least improve their public standing.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5328 - COPYRIGHT

Minimum Credits: 3

Maximum Credits: 3

Copyright law deals with legal protection for certain kinds of expressive work -- literature, music, film, photography, and computer software, among other things -- which is an essential element of modern culture, knowledge, and communication. The copyright law course will teach you about the many roles that copyright law plays in constructing businesses, markets and other institutions for creating, distributing, and consuming that work. For authors and publishers, how does copyright law help them make money based on their creative works, or based on others' creative works? For readers and consumers and society as a whole, how does copyright law preserve the power to access and use knowledge? The course will teach those things in the context of teaching the skills of copyright lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and exercise professional judgment? How do practicing lawyers solve copyright problems? The course will put students in the role of practicing lawyers and teach them to think, write, and act as lawyer's generally and especially as copyright lawyers.

LAW 5330 - EMPLOYEE BENEFITS

Minimum Credits: 3

Maximum Credits: 3

This course examines the law of employee retirement benefits as well as welfare benefits, chiefly health care benefits. The course will focus on the federal employee retirement income security act of 1974 (Erisa). Close attention will be paid to the statute and the case law that has developed to explain and apply that statute. Classes will feature detailed discussions of the relevant statutory provisions and the resulting case law. Students will be expected to discuss the statute, cases and the problems in the assigned case book. The course is designed to make students understand how federal law governs and protects pensions, retirement benefits such as 401(k) plans, and health care benefits for employees, retirees and their spouses and dependents.

LAW 5336 - LAND USE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide students with a basic introduction to the mechanics and legal theories underlying land use controls. The course will strive to go beyond the theoretical by presenting a series of guest speakers (ranging from judges and zoning officials to land use planners and civil and transportation engineers) who deal with land use issues on a daily basis. Students will also be provided an opportunity to observe zoning board and court proceedings first hand and prepare class projects and papers based upon these proceedings. The course will emphasize the inter-relationship and conflict with environmental regulations. Class discussions and projects will focus upon recent judicial and legislative developments in land use law.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5339 - LAW OF DISABTY DISCRIMINATION

Minimum Credits: 2

Maximum Credits: 2

This course will provide in-depth analysis and discussion of the major federal disability discrimination statutes, including the Americans with disabilities act, the individuals with disabilities education act, and section 504 of the rehabilitation act. Readings and class discussions will focus on the application of these laws to issues such as employment, public accommodations, education, architectural barriers, transportation and insurance. The course will explore how disability discrimination statutes interact with other statutes, such as the social security act, the family and medical leave act, and the genetic information nondiscrimination act.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5340 - ENVIRONMENTAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient background for the purposes of this course.

LAW 5350 - EU FROM AN INTERNATIONAL LAW PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

As the European Union deals with the withdrawal of existing members and other threats to its continuation in the current form, an understanding of the EU and its impact on the international arena is more important than ever. This course will introduce both undergraduate and law students to the

EU and its policy framework from an International law perspective. It will provide a basic but critical understanding of the historical, institutional, constitutional, and substantive law dimensions of the EU and of the sui generis character of the Union legal order. It will also explore fundamentals of EU business law and the legal challenges that non-Member State businesses face when entering the EU market. The course will begin with a general introduction to the history, institutional structure, and competence of the EU. It will cover sources and principles of EU Law and their status within Member States. The course will then examine the relationship between EU law and public international law, including the status of the EU as a sui generis legal order, and the rising role of the EU as a co-creator of the international legal order. The third part of the course will deal with the fundamentals of European business law in an international setting.

LAW 5359 - WORKERS' COMPENSATION PRACTCM

Minimum Credits: 2

Maximum Credits: 2

The student undertakes this practicum concurrently with the workers' compensation course taught by adjunct professor Torrey. The practicum is not a requirement of the workers' compensation course. The workers' compensation course provides the student with an exposure to the history and theory of the law, a survey of the different state and federal systems, and the manner in which employers insure for workers' compensation. The practicum works as a supplement, and provides the student with firsthand exposure to and activity in the field. The student will observe lawyers meeting with clients and evaluating their cases. In addition, the student will learn how lawyers communicate and/or work with physicians, and how employers contesting claims obtain and present rebuttal medical evidence. The student will be introduced to the practice of taking trial depositions of medical and other experts, and have the opportunity to attend a deposition to observe attorneys at work. The student will also have the opportunity to attend hearings and observe the procedures of the opposing attorneys and the judge. In addition, the student will gain an understanding of the specific petitions that are advanced by the worker prosecuting the claim and the employer and/or insurance company that has contested entitlement. The participant in the practicum will be instructed in how to prepare written legal argument to the workers' compensation authorities, and briefs to the appeals courts. The student will also gain exposure to current practices surrounding evaluation of workers' compensation cases for possible lump sum settlement.

LAW 5364 - ADVANCED BANKRUPTCY

Minimum Credits: 3

Maximum Credits: 3

Lectures on chapter 11 issues and procedures will set the stage for what is going to happen in the class. Practicing attorneys or other professionals will be invited when the issues involve direct participation with a client and decisions that must be made from the business or legal side of the case. Lectures will cover the theoretical underpinnings to the bankruptcy code and rules, as applicable, and illustrate the points with appropriate case law. Discussion will cover the nature of chapter 11 reorganization, kinds of relief available in business cases, need for cash, why certain motions are needed early in the case whereas others wait, how the business issues interplay with the bankruptcy case, pre and post filing issues, solicitation of creditors committee, plan negotiation process and more. Students will be required to read and analyze the relevant statutory text and rules and relevant cases. They will be assigned certain drafting work and/or papers to write regarding the issues involved. "Papers" may take the form of legal briefs. Each student will be required to argue on behalf of a "client" an assigned topic. To simulate the practice of law, students will file all assignments on the bankruptcy court's test data base for electronic filing.

LAW 5365 - INTRO RUSS & UZBEK LEGAL SYS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to introduce students to the legal systems of the Russian federation and Uzbekistan. The foundation of the legal systems of these countries is almost identical, and by comparing one country's system to another, students will become more familiar with civil law systems. Special attention will be given to constitutions, court systems, the role of judges, state prosecutors, courtroom advocates and lawyers, as well as to the important commercial laws and treaties. I will use examples from my professional experience to give my students a realistic view of the legal systems of these countries. The class is intended to enhance student awareness of the legal environment and issues that often result from a decision to engage in relations or do business across national boundaries. Students must be prepared to actively discuss the assigned reading or other material in class each week.

LAW 5391 - ELDER LAW CLINIC

Minimum Credits: 7
Maximum Credits: 7
The Elder Law Clinic offers students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering. Students enrolled in the clinic are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Elder law clinic representation focuses on issues of capacity in medical treatment, mental health law, estate planning, contractual relations, and property management. Emphasis will be placed on long term planning, including estate planning and medical assistance (Medicaid) eligibility. Litigation skills focuses on practice in the orphans' court division, for example, guardianship proceedings. Students will develop practical skills such as interviewing, counseling, research, drafting, negotiation, and trial practice skills. Students may work in teams to represent their clients. The classroom component is an integral part of the clinic experience, consisting of a series of discussions focusing on substantive law, policy, and practical skills training. Experts in the fields of social work, psychology, psychiatry, and medicine will provide insights into interdisciplinary issues.

LAW 5393 - HEALTH LAW CLINIC

Minimum Credits: 7
Maximum Credits: 7
The civil practice clinics offer students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering skills. Students enrolled in the clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Health law clinic students represent their clients at all stages of seeking disability benefits through the social security administration. Students also represent clients in orphans' court in guardianship cases and in the US District Court on health related matters. They interview clients initially and if the case is accepted, proceed to gather and interpret evidence, develop case theory, prepare hearing memoranda, and represent clients at hearings or in court. The classroom component is an integral part of the clinic experience and consist of a series of lectures and discussions focusing on substantive law, policy, and practical skills training. Classroom simulations are designed to ready students for client work, and include an ADR exercise. The skills component of the course will be taught in tandem with the elder law clinic. Students may work in teams of two.

LAW 5395 - HEALTH LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system (including integrated health care delivery systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala; tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage (including HIPAA, COBRA and ADA); Medicare/Medicaid eligibility, benefits, and reform efforts; health care fraud and abuse (false claims act, anti-kickback statute, Stark); and antitrust issues in the health care industry. This course does not examine issues of professional liability, and it does not cover ethical issues in health care (covered in, which is the subject of "bioethics and law").

LAW 5398 - FAMILY LAW CLINIC

Minimum Credits: 4

Maximum Credits: 4

The Family Law Clinic is a two semester clinic. Students will receive a grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a W for the course, thus nullifying the grade for the prior semester. Students will receive 4 credits per semester. Classroom study generally includes instruction in client interviewing, client counseling, custody, paternity and child support substantive Pennsylvania law and custody and child support litigation procedures in Allegheny County. Custody mediation techniques are also examined. In clinic, under faculty supervision: Students will interview clients with regard to Pennsylvania custody and child support law. Students will, as legal interns certified by the Supreme Court of Pennsylvania, interview, counsel and assist clients in certain proceedings in the Family Court of Allegheny County dealing with matters of child custody and support. Students may in the course of their clinic duties prepare and deliver educational lectures concerning the substance of family law to client groups as, if and when the need arises, thus providing the student the opportunity to teach. Students may prepare Briefs, Motions, Complaints, Petitions or other court documents depending upon the legal needs of the clients that the student assist. Students may prepare research memos to be presented to all the students at the Clinic Review Meetings. Second semester students will undertake to mentor incoming students in family law court procedures.

LAW 5402 - CRIMINAL PROCEDURE II

Minimum Credits: 3

Maximum Credits: 3

Criminal Procedure II (The Adjudication Process) -addresses all of the major federal constitutional issues that arise during criminal adversarial proceedings in the United States - in both the state and federal court systems. This course will provide a detailed, practical, and realistic understanding of what occurs in a criminal case from the time an accused is arrested until the time of conviction, sentence, and appeal. Procedures in both federal and state courts will be discussed including preliminary issues such as arrest procedure, prosecutorial discretion in determining what charges will be filed, bail concerns, preliminary hearings, and grand jury proceedings. The course will then address pre-trial matters such as discovery, Brady material, and pre-trial motions practice. This section will include but not be limited to joinder and severance, speedy trial, plea bargaining, and pre-trial habeas corpus. The "trial" section of the course will discuss jury issues including jury selection and a variety of procedural

issues that arise at trial including confrontation clause, hearsay, double jeopardy, and Bruton issues. Supreme Court cases, such as Apprendi and Alleyne, will generate an important discussion of not only appropriate language in indictments, but verdicts and verdict slips as well. Time will also be spent on sentencing, both state and federal. We will also briefly cover the appellate and collateral attack post-conviction processes.

LAW 5404 - CYBERSPACE AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course will examine legal and public policy issues that pertain specifically to the existence, operation, and governance of the network of networks that we call "the internet" and the metaphorical experience that we sometimes refer to as "cyberspace." What legal and policy problems are unique to the internet and cyberspace? When and how should "ordinary" legal problems be treated differently if they concern the internet or cyberspace in some respect? Specific topics are expected to include the construction and definition of the internet; internet governance, including domain name regulation and network neutrality; and network and information security. It is expected that the course will not consider intellectual property topics, freedom of expression topics, or jurisdictional (civil and criminal procedure) questions. The course will focus primarily on public policy questions wrapped up in legal questions, rather than on principles of law as such.

LAW 5413 - MERGERS AND ACQUISITIONS

Minimum Credits: 3

Maximum Credits: 3

Mergers and acquisitions is a standard third year elective at many United States law schools. The course concerns itself mainly with the legal implications and practical aspects of the combination of business entities. Attention is paid to the economic and business reality which creates the context in which the legal issues arise. The course materials take a chronological review of the subject, from preliminary negotiations and letter of intent stages through definitive agreement drafting and closing, with litigation which may arise afterwards.

LAW 5417 - LAWYERING PROCESS SUMMER CLINIC

Minimum Credits: 2

Maximum Credits: 2

Students will be able to gain live client experience in performing an ensemble of essential lawyering skills, including: interviewing, counseling, negotiation, document/pleading drafting, and representation before the court of common pleas. Modeling, training and supervision will be provided by experienced staff attorneys at the field-based setting in Washington and the professor in a one-hour weekly group review meeting at the law school/online through Lync. Family law ' protection from abuse, custody, divorce, and child dependency ' will be the principal area of practice, with students provided preparatory substantive instruction/materials by staff attorneys and professor. Family law is not a required prerequisite. Scheduling of clinical hours will be adjusted to accommodate each student's other work commitments. Transportation costs associated with travel to/from the office will be reimbursed.

LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills. This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.

LAW 5424 - INTERVIEWING AND COUNSELING

Minimum Credits: 2

Maximum Credits: 2

Proficiency in interviewing and counseling is essential to both the litigator and transactional lawyer. Lawyering process I will provide the student with theoretical understanding of interviewing/counseling and intensive training designed to develop these essential skills. Through lectures, readings, demonstrative videotapes and class discussions, the "client-centered" model advocated by the instructor as well as the "traditional approach" will be introduced, examined, and collectively critiqued. Practice will involve observing/critiquing weekly in-class simulations (with students as "client," "lawyer"). Periodic quizzes and two videotaped exercises at mid-point and end of course (with students interviewing/counseling 'outside' client) will be scheduled. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of/practice in each essential skill.

LAW 5425 - LOW-INCOME TAX CLINIC

Minimum Credits: 3

Maximum Credits: 3

Working under the supervision of experienced tax attorneys, students participating in this clinic will assist in all aspects of the delivery of legal services to low income taxpayers in disputes with the internal revenue service. Students may expect to engage in interviewing, counseling, research, drafting, and negotiation with the I.R.S. Calendar and the disposition of the cases taken. In addition to the client work, students will also meet for weekly case review sessions.

Academic Career: LAW

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5428 - LEGAL NEGOTIATION

Minimum Credits: 2

Maximum Credits: 2

Proficiency in negotiating is essential to both the litigator and transactional lawyer. Lawyering process II will provide the student with theoretical understanding and intensive training designed to develop this essential skill. Through lectures, readings, and class discussions the two principal models of legal negotiation 'adversary' and 'problem-solving' will be introduced, examined, compared and critiqued. Students will engage in numerous negotiation exercises, some requiring drafting pre-negotiation plans and post-negotiation critiques. Highly experienced attorneys from the private/public sector will be invited to share their approaches/successes/challenges. Negotiations will be conducted both in-class and out-of-class. Two negotiations will be videotaped 'one at mid-point and the other at end of course' for subsequent viewing/critiquing on box. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of/practice in each negotiation model.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5429 - LAWYERING PROCESS CLINIC

Minimum Credits: 2

Maximum Credits: 2

Students participating in this clinical course will be provided with skills training and the opportunity to engage in a wide variety of lawyering activities (interviewing, counseling, negotiation, drafting of documents and pleadings, representation of clients before court and administrative agencies) in a controlled, supervised, instructional field-based program setting. Following initial orientation at the office, students will observe and thereafter participate in direct delivery of legal services to program clients. Cases assigned will primarily involve family law issues (divorce, protection from abuse, custody, dependency, etc.). Students who take the course for one semester will focus skills development on pre-hearing elements (interviewing, counseling, negotiating, etc.) During the first several weeks; thereafter, emphasis will be placed on in-court and administrative hearing representation. Students will be closely supervised by an experienced staff attorney under the direction of the course instructor. Selected student work may be videotaped for later review and critique by supervisor and instructor. Clinical time at the field-based office will be supplemented with a weekly case review session at the law school. Scheduling of clinical hours will be adjusted to accommodate the student's schedule. Transportation costs for travel to/from the office will be reimbursed. Students are encouraged to enroll in lawyering process I or II, since the focus of both such courses will provide skills support for the clinical experience. Course also available during the summer, with same supervisory

input and course requirements as described above.

LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This introductory course will provide a comprehensive overview of the primary laws, regulations and guidelines dictating data protection safeguards in the health care industry. It will begin with an introduction to the origins and philosophical perspectives that provide the framework for current privacy laws. Students will then explore the HIPPA privacy/security rules, provisions of Hi-tech breach notification standards, technical, physical and administrative safeguards and their intersection with the various state data protection laws. This course will include an introduction to the legal challenges associated with securing electronic data along the information highway and within the cloud, while attempting to safeguard against cybersecurity threats. Students will be introduced to the implications of privacy to the health care provider, health plans, health care clearinghouses, business associates, and the enforcement activities belonging to the office for civil rights. It will also afford students an opportunity to examine privacy from the financial and international perspectives.

LAW 5433 - OCCUPATIONAL SAFETY & HEALTH

Minimum Credits: 2

Maximum Credits: 2

With the explosion of COVID regulations from federal, state and local regulators, this class will take what was once the niche area of occupational health & safety and teach the administrative law skills needed by a new generation of lawyers as this historically-rooted specialty suddenly impacts the operations of offices, restaurants, manufacturers, and virtually every other type of client any lawyer might represent. The course will briefly review historic dangers posed to workers and move into a study of the modern regulatory state with the creation of OSHA. The course will study several tragic incidents the faculty have personally been involved with and walk students through handling an emergency investigation, managing public relations, filing an initial appeal, conducting a mandatory settlement conference, and litigating on the expedited OSHA timeline. The course will focus on how lawyers interact with experts and clients to quickly conduct a root cause analysis and examine broader legal defenses to OSHA actions such as unanticipated employee misconduct. The course will also examine risks for clients beyond any discrete citation, with discussions about OSHA's national "one" employer doctrine. Course faculty will leverage the international reach of their Dentons colleagues and other guest speakers to add different perspectives to the material. A particular focus of the course will be issues of racial and financial inequities in some OSHA matters. At least one class will focus on COVID-era class actions filed on behalf of largely minority essential workers.

LAW 5478 - HIGHER EDUCATION AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

Colleges and Universities occupy a unique role in American society and culture. Courts in case law vividly describe colleges and universities as "marketplaces of ideas" and consider higher education to play a critical role in our democratic society. As a result, concepts such as academic freedom and free speech shape the legal landscape in unique ways. In addition, many statutes specific to higher education govern the day-to-day actions and obligations. At the same time, many areas of the law apply to colleges and universities in the same manner as they would to any other

institution. This course will provide students an overview of the legal principles that shape higher education law. Students will then learn to apply the unique legal concepts to the analysis of the myriad of issues that commonly arise on campus.

LAW 5491 - ADVANCED LEGAL RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will build on the material presented in the foundations of legal research course, and will provide students with a broader array of strategies and skills to approach legal research projects. The course is to be broadly divided into three components. The first component focuses on strategic approaches to legal research, how to incorporate the research process into the litigation or transactional problem presented and to more effectively integrate the various legal research tools available into that strategic approach. Cost-effective research strategies, including strategies to effectively manage real-world lexis and Westlaw costs will also be covered. This component will somewhat overlap with, but significantly expand on material from the foundations course, and will give students a broader understanding of the research process. The second component of the course recognizes that not all substantive areas of the law utilize the same research resources, strategies and techniques. During this component of the course, students will self-select into one of three topical research tracks-expected to be intellectual property, environmental law, and health and disability law-and spend several weeks looking at the unique resources and research challenges presented by those areas. The third component of the course returns all students to the same material and focuses on non-legal research areas such as medical and scientific research, business and corporate research, investigative research, and financial and marketplace research.

LAW 5497 - HEALTH LAW PRACTICUM: ADR

Minimum Credits: 4

Maximum Credits: 4

The Health Law Practicum offers third and second year law students an opportunity to work with lawyers in hospitals, health insurance companies, and in a variety of other placements in health law. The primary emphasis of this practicum is legal representation of a non-profit enterprise in the changing health law environment. One of the changes being experienced in all health law environments is the resolution of disputes through the use of negotiation, mediation and other alternatives to adversary adjudication. The practicum comprises both a classroom component and a field placement. Both focus on work in the health law environment; however, the focus on alternative dispute resolution is primarily in the classroom component of the course. The classroom sessions of two hours per week will be devoted to a consideration of the application of ADR techniques to health law disputes. Besides studying substantive health law issues, students will participate in ADR simulations as part of their classroom experience. In addition to the classroom component of the course, students will work in the field with supervising attorneys for a minimum of 104 hours per semester. Students will be exposed to working in a health law environment in these placements. Whether students will be afforded an opportunity to participate in alternative dispute resolution as part of their site experience will depend on the projects then being undertaken at the placement site.

LAW 5508 - PERFORMING JUSTICE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Anyone who has set foot in a courtroom knows that what goes on there has as much to do with drama as with rational inquiry. Judges act as if they are finding legal rulings by applying objective rules, while making subjective choices about which rules to apply and how. Witnesses testify as if responding spontaneously to questions that actually have been rehearsed. Lawyers are professionally histrionic - paid to play righteous believers in their clients' virtue. This is the decision making process Jeremy Bentham called "theater of justice" and the American Legal Realists derided as a "ceremonial routine" of "word jugglery," "legal ritual," "magic solving words" and verbal "sleight of hand." In this seminar we will explore some

standard critiques of law as performance. Along the way we will consider how the theatrical, ritual, and perhaps even magical aspects of legal process might both detract from and contribute to the production of justice. We will approach these questions through reading and discussing a wide range of texts, including, judicial opinions, law review articles, performance theory, plays, social criticism, and ethnography. There will be at least one "field trip" to see some legal performance live, and we will likely make use of film and video as well.

LAW 5510 - SUPREME COURT PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to practice before the Supreme Court of the United States, with an emphasis on understanding the rules that govern the Court's handling of cases and the Court's decision-making processes. Over the duration of the course, we will track the progress of recent cases before the Supreme Court from beginning to end through certiorari filings, decisions to grant or deny certiorari, merits filings, oral arguments, and opinions. We will also take a closer look at three cases as examples that the students in the class will help us select. In particular, we will ask for student help to pick a case that was decided last Term, one that is scheduled to be argued during the course, and one that will be argued later in the Term. Our final exercise in the course will be to do a mock Conference in which we will try to predict the outcome in the case we select that has been argued but not yet decided by the Court. This course will continue to build student skills in (1) reading and analyzing cases, particularly Supreme Court cases; (2) identifying issues and considerations that might lead the Court to adopt a particular holding; (3) understanding how various argument strategies might affect outcomes; and (4) analyzing legal problems, including stating the established law, identifying open or unresolved or new issues in the law, and applying law to the facts to resolve a problem.

LAW 5537 - MEDICARE AND MEDICAID PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

This course is an introduction to the Medicare and Medicaid Health Care Systems. The goal of this course is to provide a basic understanding of how

these systems function and recognize how eligible individuals can utilize them to access affordable health care services. We will examine the purpose and function of Medicare and Medicaid, their program vocabulary, the eligibility criteria, the enrollment process, and the specific benefits that each program provides. The course is also designed to develop and enhance the practical counseling and advocacy skills necessary for using this information to serve program clients. By the end of the semester, students will be prepared (and should be confident) to successfully tackle the cases that they are assigned (as counselors with Pennsylvania's State Health Assistance Program - SHIP), assisting clients with in-depth counseling, and helping them access and utilize available health care benefit programs and services. The practicum is also designed to provide students with an opportunity to network and interact with local law firms, health care systems (UPMC and Highmark), government agencies (SSA, CMS and DHS) and private non-profit programs. In addition, the SHIP program sponsors several networking events during the spring semester to present the practicum students to these entities and profile their capabilities

LAW 5547 - INT'L INTELLECTUAL PROPRTY LAW

Minimum Credits: 3

Maximum Credits: 3

International intellectual property law has expanded substantially over the past few decades, and today seeks broadly to regulate transnational flows of information and culture. This course analyzes the international IP regime, situating it within the dynamics of globalizing flows of information and cultural objects. It provides an overview of the law, theory, and politics of this area of law, and will use case studies to illuminate the interaction between the three. Subjects covered include copyright and related rights (moral rights, traditional cultural expression, performers rights); trademarks and geographical indications; Internet domain names; trade secrets and patents. Case studies may include considerations of access to medicines, moral rights in Europe, and piracy in China as well as copyright formalities and Berne retroactivity.

LAW 5572 - PA INNOCENCE PROJECT PRAC

Minimum Credits: 3

Maximum Credits: 3

The Pennsylvania Innocence Project is a two-semester course offered by Pitt and Duquesne law schools, and meets at Duquesne School of Law. A 2-hour weekly seminar will examine and discuss the substantive law and remedies associated with wrongful convictions. Topics include mistaken eyewitness identification, junk forensic science, forensic DNA testing, and post-conviction remedies. Students are expected to spend 10 additional hours per week on their cases. This practicum will give students exposure to post-conviction collateral litigation, ethics in criminal law, both defense and prosecution, and factual analysis training. Students may work on wrongful conviction cases and clemency cases. Students will develop

lawyering skills in the context of factual analysis, and will develop creative legal arguments to aid the convicted innocent. They will explore criminal justice issues related to these fields. Students will apply their substantive knowledge to actual cases by reviewing and investigating claims of actual innocence. Students are assigned their own cases to review for factual innocence claims. They are expected to review the entire case & discovery, transcripts, motions, appeals, court opinions & to determine whether the inmate presents a colorable claim of innocence. They may be involved in factual investigation including identifying potential witnesses locating physical evidence to be subjected to forensic testing, and identifying potential expert witnesses. The Pennsylvania Innocence Project Practicum is a two semester practicum. Students will receive an S grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a W for the course, thus nullifying the S grade for the prior semester. Students will receive 3 credits per semester.

LAW 5585 - EDUCATION AND JUSTICE AND CIVIL RIGHTS SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to education and civil rights law and policy that are the foundation for civil rights protections in K-12 public education. Students will explore key education and civil rights issues in the following topic areas: school segregation (past and present), the criminalization of students of color, school privatization, and social movements for education justice. Students will emerge from this class with an understanding of historical and current flashpoints in education and civil rights in the United States and the role of lawyers and the law. In addition to analyzing key cases, articles, and social science research, students will explore how law students and lawyers can play a meaningful role through policy, litigation, and advocacy for social change.

LAW 5609 - PROFESSIONAL RESPONSIBILITY

Minimum Credits: 3

Maximum Credits: 3

This course will cover selected topics on the law governing lawyers. Major topics will include formation and termination of the attorney-client relationship and its attendant obligations, fee issues, conflicts of interest, ethics in advocacy, transactional lawyering, and entity representations, among others. The course will cover these topics from the vantage point of the model rules of professional conduct and the restatement of the law governing lawyers, as well as those aspects of constitutional law, evidence law, agency law, tort law, and procedural rules (both civil and criminal) that bear on an attorney's obligations to clients, courts, opposing parties and their attorneys, and the legal system at large. Class discussions will incorporate in-depth analysis of case law and the rules, as well as analysis of practical hypothetical scenarios in which a lawyer seeks advice about his or her legal and ethical options for moving forward in dealing with his or her clients.

LAW 5611 - ADVANCED FAMILY LAW ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

Much of the modern practice of family law involves litigation. From routine contested motions to complex equitable distribution and custody trials, the field of family law has seen a dramatic increase in the time the practicing family lawyer spends in the courtroom. Very often the family lawyer is faced with complex litigation that involves the direct and cross examination of expert witnesses and trial techniques and strategies molded well in advance of trial with the assistance of a child psychologist expert. In addition, "motions practice," arguing important discovery or interim issues that affect custody and equitable distribution cases, is an important, if not critical aspect of the practice of family law. We will follow hypothetical cases of families whose contentious divorce and custody issues must be tried to conclusion in non-jury mock trials. The students, working in small teams, will interview, counsel and prepare their role playing "client" for trials, develop trial strategy, engage in pretrial preparation, meet with and prepare expert witnesses for direct and cross examination and finally, try various issues to conclusion. The expert witnesses will be actual, highly experienced experts in various areas of valuation and custody. Students will be expected to prepare written trial materials. One class will be specifically devoted

to arguing a motion against opposing counsel on a discovery issue. The student will be asked to prepare a motion and a supporting brief on the subject issue to be addressed before the motion's court judge.

Course Requirements: PROG: School of Law (LAWSC); PREQ: LAW 5219 or LAW 5103

LAW 5616 - MOCK TRIAL STRATEGY AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

In this class, you will learn fundamentals associated with trying a jury case. You will learn how to conduct each phase of the trial from opening statements to closing arguments and everything in between. There will be a focus on the use of trial evidence which will serve as a good supplement to a regular evidence class. This is very much a learning by doing environment, and you will be required to participate in class each work to demonstrate your understanding of the assignment. It cannot be emphasized enough that grading will not be based on overall skill, but instead focused on individual improvement throughout the semester. This class will also serve as a springboard into competing on the Law School's Mock Trial teams. Although this class is focused on trial practice, it is beneficial to all students regardless of their anticipated career path. Through the semester, you will learn how to synthesize, sort and present ideas in a persuasive fashion to your audience

LAW 5618 - ARABIC FOR LAWYERS 1

Minimum Credits: 2

Maximum Credits: 2

Arabic for lawyers is a two semester course comprised of both Arabic for lawyers I and Arabic for lawyers II. Arabic for lawyers is a course that helps students to familiarize themselves with Arabic legal terminology and basic Arabic grammar. This is a beginner class that assumes no prior knowledge of or exposure to the language. As such, native speakers and those with formal training over a period of years may not enroll. The course is a two semester (full year) course and students are encouraged to take both semesters in order to benefit from the course. However, students are permitted to take only the first semester if they wish. They may take only the second semester with the professor's permission if they have had some modest experience with the Arabic alphabet. The first semester of the course deals with learning the Arabic alphabet, mastering pronunciation and developing the ability to write in Arabic by hand. In the second semester, we will turn to learning basic rules of grammar and developing vocabulary in a manner that is designed to be of interest and use to lawyers and legal professionals. The class will conclude by reading simple cases, laws and other basic legal materials. To facilitate the learning experience, laptops will not be permitted in class.

LAW 5622 - COMPARTV PROF RESPONSIBILITY

Minimum Credits: 3

Maximum Credits: 3

The course provides an exploration of the organization and the sources of regulation of the legal profession in the United States, and an overview of select countries in the Americas as well as Europe, briefly highlighting the main differences existing in lawyers' ethical standards in civil law and common law systems. It focuses on the main standards of professional legal ethics in the United States, and compares them with those of Latin American and European countries. The course will be centered on the ABA Model Rules of Professional Responsibility. The Model Rules will be compared with the rules of professional conduct proposed by international associations such as the International Bar Association and the rules proposed by bar associations in the MERCOSUR zone. The course also seeks to engage students in an exploration of the challenges posed by the increase in cross-border, transnational legal practice, and an overview of the ethical regulatory responses attempted so far in this field. This course meets the New York professional responsibility requirement. N.Y. Court Rules for Admission of Attorneys and Counselors at Law Rule 520.3(c)(1)(iii).

LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course will explore theoretical and practical aspects of nation-state legal issues concerning cyberspace, with a particular focus on computer-related crime, espionage, war, and international governance. The course will review key legal cases, policy, and legislation. In tandem with a series of expert guest speakers from the field, the course will reflect on the roles of national and international governments, the legal and ethical dimensions of cybersecurity, the relationship between the public and private sectors, and the increasing tensions between privacy and national security. The course will consist of four major components: (1) an assessment of the current cybercrime threat landscape, (2) a review of the relevant national and international legal frameworks, (3) analysis of case studies of significant prosecutions, and (4) assessments of domestic and international policy and security challenges, including gaps in existing frameworks. Students who complete the course will obtain an enhanced understanding of the legal, policy, and security frameworks at the core of these challenging issues for nation-states.

LAW 5627 - WICKED PROBLEM INNOVATION

Minimum Credits: 3

Maximum Credits: 3

"Wicked Problem Innovation" is a new, innovative, cross-disciplinary course that brings together graduate students from Pitt Law, the Katz School of Business, and other units across the University of Pittsburgh to engage deeply in a selected acute problem that faces Pittsburgh and the broader world. "Wicked" problems are stubborn, complex societal and business challenges, like global climate change, income disparity, inclusive economic growth, and universal healthcare. These problems arise from a variety of causes and affect multiple stakeholder groups, each of which has a different idea of how the problem arises and what can be done to improve it. While it is likely not possible to "solve" these problems in a traditional sense, it is possible to make sustained progress in tackling them. Course participants will research the selected problem from legal, business, historical, and other perspectives, identify and consult with stakeholders, and ultimately design a process to improve progress on the selected problem. During the course, students will learn to work collaboratively with peers and instructors from a variety of disciplines, and will practice a host of practical skills, including interviewing witnesses and clients, negotiating outcomes, and actively problem solving across a range of subject matter areas. Additionally, students will gain substantial and deep contacts in local, state, and potentially national, government, nonprofit, and business communities. Students will come away from the course with critical skills in working collaboratively across subject matter boundaries and experience creating an innovative problem-solving process from the ground up.

LAW 5631 - LAW AND ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

This hands-on, practical course is intended to expose law students to entrepreneurs, innovation companies and the legal issues they face. The course will take students through the life cycle of a technology start-up company, from concept and formation to exit (IPO or sale), through careful analysis of relevant legal documents and case studies, as well as participation in lectures, workshops and simulations. The course will cover choice of entity and formation (including tax issues at start up and early stage fundraising), employee hiring and compensation, evaluation and protection of intellectual property and the development of a comprehensive IP strategy, valuation and financing (investment opportunities), licensing and sales, multinational operations, and exit strategy. The course will provide students with the legal framework and tools necessary to launch and grow a successful technology start-up, and to advise and assist entrepreneurs interested in launching a new business.

LAW 5638 - RACE AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course will explore the legal treatment of race in the United States. Central to this examination will be: (1) the legal and social construction of race and racism; (2) the legal history of racialized groups including African Americans, Latinos/as, native Americans, Asian Americans, Arab and middle eastern Americans, and white Americans; (3) anti-discrimination laws (governing diverse areas such as education, employment, voting, familial relations, public accommodations, and housing); and (4) the relationship between race, language, and citizenship. A pervasive theme throughout the course will be the significance of race in the post-civil rights era. This inquiry will be analyzed under various modern civil rights perspectives including: traditionalism (advocating for colorblindness and 'reverse' racism claims), reformism (supporting affirmative action); and critical race theory (recognizing continued systemic subordination).

LAW 5640 - DIVERSITY INTERGROUP DIALOGUE

Minimum Credits: 1

Maximum Credits: 1

The Diversity Intergroup Dialogue Workshop is open to all 2L, 3L, LLM, MSL and joint-degree Pitt Law students and brings together those with diverse cultural and social identities in a small group setting, with the goal of engaging students in experiential learning as well as open and constructive dialogue concerning issues of intergroup relations, conflict and community. Students will learn from each other's experiences and examine how race, ethnicity, class, religion, age, disability, sexual orientation, gender identity and expression relate to power and privilege; and will practice constructive approaches to dialogue and the bridging of differences. Students will also consider how attorneys in a pluralistic society can use Intergroup Dialogue skills to better serve clients, advance causes and enhance professional satisfaction. The workshop process is designed to stimulate learning, growth and engagement across the cultural identities identified above to provide students with the affective, behavioral and cognitive acumen that will promote skill-building to navigate effectively in our increasingly pluralistic nation and world.

LAW 5641 - SECTION 1983

Minimum Credits: 2

Maximum Credits: 2

This is a course in advanced constitutional rights litigation brought pursuant to 42 USA1983-- the federal statute which puts constitutional rights in action. It focuses on the means by which constitutional rights claims are actually litigated in lawsuits against public officials and local governments. Topics will include what it means to act "under color of state law;" absolute and qualified immunities; government liability for the acts of individual officials; remedies for constitutional violations, including monetary and injunctive relief; structural reform litigation; and the award of attorney's fees. The objective of the course is to provide students with the threshold substantive knowledge- to be able to bring or defend a 1983 case--- with the presentation facilitated by using "real-life cases" actually litigated by the instructors-- who between them have over 80 years of combined 1983 federal court trial and appellate litigation experience; and who accordingly--expect to provide practical insights into how 1983 cases are litigated.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5642 - FEDERAL HATE CRIMES

Minimum Credits: 2

Maximum Credits: 2

This course will focus on federal hate crimes. Students will examine and analyze relevant statutes and key cases with a focus on gaining a practical understanding of the elements and application of these statutes. Students will have the opportunity to engage in discussions regarding the larger societal conversations relevant to these cases in order to better understand the various lenses through which prospective jurors may view such cases. Students will also learn about the tailored strategies applicable to investigating and litigating federal hate crimes cases, as many of these strategies are unique to this specific area of law. In addition to exploring various fact patterns through in-class discussion, students will utilize a specific hypothetical case fact pattern throughout the duration of the course that will serve as a basis for exploring the relevant statutes and strategies. As the course progresses, students will investigate the hypothetical case (including through an "investigation workshop"), analyze evidence related to the case, and litigate the case (through a "litigation workshop" and mock trial exercises). Please note that the subject matter of this course will require students to read about, view, listen to, and discuss material that may be disturbing or offensive to some or all students. Such material may include recordings or descriptions of the use of racial slurs and other offensive language, recordings or descriptions of the use of violence targeting victims based on a specific trait (race, ethnicity, gender, sexual orientation, religion, etc.), and other similar material.

LAW 5643 - THE PRESS AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

The press often requires representation to ensure that it has access to the news and to ensure it can gather and report news without interference. There is a considerable body of law on the press' rights of access to government actions and the right to report news. The body of law also protects the press' sources and research from government intrusion. The course, taught by an attorney with extensive experience in representing the press, will review this body of law. It will afford students practical experience in representing the press by mock court appearances and arguments, and pleading preparation. Among the topics to be covered are: A. Origins of Freedom of Press History of Censorship of the Colonies and the Development of the Protection of the Press in the Bill of Rights B. Prohibition on Prior Restraint of the Press - New York Times v. United States of America C. Protections of the Reporter in Covering News -The Qualified First Amendment Privilege and the Pennsylvania Shield Law D. Access to Judicial Proceedings and Judicial Records 1. The common law right of access 2. The higher First Amendment right of access 3. The Pennsylvania Constitution protections 4. How the press can assert its right of access E. Access to the Executive Branch 1. Freedom of Information Act 2. Pennsylvania Right to Know Law and Sunshine Law and similar state laws

LAW 5644 - PHILOSOPHY OF CRIME & PUNISHMENT - NATIONAL & INTERNATIONAL PERSPECTIVE

Minimum Credits: 2

Maximum Credits: 2

This class will examine the philosophical and moral justifications for punishment in both American and international criminal justice systems, with a specific focus on the impact that the philosophy of punishment has on the individual and more broadly, on society as a whole. We will examine legal theory and concepts while fostering philosophical contemplation and discussion. There are four main theories of punishment: deterrence, retribution, rehabilitation and incapacitation. Depending on era and country, different views take a different approach and order of importance; this class will examine the four main theories in other countries, as well as our own. We will examine which philosophy of punishment is most effective and why. As we attempt to move toward a more socially conscious view of justice, we must ask a series of "why" and "how" questions: why do we punish those who have violated the law, and how do we decide the proportionality of the punishment in question? What philosophy do other countries use/ what philosophy has shaped our modern view of crime and punishment? Are we becoming more or less moral? Whose standards of morals? Are we becoming a more or less compassionate society? And how do those standards compare to the moral/philosophical views of comparative criminal justice systems in other countries? This class will be taught by lecture and discussion and will require short essays and one longer research paper. The purpose of these essays will be to make a well-reasoned argument supported by the readings, as well as counterpoints.

LAW 5647 - INTRODUCTORY ENTERTAINMENT LAW

Minimum Credits: 3

Maximum Credits: 3

Introductory Entertainment Law exposes students to a wide range of legal knowledge, practical skills, industry experts, potential clientele and content genre encountered in the field of entertainment, sports and art law. Students will learn about corporate, contract, intellectual property, employment, tax and securities law. Students will practice negotiation, drafting and oral presentation skills. Students will hear from industry experts, including lawyers, agents, managers, and executives. Students will also meet clientele, including athletes, entertainers and/or artists, and for-profit, non-profit, governmental and/or social benefit organizations. The course will also focus on a wide variety of sports, entertainment and artistic genre, including film, television, amateur and professional sports, video games, music, theater and visual art content. The course is experiential, interdisciplinary and immersive. Student assignments will include reflective journals, stakeholder interviews, negotiation exercises, and a final oral presentation and written project. Students will learn about the legal and business issues encountered in the sports, entertainment and art industries. And outside speakers will include lawyers and clients discussing their experiences with sports, entertainment and art law. Course Topics: Representation by lawyers, agents, and managers; protection, licensing, infringement and fair use of intellectual property; labor and employment law; negotiation and

drafting of contracts; representing for-profit, non-profit, governmental and social benefit organizations; investment, debt, governmental and charitable financing; and specific legal issues related to film, television, sports, video games, music, art and live entertainment.

LAW 5648 - CIVIL RIGHTS LITIGATION: HIST

Minimum Credits: 3

Maximum Credits: 3

This seminar will be a historical consideration of civil rights litigation in the United States. Our goal will be to understand the long history of segregation as it was created by legislatures and then supported by Courts, and how these precedents were reversed through litigation and other strategies. We will read classic cases on race, from the 19th and early 20th centuries, learning how the Supreme Court developed its segregation doctrines. We will simultaneously look at litigation strategies by abolitionists before the Civil War and civil rights activists in the late nineteenth century. We will then turn to the creation of the NAACP and see how it became the leading engine of civil rights litigation. This will lead to the long struggle for an end to segregation, culminating in *Brown v. Board of Education* (1954). Part of our focus will be on Thurgood Marshall as a lawyer. We will look at NAACP integration strategies along with more activist civil rights strategies by Martin Luther King and others. This part of the course will also look at federal actions on civil rights after the passage of the 1964 Civil Rights Act and other civil rights laws. Readings will include some cases -- often in full text -- the classic book *Simple Justice*, a biography of Marshall, and writings by King and others. Our consistent focus will be on (1) what this history teaches us about attorneys litigation strategies and (2) what overarching limits there may be on attaining fundamental change through the litigation process.

LAW 5653 - INTERNATIONAL HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law and the ability (or lack thereof) to enforce international human rights standards. The course will look at different examples of human rights crises throughout the world, how those crises are being addressed and how we believe they should be addressed in light of established law and morality. In light of the growing importance of the *r2p* ("responsibility to protect") doctrine and the related doctrine of "human rights intervention," we will examine these doctrines closely, whether they comport with international human rights law and whether they in fact accomplish what they claim to accomplish.

Grade Component: Grad HSU Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5669 - POLICE MISCONDUCT & HATE CRIMES

Minimum Credits: 2
Maximum Credits: 2

This course will address civil rights with a focus on police misconduct and hate crimes. While these are distinct areas of criminal law, they represent the two primary categories of federal criminal civil rights enforcement. Students will examine and analyze relevant statutes and key cases with a focus on gaining a practical understanding of the elements (and application thereof) of each crime. Students will also learn about the strategies applicable to investigating and litigating these matters. Students will then apply their understanding to real-world fact patterns examined through in-class discussions, mock hearing and trial exercises, and assignments focusing on the development of written and oral litigation skills. Please note that because this course addresses police misconduct and hate crimes, the subject matter will require students to read about, view, listen to, and discuss material that may be disturbing or offensive to some or all students. Such material may include videos of police shootings, recordings or descriptions of the use of racial slurs and other offensive language, recordings or descriptions of the use of violence targeting victims based on a specific trait (race, ethnicity, gender, sexual orientation, religion, etc.), and other similar material.

LAW 5670 - PERSONAL FINANCIAL PLANNING & BUSINESS START-UP PLANNING

Minimum Credits: 1
Maximum Credits: 1

This course deals with the basics of personal financial planning and startup business planning. Students will create personal financial plans based on projected horizons of 1, 3 and 5 years. The primary focus is on near term planning with emphasis on: initial savings, paying off student debt, judicious use of credit, and investing for short and long term goals. Also, students will create a comprehensive business plan for starting a law firm after graduation. This plan's focus should be on business structure, financing, cash management and cost control. Topics such as benefits and insurance should be covered as well. Students will prioritize and codify their plans based on personal, professional and lifestyle objectives projected over each plans stated horizons.

LAW 5671 - CYBERSECURITY, PRIVACY, AND AMERICAN DEMOCRACY

Minimum Credits: 3
Maximum Credits: 3

This course will explore the intersection of cybersecurity issues and American democracy. The proliferation of technology in the cyber age has not only collided with existing norms and laws around privacy, but also stressed American democracy in profound ways. The proliferation of algorithmic tools within government and cyber threats to our critical election infrastructure (including digital disinformation and hacking) are among the most pressing challenges that our democracy must confront to preserve popular legitimacy in the face of cyber's growth. By first exploring the legal framework around cybersecurity and privacy, students will have a sufficient grounding to examine these complex issues facing American democracy.

LAW 5672 - IMPLICIT BIAS IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

Equity of care, cultural competence, implicit bias, diversity, patient health management, population health, and their connection to federal law and informed consent liability can be among the most challenging of myriad legal mandates for health care providers. Long described as just "doing the right thing," culturally competent health care is now a legal imperative, with significant implications for physicians and health care providers' practices, livelihoods, and the health of their patients. Academic studies demonstrate that culturally competent, civil rights compliant care reduces costs while also driving new business, attracting new customers, increasing workplace productivity, improving patient outcomes, and heightening medical staff satisfaction. In this class, we will discuss the new legal landscape of cultural competence and the consequences for providers. We will examine health care diversity and inclusion, implicit bias, its daily manifestations in health care and everyday life, including organizational culture and the BLM movement and protests. We will discuss how to identify such bias and how to minimize its influence on vital health care and professional decision making. We will analyze federal health care civil rights laws and apply them to real life health care situations while providing students with behind the scenes information about little known court decisions, leadership courtroom testimony, and health care defense practices that tipped the balance in multiple courtrooms across the United States.

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5673 - HEALTH CARE FRAUD, ABUSE, AND COMPLIANCE

Minimum Credits: 2

Maximum Credits: 2

United States health care spending reached \$3.6 trillion in 2018, accounting for 17.7% of the gross domestic product. Government officials have been quoted as saying that up to ten percent of this spending is due to fraud, waste, or abuse. In fiscal year 2019, the federal government won or negotiated \$2.6 billion in health care fraud and abuse judgments and settlements, as well as additional amounts from administrative cases. As one of the most highly regulated industries in the United States, health care entities are required to comply with numerous statutes and regulations, including those related to fraud and abuse. These laws are increasingly complex, thereby exposing health care entities to liability for non-compliance. Thus, individuals involved in the administration and delivery of health care and lawyers who wish to practice health law must be well-versed in the laws and regulations that govern health care fraud, abuse, and compliance, as well as the strategies health care entities employ to address these concerns. In this course, students will explore the major federal civil, administrative, and criminal laws that have been used to combat health care fraud and abuse. These laws include the False Claims Act, the Anti-Kickback Statute, the Physician Self-Referral Law, and the Civil Monetary Penalties Law. Related compliance strategies and the practical compliance issues faced by health care providers will also be covered, including the seven elements of effective compliance programs, conflicts of interest and governance, repayments and disclosures, privacy and security, and corporate integrity agreements.

LAW 5674 - THE STATE ATTORNEYS GENERAL

Minimum Credits: 2

Maximum Credits: 2

The course will cover the day-to-day challenges faced by state Attorneys General and their staffs in enforcing state and Federal laws and defending state agency clients in a constitutional and ethical manner. The course will focus special attention on the 1,000-person Pennsylvania Office of Attorney General and on consumer financial issues, including enforcement of the Consumer Financial Protection Act and other federal consumer financial laws. Although each State is unique, the course will demonstrate the remarkable congruence that exists among State Attorneys General when addressing similar challenges and issues. Each office possesses broad jurisdiction and to varying degrees is independent from the executive and the legislative branch of state government. Attorneys General in 43 states are elected statewide on a partisan basis. The combination of sweeping jurisdiction and constitutional independence has given rise to a unique American legal institution of growing importance. The course considers the unique ethics issues that Attorneys General and their staffs must confront. The course will also cover the relationship of Attorneys General with Governors, state legislatures and agencies, the federal government, the private bar, and a myriad of advocacy organizations.

LAW 5675 - DOMESTIC ARBITRATION: LAW, POLICY & PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This course will discuss not only the governing legal framework for domestic arbitration but also how to approach arbitration as a practitioner, with a particular focus on arbitrations in the employment and consumer contexts. Students will consider on what grounds arbitration can be compelled or, in the alternative, opposed. Students will also learn how arbitrations are actually conducted and the key practical differences between arbitration and litigation. Finally, students will consider the policy implications of the trend toward resolving disputes through arbitration rather than litigation. The course will utilize simulations, role-playing exercises, mock arguments, and similar methodologies to ensure that students are active and engaged discussion participants.

LAW 5677 - CORPORATE IN-HOUSE COUNSEL PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This practical business law concentration, three credit experiential course, will explore the unique legal and real-world challenges that face counsel working in a typical corporate law department. Students will continually engage as a member of legal affairs for a fictional corporation addressing various topics. Themes include: serving stakeholders and the client, furthering business objectives, adding value and weighing the independent duties owed by a corporate attorney to the corporation, as well as, managing the tensions that arise in the role. Themes will be explored through selecting and managing outside counsel and budgeting, advocating for and integrating legal technology, applying effective practices as part of legal operations, administering merger and acquisition transactions and managing litigation, each as distinct from the responsibilities of outside counsel. Students will examine matters of fulfilling corporate compliance and governance requirements, awareness of legal knowledge versus application of legal intelligence, and the operation of the attorney-client privilege specific to the in-house context. Students will learn that the demands of business operations will encourage innovation, often substantiating use of technology, and they will recognize that expectations to be innovative are largely directed by the increasing need to be a predictive, forward-looking and problem-solving lawyer. Students will build practical skills for writing business-oriented communications, training and counseling the non-lawyer business client in order to realize legal and business objectives. Students will repeatedly interact with in-house practitioners and other guest speakers, as well as, participate in a shadow program for a day in the life inside a law department.

LAW 5678 - SOCIAL JUSTICE IN ACTION

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of the fall term course Social Education Justice Project. The spring semester of the course will be primarily experiential in nature, both as a simulation course and a clinic course. The simulation component will involve students as attorneys supervising junior attorneys in the preparation of an appellate brief and oral argument for a national moot court competition. Students will be placed in a lawyer role representing a client and completing lawyering tasks. I will supervise them directly and provide frequent feedback. The students will participate in a classroom component throughout the semester. The clinic component will place students in the role of facilitative lawyer, acting as a third party neutral and advising an individual or entity who is pursuing a social justice initiative or project in the community. I will supervise the students' work directly as they serve in the lawyer role and I will provide regular feedback. The students will participate in a classroom component throughout the semester.

Grade Component: Grad LG/SU3 Basis

LAW 5679 - INSIDE-OUT PRISON EXCHANGE PROGRAM

Minimum Credits: 3

Maximum Credits: 3

This course, which will be taught using the Inside-Out method, will explore some of the most fundamental and current issues arising in criminal justice and the law. Among them those issues and questions: What is the history of prisons in the U.S., and why do we have prisons now? Why has the U.S. engaged in one of the largest experiments in mass incarceration the world has ever seen? Why do people commit crime? Are there alternatives to incarceration that would produce better outcomes and a more just system? What role has race played in criminal justice in the U.S., and what would a more just system look like? The course will bring together students from the School of Law (and perhaps undergraduates from the University of Pittsburgh) with students who are incarcerated at a correctional institution in the region. All students will study together, with most class sessions taking place at the institution. Students will use reading and group discussions as well as writing assignments to bring together theoretical knowledge and learning, lived experience, and the experience gained in the class. The Inside-Out method emphasizes collaboration and dialogue facilitated by the instructor, which invites all participants in the class to address topics under discussion with a willingness to discuss things with honesty and integrity and to learn from each other. Students should anticipate that they will have the opportunity to test and sharpen their understanding of criminal justice issues, in an environment that will depend upon an honest exchange of ideas through real dialogue. In doing so, we will create real connection between students on the outside, and students on the inside.

LAW 5680 - INTERNATIONAL INSOLVENCY

Minimum Credits: 3

Maximum Credits: 3

Each spring semester, the American College of Bankruptcy offers a live internet-based course in international insolvency law. This innovative course is shared by law schools across the United States and in foreign countries through live interactive video over the internet. Experts from around the globe are brought in by the College as guest lecturers for each class session. Robert Lapowsky, a College Fellow and the course professor at Penn, serves as Course Leader in charge of scheduling the speakers and coordinating the lectures. In addition to the weekly lectures, Pitt students will meet weekly and in-person with Professor Schaffer for an additional one-hour session. These sessions will supplement the material offered online and introduce students to the basics of international capital markets, which is quite relevant given the extent to which international insolvency often involves questions of public debt.

LAW 5681 - PRACTICE OF INTERNATIONAL LITIGATION & ARBITRATION

Minimum Credits: 3

Maximum Credits: 3

There has been a dramatic rise in complex global disputes, often between private parties and sovereign states. These cases carry significant political, economic, and legal consequences, and the legal regime governing these disputes is both complicated and underdeveloped. This reality creates both pitfalls and strategic opportunities for creative counsel. This course provides students a unique opportunity to explore the evolving area of cross-border disputes, while obtaining substantial stand-up advocacy experience that translates to any dispute-resolution setting. Based upon a realistic simulation of a cross-border dispute between a U.S. company and a foreign state-owned entity, students will prepare submissions that they will then

argue to mock panels comprised of prominent arbitrators, corporate counsel and leading practitioners. Reflecting the reality of global disputes, roughly 30% of the class is dedicated to transnational litigation, 50% is dedicated to international arbitration, and 20% focuses on mediation. Students will leave with first-hand experience in the substantive and procedural aspects of international litigation and arbitration, with the additional overlay of complex and delicate facts involving foreign sovereigns. The focus of the course is on practical skills and strategic considerations, and the lectures are designed to provide sufficient context and background to make the simulations accessible for students with little prior exposure to this area of law. In this way, the course is as useful to student who might be taking the course to primarily to hone their advocacy skills as it is for those students with a background and interest in international disputes and international law.

LAW 5682 - GLOBAL CHALLENGES & TRADE LAW

Minimum Credits: 1

Maximum Credits: 1

The ongoing transformation of the international economic legal order and of global governance institutions is generally attributed to globalization. The establishment of global governance institutions is linked with the need of solving issues that affects, due to their nature, the international community. Yet, both globalization and institutions established for its promotion are in a profound crisis of identity. Concerns arise as to the coherence and compatibility of these trading processes and efforts with respect to national and global challenges. Both public opinion and policy makers fear that international trade, in particular a further liberalization thereof, may undermine or jeopardize policies and measures enacted for facing global challenges. This is the domain of this course; the law and policy of relations between national governments concerning the regulation of economic transactions that have cross-border effects also on the life of the population at large. The course covers the relevant WTO agreements and look into the interaction among trade, economic globalisation and global challenges. This course will also deal with past and present debates over the role of the legal order in economic development, analyzing today's most important issues in this domain: environmental crisis and the rise of emerging economies. Emerging economies, especially China, are increasingly taking the lead in reforms attempt of international economic law and from rule taker are now shaping the future of this field. Trade wars, the securitization of international trade as well as COVID-19 implications on international economic law are 2 also covered in this course to demonstrate the broader crisis of what we can term as multilateralism.

LAW 5683 - TRANSACTION NEGOTIATION & DOCUMENT DRAFTING

Minimum Credits: 2

Maximum Credits: 2

This course is designed to strengthen students skills in two areas of fundamental importance to any transactional lawyer negotiation and drafting. Specifically, students will learn how to develop and most effectively deploy their own negotiation style, understand the bargaining process, and then develop what they have learned to draft negotiated agreements with counterparties. The course is experiential, and it will rely largely on simulations and mock exercises to assess student progress in realizing the course objectives.

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5684 - MEDIATION SKILLS

Minimum Credits: 3

Maximum Credits: 3

Mediation continues to be utilized by parties and the judicial system as a preferred alternative to litigation. This course is designed to train students to become mediators and to meet the minimum standards set by the courts for mediation of cases. Students may use this course to satisfy accepted requirements for a basic 40-hour mediation training program. This course focuses on the structure and goals of the mediation process and on the skills and techniques used to assist parties in overcoming barriers to dispute resolution. This will be achieved through a thorough discussion of the theories and sources of conflict, theories of conflict resolution conciliation processes, mediation, negotiation, and professional ethics. These theories are then tested in simulations, exercises, and role plays to allow the students to develop mediation skills, implement creative options for resolving conflict, and explore the effectuation of the theories and their skills. In addition, it is incumbent on all lawyers to be familiar with the mediation process and become competent in representing clients in mediation. The course also will cover ethical issues for lawyers and mediators, dealing with difficult people, power imbalances, and cultural considerations.

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5685 - CYBER LAW & POLICY SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Cyberspace is the critical infrastructure that runs our world. Yet, much remains ungoverned and the threats are constantly evolving. This course will explore theoretical and practical aspects of nation-state legal issues concerning cyberspace, including computer-related crime, espionage, war, and international governance. The seminar will review key legal cases, policy, and legislation. In tandem with a series of expert guest speakers from the field, the course will reflect on the roles of national and international governments, the legal and ethical dimensions of cybersecurity, the relationship between the public and private sectors, and the increasing tensions between privacy and security.

LAW 5687 - RE-IMAGINING POLICING SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will explore issues arising around policing, and ask students to re-imagine our entire concept of public safety. In recent history, any discussion of public safety was always a discussion of policing, and often little else. The course will ask students to take a broader look at the whole concept of safety without limiting themselves to policing. What is necessary to create public safety for everyone? The course will require students to use all of their legal and analytical skills to re-imagine how public safety should be created and delivered to all, from the ground up. Subjects considered may include such topics as the origin and purposes of policing agencies; handling crises related to mental health, homelessness, and drug addiction; the recruiting and training of police; and accountability for police misconduct. Students will use assigned readings, group discussions, presentations, and writing assignments to bring together theoretical knowledge and learning, lived experience, and the experience gained in the class.

Grade Component: Grad LG/SU3 Basis

LAW 5689 - CANNABIS AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

Although still federally illegal, cannabis is big business in the United States. Medical marijuana is now legal in 37 states, including Pennsylvania, and the District of Columbia. "Adult-use," or "recreational," marijuana is now legal in 18 states and the District of Columbia. According to multiple reports, the U.S. cannabis industry is projected to soon exceed \$40 billion and potentially employ approximately a half-million individuals nationally. "Mainstream" businesses have now entered this space. Many more ancillary businesses - such as architects, landlords, packaging companies, and insurance companies - interact routinely with this industry. As such, outside and/or in-house counsel representing "conventional" companies - as well as ones advising plant-touching companies, such as cannabis dispensaries, growers, and processors - must understand the unique legal challenges the U.S. cannabis industry presents. This course will address those challenges -- such as (i) whether one can be found to have violated federal criminal law when complying with state cannabis law, (ii) whether other federal statutes (e.g., the federal Fair Labor Standards Act) apply to this industry, and (iii) whether federal courts will enforce contracts relating to cannabis - while also considering if and how established law can adapt/apply to novel industries. It will also consider other important legal, legislative, and public-policy issues facing the dynamic U.S. cannabis industry, such as access to banking and mitigating risk in corporate transactions and agreements.

Grade Component: Grad LG/SU3 Basis

LAW 5690 - BLOCKCHAIN FOR LAWYERS

Minimum Credits: 2

Maximum Credits: 2

The Blockchain course reviews how Blockchain technology is significantly altering the way business is being conducted generally and in specific fields like finance, healthcare and data privacy, to only name a few. Those changes, in turn, will bring many new legal challenges that our laws and courts, regulatory agencies and other institutions must address. This course will consider some of the legal opportunities and challenges facing existing and new applications of the blockchain technology.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5691 - LATINOS/LATINAS AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This seminar will offer a critical approach to the role that law has played in the shaping of the Latino and Latina communities in the United States. It will also critically analyze legal issues of particular relevance to the Latino(a) communities in the United States. The course will explore sociological and historical readings to address questions of who Latinas/os are in terms of demography and the multiplicity of latino(a) identities. The course will also use case studies (based principally around governmental policies and programs and U.S. or state Supreme Court opinions) to explore issues of relevance to the Latino(a) communities: civil rights, colonialism, litigation over the right to serve on juries, education, language regulation, radical latino(a) movements, incarceration, identity issues and various issues in immigration law. In studying the legal issues affecting Latina/os, much attention will be paid to Critical Race Theory and critical Latina/o (LatCrit) theory and intersectionality. The readings are interdisciplinary in focus and include research in the social sciences and the humanities as well as legal sources.

Academic Career: Law

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

LAW 5693 - CRIMINAL POLICE MISCONDUCT

Minimum Credits: 2

Maximum Credits: 2

This course will address federal criminal police misconduct with a specific focus on the use of excessive force by police. Students will examine and analyze relevant statutes and key cases with a focus on gaining a practical understanding of the elements and application of these statutes. Students will have the opportunity to engage in discussions regarding the larger societal conversations relevant to these cases in order to better understand the various lenses through which prospective jurors may view such cases. Students will also learn about the tailored strategies applicable to investigating and litigating police misconduct cases, as many of these strategies are unique to this specific area of law. In addition to exploring various fact patterns through in-class discussion, students will utilize a specific hypothetical case fact pattern throughout the duration of the course that will serve as a basis for exploring the relevant statutes and strategies. As the course progresses, students will investigate the hypothetical case (including through an "investigation workshop"), analyze evidence related to the case, and litigate the case (through a "litigation workshop" and mock trial exercises).

Please note that the subject matter of this course will require students to read about, view, listen to, and discuss material that may be disturbing or offensive to some or all students. Such material may include videos of police shootings, recordings or descriptions of the use of offensive language, and other similar material

LAW 5694 - TRADEMARK LAW

Minimum Credits: 3

Maximum Credits: 3

Trademark law deals with legal bases for obtaining and enforcing interests in commercial symbols, including logos, slogans, and the like, which play central roles both in modern commercial transactions (selling and buying stuff) and in daily conversation. Trademarks are partly information and partly the stuff of speech. The trademark law course will teach you about the many roles that trademark law plays in positioning trademarks as part of business strategies, commercial markets and other institutions, and everyday life. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for firms and citizens generally, how does trademark law preserve the power to access and use trademarks as information about commercial things, information that shapes about the commercial sphere, and information that guides daily experience (if that's separate from the commercial sphere). The course will teach those things in the context of teaching the skills of trademark lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and exercise professional judgment? How do practicing lawyers solve trademark problems? The course will put students in the role of practicing lawyers and teach them to think, write, and act as lawyers generally and especially as trademark lawyers.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5697 - PRACTICAL ASPECTS OF GLOBAL DISPUTES

Minimum Credits: 2

Maximum Credits: 2

The focus of the course is on practical skills and strategic considerations that arise in the management and resolution of global disputes. The course will take students through a hypothetical dispute based upon realistic scenarios so that they can master the practical and strategic problems present when a multinational company becomes embroiled in a dispute with a foreign sovereign entity. The lectures will cover all of the substantive and procedural aspects of suing a foreign sovereign or sovereign entity in a U.S. court (like the Foreign Sovereign Immunity Act and the Act of State Doctrine). The course will also address the practical considerations of litigating in foreign courts, and the tools available for litigators to coordinate parallel U.S. and foreign litigation (like transnational discovery and antisuit injunctions). It will then explore commercial and treaty-based arbitration against foreign state-owned entities and states themselves, which may be pursued alternatively or in addition to U.S. and foreign litigation. As most disputes are ultimately mediated and settled, the course addresses the different ways by which the parties can reach a negotiated solution. Finally, the course reviews the issues surrounding asset attachment and recognition of judgment and arbitral awards against foreign sovereigns. Illustrating the practical and theoretical interplay among these scenarios, the focus will be on the strategic options presented at various junctures, as well as a focus on advocacy skills required across the domestic, foreign, and arbitral fora.

LAW 5698 - INTERSECTION OF LAW & POLICY - LAWYER IN POLICY DEVELOPMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on what it means to be a lawyer working in policy development. To examine the lawyer's role in the policy development context, this course will first explore the intersection of law and policy, focusing on the Federal government and higher education. The course will then analyze the role of an attorney in developing policies generally and in these institutions specifically. Building on these discussions, the course will conclude by examining, and providing an opportunity to develop or strengthen, the skills used to navigate the relationship between law and policy in order to create and implement effective policies. There are two central purposes of this class. The first is to enrich students' understanding of how policies are developed in the Federal government and in higher education. To do this, the course will provide an opportunity to talk with practitioners, who are experts in these fields and have been actively engaged in shaping policy, as well as read and discuss publications by those who have studied or are currently studying policy development and articles describing contemporary examples illustrating why policy and process are important. The second central purpose of the class is to develop and strengthen the students' skills that lawyers use when creating and implementing policy. These skills will be practiced and examined through case studies, group exercises, and writing assignments. These assignments will allow students to practice the skills they learned through the course readings and guest presentations.

LAW 5701 - HEALTH CARE FRAUD AND ABUSE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

United States health care spending reached \$3.2 trillion in 2015, accounting for 17.8% of the gross domestic product. Government officials have been quoted as saying that up to 10 percent of the money the United States spends on healthcare is due to fraud, waste, or abusive practices. If true, that now amounts to over \$3 billion per year. In Fiscal Year 2016, the federal government won or negotiated over \$2.5 billion in health care fraud judgments and settlements, as well as additional amounts from administrative cases. Thus, health care fraud is a major priority of both federal and state agencies and lawyers who wish to practice health law would be wise to understand the laws that govern health care fraud and abuse. This course focuses on the major civil, administrative and criminal laws that have been used to combat health care fraud and abuse, broadly defined as actions by health care providers (e.g., hospitals, physicians and physician practices, nursing homes, medical device and pharmaceutical manufacturers, home health agencies, clinical laboratories, and rehabilitation facilities) that are inconsistent with accepted business and medical practices. These laws include the federal civil False Claims Act, the federal Anti-Kickback Statute, the Stark Law, and the Civil Monetary Penalties Law. While the class focuses on federal law, health care fraud and abuse laws at the state level will also be discussed. Related compliance strategies and the practical compliance issues faced by healthcare providers will also be covered.

LAW 5709 - LAW OF SLAVERY, ABOLITION & FREEDOM SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar will examine how laws, cases, and the U.S. Constitution helped create and preserve slavery. Class will read statutes and cases from the 17th century; excerpts from pro-and anti-slavery treatises, 18th and 19th century statutes and cases; major supreme court decisions; a short book on

the Dred Scott case and monograph on slavery, law, and the Founding of America. There will be sections on criminal law, fugitive slave laws, constitutional law, and the law of manumission. There will be two or more days devoted to the large body of material on slavery and the law from Pennsylvania.

LAW 5712 - LATER LIFE LEGAL PLANNING SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Every day, 13,000 Americans turn age 65. By 2040, 20 percent of the population will be age 65 or older. Older individuals face three significant issues including replacing income lost due to retirement, declines in physical and mental capacity, the need for surrogate decision making, and paying for acute and long-term care. The Seminar will focus on effective legal responses to these issues. It is a policy based seminar that will require students to appreciate, understand and formulate legal solutions about specific issues that arise due to the realities of aging. The Seminar will spend the first weeks examining the issues through a series of readings. Each student, under the guidance of the Professor, will select a topic on which to write a two-draft paper that describes a particular legal issue faced by an older adult, analyzes the challenges it presents to society and the legal system, and proposes a solution to the issue. Each student will make a presentation to the Seminar that will serve as the basis for an extended class discussion of the issue.

LAW 5714 - ENVIRONMENTAL POLICY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

In many areas of law, the daily practice is not black-letter analysis and trial practice, but interdisciplinary collaboration and policy development. This is particularly true of environmental law, which combines legal issues in the common law, statutory frameworks, administrative law, international and transnational law, and constitutional law, along with scientific understanding, public communications, political persuasion, and ethics. Focusing on environmental issues, this discussion section and practicum will provide students with a chance to explore interdisciplinary policy practice through an open-ended semester-long simulation. The simulation is paired with a weekly discussion section to discuss a variety of issues in environmental law and policy. This course's practical simulation will put students into teams to address a real-world environmental policy issue. Each team will approach the issue from a different perspective (for example, one team will represent environmental interests while another will represent a regulated industry or the government). Students will prepare memos, comment letters, presentations, and public statements based on their own research, in response to the arguments of their classmates, and in consideration of their overall strategic and legal goals. In the discussion component of the course, students will dive into readings and discussions about the law, policy, ethics, and practical realities of environmental law.

LAW 5717 - TELECOMMUNICATIONS LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the regulation and evolution of electronic communications in the United States. We will survey the legal framework of telecommunications, broadband and the Internet at several significant points in its development. Following the respective regulatory paths of broadcast, wireline and wireless telephony, cable, and broadband, the analysis will include early Federal Communications Commission broadcast regulation; the Communications Act of 1934 and its progeny; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the Telecommunications Act of 1996. Finally, we will examine technological convergence, the emergent dominance of broadband and wireless communications, and the impact of rapid technological changes. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and the impact of such concerns as intellectual property and free speech. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 5718 - TECHNOLOGY AND EMPLOYMENT LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the evolving application of employment laws with a focus on how the law responds to technological, social, and economic changes. It examines changing definitions of the employment relationship in light of evolving tech platforms and the "gig economy." It analyzes issues of employee privacy and data security as well as developments in post-employment restrictions, confidentiality, and trade secret and intellectual property protection. Throughout the course, students will be exposed to core employment doctrines such as wage and hour law and discrimination with a particular focus on how disruptive forces such as big data, social media, and virtual workplaces are reframing traditional views of these doctrines.

LAW 5719 - APPLIED LEGAL DATA ANALYTICS AND AI

Minimum Credits: 3

Maximum Credits: 3

Technological advances are affecting the legal profession. While it is hard to predict the changes that machine learning and natural language processing will bring, legal professionals certainly will need to understand the new techniques and how to use and evaluate them. This course, co-taught by instructors from the University of Pittsburgh School of Law and Intelligent Systems Program, provides a hands-on practical introduction to the fields of artificial intelligence, machine learning and natural language processing as they are being applied to support the work of legal professionals, researchers, and administrators. Researchers in the field of Artificial Intelligence and Law (AI&Law) have been applying recent advances in natural language processing and machine learning to extract semantic information from legal documents and to use it to solve legal problems. Meanwhile, the commercial LegalTech sector is thriving. Companies and startups have been tapping into the legal industry's need to make large-scale document analysis tasks more efficient, and to use predictive analytics for better decision making. This course will help law students gain literacy with these technologies and learn how to apply them to the kinds of legal problems they have studied or will encounter in practice. This course not only teaches law students about the new tools, but enables students to gain practical experience using them under close mentorship and in project-based collaboration with students from computer science backgrounds who want to learn about the law. Lecture sessions will alternate with working sessions where instructors assist groups with projects.

LAW 5720 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 0

Maximum Credits: 0

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 5723 - WORKING WITH PUBLIC INTEREST TECHNOLOGIES AND CIVIC DATA

Minimum Credits: 3

Maximum Credits: 3

This class is designed to equip students passionate about social justice issues to work with public interest technologies and civic data using a curriculum co-developed by four Pitt centers: Center for Analytical Approaches for Social Innovation (CAASI), Western Pennsylvania Regional Data Center (WPRDC), the Office of Diversity, Equity and Inclusion (DEI), and the University Honors College (UHC). The goal is to discern the opportunities and challenges that can come from working with technology and civic data, prepare students to understand and account for community dynamics, develop socially-responsible research and data practices, and implement projects that hold benefits for both community partners and students. This is not a quantitative course and no programming experience is expected.

LAW 5728 - EXPUNGEMENT OF CRIMINAL RECORDS

Minimum Credits: 3

Maximum Credits: 3

This course provides hands-on experiential learning, working directly with clients on their expungement-related needs. This includes client consultation, drafting of petitions and other legal documents, and court representation as needed. Training and ongoing supervision by Neighborhood Legal Services (NLS). This course is also part of a research study on the effectiveness of expungement in improving employment and housing opportunities for those who were formerly in the criminal justice system. The research study is coordinated by Harvard Law School and jointly sponsored by Pitt Law, NLS, and Duquesne Law. In addition to time servicing clients, students will also have writing assignments throughout the semester to reflect on their experiences and its relationship to their legal education and professional development, and to demonstrate their mastery of the laws and their application.

LAW 5729 - HEALTH LAW CLINIC

Minimum Credits: 6

Maximum Credits: 6

The Health Law Clinic is a medical-legal partnership between Children's Hospital of Pittsburgh of UPMC and the University of Pittsburgh School of Law Legal Clinics. The Health Law Clinic provides legal needs screening and brief advice in matters involving childhood SSI, special education rights, and medical decision-making. Students enrolled in the clinic must apply for and obtain a certified legal intern designation from the Pennsylvania Bar. Students take primary responsibility for client representation under the supervision of their professor/supervising attorney. Students will have opportunities to represent parents of children with disabilities in Court and in administrative hearings, as well as in negotiations with area school districts. The clinic seminar provides an opportunity to engage in inter-professional learning with students from the Pitt Schools of Medicine and Nursing, while exploring policies that challenge, and structures that reinforce, health outcome disparity.

LAW 5731 - CURRENT ISSUES IN HEALTH LAW

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

LAW 5733 - MB CONSTITUTIONAL LITERACY SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar relates to the Marshall-Brennan constitutional literacy component of the law school's pipeline diversity program. The Marshall-Brennan constitutional literacy project prepares students to teach a constitutional literacy seminar in Pittsburgh area high schools. Students selected for the Marshall-Brennan constitutional literacy project are required to participate in the Marshall-Brennan Constitutional Literacy seminar concurrent with their teaching assignment at a Pittsburgh area high school. The seminar will focus on teaching methodology and review of constitutional doctrine in the areas to be covered in the high school course. Areas of focus will include the first, fourth, fifth, sixth and eighth amendments to the United State constitution, with particular emphasis on the constitutional rights of high school students and young people generally. Students will develop detailed lesson plans relating to topics to be covered in the high school course. In addition, students will be required to produce a substantial paper relating to one of the topics covered in the curriculum.

LAW 5744 - HEALTH LAW CLINIC

Minimum Credits: 4

Maximum Credits: 4

Health Law Clinic is a medical-legal partnership with UPMC - Children's Hospital of Pittsburgh. Medical-legal partnerships enable legal advocates to collaborate with a patient's medical care team. Recognizing that acute, preventative, and rehabilitative care are only part of the whole health equation, the Health Law Clinic specifically addresses the role of income, education, caregiver stability, and self-determination on patient health. Providing "legal care" in the form of access to counsel can mitigate the collateral impact on mental and physical health that legal problems can cause. Students in this clinic will receive substantive instruction in childhood SSI, adult guardianship, and special education law. Students will have opportunities to represent parents of children with disabilities in administrative hearings, in Orphan's Court, as well as in negotiations with area school districts. The Health Law Clinic provides a meaningful opportunity to gain course credit while acquiring and developing practical legal skills.

LAW 5747 - LAW OF MENTAL HEALTH SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the laws and issues that affect individuals with mental illness, many of whom find themselves in the criminal or civil justice systems. Emphasis will be on the issues surrounding civil commitment and the emerging use of treatment courts on the criminal side. This will require a review of Pennsylvania's Mental Health Procedures Act and other state and federal statutes, cases, and regulations. Students will be permitted to attend a session of mental health court.

Academic Career: Law

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

LAW 5748 - RACE,RELIGION,&CRIMINAL JUSTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines the legal treatment of religion in various contexts, paying particular attention to the intersection of race and criminal justice. As a course that is primarily interdisciplinary in its approach, this exploration necessarily involves study of how law impacts and shapes religion, and in turn how religion impacts law and policy. The class focuses on the Religion Clauses of the First Amendment as well as other areas of law, including the Religious Freedom Restoration Act (RFRA) and the Religious Land Use and Institutionalized Persons Act (RLUIPA). Topics include Civil Religion, Death Penalty, Intoxicants and Worship, Prison Rights, and Islam in Prison. The course will involve the development of a research topic and plan of research, development of a working outline of the project, submission of an initial draft, and submission of a final draft

LAW 5754 - TECHNOLOGY, LAW & LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

The theme of this seminar is change. Technologies are changing in ways that we often do not even see. The character of law, legal institutions, and law practice is changing rapidly and dramatically. As humans, our capabilities and futures are changing. How do we identify and assess the virtues and drawbacks of all of this? As lawyers and as professionals in other fields, what if anything can and should we do about it? The seminar approaches those questions by diving into deep critical examinations of how technological change is generating and reflecting new ideas about what law is and what law does, at both global and local scales. The payoff is greater than learning about contemporary technology law. The payoff is an introduction to leadership competencies and capabilities that help new lawyers and other professionals thrive in this new world.

Academic Career: Law

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

LAW 5755 - RACIAL HARASSMENT IN THE WORKPLACE

Minimum Credits: 3

Maximum Credits: 3

This seminar explores racial harassment in the workplace, including how frequently it occurs and its different forms. We discuss the legal framework and dispute-resolution processes for racial harassment, including their current shortcomings and ideas for more effectively remedying racial harassment. We also draw from sexual harassment research and law -- and consider how society and the justice system treat sexual harassment and racial harassment similarly and differently. In consultation with the professor, students will select a topic on racial harassment, sexual harassment, or another form of harassment to research and present in a power-point presentation and paper. In addition to the professor's feedback on their research and writing, Professor Wisor of the Law School Writing Center will also provide feedback.

Academic Career: Law

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

LAW 5756 - BASIC BUSINESS CONTRACT DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course demonstrates how "design thinking" can be used when drafting basic business contracts that provide positive incentives for the parties to perform their obligations. Reading assignments explain design thinking, the role of incentives in business, foundational concepts in law and economics relevant to business concepts and how transactional business law practice differs from litigation-practice. Students practice "aligning" basic business contracts with clients' business goals through practical drafting assignments. These assignments permit students to compare and contrast the skills required to align contract language with transactional business goals for global multinational businesses, small and medium sized businesses and private individuals engaged in business. Students are trained to distinguish appropriate and inappropriate copying of contract language from "drafting precedents" and to carry out legal research on contract drafting issues for which there is no case law. One "capstone" assignment invite students to apply their new "incentive design" skills to drafting a law firm engagement letter for "value-based billing," a new business law billing model that is replacing billable hours and contingency fees. A second "capstone" assignment invites students to research a contract drafting issue that highlights how the business ethics of Walmart differ from those of Toyota and the impact of that difference on the professional responsibility of attorneys.

Academic Career: Law
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

LAW 5757 - LAW PRACTICE INNOVATIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to selected innovations in law practice technology most likely to have a major impact on the legal profession and legal institutions in the future. No prior knowledge of programming is required, and this is not a course designed to teach students how to program. The focus is instead on learning to think critically about what technological innovations can and cannot contribute to the practice of law and the administration of justice in America. Reading assignments provide theoretical perspectives and historical context for changes occurring in law practice today. Lab assignments simulate situations in which new technologies could be applied to a few basic law practice challenges. Students develop and write a short paper about an idea for an innovation in law practice (which may be a technology solution, a new process, etc)

Academic Career: Law

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5758 - TRANSNATIONAL TRADE LAW

Minimum Credits: 3

Maximum Credits: 3

The ongoing transformation of the international economic legal order and of global governance institutions is generally attributed to globalization. The establishment of global governance institutions is linked with the need of solving issues that affects, due to their nature, the international community. Both globalization and institutions established for its promotion are in a profound crisis of identity. Concerns arise as to the coherence and compatibility of these trading processes and efforts with respect to national and global challenges. Both public opinion and policy makers fear that international trade, in particular a further liberalization thereof, may undermine or jeopardize policies and measures enacted for facing global challenges. This is the domain of this course; the law and policy of relations between national governments concerning the regulation of economic transactions that have cross-border effects also on the life of the population at large. The course covers the relevant WTO cardinal principles (nondiscrimination, most-favored nation, national treatment, free trade, etc), the WTO agreements, the WTO Dispute Settlement Mechanism and the foundational case law. A brief overview on the most recent or problematic case law on national security, state interference in the market, subsidies and countervailing duties and intellectual property is also provided. The course looks into the interaction among trade, economic globalisation and global challenges. It also deals with past and present debates over the role of the legal order in economic development, analysing some of today's most important issues in this domain: the relations between law and development and the rise of emerging economies. Emerging economies, especially China, are increasingly taking the lead in the reform attempts of the international economic law and from rule taker are now shaping the future of this field. Trade wars, trade sanctions, the securitization of international trade as well as COVID-19 implications on international economic law are also covered in this course to demonstrate the broader crisis of what we can term as multilateralism. In addition, this course is addressing the international trade law and its domestic regulation and policy in different countries with cases studies on the U.S., the European Union, and other economic powers.

LAW 5759 - TRANSNATIONAL ENVIRONMENTAL LAW

Minimum Credits: 3

Maximum Credits: 3

Climate change is one of the most fundamental challenges ever to confront humanity. The United Nations climate change negotiations offer a historical opportunity to step up international action on climate change. Over the last forty years discussions of international environmental law and policy have grown in number and frequency, and treaties addressing the topic have become common. Many of the treaties contain concepts that have now become accepted as commonplace, such as the ecosystem approach and the precautionary principle. The early beginnings of the subject can be found in bilateral and multilateral efforts to protect shared and jointly exploited natural resources like fur seals and fisheries, but now the subject of international environmental law and policy has grown into a complex code of treaties and other instruments that impose obligations on states to protect their own environments as well as to refrain from causing extra-territorial environmental harm. This course examines the basic objectives, principles, techniques, and content of international environmental law and policy and how international environmental law is related with core areas. It starts by examining the main environmental challenges and root causes, and then looks at the role that the global economic system plays in creating and perpetuating the problems. Once a foundation for understanding the genesis of the issues has been laid, global challenges are analysed. More

specifically, the intersection between international environmental law and policy, international environmental negotiations and the following fields will be analysed: Climate Change, Energy, Trade, Human Rights, Water, Intellectual Property Rights, Biodiversity, Food Security, Traditional Knowledge, and Climate Justice. The course will conclude with reflections on the future of international environmental law and on how to meaningfully address global challenges. In addition, the course intends to present in an inclusive way the different perspectives on sustainable development, climate change, the protection of the environment and biodiversity from both the North and the Global South with classes and case studies dedicated not only to U.S, Europe and the other Western countries and Western categories, but also to China, India, Latin American, Africa, Middle East, South East Asia. At the end of the course, students will be expected to know the basic principles and issues of international environmental law and policy.

LAW 5760 - HEALTH JUSTICE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Although the United States likes to pride itself on having the most advanced medical care in the world, its residents' experiences diverge widely with respect to the care they receive, as well as their health status and outcomes. Health disparities based on race have received the most attention, but disparities also exist with respect to ethnicity, gender, disability status, and sexual minority status, among others. Nowhere have those disparities been more glaring than in the context of the COVID-19 pandemic, which has disproportionately affected communities of color and people with disabilities. Significant health disparities call into question both the justice and the quality of the U.S. health care system. What role does or could the law play in addressing these inequities? Conversely, how has the law contributed to them? This seminar provides students with an opportunity to explore in depth topics relating to the law's responses (and potential responses) to health inequality. While the seminar's central concern is with the law, readings and discussions will explore and integrate evidence and knowledge from multiple professional and academic disciplines. Topics covered might include, simply by way of example, health equity issues associated with Medicaid policy decisions; the ACA's contraceptive coverage mandate, gender equality, and religious liberty; disparities in insurance coverage and access to care for persons with mental illness; and health care providers' obligations to provide accommodations to disabled patients.

LAW 5806 - JUVENILE LAW AND POLICY SEMINAR

Minimum Credits: 3
Maximum Credits: 3

For over a century this country has wrestled with how to treat youth in the juvenile justice system. This struggle centers on the tension between recognizing youth as developmentally distinct from adults, thus deserving of second chances and rehabilitative services, and historically and culturally driven notions of accountability, justice, and safety. This course will explore this tension and examine how that internal struggle has shaped the building of the juvenile justice system as a separate legal institution governed by unique criminal law, procedure, and policy. Students will gain an in-depth understanding of juvenile justice from both policy and legal perspectives through analyzing case decisions, social science research, legal theory, and empirical studies. During this course the class will probe questions such as: What does juvenile justice look like? How does the social construction of adolescence impact legal definitions? What role do the advances in science on brain development play in the administration of juvenile justice? How has race, gender, and class impacted juvenile courts' jurisprudence? What factors have influenced the court's ever shifting understanding of culpability by age? Where are the overlaps and intersections between the juvenile justice and adult criminal justice systems?

LAW 5811 - HLTH CARE BUS TRANSACTIONS

Minimum Credits: 3
Maximum Credits: 3

This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception

to conclusion.

LAW 5814 - INTERNATIONAL AND COMPARATIVE LAW SURVEY

Minimum Credits: 1

Maximum Credits: 1

The Deans' Office has surveyed our JD students with significant non-US contacts and has discovered that a number of them have expressed a strong desire for a comparative and international law survey course that enables them to learn more about specific areas of law in jurisdictions other than the United States. This course fills that need. It requires special permission so as to be limited to those students who have significant experience living in jurisdictions other than the United States. It is further designed to be an in person class with much interaction between faculty and student - no remote option will be offered or delivered for this course. If gatherings are restricted in number because of public health guidelines, the class will be divided into as many sections as necessary to continue in person instruction. Any instructor unable to teach the course in person will be replaced by another determined by the remaining professors. The course will be divided into 13 one hour modules to be delivered by the professors co teaching the course or other guest lecturers. It will discuss various areas of law: commercial law, intellectual property law, real property law, environmental law, tort law, and legislation and regulation, among others as well as research methods for how to locate that law.

LAW 5818 - LAW INTERSESSION

Minimum Credits: 1

Maximum Credits: 1

The Law School's intersession runs the week before regular spring semester classes begin. During the intersession, we make available a selection of short, intensive one credit courses to our students that they might otherwise find difficult to enroll in. For a specific description of each particular course offered during the intersession, please go to the link for the course located at the Law School's online Catalog of Courses. To receive credit for any of the courses offered during the intersession, students must attend class every day for approximately 2.5 hours and should expect to spend

roughly twice that amount of time outside of class working on class related activities.

LAW 5820 - LL.M COLLOQUIUM

Minimum Credits: 1

Maximum Credits: 1

This is a required course for all students in the LL.M. Program for foreign law graduates. The course will include guidance in the development and writing of projects for seminars or independent study projects. Students will be assisted with topic selection, developing an analytical focus, and writing the paper. Students doing independent studies will present their papers in the class for feedback. The course will also provide an opportunity to address specific issues of interest to students as well as opportunities to observe settings involving practical legal skills.

LAW 5824 - ELDER LAW LAB

Minimum Credits: 4

Maximum Credits: 4

This course is the clinical companion to the Elder Law Seminar. Those enrolled in the lab must take the seminar, but the lab is optional for those in the Seminar. This course offers students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering skills. Students enrolled in the Clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Client representation will focus on guardianship of older adults and/or disabled adults; estate planning for clients of limited means, including powers of attorney, health care directives Wills and testamentary special needs trusts; and eligibility for government benefits for long term care.

Course Requirements: PREQ: LAW 5395 and LAW 5730 ; PLAN: Health Law

LAW 5831 - CURRENT ISSUES IN HEALTH LAW 1

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

LAW 5839 - LAW ENTERTAINMENT SCL ENTRP PRAC

Minimum Credits: 2

Maximum Credits: 2

Law, entertainment and social enterprise ("lese") will expose students to the legal knowledge, skills and roles entailed in the representation of a social entertainment enterprise. Students will gain a broad understanding of the operations of the entertainment industry and the intellectual, corporate and securities matters that permeate the industry. We will specifically use a case study of the steel town entertainment project ("steel town"), a local social entertainment enterprise that is dedicated to building a socially and commercially significant entertainment sector in southwestern Pennsylvania. The course will involve cross-disciplinary and experiential learning and immersion opportunities. In lese, students will acquire substantive knowledge, practical skills and role models needed by lawyers representing a social entertainment enterprise ("see"). Students will learn about social enterprise, entertainment, intellectual property, corporate and securities law. Students will learn to research and draft a private placement memorandum based on a business plan for a strategic entertainment investment fund see will launch in the spring of 2010. Students will work closely with practicing lawyers who represent or volunteer for the steel town entertainment works and other social entertainment enterprises in southwestern Pennsylvania such as WQED, family communications and Pittsburgh Filmmakers. Students will gain a broad understanding of the business operations and legal needs of various social enterprise entertainment clients in the industry, including but not limited to incorporation, strategic alliances, licensing and venture capital.

LAW 5841 - INTERNATIONAL TAX

Minimum Credits: 3

Maximum Credits: 3

This course will serve as an introduction to the U.S. Federal tax aspects of the cross-border flow of capital and labor. At the most basic level, we will explore the distinction, both for income and for estate and gift tax purposes, between a U.S. And a foreign person. We will then compare and contrast the manner in which U.S. And foreign persons (including tax expatriates) are subject to income tax. We will also cover the special tax regimes applicable to investments made by U.S. Persons in foreign corporations (i.e., The controlled foreign corporation and passive foreign investment company regimes) as well as an introduction to the foreign tax credit rules. Throughout the course of the semester we will consider the potential impact of tax treaties on the rules in the internal revenue code. The grade for the course will be based on a series of drafting projects.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5843 - LITERATURE AND THE LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

In this seminar, we will read and discuss stories about law. In such writers as Dostoevski, Melville, Glaspell, Wright, Lee, Shakespeare, Camus, Kafka, Porter, and Malamud, and in many popular culture and on-line media, LAW is represented, criticized, admired, and deconstructed, There is no better -- or more enjoyable! -- way to learn about the underlying premises and prejudices of legal systems than to participate in the real conflicts depicted in great stories, In this seminar, too, we will take a COMPARATIVE approach, because the writers chosen come from varied backgrounds, and their careful depictions of trials, investigations, and lawyers in action permit us to see how legal systems differ one from another.. Thus by perusing carefully Dostoevski , Kafka, and Camus, for example, we will see how criminal procedure on the continent of Europe differs markedly from common law approaches to guilt and innocence. The stuff of stories will be supplemented, where helpful, by readings in comparative law. Meanwhile these stories also permit us to raise questions of race, religion, and gender both within specific contexts (Shakespeare's Venice; Susan Glaspell's early 20th century America; Richard Wright's Chicago; Harper Lee's Jim Crow south) and comparatively (Bernard Malamud's recreation of the "blood libel trials").

LAW 5847 - GENDER AND LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will examine how gender influences legal doctrine and how legal doctrine in a number of specific areas of law affects women and shapes societal understandings of gender. The objectives of the course are twofold: (1) to explore how an understanding of gender and feminist legal theory can enrich the study of law; and (2) to learn specific areas of legal doctrine that are particularly relevant to women and societal understandings of gender. The course will cover a number of areas related to issues of gender equality, such as employment, education, family and domestic responsibilities, sexual harassment, and domestic violence. Various feminist legal theories will provide a framework for studying these areas of law.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5858 - INTERNATIONAL SALES SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The seminar will consider the international law applicable to cross-border sales transactions involving a U.S. Party. We will focus primarily on the united nations convention on contracts for the international sale of goods ("CISG"), supplemented by study of the principles of international commercial contracts of the international institute for the unification of private law (UNIDROIT). The course emphasizes approaching these texts from an international perspective and employing new research resources that have developed in the area of international commercial law. No background beyond familiarity with general contract law is required, although the course on commercial transactions in goods and/or the course on international business transactions would be useful preparation. In the first part of the course we will explore the substantive provisions of the CISG and UNIDROIT principles, including discussion of applicability, contract formation, obligations of quality, avoidance of contract, risk of loss; exemption for failure to perform; and remedies for breach. The remainder of the course will be devoted to presentations by students on their paper topics.

LAW 5860 - ANCIENT LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar will introduce students to the very beginnings of Western legal history. Through a comparative examination of the legal systems and practices of ancient Mesopotamia (including Hammurabi's Babylon, c. 1700 B.C.), Ancient Egypt, ancient Israel, ancient Anatolia (the Hittite empire, c. 1500 B.C.), Ancient Greece and ancient Rome, we will investigate the historical origins of "law" as an idea. We will see how each of these societies created law in the image of its own beliefs and needs. We will look at what differentiated the resulting legal systems, and what united them. We will examine not merely the ancient "law in the books" (the formal written codes that have received so much historical and philological attention over the years) but also the ancient "law in action" (the performances, rituals and ceremonies that created legal rights and duties in all these proto-literate societies). We will look at some of the earliest surviving trial records. Throughout the seminar, emphasis will be placed on developing a broad interdisciplinary perspective on the ancient legal cultures examined; readings will be drawn not only from the fields of law and history, but also from religion, anthropology, archaeology, literature and communication studies.

LAW 5862 - FDS INTELCL PROPERTY LAW SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar deals with the theoretical and policy foundations of patent, copyright, and trademark law. The readings consist of both contemporary and "classic" law review articles and other primary and secondary sources that explore connections between intellectual property law and a variety of possible justifications for the law and its leading cases, statutes, and treaties, including history, liberal political theory, economics and other social sciences, literary theory, and cultural theory. The bulk of the work of the seminar consists of supervision and discussion of original research by students (that is, research in print collections and other collections of analog sources, and digital archives of print collections) on historical intellectual property topics of their choosing, and the production and classroom presentation of a significant piece of original writing by each student.

LAW 5866 - ISLAMIC LAW AND JURISPRUDENCE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will focus primarily on Islamic law, and Islamic jurisprudence, in the modern era, using the classical period only as the backdrop against which modern notions and understandings of Islamic law may be tested. We will begin with a brief introduction into the creation and development of Islamic law from its earliest formative period through its golden, classical era in an effort to explore the principles of Islamic jurisprudence. We will then move quickly to address central questions concerning how that law has evolved given that the empires that gave rise to law in the classical era have evaporated and been replaced with nation states that have adopted by and large transplanted political and legal ideas, among them constitutionalism and reliance on secular legal codes to resolve legal questions. In this context, our primary focus will be on the judicial application of Islamic law in Muslim and non-Muslim countries, surveying court practice in states as varied as Egypt, Iraq, Indonesia and Malaysia. We will also address the increased pan-national use of concepts that purport to be based on Islamic law, from Islamic finance to jihad.

LAW 5871 - INTERNATIONAL CRIMINAL LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar is an introductory survey of the substantive and procedural aspects of international criminal law, a new and evolving area of law that has gained in prominence in the past decade. The course starts with an overview of fundamentals, focusing on the notion of international crimes and their historical evolution, as well as the general features and sources of international criminal law. The second part of the seminar analyzes the substantive law, especially the definitions and subjective and objective elements of genocide, crimes against humanity and war crimes. The discussion will take place within the context of a comparative evaluation of the main international judicial mechanisms developed after World War II to prosecute these crimes. Particular attention is paid to the International Military Tribunal at Nuremberg, the ad hoc United Nations International Criminal Tribunals for the former Yugoslavia and Rwanda, the Special Court for Sierra Leone and the permanent International Criminal Court. In the final part, we examine the fair trial rights and the limited defenses and immunities available to alleged perpetrators of international crimes. A key question students will be expected to engage throughout is whether, and if so to what extent, individual criminal prosecution is a legitimate and effective tool to address mass human rights violations during or after conflict.

LAW 5873 - PRIVATE INTERNATIONAL LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Private international law traditionally covers three areas important to cross-border transactions and dispute settlement often referred to in the United States as conflict of laws: jurisdiction, the determination of applicable law, and the recognition and enforcement of judgments. This course will focus on these core issues and give attention to broader issues of international private law dealt with under the rubric of private international law in the U.S. Department of state, including international arbitration law, judicial cooperation, and other areas. We will review major international legal instruments (treaties, model laws, sets of principles, European regulations, etc.) And their importance to both transactional and litigation practice. Particular attention will be given to the expanded role of the European union institutions in the development and implementation of rules of private international law, as well as to the work of the Hague conference on private international law, the united nations commission on international trade law (Uncitral), and the international institute for the unification of private law (Unidroit). During the second half of the semester, each student will

present the results of his or her research in preparation for the final paper.

LAW 5874 - SECURITIES ARBITRATION CLINIC

Minimum Credits: 4

Maximum Credits: 4

The securities arbitration clinic is a two-semester clinic; however, students may enroll in either the spring or the fall semesters, but must complete 2 semesters in order to receive credit. Total credits hours for the two semesters are 8 credits. The securities arbitration clinic offers a practical and educational opportunity in the securities arbitration process. In this course, the students will represent individual small investors with controversies of up to \$75,000.00 before a securities panel under the supervision of practicing attorneys. The securities arbitration clinic is designed to impart negotiation, advocacy and trial litigation skills to the students, as well as provide a service to investors that might otherwise be unrepresented. Each student will handle all aspects of assigned a particular client's case, including: ' review case file ' meeting with the client to review facts, request supporting documents, and determine relevant issues ' research of applicable securities laws ' meeting with supervising attorney to determine course of action ' if case is accepted, file power of attorney or entry of appearance with the Pennsylvania supreme court or securities and exchange commission, preparing and filing a statement of claim with FINRA and following through with all aspects of case preparation. 'Contact sec attorneys, opposing counsel and the SRO to discuss recourse and schedule the arbitration panel if necessary. ' For arbitrations: prepare case to be presented to the arbitration panel, including obtaining all necessary documents and witnesses, as well as completion of all research on the law; represent the client in arbitration; complete post arbitration work, including review of stipulated decision, if case is settled before arbitration.

LAW 5880 - IMMIGRATION LAW CLINIC

Minimum Credits: 4

Maximum Credits: 4

The Immigration Law Clinic is a two semester clinic. In the Immigration Clinic students represent immigrants requesting asylum, facing removal from the United States, and seeking special protection under the Violence Against Women Act. In representing clients under the supervision of the clinical professor, students perform all aspects of case preparation including interviewing clients, writing pleadings, appearing in Immigration Court, appearing before administrative agencies and managing post-relief issues. Clinic students also assist their clients in overcoming linguistic and cultural barriers that could impede their clients' success in the U.S. legal system. Clients may include refugees, immigrant women and children survivors of domestic violence applying to change their status, persons with criminal convictions who seek relief from removal from the United States and other immigrant populations. Students are also expected to collaborate with community based organizations that serve the foreign born population in the city.

LAW 5883 - ENVIRONMENTAL LAW CLINIC

Minimum Credits: 6

Maximum Credits: 6

The environmental law clinic provides a forum for students to acquire practical expertise in environmental and administrative law by developing and integrating knowledge and skills with practical judgment in the assumption of responsibility for clients. The clinic will represent groups and individuals who otherwise could not afford legal and technical services for their environmental and community health needs. Focusing on, among other areas, water quality and land use issues in Western Pennsylvania, students may be assigned to handle matters involving the following activities: drafting court pleadings and briefs; representing clients at administrative hearings; engaging in collaborative legal and technical work; supporting pro bono environmental litigation filed by non-clinic counsel; conducting discovery; drafting proposed legislation and rules; commenting on proposed permits, regulations, and environmental impact statements and assessments; evaluating matters for potential future action; meeting with clients, other attorneys, and governmental officials; developing case strategy; factual investigation; community outreach and development; policy work; and similar tasks. In some instances, students will have primary responsibility for their assigned matters, and the supervising attorney will maintain a secondary role.

LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM

Minimum Credits: 3

Maximum Credits: 3

Researchers in Artificial Intelligence (AI) and law attempt to design computer programs that can perform legal reasoning or that can solve, or assist attorneys to solve, legal problems. The researchers ask tough, philosophical questions, such as, can one state precisely what a legal rule means and decide whether it applies to a situation? How can one separate "hard" from "easy" legal issues? What roles do cases play in interpreting a legal rule? Their answers, however, are not philosophical but scientific; they design computer programs that model the task and conduct experiments to evaluate how well the program performs. The seminar will involve law students and graduate students from other disciplines. The seminar goals are to introduce the fundamentals of AI to law students and of legal reasoning to graduate students and jointly to grapple with the work of researchers who have built AI programs for the legal domain. Law students will more fully appreciate the techniques and assumptions employed by attorneys, and by AI and law researchers, to deal with the uncertainties inherent in legal reasoning.

LAW 5904 - INTERNAL SKILLS COMPETITION

Minimum Credits: 1

Maximum Credits: 1

This intra-school moot court competition is open to all second and third year students. During the initial fall round, students write a brief and orally argue it. The winning participants go on to an intermediate level "round robin". Participants advance through the round-robin based upon the relative quality of their oral advocacy. The final rounds, usually occurring after the winter break, consist of the successful participants from the previous semester's round-robin. Participants completing the first round receive one credit awarded in second semester.

LAW 5910 - LAW REVIEW

Minimum Credits: 1

Maximum Credits: 1

The law review is a quarterly legal journal published by second and third year students. Members not only write scholarly commentaries on recent developments in legislative and court decisions, but also analyze and edit student and non-student works, preparing those selected for publication. Students with high academic averages are invited to become members following completion of their first year, and, to a limited extent their second year. All first year students may enter a writing competition held over the summer from which additional members are chosen.

LAW 5911 - JOURNAL OF LAW AND COMMERCE

Minimum Credits: 1

Maximum Credits: 1

The journal of law and commerce is a semi-annual legal periodical published by second and third year students. Focusing on material of a commercial nature, the journal attempts to provide scholarly yet practical articles and book reviews written by professionals and students. Journal members must have exhibited superior abilities either through academic performance or through submission of a research paper in the annual writing competition.

LAW 5929 - PA PRACTICE PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This course offers students a great opportunity to help indigent clients and to learn important lawyering skills under the close supervision of an experienced attorney at neighborhood legal services association or laurel legal services. Students will work on cases involving poverty law issues such as eviction, custody, protection from abuse, public benefits, and debt collection. The classroom component will focus on various substantive and procedural poverty law issues, on ethical considerations, and on lawyering skills - such as interviewing, counseling, fact-gathering, legal analysis, negotiation, research, drafting, and litigation - critical to many types of legal practice. Classroom assignments will include simulation exercises and preparing a monthly journal. The field component will focus on advising and representing indigent clients. Field assignments will be available in Pittsburgh, Bridgeville, new castle, and butler. This is an excellent opportunity for students to gain experience in the county where they live or hope to practice. Most field assignments will include courtroom experience, and most students will be able to complete the field component before final exams. Every attempt will be made to schedule the field assignment at times convenient to the student.

LAW 5937 - PA PRACTICE ANTI-EVICTION PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

"Eviction is a cause, not just a condition, of poverty" Matthew Desmond, Evicted The PA Practice Practicum is focused on providing students with

skills needed to practice law. It does this through a focus on anti-eviction representation. Research has shown that tenants who are represented by counsel have a much better chance of maintaining housing stability. Students will learn substantive law and practical skills and use them to protect low income clients from eviction and its devastating consequences. There are no exams. Writing assignments take the form of advice letters to clients. There will be weekly class sessions as needed at the offices of Neighborhood Legal Services to learn applicable law and client skills such as interviewing, negotiating, and representing in court. Students must be eligible to be certified to appear in court, and must be available Thursday mornings because that is when many of the hearings are.

Academic Career: Law

LAW 5939 - CRIMINAL DEFENSE PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This Practicum will teach law students about the practice of criminal public defense. The class will consist of lecture and class discussions, courtroom observation, and direct in-court participation. Students will be required to become Certified Legal Interns and will work under the direct supervision of licensed attorneys in the Pretrial and Trial Division of the Public Defender's Office. By the end of the semester, the following learning objectives are expected: 1. Students should have a comprehensive knowledge of the process by which criminal cases move through the system and be able to articulate the separate stages of a criminal case. Students should be able to explain this process in an understandable and relatable way to clients. 2. Students should have knowledge of the bail and detainer process and understand how these concepts relate to incarcerated clients pre-trial, including the process of writing bond motions. 3. Students should understand the law and ethics around representing individuals in criminal matters, and the importance of zealous, client-centered representation through hands-on experience. 4. Students should be able to conduct a preliminary hearing from beginning to end, including cross-examination of witnesses. 5. Students should be able to formulate compelling arguments based on the elements of the charged offenses. 6. Students should have refined their interview skills and be able to interview clients and extract relevant and pertinent information in preparation for preliminary hearings. Students will be expected to formulate a weekly schedule for the semester and adhere to that schedule. The schedule will include both courtroom and office hours.

LAW 5950 - UNEMPLOYMENT COMPENSATION PRAC

Minimum Credits: 2

Maximum Credits: 2

This course provides a clinical option that combines components of a traditional law school clinic and an externship at a legal services or public

interest law firm. Representing claimants in unemployment compensation (UC) cases can provide law students with a meaningful trial advocacy experience. For the first three weeks, classes will meet twice a week so students can get up to speed on the substantive law and trial practice skills. Subsequent classes will include bringing in Referee to conduct mock hearings and a Commonwealth Court judge to discuss appeals. By week three, students will meet with and begin interviewing clients at the Pitt Clinic Offices, research applicable law, gather evidence, and conduct hearings before a Referee. The Practicum Supervisors will meet with students at additional times to assist them in preparation for hearings. The Supervisors will accompany each student to their first and perhaps a second hearing. For subsequent hearings, other students in the practicum will accompany the student attorney to observe his or her performance and provide feedback. In addition to representing claimants at hearings, students will file and draft briefs to the UC Board of Review and to Commonwealth Court. Students will submit a weekly journal which contains their analysis of their case preparation, the hearings themselves and their progress. Also, students will help update the Unemployment Compensation Manual, which John Sember has edited for a number of years and which has been published by the Pennsylvania Bar Institute (PBI).

LAW 5952 - CRIMINAL PROSECUTION PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

The office of the district attorney of Allegheny county administers the criminal prosecution practicum under the auspices of former prosecutor, judge Edward J. Borkowski. The practicum runs the full school year, so those interested must devote both semesters to the program. The practicum combines classroom instruction with actual courtroom prosecution experience in order to prepare students for the practice of criminal law. The classroom portion of the course requires students to attend a two hour class once a week in the courtroom of judge Borkowski in the Allegheny county courthouse. Students will be instructed on and be required to conduct opening statements, closing arguments, and direct and cross examination of lay and expert witnesses. Students are provided with a vehicle that includes police reports, lab reports, and transcripts of taped statements based on the class model (a homicide case) from which the exercises are performed in class by the students in a live courtroom setting with a judge and defense attorney present and participating as such. The practical portion of the course requires students to extern ten (10) hours per week in Stephen A. Zappala's Allegheny county district attorney's office. Certified students are permitted to litigate guilty pleas, suppression motions, and nonjury trials in the Allegheny county court of common pleas. The goal of the practicum is to give students a broad overview of the inner workings of a prosecution office while providing hands-on experience in prosecuting cases.

LAW 5954 - D.C. SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The D.C. Seminar is one component of the semester in D.C. Program. The other component of the semester in D.C. Program is the D.C. Externship, which is described separately. Students must enroll in both the D.C. Externship and the D.C. Seminar in order to participate in the semester in D.C. Program. The D.C. Seminar will provide intensive skills training, meetings with alumni and practitioners, and opportunities to reflect on and analyze students' externship experiences. The seminar will meet in the law school's D.C. Classroom. The three seminar credits will be graded. Grades will be based on class participation, a weekly journal, and a significant paper regarding a legal issue or set of issues relating to the externship. The paper can be used to satisfy the upper level writing requirement. Students interested in participating in the semester in D.C. Program should: (a) contact prof. Deasy and/or prof. Baylis directly to discuss the program requirements and externship application process and (b) sign the semester in D.C. Program statement of interest form included with the registration materials and return it to the registrar's office when they submit their registration materials. Students who sign the statement of interest for the semester in D.C. Program should also register for classes as they normally would, in order to keep open the option of taking a regular course load until they have obtained an externship position. Upon securing an externship position, students can drop their other classes and add the D.C. Externship and D.C. Seminar.

LAW 5958 - LGL RESEARCH FELLOWS PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Participants in this one credit, graded course will sharpen and refine basic research skills learned during previous legal research courses. With supervision from the faculty services librarian and other Barco law librarian librarians, students will learn to develop legal research strategies, conduct efficient and comprehensive legal research and to effectively communicate the results of their research to faculty members. Fellows may draft memos, generate spreadsheets or develop bibliographies as finished work products for assignments. The research fellow will encounter a diversity of research requests just as an associate would receive a variety of assignments in a law firm setting. Fellows will have an opportunity to directly interact with faculty members.

LAW 5980 - ETHICAL ISSUES IN CLINICAL CARE

Minimum Credits: 3

Maximum Credits: 3

In this intensive seminar students observe and analyze ethical and health law issues as they arise in two clinical settings: an intensive care unit (ICU) and a medical unit in University hospitals. Students spend ~20 hours/week, allocated across two mornings and one full day per week, observing in the clinical setting. They accompany physicians and other healthcare professionals on clinical rounds, observe family meetings or ethics consultations, and attend one or more ethics committee meetings. Students are expected to complete a self-paced medical terminology text; must attend an orientation session (time and location to be determined); and must participate in the weekly meeting (typically in the late afternoon or early evening) that synthesizes their observational experience. This affords students the opportunity to analyze their experience and the issues they observe, in light of assigned readings. Relatively light reading is assigned for each week. Readings bring social science perspectives to bear on medicine and healthcare and illuminate clinical ethics issues. Students also make a case presentation, write a case analysis, maintain a journal or field notes of the clinical experience, and submit those field notes for review and comment.

LAW 5984 - TRADE SECRETS LAW

Minimum Credits: 2

Maximum Credits: 2

This course will cover various aspects of trade secret law with an emphasis on practical considerations relevant to the business environment. Students will examine public policy considerations of trade secret law, compare the Uniform Trade Secrets Act (UTSA) to the Restatement Approach and to the Pennsylvania UTSA (as well as the law of other jurisdictions), and compare trade secret protection with other forms of intellectual property. We will review the elements of a trade secret and compare the types of information and the circumstances under which courts have recognized or denied trade secret protection. The rights of a trade secret owner relative to its employees and third parties will be examined in detail, including use of confidentiality agreements and non-competition agreements. Enforcement of trade secret rights will be surveyed and include civil and criminal proceedings including the Economic Espionage Act (EEA). Practical issues from the business world are strongly emphasized in this course including drafting and negotiating non-compete, non-solicitation and confidentiality agreements, establishment of business policies and procedures for trade secret protection, practical considerations surrounding the bringing and settling of trade secret cases. This course will feature presentations by various trial lawyers, computer forensics experts and other professionals who are routinely engaged in litigation involving corporate espionage and the theft of competitive intelligence. Particular emphasis will be placed on the strategy behind launching and pursuing such litigation, together with an investigation of the various ways that individuals and corporations defend themselves against such claims. This course will also explore the various forms of equitable and legal relief typically requested in such cases, with a focus on certain recent damages awards in the tens of millions of dollars. Technological advancements in securing competitively sensitive information, together with novel efforts to gain access to such data, will be studied in detail, with particular attention given to the manner in which courts have tried to shape the law in a fast-changing business environment.

LAW 2020 - CONTRACTS

Minimum Credits: 4

Maximum Credits: 4

What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

LAW 2024 - PROPERTY

Minimum Credits: 4

Maximum Credits: 4

Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.

LAW 2030 - AMERICAN LEGAL SYSTEM

Minimum Credits: 2.5

Maximum Credits: 2.5

This course prepares you for success in all courses in the MSL program by providing an overview of key areas of law you will study in depth in later MSL courses and by helping you to begin to "think like a lawyer." You will gain experience reading and analyzing judicial decisions ("case law") and written laws ("statutes" and "regulations"). Equipped with this new skill, you will begin to understand how to use the law to predict answers to legal questions. You will practice writing basic legal documents, such as a case brief and a legal memorandum, and will participate in online discussions and other activities with classmates and the course facilitator as a tool to cement the knowledge you gain in the course. The course will also include a sampling of legal readings and documents.

LAW 2039 - MEDIA LAW

Minimum Credits: 2
Maximum Credits: 2

The last two years have seen the revelation of "deep throat", the most famous confidential source of all time, juxtaposed with the spectacle of reporters going to jail for refusing to divulge confidential sources. Representing a media client today requires an understanding of the constitutional and statutory issues surrounding the gathering of news and protection of confidential sources. Although the confidential source issue is the hottest issue today, representing a media client involves much more. This course is designed to provide an overview of both the legal framework and the 'real world' considerations related to libel, invasion of privacy, access to courtrooms and judicial records, access to public records, protection of confidential sources, pre-publication review, and responding to subpoenas.

Academic Career: Graduate
Course Component: Lecture

LAW 2041 - LAWYERING: A HISTORY

Minimum Credits: 3
Maximum Credits: 3

This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendancy of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, its championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2051 - PRIVATE LAW: TORTS

Minimum Credits: 1.25

Maximum Credits: 1.25

This course explores the field of private wrongs, which form the majority of lawsuits filed in U.S. courts. You will study the methods and policies for allocating responsibility and compensating losses when a person harms another person, their property, or other interests under civil (as opposed to criminal) law. The course examines the three main theories of tort liability - intentional, negligent, and strict liability - and surveys key categories of tort claims that MSL students are likely to come across in professional and personal pursuits. You will complete a variety of research and writing exercises aimed at cementing a foundational knowledge of tort law.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2052 - PRIVATE LAW III:PROPERTY

Minimum Credits: 1.25

Maximum Credits: 1.25

Property law governs relationships among people with respect to "things." These "things" include real property, personal property, and intellectual property. The course examines how real property rights may be limited in certain situations, and how the law balances the rights of a property owner against the rights of others. You will learn how a person or entity acquires property and the key attributes of property ownership; you will also study the law of leases (landlord-tenant law), land sales, easements and private covenants, public land use regulation including zoning, and limits on government authority to "take" private property for public use.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2053 - PUBLIC LAW I: CONSTITUTIONAL LAW

Minimum Credits: 1.25

Maximum Credits: 1.25

This course is an introduction to American constitutional law, with an emphasis on U.S. Supreme Court decisions interpreting and applying the U.S. Constitution. The course explores various methods of interpreting the Constitution and the doctrines that guide judges' application of its provisions. You will explore such topics as the role of the judiciary in reviewing acts of the political branches of government; the separation of powers and relations among the three branches of the federal government; the powers of the national government and how the concept of federalism limits the powers of Congress and the states; and constitutional protection of the rights of individuals.

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2054 - PUBLIC LAW II: CRIMINAL LAW

Minimum Credits: 1.25

Maximum Credits: 1.25

This course introduces MSL students to the fascinating area of criminal law. The course analyzes doctrines of substantive criminal law, both traditional and current. It focuses on such issues as theories of punishment, the formal elements of various crimes, the theory of homicide and the different degrees of that crime, criminal causation, liability as an accessory to a crime, conspiracy, and defenses to crimes including excuse and justification. The course also covers white collar crimes, which are crimes relating to financial fraud in business or government transactions.

LAW 2057 - COMMERCIAL & TECHNOLOGY LAW

Minimum Credits: 2.5

Maximum Credits: 2.5

The Commercial Law portion of this course explores the primary U.S. legislation governing agreements to transfer an interest in goods -- Article 2 of the Uniform Commercial Code. Subjects covered include what transfers Article 2 applies to, how contracts are formed, warranties, acceptance, rejection and revocation of acceptance of goods, risk of loss, excuse for failure to perform, and remedies for breach. The Tech Law portion of this course focuses on intellectual property, which, in the Information Age, has taken on even greater significance. Intellectual Property (or IP) law is designed to encourage the production of certain forms of information by granting property rights to the producers, enabling them to realize the value of the information they produce. In this course, we survey state intellectual property law (e.g., unfair competition and trade secrets) as well as federal intellectual property law, including trademark, patent and copyright. We examine some of the ramifications of recent technological developments on intellectual property law and some of the problems of international protection of intellectual property.

LAW 2070 - INTRODUCTION TO THE LEGAL SYSTEM FOR HUMAN RESOURCES; HIRING AND FIRING

Minimum Credits: 3

Maximum Credits: 3

This course will begin by explaining primary sources of law and exploring the judicial process, which will include an overview of state and federal court systems, state and federal administrative agencies, jurisdiction, class actions, the civil litigation process, and alternative dispute resolution. It will next look at job classification: whether a worker is an employee, an independent contractor or a student intern. Next this course will review job

selection and hiring issues, such as resume fraud, background checks, questions considered inappropriate to job seekers, employee contracts, non-competition and arbitration agreements, protecting trade secrets, job references, and vicarious liability. Finally, this course will cover selected legal disputes surrounding job termination: claims of wrongful discharge and violation of whistleblower laws.

Academic Career: Graduate

LAW 2076 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 4

Maximum Credits: 4

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2082 - CLIMATE CHANGE AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the KYOTO protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.

LAW 2089 - PUBLIC HEALTH LAW

Minimum Credits: 3

Maximum Credits: 3

Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information, emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.

Academic Career: Graduate

LAW 2103 - EVIDENCE

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory course on the rules of evidence and will focus on the federal rules of evidence. We will cover hearsay and its exceptions, relevance, the use of character evidence, cross-examination and impeachment, among other subjects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2105 - FEDERAL INCOME TAX

Minimum Credits: 4

Maximum Credits: 4

This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.

Academic Career: Graduate

Course Component: Lecture

LAW 2135 - COMMERCIALIZING NEW TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3

The key challenge addressed in this joint project course between the Katz business school and the law school is how to commercialize new technologies. Commercialization is the process of transforming an invention (i.e. a new technique or artifact that performs a useful function) into an innovation (i.e. a product or service that creates value in a specific use). Whether a new technology originates in a University, in an established company, or with an individual inventor, several issues must be addressed in order to determine whether it is worth investing in further, and to decide how the technology can be commercialized for maximum long-term value. We will focus on four types of analyses as input to a commercialization strategy: (i) technology analysis, (ii) market analysis, (iii) competitive assessment, and (iii) business model evaluation. For each, you will be provided with one or two practical articles, which outline an analytical tool or approach, and we will discuss their application to one of the cases. Although we'll walk through these steps in the order listed, they will need to be conducted iteratively (e.g. as you learn more about market opportunities you may wish to revisit your initial assessment of the technology's core elements). Throughout the course, law students will have the opportunity to assist the team in assessing legal matters that impact commercialization (from intellectual property matters, to regulatory landscape impacts, to alliance considerations) while also gaining an understanding of key business goals, strategies and tactics. Innovation Practice Institute in order to receive approval to participate. Many factors will be considered in making the decision on which students will be approved for participation, including but not limited to: Life experience Participation in related courses in law school (e.g., Business Organizations, IP-related courses), other graduate studies, or undergraduate studies, JD/MBA Program candidacy, Previous employment experience in relevant fields

LAW 2146 - LANDLORD TENANT LAW

Minimum Credits: 3
Maximum Credits: 3
This course will examine issues relating primarily to the relationship between residential landlords and tenants, including the creation of the tenancy, the rights and duties of the parties, interpretation and application of critical lease provisions, and the framework for prosecuting and defending various types of eviction proceedings based upon a violation of law or breach of lease. Other topics may include discrimination in rental housing, rent regulation, public housing and housing-related public policy initiatives. There will be discussion and analysis of federal, state and local statutory authority and recent case law developments. Students will also have an opportunity to hear from lawyers and judges to get their "real-world" perspective on landlord-tenant practice. Students will be assessed through class participation, a mid-term exam, and a final exam.

LAW 2148 - THE LAWS OF INTIMACY

Minimum Credits: 2
Maximum Credits: 2
So much throughout the history of our nation, federal, state and local governments have attempted in various ways to regulate our society's most intimate relationships and decisions. Challenges to laws regulating marriage, sexual conduct, reproduction, health and other very personal decisions permeate our country's jurisprudence. These "laws of intimacy," provide a historical window through which one can view the evolution of some of America's greatest and most enduring societal and civil rights conflicts. This course will provide students with an overview of the history underlying various "laws of intimacy" and the legal principles that have come to shape the debates concerning these issues. Students will apply these legal principles in their own analyses of continued efforts to regulate the most personal of human behaviors and decision-making.

LAW 2151 - HUMAN DIGNITY RIGHTS UNDER LAW

Minimum Credits: 1
Maximum Credits: 1
This class is an introduction to the substantive law of dignity rights, a new and important emerging field of law in the U.S. and throughout the world. Dignity is the root idea that every person, everywhere has human dignity and the human right to have their dignity respected and protected under law. Dignity is a foundational value and a legal right in international law (e.g. as reflected by the 1948 Universal Declaration of Human Rights), regional law (e.g., the American Declaration of Human Rights), in nearly 160 domestic constitutions throughout the world, and in thousands of juridical opinions spanning the globe. Dignity is also an emerging constitutional value in the United States, reflected in jurisprudence regarding equality, same sex marriage, reproductive rights, capital punishment, substantive and procedural due process, and climate crisis. Moreover, in August 2019 the

400,000-member American Bar Association adopted the advancement of human dignity as a core function and ingredient of the rule of law in the U.S. and around the globe. This course would be a rare opportunity to learn more about this important new area of law.

LAW 2152 - NEGOTIATION SKILLS (BUSINESS)

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide students with an understanding of current negotiation theory and practice. Students will study negotiation theories, research and techniques. As a result of taking this course, students will have an understanding of how to negotiate effectively in transactions, as managers, and to build effective teams. The materials for this course will consist of readings, negotiation scenarios, and real-life examples. Students will engage in skill-building exercises, actual negotiations, classroom and online discussions, individual presentations, self-reflection, self-assessment, giving and receiving feedback, and close reading of assigned texts and other materials. Students will have an opportunity to explore negotiation theory, practice different styles and techniques, and develop their own strategic approaches to negotiations.

LAW 2201 - ADMINISTRATIVE LAW

Minimum Credits: 3

Maximum Credits: 3

It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.

LAW 2210 - PATENT LAW

Minimum Credits: 2

Maximum Credits: 2

For over two hundred years the united states patent system has stimulated innovation by conveying time-limited exclusionary rights to inventors who adequately disclose their novel and nonobvious inventions to the public. Throughout this time, technological advancements in various industries have repeatedly confronted the patent system with fascinating policy and doctrinal challenges. In a constant effort to keep up with the pace of innovation and ensure that the patent system fulfills its constitutional purpose to 'promote the progress of . . . Useful arts,' patent case law has become one of the most rapidly evolving and adapting areas of American law. Through study of judicial decisions and statutory provisions, this course will examine the substantive legal doctrine and policy underlying two primary aspects of united states patent law: (1) the requirements for obtaining a patent; and (2) the means by which an issued patent is enforced (and its validity challenged). Specific topics include patentable subject matter (including computer-implemented inventions and biotechnology), novelty, no obviousness, utility, loss of right, disclosure requirements, patent claim interpretation, literal infringement, the doctrine of equivalents, prosecution history estoppel, defenses to patent infringement resulting in invalidity and/or unenforceability, injunctive relief, damages, and the unique role of the united states court of appeals for the federal circuit in shaping patent law.

LAW 2216 - EMPLOYMENT DISCRIMINATION

Minimum Credits: 3

Maximum Credits: 3

This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion and age. The most prominent statutes in this area are title vii of the civil rights act of 1964, the age discrimination in employment act, and an older civil rights statute from the reconstruction era, 42 U.S.C. 1981. The course will explore the substantive meanings of "discrimination" under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

LAW 2232 - LAW AND LEGAL PROCESS IN LATIN AMERICA

Minimum Credits: 2

Maximum Credits: 2

This is a two-credit introduction to the legal tradition, juridical institutions, and legal processes of the countries of Latin America. The first several weeks of the course will be devoted to the Roman origin of the Civil Law tradition (of which, of course, the countries of Latin America are part), the development of that tradition in Medieval Europe (with special attention to Spain), the growth of legal and governmental institutions in Spain's American colonies, and the influence of the U.S. and the French Revolutions and of German Legal Science on the newly-independent countries of Latin America and on the present-day legal systems of those countries. As the course proceeds, the students will be introduced to procedural devices created in Brazil, Mexico, and Argentina to adjust portions of those countries' Civil Law systems to the selective introduction of Anglo-American constitutional concepts. Finally, some time will be allocated for study and discussion of relevant special interests of students enrolled in the course.

LAW 2251 - BIOTECHNOLOGY LAW

Minimum Credits: 2

Maximum Credits: 2

Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Franken foods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2265 - LABOR LAW: PRIVATE SECTOR

Minimum Credits: 2

Maximum Credits: 2

This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes, picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

LAW 2268 - CONSTITUTIONAL LAW 2: GOVERNMENT POWERS, FEDERALISM AND THE PRESIDENCY IN THE TRUMP ERA

Minimum Credits: 3

Maximum Credits: 3

This upper level constitutional law course advances issues raised by the structural parts of the United States Constitution, as opposed to individual rights. Attention will be given to the relationships of the three federal branches of government, with emphasis on some of the powers and limitations of the executive, legislative and judicial bodies that arise from principles of separation of powers and national checks and balances. The course will also consider federalism and the respective roles of the national and state governments in some detail. These structural aspects of the Constitution will be discussed against the backdrop of the Trump Presidency, including, but not limited to, questions concerning judicial processes of indictment, Presidential pardons, the Emoluments Clause, the 25th Amendment, plenary powers over foreign affairs, the constitutionality of an international wall, congressional impeachment processes, and the legitimacy of sanctuary cities. Students will be expected to discuss the issues in a dispassionate, civil and academic fashion.

LAW 2282 - NATIONAL SECURITY LAW

Minimum Credits: 2

Maximum Credits: 2

The Preamble to the U.S. Constitution, which famously begins "We the People," makes clear the high value our founders placed on national security and the role of law. The Preamble describes the Constitution's very purpose as including "establish[ing] Justice, insur[ing] domestic Tranquility, provid[ing] for the common defence,... and secur[ing]... Liberty." Today, national security remains a priority responsibility for our federal leaders. Our nation continues to strive for the right balance between security and liberty, mixed with a healthy dose of Justice, all in the name of "form[ing] a more perfect Union." The Constitution has continued to provide a framework for our government's exercise of national security powers. At the same time, the field of national security law has witnessed rapid growth and significant change, particularly over the past fifteen years. The coming years will be no less dynamic. This course examines national security law through a study of essential legal sources, historical precedents, and current and emerging national security issues. Topics include: each branch's role (and limitations) in national security decision-making, war powers and military force, crime and counterterrorism, and the role of information in national security. Together, we will aim to better understand the role of law in keeping our homeland safe, and the relationship (and necessary balance) between security, liberty, and justice.

Academic Career: Graduate

LAW 2291 - TRANSACTIONAL PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This course will offer an experiential learning opportunity in that all students will observe and perform many "lawyering" tasks normally entrusted to legal counsel who work on complex corporate and financing transactions. These tasks often require execution of instructions from a client or senior lawyer. Some require bilateral bargaining and judicious compromise. Some require collaboration or teamwork. The course will be cast primarily in the setting of a proposed acquisition of a "target company", as a going concern, by a so-called "private equity" investment firm. Students will be exposed to, and will engage by simulated participation in, the legal and practical dynamics by which transactions in this milieu are created, including: Negotiation of terms and bargaining over allocation of risks and uncertainties. Disclosure processes and protocols, for fulfillment of one party's appetite for information and the other's protective needs. Choice of transaction structure. Preparation of contract documents and drafting techniques. Dealing with "stakeholder" needs.

Academic Career: Graduate

Course Requirements: School of Law (PLAW)

LAW 2296 - CORPORATE GOVERNANCE

Minimum Credits: 2

Maximum Credits: 2

This course will examine the internal structures, processes and standards of behavior that are required by law in the governance of corporate organizations, utilizing a series of hypothetical problems. Particular attention will be given to the corporate director's duties of oversight, care and loyalty, to the shareholders' ability to enforce those duties, and to the concept of fiduciary "independence." Some features of the Sarbanes-Oxley act of July 2002 and related rules will also be considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2297 - WORKERS' COMPENSATION

Minimum Credits: 2

Maximum Credits: 2

This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

LAW 2301 - FIRST AMENDMENT: FREEDOM OF EXPRESSION

Minimum Credits: 3

Maximum Credits: 3

This course will address the history, theory, case law, and practice of the First Amendment's protection of freedom of expression. We will cover the history and origin of the First Amendment's Speech Clause and the various freedom of expression doctrines developed in the case law, including (but not limited to) prior restraints, vagueness and overbreadth, political speech, symbolic speech, time, place, and manner-restrictions on speech, the distinction between content-based and content-neutral restrictions on speech, and categories of unprotected or 'less-protected' speech. We will not be covering the First Amendment's Religion Clauses because they are covered in other courses. Given time constraints, we also will not be covering the First Amendment's Press, Assembly, or Petitions Clauses in any detail (although we will likely reference them in connection with other freedom of expression doctrines).

LAW 2304 - COMMERCIAL TRANSACTIONS

Minimum Credits: 3

Maximum Credits: 3

This course explores statutes and treaties governing agreements to transfer an interest in goods. The primary area of focus is article 2 of the uniform commercial code, and aspects thereof not covered in the first year contracts course; subjects covered include applicability of article 2, selected contract formation rules; warranties; acceptance, rejection and revocation of acceptance of goods; risk of loss; excuse for failure to perform; and remedies for breach. To a lesser, but significant extent, the course also covers the united nations convention on the international sale of goods (CISG), in force in the United States since 1988.

LAW 2319 - LAWYERS IN AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

Lawyers like to think of themselves as members of one of the most helpful and important professions in American society. All too often, however, we encounter suspicion, derision or open hostility, not to mention nasty jokes. Public and private criticism of lawyers in the United States has become noticeably more intense in recent decades, but we have rarely attempted to survey its range, explore its roots, assess its legitimacy, or evaluate our own responses to it. This course proposes to do these things by examining characterizations and representations of lawyers in American culture from colonial times to the present day. We will relate changing views of American lawyers and lawyering to shifting social and professional circumstances; we will also explore the impact of those circumstances on fictionalized depictions of lawyers in American plays, novels, films, radio and TV, humor, art and song. We will consider what members of other prominent groups in American society from 17th Puritan clergy to 20th century businessmen have said or alleged about lawyers. We will also discuss how, where and with what effect lawyers have presented, promoted and defended themselves before the American public. We will conclude the course by considering how lawyers might learn from past experience and leverage the opportunities and challenges of 21st century law practice to restore or at least improve their public standing.

LAW 2328 - COPYRIGHT LAW

Minimum Credits: 3

Maximum Credits: 3

Copyright law deals with legal protection for certain kinds of human "creativity," including creativity expressed in books, music, and computer code. The copyright law course will describe the role that copyright law plays - together with other intellectual property law, other non-IP law, and other non-legal institutions - in positioning that creativity as part of a knowledge ecology and the knowledge economy. For authors and publishers, how does copyright law help them make money based on their creative output? For readers and consumers (and next-generation authors), how does copyright law preserve the power to access and use knowledge? And for law students, how do lawyers participate in doing both things, by

representing and counseling clients? The course will describe the constitutional and statutory attributes of copyright law; the rights and remedies that copyright law provides for authors and publishers; constitutional and statutory protection that copyright law provides for the public; and the intersection of American copyright law with other intellectual property law, with state law, and with international law. Students are expected to master the substantive law of copyright, but that mastery is only a preliminary step. The major goal of the course is to teach students how to use the law to advance their clients' interests in creative products. The course does that by requiring students repeatedly to use their professional judgment in a counseling context.

LAW 2336 - LAND USE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide students with a basic introduction to the mechanics and legal theories underlying land use controls. The course will strive to go beyond the theoretical by presenting a series of guest speakers (ranging from judges and zoning officials to land use planners, civil and transportation engineers, state environmental officials and developers) who deal with land use issues on a daily basis. Students will also be provided an opportunity to observe zoning board and court proceedings first hand and prepare class projects and papers based upon these proceedings. The course will emphasize the inter-relationship and conflict with environmental regulations. Class discussions and projects will focus upon recent judicial and legislative developments in land use law.

Academic Career: Graduate

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2339 - LAW OF DISABILITY DISCRIMINATION

Minimum Credits: 2

Maximum Credits: 2

This course will provide in-depth analysis and discussion of the major federal disability discrimination statutes, including the Americans with disabilities act, the individuals with disabilities education act, and section 504 of the rehabilitation act. Readings and class discussions will focus on the application of these laws to issues such as employment, public accommodations, education, architectural barriers, transportation and insurance. The course will explore how disability discrimination statutes interact with other statutes, such as the social security act and the family and medical leave act.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2340 - ENVIRONMENTAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient background for the purposes of this course.

LAW 2347 - ELDER LAW

Minimum Credits: 3

Maximum Credits: 3

With over 35 million Americans age 65 or older, society and the law have grown very attentive to the needs of the elderly. In this course we will examine the aspects of aging that have particularly impacted on law and public policy. Law both protects the elderly and grants those rights and privileges. We will examine the interplay of law and public policy in the context of social security, private pensions, Medicare, Medicaid, long-term care financing, guardianship and mental capacity, health care decision making, housing and the abuse and neglect of the elderly.

LAW 2355 - NON-PROFIT ORGANIZATIONS

Minimum Credits: 2

Maximum Credits: 2

This class will survey the state and federal laws governing nonprofit tax exempt organizations. The course will examine the formation of nonprofit corporations under Pennsylvania law, principles of corporate management, and options for fundamental organizational change. In addition, the course will analyze the process of qualifying for tax exemption under the Internal Revenue Code and under the laws of Pennsylvania. Issues of private inurement, unrelated business income, charitable giving and fundraising regulations will be discussed. The course will include statutory and regulatory analysis, selected caselaw and case studies based on actual NPO's.

LAW 2395 - HEALTH LAW AND POLICY

Minimum Credits: 3
Maximum Credits: 3
This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish
2117

to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system(including integrated health care delivery systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala); tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage(including HIPAA, cobra and ADA); Medicare/Medicaid eligibility, benefits, and reform efforts; health care fraud and abuse (false claims act, ant kickback statute, stark); and antitrust issues in the health care industry. This course does not examine issues of professional liability, and it does not cover ethical issues in health care (covered in, which is the subject of "bioethics and law").

LAW 2402 - CRIMINAL PROCEDURE 2

Minimum Credits: 3

Maximum Credits: 3

Criminal Procedure II (The Adjudication Process) -addresses all of the major federal constitutional issues that arise during criminal adversarial proceedings in the United States - in both the state and federal court systems. This course will provide a detailed, practical, and realistic understanding of what occurs in a criminal case from the time an accused is arrested until the time of conviction, sentence, and appeal. Procedures in both federal and state courts will be discussed including preliminary issues such as arrest procedure, prosecutorial discretion in determining what charges will be filed, bail concerns, preliminary hearings, and grand jury proceedings. The course will then address pre-trial matters such as discovery, Brady material, and pre-trial motions practice. This section will include but not be limited to joinder and severance, speedy trial, plea bargaining, and pre-trial habeas corpus. The "trial" section of the course will discuss jury issues including jury selection and a variety of procedural issues that arise at trial including confrontation clause, hearsay, double jeopardy, and Bruton issues. Supreme Court cases, such as Apprendi and Alleyne, will generate an important discussion of not only appropriate language in indictments, but verdicts and verdict slips as well. Time will also be spent on sentencing, both state and federal. We will also briefly cover the appellate and collateral attack post-conviction processes.

LAW 2408 - HEALTH CARE FRAUD AND ABUSE

Minimum Credits: 1

Maximum Credits: 1

This course will consider the responsibilities and obligations of an attorney to his or her client, the court and the legal system. Emphasis will be placed on the rules of professional conduct which have been adopted by the Pennsylvania supreme court as the standard of conduct for all attorneys admitted to practice within the commonwealth. Classroom meetings will focus on the common ethical problems which attorneys face including the

scope of the duty to zealously represent your client; responsibilities owed to the courts and to other parties that may conflict with your client's interests; what decisions are made by the client and what decisions are made by counsel; potential conflicting responsibilities of counsel to his or her insurance company and the insured; potential conflicting responsibilities of corporate counsel to the corporation and the corporate officers; disqualification of counsel; the scope of the attorney-client privilege; confidentiality requirements; fee arrangements; withdrawal from representation; competency requirements; and pretrial and trial conduct.

LAW 2422 - ALTERNATIVE DISPUTE RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills. This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.

LAW 2491 - ADVANCED LEGAL RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will build on the material presented in the Foundations of Legal Research course, and will provide students with a broader array of strategies and skills to approach legal research projects. The course is to be broadly divided into three components. The first component focuses on strategic approaches to legal research, how to incorporate the research process into the litigation or transactional problem presented and to more effectively integrate the various legal research tools available into that strategic approach. Cost-effective research strategies, including strategies to effectively manage real-world Lexis and Westlaw costs will also be covered. This component will somewhat overlap with, but significantly expand on material from the Foundations course, and will give students a broader understanding of the research process. The second component of the course recognizes that not all substantive areas of the law utilize the same research resources, strategies and techniques. During this component of the course, students will be exposed to specific topical research areas and spend several weeks looking at the unique resources and research challenges presented by those areas. The third component of the course returns all students to the same material and focuses on non-legal research areas such as medical and scientific research, business and corporate research, investigative research, and financial and marketplace research. The use of experts in these areas as guest lecturers is anticipated.

LAW 2508 - PERFORMING JUSTICE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Anyone who has set foot in a courtroom knows that what goes on there has as much to do with drama as with rational inquiry. Judges act as if they are finding legal rulings by applying objective rules, while making subjective choices about which rules to apply and how. Witnesses testify as if responding spontaneously to questions that actually have been rehearsed. Lawyers are professionally histrionic paid to play righteous believers in their clients' virtue. This is the decision making process Jeremy Bentham called "theater of justice" and the American Legal Realists derided as a "ceremonial routine" of "word jugglery," "legal ritual," "magic solving words" and verbal "sleight of hand." In this seminar we will explore some standard critiques of law as performance. Along the way we will consider how the theatrical, ritual, and perhaps even magical aspects of legal process might both detract from and contribute to the production of justice. We will approach these questions through reading and discussing a wide range of texts, including, judicial opinions, law review articles, performance theory, plays, social criticism, and ethnography. There will be at least one "field trip" to see some legal performance live, and we will likely make use of film and video as well.

LAW 2585 - EDUCATION JUSTICE AND CIVIL RIGHTS SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to education and civil rights law and policy that are the foundation for civil rights protections in K-12 public education. Students will explore key education and civil rights issues in the following topic areas: school segregation (past and present), the criminalization of students of color, school privatization, and social movements for education justice. Students will emerge from this class with an understanding of historical and current flashpoints in education and civil rights in the United States and the role of lawyers and the law. In addition to analyzing key cases, articles, and social science research, students will explore how law students and lawyers can play a meaningful role through policy, litigation, and advocacy for social change.

LAW 2627 - WICKED PROBLEM INNOVATION

Minimum Credits: 3
Maximum Credits: 3

"Wicked Problem Innovation" is a new, innovative, cross-disciplinary course that brings together graduate students from Pitt Law, the Katz School of Business, and other units across the University of Pittsburgh to engage deeply in a selected acute problem that faces Pittsburgh and the broader world. "Wicked" problems are stubborn, complex societal and business challenges like global climate change, income disparity, inclusive economic growth, and universal healthcare. These problems arise from a variety of causes and affect multiple stakeholder groups, each of which has a different idea of how the problem arises and what can be done to improve it. While it is likely not possible to "solve" these problems in a traditional sense, it is possible to make sustained progress in tackling them. Course participants will research the selected problem from legal, business, historical, and other perspectives, identify and consult with stakeholders, and ultimately design a process to improve progress on the selected problem. During the course, students will learn to work collaboratively with peers and instructors from a variety of disciplines, and will practice a host of practical skills, including interviewing witnesses and clients, negotiating outcomes, and actively problem solving across a range of subject matter areas. Additionally, students will gain substantial and deep contacts in local, state, and potentially national, government, nonprofit, and business communities. Students will come away from the course will critical skills in working collaboratively across subject matter boundaries and experience creating an innovative problem-solving process from the ground up.

LAW 2640 - DIVERSITY INTERGROUP DIALOGUE

Minimum Credits: 1

Maximum Credits: 1

The Diversity Intergroup Dialogue Workshop is open to all 2L, 3L, LLM, MSL and joint-degree Pitt Law students and brings together those with diverse cultural and social identities in a small group setting, with the goal of engaging students in experiential learning as well as open and constructive dialogue concerning issues of intergroup relations, conflict and community. Students will learn from each other's experiences and examine how race, ethnicity, class, religion, age, disability, sexual orientation, gender identity and expression relate to power and privilege; and will practice constructive approaches to dialogue and the bridging of differences. Students will also consider how attorneys in a pluralistic society can use Intergroup Dialogue skills to better serve clients, advance causes and enhance professional satisfaction. The workshop process is designed to stimulate learning, growth and engagement across the cultural identities identified above to provide students with the affective, behavioral and cognitive acumen that will promote skill-building to navigate effectively in our increasingly pluralistic nation and world.

Minimum Credits: 2

Maximum Credits: 2

This course will focus on federal hate crimes. Students will examine and analyze relevant statutes and key cases with a focus on gaining a practical understanding of the elements and application of these statutes. Students will have the opportunity to engage in discussions regarding the larger societal conversations relevant to these cases in order to better understand the various lenses through which prospective jurors may view such cases. Students will also learn about the tailored strategies applicable to investigating and litigating federal hate crimes cases, as many of these strategies are unique to this specific area of law. In addition to exploring various fact patterns through in-class discussion, students will utilize a specific hypothetical case fact pattern throughout the duration of the course that will serve as a basis for exploring the relevant statutes and strategies. As the course progresses, students will investigate the hypothetical case (including through an "investigation workshop"), analyze evidence related to the case, and litigate the case (through a "litigation workshop" and mock trial exercises). Please note that the subject matter of this course will require students to read about, view, listen to, and discuss material that may be disturbing or offensive to some or all students. Such material may include recordings or descriptions of the use of racial slurs and other offensive language, recordings or descriptions of the use of violence targeting victims based on a specific trait (race, ethnicity, gender, sexual orientation, religion, etc.), and other similar material.

LAW 2644 - PHILOSOPHY OF CRIME & PUNISHMENT - NATIONAL & INTERNATIONAL PERSPECTIVE

Minimum Credits: 2

Maximum Credits: 2

This class will examine the philosophical and moral justifications for punishment in both American and international criminal justice systems, with a specific focus on the impact that the philosophy of punishment has on the individual and more broadly, on society as a whole. We will examine legal theory and concepts while fostering philosophical contemplation and discussion. There are four main theories of punishment: deterrence, retribution, rehabilitation and incapacitation. Depending on era and country, different views take a different approach and order of importance; this class will examine the four main theories in other countries, as well as our own. We will examine which philosophy of punishment is most effective and why. As we attempt to move toward a more socially conscious view of justice, we must ask a series of "why" and "how" questions: why do we punish those who have violated the law, and how do we decide the proportionality of the punishment in question? What philosophy do other countries use/ what philosophy has shaped our modern view of crime and punishment? Are we becoming more or less moral? Whose standards of morals? Are we becoming a more or less compassionate society? And how do those standards compare to the moral/philosophical views of comparative criminal justice systems in other countries? This class will be taught by lecture and discussion and will require short essays and one longer research paper. The purpose of these essays will be to make a well-reasoned argument supported by the readings, as well as counterpoints.

LAW 2648 - CIVIL RIGHTS LITIGATION SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar will be a historical consideration of civil rights litigation in the United States. Our goal will be to understand the long history of segregation as it was created by legislatures and then supported by Courts, and how these precedents were reversed through litigation and other strategies. We will read classic cases on race, from the 19th and early 20th centuries, learning how the Supreme Court developed its segregation doctrines. We will simultaneously look at litigation strategies by abolitionists before the Civil War and civil rights activists in the late nineteenth century. We will then turn to the creation of the NAACP and see how it became the leading engine of civil rights litigation. This will lead to the long struggle for an end to segregation, culminating in *Brown v. Board of Education* (1954). Part of our focus will be on Thurgood Marshall as a lawyer. We will look at NAACP integration strategies along with more activist civil rights strategies by Martin Luther King and others. This part of the course will also look at federal actions on civil rights after the passage of the 1964 Civil Rights Act and other civil rights laws. Readings will include some cases -- often in full text -- the classic book *Simple Justice*, a biography of Marshall, and writings by King and others. Our consistent focus will be on (1) what this history teaches us about attorneys' litigation strategies and (2) what overarching limits there may be on attaining fundamental change through the litigation process.

LAW 2653 - INTERNATIONAL HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law, the different hierarchies of human rights and the differing approaches to applying those hierarchies, and the ability (or lack thereof) to enforce international human rights standards. Students are required to either have already taken international law or to take it in conjunction with international human rights law.

LAW 2670 - PERSONAL FINANCIAL PLANNING & BUSINESS START-UP PLANNING

Minimum Credits: 1

Maximum Credits: 1

This course deals with the basics of personal financial planning and startup business planning. Students will create personal financial plans based on projected horizons of 1, 3 and 5 years. The primary focus is on near term planning with emphasis on: initial savings, paying off student debt, judicious use of credit, and investing for short and long term goals. Also, students will create a comprehensive business plan for starting a law firm after graduation. This plan's focus should be on business structure, financing, cash management and cost control. Topics such as benefits and insurance should be covered as well. Students will prioritize and codify their plans based on personal, professional and lifestyle objectives projected over each plans stated horizons.

LAW 2673 - HEALTH CARE FRAUD, ABUSE, AND COMPLIANCE

Minimum Credits: 2

Maximum Credits: 2

United States health care spending reached \$3.6 trillion in 2018, accounting for 17.7% of the gross domestic product. Government officials have been quoted as saying that up to ten percent of this spending is due to fraud, waste, or abuse. In fiscal year 2019, the federal government won or negotiated \$2.6 billion in health care fraud and abuse judgments and settlements, as well as additional amounts from administrative cases. As one of the most highly regulated industries in the United States, health care entities are required to comply with numerous statutes and regulations, including those related to fraud and abuse. These laws are increasingly complex, thereby exposing health care entities to liability for non-compliance. Thus, individuals involved in the administration and delivery of health care and lawyers who wish to practice health law must be well-versed in the laws and regulations that govern health care fraud, abuse, and compliance, as well as the strategies health care entities employ to address these concerns. In this course, students will explore the major federal civil, administrative, and criminal laws that have been used to combat health care fraud and abuse. These laws include the False Claims Act, the Anti-Kickback Statute, the Physician Self-Referral Law, and the Civil Monetary Penalties Law. Related compliance strategies and the practical compliance issues faced by health care providers will also be covered, including the seven elements of effective compliance programs, conflicts of interest and governance, repayments and disclosures, privacy and security, and corporate integrity agreements.

LAW 2686 - LEGAL INSTITUTIONS & THE HOLOCAUST

Minimum Credits: 3

Maximum Credits: 3

The Legal Holocaust in Hitler's Europe and its Aftermath in US Federal Court. This course examines the development of racial laws during WWII in France, Germany, and the British Channel Islands. We will use original documents and actual statutes and cases to understand how what was once legally grotesque became "law" in these places. We will then fast forward a half century, via the Nuremberg war-crimes of 1946, to the time when victims or their heirs began bringing restitution lawsuits in US federal courts, a development that continues to this day, the instructor being one of the plaintiffs' lawyers in a half dozen such cases, including a pending matter in the Seventh Circuit. Thus the course examines historical material as well as complex contemporary questions under US federal law and standards of professional ethics.

LAW 2694 - TRADEMARK LAW

Minimum Credits: 3

Maximum Credits: 3

Trademark law concerns common law and statutory bases for obtaining and enforcing legal protection for commercial symbols, including logos, slogans, and other potentially distinctive product and service identifiers. The trademark law course will describe the role that trademark law plays - together with other intellectual property law, other non-IP law, and other non-legal institutions - in positioning that commercial "speech" as part of commercial markets generally. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for citizens generally, how does trademark law preserve the power to access and use information about the commercial sphere - and to extend that information into other "free speech" contexts? And for law students, how do lawyers participate in doing both things, by representing and counseling clients? The course will cover the constitutional, statutory, and common law attributes of trademark law; the rights and remedies that trademark law provides for producers; the protection that trademark law provides for competitors and consumers; and the intersection of American trademark law with other forms of intellectual property protection, with the first amendment, and with international law. Students are expected to master the substantive law of trademark, but that mastery is only a preliminary step. The major goal of the course is to teach students how to use the law to advance their clients' interests in commercial symbols. The course does that by requiring students repeatedly to use their professional judgment in a counseling context.

LAW 2701 - HEALTH CARE FRAUD AND ABUSE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

United States health care spending reached \$3.2 trillion in 2015, accounting for 17.8% of the gross domestic product. Government officials have been quoted as saying that up to 10 percent of the money the United States spends on healthcare is due to fraud, waste, or abusive practices. If true, that now amounts to over \$3 billion per year. In Fiscal Year 2016, the federal government won or negotiated over \$2.5 billion in health care fraud judgments and settlements, as well as additional amounts from administrative cases. Thus, health care fraud is a major priority of both federal and state agencies and lawyers who wish to practice health law would be wise to understand the laws that govern health care fraud and abuse. This course focuses on the major civil, administrative and criminal laws that have been used to combat health care fraud and abuse, broadly defined as actions by health care providers (e.g., hospitals, physicians and physician practices, nursing homes, medical device and pharmaceutical manufacturers, home health agencies, clinical laboratories, and rehabilitation facilities) that are inconsistent with accepted business and medical practices. These laws include the federal civil False Claims Act, the federal Anti-Kickback Statute, the Stark Law, and the Civil Monetary Penalties Law. While the class focuses on federal law, health care fraud and abuse laws at the state level will also be discussed. Related compliance strategies and the practical compliance issues faced by healthcare providers will also be covered.

LAW 2717 - TELECOMMUNICATIONS LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the regulation and evolution of electronic communications in the United States. We will survey the legal framework of telecommunications, broadband and the Internet at several significant points in its development. Following the respective regulatory paths of broadcast, wireline and wireless telephony, cable, and broadband, the analysis will include early Federal Communications Commission broadcast regulation; the Communications Act of 1934 and its progeny; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the Telecommunications Act of 1996. Finally, we will examine technological convergence, the emergent dominance of broadband and wireless communications, and the impact of rapid technological changes. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and the impact of such concerns as intellectual property and free speech. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 2719 - APPLIED LEGAL DATA ANALYTICS & AI

Minimum Credits: 3

Maximum Credits: 3

Technological advances are affecting the legal profession. While it is hard to predict the changes that machine learning and natural language processing will bring, legal professionals certainly will need to understand the new techniques and how to use and evaluate them. This course, co-taught by instructors from the University of Pittsburgh School of Law and Intelligent Systems Program, provides a hands-on practical introduction to the fields of artificial intelligence, machine learning and natural language processing as they are being applied to support the work of legal professionals, researchers, and administrators. Researchers in the field of Artificial Intelligence and Law (AI&Law) have been applying recent advances in natural language processing and machine learning to extract semantic information from legal documents and to use it to solve legal problems. Meanwhile, the commercial LegalTech sector is thriving. Companies and startups have been tapping into the legal industry's need to make large-scale document analysis tasks more efficient, and to use predictive analytics for better decision making. This course will help law students gain literacy with these technologies and learn how to apply them to the kinds of legal problems they have studied or will encounter in practice. This course not only teaches law students about the new tools, but enables students to gain practical experience using them under close mentorship and in project-based collaboration with students from computer science backgrounds who want to learn about the law. Lecture sessions will alternate with working sessions where instructors assist groups with projects.

LAW 2811 - HEALTH CARE BUSINESS TRANSACTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception to conclusion.

Maximum Credits: 3

This seminar will introduce students to the very beginnings of Western legal history. Through a comparative examination of the legal systems and practices of ancient Mesopotamia (including Hammurabi's Babylon, c. 1700 B.C.), Ancient Egypt, ancient Israel, ancient Anatolia (the Hittite empire, c. 1500 B.C.), Ancient Greece and ancient Rome, we will investigate the historical origins of "law" as an idea. We will see how each of these societies created law in the image of its own beliefs and needs. We will look at what differentiated the resulting legal systems, and what united them. We will examine not merely the ancient "law in the books" (the formal written codes that have received so much historical and philological attention over the years) but also the ancient "law in action" (the performances, rituals and ceremonies that created legal rights and duties in all these proto-literate societies). We will look at some of the earliest surviving trial records. Throughout the seminar, emphasis will be placed on developing a broad interdisciplinary perspective on the ancient legal cultures examined; readings will be drawn not only from the fields of law and history, but also from religion, anthropology, archaeology, literature and communication studies.

LAW 2877 - PUBLIC POLICY SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the processes of federal law-making and public policy development through examination of a series of selected topics concerning lobbying, the legislative process, judicial challenges to new laws, and administrative rule-making and enforcement. A primary purpose of the seminar is to enrich students' understanding of law-making and policy development by focusing on a series of case studies concerning particular laws and policies and introducing information about the relevant political dynamics, bureaucratic systems, and other real-world factors. Thus, in addition to studying written materials, students will talk with Washington-based attorneys and others who are experts in the relevant fields. The selected topics will vary from year to year.

LAW 2909 - HOW LAW BEGAN

Minimum Credits: 3

Maximum Credits: 3

How did law develop in early societies? Why did it develop? As an embodiment of human values and a fundamental form of human expression, how did early law reflect and shape custom, religion, government and the very concept of civilization itself? We'll explore these questions and more through an examination of law's rise in a wide range of ancient cultures broadly clustered around the Mediterranean basin, beginning with Mesopotamia a thousand years before Babylon and extending three millennia to the eastern Roman Empire in the 6th century CE. In between, we'll encounter Egyptian viziers presiding in pharaonic courts, Hittite kings making international treaties with their neighbors, Hebrew law-givers leading their people to justice in the promised land, Greek logographers writing speeches for delivery to Athenian juries, and Roman advocates arguing cases before judges sitting in the city forum. We'll meet Hammurabi, Ramesses, Moses, Demosthenes, Cicero and Justinian. We'll find early law written on clay and set in stone; we'll read it in text, touch it in ancient coins displaying legal symbols and look at it literally in the round as its monuments stand in modern museums. We'll search for law in early Assyria, Phoenicia and Persia, and following in the footsteps of Alexander the Great we'll even reach towards the ancient legal cultures of India and China to gain a comparative perspective on law's earliest meanings and manifestations in civilized society. At the end of our journey, we may discover that far from being somehow primitive or undeveloped, early law and the people who made it have much to teach us today, not just about what they were, but about what we could be.

LAW 2910 - LAWYERS IN AMERICAN SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course examines the role of American lawyers as nation-builders from colonization to the present day. It explores not only how lawyers crafted the domestic legal and constitutional structure, but also how they shaped American settlement, politics, business, letters, education, rhetoric, race relations, immigration, communication, diplomacy, war-waging and peace-making over more than four centuries, allowing lawyers (not businessmen, not doctors, not professors, not clergy, not engineers) to largely define what it means to be an American. It considers how ordinary citizens and members of other professional groups have reacted to lawyers in their many social capacities, and it assesses how embracing and occasionally rejecting their self-appointed status as "essential Americans" has affected lawyers themselves. It concludes with an investigation of where lawyers stand in today's divided and disoriented America, assessing whether they have succeeded or failed in their larger ambitions to build and to lead, and how they might better serve their country and themselves in uncertain times. Although this course may be of particular interest to Honors College students contemplating a legal career, it is pointedly designed to engage students in history, political science, sociology and the general humanities who would like to develop a deeper understanding of the role and power of the legal profession and the dynamics of American society as a whole.

LAW 2911 - FIRST AMENDMENT

Minimum Credits: 3

Maximum Credits: 3

The First Amendment guarantees the right to engage in five activities deemed essential to a free society: religion, speech, press, assembly and the right to petition the government to redress grievances. Courts have established various tests over time for defining protected versus unprotected activity and for determining the degree of permissible government regulation. Questions concerning proper interpretation of First Amendment rights have resulted in some of the most well known and contentious Supreme Court decisions. This course will entail a rigorous study and discussion of First Amendment case law, as well as methods of legal analysis and historical/societal concerns that have driven the development of First Amendment law. Assigned readings will largely consist of court decisions. Class discussions are expected to be interactive. Students will be encouraged to question and critique court decisions and discuss their own views of how cases should have been decided using the analytical tools taught in class. A number of class exercises will be introduced to encourage free thinking and debate regarding fundamental First Amendment rights.

LAW 2912 - ASIAN-AMERICANS IN LAW & SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Asian-Americans are an under-studied minority. This course explores current issues on Asian- Americans in the workplace and in society, including the increasing recognition of profiling, harassment, and discrimination. The course begins with an interdisciplinary overview of the history of Asian-Americans, their current status in the workplace, Asian-American harassment as addressed in the law, and the myriad roles of Asian-Americans in society. Students will then select a topic to further research and to present in a power-point presentation and a paper or photo-essay.

LAW 2931 - HEALTH JUSTICE

Minimum Credits: 3

Maximum Credits: 3

Although the United States likes to pride itself on having the most advanced medical care in the world, our citizens' experiences diverge widely with respect to the care they receive, as well as their health status and outcomes. Health disparities based on race have received the most attention, but disparities also exist with respect to ethnicity, gender, disability status, and sexual minority status, among others. Significant health disparities call into question both the justice and the quality of the U.S. health care system, a challenge that has become all too apparent during the COVID-19 pandemic. This course will examine evidence of and explanations for health disparities along several axes, focusing primarily on race/ethnicity, but also including gender, disability status, and sexual minority status. After reflecting on how theories of justice respecting health and health care apply to disparities, the course will turn its attention to the roles that medicine, public health, and law can play in responding to disparities. The course is intended for a broad range of students. While it may be of particular interest to those contemplating a career in law, medicine, public health, or other health sciences, it is designed to engage students in history, sociology, philosophy, Africana studies, gender and sexuality studies, and general humanities who would like to develop a deeper understanding of why health disparities in the U.S. are so persistent and pervasive and of efforts to advance health justice.

LIS 2140 - CRITICAL LIBRARIANSHIP AND INFORMATION PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

Critical librarianship refers to the movement within libraries to reflect upon the libraries' role in hegemonic structures, and to empower community members to disrupt these systems. Critical librarianship is concerned with issues of social justice, intersectionality, privilege, power, and systems of

oppression. It is influenced by critical race theory (CRT), queer theory, disability theory, intersectional feminist theory, and critical pedagogy, among others. In this course, we will explore how critical librarianship can allow us to interrogate the systems and structures of the library in order to seek justice in our communities.

Academic Career: Graduate

LIS 2184 - INTELLECTUAL PROPERTY AND "OPEN" MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

Concepts, legislation, and case law about censorship, freedom of access to information, privacy, copyright, professional liability, and other issues. Legal implications and safeguards. Origins, development, evolution, and pivotal role of copyright, fair use, and related issues within 21st century information, legal, policy, and economic framework. Key and emerging issues such as public domain, orphan works, section 108 exceptions for libraries and archives, licensing, recent statutory legislation and case law, and international copyright. Alternative protection schema, such as open access and creative commons.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2188 - OPEN GOVERNMENT DATA AND INFORMATION: CONCEPTS, STANDARDS, AND IMPACT

Minimum Credits: 3

Maximum Credits: 3

This course introduces participants to "open data," a term that is assigned to data that are free to access and use, that are available in machine-readable formats, that can be reused for any purpose, and that can be modified and shared by others. Globally, we see conversations about open data in research, with growing expectations and requirements to share research data, and in government, with policies and initiatives to expand public access to datasets. This course will focus on this second category of open data: data produced and shared by government and civic organizations. This course will overview the historical precedents to the open data movement, survey current policies at different levels of government, and examine key concepts in the open data movement. While we will focus on drivers and initiatives in the United States, we will look at case studies that will provide us with a broader understanding of what is happening worldwide. The focus of this course will be the core information skills and principles that underpin the success of open data initiatives and the mechanisms and standards in which governments at all levels in the United States are employing to publish data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2194 - INFORMATION ETHICS

Minimum Credits: 3

Maximum Credits: 3

An examination of the intersection of information, technology, law, ethics, and policy in the digital age. Topics explored include privacy and surveillance; intellectual property; open access and open data; intellectual freedom and censorship; cybersecurity and information security; information accuracy and disinformation; cyberbullying and social media issues; and big data and data collection, sharing, and preservation. Examination of issues related to ethical research conduct, access to information and digital divides as well as of ethical issues of a more general nature, such as integrity, equality, accountability, civil discourse, conflicts of interest, transparency, respect, dignity, and inclusion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2220 - ARCHIVES AND RECORDS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Introduction to the essentials of records management in diverse organizational settings and in society. Organizational theory and how this relates to the history and development of record-keeping systems, electronic-records management and the advent of new technologies, and the place of records management in the information professions. Theoretical principles, methodologies, and practical administration of archives, records, and other information sources from print to oral contributing to the management of evidence and information necessary for organizations and society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2222 - ARCHIVAL APPRAISAL, DESCRIPTION, AND ACCESS

Minimum Credits: 3

Maximum Credits: 3

This course is organized in three parts and will provide students with an introduction to the critical archival responsibilities of archival appraisal, description, and access. In the first section of the course, we will engage with archival appraisal. The archivist's process in determining continuing value affects all other archival functions and impacts individual, organizational, and societal memory. Because of its significance for both archival work and society, appraisal has been the function most debated and subjected to experiments with new methodologies and theoretical models. This course will survey these models and, through an experiential project, delve deeply into one model in particular: documentation strategy. 1 Representing archival materials and providing access to them are core functions of the archival profession. Archivists do this with access systems that incorporate descriptive standards, data structures, controlled vocabularies, and increasingly, digital tools. The ways in which archives are described and represented influence the ways that users, such as historians, lawyers, and policymakers access, engage with, and understand the historical record. In the second section of this course, students will engage with archival descriptive standard and archival management systems, as well as debates and theories in the representation of information. Finally, we'll consider strategies for raising the level of access for an archival collection, paying particular attention to the creation of digital exhibits.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2220

LIS 2231 - COMMUNITY ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

Communities of all kinds create records, but not all communities have traditionally been represented in institutional archives, nor included in the process of establishing and maintaining archival collections that document their experiences. This course will draw from archival scholarship and recent case studies to introduce students to a range of models, including grassroots community archives, community-created archives that have been acquired by formal archival institutions, and partnerships between communities and archivists. Throughout this semester, we will engage with a range of topics relevant to community archives, including participatory and post-custodial archives, outreach and advocacy, grant writing and fundraising, and community-based, collaborative research methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2323 - RESOURCES AND SERVICES FOR YOUNG ADULTS

Minimum Credits: 3

Maximum Credits: 3

Critical assessment of resources (contemporary books, periodicals, video/film, games, and other digital formats, social media, web sites, tools, and apps) of interest and importance to young adults. Services and programming to encourage young adults and those who work with young adults to use these resources as both creators and consumers. Intellectual freedom issues and handling challenges to intellectual freedom.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2324 - HISTORY OF CHILDREN'S LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to literature for children from the Anglo-Saxon period in England through the 19th century in England and America. Emphasis on social and cultural history as reflected by literature for young people.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2325 - CURRICULUM RESOURCE AND SERVICE/SCHOOL LIBRARY

Minimum Credits: 3

Maximum Credits: 3

Integration of library media center collections and services into the curriculum. The teaching roles of the school library media specialist.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2326 - STORYTELLING AND PROGRAMMING FOR YOUNG PEOPLE

Minimum Credits: 3

Maximum Credits: 3

Storytelling in library and education settings, including history, sources and selection, ethics, development of stories for telling, and performance techniques. Also includes planning, implementing, and evaluating storytime and children's programming.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2329 - LITERACIES AND LIBRARIES

Minimum Credits: 3

Maximum Credits: 3

This course examines literacy instruction, promotion, and support for individuals and families according to the responsibilities and vantage point of the professional librarian. Most of the coursework focuses on public library, academic library, and school library contexts, including library services and outreach for immigrant communities and special populations (the latter as defined by ALA). Assignments and discussions can be differentiated to more specifically include literacy instruction opportunities in other library and information settings. Instructional methods include reading discussions and reflections, problem-based learning, and performance tasks. Students are not expected to "be" a reading or writing teacher before, or following, their participation in this course, although learning objectives include developing an understanding of the stages and development of reading in order to inform work that librarians are qualified to do. Teaching reading to children, young adults, and/or adults is a specialized profession, and the requisite, in-depth skill development and practicum experience (student teaching/internship/clinical) are outside the scope of this course. Our purview in the literacy arena does, however, include planning literacy-focused programs and events and selecting and applying strategies to teach or facilitate reading and reading instruction in the library. These competencies include readers advisory and bibliotherapy; modeling, teaching, and guiding information literacy skills and additional forms of literacy; and supporting students' or patrons' literacy needs in digital texts, multimedia, and e-reading. Students will read and discuss research on reading, literacies, and reading instruction, and study the work and resources of professional organizations involved in reading and literacies and guiding information literacy skills and additional forms of literacy; and supporting students' or patrons' literacy needs in digital texts, multimedia, and e-reading. Students will read and discuss research on reading, literacies, and reading instruction, and study the work and resources of professional organizations involved in reading and literacies

Academic Career: Graduate

Course Component: Lecture

LIS 2332 - RESOURCES AND SERVICES FOR ADULTS

Minimum Credits: 3

Maximum Credits: 3

Survey of materials in a variety of formats of interest to and importance for adults, with an emphasis on popular resources, utilization of resources and program development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2407 - METADATA

Minimum Credits: 3

Maximum Credits: 3

Principles and application of metadata for networked information resource organization, representation, retrieval, and interoperability using a variety of schemes and tools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2500 - REFERENCE SOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Survey and application of tools (paper and electronic) needed to respond to questions in the changing reference environment. Discussion of philosophies and theories underlying the practice of general reference. Introduction to subject reference tools and services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2520 - COLLECTION DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines the principles and practices involved in the development and management of library collections in all types of libraries with

emphasis on processes for identifying user needs and methods of selecting, acquiring, and evaluating materials in all formats. This course is designed to provide students with an overview and understanding of the key functions of collection development and how these functions are integrated into the library workplace.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2537 - GOVERNMENT INFORMATION RESOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

The American political environment and its impact on the availability and control of information emanating from the federal government. Consideration and analysis of federal government materials in many formats.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2585 - HEALTH CONSUMER RESOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Collection development, reference, and educational services in the domain of consumer health resources in print, non-print, and electronic formats. Identification of appropriate and accurate resources for consumer health and family education; policy issues in providing consumer and family health information in different settings; role of public media; and information and referral services to and from healthcare organizations, community agencies, and public libraries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2671 - DIGITAL HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to study, critique, and engage in the production of digital humanities scholarship. Students in this course will examine how information professionals, are situated within this area of academic inquiry as researchers, collaborators, and stewards. A range of digital humanities projects and digital tools, including the potential uses of each in library and archival settings, will be explored. This course is designed to be interactive, collaborative, and hands-on, incorporating aspects of academic seminars and studio-based workshops. Over the course of the semester, students will complete on their own individual projects, using digital tools to investigate research questions, periodically providing feedback to one another and reflecting on their own processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Sch Computing and Information

LIS 2672 - TECHNOLOGIES AND SERVICES FOR DIGITAL DATA

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to prepare students to work creatively and productively in digital environment. With the focus on the technologies and services around digital data in web information context, this course includes the development of theoretical knowledge and a practical understanding of digital data. Taking a social-technical perspective, this course will help students to develop a broad understanding of digital data rather than solely view digital data as technical achievements. The course consists of three broad modules: overview of digital data, technologies supporting the life cycle of digital data, and services built around digital data in current networked participatory daily and professional environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2674 - PRESERVING DIGITAL CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course is divided into two sections. First, we delve into fundamental concepts and principles of digital preservation, studying what the Library of Congress's Trevor Owens terms "the theory and craft of digital preservation." We will consider standards, strategies, and tools that librarians, archivists, data curators, and information professionals broadly employ to ensure long term availability of digital materials. We will view digital preservation as a spectrum, using the National Digital Stewardship Alliance's (NDSA)"Levels of Digital Preservation" as a means to understand the ways that and the extent to which an organization may implement a preservation strategy. The NDSA Levels of Digital Preservation will serve as a framing for our discussions on file formats, storage and repositories, and file fixity. This first section of the course will involve lectures, discussion, and tool labs. In the second section, we will conduct a deep dive into complex digital object types and probe the strategies, systems, and ethical/legal issues surrounding the curation of this sample of materials: social media, websites, email, and software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2678 - DATA SCIENCE FOR LIBRARY AND INFORMATION PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to data science for library and information professionals so they can participate in the emerging ecosystem around data science. This course will survey the landscape of data science and explore the role library and information professionals play in the evolving ecosystem of academic and industrial data science. In the course, students will learn the concepts, practices, and technologies of data science, both within academia and industry. It will provide students with hand-on experiences as well as critically exploring how librarians and information professionals can work and provide value in data-adjacent roles. Topics include data collection, cleaning, analysis, and visualization. There are no technical requirements for this course, but students should be prepared learn about and use various technical tools and ideas related to data science.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2680 - DATABASE DESIGN AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Characteristics and concepts of database systems; database development process, including entity-relationship model, relational database models, normalization, structured query language (SQL), basics of transaction management and physical database design; current database technologies; and database applications in libraries and archives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2690 - INFORMATION VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2700 - MANAGING AND LEADING INFORMATION SERVICES

Minimum Credits: 3

Maximum Credits: 3

Managing and leading libraries and information services, one of the required core courses for the MLIS degree, focuses on key management theories and practice-based competencies in preparing students to be successful, service-oriented managers and leaders at all levels of diverse organizations. Students in this diversity and inclusion 'infused course will develop understanding of important skill sets and management and leadership domain areas, such as communication; strategic planning; core values and organizational culture; leading productive meetings; managing people, money, facilities, conflict, and change; legal and ethical issues; collaboration and partnerships; marketing and public relations; and professional development. Guest speakers representing different types of libraries, as well as other institutional settings, will provide students with exposure to varied management and leadership styles and perspectives. Individual and group assignments, course content and case studies from non-profit and for-profit sectors, readings, podcasts, and in-class and online discussions will examine emerging trends, challenges, and opportunities for 21st century information center managers and leaders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or ; EXCLUDING SBPLAN: Archives and Information Sci (MLISAIS-SP); School Library Cert Program (MLISLCP-TR); MLIS Fast Track School Lib Cer (MLISFTL-TR)

LIS 2771 - ACADEMIC LIBRARIES

Minimum Credits: 3

Maximum Credits: 3

The environment of academic libraries has changed radically since the 1990s with rapid advances in technology, developments in higher education and innovations in scholarly communication. The fundamental purpose of academic libraries has not changed, but traditional jobs have given way to self-service and professional roles have evolved into complex specialties. This course explores the challenges and problems facing academic libraries today, examining their resources, services, facilities and staffing, with reference to historical contexts and future directions. It will cover traditional and emerging practices in areas such as academic liaison, information literacy, research support, scholarly publishing, library assessment and career management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2774 - SCHOOL LIBRARY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Planning, providing, managing, and assessing library programs for students and teachers in elementary and secondary school libraries, including access, budget, collection, instruction in information and digital literacy, infrastructure, and technology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2830 - COMMUNITY ENGAGEMENT AND ADVOCACY FOR INFORMATION SERVICES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on community engagement through communication and advocacy for information services. This includes building relationships with the community, seeking funding, and communicating the library's value. Students will learn how to best implement outreach and marketing strategies - branding, merchandising, displays, social media, and programming - to reach an intended audience. Ultimately, this course emphasizes communication and outreach to engage the community in the life of the library/museum/archive/etc. to create a mutually-beneficial relationship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2850 - INFORMATION PROFESSIONALS ROLE IN TEACHING AND LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course prepares participants for formal and informal educational roles as teachers, trainers, and facilitators of learning for all age groups found in school, public and academic libraries, as well as those found in archives, museums, and other information service organizations. Topics covered include: teaching and training fundamentals; information literacies; learning styles; instructional strategies; managing large and small instruction programs; and delivering online instruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2901 - INDIVIDUAL RESEARCH 1

Minimum Credits: 1

Maximum Credits: 3

Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2902 - INDIVIDUAL RESEARCH 2

Minimum Credits: 1

Maximum Credits: 3

Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2921 - FIELD EXPERIENCE

Minimum Credits: 3

Maximum Credits: 3

Supervised work in a library, archive or other information service environment that provides a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in other courses. Agreement of faculty sponsor and field work supervisor required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2922 - PRACTICUM IN SCHOOL LIBRARY MEDIA PROGRAMS

Minimum Credits: 3

Maximum Credits: 6

Experience in a school library, under the supervision of a cooperating teacher librarian working collaboratively with teachers, teaching information literacy skills, providing services to students and teachers, and managing resources. Weekly seminars, individual coaching sessions, and other online written requirements focus on identifying best practices and using case studies to problem solve. Professional assessment; completion of SLCP portfolio of demonstrated competencies and electronic professional portfolio.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: SBPLAN: School Library Cert Program (Library & Information Science-MLIS) or LIS SLCP Certificate (Library & Information Science-AC) or MLIS Fast Track School Lib Cer (Library & Information Science-MLIS) or Special LIS (Not Candidate for Degree-ND)

Course Attributes: Hybrid

LIS 2970 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Courses offered on an experimental basis or as special topics seminars.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

Linguistics

LING 1000 - INTRODUCTION TO LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of general linguistics, emphasizing the theory and methodology of the traditional central areas of the field--phonetics, phonology, morphology, and syntax- with special concentration on phonological and syntactic theories and analytical techniques. The remainder of the course will be devoted to phonetics, morphology, historical linguistics, semantics and pragmatics, sociolinguistics, and psycholinguistics.

Academic Career: UGRD

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 2000 - THESIS RES FOR THE MA DEGREE

Minimum Credits: 1

Maximum Credits: 9

This course provides for individual work under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

LING 2010 - STATISTICS FOR RESEARCH IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

Students finish this course with a basic understanding of the reasoning behind the most common statistical tests and measures used in linguistics.

Students are able to use their knowledge to select, perform, and interpret statistical tests in both corpus-based and experimental research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2141 - TEACHING ENGLISH ACROSS CULTURES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to the ideologies and cultures of learning, teaching and living in countries where English is taught as a second or foreign language. The course will focus the roles of students and teachers, types of literacy, the role of gender, the influence of political and religious authority, educational policy, and classroom culture. We will also include the issue of identity, the construct of 'native speaker of English' and the 'non-native English-speaking' teacher.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

Minimum Credits: 3

Maximum Credits: 3

This course is intended to introduce current and prospective foreign and second language teachers to the various theories, approaches, issues, and practices employed in the teaching of English as a foreign or second language and, by extension, to other foreign language teaching as well. The course provides a broad overview of content in order to provide foundational knowledge of the field, and includes lectures, exams, and practical experience components.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: LING 1000 or 2144

LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce students to the design and development of materials and texts for the teaching of second languages. The course

is conducted as a seminar with student presentations on the various aspects of materials designed to teach language skills. Each student also presents a project prospectus that describes the purpose, descriptive objectives, operational objectives, concepts, and procedures for incorporating concepts into the materials. Students then prepare the materials (or part of them) and present reports on their projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2144 - RES METHODS IN APPLIED LING

Minimum Credits: 3

Maximum Credits: 3

This course will give a broad introduction to research methods for the study of non-native language development. Both quantitative and qualitative methods will be discussed for the study of as well as informal learning and acquisition processes. But some emphasis will be put on qualitative methods and on classroom language development. Occasional reference will be made to research strategies in sociolinguistics and psycholinguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2145 - TESTING & ASSESSMENT IN TESOL

Minimum Credits: 3

Maximum Credits: 3

This course presents an overview of testing and assessment techniques in TESOL. Students will learn about current language testing and assessment principles and instruments. The course will distinguish among different assessment types and purposes, including standardized tests and classroom assessments. Students will have the opportunity to create and critique a variety of assessment tools and examine the benefits and drawbacks of alternative assessments. Students will also evaluate a variety of language testing instruments with regards to their usefulness, validity, reliability, practicality, inter-activeness, and washback effects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LING 2146 - SECOND LANGUAGE ACQUISITION

Minimum Credits: 3

Maximum Credits: 3

This course will deal with second language development from a linguistic and psychological, rather than from an educational point of view. Both the influence of linguistic theory on second language research and the importance of second language data for linguistic theory will be discussed. Second language development in children as well as adults will be described, and frequent comparisons will be made with data from first language acquisitions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LING 1000

Course Attributes: Global Studies

LING 2150 - LANGUAGE LEARNING AND TECHNOLOGY (CALL)

Minimum Credits: 3

Maximum Credits: 3

This course seeks to provide students with an understanding the benefits and limits of technology in instructed SLA. It will familiarize students with the most current language technology programs and apps and distinguish among different technology types and purposes. Students will also understand web-based technologies for delivering instruction and assessment (e.g., Canvas, Quizlet, the iBT and Accuplacer). The course will also examine the benefits and drawbacks of communication through technology: synchronous and asynchronous interaction, and on line language tutors. It will also review and evaluate: (i) how to integrate technology into the classroom as a mediational tool; (ii) games for language learning; (iii) Social Media in Language Learning: (Facebook, Twitter, Snapchat, Instagram).

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2195 - PRACTICUM ESL TEACHING

Minimum Credits: 1
Maximum Credits: 3

The requirements of the practicum may be fulfilled by supervised teaching either in the English language institute or in its informal ESL course (for at least 15 contact hours). Teachers are required to attend orientation and training meetings, be observed in class, attend post-observation discussions, and provide an evaluation of the curriculum.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

LING 2235 - LANGUAGE, GENDER AND SEXUALITY

Minimum Credits: 3
Maximum Credits: 3

The course considers the ways in which linguistic patterns are sensitive to the social categories of gender and sexuality, including intersectional categories such as race, class, and age, and the role of power and privilege in these patterns. The main questions considered are: How does language categorize the gender/sexuality world in both grammar and interaction? How do speakers display, create, and orient to gender, sexuality, and desire in interaction? How and why do people display different ways of speaking based on their gender/sexual identities?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

LING 2253 - PIDGIN AND CREOLE LANGUAGES

Minimum Credits: 3
Maximum Credits: 3

This course surveys the new languages that have sprung up in various parts of the world and under various historical circumstances when people who speak different languages come into contact with each other. These contact languages are called pidgins as long as they are spoken only as second languages, and creoles if they become the main language of a speech community. This course focuses on the major structural, social, and historical features of pidgins and creoles.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2267 - SOCIOLINGUISTICS

Minimum Credits: 3
Maximum Credits: 3

This is an introductory course in the social aspects of language. The course is divided into three parts: (1) linguistic competence; (2) communicative competence; and (3) language policy, which deals with implications of earlier topics when applied to society.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

LING 2270 - ADVANCED SOCIOLINGUISTICS

Minimum Credits: 3
Maximum Credits: 3

This course is a continuation of LING 2267, Sociolinguistics. This course will focus on topics selected by students' particular interests and these topics will be covered in depth.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

LING 2274 - LANGUAGE CONTACT

Minimum Credits: 3

Maximum Credits: 3

This course examines the effects of language contact on the structure of the involved languages. We will investigate a variety of language contact situations and the ways in which varying degrees of intensity of contact lead to differing degrees of interference between linguistic systems. Topics include: language contact as a cause for linguistic change (loan words, phonological and other structural change); typologies of language contact (substratum, sprachbund); bilingualism in the individual and the bilingual community (social dialects, diglossia); the emergence of new languages through contact (regional versions of standard languages, pidgins and Creoles).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 1253 or 2253 or 2267

LING 2330 - INTRODUCTION TO COMPUTATIONAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce students in linguistics to the foundations and real-world applications of computational linguistics. Students will learn how core aspects of human language—words, morphology, grammar, and meaning—are represented and processed computationally. They will also be introduced to the challenges of real-world language engineering problems and discover how the latest language technologies and artificial intelligence systems seek to solve them. Many practical applications will be covered: search, document classification, spell checking, machine translation, corpus exploration, and more. Throughout the course, there will be a big emphasis on hands-on training; students will work extensively with popular natural language processing platforms. NOTE: The Python prerequisite (CS 8, 10-12) can be waived upon proof of Python knowledge. Please email the instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: CS (0008 or 0010 or 0011 or 0012) with grade of B or better

LING 2340 - DATA SCIENCE FOR LINGUISTS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LING 2391 - PHONOLOGY OF SPANISH

Minimum Credits: 3

Maximum Credits: 3

This course provides a description of Spanish sounds (vowels, diphthongs and consonants in all their allophonic realizations), and prosodic features (stress and intonation) in light of current phonological theories. Special attention will be paid to syllable structure, as well as different phonological processes such as assimilation, dissimilation, and epenthesis. The relationship between phonology and other components of the grammar (in particular morphology and syntax) will also be dealt with.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

LING 2394 - SPANISH DIALECTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course looks at varieties of Spanish from different perspectives: regional, social, and stylistic. Phonological, morphological, syntactic, and lexical variation will be taken into account. Special attention will be paid to heritage Spanish, creoles, language contact, as well as the diachronic sources of regional differentiation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

LING 2397 - SPECIAL TOPICS IN HISPANIC LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course aims to cover a number of topics which are presently under discussion in the field of Hispanic linguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 4

This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (Indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethno semantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LING 2579 and 2773 and 2777

LING 2578 - PHONETICS AND PHONEMICS

Minimum Credits: 3

Maximum Credits: 3

Intensive analysis of the sounds of speech, giving special attention to organs involved in the articulations of speech sounds and auditory discrimination. Students will obtain grounding in practical phonetic skills. Concepts of phoneme, features, abstractness in addition to grammatical theory regarding descriptive phonology will be introduced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2579 - PHONOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the principles of phonological analysis and theory. After a brief survey of the roots of modern phonology in Prague school and American descriptivist ('classical phonemic') theories, the main focus of the course will be on generative phonology. Both in and out of class, students will be expected to solve phonological problems and construct theoretical arguments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 2578

LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course is a "nuts and bolts" description of the lexical and syntactic structures of English. An attempt will be made to provide students with a thorough grounding in traditional grammar, while, at the same time, presenting insights and explanations from a transformational-generative perspective. The class is designed for English language teachers- either those who are teaching it in American school systems or those who wish to teach EFL. Lecture format with class discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 1000

LING 2761 - DISCOURSE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Many aspects of language cannot be handled adequately in sentence grammars. Although these aspects arguably pertain to a separate area of study, the fieldworker or student of language in context must not avoid them. This course studies discourse in a number of languages, from formal and functional perspectives. Discourse will be shown to provide rich insights into language and culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2773 - MORPHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Morphology, the study of words, is interrelated with the syntax, the phonology, the lexicon, and semantics. The purpose of this course is to develop operational competence, through problem solving and discussion, in the major aspects of morphological theory. Theoretical issues to be addressed will include lexical phonology, prosodic morphology, morphology and logical form, morphology and valence alternations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Latin American Studies

LING 2777 - SYNTACTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction, stressing understanding of theoretical concepts, to the transformational generative approach to English sentence structure. This approach uses formal rules to produce sentences, and to explain how they are composed of phrases. The first part of the course concentrates on mechanical manipulation of systems of rules, aiming to acquaint the student with how the rules work. The second part concentrates on how syntacticians use evidence about a language to support or disconfirm their theories.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2820 - LINGUISTICS IN THE LAB

Minimum Credits: 3

Maximum Credits: 3

This course is a bit different from other linguistics courses in that it is not focused on a particular subject area of linguistics, but rather an approach to doing linguistics: our goal is to learn how to think about, design, and implement a basic experiment. We will touch on a variety of topics that will be familiar from other courses: semantic representations, phonemic categories, sociolinguistic identity and stereotyping, and syntactic constituency.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

LING 2860 - INTRO TO HISTORICAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

A survey of the principles and methods of historical linguistics; practice in the basic techniques of historical linguistic research. The major topics to be studied are the analysis of sound change, analogic change, contact-induced language change, the relationship between variation (regional and social) and language change, the comparative method, and internal reconstruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

LING 2900 - LINGUISTICS CONSULTING/INTERNSHIP: CONNECTING LINGUISTICS TO THE COMMUNITY AND INDUSTRY

Minimum Credits: 1

Maximum Credits: 3

Humanities subjects have many practical applications outside of academia, yet our students do not feel confident in effectively selling themselves in today's STEM-saturated job market. It is crucial to prepare humanities students to take advantage of growing opportunities in the region. It is equally imperative other organizations realize the potential contributions of humanities to their projects. Preparing students for versatile careers is especially important in light of changing trends in employment. Teaching them skills like creativity, critical thinking and collaboration will serve them in almost any job they pursue (NAS, 2018; Harper, 2018). Through this internship program, we desire to enhance the visibility of the humanities and its important connections with several disciplinary areas across the University, foster collaborative work in research, education, clinical services and other areas of study and to strengthen connections with the wider community in Pittsburgh and beyond. At the same time, it is an opportunity to enrich the humanities and outline the diverse ways in which humanities, and linguistics in particular, can in fact help us navigate the new reality of our digital age and more.

Academic Career: Graduate

Management Information Systems

BMIS 2034 - INFORMATION TECHNOLOGY GOVERNANCE

Minimum Credits: 3
Maximum Credits: 3

In this course, we will examine issues associated with information systems planning activities (designing, assessing, budgeting, managing, and maintaining) that are often associated with a firm's ability to apply information systems and technologies in the creation of business value, customer satisfaction, supply chain management, and operational cost reductions; while supporting the continuous drive for product innovation & enterprise growth. Through a combination of readings, class discussions, presentations, and hands-on projects, the students will learn about information systems planning practices and management efforts to better understand the organization's information systems strategic needs, define the systems requirements, acquire, build, and deliver the desired information system solution; plan the systems sustainment needs, and actively plan for future changes. Additional interrelated topics within the (ICT) Information and Communications Technology planning process will be discussed (systems acquisition & sourcing, ICT Supply Chain Risk Management, Vendor Management, Governance, Capital Project & Portfolio Management, decision making mechanisms, standard setting, and the ethical use of information) with the purpose to provide greater insight into the 'why and how' business leaders continuously evaluate and manage their information systems & technology capital investments.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2053 - DESIGNING THE USER EXPERIENCE

Minimum Credits: 3

Maximum Credits: 3

Designs are all around us. Most visible are apps and websites, which offer a user experience that might fall short of what users expect or what the creators intended. As a result, firms of all types have encountered pressures to improve the user experience. Organizational practices should be adopted to make sure designers and developers take into account theories and practices developed over the last half-century. There are tools for gathering requirements, achieving a usable first draft, and testing and improving upon that draft. Several assignments will make such processes of design more vivid. An early project will evaluate usability of what the student considers a poor website or app. A sequence of additional assignments will focus on improving the user's experience of the site or app, justifying a change, and evaluating the results. A final project presentation will "pitch" the design changes to management, examining benefits and costs of the improvements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2056 - MGT INFORMATION SYSTEMS PRACM

Minimum Credits: 3

Maximum Credits: 3

The objective of the practicum is to give the student information systems experience in an actual organizational setting. Examples of areas for internships are: Systems Analysis and design; Programming and Implementation; Problem Definition and Documentation; marketing and needs analysis, education and training. A project proposal is prepared by the student that, when approved by both a faculty advisor and a corporate supervisor, becomes the formal agreement to complete the project.

BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS

Minimum Credits: 1.5

Maximum Credits: 1.5

This online course examines the advantages and complexities of ERP software within the context of global SCM and demonstrates how the system can improve processes and streamline operations. The course progresses through seven experience-based-learning Modules. Each Module includes both a synchronous class session, and asynchronous individual work. The synchronous sessions are focused on the execution of an ERP Simulation where teams of students complete with one another to operate a make-to-stock company that sells a product to a European market. The asynchronous portion of the class allows students to work at their own pace to learn the how ERP systems automate and integrate SCM business processes including hands-on execution of end-to-end business processes in the SAP ERP system; and completion of quizzes and exams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS

Minimum Credits: 1.5

Maximum Credits: 1.5

The main objective of this course is to lay a foundation for business students to develop computational thinking and analytics skills. Computational thinking involves solving problems by formulating them clearly and systematically so that we can effectively leverage the power of computational tools and models. It is increasingly being recognized that computational thinking and programming are fundamental skills for everyone, not just for students interested in technology careers. Adopting a learning-through-examples approach, the course focuses on developing fluency with computational concepts and programming in a business context. Students will learn the fundamentals of computational thinking and apply them using Python and R programming languages as well as other menu-driven applications such as Excel, Rapid Miner, and Tableau. An additional pedagogical objective of the course is also to pave a path for students to build on the fundamental skills and proceed with confidence to advanced data analysis and machine learning workflows using various open-source libraries available in the Python and R ecosystem. This is an extensively hands-on course, and major components of students' grades are based on their individual submissions for the course's assignments and projects. No prior programming experience is required to enroll in the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

BMIS 2409 - INFORMATION SYSTEMS

Minimum Credits: 2

Maximum Credits: 2

.How does information technology enable the business? How does it provide business value? This course provides an overview of information technology and its application in a business. By simultaneously examining business cases and the capabilities of relevant technologies, students will develop an understanding of how information technology supports and enables business strategies, innovation, and improved business capabilities and processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Minimum Credits: 3

Maximum Credits: 3

Participants in Enterprise Systems and Integration of Business Processes course will gain extensive theoretical knowledge of Enterprise Resource Planning (ERP) systems. The theoretical knowledge is practically implemented and deepened through hands-on exercises using the 11 modules of the

SAP S/4HANA system. This immersion course is designed to prepare students for the online SAP TS410 Certification Exam which will be completed during the last day of class. All students are required to take the SAP TS410 Exam Certification exam. Students who pass the exam will receive the "SAP Certified Application Associate - Business Process Integration with SAP S/4HANA" credential from SAP, which is widely acknowledged in business. The University of Pittsburgh, as an active member of SAP's University Alliances program, is qualified to offer the SAP TS410 course to its students. Further, the SAP specific knowledge gained through this course is readily transferrable to other commercial, off-the-shelf, ERP software systems (such as Oracle eBusiness Suite). No computer programming background is required.

Course Requirements: Katz Grad School of Business students only.

BMIS 2525 - CURRENT ISSUES IN COMPUTING

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will cover current and future hardware and software technologies that can be useful in business at the organizational, group, or individual levels. Two opposing points of view will be used: from the top-down (what technologies can serve a given industry?) and the bottom-up (what industries can benefit from a given technology?). The particular industries and technologies to examine will be chosen by students. Discussion, student research, and presentations will form a large part of class sessions. Two main projects (top-down and bottom-up) and two case analyses are required. Brief lectures will provide some useful resources for conducting research on future technologies and case discussion will balance out the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Minimum Credits: 3

Maximum Credits: 3

Data science skills are highly valued in the job market and most businesses are heavily investing to develop their analytics capabilities. This course adopts an experience-based learning approach and introduces the practice of data science to Katz graduate students. The course will emphasize the acquisition of skills such as (1) the use of a programming language (R, Python, etc.) to assemble, clean, and analyze data sets, (2) analytical and text-processing procedures for answering business questions, and (3) visualization and presentation of data-driven results for evaluation of business goals. The primary mode of learning will be through hands-on exercises involving real-world data used to make business decisions. For example, students will make use of the datasets and scripts used in data science competitions (e.g., Kaggle). Although no prior programming experience is required to enroll in the course, students should expect intensive out-of-class readings and practice sessions to get the most out of this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401

BMIS 2527 - PRIVACY, SECURITY AND ETHICAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course requires students to investigate ethical issues that emerge around the use of Information Systems. The focus of the course is to provide awareness, emphasis and analysis of important issues as they are related to Information Systems and Computing, such as ethical use of technology, data protection, cloud computing, cyber security, privacy, the digital divide, social media, intellectual property, whistleblowing, professional codes of conduct, emerging technologies, professional liability, internet freedom in computing, international laws and governance, and other selected topics. Emphasis is placed on the study of ethical situations and responsibilities of IS professionals around current and emerging technologies in a global setting. By studying current issues, cases and applying real world application through active learning techniques, students will gain a greater awareness of the ethical, social, and legal structure around their technology driven environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BMIS 2537 - BUSINESS SYSTEMS PLATFORMS

Minimum Credits: 3

Maximum Credits: 3

Platforms such as Amazon, Google, LinkedIn, Uber, Yelp, and others surround us. This course introduces the technology tools, economics principles, and statistical and analytical tools that platform managers use to make decisions. In the technology module, the course introduces cloud computing and application programming interfaces (API), esp., machine learning APIs widely used by platforms. Labs supplement lectures and provide hands-on experience. In the economics module, the course starts with underlying concepts such as network effects, and then builds to cover platform architecture, launch, monetization, metrics, and strategy. Finally, in the statistical and analytical tools module, the course introduces causal analysis and covers the statistical analyses of randomized trials, an increasingly used managerial tool in platform companies.

BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course introduced basic data science concepts behind turning data into actionable insights and knowledge. In addition, the course will emphasize the development of necessary programming skills needed for doing data science. Students will learn and use the Python programming language along with a focus on learning applied statistical inference, machine learning, data visualization, text analysis, and social network analysis techniques. The course takes a hands-on approach and no prior programming experience is expected. This is a required course for students interested in pursuing the Katz Data Science specialization. Follow on courses include Practical Data Science (BMIS 2526) and Advanced Topics in Data Science (BMIS 2543)

BMIS 2591 - E-BUSINESS STRATEGY

Minimum Credits: 1.5

Maximum Credits: 1.5

This course focuses on strategic decisions that must be made in e-business, and makes use of tools such as lectures, discussion, guest speakers, case analyses, and a required business plan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Minimum Credits: 3

Maximum Credits: 3

Expose students to concepts in technology innovation, markets for information technology goods and services, and adoption dynamics within organizations for new products and processes, and therefore should prove useful in a variety of student careers. Assignments emphasize written and oral communication skills. There is an opportunity for a self-selected project to customize the course to particular student interests. Skill acquisition and improvement goals for the course include case analysis, short analytic writing, technology research, and long-form writing. Technological innovation is the origin of what the economist Joseph Schumpeter termed the 'creative destruction' of capitalism (1942). This is the dynamic process by which prior technologies, and their accompanying industrial structures and associated leading firms, are replaced by successive generations of technologies. This is a constantly ongoing process that provides both opportunities for new entrants and threats to existing firms in the market. Students are likely to need a thorough understanding of this process throughout their professional careers. Topics typically covered include: innovation sources and management, s-curves and product life cycles, dominant design and paradigm shifts, disruptive and discontinuous innovation, innovation in design, network effects, standards, complementary goods, standards, intellectual property, partnerships, alliances, and value chain ownership, environment/government regulations, organizational assimilation of technology, and lead-user design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2681 - INFORMATION SYSTEMS SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the nomenclature, concepts, and applied techniques of information systems security. The technology module of the course will start with foundations, such as digitization, operating systems shells, host types, and networking concepts as they pertain to security issues. Individual labs will supplement the lectures to provide hands-on experience. The technology module covers applied cryptography in enough detail to equip managers with basic understanding to make sound decisions. The module then covers access control, attacks, malicious code and control, and monitoring and analysis. In the managerial module the course introduces students to risk, control and countermeasures, incident response, recovery, security administration and planning, and legal issues. Cases and guest lectures from business leaders augment the concepts learned in the course by showcasing their applicability in the real-world. This course can provide a solid start to students planning to take the Systems Security Certified Practitioner (SSCP), Certified Information Systems Security Professional (CISSP), or Certified Information Security Manager (CISM) credential. Students who have not taken the prerequisite BMIS 2588 but feel that they are sufficiently prepared should seek the permission of the instructor to enroll in the class.

BMIS 2811 - INFORMATION TECHNOLOGY AND BUSINESS VALUE

Minimum Credits: 3

Maximum Credits: 3

This required EMBA course introduces students to information technology, with an emphasis on employing it to maximize business value. Topical coverage will be broad, and will examine both processes and its products that executives encounter on a regular basis. After completing the course, students will be better able to communicate with its staff, understand how systems are developed, and evaluate the strategic implications of its decisions. Class sessions will involve lecture, discussion, and business case problem-solving. Outside of the classroom, students will make use of on-line resources, academic research, and case studies. Both written and oral communications skills will be tapped in frequent and focused case write-ups and class presentations.

MSE 2043 - ELECTRON MICROSCOPY IN MATERIALS SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, laue conditions, structure factor, ewald construction, double diffraction, twinning, kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2045 - ADV FERUS PHYSICAL METALLURGY

Minimum Credits: 3

Maximum Credits: 3

Phenomena related to non-metallic inclusions; influence of size, shape, and amount of inclusions on mechanical properties and property anisotropy; thermomechanical treatment of austenite; hot rolling as a thermomechanical treatment; hot rolling behavior of austenite in plain carbon and low alloy steels; grain size and texture control through thermomechanical treatment; relationship between thermomechanical treatment, microstructure, and mechanical properties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2046 - PHYSICAL METALLURGY ENGR ALLOYS

Minimum Credits: 3

Maximum Credits: 3

Property requirements of engineering alloys are discussed: strength, toughness, formability, weldability, fatigue resistance, corrosion/oxidation resistance. Review is made of pertinent phase diagrams, transformations, and microstructures in the fe-fe₃c and other alloy systems. Composition, processing, microstructure and properties of important structural steels, sheet steels, stainless steels, tool steels, aluminum alloys, titanium alloys, as

well as nickel based & copper-based alloys will be presented. Case studies, design problems & selection criteria are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2047 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE

Minimum Credits: 3

Maximum Credits: 3

This course offers a survey of micro-analytical, microscopy and diffraction methods that are widely used for the analysis of composition, chemistry, structure, scale and morphology of advanced materials. It introduces the most basic concepts required to understand experimental data obtained with these modern techniques. The main objectives of the course are to enable students to interpret and evaluate relevant data sets presented in the research literature and to identify experimental tools to solve a given Nano-research characterization problem. Some prerequisite basic knowledge of the structure of solid matter (e.g. Crystals and amorphous materials), diffraction methods (e.g. X-ray diffraction) and processing-property-structure relationships in materials is expected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2048 - ENGINEERING ALLOYS FOR CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence is offered: review of mechanical properties required of structural alloys; review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

MSE 2050 - GAS-METAL REACTIONS

Minimum Credits: 3

Maximum Credits: 3

Oxidation of metals, alloy oxidation, internal oxidation, effect of metallurgical variables on oxidation, reactions of metals and alloys with gases other than oxygen, hot corrosion, coatings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

An introduction to technical writing and oral presentation skills using Word, Powerpoint, Mendeley, InkScape and LaTeX.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MSE 2055 - PRIN OF SOLIDIFICATION ENGRNG

Minimum Credits: 3

Maximum Credits: 3

Study of fundamental phenomenon during the formation of crystalline materials. Delineation of the processing parameters that control crystal perfection, solidification substructure, grain size and shape, microsegregation, macrosegregation, microporosity, inclusions, mechanical properties, and physical properties. Application of fundamental principles to the processing of single crystals, ingots, castings, and composites.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2061 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION, AND WEAR

Minimum Credits: 3

Maximum Credits: 3

Tribology is the study of sliding surfaces. This course will cover fundamental topics in tribology relating to surface characterization, surface roughness, adhesion, friction, lubrication, and wear. Students completing the course will be able to describe the theoretical origins of these topics, which relate to mechanics, materials science, and chemistry. They will also be able to apply tools to solve novel problems in these areas. The course will especially emphasize applications in nanotechnology and biology. Students who do not have a background in solid mechanics should contact the instructor before enrolling in the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQS: UGRAD: ENGR 0022 or MEMS 0023 or ENGR 0145 or Consent from Instructor; GRADS: ME 2003 or MSE 2036 or BIOENG 1633 or Consent from Instructor; PLAN: ME, MSE, BioE Graduate Students. All other students will need permission from the instructor

MSE 2065 - MATERIALS DESIGN

Minimum Credits: 3

Maximum Credits: 3

Alloy manufacturing has been improved over the last 50 years with many new technologies developed. This course introduces several advanced manufacturing of advanced alloys. The methods introduced in this course include alloy casting, additive manufacturing, rapid solidification, powder metallurgy. However, rather than exclusively introducing the techniques themselves, the course particularly focuses on the metallurgical fundamentals of these manufacturing techniques. The materials design concepts and methods will be introduced, and design principles with the process-structure-property-performance relationships for these manufacturing techniques will be emphasized. The course will also cover major contents as below: 1. Fundamental metallurgical concepts for alloy design and manufacturing 2. Materials design principles and methods 3. Casting, welding, and their metallurgical design aspects 4. Powder metallurgy and their applications 5. Alloy 3D printing and its optimization 6. Computational simulation of advanced manufacturing 7. Microstructure engineering for advanced manufacturing 8. Future manufacturing of advanced alloys Each lecture will cover two weeks of class. About 16 weeks are planned for this course. The course will further develop some design projects for students to accomplish.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; rate processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2072 - CERAMIC PROCESSING

Minimum Credits: 3

Maximum Credits: 3

The course is focused on powder processing of ceramic materials. It is arranged according to the steps in processing, starting with powder synthesis and characterization, proceeding through the commonly used powder forming methods and finally to the high temperature sintering of the product.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2073 - CERAMIC MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2084 - INTRODUCTION TO POLYMER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic concepts of polymer science. Kinetics and mechanism of polymerization, synthesis and processing of polymers. Relationship of molecular conformation, structure and morphology to physical and mechanical properties. Structural and physical aspects of polymers. Molecular and atomic basis for polymer properties and behavior. Characteristics of thermoplastic and thermoset polymers for single and multicomponent systems. Understanding of the viscoelastic and relaxation behavior of single and multicomponent systems. Thermodynamics and kinetics of transition phenomena. Structure, morphology and behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2085 - SUSTAINABLE MATERIALS PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the use of global resources in the production of the most heavily consumed materials in manufacturing and construction. For each of these materials the production process will be described starting with the resources from which they are derived and ending with the needs of the manufacturing or construction process in which they are used. The material life cycle and materials eco-selection criteria will be used to highlight end-of-life issues and how the sustainability of materials production may be improved. The use of strategic minerals in materials production will also be highlighted. Finally, renewable materials will be introduced and the prospects for their widespread use in materials production considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Prerequisites: ENGR 0022 or MSE 2067

MSE 2088 - POWDER PROCESSING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Powder processing is widely practiced in the traditional powder metals and ceramics industries as well as in additive manufacturing. This course will review these applications and focus on the underlying materials science and engineering employed in: production of metals and ceramic powders, powder characterization methods, the forming methods used to make shapes from metal and ceramic powders as well as sintering and heat treatment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2090 - CORROSION AND FAILURE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course covers the principles of corrosion and the analysis and prevention of failures. The initial part of the course covers the thermodynamics of corrosion reactions, metallurgical aspects of corrosion, and the various mechanisms of corrosion. An in-depth study is then made of modes of failure and corrosion-assisted failures. Guidelines are given for the prevention of corrosion through the use of coatings, selection of materials, and design improvement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: MSE 2067; PROG: Swanson School of Engineering

MSE 2096 - MS/MBA INTEGRATED PROJECTS COURSE

Minimum Credits: 2

Maximum Credits: 2

This is the integrated projects course for MS/MBA majors. The project will be jointly overseen by Katz and SSOE. A 1-2 page proposal is due at the beginning of the term, followed by a final report. The project should blend the student's business and engineering skills.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

MSE 2110 - NUCLEAR MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

MSE 2111 - MATERIALS FOR ENERGY GENERATION AND STORAGE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2112 - NANOSCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSE 2113 - NANOSCALE MODELING AND SIMULATIONS:

Minimum Credits: 3

Maximum Credits: 3

This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2120 - INTRODUCTION TO ADDITIVE MANUFACTURING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This class is targeted toward students who want to learn more about additive manufacturing in general, different additive manufacturing techniques, and how they can be used to produce parts out of a large variety of materials. We will cover the general difference between subtractive and additive manufacturing, introduce and detail the advantages and disadvantages of energy beam based and non-beam based additive manufacturing methods, and discuss which materials can be additive manufactured. We will also describe as-printed microstructures and properties and their improvement through post-processing. Furthermore, elements of characterization, testing and qualification will be introduced. If circumstances permit, students will be able to tour the Additive Manufacturing Research Laboratory at the Swanson School of Engineering and potentially compare different AM methods in hands-on demonstrations

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2122 - FUNDAMENTALS OF MAGNETIC MATERIALS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will cover the fundamentals of magnetic properties of materials and will provide an introduction to a number of important applications. Classes of materials to be covered include elemental metals and metallic alloys as well as ceramics with an emphasis on ferromagnetic and ferrimagnetic material systems. Topics to be discussed in detail include quantum mechanical exchange interactions, magnetic anisotropy (shape, magnetocrystalline, exchange bias, induced, etc.), saturation magnetization, magnetostriction, temperature dependence of magnetic properties including statistical mechanics treatments of magnetic moment ordering.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

This course will review the fundamentals of boiling water reactor systems and operations as they apply to analysis, design, selection and application of power generation. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. With successful completion of the class students will understand how BWRs operate through the fundamental principals of reactor power flows and core flow

Academic Career: Graduate

Mathematics

MATH 0120 - BUSINESS CALCULUS

Minimum Credits: 4

Maximum Credits: 4

This course introduces the basic concepts of limits, continuity, differentiation, integration, maximization and minimization. Applications to the social sciences, especially business and economics, are stressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Minimum Credits: 4

Maximum Credits: 4

This is the first of a sequence of three basic calculus courses. It covers the derivative and integral of functions of one variable and their applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0032 (MIN GRADE 'C') or MATH 0200 (MIN GRADE 'C') or MATH PLACEMENT SCORE (76 or GREATER)

MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

Minimum Credits: 4

Maximum Credits: 4

This is the second of a sequence of three basic calculus courses. It covers the calculus of transcendental functions, techniques of integration, series of numbers and functions, polar coordinates, and conic sections.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220; MIN GRADE: 'C'

MATH 0280 - INTRO TO MATRICES & LINEAR ALG

Minimum Credits: 3

Maximum Credits: 3

The principal topics which this course will cover include vectors, matrices, determinants, linear transformations, eigenvalues and eigenvectors, and selected applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0220 or 0235 (Min Grade 'C')

MATH 0400 - FINITE MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the basic concepts of set theory, logic, combinatorics, Boolean algebra, and graph theory with an orientation towards applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

MATH 1180 - LINEAR ALGEBRA 1

Minimum Credits: 3

Maximum Credits: 3

This course stresses the theoretical and rigorous development of linear algebra. Major topics include the theory of vector spaces, linear transformations, matrices, characteristic polynomials, bases and canonical forms. Other topics may be covered as time permits.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0413 or MATH 0450

MATH 2000 - THESIS MS

Minimum Credits: 1

Maximum Credits: 15

This course is for students writing a master of science thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MATH 2010 - TEACHING ORIENTATION

Minimum Credits: 1

Maximum Credits: 1

This course prepares T.A.'S to teach mathematics at a University level.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

MATH 2020 - PROGRESS IN MATH

Minimum Credits: 3

Maximum Credits: 3

This course will deepen the students understanding of analysis through intensive training in problem solving followed by comprehensive study and dissection of the problems attempted. Students preparing for the analysis portion of the preliminary exam are strongly encouraged to enroll.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2030 - ITERATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Topics include matrix theory, matrix and vector norms, error analysis, factorizations, direct and iterative methods for solving linear systems, least squares and the algebraic eigenvalue problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2060 - COMBINATORICS 1

Minimum Credits: 3

Maximum Credits: 3

This is a graduate level course in combinatorics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2070 - NUMERCL METH IN SCI COMPUTING 1

Minimum Credits: 4

Maximum Credits: 4

This is an introductory survey course for non-numerical analysis students. It covers the underlying theory and computational aspects of numerical linear algebra. Topics include directional iterative methods, computation of eigenvalues and eigenvectors and least squares problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2071 - NUMERCL MATH IN SCI COMPUTING 2

Minimum Credits: 4

Maximum Credits: 4

This course is a continuation of 2070. Topics include numerical solutions of PDE's by finite differences and finite element methods also numerical differentiation and integration are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2090 - NUMERICAL SOLUTN ORDNRY DE

Minimum Credits: 3

Maximum Credits: 3

The topic covered is modern methods for solving initial value problems. This will include the basic theory and software implementations and numerical experiments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2245 - ALGEBRAIC NUMBER THEORY

Minimum Credits: 3

Maximum Credits: 3

In this course the theory of numbers will be algebraically, that is, as the study of algebraic numbers. Particular attention will be paid to the development of quadratic and cyclotomic number fields and to factorization theorems. Other topics include ideal theory and the work of Kummer and Fermat's last theorem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2301 - ANALYSIS 1

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to real analysis/measure theory and functional analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2302 - ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of math 2300 analysis 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2303 - ANALYSIS 3

Minimum Credits: 3

Maximum Credits: 3

This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of MATH 2300 analysis 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2304 - ANALYSIS 4

Minimum Credits: 3

Maximum Credits: 3

Analysis 4 is a new course that follows on from the analysis 1, 2, 3; especially analysis 2. Its focus will be complex and harmonic analysis. We will integrate this new material with the real, functional, complex and harmonic analysis of the previous three courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2370 - MATRICES AND LINEAR OPERATORS

Minimum Credits: 3

Maximum Credits: 3

Linear transformations on finite dimensional vector spaces are studied in a semi-abstract setting. The emphasis is on topics and techniques which can be applied to other areas, e.g., Bases and dimension, matrix representation, linear functional, duality, canonical forms, vector space decomposition, inner products and spectral theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2371 - MATRICES & LINEAR OPERATORS 2

Minimum Credits: 3

Maximum Credits: 3

Continuation of MATH 2370.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2500 - ALGEBRA 1

Minimum Credits: 3

Maximum Credits: 3

The basic concepts and results of group theory are developed with an emphasis on finite groups. Topics include: homo morphism theorems,

isomorphism theorems, Sylow theorems, permutation representations and hall's characterization of solvable groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2501 - ALGEBRA 2

Minimum Credits: 3

Maximum Credits: 3

In this course the fundamental properties of rings, fields and modules are studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2505 - ALGEBRA 3

Minimum Credits: 3

Maximum Credits: 3

This is a third course in algebra. It covers commutative algebra, homological algebra and rudiments of category theory. The material covered provides the necessary background for the advanced courses in algebraic geometry and number theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2601 - ADVANCED SCIENTIFIC COMPUTING 1

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2602 - ADVANCED SCIENTIFIC COMPUTING 2

Minimum Credits: 3

Maximum Credits: 3

Course develops the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2603 - ADVANCED SCIENTIFIC COMPUTING 3

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2604 - ADVANCED SCIENTIFIC COMPUTING 4

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2700 - TOPOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

A first course in topology, some of the topics covered include separation axioms, bases and sub-bases, product and quotient topology, homeomorphisms, compactness, the Baire category theorem, the Lindelof property, connectedness, topological spaces and compactification.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2701 - TOPOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2700. In this course the basic concepts and results in algebraic topology will be covered, this includes both homotopy and homology theory. In particular the calculation of the fundamental group and homology groups from chain complexes will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2800 - DIFFERENTIAL GEOMETRY 1

Minimum Credits: 3

Maximum Credits: 3

This course covers introductory topics in differential geometry. Topics include topological manifolds, differential structures, tangent and tensor bundles, vector fields and differential equations, integral manifolds and Riemannian structures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2801 - DIFFERENTIAL GEOMETRY 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2800 and its goal is to develop advanced concepts in differential geometry. Some topics which might be covered include Riemann surfaces and the differential geometry of \mathbb{R}^4 and in particular the relevance of these to quantum super string theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2810 - ALGEBRAIC GEOMETRY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the basic ideas of algebraic geometry. The approach to the subject may be via either the linear series on a curve approach or the algebraic approach through fields of algebraic functions or the sheaf theoretic approach. Applications may also be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2900 - PARTIAL DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This is an introduction course to this area. Some of the topics to be covered include: linear second order equations, the method of characteristics, Laplace and wave equations, the heat equation and various maximum principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2901 - PARTIAL DIFFERENTIAL EQUATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2900. The topics covered in this course include an introduction to parabolic and hyperbolic equations, a priori estimates, free boundary problems, shock waves and Riemann problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2920 - ORDINARY DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This course covers basic concepts in O.D.E.'S. In particular, emphasis is given to connections of this area to applied mathematics and differential geometry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2921 - ORDINARY DIFFERENTIAL EQUATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2920. Some of the topics which are covered include boundary value problems, green's functions, integral equations and the spectral theory of second order differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2940 - APPLIED STOCHASTIC METHODS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of stochastic methods that can be applied to problems in biology, finance, and physics. Analytical and computational techniques will be presented which apply to both continuous and discrete stochastic models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2950 - METHODS IN APPLIED MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This course is a rigorous treatment of various aspects of numerical linear algebra, special features of symmetric operators, optimization with

emphasis on properties of convex functions and duality theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 15

This course is independent study by the student under the direction of a faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

MATH 3000 - THESIS PH.D.

Minimum Credits: 1

Maximum Credits: 15

This course is taken by a student who is working on a Ph.D. dissertation under the direction of a student's thesis advisor.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MATH 3020 - CALCULUS OF VARIATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the subject. Topics include: variation formulation, the Euler-LaGrange equations, and applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3040 - TOPICS IN SCIENTIFIC COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course seeks to provide a broad introduction to the field of machine learning. The emphasis will be the development of a rigorous mathematical basis for the most commonly used algorithms in the field. Topics to be covered include non-convex optimization, convex optimization, clustering, dimensionality reduction and neural networks. A background in multivariable calculus and linear algebra is recommended. Prior programming experience is not required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MATH 3060 - TOPICS IN COMBINATORICS

Minimum Credits: 3

Maximum Credits: 3

This course covers a variety of topics in combinatorics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3071 - NUMRC SOLUTN PARTL DIFFT EQUA

Minimum Credits: 3

Maximum Credits: 3

This course covers contemporary methods for solving initial and boundary value problems. Topics include: properly posed problems, characteristics, finite difference and finite element methods and error estimates.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3072 - FINITE ELEMENT METHOD

Minimum Credits: 3

Maximum Credits: 3

Topics include a description of the method in one, two and three dimensions, variation and minimum energy principles, implementation and discussion of the necessary data structure and evaluation of the errors. Possibly a special topic such as applications to fluid dynamics will be done.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3225 - MATHEMATICS OF FINANCE 1

Minimum Credits: 3

Maximum Credits: 3

A mathematical introduction to the pricing of options and other derivative securities, portfolio theory and risk management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3226 - MATHEMATICS OF FINANCE 2

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the mathematical modeling, theory and computational methods in modern finance. It will treat mathematical models for financial risk factors, pricing of options and other derivative securities, basic portfolio theory and elementary risk management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3227 - MATH FINANCE 3

Minimum Credits: 3

Maximum Credits: 3

This course covers special topics in mathematical finance. Topics will include: extensions of the black-Scholes model to alternative stochastic processes, risk management, models for credit risk and credit derivatives, American options, portfolio selection and derivatives pricing under transaction costs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3228 - MATHEMATICS OF FINANCE 4

Minimum Credits: 3

Maximum Credits: 3

This course covers advanced topics in modern mathematical finance. Topics will include: advanced credit risk and interest rate models, stochastic control and stochastic optimization models for portfolio selection and option pricing, and numerical methods.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3370 - MATHEMATICAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Course covers computational and mathematical neuroscience. It will do modeling and analysis of complex dynamics of single neurons and large-scale networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3375 - COMPUTATIONAL NEUROSCIENCE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course offers an introduction to modeling methods in neuroscience. Topics range from modeling the firing patterns of single neurons to using computational methods to understand neural coding. Some systems level modeling is also done.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3380 - MATHEMATICAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces a number of modeling methods for biological systems. We will examine a number of problems from cell biology, immunology, population biology, physiology and molecular genetics. The main tools will be techniques from ordinary and partial differential equations. Discrete and delay-differential equations will also be used however the background for these will not be assumed. We will take models from current and classic papers in the field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3436 - FIXED POINTS WAVELETS & FRACTALS

Minimum Credits: 3

Maximum Credits: 3

The course will cover iterative image reconstruction using the wavelet transform, initiated by Mallat and Zhang.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3550 - LIE GROUPS AND LIE ALGEBRAS

Minimum Credits: 3

Maximum Credits: 3

This course will cover the basic properties of lie groups and lie algebras. Also the basic classification of simple lie algebras and lie groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3760 - TOPICS IN TOPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics will include topological algebra, especially non metric topological groups, and topological semi-groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 9

Internship and/or employment experience under the supervision and oversight of a faculty member. This experience is to be an integral part of the student's individual course of study.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

MATH 3902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This is a course of directed study under a faculty member covering a topic of special interest which is not normally in the curricula.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

MATH 3923 - TOPICS PARTIAL DIFFERENTIAL EQNS

Minimum Credits: 3

Maximum Credits: 3

This course will explore recent developments in the theory of partial differential equations centered on the notion of viscosity solution. After a review of Hamilton-Jacobi equations, we will discuss how they can be used as a substitute for convolution in non-linear problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Mechanical Engineering

ME 2001 - DIFFERENTIAL EQUATIONS

Minimum Credits: 3

Maximum Credits: 3

Ordinary differential equations; series solutions of differential equations; introduction to partial differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2002 - LINEAR AND COMPLEX ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Linear algebra; vector analysis; complex variables; intro to calculus of variations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS

Minimum Credits: 3

Maximum Credits: 3

The fundamental concepts of continuum mechanics are necessary for studying the mechanical behavior of solids and fluids. Includes a review of vectors and tensors; stress; strain and deformation; general principles in the form of balance laws; constitutive equations and their restrictions; and specialization to the theories of linearized elasticity and fluid mechanics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2004 - ELASTICITY

Minimum Credits: 3

Maximum Credits: 3

Fundamental concepts of stress and strain. Linear theory; boundary-value problems of elasticity, including plane stress, plane strain, torsion, and flexure. Elementary variational theory of elasticity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2003; PROG: Swanson School of Engineering

ME 2005 - STRUCTURE OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of crystallography; lattice geometry; Bravais lattices; crystal systems; stereographic projection; point and space groups; symmetry elements; tensor properties of crystals; physical properties; elasticity of crystals; introduction to diffraction by crystals; reciprocal lattice; Ewald construction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2006 - MODELING MATERIAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

Using the principles of constitutive modeling in continuum mechanics to model the behavior of materials. Constitutive models for viscous fluids, thermoviscous fluids, elastic solids, thermoelastic solids, viscoelasticity, and plasticity are covered both because of their relevance and as examples of the process for developing constitutive models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2003

ME 2007 - ELEMENTS OF MATERIAL SCIENCE AND ENGINEERING 1

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; and rate processes.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2009 - PROCESSING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials. Alloy design, strengthening mechanisms, mechanical properties: plastic deformation, mechanical properties and microstructure control; high temperature deformation, grain size control during reheating and during deformation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2010 - NANOMECHANICS, MATERIALS AND DEVICE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction for current nanotechnology and fundamentals for Nano engineering. It mainly contains three areas: Nano mechanics, nanomaterials and nanoscale devices. In Nano mechanics, it covers Nano indentation mechanics, thin film mechanics and one dimensional nanowire mechanics, Nano crack mechanics, deformation in nanomaterials. Nano mechanical model will be emphasized. In nanomaterials, it covers carbon nanotube, one dimensional semiconducting nanowires & Nano multilayers as well as nanostructured composites. Novel property/phenomena reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2011 - FUNDAMENTALS OF MICRO AND NANOMANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2012 - COMPUTATIONAL MATERIALS SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course teaches the fundamentals and applications of computational materials science, which concerns the use of modern computational tools to the analysis of the properties and behavior of materials at various temporal and length scales. The current emphasis of this course is on integrated multiscale simulation method. The course covers topics on the first-principles density functional theory, molecular dynamics, Monte Carlo simulation, and phase-field method. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a material system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2015 - ROBOT MODELING AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course is intended for graduate students interested in human movement control. The engineering framework from robotics controls, and filtering will be widely employed to model human movement and its control. These concepts will be merged with neurophysiology and computational neuroscience to understand adaptability in human motor control and its applications to neuro-rehabilitation. The course will introduce dynamic modeling of human limbs, internal models for movement control, sensorimotor integration using optimal filtering, neurophysiology of locomotion, and motor skill learning in able-bodied persons and persons with mobility disorders the course will be helpful for students who want to pursue a career in robotics and control for neuro-rehabilitation. The course will also be valuable to students who are curious about robotics, control, and estimation theory

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2016 - NONLINEAR DYNAMICAL SYSTEMS 1

Minimum Credits: 3

Maximum Credits: 3

Nonlinear systems are the rule, rather than the exception, in physics and engineering. This course serves as an introduction to their formal study and leverages both analysis and computation heavily to study analysis methods for nonlinear physical and engineering problems. The course introduces important topics such as bifurcations, limit cycles, Lyapunov functions and stability, and chaos.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2017 - NONLINEAR DYNAMICAL SYSTEMS 2

Minimum Credits: 3

Maximum Credits: 3

Nonlinear systems are the rule, rather than the exception, in physics and engineering. This course serves to extend their formal study and leverages both analysis and computation heavily to study analysis methods for nonlinear physical and engineering problems. The course reviews analytical techniques and programming, and briefly reviews important topics from the previous course. It then begins with the study of discrete time linear and nonlinear dynamical systems, additional study of bifurcation theory, chaos control and synchronization, and delay differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2020 - MECHANICAL VIBRATIONS

Minimum Credits: 3

Maximum Credits: 3

Analysis of linear and non-linear multi-degree of freedom systems. Lagrangian formulation, model analysis, lumped parameter analysis of discrete systems, and continuous system vibrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2022 - APPLIED SOLID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Stress and strain transformations; applied elasticity problems in torsion and plane problems; thermal stresses and elementary plasticity; energy methods; fundamentals of finite element methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2023 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION, AND WEAR

Minimum Credits: 3

Maximum Credits: 3

Tribology is the study of sliding surfaces. This course will cover fundamental topics in tribology relating to surface characterization, surface roughness, adhesion, friction, lubrication, and wear. Students completing the course will be able to describe the theoretical origins of these topics, which relate to mechanics, materials science, and chemistry. They will also be able to apply tools to solve novel problems in these areas. The course will especially emphasize applications in nanotechnology and biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: ME, MSE or BioE Graduate Students. All other students will need permission from the instructor to register

ME 2027 - ADVANCED DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Variational principles, Lagrangian and Hamiltonian formalisms, kinematics and dynamics of rigid bodies, first integrals, Routh's method, stability, canonical transformations, the Hamiltonian-Jacobi theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Failure of manufactured products in service, implications for design. Energy release rates, toughness, evaluation of experimental tests. Fracture mechanisms in different material systems. Damage tolerance. Fracture control. Design studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2035 - COMPOSITE MATERIALS DESIGN AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Extensive uses of composites can be seen in several aspects of engineering applications. Industrial sectors, such as in wind turbines, oil and natural gas exploration and production, natural gas and hydrogen vehicle storage tanks, high-speed and precision machinery, etc., are today the largest user of composites, surpassing aerospace industries. Other applications are in semiconductor manufacturing equipment; automobile engines, bodies, brakes and clutches; energy storage flywheels; gas turbine engines; process industries equipment; data storage equipment; medical diagnostic equipment; prosthetics and orthotics, etc. The advantages of composite materials stem from their outstanding strengths and stiffnesses, low densities, in addition to their unique and tailorable physical properties, including good thermal conductivities compared to copper and thermal expansions that can be varied from high to near zero. Composites, such as metallic, ceramic and carbon materials have both high-temperature and low-temperature capabilities, making them useful in high temperature regimes, e.g. in gas turbine engines, automobile and aircraft brakes. This course offers an in-depth presentation of design, analysis and manufacturing methods for composites, with particular reference to polymer matrix composites. For an efficient use of composites in lightweight structural design applications, this course offers the needed fundamental understanding of the structure, properties, and mechanics of composite materials. A typical mechanical analysis and design of composite structures, which are significantly more complex than those of their metallic equivalents due to the anisotropic nature of laminated composite materials, will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2001 and 2003 and 2004, or sufficient background in structural mechanics; PLAN: Swanson School of Engineering

ME 2042 - MEASUREMENT AND ANALYSIS OF VIBRO-ACOUSTIC SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course will present measurement and analysis techniques for dynamic systems, with particular emphasis on mechanical vibrations and acoustics. Background on vibration of lumped and continuous parameter systems, acoustics, and noise and vibration control will be given. Other concepts include FFTs, windowing, input/output relationship calculations, test methods, transducers, instrumentation, and the use of dynamic signal analyzers. Application to system identification and modal analysis will be included, as well as hardware demonstrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2043 - MACHINE LEARNING-BASED METHODS FOR DYNAMICS AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course will discuss and study the utility of learning algorithms in dynamic systems and control applications. Approximately 1/6 of the course will study iterative learning control (useful in manufacturing, robotics, etc.), and the remainder split between shallow and deep neural networks for approximating and designing controllers and prediction algorithms (widely applicable in time series prediction), and a final portion spent on reinforcement learning and basic dynamic programming. It is meant to complement other data-driven courses in the department and add a dynamic systems and control flavor and perspective, and provide some survey of the state of the art via the projects. This course will mostly focus on linear and nonlinear ODE (difference, and differential equation) based systems as opposed to PDE-based ones.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2045 - LINEAR CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course builds upon the foundation laid in a classical feedback control course. The tools will be developed for analyzing and designing controllers for multi-input, multi-output dynamic systems. Ideas of controllability and observability will be discussed, as well as modern control design techniques such as pole-placement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2046 - DIGITAL CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with the tools necessary to analyze and design discrete-time (digital computer) control systems for real-time control of dynamic systems. It builds upon the background of classical control topics including Nyquist, bode, and root locus, and transform ideas will be used extensively for design and analysis to give the student an understanding of how discrete-time and classical control systems are related. State-space representations will be used for MIMO systems, so a prior understanding of modern control ideas is important.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2047 - FINITE ELEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Development of elements from variational principles and application to static continuum problems. Introduction to techniques for dynamics, stability, and generalized field problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2048 - ENGINEERING ALLOYS FOR CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence is offered: review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

ME 2050 - THERMODYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Detailed presentation of the conceptual foundations of thermodynamics. Energy and the first law of thermodynamics. The second law of thermodynamics and entropy. Thermo-physical properties of pure substances. Energy conversion systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2051 - CARBON CAPTURE AND STORAGE

Minimum Credits: 3

Maximum Credits: 3

Introduction to carbon capture; compression, transport and storage of CO₂; analyzing absorption and adsorption carbon capture; analyzing carbon capture membranes; introduction to direct air capture

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION

Minimum Credits: 3

Maximum Credits: 3

An introduction to technical writing and oral presentation skills using Word, Powerpoint, Mendeley, InkScape and LaTeX.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

ME 2053 - HEAT AND MASS TRANSFER

Minimum Credits: 3

Maximum Credits: 3

Steady state and transient conduction in solids. Conservation laws of mass, momentum, and energy. Forced and free convection heat transfer; condensation and boiling; thermal radiation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2054 - PARALLEL COMPUTING FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

Modern engineering is increasingly relying on numerical software applications and benefits from fast turnaround time enabled by multi-core processors. From smart phones to flagship supercomputers, parallelism has become pervasive. This class introduces students to parallel scientific computing with compiled languages. Students will develop a basic understanding of computer architecture, memory hierarchy, number representations and computer arithmetic. Students will become proficient in modern software environment of supercomputers, working with large scientific software and using sophisticated external libraries to solve technical problems. Students will learn Flynn's taxonomy for parallel computers and develop parallel programs using the message passing interface (MPI) library for distributed-memory parallelism, OpenACC for computing with graphics processing units (GPU) and shared memory parallelism with OpenMP. Students will learn common data formats to store and visualize large data. Class assignments and projects will be derived from linear algebra, partial differential equations and numerical analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2055 - COMPUTER AIDED ANALYSIS OF TRANSPORT PHENOMENA

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to implementation of some of the numerical/computational methods for solving problems in transport phenomena. Fields described by linear and non-linear ordinary differential equations (initial and boundary value problems), and partial differential equations (elliptic, parabolic and hyperbolic) will be considered by means of various examples from fluid dynamics, heat and mass transfer, and combustion. Numerical discretization techniques based on finite difference methods (FDM) will be the subject of main discussions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2056 - INTRO TO COMBUSTION THEORY

Minimum Credits: 3

Maximum Credits: 3

Covers the general solution techniques associated with combustion phenomena as well as chemical thermodynamics, heat and mass transfer, laminar flame theory, one dimensional reactive flow, heterogeneous combustion, and turbulent combustion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2060 - NUMERICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduction to numerical techniques for the solution of linear and non-linear equations, numerical integration and differentiation, interpolation, ordinary and partial differential equations, and eigenvalue problems.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2061 - REDUCED ORDER MODELING FOR ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to dimension reduction techniques and reduced order modeling. The course covers the mathematical foundation of all the techniques discussed and includes a diverse set of applications. In particular, the course covers the utility of dimension reduction in diagnostics of complex data, deterministic and stochastic reduced order modeling and their applications in optimization and uncertainty quantification.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2062 - ORTHOPAEDIC ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course that applies mechanics of materials, material failure theories and rigid body dynamics to orthopedic device design, tissue mechanical modeling and surgical procedure evaluation. The course is meant to provide an introductory background to engineering aspects of orthopedic medicine and biomechanics for students preparing for medical school, positions in the medical device industry or graduate studies in this field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2063 - DATA-DRIVEN MODELING FOR ENGINEERS

Minimum Credits: 3

Maximum Credits: 3

Introduction to data-driven modeling techniques: regression, Bayesian probabilities, parameter estimation, dimension reduction, neural networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2067 - MUSCULOSKELETAL BIOMECHANIC

Minimum Credits: 3

Maximum Credits: 3

Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2070 - MICROFLUIDICS

Minimum Credits: 3

Maximum Credits: 3

The basic hypotheses in the macro-scale fluid mechanics may no longer be applicable in micro or even smaller scale. The objectives of this course

are: to identify dominant forces and their effects in micro-scale fluid systems that are different from those in the macro-scale; to understand the fundamentals of micro fluidic phenomena; to discuss various micro fluidic applications in research and commercial levels and to explore new possible microfluidic applications in the emerging fields.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2074 - ADVANCED FLUID MECHANICS 1

Minimum Credits: 3

Maximum Credits: 3

Kinematics of fluids, Eulerian and Lagrangian descriptions, continuity, stream and potential functions, stress and rate of strain relation, derivations of Navier stokes and energy equations, some exact solutions, boundary layer theory, turbulent flows.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2075 - ADVANCED FLUID MECHANICS 2

Minimum Credits: 3

Maximum Credits: 3

Fluid mechanics is a broad field of study that serves as a fundamental subject in various disciplines such as aerospace engineering and geosciences. Nonlinear aspects of the governing Navier-Stokes equations manifest themselves in unique ways in different applications while sharing a common theory. This course builds upon the first graduate fluid mechanics course in the mechanical engineering graduate curriculum. The course will emphasize the nonlinear aspects of fluid mechanics in the context of different applications and provide the essential techniques and methods to study them. The course will cover the theory of temporal flow instabilities, statistical theory and modeling of turbulence for wall bounded and free shear flows, geophysical fluid dynamics and compressible aerodynamics at the intermediate level to prepare graduate students to pursue graduate level courses in each subject.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2081 - SMART MANUFACTURING - KEY TO INNOVATIONS

Minimum Credits: 3

Maximum Credits: 3

This course covers a range of topics centered on "smart manufacturing", which is a key to provide novel products and solutions for critical industries and special situations. These topics include additive manufacturing, manufacturing metrology, quality control, cyber-physical manufacturing system, supply chain, and artificial intelligence. Fundamental concepts and hands-on practice in smart manufacturing will be demonstrated through lectures, assignments and projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2082 - ELECTRO MECHANICAL SENSORS & ACTUATORS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide a thorough understanding of the various mechanisms that can be exploited in the design of electromechanical sensors and actuators. These transduction mechanisms include: 1) transduction based on changes; in the energy stored in the electric field, 2) in the energy stored in the magnetic field, 3) piezoelectricity and pyro electricity, 4) linear inductive transduction mechanisms, and 5) resistive transduction mechanisms. Will discuss various transduction materials, sensors and actuators from a wide range of applications.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2083 - INTRODUCTION TO ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Additive manufacturing processes, operating principles, materials used in the processes, applications, process chain, design for manufacturability, mechanical behavior of printed plastics and metals, process-microstructure-property relationship, post-processing and inspection.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2084 - INTRODUCTION TO POLYMER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic concepts of polymer science. Kinetics and mechanism of polymerization, synthesis and processing of polymers. Relationship of molecular conformation, structure and morphology to physical and mechanical properties. Structural and physical aspects of polymers. Molecular and atomic basis for polymer properties and behavior. Characteristics of thermoplastic and thermoset polymers for single and multicomponent systems. Understanding of the viscoelastic and relaxation behavior of single and multicomponent systems. Thermodynamics and kinetics of transition phenomena. Structure, morphology and behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2085 - GRADUATE SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Designed to acquaint graduate students with various subjects in advanced mechanics and graduate-level current research in mechanical engineering; aspects of graduate-level engineering and applied mechanics not normally encountered in classes.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2086 - DESIGN & MECHANICS OF 3D PRINTED MATERIALS AND STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course covers the mechanics of materials and structures fabricated by 3D printing. Topics to be covered include various 3D printing processes and materials, effects of process parameters and printing direction on mechanical behavior, microstructure-mechanical property relationships, constitutive models, etc. The difference between 3D printing and traditional materials will be highlighted.

Academic Career: Graduate

ME 2087 - STRUCTURAL TOPOLOGY OPTIMIZATION FOR ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

This course introduces structural topology optimization and teaches the related problem solution skills. Specific methods including SIMP (Solid

Isotropic Material with Penalization), level set method, and PTO (proportional topology optimization) will be explained in depth. Topics to be covered include the different types of topology optimization problems (compliance-minimization, stress-constrained, natural frequency design, etc.), multi-material topology optimization, multi-scale topology optimization and meta-material design, etc. Applications will be focused on addressing manufacturability issues in order to produce manufacturing-friendly design solutions. With regard to design optimization for additive manufacturing (or 3D printing), various important topics will be covered, including lattice structure design, self-support structure and infill design, material anisotropy issue, hybrid manufacturing part design, etc. Homework assignments and projects will focus on implementing basic topology optimization algorithms and performing design optimization using a commercial tool for additive manufacturing.

Course Requirements: PREQ: ME 2047 and 2060 and 2022 and 2003 and 2004

ME 2088 - ADVANCED MANUFACTURING METROLOGY AND PROCESS CONTROL

Minimum Credits: 3

Maximum Credits: 3

To provide students with an understanding of the status, challenges and trends in manufacturing and to prepare them for the potential opportunities of Industry 4.0, this course covers a broad range of topics centered on manufacturing-related measurement and control functions, which are aimed to improve manufacturing accuracy and precision and thereby to mature a manufacturing technology for demanding applications. These topics include a diverse variety of advanced manufacturing methods, cutting-edge metrology systems, measurement science and sensing technologies, data acquisition and analysis, machine learning, and process control with feedback systems. Class projects with lab work will offer the students real-world experience on manufacturing, material, measurement, modeling and control. Students will be required to develop a measurement and control system for a representative advanced manufacturing process such as an additive manufacturing process in a lab at Pitt, and gain experience for end-to-end digital integration and implementation of manufacturing processes with metrology- and model-based control systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2089 - RAPID PROTOTYPING TO ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2094 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization (industry or government laboratory). The internship must be related to the thesis or dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

ME 2095 - GRADUATE PROJECTS

Minimum Credits: 1

Maximum Credits: 15

A special problems or reading course of individual study guided by the student's major adviser. Topics selected from any phase of mechanical

engineering not covered in the regular M.S. - Level course. This course serves as comprehensive examination for non-thesis programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

ME 2096 - MS/MBA INEGRATED PROJECTS COURSE

Minimum Credits: 2

Maximum Credits: 2

This is the integrated projects course for MS/MBA majors. The project will be jointly overseen by KATZ and SSOE. A 1-2 page proposal is due at the beginning of the term, followed by a final report. The project should blend the student's business and engineering skills. Prerequisites: approval of advisor and graduate director.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2097 - SPECIAL STUDY MECHANICAL ENGRG

Minimum Credits: 3

Maximum Credits: 3

Special topics of particular importance to an individual's plan of study.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ME 2098 - SPECIAL TOPICS IN THERMAL-FLUID SCIENCES

Minimum Credits: 3

Maximum Credits: 3

Current topics and new advances in thermal and fluid sciences are discussed and analyzed. Students will learn current topics and new technical developments in the area of thermal and fluid sciences that are not covered by existing courses in the graduate curriculum. Specific outcomes will depend on the proposed topics at each offering of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2208 - MECHANICS AND PHYSICS OF SOFT MATERIAL

Minimum Credits: 3

Maximum Credits: 3

Comparing to hard materials (e.g. steel and ceramics), soft materials such as rubber, hydrogel, and tissue are in many aspects more "liquid-like": large deformation, viscoelasticity, high permeability, and poor mechanical strength. This course covers the molecular pictures that underlie these behaviors and the continuum models that describe them. Topics discussed include nonlinear elasticity, rheology, stimuli-responsiveness, capillary effects, and fracture. The aim of the course is preparing students to tackle the important practical questions: how to design soft materials to achieve desired behavior, and how to process the material to obtain the designed structure.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2003

ME 2222 - NANOSCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics,

continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2223 - NANOSCALE MODELING AND SIMULATIONS:

Minimum Credits: 3

Maximum Credits: 3

This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2227 - FINITE ELEMENT ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This course builds upon material given in an entry level finite element course. Variational principles are introduced and used to derive element quantities. The theory and methods for the development of advanced continuum and beam and plate elements are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2243 - BAYESIAN SIGNAL PROCESSING

Minimum Credits: 3

Maximum Credits: 3

This course presents Bayesian methods for signal processing and estimation. Course topics include: Bayesian estimation, sampling theory, importance sampling, simulation-based Bayesian methods, classical and modern Bayesian state-space processors, and particle filters. Other topics of interest, like joint state/parameter estimation, discrete hidden Markov models, sequential detection, may also be discussed, and various engineering-related applications are presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2247 - INTRODUCTION TO NONLINEAR CONTROL DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is devoted to Lyapunov-based control design for nonlinear dynamical systems. Mainly, this course is developed as an introduction to nonlinear control. In the beginning, the course will emphasize the drawbacks of linearization and richness of nonlinear phenomena compared to linear dynamics. A brief introduction to study qualitative behavior of linear and nonlinear systems using phase portraits will also be provided. These topics will be used as motivations for this course where main topics include: Lyapunov stability analysis for autonomous and nonautonomous systems, input-output stability, Barbalat's lemma, feedback linearization, and nonlinear control design tools such as Lyapunov redesign, sliding mode control, integrator backstepping, and other robust and adaptive control methods. If time allows, we will cover nonlinear control design methods for dynamical systems with delays. The content will be mathematical supplemented with application examples taken from robotics and human

musculoskeletal system. Prerequisites for the course include an understanding of undergraduate calculus, linear algebra, and linear control methods (ME 2045). Students are also expected to be able to use some simulation software (e.g. Matlab).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2252 - CONDUCTION HEAT TRANSFER

Minimum Credits: 3

Maximum Credits: 3

To provide the student with an understanding of the classical and general approach to heat conduction within stationary homogeneous materials through the analysis of one- and multi-dimensional steady-state and transient system with homogeneous and non-homogeneous boundary conditions. This includes analytical and numerical solutions to Fourier's law and the conduction equation using separation of variables, Laplace transforms, superposition, variation of parameters and similarity techniques. Phase change will be introduced and resolved analytically and numerically. Special topics will include micro- and nano-scale heat transfer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2253 - RADIATION

Minimum Credits: 3

Maximum Credits: 3

To provide the student with an understanding of radiative heat transfer, include surface to surface radiation heat transfer, electromagnetic theory applied to thin films, radiation through participating media, solar cells, thermoelectrics, lasers, and combined heat transfer modes (conduction, convection, and radiation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2254 - CONVECTION HEAT TRANSFER

Minimum Credits: 3

Maximum Credits: 3

To provide the student with an understanding of the transport of mass and heat in fluid systems, including free and forced convection for internal and external laminar and turbulent flow. Conservation equations for mass, momentum and energy will be developed. The development of the hydraulic and thermal boundary layer will be presented for laminar and turbulent flows, leading into film cooling, condensation, evaporation and boiling phenomena. Correlations for heat transfer characteristics for turbulent flows will be presented as a departure point from analytic solutions of laminar flows. Numerical methods for convection will be presented in the form of finite differencing schemes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2255 - TWO PHASE FLOW AND HEAT TRANSFER

Minimum Credits: 3

Maximum Credits: 3

This course is a graduate level course dealing with two-phase flow, boiling and condensation heat transfer in engineering systems. Physical phenomena and applications of various types of theoretical models to real systems will be emphasized. The real systems will be industries. Two-phase flow ranks as one of the more complex engineering problems. Two-phase flow combines all of the uncertainty of turbulent flow and the physical processes that occur at the gas-liquid interface.

Academic Career: Graduate

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: ME 2060 Strongly recommended; PROG: Swanson School of Engineering

ME 2257 - TRANSPORT PHENOMENA IN NANO-TO-MICRO SCALE

Minimum Credits: 3

Maximum Credits: 3

This intermediate graduate level course will discuss the transport phenomena of heat (phonons), mass (molecules), and charge (electrons) from nano- to micro-scale using the Boltzmann transport theory. The transport phenomena in extremely large and small scales are often described by the continuum equations and wave equations, respectively. These two extreme cases leave an intermediate length scale (often nano- to micro-meter scale) where the continuum description is invalid, and the wave characteristics of carriers can be ignored. The Boltzmann transport equation (BTE) bridges this gap and is used to describe the transport phenomena in nano- to micro- scale, which exist in many modern engineering problems. While the Boltzmann transport theories of those carriers share the same fundamental basis and similarities, the theories have been developed and discussed in different disciplines without many cross-disciplinary interactions. A goal of this course is to provide a unified perspective regarding the transport phenomena of the three practically important carriers - phonons, molecules, and electrons. This course also aims at providing a summary of introductory statistical thermodynamics and solid-state physics for the graduate students in early years. *** No Pre-reqs: It is highly recommended that students previously took at least one or two of the following undergraduate-level courses : classical thermodynamics in mechanical engineering dept., heat transfer, fluid mechanics, statistical mechanics, and solid-state physics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2300 - LINEAR ALGEBRA FOR MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

Core concepts from linear algebra that are key for understanding and creating applied machine learning algorithms. Topics include least square approximation, neural networks, and matrix factorization for dimension reduction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2440 - FUNDAMENTALS OF ACOUSTICS AND VIBRATION

Minimum Credits: 3

Maximum Credits: 3

This course will provide the basic fundamentals of acoustics, including wave motion, the wave equation and its solution, modal solutions, acoustic sources, radiation and reception, and filters, and sound/structure interaction. In addition, the student will be introduced to acoustic metamaterials and hearing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2441 - MEASUREMENT AND ANALYSIS OF RANDOM DATA FROM DYNAMICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This courses will present measurement and analysis techniques for experimental physical data from engineering applications. The treatment is intended to complement courses in estimation, including Kalman filtering and Bayesian signal processing. The course covers standard time-, frequency-, and quefreny-domain methods of signal analysis, with applications to frequency response function estimates, system identification,

modal analysis, and array processing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2646 - LINEAR SYSTEM THEORY

Minimum Credits: 3

Maximum Credits: 3

Linear spaces and operators, mathematical descriptions of linear systems, controllability and observability, irreducible realization of rational transfer-function matrices, canonical forms, state feedback and state estimators, stability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2671 - OPTIMIZATION METHODS

Minimum Credits: 3

Maximum Credits: 3

Analytical and computational aspects of finite dimensional optimization, unconstrained and equality constrained problems, basic descent methods, conjugate direction methods, nonlinear programming, and the Kuhn-Tucker Theorem, linear programming, dynamic programming, multicriteria optimization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

The course focuses on properties of good measurement that are integral to the research process. Specific objectives are to analyze methods for testing psychometric properties (reliability and validity) of psychological instruments and physiological instruments; to evaluate the adequacy of selected scaling methodologies used in research; to apply knowledge of instrumentation to the description of a psychosocial instrument and a physiological instrument for a research proposal; and to synthesize course content with statistical criteria for scale evaluation and make decisions regarding scale revision. The domain sampling model is presented as the major theory of measurement error, with the parallel test model presented as a special case of the domain sampling model. The construct, criterion, and content validity of psychosocial instruments are explored, and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies, as well as the principles involved in the design and formatting of questionnaires, will be discussed.

Academic Career: Graduate

MEDEDU 2045 - SURVEY DESIGN AND DATA ANALYSIS

Minimum Credits: 1

Maximum Credits: 1

Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.

MEDEDU 2085 - MEDICAL EDUCATION INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 2

For Master of Science and Certificate in Medical Education students. An independent study is designed by the student to pursue an area of study within medical education that is (1) not covered by other established courses and (2) necessary for a student's academic development. It cannot be used to replace required or core courses and students must provide a compelling reason for proposing the course of study. The student will complete the independent study form, and the faculty preceptor and Director of Academic Programs must approve it. An independent study project may carry 1-2 graduate credits for Master of Science students and 1 credit for Certificate students, assigned at the Director and Assistant Director of Academic Programs' discretion based on the proposal.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

MEDEDU 2100 - ENHANCING TEACHING SKILLS

Minimum Credits: 2

Maximum Credits: 2

This course will briefly review the basic principles of adult learning as they relate to clinician-educators but will devote the majority of the time to discussing, developing, and advancing teaching skills of clinician-educators. Using a combination of formal didactics, presentations by students, role playing, and videotape review, participants will have ample opportunity to refine their skills in case-based learning, teaching at the bedside, and teaching in small and large groups. Topics will also include setting goals and expectations, feedback and evaluation, and dealing with the student in need of remediation. MEDEDU 2100 is intended to complement the Medical Mind, Cognitive Studies in Medicine, and Enhanced Teaching Skills: Longitudinal Practicum, and, in an integrated fashion, provide comprehensive knowledge and experience to shape future teaching skills of the master teacher.

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2120 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

Academic physicians who function as clinician-educators face career challenges unique to their career path. This course will provide future clinician-educators with information about these challenges so they are better prepared when starting their career. In addition, the course will provide specific skills to enhance the ability of clinician-educators to set goals, demonstrate their suitability for promotion, manage time effectively, and function in leadership roles. This course is open to Medical Education students ONLY.

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2125 - ASSESSMENT OF MEDICAL LEARNERS

Minimum Credits: 1

Maximum Credits: 1

This course will prepare learners to use a wide variety of assessment methods in their educational programs. Specifically, we will address assessing knowledge, clinical performance and technical skills and create questions and cases in class. The theory behind constructing high quality assessments for educational programs will be discussed, and participants will use assessment data to make competency decisions for UGME and GME scenarios.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN

Minimum Credits: 1

Maximum Credits: 1

This course is designed to explore and develop the principles of curriculum design, implementation, and evaluation. Students will learn the fundamentals of developing goals and objectives; performing a needs assessment for curriculum development; designing the most efficient teaching strategy, including lecture, workshop, and problem-based learning sessions; evaluating student performance, including both knowledge assessment and performance-based assessment; evaluating faculty performance and course success; and strategies for grading.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2131 - STRATEGIES FOR DEALING WITH THE STRUGGLING LEARNER

Minimum Credits: 1

Maximum Credits: 1

MEDEDU 2131 is designed to be a practical, hands-on approach to dealing with students who present with learning difficulties. Both didactic instruction and small-group problem solving for difficult learners will be presented. The goals for the course are to learn how to identify problem learners; to develop a differential diagnosis of problem learner behavior; to develop strategies for remediation and monitoring remediation; to review strategies for documentation and tracking of problem students, and to review issues of competency and promotion.

Academic Career: Graduate

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2140 - SCIENTIFIC WRITING & PRESENTATION SKILLS (ONLINE)

Minimum Credits: 1

Maximum Credits: 1

Medical educators and researchers must be able to present their work clearly and effectively. However, important educational material and research data are sometimes obscured by poorly delivered presentations or poorly written manuscripts. The main objective of this course is to help students develop excellent medical writing and presentation skills. This objective will be achieved through a combination of videos, readings, individual assignments, and team projects in which students will practice specific skills. Students will craft an abstract, write a discussion section of a manuscript, practice methods of disseminating their science to the lay public, create a poster, construct a table or figure, and develop a PowerPoint presentation and record themselves delivering a 10-minute talk.

MEDEDU 2150 - MANAGEMENT OF EDUCATIONAL PROGRAMS

Minimum Credits: 1

Maximum Credits: 1

This course provides an overview of how medical schools and residency programs run in regards to accreditation, recruitment, finances, and leadership positions. We will examine forces shaping medical education by reviewing its history, social responsibility, and public accountability. Clinician-educator pathways will be explored, from program director to medical school course director to all the administrative faculty roles possible within UME and GME. The practical aspects of designing, implementing, and sustaining an educational program will be explored.

MEDEDU 2160 - CURRENT TOPICS IN TEACHING AND LEARNING - A SEMINAR SERIES

Minimum Credits: 1

Maximum Credits: 1

This seminar series includes critical discussion and evaluation of relevant topics in medical education and presentation review of methods employed by researchers in medication education. Seminars on the first Friday of the month (Medical Education Journal Club) consist of presentations of recent medical education research evaluating new teaching methods or educational curricula. Seminars on the third Friday of the month (Medical Education Research Conference) deal with topics in research methods in medical education and also serve as a forum to present research-in-progress or completed research projects. Enrollees for this series are expected to present at one of these conferences during the year, having reviewed their presentation topic with the course director prior to the session. Attendance at 16 sessions in addition to the presentation is required for 1 credit.

MEDEDU 2170 - MAKING THE MOST OF MENTORING

Minimum Credits: 1

Maximum Credits: 1

We strongly believe that effective mentoring is the cornerstone of a successful academic career, whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and to provide strategies for making the most out of the experience. Topics will include communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, postdocs, other Institute for Clinical Research Education (ICRE) trainees, and junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience both for the mentees and the mentors.

MEDEDU 2185 - STRATEGIC LEADERSHIP IN ACADEMIC MEDICINE

Minimum Credits: 1

Maximum Credits: 1

Health care professionals regularly occupy leadership roles in research, educational, and clinical arenas, and leadership opportunities abound in academic settings. Yet clinicians have been described as "accidental administrators," lacking training in skills necessary to be an effective leader. Given the current challenges facing healthcare, increasing reliance on interdisciplinary teams to provide care, and greater emphasis on cost control and quality improvement, the need for clinicians to develop effective leadership skills is paramount. This course is designed for clinician-educators and researchers who want to understand the basics of leadership and management. Through selected readings, this course will develop participants' leadership skills across a variety of domains. Topics covered include understanding how academic medical centers function and how to set team culture, run a meeting, manage time, lead across difference, and create/maintain a five year plan. At the completion of the course, trainees will understand the basic principles of leadership and management in the context of academic medicine. *Please note in previous terms, this course was titled "Managing Your Career in Clinical & Translational Science" and "Strategic Leadership".

MEDEDU 2190 - TEACHING ACROSS TEAMS

Minimum Credits: 1

Maximum Credits: 1

This special educational course will provide a component that is rarely provided in medical education and often not in other health professions education. Trainees will: 1. Be able to describe the training that other health professionals receive and come to understand the purpose of multidisciplinary teams as well as each provider's role on the team, 2. Review and practice critical communication skills necessary to build teams and negotiate conflict, 3. Learn educational methodology to assess team communication skills, and 4. Have the opportunity to participate in interdisciplinary learner teaching.

MEDEDU 2221 - APPLYING QUALITY IMPROVEMENT METHODS IN THE CLINICAL CONTEXT

Minimum Credits: 1

Maximum Credits: 1

Over the course of eight 2hr sessions, we aim to build knowledge of basic quality improvement (QI) concepts and apply QI methods to the clinical setting, to facilitate an integration of the front-line perspective into translating research into practice. More specifically, this includes problem definition and contextual inquiry concepts and tools, including process mapping, value stream modeling, selection of measures, Pareto analysis, understanding of variability of quality measures, and design of sustainable interventions. This content will be interwoven with concepts of healthcare workplace culture, leadership, and health system science, such as Just Culture and human factors engineering, which in turn facilitate stakeholder engagement in the improvement process and lead to successful and sustainable interventions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2230 - INNOVATION IN TEACHING & LEARNING

Minimum Credits: 2

Maximum Credits: 2

This course is designed to enable medical educators to use information and telecommunications technology (ITT) to expand access to educational resources, implement new models of education, and enhance student and physician competence throughout the continuum of training and practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MEDEDU 2240 - CULTURAL COMPETENCE MEDICAL EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Cultural differences have always been integral to U.S. society and represent a dynamic mixture of races, ethnicities, and beliefs. Indeed, these differences are one of the characteristics most associated with Americans overseas. Only recently has there been recognition of the importance of these cultural differences in medical education. Therefore, there is still some confusion in medical academia regarding what the focus should be and why cultural competence is now of interest to the Liaison Committee on Medical Education, the accrediting body for allopathic medical schools, universities, managed care organizations, and various governmental bodies. This course is designed to explore the impact of diversity on the training of physicians and other health care providers.

MEDEDU 2250 - TEACHING COMMUNICATION SKILLS

Minimum Credits: 2

Maximum Credits: 2

The most common thing that a physician does in his or her career is communicate with patients. This is the method that physicians use to gather information for the medical history, educate patients about their illness, and obtain informed consent regarding the various therapeutic options. During the past 25 years, doctor-patient communication has received increasing attention in medical education. Every medical school currently has a course focusing on communication skills, and many internal medicine, family medicine, and pediatric programs devote attention to these skills. The new ACGME requirements list communication skills as one of the six major focuses. In the future, physicians will need to be able to document their communications skills for certification and licensure. Over the past 10 years, there have been increasing data regarding the efficacy of educational interventions to improve physician communication skills. Courses at the medical school level and at the residency level need to incorporate these data to develop evidence-based interventions. The point of this course is to ensure that medical educators both understand the data and have the practical skills needed to design and teach communication courses.

MEDEDU 2260 - CURRENT TOPICS IN MEDICAL EDUCATION RESEARCH - A SEMINAR SERIES

Minimum Credits: 1

Maximum Credits: 1

This course allows students the flexibility to choose among 3 established seminar series in medical education and attend specific topics of interest and relevance to their teaching roles. The seminar series include: mermaid series: medical educational research methods and innovative design, academy of master educators (AME) seminar series, and medical education grand rounds. Specific information of dates and current and past topics for each series is contained on the individual websites. In order to receive the credit, the student is responsible to document attendance at 16 sessions. In order to promote active learning and enhance the relevance of the topics to the individuals' teaching roles, enrollees for this course will be required to choose one skill or learning point from the any of the 16 sessions attended. The enrollee will then provide a one page (maximum) description on how this was implemented in one of their specific teaching assignments or activities and describe its outcome. This needs to be completed prior to credit allocation and submitted to the course director.

MEDEDU 2325 - FUNDAMENTALS OF ADULT LEARNING IN MEDICAL EDUCATION PART 2

Minimum Credits: 1

Maximum Credits: 1

The process by which physicians make decisions is complicated and multifactorial. Understanding this process is critical for teaching the principles of clinical problem solving and medical decision making. Many theories and strategies have been put forward to better elucidate the process. The overall goals of this course are to introduce the learner to the principles of adult learning, to demonstrate how the principles are applied in the medical arena, and to develop strategies for teaching problem-solving and medical decision-making skills in the clinical setting.

MEDEDU 2400 - QUALITATIVE RESEARCH METHODS 1 : THEORY & DESIGN

Minimum Credits: 1

Maximum Credits: 1

What are the study designs, data collection methods, analytical approaches, and theoretical frameworks used by qualitative researchers? How should the quality and rigor of qualitative research be assessed? In this course, we will analyze a range of qualitative studies and discuss principles that should guide the selection of qualitative research strategies (e.g., sampling, data collection methods, analytical approaches, theoretical models). By the end of the course, you will be equipped to review a qualitative manuscript, respond to reviewer comments, and work effectively with qualitative methodologists. This course provides necessary background for students new to qualitative research and prepares students for Qualitative Research Methods II (CLRES 2401), which offers hands-on practice using qualitative methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2401 - QUALITATIVE RESEARCH METHODS 2: APPLICATIONS

Minimum Credits: 1

Maximum Credits: 1

In this course, you will develop and hone the skills of a qualitative researcher. You will practice designing qualitative and mixed methods research studies, creating interview guides and focus group protocols, applying different data collection methodologies, developing a codebook, and conducting thematic analysis. Finally, you will write a thorough and compelling methodology section for a grant or manuscript. The focus throughout the course will be applying the tools of qualitative research and reflecting on your experience. Prerequisite: Qualitative Research Methods I: Theory and Design (or equivalent).

Medical Elective

MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1

Minimum Credits: 0

Maximum Credits: 0

This course is designed for entering PSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to different departments and faculty will help the students select laboratories for the summer rotations and the research year.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 1

MSELCT 5110 - PSTP LABORATORY RESEARCH ROTATION

Minimum Credits: 0

Maximum Credits: 0

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for the research year.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 1

MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2

Minimum Credits: 0

Maximum Credits: 0

This course prepares PSTP students to successfully navigate key developmental milestones in their trajectory toward a physician scientist career. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a bio-sketch, specific aims, experimental plan and training plan related to their research year. Constructive peer critiquing of grant material provides a perspective on which to build grant writing skills.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 1

MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE

Minimum Credits: 0

Maximum Credits: 0

This small group session is required during the first 3 semesters of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of knowledge and how to present and critically review primary literature.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 1

MSELCT 5215 - MENTORED PROJECT INTERIM GRADE

Minimum Credits: 0

Maximum Credits: 0

The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and May of the third year, and November of the fourth year. This course will record the grade assignment for May 1 of the second year.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 2

MSELCT 5300 - BOARD STUDY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a block of time taken to participate in an intensive study period is required. This will usually mean a structured USMLE study course taken outside Pitt but could include a self-structured study schedule here at the school. The course may be given a specific title including the number of weeks.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: No Grade Required
Course Attributes: School of Medicine Year 3

MSELCT 5301 - SPECIAL STUDIES

Minimum Credits: 0
Maximum Credits: 0

This course will be registered when students are permitted to participate in a special project for one month during the third year of medical school. A descriptive title will be recorded on the official transcript to define this one month period of time.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

MSELCT 5310 - MENTORED PROJECT INTERIM GRADE

Minimum Credits: 0
Maximum Credits: 0

The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and May of the third year, and November of the fourth year. This course will record the grade assignment for November 1 of the third year.

Academic Career: Medical School
Course Component: Directed Studies

MSELCT 5450 - GET READY FOR RESIDENCY

Minimum Credits: 0

Maximum Credits: 0

This elective is an intensive preparation for students who are about to enter residency. Through daily interactive sessions, students will explore potential challenges a resident may face in a variety of specialties including medicine, infectious disease, pediatrics, obstetrics/gynecology, psychiatry, radiology, etc. There will also be simulated patient scenarios, entitled "nightmares on call," medical/legal preparation, including a mock deposition and trial, and procedural workshops. The course objectives are: 1) integrate clinical skills and knowledge in preparation for internship; 2) facilitate the fusion of knowledge obtained throughout the four years of medical school and translate it into treatment of complex patients with multi-system issues; 3) explore the evaluation and treatment of the patient with acute abdominal pain including when to call for a surgical consult; 4) identify the acutely ill child and explore the appropriate advice to give parents; 5) identify and treat the top ten women's health issues; 6) evaluate and manage acute electrolyte imbalances; 7) evaluate and treat illnesses in the pregnant patient including medication use in pregnancy; 8) gain insight into treating the patient with acute delirium and management of the violent patient; 9) evaluate and treat acute epistaxis; 10) interpret disease processes on chest x-rays, abdominal films and ct scans; 11) gain insight into the treatment of a patient with an acute stroke; 12) learn the proper way to communicate with patients, parents of patients and health care providers on the telephone; 13) manage (through simulation) a variety of urgent patient situations the student may encounter while on call in the hospital; 14) become familiar with the steps involved in legal actions against a medical practitioner including a simulated deposition and trial; 15) help students develop essential and durable approaches to personal wellness.

MSELCT 5455 - LITERATURE AND MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This course is intended for the student participating in the medical humanities area of concentration (AOC). The objective of this independent study elective is to use different kinds of culturally relevant literature (drama, poetry, children's literature, popular fiction, classics) to help explore the ways our culture imagines and interprets the experience of medicine. Specifically to gain an appreciation for the various parts physicians play in the literature of our culture. To learn to use the tools and systems of literary criticism to analyze literature, and then in turn to analyze the "text" of a clinical medical encounter. To gain an appreciation for the complex ways in which our own words and actions may be interpreted and misinterpreted within the clinical setting by patients who listen to us with ears and minds which have been prepared for the encounter by the literature, myths and stories of our culture. Selections to be read may include selections from Moliere, dr. Seuss, Nathaniel Hawthorne, Gwendolyn brooks, Jane Austen, J.R.R. Tolkien, the bible, mother goose and others. Requirements consist of: completion of a set of mutually agreed upon reading assignments. Preparation and submission of four, weekly essays each approximately 3 to 4 pages long. These essays will generally be reflective papers based on that week's reading assignment. Completion of an in-depth reflective manuscript of approximately 10 pages. This manuscript will be based on my reading of the poetry of Charles Bukowski, and will address the specific theme of Bukowski's attitudes (mainly pessimistic) towards the body and medicine, as well as his portrayal of poverty, addiction and other forms of "hard living." I may change my topic pending discussion with and approval of dr. Maier. iv. Attend a literature and medicine discussion series during the four week elective. The progress of this elective will be assessed on the basis of the submitted essays, final paper, and participation in the literature discussions. All of the assigned papers will be submitted no later than the Friday of the fourth week of the rotation.

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5495 - FUNDAMENTALS OF ORAL AND MAXILLOFACIAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

This four-week clinical elective is offered by the School of Dental Medicine and is designed for the medical student seeking exposure to oral and maxillofacial surgery and oral medicine. There is an emphasis for the physician-student to develop skills in the initial evaluation, differential diagnosis, and decision-making for a variety of problems in the oral cavity and craniomaxillofacial region. Development of medical decision-making skills will be encouraged by working closely with the attending staff and residents in ambulatory and inpatient settings. The clinical experience consists of supervised activity with a variety of patients who have issues related to craniofacial trauma, congenital deformities, oral pathology, oral manifestations of systemic disease, and other entities useful for most any practicing physician. The course curriculum includes an orientation to the scope of oral and maxillofacial surgery, a workshop on performing a detailed examination of the head and neck, and a laboratory experience on anesthetic injection techniques. Students will be able to formulate a basic differential diagnosis of a variety of disorders and evaluate a variety of different imaging modalities commonly used. A sizeable component of the rotation occurs in the operating room, where students will encounter a wide variety of procedures including trauma reconstruction, cleft and craniofacial surgery, treatment of pathology, and others. Continuity of care is emphasized by having the opportunity to see patients with the attending staff both pre- and post-operatively. Students will also participate in the department's conference series and journal club. Other in-depth experiences may be arranged based on individual interests and career paths. One of the strengths of this elective is the ability to formulate a custom approach to learning based upon the student's desires. Student's interest in careers in otolaryngology, emergency medicine, OMFS, ophthalmology, pathology, plastic surgery, or dermatology are likely to find this experience particularly interesting and practical.

MSELCT 5500 - INTERNATIONAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This elective is intended to give some structure and guidelines for students wishing to experience medical care in another country. Students are encouraged to pursue their own interests and contacts to arrange an international experience. The student is responsible for arranging this rotation. Information to be provided to the office of student affairs at least two months in advance - prepare an international clinical experience request form, travel abroad contract and checklist for international electives; designate one primary preceptor at the elective site and have written approval from the preceptor or school; develop a list of goals and objectives and a tentative list of activities which will allow the goals to be met. The student is

responsible for assuring that a grade is received at the end of the four-week elective.

MSELCT 5510 - GLOBAL TELEMEDICINE WITH THE ADDIS CLINIC

Minimum Credits: 0

Maximum Credits: 0

This course will involve partnerships with The Addis Clinic and Vanderbilt University School of Medicine. The Addis Clinic began as a volunteer effort of Dr. Stephen Chan, Professor of Cardiology at the University of Pittsburgh, when he was a graduate student at MIT and Harvard. Its mission is to utilize telemedicine to care for people living in medically underserved areas and connect volunteer physicians to local partner organizations and frontline health workers. The Addis Clinic has provided thousands of teleconsultations to over 24 countries on four continents. Their model requires frontline health workers to download an app to their existing smartphones, input patient data, and send it to consulting physicians who review the case and respond directly to the frontline worker. The Addis Clinic leadership recognizes that short-term mission trips are beneficial but have also found that telemedicine allows for longitudinal access to expert assistance across the globe. Their work rests on the simple fact that clinical knowledge spread widely saves lives. Last year, Vanderbilt University School of Medicine piloted a global health telemedicine course with one student who engaged in real-time telemedicine consults through The Addis Clinic. Vanderbilt will offer their own telemedicine course in parallel with this elective, and has agreed to share access to foundational science content, available online, focused on global health education for medical students. During this elective, students will be expected to participate as active members of the healthcare team via live telemedicine consults with patients in Kenya and possibly other countries. They will use WhatsApp to connect directly with patients and clinical officers in order to take a history, perform review of systems, and complete a virtual physical exam. Any available laboratory results and imaging studies will be submitted through a secure online portal for students to review. They will subsequently draft an assessment and plan, then review the case with an attending physician at UPSOM. The attending physician will refine their recommendations prior to submitting the formal consult to the local clinical officer through the secure portal. Students will receive written feedback for each patient write-up from the faculty member at UPSOM. When not participating in telemedicine consults, students will engage in foundational science modules shared by Vanderbilt University School of Medicine. Digital lectures will be assigned each week and are designed to augment their knowledge about topics pertinent to their clinical sites. These topics will include, but are not limited to, review of local epidemiology, infectious diseases, approach to prevention and outreach, and treatment protocols in resource-limited settings. Peer-reviewed journal articles will be assigned weekly for students to review in their own time, with in-person journal clubs led by one student per week. University of Pittsburgh resident physicians from the internal medicine department and faculty will be available to facilitate these journal club meetings and review the basic elements of study design and statistical analysis, as well as implications for clinical practice. Finally, weekly discussion sessions will be held with University of Pittsburgh clinical faculty to review student cases presented in the style of morning report, with the goal of reviewing diagnostic and management decisions. Special attention will be devoted to the way local epidemiology, resource availability, and cultural factors affected the final diagnostic and treatment recommendations.

MSELCT 5610 - COMICS AND MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Logistics and Educational Methods: This elective is a mix of a seminar course and a "studio art" course. Each class session will be 3-4 hours long, we will meet 2-3 times per week. Class sessions may involve: Short lectures by faculty about "art and medicine", drawing techniques, comic-making techniques. Close readings and group discussions of comics and other visual arts. "Studio art" sessions (Life drawing, Translating clinical anatomy knowledge to drawing anatomy, Practicing different art styles, Practicing different comic drawing skills). For every class session, students will have two homework assignments: A reading assignment - either a comic (many related to medicine) or a critical art analysis text related to either "art and medicine" or observation. A drawing assignment. In addition, students will also be expected to keep a sketchbook and draw at least once a day for the duration of the course. (The aim for this course-long project is to promote creativity and build observation and drawing habits.) There is also a tentative plan for 1 or 2 "field trips" to a local art museum to practice observation skills. **Evaluation:** Patient education comic = 15 percent. Midway through the course, each student will create a 1 page "patient education" comic on a medical topic of their choice. The AMA recommends that patient education documents be written at no more than an 8th grade level (some argue it should be at a 4th grade level). Comics may be ideal for these education documents as comics predominantly use pictures to communicate. Potential topic ideas: Explanation of a disease or disorder. Explanation of a procedure and what to expect. How to prevent a disease or injury from occurring. **Final Comic = 35 percent.** The course's final project will be a 4-8 page comic related to medicine. Topics may include (but are not limited to): a memorable patient experience, a challenge faced during medical training, a personal experience with illness or disability, or a comic about a specific healthcare issue. This will be done in stages, from concept

sketches to scripting to layout sketches to mockup pages to final product Many of the in-class sessions and homework assignments will be geared toward completing this comic This final comic will be shared with the medical school community with a published anthology and/or public display of the artwork Participation in class discussions = 50 percent

MSELCT 5700 - CHANGING SCIENCE, CHANGING SOCIETY: A GUIDE TO 21ST CENTURY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Biomedical knowledge is evolving at an ever-increasing pace. The environments where our graduates will practice are also changing, in response to society's needs and fiscal and policy influences. The most effective medical care of patients will be inextricably linked to the application of the most up-to-date knowledge. Optimal care will be patient-centered, and take fully into account the social determinants that influence health, illness and well-being. This new course directly supports learning about these subjects, at an opportune point in students' professional development.

MSELCT 5720 - SCHOLARLY PROJECT ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Analytical thought and rational decision-making are the hallmarks of modern medical practice. The ability to read and critically evaluate medical literature and to think through a patient's medical concerns or a biomedical problem from first principles is an essential component of undergraduate medical education in the current era. The design, performance, and presentation of an independent project and the critical evaluation of the projects of others represent one outstanding way to develop and crystallize analytical thinking skills and the tools for rational decision-making. Students are given an opportunity to read and critically evaluate scientific and medical literature, present a research proposal and get direct feedback from faculty and other students on that proposal, perform a research project under direct mentorship from an expert in that field, present the research project in both informal and formal collegial venues, and discuss, trouble-shoot, and critique the research and presentations of their colleagues in their medical school class. Students must spend the equivalent of eight weeks in pursuit of their mentored project during the final two years of medical school. Students may participate during a block of time or over an extended period of time. When a block of time is used, this course is registered. The grading and evaluation for this course is completed by the student mentor.

Course Attributes: School of Medicine Year 3, School of Medicine Year 4

MSELCT 5745 - REMEDIATE MENTORED PROJECT

Minimum Credits: 0

Maximum Credits: 0

The mentored project (aka scholarly project) is a graduation requirement. MSELCT 5745 will be registered when an unsatisfactory grade is assigned to MSELCT 5730, mentored project completion. The scholarly project (SP) committee will outline a plan to remediate the deficiency. The plan will include a specific period of time in which the student must successfully complete the remediation to the satisfaction of the SP committee. The student transcript will record that MSELCT 5745 is a repeat of MSELCT 5730.

MSELCT 5765 - PRE CLERKSHIP MONTH

Minimum Credits: 0

Maximum Credits: 0

This course combines three elements: 1) the traditional required Preclerkship Week, 2) a segment of content related to Covid-19 readiness, and 3) didactics and skill-building for ambulatory medicine. Students will learn remotely, with a mix of synchronous didactics and asynchronous learning - including podcasts, online modules, and readings. Some activities may involve remote use of standardized patients. Synchronous didactics will take place from 10 am to 12 pm at most during the first three weeks of the course, with asynchronous learning as per student preference at other times. During the final week, students will attend class activities 6/1-3 for full days 8:30 am to 5 pm. Reflective Writing (2 assignments) Self-Assessment of Exam Skills Completion of and Success in Simulation Activities Participation in synchronous discussions Attendance will be taken at all sessions. Students will be able to miss three sessions with permission but will have to complete make-up work. Two unexcused absences will lead to an unsatisfactory grade.

MSELCT 5805 - INTERPROFESSIONAL HEALTH CARE TEAMS

Minimum Credits: 0

Maximum Credits: 0

Course objectives: clarify the knowledge base, skills and resources different professions contribute to a health care problem, and develop understanding and respect for those contributions; explore overlapping roles and responsibilities of HC team members; clarify boundaries and responsibilities unique to individual professions; learn to communicate constructively with other HC team members; learn to design patient care plans based on shared input; identify ways of managing team members with shared / different responsibilities; realize one's own limitations and recognize when it is appropriate to seek advice or assistance from another profession. This elective course will bring together advanced level students in medicine, nursing and pharmacy to learn about and actively practice interprofessional, team-based health care. Clinically based, experiential learning will be emphasized and interwoven with didactic and reflective sessions. The course will begin with presentations and discussions to explore the meaning of interprofessional teamwork; to introduce students to the backgrounds and contributions of different professions on teams; to provide examples of highly functional vs.. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around two disease models, heart failure and renal disease, and include inpatient and outpatient settings. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's disease and ongoing status, development of management plans responsive to the patient's evolving state, discharge planning, follow-up and care in outpatient settings, etc. Students will interact with health care teams at various sites, as well as receive instruction and feedback from core teaching faculty. Evaluation and grading will consist of attendance and participation; presentation of a written assessment, care plan and patient summary for each "disease unit," to include a team oral presentation.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5808 - ADVANCED INTERPROFESSIONAL NURSING HOME HEALTH CARE TEAMS

Minimum Credits: 0

Maximum Credits: 0

This elective course brings together advanced level students in medicine, nursing, and pharmacy to learn about and actively practice interprofessional, team-based health care in nursing home (NH) environments. Clinically based, experiential learning is emphasized and interwoven

with didactic and reflective sessions. The course entails presentations and discussions to explore the meaning of interprofessional team work; to introduce students to the backgrounds and contributions of different professions and teams; to provide examples of functional vs. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around a NH model and include patients in various care stages in this overall setting. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's history (medical, nursing, pharmacy, social/family, financial, etc.) And ongoing status, development of management plans, and evaluation of outcomes. Students will interact with health care team members at a local nursing home site, as well as receive instruction and feedback from core teaching faculty. The course will run Monday through Friday. Evaluation and grading will be done on both an individual and a team participation level. Included will be attendance, written assessments, care plans and patient summaries. A team oral presentation will be evaluated by core faculty and representative health care experts.

MSELCT 5850 - PEPTIDE HORMONE RECEPTORS

Minimum Credits: 0

Maximum Credits: 0

This four to eight week senior elective is available for one student per month. Research is in the general area of the mode of action of polypeptide hormones, the isolation of hormone receptors and structure function studies of biologically active polypeptide hormone receptors.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5851 - RESUSCITOLOGY

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are provided for one student per month at the international resuscitation research center under the direction of the director. Laboratory studies range from the cellular level to long-term animal outcome experiments on total circulatory arrest (cardiac arrest) and shock states.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5853 - HEALTH POLICY

Minimum Credits: 0

Maximum Credits: 0

The objectives of this course are to expose medical students to current health policy issues and to methods used in analyzing them. Medical students do independent studies of issues of interest to them. They may also join teams of researchers in the health policy institute in conducting institute-sponsored studies.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5854 - ETHICS IN CLINICAL PRACTICE

Minimum Credits: 0

Maximum Credits: 0

The aim of the four week elective is to help physicians identify, analyze and resolve the ethical dilemmas they face in clinical practice. Students will meet in small group seminars with faculty to discuss readings which emphasize the central issues in medical ethics. Students will also participate in one of several in-patient services, identifying patients about whom ethical issues arise. The students will present these cases at ethics rounds for discussion. Students will also be involved in formal hospital ethics counsels.

Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSELCT 5856 - MILITARY SCHOLARSHIP ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

This course will accommodate health profession scholarship students who must do an active duty tour during each year of medical school for which they have a scholarship. These clinical experiences do not always conform to a specific course offered by the medical school, such as flight surgeon and aerospace medicine. This generic course will cover all military exposures for credit.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSELCT 5857 - EVIDENCE-BASED MEDICINE

Minimum Credits: 0
Maximum Credits: 0

A 4 week elective to introduce graduating students to the latest techniques in EBM as they apply to the clinical practice of medicine. EBM is the conscientious, explicit, and judicious use of the best available evidence in making decisions about the care of individual patients. It is an approach to problem solving based on information gathering and analysis. The course consists of a clinical rotation, small group workshops, computer lab sessions and independent study. Each student will present the results of their analysis of one clinical question.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSELCT 5858 - PUBLIC HEALTH FIELD PRACTICUM

Minimum Credits: 0
Maximum Credits: 0

This elective is a hands-on public health practicum that is appropriate for 3rd and 4th year medical students. Prior public health experience, while useful, is not required. Under faculty guidance, students will be placed at a local or state public health agency and participate in on-going activities. These may include disease surveillance and early warning; communicable disease control including outbreaks and food safety; environmental health (air, water, and ground); disaster preparedness, planning and response; health policy and planning; vector and pest control; and applied epidemiology. Specifics of the activities will vary depending on site and student interest. Students wishing to develop their own field-placement opportunity may arrange alternative sites with the advance approval of the course director. Students will also participate in a series of focused seminars on public health topics, presented on one half-day per week, on topics such as: public health practice; epidemiology in clinical practice; disasters, outbreaks and emergencies; avian and pandemic influenza. A short presentation and paper (3 - 5 pages) summarizing key aspects of the experience is also required. Through these activities, students will gain the opportunity to work closely with experienced public health professionals and to develop a fuller

understanding of the intersection of clinical medicine and public health.

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSELCT 5860 - EDUCATIONAL TECHNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4-week elective combines medical science with new technology in the information and computer sciences. The student will study a wide variety of aspects of technology as it relates to research, clinical medicine and/or medical education. The elective will provide an opportunity for expansion of the student's knowledge base and allow the student to create and/or evaluate a new implementation of technology in medicine. This elective assumes basic understanding of current computer software, the internet and general use.

Academic Career: Medical School

MSELCT 5900 - TRANSLATING KNOWLEDGE INTO ACTION: THE BASIC SCIENCE OF CARE

Minimum Credits: 2

Maximum Credits: 2

The "basic science of health care" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and that these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: Medical School

Course Component: Lecture

Grade Component: Grad HSU Basis

MSELCT 5901 - INTERDISCIPLINARY COLLABORATION, PROBLEM SOLVING, AND CREATIVITY IN HEALTH CARE DELIVERY

Minimum Credits: 1

Maximum Credits: 1

The "interdisciplinary collaboration, problem solving, and creativity in health care delivery" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: Medical School

Grade Component: Grad HSU Basis

MSELCT 5910 - AREA OF CONCENTRATION

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student a dedicated period of time to complete the area of concentration (AOC) requirements. The AOC program at the university of Pittsburgh school of medicine offers the opportunity for students to pursue an area of personal interest, over their four years of medical school. This is accomplished with a series of longitudinal, elective experiences which supplement the required core curriculum. These para-curricular education tracks provide an opportunity for interested students to explore a potential career plan and uniquely enhance their medical education. The AOC may be utilized to meet the scholarly project, which is a graduation requirement.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

Minimum Credits: 0

Maximum Credits: 0

This course meets monthly throughout the year and is designed for all physician scientist training program students. The purpose of this course is to provide each PSTP student a forum to present his or her research and to discuss their research ideas, designs and results, and to give and to obtain peer feedback. Each student has the opportunity to present at all stages of a project, whether it is starting a project, planning the design, analyzing the data, or getting ready to present the results at conferences or in manuscripts. This course encourages all students to engage in scientific discussion and feedback on each project.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

MSELCT 5975 - CLINICAL SCIENTIST TRAINING PROGRAM RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students who apply and are accepted to the clinical scientist training program (CSTP) participate in a course of study leading to either a certificate or a master of science in clinical research. Participants will devote one year of dedicated study to clinical research following the third year of the professional medicine (md) program. During the fourth year of the md program, a maximum of twelve (12) weeks may be scheduled to complete CSTP course work or the research project. This experience will be graded by the director of the CSTP program and will be recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit, e.g., CSTP-related research 12 weeks.

Medical Scientist Training Program

MSTP 5010 - MOLECULAR MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This course is designed for entering MSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to the primary scientific literature will prepare the students for entry into the Ph.D. component of the combined degree. Exposure to different departments and faculty will help the students select laboratories for their thesis work.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION

Minimum Credits: 0

Maximum Credits: 0

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/ her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE

Minimum Credits: 0

Maximum Credits: 0

This small group session is restricted to MD/Ph.D. students during their first two years of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of medical knowledge and how to present and critically review primary literature.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 2

MSTP 5955 - MSTP WORKSHOPS

Minimum Credits: 0

Maximum Credits: 0

This discussion-based course, guided by faculty preceptors, meets eight (8) times per year over dinner and is attended by MSTP students from all years. Each class begins with description of a topic related to training on being a physician scientist. The topic for discussion is developed by students from different years in order to assure good representation of the challenges offered at various stages of training. After presentation of the topic, students work in groups of 8-10 at assigned dinner tables and each table reports a summary of the discussion followed by group discussion. Every student must complete a class evaluation at the end of each session. The goals of the course are to provide a forum in which students can openly discuss training and ethically challenging situations with their peers; to provide a venue in which junior students can learn from senior students; to understand that responsible conduct of research and medicine is a critical aspect of research training and that it remains an important concern at all levels of a research career.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT

Minimum Credits: 0

Maximum Credits: 0

This course is required of the students participating in the md/Ph.D. program medical student training program (MSTP), at the end of their first graduate school year. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a biosketch, specific aims, experimental plan and training plan related to their Ph.D. thesis. Constructive peer critiquing of grant material provides a perspective on which to build grant writing skills.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS

Minimum Credits: 0

Maximum Credits: 0

This seminar style course is designed for MSTP students during the summer between the first and second year of medical school with one or two faculty facilitators. The learning objectives of the course are to foster social and scientific collaboration between students; to expose students to different scientific methods, techniques, and analyses; to create an environment where students can voice difficulties with their research, labs or mentors and seek constructive feedback; to develop habits of daily writing/presenting. The students are required to present three times during the course and assessed on the clarity and quality of their MSTP retreat poster.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

MSTP 5975 - CAREER-RELATED RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students apply and are accepted to the medical scientist training program (MSTP) during which they participate in the first two years of the professional medicine program before taking leave to pursue a doctor of philosophy degree of their choosing. They must defend their thesis before reentry to the professional program. They then participate in the combined third and fourth years of the professional program, which will grant a maximum of six months of credit for being granted the Ph.D. degree. A number of these physician-scientists will choose to spend all or part of this six months of the fourth year in the pursuit of research related to their Ph.D. field of study. The proposal for this research is vetted by the dean of the MSTP and when approved the student will be registered for this elective course. This experience will be graded by the research preceptor and recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS

Minimum Credits: 0

Maximum Credits: 0

Offered to md/Ph.D. students in the first three Ph.D. years. Part one is a 4-hr introductory workshop with emphasis on principles in ethical decision-making and formulating conceptual frameworks for evaluating situations with ethical implications. Part two consists of student participation in upper-level case-based workshops. Facilitation will be by university faculty and will apply the principles and methods of general ethics problem solving covered in the introductory workshop. The scenarios will be of specific import to the physician scientist.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSTP 5993 - LONGITUDINAL CLN CLERKSHIP 3

Minimum Credits: 0

Maximum Credits: 0

2 weeks junior hospitalist service are given for preparation of return to medical school. This course is not graded (pass/fail) and is not credited. This course is a General medicine service with 3 residents and 1 attending. Each MSTP student will be paired with a resident on this internal medicine clerkship following up 1-2 patients, interviewing and examining patients, writing notes, presenting patients to residents and attending during rounds. Students receive structured feedback from resident and attending during these 2 weeks. To be eligible for this course, a student must have completed LCC1 and LCC2. In addition, 8 additional hours of formal preparation either by attending Clinical Reasoning mini elective (taught evenings in Winter) or attending 8 Clinical Reasoning Conferences or M&Ms in the most recent year, is a prerequisite to participate in LCC3. Attendance at Pre Clerkship week (held in May) is strongly recommended for students returning to medical school in May or September for LCC 3, while it is highly recommended for students returning to medical school in January and can be done in the prior year.

Minimum Credits: 0

Maximum Credits: 0

Medical anatomy - section 1 of the basic science block introduces themes from anatomy, as well as providing an introduction to imaging and radiology. Instructional modalities in this intensive course include lecture, dissection and problem based learning exercises.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5116 - FOUNDATIONS OF MEDICINE 3

Minimum Credits: 0

Maximum Credits: 0

Section 3 of the basic science block begins with a segment that elucidates the systems of communication that are activated upon challenge by disease causing organisms and physiologic stressors (immunology). The final course in this section is the study of disease-causing organisms, their occurrence, preferred hosts and the diseases they cause. Evaluation is based on laboratory exercises, problem-solving sessions and written examinations.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5124 - PATIENT, PHYSICIAN AND SOCIETY 1

Minimum Credits: 0

Maximum Credits: 0

This section consists of two courses: 1) introduction to being a physician has case problems on public health and medicine, breast cancer and

HIV/AIDS with patient interviews, group exercises, lectures, independent study and self-directed learning; 2) ethics, law and professionalism addresses the basic concepts and methods for analysis of ethical and legal issues in the physician-patient relationship. The course's sessions are structured as seminars with both didactic and interactive components. Videotapes, email case discussions, and debate will complement the lectures.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5127 - FOUNDATIONS OF MEDICINE 2

Minimum Credits: 0

Maximum Credits: 0

Section 2 of the basic science block is a multi-disciplinary section that introduces students to core principles and terminology of cell and tissue biology and pathology, genetics and metabolism. It introduces students to the biochemical and molecular basis of cell function in the context of normal physiologic function, and to the processes of disease at the cellular level. Cellular, individual and population genetics builds on this course and study of the principles governing energy metabolism of cells and organisms necessary to maintain homeostasis complete this sequence of courses. Lectures, workshops, laboratory exercises and small group problem-solving sessions comprise this section.

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5128 - PATIENT, PHYSICIAN AND SOCIETY BLOCK - SECTION 2: BEHAVIORAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Section 2 of this block consists of the course - behavioral medicine - which is a multi-faceted consideration of human behavior from the perspectives of both the patient and the physician. The course uses the biopsychosocial model to consider defining elements of the patient-physician relationship, showing how neurobiological, behavioral and social factors can have determinative and interactive impacts in the causation and course of human disease, how they contribute to health, and how they can be modified. Topics are introduced in large group format via patient interviews, videos and panel discussions, each followed by breakout small group sessions featuring case-based scenarios to further the understanding of this complex topic. Student evaluations are based on small group participation, a writing assignment and an exam.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5133 - NEUROSCIENCE/PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This first organ systems block includes two courses: neuroscience and introduction to psychiatry. The neuroscience course provides a detailed, comprehensive survey of nervous system structure, function and dysfunction. Topics include sensory and motor systems, learning and memory, language, sleep and epilepsy, as well as brain imaging methods, vascular disorders, neoplasms, and infections of the central nervous system. Material is integrated across multiple disciplines including neurophysiology, neurology, pharmacology, neuropathology and neuroradiology. The goal is to provide a mechanistic understanding of normal and pathological brain function, and to teach methods of identifying and localizing major disease processes. The learning formats are lectures, laboratories, PBLs, case-based neurology conferences and self-study. Student evaluation is based on two written exams and PBL participation. The introduction to psychiatry course introduces students to common psychiatric illnesses and their assessment and treatment. There is a written exam and a final paper or presentation due at the end of the course. Student group attendance and small group participation are also included in the overall course grade, which will combine the two courses.

Academic Career: Medical School

MED 5137 - INTRODUCTION TO PATIENT CARE 1

Minimum Credits: 0

Maximum Credits: 0

The medical interviewing course assists the student in developing interviewing skills using patient simulators. The introduction to physical examination course provides the first introduction to the techniques of performing a history and physical examination. Practicing on peers, students learn the skills of a normal physical exam and how to conduct it in an orderly and sequential fashion. Emphasis is on technique and normal findings with little discussion of pathophysiology. Use of the stethoscope, oto-ophthalmoscope, reflex hammer and tuning fork are demonstrated and practiced. The goal is to familiarize students in the use of their instruments and prepare them to be observers in physician offices during the remainder of the first year.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 1

MED 5138 - INTRODUCTION TO PATIENT CARE 2

Minimum Credits: 0

Maximum Credits: 0

The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. The advanced physical examination course spans the first two years. Pathophysiology and its correlation to hx and ph skills are stressed. Students will record and synthesize the information collected during the clinical encounter as a written history, physical exam, and patient assessment with a goal to do complete and accurate history-taking and physicals.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5218 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 2: INTRODUCTION TO PATHOBIOLOGY - BODY FLUID HOMEOSTASIS

Minimum Credits: 0

Maximum Credits: 0

This second section of the organ systems pathophysiology block consists of four segments: a week long study of principles of pharmacology, followed by courses on the cardiovascular, renal, and pulmonary systems. The course is interdisciplinary. In addition to the basic science components, the subject matter includes clinical aspects of diseases and their medical management. The learning format is in small groups, laboratories, lectures, tutorials/conferences and self-study. Student evaluation is based on written exams and small group problem-solving participation.

MED 5225 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 4: PHARMACOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course begins with the neuroscience segment of organ systems pathophysiology (OS) and runs through all of the courses in organ systems 1, 2 and 3, including a concentrated week of principles of pharmacology with an emphasis on adrenergic pharmacology at the beginning of os2. At appropriate times in those courses, basic mechanisms of pharmacologic agents are taught in the context of each organ system. This course covers classes of agents, mechanisms and drug targets as well as potential side effects and future developments. The format is primarily lecture with some workshops, as well as material incorporated into problem-based learning sessions.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 2

MED 5227 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 5: INTEGRATED CASE STUDIES

Minimum Credits: 0

Maximum Credits: 0

The course objective of this fifth section of the organ systems block is to apply information acquired during the first two years to patient cases as presented on the computer, further developing independent active learning and data acquisition skills. In addition, the course serves as a bridge to the direct patient responsibilities of the final two years of medical school. The format is exclusively problem-based learning. There is no final examination. The course is honors/pass/fail based on small group participation.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 2

MED 5233 - INTRODUCTION TO PATIENT CARE SECTION 3: ADVANCED PHYSICAL EXAMINATION 2 AND CLINICAL EXPERIENCE 2

Minimum Credits: 0

Maximum Credits: 0

The advanced physical examination course of the introduction to patient care block is an extension of the introduction to physical examination course. During this course, which spans the first two years, students will expand their knowledge of history taking and physical examination skills by examining patients both in adult medicine and in the pediatric setting. Patho-physiology and its correlation to history and physical examination skills are stressed. Students are also expected to record and synthesize the information collected during the clinical encounter as a written history, physical

exam, and patient assessment. The goal is to prepare students to do complete and accurate history-taking and physical examinations during their clerkships. This course is integrated with the clinical experience course. There are seven, month-long sessions, four of which will be physical examination sessions and three will be the clinical experience rotations described below. There is a written examination, a clinical performance grade from instructors, and a required performance-based assessment at the end of the course. The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. Each student will be scheduled for three, month-long rotations, one month of one afternoon a week in a physician's office, one month of once a week afternoon visits to an assigned community site for underserved populations, and one month with a student-selected ambulatory subspecialty office or an additional month at a primary care physician's office. There will also be full class sessions on health care disparities, alcohol and substance abuse, and health care to the underserved. No textbook is required but a syllabus is provided. Completion of weekly teaching and learning logs is required. Grading is determined by attendance and passing the final examination.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5234 - INTRODUCTION TO PATIENT CARE-SECTION 4: ADVANCED MEDICAL INTERVIEWING - CLINICAL PROCEDURES

Minimum Credits: 0

Maximum Credits: 0

The first four weeks of the final section of the introduction to patient care block will be the advanced medical interviewing course. This course is designed to move students from the basic patient interviewing skills that were introduced in the first year medical interviewing course to a higher skill level in patient communication which will be required during the clinical clerkship years. Using patient simulators, and with guidance from a faculty facilitator and peers in small groups, students will learn and practice "hard to ask questions" and deal with specific "content-sensitive" cases (e., Abuse, anger, drug use and sexuality). The second four weeks of the block will consist of the clinical procedures course, which will introduce students to basic diagnostic, therapeutic, invasive, and non-invasive procedures commonly performed in clinical medicine. This course gives students the opportunity to practice clinical procedures in a laboratory setting, through interactive small-group sessions with the faculty, using equipment and supplies normally found on patient care units. The goal is to familiarize students with basic clinical procedures that they may be asked to perform on patients during their clinical rotations.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

MED 5261 - PATIENT, PHYSICIAN AND SOCIETY: POPULATION HEALTH

Minimum Credits: 0

Maximum Credits: 0

This course has been developed to bring students essential and timely content on selected topics in population health. The course will address issues of: health care finance from the patient's perspective; public health overview; social determinants of care; global health issues with an emphasis on the global burden of disease and related financial issues; financial preparedness for physicians (student debt and looking ahead to specialty choice); health care reform. Learning modalities will be large group didactic sessions, self-study segments, and small group exercises. Evaluation will be determined by: completion of assigned self-study units; attendance at large group sessions; completion of course segment assignments.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 2

MED 5265 - EVIDENCE AND DISCOVERY 3

Minimum Credits: 0

Maximum Credits: 0

The third section of this block is the second part of a two-year course (methods and logic in medicine) intended to prepare students for their four-year, mentored scholarly project. In this segment, students will use the tools and skills obtained during the preceding course to analyze seminal literature in science and medicine. Evaluation will be based on students' critiques of assigned papers as well as on a formal presentation, to their small group, of a problem of interest to them, methods of approaching it and feasibility of their proposed approach.

MED 5322 - ADULT INPATIENT MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This is an 8 week interdisciplinary clerkship divided into 2 blocks of 4 weeks each. During each block, the student is assigned to an inpatient rotation either at Montefiore, the Oakland V.A. medical center or Shadyside hospital. On the first day of each block, the student is required to attend didactic sessions given by faculty in emergency medicine and geriatric medicine. During the inpatient rotation, students are assigned their own patients and are taught, under supervision, to apply acquired skills to clinical situation. Usmle in medicine is given at end of rotation and exam in CCM.

MED 5328 - COMBINED AMBULATORY MEDICINE AND PEDIATRIC CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

The eight week combined ambulatory medicine and pediatrics clerkship provides a combination of four week experiences in the disciplines of internal medicine and pediatrics. One half-day per week the students participate in a multi-faceted, interactive didactic session learning advanced skills and discussing issues common to both of these disciplines. Student's clinical experiences in internal medicine and pediatrics are at office or clinic sites where they will be exposed to the spectrum of care that is provided in the ambulatory setting. Sites may include hospital-based practices and community locations. This is a required clerkship.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

MED 5329 - ADULT OUTPATIENT MEDICINE CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

Description of course Adult Outpatient Medicine Clerkship provides four weeks of internal medicine training focused in the outpatient clinical setting. Students will participate in multi-faceted, interactive didactic sessions learning advanced skills and discussing issues common to this discipline. Students' clinical experiences in Internal Medicine are at office or clinic sites where they will be exposed to the spectrum of care that is provided in the ambulatory setting. Sites may include hospital-based practices and community locations. Students are evaluated by their preceptors.

MED 5350 - DEATH, DYING AND THE DOCTOR

Minimum Credits: 0

Maximum Credits: 0

This elective offers medical students the opportunity to explore in depth some of the philosophical, cultural, religious, and existential aspects of human beings' encounter with death. The course will employ short stories and poetry, the visual arts, and more traditional scholarly work in the humanities and social sciences. Though the course is not a clinical introduction to palliative care, it is intended to enhance students' preparation for intelligent, self-aware, and skillful care of critically ill and dying patients. While students will have some contact with the palliative care consultation service during the elective, the primary goal of the course is to enrich students' appreciation of the meanings of death and dying as experienced and expressed by human beings throughout history, and in various cultural settings. Requirements will include weekly meetings to discuss assigned reading, observation with the palliative care service, and a personal reflection paper of 7 to 10 pages.

Course Component: Clinical

Grade Component: Exchange MED SU5

MED 5423 - RACE AND MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Race-based differences in health outcomes have long been documented in the literature, but only recently has the concept of structural racism gained traction as a driver for these observed differences. This elective will introduce the history of race and its origin as a social construct that puts into place a power structure favoring one group over others. Students will be asked to research and present a historical event illustrating how racism has affected health outcomes (e.g., Tuskegee experiment, death of Charles Richard Drew, cardiac catheterization for acute myocardial infarction, etc.) both in the remote and recent pasts. The disparities elucidated by the COVID-19 pandemic will be discussed as a class. Students will read and discuss excerpts from literary fiction, poems, and essays that explore historical and contemporary accounts of race in America, challenge the structures and politics that perpetuate health disparities, and highlight the perspectives of writers from marginalized communities. Additionally, students will present journal club presentations of articles demonstrating the effects of structural racism on health outcomes. The report on Pittsburgh's Inequities Across Gender and Race will be presented, and students will be asked to brainstorm solutions for addressing the disparities observed. Through assigned readings from selected texts (e.g., White Fragility, How to be an Anti-Racist, etc.) students will longitudinally develop skills to become anti-racist physicians who work to mitigate health disparities in their communities. They will receive implicit bias training and learn to identify stigmatizing language in oral presentations and written documentation. Cases taken from Diversity and Inclusion in Quality Patient Care will be used for the students to practice these skills.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

MED 5425 - COMBINED MEDICINE/PEDIATRICS HEALTH CARE TRANSITIONS

Minimum Credits: 0

Maximum Credits: 0

The goals of this elective are to introduce medical students to the specialty of combined internal medicine-pediatrics. In particular, this elective focuses on understanding the issues of patients with special health care needs as they transition from pediatric to adult-centered care. Students will be involved in numerous educational activities, including attending several outpatient specialty clinics, visiting pediatric rehabilitation facilities, performing home visits with patients, performing independent learning activities, and reading the current literature about transitions in care. Students are supervised by internal medicine, pediatric, and med/peds faculty members who are involved in caring for patients with special health care needs of all ages. If students have a particular interest in a certain subspecialty clinic, every effort will be made to accommodate a request made to the course director.

MED 5491 - WOMEN'S HEALTH

Minimum Credits: 0

Maximum Credits: 0

The Women's Health Elective is a multidisciplinary elective facilitated by the Department of General Internal Medicine. Students will rotate primarily with the General Internal Medicine Women's Health Faculty in the Montefiore Outpatient Clinic. They will also have the opportunity to work with several other disciplines including gynecology, urogynecology, gastroenterology, cardiology, rheumatology, endocrinology, maternal fetal medicine, genetics, pelvic floor physical therapy, breast oncology, and cancer survivorship. Clinical preceptors have a passion for women's health and gender-based care. These experiences are not guaranteed every rotation and are subject to clinic availability. Students will also partake in a core women's health didactic curriculum and weekly lunch lectures hosted by the Section of Women's Health. Topics vary by year but tend to cover advanced women's health topics such as care of the pregnant patient, interpersonal violence, hypercoagulable disorders in women, challenging contraception cases, gynecologic issues (endometriosis, fibroids, chronic pelvic pain), depression/anxiety/PTSD, migraines, thyroid disorders, and other conditions that have a gender predisposition. Students will be involved in basic bedside gynecologic procedures such as IUD insertion/removal, endometrial biopsy, nexplanon insertion/removal, and participate in routine and acute gynecologic care. Students will be asked to review a journal article toward the end of the rotation in a small group setting. This rotation counts as part of the Women's Health AOC Elective requirement. Away students are encouraged to apply but will need to be granted permission to ensure a good fit with this elective.

Minimum Credits: 0

Maximum Credits: 0

Our elective will immerse students in our combined Med-Peds clinic and introduce them to Med-Peds primary care - the most intrinsic and fundamental basis of what it means to be Med-Peds. They will see patients in the AM with Med-Peds faculty (including Dr. Allie Dakroub, the rotation coordinator and Assistant Program Director for Ambulatory Education of the Med-Peds Residency Program) and will also assist our senior residents in the PM as an "assistant clinic supervisor". [Our Med-Peds senior residents all serve as "clinic supervisor" wherein they manage the clinic. Students on this rotation will assist them in an attempt to gain an understanding of the logistics and benefits/challenges of our primary care clinic]. They will have a hand in helping manage the clinic (participating in education of junior students and residents, helping call patients and provide lab results/patient counseling, helping field acute-care visits, helping determine appropriate vaccinations and screening services and result interpretation thereof, among other daily clinical tasks). Additionally, they will partake in all Med-Peds educational experiences (noon conferences, journal clubs, and quality improvement). As a capstone of their rotation, they will be required to compose an essay regarding Med-Peds and social determinants of health. We also aim to facilitate experiences in subspecialty care with respect to Med-Peds practice for our students in whom that interest lies. Students will have an introductory email sent to them weeks prior to the rotation. Should they declare an interest in subspecialty Med-Peds care, we are more than happy to reach out to our Med-Peds colleagues across domains of Pitt IM and Pitt Peds to provide them experience in such clinics, wherever possible, and to help facilitate mentorship and career counseling connections, when possible, for such career trajectories. Students will work from 8am until 5pm M-F. There are no weekend, night, nor "call" experiences as part of this rotation. An introductory and closing session will occur with Dr. Allie Dakroub on the first Monday and last Friday of the rotation. Essay will be submitted at this time. Throughout the rotation, the student will also have 1 fully observed encounter each week (to be completed by either the clinic supervisory resident or a faculty member) and will be provided immediate feedback on pre-identified learning goals and communication style/technique.

MED 5500 - PULMONARY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Elective is aimed at acquainting student with the diagnostic and therapeutic approaches to the common pulmonary diseases, including lung cancer, asthma, chronic bronchitis, emphysema, etc. Student will become acquainted specifically with chest roentgenogram and subtleties of its interpretation through daily rounds with staff and fellows. Student will work as a team with a fellow and staff attending seeing consultations and developing therapeutic and diagnostic plans which will be reviewed and critiqued by the fellow and attending. This is a 4 week elective.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5510 - RHEUMATOLOGY AND IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective is engaged in an integrated program of patient care, teaching and research with emphasis on clinical evaluation and treatment of patients with a variety of rheumatic and immunologic disorders. Students perform initial exam of patients seen under the supervision of a fellow and rotating residents and take an active role in teaching rounds with a member of the faculty specifically assigned to this service. Students may share in responsibility for primary care of patients admitted to hospital and several outpatient clinics.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5520 - RENAL DISEASE

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective provides exposure to a full range of renal and fluid-electrolyte disorders. Students interview and examine patients admitted to the care of the renal staff physician or referred consultation, will follow the patients jointly with the nephrology fellow and participate in daily rounds with faculty. Attending also conducts ad hoc discussions regarding renal pathophysiology, diagnosis and management of acute and chronic renal diseases, and electrolyte disorders. Students attend regularly scheduled conferences. This elective is also available at hospitals outside the health center.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5530 - NUTRITION AND INTESTINAL HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to offer students a learning experience in both the science and practice of medical nutrition. Under the supervision of faculty and fellows, students will be given responsibility for evaluation and management of patients seen in nutrition clinics, admitted to the medical and surgical services. Daily work and teaching rounds are supplemented with regular conferences and seminars on basic and clinical topics in nutrition. Students will be required to participate in weekly journal club to review current literature pertinent to nutrition.

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5535 - MEDICAL NUTRITION: PAST & PRESENT THEORIES AND PRACTICE

Minimum Credits: 0

Maximum Credits: 0

This is an elective course for M3-4s, or students returning from dual-degree work, combining medical history with clinically useful knowledge about common nutritional and dietary problems in pediatrics, internal medicine/ general practice (including geriatrics), and the surgical fields. It will involve daily pre-class reading, lectures, case-based learning, guest visits from specialists, and student-directed research components. There will be 2 hours of classroom activities per day, 5 days a week, for 4 weeks.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

MED 5540 - GERIATRIC MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective will introduce students to fundamentals of practice of geriatric medicine. Students will participate in all aspects of a multidisciplinary clinic, working primarily with interests but also with geriatric psychiatrists and geriatric social workers. Primary care of the elderly

will be stressed, but consultative work will also be done. Conference will be held to discuss cases with all team members and for more didactic teaching, including weekly geriatric psychiatry conferences. Also participate in evaluation and care of nursing home patients, in home visits, family conferences and WPIC.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5560 - PULMONARY INTENSIVE CARE UNIT

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to actively involve qualified students in evaluation and therapy of critically ill medical patients with shock, respiratory failure and other acute life-threatening disorders. Students have primary patient responsibilities for a limited number of patients in the ICU under direct supervision of medical residents and pulmonary critical care fellows. Student will perform initial evaluation of patient with a resident and will assist in resuscitation and life support procedures. Students will formulate diagnostic and therapeutic plan of management.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5565 - PALLIATIVE/HOSPICE CARE

Minimum Credits: 0

Maximum Credits: 0

A structured clinical rotation to increase awareness, knowledge and clinical skills when dealing with terminally ill patients and their families. Time will be spent doing consults and seeing patients and families in outpatient clinics and their homes. The objectives include assess, diagnose and effectively manage common problems and symptoms of terminal illness; recognize and know how to deal with symptoms of normal and complicated grief; recognize common psychosocial and spiritual issues faced; understand the impact on the family and friends; develop appropriate communication skills.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5570 - LIVER TRANSPLANT

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective offers an opportunity to participate in the workup and evaluation of prospective liver and gut transplant candidates. Student will work closely with GI fellow and senior staff of the division. Student will be taught the criteria utilized to make a decision for transplantation and an appreciation of the care required in the management of such patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5590 - SUBSTANCE ABUSE IN PRIMARY CARE

Minimum Credits: 0

Maximum Credits: 0

This elective is offered to explore diagnosis and treatment of substance abuse disorders in primary care setting (both inpatient and outpatient). A variety of clinical sites will be used to accomplish objectives of identifying common presenting symptoms, become familiar with diagnostic criteria for dependence vs hazardous use, become familiar with variety of screening and assessment instruments, participate in patient detox, experience inpatient rehabilitation, implement brief interventions for hazardous drinkers, experience 12 step program, participate in smoking cessation counseling.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MED 5600 - OUTPATIENT MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This 4 week elective will introduce students to the practice of outpatient medicine. Student will have the opportunity to evaluate new patients in the outpatient setting and plan appropriate investigative and therapeutic approaches. Student will also provide follow-up care of patients with chronic illness in an attempt to maintain their maximum wellbeing and also evaluate new symptoms in patients with chronic illness. Student will be involved in decision-making regarding the need for hospitalization and how to minimize this aspect of patient care.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MED 5601 - COMMUNITY HEALTH

Minimum Credits: 0
Maximum Credits: 0

The community health elective is a four-week course designed to expose fourth-year medical students to health care access and public health issues among underserved populations in the Pittsburgh area. The curriculum will include assigned readings/research on health issues for underserved populations, particularly in community organizing and health promotion/disease prevention. Clinical experience involves supervising patient care in many locations, such as: community health centers (squirrel hill community health center, hilltop clinic, Mt. Oliver, McKeesport, and Wilkinsburg); family links; Beth haven; wellspring; jubilee kitchen. Also included are those homeless clinics or outreach locations operated by the program for health care to underserved populations (PHCUP): (operation safety net; Birmingham clinic; the salvation army Northside). Exposure will be given to multi-disciplinary outreach efforts by the health care for the homeless project and other social services agencies. Students will also spend one-half day at the health law clinic assisting law students and their clients on disability cases, tenant-landlord dispute and other legal services. Students may also have the opportunity to assist clients at their court hearings. Students will also have the opportunity to lead health talks at community agencies and present at the community health forum. Very interested and motivated students will be taught the basics of designing survey, conducting focus groups and community needs assessment. There are also opportunities to participate in ongoing research projects by PHCUP. Students participating in the underserved area of concentration are given time to pursue their longitudinal projects. A short self-reflective or advocacy paper is also required. Patient care is sixty percent of the elective with thirty percent of that spent at the Birmingham clinic. Twenty percent is spent within multi-disciplinary outreach. Twenty percent of the four-week elective will be spent doing research, attending or giving health talks and a presentation.

MED 5605 - BRIDGING THE GAPS ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

Bridging the Gaps (BTG) internship is a long-standing program at the University of Pittsburgh. BTG is an 8-week long summer immersive experience that pairs health professional students with community-based organizations and structures the service-learning experience with weekly reflective and didactic sessions. Interns will learn about the health needs of Pittsburgh's communities and the structural factors causing health inequities. Interns work directly with underserved populations including vulnerable children, homeless women, people in recovery and gain leadership experience in community engagement. Working with community mentors, interns complete a project that leaves the host organization with a tangible product such as a resource guide or needs assessments to improve program quality.

Academic Career: Medical School
Course Component: Clinical
Grade Component: Exchange MED SU5

MED 5610 - BONE MARROW TRANSPLANTATION

Minimum Credits: 0

Maximum Credits: 0

Provides an introduction to adult bone marrow transplantation for the treatment of acute and chronic leukemia, aplastic anemia, other hematologic diseases and treatment of solid tumors. Student has an opportunity to participate in initial selection of patients, the intake interview, and the marrow harvesting procedure and become familiar with various marrow preparative regimens. Student participates in daily patient management rounds, treatment of complications, including graft vs host disease, interstitial pneumonia and various infectious problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5620 - INTERNAL MEDICINE CONSULTATION

Minimum Credits: 0

Maximum Credits: 0

This consult service provides consultation for patients on the psychiatric service. Students participate as partners with a senior medical resident under direct supervision of the course director. Objectives are that student be proficient in HX, PE and assessment required of GIM consultant; be proficient in fiscally responsible diagnosis and treatment; be proficient in clinical pharmacology of psychiatric patient and develop skills required to participate as a member of the psychiatric therapeutic team.

MED 5760 - GET READY FOR RESIDENCY BOOT CAMP ALTERNATIVE TRACK

Minimum Credits: 0

Maximum Credits: 0

This course is by invitation-only from the school of medicine and is a miniature version of the boot camp course which runs each Spring for the graduating class. This alternative course is specifically for students who are graduating off-cycle or students pursuing non-traditional pathways (or otherwise assigned by the Dean of Medical Education).

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

MED 5765 - PRECLERKSHIP COURSE

Minimum Credits: 0

Maximum Credits: 0

The course is an introduction and transition for rising third year medical students to provide necessary skills and information. The daily sessions include large and small group formats. Topics include: an introduction to the combined clinical years, industry relations, communication skills, roundsmanship, honor council, infection control, clinical logs, general rules for a successful clerkship, and using the electronic patient record training. Clerkship directors will meet the students in skills workshops to and instruct in writing prescriptions, order writing, history and physical write-up reviews, and soap (subjective data, objective data, assessment, and plan) notes. Exercises will include a hands-on hospital simulation on

pandemic and disaster preparedness, patient assessment workshops and interdisciplinary teamwork presentations (allied health professional presentation and panel, and a clinical presentation on resident team/nursing support). All students will participate in a CPR recertification course, with respiratory n95 mask fit testing. There will also be a lecture on professionalism followed by humanism honor society group read vignettes presented by student members of the Watson humanism honor society. Faculty facilitators will then conduct humanism in medicine small group sessions. Attendance at all sessions is required to satisfactorily complete the course. Grades will be based on attendance, course participation, and completion of homework assignments.

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5771 - ASSESSMENT WEEK

Minimum Credits: 0

Maximum Credits: 0

The overall goal of this course is for students, who are entering the fourth year of the first professional medicine program, to complete a series of structured assessments and participate in focused review sessions designed to enhance preparation for the National Board of Medical Examiners (NBME) United States Medical Licensing Examination (USMLE), step 2 clinical knowledge and clinical skills exams. Specific objectives include: reviewing common important dermatological conditions and how to describe skin lesions. Reviewing common radiologic findings that every graduating student should know how to identify. Reviewing targeted areas in obstetrics and gynecology in preparation for step 2 CK. Interpreting clinical pathological lab values to provide better patient care. Interpreting common and life-threatening EKG findings. Practicing with step 2 CK exam questions to better understand content and timing of the exam. Practicing common clinical procedures often performed in acting internships.

MED 5772 - CLINICAL SKILLS REFRESHER ELECTIVE FOR STUDENTS RETURNING FROM EXTENDED LEAVES OF ABSENCE

Minimum Credits: 0

Maximum Credits: 0

UPSOM students are occasionally approved for extended leaves of absences to complete graduate programs outside of UPSOM or for entrepreneurial purposes. Leaves longer than 2 years in duration are associated with a loss of both interviewing, physical exam, and clinical reasoning skills. This elective was designed to incorporate clinical experiences in inpatient and ambulatory settings to refresh communication and exam skills while working with dedicated clinician-educators. Students will participate in educational sessions (e.g., IM resident morning report, Department of Medicine Clinical Reasoning Conference, and completion of VPsim clinical reasoning modules) to refresh and further develop clinical reasoning skills. Objectives: 1. Review and enhance medical interviewing skills 2. Review and enhance physical exam skills 3. Refresh components of a standard history and physical exam 4. Refresh and enhance clinical reasoning skills

Course Component: Workshop

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MED 5778 - CLINICAL FOCUS COURSE: GERIATRICS AND ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

The week-long geriatrics and oncology course focuses on the critical issues of aging and cancer. This course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships. The coverage of both topics is designed to build on the clinical exposure that students have had; both to the impact of the aging population on clinical practice as well as the pervasiveness of cancer as a medical challenge. Both topics address practical issues related to care of these patients, recent advances in clinical care, and also have an experiential component. Students visit with patients at the Hillman Cancer Center during the oncology segment and visit one of three local nursing homes to meet with the patients and the people who care for them during the geriatrics section. Conferences follow these experiences to allow faculty-guided discussions of the experience.

MED 5910 - NARATV, LIT & EXPRN OF ILLNESS

Minimum Credits: 0

Maximum Credits: 0

Will explore culture and practice of medicine from perspective of an outside observer through use of various types of medical literature (poetry, fiction, non-fiction and essays). Clinical experiences traditionally considered to lie outside physician's role designed to complement exploration of perceptions patients have of hospitals and doctors. Sessions focus on assigned readings, with attention to journal entries and weekly short essays. Clinical experiences, for two half days per week, complement participant's interests, seminar readings, and goals of experiencing clinical setting through a non-medical lens.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5911 - PRINCIPLES OF MEDICAL EDUCATION

Minimum Credits: 0

Maximum Credits: 0

The course comprises AM half days of didactic and interactive workshops from Dr. Dakroub and Dr. Klein and various key institutional faculty educators. Examples include: How to give a lecture; How to precept a medical student; How to give Feedback; How to evaluate students; Dealing with struggling learners; Teaching clinical reasoning and Teaching. Two PM half days per week will involve teaching physical diagnosis which includes Intro to physical exam (1st year students) and may include Advanced Physical Exam (2nd year students) and working with standardized patients. Additionally, all participants in the electives are asked to deliver an interactive workshop of their choice on a topic in Medical Education that interests them (this can be done in small groups). Common workshop topics include: Bias in Medical Education, Bias in Feedback in Med-Ed, P/F grading in Med-Ed, USMLE relevance to Med-Ed, Work Hours, Hidden Curriculum, The art of "debriefing", etc. Objectives: This is a four (4) week elective with two primary goals: Introducing fourth year students to the skills of teaching. Enhancing their physical diagnosis skills while practicing the skills of effective teaching.

Academic Career: Medical School

Course Component: Lecture

Grade Component: Exchange MED SU5

MED 5915 - SCIENTIFIC LITERACY, NUMERACY, & CLINICAL DECISION-MAKING

Minimum Credits: 0

Maximum Credits: 0

This elective explores the common sources of human cognitive errors and fundamental concepts of numeracy to permit comprehension of scientific literature and allow sound clinical decision making. Students will learn how to critically appraise and systematically review randomized controlled trials applying the knowledge to decision making process as well as learn how cognitive biases, conflicts of interest, group dynamics, financial and other incentives can adversely influence clinical decisions.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

MED 5920 - GLOBAL HEALTH PREPARATORY SEMINAR

Minimum Credits: 0

Maximum Credits: 0

This is a four (4) week seminar designed to prepare a student or resident for an international clinical experience and to provide a foundation for future global health advocacy and activism. The seminar will consist of 1/3 didactic instructions, 1/3 team-based learning and 1/3 practical experiential learning. It is organized into 4 tracks: 1) global health public policy 2) ethics & human rights 3) evidence based medicine for developing countries and clinical skills and 4) tropical infections. Faculty from GSPIA will provide guest lectures on selected topics regarding NGOs, global actors, development, policy analysis, corruption and transnational governance. Dr. Barnard will coordinate the bioethics and human rights track which highlights important documents regarding the right to health, policy and system factors contributing to health inequalities, social determinants of health and research ethics through case studies. Dr. Veldkamp coordinates the tropical medicine track that provides in-depth exploration of the diagnosis and treatment of common parasitic diseases, HIV, TB, and malaria according to international guidelines and local context. Participants will be exposed to hands-on sessions in basic microscopic examination. Lastly, Dr. Bui will cover EBM in developing countries reviewing existing literature, physical exam skills/tools including ultrasound, low cost/bedside diagnostics, algorithms and clinical procedures relevant for the general practitioners in developing countries.

Grade Component: H/HS/S/LS/U

MED 5925 - STREET MEDICINE - OPERATION SAFETY NET

Minimum Credits: 0

Maximum Credits: 0

This one month clinical elective will focus on the health care of those sleeping on the streets of Pittsburgh. This group presents significant challenges in terms of access to care, continuity of care, cultural barriers, as well as a variety of medical issues. By working directly with the street homeless in their environment, students will see the health care system "from the outside" and learn to partner with a largely alienated population to improve their health. Operation safety net (OSN) is a unique program of the Pittsburgh mercy health system, located at UPMC Mercy, in which walking teams visit the unsheltered homeless in the alleys, under the bridges and along the river banks where they live. Follow-up care, including medical, psychiatric, social and housing services are provided by a dedicated case management team. An inpatient consult service specializes in the interface of the street homeless with the medical system.

MED 5996 - PROLOGUE TO MEDICINE PROGRAM

Minimum Credits: 0
Maximum Credits: 0
The five week prologue to medicine program promotes academic achievement and retention by introducing students to the courses that they will take during the first year of medical school. The program features a non-graded instruction in the following areas: introduction to medical gross anatomy, cell biology, and introduction to professionalism. Problem-based learning (PBL) exercises and learning/study strategies instruction supplement the curriculum. All classes are designed to model the content and pace of the actual courses. The courses are taught by the same medical school faculty who teach the courses during the school year.
Academic Career: Medical School
Course Component: Lecture
Grade Component: No Grade Required

MED 5999 - FULL TIME RESEARCH

Minimum Credits: 0
Maximum Credits: 0
Students may participate in a research fellowship with a basic science or clinical researcher at the University of Pittsburgh or at another University for a period of one year. The fellowship must be competitive (open to other students with the best qualified student chosen) and must be approved by the associate dean for student affairs in the medical school.

Medicine Anesthesiology

MSANE 5372 - ANESTHESIA CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Two-week rotation in anesthesia runs in tandem with general surgery (SURG 5372). Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Instructional focus on airway management (intraoperative), post-operative recovery and pain management. Registration must be accompanied by registration in SURG 5372.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5381 - PAIN EVALUATION AND TREATMENT

Minimum Credits: 0

Maximum Credits: 0

This junior elective will be located at the pain evaluation and treatment institute (PETI). Students will observe and participate in the clinical evaluation of chronic and acute pain patients as well as help to formulate treatment plans.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

MSANE 5382 - RESEARCH OR INDIVIDUAL STUDY

Minimum Credits: 0

Maximum Credits: 0

This junior elective will provide an opportunity for students to learn basic research methodology; including conceiving hypotheses, experimental design, protocol development, data analysis, and statistical evaluation of research results. The student may participate in ongoing research, either in the laboratory or in the clinical setting.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

MSANE 5420 - ANESTHESIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective designed to provide information and skills required to care for patients in the perioperative period. At the end of this elective, student should have sufficient knowledge and skill to plan and administer anesthesia in a straightforward case under the direct supervision of faculty. Core content of the third year, but material covered in greater depth. Specific material varies depending upon selected institution. Teaching is on a one-to-one basis in the operating room and during rounds. The course can be tailored to satisfy the needs and goals of the individual.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSANE 5440 - SUBSPECIALTIES ANESTHESIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course is being offered for two types of medical students: 1) those who have completed a general anesthesia elective and who would like to develop expertise in an anesthesia sub-specialty and 2) those who have a special interest in non-anesthesia specialty areas such as internal medicine, pediatrics, cardiology, neurosurgery, otolaryngology, obstetrics, transplantation medicine, pain therapy or outpatient/preoperative consultation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSANE 5445 - PAIN MEDICINE

Minimum Credits: 0

Maximum Credits: 0

The pain evaluation and treatment institute (PETI) staff physicians will introduce you to the interdisciplinary approach of dealing with patients with chronic pain of nonmalignant origin. You will interface with other PETI disciplines of occupational, physical, and psychological therapy as well as be exposed to nerve block techniques when appropriate. Examples of commonly seen problems are myofascial pain, headaches, and reflex sympathetic dystrophy. You will learn about post-op pain. Epidural and patient controlled analgesia will be highlighted.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSANE 5450 - MD/OMS ANESTHESIA SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

This four month rotation for third or fourth year medical students who are participants in the md/oral maxillofacial surgery program, provides exposure to patients undergoing a variety of procedures under general anesthetics and monitored anesthesia care. Clinical experience and didactics are under the supervision of the anesthesia attending physicians for an experience that includes basic principles of planning an anesthetic, pre-operative evaluation of risk, intra-operative techniques, and post-operative care including pain management. Graduated and supervised exposure is expected over the term of the course that includes care of trauma and neurosurgical patients with a particular emphasis on head and neck procedures. Cognitive objectives: 1) recognize and explain the pre-operative work-up for patients undergoing surgery requiring an anesthetic; 2) develop and explain the concept of an anesthetic plan; 3) recognize common complications of anesthesia and their management; 4) recognize and explain safe anesthesia practices and systems-based practice of care in a team environment; 5) evaluate and understand the use of various anesthetic agents and techniques; 6) recognize the issues present in difficult airways and their management techniques. Skill objectives: 1) demonstrate competency for iv placement; 2) demonstrate competency for intubation including experience with nasal intubations and fiber optic intubation for the difficult airway; 3) assist in the application of general anesthetic techniques and the overall anesthetic plan with the supervising attending.

MSANE 5840 - ANESTHESIOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

These electives provide opportunities to learn basic research methodology, including approach to experimental design, protocol development, data analysis and evaluation of results. Student participates in ongoing research in the lab and on patients. Opportunities for research in resuscitation, high frequency jet ventilation, patient monitoring, hemorheology, brain pathophysiology, and pharmacology of anesthesia-related drugs are available. Many other topics are also possible.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSANE 5900 - INDEPENDENT STUDY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSANE 5901 - EXTRAMURAL ANESTHESIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in anesthesiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Microbiology and Immunology

MSMI 1100 - COMPREHENSIVE MICROBIOLOGY: MOLECULAR VIROLOGY & MOLECULAR PATHOGENESIS

Minimum Credits: 4

Maximum Credits: 4

This course stresses basic concepts of animal virology and bacterial pathogenesis. Bacterial pathogenesis covers the subject of attachment, invasion, secretion, toxin activity, antibiotics, gene regulation and highlights infections in a range of host systems. The virology section covers attachment and entry, mechanisms of regulation at the RNA protein levels, viral nucleic acid replication, assembly and egress as well as antivirals and immune evasion.

MSMI 2230 - EXPERIMENTAL BASIS OF IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2

This course will expose the students to classical and contemporary literature in modern immunology. Emphasis will be on paper analysis and critical evaluation of primary data. This course will parallel the topics presented in comprehensive immunology lecture course which must be taken before or simultaneously with experimental basis of immunology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMI 2240 - INTRODUCTION TO IMMUNOBIOTHERAPEUTICS

Minimum Credits: 2
Maximum Credits: 2

This course will provide a comprehensive overview of the principles and the technology upon which immunobiotherapeutics are based. The course will focus on the overall aims of using small molecules, antibodies, genes and cells as immunotherapeutic agents. It will cover the use of viral and non-viral agents as gene delivery vehicles, cells as therapeutic agents and small molecules as delivery and therapeutic vehicles. The course will also cover diseases and disorders in which immunobiotherapy has proven safety and demonstrated successful outcomes like cancer, Mendelian disorders and autoimmunity. Lectures and student presentations will cover: genes and cells as drugs, peptides, antibodies and small molecules as therapeutics and delivery vehicles, viral and non-viral vectors, stem cells, and specific diseases where immunotherapy has shown safety and efficacy. Students may also be educated on bioethical issues and existing laws governing biotechnology and molecular medicine approaches.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMI 2250 - TA: MEDICAL MICROBIOLOGY

Minimum Credits: 1
Maximum Credits: 1

The course will provide PMI graduate students with the opportunity to serve as a teaching assistant in the undergraduate immunology course BIOSC 1760. The curriculum is designed to provide valuable teaching skills to the professional scientist. Students will attend all BIOSC 1760 lectures, prepare problem sets and session content for recitation period, conduct a one-hour recitation period each week, assist with the preparation and grading of exams, and proctor exams.

Academic Career: Graduate

MSMI 2350 - INTRODUCTION TO BIOSTATISTICS FOR MICROBIOLOGY AND IMMUNOLOGY GRADUATE STUDENTS

Minimum Credits: 2
Maximum Credits: 2

This is a self-contained, three-credit course on basic principles and practices of statistical inference and data analysis for students whose primary work is in the laboratory. After completing the course, students will be able to perform basic statistical analyses, and be aware of the principles and limitations associated with those analyses. The course will also give them the background necessary to effectively use GraphPad software. The course meets twice a week for two hours, and classes will usually consist of a computer-based practicum sandwiched between two half-hour lectures. Topics include: discovery and validation in the laboratory; data management; graphics; probability concepts; probability distributions; one- and two-sample statistical tests; point estimates and confidence intervals; analysis of cross-tabulations; statistical modeling; other topics in which the class is interested. The prerequisite is proficiency with pre-calculus college algebra.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSMI 2420 - EXPERIMENTAL PATHOGEN BIOLOGY

Minimum Credits: 2
Maximum Credits: 2

This course is designed for PhD graduate students training in microbiology research and is designed to provide a more in-depth study of bacteriology and virology through a critical analysis by the student of seminal research publications. The first half of the course deals with bacteriology, while the second concerns virology. Paper discussion format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMI 2450 - IMMUNOLOGY RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSMI 2460 - MICROBIOLOGY AND RELATED TOPICS SEMINAR SERIES

Minimum Credits: 1
Maximum Credits: 1

Beginning in the second year of the program, microbiology leaning students students will be required to attend a seminar series and turn in at least two seminar summaries. Seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers, as well as internal researchers, in microbiology and related fields.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSMI 2480 - MECHANISMS OF VIRAL PERSISTENCE AND PATHOGENESIS

Minimum Credits: 2

Maximum Credits: 2

Microorganisms have evolved a vast array of mechanisms to avoid detection or elimination by host defenses, and to establish persistent infections that can lead to chronic or recurrent disease. The ability to establish persistent infections often complicates the successful therapeutic treatment of disease caused by such microorganisms. This course is designed to familiarize students with the mechanisms by which select bacterial and viral pathogens establish persistence in their host cells and/or organisms, and the subsequent considerations for pathogenesis and therapy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

MSMI 3200 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSMI 3220 - CONTEMPORARY TOPICS - IMMUNOLOGY

Minimum Credits: 1

Maximum Credits: 1

This is an advanced level course in which students will read, present and evaluate the primary literature in immunology. Each semester will feature an integrated set of papers addressing a current issue of interest to modern immunologists. The course may be taken more than once by each student, since the topic addressed will change each semester.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MSMI 3230 - MICROBIOLOGY RESEARCH IN PROGRESS

Minimum Credits: 1

Maximum Credits: 1

Students present their research to date. The course meets weekly during which the student presents his/her research in progress. Emphasis is placed on the development of teaching and speaking skills needed for scientific presentation. The student is expected to answer questions from other graduate students and faculty related to their research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MSMI 3270 - INNATE IMMUNITY

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens. Courses like molecular virology and comprehensive immunology are highly recommended but not a prerequisite for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMI 3280 - IMMUNOLOGY OF INFECTIOUS DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course examines the immune responses to pathogens, as well as on immune evasion of microbes. The organisms studied include bacteria, parasites, and viruses. Topics focus on host-pathogen interaction and include innate immunity, modulation of antigen processing and presentation, pathogenic strategies for subversion of immune responses, effector functions of immune cells, and immunopathology.

Academic Career: Graduate

MSMI 3410 - COMPREHENSIVE MICROBIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course is an introduction to the molecular basis of bacterial and parasitic pathogenesis. Topics include: 1) introduction to microbial pathogens, 2) molecular and classical Koch's postulates, 3) pathogen adhesion strategies, 4) molecular mechanisms of invasion 5) microbial strategies for immune evasion 6) genetics and action of bacterial toxins 7) coordinate regulation of virulence factors 8) antibiotics and antibiotic resistance 9) host responses to infection 10) vaccines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMI 3435 - TUMOR VIROLOGY

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to introduce students to viruses known or suspected of causing tumors and with special emphasis on viruses causally linked to human cancer. Polyomaviruses, Epstein-Barr virus, Kaposi's sarcoma-associated herpesvirus, adenoviruses, papillomaviruses, hepatitis viruses, human t-cell lymphotropic virus and their relevant gene products will be covered in detail during weekly two-hour lectures. Lectures will be given by experts in each virus. Criteria for establishing causal links between a virus and human cancer will be discussed. Focus will be on how viral mechanisms of transformation can provide key mechanistic insight on cellular pathways that drive tumorigenesis including in malignancies with non-viral etiology. Topics covered will include oncogenes, tumor suppressors, oncogenic cofactors, disruption of innate/ adaptive immune responses, latency, viral mimicry/ piracy of cellular regulatory genes, genomic instability and role of non-coding RNAs in viral pathogenesis. Techniques for novel tumor virus discovery will also be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMI 3475 - IMAGING HOST-PATHOGEN INTERACTIONS

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to fluorescence microscopy with an emphasis on the study of host-pathogen interactions. Experts in the fields of bacterial pathogenesis, viral entry, viral protein signaling, fungal pathogenesis, polymicrobial infections will present lectures on the use of imaging in their fields of research and lead a journal club discussion of relevant papers from the literature. The goal is to provide students with a

basic understanding of fluorescence microscopy for the purpose of properly designing their own experiments and effectively evaluating the work of others.

Academic Career: Graduate

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

Molecular Biophysics

MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS

Minimum Credits: 1

Maximum Credits: 1

These rotations serve three (3) purposes: 1. Encourage the student to experience different research environments and methods. 2. Provide the students opportunities to optimize their choice of research advisor/lab through direct experience in different laboratory environments. 3. Provide faculty advisors with a basis for informed judgment regarding prospective students. Academic advisors provide help in suggesting a choice of lab rotations if necessary.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE

Minimum Credits: 3

Maximum Credits: 3

This is the first of three (3) courses, which together constitute the common core of the first year of the molecular biophysics graduate program. Here, the emphasis is on the structural foundation, especially that of proteins and nucleic acids. Fundamental results are covered together with experimental techniques (x-ray diffraction, NMR, EM/CryoEM, AFM, CD/ORD, Raman and fluorescence spectroscopy), as well as structural systematics and informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MOLBPH 2010 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in molecular biophysics.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS

Minimum Credits: 4

Maximum Credits: 4

Core course of the molecular biophysics & structural biology (MBSB) graduate program. Students learn about the integration of different techniques to elucidate molecular mechanisms of disease, through the study of biomolecular structure, interactions and dynamics. The course includes hands-on demos of x-ray crystallography and other essential tools in structural biology. With the help of MBSB faculty experts, students prepare and present a research seminar on primary research. Students also gain experience in the writing of grant/fellowship applications to support their research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MOLBPH 2013 - MOLECULAR BIOPHYSICS 3: THEORY AND SIMULATION

Minimum Credits: 4

Maximum Credits: 4

This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course comprises weekly lectures by nationally renowned guest speakers as well as faculty from the Pittsburgh schools engaged in the development and application of biophysical and structural techniques towards important biomedical questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MOLBPH 2030 - DATA AND LITERATURE CLUB

Minimum Credits: 1

Maximum Credits: 1

This course, designed for students in the molecular biophysics graduate program, will alternate between 'data sessions' in which postdocs and students present research results for feedback and critique, and 'literature sessions' in which students will lead discussions and critiques of the current literature. The course is designed to give students experience in presentation and critical analysis skills, as well as to create opportunities for broader learning and interaction.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MOLBPH 2040 - TA: MBSB

Minimum Credits: 1

Maximum Credits: 1

The course will provide graduate students in the molecular biophysics and structural biology graduate program with the opportunity to serve as a teaching assistant in the mb3 core course. The curriculum is designed to provide valuable teaching skills to the professional scientist.

Academic Career: Graduate

Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MOLBPH 2055 - PRINCIPLES AND PRACTICES OF SOLUTION-BASED BIOMOLECULAR NMR

Minimum Credits: 3
Maximum Credits: 3

This course is designed to provide students with a working knowledge of the basic underlying theory of modern pulsed Nuclear Magnetic Resonance methods used to study the structures and internal dynamics of biological macromolecules in solution. The theoretical concepts covered will include an overview of pulse excitation, digital sampling, and fourier transformation. The product operator formalism will be used to describe how modern multinuclear multidimensional pulse methods function to yield the desired signals. The practical concepts covered will include an overview of modern methods for obtaining sequential resonance assignments, determining high-resolution three-dimensional structures, and analyzing internal dynamics.

Academic Career: Graduate

MSMBPH 2040 - TA: MBSB

Minimum Credits: 1

Maximum Credits: 1

The course will provide graduate students in the molecular biophysics and structural biology graduate program with the opportunity to serve as a teaching assistant in the mb3 core course. The curriculum is designed to provide valuable teaching skills to the professional scientist

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

MSMBPH 2050 - SPECIAL TOPICS IN MBSB: CRYOEM

Minimum Credits: 3

Maximum Credits: 3

Students will focus on a selected topic in molecular biophysics and structural biology: cryoem. This course is designed to enable graduate level students to understand the theoretical and practical aspects of Cryo-Electron Microscopy (cryoem). The course covers the basic anatomy of electron microscopes, the principles of image formation, and major cryoem techniques including tomography, single particle analysis and 2-d crystallography. The course emphasizes concepts rather than mathematical details, and is ideal for anyone who needs an introduction to the cryoem field to be able to understand the literature, the talks at meetings/seminars and conversations they will have with collaborators.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

MSMBPH 2055 - PRINCIPLES AND PRACTICES OF SOLUTION-BASED BIOMOLECULAR NMR

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide students with a working knowledge of the basic underlying theory of modern pulsed Nuclear Magnetic Resonance methods used to study the structures and internal dynamics of biological macromolecules in solution. The theoretical concepts covered will include an overview of pulse excitation, digital sampling, and fourier transformation. The product operator formalism will be used to describe how modern multinuclear multidimensional pulse methods function to yield the desired signals. The practical concepts covered will include an overview of modern methods for obtaining sequential resonance assignments, determining high-resolution three-dimensional structures, and analyzing internal dynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMBPH 2090 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSMBPH 2100 - LABORATORY RESEARCH ROTATION 2

Minimum Credits: 1

Maximum Credits: 1

These rotations serve three (3) purposes: 1. Encourage the student to experience different research environments and methods. 2. Provide the students opportunities to optimize their choice of research advisor/lab through direct experience in different environments. 3. Provide faculty advisors with a basis for informed judgment regarding prospective students. Academic advisors provide help in suggesting a choice of lab rotations if necessary.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

MSMBPH 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

Molecular Genetics and Developmental Biology

MSMGDB 2500 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course covers principles of developmental biology and how embryonic developmental pathways impinge on human disease. Topics include congenital organ related disease, stem cell based and reproductive events relating to disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMGDB 2535 - MODEL ORGANISMS

Minimum Credits: 2

Maximum Credits: 2

This course covers the use of vertebrate and invertebrate model organisms in biomedical research. Topics include the use of several models including: mouse, rat, Zebrafish, Xenopus, c. Elegans, and Drosophila. Special emphasis will be placed on the strengths that specialized techniques of each organism provides the research community in understanding the etiology of disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMGDB 2550 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMGDB 2590 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in biochemistry and molecular genetics.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Interdis Biomedical (INTBP-UNK) or Biochem & Molecular Genetics (MSBMG-PHD) or Mol Genetics & Dev Biology (MGDB-PHD)

MSMGDB 3500 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Interdis Biomedical (INTBP-UNK) or Biochem & Molecular Genetics (MSBMG-PHD) or Mol Genetics & Dev Biology (MGDB-PHD)

MSMGDB 3510 - ADV TOPICS IN GENE EXPRESSION

Minimum Credits: 3

Maximum Credits: 3

This course consists of lectures and class presentations on recent advances in the molecular genetics. The emphasis of the course is on the regulation of gene expression at the DNA, RNA and protein levels. Regulation in eukaryotes is emphasized, including yeast, protozoan, and mammalian systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMGDB 3530 - GENOME INSTABILITY AND HUMAN DISEASE

Minimum Credits: 3

Maximum Credits: 3

Mechanisms that maintain genome stability allowed the origin of species. DNA damage is omnipresent and DNA repair and DNA damage tolerance mechanisms are interwoven in systems that control transcription, replication, cell division, signal transduction, cell death and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndromes of impaired development, immunodeficiency, cancer predisposition, neurodegeneration, and premature aging. This course will emphasize the molecular biology and biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes as they pertain to health and disease. Environmental, clinical and endogenous sources of DNA damage will be discussed. An understanding of the fundamental role of DNA repair mechanisms in immunology, oncology, neurology, and

aging will be central to all lectures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

MSMGDB 3535 - DNA REPAIR JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMGDB 3540 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INTBP 2000

MSMGDB 3560 - MOLECULAR MECHANISMS OF LONGEVITY & AGING

Minimum Credits: 2

Maximum Credits: 2

Aging is a fascinating biological process and a topic of profound public-health significance. While humans have searched for the 'Fountain of Youth' since times immemorial, the last three decades have created a phenomenal expansion in our knowledge of the biology of aging. Classical genetic studies in laboratory models coupled with advances in molecular biology, genomics and systems biology have provided unprecedented insights into the molecular mechanisms underlying the age-related decline of our cells, tissues and bodies. These discoveries have provided the solid foundation for the emerging field of Geroscience and the discovery of therapeutic and environmental approaches to delay or even reverse aging. This is a course for those interested in obtaining in-depth knowledge and critical understanding of the molecular underpinnings of aging and the current state of Geroscience research. The course will be conducted in four modules. Module I will provide a historical perspective on aging research with a focus on major discoveries in model organisms and human studies. Module II will involve detailed examination of the molecular hallmarks of aging and Module III will focus on the links between cellular, tissue and organismal senescence. In Module IV, contemporary studies on 'quality of life'/Healthspan and advances in anti-aging therapies will be explored.

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Biophy & Struct Bio (MS)

MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course consists of a series of lectures and tutorial sessions that focus on the general principles of pharmacology. Major topics are principles of pharmacokinetics (including drug absorption, distribution, and metabolism), pharmacodynamics (quantitation of drug-receptor interactions) and mechanisms of action of cardiovascular and autonomic drugs. In addition, this course will include both animal laboratory and human simulator demonstrations that illustrate important pharmacological principles discussed in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 2350 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMPHL 2355 - PHARMACOLOGY SUMMER SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars. Present once each summer and attend a minimum of 80% of the summer seminars in order to receive credit for the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION

Minimum Credits: 3

Maximum Credits: 3

This course will explore different types of signaling pathways activated by receptor-ligand interactions. Topics to be covered include, but are not limited to: g-protein linked receptors, adenylate cyclases, small gtpases, kinases and phosphatases, nitric oxide, phospholipases, steroid hormone signaling, and pharmacological applications of signaling pathways.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMPHL 2370 - DRUG DISCOVERY

Minimum Credits: 3

Maximum Credits: 3

Drug discovery is an interdisciplinary science that seeks to identify small molecular and/or biologic probes and to understand at the molecular level how these probes affect macromolecular processes. This course will discuss various topics that are relevant to current approaches and principles in drug discovery including target validation, drug origins, cell based screening, high throughput screening, proteomic approaches to drug discovery, computational biological aspects of drug discovery, and pharmacoinformatics, as well as topics in preclinical drug development and intellectual property. The course will include case studies intended to aid students in a full understanding of the drug discovery process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 2390 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides an opportunity for students to carry out a specific laboratory project in any area of interest in pharmacology.

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Pharmacology (PHD) or Interdis Biomedical (UNK)

MSMPHL 2609 - CHEMICAL TOXICOLOGY IN THE AGE OF GREEN CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

The design of safer chemicals is vital to reduce environmental and occupational health diseases. Molecular designers, toxicologists, chemists, and engineers require knowledge about the biochemical mechanisms of toxicity, predictive toxicology, and how chemical structures and properties impact toxicity and the environment. Green chemistry has been widely incepted into the curriculum in higher education to provide students with adequate skills in the fundamental principles of toxicology and structure-activity relationships for the design of safer chemicals. This course will present the concept of designing chemicals for reduced toxicity to promote synthesis of less hazardous chemical substances that possess little or no risks to human health and the environment. Students will be provided with fundamental understanding of how to apply in-silico modelling and QSARs, etc. to identify novel replacements for the generation of hazardous chemicals (such as 'forever chemicals') already persisting in the environment and also create the next generation of safe chemicals and products. This course will also present the concept of designing chemical products to preserve efficacy of the function while reducing toxicity so that at the end of their function they do not persist in the environment but instead breakdown into safe products. The course will be conducted by in class lectures, hands-on practices for in-silico modeling, and paper discussions. A college level background in chemistry or toxicology will be required for taking this course. A college level background in chemistry or toxicology will be required for taking this course. Courses such as: Environmental Health Chemistry (EOH 2309), Principles of Toxicology (EOH 2175), Transport & Fate of Environmental Agents (EOH 2122), Principles of Environmental Exposures (EOH 2504), Fate & Transport in Environmental Engineering (CEE 1522); OR Chemistry in Environmental Engineering (CEE 1504) are suggested

MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS

Minimum Credits: 3

Maximum Credits: 3

This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral oncogenesis, breast and prostate cancer, radiotherapy, tumor immunology chemotherapy and chemoprevention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3320 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will participate in the departmental Journal Club. Presentations will be held each week that the department hosts a seminar speaker (i.e. 2-3 times/month) during the fall and spring semester. Students entering their fifth year of study may petition the program director to be excused from the spring session of the Journal Club. Sixth year students and beyond are not required to enroll in Journal Club although their attendance is encouraged. A log-in sheet will be available at all Journal Club meetings. All students in attendance will complete an anonymous peer-evaluation sheet that will be provided to the presenter. Students must inform the program director in advance if they are unable to attend a specific Journal Club. Excusable absences from Journal Club include individual or family illness or presentation (i.e. poster, platform talk) at a major scientific conference. Students are allowed two unexcused absence/semester.

MSMPHL 3340 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1

Minimum Credits: 1

Maximum Credits: 1

The goals of the fall and spring consecutive courses are to enhance the career development capacity and foster the life-long career management habits of graduate students and postdocs to maximize their scholarly training success and facilitate personal career outcomes. The courses will provide foundational background through experiential learning and small-group discussions, while facilitating peer mentoring. These approaches support the self-construction of individually relevant understandings of career development that is consistent with similar independence in scholarly expertise. The areas of focus include self-assessments, career exploration, goal setting, professional development, career planning and management, career adaptability, and additional topics identified by students. Participation in the subsequent spring course is expected for those enrolled in the fall prerequisite course.

Grade Component: Grad HSU Basis

Course Requirements: PREQ: MSMPHL 3340

MSMPHL 3360 - MOLECULAR PHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course examines molecular mechanisms of drug interactions with an emphasis on drugs that modulate cell signaling, cellular responses to drugs, and drug discovery. The course will include student participation through presentations and discussion of relevant contemporary scientific literature. Topics include: cell cycle checkpoints and anti-cancer drugs, therapeutic control of ion channels, and blood glucose, anti-inflammatory agents and nuclear receptor signaling, and molecular mechanisms of drugs used for the treatment of cardiovascular diseases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3375 - NEUROPHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will broadly review neuropharmacology and neurobiology, study monoamine, cholinergic and GPCR biology, and explore the blood-brain barrier and its significance to neuropharmacology. The course will focus on the molecular mechanisms of drug action for different classes of compounds including but not limited to; antidepressants, antipsychotics, anti-epileptics, anesthetics, weight loss, stimulants, neuroprotective, addiction, pain and migraine drugs. In addition to the formal lectures the course will emphasize critical reading of the primary literature through journal-club style discussions and cover the most recent treatment and therapeutic avenues being developed for a broad range of neurologic and psychiatric disorders. The course is ideally suited for Molecular Pharmacology and Neuroscience graduate students or any other graduate student with interest in neurological diseases and their treatments. The course is also appropriate for senior undergraduates who have completed 4 semesters of chemistry, 2 semesters of biology, and other relevant upper division course work (e.g. Cell Biology, Physiology or Biochemistry)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3750 - ANGIOGENESIS

Minimum Credits: 3

Maximum Credits: 3

Angiogenesis/vasculogenesis is one of the important research areas in biomedical sciences. This course will provide extensive basic knowledge of the developmental, cellular, and molecular biology of angiogenesis and most recent advances in its clinical applications. Topics include: 1. Angiogenesis in physiological and pathological process; 2. Molecular and cellular regulation of angiogenesis; 3. Current advances in angiogenic therapies. Recent outstanding research publications will also be discussed.

Molecular Virology & Microbiol

MSMVM 2400 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSMVM 2410 - MOLECULAR VIROLOGY

Minimum Credits: 2

Maximum Credits: 2

This course stresses basic concepts of animal virology. Subjects include different viruses, the expression and regulation of viral genes, the mechanisms of viral-induced cytopathology, latency, and cell transformation, and the nature of viroids and prions. Supplementary reading assignments are required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 2420 - EXPERIMENTAL VIROLOGY

Minimum Credits: 2

Maximum Credits: 2

This course is designed for graduate students training in molecular virology research and is designed to provide a more in-depth study of molecular virology through a critical analysis by the student of seminal research publications in various virus systems. Paper discussion format.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 2430 - TA: MEDICAL MICROBIOLOGY

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to introduce graduate students of the interdisciplinary biomedical sciences graduate program to the principles of teaching. The students will be trained in basic teaching techniques as well as provided material for teaching students specific concepts. As a major part of this course, students will participate in teaching first-year medical students the fundamentals of microbiology, in conjunction with the laboratory and problem based learning sections of the molecular pathogenesis of infectious disease course of basic science medical school book.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

MSMVM 2450 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

MSMVM 3400 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Virology & Microbiol (PHD)

MSMVM 3410 - MICROBIAL PATHOGENESIS

Minimum Credits: 2

Maximum Credits: 2

This course is an introduction to the molecular basis of bacterial and parasitic pathogenesis. Topics include: 1) introduction to microbial pathogens, 2) molecular and classical Koch's postulates, 3) pathogen adhesion strategies, 4) molecular mechanisms of invasion 5) microbial strategies for immune evasion 6) genetics and action of bacterial toxins 7) coordinate regulation of virulence factors 8) antibiotics and antibiotic resistance 9) host responses to infection 10) vaccines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 3420 - VIRAL PATHOGENESIS

Minimum Credits: 2

Maximum Credits: 2

The goal of this course is to integrate the lectures given on a particular virus in the comprehensive virology course with two additional lectures which expand the basic biology of the virus life cycle to the level of virus-host interactions. The first lecture will address the pathogenic properties of the virus from the perspective of disease manifestations, immunology, and the natural history of infection. This will be followed by a second lecture which will address the molecular basis of viral pathogenesis and current advances in antiviral research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 3435 - TUMOR VIROLOGY

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to introduce students to viruses known or suspected of causing tumors and with special emphasis on viruses causally linked to human cancer. Polyomaviruses, Epstein-Barr virus, Kaposi's sarcoma-associated herpesvirus, adenoviruses, papillomaviruses, hepatitis viruses, human t-cell lymphotropic virus and their relevant gene products will be covered in detail during weekly two-hour lectures. Lectures will be given by experts in each virus. Criteria for establishing causal links between a virus and human cancer will be discussed. Focus will be on how viral mechanisms of transformation can provide key mechanistic insight on cellular pathways that drive tumorigenesis including in malignancies with non-viral etiology. Topics covered will include oncogenes, tumor suppressors, oncogenic cofactors, disruption of innate/ adaptive immune responses, latency, viral mimicry/ piracy of cellular regulatory genes, genomic instability and role of non-coding RNAs in viral pathogenesis. Techniques for novel tumor virus discovery will also be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: MSMVM 2410

MSMVM 3440 - VACCINES AND IMMUNITY

Minimum Credits: 2

Maximum Credits: 2

Vaccines are widely regarded as one of the major contributors to increased life expectancy. The purpose of this course is to (1) explore the history of vaccines; (2) underscore the successful role of current vaccines in the management of infectious diseases; (3) present strategies for a new generation of safe and effective molecular vaccines; and (4) discuss the ethical and economic realities of vaccine use and development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 3471 - INNATE IMMUNITY

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens. Courses like molecular virology and comprehensive immunology are highly recommended but not a prerequisite for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMVM 3475 - IMAGING HOST-PATHOGEN INTERACTIONS

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to fluorescence microscopy with an emphasis on the study of host-pathogen interactions. Experts in the fields of bacterial pathogenesis, viral entry, viral protein signaling, fungal pathogenesis, polymicrobial infections will present lectures on the use of imaging in their fields of research and lead a journal club discussion of relevant papers from the literature. The goal is to provide students with a basic understanding of fluorescence microscopy for the purpose of properly designing their own experiments and effectively evaluating the work of others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

MSMVM 3480 - IMMUNOLOGY OF INFECTIOUS DISEASE

Minimum Credits: 2

Maximum Credits: 2

General mechanisms of immunity to microbial pathogens and common strategies of immune evasion will be discussed with emphasis on detailed examples from viral, bacterial and parasitic systems. An in depth examination of survival strategies of pathogens in intracellular and extracellular host environments will be addressed, as well as the consequences of inadequate and inappropriate immune responses.

MUSIC 2039 - THE SOUNDS OF ROMANTIC COMEDY

Minimum Credits: 3

Maximum Credits: 3

Sometime between Ernst Lubitsch's *The Shop Around the Corner* (1940) and Nora Ephron's *You've Got Mail* (1998), romance changed in the United States. Where class and wealth used to be deciding factors for romantic love, there now emerged the concept of the soulmate, who could be anyone. In this course, we will watch American romantic comedies of the last 100 years, paying particular attention to how the development of the soundtrack has changed what love sounds and feels like. Students will develop skills in closely analyzing sound and image in film, critically interpreting popular culture in relation to broader events in society, and thinking about the relation between music, identity, and politics. In particular, we will together develop answers to the following questions: how did capitalism, social justice movements, the changing nature of work, and other cultural transformations affect what people expected from intimate union? What aesthetic norms for representing romance changed alongside cultural norms? How is the narrative of love inflected by race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2041 - MUSIC IN AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course examines the historical social and cultural background of music in Africa with particular reference to music in community life, performing groups, the training of musicians, instrument structures in African music, and the interrelations of music and dance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2042 - MUSIC IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Mexico, Venezuela, Columbia, Panama, and Peru will be the major countries represented in this general survey of the music of Latin America. The course will be taught in a lecture-discussion format with extensive use made of recordings, slides, and films. Some actual performance of drumming traditions will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2044 - MUSIC IN SOUTHEAST ASIA

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the musical cultures of SouthEast Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2045 - MUSIC IN SOUTH ASIA

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the musical cultures of South Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2046 - AFRICAN-AMERICAN MUSIC IN U.S.

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Jobin, JP Johnson, etc. Students will conduct field projects centered around "street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2047 - WOMEN AND MUSIC IN CROSS CULTURAL PERSPECTIVES

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with music of, by, and about women from a cross-cultural perspective. Topics include, but are not limited to, traditional and ritual music, music as empowerment, sexual aesthetics, women as composers and performers, and feminist music criticism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2054 - GLOBAL HIP HOP

Minimum Credits: 3
Maximum Credits: 3

This seminar analyzes how diverse groups of musicians and listeners use hip-hop to express local and transnational claims of belonging through the appropriation of musical genres identified with the West and with African Americans in particular. A closer reading of global hip-hop practices offers insights into the genre's artistic goals and its social profile in a variety of contexts. Through analyses of locally distinct musical expressions, marketing trends within national and global music industries, and state-sponsored policies relating to hip-hop, this course sheds light on hip-hop's role in constituting cultural and political identities among diverse groups of people in the U.S. and abroad.

MUSIC 2061 - JAZZ IMPROV 1

Minimum Credits: 3
Maximum Credits: 3
This course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2062 - JAZZ IMPROV 2

Minimum Credits: 3
Maximum Credits: 3
A continuation of music 2061. The course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2063 - CREATIVE ARTS PRACTICE AND ENSEMBLE

Minimum Credits: 3
Maximum Credits: 3
Creative Arts Practice and Ensemble is an exploratory performing and research multi-arts ensemble. In this course we will explore collaboration between music and expressive arts, including poetry, dance/movement, visual art and/or video. Artists whose primary practice includes video/film, visual art, poetry/prose and skilled musicians of diverse stylistic backgrounds are welcome. While the possibilities of multidisciplinary art are

endless, this class will focus on works that explore social justice as a focus, and where music is a prioritized expression, i.e. music and video, music and poetry, music and dance, music and visual art, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2071 - ELECTRONIC AND COMPUTER MUSIC 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to composing electronic music. It includes instruction in MIDI and audio sequencing, synthesis, sampling, effects, and other digital audio concepts. Course-work will primarily involve a series of creative projects utilizing a variety of techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2072 - ELECTRONIC AND COMPUTER MUSIC 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of music 2071. It provides further experience in composing music in the university of Pittsburgh computer and electronic music studio, instruction in the advanced digital audio applications, and hard disk recording and editing.

MUSIC 2073 - PROGRAMMING ENVIRONMENTS IN MUSIC - AN INTRODUCTION TO MAX/MSP

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MUSIC 2074 - JAZZ AND FILM

Minimum Credits: 3

Maximum Credits: 3

Ralph Ellison, the author of the American classic *Invisible Man*, asserted that all of American life was "jazz-shaped." By this he meant that jazz (and blues) were more than music, that jazz (and blues) had ubiquitously infiltrated American life, and that it served as a model for an expanding pluralist culture. *Jazz and Film* explores this notion in three areas: in representations of jazz culture on film, in the sonic presence of jazz in film, and the influence of jazz on filmmaking. Students will give weekly responses to readings, films, or recordings, and will write a research paper on a topic of their own choosing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2099 - MUSIC & QUEER IDENTITY

Minimum Credits: 3

Maximum Credits: 3

In this course, we will explore critical perspectives on topics such as non-normative music history, queer modes of expression, subcultural music-making, and the implications of mainstream visibility. Along the way we will survey some notable lesbian/gay/bisexual/ transgender/queer composers and musicians in both art music and popular music.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2111 - PRINCIPLES OF RESEARCH AND BIBLIOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

This course is for all first-year graduate students, and introduces them systematically to the significant research and reference methods and their resulting tools within all major categories and formats of music research and publication. It treats music research as a unified field in which the major disciplines--historical musicology, ethnomusicology, theory/analysis and composition--necessarily interact to inform the most productive and significant results, even for narrowly defined research topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2121 - INTRODUCTION TO ETHNOMUSICOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for all first graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as field work, transcription, and analysis will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

Course Attributes: Asian Studies, Global Studies

MUSIC 2131 - INTRODUCTION TO MUSICOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for all first year graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as notation, source studies, sketch studies, criticism, performance problems, and analysis will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

Course Attributes: Medieval & Renaissance Studies

MUSIC 2141 - MUSICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examination of issues in the invention and description of musical structures and the relation of these activities to each other, with attention given to such special problems as intersubjectivity, contextuality, the role of inference in perception, and introspection as a mode of empirical inquiry; examples will be drawn from a wide range of literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2151 - INTRODUCTION TO JAZZ STUDIES

Minimum Credits: 3

Maximum Credits: 3

This proseminar provides a critical review of writings on jazz, by analyzing and evaluating the development of the scholarly literature on jazz, focusing on the writings of some of the most influential critics and historians who have shaped the field. The writers will include Nat Hentoff, Ira Gitler, Leonard Feather, Mike Hennessey (England), Gunther Schuler, Andre Hodier (France) etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2200 - TEACHING & PROFESSIONALIZATION

Minimum Credits: 1

Maximum Credits: 3

Music 2200 is an introduction to pedagogy for graduate students in the Department of Music. The course focuses on principles and practices of good teaching and is designed to provide an opportunity to self-consciously reflect on and discuss the wide variety of methods, ideas, and techniques that can support effective teaching in music history, theory, and world music.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MUSIC 2230 - SEMINAR IN TWENTIETH CENTURY MUSIC

Minimum Credits: 3

Maximum Credits: 3

The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special Twentieth-Century topic.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MUSIC 2232 - SEMINAR IN MUSIC SINCE 1945

Minimum Credits: 3

Maximum Credits: 3

The course studies postwar masterpieces and examines the modes of thought that produced them. Sessions, Berio, Boulez, Lutoslawski, Stockhausen, Babbit, and Carter. The scope and method of the course will be determined in part by the interests of the participants.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

Course Attributes: West European Studies

MUSIC 2244 - RACE AND TRANSNATIONAL PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

How might an analysis of performance lead us toward new epistemologies of race? This course explores contemporary criticism, archival sources, and multimedia materials in order to ask questions about race and the politics of performance in the 20th and 21st century. We will engage recent works in black and latinx performance studies and sound studies alongside poetry, fiction, video, sound, and live events. We will consider writing and performance as interfacing mediums, not merely defined by influence but by mutual transformation. Our lens is decidedly transnational: we chart the ways that performance travels, buoyed by historical events, social movements, and developments in technology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MUSIC 2252 - THEORIES OF GENDER & SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of important current topics and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship and the foundational readings that have prepared the way for them. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines and sampling a range of methodologies, this course works through some of the key moments, movements, and problems that shape contemporary thinking about gender and sexuality. The course invites students to think through materials and ideas in relation to their own research, interests, and commitments. Note: This course is required for GSWS graduate certificates but welcomes any students who want to get a foothold in gender and sexuality studies.

MUSIC 2631 - COMPOSITION & ANALYSIS TUTORIAL

Minimum Credits: 3

Maximum Credits: 3

Tutorial instruction in composition and analysis; students in composition and theory normally enroll every semester.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2632 - COMPOSITION SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Issues of collective interest to composers; student's examination of one another's work; reading and performance of students' (and others') work.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2710 - JAZZ STYLES AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

This seminar will be an analytical examination of musical transcripts and composers' manuscripts of works by some of the most innovative jazz composers. Many of these manuscripts and transcriptions are held by the university of Pittsburgh jazz archives, which houses the music and recordings of jazz innovators who have participated in the university of Pittsburgh jazz seminar beginning in 1970. The course will also draw on the archival services of the Klaus Kuhnke-Archiv, in Bremen, Germany; and the Rutgers University Institute of Jazz Studies, Dan Morgenstern, director. (Morgenstern is a frequent participant in the Pitt annual jazz seminar and a contributor to Pitt's international jazz archive journal.) This course is primarily theory-based analysis, and will require that students understand and develop a thorough knowledge of accepted analytical techniques. It will examine works by major innovators such as Art Tatum, Bud Powell, Charlie Parker, Dizzy Gillespie, Sonny Stitt, Sonny Rollins, Wes Montgomery, Jim Hall, and Dodo Marmarosa in detail.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2720 - ADVANCED JAZZ COMPOSITION AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

This course offers tutorial instruction in jazz composition, orchestration and analysis to graduate students in music.

MUSIC 2726 - MARY LOU WILLIAMS: STUDYING JAZZ, GENDER, AND RACE THROUGH A PITTSBURGH ICON

Minimum Credits: 3
Maximum Credits: 3

Few figures in jazz enjoyed a longer or more dynamic career than Mary Lou Williams. After emerging as a child prodigy in Pittsburgh in the 1920s, Williams became one of the most sought-after arrangers of the swing era and a germinal figure in the bebop movement. Her later work included compositions for chamber and symphonic orchestras, a full mass setting, and even concerts with avant-garde improvisers. At every turn, Williams

cultivated a reputation for elegant arrangements, stalwart professionalism, and a fiercely swinging piano style. This course will examine Williams' storied life and work, paying particular attention to the larger contexts relating to jazz and gender in the 20th century. Like many women artists, Williams never wished to be reduced solely to her gender a trend too-frequently embedded in patronizing epithets like "the great female pianist" Our discussions will therefore seek to avoid framing her in overly-reductive ways. We will strive toward a deeper interrogation of how jazz's complex and often fraught discourses surrounding gender impacted Williams' career, as well as those of subsequent generations of artists. The course will explore a wide range of texts (some unrelated to Williams) in order to grapple with such issues. In doing so, we seek not only to celebrate the legacy of one major jazz composer, but also to think about the cultural landscapes that underlie the construction of such legacies in the first place.

Grade Component: Grad Letter Grade

MSNBIO 2018 - COMMUNICATING SCIENCE

Minimum Credits: 1

Maximum Credits: 2

This course will foster a student's skills in scientific communication and outreach through participation in the CNUP Brain Program. The Brain Program organizes outreach trips by CNUP students and faculty to area middle- and high-schools to foster interest in neuroscience through interactive presentations and demonstrations on a variety of topics. (Established presentations cover basic brain anatomy, mechanisms of memory and learning, traumatic brain injury, and basic neurophysiology.) An enrolled student will: (1) attend classes semi-weekly to prepare presentations, (2) participate in at least three school visits each semester, and (3) give presentations at least twice. The course is designed to help students refine their ability to deliver an audience-engaging 10-15 minute presentation on a neuroscience-related topic through brief hands-on demonstrations and/or Powerpoint presentations. On-campus class meetings will be devoted to lectures on effective communication of science to a general audience, individual practice of new or adopted presentations, and constructive feedback to presenters. Students enrolled in the 1-credit option may adopt and adapt existing presentation materials. Students enrolled in the 2-credit option are expected to develop their own presentation. Students will be evaluated by the instructor according to participation.

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

Minimum Credits: 5

Maximum Credits: 5

This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

MSNBIO 2102 - SYSTEMS NEUROBIOLOGY

Minimum Credits: 6

Maximum Credits: 6

This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD)

MSNBIO 2112 - NEUROBIOLOGY OF DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare a short grant application on a topic of relevance to the neurobiology of disease, and to then participate in the peer review of an application of another course participant. Reading will consist of reviews and recent research articles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2135 - HISTORICAL PERSPECTV IN NEUROSCI

Minimum Credits: 2

Maximum Credits: 2

This seminar course explores the origins and evolution of modern neuroscientific concepts from the 17th and mid-20th centuries. Discussions of primary and secondary source material will focus on understanding the role of contemporary philosophical, scientific, social and technological factors in the development of neuroscientific thought. Another goal is to develop an appreciation of their contributions to current neuroscientific dogma.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2600 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSNBIO 2614 - NEUROPHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will broadly review neuropharmacology and neurobiology, study monoamine, cholinergic, and GPCR biology, and explore the blood-brain barrier and its significance to neuropharmacology. The course will focus on the molecular mechanisms of a drug action for different classes of compounds including, but not limited to, antidepressants, antipsychotics, anti-epileptics, anesthetics, weight loss, stimulants, neuroprotective, addiction, pain, and migraine drugs. In addition to the formal lectures the course will emphasize critical reading of the primary literature through journal-club style discussions and cover the most recent treatment and therapeutic avenues being developed for a broad range of neurologic and psychiatric disorders. The course is ideally suited for Molecular Pharmacology and Neuroscience graduate students or any other graduate student

with an interest in neurological diseases and their treatments. The course is also appropriate for pre-professional undergraduates who have completed 4 semesters of chemistry and 2 semesters of biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2616 - METALS, GASES, FATS, IN NEUROTRANSMISSION

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MSNBIO 2621 - PAIN MODELS: RATIONALE, TESTING, AND INTERPRETATION

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the design and analysis of animal and human pain models and will incorporate classroom presentations about various pain models (e.g. inflammatory, neuropathic, etc.). Classroom discussions will be based on assigned readings and include the relevant history and rationale for use of different tests/models, including critical assessment of strengths/weaknesses and limitations to interpretation of outcomes. Importantly, data acquisition, analysis and presentation will be included in evaluating the interpretability of outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2622 - MECHANISMS AND CLINICAL PRESENTATION OF PAIN

Minimum Credits: 2

Maximum Credits: 2

This course provides attendees with vocabulary and knowledge about anatomy, physiology, mechanisms, and modulation of pain. This fundamental knowledge is complemented by assigned readings from literature and clinical presentations about pain syndromes and pain management. The course is offered in the fall term.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

MSNBIO 2623 - PAIN MODELS: RATIONALE, TESTING AND INTEPRETATION

Minimum Credits: 1

Maximum Credits: 1

This course will focus on the design and analysis of animal and human pain models and will incorporate classroom presentations about various pain models (e.g. inflammatory, neuropathic, etc.). Classroom discussions will be based on assigned readings and include the relevant history and rationale for use of different tests/models, including critical assessment of strengths/weaknesses and limitations to interpretation of outcomes. Importantly, data acquisition, analysis and presentation will be included in evaluating the interpretability of outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2624 - GRANT WRITING

Minimum Credits: 3

Maximum Credits: 3

The course will cover the fundamentals of grant writing with a focus on NIH style pre-doctoral grants. Through a combination of lectures and student led critiques and discussions, students will work their way through the essential components of a fundable proposal starting with specific aims and ending with an introduction to a revised application. Students will generate each component of a grant application which will be critiqued by faculty

and the other members of the class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Neurobiology (PhD) or Neuroscience (PhD)

MSNBIO 2625 - AUDITORY AND VESTIBULAR SYSTEMS

Minimum Credits: 2

Maximum Credits: 2

This course will cover the anatomy, molecular biology, physiology, and pathophysiology of the auditory and vestibular systems, as well as treatments for auditory and vestibular disorders. The course includes lectures and readings / discussions of key manuscripts. It is relevant for trainees with interests in auditory and vestibular research, as well as those focused on hearing and balance therapies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2632 - ADVANCED NEUROPHYSIOLOGY

Minimum Credits: 2

Maximum Credits: 2

The primary objective of this course is for students to develop critical scientific reasoning by learning to evaluate the essential components of classic research presented in well written papers. Secondly, students will gain a solid foundation in neurophysiology by examining, in detail, the underlying principles underlying current flow through a neuron's membrane, the generation and propagation of action potentials, synaptic transmission at the neural muscular junction, and sensory transduction. Course material will consist of papers from Hodgkin, Huxley, Katz, Fatt and others. Complementing the classic papers will be contemporary work on the same topic. Students will be expected to have had basic neurophysiology and be familiar with electrostatics, electric circuits and differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2650 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2651 - PAIN JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This discussion-based course uses assigned readings to examine pain mechanisms and management with an emphasis on critical literature evaluation and topical developments in the field of pain.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2652 - TOPICS IN NEUROLOGICAL DISORDERS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

MSNBIO 2660 - NEUROBIOLOGY SEMINAR SERIES

Minimum Credits: 1
Maximum Credits: 1
Nationally and internationally recognized researchers in the field of neuroscience present scientific findings. Students meet informally with each speaker to discuss seminal topics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2680 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 9
A series of special topics courses are offered by individual members of the department or by small groups of the faculty. The general format involves the detailed analysis of a specific research area, exploring its development and current status by the presentation and discussion of research papers.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MSNBIO 2681 - SEMINAR IN CORTICAL CIRCUITS

Minimum Credits: 1
Maximum Credits: 1
This discussion-based course uses current readings to examine cortical function with an emphasis on circuit analyses using electrophysiological, computational, behavioral and/or developmental approaches.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2682 - CURRENT RESEARCH ON PAIN

Minimum Credits: 1
Maximum Credits: 1
An advanced graduate level course for students interested in current research on pain mechanisms, management and clinical presentation of pain. Presentations by course participants form the basis for class participation and discussion.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2690 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in neurobiology.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Neurobiology (PHD)

MSNBIO 3030 - SEMINARS IN SYNAPTIC FUNCTION

Minimum Credits: 1

Maximum Credits: 1

This discussion-based course uses recently published research articles to examine synaptic function, including neurotransmitter release, receptor regulation, and different forms of synaptic plasticity.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MSNBIO 3600 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neurobiology (PHD)

Neurological Surgery

NSURG 2907 - INDEPENDENT STUDY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NSURG 5383 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of neurological surgery will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

NSURG 5420 - NEUROSURGERY SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective the student will work as a subintern sharing in the operation of the neurosurgery service. Points of interest will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate in all conferences.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5422 - PEDIATRIC NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

A four-week elective offering the student a sub internship sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. The elective objectives are: to perform a careful, problem-oriented, neurological examination; to recognize, evaluate and direct the diagnostic work up of common neurosurgical problems such as lumbar and cervical disc herniation, brain tumor, head trauma, intracranial aneurysm, etc.; to recognize and manage increased intracranial pressure, brain herniation, and electrolyte and metabolic disturbances, peculiar to neurological patients; and the basic principles of neurosurgical techniques as well as basic neurosurgical topographic anatomy.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5430 - INTRO CLINICAL NEUROPHYSIOLOGY

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective the student will be exposed to the use of electrodiagnostic tools with particular emphasis on the utilization of auditory, visual and somatosensory evoked potentials in the study of clinical neurological disorders in man. Computational analysis of ongoing EEG will also be utilized. Diagnostic assessment both intraoperative and ICU monitoring will be performed. Opportunities are available to participate in research in electrophysiology and computational analysis of data.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5435 - INTRODUCTION TO CLINICAL NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

This introductory clinical elective will provide students with experiences in the care of neurosurgical patients. A student will work as a member of the clinical team, sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological/neurosurgical problems, neurological diagnosis, and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. Students will have the opportunity to be exposed to cutting edge specialized areas of neurosurgery including gamma knife radiosurgery, neuroendoscopy, and endovascular neurosurgery. In selected cases, students may elect to participate in ongoing research projects in neuro-oncology, neuro-trauma, spine biomechanics, functional neurosurgery, and neurophysiology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5705 - HEAD AND NECK DISSECTION (ILS)

Minimum Credits: 0

Maximum Credits: 0

This course fulfills the integrated life science (ILS) graduation requirement. The course is a four-week selective combining precepted anatomic dissection, various imaging modalities, lectures, operating room exposure, and clinical pathology in a systematic manner. The areas to be covered include anatomy of the head and neck. The course will include lectures in anatomy, pathology and imaging modalities; precepted anatomical dissections and clinical experiences. Clinical experiences will include, but are not limited to, exposure to neurosurgical and otorhinolaryngological procedures in the operating rooms, shadowing time in clinic, as well as assisting in neuropathological examinations. All students will be exposed to the diagnostic modalities appropriate for each anatomic area. They will also have the opportunity to see patients and follow their evaluations and management. To fulfill course requirements, each student will be expected to prepare a formal case presentation correlating the clinical findings, anatomy, diagnostic modalities, pathology and treatment plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5810 - INJURY RESEARCH AND CONTROL

Minimum Credits: 0

Maximum Credits: 0

Students in four-week elective may join basic research projects or initiate their own research projects at center for injury research and control (circl). Center conducts injury control research, gathers and disseminates information on injuries, provides training for healthcare professionals and informs public and community leaders on injury control measures. Students work with epidemiologists to identify risk factors associated with specific injury types. Designed for those interested in gaining residency experience in epidemiologic methods with emphasis on surveillance and/or descriptive injury evaluation..

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5880 - NEUROSURGICAL RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Student will participate in an ongoing research project in the department of neurosurgery under the supervision of an advisor. Objectives include training in basic neurosurgical research techniques and procedures as well as the opportunity to gain in-depth knowledge in the basic neurosciences. This elective is offered in four-week blocks and two blocks must be elected.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5899 - INDEPENDENT STUDY IN NEUROLOGICAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NSURG 5900 - EXTRAMURAL NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in neurological surgery may be arranged at an institution other than the university of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Neurology

NEURO 5366 - NEUROLOGY CORE CLERKSHP

Minimum Credits: 0

Maximum Credits: 0

The (3-week) neurology clerkship focuses on common neurological problems: presentation, diagnosis and treatment. NSURG, neuropath and neurorad experiences are also provided. Clinical teaching includes INPT and OPT settings. Exposure to NSURG or neuropath Brain cutting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exam are main modes of student evaluation. Must accompany registration in PSYCH 5366.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5389 - CLINICAL NEUROLOGY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This four week elective will provide a broad exposure to neurological disorders in an inpatient and outpatient setting. Students may rotate on the inpatient neurology ward, the neurology consult service, or the pediatric neurology service. Students will do initial patient evaluations and will follow patients daily. They will be involved in diagnostic and therapeutic decision making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

NEURO 5393 - INDEPENDENT STUDY IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

This is a third-year level elective. This course may be arranged as a research or a special clinical period of time. All electives are four weeks in duration and will be more specifically identified as to content on the student's transcript at the time credit is given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

NEURO 5410 - NEUROLOGY ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

A four week acting internship is offered on the clinical neurology service. Students will be the primary person responsible for initial patient evaluations and will follow patients daily, order tests and perform procedures including lumbar puncture. They will assimilate test and treatment results for discussion with the attending neurologist during daily rounds. Students will be directly involved with diagnostic and therapeutic decision making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

NEURO 5420 - CLINICAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on consult service at health center hospitals and outlying hospitals; participation in investigation and management of patients; discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking, detailed physical and neurological examination, and recording information on patients will be required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5421 - STROKE SERVICE

Minimum Credits: 0

Maximum Credits: 0

This four week clinical neurology elective will place an emphasis on the evaluation and treatment of patients with cerebrovascular disease including ischemic cerebral infarction and intracerebral hemorrhage. Patients will be seen in the inpatient ward and in an outpatient stroke clinic. Students may participate in ongoing acute stroke trials. They will observe carotid and transcranial doppler ultrasound studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5425 - OUTPATIENT CLINICAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective is a closely supervised clinical clerkship providing a broad exposure to common and unusual outpatient neurologic conditions. Initial manifestations of disease, physical exam findings, effective diagnostic evaluation and treatment options are emphasized. Students will actively participate in initial and follow visits of patients with faculty. Students will also work in neurology subspecialty clinics including stroke, epilepsy, multiple sclerosis, neuromuscular disease, aphasia and neurological rehabilitation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5430 - NEONATAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A four week elective consists of a closely supervised clinical clerkship in neonatal neurology. Students will participate in the diagnostic investigation and management of neonates and young infants with neurologic disorders in both inpatient and outpatient settings. Students, with attending supervision, will learn the neurologic examination of the newborn and evaluation of children with suspected neural disorders. The understanding of neural function and development with its relationship to brain disorders will be emphasized.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5435 - PEDIATRIC NEUROMUSCULAR DISEASE

Minimum Credits: 0

Maximum Credits: 0

This four week elective is a closely supervised clinical clerkship which will provide an opportunity to study a variety of pediatric neuromuscular disorders. Students will participate in the diagnostic evaluation and management of patients in the muscular dystrophy association clinic and have an opportunity to observe electromyographic examinations. Students will perform new patient evaluations and participate in the planning and interpretation of diagnostic studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5440 - PEDIATRIC NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on consult service; participation in investigation and management of patients; discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking, detailed physical and neurological examination, and recording information on patients will be required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5441 - CHILD NEUROLOGY/EPILEPSY

Minimum Credits: 0

Maximum Credits: 0

A four week elective at Childrens' Hospital will provide the student with the opportunity to see inpatients and outpatients with seizures. Students will participate in the evaluation, diagnosis and treatment of these patients and will help to evaluate patients undergoing surgical consideration. Students will learn to identify certain seizure patterns by review of seizures and EEGs recorded on video tape. They will review neuroimaging studies and be involved in discussions about antiepileptic drug management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5442 - EPILEPSY MONITORING UNITY

Minimum Credits: 0

Maximum Credits: 0

This elective will emphasize main 7 core concepts in addition to below described objectives: 1) Students will learn how to take a focused neurologic and seizure history, do a full neurologic exam and present the case to an attending, with formative feedback 2) Medical student will attain basic medical Knowledge on seizure classification, epilepsy syndromes and various types of spells. They will observe a large variety of seizure types and learn how to classify seizures based on clinical presentation and EEG findings 3) Students learn about indication, benefits and limitation of electroencephalogram role. They will understand basic principles and how to read EEG studies and learn to identify seizures on EEG, prognosis for various epilepsy conditions. 4) Students will understand how to diagnosis non-epileptiform spells and their management options. 5) Delivering the message about non-epileptic spells and counseling is one of the most challenging part in regard to management of non-epileptic patients. Students will learn the art of counseling and effectively deliver the patient their diagnosis and management options. 6) They will learn about importance of confirming or excluding epilepsy condition with similar mimickers including syncope. They will learn patient management and pharmacological treatment of these conditions. 7) They will learn about various co-morbid conditions including depression, anxiety, migraine associated with epilepsy. During this rotation, they will have direct observation by faculty, fellows and PA-c and will be working with our multidisciplinary teams in coordinating patient care. This will provide them a very good working environment.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

NEURO 5445 - BEHAVIORAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A four to twelve week elective is offered at highland drive VA Medical Center for students who have an interest in cognitive and psychiatric manifestations of neurological disease. Typical clinical problems include cognitive and personality changes after stroke, head trauma, epilepsy, dementia, neurodegenerative disorders, movement disorders, amnesic syndromes, confusional states and patients with obsessive compulsive presentations. Teaching will include neuropsychological assessments, case conferences and clinical bedside attending rounds.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5450 - NEUROLOGY BOOT CAMP

Minimum Credits: 0

Maximum Credits: 0

Students who are entering the field of neurology or with strong interest in neurology and related fields require a solid foundation of knowledge and skills before embarking on internship and assuming the duties of an intern. This intensive course addresses relevant knowledge and skill building activities by educators deeply involved in postgraduate training.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

Course Attributes: School of Medicine Year 4

NEURO 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty members, as well as the student's scheduling advisor. When approvals have been received, the course will be scheduled and department notified.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5730 - CLINICAL NEUROSCIENCES (ILS)

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective will satisfy the requirement of the integrated life science course of the senior year. The course objectives are: introduce students to clinical academic medicine; educate students in the conduct, design and interpretation of clinical trials; illustrate how basic science findings lead to clinical research advances; and provide additional subspecialty experience. The course will consist of seminars illustrating how basic scientific observations lead to clinical research, internships with a clinical neuroscience residency mentor and a pbl where a clinical research project is designed.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5875 - INDEPENDENT STUDY IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A research project can be arranged with a faculty person on or off-site. Approval of all projects must be secured at the departmental and student

affairs level. These independent study opportunities will be more specifically identified as to content on the student's transcript at the time credit is given.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5876 - BASIC RESEARCH IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

In this elective the student will be involved in the study of the molecular mechanisms that underly neuronal injury in ischemic stroke and the physiological repair mechanisms that injury triggers. One major focus is how prior ischemia induces the expression of neuroprotective gene products, such as stress proteins and death suppressor genes. Another interest is the role of neural stem cells in neural plasticity after injury. Techniques include animal surgery, cell culture, immunohistochemistry, in situ hybridization, Northern analysis and fluorescence detection of calcium.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5877 - COGNITIVE NEUROSCIENCE RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four week elective involves research in cognitive neuroscience. Students can participate in one of several research projects including: computer modeling of human language, computer modeling of the somatosensory cortex, behavioral studies of patients with language disorders and functional neuroimaging of language function. Emphasis will be placed on the relationship between cognitive structures of the mind and the neurobiologic implementation of mental structures in the cellular and molecular hardware of the brain.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5878 - ALZHEIMER'S DISEASE RESEARCH

Minimum Credits: 0

Maximum Credits: 0

An eight week elective places a special emphasis on memory and cognitive problems associated with aging and dementia. Emphasis is placed on clinical diagnosis and the use of neuropsychological testing, laboratory and neuroimaging studies in the diagnosis of dementia. There will be an opportunity to be involved in experimental therapeutic trial being carried out in patients with Alzheimer's disease.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5879 - MOLECULAR NEURO-BIOLOGY/GENETICS

Minimum Credits: 0

Maximum Credits: 0

This neurology elective will provide exposure to research directed at identifying molecules expressed during critical phases of neuronal differentiation using rat cerebellum as a model system. This tissue is studied using molecular biological methods to clone genes in granule cells to study their regulation. Methods used include standard cloning techniques, preparation of RNA from rat tissues, Northern blot analysis, in situ hybridization and histochemistry.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

NEURO 5900 - EXTRAMURAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in neurology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Neuroscience

NROSCI 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 12

Students working on their early research requirement may (but are not required to) register for NROSCI 2000.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2005 - COGNITIVE NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will cover fundamental findings & approaches in cognitive neuroscience, with the goal of providing an over view of the field at an advanced level. Topics will include high-level vision, spatial cognition, working memory, long term memory, learning, language, executive control, and emotion. Each topic will be approached from a variety of methodological directions, i.e. Computational modeling, cognitive assessment in brain-damaged humans, non-invasive brain monitoring in humans and single-neuron recording in animals. Lectures will alternate with sessions in seminar format.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2007 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This course is intended for all graduate students and faculty members. Papers will be selected from current periodicals in neuroscience for presentation. Emphasis is placed on a critical evaluation of experimental procedure and interpretation of data.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2008 - PRO SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Each member of the program faculty presents an overview of the topic on which s/he works and then leads a discussion of a research article in that area. Critical analysis of experiments and of research is emphasized.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 2010 - SCIENTIFIC ETHICS

Minimum Credits: 1

Maximum Credits: 1

The course is an introduction to basic ethical issues that arise in the course of conducting scientific research. It is intended for graduate students in the center for neuro science who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by class discussion of issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NROSCI 2011 - FUNCTIONAL NEUROANATOMY

Minimum Credits: 3

Maximum Credits: 3

This course deals with human neuroanatomy and covers the basic structure of the central nervous system from spinal cord to cerebral cortex.

Emphasis is placed on major systems and subsystems within the brain, and on their functional significance. The basic structure and morphology of nerve cells will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2012 - NEUROPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the electrical properties of nerve cells and the mechanisms by which nerve cells communicate. The following topics will be covered: electrical principles used by nerve cells, the basis of the resting potential, the function of voltage-dependent ionic channels, the mechanisms by which action potentials are generated, neurotransmitter receptor function, and the physiology of fast synaptic communication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2014 - SPEAKING OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Fulfills neuroscience advanced elective requirement. You will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include (1) how to engage your audience, (2) the art of breaking down your message, (3) tips for how to make clear, interesting slides, and (4) pointers on presentation style. All audiences want to learn interesting new scientific information, and have it delivered as a good story in an understandable manner by a personable, easy to approach person. You want to emphasize your message, stay focused, and convey the importance of your message while being interesting, maintaining the attention of the audience and making the learning process enjoyable. Guest speakers will provide background information about various uses of scientific information in the public domain. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and conveying the "big picture". Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Neuroscience (PhD) or Neurobiology (PhD)

NROSCI 2017 - SYNAPTIC TRANSMISSION

Minimum Credits: 3
Maximum Credits: 3

This course examines the mechanisms by which neurotransmitters are synthesized and released and the biochemistry of synaptic responses. Basic physiological, biochemical, and morphological characteristics of neural transmission will be discussed. An emphasis will be placed on the experimental approaches used to examine these processes.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2018 - COMMUNICATING SCIENCE

Minimum Credits: 1
Maximum Credits: 2

This course will foster student's skills in scientific communication and outreach through participation in the CNUP Brain Program. The Brain Program organizes outreach trips by CNUP students and faculty to area middle- and high-schools to foster interest in neuroscience through interactive presentations and demonstrations on a variety of topics. (Established presentations cover basic brain anatomy, mechanisms of memory and learning, traumatic brain injury, and basic neurophysiology.) An enrolled student will: (1) attend classes semi-weekly to prepare presentations, (2) participate in at least three school visits each semester, and (3) give presentations at least twice. The course is designed to help students refine their ability to deliver an audience-engaging 10-15 minute presentation on a neuroscience-related topic through brief hands-on demonstrations and/or power point presentations. On-campus class meetings will be devoted to lectures on effective communication of science to a general audience, individual practice of new or adopted presentations, and constructive feedback to presenters. Students enrolled in the 1-credit option may adopt and adapt existing presentation materials. Students enrolled in the 2-credit option are expected to develop their own presentation. Students will be evaluated by the instructor according to participation.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

NROSCI 2021 - SCIENTIFIC ETHICS & PROFESSIONAL DEVELOPMENT 2

Minimum Credits: 1
Maximum Credits: 1

This course for first-year students in the CNUP Graduate Training Program extends across fall and spring terms. It includes structured and semi-structured discussions on diversity training, ethical dilemmas scientists encounter in their professional lives, and presentations by individual faculty on their personal training histories (traditional and non-traditional), career challenges, positive influences, scientific thought processes, and research questions of deepest significance. Whenever possible, a few presentations will feature alumni from the graduate training program discussing alternate career paths. Each term ends with an opportunity for students to discuss issues of scientific ethics and professional development with the graduate and center co-directors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

NROSCI 2036 - NEUROBIOLOGY OF AGING

Minimum Credits: 3
Maximum Credits: 3

This course examines age-related changes in neurobiological systems, including motor, sensory, cognitive, and neuroendocrine. Emphasis will be placed on distinguishing biochemical, molecular, physiological, and behavioral changes associated with normal aging versus changes associated with pathologic conditions such as Alzheimer's disease. Introductory lectures will discuss different theories of aging, how aging is studied in the

laboratory, and how these relate specifically to neuroscience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NROSCI 2039 - PROCESSING IN NEURAL CIRCUITS

Minimum Credits: 3

Maximum Credits: 3

Sensory information flows from the periphery through different stages of processing in the central nervous system, to the thalamus and cerebral cortex. Within the cerebral cortex, feedforward processing is strongly modulated by top-down "feedback", with impacts on perception and decision making. The computations performed by individual neurons and networks of neurons within each region transform incoming information to produce an output that is projected to other targets in the brain. This course explores the local circuit mechanisms underlying the representation and refinement of sensory information at successive stages of the feedforward processing pathways. We will focus on the formation of receptive field properties within individual neurons, including contributions of feedforward circuitry and interactions between neurons within local circuits, and on how populations of neurons work together to encode information. An important theme of the course will also be to learn about current methodology in systems neuroscience research to study and perturb circuits. Descriptions of such experiments will be incorporated into lectures, and we will also read several primary research articles relevant to the major themes of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NROSCI 2043 - NEURAL PLASTICITY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

Minimum Credits: 5

Maximum Credits: 5

This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2102 - SYSTEMS NEUROBIOLOGY

Minimum Credits: 6

Maximum Credits: 6

This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2104 - QUANTITATIVE METHODS FOR NEUROSCIENCE RESEARCH

Minimum Credits: 4

Maximum Credits: 4

This course is designed to give students the tools necessary to do sophisticated, quantitative analyses of neuroscientific data and promote critical thinking about the quantitative methods and representations used to make scientific claims. Specifically, participants will learn (1) methods for importing, analyzing, and visualizing data using `python` and `jupyter` notebooks, (2) appropriate experimental design and statistical methodologies including both classical and contemporary statistical methods, (3) and basic modeling techniques. To accomplish these goals, students will use real data from the literature including their own when possible.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NROSCI 2106 - NEUROSCIENCE SEMINAR SERIES

Minimum Credits: 1

Maximum Credits: 1

Nationally and internationally recognized neuroscience researchers present scientific findings. Students meet with speakers to discuss seminar topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2107 - CUR RES NEURAL BASIS COGNITION

Minimum Credits: 1

Maximum Credits: 1

Presentations of current research by students and faculty of the center for the neural basis of cognition, and by visiting researchers from other universities. Areas of cognition covered include perception, memory, language, attention, motor control, and executive functions. Disorders of cognition as well as developmental issues are considered. Methodologies include single neuron recording studies, functional brain imaging studies, computational modeling studies, and behavioral investigations using normal populations and individuals with cognitive disorders.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2112 - NEUROBIOLOGY OF DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare an essay on a topic of relevance to the neurobiology of disease. Reading will consist of reviews and recent research articles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2200 - NEUROPHARMACOLOGY OF ADDICTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of the biological basis of addiction and the neuropharmacology of drugs of abuse and dependence, including basic principles of drug action as well as comprehensive coverage of the major classes of drugs (opioids, stimulants, nicotine, alcohol, sedatives, cannabis, hallucinogens). Students will study mechanisms of action, effects, pharmacokinetics as well as tolerance and dependence for each of these drugs/drug classes. The reasons for addiction including biological, genetic, cultural and other determinants will be discussed. Students will learn about laboratory-based methods used in addiction research, common pharmacotherapies used to manage alcohol and drug addiction, and consider public health issues associated with addiction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NROSCI 2410 - TRANSLATING SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, laboratories, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective, engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Guest speakers with expertise in film, video and use of museum exhibits will be included. Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of dr. Cameron you will choose a scientific advisor with specific expertise on the topic you will develop an outreach tool for. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of PowerPoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and a high school version of the lecture. They will present the lecture at one of the grade levels it was designed for. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NROSCI 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 12

Students doing laboratory research with a neuroscience faculty member should register for this course.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

Students doing laboratory research with a neuroscience faculty member should register for this course.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 12

Students working on their dissertation may register for this course.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 3001 - APPRENTICESHIP

Minimum Credits: 1

Nuclear Engineering

NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to application of theory to practical aspects of nuclear science and technology. It is intended as a ramp-up course for non-

nuclear engineers who wish to pursue additional graduate level courses in nuclear engineering at the University of Pittsburgh. Graduate level content will be assured by the use of rigorous quantitative homework assignments, take-home exams, and an individual research project to be presented at the end of the semester. This course is designed to accommodate working adults who must travel from time to time though it is not designed to be taken completely asynchronously. Topics will include: atomic and nuclear physics, nuclear reactions and radiation, radiation protection, fission reactor basics, neutron diffusion, time-dependent reactors, reactor thermal-hydraulics including nuclear heat generation, conductive and convective heat transfer, ideal and non-ideal fuel rod analysis, thermodynamics, and a review of major nuclear criticality and power plant accidents.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2101 - NUCLEAR CORE DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

This course reviews the mathematics of nuclear reactor kinetics. Linear systems of ordinary differential equations are solved by state vector techniques, laplace transform techniques, or finite difference techniques including the treatment of discretization errors resulting from various finite differencing approximations. A review of the physics of nuclear kinetics is followed by treatments of the kinetics equations including the effect of uncertainties, approximate solutions, and the interpretation of experiments to measure kinetics parameters. Representations and the physical basis of reactivity feedback mechanisms are treated. Lumped and distributed parameter models of fuel, coolant, fission products are derived and applied to develop quantitative static relationships and qualitative dynamic results for transient conditions. The course provides an introduction to space dependent reactor kinetics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course provides an integrated engineering examination of a nuclear power plant from the perspective of instrumentation and control systems used to infer the condition of the nuclear plant and its systems, control its normal operation, and provide protection during transient situations as well as assess core damage during severe accident situations. Students will apply previous knowledge of analog, digital, and microprocessor electronics techniques to nuclear power plant design and operation and reactor protection and safety considerations that influence the design of the reactor plant. A major outcome of this course will be an integrated understanding of the interaction between the physics of nuclear plant control (reactivity and heat balance) and the control and protection systems. This integrated plant understanding will be essential for the successful completion of the integrated nuclear power plant operations course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE

Minimum Credits: 3

Maximum Credits: 3

This course examines design bases for major systems and components in a nuclear plant and evaluates how the systems function in an integrated fashion. The student will examine a typical nuclear power plant and those components and systems of the nuclear plant complex that have the potential for affecting core power, and whose failure could be an initiating event for a plant transient. Dynamic relationships for the systems developed in the companion nuclear courses will be transformed into stable, numerical algorithms for computer solutions and system interactions will be illustrated using a major industry transient analysis code. Emphasis is on how operations of and faults in systems and components can influence reactivity and core behavior. Through classroom discussions the students will assess engineering problems and operational problems that have been experienced in historical nuclear plant operations. The intended outcome is an aptitude for predicting complex transient behavior of the integrated nuclear plant considering factors that are important for safe and efficient operation: reactivity management and control, coolant inventory control, and core heat removal.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

Nuclear power is an abundant and renewable power source with unique characteristics which require special attention in its design, licensing and operation. This course explains the fundamental plant processes: nuclear fission, neutron kinetics, heat transfer, chemistry and feedback mechanisms, showing how variations in one plant parameter can propagate effects in the others in ways not seen in fossil, solar, wind, or other systems. The student will also learn methods for analyzing these processes, and the relationship of their features to normal and off-normal plant operations, up to and including postulated severe accidents. Both deterministic analysis and Probabilistic Risk Assessment (PRA) will be employed, with exercises provided in both approaches. Similar concepts will also be applied to the design, manufacture and utilization of nuclear fuel. Stress is placed throughout on the defense in depth concept, and the nuclear safety cultural approach - a necessary point of view regarding how tasks are approached and conducted, whether they be analytical or operational.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

This course promotes understanding of how the integrated nuclear plant works and what challenges the operator faces, and helps an engineer 'speak operations' with interfacing groups. Use of the replica simulator is an effective way for students to understand accident control, emergency operating procedures, and how the control room interfaces with the rest of the plant. Emphasis is placed on understanding plant characteristics and controls, rather than on developing control manipulation skills. Intended outcomes are an aptitude for predicting transient behavior of the integrated plant and a command of reactivity management and control that is important for efficient operation of a nuclear plant complex. The course presumes knowledge of the major systems in a nuclear power plant and will emphasize how operations of and faults in those systems and components can affect reactivity and core transient behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2110 - NUCLEAR MATERIALS

Minimum Credits: 3

Maximum Credits: 3

In this course, materials principles are taught in the initial lectures; students do not need to have prior understanding of them. The course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well as the effects of irradiation on corrosion performance, and the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Nuclear and radiochemistry are subdisciplines of nuclear science that focus on the study of radioactive materials and their applications. The course will provide students with knowledge of fundamental nuclear science concepts that are key to the understanding of nuclear power plant safety, spent fuel and nuclear waste management, nuclear fuel reprocessing, environmental radioactivity, nuclear forensics, radionuclide production, medical imaging, nuclear pharmacy, and medical and health physics. The proposed course will consist of lectures on nuclear science fundamentals that include: atomic structure, nuclear models and properties, phenomenon of radioactive growth and decay, radiation emissions, nuclear reactions, radiation interactions with matter, radiation detection and measurement, radiation dosimetry and biological effects, and applications of nuclear and radiochemistry in science, engineering, and medicine.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2113 - RADIATION DETECTION AND MEASUREMENT

Minimum Credits: 3

Maximum Credits: 3

This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical basis of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2100 or ENGR 2100; PROG: Swanson School of Engineering (PENGR)

NUCE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

BWR Thermal-Hydraulics and Safety is a course that focuses on the Boiling Water Reactor (BWR), design, operation, transient response, and abnormal operating conditions and accidents; boiling water heat transfer and two-phase flow; applications with respect to the Fukushima Daiichi BWRs. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. Thermal-hydraulics (T/H) and safety portions of the lectures cover boiling heat transfer and two-phase flow in BWR systems, T/H performance and thermal limits. BWR abnormal operating conditions and accidents are studied in theoretical response followed by hands-on simulator program exercises. Finally, accident evaluations and overview of the state-of-the-art safety analysis techniques for licensing applications are reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2118 - COMPUTATIONAL RADIATION TRANSPORT

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth review of modern computational techniques used for solving the linear boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte carlo methods for the simulation of radiation transport, a first-principles derivation of the boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also place a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2120 - MATHEMATICALL MODELING OF NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

Graduate students will develop the graphics/simulation framework and the underlying mathematical models for simulating nuclear power plants in ME/ENGR 2120 mathematical modeling of nuclear plants. Models will be developed in Matlab/Simulink(tm) and configured to run on a PC so that students can both examine the mathematical models on which the simulation is based and use the simulation program in laboratory-like sessions to study the effect of design changes on plant behavior. The simulation model fidelity developed is suitable for educational purposes and provides students with a desktop tool to realistically model and better understand reactor performance under various conditions. While it would not be intended to replace or duplicate the high-fidelity dynamic simulation used in major accident analysis codes such as Relap, Trac, and Trace, the course will provide the student with an introduction and a working knowledge what is embodied in these industry standard codes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER

Minimum Credits: 3

Maximum Credits: 3

This course will teach management theory and best practices associated for a successful manager in the nuclear industry. The following topics presented and discussed: management theory and practice; ethics; generation economics across the U.S.; dispatch curves; implications of economic factors for existing and new nuclear plants and likely future changes; compensation theory and best practices; labor law issues and challenges common to the nuclear industry; contract law issues and challenges in the nuclear industry; management techniques for dealing with the diverse age groups; change management techniques and best practices in corporations; ethics challenges and issues in the nuclear field; management interactions with inpo and the nrc; project management techniques and practices; management's role in nuclear safety and security culture. Case studies of actual business situations will be studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS

Minimum Credits: 3

Maximum Credits: 3

Presentation of major issues associated with systems and component engineering relative to the nuclear power industry and the industry's consensus codes and standards. The course provides an explanation of the necessity of consensus codes and standards, a high-level view of codes and standards organizations, and shows how codes and standards promotes the safe operation of nuclear power plants. The course discusses how the NRC adopts and makes use of consensus codes and standards. It covers codes and standards for current, advanced and next generation, and high-temperature reactors, including global conformity assessment requirements. Relevant codes and standards from other communities, including nuclear quality assurance, are also summarized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

NUCE 2130 - THE NUCLEAR FUEL CYCLE

Minimum Credits: 3

Maximum Credits: 3

Studies the entire nuclear fuel cycle, beginning with the mining of uranium ores and progressing through the chemical and physical processes supporting enrichment, subsequent chemical conversion to uranium dioxide, and design and fabrication of fuel assemblies for use in a power reactor core. Aspects associated with fuel core management, operation and utilization in the reactor core along with the regulatory licensing requirements are presented. Following fuel operation the areas of fuel onsite handling, transportation of spent nuclear fuel and options for diverse long term secure storage are reviewed and evaluated. Reprocessing and recycling are discussed which includes fuel resource utilization, proliferation control, and waste volume minimization. Discussion of regulatory issues completes the picture, enabling the student to understand not only the processes, economics and industry drivers, but also the benefits and issues that have been addressed with nuclear power generation. In all phases of the cycle, the student is acquainted with the quantitative techniques and methods employed in the nuclear fuel cycle.

Academic Career: Graduate

Course Component: Lecture

Course Requirements: PREQ: (ME 2100) or (ENGR 2100); PROG: Swanson School of Engineering (PENGR)

NUCE 2131 - SPECIAL TOPICS IN NUCLEAR ENGINEERING, METAL COOLED REACTORS

Minimum Credits: 3

Maximum Credits: 3

This course is intended to provide you with an understanding of the technology associated with high-energy neutron reactors (most often called fast reactors). The course materials consist primarily of archival papers from literature, the GENIV International Forum materials, my slides, and the time we spend together during lectures; a bibliography of papers relevant to these reactors is provided in the course syllabus. Although many nations' sodium-cooled reactor programs continue to be based on oxide fuel, there is a better way metal fuel. In this course, the student will become more aware of the state of high-energy neutron reactor technology. Moving nuclear power from low-energy neutron fission (water-cooled reactors) to high-energy neutron fission (metal-, salt-, or gas-cooled reactors) will revolutionize fission, just as jet engines and fracking revolutionized commercial air transportation and oil/gas production, respectively. We will focus on metal-cooled high-energy neutron reactors, but you can easily transpose this knowledge to salt or gas systems.

Course Component: Lecture

Grade Component: Grad Letter Grade

NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

This course will review the fundamentals of boiling water reactor systems and operations as they apply to analysis, design, selection and application of power generation. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. With successful completion of the class students will understand how BWRs operate through

Nurse Anesthesia

NURSAN 2633 - NURSE ANESTHESIA CARE DELIVERY IN CAMBODIA: STUDY ABROAD

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the undergraduate nursing student with exposure to the culture and health care delivery system in a foreign country. Emphasis will be placed on exploring health issues and risk factors, the impact of cultural characteristics on health care delivery and utilization, and the achievement of health-related goals in Cambodia. Students will compare the health care systems, nursing education and nursing practice in Cambodia and the United States.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Attributes: Study Abroad

NURSAN 2700 - BASIC PRINCIPLES OF ANESTHESIA

Minimum Credits: 5

Maximum Credits: 5

This course prepares the student for entry into the clinical setting using classroom lecture and workshops. Basic concepts of anesthesia practice, techniques, monitoring, pharmacology, and responsibilities of the nurse anesthetist are presented. Students are introduced to anesthesia management strategies for common problems and situations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2701 - CHEMISTRY AND PHYSICS OF ANESTHESIA

Minimum Credits: 3

Maximum Credits: 3

Provides a detailed study of chemical and physical principles which apply to physiology, pharmacology and anesthesia equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2715 - ADVANCED PRACTICE INITIATIVES FOR THE CRNA

Minimum Credits: 3

Maximum Credits: 3

Course focuses on the expansion of the knowledge base and refinement of practice skills of experienced CRNA's. Students identify an area of study in the field of nurse anesthesia in which they wish to improve knowledge and clinical expertise. Students develop and implement a comprehensive plan which includes establishing specific goals, developing a program of independent study, negotiation of a clinical practice site and completion of a defined clinical practicum. Objectives are met thru a learning contract, an oral and poster presentation and a written scholarly paper.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2720 - APPLD PHYSLGY & PATHOPHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

Integrates basic physiologic principles with clinical anesthesia management regimes. Designed to formulate approaches to anesthesia nursing management in the presence of various common pathophysiologic conditions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2730 - ADV PRINCIPLES OF ANESTHESIA 1

Minimum Credits: 4

Maximum Credits: 4

Provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and the rationale for their use in each of the areas of sub specialization. These areas encompass pediatric, obstetric, and regional anesthesia management as well as acute and chronic pain management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2731 - APPLIED PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides the basis for an in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and critically analyzed for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the nurse anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2740 - ADV PRINCIPLES OF ANESTHESIA 2

Minimum Credits: 3

Maximum Credits: 3

The course provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and relevant research-based rationale for their use in each of the areas of sub specialization. The focus is on anesthetic care for patients with diseases requiring cardiac, thoracic, vascular, pulmonary cardiac/lung transplant procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2750 - ADV PRINCIPLES OF ANESTHESIA 3

Minimum Credits: 3

Maximum Credits: 3

Provides an in-depth study of specialized areas of nurse anesthesia practice. The concentration is on the theoretical basis for specific anesthesia nursing interventions and the rationale for these interventions in each area of sub-specialization. Course will focus on anesthesia for neurologic, trauma, renal, respiratory, hepatic and hematologic disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 2751 - TEAM TRAINING IN PATIENT SAFETY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2760 - CRNA ROLE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course prepares the nurse anesthetist for new areas of responsibility as a professional contributing to education, research, and advanced practice roles. Students gain experience in developing and implementing a community service project designed to promote a positive image of nurse anesthetists. Current legislative, legal and ethical issues are presented. Professional opportunities and issues are explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia(DNP, MSN)

NURSAN 2785 - THESIS

Minimum Credits: 1

Maximum Credits: 3

Individual instruction provides guidance in the preparation of a scholarly written report relating to anesthesia nursing. This report synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2791 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to anesthesia equipment, procedures, medications and the perioperative environment. Students will be required to meet or exceed level specific objectives and experiences will build from simple cases and techniques to the more complex. Clinical experience will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: CREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2792 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This second clinical course is designed to integrate with more advanced didactic coursework with focus on physiology and pathophysiology applied in anesthesia practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to more complicated cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2793 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This third clinical course is designed to build on more advanced didactic coursework including focus on pathophysiology, applied pharmacology and specialty case management. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2794 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This fourth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2795 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This fifth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on neurosurgical, trauma, orthopedic, renal transplant and hepatic transplant anesthesia. Students will apply advanced principles of fluid and blood management and demonstrate the ability to treat perioperative hematologic disorders. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2796 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This sixth clinical course is designed to assist the nurse anesthesia student to synthesize content from all advanced principles courses and to become increasingly independent in their clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2797 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This seventh clinical course is designed to assist the nurse anesthesia student to synthesize all didactic content and to demonstrate their ability to meet all program outcome criteria for clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to all types of cases for patients across the acuity spectrum. Students will be expected to manage anesthesia with a high degree of autonomy in this clinical rotation. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 3751 - TEAM TRAINING IN PATIENT SAFETY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3752 - TEAM TRAINING IN PATIENT SAFETY IN ANESTHESIA

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the student with a theoretical and practical foundation relating to human performance, simulation education, team training science and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Critical event management, team training approaches, simulation educational methods and human performance analysis will be used to support group discussion and inform course assignments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3782 - DIRECTED SEMINARS IN NURSE ANESTHESIA PRACTICE

Minimum Credits: 1

Maximum Credits: 3

This seminar based course series is designed to provide the nurse anesthesia program DNP student with a strong theoretical and practical foundation grounded in nurse anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including nurse anesthesia education, nurse anesthesia simulation methods, clinical research for the nurse anesthetist, and nurse anesthesia administration. The seminar series focus and content will change according to current state-of-the-art practice in nurse anesthesia with consideration given to faculty and student areas of interest.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 3783 - REGULATION AND REIMBURSEMENT IN NURSE ANESTHESIA PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines the current regulatory requirements of governmental and non-governmental entities that impact and control nurse anesthesia practice. Approaches to influence positive changes in this practice discipline are explored. The generation of revenue in the specialty of anesthesia, including billing procedures and requirements of governmental and private health insurance providers, effective departmental organizational structure, and fraud are discussed. Current legal and advanced professional issues are included

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Hybrid

NURSAN 3784 - CURRICULUM, INSTRUCTION AND EVALUATION IN NURSE ANESTHESIA EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course will prepare CRNAs for the various roles of an educator within a nurse anesthesia program. Concepts of academic and clinical curriculum development specific to nurse anesthesia programs, best practice methodologies for clinical and didactic instruction, and evaluation approaches for academic and clinical performance will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Hybrid

NURSAN 3785 - INTRODUCTION TO THE NURSE ANESTHETIST ROLE

Minimum Credits: 2

Maximum Credits: 2

This introductory course will provide student socialization into the role of nurse anesthesia practice and prepares the student for more advanced content within curriculum. This course provides fundamental concepts related to the professional role, anesthesia types and anesthesia processes. Safety principles essential to preventing negative outcomes for both patients and providers will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3099

NURSAN 3786 - BASIC PRINCIPLES OF ANESTHESIA

Minimum Credits: 3

Maximum Credits: 3

This course prepares the student for entry into the clinical practice setting by presenting fundamental concepts of general, regional, pain management, and sedation anesthesia. Airway management techniques, positioning, and an introduction to anesthetic pharmacology are emphasized. Anesthetic management strategies for patients with common diseases and perioperative problems are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia

NURSAN 3787 - BASIC PRINCIPLES OF ANESTHESIA LAB

Minimum Credits: 1

Maximum Credits: 1

This course provides students with necessary skills to enter clinical practice. Psychomotor, critical thinking and affective skills will be developed using a variety of experiential learning approaches. Best practices in simulation educational methods will be used and will include a variety of approaches. Students will demonstrate attainment of entry level skills required for clinical practice.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia

NURSAN 3788 - CHEMISTRY AND PHYSICS IN ANESTHESIA

Minimum Credits: 2

Maximum Credits: 2

This course provides the nurse anesthesia student with a fundamental understanding of chemical, biochemical and physics principles as they relate to physiology, pharmacology and the practice of anesthesia. Essential concepts related to chemistry and physics principles necessary to provide safe and effective anesthesia care are emphasized. Chemistry and physics concepts will be related to anesthesia equipment and processes in order to illustrate their importance to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia

NURSAN 3789 - PHYSICAL DIAGNOSIS- ANESTHESIA

Minimum Credits: 1

Maximum Credits: 1

This course offers students the skills required for conducting a preoperative anesthesia history and physical (H&P) exam, identifying risk factors (anesthetic, patient, surgical), developing a relevant anesthetic management plan and writing appropriate post-operative orders. Students will gain skill in interpreting pre-operative diagnostic tests and lab values. Students will gain familiarity with the Electronic Medical Record and charting skills. Students in this course will also develop in the areas of enhancing patient and family relations as well as health screening and intervention. Students will participate in immersive educational approaches utilizing standardized patients and structured debriefing methods.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP)

NURSAN 3790 - BASIC CLINICAL CARE 1: INTRO TO TECHNOLOGY, MONITORING, AND PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to basic level anesthesia technology and equipment, medications, monitoring procedures, and the perioperative environment. Experiences will begin with simple cases and techniques and build to more complex ones. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Clinical case conferences and ongoing assessments will be conducted to evaluate the students' ability to apply basic didactic coursework into clinical anesthesia care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3786

NURSAN 3791 - ADVANCED PRINCIPLES ANATOMY, PHYSIOLOGY & PATHOPHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This first course in a 2- course series is designed to help students understanding of advanced concepts in Anatomy, Physiology and Pathophysiology related to anesthesia care. Advanced principles of patient management supported by best evidence will be applied to the clinical practice of nurse anesthesia across a variety of body systems and surgical procedures. Students will formulate and evaluate approaches to anesthesia management in the presence of pathophysiologic conditions affecting the Central Nervous System (CNS), neuromuscular, cardiovascular, respiratory, skeletal, and immune systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3786; CREQ: NURSAN 3792

NURSAN 3792 - BASIC CLINICAL CARE 2: BASIC PRE-OPERATIVE, INTRAOPERATIVE, AND POST-OPERATIVE CARE

Minimum Credits: 1.5

Maximum Credits: 1.5

This second clinical course promotes development of skills gained in NURSAN 3790 and integrates prior basic didactic content with more advanced concepts. The primary focus will be on the application of physiology and pathophysiology into anesthetic practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas as well as increasingly complicated cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Clinical case conferences will be conducted to assess the students' ability to combine more advanced didactic content into patient specific perioperative anesthesia care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3790; CREQ: NURSAN 3791

NURSAN 3793 - ADVANCED PRINCIPLES OF ANESTHESIA 1

Minimum Credits: 3

Maximum Credits: 3

This course is the first in the three-part Advanced Principles series which provides in-depth study of specialized areas of nurse anesthesia practice. Lectures will concentrate on the theoretical basis for specific anesthesia nursing interventions and the rationale for their use in the pediatric and obstetric specialties. Concepts related to regional anesthesia, acute pain management and chronic pain management will be reviewed. Plans of care for pediatrics, obstetrics, patients requiring regional anesthesia and pain patients will be developed and evaluated. Current techniques and technologies related to management of regional anesthesia and pain blocks will be reviewed and reinforced with a variety of simulation experiences (hands-on, screen based, virtual).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3794 - EVIDENCE BASED NURSE ANESTHESIA PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This course builds on knowledge and skills acquired in NUR 2000 and NUR 2011. Translation of research evidence to nurse anesthesia clinical practice is a focus. Students will critique research papers, quality improvement projects and programmatic evaluations. Students will gain an understanding of how clinical practice guidelines (e.g., American Society of Anesthesia, American Heart Association, World Health Organization, and Centers for Disease Control) are developed, evaluated and disseminated. Differences between research projects, quality improvement projects and program evaluation projects will be explored. Students will gain an understanding of methods for integrating clinical practice guidelines into capstone projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034 and 2000

NURSAN 3795 - ADVANCED PRINCIPLES OF ANATOMY, PHYSIOLOGY, AND PATHOPHYSIOLOGY 2

Minimum Credits: 2

Maximum Credits: 2

This second course in the series is designed to review the relevant anatomy and physiology of the endocrine, renal, hepatic, gastrointestinal, (and other intraabdominal organ), immune, hematologic and genitourinary systems. Students will develop in-depth understanding of how pathophysiology involving these systems will influence anesthetic choices and management approaches. Referencing best-evidence and clinical protocols, students will describe management approaches for surgical and therapeutic procedures related to these systems. Additionally, the pathophysiology of psychiatric illness, infectious disease, cancer and obesity will be reviewed and approaches to anesthesia care in the presence of these conditions will

be developed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3791; CREQ: NURSAN 3797

NURSAN 3796 - ADVANCED PHARMACOLOGY FOR NURSE ANESTHETISTS

Minimum Credits: 3

Maximum Credits: 3

This course provides the basis for in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and evaluated for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the Nurse Anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis. Students will formulate specific pharmacologic plans through synthesis of a variety of concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034; CREQ: NURSAN 3797

NURSAN 3797 - ADVANCED CLINICAL CARE 1: PAIN MANAGEMENT, ULTRASOUND, REGIONAL ANESTHESIA, PEDIATRICS, & OBSTETRIC

Minimum Credits: 1.5

Maximum Credits: 1.5

This third clinical course is designed to begin integrating more advanced clinical concepts into the clinical experience. Primary focus will be on application of the principles of advanced physiology, pathophysiology and applied pharmacology to management of increasingly advanced clinical cases. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Supplemental clinical case conferences will focus on the students' ability to integrate more advanced didactic content into patient specific clinical anesthesia care. Particular emphasis will be placed on discussion of approaches to pain management, regional anesthesia, obstetrics and pediatrics.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3792; CREQ: NURSAN 3793

NURSAN 3798 - ADVANCED PRINCIPLES OF ANESTHESIA 2

Minimum Credits: 3

Maximum Credits: 3

The second course in the Advanced Principles series provides in-depth study of specialized areas of Nurse Anesthesia Practice. Lectures concentrate on the theoretical basis for specific interventions and relevant research-based rationale for their use in each area of sub specialization. Planning for the anesthetic care of patients with diseases requiring cardiothoracic, pulmonary, vascular, gynecologic, genitourinary and transplant (heart and lung) procedures is the focus. Current techniques and technology related to safe management of care for patients undergoing these procedures will be reviewed. Incorporated interactive workshops using models and mannequins will allow skill development in the areas of fiberoptic bronchoscopy, jet ventilation, Double Lumen Endobronchial Tube placement (DLEBT) and Central Venous Catheter insertion. Skills in scientific writing for publication in preparation for Capstone project completion will be developed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: NURSAN BSN-DNP

NURSAN 3799 - DIRECTED SEMINAR: THE BSN TO DNP STUDENT ANESTHETIST

Minimum Credits: 1

Maximum Credits: 1

This seminar based course is designed to provide the Nurse Anesthesia Program DNP Student with a strong theoretical and practical foundation

grounded in Nurse Anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including Nurse Anesthesia Education, Nurse Anesthesia Simulation Methods, Clinical Research for the Nurse Anesthetist and Nurse Anesthesia Administration, and nurse anesthesia policy. The focus and content will change according to current state 'of-the-art practice in Nurse Anesthesia with consideration given to faculty and student areas of interest, to include international practice in developing countries.

NURSAN 3800 - NURSE ANESTHETIST ROLE SEMINAR

Minimum Credits: 1.5

Maximum Credits: 1.5

This course prepares the nurse anesthesia student for their new role as a CRNA and Advanced Practice Registered Nurse. Areas of professional responsibility and potential professional roles will be addressed including APRN, educator, military member, consultant, self-employed practitioner, CRNA clinician, leader, change agent, organizational leadership position and administrator. Licensure, accreditation, certification and educational requirements for CRNAS as APRNS will be reviewed. Pathways to active involvement in community service and legislative advocacy will be discussed and analyzed. Legal, financial, malpractice and ethical issues related to nurse anesthesia practice will be addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia

NURSAN 3801 - ADVANCED CLINICAL CARE 2: CARDIOTHORACIC, CARDIOVASCULAR AND VASCULAR

Minimum Credits: 1.5

Maximum Credits: 1.5

This fourth clinical course is designed to assist the nurse anesthesia student to integrate advanced clinical concepts being covered concurrently in the classroom with the clinical experience. Primary focus will be on specialty case management, including cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas to manage increasingly complicated and specialty cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Supplemental clinical case conferences will be conducted with focus on these specialty populations. These conferences will correspond to current didactic courses.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3798

NURSAN 3802 - ADVANCED PRINCIPLES OF ANESTHESIA 3

Minimum Credits: 3

Maximum Credits: 3

The third course in the Advanced Principles series provides in-depth study of specialized areas of Nurse Anesthesia Practice. Lectures concentrate on the evidence base for specific anesthetic and surgical interventions. Anesthetic approaches and management plans for patients with traumatic injuries, burns (across the lifespan), alterations of hemostasis, hematologic disorders and neuropathology and pulmonary conditions will be reviewed. Neurosurgical, diagnostic radiology, solid organ transplant (renal, hepatic etc.) trauma, reconstructive and plastic surgery procedures will be reviewed. Current techniques and technology related to safe management of care for patients undergoing procedures involving these areas will be examined. Interactive workshops in managing trauma and performing invasive and non-invasive procedures will allow development of psychomotor skills in caring for burn and trauma patients. This course will also focus on principles of scientific writing for publication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3803 - ADVANCED CLINICAL CARE 3: NEUROSURGICAL, TRAUMA, AND EMERGENCY

Minimum Credits: 1.5

Maximum Credits: 1.5

This fifth clinical course builds upon experiences gained in NURSAN- 3801 and prior courses. The focus will be on demonstration and refinement of more advanced skills as well as incorporating content from concurrent didactic coursework into patient care. Students will demonstrate the ability to implement patient specific plans of care for neurosurgical, neurovascular, and trauma, renal, hepatic and emergency procedures. Students will also demonstrate the ability to manage complex pathophysiology. Students will gain an awareness of the broader professional roles and responsibilities of the CRNA (administrative, patient advocacy, process and patient safety evaluator). Supplemental clinical case conferences will be conducted with focus on these specialty populations and the CRNA role.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3801; CREQ: NURSAN 3802

NURSAN 3804 - ADVANCED CLINICAL CARE 4: SYNTHESIS OF PERIOPERATIVE CARE

Minimum Credits: 2

Maximum Credits: 2

This sixth clinical course builds upon experiences gained in NURSAN- 3803 and prior courses and is designed to help the student refine their knowledge base and develop increasing sophistication in practice. Students will be able to provide care for any combination of patient acuity level and complexity of procedure across the lifespan. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Integrated clinical case conferences will require students to present their patients and defend their plan of care with rationale based on best practices.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3803

NURSAN 3805 - COMPREHENSIVE ANESTHESIA REVIEW SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course is designed to comprehensively review the body of knowledge necessary to enter Nurse Anesthesia practice. Nurse Anesthesia student preparation for both the DNP Comprehensive Examination and the National Board of Certified Registered Nurse Anesthetist National Certification Examination will be enhanced. Review topics will include: Basic Sciences, Equipment, Instrumentation, Technology, Basic Principles of Anesthesia and Advanced Principles of Anesthesia. A series of seminars and presentations interspersed with comprehensive, computerized examinations will be administered to allow students to evaluate their knowledge level and their test taking skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia

NURSAN 3806 - TRANSITION TO CLINICAL PRACTIC

Minimum Credits: 2

Maximum Credits: 2

This final clinical course is designed to help the student transition from the student role to clinical practice. Students will be expected to create sophisticated patient and case specific management plans. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists, but students will be expected to practice with little or no prompting from their clinical supervisors and understand their limitations. Clinical experiences will include specialty cases and experiences in all areas of practice as assigned. Clinical case conferences will be held that challenge the breadth of the students' knowledge base across the full scope of the clinical and professional role of the CRNA.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Anesthesia

Nurse Midwife

NURNM 3500 - AMBULATORY ROLE PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course targets the implementation of evidence-based practices and interventions that serve as the basis for the nurse midwifery care of health conditions associated with pregnant and non-pregnant women within ambulatory healthcare settings. The implementation of culturally sensitive and appropriate gynecological, antepartal, and postpartum care drawn from diverse theoretical frameworks is also a primary focus of the course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURNM 3507 and NURNM 3513; CREQ: NURNM 3511; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3501 - GLOBAL/COMMUNITY ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on nurse midwifery assessment of various community level women's and maternal-child health issues and planning for intervention. Public health, epidemiologic, ethical and legal considerations are applied to critiquing proposed projects.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3508 and NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3502 - HIGH RISK CHILDBEARING FAMILY

Minimum Credits: 4

Maximum Credits: 4

This course targets evidence based-practices and interventions that serve as the basis for family-centered nurse midwifery care of high risk conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's and family's experience associated with a high risk pregnancy are discussed and examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3500; CREQ: NURNM 3504; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3503 - INTEGRATION ROLE PRACTICUM

Minimum Credits: 7

Maximum Credits: 7

This course is the culminating nurse midwifery practicum with the student focusing on the practice of full scope nurse midwifery under the guidance and supervision of a Certified Nurse Midwife preceptor. Full scope nurse midwifery care encompasses counseling and management during the preconception, pregnancy, labor and birth, postpartum, neonatal period, and across the reproductive life cycle within the family.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURNM 3504; CREQ: NURNM 3510; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3504 - LABOR & BIRTH ROLE PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum targets the nurse midwifery model of care in implementation of evidence-based practices and interventions that serve as the basis for the management of health conditions associated with family-centered pregnancy, labor and birth, postpartum, and the neonatal period. The implementation of culturally sensitive and appropriate antepartal to postpartal to neonatal care drawn from diverse theoretical frameworks is also a primary focus of the course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURNM 3500; CREQ: NURNM 3502; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3505 - MANAGEMENT FETUS/NEONATE IN DYAD

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nurse midwifery management of the fetus/neonate within the mother-newborn dyad and family. Emphasis is on selected theories, principles, and techniques from the physical and behavioral sciences central to the nurse midwifery model of care for the fetus/neonate. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3507; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3506 - MANAGEMENT WOMEN'S COMPLEX HEALTH ISSUES

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nurse midwifery model of care with women experiencing complex reproductive health issues. Emphasis is on selected theories, principles and techniques from the physical and behavioral sciences central to the nurse midwifery management of women, women's issues, health promotion for women, and diagnosing and managing complicated reproductive health problems. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2523 and 2515 and 2505; CREQ: NURNM 3513; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3507 - NEONATAL ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on the nurse midwifery model of care for the neonate within the mother-newborn dyad and family. Examination, assessment and management of the neonate from birth through the first 28 days of life are applied in practice.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3505 and NURNM 3513; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3508 - NURSE MIDWIFE GLOBAL AND COMMUNITY HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is concerned with the role of nurse midwives in population-based health. Public health, epidemiologic, ethical and legal issues applicable to women, newborns, and childbearing families in diverse settings at local, national and international levels will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3509 - ROLE SEMINAR 1: PROFESSIONAL NURSE MIDWIFE

Minimum Credits: 1

Maximum Credits: 1

This introductory seminar is designed for enculturation to the art and science of the nurse midwifery profession for care of women, newborns, and

families in diverse settings. Articulation of nurse midwife (NM) role with the Doctor of Nursing Practice (DNP) will be developed. Midwifery history, philosophy of care, ethics, standards, and competencies will be emphasized in developing the role and scope of NM DNP practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2010 and NUR 3099; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3510 - NURSE MIDWIFE ROLE SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This is a culminating seminar emphasizing issues unique to the implementation of the role of the Nurse Midwife (NM) in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice for then DNP care trends, health care needs of women, maternal-infant dyads and childbearing families in diverse environments, and legislative and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM practice will be emphasized. Identification, assessment, and advanced management of common and complex health problems in specific populations will be addressed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3513; CREQ: 3503; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3511 - NORMAL CHILDBEARING FAMILY

Minimum Credits: 4

Maximum Credits: 4

This course targets evidence-based practices and interventions that serve as the basis for nurse midwife (NM) management of normal and common health conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's experience of pregnancy, childbirth, and the taking-on of the maternal identity/role in context of family are also examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNM 3505 and NURNM 3506; CREQ: NURNM 3500; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3512 - WOMEN'S HEALTH ROLE PRACTICUM 1

Minimum Credits: 1

Maximum Credits: 1

This is an entry level clinical practicum focused on well-woman care and includes intermediate level seminars that emphasize issues unique to the implementation of the role of the Nurse Midwife (NM) as provider of primary care for women in various settings. This course is designed to develop assessment skills and differential diagnoses with beginning management skills, and to analyze factors that have an impact on advanced nursing practice, emphasizing the scope of practice in NM and DNP health care trends, health care needs in diverse environments, and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM DNP practice experiences will be emphasized.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURNM 3509 and NURNP 2523; CREQ: NURNP 2515 and 2505; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3513 - WOMEN'S HEALTH ROLE PRACTICUM 2

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on implementing the nurse midwife (NM) model of care with non-pregnant woman. Examination, assessment, and management of the woman from puberty through menopause will be the focus of this course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3506 and 3507; PLAN: Nurse Midwife (NURSMW-DNP)

Nurse Practitioner

NURNP 2026 - ROLE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NURNP 2026D - ROLE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURNP 2028 - ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This course is designed to provide each student with a practicum experience in role development for the nurse practitioner. Experiences emphasize clinical decision making in an interprofessional environment with a focus on the nurse practitioner as a principal provider of care for individuals with population specific health care needs and conditions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Nursing

NURNP 2029 - ROLE SEMINAR 2

Minimum Credits: 2

Maximum Credits: 2

This is a culminating seminar emphasizing issues unique to transitioning to the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, and legislative and professional practice issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2026 or 2406 or 2026D

NURNP 2029D - ROLE SEMINAR 2

NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033; CREQ: (NUR 2034 or 2434 or 2034D); PROG: Graduate School of Nursing

NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced practice nursing in the diagnosis and management of common episodic and chronic dysfunctions/alterations. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2033 or 2433 or 2033D); CREQ: (NUR 2034 or 2434 or 2234 or 2034D)

Course Attributes: Distance Education

NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL

Minimum Credits: 3

Maximum Credits: 3

This clinical course is designed to provide opportunities to apply a theoretical, practical and evidenced based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through clinical experience, students implement advanced practice skills in patient/family assessment, develop and implement a management plan and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of the acute care services. Health promotion, health protection, and health restoration appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2100 or 2100D

NURNP 2102 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2104

NURNP 2102D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Course Attributes: Distance Education

NURNP 2105 - CLINICAL EMPHASIS - CARDIOPULMONARY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2106 - CLINICAL EMPHASIS - CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for patients who are critically ill and apply the clinical decision-making process in care of patients. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102 or NURNP 2102D

NURNP 2107 - CLINICAL EMPHASIS - ONCOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive, evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cancer. The course integrates the pathophysiology of problems associated with cancer and its treatment with appropriate diagnostic parameters and management strategies. Through ongoing clinical experiences the student will implement the clinical decision-making in the care of the acutely ill adult-gerontology patient with cancer. Health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with dysfunctions/alterations in a selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion and maintenance appropriate to these patients and families will also be

emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2161 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Nursing students only.

NURNP 2194 - CLINICAL EMPHASIS: TRAUMA EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive practical foundation for the clinical application of advanced nursing practice in the management of selected dysfunctions/alterations commonly seen in the traumatized adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for adult-gerontology patients who are emergent, traumatized, or involved in disasters, and apply the clinical decision-making process in the care of these patients in all phases of the trauma cycle.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2246 - MANAGEMENT: ADOLESCENT HEALTH THEORY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NUR 2034 or 2234 or 2434 or 2034D) and (NUR 2033 or 2433 or 2033D); CREQ: (NURNP 2440 or 2540 or 2540D)

NURNP 2303 - MANAGEMENT AND PRACTICUM 1 PMH ADULT ACUTE AND CHRONIC

Minimum Credits: 2

Maximum Credits: 2

Students develop advanced practice skills in the clinical management of patients with common acute and chronic primary health care needs and problems. Emphasis is on the synthesis of diagnostic findings with the development, implementation and evaluation of general management strategies. Clinical practica enable students to integrate knowledge derived from courses and readings with that obtained from experiences which will include precepted clinical work in primary health care settings with adult medical patients.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033 or 2433 or 2033D; CREQ: 2314 and 2515

NURNP 2320 - NEUROBIOLOGY OF PSYCHIATRIC DISORDERS

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the knowledge base developed in the pathophysiology course, extending and applying this content to psychiatric disorders. It is designed with a threefold purpose: (a) to transition students from general concepts utilized in advanced practice to specific theories that are unique to the role of the psychiatric/mental health nurse practitioner; (b) to develop an appreciation of current biological theories as a major dimension in understanding the etiology, course, and outcome of selected psychiatric disorders; and, (c) to prepare students to utilize research findings as the empirical basis for the advanced practice of nursing. Content will focus on the major biological theories of psychiatric disorders in relationship to their respective technologies, neuroanatomical structures, neurochemical pathways, specific behaviors and symptomatology. Current research findings will be presented to supplement theoretical content.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004 or 2204 or 2404 or 2004D or (PLAN: PSYMHN-ACP)

NURNP 2320D - NEUROBIOLOGY OF PSYCHIATRIC DISORDERS

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the knowledge base developed in the pathophysiology course, extending and applying this content to psychiatric disorders. It is designed with a threefold purpose: (a) to transition students from general concepts utilized in advanced practice to specific theories that are unique to the role of the psychiatric/mental health nurse practitioner; (b) to develop an appreciation of current biological theories as a major dimension in understanding the etiology, course, and outcome of selected psychiatric disorders; and, (c) to prepare students to utilize research findings as the empirical basis for the advanced practice of nursing. Content will focus on the major biological theories of psychiatric disorders in relationship to their respective technologies, neuroanatomical structures, neurochemical pathways, specific behaviors and symptomatology. Current research findings will be presented to supplement theoretical content.

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2204 or 2404 or 2004D) and (NUR 2034 or 2234 or 2434 or 2034D) and NURNP 2331; CREQ: NURNP 2320

Course Attributes: Distance Education

NURNP 2330 - PSYCHIATRIC DIAGNOSIS THEORY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations across the life span. A bio-psycho-social perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: (PREQ: NURNP 2505 and NURNP 2515 and NURNP 2320; CREQ: NURNP 2331; PROG: School of Nursing) or (PREQ: NURNP 2320 and CREQ: NURNP 2331 and PLAN: PSYMHN-ACP)

NURNP 2330D - PSYCHIATRIC DIAGNOSIS THEORY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations. A biopsychosocial perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.

Course Attributes: Distance Education

NURNP 2331 - PSYCHIATRIC DIAGNOSIS PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

This clinical course is designed to complement and expand on the application of diagnostic reasoning skills developed in diagnostic physical exam across the life span, differential diagnosis theory and differential diagnosis clinical. In addition to the diagnoses of common health problems, the student will develop advanced diagnostic skills in relation to psychiatric disorders across the life span. The focus is on the identification and synthesis of pertinent physical, biological, psychological, and social data in order to complete a comprehensive psychiatric evaluation. The students will refine their diagnostic skills in a psychiatric setting with psychiatric patients across the life span.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2320; CREQ: 2330

NURNP 2340 - MANAGEMENT OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the theory and concepts relevant to management of the primary health care needs and problems of clients with a diagnosed psychiatric problem across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for clients with acute psychiatric problems across the life span encountered in a primary care setting. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans. This course builds directly on the knowledge base developed in the physical diagnosis and primary health care courses, expanding that base to the care of clients who have a diagnosed psychiatric problem.

Academic Career: Graduate

NURNP 2341 - MANAGEMENT PRACTICUM OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

The goal of this practicum is to provide the student with an opportunity to refine advanced practice skills in the clinical management of the primary health care needs and psycho-biological problems of clients with psychiatric disorders across the life span. The practicum focuses on synthesizing relevant psycho-therapeutic modalities with the management of common health problems into the client's plan of care, and evaluating the effectiveness of these interventions.

Course Requirements: PREQ: NURNP 2331; CREQ: NURNP 2340 and 2325; PROG: School of Nursing

NURNP 2345 - MANAGEMENT OF CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on theory and concepts relevant to the management of chronic psychiatric and primary health care needs/problems of clients with long-term psychiatric disorders across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for the client populations commonly encountered in psychiatric settings. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans for clients experiencing long-term psychiatric problems. This course builds on the scientific knowledge acquired in previous psychiatric mental health nurse practitioner core and theory courses. It offers a framework for integrating a primary care approach in the management of chronic and severe psychiatric problems across the life span.

Academic Career: Graduate

NURNP 2346 - MANAGEMENT PRACTICUM CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This clinical course is designed to provide the student with a culminating practicum experience in the role of the psychiatric mental health nurse practitioner (PMHNP). Experiences emphasize clinical decision-making in an interdisciplinary environment with focus on the PMHNP as a principal provider of care for clients with chronic and severe psychiatric disorders across the life span in a variety of psychiatric settings.

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2341; CREQ: NURNP 2345

NURNP 2361 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An in-depth study in a particular area of interest by arrangement with a designated faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURNP 2401 - MGT ADLT EPISODIC/CHRONIC HLTH

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced practice nursing in the diagnosis and management of common episodic and chronic dysfunctions/alterations. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033 or NUR 2433; CREQ: NUR 2034 or NUR 2434 or NUR 2234

Course Attributes: Distance Education

NURNP 2402 - MGT CMLPX HLT PROB ACU/CRIT 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURNP 2405 - MANAGEMENT: ADULT ACUTE/CHRONIC CLINICAL 1

Minimum Credits: 3

Maximum Credits: 4

This practicum is focused on the management of primary health care needs. Students are precepted in an ambulatory health care setting and carry out the diagnostic process as they provide primary health care services to adults with chronic primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.

NURNP 2406 - ROLE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: GRAD

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURNP 2414 - CPLX HLTH PROB ACTLY/CRIT ILL

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient. Through didactic information, laboratory experience, and course assignments, students develop the knowledge base and psychomotor skills central to planning, implementing and evaluating health care for adult-gerontology patients with complex health problems that are commonly seen across the continuum of acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population will also be emphasized.

Course Requirements: PREQ: (NURNP 2520 or 2420 or 2520D); CREQ: NURNP 2550

NURNP 2550 - MANAGEMENT: ADVANCED PEDIATRIC HEALTH PROBLEMS CLINICAL

Minimum Credits: 3

Maximum Credits: 3

The purpose of this clinical course is to provide students with an opportunity to provide comprehensive primary health care services to children with primary health care needs, developmental concerns, complex and chronic health problems. Concepts and content from NURNP 2549 will be applied in clinical practice.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NURNP 2521 or 2421 or 2521D); CREQ: NURNP 2549

NURNP 2561 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Allows the student the opportunity to acquire knowledge and skill through independent experiences involving little or no formal interaction between the student and instructor. Typically selected when no formal course is available that meets the student's individual learning needs.

Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY

Minimum Credits: 2

Maximum Credits: 2

This course addresses the complete neonatal assessment process. It includes a genetics overview, perinatal and neonatal physiology, neonatal pharmacology, common neonatal diagnostic and laboratory testing and invasive procedures. The comprehensive neonatal assessment, including prenatal through neonatal history and neonatal physical examination is reviewed. Family function, dynamics, crisis theory and the grieving process are also examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004 or 2204 or 2404 or 2004D

NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY

Minimum Credits: 4

Maximum Credits: 4

This theory course builds on the neonatal assessment theory course and assists the students in developing the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU), particularly in emergency situations. It focuses on the knowledge necessary to resuscitate and stabilize a sick newborn. In addition, the course discusses the physiology of pain and pain management. The course is taught with an accompanying clinical course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2570; CREQ: NUR 2572

NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL

Minimum Credits: 5

Maximum Credits: 5

This clinical course builds on the physical diagnosis and the neonatal assessment and general management courses. The students master the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU). The students will obtain and evaluate a complete neonatal patient database, including conducting a history and physical examination. The students will also learn stabilization and resuscitation in the delivery room and during transport. In addition, the course affords the students the opportunity to perform neonatal therapeutic and diagnostic procedures in the clinical setting.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2570; CREQ: NURNP 2571

NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY

Minimum Credits: 4

Maximum Credits: 4

Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the first in a series of 2 consecutive courses and will focus on the cardiovascular, pulmonary, gastrointestinal/nutrition, renal/genitourinary and hematologic systems as well as fluids and electrolytes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2571; CREQ: NURNP 2028

NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY

Minimum Credits: 4

Maximum Credits: 4

Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the second in a series of 2 consecutive courses and will focus on the endocrine & metabolic, immune, neurobehavioral, musculoskeletal, eyes/ears/nose/throat and dermatologic systems. It also includes discharge planning and follow-up care for the high-risk neonate.

Academic Career: Graduate

Course Requirements: PREQ: NURNP 2573; CREQ: NURNP 2028

NURNP 3025 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Minimum Credits: 4

Maximum Credits: 4

This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURNP 3025D - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Minimum Credits: 4

Maximum Credits: 4

This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

NURSP 2064 - NURSING ADMINISTRATION SEMINAR AND PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students enrolled in the Administration minor tract and serves as their clinical practicum. This course will provide students with opportunities to observe, apply, analyze and discuss selected administrative and managerial skills and processes which are relevant to the practice of nursing administration. Negotiated sites and experiences are tailored to enhance student's career goals. It is anticipated that students will be exposed to and involved in various experiences that nursing administrators face in today's health care environment

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSP 2061 and 2091 and 2092

NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an introduction to information technology project management. Students will learn how to create a comprehensive project management plan which includes: scope, integration, communication, time, cost, risk, quality and human resources management. This course also covers the following topics: system life cycles, messaging standards and procurement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2072D - MEASUREMENT AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Concepts and methods for learning measurement and evaluation as they relate to teaching and learning in nursing and the health sciences are reviewed and assessed. Course activities offer the student opportunities to study and use a variety of measurement and evaluation techniques that are appropriate for classroom and clinical healthcare settings. Opportunities are provided for students to critique and evaluate ethical, legal and social issues involving measurement and evaluation as well as uses and limitations of evaluation methods in diverse healthcare settings and educator roles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2074 - PRACTICUM 2 IN NURSING EDUCATION: EDUCATIONAL PROGRAM MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course builds on the principles of NURSP 2073 practicum 1 in nursing education: teaching and learning assessment. In this course students have the opportunity to further develop and implement the role of nurse educator through a guided, supportive practicum experience under the direct supervision of an accomplished preceptor. Students are able to choose the teaching environment that best meets his or her learning needs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2071 and NURSP 2072 and NURSP 2073; PROG: School of Nursing

Course Attributes: Hybrid

NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2075D - INTRODUCTION TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURSP 2076 - CLINICAL INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on an analysis of nursing information systems within the context of the health care system. Emphasis is placed on the use of computers for documentation in clinical settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSP 2075 or 2275 or 2475 or 2075D

NURSP 2082 - INFORMATICS THEORIES AND ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course covers relevant theories and models from the fields of: nursing informatics, communication, information science and computer science. The foundations of behavioral theories, group dynamics and principles of adult learning will be introduced. Students will apply these theories and

models to emerging issues in informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2085 - NURSING INFORMTCS PRACTICUM 1

Minimum Credits: 3

Maximum Credits: 4

This course provides an opportunity for the learner to synthesize previous nursing informatics coursework. The student will implement the theory learned in class in a real-world setting and demonstrate beginning competency as an informatics nurse.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSP 2076 or 2276

NURSP 2086 - NURSING INFORMTCS PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 4

The course employs an application focus in which the learner demonstrates leadership, comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment. The student will assume the role of a beginning nursing informatics specialist.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSP 2085

NURSP 2090 - HEALTHCARE OUTCOMES

Minimum Credits: 3

Maximum Credits: 3

Knowledge and understanding of healthcare outcomes is an important competency for healthcare professionals. This course will provide students with opportunities to discuss and analyze key issues in the healthcare quality movement. Conceptual frameworks used in explaining healthcare outcomes and identification of driving forces defining the development of various outcomes will be addressed. Specific healthcare outcomes and the influence that they have on advance practice nursing and policy formulation will be examined and analyzed. Finally, the strategies and skills healthcare professionals will need to practice and manage effectively within this outcomes environment will be detailed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2091 - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data to allow clinical leaders to learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2091D - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURSP 2092 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2092D - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: Graduate

NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of clients/patient/families, nurse colleagues, and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology, and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees, mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2095 - CONTEMPORARY ISSUES IN NURSING AND THE CNL ROLE SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the major contemporary issues facing the nursing profession. Patient safety, process improvement, effective patient care and family partnerships, improved care coordination and implementation of evidence based practice are examples that the CNL role could impact. The course also focuses on successful implementation of the CNL role through knowledge, evidence-based practice and application of leadership principles. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NURSP 2096 - CNL CLINICAL PRACTICUM 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NURSP 2062 or 2261 or 2062D or 2061 or 2061D) and (NURSP 2290 or NURSP 2098)

NURSP 2097 - CNL CLINICAL PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Nursing students only.

NURSP 2180 - ADVANCED SPECIALTY OPTION: ADULT EPISODIC AND CHRONIC ACUTE CARE

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a foundation for advanced nursing practice in the care of patients with common episodic and chronic dysfunctions/alterations. The student will develop advanced practice skills in patient/family assessment, developing and implementing a nursing plan and evaluating the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health maintenance, disease prevention and health restoration appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2185 - ADVANCED SPECIALTY OPTION: COMPLEX HEALTH PROBLEMS IN ACTUE CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient. Through didactic information and course assignments, students develop the knowledge base central to planning, implementing and evaluating nursing care for acutely and critically ill adult-gerontology patients with complex health problems that are commonly seen across the continuum of

acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2404 or 2004D) and (NUR 2034 or 2434 or 2034D)

NURSP 2190 - ADV SPECIALTY OPT: CARDIOPULMONARY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing practice in the care of adult-gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004

NURSP 2191 - ADV SPECIALTY OPTN: CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with selected dysfunctions/alterations commonly seen in critical illness. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the critical care setting. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURSP 2383 - METHODS IN TECHNOLOGY EVALUATION & USABILITY

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation, and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2388 - DATABASE MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course provides students with the conceptual knowledge base and practice experiences necessary to understand the workings of a modern relational database management system. It will provide the students with the historical and practical knowledge needed to design a relational database. The students will have hands-on experience with databases and other software that will interface with databases. Standards, such as html, SQL, ODBC and normalization will be stressed in both the theory and practical aspects of this course. The future of database design and access from non-traditional environments will be discussed. Use of databases on servers will be demonstrated.

Course Attributes: Distance Education

NURSP 2461 - ORGANIZTNL & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Distance Education

NURSP 2475 - INTRO TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NURSP 2491 - FINC ECON HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Distance Education

NURSP 2492 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: GRAD

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Distance Education

NURSP 3092 - LEADERSHIP IN COMPLEX SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This advanced level leadership course focuses on leading complex organizations and systems to facilitate the transformation of health care. Using principles of chaos and complexity theory, students will explore methods for assessing organizations, identifying emerging issues, and facilitating organization-wide changes to meet the ongoing challenges facing health care organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 3094 - EVIDENCE-BASED MANAGEMENT AND QUALITY IMPROVEMENT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to assist students pursuing leadership roles within health systems with the application of evidence-based management principles and the design of quality improvement approaches that support a culture of clinical and service excellence. During this course, students learn to find, interpret, and use scientific evidence related to managerial decisions. Using quality improvement theories, students will analyze their own organizations and identify best practices. Students will apply selected quality tools and techniques to solve actual problems in their workplaces.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is designed to assist students pursuing leadership roles within health systems to use data analytics to assist with the design of clinical systems to improve organizational outcomes. Using a web-designed structure, students will access a Virtual Hospital and use financial and clinical data to successfully resolve issues presented in a case study format. These case studies are designed to simulate actual problems facing nursing leaders both today and in the future. Through class discussions, students will then learn multiple approaches to resolving complicated issues.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 3097 - DNP RESIDENCY: ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 10

This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership complex issues, organizations and systems.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: School of Nursing students only.

Nursing

NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students identify relevant research and critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice. Students synthesize critically appraised evidence on a clinical topic. Students describe the methodologies used for quality improvement and safety initiatives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2011 or 2211 or 2411 or 2011D

NUR 2000D - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students identify relevant research and critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice. Students synthesize critically appraised evidence on a clinical topic. Students describe the methodologies used for quality improvement and safety initiatives.

Course Attributes: Distance Education

NUR 2002 - RESEARCH PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

This course builds on the knowledge and skills acquired in NUR 2000/2400 and NUR 2011/2411 and focuses on the continuing development of an understanding of the research process through participation in an ongoing research project and course seminars. Students identify a researcher who is conducting an ongoing project and who is willing to serve as a preceptor. Students prepare a contract defining the role of the student and how he/she will meet the course objectives while working with the designated preceptor. A written log is submitted documenting the student's learning activities for the practicum. Seminars are held on a regular basis by the primary teacher and focus on discussion of the research process, guided critiques of published research, and presentations by the students of their practicum experiences.

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NUR 2007 - RESEARCH FOR EVIDENCE-BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

During this course students build on the knowledge they acquired in NUR 2000/NUR 2200 and NUR 2011/ NUR 2211 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2000 and 2011) or (NUR 2200 and 2211) or (NUR 2400 and 2411) or (NUR 2000D and 2011D)

NUR 2007D - RESEARCH FOR EVIDENCE-BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

NUR 2009 - LEADERSHIP AND HEALTHCARE SYSTEMS: POLICY, ORGANIZATION, AND FINANCING OF HEALTH CARE

Minimum Credits: 0

Maximum Credits: 0

The purpose of this web-enhanced course is to equip the graduate prepared nurse with beginning skills to influence health policy, to provide leadership in the healthcare delivery system, and to utilize basic principles of fiscal management in making high-quality cost-effective choices in the use of health care resources. The course consists of three units. The first unit explores the policymaking process, the role of the advanced practice nurse or advanced generalist and the effect of public policy on healthcare delivery systems. The second unit examines the organization and delivery of healthcare with an emphasis on the continuum of health care, including acute, specialized, and community based systems. Preparation for a nursing leadership role in these integrated care systems is emphasized. The third unit presents an overview of healthcare financing as it relates to the delivery of health care services. The nurse's role as the monitor of quality control, patient safety, and cost-effective care is examined in the context of clinical decision making.

Course Requirements: MUST be taken with any 2000 or 3000-level Nursing Course

NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to Healthy People 2020 and World Health Organization goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current international research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

NUR 2040 - LITERATURE AND FILM TO UNDERSTAND THE PATIENT-PRACTITIONER EXPERIENCE

Minimum Credits: 1

Maximum Credits: 1

This course emphasizes the importance of understanding the universal human aspects of health and disease to further develop empathetic and holistic skills among health professional students. The importance of interprofessional collaboration as a mechanism to improve patient outcomes will be explored. Students and faculty will read and/or view selected works that focus on the human condition that may impact the physical and/or psychological health of the patient, families, communities, and care providers - and their interaction with the healthcare system. Guided discussion that helps students to reflect on the humanistic aspects of healthcare will be conducted.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3293

NUR 2112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1

Minimum Credits: 3

Maximum Credits: 3

This course develops skill in parametric and nonparametric applications of descriptive and inferential statistics to health sciences research. The concept of parametric and non-parametric statistics is covered. Parametric tests for comparing means include one-sample z and t-tests, and independent and related samples t-tests. Methods for checking parametric test assumptions are presented, and remedies for assumption violations explored, including non-parametric alternatives for these tests. Software for statistical analyses will be introduced along with data examples from health science research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate Nursing

NUR 2113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2

Minimum Credits: 3

Maximum Credits: 3

This course develops skill in parametric and nonparametric statistical applications to factorial designs in health sciences research. Analysis of variance (ANOVA) for normally distributed outcomes is the parametric approach presented. Methods for checking parametric test assumptions are presented, and remedies for assumption violations explored, including non-parametric alternatives for this test including empirical resampling techniques (bootstrapping) and rank-based tests. Software for statistical analyses will be introduced along with data examples from health science research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: "NUR 2112 Applied Parametric and Non-Parametric Statistics for Health Sciences 1" OR "NUR 3112 Applied Parametric and Non-Parametric Statistics for Health Sciences 1"

NUR 2114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course covers classical and more modern regression analysis methods with application to the health sciences. A major focus is simple and multiple linear regression and its underlying assumptions for valid inference. Remedial strategies will be presented for regression when nonstandard conditions exist. Predictive modeling using nonlinear regression methods, regression trees, and rule-based models will be introduced. Implementation of regression using statistical software will be presented using data examples from health science research.

NUR 2176 - SEMINAR SCHOOL NURSE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare the professional nurse for certification as a school nurse in Pennsylvania; both the theory component (NURSP 2176) and the practicum (NURSP 2179) are required for eligibility. The role of the school nurse is explored through the historical, legal, ethical, research and practice perspectives. The biological, physical, developmental, behavioral, cultural and psychosocial needs of children of all ages in the school setting are examined. Throughout the course, current evidence related to school nursing and Pennsylvania educational requirements are applied to the health needs of school age children, including those with special health and learning needs, the culturally diverse and English Language Learners (ELLs). The independent and collaborative aspects of the school nurse role are explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2179 - PRACTICUM SCHOOL NURSE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to prepare the professional nurse for certification as a school nurse in Pennsylvania; both the theory component (NURSP 2176) and this practicum (NURSP 2179) are required for eligibility. This course provides the required 120 hours of clinical practicum experience in elementary, middle and high school settings. The nursing care of children requiring acute, chronic and episodic care is performed under the guidance of a certified school nurse. Throughout the course, the application of the nursing process and evidence-based approaches are employed when providing nursing services to school age children. Interdisciplinary care and management for school age children with special health and learning needs, including the culturally diverse and English Language Learners (ELLs) is emphasized. The independent and collaborative aspects of the school nurse role are explored within the school setting.

Minimum Credits: 3

Maximum Credits: 3

Projected nursing faculty shortages support the need for education that will prepare nurses to offer didactic teaching and clinical supervision in academic settings. This course is designed to enable students to put into practice elements of didactic and clinical instruction including online simulation and laboratory instruction. The online, didactic content focuses on the essential knowledge and skills required by academic faculty to teach in multiple learning environments. Under the supervision of an accomplished preceptor/mentor, students will implement the role of an academic nurse-educator through a personally designed 90-hour practicum experience in didactic and clinical teaching.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2084 or 3293

NUR 2202 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2212 - HEALTH POLICY ANALYSIS: CONCEPTUAL FOUNDATIONS

Minimum Credits: 3
Maximum Credits: 3

Twenty-first century America is marked by deep and seemingly incommensurable divisions in terms of public policy solutions to our most intractable issues. Health policy challenges are not immune to these deep divisions, as the debate during and since the passage of the Affordable Care Act illustrates. Positions on key public policy issues are driven by a variety of philosophical, social, and cognitive phenomena. In this class, we will explore these phenomena and how they drive the derivation, implementation, and evaluation of public policy. We will apply the conceptual understanding of these phenomena to current health policy issues.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2218 - STUDIES IN ADVANCED NURSING ETHICS

Minimum Credits: 1
Maximum Credits: 1

Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include (among other potential issues) theoretical foundational ethics, issues in diversity and social justice, healthcare allocation, and responsible conduct of research. At the end of the course students will be able to apply theoretical resources to case studies and daily practice

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

NUR 2308 - ETHICAL AND SOCIAL IMPLICATIONS OF BIOTECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3

This discussion-based course provides an introduction to the ethical issues accompanying the development and implementation of a range of biotechnologies and the social implications of their use. Two types of biotechnologies will be examined: the use of engineering and technology in the health sciences to treat disease, protect people, and improve human well-being, as well as the use of microorganisms or other biological substances in the development of new products. Biotechnologies to be considered include genomic sequencing, gene editing and genetic engineering (CRISPR-Cas9); reproductive technologies (e.g., ectogenesis, fertility preservation); use of stem cells, phage, and neurotechnologies to treat human disease and disability; forensic uses of data (e.g., facial recognition technologies, identification of humans and human remains); Big Data and machine learning in healthcare; robotics, and neuroengineering, as well as the use of technologies to protect people or to avoid placing humans in harm's way (e.g., military use of drone technology, or search and rescue use of robots). This course encourages students to consider: issues of diversity, equity, and inclusion in developing and deploying biotechnologies; issues of research ethics, intellectual property, and global access to biotechnologies; professional and social responsibilities for the funding, development, marketing, and use of biotechnologies; ethical use of personal data and biological materials; and ethical frameworks for evaluating the social implications of biotechnology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2400 - RES FOR EBP 1

Minimum Credits: 2
Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: GRAD
Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2011 or NUR 2211
Course Attributes: Distance Education

NUR 2404 - PATHOPHYS ACROSS LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Distance Education

NUR 2407 - RES FOR EBP 2

Minimum Credits: 2

Maximum Credits: 2

Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2000 or NUR 2200 or NUR 2400) and (NUR 2011 or NUR 2211 or NUR 2411)

Course Attributes: Distance Education

NUR 2410 - HEALTH PROMO/DISEASE PRVNTN

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to Health People 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Distance Education

NUR 2411 - APPLIED STATISTICS FOR EBP

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2432 - DIFFERENTIAL DIAGNOSIS CLN

Minimum Credits: 2
Maximum Credits: 2

This clinical course builds upon the diagnostic process that is introduced in NUR 2031 and expanded upon in NUR 2033. Using a problem based approach; students will use the information on the diagnostic process that is taught in NUR 2033 and apply it to the clinical setting. Differential diagnoses will be formulated based on the accurate and thorough health history and physical exam conducted on patients across the lifespan. Students will learn the process of verbally presenting patient cases, formulating differential diagnoses, formulating patient problem lists, and identifying stressors to health.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2031 or NUR 2231 ; CREQ: NUR 2033 or NUR 2433

Course Attributes: Distance Education

NUR 2433 - DIFFRNCL DIAG ACROSS LIFE SPAN

Minimum Credits: 2
Maximum Credits: 2

This didactic course builds upon the diagnostic process introduced in NUR 2031. Using a problem-based approach to symptoms, students will be introduced to the diagnostic framework, algorithms, and terminology that will allow them to move from symptom to diagnosis. Evidence-based diagnosis will focus on the accuracy of the health history and sensitivity of the physical exam, laboratory studies and tests to "rule in" or "rule out" specific diseases. Students will learn the importance of formulating clinical impressions that lead to hypothesis testing in the care of patients across the life span.

Academic Career: GRAD

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2031 or NUR 2231 ; CREQ: NUR 2032 or NUR 2432

Course Attributes: Distance Education

NUR 2434 - ADVANCED PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3

This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404

Course Attributes: Distance Education

NUR 2465 - FUNDMS DISTR/MASS CASUALTY CRE

Minimum Credits: 2
Maximum Credits: 2

This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Attributes: Distance Education

NUR 2478 - CLINICAL DIAGNOSTICS

Minimum Credits: 3
Maximum Credits: 3

This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are EKG and x-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.

Academic Career: GRAD

NUR 2800 - COORDINATING CLINICAL TRIALS

Minimum Credits: 2

Maximum Credits: 2

.The purpose of this course is to provide individuals with a basic understanding of clinical trials research conducted in accordance with federal regulations. Aspects of clinical trials research such as regulatory requirements, informed consent, pre- and post-study activities, audit procedures, and budgetary issues will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2000 or 2200 or 2400 or 2000D

NUR 2801 - COORDINATING CLINICAL TRIALS PRACTICUM

Minimum Credits: 1

Maximum Credits: 2

The course is designed to familiarize the student with the various roles and responsibilities of a clinical research coordinator. Each student may select one or more research areas. Preceptors in these areas will guide observations that exemplify the role of the clinical research coordinator. Each student will also participate in the review of research proposals at the university of Pittsburgh institutional review board and an observational experience at the clinical and translational research center (CTRC). The CTRC is an NIH funded center at the University of Pittsburgh used for inpatient and outpatient studies. The course includes opportunities for discussion of research protocols and review of procedures from a variety of perspectives.

Grade Component: Grad HSU Basis

Course Requirements: CREQ: NUR 2800

NUR 2820 - PRINCIPLES AND PRACTICE OF FORENSIC NURSING AND LEGAL NURSE CONSULTING

Minimum Credits: 3

Maximum Credits: 3

This course provides knowledge in areas of the law; the process of a lawsuit; and ethical, legal, and social issues (ELSI) related to nurse consulting and forensic nursing (FN). It is designed to provide an overview of how nursing knowledge and skills can be transferred and translated into legal nurse consulting (LNC) and forensic nursing examination (FNE) practice. Approaches and methods in legal nurse consulting and forensic nursing are discussed including but not limited to screening cases, analyzing health professional malpractice cases, performing medical records review and examination, quality assurance and risk management, preparing effective written and verbal reports and abstracts, and preparing for testifying as an expert witness. Specific activities focused on the development of investigative techniques in forensic nursing examination are included. Emphasis is placed on the application of nursing skills and knowledge to questions of law and health in criminal and civil investigations and other court related issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Hybrid

NUR 2822 - SEMINAR AND PRACTICUM IN FORENSIC NURSING AND LEGAL NURSE CONSULTING

Minimum Credits: 3

Maximum Credits: 3

The seminar and practicum in forensic nursing and legal nurse consulting course provides the student with an opportunity to attend a seminar with other students who are completing their practicum experience in a variety of settings and mentored by diverse preceptors. Emphasis is placed on the application of nursing skills and knowledge to areas of practice in law (reviewing malpractice cases for an attorney, collaborating with law enforcement, health, correctional, or psychiatric or ed settings) where a forensic nurse or legal nurse consultant practices.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2823 - FORENSIC PMH NURSING AND CORRECTIONAL NURSING

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of forensic psychiatric mental health nursing and correctional nursing practice. The course focuses on the role of the forensic psychiatric mental health nurse (FPMHN) and correctional forensic nurse (CFN) in caring and providing interventions for the criminally insane, adjudicated criminal defendants unable to stand trial by reason of insanity or mental disorder/defect, or incarcerated offenders in rehabilitation or in treatment, as well as survivors and their families who are affected by interpersonal violence. Emphasis is placed on the role of the nurse when FPMHN and CN intersect with the law to affect patient outcomes. Research themes, standards of practice, evidence-based interventions and outcomes are discussed. The application of ELSI (ethical, legal and sociocultural issues) in FPMHN and CFN are presented. The role of the CFN in various correctional facilities and level of client treatment needs will be explored.

NUR 3010 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 9

The PhD dissertation fulfills two major purposes: (1) to establish the student's competency in the conduct of scholarly research, the successful public defense and uploading of all required documents of which demonstrates the candidate's ability to carry out, analyze and report scholarly research at a higher level of professional competency; and (2) to contribute to the science of nursing through the dissemination of results from the investigation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

NUR 3012 - PUBLIC POLICY IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course offers political and analytical insights into understanding U.S. health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.

NUR 3016 - THEORETICAL FOUNDATIONS FOR RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon the relationship of theory to research with an emphasis on the role of theory in the design and interpretation of research. Attention is given to the evaluation of theory, the utility of theories in research, and the comparison of research strategies from various theoretical perspectives. Emphasis is placed upon midrange, multidisciplinary theories relevant to clinical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3018 - FOCUS GROUP PRACTICUM

Minimum Credits: 2

Maximum Credits: 6

This course builds upon the student's didactic knowledge gained in NUR 3055 or equivalent through the supervised experience of planning, conducting, analyzing, and preparing reports for focus groups. Emphasis is placed upon the student's mastery of the ability to formulate questions, facilitate discussion, including the management of difficult participants, note taking, and analysis of data and preparation of the report. Students will be expected to lead at least two focus groups and to serve as note taker in at least two additional groups. It is expected that a secondary component of the practicum will be to develop an understanding of cultural differences in approaches to health and health care through the conduct of focus groups among different cultural groups as well as learning from the focus group experiences of others.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3020 - QUANTITATIVE RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of quantitative research methods, including various research designs appropriate for studying health care phenomena. Some of the quantitative methods included are: descriptive, comparative, correlational, survey, methodological, epidemiological, experimental and quasi-experimental designs, clinical trials, evaluation research, longitudinal, and secondary analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2019 or BIOST 2042

NUR 3022 - QUALITATIVE RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the study of research traditions that guide the collection and analysis of qualitative data. The course provides an overview of various qualitative methods, such as phenomenology, grounded theory, case study, ethnography, hermeneutics and historical approaches. It includes a focus on the philosophical perspectives underlying each of the methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3027 - SEMINAR ON STRUCTURE OF KNOWLEDGE

Minimum Credits: 3

Maximum Credits: 3

In this course the focus is on the organization and integration of evidence from a series of scientific work in order to structure the results in such a manner that the perspectives, assumptions, and ways of knowing are evident. Structuring involves historical review, critical inquiry, and synthesis of disseminated knowledge. The process results in creating a knowledge structure that is used for the advancement of science.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3016 and (HPS 1653 or PHIL 1610)

NUR 3031 - METHODOLOGIES FOR DNP PROJECTS

Minimum Credits: 2

Maximum Credits: 2

During this course, students develop a proposal appropriate for a Doctor of Nursing Practice (DNP) project. The evidence-based proposal includes the following components: (a) a focus on a change that directly or indirectly affects health care outcomes, (b) a focus on a system or population/aggregate, (c) an implementation plan in an arena or area of practice, (d) a plan for sustainability, and (e) an evaluation plan that measures processes and/or outcomes (formative or summative). During this course, students learn to apply the following four methodologies for the development and conduct of a DNP project and future scholarly projects, specifically quality improvement, surveillance, program evaluation, and N of 1.

Academic Career: Graduate

NUR 3036 - CAPSTONE PROJECT

Minimum Credits: 2

Maximum Credits: 2

Students will undertake a systematic investigation of a clinically based or administration based problem selected by the student and supported by faculty. Course requirements include identification of the problem to be addressed, review and critique of pertinent literature, and implementation of the project. The project will use an evidence-based practice model, and it will be systematically developed in consultation with the student's capstone committee who will evaluate each step of the process. This process can begin in NUR 2007: research for evidence-based practice 2.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

NUR 3037 - DNP PROJECT CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This practicum represents the final clinical course for the DNP degree. Here the student will experience a mentored and supervised immersion in a clinical practice where the project designed and approved in the capstone project course will be implemented and evaluated. The practice site, approved by the capstone committee must provide access to the necessary and appropriate population for project implementation, as well as support for full expression of the DNP scope of practice.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Nursing (Graduate)

NUR 3045 - RESEARCH PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This course focuses on the student's development of selected research skills in collaboration with a mentor and his or her research team. Each student has the opportunity to design a practicum that complements prior research experience and is tailored to his or her current learning needs. The array of course activities may include but not be limited to developing a research proposal, submitting it as part of a grant application, preparing a protocol for submission to the institutional review board, assisting with recruitment or data collection activities for ongoing investigation, learning data management skills, participating in performance of laboratory procedures, participating in research team meetings, conducting literature searches, and preparing abstracts and/or manuscripts for presentation or publication.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3049 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This seminar focuses on assisting students to identify their area of research concentration for their doctoral studies and subsequent research trajectory. Students will learn how to: generate evidence through research; critically appraise quantitative and qualitative knowledge; and conduct a systematic literature review to address a specific research question. Students will be introduced to a variety of research programs related to nursing, including interdisciplinary and translational research programs lead by nurse researchers. Students will distinguish primary from secondary data analyses. Students will be expected to examine relevant concepts from nursing science and to identify faculty areas of expertise that can support their own research agenda.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

NUR 3050D - GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3052 - MANUSCRIPT DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. Multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Academic Career: Graduate
Course Component: Practicum

NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Minimum Credits: 2

Maximum Credits: 2

This seven-week workshop will introduce students to the focus group as a data-gathering tool and will prepare them to use focus groups in their work. The workshop will use lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics to be covered include the theoretical basis of focus groups, formulating questions, recruiting participants, facilitating the discussion, taking notes and applying the data. It is recommended that students read one text. In addition, students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.

Academic Career: Graduate

Grade Component: Grad Letter Grade

NUR 3056 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

Academic Career: Graduate

Grade Component: Grad Letter Grade

NUR 3060 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This course focuses on the student's development of unique knowledge and skills in collaboration with a faculty mentor. Each student has the opportunity to design an independent study that complements prior knowledge and is tailored to the student's current learning needs. Content of the independent study will reflect an in-depth focus in a particular area of study as arranged between the student and designated faculty member. Content to be covered may include, but is not limited to, theoretical approaches from the biomedical and psychosocial sciences, research designs and methods, data analytic techniques, and advanced clinical practice issues.

Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NUR 3061 - INTENSIVE METHODS: ADVANCED QUANTITATIVE METHODS

Minimum Credits: 2

Maximum Credits: 2

This course focuses upon the development of knowledge and skills for building advanced methodologies that can be used in more complex research designs that are conceptually congruent with study purpose and aims. This course will build on the student's substantive knowledge in the state of the science of quantitative methods through critical appraisal of methodologies relevant to the field and implications of these methodologies for study design, sample, setting, measurement and plan for analysis. Based upon this appraisal, students will select and construct rigorous methods to investigate problems in their field of study. Emphasis will be on developing knowledge and skills in evaluating, selecting and applying methods that are congruent with the driving theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Plan: Nursing (PhD)

NUR 3062 - INTENSIVE METHODS: QUALITATIVE & MIXED-METHODS RESEARCH

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the development of advanced knowledge and practical skills for applying research approaches that are conceptually and methodologically congruent with the constructivist and dialectic paradigms (combination of qualitative and quantitative inquiry). This course will build upon students' understanding of the state of the science about their phenomena of interest and provide them with the knowledge to determine when the qualitative and mixed methodological approaches are appropriate for moving the science forward. Emphasis will be on promoting knowledge and skills for selecting, applying and evaluating methods that contribute to the development, expansion or integration of theory. The course also provides an overview and opportunity for students to apply and critically appraise various types of qualitative and mixed-methods and their corresponding purposes, settings, sampling, data collection, analysis, verification and integration techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3287 or by permission of the instructor; PLAN: Nursing (PhD)

NUR 3063 - INTENSIVE METHODS: INNOVATIVE DESIGN & METHODS IN DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon the development of knowledge and skills for designing studies using methodologies in data science that are conceptually congruent with study purpose and aims. This course will build on the student's substantive knowledge in the state of data science through critical appraisal of methodologies relevant to the field, and implications of these methodologies for study design, sample, setting, measurement and plan for analysis of big data. Based upon this appraisal, students will select and construct rigorous methods to investigate problems in their field of study. Emphasis will be on developing knowledge and skills in evaluating, selecting and applying data science methods (at the scale of big data) that are congruent with the driving theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3064 - STATE OF THE SCIENCE IN BIOPSYCHOSOCIAL RESEARCH

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the concepts, theories, and design of biopsychosocial investigations and develops the ability to apply biopsychosocial concepts to the interpretation and design of biopsychosocial research. Emphasis is placed on interdisciplinary and translational research focused on health outcomes with complex links with and between psychosocial factors, behavior, and physiologic systems such as hormonal, cardiovascular,

inflammatory, and genetic systems. The main goal of the course is to enhance the development of foundational knowledge in biopsychosocial investigations that address these links.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3065 - STATE OF THE SCIENCE IN LEVERAGING TECHNOLOGY FOR SELF-MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the concepts, theories, and design of technology for self-management and develops the ability to apply technologic concepts to the interpretation and design of self-management research. Emphasis is placed on interdisciplinary and translational research focused on health outcomes related to leveraging technology for self-management. The main goal of the course is to enhance the development of foundational knowledge in the application of technology in patient self-management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3066 - STATE OF THE SCIENCE IN CANCER SURVIVORSHIP

Minimum Credits: 2

Maximum Credits: 2

The cancer survivorship research emphasis seminar focuses on synthesis of the empirical evidence in cancer survivorship and critical evaluation of theories from multiple disciplines underlying this research. Students will examine controversies and methodological issues associated with investigations of the physical, psychological and social responses to cancer and cancer therapy and discuss innovations in cancer survivorship research. Emphasis will be placed on the examination of the influence of underrepresented populations on research in cancer survivorship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3067 - STATE OF THE SCIENCE IN WOMEN'S HEALTH

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to science in the area of women's health. Theoretical foundations and mechanistic processes are the focus, although issues in measurement, considerations for intervention development, analytics and implications for clinical application will also be examined. Emphasis is placed on the identification, critical review, analysis, and integration of key theoretical concepts and relationships in women's health and their implications for the student's own area of research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3068 - STATE OF THE SCIENCE IN SYMPTOM SCIENCE

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to symptom science. Theoretical foundations and mechanistic processes and outcomes are the focus, although issues in measurement, considerations for intervention development, analytics and implications for clinical application will also be examined. Emphasis is placed on the identification, critical review, analysis, and integration of key theoretical concepts and relationships in symptom science and their implications for the student's own area of research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3285 and 3286 and 3287; PLAN: Nursing (PhD)

NUR 3069 - STATE OF SCIENCE: ADVANCED TOPICS IN HUMAN GENETICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to science in the area of human genetics. Theoretical foundations and mechanistic processes are the focus, although issues in measurement, considerations for intervention development, analytics and implications for clinical application will also be examined. Emphasis is placed on the identification, critical review, analysis, and integration of key theoretical concepts and relationships in advanced human genetics and their implications for the student's own area of research. Clinical aspects of genetic disorders including diagnosis, current standard treatment, available gene testing and molecular therapy, ethical/cultural issues, support group availability and the state of current research in the field will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3070 - ADVANCED MULTIVARIATE QUANTITATIVE STATISTICAL TOPICS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the application of advanced quantitative statistical topics applicable in nursing research. A variety of statistical strategies will be explored for their utility in answering research questions and/or testing hypotheses in nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3290; PLAN: Nursing PHD

NUR 3071 - PHD RESEARCH APPRENTICESHIP

Minimum Credits: 1

Maximum Credits: 6

This apprenticeship provides the student with mentored practical application of the research process from inception through dissemination. The course is designed to allow an active, participatory role in the mentor's program of research. The goal is to develop, under supervision, competencies necessary for the development, implementation, analysis and dissemination of scholarly research. This will be accomplished through the construction and implementation of an apprenticeship plan in congruence with mentor's and student's research focus

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

NUR 3072 - STATE OF THE SCIENCE: APPLICATIONS OF MACHINE LEARNING IN HEALTH SCIENCES

Minimum Credits: 3

Maximum Credits: 3

Machine learning involves the application of advanced computing methods in the delivery of healthcare services. Predictive and causal models using machine learning will be increasingly used in clinical practice in the coming decade. However, in order to better adopt machine learning-based discoveries into health sciences effectively; scientists need to learn the fundamentals of machine learning models and understand the current state-of-the-science of these methods in various clinical applications. This course focuses on understanding and critically appraising the development of machine-learning based applications that aid in very specific clinical tasks. This course will review and discuss selected machine-learning based applications in health science areas such as primary & acute care, chronic & ambulatory care, global health, genomics, and medical imaging. Basic knowledge about statistics and clinical research methodologies is desired for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3073 - STATE OF THE SCIENCE: HEALTH SERVICES RESEARCH & POLICY

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to science in the area of health services research and policy. Theoretical foundations and mechanistic processes are the focus along with examination of issues in measurement, considerations for intervention development, analytics, and implications for clinical application. Emphasis will be placed on the identification, critical review, analysis, and integration of physiological, psychological, and social responses to health services and policy research and their implications for the student's own area of research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3074 - STATE OF THE SCIENCE: CHRONIC DISORDERS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to science in the area of chronic disorders. Theoretical foundations and mechanistic processes are the focus along with examination of issues in measurement, considerations for intervention development, analytics, and implications for clinical application. Emphasis will be placed on the identification, critical review, analysis, and integration of physiological, psychological, and social responses to selected chronic disorders and their implications for the student's own area of research.

Academic Career: Graduate

Course Component: Lecture

NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based health care. Participants in this course will develop the knowledge base and critical thinking skills central to identifying and solving problems in the planning, implementation and evaluation of health care across the continuum of care delivery systems and across professions. The two overarching goals of the course are to a) develop a better understanding of how the healthcare delivery system works and fails to work, and b) develop a foundation for organizational and systems leadership for care reform, quality improvement and systems thinking in the delivery of safe, effective, evidence-based care using interprofessional approaches.

Academic Career: Graduate

NUR 3110 - RESEARCH INSTRUMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the general properties of skillful measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. The theory of reliability is approached from the domain sampling model and factors are identified that reduce the reliability of an instrument. Methods to estimate reliability such as internal consistency, alternative forms and long-range stability are included. The basic concepts of biomedical instrumentation and the static characteristics that describe instruments performance (e.g., Accuracy, precision, resolution, reproducibility, zero drift, sensitivity drift, and linearity) of physiological instruments are reviewed. Also, a basic discussion will be held on laboratory standardization's (e.g., CDC) and reliability of laboratory assays (use of split samples, coefficient of variation measures). A variety of scaling methodologies will be discussed as well as the principals involved in the design and formatting of questionnaires.

NUR 3112 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 1

Minimum Credits: 3

Maximum Credits: 3

This course develops skill in parametric and nonparametric applications of descriptive and inferential statistics to health sciences research. The concept of parametric and non-parametric statistics is covered. Parametric tests for comparing means include one-sample z and t-tests, and independent and related samples t-tests. Methods for checking parametric test assumptions are presented, and remedies for assumption violations explored, including non-parametric alternatives for these tests. Software for statistical analyses will be introduced along with data examples from health science research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Requirements: Graduate Nursing

NUR 3113 - APPLIED PARAMETRIC AND NON-PARAMETRIC STATISTICS FOR THE HEALTH SCIENCES 2

Minimum Credits: 3

Maximum Credits: 3

This course develops skill in parametric and nonparametric statistical applications to factorial designs in health sciences research. Analysis of variance (ANOVA) for normally distributed outcomes is the parametric approach presented. Methods for checking parametric test assumptions are presented, and remedies for assumption violations explored, including non-parametric alternatives for this test including empirical resampling techniques (bootstrapping) and rank-based tests. Software for statistical analyses will be introduced along with data examples from health science research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2112 or NUR 3112

NUR 3114 - APPLIED REGRESSION FOR HEALTH SCIENCE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course covers classical and more modern regression analysis methods with application to the health sciences. A major focus is simple and multiple linear regression and its underlying assumptions for valid inference. Remedial strategies will be presented for regression when nonstandard conditions exist. Predictive modeling using nonlinear regression methods, regression trees, and rule-based models will be introduced. Implementation of regression using statistical software will be presented using data examples from health science research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3112 and NUR 3113

NUR 3115 - ADVANCED QUANTITATIVE METHODS IN HEALTH SCIENCE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of advanced statistical techniques in current health science research. Aspects of methodology relevant to statistical analysis such as design, statistical power, sample size, and statistical significance will be conceptually integrated with data analysis. Statistical strategies popular in a variety of areas of research, such as epidemiology, nursing and medicine, will be considered for their utility in answering research questions and/or testing hypotheses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3120 - DIVERSITY, EQUITY, AND INCLUSION IN HEALTHCARE

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to increase understanding of how health care relates to the concepts of diversity, equity, and inclusion (DEI). It will provide an overview of how these concepts influence the health of individuals and populations, and the healthcare provider's role in supporting DEI to influence positive outcomes. We will consider diversity in its broadest meaning. However, our focus will be exploring diversity in culture, race, ethnicity, gender, ability, socioeconomic, sexual orientation, and immigration, with special attention paid to the impact on local communities. During this exploration, community strengths and capacity to promote positive change will be presented. The goals of this course are to increase our appreciation of and advocacy for DEI in health care. Learning activities will support skill development to interact in an inclusive manner with a variety of individuals and groups.

Academic Career: Graduate

NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of advanced quantitative statistical methods used in research. Aspects of methodology relevant to statistical analysis such as design, sampling, statistical power, sample size, and significance will be conceptually integrated with data analysis. Statistical strategies popular in other research areas will be explored for their utility in answering research questions and/or testing hypotheses in nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3286 - THEORETICAL FOUNDATIONS FOR RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon the relationship of theory to research with an emphasis on the role of theory in the design and interpretation of research. The relationship between the development of science and theory is stressed. Attention is given to the evaluation of theory, the utility of theories in research, and the comparison of research strategies from various theoretical perspectives and the contribution of effect size. Emphasis is placed upon midrange, multidisciplinary theories relevant to clinical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3285 or HPS 1653 PLAN: Nursing (PhD)

NUR 3287 - RESEARCH DESIGN & METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is a core component and foundational to the dissertation process and the program of research. The course provides a compendium of qualitative and quantitative research methods and study designs appropriate for studying health care phenomena. The emphasis of the course is on the interrelationship between clinical problems, literature reviews, research questions, study designs, and methods of inquiry and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing PhD; PREQ: (NUR 3285 or HPS 1653) and (BIOST 2041 or PSYED 2018 or NUR 3112); CREQ: (NUR 3286 or NUR 3016) and (BIOST 2042 or PSYED 2019 or NUR 3113)

NUR 3288 - RESEARCH MEASUREMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on quantitative approaches to analyze reliability, validity, and sensitivity of measurements in health research. Classic and emerging measurement theories will be discussed. Principles of psychometrics, including reliability and validity, and latent variable-based measurement models such as exploratory factor analysis will be discussed and applied by students to evaluate the reliability and validity of research instruments. Emphasis is placed on understanding the interrelationship of study aims, design and methods in outcomes measurement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (BIOST 2041 or PSYED 2018 or NUR 3112) and (BIOST 2042 or PSYED 2019 or NUR 3113) and (NUR 3285 or HPS 1653) and (NUR 3286 or NUR 3016); CREQ: NUR 3289; LEVEL: Nursing PhD

NUR 3289 - INTERVENTION DEVELOPMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on an analysis of the relationship between intervention theory and the development of intervention protocols. In-depth exploration of selected programs of research will be used to generate and evaluate theories and intervention protocols. Methodological and practical issues in the design and implementation of theory-based intervention studies will be examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1

Minimum Credits: 2

Maximum Credits: 2

This seminar addresses the moral and ethical agency of a nursing scientist in the health professions, developing knowledge and skills to act ethically. First the course will cover multiple challenges of conducting research including ethical issues, health policy, scientific freedom and social responsibility, collaboration and negotiation, and interdisciplinary responsibilities. Next, key issues in conducting responsible science and human subject protection will be covered, including the conduct of culturally competent scholarship. Lastly issues in nursing leadership including valuing and upholding the caring nature of professional practice and advocacy for, and valuing the needs and concerns of patients/families will be addressed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3292 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 2

Minimum Credits: 2

Maximum Credits: 2

This seminar addresses the responsibilities and activities involved in obtaining and sustaining a career in academic research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing (PhD)

NUR 3293 - ART AND SCIENCE OF TEACHING AND LEARNING

Minimum Credits: 2

Maximum Credits: 2

This course provides instruction in course design, methods of student and classroom instruction and evaluation of learning for teaching in academia in order that students can contribute to the formal and informal education of future nurses through discovery, application and integration of

knowledge. One evaluative methodology may be the teaching practicum, taken concurrently or in a subsequent semester.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nursing PhD

NUR 3294 - STATE OF SCIENCE: RESEARCH SLEEP AND CIRCADIAN RHYTHMS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the critical appraisal and synthesis of empirical evidence relevant to science in the area of sleep and circadian rhythms. Theoretical foundations and mechanistic processes are the focus along with examination of issues in measurement, considerations for intervention development, analytics, and implications for clinical application. Emphasis will be placed on the identification, critical review, analysis, and integration of physiological, psychological, and social responses to impaired sleep and circadian rhythms and their implications for the student's own area of research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3412 - PUBLIC POLICY IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course offers political and analytical insights into understanding U.S. health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Distance Education

NUR 3413 - ETHICS IN HEALTHCARE

Minimum Credits: 1

Maximum Credits: 1

Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include legal-ethical issues in practice, ethical implications in the role of the doctorally prepared nurse, historical and political influences on ethics in health care, diversity in race, gender, and sexual orientation, and principals of justice, autonomy, and provider-patient relations. Additionally this course describes general ethical practices and ethical principles associated with the proper conduct of research, scientific integrity and protection of human subjects.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Distance Education

NUR 3450 - GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Attributes: Distance Education

NUR 3452 - MANUSCRIPT DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Attributes: Distance Education

NUR 3499 - THE SCI OF HLTH CARE DELIVERY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based health care. Participants in this course will develop the knowledge base and critical thinking skills central to identifying and solving problems in the planning, implementation and evaluation of health care across the continuum of care delivery systems and across professions. The two overarching goals of the course are to a) develop a better understanding of how the healthcare delivery system works and fails to work, and b) develop a foundation for organizational and systems leadership for care reform, quality improvement and systems thinking in the delivery of safe, effective, evidence-based care using interprofessional approaches.

Nutrition

NUTR 1000 - INTRODUCTION TO RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

NUTR 1006 - INTRO TO HUMAN NUTRITION

Minimum Credits: 3

Maximum Credits: 3

This course will cover an overview of the scientific principles of nutrition and application of these principles to humans throughout the life cycle. Major focuses of the course are the classification and function of the six major nutrients, review of current nutrition standards, safety of the food supply, and nutrition misinformation.

This course is meant for nutrition majors.

Academic Career: Undergraduate
Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

NUTR 1600 - INTRODUCTION TO DIETETICS

Minimum Credits: 2

Maximum Credits: 2

This is an introduction to the profession of dietetics. Emphasis will be placed on the scope of the profession of dietetics practice, the role and functions of registered dietitian nutritionists, and the education requirements for entry into practice.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1602 - NUTRITION ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the rationale for and the use of a variety of standards used in assessing and planning the quality and quantity of the food and nutrient intake of individuals and groups. It will include in-depth study and application of commonly used reference standards and tools used for evaluating levels and proportions of macronutrients, micronutrients and various dietary food components. Assessment of health indicators in individuals and populations will also be addressed.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB

Minimum Credits: 3

Maximum Credits: 3

This course presents the basic principles and skills of food service management and leadership. Learning experiences include lectures, discussions, and required field trips. Please note, no other courses can be scheduled during the break between the morning and afternoon class sessions as this time will be needed for travel to field trips sites.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H)

NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Concepts and components of the teaching-learning process and their application in the dietetics practice. Experience in the instructional planning and implementation functions of clinical dietitians is emphasized.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Nutrition Science (NS-BS) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1610 - FOOD APPLICATION

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course emphasizing the chemical and physical properties of food in relation to its selection, quality, and preparation. Experience in the construction, modification and preparation of recipes to meet various dietary needs is also provided.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: NUTR 1602; PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1612 - FOOD AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to ethnic influence on the diversity of American food patterns. Social, cultural, economic, geographic, and religious factors are considered.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1613 - FOOD APPLICATION LAB

Minimum Credits: 1

Maximum Credits: 1

Study of the chemical and physical changes that occur in food as a result of various food preparation methods and their effects on nutrient quality. Experience in the construction, modification and preparation of recipes to meet various dietary needs is also provided.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: Letter Grade

Course Requirements: PREQ: NUTR 1602; PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1614 - NUTRITION CRITICAL THINKING

Minimum Credits: 3

Maximum Credits: 3

An application of critical thinking skills to evaluate nutrition issues.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS, BPH, BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1620 - NUTRIENT METABOLISM

Minimum Credits: 3

Maximum Credits: 3

The first of a two-course sequence in advanced nutrition and metabolism presenting the principles of normal nutrition and their application in providing nutritional care and guidance. Emphasis is placed on the macronutrients and energy balance.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND)

NUTR 1622 - LIFE CYCLE NUTRITION

Minimum Credits: 3

Maximum Credits: 3

The study of the physiological, developmental, sociological, and environmental factors that affect nutrient requirements and recommendations at various stages of the life cycle.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

NUTR 1625 - NUTRITION THERAPY

Minimum Credits: 4

Maximum Credits: 4

This course will provide an introduction to medical nutrition therapy in the prevention and treatment of disease. The course will cover the nutrition implications, nutrition assessment process, and nutrition interventions for specific diseases. Teaching approaches for the course include lectures, assigned readings, in-class discussions, and problem-based learning through simulation/case studies.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

NUTR 1630 - NUTRITION THERAPY 1

Minimum Credits: 3

Maximum Credits: 3

The first of a two-course sequence which will provide an introduction to medical nutrition therapy in the treatment of acute and chronic diseases. The course will cover pathophysiology and treatment of specific diseases, nutrition implications of specific diseases, nutrition assessment, determination of nutrient requirements, and nutrition interventions including calculation of modified diets.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nutrition and Dietetics (BPH; BS; BS-H) or Clinical Dietetics - Nutrition (NDNUTR-ND) or (NS-BS)

Obstetrics and Gynecology

OBGYN 5341 - OBSTETRICS AND GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

This is a four week clerkship at Magee-Womens Hospital. The clerkship is divided among obstetrics, gynecology, and outpatient services. The daily schedule includes teaching rounds, small group tutorials, and lectures, in addition to patient responsibilities. Students are expected to take call and remain in the hospital overnight approximately twice a week during their rotation on obstetrics. At the end of the clerkship, an oral and/or written examination will be given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OBGYN 5345 - CLERKSHIP REPEAT COURSE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OBGYN 5387 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of obstetrics, gynecology and reproductive sciences will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OBGYN 5420 - OBSTETRICAL SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

This elective is offered for a four-week period of time. The student will function similar to an intern on the obstetrical service. Examine patients on admission to the labor suite, assess these patients during labor, assist at their delivery and follow them during their postpartum hospitalization.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5430 - GYNECOLOGICAL SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

The student will function similar to an intern on the gynecologic service during this four-week elective. Time will be spent on the ward and/or private gynecology services. The subintern will work up patients following admissions, examine these patients and establish a differential diagnosis. Student will assist at the surgical procedures of these patients and their postoperative care.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5432 - MINIMALLY INVASIVE GYNECOLOGIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

This elective will teach minimally invasive gynecologic surgery as well as the principles of evaluation and management of women with pelvic pain. Students will learn to take pertinent history and perform the (pelvic pain specific) physical exams on women with endometriosis as well as women with other sources of chronic pelvic pain. There will be exposure to all disciplines of minimally invasive gynecologic surgery including laparoscopic deep excision of endometriosis, presacral neurectomy, reconstruction for pelvic organ prolapse, hysterectomy, myomectomy, and adenexal surgery. Students will participate in the pre-op evaluations with the faculty and will have the opportunity to scrub in on cases. The students will renew their understanding and appreciation of pelvic anatomy (retroperitoneal and pelvic support anatomy) from the laparoscopic perspective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

OBGYN 5435 - OBSTETRIC/GYNECOLOGY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This clinical elective can be customized to meet individual needs. Students may elect to concentrate on maternal-fetal medicine, genetics, or gyn-one. The rotation will include both in-patient and ambulatory experience. Students must make advance arrangements and a specific descriptive course title may be assigned for recording on the official transcript.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

OBGYN 5440 - OBSTETRICAL AND AMBULATORY CARE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective offers hands-on experience in the delivery room and clinic at mercy hospital. The ob service consists mostly of 600 clinic deliveries per year with 24 hour, in-house coverage by attending staff. The clinic has a supervisory obstetrician/gynecologist full-time in attendance.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5445 - OUTPATIENT GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

The student will function similarly to an intern. Time will be spent at office sites as well as hospital affiliates. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the cultural and socioeconomic challenges of a diverse population. The student will assist in minor and major surgical procedures as well as post-operative care. S/he will assist in the management of obstetrical patients during the antepartum, intrapartum and postpartum periods. The student will also have the opportunity to interact with patients who experience termination procedures. The sub internship will be offered for a four-week period with one weekend call required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

OBGYN 5450 - REPRODUCTIVE ENDOCRINOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective offers a clinical experience in two areas: the evaluation of couples with infertility and the diagnostic evaluation and management of endocrine dysfunctions involving the hypothalamic-pituitary-ovarian axis. The majority of work will be evaluating and managing these problems in outpatient areas. Inpatient gynecological procedures including laparoscopy, hysteroscopy, microsurgical techniques for resection of endometriosis and tuboplastic procedures for restoration of fertility will be observed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5460 - MATERNAL AND FETAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective students will follow high-risk obstetrical patients as outpatients in the perinatal and medical clinics and as inpatients in the labor suite. Students will become familiar with the principles of biophysical and biochemical monitoring of the fetus during labor as well as the techniques of antepartum fetal evaluation. These include amniocentesis, sonography, and antepartum fetal heart rate monitoring. Management of pregnancies with underlying medical problems of the mother will be an integral part of the elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5470 - GYNECOLOGIC ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students will participate as a member of a team providing care to patients with gynecologic malignancies during this four-week elective at Magee-Womens Hospital. Student will learn the staging classifications, the appropriate workup and be involved in the treatment and follow up of patients. The individual will scrub in the operating room and be involved in the administration of chemotherapy and radiation therapy for gynecologic malignancies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5480 - UROGYNECOLOGY SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Elective with intensive exposure to women with urinary incontinence and other pelvic floor defects. Student will see patients in an office setting learning to obtain an appropriate history, neurologic and pelvic examination. Student will also assist in the surgical procedures and post-operative care of these patients. Additional exposure is planned for cystometric evaluations, pharmacologic intervention, pelvic floor muscle rehabilitation, behavioral and biofeedback intervention protocols.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5487 - FAMILY PLANNING

Minimum Credits: 0

Maximum Credits: 0

The focus of this elective is to learn more about the gynecologic subspecialty of family planning. During the four weeks of the elective, the student will be present in several clinical settings to include: planned parenthood of Western Pennsylvania; family planning clinics in the Magee outpatient clinic - one specializing more in IUDS, implants, and sterilization pre-operative evaluations and the other specializing more in pre-operative preparation and evaluation for dilation and evacuation procedures); time will be spent with faculty in the private office seeing general GYN patients, family planning consults, and abortion patients; Magee or, both sterilization surgery and dilation and evacuation procedures. The student will decide on a topic from the current medical literature and present a full review to the family planning faculty, fellows and research staff.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5488 - REPRODUCTIVE GENETICS

Minimum Credits: 0

Maximum Credits: 0

Clinical reproductive genetics with the opportunity to tailor the experience to the student's interest. Core experience in genetic counseling will include advanced maternal age (AMA), abnormal family history, prenatal screenings, teratogen exposure, prenatally detected anomalies, adult genetics clinic and cancer counseling. The student will observe invasive diagnostic procedures (CVS and amniocentesis) as well as in the cytogenetics lab. The student will attend weekly fetal diagnosis & treatment center meetings and weekly clinical genetics meetings. The student will observe how genetics impacts personalized medicine. There may be opportunity to attend adult genetics clinic and participate in research.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5490 - WOMEN'S HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is an interdisciplinary offering by the department of obstetrics, gynecology and reproductive sciences and the department of medicine. The goal is to introduce students to the breadth and complexity of gender-specific health care. A variety of ambulatory clinical sites will be utilized to provide experience in women's health care, including, but not limited to; health maintenance and preventive care; family planning; genetic counseling; menopause and hormone replacement; osteoporosis; coronary artery disease; depression; violence against women.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5495 - MIDLIFE HEALTH

Minimum Credits: 0

Maximum Credits: 0

Course objectives: extract a targeted history from patients presenting to the midlife health center; perform a physical exam focused on perimenopausal and menopausal issues; be familiar with the gynecologic and medical needs of midlife female patients; develop a differential diagnosis for common conditions in perimenopause and menopause, such as abnormal vaginal bleeding; be familiar with the indications and contraindications with commonly used therapies for menopausal issues; competently assist on various surgical procedures; write postoperative orders on patients; be familiar with the work-up and management of postoperative complications. Students planning to practice primary care medicine, gynecology, urology, or geriatrics will benefit from this intensive exposure to the health needs of midlife-aged women. He/she will see patients in an office setting, learning to obtain an appropriate history and physical exam focused on menopausal issues. He/she will also be exposed to procedures such as endometrial biopsies and vulvar biopsies. He/she will be exposed to standard pharmacologic interventions, as well as integrative approaches such as acupuncture. In addition, the student may assist in the surgical procedures and postoperative care of these patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5500 - INTERNATIONAL MEDICINE IN OBSTETRICS AND GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

The student will function similarly to an intern with faculty mentorship by designated OB/GYN faculty and staff. The student will spend this four-week elective at an international hospital and rural clinical affiliation. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the cultural and socioeconomic challenges and resources of a developing country. The student will assist in minor and major surgical procedures as well as pre and post-operative care. He/she will assist in the management of obstetrical patients during antepartum, intrapartum and post partum periods. Course objectives: understand the multifaceted challenges in accessing and delivering care in developing countries; recognize the disparity gap in healthcare as it relates to the personnel, medical and surgical resources; evaluate patients with OB/GYN problems endemic to the international site; manage pregnant patients with both normal and high acuity medical and obstetrical issues; evaluate the course of normal labor and delivery and the post partum period; assist on OB/GYN procedures and recognize common pathology; assist in the planning and implementation of family planning programs and post abortive care.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5580 - SEXUALLY TRANSMITTED DISEASES

Minimum Credits: 0

Maximum Credits: 0

This rotation, located in the clinics of the Allegheny county health department, will provide an opportunity to gain practical experience under the direct guidance and supervision of the attending physician in the diagnosis and treatment of commonly seen sexually transmissible diseases including gonorrhea and syphilis. Opportunities will be available for obtaining skills in the commonly performed laboratory procedures such as gram staining and culturing and in performing darkfield examinations. Limited experience in contact investigation will be gained.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of obstetrics, gynecology and reproductive sciences to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5725 - INFECTIOUS DISEASE-OB/GYN (ILS)

Minimum Credits: 0

Maximum Credits: 0

This four week selective emphasizes the many unique features of infections in obstetrics, gynecology, and reproductive medicine. Students will learn the pathogenesis of organisms relevant to the female reproductive tract, and about transmission of organisms to the fetus. Students will evaluate pregnant and non pregnant patients with reproductive tract infections and discuss clinical and management issues daily with faculty. Students will also be exposed to contemporary laboratory techniques of identifying pathogenic organisms.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5750 - GET READY FOR RESIDENCY BOOT CAMP

Minimum Credits: 0

Maximum Credits: 0

This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

Academic Career: Medical School

Course Component: Clinical

Grade Component: S/U Basis

OBGYN 5885 - OB AND GYN RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The research elective at Magee-Womens Hospital will involve the student in basic or clinical research projects under the supervision of a full-time faculty member. The student will participate in the design and conduct of the study as well as in the analysis of the data obtained during the study. The student will then be expected to participate writing a report of the study which should be of a quality suitable for publication in a refereed journal. This elective is offered in four-week time blocks.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5886 - INDIVIDUAL STUDY

Minimum Credits: 0

Maximum Credits: 0

The department of obstetrics, gynecology and reproductive sciences will arrange an individual clinical experience to fit the student's needs.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OBGYN 5899 - INDEPENDENT STUDY OBSTETRICS/GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OBGYN 5900 - EXTRAMURAL OBSTETRICS AND/OR GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in obstetrics and/or gynecology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Occupational Therapy

OT 2100 - FDS OCCUPATIONAL SCIENCE & OT

Minimum Credits: 3

Maximum Credits: 3

Examines the history, philosophy, and science of the profession of occupational therapy. The focus is on the meaning of occupation and its role in health, wellness, and participation. Occupational science and occupational performance theories of practice are introduced. Examines how occupational therapists develop and manage their therapeutic relationships with clients using a model of intentional relationships, focusing on the use of narrative reasoning, emotional intelligence and empathy, and a client-centered collaborative approach. Formal interview techniques and casual conversation approaches used to obtain information are introduced and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2101 - HUMAN MOVEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examines human performance in-depth using the approaches of occupational analysis and activity analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2104 - CLINICAL PSYCHIATRY

Minimum Credits: 1

Maximum Credits: 1

Psychiatric diagnoses that are highly prevalent in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, psychiatric management, morbidity, and prognosis are reviewed. The influence of psychiatric pathology on daily living skills and routines, and societal participation is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2105 - CLINICAL MEDICINE

Minimum Credits: 2

Maximum Credits: 2

General medical diagnoses that are leading causes of disability in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed. Influence of medical pathology on activities of daily living and routines, and societal participation is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100 and HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2106 - CLINICAL RESEARCH FOR OT

Minimum Credits: 2

Maximum Credits: 2

Occupational therapy and rehabilitation research and its application to practice, management, and education is explored. Scientific method, hierarchies of evidence, levels of measurement, and interpretation of findings are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2107 - PSYCHOSOCIAL / COGNITIVE THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for clients with psychosocial and/or cognitive dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with psychosocial and/or cognitive dysfunction and the skills needed for the analysis and adaptation of occupational performance deficits.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2102 and 2104; PLAN: Occupational Therapy (MOT)

OT 2108 - CLIN NEUROLOGY & ORTHOPEDICS

Minimum Credits: 3

Maximum Credits: 3

Neurologic and orthopedic diagnoses that are leading causes of disability in children, adolescents, adults, and older adults are defined and described.

Etiology, signs and symptoms, clinical course, medical management, morbidity and prognosis are reviewed. This course provides the background for understanding the influence of neurologic and orthopedic pathology on activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022 and OT 2100; PLAN: Occupational Therapy (MOT)

OT 2109 - NEUROBEHAVIORAL SCIENCE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Concepts of normal sensorimotor integration, including the influence of neural centers on postural control and functional movement are considered and the clinical manifestations of dysfunction of major neural elements are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2110 - BIOMECHANICAL THEORY & PRACT 1

Minimum Credits: 2

Maximum Credits: 2

OT process for clients with physical dysfunctions involving biomechanical impairments is introduced. Emphasis is on clinical evaluations and their function in diagnostic reasoning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2101 and 2105 and 2113; PLAN: Occupational Therapy (MOT)

OT 2111 - OCCUPATIONAL THEORY AND THE HEALTH CARE SYSTEM/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 2

Maximum Credits: 2

Examines health care trends, reimbursement regulations, legislative policies, and current issues affecting occupational therapy. Strategies for maintaining continued competence and supervisory roles are interpreted and applied to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2112 - NEUROREHABILITATION THEORY & AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with neurological and neurobehavioral dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2109; PLAN: Occupational Therapy (MOT)

OT 2113 - REHABILITATION THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

The interface between functional impairment, activity, and societal participation is studied in-depth. Emphasis is on adaptation to compensate for dysfunction in performance of occupations for life activities (self-care, home and community management, rest/sleep, education/work, and play/leisure, and social participation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022 and OT 2100; PLAN: Occupational Therapy (MOT)

OT 2114 - BIOMECHANICAL THEORY AND PRACTICE/MOT

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for clients with physical dysfunction involving biomechanical impairments is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with neurological/neurobehavioral and biomechanical dysfunction. Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, licensure, certification, and professional sustainability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2113; PLAN: Occupational Therapy (MOT)

OT 2115 - DEVELOPMENTAL THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for children and youth is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of children and youth, and older adults.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2103 and 2109; PLAN: Occupational Therapy (MOT)

OT 2116 - INTEGRATIVE CAPSTONE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Course addresses the role of the OT as a contributor to the profession. Problem-focused and solution-oriented students pose, and subsequently solve questions related to clinical issues. Solutions are evidenced in quantitative or qualitative learning products.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2106; PLAN: Occupational Therapy (MOT)

OT 2117 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Examines the role of the occupational therapist as a manager of occupational therapy services. Focuses on the application of principles and practices of administration and supervision in diverse practice environments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2111; PLAN: Occupational Therapy (MOT)

OT 2118 - SP TOPICS OT THEORY & PRACTICE

Minimum Credits: 3
Maximum Credits: 3

The role of occupational therapy in productive aging and the promotion of successful aging in older adults is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2110; PLAN: Occupational Therapy (MOT)

OT 2119 - OT FIELDWORK EDUCATION A (FW2)

Minimum Credits: 1
Maximum Credits: 10

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PREQ: OT 2114 and 2115 and 2118; PLAN: Master of Occupational Therapy

OT 2120 - OT FIELDWORK EDUCATION B (FW2)

Minimum Credits: 1
Maximum Credits: 10

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PREQ: OT 2114 and 2115 and 2118; PLAN: Occupational Therapy (MOT)

OT 2121 - OT FIELDWORK EDUCATION C

Minimum Credits: 1
Maximum Credits: 6

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop specialized skills.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2199 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6

A topic of interest to the student is examined in-depth under the guidance of a faculty mentor. It is the student's responsibility to contract with a faculty member for this tutorial.

Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2200 - FOUNDATIONS OF OCCUPATION

Minimum Credits: 2

Maximum Credits: 2

Examines the history, philosophy, theory and science of the profession of occupational therapy. The focus is on the meaning of occupation and its role in health, wellness, and participation. Occupational performance theories of practice are introduced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2201 - BODY FUNCTIONS AND STRUCTURES: ANATOMY

Minimum Credits: 3

Maximum Credits: 3

Emphasizes the understanding and application of knowledge of human anatomy in diagnostics of clinical conditions commonly encountered by an occupational therapist. The practical component includes the use of prosected cadavers, skeletal models, and palpation of surface anatomical features in live models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2202 - THERAPEUTIC APPROACHES 1

Minimum Credits: 2

Maximum Credits: 2

Examines how occupational therapists develop and manage their therapeutic relationships with clients using a model of intentional relationships, focusing on the use of narrative reasoning, emotional intelligence and empathy, and a client-centered collaborative approach. Formal interview techniques and casual conversation approaches used to obtain information are introduced and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2203 - CLINICAL SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

Professional issues for the occupational therapist are introduced and discussed, including but not limited to traditional and emerging practice settings, the roles and functions of occupational therapy practitioners, professional associations, licensure, certification, and ethics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2204 - HUMAN PERFORMANCE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examines human performance in-depth using the approaches of occupational analysis and activity analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2200 and 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2205 - NEUROBEHAVIORIAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Examines neuroscientific concepts underlying normal somatosensory, special sensory, motor, cognition, and emotion functional systems, and explores the manifestation of dysfunction of major neural elements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2206 - CLINICAL CONDITIONS 1

Minimum Credits: 3

Maximum Credits: 3

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2207 - PRINCIPLES OF ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Examines the principles associated with the evaluation process, including the selection and administration of assessment tools, and the scoring and interpretation of assessment data. Psychometrics are explored and data collection and analysis is practiced using a range of assessment methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2208 - CRITICAL APPRAISAL OF EVIDENCE

Minimum Credits: 2

Maximum Credits: 2

Occupational therapy and rehabilitation research and its application to practice, management, and education is explored. Scientific method, hierarchies of evidence, levels of measurement, and interpretation of findings are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2209 - CLINICAL SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Introduces a model for professional and clinical reasoning to plan, direct, perform, and reflect on occupational therapy services. Explores the various audiences and types of documentation used by occupational therapy practitioners.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PREQ: OT 2203; PLAN: Doctor of Occupational Therapy (OTD)

OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with psychosocial and/or cognitive dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2207; PLAN: Doctor of Occupational Therapy (OTD)

OT 2211 - ACTIVITY/CONTEXT ADAPTATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The interface between functional impairment, activity, and societal participation is studied in-depth. Emphasis is on adaptation to compensate for dysfunction in performance of occupations for life activities (self-care, home and community management, rest/sleep, education/work, and play/leisure, and social participation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2207; PLAN: Doctor of Occupational Therapy (OTD)

OT 2212 - CLINICAL CONDITIONS 2

Minimum Credits: 3

Maximum Credits: 3

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined. Builds on content in Clinical Conditions 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2206; PLAN: Doctor of Occupational Therapy (OTD)

OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM

Minimum Credits: 2

Maximum Credits: 2

Examines health care trends, reimbursement regulations, legislative policies, and current issues affecting occupational therapy. Strategies for maintaining continued competence and supervisory roles are interpreted and applied to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2203; PLAN: Doctor of Occupational Therapy (OTD)

OT 2214 - THERAPEUTIC APPROACHES 2

Minimum Credits: 2

Maximum Credits: 2

Examines the dynamic process used by occupational therapists to facilitate a client's or group of clients' engagement in occupations to promote health

and participation. Focuses on education and training, self-advocacy, and health literacy for clients, those involved in the care of the clients, and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2202; PLAN: Doctor of Occupational Therapy (OTD)

OT 2215 - FIELDWORK EDUCATION A

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with psychosocial and/or cognitive dysfunction and the skills needed for the analysis and adaptation of occupational performance deficits.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2207; CREQ: OT 2210 and 2236; PLAN: Doctor of Occupational Therapy (OTD)

OT 2216 - CLINICAL SEMINAR 3

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Focuses on applying the model for professional and clinical reasoning to practice. Issues explored include traditional and emerging practice settings, collaborative practice, ethics, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2209; PLAN: Doctor of Occupational Therapy (OTD)

OT 2217 - NEUROREHABILITATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with neurological and neurobehavioral dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2210; PLAN: Doctor of Occupational Therapy (OTD)

OT 2218 - BIOMECHANICAL THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with physical dysfunction involving biomechanical impairments is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2236; PLAN: Doctor of Occupational Therapy (OTD)

OT 2219 - FIELDWORK EDUCATION B

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with neurological/neurobehavioral and biomechanical dysfunction.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2215; PREQ: OT 2217 and 2218; PLAN: Doctor of Occupational Therapy (OTD)

OT 2220 - CLINICAL SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, licensure, certification, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2216; PLAN: Doctor of Occupational Therapy (OTD)

OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for children and youth is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2217; PLAN: Doctor of Occupational Therapy (OTD)

OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The role of occupational therapy in productive aging and the promotion of successful aging in older adults is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2218; PLAN: Doctor of Occupational Therapy (OTD)

OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Examines the role of the occupational therapist as a manager of occupational therapy services. Focuses on the application of principles and practices of administration and supervision in diverse practice environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2213; PLAN: Doctor of Occupational Therapy (OTD)

OT 2225 - PROJECT DEVELOPMENT 1

Minimum Credits: 3

Maximum Credits: 3

Focuses on the development of the skills needed to plan, implement and evaluate a project that addresses an important question related to professional practice. In collaboration with and mentorship by faculty and content experts, designs and presents a synopsis of a proposal for a capstone project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2208; PLAN: Doctor of Occupational Therapy (OTD)

OT 2226 - FIELDWORK EDUCATION C

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of children and youth, and older adults.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: CREQ: OT 2221 and 2222; PREQ: OT 2219; PLAN: Doctor of Occupational Therapy (OTD)

OT 2227 - CLINICAL SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, fieldwork and professional entry, licensure, certification, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2220; PLAN: Doctor of Occupational Therapy (OTD)

OT 2228 - FIELDWORK EDUCATION D

Minimum Credits: 1

Maximum Credits: 10

Provides an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2226; PLAN: Doctor of Occupational Therapy (OTD)

OT 2229 - FIELDWORK EDUCATION E

Minimum Credits: 1

Maximum Credits: 10

Provides an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2226; PLAN: Doctor of Occupational Therapy (OTD)

OT 2230 - CLINICAL SEMINAR 6

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2231 - CLINICAL SEMINAR 7

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2232 - ADVANCED THEORY AND PRACTICE / MS

Minimum Credits: 1
Maximum Credits: 1
This course enables students to examine select theoretical perspectives, practice areas, evaluation procedures, intervention protocols, and/or professional issues in-depth.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2233 - IMPLEMENTING EVIDENCE: CLINICAL PRACTICE GUIDELINES

Minimum Credits: 3
Maximum Credits: 3
This course introduces the opportunities and barriers for implementing evidence in practice and focuses on the use of evidence for evaluating and developing clinical practice guidelines.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2234 - HUMAN PERFORMANCE ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
Examines human performance in-depth using the approaches of occupational analysis and activity analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Plan: Doctor of Occupational Therapy (OTD)

OT 2235 - CLINICAL CONDITIONS 1

Minimum Credits: 1
Maximum Credits: 1
Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined.
Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Plan: Doctor of Occupational Therapy (OTD)

OT 2236 - ACTIVITY/CONTEXT THEORY AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

The interface between functional impairment, activity, and societal participation is studied in-depth. Emphasis is on adaptation to compensate for dysfunction in performance of occupations for life activities (self-care, home and community management, rest/sleep, education/work, and play/leisure, and social participation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2207; PLAN: Doctor of Occupational Therapy (OTD)

OT 2237 - CLINICAL CONDITIONS 2

Minimum Credits: 1

Maximum Credits: 1

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined. Builds on content in Clinical Conditions 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2235; PLAN: Doctor of Occupational Therapy

OT 2238 - ADAPTATION/TECHNOLOGY THEORY AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Addresses assistive technologies and devices used to enhance occupational performance and foster participation and well-being.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2236; PLAN: Doctor of Occupational Therapy (OTD)

OT 2239 - PROJECT DEVELOPMENT 1

Minimum Credits: 2

Maximum Credits: 2

Focuses on the development of the skills needed to plan, implement and evaluate a project that addresses an important question related to professional practice. In collaboration with and mentorship by faculty and content experts, designs and presents a synopsis of a proposal for a capstone project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2208; PLAN: Doctor of Occupational Therapy (OTD)

OT 2240 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2241 - CLINICAL PRECEPTORSHIP 1

Minimum Credits: 1

Maximum Credits: 1

This course provides experiential learning in a specialized area of occupational therapy practice (e.g., acute care) to provide clinical exposure to the U.S. Health Care System.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2242 - CLINICAL PRECEPTORSHIP 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2243 - CLINICAL PRECEPTORSHIP 3

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2244 - CLINICAL CONDITIONS 3

Minimum Credits: 1

Maximum Credits: 1

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined. Builds on content in Clinical Conditions 2.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2237; PLAN: Doctor of Occupational Therapy (OTD)

OT 2245 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course examines advanced topics related to occupational therapy research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2246 - RESEARCH PRECEPTORSHIP 1

Minimum Credits: 2

Maximum Credits: 2

This course provides a structured exposure to occupational therapy research.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2247 - RESEARCH PRECEPTORSHIP 2

Minimum Credits: 2

Maximum Credits: 2

This course provides a structured experience in an occupational therapy research laboratory under the guidance of a faculty mentor.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2248 - PROFESSIONAL REASONING IN OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

This course uses professional and clinical reasoning to enhance evaluation and intervention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2249 - SPECIAL TOPICS IN OCCUPATIONAL THERAPY: CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This course examines advanced topics related to occupational therapy practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2250 - APPLIED STATISTICS IN OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the concepts of descriptive and inferential statistics as they relate to occupational therapy research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 2251 - SCHOLARLY PROJECT

Minimum Credits: 1

Maximum Credits: 10

This course provides the student with experience in implementing, analyzing, interpreting, and/or writing elements of an existing research project under the direction of a faculty mentor.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

OT 3000 - ADVANCED ASSESSMENT

Minimum Credits: 4

Maximum Credits: 4

This course focuses on building foundational knowledge in classical test and item response theories to identify assessments for improving outcomes at the patient, program, system, and population levels. Students will learn to differentiate between levels of assessments; examine the uses of various assessment methods (e.g., self-report, proxy report, clinical judgment, performance assessment, and survey); and analyze the impact of measurement issues on outcomes. Additionally, students will utilize knowledge gained in this course to create a program proposal showcasing the utility of assessments in improving outcomes at a facility.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3001 - ADVANCEMENTS IN FUNCTIONAL ASSESSMENT: COLLOQUIUM

Minimum Credits: 3

Maximum Credits: 3

Using the ICF-methods matrix approach, the colloquium focuses on development of an ICF-methods matrix for a specific patient population.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 3010 - EVIDENCE INTERPRETATION FOR IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course provides a basic understanding of methods to interpret research in the context of evidence-based practice. Content includes critical appraisal and interpretation of descriptive and inferential statistics (including univariate and multivariate parametric and nonparametric tests) that are commonly used in published clinical research studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy(OT-MS) or Impl of Evidence in Clin Pract (IECP-ACG) SUBPLAN: Clinical Education(CSDCE-SP) or (OCSD-TR) Online OT-CSD

OT 3020 - FOUNDATIONS IN IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces opportunities and barriers for implementing changes designed to improve clinical practice processes and outcomes. Content will include definitions, distinctions, and applications of key concepts including evidence-based practice, knowledge translation, implementation, and dissemination.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3030 - THE BUSINESS OF IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course shares effective techniques for negotiating, facilitating, and leading change in clinical contexts. Topics will include establishing new or renewing old relationships, changing behaviors and expectations, resolving dispute, and interpersonal effectiveness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3040 - ADVOCACY FOR IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course will provide a framework for understanding and analyzing legislative and regulatory processes that have an impact on clinical services delivery and implementation of processes across contexts to improve clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

OT 3040 - ADVOCACY FOR IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course will provide a framework for understanding and analyzing legislative and regulatory processes that have an impact on clinical services delivery and implementation of processes across contexts to improve clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3040 - ADVOCACY FOR IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course will provide a framework for understanding and analyzing legislative and regulatory processes that have an impact on clinical services delivery and implementation of processes across contexts to improve clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3100 - EVIDENCE ANALYSIS AND SYNTHESIS

Minimum Credits: 4

Maximum Credits: 4

This course uses systematic methods (e.g., PRISMA, Pedro, Consort, Strobe, Trend, CASP) to critically appraise and synthesize research to inform design and implementation of clinical protocols and best practice guidelines to improve clinical practices and outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy (OT-MS) or Impl of Evidence in Clin Pract (IECP-ACG) or SUBPLAN: Clinical Education (CSDCE-SP) or Online OT-CSD(OCSD-TR)

OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the use of evidence checklists for evaluating and developing practice guidelines (e.g., AGREEII). Current professional

practice guidelines will be evaluated, generated, implemented, and assessed for adoption and sustainability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy(OT-MS) or Impl of Evidence in Clin Pract (IECP-ACG) SUBPLAN: Clinical Education(CSDCE-SP) or (OCSD-TR) Online OT-CSD

OT 3203 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING

Minimum Credits: 3

Maximum Credits: 3

Uses case-based methods, evidence synthesis, and critical thinking to derive evidence-based and sustainable solutions to real-world complex clinical challenges in evaluation and intervention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3204 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

Focuses on the development and analysis of policy issues, and the engagement in advocacy to address issues affecting occupational therapy and that support health, well-being, and societal participation at the individual and/or systems levels. Addresses strategies for promoting occupational justice and empowering individuals to seek and obtain resources to fully participate in daily life occupations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3205 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on leadership skills for promoting the distinct value of occupational therapy, implementing evidence-based occupational therapy services, and advocating for occupational therapy services at the consumer, work environment, and policy levels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3206 - ADVANCED THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Examines select theoretical perspectives, practice areas, evaluation procedures, intervention protocols, and/or professional issues in-depth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3207 - PROJECT DEVELOPMENT 2

Minimum Credits: 3

Maximum Credits: 3

Focuses on the construction of the protocol of a capstone project, including collaboration with and mentorship by faculty and content experts in

developing plans for implementation, evaluation and sustainability of the program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3208 - EXPERIENTIAL PRECEPTORSHIP

Minimum Credits: 1

Maximum Credits: 12

Provides an in-depth learning experience in clinical practice, research, administration, leadership, program and/or policy development, advocacy, or education at an approved clinical education site that offers the opportunity to develop advanced skills that are beyond the professional responsibilities of an entry-level occupational therapist and collaboration and mentorship with faculty and site experts. Includes implementation of a capstone project.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 3207; CREQ: OT 3209; PLAN: Doctor of Occupational Therapy (OTD)

OT 3209 - PROFESSIONAL DEVELOPMENT SEMINAR

Minimum Credits: 2

Maximum Credits: 2

Addresses professional issues and the professional development of the occupational therapist related to collaborative practice, ethics, professional entry requirements and responsibilities, and professional sustainability. Includes dissemination of capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 3207; CREQ: OT 3208; PLAN: Doctor of Occupational Therapy (OTD)

OT 3210 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING

Minimum Credits: 2

Maximum Credits: 2

Uses case-based methods, evidence synthesis, and critical thinking to derive evidence-based and sustainable solutions to real-world complex clinical challenges in evaluation and intervention, and to develop clinical protocols and best practice guidelines for the implementation of the solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy

OT 3211 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY

Minimum Credits: 2

Maximum Credits: 2

Focuses on the development and analysis of policy issues, and the engagement in advocacy to address issues affecting occupational therapy and that support health, well-being, and societal participation at the individual and/or systems levels. Addresses strategies for promoting occupational justice and empowering individuals to seek and obtain resources to fully participate in daily life occupations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3212 - LEADERSHIP DEVELOPMENT

Minimum Credits: 2

Maximum Credits: 2

Focuses on leadership skills for promoting the distinct value of occupational therapy, implementing evidence-based occupational therapy services, and advocating for occupational therapy services at the consumer, work environment, and policy levels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3213 - PROFESSIONAL DEVELOPMENT SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist related to collaborative practice, ethics, professional entry requirements and responsibilities, and professional sustainability. Includes dissemination of capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 3207; CREQ: OT 3208; PLAN: Doctor of Occupational Therapy (OTD)

OT 3300 - CONCEPTUALIZING AND ASSESSING QUALITY IMPROVEMENT

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the application of data analytic strategies (e.g., descriptive, correlational, comparative, predictive, and qualitative strategies) that practitioners can use to analyze clinical data related to patient, program, population, or health system-level outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy(OT-MS) or Impl of Evidence in Clin Pract (IECP-ACG) SUBPLAN: Clinical Education(CSDCE-SP) or (OCSD-TR) Online OT-CSD

OT 3301 - DATA-BASED DECISION MAKING: CLINICAL ROTATION

Minimum Credits: 3

Maximum Credits: 3

In this clinical rotation, students will work with staff at an assigned clinic, using data analytic strategies to analyze and synthesize data from relevant clinical cases to assist them in documenting patient progress, satisfaction, and outcomes, and staff productivity.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

OT 3400 - THEORIES OF CHANGE

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on analysis and synthesis of health, behavior, and organizational change theories and application to clinical practice, program development, and adult learning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3500 - IMPLEMENTATION EVIDENCE

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on evidence-based practices to support implementation, with particular attention on approaches to support stakeholder engagement, knowledge translation, and dissemination.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3600 - CAPSTONE PHASE 1

Minimum Credits: 3

Maximum Credits: 3

Students will design and initiate a project to implement evidence-based knowledge in partnership with stakeholders and an academic mentor to improve occupational therapy outcomes. This phase of the capstone project includes project development and approval, stakeholder engagement, faculty guidance and feedback, project implementation, and data collection.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

OT 3700 - CAPSTONE PHASE 2

Minimum Credits: 5

Maximum Credits: 5

Students will complete and analyze the results of their project implementation to demonstrate the synthesis of integrated learnings. This phase of the capstone project includes the delivery of findings through both an oral presentation to and collegial discussion with an audience of academic peers, faculty and professional colleagues, as well as a written defense.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PLAN: IECP-ACG or SUBPLAN: CSDCE-SP or OCSD-TR

Ophthalmology

OPHTH 5385 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of ophthalmology will arrange an individual study or research experience for third year medical students in an area of their interest. These electives are at the junior level and will be four weeks in duration.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OPHTH 5420 - INTENSIVE OPHTHALMOLOGY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This elective will provide in-depth exposure to the field of ophthalmology. It is intended for students exploring the possibility of a career in ophthalmology as well for those who wish to gain more ophthalmologic experience prior to a career in another field. Prior to enrolling for the elective, the student must meet with Dr. Waxman to discuss his/her specific goals. Individual students will then be directed to meet with a member of the full-time faculty who will become the student's mentor for the elective period. The expectation is that the student will become a functioning member of their mentor's service with duties comparable to those of a first-year resident. Students will have the opportunity to attend subspecialty

lectures, weekly grand rounds and to observe intraocular microsurgery. A call schedule can be arranged at the discretion of the student and mentor.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

Course Attributes: School of Medicine Year 4

OPHTH 5430 - PEDIATRIC OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective will provide in-depth exposure to the field of pediatric ophthalmology. It is intended for students exploring the possibility of a career in ophthalmology, as well as for those who wish to gain more ophthalmologic experience prior to a career in another, likely pediatric, field.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OPHTH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of ophthalmology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OPHTH 5815 - OPHTHALMOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are available with appropriate staff members. Call to discuss the various research programs. The individual can then make the necessary arrangements for a research elective with the staff member of his choice.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OPHTH 5899 - INDEPENDENT STUDY IN OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OPHTH 5900 - EXTRAMURAL OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in ophthalmology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Oral Biology

ORBIOL 3501 - MOLECULAR AND CELL BIOLOGY PART 1

Minimum Credits: 4

Maximum Credits: 4

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ORBIOL 3502 - MOLECULAR AND CELL BIOLOGY PART 2

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENESIS

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ORBIOL 5001 - DIRECTED STUDY IN ORAL TISSUES

Minimum Credits: 1

Maximum Credits: 1

A customized course of study in oral tissues for students who transfer to the School of Dental Medicine.

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

ORBIOL 5113 - MOLECULAR AND CELL BIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

In this course, students will be provided foundational knowledge of molecular structures and the metabolism of biomolecules that underlie normal human health, deviations associated with human disease, and alterations resulting from clinical interventions supporting evidence-based clinical decisions. This course includes lectures with a very pronounced interactive dimension.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORBIOL 5114 - MOLECULAR AND CELL BIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This class represents a continued study of the molecular- and cell- biological processes discussed in ORBIOL 5113. In this course, students will be provided foundational knowledge of molecular structures and the metabolism of biomolecules that underlie normal human health, deviations associated with human disease, and alterations resulting from clinical interventions supporting evidence-based clinical decisions. This course includes lectures with a very pronounced interactive dimension.

Academic Career: Dental Medicine

Grade Component: Grad Letter Grade

ORBIOL 5117 - MOLECULAR AND CELL BIOLOGY 2

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORBIOL 5125 - GENERAL EMBRYOLOGY AND CRANIOFACIAL ORGANOGENESIS

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to the principles of human development starting from fertilization extending to postnatal growth of the craniofacial skeleton. The goal of the class is to make the students aware of how developmental processes can impact their daily practice, and can be incorporated into evidence-based decision-making. At the completion of the course, the students will be able to describe human fertilization, organogenesis and craniofacial embryology and will be able to integrate the fundamental knowledge about embryonic and postnatal growth and development and use it to describe how congenital anomalies arise. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5130 - ORAL TISSUES

Minimum Credits: 3
Maximum Credits: 3

In this course, students will be provided sufficient information for an in-depth understanding of the developmental and structural features of the oral cavity and face so that the student can understand the scientific basis for oral diagnosis and treatment planning. In this course, the basic principles of development, structure, and function are considered as they relate to craniofacial complex. Students will relate concepts from other disciplines i.e., anatomy, physiology, biochemistry, to oral histology and common clinical procedures. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5142 - THE SKULL: BASIC AND APPLIED ANATOMY

Minimum Credits: 2
Maximum Credits: 2

In this course, students will be instructed on the anatomy of the skull so that they have a clear and lasting understanding of the anatomical concepts and relationships essential for the practice of dentistry. To this end, this course will focus on the gross anatomical structure of the skull and the clinical application of this anatomical knowledge. Skeletal elements will be presented during class lectures and reinforced by laboratory and museum specimens. Concepts important in clinical dentistry will be emphasized; some of these include the identification of bony landmarks used in surgical procedures, local anesthesia, radiographic diagnostics, and orthodontic treatment planning and evaluation.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORBIOL 5171 - IMMUNOLOGY AND INFECTIOUS DISEASES

Minimum Credits: 4
Maximum Credits: 4

In this course, students will focus on the structure and function of the immune system as well as on the major human infectious diseases. Microbial Physiology and Immunology I (ORBIOL 5115) is a required prerequisite. Emphasis is placed on the role of microorganisms in the development of dental caries and periodontal disease. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Letter Grade

ORBIOL 5214 - PHARMACOLOGY AND THERAPEUTICS

Minimum Credits: 4
Maximum Credits: 4

In this course, students will be provided with foundational knowledge of physiologic pharmacology. The course is oriented to second year dental students to establish the basis for safe and effective dental therapeutics. This course is team taught with faculty from the School of Pharmacy including: Dr. Sharon Corey, Dr. Beth Minnigh, and Dr. Michael A. Zemaitis. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5817 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine

Course Component: Directed Studies
Grade Component: Grad HSU Basis

ORBIOL 5847 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3

Undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and this directed study is designed for the approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ORBIOL 5877 - DIRECTED STUDY

ORBIOL 5999 - DEAN'S SUMMER RESEARCH PROGRAM

Minimum Credits: 3
Maximum Credits: 3

This course is for students who are concurrently enrolled in the Dean's Summer Research Program with the School of Dental Medicine and the Biomedical Masters Program.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

Oral and Maxillofacial Path

OMFP 2111 - SURGICAL ORAL PATHOLOGY 1

Minimum Credits: 1

Maximum Credits: 1

This course will provide training and experience in the full range of oral surgical pathology procedures. The course will train the resident through hands-on experience in de scribing gross specimens as they arrive from the contributor, proper preparation for embedding, microscopic description, generation of a diagnosis, and decision-making in the need to order special stains and immunohistochemical procedures. This course includes instruction in laboratory administration, contributor relations, and histopathologic methods.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

OMFP 2121 - ORAL AND MAXILFACL HISTOPATH 1

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2131 - OMFP JOURNAL CLUB 1

Minimum Credits: 1

Maximum Credits: 1

This course is a conference where departmental faculty and residents meet to discuss current scientific articles of interest to the field. This will serve as a forum to address controversial and evidence-based topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2141 - TMJ AND ORAL AND MAXILLOFACIAL PAIN 1

Minimum Credits: 1

Maximum Credits: 1

This course will involve analysis of case histories of patients who have pain in the head and neck region. Students will be provided cases beforehand and will investigate patient medical and dental history, current medications, differential diagnosis, possible treatments, and treatment outcomes. Topics may also include trigeminal neuralgia, multiple sclerosis, migraine headaches, cranial arteritis, and temporomandibular joint surgery.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2151 - OMFP RESEARCH 1

Minimum Credits: 1

Maximum Credits: 3

The resident, with the assistance of the program director, will select a research mentor and research project that exposes him/her to methods of research, critical review of the scientific literature, analysis of data, and presentation of the results before his/her peers. A comprehensive understanding of institutional review board and human subject's committee policies will be required. The research may include, but is not limited to, basic research, clinical trials, epidemiologic studies, and public health issues.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

OMFP 2161 - ORAL MEDICINE CLINIC 1

Minimum Credits: 1

Maximum Credits: 1

This course has three main components. The first will be observing and assisting faculty members with their clinical oral pathology/oral medicine

patients. The second component of the course is the resident's taking responsibility for his/her own clinical patients, under the direct supervision of a faculty member. The third will be the training and evaluation of first professional students in the urgent care clinic rotations.

Oral and Maxillofacial Surgery

ORSUR 5241 - ORAL SURGERY 1

Minimum Credits: 1

Maximum Credits: 1

This introductory course in oral and maxillofacial surgery is an integral part of dental education and clinical practice. It involves reinforcing and correlating the dental student's knowledge of the basic sciences with physical evaluation and risk assessment for patients requiring oral surgery. Basic dentoalveolar surgery techniques, suturing, flap design and extraction of impacted teeth are discussed as well as complications of dentolaveolar surgery.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

ORSUR 5282 - ORAL SURGERY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn about classification and management of impacted teeth. An emphasis will also be placed on the recognition and management of common oral surgical related complications. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

ORSUR 5313 - ORAL SURGERY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented with information related to the management of patients with co-existing medical diseases; patients requiring oral surgery in a hospital setting; the treatment of advanced oral and maxillofacial conditions such as odontogenic infections and facial trauma; and medical/legal considerations with an emphasis on the informed consent process. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

ORSUR 5314 - PHYSICAL DIAGNOSIS AND EVALUATION

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be provided the foundational information for taking a medical history leading to a focused physical examination.

Students will gain practical knowledge to assess the patients medical condition and make practical clinical decisions based on the patient's situation

and medical history. This course integrates knowledge learned in the basic sciences, specifically pharmacology, histology, physiology and anatomy for clinical application. A physical systems approach to associated disease states will be used. Representative examples of normal and disease states will be presented with emphasis on oral manifestations and implications for patient management in the dental setting including medical emergencies. This course will help prepare the student for the subsequent Spring 3rd year Clinical Medicine (DSANE 5342) and Medical Emergencies (DSANE 5344) courses.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

ORSUR 5344 - ORAL SURGERY 4

Minimum Credits: 1

Maximum Credits: 1

This course is a continuation of dentoalveolar surgery techniques and includes discussion of more complex situations including those pertaining to maxillofacial surgery.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

ORSUR 5388 - CLINICAL ORAL SURGERY 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of oral surgery for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with oral surgery needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with oral surgery needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

ORSUR 5449 - CLINICAL ORAL SURGERY 2

Minimum Credits: 2

Maximum Credits: 2

This course is designed to permit the student to be able to evaluate, manage and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

ORSUR 5800 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 4

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

ORSUR 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 4

This independent study course is designed for the pre doctoral dental student who desires to pursue additional knowledge in specific areas of oral and maxillofacial surgery. The content of the course is specified by the student and approved and monitored by a full-time faculty member. The teaching format is designed to encourage independent student experiences with the faculty acting in an advisory capacity with limited personal interaction.

Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

ORSUR 5911 - HOSPITAL EXTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

The participant will participate at MUH department of dental medicine for a two week rotation. During this time they will function with the oral surgery residents in the clinic seeing patients presenting with both inpatient and outpatient emergencies. Participants will also rotate in the operating room for an observational experience with oral and maxillofacial surgery staff and residents.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5912 - ADVANCED ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical procedures along with man aging medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5913 - BASIC ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, assisting other students and managing medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5941 - HOSPITAL EXTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh medical center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care and operating room coverage.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5942 - ADVANCED ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical extractions, preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical
Grade Component: Grad HSU Basis

ORSUR 5943 - BASIC ORAL SURGERY

Minimum Credits: 3
Maximum Credits: 3

This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.

Minimum Credits: 3

Maximum Credits: 3

Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

OCS 5120 - BODY TISSUES

Minimum Credits: 2

Maximum Credits: 2

This course introduces students to the microscopic anatomy of the various tissues and organs that make up the human body. The course starts with a description of the structural elements of the cell, followed by a discussion of epithelial, glandular, connective, muscle and nervous tissues. The course continues with coverage of the microscopic features of the cells and tissues that form the various body systems, such as the integumentary, circulatory, respiratory, digestive, endocrine, and urinary systems. The function of the cells found within these tissues and organs is also addressed at an introductory level. Histopathologic correlates are introduced throughout the course, and will help the student understand the link between normal histology and microscopic changes seen in diseased states. The course format is predominantly lecture-based, with an emphasis on histologic slides. This course provides a strong foundation in histology that will be useful for subsequent courses in Oral Tissues and Embryology (ORBIOL 5130), Systemic Human Physiology (ORBIOL 5141), General and Systemic Pathology (DIASCI 5170), and Oral and Maxillofacial Pathology (DIASCI 5212).

Grade Component: Grad Letter Grade

OCS 5140 - SYSTEMIC GROSS ANATOMY

Minimum Credits: 4

Maximum Credits: 4

This is a gross anatomy course for predoctoral dental students that presents the anatomy of the human body from a systems-based approach using lecture and laboratory formats. The primary educational goal of this course is to instruct predoctoral dental students in gross anatomy so that they will have a clear and lasting understanding of the anatomical concepts and relationships that are prerequisites for future courses in their education and for the years of practice that will follow. The course will provide students with an in-depth knowledge of, and appreciation for, the gross anatomy of the human body, particularly those portions directly involved in the practice of dentistry.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

OCS 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

As the first of two courses in the systemic Human Physiology series, this course is organized to provide a basic foundation for the dental student that explains 1) how each organ functions in the body; and 2) how all the organs work together as one functional unit to maintain body homeostasis with a recognition that any deviations from this normal organ functions would lead to organ failure of these systems. The topics covered in the systemic Human Physiology 1 course include: nervous system, muscular system, cardiovascular system, urinary system and respiratory organ system. Oral implications of systemic physiology are introduced. The goals of the course are therefore to provide an opportunity for the dental students to learn the principles of cellular and systemic organ functions; apply these principles and concepts to explain the significance of normal human physiology; and identify deviation(s) from normal organ functions that can affect dental treatments, thus establishing a foundation for the practice of dental

OCS 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

In this coursework, we will discuss the fundamental principles and concepts that govern each organ and organ system functions in the human body and their integration to maintain homeostasis, as well as some clinical aspects of failure of these systems. The organ systems covered in this course include: sensory, gastrointestinal tract and endocrine systems that include pituitary, thyroid, parathyroid, insulin/glucagon/pancreas, male and female

reproduction, and metabolism and temperature regulation. The goal of the course is therefore to provide an opportunity for the dental students to know the principles of cellular and systemic human physiology, appreciate the significance of normal physiology, to understand pharmacology and pathology, and ultimately establish a foundation for the practice.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

OCS 5176 - IMMUNOLOGY

Minimum Credits: 2

Maximum Credits: 2

In this course, students will focus on the structure and function of the immune system as well as on the major human infectious diseases. Microbial Physiology and Immunology I (ORBIOL 5115) is a required prerequisite. Emphasis is placed on the role of microorganisms in the development of dental caries and periodontal disease. This course includes lectures and class discussions.

ORBIOL 5944 - COMPOSITION OF MINERALIZED TIS

Minimum Credits: 2

Maximum Credits: 2

Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

BORG 3510 - ORGANIZATIONAL SCIENCE 1

Minimum Credits: 3

Maximum Credits: 3

Organizational Science 1 (Topic: Evidence-Based Management) Evidence-based management means making organizational decisions through the conscientious and explicit use of the best available evidence to increase the likelihood of a favorable outcome for stakeholders. Evidence-based management requires a set of skills and knowledge whereby practitioners translate an issue or problem into an answerable question; systematically search the evidence and critically assess its quality; and incorporate that evidence into the decision making process. It blends science with practice with the goal of ensuring that organizational decisions are based on quality social science research. In this seminar our focus will be on topics in organization science. These topics include leadership, motivation, job design, incentives, and other foundational topics in organizational science. Students will use this information, as well as the principals of evidence-based management, to develop a proposal for addressing a relevant issue or problem to address within their own organizations or industries.

Course Requirements: PREQ: BOAH 2401 or BOAH 2409 ; PROG: Katz Graduate School of Business

BOAH 2422 - MANAGING HUMAN RESOURCES IN A GLOBAL ECONOMY

Minimum Credits: 2
Maximum Credits: 2

This course provides an integrative framework for understanding the macro- and micro-level issues that are associated with effective workforce management in a regional and global context. As more and more companies move toward global supply chain management, it is critical to consider the impact that country-level labor factors can have on operating performance and firm competitiveness. Accordingly, the challenges of identifying and integrating pertinent labor-related data for international sourcing decisions will be examined. At the firm level, we will discuss the role of human resources in business strategy formulation and implementation. Emphasis will be placed on best practice in the areas of talent acquisition and development as well as performance management. Relevant topical issues such as succession planning, managing large-scale reductions-in-force, and managing expatriate personnel may be addressed. With a focus on how to best allocate responsibilities for HR within the organization and effectively

deliver HR services, the implications of such developments as HR-process outsourcing, EHR, internal restructuring, and the possibility of transforming the HR function from a cost center into a profit center will be discussed. The course is designed to accomplish three fundamental learning objectives: improved understanding of how traditional and contemporary HR practices can impact organizational effectiveness. Enhanced awareness of the substantial labor-market differences that exist across countries (economic, cultural, regulatory); and greater sensitivity to the challenges of managing international value-and operating-chains to enhance competitive advantage.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BOAH 2424 - MANAGING HUMAN RESOURCES IN A GLOBAL ECONOMY

Minimum Credits: 2

Maximum Credits: 2

This course will provide an overview of human resource management and development policies and practices in different continents, such as Asia, America, Africa, Europe, and the South Pacific. The course will focus on managing workforce in global setting, human resource management and development in international joint ventures and global corporations. Topics include: hiring and selecting, training and developing, compensating, motivating, performance appraising, retaining in an international setting, cross cultural management, and the development of global managers. We will attempt to: develop a conceptual and critical understanding of human capital and global human resources management; develop familiarity with policies and practices of human resources management around the globe; and develop an agenda of future global managers.

BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Minimum Credits: 1.5

Maximum Credits: 1.5

This 1.5 credit course is a required course for the MBA degree. Students will learn frameworks that enable them to communicate persuasively to influence key strategic stakeholders within and external to the organization. A variety of experiential elements will be incorporated such as presentations, projects, and guest speakers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1

Minimum Credits: 1.5

Maximum Credits: 1.5

We negotiate daily in a variety of contexts: business, family, and social. Negotiation serves several purposes: (1) establishing new or renewing old relationships; (2) changing behaviors and expectations; and (3) resolving disputes. A key goal of this course is to learn the techniques of effective negotiating and collaborative problem solving. Successful negotiations and teamwork reduce costs, improve outcomes, and build constructive relationships. Negotiations are part of a broader set of exchanges that take place within and across organizational contexts. This is the first half of a two-part course on negotiations, teamwork, and change. This course will introduce you to effective techniques for negotiating and collaborative decision making in dyads, as well as in groups. It will further cover the methods for negotiating, facilitating, and leading change in organizational contexts. This is an experiential course and you will be involved directly in negotiating, leveraging team dynamics, and facilitating change in a range of contexts. These experiences will involve a host of tangible and not-so-tangible outcomes, ranging from monetary terms and conditions to matters of goodwill, trust, and information-sharing.

BOAH 2537 - CONFLICT RESOLUTION IN THE WORKPLACE 1

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is designed to build on the skills you learned in the prerequisite negotiation course (BOAH 2532 Negotiations, Teamwork and Change) to improve your skills in analyzing and resolving disputes in a variety of settings. Most of the lessons and principles covered in the course are not necessarily specific or unique to business-related or managerial applications, even though that will be the focal setting of study. A basic premise of the course is that while analytic skills are needed to discover optimal solutions to problems, a broad array of conflict management skills are often needed to get these solutions accepted and implemented. The course will allow participants the opportunity to develop these skills experientially, where considerable emphasis will be placed on learning from simulations and case analysis.

The clinical pediatric orthodontics course series is designed to afford the resident in pediatric dentistry the clinical experience necessary to ensure competency in diagnosis of abnormalities in the developing dentition and treatment of those conditions which can be corrected or significantly improved by the early utilization of limited procedures. Clinical experiences in this course series will be gained through patient screenings in the department of pediatric dentistry and the cleft palate-craniofacial center, as well as through rendering clinical care in the department of orthodontics and dentofacial orthopedics. Residents enrolled in this course will be afforded the opportunity to participate in the provision of comprehensive, multidisciplinary dental care under the supervision of faculty from the department of pediatric dentistry, the department of orthodontics and dentofacial orthopedics as well as attending professionals from the cleft palate-craniofacial center. The course is intended for residents enrolled in the advanced specialty education program in pediatric dentistry.

Course Component: Clinical

Grade Component: Grad Letter Grade

ODO 2031 - ADVANCED ORTHODONTIC CLINIC 1

Minimum Credits: 4

Maximum Credits: 4

Clinical cases treated in the areas of (1) maxillo-facial surgical orthodontic treatment, (2) growth modification cases, (3) congenital syndromes including cleft palate. The resident treats the patient under the guidance of a faculty team that may include maxillo-facial surgery, prosthodontics, periodontics, psychology, speech pathology, and orthodontics.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

ODO 2032 - ADVANCED ORTHODONTIC CLINIC 2

Minimum Credits: 4

Maximum Credits: 4

Clinical cases treated in the areas of (1) maxillo-facial surgical orthodontic treatment, (2) growth modification cases, (3) congenital syndromes including cleft palate. The resident treats the patient under the guidance of a faculty team that may include maxillo-facial surgery, prosthodontics, periodontics, psychology, speech pathology, and orthodontics.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

ODO 2033 - ADVANCED ORTHODONTIC CLINIC 3

Minimum Credits: 2

Maximum Credits: 2

Clinical cases treated in the areas of (1) maxillo-facial surgical orthodontic treatment, (2) growth modification cases, (3) congenital syndromes including cleft palate. The resident treats the patient under the guidance of a faculty team that may include maxillo-facial surgery, prosthodontics, periodontics, psychology, speech pathology, and orthodontics.

Academic Career: Graduate

Grade Component: Grad Letter Grade

ODO 2041 - BIOMECHANICAL ORTHODONTICS 1

Minimum Credits: 0.5

Maximum Credits: 0.5

This course is an introduction to solid mechanics and materials science and emphasis is placed towards the application to orthodontic structure. Also special emphasis is placed upon the application of mechanics principles to the analysis, materials selection, and design of orthodontic elements and orthodontic appliances.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ODO 2042 - BIOMECHANICAL ORTHODONTICS 2

Minimum Credits: 0.5

Maximum Credits: 0.5

This course is a continuation of the study of orthodontic appliance systems, to include fixed, removable and complex appliances. Special emphasis is placed upon the design of orthodontic appliances to meet unique patient treatment needs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ODO 2043 - BIOMECHANICAL ORTHODONTICS 3

Minimum Credits: 0.5

Maximum Credits: 0.5

The Biomechanical Orthodontics 3 course is designed to provide the graduate orthodontic resident with advanced instruction in the biomechanical aspects of the modern edgewise orthodontic appliance. Students will follow the course of instruction historically utilized at the Tweed Foundation's Advanced Edgewise Course. The biomechanics of the Tweed orthodontic philosophy will be studied and applied to the modern edgewise orthodontic appliance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ODO 2051 - ORTHODONTIC LAB TECHNIQUES 1

Minimum Credits: 5

Maximum Credits: 5

The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad HSU Basis

ODO 2057 - ORTHODONTIC DIAGNOSIS AND TREATMENT PLANNING 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the first year student in orthodontics with a fundamental understanding of the concepts of orthodontic diagnosis and treatment planning. In the first term students will acquire knowledge pertaining to orthodontic diagnostic records, the etiology of malocclusion and various treatment modalities common to the practice of orthodontics.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

ODO 2058 - ORTHO DIAG & TREATMENT PLAN 2

Minimum Credits: 1

Maximum Credits: 1

The second term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first term to selected orthodontic cases. The application of independent thought in case analysis will be stressed.

Academic Career: GRAD

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

ODO 2059 - ORTHODONTIC DIAGNOSIS AND TREATMENT PLANNING 3

Minimum Credits: 1

Maximum Credits: 1

The third term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first two sections of the course. Students will have additional opportunities to apply diagnostic and treatment planning skills previously acquired to additional orthodontic cases. The application of independent thought in case analysis is stressed.

ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB

Minimum Credits: 1
Maximum Credits: 1

In this course, students will be introduced to the practical knowledge and skills associated with recognizing malocclusions in the mixed dentition, warranting interceptive orthodontic treatment involving space maintenance. Students will become familiar with simple clinical procedures which can be employed for children in the mixed dentition who would benefit from simple space maintenance procedures. Students will also review tracing and landmark identification of a lateral cephalometric radiograph and learn how to perform the following analyses: Steiner, Sassouni, Tweed and Wits appraisal. This course includes laboratory sessions.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

ODO 5319 - CLINICAL ORTHODONTICS

Minimum Credits: 2
Maximum Credits: 2

This course is designed to provide clinical experience in the area of orthodontic dentistry for predoctoral dental students. By the end of this course, students will be able to demonstrate competence in orthodontic dentistry for dental patients at the level of a general dentist. Students will complete a week long hands on clinical orthodontics experience that leads to an understanding of the overall clinical procedures which are undertaken during treatment of malocclusions. Orthodontic treatment of patients in mixed and adolescent dentitions will be addressed, including space management procedures.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

ODO 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3

This course is available for the design of special projects of reading and/or research on topics related to orthodontics.

Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

ODO 5911 - ADVANCED ORTHODONTICS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

ODO 5941 - ADVANCED CARDIAC LIFE SUPPORT

Minimum Credits: 1
Maximum Credits: 1
The content presented in this course is a standardized curriculum developed by the American heart association for the purpose of managing acute cardiac events prior to the initiation of more definitive care. The objectives of this course are to provide the student with the knowledge and skills necessary to become certified in advanced cardiac life support.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

ODO 5942 - CRANIOFACIAL ANOMALIES

Minimum Credits: 1
Maximum Credits: 1
This course presents a comprehensive introduction to the diagnosis and treatment planning principles of an interdisciplinary team approach to cleft lip and palate and craniofacial anomalies. The objectives of this course are to provide a sound basis for the clinical examination, diagnosis and interactive team management of patients principally with the severe dental presentations associated with the various craniofacial anomalies.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

Orthopedic Surgery

OSURG 5320 - PEDIATRIC ORTHOPAEDICS

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student concentrated exposure to all aspects of pediatric orthopaedics with a primary object of gaining an appreciation of the physical examination of musculoskeletal disorders in children. Students will be assigned to one of several specific orthopaedic teams and will be integrated to the service and have close contact with orthopaedic residents. Assignment choices will include concentrations in sports medicine, spina bifida/cerebral palsy and adult spinal disorders and there will also be significant exposure to general pediatric orthopaedics and fracture care. Students will be on the call schedule once a week with the pediatric orthopaedic resident. The student may choose to have operating room exposure.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

OSURG 5325 - SPORTS MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This four-week elective offers exposure to general sports medicine. Students will be assigned to one of several specific orthopedic teams, which may include concentration in shoulder and elbow disorders or knee disorders. The student will observe orthopedic evaluations in the office as well as become involved in the medical coverage of sporting events depending on the season. While not required, the student may observe surgery if desired. The course objectives are: to understand the mechanism and pathophysiology of sports-related injuries; to become knowledgeable in orthopedic sports medicine physical examination; and to evaluate and monitor rehabilitation following sports-related injuries.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5330 - ORTHOPAEDIC TRAUMA

Minimum Credits: 0

Maximum Credits: 0

This is an intensive 4-week exposure to orthopaedic trauma during which the student will be assigned to the orthopaedic trauma team. Students will take call in the hospital once per week. Students will participate in the real-time evaluation of acutely-injured patients in the emergency department; the initial evaluation to include interpretation of radiographic studies, as well as the pre- and postoperative management of acutely-injured patients with orthopaedic injuries. Course objectives include: appreciate the implications of multiple trauma; understand the role of orthopaedic injuries in the management of the multiply-injured patient; understand the trauma care system of a major tertiary medical care system; and become comfortable with the basic skills required to evaluate a multiply-injured patient with orthopaedic injuries.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5335 - ORTHOPAEDIC FOOT AND ANKLE

Minimum Credits: 0

Maximum Credits: 0

This elective is a four week exposure to foot and ankle orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe foot and ankle evaluations in an office setting and will have the opportunity to observe surgery. Course objects include: appreciate the clinical and radiographic assessment of the foot and ankle; gain an appreciation and understanding of the evaluation and treatment of foot and ankle injuries; and become knowledgeable in the examination of the foot and ankle.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5340 - ORTHOPAEDIC HAND SERVICE

Minimum Credits: 0

Maximum Credits: 0

This elective is a four week exposure to hand orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe hand evaluations in an office setting and have the opportunity to observe surgery. Objectives include: appreciate the clinical assessment of the hand and upper extremity; gain an appreciation and understanding of the evaluation and treatment of hand and upper extremity conditions and procedures; and become knowledgeable in the examination of the hand and upper extremity.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5389 - CLINICAL CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

This elective will offer the student early in his/her clinical experience an opportunity to learn more about diseases of the musculoskeletal system,

their diagnosis and their treatment. The student will be assigned to a clinical service and will participate in both in-patient and ambulatory care. Teaching by preceptorship and demonstration will recognize the student's limited clinical experience.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5392 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

A student may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should plan the rotation well-in advance with both the preceptor and the department's student coordinator. Time periods for this elective are in four week blocks of time.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OSURG 5410 - OSURG ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

The goal of the four week elective is to meet the needs of a student whose career plans include specialization in orthopaedic surgery. This elective is designed to integrate the student into one of the specialty services at the university hospitals. The student should be highly motivated and will function as an integral part of the house staff team.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5420 - CLINICAL PRECEPTORSHIP

Minimum Credits: 0

Maximum Credits: 0

This rotation is designed for students who are interested in learning about the musculoskeletal system, its disease processes and treatment. The student will be integrated into one of the clinical services at the university hospitals will be involved in the outpatient care of the patients in the emergency room and the orthopaedic ambulatory care clinic. The elective is four weeks in duration.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5451 - OPERATIVE SPORTS MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will integrate the students into the sports medicine orthopaedic services in both an inpatient and an outpatient setting. The course objectives are: to improve the student's musculoskeletal system exam skills; to assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; to develop an appreciation of the roles of surgeons, primary care physicians, athletic trainers, and physical therapists in the sports medicine team approach to the care of athletes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5455 - PRIMARY CARE/SPORTS MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is for the student who is interested in learning more about sports medicine, the musculoskeletal system, its exam and their treatment. Students will be exposed to a variety of sports/musculoskeletal injuries in a multi-provider outpatient sports medicine team approach. Objectives are: improve the student's musculoskeletal system exam skills; assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; develop an appreciation in the sports medicine team approach to the care of athletes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of orthopaedic surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's advisory dean. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5881 - ORTHOPAEDIC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students interested in orthopaedic research may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should contact the coordinator and plan the rotation months in advance. Time periods for this elective are in four week blocks.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OSURG 5899 - INDEPENDENT STUDY ORTHOPAEDIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OSURG 5900 - EXTRAMURAL ORTHOPAEDIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in orthopaedic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine.

Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before

the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Otolaryngology

OTO 5390 - OTOLARYNGOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this elective may join ongoing basic research projects in the laboratory. The student will be given an opportunity to learn research techniques.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

OTO 5420 - HEAD AND NECK SURGERY

Minimum Credits: 0

Maximum Credits: 0

This four-week course concentrates on the management of patients with tumors of the head and neck. Special emphasis is on oncologic surgery, but the elective includes reconstructive surgery of the head and neck, major inflammatory diseases, and management of the airway and swallowing disorders. There will be general ear, nose, and throat experience as well. The objectives are to record and interpret a complete medical history, perform and evaluate an examination of the head and neck and to develop an appropriate management plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OTO 5425 - COMBINED OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective combines two weeks each of the head and neck and pediatric otolaryngology rotations. The course will constitute an intensive rotation as a member of the surgical teams. The focus is on management of patients with tumors of the head and neck and children with a variety of diseases of the ear, nose and upper digestive tract. Each week the student will spend two days in the patient office and three days in the operating room, functioning as an integral member of the teams. Teaching rounds will be conducted twice daily by the house staff and attending staff.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OTO 5430 - OTOLARYNGOLOGY PRIVATE PRACTICE

Minimum Credits: 0

Maximum Credits: 0

In this four-week course the student will work as a colleague in a private practice office two days a week seeing patients and working as an assistant in the operating room three days a week. The preceptor is involved in the practice of general ear, nose, and throat to offer experience in recognizing and managing common ENT complaints such as headaches, dizziness, neck mass, trouble swallowing, etc. The objectives are to record a complete medical history, record and evaluate a complete examination of the head and neck and to develop a plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OTO 5450 - PEDIATRIC OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective course is designed for the student desiring a career in primary medicine, pediatrics or otolaryngology. The student will attend the pediatric otolaryngology outpatient department, surgery and work rounds with staff and residents. In addition, all department activities, including participation in ongoing research, will be available to the students. The objectives of the course are to record and to interpret a pediatric otolaryngology history, to perform a complete pediatric head and neck exam and to formulate a management plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OTO 5460 - NEUROTOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course deals with patients with disorders of the hearing and balance systems. Special emphasis is on evaluation, physical examination and special testing -vestibular and audiological -of patients who present with complaints related to hearing, balance, facial dysfunction and medical and surgical management. In addition, the student will have the opportunity to participate in otologic surgery. The objectives are to learn techniques used in evaluation of hearing and balance disorders, to interpret a medical history and to outline a plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

OTO 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of otolaryngology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator

Grade Component: H/HS/S/LS/U

Pathology

MSPTH 5381 - INDIVIDUAL STUDY

Minimum Credits: 0

Maximum Credits: 0

Opportunities are available for third year students to do a variety of electives in the department of pathology. These electives include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, pathology practice, clinical chemistry, and tumor immunology. Independent study is also available in other areas pending consultation with individual faculty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

MSPTH 5382 - PATHOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are available for third year students within the department of pathology. Research areas include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, clinical chemistry, and tumor immunology. Research opportunities are also available in other areas pending consultation with individual faculty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

MSPTH 5420 - ANATOMIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

During this four or eight week elective, the student will have the opportunity to study and review normal and pathologic anatomy as provided by surgical and autopsy materials. Under the direction of the staff, the student will process surgical specimens and perform autopsies. The findings will be correlated with the clinical data to provide insight into disease processes and their progression, may participate in ongoing investigations being conducted by the staff.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSPTH 5421 - BASIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This fourth year level elective will conduct a systematic, hands-on review, covering many organ systems, of gross and microscopic pathology. Cpc cases will be studied representing a wide variety of medical, surgical, pediatric and ob/gyn problems. Gross and microscopic specimens will be used. Various pathology facilities will be visited and students will be invited to attend regularly scheduled conferences in anatomic and clinical pathology.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5422 - PRACTICAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

Remote online course working with Death Certificates, frozen sections, lab medicine 2-3 hpw plus independent work. Will count as an ILS

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: Exchange MED SU5

MSPTH 5425 - INTRODUCTION TO AUTOPSY PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

The autopsy remains an enigma in the medical community. Myths and misconceptions continue to be pervasive. This course will introduce the student to the field of autopsy pathology, teaching them to communicate the benefits and expectations of the autopsy to their clinical colleagues and patient's families. Each student will participate in the UPMC hospital autopsy service, working with pathology residents, attending physicians and pathology assistants as we attempt to answer difficult medical questions, correlate clinical and pathological findings, and present this information to the clinical services. Activities include review of hospital charts and case discussions with clinical services prior to the autopsy; observing autopsy gross dissections; review of histologic slides to make pathologic diagnoses; interpretation of clinical laboratory tests as they relate to the autopsy; and completion of autopsy reports and death certificates. There will also be opportunities for participation in clinical conferences and active presentation at pathology meetings. Objective are to: 1. To learn the policies and procedures for UPMC hospital autopsies. 2. To learn the various myths and misconceptions about autopsies. 3. To learn how to communicate autopsy findings to clinical services and patient's families. 4. To understand how pathologists use clinical information, autopsy gross and microscopic examinations, and clinical testing to conclude a patient's cause of death.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5427 - INTEGRATED ENDOCRINE ELECTIVE THE NODULAR THYROID

Minimum Credits: 0

Maximum Credits: 0

This elective is intended for MSIII and IV level medical students. The student will follow patients through three phases of predominantly outpatient thyroid nodule management including preoperative assessment, operative procedures and postoperative follow-up. Cooperation of the departments of surgery, radiology, endocrine medicine and pathology will be required. The student will maintain a patient log (learning log) and at the conclusion of the rotation will give a 10-15 minute focused presentation on a relevant topic of the student's choice. The student will gain an in depth understanding of the multi-disciplinary approach to thyroid disease. Preoperative phase will include: thyroid interdisciplinary conference; non-gynecologic cytology sign out; molecular anatomic pathology; endocrine clinic; surgery clinic, clinical chemistry; immunopathology; radiologic us guided FNA biopsies; and medical management of non-surgical thyroid disease. Goals of the preoperative phase include: clinical assessment of patients with thyroid

nodules and correlation with radiologic, pathologic and molecular data; understanding of thyroid related laboratory values; and applications and limitations of fna of the thyroid. Operative phase will include intraoperative involvement in thyroidectomies; understanding of indications; and complications and postoperative care. Goals of the operative phase include: understanding of the indications and complications of thyroidectomy; lymph node dissection; follow through of thyroid surgical specimens; gross evaluation; microscopic features of specific thyroid processes; and staging of carcinomas. Postoperative phase will include: surgery clinic; discussion with patients regarding thyroid disease; follow-up of surgical pathology cases; and presentation of a relevant topic. Goals for the postoperative phase include: completion of clinical-radiologic-pathologic-molecular correlation of data as applied to diseases of the thyroid.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5430 - CLINICAL IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week elective is designed to provide a broad exposure to both clinical and laboratory immunology. The student will become familiar with the diagnostic evaluations and clinical management of a variety of patients with immunodeficiency diseases or autoimmune disorders. Daily teaching sessions will be held covering patient and laboratory aspects of immunology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5441 - SURGICAL AND PERINATAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

The course meets student current or future career objectives in general surgical, gynecological, obstetrical and perinatal pathology. It includes participation in department activity as patient diagnostic workup, teaching conferences, research project with emphasis on clinico-pathological correlation studies, immunohistochemical, DNA analysis and cytogenetic studies of gynecological tumors, breast tumors, trophoblastic disease, pregnancy loss, placental pathology, perinatal pathology and sexually transmitted disease.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5442 - CLINICOPATHOLOGIC APPROACH TO INTERSTITIAL LUNG DISEASE

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to give students a stronger foundation in interstitial lung disease for internship and residency training. It emphasizes three core concepts: (1) the sine qua non of an interdisciplinary approach to lung disease (during this elective involving physicians from at least four different specialties), (2) the indications, benefits and limitations of laboratory testing including blood tests and histologic examination in the setting of lung disease, and (3) the importance of confirming or excluding interstitial lung disease as the cause of shortness of breath, since some interstitial lung diseases are readily curable with intervention while others are potentially devastating. The lungs possess two noteworthy properties. First, their large surface area forms the most extensive interface between the human organism and the environment. However, this interface with is the one most difficult to protect and often even voluntarily exposed to noxious stimuli. Secondly, the lungs are the only organs that encounter the entire cardiac output of blood, and are theoretically exposed to hematogenous factors of all other tissues in the body. It is therefore not surprising that the lungs are often involved in systemic diseases. Despite its anatomic complexity, histologically the lung only exhibits a rather limited repertoire of reaction patterns to injury. The three most important ones are airspace organization, inflammatory infiltrates and fibrosis. Each one has characteristic radiographic and physical examination correlates. Although most clinical entities of lung disease have well described histopathologic findings, many of these entities show significant histopathologic overlap. It is therefore of high importance to integrate the findings and impressions of primary caregivers, radiologists and pathologists in order to arrive at the correct diagnosis and formulate the most appropriate treatment plan. This constitutes the rationale and strength of this elective. While many medical school rotations emphasize and encourage interdisciplinarity, the primary responsibilities of the student usually lies within a single specialty. This elective, although initiated by pathologists, is meant to be a true multidisciplinary and in-depth experience. Students will be held accountable by faculty from all participating specialties. The focus shall be the need

for diagnosis and treatment of a patient with lung disease utilizing pathology, radiology and medicine as tools, rather than teaching pathology, radiology or medicine utilizing patients as ways and means.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5450 - PEDIATRIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week course is to introduce the student to a range of procedures used in diagnostic anatomic pathology as well as in research. This includes anatomic, histologic and histochemical techniques. The student would be expected to take full part in the diagnostic work and daily departmental teaching conferences. Each student will be given a defined research or clinically-oriented problem to be completed by the end of the elective.

MSPTH 5471 - HEMATOPATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

An introduction to diagnostic hematopathology introducing a state-of-the-art approach to diagnosing disorders of the hematopoietic/lymphoid system, evaluation of proliferations, in-depth exposure to selected disorders, evaluation of peripheral smears and biopsies, a variety of hematologic laboratory tests, and the utility of bone marrow and lymph node examinations.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5480 - PATHOLOGY PRACTICE

Minimum Credits: 0

Maximum Credits: 0

In this four-week clerkship, the student will become familiar with the activities of both clinical and anatomical pathology. The former will encompass brief tours of duty in the hematology, microbiology and clinical chemistry sections of the laboratory. The student assigned to anatomical pathology will visualize the activities of surgical pathology including frozen section diagnosis. Students will also attend autopsies when performed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5485 - LABORATORY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is designed to provide a broad exposure to the clinical laboratories. The student is exposed to chemistry, hematology, microbiology, immunology, histocompatibility, transfusion medicine, coagulation, point-of care testing, information systems, laboratory administration and quality assurance. The student learns testing basics, result interpretation, clinical correlation and principles of transfusion medicine. The student also has an opportunity to undertake a small research project. Attendance at all teaching sessions is expected.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5487 - MUSCULOSKELETAL ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This medical school elective is intended for MS3 and MS4 levels. The goal of the experience is increased awareness of multidisciplinary modalities in the diagnosis of musculoskeletal disease, particularly oncologic processes. The student will rotate through the three main components of the course each week: outpatient orthopedics, musculoskeletal radiology and bone/soft tissue pathology. The student will evaluate patients in outpatient orthopedic clinics with Drs. Goodman, McGough and Weiss. Opportunities to scrub in and participate in operative procedures will be incorporated. Review of pertinent radiographic imaging will occur both in clinic and in the UPMC Shadyside radiology department with subspecialty musculoskeletal radiologists. The student will participate in evaluation of musculoskeletal imaging and observe procedures performed by interventional radiologists in order to obtain diagnostic tissue for cytologic and/or histologic examination. The student will also attend surgical pathology sign-out in the upmc department of pathology bone and soft tissue center of excellence. During these exposures to orthopedics, radiology and pathology, the student will maintain a log of patients seen, imaging reviewed and pathology case material reviewed with differential diagnoses and plans for further workup as necessary. Patient follow-up correlation with radiologic and pathologic data and cost effective diagnostic strategies will be emphasized. Experiences in the frozen section laboratory and in the fluorescence in situ hybridization (FISH) laboratory are included. Weekly orthopedic conference is also an important component allowing for complete clinical, radiologic and pathologic correlation. At the conclusion of the rotation, the student will give a 15 minute oral presentation on a relevant topic. The purpose of this course is to outline the diagnostic evaluation of musculoskeletal diseases encountered with attention to cost effective strategies, demonstrate understanding of history and physical examination findings and integrate radiographic and pathologic data where appropriate and demonstrate understanding of the pathologic basis of the disease process and how the pathologic information impacts treatment.

Minimum Credits: 0

Maximum Credits: 0

The immunology program in the division is oriented toward basic and clinical immunology genetics. These problems focus on the structure and function of the major histocompatibility complex and the genetic and immunological interactions that occur between the mother and the fetus. The student will learn some of the basic principles of transplantation immunobiology and how basic research in this area impinges on a variety of problems in clinical medicine. A minimum of 2 four-week blocks is required.

Academic Career: Medical School

Course Component: Practicum
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSPTH 5861 - BIOLOGY OF CANCER

Minimum Credits: 0

Maximum Credits: 0

This four or eight week course will stress the investigations relevant to clinical oncology. Subjects include carcinogen target cell interactions, analysis of tumor progression and regression, tumor metastasis, cell differentiation and therapeutic responses. Students will be exposed to various experimental techniques such as electron microscopy, tissue and cell cultures, animal models and selected biochemical studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5862 - BIOCHEMISTRY PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week elective is to provide students with an experience studying the biochemical basis for both clinical and experimental disease. Students will have a brief rotation through selective areas of the clinical biochemistry laboratory and will then be assigned to work with a staff pathologist, providing review of laboratory data and consultation on unusual clinical problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5863 - TUMOR IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide exposure to basic and clinical aspects of tumor immunology. Students may elect to spend up to four weeks on this rotation. During this elective the student will have the opportunity to investigate various aspects of tumor immunology as it relates to pathophysiology of tumor invasion and metastasis. The student may also have the opportunity of rotating through clinical labs.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5865 - HEAD, NECK AND ORAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

The student participates in slide sign-out in the morning and afternoon with the attending pathologists. The slide readings offer a focused review of head, neck and oral histology and histopathology as well as integrate the related case histories. The student also takes part in frozen section call for the operating room with the head and neck pathologist to learn evaluation of gross specimens and appropriate margins of resection. A portion of the rotation will also include participation in clinical consultations in the hospital or outpatient clinics, where experience will be gained in assessment and diagnosis of head and neck pathology. The student also plans a review of slides from the pathology case files to ensure a comprehensive review of head, neck and oral histopathology is obtained. The student attends relevant pathology conferences and ENT tumor board as time and schedule permit. The student will also construct an oral presentation on a pertinent head and neck pathology topic agreed upon between the attending and student.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

MSPTH 5869 - INDEPENDENT STUDY IN PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

Opportunity for flexible independent study in anatomic, clinical or investigative pathology for a maximum of 3 months. Must be arranged and approved in advance.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

MSPTH 5900 - EXTRAMURAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in pathology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Pediatric Dentistry

PEDENT 2010 - GRADUATE PEDIATRIC DENTAL CLINIC 1

Minimum Credits: 1

Maximum Credits: 1

This clinic will provide training and experience in principles of preventive dentistry, cavity preparations and restorative procedures, interceptive orthodontic appliance fabrication, and treatment of the handicapped patient for newly enrolled advanced pediatric dentistry specialty residents.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2020 - GRADUATE PEDIATRIC DENTAL CLINIC 2

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2030 - GRADUATE PEDIATRIC DENTAL CLINIC 3

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients, patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2040 - GRADUATE PEDIATRIC DENTAL CLINIC 4

Minimum Credits: 1

Maximum Credits: 1

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2050 - GRADUATE PEDIATRIC DENTAL CLINIC 5

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate, and orofacial abnormalities, patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2060 - GRADUATE PEDIATRIC DENTAL CLINIC 6

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2070 - GRADUATE PEDIATRIC DENTAL CLINIC 7

Minimum Credits: 1

Maximum Credits: 1

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2110 - GRADUATE PEDIATRIC DENTAL SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to the specialty of pediatric dentistry. Material on preventive principles, restorative techniques, and dental materials will be provided. Seminars on physical and mental handicapping conditions will be given.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDENT 2120 - GRADUATE PEDIATRIC DENTAL SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to advanced pediatric dentistry. Various topics on pediatric dentistry are included for discussion. Diagnosis,

case presentation and case review will be included in this seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDENT 2130 - GRADUATE PEDIATRIC DENTAL SEMINAR 3

Minimum Credits: 1

Maximum Credits: 3

This course will provide material to the first year advanced pediatric dentistry specialty resident on pulp biology. Topics on pulp morphology, response and treatment are discussed. Diagnosis, case presentation and case review will be included in this course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

PEDENT 2140 - GRADUATE PEDIATRIC DENTAL SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

This course will provide material to the first year advanced pediatric dentistry specialty resident on the diagnosis and treatment of traumatic injuries. The use of pharmacotherapeutic agents in the management of the pediatric dental patient will also be discussed in this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDENT 2150 - GRADUATE PEDIATRIC DENTAL SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

This course will provide the second year advanced pediatric dentistry specialty resident material on the dental treatment of patients with cleft lip, cleft palate and/or other craniofacial abnormalities. Topics on genetics, epidemiology, pathogenesis, growth and development, speech, and syndromes will be included in this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDENT 2160 - GRADUATE PEDIATRIC DENTAL SEMINAR 6

Minimum Credits: 1

Maximum Credits: 3

This course will provide material to second year advanced pediatric dentistry specialty residents on the maintenance of the dental arch through the use of space maintaining appliances. Additional topics on systemic diseases, fluorides and general anesthesia are discussed.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

PEDENT 2170 - GRADUATE PEDIATRIC DENTAL SEMINAR 7

Minimum Credits: 1

Maximum Credits: 1

This course will provide material to the third year advanced pediatric dentistry specialty resident on pediatric dental practice management. Office design, practice finance and payment options are discussed in this course. Computer utilization and practice alternatives are also presented.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDEENT 2230 - SPECIAL WORK

Minimum Credits: 1

Maximum Credits: 3

This course will provide the opportunity for the advanced specialty resident to pursue the independent study of a topic of interest in pediatric dentistry.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PEDEENT 5211 - PEDIATRIC DENTISTRY 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented with material specific to the specialty of pediatric dentistry. The goal of the course is to introduce the second year predoctoral student to foundational knowledge in pediatric dentistry and provide information on various topics concerning the pediatric dental patient, including: morphology and eruption of teeth; oral habits; evaluation of the developing occlusion; clinical management of arch length; physical growth and development; prenatal and infant oral health; caries disease prevention and management; adolescent oral health care dentistry; behavior guidance and modification; and advanced behavior management. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PEDEENT 5242 - PEDIATRIC DENTISTRY 2 LAB

Minimum Credits: 2

Maximum Credits: 2

A preclinical course introducing the second year dental student to current concepts of clinical pediatric dentistry including restorative and space maintenance treatment modalities. A second goal of the course is to present skills and techniques to develop motor coordination in anticipation of clinical care for the pediatric dental patient.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PEDEENT 5253 - PEDIATRIC DENTISTRY 2

Minimum Credits: 1

Maximum Credits: 1

A lecture course presenting concepts of pulpal therapy, information regarding child abuse and neglect, and restorations for the pediatric dental patient.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PEDEENT 5315 - PEDIATRIC DENTISTRY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented material specific to the specialty of pediatric dentistry. The goal of the course is to enhance the foundational knowledge from the two previous didactic courses in pediatric dentistry (PEDEENT 5211 and 5253) and to provide information on various topics concerning the pediatric dental patient including trauma to primary and permanent dentitions; oral medicine and oral-facial pathology; patients with special health care needs; and interdisciplinary case management, the theme of the third year curriculum. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF with +/- Values

PEDENT 5379 - CLINICAL PEDIATRIC DENTISTRY 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of pediatric dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to pediatric dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the pediatric patient.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PEDENT 5447 - CLINICAL PEDIATRIC DENTISTRY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2

Minimum Credits: 2

Maximum Credits: 2

This course will focus on preventive and restorative procedures for the pediatric dental patient. Clinical experiences in the diagnosis and treatment planning of children and adolescents will be provided.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PEDENT 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 1

This course will provide the opportunity for the first professional dental student to pursue the independent study of a topic of interest in pediatric dentistry.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

PEDENT 5915 - ADVANCED PEDIATRIC DENTISTRY

Minimum Credits: 1

Maximum Credits: 1

The advanced pediatric dentistry elective is a clinical rotation in the graduate pediatric clinic where the student has the opportunity of treating advanced pediatric restorative and management cases. Treatment of children requiring advanced management techniques including, but not limited to, premedication, N₂O/O₂, and general anesthesia will be provided by the dental students under the direct supervision of attending faculty. Advanced treatment planning and restorative procedures will also be undertaken.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

Pediatrics

PEDS 5345 - PEDS CLERKSHIP REPEAT COURSE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a student's makeup of an unsatisfactory clerkship is required. This course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

PEDS 5351 - PEDIATRIC INPATIENT MEDICINE

Minimum Credits: 0

Maximum Credits: 0

A 4 week inpatient pediatric clerkship in which students will participate in all aspects of patient care and management. Expectations are to read both the current literature and the standard pediatric textbooks in order to understand childhood growth and development and important pediatric disease processes. Attendance at conferences, lectures and rounds is expected. Students are part of the floor medical team and take call every 4 days. Each student will present a clinicopathologic conference (CPC). At the end of the rotation a 3 hour multiple choice exam is given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

PEDS 5352 - PEDIATRIC CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

This 8-week clerkship exposes students to ambulatory and inpatient pediatrics. The 4-week inpatient experience is comprised of 3-weeks with an inpatient team and 1-week on a sub-specialty team. The 4-week ambulatory experience provides exposure to primary, acute, complex, adolescent, and newborn care and pediatric behavioral health. Students participate in all aspects of patient care and management, including performing histories and physical examinations; presenting patients in a family- and patient-centered manner; providing organized assessments and plans; and communicating in a professional manner with other members of the interprofessional staff, the clinical team, consultants, families, and patients. Students read the current literature and standard pediatric textbooks and complete on-line modules in order to understand childhood growth and development and major pediatric disease processes and therapies. In addition, students attend conferences, didactic sessions, and participate in rounding with the clinical team. Students also present an evidence-based case conference as part of their final grade

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5386 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of pediatrics will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

PEDS 5401 - ADV PEDIATRIC IN-PATIENT (AI)

Minimum Credits: 0

Maximum Credits: 0

Four week acting internship at children's hospital. Students have same responsibility as intern-total patient care including complete history, physical exam, assessment lab data, case formulation, communication with attending and referring physician, formulation of discharge plans, discharge summary. Performance of procedures including lumbar punctures, iv and intra-arterial punctures, bladder tap, bone marrow aspiration, performance

and interpretation gram stain of CSF, blood smear for red cell, white cell platelet morphology. Interpret routine films and urinalysis.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5406 - EXTRAMURAL ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will register for this course when participating in a pediatric acting internship at an institution outside of the University of Pittsburgh School of Medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5410 - PRIMARY CARE PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

The general purpose of this elective is to provide students with component experiences of a primary care physician. To this end, the student will 1) examine newborn infants in a neonatal high-risk setting, counsel parents regarding well baby issues and help formulate plans for common newborn problems; 2) develop management plans for children who present for initial neonatal visits, acute illnesses and chronic problems; 3) enhance knowledge of common pediatric behavioral and developmental issues and diagnosis and follow-up of otitis media & 4) learn how to provide telephone advice.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5421 - ALLERGY AND IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective offers an opportunity to participate in the clinical evaluation and management of ambulatory patients who present with a large variety of immunologically mediated diseases of either hypersensitivity or deficient immune response origin. Under supervision, students will carry out the initial evaluation and subsequent re-evaluation of patients with asthma, allergic rhinitis, urticaria, drug allergy, insect allergy, immunodeficiency syndromes, as well as a large variety of clinical immunology and/or collagen-vascular diseases.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5425 - PEDIATRIC RHEUMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

The students will get outpatient and inpatient exposure in the field of pediatric rheumatology with a particular emphasis on outpatient clinics. There is in-depth one-on-one teaching through the pediatric rheumatology attending physicians. Students will generally work with one particular attending physician for a clinic section, but will be exposed to different attending physicians throughout the rotation. The student will be directly involved in patient care, assessment and decision-making. Participation in academic conferences and selected lectures is mandatory.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

PEDS 5430 - PEDIATRIC CARDIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. Diagnosis and management of child with congenital and rheumatic heart disease. Interpret EKG, echocardiograms and chest roentgenograms. Observe cardiac catheterization lab, take pediatric cardiac history, attend cardiac catheterization and cardiac surgery conferences. Pursue basis of selection of patients for cardiac catheterization and cardiac surgery.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5440 - ENDCRNLGY, METBLSM & DIABETES

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. Out-patient evaluation of children with endocrine or metabolic disease. Participate in clinic and research activities, teaching rounds on endocrine ward and clinical research unit. Clinical diagnostic and management of endocrine disorders, metabolic bone disease, parathyroid and adrenal disorders, diabetes mellitus. Interpret endocrine and metabolic studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5450 - PEDIATRIC INFECTIOUS DISEASES

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital of consult experience on infectious disease of hospitalized pediatric patients including rounds, lectures, conferences and seminars. Study antibiotic therapy, diagnosis and management of CNS, pulmonary and urinary tract infections. Evaluate gram-stained smear, urine cult results and antibiotic tests.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5455 - PEDIATRIC DERMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

Medical students will be exposed to both common and rare skin disorders seen in both outpatient and inpatient settings. Objectives: 1) develop a familiarity with terminology used to describe primary and secondary skin lesions; 2) develop a familiarity with both the diagnosis and treatment of common skin disorders such as, acne and eczema, lesions, such as hemangiomas and nevi, as well as rare skin conditions such as Geno dermatoses including ichthyoses and epidermolysis bullosa; 3) develop interviewing skills with pediatric patients and their families; 4) obtain experience in performing cutaneous physical exams in pediatric patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

PEDS 5460 - NEONATOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at Magee Women's Hospital neonatal intensive care unit joining residents as acting intern. Experience in all areas of newborn care including recognition and treatment of critical infants. Perform exams, utilize basic lab procedures and x-ray, perform umbilical vessel catheterization,

arterial and venous puncture, bladder tap, endotracheal intubation. Discuss dynamics of sick, premature and dying infants.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5465 - BREASTFEEDING ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This elective will prepare future physicians, especially those pursuing careers in OB/GYN, family physicians, pediatrics and internal medicine, to support women to breastfeed. During this four week elective, students will see mother-infant dyads in the newborn follow-up clinic in primary care center, seeing patients with other providers of lactation services in the hospital and community setting and completing directed readings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5470 - GENETICS

Minimum Credits: 0

Maximum Credits: 0

Four week clinic and laboratory elective at children's hospital. Diagnostic and genetic counseling of common and rare hereditary disorders, syndromes of congenital anomalies, evaluation of in-and-out patients. Lab experience in cytotechnology techniques including interpreting karyotypes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5480 - NEPHROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. In- and outpatient rounds and consults, participation in hypertension and pathology conferences. Understanding of urinalysis; evaluation of laboratory studies and radiology of renal disease, electrolyte disorders and pediatric hypertension.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5490 - HEMATOLOGY/ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. Clinic exposure to pediatric hematology and oncology problems in outpatient chemotherapy unit and various inpatient services. Participate in hematology/oncology clinics and sickle cell clinics. Instruction in peripheral blood and marrow morphology. Participate in rounds and lectures and extensive reading.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5491 - NEONATOLOGY

Minimum Credits: 0

Maximum Credits: 0

The clinical elective in neonatology at Children's Hospital is designed to provide the student with an experience in neonatology that emphasizes the multidisciplinary care of the critically ill newborn. The CHP unit is the region's only level III NICU, and offers the highest level of neonatal care, including surgical services and ECMO. As a referral center, the CHP NICU cares for a unique population of high-acuity, medically-complex infants with a wide variety of problems, including cardiorespiratory failure, infections, surgical issues, genetic disorders and congenital anomalies. Currently, the newborn medicine program only offers an elective in the Magee Women's Hospital NICU, which cares for a very different population of infants, with an emphasis on premature infants and infants with transient problems related to the neonatal transition. The elective rotation in the CHP NICU will offer students exposure to a one-of-a-kind patient population, a full-spectrum of neonatal medicine, and a level of multidisciplinary care not available anywhere else in the region. Students will join the CHP NICU team under the direct supervision of neonatology faculty. The NICU team is made up of attending neonatologists, neonatal-perinatal medicine fellows, neonatal nurse practitioners, pediatric residents, neonatal nurses, and specialized ancillary providers, including pharmacists, nutritionists and therapists. The student will be involved in all aspects of care, including initial assessment, stabilization, diagnostic evaluation and ongoing ICU management. The student will perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis and endotracheal intubation under the supervision of NICU staff. The student will gain experience in family-centered care. Students will be supervised directly by newborn medicine faculty, with one-on-one precepting throughout the rotation. Newborn medicine fellows and neonatal nurse practitioners will be available as teaching resources. The course director is available in the NICU should the student require additional support. Educational methods will include bedside teaching focused on the student's panel of patients, daily NICU rounds, demonstration of clinical skills and procedures, and didactic sessions (the newborn medicine program's seminars in neonatal medicine, core lecture series, and newborn grand rounds). Key references will be provided. Students may attend sessions of the AAP/AHA neonatal resuscitation program (scheduled bimonthly). The course director will provide an updated schedule of educational activities on the first day of the rotation. This 4 week inpatient rotation takes place in the neonatal intensive care unit at CHP. Students will assume the care of a panel of 2-4 NICU patients, selected according to their interests

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5500 - EMERGENCY PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital in emergency department. Experience in assessment and management of acute illnesses and injuries. Technical skills such as drawing blood, starting IVs, lumbar punctures. Interpret lab studies and x-rays in acute situations. Distinguish mildly acute from serious in emergency situations. Interaction skills with acutely ill and injured child.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5510 - PEDIATRIC GASTROENTEROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital involves supervised direct patient contact and formal didactic sessions including inpatient consults, outpatient clinics and assisting in all GI procedures. Eight week research elective provides opportunity to gain skills in clinical or basic investigation of bile acid metabolism, gastroesophageal reflux or GI immunology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5520 - DEVELOPMENTAL PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

Four week elective in child development unit. Focuses on normal child development and developmental and behavioral disabilities. Includes didactic sessions, reading, field experience and team assessments in outpatient clinic setting. Develop assessments of inpatients at children's hospital and in

the ICU at Magee Women's Hospital.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5521 - TRIPLE BOARD PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at Children's Hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5524 - CHILD ADVOCACY

Minimum Credits: 0

Maximum Credits: 0

This elective will teach medical students how to recognize the signs and symptoms of children who may have been physically sexually abused and/or neglected and become familiar with the basic approach to the medical evaluation of each type of maltreatment

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5525 - CHILD ADVOCACY

Minimum Credits: 0

Maximum Credits: 0

THE PHYSICAL AND SOCIAL ASPECTS OF CHILD SEXUAL AND PHYSICAL ABUSE WILL BE EXPLORED. THE STUDENT WILL HAVE THE OPPORTUNITY TO OBSERVE AND LEARN HOW TO EXAMINE A CHILD SUSPECTED OF BEING ABUSED AND HOW TO DOCUMENT FINDINGS. OBSERVATIONS ON HOW THE CHILD AND ITS FAMILY ARE INTERVIEWED WILL OCCUR. EXPERIENCES MAY INCLUDE JUVENILE AND CRIMINAL COURTS AS WELL AS FOSTER CARE AND HOMELESS SHELTER SITUATIONS.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5530 - POISON CENTER

Minimum Credits: 0

Maximum Credits: 0

4 week elective at poison center. Basic principles of managing cases of exposure to toxic materials. Under close supervision, manage poison case via the telephone. Exposure to principals of development and operation of a poison center. Includes rounds on toxicology patients at Children's Hospital. 8 week elective includes independent research.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5540 - PEDIATRIC PULMONOLOGY

Minimum Credits: 0

Maximum Credits: 0

4 week elective at Children's Hospital. Includes history taking, physical exam, choice of diagnostic procedures, perform pulmonary lab tests, reading chest radiographs. Inpatient, outpatient and ICU patients seen. Basic review of pulmonary physiology. Observe and participate in lab testing procedures, interpret results with staff. Observe and help in research projects and clinical investigation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5550 - ADOLESCENT MEDICINE

Minimum Credits: 0

Maximum Credits: 0

4 week elective at children's hospital. Includes normal and abnormal adolescent development, reading and discussion. Learn exam skills and lab testing. Diagnosing sexually-related problems. Participate in psychosocial assessments of teens. Work in outpatient clinic and inpatient consults.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5560 - AMBULATORY PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is designed to provide a primary care pediatric experience in a community setting. The hours and specific duties will be determined by each practice. The student is responsible for contacting and setting up the elective and then obtaining approval from the medical student program director in the department of pediatrics. Supervision and evaluation is provided by the primary care physicians in the practice.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5570 - ADOLSCNT AND YOUNG ADULT MEDICN

Minimum Credits: 0

Maximum Credits: 0

This four week elective encompasses a diverse offering in adolescent and young adult medicine. Its clinical content is based at an urban teaching hospital and its college health affiliates. Daily rounds, preceptorships and conferences are part of the rotation with supervision by mercy's full-time pediatric faculty.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5580 - SCHOOL HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide a unique school health experience utilizing urban and suburban schools including school based clinics for teaching sites. This specialized experience will include experience with health education, team meetings and school consultation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of pediatrics to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5710 - IMMUNIZATION, IMMUNE DEFICIENCY, AND INFLAMMATION IN KIDS

Minimum Credits: 0

Maximum Credits: 0

In this ILS, students will learn practical and cutting-edge clinical applications of basic science immunology topics including immunization development, primary immune deficiency and immune dysregulation conditions, and pathophysiologic manifestations of inflammation as it pertains to numerous pediatric disease states. This course will highlight ways in which an in-depth understanding of the immune system and mechanisms of inflammation enhances the practice of precision medicine, especially as it pertains to genetic testing and initiation of biologic and immunomodulatory therapies. Students may have some clinical experiences (i.e. time spent in Primary Immunodeficiency Clinic at UPMC Children's Hospital and with genetic counselors), however, most of the course time will be dedicated to small case-based group sessions in which students and facilitators will discuss the clinical applications of basic immunology topics.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

PEDS 5715 - GENETICS/GENOMICS IN PRIMARY CARE

Minimum Credits: 0

Maximum Credits: 0

In this ILS, students will learn about how genetics and genomics can be used to enhance precision medicine in primary care settings like pediatrics, medicine, and family practice. Students will return to the basic sciences of genetics, molecular biology, and pharmacology, discussing how to apply cutting edge insights from those disciplines to a variety of practice settings. This course will address newborn screening, how to take an effective family history, effective communication strategies around genetic conditions, care for individuals with genetic conditions, ethical issues around genetic testing, pharmacogenomics, and the use of registries. Students may have some clinical experiences (e.g., with genetics counselors), but most of the time will be spent in the classroom discussing the science and its application. An interprofessional component will include collaboration with pharmacy and other disciplines.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

PEDS 5720 - MOLECULAR MEDICINE (ILS)

Minimum Credits: 0

Maximum Credits: 0

This course is designed to teach the fourth year medical student some basics of molecular biology and how molecular techniques are being employed to diagnose and treat disease. This course will focus on several single-gene diseases. Forensic use of DNA will also be featured. This course will have 3 lectures and 3 clinics per week and each student will be obliged to give a presentation on a topic selected.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5750 - GET READY FOR RESIDENCY BOOT CAMP

Minimum Credits: 0

Maximum Credits: 0

This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

Academic Career: Medical School

Course Component: Clinical

Grade Component: S/U Basis

PEDS 5845 - PEDIATRIC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

4 week research elective available with individual pediatric faculty members at children's hospital.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PEDS 5899 - INDEPENDENT STUDY PEDIATRIC

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PEDS 5900 - EXTRAMURAL PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in pediatrics may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Periodontics

PERIO 2110 - PERIODONTICS SPECIALTY CLINIC 7

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2111 - PERIODONTAL LITERATURE REVIEW 1

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2112 - SPECIAL TOPICS IN PERIODONTICS 1

Minimum Credits: 0

Maximum Credits: 0

This seminar will feature guest lecturers invited to present specific topics related to the practice of periodontics and periodontal therapy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2114 - MINERALIZED TISSUE BIOLOGY

Minimum Credits: 1

Maximum Credits: 1

Understanding the present efforts to elucidate mechanisms for bone healing encompasses study of numerous growth factors and signaling molecules. The role of each factor will be described and related to potential therapeutic products. At the completion of the course the student will be familiar with bone biology; given the opportunity to demonstrate capacity for critical evaluation of a paper on tissue engineering and its foundation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PERIO 2119 - PERIODONTICS SPECIALTY CLINIC 1

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2120 - PERIODONTICS SPECIALTY CLINIC 8

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2130 - PERIODONTICS SPECIALTY CLINIC 9

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2140 - PERIODONTAL TREATMENT PLANNING 1

Minimum Credits: 1
Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2141 - PERIODONTAL TREATMENT PLANNING 5

Minimum Credits: 1
Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1

Minimum Credits: 0
Maximum Credits: 0

This course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science and practice of periodontics. It will focus on correlating and comparing new information with established concepts.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2144 - PERIODONTICS ASPECTS OF DENTAL IMPLANTS

Minimum Credits: 1
Maximum Credits: 1

This course is designed to present to the graduate resident the different implants systems, selection criteria of implant cases, and guided tissue regeneration as it applies to implantology. The management of failing implants will be also discussed.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2146 - PERIODONTAL RESEARCH 1

Minimum Credits: 1
Maximum Credits: 3

The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

PERIO 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Minimum Credits: 2

Maximum Credits: 2

This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2148 - PERIODONTAL RESEARCH 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2149 - PERIODONTICS SPECIALITY CLINIC 2

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the first year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2150 - PERIODONTICS SPECIALITY CLINIC 10

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2151 - PERIODONTAL LITERATURE REVIEW 2

Minimum Credits: 2

Maximum Credits: 2

Literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2160 - PERIODONTICS SPECIALTY CLINIC 11

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2180 - PERIODONTIC LITERATURE REVIEW 7

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2181 - PERIODONTAL LITERATURE REVIEW 8

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2182 - PERIODONTICS LITERATURE REVIEW 9

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2190 - ADVANCED PERIODONTAL CONCEPTS

Minimum Credits: 2

Maximum Credits: 2

This advanced periodontal concepts course is designed to familiarize the graduate student with advanced concepts in the science and art of clinical periodontics through intensive study of textbooks and by means of clinical demonstrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 2199 - INTRODUCTION TO PERIODONTICS SPECIALTY CLINIC

Minimum Credits: 3

Maximum Credits: 3

This course allows the resident to select a special project.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

PERIO 2210 - SPECIAL TOPICS IN PERIODONTICS 4

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2211 - PERIODONTAL LITERATURE REVIEW 3

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2212 - SPECIAL TOPICS IN PERIODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

This seminar will continue the guest lecture series related to specific topics in periodontics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2213 - HOSPITAL PERIODONTICS - 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA Residents in the periodontal care of VA patients.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2216 - PERIODONTAL RESEARCH 3

Minimum Credits: 1

Maximum Credits: 3

The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

PERIO 2219 - PERIODONTICS SPECIALTY CLINIC 12

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2223 - PERIODONTICS JOURNAL CLUB - 3

Minimum Credits: 1

Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2230 - SPECIAL TOPICS IN PERIODONTICS 3

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2240 - PERIODONTAL TREATMENT PLANNING 2

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2241 - HOSPITAL PERIODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA residents in the periodontal care of VA patients.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2242 - PERIODONTICS JOURNAL CLUB 2

Minimum Credits: 1

Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2244 - PERIODONTAL LITERATURE REVIEW 4

Minimum Credits: 2

Maximum Credits: 2

A literature review seminar designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2246 - PERIODONTAL RESEARCH 4

Minimum Credits: 1
Maximum Credits: 1

Continuation of ongoing research to finalize protocols and initiate pilot studies.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2247 - PERIODONTAL TREATMENT PLANNING 3

Minimum Credits: 1
Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2249 - PERIODONTICS SPECIALTY CLINIC 4

Minimum Credits: 1
Maximum Credits: 1

This course is the clinical practice of periodontics for second year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planning and periodontal surgery.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 2250 - SPECIAL TOPICS IN PERIODONTICS 5

Minimum Credits: 1
Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2251 - CONCEPTS OF MODERN SEDATION

Minimum Credits: 1
Maximum Credits: 1

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2252 - INTRAOPERATIVE MANAGEMENT OF COMORBIDITIES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2253 - PERIODONTICS TREATMENT PLANNING 4

Minimum Credits: 1
Maximum Credits: 1

This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2254 - PERIODONTICS JOURNAL CLUB 4

Minimum Credits: 1
Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2260 - SPECIAL TOPICS IN PERIODONTICS 6

Minimum Credits: 1
Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2280 - SPECIAL WORK

Minimum Credits: 1
Maximum Credits: 3

This course allows the resident to select a special project.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2289 - PERIODONTICS SPECIALTY CLINIC 3

Minimum Credits: 1
Maximum Credits: 1

Continuation of previous periodontics specialty clinic courses involving increasing complexity of case types and treatments.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 2313 - HOSPITAL PERIODONTICS 3

Minimum Credits: 1
Maximum Credits: 1

This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2314 - PERIODONTICS JOURNAL CLUB 5

Minimum Credits: 0

Maximum Credits: 0

Periodontics journal club 5 provides a continuing review of the recent dental and medical journals.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2315 - PERIODONTICS JOURNAL CLUB 6

Minimum Credits: 1

Maximum Credits: 1

Periodontics journal club 6 provides a continuing review of recent dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2316 - PERIODONTICS RESEARCH 5

Minimum Credits: 1

Maximum Credits: 1

Continuation of ongoing research to finalize and complete the data and start writing a thesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2317 - PERIODONTICS RESEARCH 6

Minimum Credits: 1

Maximum Credits: 1

Continuation of ongoing research to finalize the research project and complete writing a thesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2318 - PERIODONTICS SPECIALTY CLINIC 5

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2319 - PERIODONTICS SPECIALTY CLINIC 6

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants. The course involves increasing complexity of case types and treatments.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2320 - PERIODONTAL LITERATURE REVIEW 5

Minimum Credits: 2

Maximum Credits: 2

The periodontal literature review 5 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2321 - PERIODONTICS LITERATURE REVIEW 6

Minimum Credits: 2

Maximum Credits: 2

The literature review 6 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals. The review of the literature also includes basic science literature and its relation to treatment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2322 - PERIODONTAL TREATMENT PLANNING 6

Minimum Credits: 1

Maximum Credits: 1

This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2341 - HOSPITAL PERIODONTICS 4

Minimum Credits: 1

Maximum Credits: 1

This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 2411 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 1

Minimum Credits: 2

Maximum Credits: 2

Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2412 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 2

Minimum Credits: 2
Maximum Credits: 2

Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2413 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 3

Minimum Credits: 2
Maximum Credits: 2

Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2414 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 4

Minimum Credits: 2
Maximum Credits: 2

Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2415 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 5

Minimum Credits: 2
Maximum Credits: 2

Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate

Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5141 - PERIODONTOLOGY 1

Minimum Credits: 1

Maximum Credits: 1

The 21st century dentist will see a shifting paradigm toward a more significant and possibly dominant role of bioscience in our biochemical profession. The course continuum of periodontology i and ii will review and show application of the relevant basic science principles utilized in the field of periodontology. It will then build upon those basic principles in helping to achieve diagnostic, therapeutic, and preventive skills in the management of periodontal diseases. A major emphasis will be placed on the effect of oral health/disease on the systemic health/disease of our patients. Finally, in light of current, ongoing, and expanding research in the area of oral/systemic relationships, emphasis will be placed on the combined and cooperative roles of both the dentist and physician in providing comprehensive healthcare to our patients.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PERIO 5143 - PERIODONTOLOGY 1 LAB

Minimum Credits: 1

Maximum Credits: 1

This course is a continuation of the spring periodontology lab course. Students will have an opportunity to practice periodontal instrumentation skills with peers in a small group setting. Topics such as instrument grasp(s), operator positioning, and the proper use of scalers will be addressed. This course will prepare students for Periodontology 2 Lab, where advanced techniques including scaling and root planing procedures will be covered.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PERIO 5149 - PERIODONTAL INSTRUMENTATION 1

Minimum Credits: 0.5

Maximum Credits: 0.5

This course is intended to introduce the dental student to the instrumentation utilized in the performance of periodontal procedures via lectures and simulation clinic exercises. Topics such as instrument grasp(s), operator positioning, and an introduction to the proper use of scalers will be covered.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PERIO 5171 - PERIODONTAL INSTRUMENTATION 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to the instrumentation utilized in the performance of periodontal procedures via lectures and simulation clinic exercises. Topics such as instrument grasp(s), operator positioning, and an introduction to the proper use of scalers will be covered. This course will prepare students for Periodontal Instrumentation 2, where advanced techniques including scaling and root planing procedures will be addressed.

Academic Career: Graduate

Course Component: Practicum

Grade Component: ABCF

PERIO 5181 - PERIODONTOLOGY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will build upon concepts learned in Periodontology 1 to develop foundational knowledge associated with the clinical aspects of periodontology. We begin by exploring various diseases and conditions affecting the periodontium. Students will then begin to understand periodontal defense mechanisms and how different etiologies and risk factors lead to development of periodontal disease. Students will learn the

periodontal clinical examination parameters and how they relate to diagnosis, prognosis, treatment planning, and maintenance therapies. Emphasis is placed on both the basic and clinical science knowledge necessary in the diagnosis, treatment, and prevention of periodontal diseases relative to the student's introduction to the dental clinics. This course includes lectures, quizzes, and, exams.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PERIO 5183 - PERIODONTOLOGY 2 LAB

Minimum Credits: 1

Maximum Credits: 1

This course is a continuation of the Periodontology 1 Lab course and emphasizes instrumentation skills for periodontal assessment and treatment. This course includes small group instruction in a simulation lab.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PERIO 5210 - PERIODONTAL INSTRUMENTATION 2

Minimum Credits: 1

Maximum Credits: 1

This course is a continuation of PERIO 5149, Periodontal Instrumentation 1. In this course, students will continue to develop skills in the proper use of instrumentation for the performance of scaling and root planing procedures. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered. Ultrasonic instrumentation techniques, Naber's probe, and EHR charting will also be introduced and practiced. This course includes lecture and small group simulation clinic exercises and graded evaluations.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PERIO 5212 - PERIODONTOLOGY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will build upon concepts learned in Periodontology 1 to develop foundational knowledge associated with the clinical aspects of periodontology. We begin by exploring various diseases and conditions affecting the periodontium. Students will then begin to understand periodontal defense mechanisms and how different etiologies and risk factors lead to development of periodontal disease. Students will learn the periodontal clinical examination parameters and how they relate to diagnosis, prognosis, treatment planning, and maintenance therapies. Emphasis is placed on both the basic and clinical science knowledge necessary in the diagnosis, treatment, and prevention of periodontal diseases relative to the student's introduction to the dental clinics. This course includes lectures, quizzes, and, exams.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PERIO 5214 - PERIODONTOLOGY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will take concepts learned in Periodontology 1 and 2 and apply them to clinical cases. Etiology and diagnosis of periodontal disease will be reviewed, and students will learn how to establish prognoses, treatment plan for initial and continuing supportive periodontal therapy. This course will prepare students to treat and manage clinical periodontal cases and will include lectures, presentations, and exams.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PERIO 5241 - PERIODONTAL INSTRUMENTATION

Minimum Credits: 1

Maximum Credits: 1

In this course, students will continue to develop skills in the proper use of instrumentation for the performance of prophylaxis, and scaling and root planing procedures. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered. Ultrasonic instrumentation techniques, standard Periodontal and Naber's probes, and EHR charting will also be introduced and practiced. This course includes lecture and small group simulation clinic exercises and graded practical skill evaluations.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PERIO 5243 - PERIODONTAL CLINIC

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PERIO 5346 - PERIODONTOLOGY 4

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to the clinical, surgical, and interdisciplinary aspects of periodontal therapy along with supportive periodontal treatment.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF with +/- Values

PERIO 5379 - CLINICAL PERIODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of periodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with periodontal needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with periodontal needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PERIO 5449 - CLINICAL PERIODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning. Patient communication, patient home care instructions, subgingival scaling and root planning, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and soft tissue grafts.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PERIO 5800 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

PERIO 5847 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

PERIO 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

PERIO 5910 - ADVANCED PERIODONTICS

Minimum Credits: 3

Maximum Credits: 3

Dental students will have the opportunity to become familiar with periodontal surgical concepts and techniques through study of the periodontal literature and through participation in mentor - resident and faculty supervised periodontal flap procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

Petroleum Engineering

PETE 2004 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PROG: Swanson School of Engineering

PETE 2160 - PETROLEUM RESERVOIR ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course covers the principles of reservoir engineering and material balance calculation in petroleum reservoirs. The topics include petroleum origin and oil occurrence and migration; oil, gas, and gas-condensate reservoirs; basic drilling of oil and gas wells; p-v-t behavior of natural gas; material balances in gas reservoirs; oil reservoirs under simultaneous dissolved gas drive, gas cap drive, and water drive; generalized material balance in petroleum reservoirs; basic equations for fluid flow in reservoirs, absolute, effective, and relative permeabilities; and a design project on reservoir

calculations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2201 - RECOVERY OF OIL BY WATERFLOODING

Minimum Credits: 3

Maximum Credits: 3

Theory of immiscible fluid displacement starting with frontal advance theory and applying it to waterflooding, fluid patterns, sweep efficiency, stratified reservoirs, etc. Relative permeability experiments are simulated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2204 - ENHANCED OIL RECOVERY PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course covers different topics on enhance oil recovery processes (co₂, thermal, miscible fluids and surfactants); coal-bed methane, enhanced methane recovery, and underground coal gasification; surface and in-situ heavy oil, tar sand and oil shale production; and co₂ capture, sequestration and disposal. The fundamentals, thermodynamics, reaction kinetics and transport phenomena as well as the environmental issues and regulations related to these topics are also covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2205 - PETROLEUM PRODUCTION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and chock performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING

Minimum Credits: 3

Maximum Credits: 3

The course covers different topics on natural gas, petroleum and petrochemical processing. The topics include natural gas cleanup, methane reforming for h₂ production, partial oxidation of ch₄ for synthesis gas production, and chemicals from methanol; refinery feedstocks, crude distillation and refinery products, alkylation, hydrotreating, catalytic reforming and isomerization, catalytic cracking, resid, tar sands and oil shale processing; and methanol/other alcohols, ethylene, fertilizer, and plastic production plants.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course covers different topics related to drilling operations; directional drilling techniques; completion operations; and work-over operations. The drilling operations encompass drilling rig components, bit selection program, drilling fluid types, cementing program design and well control/safety. The directional drilling techniques include: well-path design/applications, downhole motor components, directional surveys, and logging while drilling. The well completion operations contain: formation evaluation tools, open-hole log interpretation, coring tools, flow testing, perforating, hydraulic fracturing and other stimulation techniques. The work-over operations comprise work-over rig components, cased hole log interpretation, plugs/packers/fishing tools, squeeze job design, casing integrity tests and stimulation evaluation. A special project on casing design is also included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Course description: this class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PETE 2211 - RESERVOIR SIMULATION

Minimum Credits: 3

Maximum Credits: 3

This course introduces the students to the simulation process of fluid flow in petroleum reservoirs. Governing equations required to describe fluid flow in porous media are derived, numerical techniques for solving the equations are introduced. Students will learn how reservoir flow simulators can be used in assessment studies of hydrocarbon reservoirs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

PETE 2212 - CO2 FOR ENHANCED OIL RECOVERY AND FRACKING

Minimum Credits: 3

Maximum Credits: 3

This course will cover the physical properties of CO₂ that make it an attractive solvent for enhanced oil recovery (EOR), the natural and anthropogenic sources of CO₂, the types of fields that are suitable for CO₂ EOR, and the mechanisms responsible for CO₂ increasing oil recovery. The current status of CO₂ EOR in the United States will also be reviewed, along with its potential for future expansion. The foremost technical challenges of CO₂ EOR, namely mobility control and conformance control, will be discussed along with a current research efforts. The course will conclude with a brief review of how CO₂ has been used as a hydraulic fracturing, whether as a pure fluid, as the gaseous component of foams, or as an energizing component.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

PETE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1

Maximum Credits: 1

This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad SN Basis

PETE 2910 - SPECIAL PROJECTS

Minimum Credits: 1

Maximum Credits: 12

Individual study programs at M.S. Level.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PETE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1

Maximum Credits: 1

This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

PETE 2982 - ISSUES IN RESEARCH AND TRAINING

Minimum Credits: 2

Maximum Credits: 2

This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PETE 2999 - M.S. THESIS

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Pharmacy

PHARM 2001 - PHARMACEUTICAL ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

Current methods utilized in pharmaceutical research for the analysis and isolation of drugs and their metabolites. Theories of extraction, solvent partition and forms of chromatography (adsorption, partition, gas, liquid, counter current, ion exchange, gel-filtration and electrophoresis) are discussed.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Pharmacy students only.

PHARM 2003 - PHARMACOEPIDEMIOLOGY

Minimum Credits: 2

Maximum Credits: 2

Introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 2005 - RESEARCH DISCUSSION COURSE

Minimum Credits: 2

Maximum Credits: 2

Course is designed for students enrolled in the non-thesis MS program. The focus of the course is enhancement of the students' understanding of scientific literature and research methodologies. It will also provide an opportunity for students to learn about and discuss research careers, challenges of clinical vs. Preclinical research, research ethics, and professional development.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 2010 - MASTER OF SCIENCE THESIS

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: School of Pharmacy students only.

PHARM 2015 - COMPREHENSIVE EXAM: NON-THESIS MASTER OF SCIENCE

Minimum Credits: 1

Maximum Credits: 3

Students will be assigned several research papers to study and review independently. The research papers will serve as the base for an in-class comprehensive examination to assess the student's critical thinking skills, writing competence, and ability to synthesize and integrate knowledge acquired during the MS program.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 2510 - EXECUTIVE BOARDROOM

Minimum Credits: 1

Maximum Credits: 1

This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->PBM->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on

the potential contribution(s) of this course to the student's education and/or career goals.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3000 - TOPICS IN NEUROSCIENCE

Minimum Credits: 1

Maximum Credits: 1

The objectives of the course are to strengthen the abilities of research-directed, pre- and postdoctoral students to understand and evaluate current research and to describe that research to others in a concise and meaningful way and to broaden students' understanding of fundamental workings of the central nervous system so as to increase their understanding and appreciation for the basic science which under lies and supports current research in the therapeutic treatment of behavioral and psychiatric disorders.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3002 - ADVANCED PHARMACOKINETICS

Minimum Credits: 4

Maximum Credits: 4

This course deals with fundamental aspects of pharmacokinetic concepts from model building, data analysis and parameter estimates after various routes of drug administration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

Minimum Credits: 1

Maximum Credits: 1

Students will rotate to present recently published scientific papers from reputable journals that are typically chosen by the students with the approval of the course coordinators. This course, structured as a journal club, will introduce topics including but not limited to drug development, drug delivery, biochemical and clinical pharmacology, toxicology, and molecular medicine. The course is intended primarily for first and second year graduate students enrolled in the pharmaceutical sciences program.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Pharmacy students only.

PHARM 3010 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: School of Pharmacy students only.

PHARM 3011 - PRINCIPLES OF BIOCHEMISTRY

Minimum Credits: 1

Maximum Credits: 1

The Principles of Biochemistry course provides a basic underpinning of the biochemical and molecular biology principles that are critical to understand disease states and drug discovery, and mechanisms of action and disposition of pharmaceutical agents. The course provides basic insights into the chemical, physical, thermodynamic and genetic foundations of life. The course complements other required core courses taken: Pharmacology and Foundations of Pharmaceutical Sciences. In addition, the course provides the required background for other elective graduate courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS

Minimum Credits: 4

Maximum Credits: 4

Topics include analgesics, antibiotics, antihistamines, autonomic drugs, CNS drugs, cardiovascular drugs, digestive pharmacology, drug abuse, drug laws, hypoglycemics, principles of drug action and reproductive pharmacology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 3032 - MEDICINAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for graduate students starting the second year of a Ph.D. program in chemistry and pharmacy. It teaches the basics of medicinal chemistry and will endow the students with the necessary skills to understand medicinal chemistry scientific literature and to make meaningful proposals of the design/synthesis of drug-like compounds. Topics include energetics of drug-protein interactions, introduction to different types of target classes, introduction to structure based design, including computational chemistry, as well as optimization of hit into leads compound. The course incorporates an extensive exercising part where students are asked to propose and (virtually) perform small target oriented drug discovery projects. Students are required to verbally present twice during this course. Additionally, students are tested twice in written.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course is structured as a journal club focused on translational investigations and is being offered jointly with the universities of Minnesota, North Carolina, and Pittsburgh for 1st and 2nd year graduate students from all three programs who will participate in discussions by live video teleconferencing. Articles emphasizing methods which allow for translation from preclinical to clinical investigation will be discussed in several different therapeutic areas with emphasis on pharmacometrics, genomics, biomarker validation, and drug discovery.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide the recent developments in the field of drug delivery and regenerative therapies to graduate students. This course, structured as a journal club, will introduce different concepts in drug/gene delivery research through analyzing recent scientific literature. It will also expose students to novel regenerative therapies under development and their role in personalized medicine. If possible, we will also introduce some clinical examples where such regenerative therapies have been successfully used in patients. The course will use scientific research articles from high impact factor journals to introduce these concepts. The course is intended primarily for first/second year graduate students enrolled in the MS or Ph.D. program specifically in the pharmaceuticals track. Postdoctoral researchers may participate with prior approval from the course coordinators.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1

Minimum Credits: 2

Maximum Credits: 2

Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2

Minimum Credits: 2

Maximum Credits: 2

Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3040 - STATISTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Course is designed to teach graduate students standard and advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze simple as well as complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, homework assignments, and exams. At the end of this course, students will have skills to construct and test statistical models and will be able to

understand statistical methods used in research articles and critique the methods selected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3042 - RESEARCH PRACTICUM

Minimum Credits: 1

Maximum Credits: 12

Course provides practical training in advanced research methodology and skills. Students will be engaged in active research with a faculty member or designate as approved by the student's doctoral committee or by the graduate program director. Students enrolled in the graduate program may register to earn 1-12 units per term until they have advanced to candidacy for the Ph.D. Degree.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3043 - TEACH ME TO TEACH YOU

Minimum Credits: 1

Maximum Credits: 1

Course is designed to introduce graduate students to the art and science of teaching. Course will essentially consist of a brief presentation by faculty on different aspects and approaches to teaching followed by a 30 minutes presentation of basic concepts related to individual research carried out by graduate students.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3045 - ADVANCED STATISTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Course is designed to teach graduate students advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, in homework assignments, and in exams. At the end of the course, students will have skills to construct and test complex statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide an opportunity for the students to informally learn and discuss concepts and applications in the area of drug discovery, design and development.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 3049 - SCIENTIFIC WRITING SKILLS

Minimum Credits: 2

Maximum Credits: 2

Course is designed to provide the systematic approach of reading and writing a scientific paper to graduate students. Writing a review or a research paper in the peer reviewed journals is an integral part of the graduate curriculum. Course will introduce different components of a scientific paper, how to read and summarize a scientific paper, methodical approach towards writing a paper and managing references using endnote software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3050 - RESEARCH PREPARATION

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide an opportunity for the students to learn applications, guidelines, regulations, and procedures necessary for safe, ethical, and accountable research. Required course for all non-thesis MS students. Elective for all others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3051 - SOCIAL & BEHAVIORAL THEORIES IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course provides a comprehensive study of the major social/behavioral theories and models that are relevant to pharmaceutical outcomes and policy research (POPR). Students will critically evaluate and apply social and behavioral science theories from medical sociology, health psychology, engineering, health services research, and related fields to understand utilization of prescription and non-prescription medications, provider prescribing behavior, and patient medication-taking behavior. A focus is placed on helping students apply their knowledge of relevant theories/models to guide the investigation of pharmaceutical outcomes and policy research questions, including hypothesis generation, study design, methodology, and appropriate interpretation of results. Part 1 of the course will introduce and critically evaluate the predominant theories, models, and frameworks used in POPR. Part 2 will evaluate how these theories and models have been applied to address specific topics in POPR, drawing heavily on research studies that have been published in the peer-reviewed literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3052 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH

Minimum Credits: 1

Maximum Credits: 1

Topics and Methods in Pharmaceutical Outcomes and Policy Research is structured as a journal club and is designed to introduce recent developments in pharmaceutical outcomes and policy research, with a focus on observational study design and methodology. Students on the 2nd, 3rd or 4th year of graduate training will have the opportunity to discuss present scientific findings of their own.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3062 - ADVANCED METHODS IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Graduate level course designed to develop student understanding and skills related to research designs and analytic methods for conducting

population-based studies drawn from large observational survey and claims databases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3063 - GRADUATE RESEARCH ROTATION

Minimum Credits: 3

Maximum Credits: 3

Special research projects are conducted under the supervision of a faculty member to acquaint the graduate student with advanced research techniques.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3067 - CLINICAL PHARMACY ENVIRONMENTS

Minimum Credits: 2

Maximum Credits: 2

The successful completion of clinical research is dependent upon an understanding of how healthcare is delivered in the environment where it is conducted. A significant number of clinical studies involve drugs and/or the acquisition of drug concentrations. This course is designed for students who do not have clinical pharmacy experience within the U.S. Healthcare system. The goal is to improve these students' abilities to design clinical/translational research studies by introducing fundamental concepts of how pharmaceutical care is delivered in a U.S. Academic health system. To meet this objective, students will gain an appreciation of how pharmaceutical care is delivered through didactic lectures and guided exposures to multiple clinical pharmacy environments with experienced clinical pharmacists. During each field observation, students will be expected to identify the application of pharmacy and therapeutics interventions. Students will also learn how clinical data is generated and stored to deliver daily patient care and how databases may be used for research purposes. Additionally, students are expected to gain an appreciation for the privacy regulations that are associated with accessing protected health information (phi) for research and their implications for designing and conducting clinical/translational research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will teach the fundamentals of computational systems pharmacology (CSP) modeling and their applications to study drug actions and rational development of new drugs through network analysis, Theoretical concepts pertaining to computational systems pharmacology, such as drug target identification and computer aided drug design (CADD), will be taught. The course also includes hands-on training with the mainstream network analysis and CADD software, such as Symbiology of Matlab, Tetrad, drug discovery package of Schrodinger. This is a mandatory course to be taken for the PSP program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3069 - PHARMACOMETRICS

Minimum Credits: 3

Maximum Credits: 3

This course will provide training in the fundamentals of pharmacometrics & systems pharmacology (PSP) modeling and their applications to study drug actions through multiscale modeling and simulations [mechanism-driven] and data analysis [data-driven]. Theoretical concepts pertaining to

PSP, such as population pharmacokinetics/pharmacodynamics (pop PK/PD) modelling both from mechanistic and statistical points of view, physiologically-based pharmacokinetics (PBPK) data analysis, will be taught. The course covers the advanced pharmacokinetics/pharmacodynamics (PK/PD) topics, such as drug-drug interactions, disease progression, as well as multi-scaling PK/PD modeling of drug actions for selected diseases, including cancers, type 2 diabetes, etc. The course also offers hands-on training on using mainstream population PK/PD and PBPK modeling and simulation software. This is a mandatory course to be taken for the PSP program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3070 - GENOMICS & CANCER THERAPEUTICS

Minimum Credits: 1

Maximum Credits: 1

This course, structured as a journal club, is designed to provide an opportunity for students to informally learn and discuss concepts and applications in the area of genomics and cancer therapeutics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES

Minimum Credits: 4

Maximum Credits: 4

The discovery, development, and evaluation of new medications and dosage forms, is a cornerstone of pharmaceutical sciences research. This course provides an overview of the drug development process, from preclinical discovery through clinical testing and evaluation. The course begins with a discussion of natural products, small molecule development, physicochemical properties of drugs, computational approaches to lead generation and drug design, target identification, and high throughput screening methods for identifying active compounds. This is followed by an overview of screening methods for identifying the best drug candidates, and then how drug candidates are formulated to overcome barriers to effective drug delivery. The next segment of the course focuses on clinical evaluation of drug safety and efficacy. This includes how animal models are used in transitioning from preclinical to clinical drug development, followed by discussions of how biomarkers are used in drug development, human equivalent dosing, the different phases of clinical trial design, and how PK/PD modeling and simulation can be used to model and predict clinical efficacy. The final segment of the course focuses on methods for evaluating the impact of medications on patient disease populations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Course involves a discussion of current topics of interest in pharmacokinetics and pharmacodynamics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: School of Pharmacy students only.

PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to teach graduate students multivariate statistical methods. Where appropriate and consistent with the students' educational background, theoretical foundations for multivariate statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply multivariate statistical methods appropriate for analyzing complex data sets and statistical problems presented

during class sessions, in homework assignments, and in an exam. At the end of this course, they will have skills to construct and test and analyze complex statistical models. Furthermore, they will be able to understand multivariate statistical methods used in research articles and critique the methods selected. The major topics covered in this course will be (1) matrix and vector algebra, (2) measures of central tendency, dispersion, and association, (3) graphical display of multivariate data, (4) multivariate normal distribution, (5) inference for means, (6) multivariate regression, (9) multivariate analysis of variance, (10) canonical correlation coefficient, (11) repeated measures analysis, (12) principal component analysis, (13) factor analysis, (14) cluster analysis, (15) discriminant analysis, classification and pattern recognition. Students will be required to apply statistical software packages, such as STATA, SPSS, SAS, R or other appropriate programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3074 - INTRODUCTION TO REGULATORY ASPECTS OF DRUG DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course is designed to orient graduate students and students of PharmD program with foundational knowledge on regulatory aspects of drug development process including drug and biologic products. This course will introduce students with various regulatory agencies worldwide with emphasis on regulations by the US Food and Drug Administration (FDA). It will introduce types of applications in drug approval process including Investigational New Drug application (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA), and Biologic Licensing Application (BLA). The course will provide overview of various requirements for approval of a drug product such as Preclinical toxicology, Chemistry, Manufacturing and Controls (CMC), clinical data required to establish safety and effectiveness (Phase 1 to Phase 3 trials) and post-marketing regulations. Through this introductory course, graduate students of School of Pharmacy will gain basic knowledge about regulatory pathways for drug and biologic products. The students can then use the acquired knowledge in their research projects (if applicable) or take additional courses in regulatory affairs. This course will also expose the students to various career opportunities in regulatory affairs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PHARM 3075 - TOPICS IN PHARMACOGENOMICS AND PRECISION MEDICINE

Minimum Credits: 1

Maximum Credits: 1

This course is a journal club for students interested the application of pharmacogenomics and precision medicine. The course will cover specific topics related to pharmacogenomics implementation, genotype-phenotype discovery, informatics, data science, and implementation science as they relate to pharmacogenomics and precision medicine.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

PHARM 3076 - FOUNDATIONS OF PRECLINICAL DRUG DEVELOPMENT AND DELIVERY

Minimum Credits: 2.5

Maximum Credits: 2.5

The discovery, development, and evaluation of new medications and dosage forms, is a cornerstone of pharmaceutical sciences research. This course provides an overview of initial stages of the drug development process, including principles of preclinical drug discovery and development as well as factors that contribute to the formulation and delivery of medications. The course begins with a discussion of natural products, and quickly moves into small molecule development, physicochemical properties of drugs, computational approaches to lead generation and drug design, target identification, and high throughput screening methods for identifying active compounds. This is followed by an overview of screening methods for identifying the best drug candidates, including metabolic and toxicology screening, transporter screening, and methods for identifying drug-drug/drug-gene interactions. The last portion of the course focuses on how drug candidates are then formulated to overcome barriers to effective drug delivery. Emphasis is placed on understanding the drug development process and methods that are used to identify, develop, and formulate drug candidates for preclinical testing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PHARM 3011; PROG: School of Pharmacy

PHARM 3077 - FOUNDATIONS OF CLINICAL DRUG DEVELOPMENT AND ASSESSMENT

Minimum Credits: 1.5

Maximum Credits: 1.5

The development and testing of medications for clinical safety and effectiveness is an essential component of the drug development process. This course provides an overview of the principles and methods used to evaluate the safety and efficacy of medications in individuals and in patient disease populations. The course begins with a brief discussion of how animal models are used in transitioning from preclinical to clinical drug development. This is followed by discussions of how biomarkers are used in drug development, human equivalent dosing, the different phases of clinical trial design, and a discussion of how PK/PD modeling and simulation can be used to model and predict clinical efficacy. The next part of the course focuses on methods for evaluating the impact of medications on patient disease populations. Topics include causal inference and study design, data sources and collection methods, phase 4 trials, the use of big data including pharmacogenomics data in clinical research, and methods for adverse effect detection and reporting. Emphasis is placed on understanding the processes and methods that are used to evaluate medication safety and effectiveness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PHARM 3011; PROG: School of Pharmacy

PHARM 3078 - MEDICATION PHARMACOLOGY: A PHARMACOLOGIC FRAMEWORK FOR UNDERSTANDING DRUG ACTION

Minimum Credits: 2

Maximum Credits: 2

This course is intended for pharmacoanalytics graduate students without previous pharmacology courses. The course provides a pharmacologic framework for understanding drug action. Students will gain an understanding of general mechanisms of action for drugs, what happens to the drug after ingestion, sources of variability in drug response and the research needed to show a drug is safe and effective. Students will gain insight into the many disciplines and skills that contribute to development of new medications by examining and evaluating content from new drug applications, post-marketing evaluations and marketing materials of currently marketed drug products.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3140 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PHARM 3300 - CONCEPTS IN PHARMACOECONOMIC AND OUTCOME EVALUATIONS IN HEALTH AND MEDICINE

Minimum Credits: 1

Maximum Credits: 1

This course serves as a competency-based application of advanced concepts in economic and outcomes evaluation in health and medicine. The theories and necessity of health economic evaluations will be reinforced with examples from real-world scenarios and emphasize hands-on advanced modeling activities. Topics include Markov modeling, sensitivity analyses to address model uncertainty, budget impact analysis, and health state

utility assessment. Knowledge of data manipulation in Excel is preferred prior to course enrollment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3301 - SECONDARY DATABASE APPLICATIONS

Minimum Credits: 1

Maximum Credits: 1

This course serves as an introduction to commercially and publicly available databases including administrative datasets, clinical datasets, spontaneous reporting datasets and datasets for national representative surveys used for large-scale data analyses. Students will understand how to accrue commercially and publicly databases. Students will explore the advantages and disadvantages to various databases. Students will develop skills in using tools to assist with management and analysis of secondary databases. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to course enrollment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES

Minimum Credits: 1

Maximum Credits: 1

This course serves as an introduction to core data science methods for querying large-scale datasets, primarily focusing on relational databases. The course is entirely online via short videos and web-based homework assignments. Students will develop skills understanding data found in clinical information systems, biomedical data standards and terminologies, and strategies for managing and storing biomedical data. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); basic statistics course and introductory to programming experience are preferred prior to course enrollment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS

Minimum Credits: 1

Maximum Credits: 1

Topics and Methods for Secondary Database Evaluations is structured as a journal club and is designed to discuss pragmatic research with large secondary databases, with a focus on observational study design, analytics and methods. Students will have the opportunity to discuss, critique and present published literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY

Minimum Credits: 1.5

Maximum Credits: 1.5

This course serves as competency-based application of research methods for pharmaceutical practice and policy. This course will address the conceptualization and operationalization of research, study design considerations, and secondary data analysis. Students will also learn how to operationalize data metrics for medications and outcomes using large databases. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); basic statistics course and introductory to programming experience are preferred prior to course enrollment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS

Minimum Credits: 1

Maximum Credits: 1

This is a competency-based course designed to introduce students to the US Healthcare System and pharmaceutical policy. This course will cover the organization, financing, and principal stakeholders of the US healthcare system. Additionally, this course will examine central concepts related to pharmaceutical policy; including, pharmaceutical pricing, spending, and use within the healthcare system. Students will also learn concepts in healthcare policy, pharmacoeconomics, and value-based healthcare.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3308 - DATA PRIVACY AND SECURITY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce students to policies and regulations regarding privacy and security for using clinical and sensitive data for clinical research. Students will learn about de-identification methods, encryption standards and network security. The students will be required to write and evaluate data security and sharing plans as well as organizational policies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS

Minimum Credits: 1

Maximum Credits: 1

This course will give the student an understanding of how to develop and use a software infrastructure to support projects using secondary data. Students will learn methods for selecting appropriate software tools for a project and gain exposure to software tools to support natural language processing, machine learning and neural networks. The course will include discussions of real-world examples of successful projects using various infrastructures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3312 - COMMUNICATING DATA

Minimum Credits: 1

Maximum Credits: 1

This course will offer a survey of methods for communicating the results of data analyses in healthcare. Best practices for different modes of presenting (oral and written) data will be introduced and applied. As data visualization has grown in importance, students will learn which figures and plots are most effective in specific cases. These methods will be reviewed, applied to various scenarios, and assessed in this course. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); descriptive statistics course and project data or familiarity with utilizing open data sets are preferred prior to course enrollment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 4999 - FULL TIME STATUS

Minimum Credits: 0

Maximum Credits: 0

Designed to accommodate summer billing for pharmacy students.

Academic Career: Graduate

Course Component: Clinical

Grade Component: No Grade Required

Course Requirements: School of Pharmacy students only.

PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS

Minimum Credits: 3

Maximum Credits: 3

First of six semester sequence of courses that support the students' development of competence in four major areas- clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS

Minimum Credits: 3.5

Maximum Credits: 3.5

The second of six courses that support the students' development of competence in clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR

Minimum Credits: 1

Maximum Credits: 1

A continuation of experiential education from term 1. Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5114 - ANATOMY AND PHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

First part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 5115 - ANATOMY AND PHYSIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

Second part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 5116 - BIOCHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

First of two course sequence that enables students to appreciate the chemical process which govern the function of living systems, the molecular basis of disease, the rationale behind use of certain drug classes, and the biochemical basis of clinical diagnostic procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5117 - BIOCHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

Course builds on principles introduced in biochemistry 1. First portion of course covers topics in molecular biology and gene regulation, particularly as they relate to the etiology and treatment of disease. Second portion of course covers the intermediary metabolism of carbohydrates, proteins, and lipids. Emphasis is placed on errors of intermediary metabolism responsible for human disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5118 - PRINCIPLES OF DRUG ACTION

Minimum Credits: 4

Maximum Credits: 4

To enable students to apply principles of drug-receptor interactions, conceptualize principles of medicinal chemistry with regard to drug design and development, understand the relationship between drug action and chemical structure, understand the relationship between dosage forms and oral bioavailability, understand basic pharmacokinetic and pharmacodynamic concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5119 - DRUG DEVELOPMENT 1

Minimum Credits: 4

Maximum Credits: 4

Course examines sources of drugs and the process of drug development and the drug approval process. Since drug metabolites may play an important role in the activity or toxicity of a drug, early phases of the approval process require extensive metabolism studies. Course also covers the biochemistry of drug metabolism and chemical pathways of metabolism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5120 - THE EMERGING PROFESSIONAL

Minimum Credits: 1

Maximum Credits: 1

The emerging professional is designed to stimulate the development of professional attitudes and behaviors and an understanding of the opportunities within the pharmacy profession. Professionalism, ethics, management of self, and the profession of pharmacy are themes of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5121 - CASE CONFERENCE SERIES 2

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5122 - CASE CONFERENCE SERIES 1

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5133 - PROFESSIONAL AND CAREER DEVELOPMENT 1

Minimum Credits: 0.5

Maximum Credits: 0.5

This course, part of a longitudinal sequence, provides a thoughtful, sequential progression of themes of self-development, career development and professional development, incorporating skills for success and documentation of outcome-focused progress.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The third of a six course sequence that supports students' development of competence in four major areas: clinical skills, social science in pharmacy, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

The fourth of a six-course sequence that supports students' development of competence in four major areas: clinical skills, psychosocial dimensions of practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT-IMMERSION IN PRACTICE

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE

Minimum Credits: 3.5

Maximum Credits: 3.5

Provides a comprehensive evaluation of the pathophysiology and treatment of cardiovascular disease. The pharmacology and therapeutic use of cardiovascular drugs is presented in relation to the management of hypertension, coronary artery disease, heart failure, arrhythmia, thromboembolic disorders, and acute myocardial infarction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE

Minimum Credits: 4

Maximum Credits: 4

Course provides students with a fundamental understanding of the mathematical relationships that are available to quantify the rate and extent of drug absorption, distribution, metabolism and excretion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY

Minimum Credits: 4

Maximum Credits: 4

Course provides students with a fundamental understanding of the physical-chemical properties of various drug dosage forms. Students will compound several different dosage forms in the laboratory portion of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5220 - CASE CONFERENCE SERIES 3

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis within this course series include but are not limited to patient assessment, development of pharmaceutical care plans, verbal and written communicating to patients and providers, and retrieval and critical evaluation of quality health care information with application to individual patient care settings. Patient case activities will be planned to reinforce the knowledge and skills introduced in concurrent courses within the semester, as well as reinforcing previously-learned scientific and patient care principles, skills and knowledge from preceding semesters. During the fall P2 year, each session will use skill building exercises in the context of concurrent courses listed above.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5222 - FUNDAMENTALS OF IMMUNOLOGY

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students with fundamental knowledge of the immune system and integrate elements of basic and applied immunology with pharmacy practice. Principles in immunology will be reviewed, including mechanisms of inflammation and actions of antibodies,

complement, and cytokines. The course will also introduce selected immune-based disorders and principles of immunization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5223 - GASTROENTEROLOGY/NUTRITION

Minimum Credits: 2

Maximum Credits: 2

Students demonstrate and apply concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected gastrointestinal diseases and states of nutritional deficiency. Students develop the ability to design, monitor, and refine safe and cost effective treatment plans and provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5225 - ADVANCED PHARMACEUTICAL CARE 1

Minimum Credits: 1

Maximum Credits: 1

Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in 'capstone' experiences to manage pharmaceutical care problems in ambulatory and acute care settings.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5227 - CASE CONFERENCE SERIES 4

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5229 - FUNDAMENTALS OF NEPHROLOGY/PULMONOLOGY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide students with opportunities to apply knowledge of physiology, pathophysiology, pharmacology and therapeutics in provision of pharmaceutical care for patients with selected renal and pulmonary disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and quality of life. Expanding on current knowledge and acquiring new knowledge of disease states and therapies, students will be challenged through team-based learning, using a series of TBL sessions focused in selected aspects of pharmaceutical care to patients with renal and pulmonary diseases. The course will integrate with prior learning (i.e. cardiology, anatomy and physiology) and concurrent learning (case conferences, infectious diseases).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5231 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1: COMMUNITY-BASED

Minimum Credits: 3

Maximum Credits: 3

The first in a 2-course sequence which uses an integrated approach to the assessment and management of common community-based infectious diseases. Using large group instruction, case-based practica and other instructional methods, students have the opportunity to acquire scientific knowledge and develop patient care decision-making and plan development skills relevant for a pharmacy practitioner in community practice. Elements of microbiology, immunology, chemistry, pharmacology and therapeutics will be interwoven throughout the course to provide students with structured and organized learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5233 - PROFESSIONAL AND CAREER DEVELOPMENT 2

Minimum Credits: 0.5

Maximum Credits: 0.5

This course, part of a longitudinal sequence, provides a thoughtful, sequential progression of themes of self-development, career development and professional development, incorporating skills for success and documentation of outcome-focused progress.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS

Minimum Credits: 2

Maximum Credits: 2

Provides the knowledge, skills and attitudes necessary to practice pharmacy. Will focus on clinical skills, psychosocial dimensions of practice, pharmacy management and professional inquiry. Topics include principles of pharmacoconomics, pharmaco-economic decision making, quality improvement and total quality management, and population-based decision making. Individual and group presentations, case analyses and projects will be used to incorporate pharmaco-economic principles into therapeutic decision-making and enhance the communication skills of students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING

Minimum Credits: 1

Maximum Credits: 1

Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT

Minimum Credits: 1

Maximum Credits: 1

Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5314 - IMMUNOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry, and therapeutics in the evaluation and treatment of selected diseases of the immune system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and provide appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5315 - ONCOLOGY/HEMATOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of various types of cancer and diseases of the blood. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5316 - PULMONOLOGY/RHEUMATOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected pulmonary and rheumatic diseases. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5318 - ENDOCRINOLOGY

Minimum Credits: 3

Maximum Credits: 3

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected disorders of the endocrine system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5319 - NEUROLOGY/PSYCHIATRY

Minimum Credits: 4

Maximum Credits: 4

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected neurological and psychiatric disorders. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5320 - POPULATION HEALTH AND MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

The course focuses on the United States health system and its connection to the pharmacist, principles of management and business for the pharmacist, and public health pharmacy. Core concepts addressed will include: health disparities, program development and evaluation, health literacy, health behavior change, access to essential medicines, health care reform, payment structures, business planning, personal and professional management, human resources, advocacy, emergency preparedness, safety nets, cultural competency, and global health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5321 - CRITICAL CARE AND ADVANCED NEPHROLOGY

Minimum Credits: 2

Maximum Credits: 2

Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in "capstone" experiences to manage pharmaceutical care problems in ambulatory, acute care, and critical care settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5322 - PHARMACY LAW

Minimum Credits: 2

Maximum Credits: 2

This course is focused on pharmacy law, with a focus on general concepts of constitutional law and an overview of the legal process in the United States. Students will learn by analyzing statutes, regulations, and case law examples. The areas covered will include laws and regulations relevant to pharmacy practice, civil liability including malpractice, and some business-related legal material.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5323 - CASE CONFERENCE SERIES 6

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5324 - CASE CONFERENCE SERIES 5

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis within this course series include but are not limited to patient assessment, development of pharmaceutical care plans, verbal and written communicating to patients and providers, and retrieval and critical evaluation of quality health care information with application to individual patient care settings. Patient case activities will be planned so as to reinforce the foundational knowledge and skills introduced in concurrent courses within the semester, as well as reinforcing previously-learned scientific and patient care principles, skills and knowledge from preceding semesters. During the fall P3 year, each Case Conference session will use skill building exercises in the context of concurrent courses. Additionally, two comprehensive Capstone Cases will challenge students to demonstrate the desired comprehensive skills in patient care through patient assessment, care plan development, ability to communicate with patients and providers, and provide quality patient care recommendations with evidence-based justifications.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5326 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2: HEALTH-SYSTEMS-BASED

Minimum Credits: 2.5

Maximum Credits: 2.5

The second in a 2 course sequence which uses an integrated approach to the assessment and management of health system-based infectious diseases. Using large group instruction, case-based practica and other instructional methods, students have the opportunity to acquire scientific knowledge and develop patient care decision-making and plan development skills relevant for a pharmacy practitioner in health systems practice. Elements of microbiology, immunology, chemistry, pharmacology and therapeutics will be interwoven throughout the course to provide students with structured and organized learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5328 - ADVANCED THERAPEUTICS: IMMUNOLOGY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to reinforce previously-learned fundamental immunology concepts through application to immune-mediated disease states. Elements of immunology, medicinal chemistry, pharmacology, and therapeutics are illustrated, reinforced, and applied through case-oriented discussion sessions and assignments designed to enhance skills in problem-solving, patient assessment, drug selection, and monitoring.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5400 - PHARMD SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students learn communication and organizational skills necessary to present professional seminars.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5409 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 9

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5410 - ADVANCED PHARMACY PRACTICE EXPERIENCE 1 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5411 - ADVANCED PHARMACY PRACTICE EXPERIENCE 2 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5412 - ADVANCED PHARMACY PRACTICE EXPERIENCE 3 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS

Minimum Credits: 1

Maximum Credits: 6

A sequence of courses that address issues related to providing pharmaceutical care to underserved populations. Topic areas that will be addressed include: psychosocial factors impacting health, political and economic influences on health care access, community advocacy and resources, patient assessment, clinical problem solving skills, pharmacotherapy management, and patient education. Students will have opportunities for interdisciplinary care and educational sessions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5805 - COMMUNITY PHARMACY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Discussion of the principles and procedures of management involved in community pharmacy practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE

Minimum Credits: 2

Maximum Credits: 2

Provides students with opportunities to acquire the knowledge and skills necessary to provide pharmaceutical care to pediatric patients of all ages.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5811 - CLINICAL NUTRITION

Minimum Credits: 1

Maximum Credits: 1

Course examines the provision of adequate nutrition and nutritional support to ambulatory and hospitalized patients as well as the relationships between nutrition and disease and drug therapy and nutrition.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5812 - HEALTHCARE INNOVATIONS 1

Minimum Credits: 1.5

Maximum Credits: 1.5

Students will be able to effectively participate in a healthcare innovation application team as either a leader or participant that results in the application of an evidence-based healthcare innovation, which leads to improved patient care. Students will be able to develop detailed and effective strategic frameworks from which they can outline and track their progress in implementing a healthcare innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION

Minimum Credits: 3

Maximum Credits: 3

Course is designed to allow students to apply clinical knowledge, skills and attitudes gained in previous courses to care for patients with advanced cardiovascular diseases and those that are critically ill. Students will expand on the concepts gained throughout the pharmacotherapy of cardiovascular disease course. Course utilizes simulation based learning to enhance clinical decision-making processes. A major component of the course is self-study requiring an adult learning approach to education. The adult learning concept will require students to be responsible for and highly interactive in achieving the objectives of the course. This learning environment will foster clinical decision making and reinforce concepts learned throughout the school's curriculum. Also, it will provide an excellent source for objective assessment of student knowledge and performance.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION

Minimum Credits: 3

Maximum Credits: 3

This course for third professional year pharmacy students will introduce and discuss important topics in global health, focusing specifically on care of the underserved in a global context. Topics discussed will include health policy and economics, determinants of health, essential medicines, community-oriented primary care, structural violence, malnutrition and tropical medicine. In addition to readings and weekly discussion groups, students will have the opportunity to gain valuable practice-based skills by working in underserved clinics in Pittsburgh.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to understand the fundamental concepts in managed care pharmacy and the relation to the healthcare system. This course supports the school's mission by enabling students to better navigate and understand the healthcare system from the perspective of different stakeholders to help optimize pharmaceutical care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5816 - NEPHROLOGY PATIENT CARE

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to introduce students to the delivery of pharmaceutical care to end-stage renal disease (ESRD) patients receiving outpatient hemodialysis therapy. The course is structured as a longitudinal patient-centered experience. It integrates nephro pharmacology-related concepts and continuous, direct patient care. This is accomplished via critical evaluation of all clinical data and involvement in patient care activities, multidisciplinary patient rounds, case studies, oral presentations, pharmacotherapeutic discussions, literature evaluations, and other selected exercises. Patient and interprofessional communication is a fundamental aspect of this course. Participating students are expected to be self-motivated, self-directed individuals who embrace independent learning and self-assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5817 - ADVANCED INFECTIOUS DISEASES

Minimum Credits: 1

Maximum Credits: 1

Students will expand upon and apply knowledge and skills developed in the required Infectious Diseases 1 and 2 course sequence and Advanced Pharmaceutical Care 1 to new and complex infectious disease case scenarios, be introduced to the principles of antimicrobial stewardship, learn basic skills relevant to performing antimicrobial stewardship activities in a health system, and explore current controversies in infectious diseases to optimize the health of patients with complex infectious diseases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5818 - MEDICAL PARASITOLOGY

Minimum Credits: 1

Maximum Credits: 1

Course offers a concise presentation of the protozoan and helminthic parasites of medical importance, with an emphasis on parasitic morphology and life cycle, disease transmission, pathogenesis, prophylaxis, therapy and epidemiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)

Minimum Credits: 3

Maximum Credits: 3

Course is designed especially for students interested in advancing and leading change in community pharmacy practice. The objective is to mentor and support students in effective and meaningful community pharmacy-based patient care research. Students will engage in a combination of on-line lecture content and small group; weekly discussions throughout the summer months. Students will initiate and complete a research project in the community. The purpose of the project is to: 1. Familiarize students with the key components in carrying out a valid research project from conceptualization to final report (abstract; meeting presentation). 2. Develop research problem solving skills through working group discussions and by working research problem solving skills through working group discussions and by working closely with project mentor. 3. Enhance verbal and written communication skills through formal and informal presentations and scientific writing. 4. Contribute to the diversity of the students' expertise through meeting and discussing with experts in community practice and research nationally.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5820 - PHARMACY INNOVATION 1

Minimum Credits: 1

Maximum Credits: 1

The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5821 - PHARMACY INNOVATION 2

Minimum Credits: 1

Maximum Credits: 1

The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5822 - RESEARCH FUNDAMENTALS

Minimum Credits: 2

Maximum Credits: 2

Course is designed to provide students with a comprehensive survey of research. The topics covered encompass specific topics related to research. Course content includes an introduction to: hypothesis generation, writing the introduction, design of study, report on a technique and various additional topics related to research. The overall goal of the course will be practical applied discussion of the steps involved in the process of generating new knowledge through research. Students completing this course will gain the design, conduct and report their research in the form of a poster and/or podium presentation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5824 - MENTORED RESEARCH

Minimum Credits: 1

Maximum Credits: 3

The purpose of this course is to give PharmD students an experiential educational offering within pharmacy research. This course is available to all students including (but not limited to) those in the Research Area of Concentration. Students are given an opportunity to answer hypothesis-driven pharmaceutically-related questions under direct mentorship from an expert in that field. Ongoing studies include but are not limited to in vitro synthesis, mechanistic studies, in vivo preclinical models of disease, and large population studies in order to bridge the bench to bedside to improved public health through research.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5825 - HEALTHCARE INNOVATIONS 2

Minimum Credits: 2

Maximum Credits: 2

Course is to provide the students who have successfully completed Healthcare Innovations 1 the opportunity to apply what they have learned by observing successful and unsuccessful innovation applications within the VA health system in Pittsburgh and using the innovation model master in Part 1 of this two-part course to provide evaluative insight as to why the innovations observed may have succeeded or failed to succeed. As part of this course, the students will also learn about the veterans engineering resource center (VERC) program at the VA and how it guides the development and implementation of innovations that aim to improve healthcare quality and outcomes for participating veterans.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5826 - ADVANCED PEDIATRIC PHARMACEUTICAL CARE

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to extend knowledge and skills in intensive and/or advanced pediatric specialties, building on previously developed

fundamental knowledge of pediatric physiology, pathophysiology, pharmacology and therapeutics, so as to advance pharmaceutical care for infants and children with selected disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and quality of life.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5828 - BECOMING A LEADER

Minimum Credits: 1

Maximum Credits: 1

The course addresses the need for additional opportunities for interested students to build a depth of skill and experience in leadership, applicable across all facets of the profession. The purpose of this 5-week course is to expand upon the knowledge of leadership gained during the student pharmacist's first professional year, particularly in the emerging professional (pharm 5120). M.A. Soupios' and P. Mourdoukoutas' the ten golden rules of leadership: classical wisdom of modern leaders and other literature will serve as the primary references. Individual reflections and group discussions will allow students to master self-directed processes to continuously critique and improve their leadership abilities. The course will guide students through evaluating their own strengths and talents, shaping their own leadership styles, and understanding those of others. It will facilitate student preparation for leadership roles.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)

Minimum Credits: 2

Maximum Credits: 2

The primary purpose of the course is to adequately prepare learners to execute an outcomes research-based project during the P4 curriculum. As a required component of the pharmacotherapy scholars program, this course will enable P3 students in the spring semester to design a study, submit the required institutional review board documents, and strengthen their data analysis skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5831 - HEALTHCARE FOR LGBTQIA COMMUNITY

Minimum Credits: 2

Maximum Credits: 2

This course will prepare the student to assess and guide comprehensive medical treatment for LGBTQIA individuals. Students will learn about cultural competency and inclusive language, screening and diagnosis, gender affirmation, primary and preventative care, and advocacy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

Course Attributes: Gender, Sexuality & Women's St

PHARM 5832 - LITERATURE AND FILM TO UNDERSTAND PATIENT-PRACTITIONER EXPERIENCES

Minimum Credits: 1

Maximum Credits: 1

This course is open to students from across the health sciences and will be directed by an interprofessional faculty team. This course emphasizes the importance of understanding the universal human aspects of health and disease to further develop empathetic and holistic skills among health professional students. The importance of interprofessional collaboration as a mechanism to improve patient outcomes will be explored. Students and faculty will read and/or view selected works that focus on the human condition that may impact the physical and/or psychological health of the

patient, families, communities, and care providers - and their interaction with the health care system. Guided discussion that helps students to reflect on the humanistic aspects of health care will be conducted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to programming, data processing, and data analytics using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the Python programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, and basic data mining.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5835 - REINVENTING THE INCUMBENT: DESIGNING AN INTRAPRENEURSHIP STRATEGY

Minimum Credits: 1

Maximum Credits: 1

The goal of this course series is to introduce didactic and experiential elements of entrepreneurship for pharmacy students. This course offers students the foundations required to successfully understand, create, and execute entrepreneurial ideas in pharmacy. This includes learning from success in other fields, understanding the components that comprise pharmacy, and identifying current opportunities in pharmacy. Concepts of business models, funding, consumer behavior in healthcare and landscape reviews of technology in healthcare will be reviewed in this course. Career focuses for students would benefit in learning about starting a new company to disrupt incumbents, starting and managing new projects within an existing corporation, and new Management within the field of innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5836 - SIDE PROJECT: BUILDING VALUE WITH YOUR SPARE TIME

Minimum Credits: 1

Maximum Credits: 1

The goal of this course series is to introduce didactic and experiential elements of entrepreneurship for pharmacy students. This course offers students the foundations required to successfully understand, create, and execute entrepreneurial ideas in pharmacy. This includes learning from success in other fields, understanding the components that comprise pharmacy, and identifying current opportunities in pharmacy. Concepts of start-up methodology, management/leadership, and company culture will be reviewed in this course. Career focuses for students would benefit in learning about starting a new company to disrupt incumbents, starting and managing new projects within an existing corporation, and new Management within the field of innovation.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5837 - INTRO TO PSYCHOPHARMACOLOGY & PSYCHIATRIC DISORDERS: AN INTERPROFESSIONAL APPROACH

Minimum Credits: 3

Maximum Credits: 3

This course will serve as an introduction to psychopharmacology and the management of common psychiatric disorders including substance use disorders. This course is designed to familiarize students with the fundamentals of pharmacological as well as non-pharmacological treatment from a

historical, sociological and practice perspective. This course aims to increase mental health literacy and enhance practitioner competency while elucidating the roles of healthcare providers within an interprofessional team framework. This is an introductory course. No prerequisites are required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PHARM 5838 - IMPROVISATION FOR CLINICIANS

Minimum Credits: 1

Maximum Credits: 1

Principles of improvisation are surprisingly applicable in clinical settings. The central tenant of improv is acceptance. Using the core philosophy of "Yes, and", improvisers learn to listen, accept, and empathize. Clinicians must also use these same skills to communicate with their patients and empathize with them. Improvisers use teamwork and spontaneity to build scenes. Clinicians must collaborate learn to calmly handle unexpected scenarios. Improvisers use techniques and exercises to hone these skills, which, for clinicians, can lead to better patient interactions, collaboration, presentation skills, and even lower stress. We will learn about the principles of improv, exercises used to develop skills, and how improv training has been applied in clinical settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

PHARM 5839 - COMPREHENSIVE DIABETES MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This internet-based course provides students with a multidisciplinary foundation in the principles of diabetes management. Students will develop their knowledge and ability to assess, manage, educate and monitor patients with diabetes. Pathophysiology, monitoring, complications, and treatment including pharmacotherapy, medical nutrition therapy, and exercise therapy will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5840 - PALLIATIVE CARE PHARMACOTHERAPY

Minimum Credits: 2

Maximum Credits: 3

This semester long elective course is designed to provide the student with an advanced understanding of palliative and hospice care principles, the pharmacotherapeutic management of pain and non-pain symptoms occurring in patients with advanced illness, and the process of deprescribing. This elective will expand on the concepts gained throughout the first and the second professional years. The purpose of this course is to prepare the student to develop rational, patient-centered, and goal directed drug therapy and monitoring plans for patients with life-limiting illnesses throughout the life continuum. The goal of this elective experience is for the students to develop the attitudes, knowledge and skills necessary to participate in effective and compassionate palliative care.

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5853 - SPECIAL TOPICS 3

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5854 - SPECIAL TOPICS 4

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5855 - SPECIAL TOPICS 5

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5856 - SPECIAL TOPICS 6

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5891 - INTERNATIONAL PHARMACY SCHOLARLY EXPERIENCE 2 (IPSE)

Minimum Credits: 1

Maximum Credits: 3

Course allows the student to personalize their pharmd education by proposing, developing, and implementing a mentored scholarly project in an international setting. The goal of these international project experiences is to provide the student with an experience to build specific skills in research and practice while providing opportunities for cross-cultural learning and awareness. Projects will be developed in conjunction with an identified faculty mentor and should be developed to meet a site-specific need. Students will complete their project abroad during the summer and will present their project and experience when they return. Instructor's permission required.

PHARM 5910 - US HEALTHCARE SYSTEM

Minimum Credits: 2

Maximum Credits: 2

The aim of this course is to provide students with an overview of the U.S. Health care delivery system. This course covers the structure of health care delivery systems and delivery of health care services including personnel and facilities; organization, financing, and quality assessment with special attention to medication distribution and management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5911 - HEALTHCARE SALES AND MARKETING

Minimum Credits: 2

Maximum Credits: 2

This course educates students on contemporary healthcare sales and marketing as it directly applies to pharmacy. Sales concepts to be covered include understanding management prospects, developing your sales value proposition, finding management and penetrating the no-talk zone, generating leads: marketing to management, generating leads, cold calling management, meeting the prospect for the first time, presenting to prospects ' the executive briefing, preparing a management proposal that works, negotiating with management, selling to targeted key or major

accounts, managing your sales cycle and forecasting, managing sales objections; using storytelling as a business sales tool; managing your competition, following up after the sale, and making a difference with business ethics. Health care marketing is undergoing dramatic reinvention and change because of emerging trends, reform uncertainties, the emergence of social marketing and a renewed focus on quality, outcome and prevention. Executives are demanding higher impact and bigger returns from marketing investments and marketing professionals are more closely aligning their efforts with strategic objectives, customer experience and the integration of communications across multiple platforms and channels. This course offers effective approaches to proactive health care marketing with specific action steps, strategies, techniques and tactics to move markets and increase visibility, awareness, understanding, market share and profitability.

PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundational introduction to pharmaceutical/health care leadership and ethics. An analysis of dominant methods in leadership theories and healthcare ethics will be discussed and analyzed from historical, systematic, and religious perspectives. Ethical dilemmas of leadership, the foundation and context of moral choice, the moral implication of decision-making within healthcare organization and the impact on employees, morale, personal integrity, and the patients. Practical issues are engaged to illustrate effective leadership and ethical frameworks for sound decision making. Students will be able to understand and analyze health care leadership and ethics theory and methods as well as major applied topics; critically relate health care leadership and ethics with multi-disciplinary fields in health care as a diverse and national enterprise; integrate academic learning with experiential learning in clinical/organizational experiences; and demonstrate knowledge, skills, competencies and character traits to provide ethical leadership.

Academic Career: Graduate

PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM

Minimum Credits: 2

Maximum Credits: 2

Following the healthcare dollar: this interactive offering will engage students in a structured understanding of the business side of medicines in the health care industry and other related fields. For instance, students will study different leadership styles and corporate cultures in an organization, follow health spending longitudinally and vertically on medicines from consumer to product and service, discover how market conditions affect operations and profitability and learn about the executive's career development path. Entrepreneurship in healthcare: students will engage in a structured understanding of the business side of medicines in the health care industry and other related fields. This course delves into entrepreneurship in medicines and health. The fundamentals of entrepreneurship medicines and health will be discussed and students will study and contrast the primary entrepreneurship styles including characteristics of those who succeed through discovery, adaptation, and fortitude. Entrepreneurship and intrapreneurship models will be utilized. Students will contrast methods of innovation and supporting business cultures. The impact of market conditions will be analyzed in terms of how they affect success of such endeavors and learn about the executive's career development path. Many past students have used the learning and networking opportunities from this course to shape and propel their careers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will give students an understanding of managing change through the lens of complexity theory using the principles of implementation science. They will understand the levers important in change and how to assess an organization for readiness to change. Students will be able to effectively participate in a health care innovation application team as either a leader or participant that results in the application of an evidence-based health care innovation, which leads to improved patient care. They will be able to develop detailed and effective strategic frameworks from which they can outline and track the progress in implementing a health care innovation.

PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA

Minimum Credits: 2

Maximum Credits: 2

The overall objective of this course in Predictive Analytics in Pharmacy is to familiarize students with sources of big data, large data analytic techniques, and their wide-applicability in guiding decisions in the areas of patient care, drug research & development, healthcare policy, and cost effectiveness. For the most common techniques, the objective is to acquire sufficient mastery through hands-on analyses of real world data so that students are prepared to apply these techniques in future career positions. For other, more advanced techniques, the objective will be to develop a familiarity about how these methods are used and what questions they can answer.

Grade Component: Grad Letter Grade

Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5924 - HEALTH SYSTEM PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This is the first of two courses designed to provide focused learning in health system pharmacy management/leadership. Students will develop a basic understanding of organizational culture and how it affects personnel and performance, human resource management including hiring, training, assessment and development, and compensation strategies. The course will also address corporate pharmacy management functions; multi-site management and control; relevant accreditation standards (JCAHO, CMS, etc.)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5925 - HEALTH SYSTEM PHARMACY MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of two courses designed to provide focused learning in health system pharmacy management/leadership. The first course prepares students to plan and manage pharmacy operations in a hospital pharmacy. This course will address health system pharmacy organization quality standards; patient satisfaction; industry specific financial analysis (financial and managerial statements, cash flow, return on investment); health system reimbursement structure, contracting, purchasing and inventory management (supply chain), and finally the impact of health system informatics systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This is the first of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. Students will develop a basic understanding of organizational culture and how it affects personnel and performance. The course will cover the basics of human resource management including hiring, training, assessment and development as well as compensation strategies. The course will also cover corporate pharmacy functions as well-as multi-site management and control. Students will use the "Pharmacy Management " Essentials for All Practice Settings, textbook, readings from publications, videos, and case studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3

This is the second of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. The first course prepares students to plan and manage pharmacy operations in a community pharmacy. Students will learn to develop a business model and to establish key production and quality metrics. Students will gain an understanding of financial analysis including how to construct and interpret operating statements, key financial measures, cash flow, and return on investment. Special emphasis will be given to understanding various reimbursement models and contracts for services in addition to prescription fulfillment. Students will learn to manage purchasing and inventory. Students will use the "Pharmacy Management - Essentials for All Practice Settings" textbook, readings from publications, videos, and case studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3

This course offers students the first part of a focused learning in specialty pharmacy. The course will address specialty drug and clinical management; specialty pharmacy patient management (intake & outcomes); as well as address relevant accreditation standards (URAC, etc.).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3

This course offers students the second part of a focused learning in specialty pharmacy. The course will address specialty pharmacy organizational quality standards; specialty pharmacy customer service, communications, and disclosure standards; industry specific financial analysis (financial and managerial statements & indices); specialty pharmacy operations; specialty pharmacy contracting, purchasing and inventory management (supply chain), and finally specialty pharmacy informatics management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3

This is the first of two courses designed to provide focused learning in the practice of managed care pharmacy. Students will develop a basic understanding of how managed care pharmacy impacts the healthcare system. The course will focus on managed care, pharmacy benefit managers, prescription drug benefit, formulary management, impact of specialty pharmacy, and overall plan design.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of two courses designed to provide focused learning in the practice of managed care pharmacy. This course will build on the framework from Pharmacy Benefits Management I, allowing students to confidently engage health and benefits decision makers as an informed advisor. Students will be exposed to various guest speakers, helping to broaden their scope of understanding as it relates to industry dynamics. Additionally, students will be expected to demonstrate their comprehensive knowledge through a plan design and contract exercise.

Philosophy

PHIL 2010 - GREEK PHILOSOPHICAL TEXTS

Minimum Credits: 3

Maximum Credits: 3

This is a seminar primarily intended for CPAS students to help them gain expertise in reading philosophy in Greek.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2041 - STUDIES IN ARISTOTLE

Minimum Credits: 3

Maximum Credits: 3

Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2050 - TOPICS IN HISTORY OF PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected texts and topics in the history of philosophy. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2070 - ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2071 - STUDIES IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics and texts in ancient philosophy (readings in Greek). Course may be repeated for credit if the material is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2075 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2079 - FROM PHILO TO PHILOPONUS: AN INTRODUCTION TO THE HISTORY OF PHILOSOPHY IN LATE ANTIQUITY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2120 - SPINOZA

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Spinoza, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2130 - LEIBNIZ

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Leibniz, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2160 - HUME

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Hume, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2170 - KANT

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Kant. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2171 - KANTIAN ETHICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in Kantian ethics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2175 - STUDIES IN KANT

Minimum Credits: 3

Maximum Credits: 3

Study of Kantian texts and topics. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2180 - HEGEL

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Hegel, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2183 - MARX

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Marx, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2200 - FREGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Frege, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2210 - WITTGENSTEIN

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Wittgenstein. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2300 - ETHICS (CORE)

Minimum Credits: 3

Maximum Credits: 3

This is an advanced introduction to the foundations of ethics. We begin with basic topics from Kant about the nature of morality and the task for moral philosophy, reading defenders and critics of Kant's approach. This will serve as a point of entry into contemporary discussions about the ground of normative reasons for action, and the nature of moral and other forms of normativity. In this way we will work through leading positions in meta-ethics: varieties of constructivism, realism, and naturalism. We will end with an exploration of Plato's question about whether it is good for the just person to be just. There will not be a required text for this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2305 - TOPICS IN ETHICS

Minimum Credits: 3

Maximum Credits: 3

A study of selected topics in ethics. Course may be repeated for credit if material is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2310 - MORAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in moral theory, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2316 - ETHICS AND PUBLIC LIFE

Minimum Credits: 3

Maximum Credits: 3

This course will aid students in making and evaluating normative arguments and analyzing normative concepts as relevant to the formulation and administration of public policy. It will also present and discuss a number of substantive issues of ethical responsibility, rights and justice that are relevant to government officials, both in the U.S. and other countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2330 - POLITICAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in political philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2335 - TOPICS CONTEMPORARY PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on various topics in contemporary philosophy. The subject matter will change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2385 - RATIONALITY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in philosophical issues related to rationality, taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of this course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2390 - PHILOSOPHY OF LAW

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of law, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2400 - METAPHYSICS-EPISTEMOLOGY (CORE)

Minimum Credits: 3

Maximum Credits: 3

This is an introductory to intermediate level graduate seminar in metaphysics and epistemology, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2410 - PHILOSOPHY OF WILFRID SELLARS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Wilfrid Sellars, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2420 - PHILOSOPHY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of language, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies

PHIL 2421 - TOPICS IN PHILOSOPHY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in various topics in the philosophy of language taken by students in the doctoral program. The exact content of this course varies from one occasion to another.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2440 - PHILOSOPHY OF MIND

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of mind, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2445 - PHILOSOPHY OF ACTION

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of action taken almost exclusively by students in the doctoral program.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2460 - EPISTEMOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in epistemology, taken almost exclusively by students in the doctoral program, usually during

their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2480 - METAPHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in metaphysics. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2485 - PERSONAL IDENTITY

Minimum Credits: 3

Maximum Credits: 3

This is an advanced seminar on issues in personal identity.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2499 - SYMBOLIC LOGIC

Minimum Credits: 3

Maximum Credits: 3

This graduate course develops skills in formal and informal reasoning in predicate-quantifier logic, and covers formal semantics for sentential logic, informal semantics for predicate-quantifier logic, and elementary syntactic metatheory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2500 - ADVANCED LOGIC (CORE)

Minimum Credits: 3

Maximum Credits: 3

This is the first term of an introductory graduate course in mathematical logic. Topics are completeness of propositional logic and quantification theory and elementary set theory.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy or History and Philosophy of Science (PHD)

PHIL 2505 - TOPICS IN PHILOSOPHICAL LOGIC

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in various topics in philosophical logic, taken almost exclusively by students in the doctoral program. The exact content of this course varies from one occasion to another.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2533 - DESCARTES

Minimum Credits: 3

Maximum Credits: 3

An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

PHIL 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2580 - PHILOSOPHY OF MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2585 - TOPICS IN PHILOSOPHY OF MATH

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on topics in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2600 - PHILOSOPHY OF SCIENCE CORE SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD) or History and Philosophy of Science (PHD)

PHIL 2610 - SPECIAL TOPICS IN THE HISTORY OF THE PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2625 - RECENT TOPICS IN PHIL OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2627 - PHILOSOPHY OF QUANTUM MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course will review the Hilbert space formalism of quantum mechanics, consider interpretations of that formalism, (for instance, hidden variable theories, relative state formulations, stochastic reduction schemes), and the difficulties-empirical, logical, and conceptual- to which interpretations are prone.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2628 - PHILOSOPHY OF PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This seminar investigates philosophical issues in the foundations of fundamental theories of physics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2633 - PHILOSOPHY OF COGNITIVE SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2653 - REALISM

Minimum Credits: 3

Maximum Credits: 3

What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truth? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2662 - CAUSALITY

Minimum Credits: 3

Maximum Credits: 3

Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2663 - MODELS AND MODELING IN SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2687 - THE EPISTEMOLOGY OF EXPERIMENTAL PRACTICES

Minimum Credits: 3

Maximum Credits: 3

Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and inferences involved in reasoning about experimental results.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2690 - THEORIES OF CONFIRMATION

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on the topic of induction and confirmation, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2695 - PRAGMATISM

Minimum Credits: 3

Maximum Credits: 3

The course focuses on key pragmatic texts from C. S. Pearce to the present. But it will also give some consideration to the historical background of pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings, especially in semantics, epistemology, and philosophy of science, that bear on currently controverted issues.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2801 - TOPICS IN PHILOSOPHY

Minimum Credits: 1

Maximum Credits: 1

A seminar for the discussion of recent work in philosophy. Topics will vary from term to term and the course may be taken multiple times.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad SN Basis

PHIL 2900 - TEACHING PHILOSOPHY

Minimum Credits: 1
Maximum Credits: 1

A practicum approach to train as an tfs wherein faculty and senior graduate students train the more junior tas on how to teach philosophy. This course has been approved as an alternative to FACDEV 2200 for philosophy graduate students.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Philosophy (PHD)

PHIL 2902 - PRE-MA DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PHIL 2950 - DISSERTATION SEMINAR

Minimum Credits: 3
Maximum Credits: 3

The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working on dissertation projects a community of others in the same boat. It provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated but not yet defended a prospectus examples of other students who have successfully negotiated the transition.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Philosophy (PHD)

PHIL 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9

This is a course through which students can receive graduate degree credit in philosophy for work that they undertake largely or entirely on their own, with little or no faculty supervision.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

PHIL 2999 - PROSPECTUS RESEARCH

Minimum Credits: 3
Maximum Credits: 3

Each doctoral student in philosophy, when he or she is ready to begin working on the doctoral dissertation in earnest, must submit to a prospective dissertation committee a document, called a "prospectus", outlining the proposed dissertation topic, the envisioned treatment of that topic, and a rough plan for how to proceed. This course is a special directed study course for preparing that document.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

PHIL 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 9

This course gives academic credit for research toward and writing of the doctoral dissertation.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

PHIL 3902 - POST-MA DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Physical Medicine and Rehab

PMDREH 5410 - REHABILITATION SUB-INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective for fourth year medical students, participants will function at an intern-level the student will be given intern-level responsibilities to manage inpatient rehabilitation patients. Student will be teamed with one attending and one or more PM&R residents and will be responsible for caring for their own patients, which includes rounding, writing notes, admitting and discharging patients, staffing team conferences with therapists, nurses, and other health care providers, and communicating with families under supervision of the team. Students will also be able to participate in therapy sessions and will gain exposure to prescription of orthoses. The student will be assigned to one team for the entire month to gain experience in the longitudinal care of rehab patients. Teaching will be bedside as well as small didactic sessions at the discretion of the attending. There is no exam and students will be evaluated on their participation and meeting the course objectives.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5450 - REHABILITATION MEDICAL CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will demonstrate to the student the basic problems of patients and basic concepts of care for patients, referred to the division of rehab medicine. The student will be taught physical diagnostic techniques applicable to the disorders of musculoskeletal and neural systems. Students are expected to evaluate inpatients and develop a treatment plan under the supervision of division physicians. Common patient problems include hemiplegia, back pain, cervical spondylosis, arthritis and amputations. Electrodiagnostic studies will also be demonstrated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5460 - PED PHYSCL MED/REHAB-INPATIENT

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective the student will function in the capacity of an intern and care for hospitalized children with rehabilitation needs. Diagnosis will include cerebral palsy, myelomeningocele and other neuromuscular disorders. Skills in the physical and medical management of pediatric disability and an awareness of the other medical disciplines involved in the care of these children would be stressed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5461 - PED PHYSCL MED/REHAB-OUTPATIENT

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective the student will be involved in clinical evaluations of pediatric patients with multiple neuromuscular problems. This would include the differential diagnosis and physical exam as well as emphasis on electro diagnosis. In addition, some fundamentals of bracing and prosthesis prescriptions will be covered.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5465 - DISABILITIES CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will participate in the medical care of patients in a variety of inpatient clinical settings and in both adult and pediatric outpatient settings. Teams consist of physiatrists, pediatricians, nurse practitioners, physical therapists, occupational therapists, and social workers. The student's role will include serving as liaison to the medical center, assisting in the daily care of individuals with disabilities, providing clients and staff with education about specific medical topics and advocating for the program and its clients within the medical center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5810 - PM&R RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student to gain valuable experience in cutting edge research in physical medicine and rehabilitation (PM&R). The student will be precepted by faculty affiliated with the department of PM&R by meeting the following objectives: identify different sources of research funding; become familiar with effectively formulating grant proposals and budgets; learn to identify obstacles to performing productive research in an academic setting; assist in formulating effective research methodology; publication of an abstract.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5899 - INDEPENDENT STUDY IN PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PMDREH 5900 - EXTRAMURAL PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in Physical Medicine & Rehabilitation may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Physical Therapy

PT 2025 - PHYSIOLOGY OF EXERCISE

Minimum Credits: 2

Maximum Credits: 2

Structures and function of muscle, principles of neuromuscular recruitment for physical work, excitation-contraction coupling, contractile biochemistry, including sources of fuel for muscular work, and shifts in energy demands and fuel sources with physical activity under conditions of steady state, fasting, exercise and stress will also be covered. Examples of the impact of structural and physiological change with growth, aging, disease, drugs, and performance enhancing substances are reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2026 - CARDIOPULMONARY PT 1

Minimum Credits: 2

Maximum Credits: 2

Students gain a basic understanding of structure and function of cardiovascular and pulmonary systems, cardiorespiratory fitness and pulmonary physiology in both healthy and diseased state. Principles of physical training for persons with and without cardiopulmonary dysfunction are addressed through lecture, demonstrations, and student participation in monitoring and interpreting signs and symptoms of physical work in healthy and disease states. Interactions of skeletal muscle and the cardiovascular and respiratory systems are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2027 - CARDIOPULMONARY PT 2

Minimum Credits: 2

Maximum Credits: 2

Evidence-based study of the application of physiological and clinical sciences to the physical therapy management of individuals with cardio-pulmonary system dysfunction. Learning experiences include weekly literature review and directed professional discussions with colleagues (class mates, instructor and lecturers), and a case-based approach to applying knowledge and decision-making to examination, evaluation, prognosis, and intervention in cardiopulmonary pt.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2028 - HEALTH AND WELLNESS

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2029 - KINESIOLOGY AND INTRO TO

Minimum Credits: 3

Maximum Credits: 3

Introduction to the principles of the causes and treatment of musculoskeletal movement dysfunction. Basic principles of biomechanics and kinesiology of the musculoskeletal system with applications to the treatment of musculoskeletal dysfunction are also included. This material will be presented in lecture format and will be supplemented by direct laboratory experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2030 - ANATOMY

Minimum Credits: 6

Maximum Credits: 6

An overview of the musculoskeletal causes of movement dysfunction concentrating on the upper extremities. Basic principles of musculoskeletal evaluation, biomechanics, kinesiology and treatment are included. In depth study of the musculoskeletal and peripheral nervous system of the human body also included. Directed laboratory experience using prosected cadavers, skeletal material, models and audio-visual tapes. The adaptation of this knowledge and skills to diverse populations in a variety of practice populations emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2035 - CLINICAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Student will be introduced to quantitative methods for biomechanical analysis of gait and other human movement. Equipment and methods to be studied include automated motion analysis, videography, force platform, and kinesiological electromyography. The student will do a project involving the biomechanical analysis of movement using this equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2036 - CLINICAL BIOMECHANICS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2040 - SURVEY OF HUMAN DISEASE 1

Minimum Credits: 2
Maximum Credits: 2

A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2045 - SURVEY OF HUMAN DISEASE 2

Minimum Credits: 2
Maximum Credits: 2

An introduction to human diseases that affect the respiratory, hepatic, renal, and gastrointestinal systems. Environmental and psychogenic causes of diseases are also studied.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2050 - ADVANCED MANUAL THERAPY

Minimum Credits: 2
Maximum Credits: 2

This 2-credit elective course will introduce students to a variety of manual therapy techniques that are used to treat musculoskeletal conditions in the clinical practice of physical therapy. The course will include a combination of lecture and hands-on lab. The techniques will span the spectrum from soft tissue procedures such as transverse friction massage and manual trigger point therapy to mobilization procedures for the spine and extremity joints. Participants should have a basic working knowledge of the manual therapy procedures taught within the musculoskeletal tract.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2052 - PEDIATRIC PHYSICAL THERAPY

Minimum Credits: 3
Maximum Credits: 3

Lecture and laboratory activities focusing on the preparation of the student for a pediatric clinical affiliation and a possible career in physical therapy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2055 - GROWTH AND DEVELOPMENT 1

Minimum Credits: 2

Maximum Credits: 2

Major emphasis is on the evaluation and treatment of children. General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2056 - GROWTH AND DEVELOPMENT 2

Minimum Credits: 2

Maximum Credits: 2

A continuation of PT 2055.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2059 - GERIATRICS

Minimum Credits: 2

Maximum Credits: 2

Course provides information and sources of information to enable students to appreciate changes in physical function (including physical, cognitive and social aspects) of the older adult and consider the potential impact the changes may have on health status and assessment and treatment in pt. An overview of systemic, behavioral and cognitive changes that typically occur with advanced age and the impact of the changes on physical function are also discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2060 - NEUROSCIENCE

Minimum Credits: 4

Maximum Credits: 4

Considers gross and cellular organization of central nervous system and its relationship to peripheral somatic and visceral systems; the physiological properties of neurons, their associated structures; and the problem mechanisms for reception, transmission, and integration of information at spinal, supraspinal and cortical levels. Concepts of normal sensory-motor integration, to include influence of neural centers on motor activity and postural control, and clinical manifestations of dysfunctions of major neural elements will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2061 - NEUROMUSCULAR PT 1

Minimum Credits: 3

Maximum Credits: 3

First of a three part series of courses which introduce the student to basic neurological rehabilitation principles. Course intended to provide the student with knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information presented regarding motor behavior, motor control as it relates to normal/abnormal movement and function. Case studies and problem solving format will be used throughout this course.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2071 - RESEARCH METHODS IN PT

Minimum Credits: 2

Maximum Credits: 2

Purpose of this course is to instruct students in the basic principles of research in physical therapy. Topics to be covered include research methodology and study design, hypothesis testing, and principles of data collection and outcome assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2079 - MANAGEMENT OF THE MEDICALLY COMPLEX PATIENT

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2084 - SPECIAL TOPICS IN OSTEOARTHRITIS

Minimum Credits: 1

Maximum Credits: 2

The purpose of this course is to explore the literature on a variety of current issues related to osteoarthritis and the care of individuals with osteoarthritis.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2085 - ADVANCED THERAPEUTIC EXERCISE IN PT PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2086 - ADVANCED THERAPEUTIC EXERCISE IN PT PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This intermediate level course is designed to expand on the basic understanding of therapeutic exercise selection and application. Students will learn the clinical reasoning behind the selection of exercises to address specific musculoskeletal impairments. There will be an emphasis on the lab component of the course in order to emphasize and practice the proper techniques to ensure quality. There will be a specific focus on justification of exercise, exercise technique and modification, potential compensations, and dosing of exercise from the acute phase of injury to return to sport/function testing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2088 - SPECIAL TOPICS IN PT

Minimum Credits: 1

Maximum Credits: 1

This course will be divided into 2 separate and distinct modules. The purpose is to provide students with a fundamental understanding of 2 major areas that impact their future practice as physical therapists. The first module covers the clinical innovations and translation of emerging science(s) in the field of rehabilitation. In this portion students will be introduced to an understanding of the role of work being done in regenerative medicine and its impact on rehabilitation of musculoskeletal and neurological conditions. The second module covers the broad topic of psychologically informed physical therapy practice. Students will become familiar with cognitive behavioral therapy approaches as well as motivational interviewing techniques with the goal of enhancing their awareness of psychosocial factors that influence the patient outcomes. The content will also include information and training on the SBIRT model, designed to identify individuals across a continuum of substance abuse. The course will be delivered in a seminar based format with the expectation of students being engaged and interactive during the discussions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2089 - CLINICAL EDUCATION SEMINAR

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2092 - CLINICAL EDUCATION 2

Minimum Credits: 1

Maximum Credits: 8

Fourteen-week clinical education experiences conducted under the supervision of qualified physical therapists in a variety of practice settings to provide a wide range of professional learning opportunities in the provision of care and in teaching and where possible, opportunities to participate in the administration of services, quality assurance, clinical research activities, and supervision of physical therapist assistants and other supportive personnel.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2099 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2102 - PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course covers the principles of drug action for drugs related to: central nervous, respiratory, gastrointestinal, renal/cardiovascular, and endocrine systems. The mechanism of action and use of antibiotics will also be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2103 - RADIOLOGY-PHYSICAL THERAPISTS

Minimum Credits: 2

Maximum Credits: 2

This course will introduce the radiologic concepts with an emphasis on musculoskeletal and neurological imaging related to PT practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2107 - EVIDENCE BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines best practice patterns in clinical care and emphasizes basic concepts related to research such as reliability, internal and external validity, and study design. Critical appraisal of studies related to various PT interventions will be reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2108 - EVIDENCE IN PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2109 - EVIDENCE IN PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2110 - EVIDENCE IN PRACTICE 3

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2111 - DIFFERENTIAL DIAGNOSIS IN PT

Minimum Credits: 3

Maximum Credits: 3

This course will cover basic concepts of physical examination of the patient with neuro-musculoskeletal dysfunction. Fundamental examination skills and knowledge will be covered, including issues related to screening, review of systems, history, physical examination and clinical decision making.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2127 - FALLS AND BALANCE DYSFUNCTION: PT MANAGEMENT AND INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2141 - CLINICAL EDUCATION 1

Minimum Credits: 1

Maximum Credits: 8

First PT Clinical Course.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2142 - CLINICAL EDUCATION 2

Minimum Credits: 1

Maximum Credits: 8

This will be the second full time 6-week clinical education experience completed under the supervision of a qualified physical therapist. Following Clinical Education II, students will have completed an inpatient and an outpatient experience. Students will continue to develop their professional behaviors in the clinical setting as well as develop patient management skills and clinical reasoning. Students are expected to function as an integral part of the interprofessional healthcare team at their assigned facility. By the end of the experience, students will be expected to manage the patient with a familiar diagnosis in their setting independently while demonstrating appropriate professional behaviors.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Component: Clinical

Grade Component: Grad HSU Basis

PT 2158 - CUR EVIDENCE INTEGUMENTARY PRA

Minimum Credits: 2

Maximum Credits: 2

Theoretical frameworks underlying the examination, evaluation and treatment of patients with integumentary impairments will be discussed. The use of evidence-based clinical decision making will be emphasized in this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2172 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2173 - ADVANCED CLINICAL PRACTICE: THE UPPER QUARTER

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2180 - CUR EVIDENCE MUSCULSK PRACT 3

Minimum Credits: 3

Maximum Credits: 3

Theoretical frameworks underlying the examination, evaluation and treatment of patients with musculoskeletal impairments of the C-T spine will be discussed. The use of evidence-based clinical decision making will be emphasized in this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2181 - CUR EVIDENCE MUSCULSK PRACT 4

Minimum Credits: 3

Maximum Credits: 3

Theoretical frameworks underlying the examination, evaluation and treatment of patients with musculoskeletal impairments of the UE will be discussed. The use of evidence based clinical decision making will be emphasized in this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

Minimum Credits: 1

Maximum Credits: 1

continuation of EBP series

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

PT 2229 - KINESIOLOGY

Minimum Credits: 4

Maximum Credits: 4

An introduction to the foundations of biomechanics, musculoskeletal tissue mechanics, and therapeutic exercise that will provide the basic principles underlying the analysis of normal and pathological human movement with applications to the musculoskeletal system. This material will be presented in lecture format and will be supplemented by direct laboratory experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2231 - MUSCULOSKELETAL PT 1

Minimum Credits: 6

Maximum Credits: 6

This course is the first of the Musculoskeletal series. PT 2031 is an overview of the musculoskeletal causes and treatments of movement dysfunction related to the lower extremity. Lecture and laboratory sessions are used to develop competency in the knowledge of pathomechanics of musculoskeletal injuries, prevention, screening, patient evaluation, treatment planning and implementation. This course emphasizes the adaptation of this knowledge and skills into evidence based clinical decision making and assessment of treatment outcome for patients with lower extremity musculoskeletal dysfunction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2232 - MUSCULOSKELETAL PATIENT 2

Minimum Credits: 5

Maximum Credits: 5

This is the second of the Musculoskeletal series. PT 2232 is an overview of the musculoskeletal causes and treatments of movement dysfunction related to the upper extremity and spine. Lecture and laboratory sessions are used to develop competency in the knowledge of pathomechanics of musculoskeletal injuries, prevention, screening, patient evaluation, treatment planning and implementation. This course emphasizes the adaptation of this knowledge and skills into evidence based clinical decision making and assessment of treatment outcome for patients with musculoskeletal dysfunction in the upper extremity and spine.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2233 - MUSCULOSKELETAL PT 3

Minimum Credits: 4

Maximum Credits: 4

This is the final course of the Musculoskeletal series. PT 2233 is an advanced seminar in evaluative techniques, application and progression of therapeutic intervention. Lecture and laboratory sessions will consist of advanced seminars by the University of Pittsburgh Faculty. Specific topics related to task and movement analysis, advance spine and women's health concepts, pain and biopsychosocial influence, soft tissue and myofascial techniques. The final section of this course will be dedicated to ergonomics and its influence on musculoskeletal injuries. In this section, students will be introduced to human factors in industry, workplace design, evaluation of work demands, biomechanical analyses of work, work hardening and return to work principles. Being the culmination of the Musculoskeletal series, competency will be assessed with written exams, and a comprehensive musculoskeletal oral practical examination. Upon completion of PT 2233, students will be able to demonstrate knowledge of, and be able to implement the most current clinical practice guidelines in musculoskeletal physical therapy practice as it pertains to the Spine, Upper Extremity and Lower Extremity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2241 - PATIENT MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to physical therapy assessment and intervention using a model of patient/client management as described in the Guide to Physical Therapist Practice. Using this model, common foundational skills of physical therapist practice will be addressed, from preparing for patient/client interaction, to examination and treatment skills. Topics include history and interview skills, body mechanics, and positioning of the patient/client. Students will develop skills in mobility training and activity progression using transfer techniques, gait training and basic manual wheelchair prescription. An overarching theme is the concept that empathy for the patient experience, combined with excellent clinical skills, creates expertise in caregiving, an essential quality in the physical therapy profession. At the completion of this course, students will have a solid framework for patient/client management that can be used across a variety of practice settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2242 - PATIENT MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This course provides instruction in physical therapy interventions used to help alleviate movement dysfunction and pain in a variety of patient populations. Content includes: upper and lower extremity orthotic and prosthetic intervention, pathological processes and physical therapy management for patients with amputations cancer, wounds, burns, and arthritis, and intervention for issues in Women's Health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2243 - PATIENT MANAGEMENT 3

Minimum Credits: 2

Maximum Credits: 2

This course is the last in the Patient Management series. There are two major units: Amputations and Prosthetics and Management of Chronic Disease. Topics which emphasize the role of the physical therapist in successful recovery and long-term management include diabetes management, cancer rehabilitation, arthritis, and autoimmune disorders. Students will continue to practice examination, evaluation and treatment planning skills learned in Patient Management 1 and 2, while considering the self-management needs of patients and clients with these conditions. Using standardized patients, students will also participate in a formative assessment of their ability to guide patients in self-management skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2255 - GROWTH & DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate. Emphasis on systems-based growth and development and impact through the lifespan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2261 - NEUROMUSCULAR PT 1

Minimum Credits: 4

Maximum Credits: 4

This is the first of a three-part series of courses which introduce the student to basic neurological rehabilitation principles. This course is intended to provide the student with the knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information will be presented regarding motor behavior and motor control as it relates to normal and abnormal movement and function. Case studies and a problem-solving format will be used throughout this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2262 - NEUROMUSCULAR PT 2

Minimum Credits: 4

Maximum Credits: 4

This course is a continuation of PT 2261 and is an overview of adult neurological diseases. The symptoms/prognosis, typical functional limitations, and evaluation/intervention will be discussed. This course requires synthesis of previous knowledge in order to effectively manage the client's movement dysfunction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2263 - NEUROMUSCULAR PT 3

Minimum Credits: 2

Maximum Credits: 2

This course is a continuation of PT 2261 and PT 2262. This course combines the theoretical knowledge of neuromuscular dysfunction previously learned with treatment application. The causes of dysfunction, assumptions of treatment approaches, and management of patients with neuromuscular dysfunction are emphasized. This course also covers the assessment and management of patients with disorders of balance and postural control. The course requires synthesis of previous knowledge in order to effectively manage the client's movement dysfunction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2281 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 1

Minimum Credits: 2

Maximum Credits: 2

This course is the first in a series of three (3) that examines the professional practice of physical therapy. The content focuses on professionalism, code of ethics, regulatory agencies governing practice, standards of conduct and practice act(s). In addition, it provides an introduction to documentation, the health care industry, payers, and the continuum of care and how they relate to the physical therapy profession. The course series presents management principles for effective and efficient patient care services by providing knowledge of health care systems, organizational structures and functions, and personnel management policies in the environments of practice. Standards of practice including legal, licensure, accreditation, fiscal, ethical, documentation, reimbursement and regulatory, and information management technologies are considered. Entry level students are prepared for writing resumes, job interviews, job searches and for continuing their professional development after graduation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2282 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a series of three (3) that examines the environment and conduct of the professional practice of physical therapy. The primary focus will be upon leadership and management principles, styles and primary functions essential to practice management. In addition, we explore professional development and career preparation. Finally, we will explore effective teamwork dynamics, communication and conflict management strategies and styles. Learning experiences consist of readings, lectures, and discussions as well as three practical applications: case study using The Guide, resume and cover letter preparation, and a leadership development plan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2283 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 3

Minimum Credits: 2

Maximum Credits: 2

This course is the third in a series of three (3) that examines the environment and conduct of the professional practice of physical therapy. We will be exploring the healthcare continuum in which we as physical therapists practice. We will be examining the rules, regulations, laws, payer requirements, accrediting agencies' quality and safety standards, corporate compliance programs, leadership and management principles, and the "business" of rehabilitation. We will apply and integrate the concepts learned into real- life group projects and written examinations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2291 - EVIDENCE BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

Course will introduce research methods and statistics and a critical appraisal framework necessary to interpret and critique clinical research related to

PT interventions. Course will integrate classroom lecture and small-group article discussion to help students learn how research evidence impacts the practice of PT. Emphasis of course will be interpreting research evidence on PT interventions to inform clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2292 - EVIDENCE BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

This is the second course in the Evidence Based Practice Series and emphasizes the interpretation and appraisal of research evidence as it relates to diagnosis and prognosis in PT practice. The course will introduce research methodology and statistics necessary to interpret and critique clinical research related to PT diagnosis and prognostic issues. Students will read, interpret and critique a variety of peer-reviewed articles related to PT diagnosis and prognosis issues and will be able to discuss and describe their application to clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2293 - EVIDENCE BASED PRACTICE 3

Minimum Credits: 2

Maximum Credits: 2

This course will focus on aspects of evidence-based practice related to quality and process improvement and its relationship to the process of care and outcomes management. There will be a focus on translating and implementing contemporary approaches to quality improvement into the clinical environment. Students will be able to develop mechanisms to gauge (1) compliance; (2) adherence to standards of care and (3) outcome assessment as the basis for clinical performance assessment. Furthermore, students will be able to describe and apply essential quality improvement principals to improve the process and outcomes of physical therapy practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2555 - BIOMECHANICS OF BALANCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PROG: Sch Hlth & Rehabilitation Scs or School of Medicine or Swanson School of Engineering; LEVEL: Graduate

PT 2556 - INTERFACING ENGINEERING TECHNOLOGY AND REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce the student to the emerging trends in rehabilitation technologies. Students and faculty will participate in active discussion regarding research directions currently taking place to further develop applied rehabilitation technologies as well as discuss methods to modify and measure responses in clinical situations using these technologies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2922 - TEACHING INTERNSHIP

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

Physician Assistant Studies

PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION

Minimum Credits: 1
Maximum Credits: 1

This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the PA role in health care delivery, competencies integral to the PA profession; political and legal factors that affect PA practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2102 - HUMAN ANATOMY

Minimum Credits: 4
Maximum Credits: 4

This course with a lab studies the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention. The lectures are designed to provide guidance or explain difficult or conceptual material. The major learning experience occurs in the laboratory with cadaveric dissection.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2103 - MEDICAL PHYSIOLOGY

Minimum Credits: 4
Maximum Credits: 4

This course is an introduction to the physiology and microanatomy of the human body, and as such its major objectives are to give students an appreciation of both the normal functioning and the structure of tissues and organs. In accomplishing this goal, it is desirable for students to correlate lecture information pertaining to cell and organ system physiology with laboratory exposure to the histology and ultra structure of human tissues and organs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE

Minimum Credits: 1
Maximum Credits: 1

This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic

knowledge and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician assistant students must be familiar with the most common clinical genetic diseases, as well as the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, pa students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed lifelong learners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2105 - HEALTH POLICY

Minimum Credits: 2

Maximum Credits: 2

This course introduces the student to how the health care system works. The focus is on basic principles of health policy, system failures. Topics include reimbursement, access to health care, workforce, quality assurance, long-term health care. In addition, topics will include public policy, funding issues, healthcare disparities, managed care and the medically underserved. The course will conclude with an opportunity to review and discuss moral and ethical issues in healthcare from the perspective of a physician assistant.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE

Minimum Credits: 1

Maximum Credits: 1

This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course will stress the knowledge and skills necessary for locating, interpreting, evaluating and applying quality medical research to clinical practice and professional development; the ability to appropriately critique medical literature; and the basic comprehension needed for participation in research and the development of research and grant proposals. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2107 - PATIENT EDUCATION AND COUNSELING

Minimum Credits: 2

Maximum Credits: 2

This course is a practical approach to understanding how patients present, learn and change based on the research on theories, models and techniques of: personality and learning styles; how to assess patient knowledge, attitude and readiness to change; and the effects of literacy, health literacy, individual coping mechanisms, ecological barriers and culture on patient comprehension and adherence. The use of validated interpersonal skills improves the clinician/patient relationship, demonstrates respect for the patient's well-being and individuality, thereby reducing medical errors and lawsuits, and increasing patient adherence. Self-reflection on the student's own barriers, biases, stereotypes, culture and assumptions is required. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2108 - INTRODUCTION TO CLINICAL MEDICINE WITH LAB

Minimum Credits: 3

Maximum Credits: 3

This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. Students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Presented by clinicians from various specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. Students will also learn the head to toe physical examination. The laboratory component of this course will focus on patient interviewing, patient communication, and case-based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2109 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course integrates the specific characteristics and mechanisms of normal and abnormal functioning of tissues and organs of the human body organized in a systems-based approach. This includes principles of cell and organ physiology, and the disruption of normal homeostatic mechanisms that progresses beyond the compensatory capabilities of the human body.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the basic interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications. Students will learn the clinical significance of the physical examination, the components of the complete physical exam and will be able to perform these examination techniques. Topics in this course will include: a general overview of history taking and physical examination; clinical reasoning; documentation; interviewing skills; the general survey; skin; the head and neck; the lungs; and the abdomen.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2202 - CLINICAL MEDICINE 1

Minimum Credits: 3

Maximum Credits: 3

This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes infectious diseases, dermatology, disorders of the head, eyes, ears nose and throat, cardiopulmonary disorders, and endocrinopathies. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include methods of wound care and closure, burns, hyper/hypothermia, assessment of pulmonary function, arterial blood gases, ENT procedures, bioterrorism, radiology. The laboratory component of this course will allow the student to practice the skills and procedures common to PA practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2204 - PHARMACOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This course presents a study of drugs and their interactions with and within living tissue to build the foundation of safe and effective prescribing. This course introduces the student to general drug classifications and pharmacological principles including mechanism of action, indications, dosing, pharmacodynamics, and therapeutic parameters, and patient education about commonly prescribed drugs. Topic areas covered include endocrinology, dermatology, pulmonology, gastroenterology, ears/eyes/nose/throat, inpatient infectious disease, and immunology. Each of these topics will be explored through lecture, class discussions, patient cases, and prescription writing exercises.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2205 - PATHOPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the biological basis of common clinical disease states. Pathophysiology is treated as a disruption of normal homeostatic mechanisms that progresses beyond the normal compensatory capabilities of the human body.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications as they pertain to the specific organ systems presented. The students will learn the clinical significance of the physical examination, the components of the physical exam and will be able to perform these examination techniques for the material introduced in this course. Topics in this course will include: a general overview of history taking and physical examination as it pertains to course content; clinical reasoning; documentation; interviewing skills; and the cardiovascular, female/male genitalia, musculoskeletal, neurological, and psychiatric systems; and assessment of the pregnant patient.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2302 - CLINICAL MEDICINE 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of Clinical Medicine I and is an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes disorders of the GI system, obstetrics and gynecology, nephrology, disorders of the urinary tract, musculoskeletal diseases, neurology, behavioral medicine, and hematology/oncology. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include GI procedures, NG tube placement, intravenous placement, central line monitoring, bladder catheterization, musculoskeletal procedures, immobilization, joint injection, lumbar puncture, electrocardiography, transfusion medicine. The laboratory component of this course will allow the student to practice the skills and procedures common to pa practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2304 - PHARMACOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course continues the study of drugs and their interactions with and within living tissue to build the foundation of safe and effective prescribing. This course reinforces general drug classifications and pharmacological principles including mechanism of action, indications, dosing, pharmacodynamics, and therapeutic parameters, and patient education about commonly prescribed drugs. Topic areas covered include cardiology, genitourinary, musculoskeletal, rheumatology, neurology, and psychology. Each of these topics will be explored through lecture, class discussions, patient cases, and prescription writing exercises.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN

Minimum Credits: 2

Maximum Credits: 2

This course introduces the physician assistant student to diseases, exam findings and diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using a variety of teaching techniques including both traditional lectures as well as cooperative and collaborative group work. Case studies will be presented to reinforce course content and form the discussion in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PAS 2306 - FUNDAMENTALS OF SURGERY

Minimum Credits: 1

Maximum Credits: 1

A series of lectures introduces fundamental principles of peri-operative medicine, procedure oriented patient evaluations, preoperative assessment, prevention of post-operative complications, surgical instrumentation, operative techniques, anesthesia, pre- and post-operative management of patients, post-operative complications, co-morbid states, and documentation. The history of the physician assistant in surgery, including surgical reimbursement issues will be discussed. Selected topics will include the most commonly performed surgical procedures as well as issues relevant to various surgical sub-specialties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2401 - INTRODUCTION TO THE PA PROFESSION

Minimum Credits: 1

Maximum Credits: 1

This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the PA role in health care delivery, competencies integral to the PA profession; political and legal factors that affect PA practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed. Each of these topics will be explored lectures, class discussions and written assignment.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2402 - HUMAN ANATOMY AND LAB

Minimum Credits: 4

Maximum Credits: 4

This 4-credit course uses small group discussion and dissection to study the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2403 - HEALTH POLICY

Minimum Credits: 2

Maximum Credits: 2

This course introduces the student to how the health care system works. The focus is on basic principles of health policy, the health care system and system failures. Topics include reimbursement, access to health care, quality assurance, public health, health care disparities. The course also includes a discussion of ethical principles as they relate to the practicing medical professional. Students will have the opportunity to research and present topics related to the course as well as discuss current health policy topics in a group setting.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2404 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE

Minimum Credits: 1

Maximum Credits: 1

This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course provides the knowledge and skills necessary for locating, interpreting, critiquing and applying medical research to clinical practice and professional development. This course will highlight methods for identifying quality medical literature, with a focus on the strengths and limitations of various study designs and statistical analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2405 - INTRODUCTION TO CLINICAL MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. Students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Measures to assist in disease prevention and mitigate healthcare disparities will also be discussed. The course combines asynchronous content with interactive case-based live sessions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2406 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course integrates the specific characteristics and mechanisms of normal and abnormal functioning of tissues and organs of the human body organized in a systems-based approach. This includes principles of cell and organ physiology, and the disruption of normal homeostatic mechanisms that progresses beyond the compensatory capabilities of the human body.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PAS 2407 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE

Minimum Credits: 1

Maximum Credits: 1

The understanding of genetic and molecular medicine as it applies to clinical practice is the focus of this course. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of, precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician Assistant students must be familiar with the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, PA students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed life-long learners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2408 - PATIENT EDUCATION AND COUNSELING

Minimum Credits: 2

Maximum Credits: 2

The successful Physician Assistant prides herself/himself on being able to communicate effectively with patients. This course will begin to cultivate the crucial skills of patient communication and health counseling. Students will be exposed to theory regarding patient adherence, health literacy and communication methods for various population groups as well as education on specific topics they will encounter as they navigate patient-clinician relationships in the future.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2409 - HISTORY TAKING AND PHYSICAL EXAMINATION 1 AND LAB

Minimum Credits: 3

Maximum Credits: 3

This course section introduces the student to the basic interviewing, physical exam, and documentation skills necessary to complete an appropriate subjective and objective assessment of a patient. Topics will be arranged by systems and will parallel the systems covered in other concurrent coursework. Systems covered in this course include head, eyes, ears, nose and throat (HEENT), dermatologic, abdominal, and pulmonary. This course will also briefly cover billing and coding as it relates to documentation. This course contributes key knowledge and skills that will enable students to achieve competency in patient-centered practice knowledge and health literacy and communication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2410 - CLINICAL MEDICINE 1 AND LAB

Minimum Credits: 3

Maximum Credits: 3

This course will include a series of lectures on fundamental principles of disease, diagnosis, intervention and management. The course promotes a working knowledge base for correlating the relationship between signs and symptoms of disease, the etiology of disease, diagnostic work up and the medical rationale for selected management regimes. The lab portion of the course will be largely case based and focus on clinical decision making.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2411 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1 AND LAB

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of diagnostic and therapeutic procedures I and provides ongoing knowledge of clinical/diagnostic and therapeutic skills that are commonly performed in patient care. Students will be introduced to the basic diagnostic and therapeutic procedures that they may perform while in clinical practice. Each student is given the opportunity to practice certain basic clinical procedures in the laboratory setting, using universal precautions, prior to performing the procedure on the actual patient. Students will become familiar with the indications, contraindications, complications, and interpretations associated with the various clinical procedures that they will perform.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2412 - PHARMACOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This course involves the study of pharmacology therapeutics and designed to provide the students the knowledge necessary to make clinical decisions regarding pharmaceuticals in their practice. This course will include the study of the effects of drugs on the body and their ability to modify disease states. The focus will be on determining the appropriate drug therapy using all available patient information.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2413 - HISTORY TAKING AND PHYSICAL EXAMINATION 2 AND LAB

Minimum Credits: 3

Maximum Credits: 3

This course section builds off H&P I to provide the student with the basic interviewing, physical exam, and documentation skills necessary to complete an appropriate subjective and objective assessment of a patient. Topics will be arranged by systems and will parallel the systems covered in other concurrent coursework. Systems covered in this course include cardiovascular, musculoskeletal genitourinary, breast and axillae, and the gravid female patient. This course will also briefly cover billing and coding as it relates to documentation. This course contributes key knowledge and skills that will enable students to achieve competency in patient-centered practice knowledge and health literacy and communication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C' for All Listed Courses)

PAS 2414 - CLINICAL MEDICINE 2 AND LAB

Minimum Credits: 3

Maximum Credits: 3

This course will include a series of lectures on fundamental principles of disease, diagnosis, intervention and management. The course promotes a working knowledge base for correlating the relationship between signs and symptoms of disease, the etiology of disease, diagnostic work up and the medical rationale for selected management regimes. The lab portion of the course will be largely case based and focus on clinical decision making.

PAS 2416 - PHARMACOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course involves the study of pharmacology therapeutics and designed to provide the students the knowledge necessary to make clinical decisions regarding pharmaceuticals in their practice. This course will include the study of the effects of drugs on the body and their ability to modify disease states. The focus will be on determining the appropriate drug therapy using all available patient information.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2417 - HEALTH ISSUES ACROSS THE LIFESPAN

Minimum Credits: 2

Maximum Credits: 2

The well-trained physician assistant is able to competently treat patients of all ages based upon a clear understanding of health issues and diseases as they exist within the context of the patient's lifespan. This course introduces the physician assistant student to disease processes, exam findings, diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using various teaching techniques including traditional lecture, class discussion and completion of electronic curriculum modules.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C' for All Listed Courses)

PAS 2418 - FUNDAMENTALS OF SURGERY

Minimum Credits: 1

Maximum Credits: 1

This course introduces students to the fundamental principles of perioperative medicine, including how to care for the surgical patient, operative equipment and techniques, anesthesia, common postoperative complications and methods for prevention, and documentation. Selected topics will include the most performed surgical procedures as well as issues relevant to various surgical subspecialties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C' for All Listed Courses)

PAS 2421 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2422 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2425 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2426 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2427 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2428 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8

Minimum Credits: 4

Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults,

and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2429 - TRANSITION TO PROFESSIONAL PRACTICE

Minimum Credits: 5

Maximum Credits: 5

This course combines instruction on practical issues as they relate to the practicing PA, especially new graduates, with evaluation instruments that measure if and verify that the learner has met the learning outcomes of the program and has the knowledge, interpersonal skills, clinical and technical skills, professional behaviors, clinical reasoning and problem-solving abilities required for PA practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2701 - CLINICAL ROTATION 1

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2702 - CLINICAL ROTATION 2

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2703 - CLINICAL ROTATION 3

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-

defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2704 - CLINICAL ROTATION 4

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2705 - CLINICAL ROTATION 5

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2706 - CLINICAL ROTATION 6

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2707 - CLINICAL ROTATION 7

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-

defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2709 - CLINICAL ROTATION 9

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2712 - SUMMATIVE EVALUATION

Minimum Credits: 1

Maximum Credits: 1

The summative evaluation is designed to assure that each student has met ARC-PA and the program's defined cognitive and clinical skills performance objectives prior to graduation. In addition to assessing the student's proficiency by individual competencies we will be assessing student performance through the interaction of the program specific competencies. The summative evaluation includes measurement of the dimensions of cognition, technical skill, integration, rapport, behavior and attitude. The evaluation is comprised of an objective examination of medical knowledge, procedural skill through clinical skills evaluation, and objectively structured clinical examinations to evaluate interactions between the student and patient (history taking, physical examination and clinical reasoning) assessment of critical thinking and professional behavior. Students are required to pass this course in order to graduate from the program.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2713 - CLINICAL ROTATION 8

Minimum Credits: 4

Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2714 - TRANSITION TO PROFESSIONAL PRACTICE

Minimum Credits: 5

Maximum Credits: 5

This course combines instruction on practical issues as they related to the practicing physician assistant, especially the new graduate, with evaluation

instruments that measure if and verify that the learner has met the learning outcomes of the program and has the knowledge, interpersonal skills, clinical and technical skills, professional behaviors, and clinical reasoning and problem solving abilities competencies required for physician assistant practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PAS 3001 - CORE CONCEPTS OF SCHOLARLY PRACTICE

Minimum Credits: 4

Maximum Credits: 4

This course provides the theoretical foundations for the emerging scholar-practitioner to conceptualize the doctoral capstone project. The course provides an understanding of becoming a scholar-practitioner and the tools to identify, frame, and consider ways to thoughtfully engage in systematic inquiry focused on important problems of practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3002 - EXAMINING SUPPORTING EVIDENCE

Minimum Credits: 4

Maximum Credits: 4

At the center of practitioner scholarly inquiry is the ability to use data to understand the effects of innovations that seek to improve problems found in practice. This course will prepare learners to engage the literature to help frame their area of inquiry. Learners will use primary and other professionally appropriate sources to support the implementation of quality improvement projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3003 - INTERNSHIP EXPERIENCE 1

Minimum Credits: 6

Maximum Credits: 6

Learners will apply classroom-based concepts in the clinical, academic, or administrative setting with an emphasis on exploring areas for enhanced implementation strategies or improvement and organizational analysis.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3004 - PERSONALIZED ELECTIVE

Minimum Credits: 4

Maximum Credits: 4

This course gives learners the option for an academic or administrative focus. Learners will broaden their understanding of program concepts through a combination of didactic instruction and experiential learning. This course will give learners the opportunity to apply knowledge and build professional networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3005 - SCHOLARLY PRACTICE CAPSTONE PHASE 1

Minimum Credits: 4

Maximum Credits: 4

Learners will design and initiate a project to implement evidence-based knowledge in partnership with stakeholders and an academic mentor to improve health care practice. This phase of the capstone project includes project development and approval, stakeholder engagement, faculty guidance and feedback, and project implementation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3006 - INTERNSHIP EXPERIENCE 2

Minimum Credits: 6

Maximum Credits: 6

Learners will apply classroom-based concepts in the clinical, academic, or administrative setting with an emphasis on enhancing the focus of their personalized elective.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad Letter Grade

PAS 3007 - SCHOLARLY PRACTICE CAPSTONE PHASE 2

Minimum Credits: 8

Maximum Credits: 8

Learners will complete and analyze the results of their project implementation to demonstrate the synthesis of integrated learnings. This phase of the capstone project includes the delivery of findings through both an oral presentation to and collegial discussion with an audience of academic peers, faculty and/or professional colleagues, as well as a written defense.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PAS 3008 - INTERNSHIP EXPERIENCE 3

Minimum Credits: 6

Maximum Credits: 6

Learners will apply classroom-based concepts in the clinical, academic, or administrative setting that emphasizes reflection on the implementation of change processes and their iterations.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Physics

PHYS 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PHYS 2101 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHYS 2341 - THERMODYNAMICS AND STATISTICAL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
The properties of matter as described by thermodynamics, in which atomic structure is irrelevant, and by statistical mechanics, which is based on the atomic point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2370 - INTRODUCTION TO QUANTUM MECHANICS 1

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to quantum mechanics for first-year graduate students who have not taken such a course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2371 - INTRODUCTION TO QUANTUM MECHANICS 2

Minimum Credits: 3
Maximum Credits: 3
Physics 2371 will be a continuation of the material covered in Physics 2370 with special emphasis on applications of quantum mechanics. Topics to be covered are: multi-particle systems, time-independent perturbation theory and its application to the fine-structure and hyperfine structure of atoms, time-dependent perturbation theory and its application to the absorption and emission of light, and other approximation methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2372 - ELECTROMAGNETIC THEORY

Minimum Credits: 3
Maximum Credits: 3
Advanced topics, including boundary-value problems and radiation theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2373 - MATHEMATICAL METHODS IN PHYSICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2513 - DYNAMICAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

The Lagrangian and Hamiltonian formulations of classical mechanics will be emphasized. Some of the topics that will be treated are conservation, theorem, small oscillations, rigid-body motion, canonical transformation, and an introduction to the theory of chaotic motions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2541 - THERMODYNAMICS AND STATISTICAL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a 2-term course with emphasis on statistical mechanics. Discussion of microcanonical, canonical, and grand canonical ensembles, the passage to quantum mechanics, and the use of density matrix. The Gibbs approach to the second law. Fermi-Dirac and Bose-Einstein statistics, in both weak and strong degeneracy approximations. Transport phenomena including the fluctuation dissipation theorem and the master equation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2555 - ADVANCED CLASSICAL ELECTRICITY AND MAGNETISM

Minimum Credits: 4

Maximum Credits: 4

This is the first term of a two-term study of Maxwellian electromagnetism. Both the physical concepts involved and the mathematical formulation of the theory will be explored. The theory will be applied to a variety of physical systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2565 - NON-RELATIVISTIC QUNTM MECHANC 1

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two-term course. Subjects covered include the general principles of wave mechanics and matrix mechanics, Dirac notation, the solution of bound state problems, especially the central force problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2566 - NON-RELATIVISTIC QUNTM MECHANC 2

Minimum Credits: 3

Maximum Credits: 3

The second term of this course applies the previously developed abstract form of quantum mechanics to more complicated systems. Angular momentum and permutation symmetries are discussed. Approximation methods for multiparticle and scattering problems are developed. Finally the theory of electromagnetic radiation by atoms is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment.

PHYS 3542 - ADVANCED STATISTICAL PHYSICS

Minimum Credits: 3
Maximum Credits: 3

Statistical physics typically deals with the thermal properties of systems with large numbers of interacting dynamical variables, i.e., With many degrees of freedom, and the special techniques used to determine those properties. As such, the ideas, methodologies and results from the study of statistical physics inform virtually all fields of physics, from condensed matter and solid state to astrophysics and cosmology. This course is aimed at a wide audience of primarily second year (and more senior) graduate students with interests in experimental or theoretical physics and astrophysics/cosmology. The aim is to provide a broad perspective of the concepts and techniques of statistical physics, which, as noted, cut across many areas of active research. Depending on the composition of the class, an attempt will be made to include some examples from different disciplines. Topics to be covered (depending somewhat on the background and interests of individuals in the class) include: a review of ideal quantum gases (Sommerfeld model of a metal; Bose-Einstein condensation; magnetism in Fermi systems (Landau levels, Hall effect); white dwarf stars); fluctuations and response; phase transitions and critical phenomena (experimental survey; criticality = a new state of matter?); Phenomenology (mean field theories, Landau theory, classification); order parameters, scaling, fluctuations, response, universality, broken symmetry; renormalization group overview as a mechanism; interacting systems (brief introduction to second quantization; weakly interacting Bose gas (broken symmetry, excitation spectrum, superfluidity); bcs as a mean field theory; nonequilibrium, stochastic processes (Brownian motion and diffusion; fluctuation/dissipation; Markov processes, master equation; Boltzmann equation and fluid mechanics).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3707 - INTRODUCTION TO MANY-BODY PHYSICS

Minimum Credits: 3
Maximum Credits: 3

It is difficult to find a current topic in physics that doesn't deal with many interacting degrees of freedom. The universe of such problems is conveniently divided into ones in which quantum descriptions are essential and others in which a classical description will suffice. Despite this seeming division, the ideas and concepts cross over; an example is the idea of a field description. Very similar effective field theories describe a superconductor at low temperatures, a quantum system, and a classical system like a quantity of liquid argon coexisting with its vapor. Concepts, for example, of broken symmetry and gauge invariance are portable. Many of the same general concepts and techniques carry over from one subfield to another; a number of examples can be cited and will be mentioned at appropriate points during the course. This is a one-term nuts-and-bolts introduction to the quantum physics of interacting, many-particle systems. The course includes second quantization, many body physics and a brief introduction to relativistic quantum mechanics. The approach will generally be intuitive and hands-on. The course typically will begin with second quantization for fermionic and bosonic systems, with examples typically involving electrons, phonons and photons, arising from the quantization of

the electromagnetic field. Applications will typically include (i) the interacting electron gas and plasmons (ii) the interaction of the radiation field and matter, (iii) electron phonon interaction, dressed electrons and the polaron problem. There will typically be some discussion of condensation phenomena and superfluidity (typically Bogoliubov theory, broken symmetry and goldstone bosons); superconductivity (pairing, BCS and Landau-Ginzburg theories). There will generally be some exposure to greens functions and Feynman diagrams. In addition the course will include a brief introduction to relativistic quantum mechanics and the Dirac equation. Throughout there will be discussion of applications of the techniques and concepts in various subfields of physics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3715 - SOLID STATE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is a one-term course on the ideas of solid-state physics, emphasizing the special ways one must think about crystalline materials. This is a mature subject, but continuously, over more than seven decades, new ideas and phenomena have emerged. In one term we can only consider the basic ideas along with a few more recent developments to enable students working in solid state physics, condensed matter, nanoscience and related fields to approach the voluminous literature and enhance their own research efforts, and also to allow other students to have an appreciation for an extremely large part of current research activity in physics. Roughly speaking, there will be three parts to the course: some variation on emphasis can be expected depending on the instructor and on the interests of the class. (I) phonons: crystal lattices; diffraction and scattering; reciprocal lattice; lattice vibrations, quantization; thermal properties. (Ii) electrons: free electron model; density of states; thermal properties; Bloch's theorem, electron states and energy bands; semiconductor statistics; quasi-classical electron dynamics; Boltzmann equation and transport. (Iii) additional topics: electron-electron and electron-phonon interactions; hall effect; landau levels; superconductivity; electromagnetic response.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3716 - ADVANCED SOLID STATE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is a second, graduate level solid state course. The topics could be adjustable given the cross section of the department and topical developments in the field. Depending on the makeup of the department, the scope (and title) could be broadened. Topics suitable for this course include: a brief exposure to 'practical' group theory (1-2 weeks maximum); optics and spectroscopy relevant to the solid state (including linear and non-linear response and complex dielectric constant); coherence and correlation (including the density matrix, Bloch equations, optics); introduction to NMR (e.g. Two-level system, rotating reference frame, characteristic times); superconductivity ii (e.g. Type ii, magnetic effects) beyond the Ginsburgh-Landau theory (done in statistical physics ii); magnetism ii (more advanced topics: using model and phase transitions done in statistical physics ii, spin waves and landau levels in solid state physics i); transport theory ii (i.e. Beyond the basic Boltzmann equation examples in solid state physics i).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3717 - PARTICLE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two term sequence exposing the student to basic methods and recent developments in high energy physics. Particle physics involves completely relativistic phenomena and requires the generalization of non-relativistic quantum concepts to the relativistic regime in order to develop the phenomenological and calculational methods suitable for relativistic processes in which the number and type of particles can change. The student will be taken out of the realm of the Schroedinger equation and into relativistic quantum fields. The first term is suitable as a one semester course for students not specializing in high energy physics. The course examines experimental and phenomenological foundations of particle physics. The known particles and fundamental interactions are investigated. Modern experimental techniques of particle physics are discussed (including basic properties of particle interactions with matter). General features of electromagnetic, weak, and strong interactions, and their associated symmetries, are explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3718 - ADVANCED PARTICLE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is the conclusion of the 2-term sequence PHYS 3717/3718. This course covers the standard model in detail and includes: the phenomenology of weak interactions; group theory and the quark model; the parton model for deep inelastic scattering and other high energy processes; an introduction to gauge theories of electroweak and strong interactions. Various topics of current interest in particle physics beyond the standard model will also be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3725 - GENERAL RELATIVITY 1

Minimum Credits: 3

Maximum Credits: 3

This course will cover the basic conceptual foundations of general relativity, calculational techniques, and current observational probes. Topics include the equivalence principle, geodesic deviation, tidal forces, the description of gravitation as spacetime curvature, and Einstein's equations. These ideas will be applied to current observations, including post-Newtonian parameters and solar system probes, the Schwarzschild metric and black holes, gravitational wave generation and detection, gravitational lensing, and gravitational explanations for dark energy phenomenology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3726 - GENERAL RELATIVITY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second term of a two-term survey of general relativity. Subjects to be treated during the year include conservation laws, equations of motion, gravitational radiation, gravitation collapse, and cosmology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3730 - INTRODUCTION TO BIOPHYSICS

Minimum Credits: 3

Maximum Credits: 3

The post genomic age presents many new challenges and opportunities to physicists. This course will prepare the students to face those challenges and to work in this exciting multidisciplinary area of science. In this course we will review useful physical ideas and techniques that have contributed significantly to the recent development in biophysical research. This includes the use of statistical approaches for understanding gene regulation and signal transduction in biological and chemical networks; nonlinear dynamics for understanding biological pattern formation, ecology, and population dynamics; hydrodynamics for understanding cell motility and taxis; and information theory for signal processing in neuronal networks. The study of biophysics thus requires a broad range of physics knowledge and techniques. The course will also introduce basic concepts in biology that range from molecular to cellular biology. Topics to be covered include: introduction to biology; microscopy techniques; basics of cell biology; genetics (the genetic code, gene replication, gene expression, genetic networks); molecular biology techniques; energy in biological systems and the statistical view of biological dynamics; entropy and free energy in biology; two-state models in biology and neurobiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3765 - FIELD THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This is the first semester of a graduate course in quantum field theory. The assumed prerequisites are a basic graduate course in quantum mechanics,

and familiarity with the rudiments of special relativity. The course develops the perturbative approach to relativistic field theory. It begins with a study of the Lorentz group and the method of second quantization. Scalar and spin-1/2 field theories are discussed, including an elementary introduction to renormalization (at the one-loop level). The theory of interacting electrons and photons (qed) is constructed, with applications to a number of physical processes. In more detail, the topics covered will be: Lorentz and poincare groups; free scalar field theory; free spin-1/2 field theory; field quantization; symmetries and conservation laws; interacting scalar field theories, Yukawa theory; perturbation theory and Fynman rules; elementary renormalization theory; quantum electrodynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3766 - FIELD THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second semester of a graduate course in quantum field theory. It builds on the material covered in phys 3765 (field theory 1). The course further develops the techniques of relativistic quantum field theory, covering the path integral approach to field theory, additional topics in quantum electrodynamics, symmetry breaking, non-abelian gauge theories, and the standard model. In more detail, the topics covered will be: green's functions, asymptotic scattering theory, and the lsz formalism; functional integration and the path integral; quantization of abelian (qed) and non-abelian (yang-mills) fields; the renomalization group; spontaneous symmetry breaking of global and local symmetries; the standard model.

Plastic Surgery

PLSSURG 5450 - PLASTIC RECONSTRUCTIVE SURGERY

Minimum Credits: 0
Maximum Credits: 0
Four-week elective. Student participates in clinical care of patient on plastic surgical service, in acute management of facial and hand injuries in ER or OR. Also involved in pre- and post-operative care. Act as assistant in elective plastic surgery operations in wide variety of conditions. Instruction given in biology of wound healing and fundamental techniques of plastic surgery. Emphasis on scope and interaction of plastic surgery with other specialties and various methods of reconstruction available for various deformities.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5883 - SURGICAL RESEARCH

Minimum Credits: 0
Maximum Credits: 0
Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5899 - INDEPENDENT STUDY PLASTIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PLSSURG 5901 - EXTRAMURAL PLASTIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in plastic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Political Science

PS 2000 - THE PROFESSION OF POLITICAL SCIENCE

Minimum Credits: 1

Maximum Credits: 1

This course is a professionalization seminar in which first-year graduate students meet weekly with various faculty members to discuss various issues surrounding political science as a profession. Topics will include writing a dissertation, the publication process, teaching, work-life balance, and other issues.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2010 - FOUNDATIONS OF QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2020 - EMPIRICAL METHODS OF RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques

common in political research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2030 - POLITICAL RESEARCH AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide the student with (1) the ability to read, interpret, and criticize virtually any piece of political science research using quantitative methods and (2) the ability to design and carry out original research applying quantitative methods to relevant data.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2040 - CORE POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar in political thought forms one of the core requirements of the graduate program in political science. Its aim is to introduce graduate students to the traditional concerns of the subfield of political theory and to explore the relevance of this subject matter even to political scientists who do not choose to specialize in it.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Global Studies, West European Studies

PS 2060 - QUALITATIVE RESEARCH: DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PS 2116 - COMPARATIVE PUBLIC ADMINSTRTN

Minimum Credits: 3

Maximum Credits: 3

The public bureaucracy is a political institution and must be understood as a key factor in the policymaking process. At the same time it is a formal structure charged with the legal implementation of policy. These two competing understandings of administration will be examined from a variety of theoretical and analytical perspectives. The principal geographical focus will be on Europe, but there will also be discussions of administration in

other areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2118 - GENDER AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Gender, Sexuality & Women's St

PS 2200 - AMERICAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2201 - SEPARATION OF POWERS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the relationships among the branches in a separation of powers system, particularly the interplay between the legislature and the president. Most specifically, the course will consider the implications of a separation of powers system on representation: can a system specifically created to check the government's ability to act meet the demands for representation of a diverse constituency? How should we think about representation in a separation of powers system? The course will focus on the US political system, but will have implications for the comparative study of these systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2204 - WOMEN & POLITICS

Minimum Credits: 3

Maximum Credits: 3

Women have participated in politics as citizens, voters, activists, and elites. However, the extent to which women can and do serve in these roles varies substantially within the U.S. and cross-nationally. This course will examine core works and current developments in the field of women in politics from both a behavioral and institutional approach. We will discuss the role of women in social movements, public opinion, voting behavior, electoral politics, legislative studies, and public policy. While this is a substantive course, there will be a strong focus on the methodical approaches used to study women in politics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Gender, Sexuality & Women's St

PS 2205 - POLITICS, GROUPS AND IDENTITIES

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of social identities and how they influence politics. First, we will discuss what is a group and the theoretical underpinnings of social identity. We will discuss how social identities work, whether they are socially constructed, if identity is optional, and how social identities intersect with one another. We will cover identities such as race, ethnicity, gender, class, religion, and national identity, and how these shape political behavior. While much of this course will focus on the American context, we will also discuss how these themes apply to comparative politics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2211 - AMERICAN LEGISLATIVE PROCESS

Minimum Credits: 3

Maximum Credits: 3

Focus is on the journal literature of the last decade- involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2212 - US EXECUTIVE BRANCH POLITICS

Minimum Credits: 3

Maximum Credits: 3

This Ph.D. seminar course examines both the theoretical and empirical literature on the U.S. Executive branch. The focus of this course is strictly centered on the study of political institutions and organizations' political behavior related topics (e.g. presidential popularity; presidential elections; presidential nominations) will be covered in other courses. Although the primary focus of this course will be at the U.S. federal level, some attention will be given to the U.S. subnational level (i.e. American states). The course is broken down into three sections. The first section provides an overview of interdisciplinary research on institutions and organizations from both economics and sociological theoretical traditions. The second section of this course focuses on the internal functioning of the executive branch, including, but not limited to, president-agency relations. The final section focuses on analyzing executive branch actors' external relations with other institutional actors (i.e. legislative, judiciary, organized interests) within a separation of powers constitutional framework. The aim of the final section is to integrate insights from both institutional and organizational perspectives.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2213 - JUDICIAL PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 221 - ECONOMIC INEQUALITY AND AMERICAN DEMOCRACY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2230 - POLITICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2233 - POLITICAL ECONOMY OF THE INTERNATIONAL FINANCIAL SYSTEM

Minimum Credits: 3

Maximum Credits: 3

This course examines the relevance of psychological theories of information processing and attitude change for the study of mass political behavior, with particular emphasis on American political behavior. Theoretical perspectives examined include cognitive heuristics, schema theory, attribution, stereotyping, and others. Study of such cognitive perspectives is intended to facilitate assessment of the political aptitude of the mass public.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2235 - AMERICAN ELECTORAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the American micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2301 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytic frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytic tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state and to making policy.

PS 2307 - ETHNIC POLITICS AND CONFLICT IN COMPARATIVE PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2308 - AFRICAN DEVELOPMENT SEMINAR

Minimum Credits: 3
Maximum Credits: 3

The violence, hunger and poverty of Africa, and the economic potential, energy and mineral resources, that are often described in our newspapers, (on the bottom right-hand corner of the third section of your daily newspaper right after the sports briefs) do not exist in a vacuum. They are the products of historical and social forces that go back a number of centuries and also reflect current day world divisions about race, religion, gender and culture. In this highly individualized course we will look at the origins of these forces, the reason for sub-national violence and their consequences as they affect the African continent. Of particular importance is the question: is there a "new" Africa in terms of governance, conflict, institutional development and economic and social change? Are patterns of change national, regional or continental? The purpose of this course is to destroy myths and understand causality. It is to get course participants, in a small seminar environment, to start thinking and talking about the causes of poverty, political conflict, development and underdevelopment and to stimulate an interest in a part of the world which is very far away from and very different from the united states. It is an ambitious course in that it will require participants to have the ability to read and digest (as well as think about) a large amount of material in a short period of time. Every effort has been made to recommend material that is clearly and interestingly written. However, there will be many concepts and terms that are not immediately familiar to you. If so, write them down and ask about them during class. In tackling the reading, take your time with it, re-read and ask questions of your colleagues and of the course instructor. This course will be a mixture of lecture, presentation and discussion. Hopefully it will be structured and informal at the same time. Feel free to interject comments and raise questions at any point during the class. Generally, the first hour of class will be devoted to an informal lecture on the topic of the week. Following the break we will spend the remainder of the class discussing the reading for that week or listening to individual comments on a piece of reading. This format assumes that all class participants will have completed their reading in advance of the week's class.

Academic Career: Graduate

PS 2312 - COMPARATIVE PARTIES AND ELECTIONS

Minimum Credits: 3
Maximum Credits: 3

In this seminar, graduate students will be introduced to a wide variety of readings in the history of Western Europe.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2313 - COMPARATIVE POLITICAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3

This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social

capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2320 - HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

Because of Civil Wars in several parts of the world, especially in sub-Saharan Africa, the international organizations have reshaped their development agenda by emphasizing the importance of security and peace as preconditions for development. This approach has been explicitly mentioned among the aims of the United Nations by Secretary General Kofi-Annan in his roadmap for the implementation of the U.N. Millennium summit. In parallel, the concept of human security has been promoted by several Western governments, N.G.O.S and independent commissions in order to take into account the need to address not only state security needs but also human individuals' vulnerability in crisis situations. Aid policies have taken into account these evolutions, though the concept of human security itself has been discussed in a controversial way. The European union is progressively integrating it into its security agenda and has started 'securitizing' its development agenda and African policy, including instruments like the Cotonou convention with African, Caribbean and pacific states. The course explores the reasons for the merging of security and development policies in the European union and its member states and the emergence of a European human security agenda, within the wider context of the united nations, world bank and OECD. The focus will be European policies towards crisis areas in Africa and Asia potential case to be discussed are: regulations about antipersonnel landmines, small arms and light weapons, conflict timber and conflict diamonds; policies of conditionality and sanctions; assistance to transitional justice; peace building, security governance, security sector reform in fragile states.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Global Studies, Russian & East European Studies, West European Studies

PS 2321 - LATIN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

The course is a readings seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topic of "regime transition" in Latin America.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Latin American Studies

PS 2323 - EXPERIMENTAL RESEARCH IN POLITICAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and qualtrics. The second part of the course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2326 - AUTOCRACY AND DEMOCRACY

Minimum Credits: 3

Maximum Credits: 3

This course surveys important questions driving past and current research in the fields of regimes, regime change, and authoritarian governance. Students will be able to identify important research questions based on existing scholarship and execute sound research designs.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2330 - IDENTITY POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course will cover topics on Identity Politics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2351 - GENDER & DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Gender, Sexuality & Women's St

PS 2370 - RESEARCH TOPICS ON THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is a PH.D level course that explores the causes and effects of poverty, under-provision of public goods, bad governance, and conflict in low-income countries. We will look at the role of institutions, historical legacies, state capacity, regime type, corruption and clientelism, natural resources, ethnic divisions, and international aid in explaining under-development. While this is primarily a substantive course, it will also expose students to cutting-edge methods at the forefront of research on the political economy of development, including experimental and quasi-experimental methods.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2379 - ECONOMICS OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on development theories; classical, neo-classical, Marxian, dualistic (economic and non-economic) as well as models of agricultural development and administration, productivity enhancement, saving and investment and the foreign sector. Students are expected to apply development models to current problems, analyze and construct policy approaches to issues of current importance in less developed countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Asian Studies, Global Studies

PS 2381 - SEMINAR POLITICAL INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Global Studies

PS 2385 - COMPARATIVE LEGISLATURES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and eastern Europe, Latin America, Asia, and other parts of the world.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (PHD or MA)

PS 2387 - POLITICS OF WATER

Minimum Credits: 3

Maximum Credits: 3

Given the need to highlight the contributions political science offers to our study of the Anthropocene, this interdisciplinary course investigates the role of water in the political development of contemporary Central Eurasia. As a landlocked world region, Central Eurasia provides a compelling case for the study of the political, social, and technological innovations that has yielded sites of ecological disaster and environmental frontiers of opportunity. This course guides students through the key stages of Soviet political change and its impact on the issues of Central Eurasian water culture: the collapse of tsarist governance and the withdrawal of its engineerspecialists, ending its "civilizing mission"; the arrival of US experts whose modern irrigation methods inadvertently contributed to environmental degradation and economic dependence; the "shock" construction sites of the Stalin era; the misguided dam-building projects of the late Soviet period; and finally the issues relating to the international cooperation to manage the river basins connecting Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, and Kazakhstan. Primarily, this course is a political science course, providing students with analytical frameworks to consider the institutions of power and how they are utilized concerning water management, whether for development purposes or national security. Yet this course also presents students with an interdisciplinary understanding of water politics by integrating skills from engineering sciences. This provides the opportunity for students to better understand the technological innovations that have exacerbated poor water management and also provided solutions to mitigate the ramifications of human activity. Through course assignments and a research project, students are not only introduced to a critical world region, but also familiarized with major crises of water management in the United States and beyond. Thus, at the course's conclusion, students are prepared to critically think about solutions to water management across environmental science, political science, and engineering.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2401 - BEHAVIOR THEORY & EXPERIMENTS

Minimum Credits: 3

Maximum Credits: 3

This is a doctoral course that surveys theoretical models and corresponding experimental methods relevant to the study of political behavior. Topics will include voting, accountability, information processing, risk and social preferences, trust, cooperation, and leadership, drawing from rational choice, cognitive psychology, and behavioral economics. Class sessions will include seminar discussions, lectures, and workshops. Familiarity with

formal models is helpful, but not required, we will review the basics as needed for the class.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Russian & East European Studies, West European Studies

PS 2501 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3

Maximum Credits: 3

This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Global Studies

PS 2502 - INTERNATIONAL ORGANIZATION

Minimum Credits: 3

Maximum Credits: 3

This course examines the contemporary structures of governance within international policies as they are found at national, regional and international level, and the challenges and stresses to which such structures are vulnerable. It also considers major traditions and theorizing about sources of conflict, order and integration in international politics and reviews current evaluations of major international organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Global Studies, West European Studies

PS 2503 - TOPICS IN INT'L DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Topics in international development will explore specific current issues in international development.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Asian Studies

PS 2515 - DOMESTIC POLITICS AND INTERNATIONAL CONFLICT IN THE INFORMATION AGE

Minimum Credits: 3

Maximum Credits: 3

This class will explore the interaction between domestic and international conflict. While these domains have traditionally been treated separately, the processes of domestic mobilization for international initiatives (including minds, money, material and martyrs) and maintaining resilience to the domestic consequence of international interaction (including analog and cyber cooperation and conflict) are increasingly important in today's globalized and digitally connected world. We will read both canonical research as well as more recent works that attempt to integrate contemporary changes in technology and cyber-capabilities into our understanding of the connections between these nested spheres of politics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2518 - SECURITY & INTELLIGENCE STUDIES

Minimum Credits: 3

Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war ' and especially since 9/11 ' are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment ' past and present ' and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies

PS 2522 - CHOOSING NUCLEAR WEAPONS

Minimum Credits: 3

Maximum Credits: 3

Why do some states choose to develop nuclear weapons and others do not? Have the reasons for nuclear weapons acquisition changed over time? Are more states likely to acquire nuclear weapons in the future? Once they have nuclear weapons, how do states choose their strategies for using them to advance foreign and security policy objectives? Why do states choose to give up nuclear weapons? Is a world without nuclear weapons possible? Is a world without nuclear weapons desirable? The answers to these questions are crucial to ensuring stability, peace, and security in the international realm. Problematically, they are also fundamentally contested by academics, policymakers, military officers, and the general public. This course will provide students with the tools to understand, partake in, and shape these debates about nuclear weapons. It will provide students with a foundational understanding of what nuclear weapons are and how they work. Then, drawing on both academic scholarship and primary source material like declassified documents, it will introduce students to: the myriad decisions confronting policymakers considering the acquisition, use, and elimination of nuclear weapons; how such decisions are made; and how such decisions can be improved. Academic scholarship from the disciplines of political science, history, public administration, and psychology will be used to develop theoretical frameworks and analytical toolkits necessary to think critically about elements of the nuclear weapons lifecycle. Primary sources and declassified documents concerning not only the United States' experience with nuclear weapons, but also that of countries like the USSR, China, the United Kingdom, France, Israel, South Africa, India, and Pakistan will be used to test and refine those frameworks and toolkits.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PS 2534 - CIVIL WARS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2540 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2543 - POLITICAL ECONOMY OF GROWTH

Minimum Credits: 3

Maximum Credits: 3

This graduate course is devoted to the study of international and comparative political economy in developing and emerging countries. These countries tend to face very different sets of constraints than their wealthier counterparts. The aim of this course is to analyze the determinants of welfare in poorer countries. Its main focus is to study the political economy of income and examine how domestic and international incentives shape crucial economic policies (e.g. trade, monetary, or education policies). In the last part of the semester, we broaden our horizon to examine other important components of welfare, such as environmental quality. This course is resolutely focused on the macro level and limited to developing countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Asian Studies, Global Studies, Latin American Studies

PS 2563 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course, we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international peace and focus on terrorism, refugees, and weak states as destabilizing factors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2607 - DEMOCRATIC THEORY & DEMOCRATIZATION

Minimum Credits: 3

Maximum Credits: 3

The course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3) to apply this knowledge in solving some puzzle or problem by comparing cases, assessing claims, developing arguments, etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

Course Attributes: Global Studies

PS 2675 - HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2701 - ADVANCED METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide students with an overview of statistical methods appropriate for the analysis of longitudinal data, or data collected on multiple units (individuals, states, dyads, countries) at more than one point in time. The course will focus on models for the analysis of 'panel data,' which (by convention) is used to describe data with relatively large number of units and relatively few time points. We will cover different approaches to the analysis of panel data, including structural equation models, fixed and random effects models, dynamic econometric models, and longitudinal hierarchical growth ("multi-level") models.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2702 - ADVANCED METHODS: CAUSAL INFERENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts central to causal inference but there is also a heavy emphasis on helping students develop their capacity for research design.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2703 - FORMAL POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2704 - FORMAL POLITICAL THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second course in the department's graduate formal theory sequence. We will survey game theoretic models in political science with two goals in mind: (1) students will become critical and competent consumers of formal theory and (2) they will be prepared to begin using formal theory in their research. Topics include bargaining, coalition formation, lobbying delegation, reputation, and signaling. We will also discuss the connection between formal models and empirical tests (both observational and experimental) as well as survey alternatives to rational choice (behavioral and experimental) as well as survey alternatives to rational choice (behavioral, computational, and evolutionary models). Students must be familiar with basic game theoretic concepts and analysis (at the level of PS 2701).

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2705 - SCIENTIFIC COMPUTATION FOR SOCIAL SCIENTISTS

Minimum Credits: 3

Maximum Credits: 3

This course covers scientific computation for social scientists.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2707 - MEASUREMENT IN SOCIAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

A key part of social scientific research is measurement, i.e. creating independent or dependent variables from raw data to capture substantive concepts. This course provides an applied overview of a variety of popular techniques in social science and machine learning to perform measurement on large and complex datasets. It will cover a variety of "unsupervised" methods (e.g. dimensionality reduction, ideal point estimation, and latent variable methods) that are used to create interpretable and low-dimensional summaries of complex data. It will also cover "supervised measurement", i.e. using a small collection of training data to create measures that can be extrapolated reliably. Specific focus will be paid to methods used in cutting-edge social science including multilevel regression with post-stratification (MRP) and machine learning techniques including random forests, sparse methods, and ensembles. A key goal of this course is to give students the skills to use these methods in their own research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2720 - BAYESIAN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a course on the theory and methodology of applying Bayesian computation and inference in social science research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2730 - ADVANCED METHODOLOGY: MAXIMUM LIKELIHOOD ESTIMATION

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2740 - TIME SERIES ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to time series.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2751 - ADVANCED METHODOLOGY: TEXT AS DATA

Minimum Credits: 3

Maximum Credits: 3

The amount of social science relevant information stored in text presses against the boundaries of human comprehension. From corpora of international and national speeches and documents, through repositories of human rights reports, news archives and blog posts, to streaming social media feeds, a font of knowledge awaits those that have the creativity and ability to model and learn from text as data. This class is a lower case, but more than cursory, introduction to the use of natural language processing, machine learning and Bayesian inference frameworks and tools to accelerate innovations in key social science research. The workload is significant but should not give anyone a stroke. We will cover lexical methods such as dictionary-based sentiment analysis, topic modeling and more general supervised learning techniques, as well as research designs that leverage syntactic information. Theoretical lectures will be punctuated with hands-on coding assignments. The point of the class is to increase student's confidence in utilizing text in their applied work.

Academic Career: Graduate

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PhD)

PS 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 12

This course is for students who have passed their dissertation overview and are currently working on their Ph.D. dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Prosthodontics

PROSTH 2020 - GRADUT REMOVABLE PROSTHODONTICS

Minimum Credits: 2

Maximum Credits: 2

This course examines in detail the mechanics of RPD function and its application to design. Complex RPD situations and their relationship to a complicated occlusion, with or without fixed partial dentures, is explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2030 - GRADUATE FIXED PROSTHODONTICS

Minimum Credits: 2

Maximum Credits: 2

This course exposes the student to concepts of tooth preparation and their relationship to total rehabilitation of the patient. Emphasis is placed on diagnostic preparation, dental materials knowledge, esthetics and the total relationship to occlusion. Modification of design for integration with RPD, is stressed. Laboratory skills are emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2040 - DENTAL MATERIAL PROSTHODONTICS 1

Minimum Credits: 1

Maximum Credits: 1

This course presents an introduction to biomaterials. Application of biomaterials in removable and fixed prosthodontics will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2050 - DENTAL MATERIAL PROSTHODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

Demonstrations of different clinical applications of BIO materials, as well as laboratory fabrication of appliances for active cases currently being treated in the prosthodontic department will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2070 - ADVANCED PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

During this course, the students become more experienced in treating difficult cases with medical complications and cases which need multi-disciplinary approaches.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2080 - ADVANCED PROSTHODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

Emphasis is placed on the clinical, laboratory, and technical skills necessary to treat the partially edentulous patient using a removable appliance.

Coordination with fixed appliances is mandatory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2090 - ADVANCED PROSTHODONTICS 3

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2100 - ADVANCED PROSTHODONTICS 4

Minimum Credits: 2

Maximum Credits: 2

This course emphasizes the total treatment of the geriatric patient. Considerations are given to prosthodontic rehabilitation with implants, orthognathic treatment planning and the difficult prosthodontic patient.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2101 - ADVANCED PROSTHODONTICS 5

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2102 - ADVANCED PROSTHODONTICS 6

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2103 - ADVANCED PROSTHODONTICS 7

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2104 - ADVANCED PROSTHODONTICS 8

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2110 - ADVANCED MAXILLOFACIAL PROSTHODONTICS 1

Minimum Credits: 1

Maximum Credits: 1

This course exposes the graduate resident to the principles of radiation oncology and the management of the cancer patient. Emphasis is placed on the oral biological changes that occur with treatment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2117 - IMPLANT PROSTHODONTICS SEM 1

Minimum Credits: 2

Maximum Credits: 2

This is a didactic course designed to review all aspects of implant dentistry at the in depth level. Diagnostic and treatment planning procedures, selection of implants to include biomechanical and biomaterials considerations, surgical procedures for implant placement, prosthodontic procedures to include provisional and definitive implant restorations, and maintenance procedures will be presented and illustrated.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Minimum Credits: 2

Maximum Credits: 2

This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2150 - PROSTHODONTICS SEMINAR 1

Minimum Credits: 2

Maximum Credits: 2

This course is an introductory review of basic prosthodontic principles and their application to advanced prosthodontic procedures. Thorough understanding of this course is essential to comprehensive treatment planning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2160 - PROSTHODONTICS SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course is a description of the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2170 - PROSTHODONTICS SEMINAR 3

Minimum Credits: 2

Maximum Credits: 2

This course discusses the special considerations given to the geriatric and the handicapped prosthodontic patient. Maxillofacial patients and those undergoing immune suppression and cancer therapy are discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2180 - PROSTHODONTICS SEMINAR 4

Minimum Credits: 2

Maximum Credits: 2

This course is the final in a series that entails the review of advanced graduate procedures, including TMJ and implant ology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2181 - PROSTHODONTIC SEMINAR 6

Minimum Credits: 2

Maximum Credits: 2

This course is another part of a series that entails the review of advanced graduate procedures, including TMJ and implantology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

PROSTH 2182 - PROSTHODONTICS SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

Continuation course for the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2200 - OCCLUSION

Minimum Credits: 1

Maximum Credits: 1

This is an introductory course in physiologic, gnathologic and denture occlusion. The basic principles and techniques are covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2201 - OCCLUSION SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PROSTH 2202 - OCCLUSION SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PROSTH 2203 - OCCLUSION SEMINAR 3

Minimum Credits: 1

Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PROSTH 2204 - OCCLUSION SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PROSTH 2205 - OCCLUSION SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad HSU Basis

PROSTH 2206 - OCCLUSION SEMINAR 6

Minimum Credits: 1
Maximum Credits: 1

The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

PROSTH 2210 - SPECIAL PROSTHODONTICS CLINIC

Minimum Credits: 1
Maximum Credits: 9

This course provides the resident with experience providing special clinical care of multi-disciplinary cases involving dental and medical treatment under direct faculty supervision.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2211 - COMPREHNSV TREATMENT PLANNING 1

Minimum Credits: 2
Maximum Credits: 2

This is a multidisciplinary course in comprehensive/diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

PROSTH 2230 - TEMPOROMANDIBULAR JOINT DYSFNTCN

Minimum Credits: 1
Maximum Credits: 1

This course exposes the student to the etiology, diagnosis, and treatment of TMJ and myofascial pain dysfunction syndromes. Radiology and drug therapy are reviewed. Various treatment modalities involving electronic instrumentation and splint therapies are reviewed.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2240 - LITERATURE REVIEW 1

Minimum Credits: 2
Maximum Credits: 2

This course covers classic and current literature review in the following areas: bone resorption, articulators, face-bow, hinge axis, and immediate dentures.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2250 - LITERATURE REVIEW 2

Minimum Credits: 1

Maximum Credits: 1

This course covers classic and current literature review in the following areas: color, splinting, porcelain, crown preparation, impression materials, dies and pontics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2260 - LITERATURE REVIEW 3

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2270 - LITERATURE REVIEW 4

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas: maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2272 - LITERATURE REVIEW 6

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas. Maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PROSTH 2273 - LITERATURE REVIEW 5

Minimum Credits: 1

Maximum Credits: 1

Continuation course that covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2305 - CEREC BASIC TRAINING

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad HSU Basis

PROSTH 2400 - REMOVABLE PARTIAL DENTURES

Minimum Credits: 1
Maximum Credits: 1

A seminar/case based course where advanced students (prosthodontic residents) will gain experience in surveying and designing a variety of clinical removable partial dentures. The majority of cases will involve clinical cases which will include the various Kennedy classes and modification while some simulated models may be used. The assessment of partial edentulism encompasses everything from the loss of a single tooth to the loss of all teeth but one. All disciplines of dentistry may be involved. The integration of all considerations is where the specialty of prosthodontics has the most to offer a patient. The management of the many variables in partially edentulous conditions is the essence of specialty-level prosthodontic therapy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5001 - DIRECTED STUDY IN DENTAL MATERIALS

Minimum Credits: 2
Maximum Credits: 2

A customized course of study in dental materials for students who transfer to the School of Dental Medicine.

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

PROSTH 5002 - DIRECTED STUDY IN DENTAL OCCLUSION

Minimum Credits: 1
Maximum Credits: 1

A customized course of study in dental occlusion for students who transfer to the School of Dental Medicine.

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

PROSTH 5142 - DENTAL MATERIALS

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5171 - PRINCIPLES OF DENTAL OCCLUSION

Minimum Credits: 3
Maximum Credits: 3

This course is clinically-oriented and employs preclinical laboratory exercises to teach the students the basic principles of occlusion. The importance of the relationship between the temporomandibular joint, occlusion and incisal guidance is emphasized. The students use semi-adjustable - class III - articulators and face bows. Students will learn how to perform an anatomic diagnostic mounting, occlusal analysis, diagnostic equilibration, bite splint fabrication, and functional occlusal waxing.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5211 - FIXED PARTIAL DENTURES 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will develop an understanding of the process involved in successfully treating a patient indicated for the placement of crowns. Topics include: 1) the preliminary work up, including diagnostic waxing on prepared casts; 2) template fabrication for provisionalization; and 3) the sequencing involved in the development of the art and skill of proper tooth preparation for single crowns, including a full cast crown preparation (FCC), a porcelain fused to metal crown (PFM), and an all ceramic crown (ACC). Provisionalization of the crown preparations will be discussed. Students will develop an understanding of the principles of final impression making for a fixed partial denture (FPD), pouring and pindexing of the impression casts, face-bow transfer registration, jaw relation records and mounting of the case on a semi-adjustable articulator. In the accompanying lab course, PROSTH 5215, students will have an opportunity to develop and practice skills in a small group laboratory setting. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5213 - COMPLETE DENTURES 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will develop an understanding of the process involved in successfully treating a patient indicated for the placement of crowns. Topics include: 1) the preliminary work up, including diagnostic waxing on prepared casts; 2) template fabrication for provisionalization; and 3) the sequencing involved in the development of the art and skill of proper tooth preparation for single crowns, including a full cast crown preparation (FCC), a porcelain fused to metal crown (PFM), and an all ceramic crown (ACC). Provisionalization of the crown preparations will be discussed. Students will develop an understanding of the principles of final impression making for a fixed partial denture (FPD), pouring and pindexing of the impression casts, face-bow transfer registration, jaw relation records and mounting of the case on a semi-adjustable articulator. In the accompanying lab course, PROSTH 5215, students will have an opportunity to develop and practice skills in a small group laboratory setting. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB

Minimum Credits: 3

Maximum Credits: 3

In this course, students will apply concepts learned in PROSTH 5211 and will develop the skills necessary to treat a fixed prosthodontic patient. An emphasis will be placed on the preliminary work up as well as the art of proper tooth preparation for single crowns. Students will complete crown preparations for a full cast crown (FCC), porcelain fused to metal crown (PFM), and all ceramic crowns (ACC). Provisionalization of the crown preps will also be required. Students will also develop skills in making final impressions for a fixed partial denture (FPD) and in the laboratory techniques required to produce acceptable results. Laboratory procedures such as pouring and pindexing of casts, facebow transfer registration, jaw relation records, and mounting of the case on a semi-adjustable articulator will be accomplished by the student. This course includes small group laboratory sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF

PROSTH 5217 - COMPLETE DENTURES 1 LAB

Minimum Credits: 1.5

Maximum Credits: 1.5

In this course, students will be prepared for the complex task of complete denture fabrication for the edentulous patient. Students will apply concepts learned in the didactic course (PROSTH 5213) in order to fabricate complete dentures in a simulated clinical environment. The student will also participate in the fabrication of complete dentures in the continuing education clinic for a selected patient. This course includes small group laboratory sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PROSTH 5241 - REMOVABLE PARTIAL DENTURES

Minimum Credits: 1

Maximum Credits: 1

Didactic introduction to the treatment of totally edentulous patients with removable complete dentures begins with terminology, patient examination and ridge and arch classification. Continues with the oral anatomy, pertinent bio materials and the mechanical and physiologic principles utilized in edentulous impression making. Concludes with jaw relation records, the use of artificial denture teeth and the steps required to fabricate, insert, adjust and maintain complete dentures.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY

Minimum Credits: 1.5

Maximum Credits: 1.5

An introductory laboratory course in which the student utilizes a variety of biomaterials to fabricate a technique set of maxillary and mandibular complete dentures for a dental typodont. Provides experience in material handling while making impressions, dental casts and baseplates and wax occlusion rims. Concludes with the performance of sequential laboratory procedures-tooth articulation, waxing, flasking, boil-out, packing, processing and finishing dentures.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF

PROSTH 5251 - FIXED PARTIAL DENTURES 2

Minimum Credits: 1

Maximum Credits: 1

During this course the preparation of posterior teeth for a fixed partial denture along with making an impression, fabrication of an all metal cast fixed partial denture and pro visualization of the prepared teeth are introduced.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB

Minimum Credits: 3

Maximum Credits: 3

This is the laboratory component of the didactic course fixed partial dentures 2. Students perform the procedures necessary to fabricate an all metal cast fixed partial denture and the provisionalization of the prepared teeth.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF

PROSTH 5271 - DIGITAL DENTISTRY 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to CAD/CAM (CEREC) technology and will be properly trained in its use. This course blends theoretical foundations with practical applications. Students will learn how to prepare teeth for all-ceramic, CEREC crowns and will make digital impressions using the CEREC 4.24 machines. Students will also learn how to design and edit these crowns prior to milling them. Proper block selection and finishing/inserting these final restorations will also be addressed. This course includes lecture and small group laboratory/simulation sessions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5273 - FIXED PARTIAL DENTURES 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be prepared for the complex task of fabricating post and cores on anterior and posterior endodontically treated teeth. Students will learn the procedures involved for the placement of retraction cord into the sulcus of a patient prior to impression making. Students will also be exposed to contemporary provisional materials and CAD/CAM technology. This course includes lectures and class discussion. An opportunity to apply principles learned in this course will be provided in the accompanying lab course, PROSTH 5276 (Fixed Partial Dentures 3 Laboratory).

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5276 - FIXED PARTIAL DENTURES 3 LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The goal of this fixed prosthodontic course is to prepare the student for the complex task of fabricating post and cores on endodontically treated teeth. Students will have an opportunity to apply concepts learned in PROSTH 5273 (Fixed Partial Dentures 3) in a small group laboratory setting. Students will prepare porcelain veneers on anterior teeth, practice the procedures involved in the placement of retraction cord into the sulcus of a patient, and evaluate a completed fixed partial denture case to prepare for insertion. A practical exam on single crowns and provisionals will also be included.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PROSTH 5282 - COMPLETE DENTURES 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn the basic principles for the classification system of edentulism as well as dental procedures related to topics such as denture repair; relines or rebases to current removable appliances; interim or transitional appliances; overdentures; and immediate dentures. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5311 - IMPLANTOLOGY 1

Minimum Credits: 1.5

Maximum Credits: 1.5

In this course, students will be introduced to implantology as a progressive field that requires a comprehensive knowledge of dentistry. This course prepares students for introductory level treatment of implant dentistry, including examination of implant-bone interface, preoperative patient evaluation, use of cone beam CT scanning to image bone, construct surgical guides and virtually treatment plan cases. Other topics covered include: treatment planning involving surgical techniques and prosthetic therapies; surgical instrumentation and procedures for effective implant placement; temporization of the patient during the implant therapy; and implant impression making techniques. This course also serves as preparation for Implantology 2, where the student will begin with the reconstructive phase of implantology. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5346 - IMPLANTOLOGY 2

Minimum Credits: 1.5

Maximum Credits: 1.5

This course in implant dentistry is a multidisciplinary teaching program, structured to provide basic learning didactic experience. It presents an approach to historical and biological basis for implantology, patient evaluation and treatment planning, implant surgery and provisionalization,

definitive Prosthodontic procedures, and maintenance protocols.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

PROSTH 5347 - CURRENT TRENDS IN DIGITAL DENTISTRY

Minimum Credits: 1

Maximum Credits: 1

Grade Component: Grad HSU Basis

PROSTH 5367 - CLINICAL REMOVABLE PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with removable prosthodontic needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PROSTH 5369 - CLINICAL FIXED PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of fixed prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with fixed prosthodontic needs.

Academic Career: Dental Medicine

Maximum Credits: 3

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PROSTH 5377 - SIMULATED PATIENT TREATMENT

Minimum Credits: 1.5

Maximum Credits: 1.5

In a simulated treatment setting, students will focus on the preparation of a single-unit porcelain crown and a three-unit porcelain-fused-to-metal fixed partial denture (FPD), utilizing several preparation designs and restorative materials. The student will complete a 3-unit fixed bridge clinical simulation competency examination by the end of this course.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PROSTH 5448 - CLINICAL PROSTHODONTICS 2

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide clinical experiences in the area of fixed and removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed and removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with fixed and removable prosthodontic needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PROSTH 5449 - CLINICAL REMOVABLE PROSTHODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

The comprehensive and clinical treatment of a selected and assigned number of partially and completely edentulous patients. Treatment cases include complete dentures, immediate and transitional dentures, overlay dentures, removable partial dentures, temporary partial dentures, and the repair, relines and rebase of indicated dentures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PROSTH 5459 - CLINICAL FIXED PROSTHODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

This course will provide patient care in a clinical setting under direct faculty supervision. Treatment procedures will include anterior and posterior fixed partial dentures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

PROSTH 5469 - CLINICAL IMPLANT DENTISTRY

Minimum Credits: 3

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Dental Medicine

Course Component: Lecture
Grade Component: Grad HSU Basis

PROSTH 5910 - ADVANCED PROSTHODONTIC TREATMENT PLANNING

Minimum Credits: 1
Maximum Credits: 1

This course is structured to develop the student's ability to plan and implement treatment for patients with complex prosthodontic problems, including but not limited to fixed, implant, and removable prosthodontics, geriatric prosthodontics, TMJ problems, re-establishment of vertical dimension, surgical prosthodontics and other prosthetic procedures.

Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

PROSTH 5915 - DENTAL IMPLANT SELECTIVE

Minimum Credits: 1
Maximum Credits: 1

A hands-on approach is offered for the surgical and restorative phases of implant dentistry. Students will surgically place implants and assist with cases. Each student will re store one Prosthetic case. Advanced seminars will be given on implant dentistry.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

PROSTH 5916 - COMPLETE DENTURE FABRICATION - VA

Minimum Credits: 1
Maximum Credits: 1

This externship permits the fourth year dental student working one-on-one with a hospital staff dentist to complete one full denture in a hospital setting on medically compromised geriatric patients. In addition the student will understand the operation of a dental clinic within a hospital setting.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

Psychiatry

PSYC 5345 - CLINICAL NEUROSCIENCE REPEAT

Minimum Credits: 0
Maximum Credits: 0

This course is registered when the clinical neuroscience clerkship is failed and all or part of it must be repeated. If less than the full clerkship is taken, the transcript should reflect the specific number of weeks repeated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 3

PSYC 5365 - CLINICAL NEUROSCIENCES

Minimum Credits: 0
Maximum Credits: 0

The neurosciences clerkship integrates psychiatry and neurology. NSURG, neuropath and neurorad experiences are also provided. The block is five weeks psych and three weeks neurology. Clinical teaching includes INPT and OPT settings. Field trips, NSURG or neuropath brain cutting, emergency room, and one aa meeting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

PSYC 5366 - PSYCHIATRY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

The psychiatry clerkship is five weeks of clinical psychiatry. Focus in on common psychiatric conditions: presentation, diagnosis, treatment and prognosis. Clinical teaching includes INPT and emergency room settings. Field trips, and one aa meeting are required. Didactic teaching on two afternoons include interactive lectures, case conferences and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

PSYC 5410 - ACTING INTERNSHIP IN PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0

Four/eight week elective in a number of AI's available in psychiatry. Assigned to a clinical module at WPIC of their choice that will provide experience in diagnostic and management of psychiatric patients; enhance ability to conduct a psychosocial and clinical interview; proficiency in gathering clinical data relevant to a psychiatric evaluation, arriving at a correct diagnosis of psychiatrically ill patients; plan and carry out a treatment approach towards a psychiatric patient; effectively utilize the resources and skills of related mental health professions.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5411 - ADOLESCENT PSYC ACTING INTERN

Minimum Credits: 0
Maximum Credits: 0

Four week elective. Students will observe the assessment and treatment of hospitalized adolescents and their families. Patients are treated in therapeutic milieu along with individual group and family therapy sessions. Students attend team meetings, in-service sessions among other activities. Participate in establishing psychiatric diagnosis. Individual or informal seminar instruction cover normal and atypical developmental stages.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5412 - TRIPLE BOARD ACTING INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0

This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at children's hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5415 - INTRODUCTION TO CLINICAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is for those students interested in getting experience in clinical psychiatry outside of the core clinical neurosciences clerkship. Students will develop basic skills in the interviewing and assessment, diagnosis and management of psychiatric patients in the inpatient units. Course objectives include: conduct comprehensive psychiatric interview and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and management treatment; plan and implement a biopsychosocial treatment plan for patients with psychiatric illnesses; and utilize the resources and skills of related mental health professionals.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5420 - PSYCHIATRIC EMERGENCY SERVICES

Minimum Credits: 0

Maximum Credits: 0

Twenty-four hour psychiatric assessment center and emergency room where students may participate for one to 3 months in the assessment, diagnosis and disposition planning of patients. Students also participate in a comprehensive course covering diagnostic interviewing, lethal assessment and specific methods for interviewing efficiently under time constraints. This course consists of didactic presentations, role playing, interviewing of patients in class and a bibliography of required and suggested readings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5422 - TELEPSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Telepsychiatry visits across the region, independent reading, and a QI project.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

PSYC 5425 - MANAGEMENT OF PSYCHIATRIC ILLNESSES

Minimum Credits: 0

Maximum Credits: 0

Four week elective designed to allow students to learn in a service-learning model. Students will participate at non hospital sites interacting with social workers, nurse practitioners, primary care physicians, and psychiatrists. Primary goal of this elective is to learn to identify and manage psychiatric illness in the primary care setting.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5430 - PEDIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Assessment of children and families referred to behavioral science program, children's hospital and consult liaison. Help consult in abuse and neglect problems at hospitals and special settings. Acquainted with community resources. Skills in behavioral syndromes assessment principles of consultation and liaison activity.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5441 - OUTPATIENT ADOLESCENT PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective in which the student will observe and participate in complete evaluations of children, adolescents, and their families. Expected to rotate in a general clinic and through some of the specialty child psychiatry clinics as well. There will be an opportunity to observe group therapy sessions. Teaching will be in individual, group and conference settings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5442 - ADV OUTPATIENT CHILD & ADOLSCNT

Minimum Credits: 0

Maximum Credits: 0

Four/eight week for those individuals who are considering a career in behavioral pediatrics, or general or child psychiatry. Active role demanded of student. Those interested will serve as a co-clinician with shared and supervised responsibility for assessment and treatment of children and adolescents. Literature-intensive, assigned texts and articles. Students will learn clinical skills as part of a multi-disciplinary approach to outpatient treatment, working with other mental health professionals. Student will spend time in general clinic and varied specialty clinics.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5443 - SEX ABUSE OF CHILDREN & ADOLSCNT

Minimum Credits: 0

Maximum Credits: 0

Four week elective, clinical and research aspects of child sexual abuse will be examined from a variety of perspectives. Discussions with instructors and selected readings. Clinical aspects of child sexual abuse including how to identify and gather information from children, methods of reporting abuse to the proper authorities. Legal and child protective aspects. Psychiatric and physical problems will be addressed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5448 - INTRODUCTION TO GERIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This course will provide an introduction to psychiatric care of the geriatric patient. Experiences will include new assessments, interviewing, psychotherapy and pharmacotherapy, collaboration with geriatricians and other related issues. Experiences will be in both inpatient units and in-home visits. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and manage treatment; plan and implement biopsychosocial treatment plan for patients with elders with psychiatric illnesses; utilize the resources and skills of related mental health professionals, learning how to collaborate with other providers and agencies; understand how family and community contents affect mental health of the elderly; summarize the assessment and treatment of a patient with dementia; employ a cognitive screening evaluation to assess and follow patients with cognitive impairment and state the limitations of these instruments; summarize the special considerations in prescribing psychotropic medications of the elderly, especially toxicity risks; appreciate the role of loss in the etiology of psychiatric disorders in the elderly.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5450 - GERIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four/eight week elective provides the students the opportunity of being involved in all aspects of care of elderly inpatients and outpatients. Involvement in individual, couple, family and group programs. Function as members of the multi-disciplinary team. Assume increasing responsibility for individual patients as their rotations proceed. Attend a weekly case conference. Supervised by a resident and faculty member of the team to which they are assigned.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5455 - EMERGENCY PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Student will learn clinical interviewing, the mental status examination, basic psychiatric diagnosis, basics of evaluation of suicidal and homicidal potential, emergency therapeutics, and basic aspects of psychiatry and the law.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5458 - PSYCHIATRIC ASSESSMENT

Minimum Credits: 0

Maximum Credits: 0

This elective experience will develop skills at psychiatric interviewing as well as assessment of new patients. Forty (40%) percent time will be spent in the psychiatric emergency room doing evaluations with faculty and resident preceptors, 40% rotating at other sites (child, adult, geriatric) doing assessments of new ambulatory patients, plus a full day of didactics and supervision. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, and formulate working diagnosis using the dsm-iv multi axial system; elicit, describe and record the key components of a mental status examination; make a clear and concise psychiatric case presentation; learn different approaches to assessment across the lifespan; understand the indications and procedures for involuntary mental health commitment; develop a collaborative, multi-disciplinary and biopsychosocial approach to patient care; demonstrate empathy, facilitative approaches and sensitivity to diversity.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5459 - NEUROSCIENCE AT THE BEDSIDE: EXPLORING PERSONALIZED MEDICINE IN PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Personalized medicine is the new catchphrase for the role of cutting edge translational science on routine clinical care. Can we use an imaging result to predict treatment response? How will a person's genetic make-up inform choice of medication? How does awareness of risk affect management? In psychiatry, personalized medicine remains somewhat of a 'holy grail' ' elusive but hotly pursued by neuroscientists and clinicians. In this elective experience, students will get a taste of that pursuit through a mixture of scientific and clinical activities that will be individualized by students in particular areas ranging from neuroimaging, pharmacotherapy, genomics, ethics and service research. Students will investigate a particular area of interest through a literature review and specific directed experiences, presenting a capstone project to a scientific audience at the end. Overall supervision will be conducted by the course director.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5460 - CONSULTATION & LIAISON PSYCH

Minimum Credits: 0

Maximum Credits: 0

Four/eight week elective focuses on psychiatric problems in medical and surgical patients. Under the supervision of full-time faculty and chief resident. Respond to requests for psychiatric evaluation of patients on inpatient units. Conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patient's family in the clinical problem, makes treatment recommendations and provides appropriate follow-up during the patient's hospital stay. Multi-disciplinary team integrates the biological with psychosocial perspective to achieve view.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5462 - COMBINED PSYCHIATRY AND FAMILY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective focuses on psychiatric and general medical problems in a variety of patients. Student will work on the consultation/liaison service at St. Margaret's hospital where the student will respond to requests from physicians for psychiatric evaluation of patients on inpatient units. The student conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patient's family in the clinical problem, makes treatment recommendations and when appropriate does follow up during the patient's hospital stay. The multi-disciplinary team on the service attempts to integrate the biological with the psychosocial perspective to achieve a comprehensive view of patient care. Students will participate in family medicine case conferences, attend outpatient experiences at primary care clinics, participate in palliative care interventions and work on the medical care of the psychiatry patient (MCPP) service at WPIC. Learning opportunities include: supervised clinical assessments; hospital rounds; case conferences and seminars. This elective can prepare a student for combined family medicine/psychiatry residency programs.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5465 - COMMUNITY PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective intends to teach students how to care for seriously and persistently mentally ill adults and adolescents who are in community-based psychiatric treatment programs. Students will precept with team psychiatrists, get exposure to group and individual therapy, and follow one or two patients for continuing care over the month. Home visits and other community outreach will be an integral part, along with collaboration with a variety of team members and other providers. Students will be involved in case management, treatment teams, and systems liaising (e.g., Assisting patients leave state hospitals and return to the community). The course objectives are: to build basic skills in psychiatric interviewing, assessment, and patient management; to learn how to work with "challenging" clients, situations, and systems; to plan and implement biopsychosocial treatment plans for patients with psychiatric illnesses; to utilize the resources and skills of related mental health professionals, working collaboratively with multiple disciplines and agencies; to understand how continuity of care can be achieved and how it can help improve patient outcomes; and to learn how the funding of mental health care affects service delivery and patient outcomes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5468 - INTEGRATED CARE ACROSS THE LIFESPAN

Minimum Credits: 0

Maximum Credits: 0

This elective will provide medical students with clinical experiences at the interface of psychiatric and medical care, focusing on different models of integrating ambulatory behavioral services with primary and specialty medical care. Students will work with interdisciplinary teams that help improve access to care, often at the level of the medical home.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5471 - MAYVIEW STATE HOSPITAL

Minimum Credits: 0

Maximum Credits: 0

Eight week elective at Mayview State Hospital. Become aware of the social and community programs of the chronic mentally ill and participate in the supervised group therapy experience. Participate in ongoing research at Mayview depending on the student's ability and interest. Interview and assessment techniques for psychiatric inpatients. Prescription practice for psychotropic medications. Treatment of non-responsive schizophrenic patient. Drug metabolism, conduct a neurological evaluation of psychotic and depressed individuals.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5481 - ADDICTIONS TREATMENT PROGRAM

Minimum Credits: 0

Maximum Credits: 0

Four/eight week placement providing the opportunity of being included in all aspects of care both in and outpatient, for chemical dependency. Participation and involvement in all medical-psychological aspects; detoxification and rehabilitation, individual, family and group counseling; evaluation/ assessment, treatment planning; working with adult, adolescent, elderly and pregnant patients in various modalities. Function as an integral part of the clinical multi-disciplinary team. Recognize how to avoid prescribing inappropriately for chemically-dependent patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5482 - DUAL DIAGNOSIS: MENTAL AND SUBSTANCE ABUSE

Minimum Credits: 0

Maximum Credits: 0

Experience treatment of patients with both mental illness problems and substance abuse problems at the Western psychiatric institute and clinic. Full member of interdisciplinary treatment team as primary therapist for two patients. Some time will be spent at off-site locations within the community.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5483 - ADDICTION MEDICINE AND DUAL DIAGNOSIS

Minimum Credits: 0

Maximum Credits: 0

This elective will provide the student with experiences in addiction medicine and psychiatry, with a special focus on patients with dual diagnosis of substance use and other psychiatric disorders. Various rotation sites will be available including outpatient and inpatient detoxification services, treatment of opiate dependence (including methadone and buprenorphine maintenance programs), individual and group dual diagnosis treatment, and specialized perinatal addiction treatment for pregnant women and women with young children. Optional rotation sites in the HIV clinic and center for liver disease may also be available (depending on availability), as patients with addiction frequently engage in risky behaviors such as needle-sharing or unprotected sex that can lead to transmissible diseases such as HIV and hepatitis. Patients with psychiatry and substance use disorders often have a history of trauma, and thus the student will have ample opportunity to learn how to diagnose post-traumatic stress disorder (PTSD) and deliver trauma-informed care. Evidence-based treatments for addiction will be demonstrated with a special focus on motivational interviewing (MI), a

collaborative, patient-centered technique for facilitating behavioral change. Supervision will be provided by medical directors of the various sites. The student participating in this elective will have the opportunity to: 1) assess patients in need of detoxification and provide appropriate treatment; 2) manage opiate dependence utilizing opioid-replacement therapies; 3) perform assessments and intakes on new patients referred for dual diagnosis treatment; 4) observe and interview patients during individual pharmacotherapy management sessions; 5) participate in individual and group dual diagnosis sessions; 6) interact with and provide education to family members when possible; 7) observe and assist with current substance abuse research within the department.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5485 - ADULT INTENSIVE OUTPATIENT PROGRAM

Minimum Credits: 0

Maximum Credits: 0

Elective introduces student to acutely ill psychiatric patients. Partial serves as a step-down for hospitalized patients with a mix of mood and psychotic disorders, frequently with significant comorbidities. Treatment occurs in group, individual and family sessions by multidisciplinary treatment team. Student participates in variety of clinical experiences: running group psychotherapy sessions; carrying small case load of individual patients for individual psychotherapy and pharmacotherapy; conduct family sessions; perform assessments and intakes on new patients; participate in treatment team meetings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5500 - NEUROBEHAVIORAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective to learn different diagnosis of neuropsychiatric disorders in developmentally disabled population; neurology principles and treatment pertaining to developmental disabilities; behavioral neurology principles and treatment pertaining to developmental disabilities; to work on a treatment team and learn inpatient case formulation and therapeutic management skills. John Merck multiple disabilities program for children/adolescents/adults and their families in and outpatient clinic and community liaison program. Reasons for admission is acute psychiatric symptomatology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5510 - SLEEP AND ITS DISORDERS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective to provide a basic knowledge of sleep, regulation of a relationship of sleep stages to other physiobiological process; to develop basic skills and apply them to comprehensive assessment of patients with complaints of disturbed sleep. Assist in the evaluation of patients with disorders. Participate in history taking and in the administration of structured interview to patients and their bed partners. Learn principles and procedures of polysomnography and will participate in the processes of data interpretation, treatment recommendation and formulate a treatment plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5520 - BIOLOGICAL RHYTHMS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective in understanding more the interrelationships between the sleep-wake cycle and the circadian rhythms of core body temperature and different neuroendocrine axes; to participate in the evaluation of subjects and patients including history taking and recruitment. Provide as opportunity to learn about polysomnography and clinical neuroendocrinology including hormone assay procedures; participate in data collection and subsequent analysis. Material will be provided; expected to critically review relevant literature. Design a research study.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5531 - WOMEN'S MENTAL HEALTH

Minimum Credits: 0

Maximum Credits: 0

A four week elective that provides students with the opportunity to assess and treat psychiatric disorders in women, both within inpatient and outpatient settings. Students will have the opportunity to assess up to five patients per day. Issues addressed include: pregnancy, postpartum, breast and gynecological oncology as well as other problems such as premenstrual dysphoric disorder and long term care of patients with cancer. Weekly breast or gynecologic conferences and student involvement in special projects are also encouraged.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of psychiatry to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5750 - GET READY FOR RESIDENCY BOOT CAMP

Minimum Credits: 0

Maximum Credits: 0

This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

Academic Career: Medical School

Course Component: Clinical

Grade Component: S/U Basis

PSYC 5890 - CHILD & ADOLESCENT MOOD AND ANXIETY DISORDERS

Minimum Credits: 0

Maximum Credits: 0

The Child and Adolescent Bipolar Spectrum Services (CABS) and Services for Teens at Risk (STAR) offer a four-week elective that provides outpatient experience with problems related to depression, anxiety, and bipolar disorder in children and adolescents. Students participating in this elective will learn to: 1) understand the manifestations of affective disorder in childhood and adolescence; 2) conduct structured assessments for childhood psychiatric disorders; and 3) understand several different research methodologies used in this population, including pharmacological treatment studies. Students interested in this elective area are asked to contact the Director of Medical Student Education at least two months prior to

the start date to discuss their interests and develop a set of activities that will enable them to achieve their goals.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Exchange MED SU5

Course Attributes: School of Medicine Year 4

PSYC 5892 - PSYCHOPHYSIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Eight week elective provides an introduction to basic noninvasive electrophysiobiological techniques and psychophysiobiological responses used to study autonomic nervous system responsivity to psychological influences on physiology and pathophysiology will be taught and basic research. Readings will supplement lab work. Students will successfully collect at least one type of electrophysiobiological data; effectively critique a published article in psychophysiology; design a feasible psychophysiobiological experiment.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5893 - NEUROPHARMACOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on various central neurotransmitter systems will be described and their possible role processes will be analyzed in relation to pharmacological effects. Catecholamines, serotonin, GABA, acetylcholine and receptors will be discussed and existing experimental evidence regarding their role. Independently conduct a thorough library search; effectively critique and evaluate published research papers and write a comprehensive document based on a critical literature review.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5894 - PSYCHOPHARMACOLOGY OF MOOD DISORDERS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective that offers the opportunity to conduct lab studies of cell membrane function in patients with mood disorders. Blood components are used to study ion transport phenomena and other aspects of membrane function, and membrane structural components such as phospholipids. Orientation is to ward off the biological foundations of major mood disorders, and the mechanisms underlying the therapeutic actions of psychopharmacological agents; to design an experiment that employs basic lab methods to investigate clinical phenomena; to analyze and interpret data from experiments.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5895 - INDEPENDENT RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Four week interdisciplinary work, combining research and clinical work, involving areas of overlap between psychiatry and other disciplines or institutions, i.e. psychophysiology, behavioral approaches in psychiatry, research design in the treatment of chronic psychiatric disease, research literature and psychopharmacology, neuroendocrinology of major psychiatric disorders, somatopsychiatric factors in human disease.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5896 - LAW AND PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective to conceptualize issues and perform law medicine consultations in general areas of mental health law, medical ethics and professional responsibility with specific projects on patient's rights, informed consent, medical experimentation, legal guidelines effecting patient care and other areas of medicine where legal, social and ethical issues predominate. An experience as a jail psychiatrist providing psychiatric examination, as an advocate for patient's rights in a state hospital or as a consultant to lawyers at neighborhood legal service could be arranged.

Academic Career: Medical School

Course Component: Internship

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5897 - BEHAVIORAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Four week elective aimed at familiarizing the student with theory and practical applications within the programs of one or two of participating faculty members. Techniques include behavioral assessment, nutritional intervention for diabetes and obesity, and interventions for enhancing coping with chronic disease or pain such as relaxation and biofeedback therapy. Develop an assessment and treatment plan for a representative case; conduct a behavioral treatment session of a selected case; critically evaluate the clinical behavioral medicine literature.

Academic Career: Medical School

Course Component: Internship

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5898 - INTRO TO CLINICAL PSYC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Eight week elective exposure to clinical research projects. Variety of research projects available. Each student will be assigned a faculty mentor or mentors based on his/her particular interests. Current projects involve clinical, biochemical, neuropsychological, neuroanatomic and electrophysiology studies in schizophrenia. Experiences range from "bench-top" lab assays to patient interviewing techniques; data collection, basic computer skills and basic lab skills; basic knowledge of current psychiatric nomenclature and diagnostic instruments.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5899 - INDEPENDENT STUDY

Minimum Credits: 0

Maximum Credits: 0

Four week elective wherein the students are welcome to do an independent study or the possibilities of other studies besides the following ones: anorexia nervosa and bulimia nervosa; epidemiology of major psychiatric disorders; out patient management of cognitive disorders; outpatient behavioral treatment of neurotic disorders; behavioral techniques in the management of general medicine disease; genetic factors in major psychiatric disorders; outpatient drug and alcohol valid disorders and their management.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

PSYC 5901 - EXTRAMURAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in psychiatry may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5903 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is intended for the nonmedical graduate student. It provides the opportunity to participate in ongoing clinical or laboratory research under the direction of a departmental faculty preceptor. The student, in collaboration with the faculty member, will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and time table for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Psychology

PSY 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 9

Students who are planning, conducting or completing the master's thesis may register for this course.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the lifespan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSY 2005 - STAT ANAL 1/ADV STATS-UG

Minimum Credits: 3

Maximum Credits: 3

This course is the first of a two course sequence to provide the knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Students will learn techniques to conduct a variety of statistical tests; the appropriate interpretation of results will be emphasized. Topics include data management and visualization, hypothesis testing (including power, effect sizes, and confidence intervals), simple and multiple regression, moderation, and mediation. Students will use R software for statistical computations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2010 - STATISTICAL ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of a two-course sequence to provide knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Topics covered include one-way and factorial analysis of variance, analysis of covariance, repeated measures and mixed model analysis of variance, mixed model analysis of covariance, outlier detection, and transformations. Students will continue to use SAS for statistical computing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2035 - MIXED EFFECTS MODELS

Minimum Credits: 3

Maximum Credits: 3

This course covers the conceptual basis of mixed-effects and hierarchical linear models and their implementation in the R environment for statistical computing, with a particular focus on analyzing psychological or linguistic data. Course topics will include fixed and random effects, model comparison, contrast coding, binomial and Gaussian models, longitudinal data, and dealing with missing data. We'll also discuss the basics of statistical programming in R and other software packages no previous R or programming experience required!

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2090 - STRUCTURAL EQUATION MODELING

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide a strong foundation in the principles of modern structural equation modeling (SEM), with an emphasis on the applied use of these techniques. The goal is to provide students with a strong set of fundamentals that will allow them to flexibly apply SEM to sophisticatedly answer diverse questions in a wide variety of data. Core topics covered will include conceptual introduction to latent variable models, fundamentals of covariance structure models (e.g., data requirements, identification, etc.), measurement models and confirmatory factor analysis, path analysis, full SEM, multiple group analysis, measurement invariance, and the basics of longitudinal models (e.g., cross-lagged panel designs, growth curve models). Introductions to advanced topics will be offered time permitting (e.g., SEM with categorical data, advanced growth curve modeling, mediation with bootstrapped errors, exploratory structure equation modeling). Examples will draw from the behavioral sciences, mostly psychology. Student evaluation will be based on take-home exercises, quizzes, and a final project. Students are encouraged to work with their advisors to identify suitable data for analysis in their final projects, with a goal of producing a publication ready product at the end of the term. The primary statistical package used in this course will likely be Mplus.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSY 2005 and 2010

PSY 2110 - TOPICS IN SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course focuses on a single topic within social psychology, such as group formation and development, victimization, social comparison, or the self. Choice of topic varies from one instructor to another.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2111 - FOUNDATIONS OF SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to provide graduate students with an overview of theory and research in social psychology. Topics covered include social cognition, social perception, the self, attitudes and attitude change, close relationships, prosocial behavior, aggression, group processes and performance, and stereotyping, prejudice, and discrimination. A seminar format is used, in which students are expected to read and comment on papers, participate actively in class discussions, and write a final paper.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2130 - INTERPERSONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Survey of theories and empirical research from social psychology and personality relevant to the study of close interpersonal relationships. Topics covered include empathy, altruism, affiliation, aggression, sexuality, and interpersonal power.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2155 - PSYCHOLOGY OF SMALL GROUPS

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to provide students with a critical overview of theory and research on intragroup processes. Topics include: group composition and diversity; group structure (e.g., status, power); conflict (e.g., negotiation, justice); conformity and deviance; decision making; creativity and innovation; productivity and team effectiveness; leadership; prejudice and discrimination; social identity; responses to stigmatization; intergroup interaction; and techniques for improving intergroup relations. The course is useful for students in various areas of psychology as well as such disciplines as organizational behavior, sociology, and decision sciences.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2200 - CLINICAL PSYCH RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

Graduate level examination of major research methods used in clinical psychology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2205 - PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Provides a critical background in research strategies, phenomena, empirical research, & models of adult psychopathology. Emphasis on etiological & pathological research, with both psychological & biological findings to be discussed. Concentration will be on the major psychopathologies with clinical onset in adulthood, including schizophrenia, affective disorders, anxiety, addictions, & eating disorders. Conceptual & methodological issues that cross diagnostic categories will be stressed. Treatment approaches and differential diagnosis will be covered but not emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2210 - CLINICAL PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This monthly graduate seminar series serves as an introduction to ongoing research relevant to the field of clinical psychology through research presentations by students and faculty from the clinical psychology program, department of psychology, and other departments.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2220 - CLINIC PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This graduate course involves supervised experience in interviewing, assessment and psychotherapy within the clinical psychology center. This course is open only to graduate students in the clinical psychology program.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2225 - NON-CLINICAL EXTERNSHIP PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This graduate course provides the student with supervised experience in a community organization. The placement and number of credits must be approved by the student's program faculty. This course is open only to graduate students in psychology.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2230 - CLINICAL COGNITIVE ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This graduate course focuses on the intellectual assessment of adults and children. Following a discussion of the history of theories of intelligence, the major instruments for assessing intellectual functioning will be reviewed, with a focus on the Wechsler Scales. Students will administer, score, and interpret several measures. The communication of assessment results will be emphasized. A brief introduction to the assessment of brain diseases and learning disability will also be provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2235 - CLIN PSYCHOPATHOLOGY ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This graduate course covers psychometric theory and major methods for assessing psychopathology with an emphasis on objective tests such as the MMPI-2 and structured interviews. Both theoretical and practical issues of administration and interpretation are addressed. Open only to graduate students in the clinical psychology program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2245 - DEVELOPMENTAL PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This graduate course reviews models of social development and considers several theoretical issues with implications for both normal social development and for the emergence of psychopathology. Social experiences that are seen as crucial for normal development or which may set the stage for later problems are discussed. Both theoretical formulations and empirical findings are critically reviewed with an emphasis on attachment, peer relationships and family relationships.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2250 - PSYCHLGCL TRMNT: SYSTEMS & PRIN

Minimum Credits: 2

Maximum Credits: 2

This graduate course covers the history and systems of psychotherapy, with a particular focus on psychotherapy process and outcome research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2251 - PSYCHLGCL TRMNT: COGNTV & BEHVRL

Minimum Credits: 2

Maximum Credits: 2

This graduate course covers the history and theoretical foundations of cognitive and behavioral therapies as well as evidence on their effectiveness for a range of psychopathology in adulthood. Students will be exposed to basic principles of operant conditioning, behavioral analysis, counter-conditioning, strategies and case material will be introduced, but the class will focus on critical evaluation of treatment research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2252 - PSYCHLGCL TRMNT: BEHVRL MEDICINE

Minimum Credits: 2

Maximum Credits: 2

This graduate course examines history and current status of psychological therapies designed for health risk prevention and management of physical disease. Areas emphasized are risk factor modification, secondary prevention/rehabilitation, coping with medical illness and procedures, and community/public health interventions. Critical evaluation of research on these topics will be stressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2253 - PSYCHLGCL TRMNT:FAMILIES & CHILD

Minimum Credits: 2

Maximum Credits: 2

This graduate course provides an overview of family systems theory and family interventions with children. The history and conceptual underpinnings of family systems approaches will be introduced along with a background in normal family development. Specific orientations, including structural, functional/behavioral, and strategic approaches will also be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2280 - ETHICS AND PROFESSIONAL ISSUES 1

Minimum Credits: 1

Maximum Credits: 1

This course introduces first-year clinical students to some of the core issues in professional psychology, including an overview of ethics and diversity issues and some orientation to the clinic and the team process. The largest part of the course will be devoted to the development of fundamental clinical skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2281 - ETHICS AND PROFESSIONAL ISSUES 2

Minimum Credits: 1

Maximum Credits: 1

This course provides information for first-year clinical students regarding core issues in professional psychology, including a series of lectures on psychopharmacology, followed by a summary of process research in psychotherapy. There will be additional presentations in the areas of ethics, diversity, and several empirically supported treatment models. This course will be offered annually in the summer term.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2282 - ETHICS AND PROFESSIONAL ISSUES 3

Minimum Credits: 1

Maximum Credits: 1

This course addresses a number of topics of relevance for second-year clinical students, including ethics and diversity, as well as information regarding specific empirically supported treatment models and more general therapy techniques, such as relaxation skills training and emotional self-regulation. This course will be offered each year in the fall term.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2310 - FOUNDS: DEVELM PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

A survey of theories and current research problems in developmental psychology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2315 - DVLPMNTL PSYCH: INFANCY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the development of basic cognitive processes such as sensation, perception, memory, and thought during the first 18 months of life.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2325 - DVLPMNTL PSY: SOCIAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course covers the central theory and research concerning social and emotional development. Topics covered include: interpersonal relations with peers and family; aggression and pro-social behavior; sex-role development and moral development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PSY 2330 - DEVELM PSYCH: COGNITV DEVELP

Minimum Credits: 3

Maximum Credits: 3

This course examines children's cognitive development in areas such as perception, language, memory and learning skills. Several theoretical perspectives, including Piagetian theory and the information-processing approach are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2376 - TOPICS SEM IN DEVELM PSYCHOLOGY

Minimum Credits: 2

Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in developmental psychology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2402 - COGNITIVE PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This series of presentations serves as an introduction to ongoing research relevant to the field of cognitive psychology. Presentations are made by graduate students and faculty of the cognitive psychology program, the department of psychology, and other departments.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2410 - FOUNDATIONS OF COGNITIVE PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area, in other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2470 - HUMAN COGNITION: SKILL ACQUISITION

Minimum Credits: 3

Maximum Credits: 3

A course in the human cognition graduate core sequence dealing with the learning of cognitive skills, such as technical job skills and professional problem solving skills. Emphasis is on the acquisition of facility, the nature of effective practice, and the representation of knowledge that contributes to skilled performance.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2471 - MAPPING HUMAN BRAIN CONNECTIVITY TECHNOLOGY BASIC RESEARCH AND CLINICAL APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course covers use of a novel Pittsburgh developed High Definition Fiber Tracking (HDFT) technology providing human brain connectivity with unprecedented fidelity. The technology maps a million streamlines (0.1mm diameters sets of axons) per person providing 93 miles of tracts within the head involving 40 tracts connecting 170 brain areas. We can follow tracts from source to destination mapping projection fields with high accuracy. The fibers can be visualized and quantified providing circuit diagrams of cortical networks. These techniques will advance the study of brain systems, disorders, development, neuropathology, and neurosurgery. Students will perform projects individually or in groups analyzing collected data or developing new analysis or biomedical methods. Students can do projects that are cognitive neuroscience studies of a brain system or technical development of new methods. Sample projects might include mapping a sensory system, developmental assessment or automated brain segmentation and circuit tracing and detection of clinical anomalies (e.g., TBI breaks, tumors). Technical projects might involve better fiber reconstruction, tracking, tract segmentation or developing new visualization or statistical projects. Students must have some statistics and research experience/course work and consent of the instructor.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad LG/SNC Basis

PSY 2475 - BEHAVIORAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will explore the links between behavior (normal and abnormal) and the brain. Cognitive and affective processes will be emphasized. Throughout the course, students will be exposed to research involving humans and animals at a variety of levels: e.g., Analysis of behavior, neuroimaging studies of whole brain activity, recordings from single brain cells, examinations of brain chemistry, and manipulations and study of genetic information. No prior knowledge of biology or neuroscience is required. The format of the course will include both lectures and discussions of scientific papers. The lectures will introduce basic facts and methods of cognitive, systems, cellular, and molecular neuroscience, and they will provide overviews of topics in cognitive and affective neuroscience, considering both normal and clinically-impaired behavior and brain function. The readings will provide an opportunity to consider different methods in the context of the primary literature, permit selected topics to be explored in greater depth, and provide a foundation for self-exploration and evaluation of cognitive and affective neuroscience literatures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2476 - TOPICS SEMINAR IN COGNITIVE PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 4

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in cognitive psychology.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

PSY 2477 - DESIGN OF EDUCATIONAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Students will work in teams to enact an innovative educational design process with real projects and real clients. The educational systems being (re)designed may include a museum exhibit, a high school robotics unit, a college lab course, or a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the

design teams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSY 2502 - HEALTH FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

This is a 3-credit proseminar intended for graduate trainees in biological and health psychology. Key conceptual and methodological issues in several major areas of concentration will be presented and discussed in a seminar format, in the context of current research. Requirements include active class discussion, brief presentations, and several papers involving summary and critique of current issues in each area of concentration. Areas of concentration will include cardiovascular behavioral medicine, psychoneuroimmunology and behavioral oncology, addictions and health behavior, and health cognition.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2505 - HEALTH PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Review of current research and topics in biopsychology.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2520 - PSYCHONEUROIMMUNOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course provides a general background in the new interdisciplinary area of research dealing with effects of physical and psychological stress on the ability of the immune system to withstand illness and disease. Emphasis is on experimental studies which demonstrate ways in which environmental factors alter immunocompetence of animals and humans and on neural and endocrine factors that may mediate such effects. The possible significance of nervous system immune system interactions for development of disease states such as cancer is discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2560 - HUMAN CARDIOVSLR PSYCHPHYSLGY

Minimum Credits: 3

Maximum Credits: 3

Cardiovascular psychophysiology examines the influence of psychological processes on cardiovascular function. The course examines evidence supporting three perspectives on psychological processes related to cardiovascular function; a stress-arousal perspective, an information processing perspective and a metabolic need perspective.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2575 - TOPICS IN PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in psychology.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2576 - TOPICS SEMINAR IN HEALTH PSYCH

Minimum Credits: 2
Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in biopsychology.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

PSY 2945 - PSYCHOLINGUISTICS

Minimum Credits: 3
Maximum Credits: 3

This course is a general introduction to psycholinguistics, which will look at processes of language understanding, language production, and language acquisition. Throughout the course, we will consider the relationship between theoretical linguistic concepts and constructs, and psycholinguistic data. We will also touch on related areas, such as processes of reading, language and the brain, and language and thought.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2970 - TEACHING OF PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course is required of all graduate students fulfilling the departmental teaching requirement. This requirement involves full responsibility for teaching an undergraduate course in psychology during one term.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2975 - TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1

Supervised practicum experience in the Teaching of Psychology

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

PSY 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9

Independent research project developed under the supervision of a faculty advisor.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 9

Students who are planning, conducting or completing the Ph.D. dissertation may register for this course.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 3205 - SEMINAR IN BEHAVIOR GENETICS

Minimum Credits: 3

Maximum Credits: 3

This is a survey of recent topics in the field of experimental psychopathology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 3245 - SEMINAR IN ADDICTION

Minimum Credits: 3

Maximum Credits: 3

This seminar will examine research literature on alcohol use and abuse. A guiding principle in this course is that alcoholism is a heterogeneous disorder that is multiply determined. Both genetic and environmental factors contribute to its etiology. A second point of emphasis in this course is that understanding drinking and alcoholism is advanced through the study of basic psychological processes. Although the course will focus on alcohol, some of the material will be drawn from, or relevant to, other substances of abuse. The field of alcohol research is vast and this course will focus on aspects of particular psychological relevance, with an emphasis on human research. Seminar topics will range from acute effects of alcohol in social drinkers to issues related to prevention and treatment of alcoholism. Although the course will include clinical topics, it will not be a clinical "how to" course, and students from both within and outside the clinical area are encouraged to enroll.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 3290 - RESEARCH CHILD PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on major research problems in the field of child psychopathology. Issues of classification, differential diagnosis, course, and outcome of disorder are addressed. Particular disorders are used to illustrate the issues, trends and methodological problems which characterize current research in child psychopathology. These include attention deficit disorder, conduct disorder, childhood depression and anxiety disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 3902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

Specific research topics carried out under the direction of a particular member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

Public & Int'l Affairs

PIA 2003 - SEMINAR IN RESEARCH DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term "mixed method."

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

PIA Administration of Public Affairs introduces students to techniques of management, drawing on insights from domestic, comparative, and global public management. The course covers a number of areas, including the functions and organization of government at multiple levels, including the regulatory and policy-making environment; core issues of public administration and management; the interface between government and citizens and governance partnerships in the public, private and nonprofit realms; the "four pillars" of governance - accountability, participation and social capital, transparency, and the rule of law; strategic management in the public sector; and "soft" skills associated with leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2021 - INTERNATIONAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course in the field of International Affairs (IA). It is designed to give students knowledge of the major theoretical approaches and issues in international politics. The course introduces students to basic concepts and schools of thought in IA and examines major institutions and processes through which foreign policies are made and implemented. A major objective is to relate theories and models to major national and international policy debates through the close examination of case studies. Reference will be made throughout to contemporary developments. The interlocking objectives of this course are: 1) to provide a grounding in the nature and characteristics of International Affairs; 2) to develop a broad understanding of the outstanding features of today's world and how it differs from other periods; and 3) to learn the key concepts for categorizing and analyzing the dynamics of international politics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: African Studies, Global Studies, West European Studies

PIA 2022 - QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduction to quantitative methods is a foundation course that provides an overview of statistical methods and hands-on applications to managerial decision-making in the public sector. Understanding statistical analysis and being able to work with data are important competencies of professionals in public policy and administration. Course topics include program evaluation, data collection and measurement in public policy and administration, descriptive statistics, hypothesis testing, processes for selecting statistical tests and assessment of statistical assumptions, measures of association and other bivariate statistics, index variable construction, regression analysis, and an overview of selected other statistical and quantitative methods applied to problems of public administration. Students get hands-on experience through the use of a statistical analysis tool. Recognizing the social, political, and economic context of data collection, analysis, and reporting practices in the public sector, this course also discusses the ethics of data analysis and information technology policy and management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to provide an introduction to econometrics for policy analysts. The focus of the class will be on applied data analysis to practical problems. We will discuss some basics of econometric theory to support your understanding of the applications of these techniques. In the first part of the semester, we will introduce regression analysis and the assumptions underlying it. In the later part of the semester, we will see extensions of this basic idea: time series and panel regression, regression with a limited dependent variable, instrumental variables regression, and experiments. After this class you should be able to: 1. Understand basic empirical research in the social sciences. 2. Understand the theory behind basic econometric techniques. 3. Perform basic empirical analysis on social and political behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

Macroeconomics Macroeconomics, as the name implies, is the study of aggregate economic phenomena such as national income and product, inflation, employment, economic growth, and the associated fluctuations in these variables. At its center is the analysis of the fiscal and monetary policies used to achieve the macroeconomic goals of stability and growth. Students will gain understanding of the causes of economic recessions and the policy tools available to stimulate recovery and mitigate the economic and financial costs of these downturns.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2025 - MICROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

Microeconomics is the study of the production, allocation and distribution of economic resources and output. It focuses on markets and analyzes how producers, consumers and policies interact to determine the market's prices and quantities. The course begins with the analysis of supply and demand and market clearing under competitive conditions. It will also cover market failure such as externalities and monopoly and analyze the associated policy interventions such as price floors, ceilings, quantitative restrictions, and market-based policies, namely, taxes and subsidies. The course also covers the analysis of labor markets, natural resources, and international trade. The key objective of the course is to apply microeconomic principles to the analysis of policy objectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Public and International Affairs

PIA 2027 - MACROECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course applies tools from PIA 2024 economic of public affairs course (or equivalent) to examine current economy-wide challenges. These topics include economic development, environment, energy, health, international trade, and recent financial crisis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Public and International Affairs

PIA 2028 - PUBLIC POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

How can we improve the ability of society to choose between alternative policies? This course provides a framework to assess alternative policies on the dimensions of efficiency, equity, and political feasibility. The comparative institutional framework requires an interdisciplinary perspective which draws on economics, political science, and political economy. Throughout the course, we will consider how insights from these disciplines provide insight into the choices confronting policymakers seeking to bring society closer to their conception of the good life. The course is organized into three parts: an introduction to policy analysis; a framework for comparative markets and governments; and applications of the framework. One of the main goals of the course, besides mastering the material (as evidenced by an in-class midterm), is a series of papers applying these concepts as well as an original research paper conducting a policy analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PIA 2001 or 2008 or PIA 2022 or PIA 2024; PROG: Graduate School of Public and International Affairs

PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INFERENCE FOR POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

What are the true impacts of a policy? Does the policy in question achieve its desired goals? Even with good data, this question is often difficult to answer, as policies are rarely introduced in isolation. This means that patterns in data may reflect the impacts of policies, but may also reflect the influences of various confounding factors. Through lectures, discussions, and hands-on data projects, this course will introduce students to quantitative methods aimed at identifying the causal impacts of policies. Methods introduced will include: difference-in-differences, regression discontinuity, and instrumental variables. By reading and discussing academic research papers, we will see that these methods can be applied to a wide variety of settings. Topics of these applications may include: the relationship between government spending and charitable giving, taxation, education policy, the impacts of the characteristics of politicians on policy outcomes, crime, among others. Students should have some pre-existing familiarity with regression analysis and experience in working with data in a statistical analysis package like Stata.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PIA 2023 or 3000

PIA 2038 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course, we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international peace and focus on terrorism, refugees, and weak states as destabilizing factors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2039 - ADVANCED METHODS: TEXT AS DATA

Minimum Credits: 1.5

Maximum Credits: 1.5

This is a course in advanced methodology in political science. The class will focus on topics related to measurement.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course provides a multidisciplinary framework for analyzing cybersecurity and intelligence policies developed after the Intelligence Reform and Terrorism Prevention Act of 2004. Methods of policy analysis include expert forecasting and prediction markets, benefit-cost and benefit-risk analysis, performance monitoring and evaluation, problem diagnosis with structured analytic techniques, and the development of transparent policy arguments. Case studies are used to exemplify the interplay of policy analysis and the politics of policymaking in the pursuit of efficiency, equity, political feasibility, and ethics. The course is organized into three parts: I. A Framework for Policy Analysis; II. Methods for Policy Analysis; and III. Methods for Communicating and Using Policy Information. Case materials in cybersecurity policy and intelligence analysis will be used throughout the class. Requirements include two 5-page policy memos, an in-house midterm exam, and a take-home final. This course satisfies the GSPIA core course requirement in public policy analysis.

Grade Component: Grad HSU Basis

PIA 2101 - MANAGING EMERGENCIES AND DISASTERS

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad overview and practical exercise of frameworks and principles of emergency management in the United States and global contexts. The course builds on these frameworks to consider how communities understand and plan for risk; adapt plans and make decisions in response to actual emergencies and disasters; engage effectively in short and long-term recovery; and consider resilience and mitigation as they build back.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR

Minimum Credits: 3

Maximum Credits: 3

This course, designed for students in all GSPIA Masters programs and for PhD students, links the fields of human resources management,

organizational behavior, and leadership with hands-on exercises and cases to provide a basic understanding of the skills needed for successful supervision and management of people in public and non-profit organizations. Skills covered include effective hiring, motivation, and direct supervision of staff; evaluation and reward systems; effective communication in a multicultural or international environment; labor management relations; and participative approaches to management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2104 - FINANCIAL MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Financial management plays a central, if not strategic and controlling role in public administration. It is the one element that can, and does, most easily shape and condition administrative behavior patterns. It involves the allocation and management of scarce resources. This course introduces the students to the basic financial management concepts and practices in the public and non-profit sectors. The purpose of the course is to familiarize potential administrators with the elements of financial management and how these various elements are (or can be) used to help accomplish organizational goals and objectives. The ability to read and understand basic financial statements used in the public and nonprofit sectors will be emphasized. One does not need to be an accountant to take this course. The course will focus on understanding the financial world of governments, how they are financed; the major expenditure elements; how to read and understand the major financial documents and financial statements. Several classes will focus on the non-profit sector. A significant amount of time will be spent reviewing the major taxes used to finance governments as well as understanding the significant tax policy issues surrounding the use of these taxes. Major items impacting upon the financial conditions of governments including the funding of public pension systems; capital budgeting; and debt management will also be reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2108 - MATCHING MONEY WITH MISSION

Minimum Credits: 3

Maximum Credits: 3

This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grant-making experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grant-making skills; connect applied learning in grant-making to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grant-making; incorporate knowledge gained from practitioners and course work into personal philanthropic practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs through an enhanced understanding of the Pittsburgh nonprofit sector.

Academic Career: Graduate

PIA 2109 - REBUILDING AND BUILDING US PUBLIC INFRASTRUCTURE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2111 - REGULATION HEALTH, SAFETY AND ENVIRONMENTAL RISKS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to improve skills in analyzing government efforts to control health and safety risks. The class is designed to illuminate the public policy issues raised by government efforts to manage risks. Economic, legal, ethical and political perspectives are brought to bear on the choices that policymakers have to make.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2115 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

From global climate change to how much you pay for water and sewer service, many public issues intersect with the environment or natural resources. This course uses an economic lense to understand a range of environmental and natural resource issues facing policy makers. Through readings, class discussions, and assignments the course should help you build policy-related skills, including analyzing complex problems, communicating clearly, and drawing insights from data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies, Russian & East European Studies

PIA 2117 - PROGRAM EVALUATION

Minimum Credits: 3

Maximum Credits: 3

This course gives students knowledge, skills, and experience to define and measure program and policy impacts on clients/consumers, meet accountability requirements of funders, and design and revise programs to address the changing needs of stakeholders. Through in-class exercises, case studies and written assignments, students will be able to apply their new knowledge and skills to real life evaluation designs, implementations, and reporting. In addition, students will be asked to develop a plan to evaluate a public program of their choice including proposed methods of data collection and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2122 - MANAGING AND FINANCING URBAN SERVICES

Minimum Credits: 3

Maximum Credits: 3

This course examines issues related to the public economy of local government taxation and spending. The problems facing central cities and metropolitan areas are highlighted using the Pittsburgh and Allegheny County region as context. The course is designed to maximize the student's participation while making the learning environment as "real world" as possible. To accomplish those goals students select either a city to develop a financial plan, a particular coping strategy to deal with fiscal stress, or an analysis of a nationally recognized best practice for the budget process. Students learn how to finance public services, infrastructure, and economic development (a model is discussed early in the course).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2124 - COMPARATIVE METROPOLITAN GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

This course is about the governing of metropolitan regions in the United States. The concepts of metropolitan region is relatively new. Faced with rapid growth of suburbs, the creation of satellite cities, new modes of transportation, an academic roundtable of regional planning proposed that a "new political or administrative entity" at the metropolitan level needed to be created that was different from the precinct, ward, municipality, county, or state. The year was 1926. Seventy-one years later, Anthony Downs lamented, "as congress shifts many federal powers to lower levels of government it is missing a unique opportunity to resolve a fundamental flaw in America's government structure; the absence of any authority at the metropolitan regional level. Metropolitan regions have become the most important functional units of economic and social life in almost all modern societies" (Downs, 1997). The road to the metropolitan region takes us through the land of local government. Local governments are the building blocks of the metropolitan regions. The American system of governing and government is best understood as a territorial based distribution of power and responsibility. It is steeped in both law and popular culture. Over 40 years ago, Arthur Maas (1959) defined the structure of local government in the United States as an "areal" division of power wherein the territorial bounded local governments were by culture and practice, an integral part of the system of organizing the divided power between the federal, state, and local governments. With this background, we will compare and contrast governance strategies that have been or are being considered in regions throughout North America. These strategies will be analyzed through lectures, discussions, innovation presentations, brief policy memos and the use of formal debates between teams of students organized early in the semester.

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2125 - CITY AND REGION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is about the current challenges faced in cities and regions, nearby and around the world - and how those challenges might be met. The majority of the world's citizens live in cities, and therefore one cannot talk about human progress without thinking about progress in cities. As "mega-regions" consolidate, small cities grow rapidly, and older industrial cities shrink, the managerial, policy, and planning capacities of governments come under increasing stress. How can cities meet these challenges? To facilitate understanding of these dynamics and issues, this course is divided into two parts. The first part provides a general background necessary for the second part. We define the general concepts of "city" and "region," and we talk about measurement issues involved in understanding what is happening to them. We also learn about the policy and planning process involved in addressing any issue in a city or region. The second part focuses on the challenges cities and regions face, and how to solve them. Solving them implies having a theory about what causes them, so this part will begin with a discussion of what urban scholars define as an ideal city and region. It will then move on to cover specific urban policies such as transit oriented development, the use of eminent domain for urban projects, community development, etc. Emphasis will be placed on understanding the practical issues of implementing urban and regional policies, and learning about actual experiences with such policies in particular places.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2129 - LAW AND CIVIL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to acquaint students with the maintenance or creation of civil society in conditions of political instability prompted by such things as security threats, disasters, or political upheaval. In particular, the course will explore the rule of law and the protection of rights and liberties as a bulwark of civil society and consider the requirements for their continued preservation. Upon completing this course students should be able to critically assess the concept of civil society and its requisite components from a historical, philosophical, and legal perspective and understand the role of rights, liberties, political processes, organizations, institutions, and norms to preserve civil society even in periods of conflict. The course is divided into (1) historical and theoretical foundations of civil society; (2) management of political, economic, and natural disasters and rights and liberties; (3) analysis of public policy solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2131 - LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

This course examines theories about leadership and provides students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior; and plan for their own leadership development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the financial practices and processes required to promote economic and environmental sustainability (both public and private comparisons). Emphasis is put on how the economic component husbands the wise use of resources to effectively achieve specific organizational successes, promoting societal or external long-term prosperity, enhancing the opportunity for living things in the environment. On the environmental and social sides stress is put on respecting things and people both in particular organizational and external community. Next focus is put on financial indicators (both early warning and long term) that have been developed and applied to predict potential financial problems before they arise. Attention is focused on financial indicators (the financial monitoring trend system-ftms) that have been developed to promote stable and sustainable financial management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2145 - BENEFIT COST ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is intended to give the students a grounding in the concepts and tools of benefit-cost effectiveness analysis. In determining whether or not to undertake a program or project, which of several possible projects should be undertaken, or how to evaluate an ongoing or completed project, benefit-cost analysis is a widely used method. The advantages or and limitations of benefit-cost analysis will be covered in order to give a perspective on public vs. private considerations.

PIA 2156 - ETHICS AND POLICY IN CYBER SPACE

Minimum Credits: 3

Maximum Credits: 3

Information technology and the information that it generates has increasingly become part of our daily lives shaping our practices, discourses, and institutions in fundamental ways. Personal information is used by consumers, professionals, and organizations to a variety of ends and in a number of different settings. The growing reliance on personal information not only challenges long standing demarcations between public and private institution in terms of responsibilities, obligations, and limits, but also calls for a reconsideration of how to ensure the protection of long standing civil liberties and civil rights. This course will consider the impact of emerging technologies within existing constitutional, statutory, and international guidelines and will then explore a range of policy solutions for managing the use of personal information in our public and private sectors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Natural resource management is complex, and emerges from frameworks of governance - the rules that govern ownership in society and the political and administrative institutions that have responsibility for management of natural resources. The course will examine resource ownership and management by government, private owners, and communal property actors. Institutional frameworks reflect nature of the resource being managed, the characteristics of the community seeking to manage the resource, and historical socio-economic factors. Geographically, the course will take a global view, with regional illustrations. The course will look at the theoretical approach referred to as "managing the commons." Institutionally, the course will examine government entities, international organizations, communities, non-governmental organizations, and trade associations. Substantively, the course will look at land, soil, and forests; water and rivers; oceans, fisheries, and coastlines; energy and mineral resources; and ecosystem services, and species protection.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2170 - MANAGEMENT NON-PROFIT ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

Nonprofit organizations and nongovernmental organizations are a part of what is generally referred to as civil society. While this course is primarily an introduction to leadership, management and policymaking in nonprofit organizations, it will, however, briefly, cover nongovernmental organizations. In the main, the readings, assignments, and course materials are designed to enhance your understanding of the nonprofit sector in the U.S. and to build conceptual and practical skills needed to perform effectively in positions of significant management responsibility in nonprofit organizations/nongovernmental organizations. Students who have substantial experience in the nonprofit/nongovernmental sector will relate the course materials to their own experiences and perspectives. But students who have no prior managerial experience (or limited experience) will also find the course to be valuable and instructive.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2180 - COMPARATIVE PUBLIC ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

Emergencies and disasters create an extraordinarily difficult set of challenges for public managers. In disaster, public managers are legally responsible for the protection of life, property and continuity of operations in their respective communities. Yet, they are suddenly confronted with situations they may have never seen before. How do they assess the situation? How do they formulate a strategy of action to bring the situation under control? What information do citizens need to protect their own lives and property? How do managers of nonprofit and private organizations make

informed decisions under the urgent stress of disaster, when lives and property are at risk? As the world's population increases, the incidence of disasters, both natural and man-made, also increases as people move into vulnerable coastal regions and amass in megacities. This course will examine the conditions that confront public, private, and nonprofit managers in communities exposed to risk from natural, technological, and deliberate disasters. It will review the current organizational plans for assessing risk, and examine the requirements for enabling communities to reduce their exposure to risk.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2185 - STRATEGIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course deals primarily with the concept of organizational strategy ' how organizations position themselves to succeed in an ever changing environment. Secondly, it deals with managerial strategy ' how leaders and managers in organizations make important decisions under conditions of uncertainty. Strategic management consists of a set of tools to help organizations thrive in dynamic and (sometimes) competitive environments. The essence of strategic management is the ability to leverage the organization's strengths and 'comparative advantages' to respond to emerging opportunities and challenges in its external environment. In government and nonprofit organizations, the practice of strategic management is complicated by the need to work effectively within the political system and to collaborate with other agencies for the delivery of goods and services. Purely competitive strategies must be tempered by a broader view of what is in the best interests of society at-large, not just the organization's self-interests. This course will help you to understand and apply the concepts and methods of strategic management in public and nonprofit organizations. Strategic planning is one of the many tools of strategic management. Strategic planning is a step-by-step process, usually undertaken every 3-5 years, to help an organization develop its strategy for the future. The strategic plan might, for example, highlight opportunities for the organization to grow by offering its services in new locations, add new services to its portfolio, alter its mission statement, or even merge with another organization. Alternatively, a strategic plan might identify ways for the organization to reduce its size, cut programs and staff, or even go out of business in an orderly way.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2187 - INEQUALITY, POVERTY AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Inequality of income and wealth has increased substantially in the United States in recent decades. This course will examine the dimensions of those changes, their causes and the costs and benefits of different possible remedies. In addition, it will explore the linkages between these financial measures and changes in social inequality and social behavior and in the worldviews of citizens. Finally, it will investigate political changes linked to these changes in society.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on sub-national, local economic development. This course will encompass theory, policy, process and practice in state and local economic development. Our focus will be largely in the North American urban context over the post-World War II period, with international comparisons. We will also use examples from Pittsburgh in furthering our understanding of local economic development practice. We will find that in the U.S. Context, there are different interpretations and meanings to economic development, both in theory and practice. These certainly differ at the international scale, as well. Specific topics include: equity issues in economic development, economic cluster analysis, tax increment financing, brownfields revitalization, retail, and regional governance. The purpose of the course is to provide the student with knowledge of the approaches to economic development in theory and practice, techniques and methods of analysis, and debates ongoing in the field. Students will select one economic development policy or case to analyze in depth over the course of the term.

Academic Career: Graduate

Course Attributes: Global Studies

PIA 2202 - BEHAVIORAL ECONOMICS AND GAME THEORY

Minimum Credits: 3

Maximum Credits: 3

In this class you will sharpen and systematize your understanding of incentives and psychological motivation, identify and model strategic issues in real world cases in public and international affair, and communicate your analysis in a compelling and concise manner.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2204 - GRANT WRITING AND FUNDRAISING

Minimum Credits: 3

Maximum Credits: 3

Grant writing and fundraising are critical skills for people working in the nonprofit sector. "Grants" are funds donated by an organization such as a foundation; donations from individuals are obtained through a variety of other fundraising strategies. This course aims to provide an introduction to grant writing and fundraising for nonprofit organizations (NPOs/NGOs). No matter what type of position you have, as a program coordinator, executive director, corporate/community liaison, or a development officer, all nonprofit and public sector professionals need to be familiar with how nonprofit organizations obtain funding. Moreover, the writing, planning, analysis, and collaboration skills required for grants and fundraising are applicable and useful in every profession. You will learn how to research a variety of funding sources, write a grant proposal, and develop fundraising materials based on the needs, services, and constituents of a nonprofit organization. You will select one NPO/NGO to serve as the basis of a grant proposal and then work with a group to develop a fundraising plan for another "client" organization. More details and instructions about selecting a nonprofit organization to work with will be given in class. The course first focuses on grants, mainly from private (foundation and corporate) sources, and how to write a standard grant proposal that could be submitted or adapted to a variety of prospective funders including public/government funding programs. The course will then explore fundraising strategies for individual donors, including appeal letters, planned giving, event planning, the use of social media, and other tools.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2210 - RACE, GENDER, LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the definition, protection and conflicts of identity, gender, sexuality, race, religion, and ethnic, in law and policy in the United States. The course considers the historical and philosophical justifications that have been used to broaden the definition and protection of identity and engages in an analysis of how these efforts continue today. From desegregation of the past to race conscious admissions of today, the way we define and remedy racial discrimination involves complicated considerations of our legal definition of equality and the institutionalization of policy in the public and private sectors with Constitutional limits in mind. Similarly, policy guarantees against gender discrimination and the broadening of LBGTQIA+ rights once relied on biological justifications, but now claims of gender fluidity alter the kinds of legal and policy protections we are able to seek. The landscape of expanding legal and policy accommodation of emerging forms of identity also includes a consideration of conflicts and intersectionalities with other existing protections for identity. Religious exercise and practice, for example, can clash with those seeking

accommodation of LBGTQIA+ rights, while law and policy struggles to strike a balance. This course will engage legal analysis, case based examples and structured student debates on emerging policy issues involving identity and its place in American society today.

PIA 2213 - URBAN CULTURAL REGENERATION AFTER CRISIS: DOING INTERNATIONAL COMPARATIVE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The Issue: This course centers on three post-industrial cities: Pittsburgh, PA; Newcastle-Gateshead, UK; and Saint Etienne, France, to evaluate how their cultural regeneration strategies have adapted post-COVID. Many former industrial cities in Europe and North America relied on the arts and culture sector as a main driver of post-industrial regeneration and revitalization. These cities were remade through economic development strategies focused on culture and creativity, with arts and cultural redevelopment strategies, projects, and programs. The pandemic disrupted the arts sector's standard operating practices, causing devastating job losses, canceled programming, altered consumption practices, and requiring emergency relief packages. These disruptions were compounded by public health guidelines and the uncertainty around a rebound in pre-pandemic support for arts and culture. Governments - at all levels - responded in many ways to keep arts and artists in recovery, but these extraordinary circumstances brought into question the resilience of arts and culture as drivers for cultural regeneration in post-industrial cities and drivers for whom. Class background and work: This course provides practical experience in comparative international research and is well-suited to students interested in urban economic development and the cultural and creative industries. The coursework builds on the pre-pandemic research of GSPIA students to create a longitudinal perspective on the sectoral impacts of the COVID pandemic. While there are different methodologies for international comparative research, the class will employ a mixed methods strategy of qualitative research supported by quantitative public data: Review and update scholarly and policy work on cultural regeneration and review previous GSPIA work on the three cities; Formulate research questions based on impacts of COVID on the sector; Design site visit itineraries based on key cultural regeneration examples in each city; Develop research instruments and conduct international field work; and Complete analysis and interpret findings. Ability to travel to UK and France, Spring break, March 2023 is an essential prerequisite for this course (assuming no travel restrictions). This work is supported by the Jean Monnet Network Grant (TransAtlantic Perspectives on Energy and Cities), University Center for International Studies. The grant covers airfare, ground transportation, and accommodation travel expenses for students.

Grade Component: Grad Letter Grade

PIA 2216 - ECONOMICS OF SOCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

This course will use the tools of economics, and draw on empirical research from economics, to explore issues around racial, ethnic, and gender disparities in the United States. We will consider questions such as: Why are there persistent gaps in labor market outcomes across groups? Why are there persistent differences across groups in educational attainment and opportunities? What drives the dramatic underrepresentation of minority groups and women in government, and to what extent does this impact the distribution of government spending? For each of these issues, we will consider the impact of policy on reducing, or in some cases exacerbating, these disparities.

PIA 2222 - THE ECONOMICS OF INTERNATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

States have many tools of statecraft available for use in pursuing their national interests in the international system. While military options are often examined and reported on, economic statecraft is far more commonly employed. This course investigates the use of trade flows, the movement of capital, foreign aid, and economic development to pursue international objectives. It examines the use of such tools by great powers, including the United States, Russia, and China. It also explores how the adverse consequences of punitive economic statecraft and poor economic development can help foster civil war. Case studies encompassing the actions of great powers and civil wars in the Middle East are used to ground the theory of economic statecraft in practice and highlight contemporary uses and challenges in the use of such tools in the international arena.

Grade Component: Grad Letter Grade

PIA 2223 - CITY OF WHITE SUPREMACY

Minimum Credits: 3

Maximum Credits: 3

The title of this course is meant to signal the objective of scrutinizing how systems of white supremacy have shaped the American city and how the American city functions in ways that reproduce and reinforce white supremacy. As George Lipsitz (2007: 12) tells us, "The lived experience of race has a spatial dimension, and the lived experience of space has a racial dimension." The first section of the course will focus on frameworks for understanding white supremacy generally, and as it relates to urban development specifically. The second section considers specific domains of urban policy and planning using white supremacy as the analytic framework. We will examine how white supremacy has been expressed across a range of urban development issue areas, including housing, transportation, the urban environment, education, criminal justice, and urban design, and how policies and planning practice have maintained or disrupted systems of white supremacy.

Minimum Credits: 3

Maximum Credits: 3

Against the backdrop of racialized mass incarceration, policing, and state surveillance, a chasmic racial wealth gap, racially disparate health outcomes, environmental racism, flagrant seizures of indigenous land, and a growing skepticism of liberal and corporate multiculturalism, a revitalized reparations movement has reemerged, challenging the intergenerational effects of white supremacy. However, demands for reparations, whether at the federal or municipal levels, remain encircled by technical, theoretical, and ideological debates. What is the moral basis for reparations? Does the history of racial exploitation, broadly conceived, explain present-day racial inequality? Who should pay for reparations and what group(s) should receive them? And, fundamentally, what actually constitutes "reparation?" In this course, we turn to these questions and more.

PIA 2227 - ADVANCED METHODS OF POLICY RESEARCH ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course in advanced methods of policy analysis focuses on four types of methods: -structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; -problem structuring techniques used to solve ill structured or 'wicked' problems in areas of technology assessment, development planning, intelligence analysis, and economics; -forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; -argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the Security and Intelligence Studies (SIS) program and professional analysts, researchers, and trainers in the Intelligence Community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

PIA 2230 - MASS POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the political behavior of citizens in modern Western democracies, especially the United States. Since much of this behavior is institutionalized through elections, we will spend much of our time examining electoral behavior and participation. We will also deal with public opinion, political reasoning, and information processing, and mass-elite communication.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2231 - CONTEMPORARY US ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

PIA 2231 -- Contemporary US Energy Policy Course Description: This class examines the energy policy choices facing local, state, and federal policymakers. The choices involve myriad issues, including, but not limited to: how and when to regulate energy markets, such as for environmental reasons; ensuring electricity is delivered safely and reliably; allocating research and development resources; and growing concerns about environmental (in)justice. This class will connect realistic policy outcomes to theoretical ideals underlying energy policy, including supply and demand, benefit-cost analysis, monetizing non-market goods, taxes and subsidies, discounting, and equity. Students should expect to build practical, intellectual, and interdisciplinary skills applicable to making energy policy decisions, particularly decisions that impact the environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2234 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

GSPIA's social entrepreneurship class will be taught within the context of nonprofit management and practice, with an emphasis on purpose-driven leadership and skill development. The course will address the impacts of social entrepreneurship in multiple settings and how impact is measured and evaluated. Students will discuss and analyze the goals of "doing good" for social good in the nonprofit realm linking philanthropy, government, and volunteerism through innovative partnerships and financial ties. The instructor will make use of case study materials and connections to GSPIA's Johnson Institute for Responsible Leadership.

PIA 2250 - WORKING WITH PUBLIC INTEREST TECHNOLOGIES AND CIVIC DATA

Minimum Credits: 3

Maximum Credits: 3

This class is designed to equip students passionate about social justice issues to work with public interest technologies and civic data using a curriculum co-developed by four Pitt centers: Center for Analytical Approaches for Social Innovation (CAASI), Western Pennsylvania Regional Data Center (WPRDC), the Office of Diversity, Equity and Inclusion (DEI), and the University Honors College (UHC). The goal is to discern the opportunities and challenges that can come from working with technology and civic data, prepare students to understand and account for community dynamics, develop socially-responsible research and data practices, and implement projects that hold benefits for both community partners and students. This is not a quantitative course and no programming experience is expected.

PIA 2301 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to international political economy, an interdisciplinary field related to international politics and international economics. This course introduces students to important actors and institutions that shape the global economic system. Central issues in international political economy include policy-making on the topics of trade, money, foreign investment, development, migration, and the environment. Major questions include: 1. What are the main economic and political forces that shape the international economy? 2. What domestic and external strategies have states adopted in order to develop their economies and to benefit from exchanges with other countries (while minimizing their vulnerability)? 3. Why and when do states seek to cooperate with each other in the management of the international economy? How successful have their efforts been? (4) What are the major challenges currently facing policy-makers in the management of the international economy? To answer these questions, students will identify key political and economic actors (governments, firms, workers, interest groups, international organizations) and examine interactions within and between states. , Drawing on both historical and contemporary events, the course focuses heavily on globalization's opportunities and challenges by examining the complexities of governing in an interdependent world

PIA 2302 - INTERNATIONAL FINANCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

International Financial Policy The course focuses on the international financial system and its significance for policymaking. Topics include: the balance of payments, foreign exchange markets, fixed and flexible exchange rates, purchasing power parity, and alternative monetary regimes. The course is designed to give students a command of the basic theoretical tools used in analyzing international financial issues and the ability to apply this theory to the real world. Students will write a term paper and make a presentation on a current or historical international financial issue.

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies, West European Studies

PIA 2303 - SECURITY AND INTELLIGENCE STUDIES

Minimum Credits: 3

Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war ' and especially since 9/11 ' are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment ' past and present ' and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

Academic Career: Graduate

Course Attributes: Asian Studies, Global Studies, West European Studies

PIA 2305 - FOREIGN POLICY AND DIPLOMACY

Minimum Credits: 3

Maximum Credits: 3

This course examines how the United States government makes foreign policy and conducts its diplomatic relations with foreign governments and international organizations. It is designed for students who want to pursue a career in foreign affairs. Its main focus will be the state department and embassies, but it will also look at the role of the president and the national security council, the pentagon and other government agencies, congress, the media and think tanks. Key concerns will be the interagency process and the interaction of Washington with overseas missions. The course will acquaint students with how the state department and embassies are organized and function. It will discuss how recent secretaries of state have used the department's machinery, and it will introduce students to key diplomatic activities: working with allies, dealing with Russia, negotiating treaties, conducting shuttle diplomacy. Students will be introduced to the relevant functions of foreign service officers. There is a strong emphasis on drafting: press guidance, briefing memos, reporting cables, etc. Students will also assume the role of 'desk officer' and manage an issue of their choice throughout the course. Normally there will be a field trip to Washington to meet people working at state, on the hill, at think tanks and in foreign embassies. At the conclusion of the course, students will participate in a crisis management exercise that they design and execute. The goal is to develop the professional drafting, reporting, briefing and policymaking skills required to function effectively in Washington's foreign affairs community.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2306 - COMPETING PERSPECTIVES ON GLOBAL ENERGY: FROM WESTERN PA TO EASTERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course provides professional school students in the fields of business, law, engineering, public policy and other areas with a first-hand experience of the global impact of contemporary developments in the natural gas and other energy sectors. Participants will first witness the effect that Marcellus shale has had in Western PA and then see how these developments are impacting the US's foreign policy and trade practices. After this, students will be familiarized with a very different side of the global natural gas and energy equation by travelling to Moscow, where they will see the kremlin's view of global and regional gas and energy markets. The course ends with an exploration of the role that transit states like Bulgaria play in global energy markets and efforts by these players to use their territory and energy alternatives to bargain with larger states at both ends of energy pipelines. Throughout this exploration, students will be exposed to a variety of stakeholders and gain an understanding of energy's impact on domestic and international politics, economics, societies and the environment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2307 - HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

A human security approach puts individual well-being and empowerment at the center of analysis, displacing the traditional focus on state security, in order to produce different priorities, new political synergies, and better domestic and global policies. This course introduces the core principles, critical debates, and emerging approaches to achieving human security in a diverse and conflicted world. Students engage with a challenging interdisciplinary field encompassing international development, security, and human rights. We examine the main approaches to "human security" and investigate substantive policy agendas on a range of global issues, addressing the classic trifecta of threats: want, fear, and indignity. Focusing especially on vulnerable populations, we explore human security approaches to political and interpersonal violence, poverty, environmental and health threats, and identity-based threats such as racism and sexism. We pay special attention to the roles of non-governmental actors alongside states and international actors. Students learn to utilize multi-sectoral and interdisciplinary thinking in order to articulate people-centered policy agendas and solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2308 - COVERT ACTION IN WORLD POLITICS

Minimum Credits: 3

Maximum Credits: 3

What is covert action? How does it differ from other hidden tools of statecraft? What are the common drivers of covert action across time and space? What are some of the major successes and failures of covert action over the past 70 years and what can these episodes teach us about secret operations in the 21st century? How has the proliferation of new technologies impacted the ways in which states think about and use covert action today? At present, there exists a mismatch between the relatively high frequency with which states turn to covert action to achieve foreign policy objectives and popular understanding of the subject, which is oftentimes limited and sometimes sensationalist. In this course, we will take a deep dive into the secret world of covert action, exploring the many faces of, and dispelling the many myths surrounding, this unique tool of statecraft. In order to accomplish these goals, we will examine the theoretical, historical, and contemporary research on covert action.

Academic Career: Graduate

Course Component: Lecture

PIA 2310 - MARKETS AND STATES

Minimum Credits: 3

Maximum Credits: 3

Markets and States considers how governance explains why some countries are rich and others are poor. In the context of this course, "governance" refers to the formal and informal rules that liberate and constrain individuals and groups in their efforts to improve their economic situation. The course begins by considering the economic foundations of prosperity, including the role of competitive markets, private property rights, and foreign aid in the process of economic development. It then considers the role of the state in economic development, with emphasis on analysis of the political factors that create incentives for governments to do what is in society's best interests. Its empirical focus is on developing countries, but will also consider some examples of the political economy of development in the U.S., including when the U.S. was a developing country. The course will also focus on evaluation of development policies, including understanding the logic of randomized impact evaluations and other methods used to analyze the causal impact of public policies seeking to improve prospects for economic development. The course is relevant for students in international development, public administration, and international affairs.

Academic Career: Graduate

PIA 2311 - ADVANCED INTELLIGENCE ANALYTICAL TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students who have already gained skill in writing intelligence analytical pieces from Introduction to American Intelligence, Terrorism as an Intelligence Problem, or Intelligence Perspectives on the Cold War Era. We will review some of the basic literature on intelligence analysis, study some of the more-advanced analytical writing techniques, and then will put them into practice in writing and orally briefing analyses on topics of current intelligence interest. During the course, each student will develop and research a topic -- chosen in consultation with the instructor -- of interest to the student and drawing on the student's own knowledge and expertise. The instructor and other students in the course will act as policymakers to critique the analyses for their insights and value to the policymaking process. Each student will produce a medium-length analytical product suitable for use as a professional writing sample of value in their career search.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2319 - INTERNATIONAL TRADE

Minimum Credits: 3

Maximum Credits: 3

International trade is important and controversial. All countries participate in international trade. Yet all countries restrict trade. In all countries there are people and groups who favor freer trade and there are others who oppose it. This course will introduce the student to the key issues and controversies in the study of international trade. We will examine economic explanations and analyses of why countries trade. What are the key determinants of trade - factor endowments, resources or skills? We will also analyze the benefits and costs from trade and how these are distributed

within a country. Throughout we will adopt a policy perspective and will rigorously examine some elements of trade policy such as tariffs, quotas, subsidies, export taxes, and, the economics of free trade arrangements. We will look at the controversial issue of international trade and the balance of payments. Time permitting; we will analyze the effects of trade and international factor mobility on economic growth and development. We will broaden and deepen our knowledge of the specific subjects and improve our skills in applying the analytical tools that economists have developed to help understand these complex phenomena.

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies, West European Studies

PIA 2323 - INTELLIGENCE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will empower students with a deeper understanding of the myriad ways U.S. intelligence analysts support policy makers. Students will have hands-on experience drafting written assessments in the style and format used by the intelligence community, including for the President's Daily Brief and in longer intelligence assessments such as National Intelligence Estimates (NIE). Students will also hone their oral briefing skills through in-class exercises. Examples for written and oral exercises will be drawn from the range of experience real-world intelligence analysts face, including providing strategic assessments of political and economic developments in support of U.S. bilateral and multilateral relations, analysis of terrorist groups and other non-state actors, and military analysts' support to the war fighter. Class readings will focus on understanding the delicate balance between intelligence analysis and foreign policy making, and what happens when policy makers disagree with analytic assessments or when intelligence analysts fail to provide timely and accurate information to policy makers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2327 - TERRORISM AND COUNTER TERRORISM

Minimum Credits: 3

Maximum Credits: 3

This course will deepen our understanding of the post-9/11 security environment by examining contemporary terrorist groups and the history from which they spring. We will address a number of questions, including, what is terrorism and how has the terrorist threat changed over time? What are the data that we use to understand terrorist behavior and the patterns of terrorism? What motivates terrorists to engage in political violence against non-combatants? At what point does violent militancy cross over into terrorism? Does terrorism ever succeed, and, if so, under what circumstances? How does terrorism end? While much of our focus will be on so-called 'Islamist terrorism,' we will also explore other types of terrorism, including secular and sacred groups active in the United States, Western Europe, and elsewhere. Time permitting, we will also consider a number of other topics, including 'cyber-terrorism,' deradicalization, and state terrorism. As befitting the complex nature of terrorism, we will draw on numerous academic disciplines in studying these topics, including political science, sociology, psychology, history, anthropology, and economics.

Course Attributes: African Studies

PIA 2328 - ETHICS AND NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This graduate seminar focuses on the ethical quandaries confronting principals who make decisions on national security policy. Students practice articulating foreign policy arguments, paying attention to the political, ethical, and social scientific aspects of those arguments. Issues covered include just war, humanitarian intervention, counterintelligence, counterterrorism, immigration, economic sanctions, foreign aid, and distributive justice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2329 - INTELLIGENCE & FOREIGN POLICY

Minimum Credits: 3

Maximum Credits: 3

As societies have become more reliant on information technologies, so they have become more vulnerable to disruption through attacks on information systems. This course examines the national information infrastructure, highlights its vulnerabilities to both criminal exploitation and attacks by terrorists or hostile nations, and look at what can be done to enhance security in this area.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2335 - APPROACHES TO CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The resolution of disputes at national and international levels requires creative approaches to conflict resolution. Resolving disputes through successful negotiation has become a valued skill and could even be considered a "fine art" Of course, some disputes cannot be completely resolved, especially those which have evolved into violent conflict. In these cases, successful negotiation can lead to a more peaceful and productive situation which could eventually evolve into a permanent settlement. This course first examines the nature of conflicts: how they begin and can sometimes lead to violence or even war. We then analyze the role of negotiation and its potential for mediation to defuse disputes. This course covers both the theory and the practical application of conflict resolution using case studies and role playing. The course objective is to provide students with both the theory of conflict resolution as well as the skills involved in successful negotiation. In relation to the negotiation process, the course focuses on the following questions: when is negotiation feasible and desirable as an approach to conflict resolution? What format (bilateral/multilateral) and procedure is appropriate for a given negotiation? What are the main issues in setting up a negotiation? How can negotiation "formulas" be devised and evaluated?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2340 - SPACE AND NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course examines how space-based services provide critical support to military and intelligence operations and contribute to national security more broadly. The course is designed to investigate several interrelated themes, weaving together relevant aspects of technology, strategy, and policy. The material is approached from both functional and historical perspectives, exploring the basics of military and intelligence space operations and ending with an examination of the space-related technical, strategic, and political challenges facing the nation today and in the foreseeable future. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. Upon completion of this course students should be able to understand and evaluate policy proposals for national security space and intelligence systems, strategies, and operations. Students should be able to perform competent policy analyses, develop well-reasoned positions, and communicate those positions in concise, persuasive professional papers. The course is taught in three phases. Phase 1 focuses on the fundamentals of satellite operations. Here students explore, at a non-engineering level, the basic principles of orbit and learn what kind of military and intelligence missions are flown in space, at what orbit each mission is flown, and why. Phase 2 surveys key developments in space operations and national policy in the cold war. Students examine how military satellite programs developed during that period and what missions they came to support. Phase 3 examines America's dependence on space today, surveys emerging threats to the nation's space infrastructure, and considers the implications of these developments for U.S. National security policy. Students weigh the pros and cons of such controversial programs and concepts as ballistic missile defense, anti-satellite weapons, space control, and orbital weapons designed to attack targets on earth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on how the U.S. intelligence community collects and analyzes information to support U.S. national security and foreign policy objectives. Students will examine the historical foundations of the intelligence community and consider how the role of intelligence has changed over time, particularly after the attacks of September 11, 2001. Students will also consider the legal, moral, and ethical factors that influence the roles and conduct of the U.S. intelligence community. Finally, this course will take a closer look at selected current intelligence topics, such as Russia, China, terrorism, weapons of mass destruction, and cyber security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2350 - THE POLITICS OF INTERNATIONAL TRADE

Minimum Credits: 3

Maximum Credits: 3

This redesigned class will cover the political economy of trade, broadly defined to include global production and the activity of multinational firms. As the examples of Brexit and the protectionist policies and rhetoric of the Trump administration remind us, openness to the international economy is a political choice. Indeed, all governments face a dilemma: how to balance the demands of economic actors (workers, industries, firms) who demand protection from global competition, while guarding the benefits of globalization - jobs created, gains to consumers, growth-inducing innovation - from protectionist (i.e. anti-globalization) rhetoric and policies (e.g. trade barriers). We will examine how governments in developed and developing countries can manage this dilemma through trade policy, social welfare policy, industrial policy, and development strategy. To understand how this dilemma shapes the politics of trade within and between countries, we will first cover major economic theories of trade, foreign investment and global production (i.e. offshoring). These theories tell us which economic actors are the winners and losers from trade. Second, we will examine the political process that shapes trade policy at the domestic level. Finally, we will cover the international politics of trade, including free trade agreements and the WTO. The class will also help students develop their policy analysis skills. One requirement will be a short data-driven research project. Class time will be devoted to spending time on data collection, data preparation, and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2352 - STRATEGY AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course examines the nexus of military strategy and national policy, exploring the development and use of military power for political ends. In short, it is about how states make war. The course is designed to investigate several interrelated themes. First is the role of military theory as a foundation for doctrine and strategy. The second explores the relationship of military strategy to national objectives and political decision-making. The context in which the foregoing issues are examined is provided in the third theme: the social, technical, and intellectual evolution of warfare from the early nineteenth century to the present. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. The course is taught in five phases; the first is foundational and the four that follow are historically oriented. The course phases are: (1) basic concepts and theory; (2) the 19th century through the first World War; (3) the interwar period through the Second World War; (4) the Cold War; and (5) the post-cold war era and beyond. Phase 1 lays a theoretical foundation that students apply in analyzing historical developments presented in each of the four subsequent phases. Additional theories are introduced in phases 2 through 5 in context of the technological and intellectual developments that inspired them. In each of those phases, students also explore the evolving nature of civil-military relations and the impacts of social, intellectual, and technological developments on military strategy and national policy. At the end of the course, students are invited to synthesize their knowledge of military theory, strategy, and policy to assess the strengths and weaknesses of current U.S. Strategic thought and discuss prospects for more effective strategies and policies in the future.

PIA 2353 - CREATIVE APPROACHES TO INTELLIGENCE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Modern diplomatic thought is a survey course in diplomatic history. While emphasis is on the history of the Western world (U.S.-Europe), their relations with Asia, Africa, and their developing countries are also covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2355 - WWII, THE COLD WAR, AND THEIR IMPACT ON DEVELOPING NATIONS

Minimum Credits: 3

Maximum Credits: 3

This is a policy-relevant history course that examines the international relations of the 20th century, as well as the lasting legacy of the cold war today. After discussing the causes, conduct, and consequences of World War II, students study the rise of the Soviet Union and iron curtain, postwar trusteeships, and the process of decolonization by which large swaths of Africa and Asia obtained their independence. Class lectures cover just war theory, the geopolitics of war, the rise of NATO, and the major cold war conflicts in Cuba, Afghanistan, Iran, and Vietnam. Using historical case studies, students learn important practical skills useful for a career in diplomacy, international negotiation, or statecraft, as seen through the eyes of master practitioners.

Academic Career: Graduate

Course Attributes: Asian Studies, Russian & East European Studies

PIA 2358 - POLITICAL ECONOMY OF THE INTERNATIONAL FINANCIAL SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Why do states select the economic financial policies that they do, and with what effects? This elective course introduces students to the interplay of politics and economics within international financial system. Topics include the trilemma (fixed exchange rates, free capital movement, and independent monetary policy), and how reputation and perception 'distinct from policy choices' have real effects in areas as diverse as credit ratings, sovereign debt, and political risk. We will analyze large, rising powers within the international financial system, and explore the strength of financial and monetary policy special interests. Group presentations throughout the semester will address current events, touching upon each of the BRICS countries Brazil, Russia, India and China. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policy-makers who are non-experts in the specific topic under consideration.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Asian Studies, Global Studies

PIA 2359 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The

third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Academic Career: Graduate

Course Component: Directed Studies

Course Attributes: African Studies

PIA 2360 - CYBER SECURITY POLICY

Minimum Credits: 3

Maximum Credits: 3

In our increasingly interconnected world, nearly everyone is reliant upon information technology as they go about their daily lives. This reliance on technology and people's related desire for immediate access to information, provides an opportunity for various actors to advance their personal goals, whether it be for political purposes, financial or other criminal endeavors, or as a platform to advance their social causes. As such, the need for solutions to this ever-growing problem goes beyond just technical solutions. In the course, students will learn how to approach cyber security from a policy and planning perspective. Students will be introduced to various threats and learn how to develop 'plans' at the operational and strategic level to mitigate them. Students will be introduced to various governmental policies, strategies and directives from both the US and non-US perspective that have been crafted to address the cyber threat. Finally, students will learn about the various governmental and non-governmental organizations that are working to deal with the daily challenges of cyber warfare.

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2363 - INTERNATIONAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

Policymakers, scholars, analysts, journalists, average citizens, and others frequently talk about the "lessons of history" and what they mean for understanding, interpreting, and reacting to contemporary events in the international arena. Yet, history as we know it is the synthesized, and often stylized, reporting of certain people and certain events that some investigators have deemed worthy of study. Accordingly, the lessons we seek to learn from history are consequently often hidden, obscured, or mangled beyond recognition. Despite its imperfections, the received historical record is the only guide we, and policymakers, have to understanding the present and thinking seriously about the future. Accordingly, history must be studied, considered, and used with care. This course prepares students to embark on each of these tasks in several ways. First, students will become acquainted with the key events, trends, and developments in international history since the beginning of the twentieth century. Second, students will think seriously about the contingency of historical events and consider not only the lessons of decisions made (along with their consequences), but also those of many of the unrealized histories of the twentieth century. Third, students will explore the connections between events and developments of the past and contemporary debates, problems, and issues. Finally, students will, by reporting on their work in multiple formats, develop their capacity to use and present history in an effective, policy-relevant manner.

PIA 2365 - TRANSNATIONAL CRIME

Minimum Credits: 3

Maximum Credits: 3

Since the end of the cold war, threats to national and international security have become more varied and diffused. Some of these threats are subtle and insidious rather than overtly military in character. Transnational organized crime has this character. The course is intended to provide substantive knowledge about major transnational criminal organizations and the threats they pose to domestic and global governance and to international security and stability. Accordingly, it places the challenge posed by transnational organized crime in the context of broader issues of globalization, governance, and disorder. The purpose of this course is to examine the phenomenon of transnational organized crime, in all its variations and manifestations, to identify major transnational criminal organizations and activities, to assess the threat posed to national and international security

and stability, and to evaluate the policy implications of this threat.

Course Attributes: Asian Studies, Russian & East European Studies, West European Studies

PIA 2366 - INTERNATIONAL ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course examines multilateral diplomacy and international cooperation, paying special attention to the role that institutions play in shaping the modern world. Students learn practical skills relevant to a career in a multilateral setting, as well as information about the history of major institutions and some important political science theories on the nature of cooperation. The class is divided into three parts: part 1 examines the role institutions play in international politics and covers the various theoretical debates surrounding their efficacy. Part 2 covers the history, structure, and function of major international organizations like the United Nations, NATO, the European Union, African Union, Organization of American States, and others. Part 3 examines some managerial techniques important to working in a multilateral setting, and is designed to give students concrete skills that will be important in a career in multilateral diplomacy.

PIA 2370 - TERRORISM AS AN INTELLIGENCE PROBLEM

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the important and topical issue of international terrorism and how the U.S. intelligence community responds to demands from U.S. policymakers and allies to detect terrorist threats, to collect intelligence on terrorist groups, and to analyze and assess their intentions, plans and capabilities. Rather than examining international terrorism from a theoretical point of view, we will look at the tactical and strategic issues of most concern to the U.S. intelligence community. As part of the students' professional development, the instructor also will teach the students to write brief intelligence analytical-style memoranda, a skill that will be useful in any professional career.

PIA 2372 - POLITICAL ECONOMY OF EAST ASIA IN COMPARATIVE PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This course is a graduate seminar designed to explore the content, process, and consequences of China's institutional reforms from a comparative perspective. Through a detailed examination of the literature on property rights, markets, and the role of the state in economic development, it is hoped that broader comparative insights may emerge about reform in China that distinguishes it from the experience of regimes in Eastern Europe, the former Soviet Union and developing and developed nations worldwide. The overarching question is what explains the course of China's institutional change. Specific questions include the following: Who were the key political actors involved? What was the role of the central state and its agents? What incentives motivated their particular responses to the reforms? What role did changes in property rights play in the success of China's reforms? Why were some reforms easier to implement than others? Who were the winners and losers in the different reforms? What major new problems have emerged as a consequence of piecemeal reform? How have those been handled?

PIA 2379 - INTRODUCTION TO CYBER CRIMES

Minimum Credits: 3

Maximum Credits: 3

Traditionally, crime has taken place in the physical world. Since the dawn of the internet, criminal activities on the web have been continually increasing. Crime is no longer restricted to a town, city, state or even country because internet crime transcends all different types of jurisdictions. In this course, students will learn the types of crimes that occur online, as well as receiving an overview of how these crimes are conducted. Since this course focuses on computing technologies, students will be given the basic necessities needed to understand the technologies they will be utilizing throughout this course, as well as future courses. Students will learn safe computing practices and how to gather the necessary data to help track down criminals on the web. Topics covered will include introduction to various technology topics, distributed denial of service attacks, ecommerce fraud, counterfeiting, 0-day exploits, discussion on various cyber criminals and nation state threats, etc. Lastly, students will learn about the different organizations, both public and private, and the various policies and laws that are intended to counter the increase in cybercrime.

PIA 2380 - HUMAN TRAFFICKING

Minimum Credits: 3

Maximum Credits: 3

According to some estimates, there are at least 10 times as many girls now trafficked into brothels annually as African slaves were transported to the New World in the peak years of the trans-Atlantic slave trade. More children, women and men are held in slavery right now than over the course of the entire trans-Atlantic slave trade. Human trafficking is the third largest international criminal industry in the world after illegal drug and arms trafficking, and it is the fastest growing. This course examines the domestic and international dynamics of human trafficking from a variety of disciplinary and practitioner perspectives. Assignments allow students to practice evaluating anti-trafficking policy on both scientific and ethical grounds and making persuasive arguments on the basis of that analysis. Prerequisite: None.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2387 - NATO AND ALLIANCE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the organization and operation of history's most successful alliance, the North Atlantic treaty organization, as a key forum for international cooperation. In today's world nations are working together more intensely than ever and on a wider range of challenges. Thus, students who want to work in any branch of government are likely to find themselves working with their counterparts in other countries, particularly if they work in military and security related areas. Moreover, even if they are working in non-military fields, they may find themselves working alongside NATO-led forces, where an understanding of how the alliance works would also help. Throughout the course, students will follow and analyze current developments at nato, and they will also be introduced to its history since 1949. Special attention will be paid to nato's crisis management missions in Bosnia, Kosovo and Afghanistan, as well as to nato's relations with partners, including russia, and with other international organizations, including the European union and the un. There will also be an emphasis on negotiations among allies at nato. Normally the course will include a field trip to washington to meet people working on nato issues today. At the conclusion of the course, students will also participate in a

nato crisis management exercise that they design and execute. The goal of the course is to develop the knowledge and skills necessary to function effectively in a key international organization.

Course Attributes: Russian & East European Studies, West European Studies

PIA 2388 - INTERNATIONAL LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course begins with an exploration of the history and sources of international law. We then survey the legal process and the application of international law to explore laws governing relations among states, and its expansion to non-state actors (e.g., the private individual, international organizations, NGOS, and multinational corporations). Students will learn about how and why international law is created and develop an understanding of the mechanisms and institutions of its enforcement. The enforcement of international law, its successes and difficulties, will require students to learn about, inter alia, the nature of international disputes, the subjects of international law, and the forums in which disputes are settled. Throughout the course, we will consider the emerging challenges faced in an international law paradigm including, organized violence, global markets, cultural coherency and conflict, identity and citizenship, technological evolution, and environmental regulation.

PIA 2394 - ISSUES IN GLOBAL ECONOMIC AND FINANCIAL SECURITY (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course will discuss trends in global economic and financial security and ways to enhance it. The focus will be on ways to ensure global monetary and financial stability, including through appropriate regulation to reduce the incidence of financial crises and asset price bubbles. Other critical issues, including food and energy security and the role of finance in promoting development, will also be discussed. Although this is a policy course, students should expect to learn a good deal of economics and finance in the process of learning about these issues. These will be important intellectual tools as the future policy discussions on economic security and development will likely continue to focus more and more on finance and thus require more knowledge of finance than in the past. This course will be less narrowly technical, more policy and political economy oriented, but nonetheless appropriate for students concentrating in global markets, development, finance and trade.

Course Attributes: African Studies

PIA 2399 - INTERNATIONAL ECONOMIC ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This elective course examines international organizations, with emphasis on institutions that govern countries' international economic policies and that affect international economic flows. We will study the Bretton woods institutions (the GATT/WTO, the IMF, the world bank) in-depth, along with regional economic arrangements (the EU), the OECD, the foreign aid regime (DAC), the system of bilateral investment treaties (BITS), international financial regulatory bodies (such as the BCBS, the FSB, and the FSF), and OPEC. Students will learn about international economic dilemmas that arise within an anarchic international system, and arrangements among countries to mitigate and govern such issues. Students will study how power and political processes work within and outside of international institutional arrangements. At the end of the course, students will be able to analyze the role of international economic organizations as both amalgamations of states that hold varying preferences, and as autonomous actors, within the international system within current events. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policy-makers who are non-experts in the specific topic under consideration.

PIA 2412 - ANALYZING CRITICAL INTERNATIONAL SECURITY CHALLENGES

Minimum Credits: 3

Maximum Credits: 3

This course consists of three 15-hour weekend workshops 'meeting Friday 6-9pm, Saturday 9am-5pm (1-hour lunch break), and Sunday 9am-1pm'each of which explores a critically important international security topic in the news today. The topics planned for 2015 include: the pros and cons of nuclear abolition; assessing the need for missile defenses; and analyzing China's military capabilities. Using films, lectures, discussion and debate, and group simulations, these workshops will expose students to the key factors shaping each security challenge. The objective is to promote balanced and critical thinking in assessing threats and evaluating choices facing security and intelligence practitioners. In addition to a reading list of articles and monographs' all downloadable or available via the university's digital library' and two books (both provided courtesy of the instructor), the syllabus also provides students with a bibliography of books, journal articles, and major monographs for those wishing to pursue more advanced study. Grades will be determined on the basis of classroom participation and three take-home essays.

PIA 2431 - THE NEW SOCIOECONOMIC LATIN AMERICA AND CARIBBEAN-CHINA RELATIONSHIP: THEORY AND EVIDENCE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to understand general and detailed topics in the current Latin American and Caribbean (LAC) and China socioeconomic relationship since the 1990s and particularly in the fields of trade, financing, foreign direct investments (FDI) and infrastructure projects. The first section of the course will begin with a group of sessions on conceptual debates in development theory, data sources for trade, FDI, and infrastructure projects, as well as a structure to analyze the LAC-China relationship in the 21st century. The second section of the course will examine details of the LAC-China relationship in terms of proposed strategies and analysis in each of the four mentioned items (trade, financing, FDI and infrastructure projects), as well as analysis of existing literature in LAC and China. The third section of the course will present case studies of the LAC-China relationship in specific countries and/or of specific topics in one of the suggested 4 topics and/or of specific value-added chains; students will participate with presentations in this section of the course. The final session will also present main results, challenges, and policy suggestions for the current and future LAC-China relationship, both from a bilateral and regional perspective.

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 2434 - CIVIL-MILITARY RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course explores the relationship between militaries and the polities they serve. Militaries are crucial governmental institutions in the modern world, serving as the guardians of sovereignty and safety. However, militaries also possess the tools and capability to threaten the very people and polities they are meant to protect. Striking the proper balance between military capability and civilian control of the armed forces is therefore an essential task for all political communities. The difficulty of doing so underscores the importance of knowing what the necessary delicate balance looks like as well as what factors make success and failure in such ventures more or less likely. In exploring this essential topic of good governance, we will examine the historical roots of civil-military relations, military takeovers of and defections from civilian governance institutions, and the theory and practice of civil-military relations in modern democratic societies (particularly the United States). Particular topics to be considered include coups d'état, military disobedience, civil-military relations in wartime, the "civil-military gap," and the role of servicemembers in the political life of the community. Throughout the course, we will ask and explore three specific questions: What is the dividing line between civilian and military spheres of activity? How much influence should civilians have on activities within the military sphere? How much influence should the military have in the civilian sphere? And we will grapple with the implications of the fact that there are few, if any, clear answers to these questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 2449 - HUMANITARIAN INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

Humanitarian intervention is the set of responses by international actors who assist people when they are deprived by a natural disaster or political conflict of the basic necessities of security, shelter, food, water, and medical care. Such crises typically occur in countries with weak governing institutions, involve large-scale population displacement, and attract a diverse range of international organizations and states. This course introduces the international humanitarian aid system; reviews ethical, legal, political, and pragmatic challenges; and, through a series of case studies, investigates the processes and outcomes of humanitarian assistance efforts by non-governmental organizations, inter-governmental organizations and governments. The class concentrates on politically induced crises and the controversial role of military actors in the humanitarian realm.

PIA 2460 - LATIN AMERICA SOCIAL & PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, glonacal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).

PIA 2467 - INTRODUCTION TO AMERICAN INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on how the U.S. intelligence community collects and analyzes information to support U.S. national security and foreign policy objectives. Students will examine the historical foundations of the intelligence community and consider how the role of intelligence has changed over time, particularly after the attacks of September 11, 2001. Students will also consider the legal, moral, and ethical factors that influence the roles and conduct of the U.S. intelligence community. Finally, this course will take a closer look at selected current intelligence topics, such as Russia, China, terrorism, weapons of mass destruction, and cyber security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2468 - CHOOSING NUCLEAR WEAPONS

Minimum Credits: 3

Maximum Credits: 3

Why do some states choose to develop nuclear weapons and others do not? Have the reasons for nuclear weapons acquisition changed over time? Are more states likely to acquire nuclear weapons in the future? Once they have nuclear weapons, how do states choose their strategies for using them to

advance foreign and security policy objectives? Why do states choose to give up nuclear weapons? Is a world without nuclear weapons possible? Is a world without nuclear weapons desirable? The answers to these questions are crucial to ensuring stability, peace, and security in the international realm. Problematically, they are also fundamentally contested by academics, policymakers, military officers, and the general public. This course will provide students with the tools to understand, partake in, and shape these debates about nuclear weapons. It will provide students with a foundational understanding of what nuclear weapons are and how they work. Then, drawing on both academic scholarship and primary source material like declassified documents, it will introduce students to: the myriad decisions confronting policymakers considering the acquisition, use, and elimination of nuclear weapons; how such decisions are made; and how such decisions can be improved. Academic scholarship from the disciplines of political science, history, public administration, and psychology will be used to develop theoretical frameworks and analytical toolkits necessary to think critically about elements of the nuclear weapons lifecycle. Primary sources and declassified documents concerning not only the United States' experience with nuclear weapons, but also that of countries like the USSR, China, the United Kingdom, France, Israel, South Africa, India, and Pakistan will be used to test and refine those frameworks and toolkits.

PIA 2470 - U.S. FOREIGN POLICY AND LAW REGULATING THE USE OF FORCE

Minimum Credits: 3

Maximum Credits: 3

This seminar examines the role of both domestic and international law in regulating the use of force as a part of U.S. foreign policy. It focuses on the use of covert action by the CIA as an example of a use of force that is regulated both by domestic and international law. The first portion of the course examines the history of the CIA and its use of covert action. It also examines theoretically and empirically why covert activity is an attractive choice for policymakers and the effect of covert action on relations between states. The course then shifts to discuss domestic regulation of the use of force, focusing on Congress's role in the domestic regulation of the CIA's activities. The course will feature an in depth analysis of primary documents related to U.S. intervention in the Angolan Civil War of the mid-1970s. Lastly, the course examines the role of international law in regulating the use of force abroad. The course examines the laws of war and how international law applies to covert action. Modern extensions of covert activity are also considered, such as the use of private military contractors and drone targeting.

PIA 2471 - ESPIONAGE SURVEILLANCE & SECRET INFORMATION IN INTERNATIONAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the importance of secret information in the conduct of international affairs. Students will first learn about the ways in which states share information, protect secret intelligence, and deceive each other, both in war and peacetime. The course will also delve into how surveillance and espionage are practiced among states and on domestic populations. This includes discussion of the international legal framework for espionage; the development of intelligence sharing between allies (such as Five Eyes); the authority and limits of U.S. domestic and foreign surveillance (such as the role of the Foreign Intelligence Surveillance Act and the Foreign Intelligence Surveillance Court); as well as more recent uses of cyber capabilities to spread misinformation.

PIA 2473 - STRATEGIES OF GLOBAL INQUIRY

Minimum Credits: 3

Maximum Credits: 3

Global Studies is an expansive and dynamic interdisciplinary field that explores current and past transnational processes, such as migrations, human rights, ethnonationalism and imperialism, economic and institutional globalization, and transnational social movements. Within the academy, it is a meeting place or community of inquiry for scholars interested in topics that spill beyond temporal, political, disciplinary, ecological, geographical, and cultural boundaries. This seminar will hone graduate students' abilities to analyze issues and events through global and transnational research frameworks that incorporate various disciplinary perspectives, and to investigate linkages between global processes, social justice, and human well-being. The course is designed to complement each student's own disciplinary background and interests, and to foster preparedness for collaborative and inter-disciplinary global work. It will stimulate student abilities to think critically about a broad range of theoretical and methodological issues involved in global research, including ethics, the co-production of the global and local, the nature of "global" research questions, and research designs from different disciplinary perspectives. In addition to providing a framework for global thinking and learning, the seminar also intends to create a "community of junior global studies scholars" and thus places strong emphasis on attending regularly, participating actively, and presenting critical analyses in a scholarly manner. This is the core seminar for students in the Global Studies graduate certificate program (UCIS).

PIA 2474 - CONTEMPORARY CHINA AND INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This course examines China's role in international economics and politics. It will introduce students to the domestic institutions and actors in China, and then discuss the impact of China's outward economic activity (in terms of trade, investment, finance, and foreign aid) on foreign policy and international politics. Finally, it explores China's role in international institutions and global governance. Students will deepen their understanding of the evolving role of China in the international order and the political implications of a rising China, as well as develop their analytical skills on policy analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2475 - FAILURES FIASCOS AND DISASTERS

Minimum Credits: 3

Maximum Credits: 3

The history of United States (and other countries) security policies during the twentieth century and the early part of the twenty first century, is replete with intelligence failures and foreign policy fiascos. An enormous intelligence apparatus and decision makers who are often regarded as "the best and the brightest" have been prone to errors of commission and omission that have resulted in strategic surprises, disastrous wars, botched military interventions, and inadequate or ineffective responses to challenges and threats. In addition, there are also what can broadly be termed industrial and technological disasters. Although some of these can be traced to poor regulation, it appears that certain kinds of organizational pathologies have also been at work. There is a rich literature on disasters that facilitates interesting comparisons with failures in intelligence and foreign policymaking. Accordingly, this course will give students an opportunity to examine failures in intelligence, foreign policy, and technology/industry. Students will provide cases studies in each of these three areas and then seek to identify possible commonalities across the three domains. Cases include the Fall of the Shah, the Bay of Pigs, Vietnam, Somalia, and Iraq as well as the Challenger Disaster, Bhopal, and Boeing's 737 Max.

PIA 2477 - ECONOMIC STATECRAFT INTERNATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

The central role of economic statecraft in contemporary international politics reflects the importance of economic elements of power in an interdependent world as well as the state's evolving relationship with the commercial sector. The course examines the practice of economic statecraft

in coercive national and intergovernmental approaches for addressing security threats and challenges, the utility of economic and financial tools for achieving policy goals, and the complexity of designing effective strategies that mitigate adverse consequences. Case studies compare the nature, strengths, and limitations of economic statecraft in great powers' foreign policies and explore regional organizations' use of economic instruments to enforce norms and standards.

Grade Component: Grad Letter Grade

PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

This is a survey of development policies, issues, institutions, and resources for professionals working in development. Lectures, discussions, and presentations in class focus on analysis of development policies, and on new and significant policy issues, skills, methodologies, and resources. The course helps students develop the ability to analyze development issues from several perspectives, understand the breadth of international development as a field of professional service and academic study, and clarify their priorities for acquiring skills in preparation for that service. Students completing the course will be able to grasp the history of approaches and experiences with development, identify and critically analyze major institutions involved, assess political and institutional environments of development, employ some key social science and administrative tools, and recognize and understand principles of other significant skills and emerging methodologies in development practice. The course is organized in three parts: 1) dynamics of development and social change; 2) development management: who's in charge; And 3) contemporary issues and skills. Throughout the course we will introduce, discuss, and return to case studies that illuminate key issues and themes: the global HIV/AIDS pandemic, microfinance programs in development, the chad-cameroon oil pipeline project, water system privatization, and the global and local food prices and production.

Academic Career: Graduate

Course Component: Lecture

Course Attributes: African Studies, Global Studies

PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL

Minimum Credits: 3

Maximum Credits: 3

The 1992 Rio Declaration on environment and development states that 'to achieve sustainable development, environmental protection shall constitute an integral part of the development process.' We discuss the linkages between development and the environment, and the role of women, indigenous peoples, and the poor in achieving equitable development and environmental protection. Using tools from economics and policy analysis, we explore the conceptualization of environmental problems (market or government failure); various policy instruments to rectify environmental problems (regulations, voluntary programs, taxes, tradable permits, payments for environmental services and international treaties such as the Basel Convention, the Montreal Protocol, and the Kyoto Protocol), and the link between trade and the environment. Students' case presentations illustrate the challenges of environmental management in developing countries and the roles of civil society, NGOs, corporations, and international institutions such as the world bank, world trade organization, and united nations environmental program. Over the course of the semester, students are responsible for several policy memos and PowerPoint presentations.

Course Attributes: Global Studies

PIA 2503 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from

Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Course Attributes: African Studies

PIA 2506 - SEX AND HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

What effects do power relations between men and women, and between different gender and sexual orientations, have on human security? What is the connection between global gender inequality and experiences of security, development, and human rights as the three founding fields of human security? How does taking sex into account shift national and global policies, priorities, and human security outcomes? How well are international and national institutions doing in addressing connections between sex/gender and human security, and what remains to be done? The human security field has made such questions a priority by addressing neglected issues such as rape as a strategy of war, domestic violence as an obstacle to development, and gender/sexuality as a human right. More generally, it aims to address all human security issues comprehensively by including attention to gender. In this course, we focus on neglected gender issues and learn how to apply tools of gender analysis to our human security work more broadly. This means we examine human security using gender as a category of analysis, and that we address gender gaps in traditional approaches to issues at the intersection of security, development, and rights. We begin by studying the merits of different gender analysis approaches relevant to human security issues. Through a gender lens we then critically examine the causes and implications of human security issues such as: violence that systematically targets a sex or gender as a particular group; rape as a strategy of war and a foil to peace keeping; inequality and domestic violence in non-conflict contexts. We also examine gender aspects of human security threats such as child soldiering, modern slavery, and environmental disasters. We critically assess institutional and policy responses and learn to develop more effective gender-aware human security responses.

Academic Career: Graduate

Course Attributes: Gender, Sexuality & Women's St

PIA 2507 - HUMAN RIGHTS: POLITICS AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

In this course students examine global human rights as an evolving social and political institution, analyze human rights violations and the challenges of human rights practice, and learn how serious threats to human security may be addressed. We examine key human rights concepts, theories and laws, and related controversies that often obstruct international action on human rights (e.g. origins and nature of rights, universality and cultural relativity claims, conflicting rights, state sovereignty, and notions of obligations and accountability). We then examine the field of international action for human rights (e.g. states, inter-governmental actors, non-governmental actors and civil society) and the core dimensions and challenges of human rights work. Throughout the course, human rights target groups (such as women, children, and refugees) and current topics (such as genocide, child soldiering, gender violence, and peacekeeping) are examined as case studies, illustrating key principles and challenges, and providing insight into the range and depth of current human rights and their practice across fields. Students also select a specific human rights topic for major assignments, including a human rights issue brief and a comparative case study of international action on human rights.

Course Attributes: Global Studies

PIA 2508 - NGOS ADVOCACY IN INTERNATIONAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

Ngos are increasingly respected and visible as political actors influencing a wide range of human security and international development issues. To what extent do they influence politics and policy globally, and what kind of impact do they have? How do they become influential, how do they get the work done? What are the challenges they both face and pose? In what ways is NGO advocacy changing international politics and institutions? In this course we examine NGOS as political actors whose influence extends to the global level. We begin by analyzing the nature of NGOS as political actors and their relationship to broader social movements, political institutions, and social goals in international settings. We examine how NGOS shape themselves and their work in relation to such broader contexts, and how they coordinate with other political actors to achieve change. We then learn how NGOS develop comprehensive and effective international advocacy plans, and we study core NGO tactics and their coordination in political actions. Throughout the course case studies demonstrate how theory, context, and practice are linked. Students also select their own case study for assignments, which are inter-linked as part of a term-long simulation in which the political strategies of real NGOS are evaluated, an original international coalition is formed, and a convincing global strategy of action on common political goals is developed. Students therefore learn to effectively analyze NGOS' international political action while gaining practical skills for international NGO influence. The course engages with theoretical concepts but is heavily skills-oriented. It will enable students to (a) analyze and assess the work of nongovernmental actors in international politics, and (b) construct a comprehensive NGO political strategy through simulated governance of real-life NGOS. In the course of the simulation, we will develop specific skills in activities key to NGO political influence, such as analyzing lobbying opportunities, ensuring ethical responsibility, building an international coalition, and working with global mass media. Importantly, all NGOS, whether based locally, nationally, or internationally, can and often do have an influence on international politics, therefore the course does not focus exclusively on international nongovernmental organizations but rather adopts a framework for exploring any NGOS' international influence, for example through their participation in larger networks and coalitions. Examples of international NGO advocacy include: the international campaign to ban landmines, international child soldier campaign, jubilee and debt relief campaigns, campaign for an international criminal court, and many other human rights campaigns for example on health issues and gender issues. The inclusion of NGO advocacy in international politics is important for issues across a range of fields, from development to security to political economy and human rights. Ngo advocacy is core to the very idea of human security, which is intended not only to address people's needs over those of states, but to make people's participation essential in addressing those needs.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2509 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Translating classroom theory into innovative field-based practice remains a project manager's most difficult challenge. The purpose of this course is to provide students with practical strategies and tools that can be used in the design and implementation of successful development projects. The course will be a highly interactive exploration of field-based development strategies and real-world projects that suffered lethal and catastrophic setbacks yet ultimately achieved solid and sustainable outcomes as a result of their innovative design. Students will be introduced to the basics of the project cycle, given specific management tools for project design and, working in groups, asked to develop project initiatives addressing a problem in a developing country of their choice.

PIA 2510 - ECONOMICS OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course has three key objectives. The first is to provide students with an appreciation for the problems and constraints that poor or Less Developed Countries (LDCs) face. The second is to provide theoretical frameworks which facilitate analysis of these problems and generation of relevant policy implications. The third is to provide country and problem specific contexts within which students can apply the knowledge they acquire during the course. To accomplish these objectives, the course will employ a combination of lectures, case studies, exercises, and class discussion.

PIA 2513 - RELIGION AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3

Religious ideas, beliefs, and institutions are influential almost everywhere development practitioners work. This course engages students actively in understanding the roles of religion and culture in economic, social, and political change; the varieties of religious institutions and movements in poor societies; and the significance of religion in several key policy areas. The approach draws on sociology, economics, political science, and anthropology to understand the practical implications of religion for development work. Students completing the course will be able to use and critically assess major approaches to the study of religion and social change, recognize key doctrinal and institutional features of major world religions, incorporate religious institutions and thought into an analysis of civil society, assess the roles of religious actors in conflict situations, evaluate options and strategies for working with faith-based organizations, and apply diverse ethical perspectives to major development policy issues. The course is organized into three parts: (1) an introduction to religion, culture, and development; (2) a comparative survey of major issues and case studies including each of the major "world religions" and key issues such as gender, inclusion and exclusion, human rights, religion and social movements, and faith-based organizations; and (3) religion and the policy and practice of development, including conflict, HIV/aids, and topics determined by the class.

PIA 2519 - COMPARATIVE GOVERNANCE

Minimum Credits: 3
Maximum Credits: 3

This is a graduate-level course in comparative governing institutions. It is a course that focuses on the political incentives and constraints faced by policymakers as they seek to develop and implement public policy. Our goal in this class is to understand the institutional environment in which politicians and policymakers operate. The most important objective will be to develop the ability of policy practitioners to understand the nature and transformations taking place in political institutions around the world as they seek to improve them. This course is part of a two-course sequence that is strongly recommended for students (both MA and PhD students) in the Governance and International Public Management concentration.

Course Attributes: Global Studies

PIA 2522 - CLIMATE POLICY-LOCAL & GLOBAL

Minimum Credits: 3
Maximum Credits: 3

The global energy policy course applies tools from economics, science, and policy analysis to address energy issues. We examine various energy sources in the us/eu/developing countries including oil, gas, nuclear, hydro, biofuels, solar and wind. We discuss how market failures and government policies influence the gaps between private and social costs of energy. We examine incentive policies for the adoption of renewable energy and overall benefits from restructuring towards a greener economy. We examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course explores the range of non-state actors in developing/transition countries that are important to promoting socioeconomic and political change. We will examine the origins, evolution and multiple roles played by this diverse group of non-state actors, including business and professional associations, trade unions and political movements, policy advocacy groups and civic education/democracy-building organizations. Among the issues preoccupying practitioners and researchers, and this course, are: what factors influence the presence and vibrancy of civil society in different countries? How has the state 'in various times and places -- determined the context in which civil society organizations pursue their goals? With what strategies and with what success have civil society organizations been able to influence or change state policies? What autonomy and accountability issues arise in state-civil society relations, and how does the international donor community facilitate or complicate these relationships? In the process we will introduce specific tools from the social disciplines and development practice for working with civil society organizations, including assessing the strength of civil societies, measuring social capital, and assessing 'partner' organizations.

PIA 2527 - FINANCIAL MANAGEMENT FOR NGOS AND NON-PROFITS

Minimum Credits: 3

Maximum Credits: 3

This skills course covers various accounting methods in both private sector organizations as well as Nongovernmental Organizations (NGOs). Upon completing this course students should be able to read and understand annual reports of profit and nonprofit organizations, analyze the published financial statements within the reports to ascertain the well-being of the organization, and to make managerial decisions based upon the results of this analysis. This course is divided into (1) understanding basics of accounting for all organizations; (2) measurements and analysis of financial statements using accounting tools such as common-size statements, liquidity and profitability analysis, debt vs. equity; and (3) budgeting and cost-benefit analysis using contribution margin.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY

Minimum Credits: 3

Maximum Credits: 3

This course will attempt to define this balance by looking at issues of local government, governance and civil society in Latin America, the Caribbean, Eastern Europe, Asia and Africa. It focuses on the dynamics of governance with primary attention being the grass roots base of democracy and their relationship to institutionalized state structures. Focus is on the nexus between theories of governance and the practical implications of that theory on political behavior. The basic source of our understanding about governance, will be the reading. It is lengthy and various. The categories under which reading is assigned are somewhat arbitrary and as we go along the re-examination of earlier readings will be essential when we get further into the course. Because of the length of each week's reading assignment, it is essential that students keep up with the reading from week to week. Failure to do so will result in academic "overload" as the course draws to an end. The course will be a mixture of in-class discussions and lectures. The lectures, it should be noted, are not intended to summarize the reading but rather give the independent views of the instructor. All students in the class should read the core readings. Each student should also read from at least one of the three topic lists. There will be

four assignments for the successful completion of the course.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to tools of applied Political Economy Analysis. Many government agencies around the world require such analysis before considering policy change or adopting new strategies. As a result of this course, students will have a framework to situate policy interventions within the context of the political and economic processes in a society including the incentives, relationships, distribution, and contests of power between groups and individuals. Such analysis supports more politically feasible and thus, more effective policy strategies by setting more realistic expectations of what can be achieved, over what time frame, with consideration of risk. Institutions matter for development, but Political Economy Analysis tells us how they matter and shows us what needs to be done in order to overcome obstacles to change. By helping to identify these incentives, this course provides a more grounded, informed approach to policy design. This structured analytical approach helps policymakers examine political, economic, and social forces that influence policy outcomes around the world.

PIA 2530 - GENDER EQUALITY AND THE UNITED NATIONS

Minimum Credits: 1.5

Maximum Credits: 1.5

In this year-long transdisciplinary course, students will collaborate directly with the United Nations Development Programme (UNDP) and other partner institutions on policy-relevant research on gender inequality in public institutions worldwide. Students will develop their skills in data collection, analysis, and reporting. Students' research will feed into an ongoing Pitt-UNDP collaboration and support gender equality as part of the United Nations 2030 Agenda for Sustainable Development. Students will have professional opportunities to interact with policymakers and practitioners at international and national levels, and are expected to present their research at the UN Secretariat in New York City during the spring semester. This course operates in conjunction with an internship program that places select students as junior researchers in partner institutions during the summer following the course.

PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course explores how human rights principles and practices are reshaping development practice, and how this is reflected in the Sustainable Development Goals (SDGs). We will analyze how the SDGs are affecting governments' development policies, how NGOs and social movements are engaging with the goals, and critically analyze the value and impact of global goal-setting. We will introduce skills and methods that practitioners are using to implement and monitor SDG targets and indicators and human rights principles; communication strategies used in promoting the SDGs; and the prospects of the goals in the context of the Covid-19 pandemic and the current trend toward authoritarian populist governments. Students will focus on an issue area or geographic region of interest to them, and develop expertise in an area such as women's land rights, the decent work agenda, income inequality, universal health coverage, or sexual and reproductive health rights.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2532 - GLOBAL ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course addresses global energy issues. First, we examine energy sources globally including oil, gas, nuclear, hydro, biofuels, solar and wind. Specifically, we explore methods to estimate the benefits and costs/risks (economic, environmental, health, political) from various energy sources. We discuss how market forces, market failures, lobbying, and government policies influence the gaps between private and social costs of energy. Second, we examine incentive policies for the adoption of renewable energy (e.g. carbon pricing, cap & trade, renewable portfolio standards, pull-push innovation policies), barriers to their adoption (infrastructure, storage, and intermittency), and overall benefits from restructuring towards a greener economy. Third, we address incentive policies to increase energy efficiency (e.g. fuel economy standards, rebates, leed certification). Fourth, we examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide. Fifth, we examine the geopolitics of energy sources (e.g. US, EU/Russia, China/Africa, Central Asia & Middle East). We discuss the growing recognition that investment in energy efficiency and renewable energy can mitigate national security concerns stemming from fossil fuel dependency.

Grade Component: Grad LG/SNC Basis

PIA 2544 - CENTRAL EURASIA: POLITICAL ECONOMY AND GEOPOLITICS

Minimum Credits: 3

Maximum Credits: 3

The Political Economy of Central Eurasia provides an overview of the pressing security, geopolitical, and development issues in one of the most important regions in the world. This course will cover histories as well as key developments in the five Central Asian Republics (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan), Afghanistan, Iran, and Western China (Xinjiang). It will also focus on global strategy in Central Eurasia analyzing foreign policy objectives of countries such as the US, China, and Russia. This class will prepare students to analyze and address key foreign policy challenges in this strategically vital region.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2550 - ECON MEETS CS: MECHANISM DESIGN AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Mechanism design is "reverse game theory": instead of starting with a game and solving for the outcome, we start from a desired outcome (for example, social welfare maximization) and design an institution / mechanism that would accomplish it. While this branch of economics has much policy relevance, the methods of analysis are fairly abstract and results are restricted to certain environments. Computer science approaches, such as measures of complexity, methods of computing approximations and the use of simulations, provide a necessary bridge between mechanism design in theory and its implementation in practice. As examples of applications we will discuss Matching and Market Design, which is one of the most practical fields in Economics, with real world applications in school choice, organ exchange, doctor-hospital match, among many others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2551 - GENDER AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to critically examine how development processes affect women, men and gender relations. By doing so it aims to contribute to an ongoing policy discussion on the meaning and operationalization of diverse, inclusive, and equitable development. The course begins with theoretical approaches to gender and development, development economics, feminist critiques, and their methodological implications for mainstreaming gender into development practice. In the second half, the course studies how gender relations are impacted by social change in the form of positive or negative development. In this policy applied section, the discussions focus on a set of policy issues including reproductive health, migration, climate change, ITCs, work, citizenship and leadership. The overarching goal in both sections is to encourage students to review and debate what we already know and what we still don't know about policies designed to close gender gaps globally. The course concludes with a discussion in the form of a mini-conference on the progress record of the United Nation's 2030 Agenda for Sustainable Development

PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines the management of organizations working in international development and humanitarian assistance with a focus on NGO management. This course has three key objectives. The first is to introduce students to the work and environment faced by development organizations. The second is to provide theoretical and practical frameworks for the analysis of management challenges and generation of relevant recommendations. Big questions we investigate include: why are NGOs fundamental for development? How can NGOs improve their accountability and effectiveness? How to best approach a complex decision problem? What are the key opportunities and dangers in organizational "partnerships" between governments and NGOs, northern and southern organizations, etc.? How can NGOs leverage community participation? The third objective is to help students develop transferable management skills, which will help them get a job in international development. Assignments emphasize primary research and focus on building critical writing, analytical, and presentation skills that demonstrate a broad understanding of the key management challenges facing development organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PIA 2553 - GLOBAL HEALTH POLICY

Minimum Credits: 3

Maximum Credits: 3

This course covers the millennium development goals prioritize investment in health for human welfare. We examine underlying economic problems and proposed policy solutions to address major diseases health issues such as AIDS, TB, malaria, diarrhea, and respiratory illnesses. We examine challenges in addressing children's and women's health issues, including child labor and trafficking. We study World Trade Organization (WTO) provisions that assist or impede poor countries' access to drugs. We study WTO cases on health protection (e.g., US-EU beef hormone debate). We discuss the costs and benefits of genetically modified organisms in our food supply. Students' case presentations examine cases of successful global health interventions (e.g., Small pox eradication, arresting AIDS in Thailand) and new challenges (SARS, avian flu, health-related impacts of climate change), as well as the roles of the world bank, the world health organization, corporations, NGOs, and civil society in improving public health in developing countries.

PIA 2567 - TECHNICAL ASSISTANCE AND PROGRAM DESIGN

Minimum Credits: 3

Maximum Credits: 3

Instructor Permission is required. Field based learning and cultural emersion are vital to gaining the skills necessary to have successful careers in international development and human security. With this in mind, the African Studies Program, the School of Education and the Law School are

collaborating to expand the University of Pittsburgh field-based activities programs into a full-fledged learning research seminar which will now be available for all of East Africa and in other parts of Africa, Asia and Central and South America for students who are interested. Over several phases, taking place in Pittsburgh and overseas, students will familiarize themselves with relevant literature, design a project for a research activity, an evaluation, or an organizational development opportunity in relation to the proposed project, and finally compile a policy/research paper on the project as part of a post-travel independent study. Students will work with organizations dealing with issues of gender violence, homeless and other vulnerable youth, social entrepreneurialism and income generation, as well as other topics developed by students. This course will not only increase the experiential learning profile of the university and its students but will be a continuing mechanism for increasing the partnerships and network between Pitt academic centers and alumni and development organizations in East Africa and other parts of the world. Graduate and upper-level undergraduate students (by invitation) will participate in a Pittsburgh in-field-based learning research seminar for their overseas work in the summer of 2019. Their research project will be due on August 31. Students can register for the course either in the Spring semester or the Fall semester of 2019. The instructor will work independently with each person individually to develop their program. There will be three phases to the course/activity (depending on whether course credit is sought).

Grade Component: Grad Letter Grade

PIA 2574 - AFRICAN DEVELOPMENT SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course explores development issues in Sub-Saharan Africa. It facilitates multidimensional considerations of these issues and examines the very meaning of "development" as a concept for Africa. Historical and contemporary paths of development in Africa are examined. Important analytical focuses of the course include the roles of both internal and external factors influencing development policy and management. This includes African regional organizations, nation states, and traditional societies; external factors such as, international regimes; as well as European, North American, Middle Eastern, and Asian state participants in African development activities. Students completing this course are expected to have: a better background for understanding Africa, African peoples and civilizations; knowledge of the social and cultural issues affecting development in Africa; alternative frames of reference for interpreting information about Africa; appreciation of various challenges facing Africa; and the capacity to develop and defend a well-designed policy position on an African development issue. The course is divided into: part 1 (the underdevelopment of Africa: scale and sources); part 2 (the non-development of Africa, 1960-present); part 3 (contemporary approaches to African development); part 4 (emerging challenges and opportunities for African development); and part 5 (African policy debates: where do we go from here?)

PIA 2585 - U.S. FOREIGN ASSISTANCE AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Why does the U.S. provide foreign assistance? How much does it cost? What does the U.S. spend foreign assistance on? What is the impact of U.S. assistance in countries around the world? This course will explore these questions and cover the way the federal budget process is supposed to work and the way it actually does work, with a specific focus on the U.S. foreign assistance budget implemented by the U.S. Department of State and U.S. Agency for International Development. The course will also examine the decision making process for allocating foreign assistance, including its impact on benefiting countries; its influence on sectoral objectives (such as democracy or global health); and its effect on U.S. policy. Through country and sector case studies, students will gain practical expertise in analyzing country and sectoral contexts and making recommendations on foreign assistance to senior leaders.

PIA 2602 - EVOLVING GLOBAL SECURITY LANDSCAPE (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

U.S. National security strategy and policy face great challenges in the 21st century. Political, military, legal, and economic factors will affect both strategy and policy. This course will assess those factors and their effects on possible solutions to those challenges. The course approaches national security from both military and government-wide perspectives and addresses the executive branch, the congressional, and the global environments. The professor will emphasize a practitioner's approach to issues and will use lectures, readings and original source documents, class discussions, and guest speakers from the national security community. Students will deliver short written papers, mostly in the form of one-page memos, and will undertake group assignments leading to oral class presentations. The primary focus is on contemporary issues and events, but the instructive value of history is also prominent throughout the course. For students who wish to take this course, prior knowledge of or study in national security is strongly recommended but not required. This course will help students with foreign policy and security studies concentrations prepare for the evolution and challenges of coming years.

PIA 2603 - DEVELOPMENT IN AFRICA: CHALLENGES, CONSTRAINTS AND STRATEGIES (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

A half-century after most African nations gained their independence, the continent continues to be a disproportionate generator of conflict and instability. Simultaneously its global importance grows, due to external preoccupations with energy security, anti-terrorism efforts, emigration, and disease. Despite these complex dynamics, the international community's engagement with Africa continues to be largely focused on crisis management and humanitarian assistance. This course will explore the underlying reasons: historic, political, economic and cultural -- for Africa's chronic weakness and dependency, as well as the West's often myopic response to these pressing problems. It will take a close look at some of the most destructive developments in the post-colonial period, including state collapse, genocide, and HIV/AIDS. We will then seek to better understand the manifestations of crisis in Africa and how to more effectively tailor our responses. To that end, we will delve into the world of humanitarianism, from its traditional charitable manifestations to more recent trends such as humanitarian intervention, r2p, and reconciliation.

PIA 2604 - GEOPOLITICS OF SOUTH ASIA (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course will look at the region against the historical backdrop of its relations with the world. But the major focus will be on the dramatic developments within South Asia during and since the 90's and the region's evolving relations with the US, China, Russia, Japan, Iran the middle East and central Asia. Especially how the US is helping India in realizing its aspirations for a big power status, and a factor of stability in the region, and Pakistan in its salvation from chronic weakness by building its capacity to reform itself. Pakistan, both as a partner and potential target, in the war against religious extremism and terrorism, has become a major foreign policy challenge for the us and is likely to occupy an important place in the national security and foreign interests of America for some time. The course will look at these threats and challenges specially the US war against extremism, more particularly the Taliban and Al Gaeda, being fought with the help of two critical allies, Pakistan and Afghanistan.

PIA 2607 - STATE CRAFT AND SMART POWER IN THE DIGITAL ERA (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course examines new approaches to the practice of statecraft in an era of rapid global change. Globalization, including accelerating digital communication, is upsetting traditional international order and institutions, and changing the pace and intensity of decision making. Nation-state governments, while still the primary actors, must adjust to new sub-national, regional and transitional forces and players in a far more complex global arena. As digital communication brings publics into politics and policy far more than ever before, this course helps participants better understand and prepare for these and other current challenges for smart power. Features guided classroom discussion, presentations by officials and outside experts, and in-class exercises such as a resource allocation/strategic planning session (somewhat akin to one of the major elements of the PMF and FSO oral exams) as well as policy simulations. The course's emphasis on policy, institutional and professional concerns, will be particularly relevant to those seeking employment in public service, NGOs, public policy think tanks and consulting firms.

PIA 2617 - ISSUES IN PUBLIC DIPLOMACY DC SEMESTER

Minimum Credits: 3
Maximum Credits: 3

This course will provide a deep dive into the origins of information statecraft and explore case studies to provide a detailed understanding of the scope, sophistication, and significance of the geopolitics of information. Building on key theoretical models, including markets for loyalties, networks, and game theory, this course will provide an analytic framework for understanding the range of information statecraft activities, as well as the key variables likely to influence the success or failure of a public diplomacy campaign or program. Monitoring and evaluation techniques and best practices will also be covered, as well as the foundations of digital analytics and metrics. Classes will feature occasional guest speakers from the State Department, the Department of Defense, and the NGO community. At the end of the course, students will be subject matter experts on public diplomacy and global media strategy, the information statecraft toolkit, and the significance of these tools and tactics in international affairs.

PIA 2625 - STRATEGIC FORESIGHT IN INTERNATIONAL RELATIONS DC SEMESTER

Minimum Credits: 3

Maximum Credits: 3

This course will provide graduate students with a structured approach to thinking about the future of the international environment. It is a foundation in qualitative foresight methodologies with direct application to national or organizational strategic planning. It also provides a tour du horizon of the global trends shaping the world 10-20 years into the future and beyond. Through real-world case studies and classroom exercises, the course exposes students to the practical application of foresight methodologies to policymaking and resource decision-making. These methodologies are routinely used by strategic planners in leading global intelligence organizations, national security ministries, multinational corporations, and non-governmental organizations. Strategic foresight is an under-appreciated "hard" international relations skillset, particularly useful in navigating the profound global transitions underway that affect risk and competitiveness for countries, companies, and individuals.

Grade Component: Grad Letter Grade

PIA 2628 - RISING ATHENS DEFENSE DIPLOMACY AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course uses the deity Athena (the goddess of wisdom, war, and strategy) as a heuristic in order to critically engage the structure and substance of U.S. national security policy. Particularly after 9/11, U.S. national security and foreign policy has been dominated by the Department of Defense. Arguably Ares, the god of war and tactics, has been ascendant. Yet the U.S. has not been winning wars and it remains underprepared to use non-military instruments to achieve strategic success. The ancient Greeks knew that militarism without strategy was a losing proposition, which is why Athena - the multifaceted female god of art, war, empathy, protection, architecture and many other things besides - was the deity for victory. Over the duration of the class, students will explore national security policy through the lenses of gender, creativity, storytelling, strategic empathy, and interagency structures in order to tease out how the U.S. might build better national security strategies and policies.

Academic Career: Graduate

PIA 2629 - DISINFORMATION AND INFLUENCE IN THE DIGITAL AGE

Minimum Credits: 3

Maximum Credits: 3

This course will explore how global actors have weaponized false or misleading information to shape public perceptions, achieve strategic geopolitical goals, make money, and pollute the information environment. Students will study the new tools being used by state and non-state actors and examine the reach/effectiveness of disinformation campaigns in shaping public dialogue. This course will further explore how the practice of disinformation has changed in the information age, how both state and non-state actors weaponize technology, social networks, and other tools for dissemination, and what makes human beings and societies vulnerable to information operations. In addition to covering state-sponsored information operations, this course will also dive into financially motivated operations, the role of the media and state media, and the inadvertent spread of viral false information, differentiating between different types of campaigns. Additionally, students will have the opportunity to study how to detect these campaigns using open-source investigative techniques and discuss the difficulties of attribution particular to the information operations space. Finally, this course will explore regulatory, diplomatic, technological, and societal mitigations and interventions aimed at protecting the information environment, assessing their effectiveness.

PIA 2630 - 21ST CENTURY STRATEGY (WASHINGTON DC)

Minimum Credits: 3

Maximum Credits: 3

The art of war and grand strategy is often invoked yet rarely understood, resulting in catastrophe. Too often policy makers, members of congress, academics, think tankers, journalists, pundits and even flag officers discuss strategy but remain ignorant of the concept. Consequently, strategy is frequently confused with tactics, bureaucracy, academic theory and other things - all to ruinous effect - as evidenced in Vietnam, Iraq and Afghanistan. You will learn universal strategies for the strong, the weak and most things in between. We will examine the ideas of Sun Tzu, Kautilya, Jomini, Clausewitz, Mao, T.E. Lawrence, Galula and other scholar-practitioners. Case studies include the Peloponnesian War, American Revolution, 2006 Lebanon War and African warlords. The course will teach you how to think strategically and builds on what senior U.S. military officers learn at war colleges, taught by a professor at such an institution. However, we will probe much deeper than what is usually taught at war colleges and civilian institutions so that you are equipped to fight and win 21st century wars.

PIA 2634 - SPEECH WRITING & EFFECTIVE COMMUNICATING FOR POLICY PRACTITIONERS (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

How do you write a great speech that has impact in the international arena or helps move the policy agenda forward? From research to rhetoric, "Speechwriting and Effective Communicating for Policy Practitioners" will address that question and explore a range of techniques that speechwriters use to create memorable messages for the international stage. This course will be taught fully online in Fall 2021 by Dr. Jamie Shea, former Deputy Assistant Secretary General for Emerging Security Challenges as well as the former NATO spokesperson. During the course you will study historic and contemporary speeches tied to significant international issues as well as learn how to craft and critique the language of international affairs. There will be regular writing assignments as well as, reading, listening assignments, and discussion, as well as guest lectures from seasoned practitioners. In the end you will understand how foreign policy ideas are communicated and perhaps find a speechwriting voice of your own. Dr. Shea will teach the course live from Brussels, BE.

Grade Component: Grad Letter Grade

PIA 2638 - TRANSATLANTIC RELATIONS IN A MULTI-POLAR WORLD(WASHINGTON DC)

Minimum Credits: 3

Maximum Credits: 3

The Transatlantic Relationship, formally embodied in the North Atlantic Treaty Organization (NATO), has been a cornerstone of international security since the end of the Second World War. NATO helped to ensure that a war between the Soviet Union and the United States did not occur. It helped to pacify post-World War II Europe, to reduce fear amongst European states and to enable European integration and the eventual development of the European Union. Several non-democratic allies transitioned into liberal democracies, arguably due in part to their NATO membership. Following the end of the Cold War and dissolution of the Soviet Union NATO facilitated the transition to democracy in eastern Europe. The alliance was, and seemingly remains, the main forum for Europe, Canada and the United States to discuss the most pressing global security concerns. But animosity during the administration of George W. Bush, apathy during the Presidency of Barrack Obama and downright hostility from the Trump White House has left NATO shaken and weak. Europeans, meanwhile, failed to invest in NATO following the end of the Cold War and are increasingly torn between NATO and the EU's European Security and Defense Policy (ESDP). This seminar explores the historic foundations of NATO and dissects current issues such as the challenge from Putin's Russia, rising illiberalism in Europe, populism in the US and EU, migration pressures, defense industrial issues, terrorism and the role of China in Europe and the wider world. The course finishes by exploring possible future developments of what has been known as the "most successful alliance in history" in an emergent era of multipolarity.

PIA 2644 - FORESIGHT, INSIGHT, AND THE FICTION OF NATIONAL SECURITY (DC SEMESTER)

Minimum Credits: 3
Maximum Credits: 3

While old paradigms seem to be failing us in war and peace, the creative management of national security challenges are more important than ever. We require new approaches - not reading the same, old texts, or using the same, old methodologies and theories. It is primarily for this reason - the need for imaginative, strategic leaders - that this class uses fiction as the launching point for discussion. As the 9/11 Commission noted in their report, "The most important failure was one of imagination." Students in this course will use fiction as a springboard will hone several key student skills including creativity, the ability to better empathize with complex situations and potential opponents, understanding unfamiliar or strange cultures in order to consider unseen challenges and potential solutions and, grappling with ambiguity, contradictions, complexity, and ambivalence - entertaining for fiction but critical when considering the real world. Perhaps most importantly, students will hone their ability to ask the right questions - a prerequisite to finding least bad options, which is increasingly their job as they move into higher leadership positions. Finally, students will emerge from this course changed readers - better able to deconstruct (and reconstruct) text, think critically about what is read, and know when, and when not to, apply these frameworks.

PIA 2705 - NEIGHBORHOOD AND COMMUNITY DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

The concept of neighborhoods in cities has had many meanings and understandings over time. The neighborhood can be interpreted as a spatial, social, political, racial, ethnic, cultural or economic unit. How have urban neighborhoods changed? What has been the impact of local, state and federal policies on neighborhoods over time? What role has and does community development play in neighborhood development? How and why did some urban neighborhoods decline in the 20th century? How have urban neighborhoods revitalized? What are current impacts of the COVID19 pandemic and how are they affecting local planning? This course focuses on neighborhoods and community development largely in the North American urban context over the post-World War II period, with international comparisons. For cultural studies students, we include a dedicated focus on placemaking as a means for revitalization across city neighborhoods and international comparisons of cultural regeneration strategies, particularly in the COVID and post-COVID era. We use many examples from the Pittsburgh region, providing a wonderful source of cases for helping to advance your understanding of neighborhood and community development. The course will introduce students to the dynamics of neighborhood change, with an emphasis on equity issues explicit and implicit in cities and urban development, neighborhood data analysis and tools for analyzing neighborhood development and change, history of urban development, and policies and plans that have helped to shape and transform urban neighborhoods.

PIA 2713 - CAMPAIGNS FOR POLICY CHANGE

Minimum Credits: 1.5

Maximum Credits: 1.5

How do you turn anger into action? Protest into progress? Interest into influence? For starters, having history, morality, well-attended marches, or even facts on your side - though helpful - is never enough. Successful campaigns and their leaders have specific strategies and tools to move the public, policies and politicians in order to achieve their goals. This course offers an intensive, skills-based and highly interactive experience. Strategies and campaign components are drawn from the instructor's work on national and international policy and political campaigns, as well as interactions with some of the biggest campaigns and best policy campaign professionals in the world. The instructor's campaign experience includes appearing on Fox News, speaking on NPR, testifying before the U.S. Congress, organizing rallies in D.C. and New York City, writing or appearing in: the Wall Street Journal, Associated Press, ABC News, New York Times, Bloomberg, USA Today, The Hill, San Francisco Chronicle, Huffington Post, and having blogs re-printed in many state and local newspapers. Reports authored and campaigns led by the instructor have been cited in several books and a feature length documentary. The lectures, class participation and assignments will cover primary elements of a campaign -- from organizing your advisors to fund raising to being a spokesperson in the media. The instructor will provide the process and outcomes of effective strategy development. Each course component will use actual or real-time examples of how to (and how not to) execute the resulting tactics effectively. There's tough work and enormous satisfaction that comes when you stop talking about a problem and actually want to solve it. This

course will challenge - and at times entertain - students willing to quickly apply what they learn to defend policy positions and to create the plans and elements of real campaigns. The urgency and need for skilled, smart and strategic advocates to fight for the public interest and protect our democracy has never been greater.

PIA 2715 - GIS FOR PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

A geographic information system (GIS) is a powerful tool for the public sector and used in a variety of disciplines. GIS builds on existing methods while offering new dimensions. This course provides students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and demonstrates its uses in the public sectors. Students utilize ArcGIS to analyze and display spatial and demographic data. The construction of policy is then predicated on analysis. Skills learned in core courses can be brought to this course and built upon. Students have the flexibility to focus on their particular area of interest within the public sector through project work. The course is taught via lecture and hands-on experience using the ArcGIS software.

Minimum Credits: 1.5

Maximum Credits: 1.5

Issues of economic development, social equity and environmental sustainability are at the heart of local policy and planning, whether it is taking place in the US or in other countries. Looking at experiences in a comparative perspective, in this 1.5 credit course, students will gain a practical understanding of the commonly used tools by local governments, as well as their interaction with regional and central government actors.

PIA 2717 - STRATEGIC COMMUNICATIONS

Minimum Credits: 1.5

Maximum Credits: 1.5

Understand the strategic and tactical role of the communications function within a nonprofit/NGO organization. Develop ability to analyze audiences, establish positioning, craft messaging and write a communications plan for an organization, program or initiative in the nonprofit sector. Gain contacts with working communications professionals with nonprofit/civic experience in the region.

PIA 2718 - COMPARATIVE CULTURAL REGENERATION IN PITTSBURGH, NEWCASTLE, UNITED KINGDOM AND ST. ETIENNE, FRANCE

Minimum Credits: 1.5

Maximum Credits: 1.5

Instructor permission is required. This is a course for required students who will be taking the Spring 2020 Capstone Seminar in Urban Planning and Governance: Cultural Regeneration in International Perspective. This course will review the theory and background of cultural regeneration, conduct a case study of cultural development and placemaking in Pittsburgh, and prepare background and time line for spring Capstone and field visit to Newcastle, United Kingdom, and St. Etienne, France.

Academic Career: Graduate

PIA 2719 - APPLIED GIS IN THE LOCAL GOVERNMENT CONTEXT

Minimum Credits: 1.5
Maximum Credits: 1.5

Geographic Information Systems is evermore present in the public sphere. This course will explore various uses of GIS in local government and public policy contexts. This course is designed to succeed PIA 2715, GIS in Public Policy, and will build on and test the comprehensive techniques covered. Some GIS new skills will be introduced. We will apply spatial analysis to a variety of problems with an emphasis on the local government and community perspective. Then, we will critique our efforts with the goal of defining the best uses of GIS, and how it can be most impactful in these settings. Students must have completed PIA 2715 or its equivalent before registering for this class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PIA 2715

PIA 2720 - APPLIED GIS IN THE LOCAL GOVERNMENT

Minimum Credits: 3
Maximum Credits: 3

Geographic Information Systems is evermore present in the public sphere. This course will explore various uses of GIS in local government and public policy contexts. PIA 2721 - BUDGETING

Minimum Credits: 3
Maximum Credits: 3

This course will introduce students to the local government budgeting process. Students will learn policies and procedures for preparing and adopting operating and capital budgets. The course will also focus on revenue, expenditure, tax, debt and pension policies along with some of the budgeting challenges faced by many local governments today.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Minimum Credits: 2
Maximum Credits: 2

This eight-week workshop introduces students to the focus group as a data-gathering tool and prepares them to use focus groups in their work. Critical components of the class observation of and hands-on experience with facilitating discussions, taking notes and analysis for report preparation. By the end of this workshop students are expected to describe the theoretical underpinnings and processes of focus groups; identify situations in which focus groups are an appropriate methodology; design all aspects of focus groups, including sampling and writing questions; conduct focus groups; record focus groups; and analyze and report on focus groups' data. The workshop uses lectures, discussions, and interactive exercises to familiarize students with all aspects of focus groups, including the theoretical basis of focus groups, formulating questions, recruiting participants, facilitating the discussion, taking notes, and applying the data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2732 - LOG FRAME AND DEVELOPMENT PLANNING

Minimum Credits: 2

Maximum Credits: 2

The design of an efficient and successful development project requires careful analysis and planning. The logical framework ("logframe") was designed to assist in this process. PIA 2561 Log Frame Skills will study the theory behind project design, implementation and evaluation through proper understanding of this tool. The course will use case studies and emphasize exercises in developing logframes.

Academic Career: Graduate

PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS

Minimum Credits: 3

Maximum Credits: 3

This course is presented in three sections. The first section concerns foundations and perspectives of sustainable development, to include human relationships with the environment; economic models of sustainability; and equity and participation in sustainability issues. The second section concerns planning and analysis for sustainability within a regional context, to include governance, planning, and assessment frameworks. The final section focuses on sustainability in practice, considering regional approaches to sustainable energy and transportation, food and water systems, green infrastructure, and innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2742 - HUMANITARIAN CRISIS

Minimum Credits: 3

Maximum Credits: 3

This course examines more than a dozen major humanitarian crises from around the world during the past 25 years. It analyzes key cross-cutting themes and how response and recovery efforts have been managed, while giving additional attention to reducing disaster risks. Through readings, class discussions and negotiation exercises we will consider the performance and respective roles of primary actors such as united nations agencies, Non-governmental Organizations (NGO's), international organizations, military forces and the official authorities of affected countries. The course has a strong experiential emphasis as reflected by visiting speakers with first-hand field experience, and contact with disaster management graduate students and practitioners in other countries. Students will participate in three simulated negotiations by agencies working in Haiti, Darfur, and Pakistan. They will also work together in comparative research teams, engaging with selected overseas partners, and prepare a joint presentation. Two short papers also will be assigned. Broader themes will include the role of leadership, ethical dilemmas, state-NGO-military relations, policy advocacy by NGOs, the growth of local and national capabilities, the evolution of the international system of humanitarian response, and programmatic ideals such as 'do no harm' and 'disaster risk reduction'. By the end of the course, participants will acquire a deeper understanding of political, military, and humanitarian responses to major humanitarian crises, as well as current initiatives that seek to reduce people's exposure to future threats. This fifteen week course is designed for graduate students interested in working in humanitarian or international crisis activities, whether on behalf of host governments, institutional donors, civilian international or local agencies, military forces, or the media.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2743 - URBAN AND LOCAL POLICY MAKING IN THE UNITED STATES

Minimum Credits: 3

Maximum Credits: 3

This course examines policy through the lens of urban and local problems and policy issues, including gentrification, race, development, and resource

allocation. Local and municipal policies have developed as cities have grown and cleavages between urban and rural have deepened. We will examine the origin and evolution of local politics and policy, trace the development of local governmental institutions, coalitions, and development. Concepts such as the debates and discussions of public servants' and institutional policymaking with respect to public values for public services, place making, etc. Students will be equipped with an understanding of the cultural, constitutional, institutional, organizational, and ethical context of public administration through experiential and collaborative learning. As a graduate course, this class is designed to familiarize students with the literature in subnational political systems, including federalism, and the variety of theoretical and methodological approaches on the topic. The course will be rooted primarily in the political science and policy and public administration literatures, but will include political science, sociology, geography, and interdisciplinary works in urban studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2801 - FOUNDATIONS OF QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2802 - EMPIRICAL METHODS OF RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques common in political research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2810 - ADVANCED METHODS CAUSAL INFERENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts central to causal inference but there is also a heavy emphasis on helping students develop their capacity for research design.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2811 - AMERICAN ELECTORAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the American micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2812 - COMPARATIVE PARTIES AND ELECTIONS

Minimum Credits: 3

Maximum Credits: 3

In this seminar, graduate students will be introduced to a wide variety of readings in the history of Western Europe.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2813 - SEMINAR POLITICAL INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2814 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2815 - WOMEN & POLITICS

Minimum Credits: 3

Maximum Credits: 3

Women have participated in politics as citizens, voters, activists, and elites. However, the extent to which women can and do serve in these roles varies substantially within the U.S. and cross-nationally. This course will examine core works and current developments in the field of women in politics from both a behavioral and institutional approach. We will discuss the role of women in social movements, public opinion, voting behavior, electoral politics, legislative studies, and public policy. While this is a substantive course, there will be a strong focus on the methodical approaches used to study women in politics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Gender, Sexuality & Women's St

PIA 2816 - RESEARCH TOPICS ON THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is a PH.D level course that explores the causes and effects of poverty, under-provision of public goods, bad governance, and conflict in low-income countries. We will look at the role of institutions, historical legacies, state capacity, regime type, corruption and clientelism, natural

resources, ethnic divisions, and international aid in explaining under-development. While this is primarily a substantive course, it will also expose students to cutting-edge methods at the forefront of research on the political economy of development, including experimental and quasi-experimental methods.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2817 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course offers case studies of multilateral peacekeeping and peacemaking efforts in relation to regional and ethnic conflicts, such as those in Bosnia, Kosovo, Rwanda and Somalia. It looks at the underlying rationale for intervention in such conflicts and the problems and dilemmas that arise.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2818 - DOMESTIC POLITICS AND INTERNATIONAL CONFLICT IN THE INFORMATION AGE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and Eastern Europe, Latin America, Asia, and other parts of the world.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2819 - FORMAL POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2821 - COMPARATIVE POLITICAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2822 - SEPARATION OF POWERS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the relationships among the branches in a separation of powers system, particularly the interplay between the legislature and the president. Most specifically, the course will consider the implications of a separation of powers system on representation: can a system specifically created to check the government's ability to act meet the demands for representation of a diverse constituency? How should we think about representation in a separation of powers system? The course will focus on the US political system, but will have implications for the comparative study of these systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2823 - TOPICS IN COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

This graduate course is devoted to the study of international and comparative political economy in developing and emerging countries. These countries tend to face very different sets of constraints than their wealthier counterparts. The aim of this course is to analyze the determinants of welfare in poorer countries. Its main focus is to study the political economy of income and examine how domestic and international incentives shape crucial economic policies (e.g. trade, monetary, or education policies). In the last part of the semester, we broaden our horizon to examine other important components of welfare, such as environmental quality. This course is resolutely focused on the macro level and limited to developing countries.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2824 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3

Maximum Credits: 3

This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 2825 - CIVIL WARS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2826 - BAYESIAN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to matrix algebra.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2827 - FORMAL POLITICAL THEORY 2

Minimum Credits: 3
Maximum Credits: 3

This is the second course in the department's graduate formal theory sequence. We will survey game theoretic models in political science with two goals in mind: (1) students will become critical and competent consumers of formal theory and (2) they will be prepared to begin using formal theory in their research. Topics include bargaining, coalition formation, lobbying delegation, reputation, and signaling. We will also discuss the connection between formal models and empirical tests (both observational and experimental) as well as survey alternatives to rational choice (behavioral and experimental) as well as survey alternatives to rational choice (behavioral, computational, and evolutionary models). Students must be familiar with basic game theoretic concepts and analysis (at the level of PS 2701).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2828 - AUTOCRACY & DEMOCRACY

Minimum Credits: 3
Maximum Credits: 3

This course surveys important questions driving past and current research in the fields of regimes, regime change, and authoritarian governance. Students will be able to identify important research questions based on existing scholarship and execute sound research designs.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2829 - BEHAVIOR THEORY & EXPERIMENTS

Minimum Credits: 3
Maximum Credits: 3

This is a doctoral course that surveys theoretical models and corresponding experimental methods relevant to the study of political behavior. Topics will include voting, accountability, information processing, risk and social preferences, trust, cooperation, and leadership, drawing from rational choice, cognitive psychology, and behavioral economics. Class sessions will include seminar discussions, lectures, and workshops. Familiarity with formal models is helpful, but not required, we will review the basics as needed for the class.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2830 - POLITICAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2831 - TIME SERIES ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to time series.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2832 - ADVANCED METHODOLOGY TEXT AS DATA

Minimum Credits: 3

Maximum Credits: 3

Advanced Methodology Text as Data

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2833 - AMERICAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 2834 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytic frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytic tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state and to making policy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2835 - ADVANCED METHODOLOGY: MAXIMUM LIKELIHOOD ESTIMATION

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2836 - EXPERIMENTAL RESEARCH IN POLITICAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and qualtrics. The second part of the

course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2837 - MEASUREMENT IN SOCIAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

A key part of social scientific research is measurement, i.e. creating independent or dependent variables from raw data to capture substantive concepts. This course provides an applied overview of a variety of popular techniques in social science and machine learning to perform measurement on large and complex datasets. It will cover a variety of "unsupervised" methods (e.g. dimensionality reduction, ideal point estimation, and latent variable methods) that are used to create interpretable and low-dimensional summaries of complex data. It will also cover "supervised measurement", i.e. using a small collection of training data to create measures that can be extrapolated reliably. Specific focus will be paid to methods used in cutting-edge social science including multilevel regression with post-stratification (MRP) and machine learning techniques including random forests, sparse methods, and ensembles. A key goal of this course is to give students the skills to use these methods in their own research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2840 - LATIN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

The course is a readings seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topic of "regime transition" in Latin America.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2841 - POLITICAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2842 - THEORY OF INTERNATIONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 2896 - MPPM POLICY SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This is the final required course for students in the executive degree program. Students prepare individual reports in policy analysis format on topics of their choice, approved by the instructor. Methods of policy analysis will be reviewed, and students will give an oral presentation as well as a final written paper.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3000 - INTERMEDIATE QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the fundamental techniques of regression analysis, focusing on the linear regression model. Emphasis is on applied econometrics, with the goals of the course being to enable students to interpret empirical results in social science work they read and to use statistical software to employ these techniques successfully in their own work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term 'mixed method.'

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3005 - FIELD SEMINAR IN PUBLIC ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

This is the doctoral field course in public administration. This course reviews major developments in the field of public administration, beginning with its historical origins and then focusing on its current research frontiers. The purpose of the course is to prepare students to teach and conduct research in the field of public administration. To that end, students will be expected to turn in weekly reviews of the readings (3 to 4 pages each week) and a research paper of sufficient quality for submission to an academic journal. The format of the course will involve some lecturing (for about an hour) followed by discussion (for about an hour). Students are expected to read thoroughly before the seminar and to come prepared to

critically discuss the readings. This course is open to doctoral students in any field. Master's students with sufficient background, as judged by the instructor, may enroll with the permission of the instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3012 - COMPARATIVE GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3013 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3019 - FIELD SEMINAR IN INTERNATIONAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce GSPIA Ph.D. students to the various approaches to the study of international affairs as well as a few broad areas of inquiry in the field. It covers 'great books' in the study of international affairs, concentrating each week on a classic or important new work. This approach will provide a stable platform from which international affairs students may delve deeper into the literature while apprising non-international affairs students of the general structure and large debates in the field. Given the vastness of the field, there are many topics that we will not be able to cover. However, familiarity with the arguments covered is essential for navigating and making sense of the sprawling literature. By the end of the semester, students will possess the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on the topics we do and do not cover.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3020 - ADVANCED SEMINAR: EVIDENCE AND INFERENCE IN POLITICAL SCIENCE AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This seminar examines methodological disputes in the policy sciences. We will use a structural model of argument based in large part on the work of Stephen Toulmin, the English-born philosopher and applied philosopher of science who spent the latter part of his career working with well-known international relations and public policy specialists at the University of Southern California. Much of Toulmin's structural model of argument was built into the computer program we will use this term. The program is called rationale and it was developed by a Pitt philosophy of science Ph.D., Tim Van Gelder, who also gained significant expertise in computer science. He is at the Melbourne University in Australia. We will use rationale to study the methodology of the policy sciences. By using the structural model of argument to study methodology we will expand the range of research methods available to us as policy-oriented social scientists. Hopefully, this will protect us from the dogma that there is one set of 'approved' methods and from the despair that comes from believing that 'anything goes.' In addition, it will alert us to the dangers of winding up in one or another methodological cul-de-sac in which orthodoxy reigns.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3026 - PHD PROFESSIONAL DEVELOPMENT WORKSHOP

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is meant for GSPIA PhD students in the semester they enter the program, or as soon as possible thereafter. The course will feature guest lectures from GSPIA faculty members on issues pertinent to professional development in a doctoral program. Topics will include, but are not limited to, journal submission, dissertation preparation, seeking and applying for grants, etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

PIA 3050 - QUALITATIVE RESEARCH: DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3096 - COMPREHENSIVE EXAMINATION PREPARATION

Minimum Credits: 1

Maximum Credits: 9

This course is an independent reading course for Ph.D. students who are actively preparing for their comprehensive exams. The student will work under the supervision of a faculty advisor. The advisor and student agree on bibliographies in advance, and the student is encouraged to discuss the readings on a regular basis with his or her advisor and other division faculty.

Academic Career: Graduate

PIA 3097 - INDEPENDENT STUDY PHD

Minimum Credits: 1

Maximum Credits: 6

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3098 - DOCTORAL TEACHING PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

In an increasingly competitive academic job market, teaching experience can be a decisive factor in doctoral students' ability to secure an academic job after graduation. This practicum provides an opportunity for doctoral students to develop teaching skills by creating and delivering a course to members of the community. The practicum will begin with pedagogical and teaching policy training. Under the supervision of the course instructor, doctoral students will then be responsible for all elements of teaching a course in one of GSPIA's doctoral fields (creating a syllabus, delivering lectures, leading class discussions, creating and evaluating course work). After every class delivery, doctoral students will have a rare and invaluable opportunity to receive instant feedback on their performance. At the end of the practicum, students will put together a teaching portfolio which includes a statement of teaching philosophy, the teaching materials developed during the practicum, student feedback and a reflection upon the feedback received.

Academic Career: Graduate

Course Component: Practicum

Course Component: Thesis Research

Grade Component: Grad HSU Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3121 - POLICY THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is broadly concerned with political science research on policy processes, including democratic theory, multiple streams, and punctuated equilibrium, among others. It will focus on these major theories of the policy process, explore major theories of policy change and examine important empirical contributions to the policy field. The course will examine micro-foundations of policy dynamics through models of individual to organizational decision-making, and explore policy agendas, formation of public policies, and the factors influencing change to agendas and policies over time. It will emphasize process approaches of policy change rather than substantive issues, although substance will be addressed in much of the extant literature. This course focuses primarily on American politics but will include select works on comparative policy process perspectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3303 - ADVANCED SEMINAR: IN SECURITY AND INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This field seminar is designed to guide graduate students through the large and complex security studies literature. It is intended primarily to help prepare GSPIA Ph.D. students for the foreign and security policy comprehensive exam, but other students are welcome. Students in this seminar will master the foundations of the academic literature on questions like theories of international relations, the balance of power and its effects, causes of war and peace, coercion, foreign policy decision making, nuclear and conventional warfighting, security institutions, terrorism, violent non-state actors, military and humanitarian intervention, the future of power, and intelligence studies. Due to the vast nature of the security and intelligence studies fields and the limited timeframe of a single semester, we will not be able to cover many of the topics and debates in the literature. By the end of the semester, however, students will have the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on security and intelligence topics we do not cover.

Academic Career: Graduate

Course Component: Seminar

Public Health

PUBHLT 2002 - ESSAY-MMPH

Minimum Credits: 1

Maximum Credits: 2

The essay is designed to provide the student with an opportunity to integrate the major components of the public health learning experience.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PREQ: Multidisciplinary MPH

PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

The course provides GSPH students enrolled in MS degree programs with an introduction and overview of the scope and history of public health, as well as core concepts in public health not covered in the core epidemiology and biostatistics courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: BCHS-PHD or (BIOST-MS or BIOST-PHD) or (EOH-MS or EOH-PHD) or (EPIDEM-MS or EPIDEM-PHD) or GNCSLG-MS or (HUGEN-MS or HUGEN-PHD) or HPM-MPH or HSRP-PHD or HSRP-MS or (IDM-MS or IDM-PHD) or GENBINF-MS

PUBHLT 2012 - MMPH PUBLIC HEALTH ESSAY

Minimum Credits: 1

Maximum Credits: 1

This course will support MPH students who are writing the public health essay. No more than two credits of the essay classes may count toward the MMPH degree. This course counts as one credit toward the public health essay allowance.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad HSU Basis

PUBHLT 2015 - PUBLIC HEALTH BIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This core course will provide an introduction to the biological foundations of many systems that are important in public health. The major determinants of human disease will be considered from an integrated ecological perspective that brings together molecular and population-based approaches to the study of infectious disease (with particular focus on HIV/AIDS, polio, emerging infections, and disease outbreaks following natural disasters) and genetically-determined diseases including "simple" genetic diseases such as cystic fibrosis and "complex" diseases such as hypertension). The host response to infection will be considered, as will the disorders that result from defects in this system, including allergy and asthma. Current developments in genomic science will be covered, including the ethical, legal and social implications of the increased capability to detect and predict disease outcome in individuals and populations. On completion of this course, students will have an understanding of the biological bases of many conditions that are important to public health, and that they will encounter as public health students and practitioners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES

Minimum Credits: 2

Maximum Credits: 2

Students will review the historical development of lesbian, gay, bisexual and transgender health focus area. The impact of stigma and disparity on the health of populations will be explored. An overview, by systems, of conditions of greater prevalence among lesbian, gay, bisexual and/or transgender populations will be presented and discussed. Students will develop a greater understanding of the health disparities among lesbian, gay, bisexual and transgender populations and develop critical thinking skills regarding the impact of marginalization on the health and wellbeing of subpopulations, using lesbian, gay, bisexual and transgender populations as a model. Course will include lectures and active participation in class discussions. This course will serve as the introductory overview course for the lesbian, gay, bisexual and transgender health and wellness certificate program.

PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to socialize our students to the broader profession of public health through engaging them in substantive programs on a wide range of topics that reflect the breadth of public health. This course will enable them to interact with researchers and practitioners from other settings and universities around the world. The course will help to build their capacity to work in interdisciplinary teams to address challenging and complex public health problems. This course requires that all GSPH students (with the exceptions noted below) participate in GSPH sponsored lectures, symposiums, and other events, outside of the classroom, during the first fall and spring terms for which they are enrolled and in residence in Pittsburgh. Two terms are required for graduation. Joint degree students, certificate only students and non-degree students are exempt from this requirement.

Academic Career: Graduate

Course Component: Colloquium

PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

Minimum Credits: 2

Maximum Credits: 2

This course is designed for students who plan to work in global health and is required for students enrolled in the GSPH global health certificate and peace corps master's international tracks. The course focuses on public health in low- and middle-income countries and also covers issues related to globalization. The course will provide students with the theoretical knowledge and practical skills needed to 1) identify, collect and interpret health and economic data, 2) produce a report on public health priorities at the country level, and 3) propose a course of action (including activities, partners, and measureable indicators) for a priority health issue.

Academic Career: Graduate

Grade Component: Grad Letter Grade

Course Requirements: PLAN:Global Health (AC or CR4); or SUBPLAN: Peace Corps (PCORPS-TR)

PUBHLT 2026 - GLOBAL HEALTH PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The practicum provides an opportunity for certificate students to integrate and apply knowledge in global health through a structured, supervised field experience. Learning objectives, assignments, and site are based on the learning needs and career goals of the student and determined in consultation with the certificate director.

Academic Career: Graduate

Course Component: Practicum
Grade Component: Grad HSU Basis

PUBHLT 2027 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

Minimum Credits: 2
Maximum Credits: 2

This course is a capstone experience for students in the global health certificate. It is designed to give students the opportunity to apply what they have learned in their training to the challenge of real-world problem-solving in collaboration with individuals and organizations in the developing world. Students will form two teams, and each team will collaborate with experts from a developing country on a significant health issue in that country. The final product will be a policy paper analyzing the problem and proposing relevant, timely and actionable interventions. This course is different from typical courses that follow a prescribed syllabus. It is a hands-on experience, and for the most part the activities and content of each week will be determined as the course goes along, as students, working in their groups, pursue the background research, consultation, and brainstorming necessary to produce their policy papers. Accordingly there is a great emphasis on independent work (in teams), self-motivation, and active learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PUBHLT 2025; PLAN: Global Health (CR4)

PUBHLT 2028 - PEACE CORPS MASTERS INTERNATIONAL INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0

This course is restricted to students in the school of public health peace corps masters international track and is to be used by students during the peace corps field experience portion of the PCMI program.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

Course Requirements: SUBPLAN: Peace Corps (PCORPS-TR or PC-TR) or Peace Corps Master's Intl (PCMI-TR)

PUBHLT 2029 - MMPH PRACTICUM

Minimum Credits: 1
Maximum Credits: 3

This course is designed to build and expand upon the experience of the individual student in the MMPH program. The practicum will blend the students existing clinical and/or professional work with additional practical experience with a major public health focus.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1
Maximum Credits: 1

This course provides an introduction to topics in research ethics and the responsible conduct of research particularly pertinent to basic and non-clinical, population-based research employing a variety of methods. Students will learn key concepts and methods of ethical reasoning and requirements of human subjects' protection and nonhuman animal research, and will analyze historical and contemporary examples of research misconduct, as well as ethical concerns arising in their own work. Using lecture and small group discussion of assigned readings and participants' research, the course will develop students' skills requisite to design and conduct ethical research, avoid research misconduct, and ethically negotiate the tasks and milestones of academic education and careers (e.g. issues of mentorship and publication). Students will be evaluated (by letter grade) on the basis of the quality of their discussion contributions and quiz/exam responses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2031 - TECHNIQUES FOR PROFESSIONAL WRITING

Minimum Credits: 1

Maximum Credits: 1

This course offers practical experience in a variety of writing styles encountered by professionals. The focus is on communication with general professional and lay audiences rather than on scientific or academic writing. You will learn to recognize communication issues and challenges, understand how they may be addressed in writing, and improve your ability to write effectively within your profession. This course is intended for students who are native and/or confident English writers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2032 - HEALTHCARE IN SUB-SAHARAN AFRICA

Minimum Credits: 2

Maximum Credits: 2

This course provides an in-depth look at health services and healthcare systems in Sub-Saharan Africa. Students will explore the WHO health systems building blocks consisting of leadership/governance, health care financing, health workforce, medical products, information technology and service delivery. Students will also examine health systems databases to assess performance and to better understand the challenges to attain high quality care at low cost, enhanced patient experience and improved outcomes. A variety of teaching modalities will be employed throughout the course including lecture, news headlines, case studies, class discussion, audio-visuals and student presentations. Guest speakers will be invited to share experience and expertise on various topics. A research paper with in-depth exploration of one of the six building blocks in a specific sub-Saharan country is required in addition to a global health case competition group presentation. Course enrollment is capped at 20. This course is a graduate-level course that is open to undergraduates.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Letter Grade

PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH

Minimum Credits: 1

Maximum Credits: 1

This one-credit course is required during the first term for incoming MPH students and is aimed at introducing students to core foundational concepts of public health and providing them with an overview of notable PITT Public Health and Pittsburgh based successes. The course was designed so that students can learn on their own and at their own pace. Course content is divided into seven on-line modules containing brief video lectures and case example segments and organized in a recommended (though not required) sequencing. Students will be allowed seven weeks to progress through the content and assessments. The course will commence with a mandatory meeting at the beginning of the term. A resource list of relevant PITT Public Health courses will be included in each module in order to encourage additional exploration of the topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: PLAN: All Public Health MPH plans

PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS

Minimum Credits: 2

Maximum Credits: 2

This course provides hands-on training in the principles and practice of effective communication. The emphasis is on the types of communication used by public health professionals. Students will briefly cover fundamental principles of communication theory, learn to critically analyze examples of communication, and then have the opportunity to practice applying those principles to a wide variety of different types of communication, including health promotion, routine business communication, and scientific communication. Multiple media types will be discussed, including print, web, and video.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: All Public Health MPH plans

PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Minimum Credits: 2

Maximum Credits: 2

This is the final course in the public health core curriculum. Students will apply a problem solving methodology to analyze current public health issues. Working in interdisciplinary groups in the classroom, students will develop and assess interventions to address specific problems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041) and PUBHLT 2015 and PUBHLT 2022 and BCHS 2509 and EOH 2013 and HPM 2001 and PUBHLT 2033 and PUBHLT 2034; PROG: School of Public Health

PUBHLT 2036 - FRED: AGENT BASED MODELING FOR SOCIAL DETERMINANTS OF HEALTH

Minimum Credits: 2

Maximum Credits: 2

This course is an introduction to agent-based models (ABMs) as a technique for understanding how the dynamics of social, biological, and other complex systems arise from the characteristics and behaviors of the agents making up these systems. Students will learn using the "FRED" (Framework for Reconstructing Epidemiological Dynamics) software platform developed at Pitt Public Health. Examples will emphasize the applications of FRED in public health, including infectious disease transmission and control measures; health behaviors such as vaccine refusal and drug and tobacco use. Emphasis will be on modeling the effects of the Social Determinants of Health. While this course is intended primarily for students in public health, graduate students in other disciplines, including social sciences, engineering or computer science, are welcome to enroll.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2037 - DEVELOPING A GLOBAL HEALTH CASE STUDY FOR COMPETITION

Minimum Credits: 1

Maximum Credits: 1

In this course, students will complete secondary research to select and develop a Global Health case study about a global public health problem in a specific country context. The course will run weekly during the first half of the semester (7 sessions). Tasks and assignments will include, identifying an appropriate case and completing a robust literature review to develop a background/introduction to the health issue and the country profile, which will include relevant historical, demographic, political, economic and culture background. A multidisciplinary team of students will develop a problem statement, a call for strategies addressing the problem, and a judging rubric for proposed solutions. The final product will include a glossary of terms and a bibliography. By developing cases, students will gain valuable Global Health skills, background knowledge and perspective. Cases developed in this course will be suitable for use in future campus-wide learning activities for the Pitt Global Health Case Competition.

Academic Career: Graduate

Course Component: Seminar

PUBHLT 2500 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

Minimum Credits: 1

Maximum Credits: 1

The goal of this course is to use knowledge about health disparities to achieve health equity. The seminar builds upon knowledge and experience gained from previous Health Equity Certificate core and elective courses. The seminar will provide students with an opportunity to assess health equity and disparities in depth and establish strategies to resolve these inequities/disparities. Additionally, we will discuss sources of knowledge and contemporary approaches to improve the health of populations and well-being employing health equity research applications. The student will tackle the disparity(ies)/inequity(ies) through data retrieval, literature review, and contact with community, not for profit, private or government agencies that address the disparity/disparities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BCHS 2554, BCHS 2524, or BCHS 2526

PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Lean Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Lean Six Sigma utilizes a five-phase problem solving methodology known by the acronym DMAIC, around which the course is organized. To integrate theory and practice, students will form teams and work under the mentorship of a Lean Six Sigma Black Belt on a client field project. The flow of the lecture topics will mirror the DMAIC methodology; providing just-in-time knowledge. Lectures will focus first on providing a high-level overview which frames the topic followed by deep dives into a small number of the most critical subject areas and tools within the higher-level topic. Where appropriate, class sessions will also include hands-on labs that allow the students to immediately apply the learning. Student with a final letter grade of "B" or better will be awarded a Lean Six Sigma Green Belt Certificate.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401

BQOM 2140 - SIX SIGMA THEORY & PRACTICE IN HEALTHCARE

Minimum Credits: 1.5

Maximum Credits: 1.5

In managing Healthcare today, many organizations have turned to Six Sigma for a disciplined, data-driven approach to improving the safety and efficacy of processes while simultaneously reducing costs. Faculty will guide students through the theory of Six Sigma, and its five-phase process improvement methodology known by the acronym DMAIC: 1. Define the problems (opportunities), the goals, and the deliverables to the customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate the data to make sure it is credible and set the baseline. 3. Analyze the data to narrow the causal factors to the vital few. Determine the root cause(s) of defects. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. This experience-based learning course incorporates in-class labs, based on a fictitious company named Precision Delivery Incorporated (PDI), that allow teams of students to immediately put the theory of Six Sigma into practice. Further, students will develop critical thinking skills as they analyze and evaluate real-world Healthcare Six Sigma Projects.

Academic Career: Graduate

Course Requirements: CREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major components of SAP ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP ERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the SAP certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems SAP business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.

Course Requirements: Katz Grad School of Business students only.

BQOM 2504 - FRUGAL ENGINEERING & VALUE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the principles of frugal design of products and processes. Foundational skills in Value Engineering/Analysis including tools such as Functional Analysis will be detailed. Additionally, topics such as Customer Needs Identification, Quality Engineering, Operational Excellence and Lean Process Engineering will be integrated into developing frugal product and process designs. With this course, students will have taken the first step towards certification as Value Methodology Associates (VMA) offered by the SAVE International.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS

Minimum Credits: 2

Maximum Credits: 2

Increasingly, due to shortening product life cycles and capital-intensive capacity decisions, companies are being forced to place greater emphasis on managing constrained, but perishable inventory and capacity. In this course, we study quantity and pricing strategies to improve profitability. The main goals of this course are to provide the insights and tools that will enable students to: (1) be able to identify pricing and revenue opportunities; (2) understand the critical differences among different types of opportunity and the approaches needed to address them; (3) understand key concepts including the impact of constrained capacity, opportunity costs, customer response, demand uncertainty, and market segmentation; and (4) be able to formulate and solve pricing and revenue optimization decisions as constrained optimization problems at the level necessary to estimate potential benefits. The focus of the course will be on imparting a broad understanding and grasp of basic techniques rather than the technical nuances of a particular algorithm.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or BQOM 2411); PROG: Joseph M. Katz Grad Sch Bus

BQOM 2512 - ADVANCED DECISION TECHNOLOGY

Minimum Credits: 2

Maximum Credits: 2

While contemporary decision technologies are increasingly important in today's competitive environment for dealing with complex problems, they can also yield wrong or misleading solutions. The course will consider current applications of these technologies in these areas and students will analyze a variety of cases in these areas using commercial software packages. Emphasis in the course will be given to the potential and limitations in using decision technologies and to alternative approaches to dealing with complex problems.

Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or 2411); PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BQOM 2521 - DECISION MAKING COMPLEX ENVRNMNT

Minimum Credits: 1.5

Maximum Credits: 1.5

Examines in detail the thought processes of the decision maker when faced with social, personal, business or contemporary political problems. Through the analytic hierarchy process, decision makers use a framework to organize thoughts in a consistent way and to compare elements and criteria which weigh most heavily in arriving at the best alternative among given options.

Academic Career: Graduate

BQOM 2523 - PROCESS ENGINEERING

Minimum Credits: 2

Maximum Credits: 2

This course studies the design and engineering of the business processes - the way businesses organize "work" in service as well as manufacturing operations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT

Minimum Credits: 2

Maximum Credits: 2

This course is concerned with the continuous improvement principles involved in the production of goods and services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2523; PROG: Katz Graduate School of Business

BQOM 2531 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

A continuation of distribution networks (BQOM 2530).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2411; PROG: Katz Graduate School of Business

BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will consider multi-facility supply and demand network management from all three perspectives: operational, tactical and strategic. We will emphasize the creation and maintenance of value in the supply network, an activity critical to the survival of all organizations. Value creation can be accomplished by increasing revenue (e.g., by improving delivery and logistics flexibility, and enhancing customer experience and responsiveness) and/or by decreasing cost (e.g., by eliminating unnecessary activities, and efficiently managing others). Topics covered will include supply chain strategy, integration, and coordination; supply chain finance; network design and logistics optimization; inter-organizational partnerships for effective inventory control; demand-driven sales and operations planning; quick response through product and supply chain design for improved customer experience; strategic outsourcing and contracting; supply chain risk management; new technologies for supply chains 4.0; and sustainability. Using real-life case studies and software packages, we will examine these intricacies of supply and demand network management, learning about the underlying tools, methodologies and decision support systems.

BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT

Minimum Credits: 1.5

Maximum Credits: 1.5

The course provides a special emphasis on the development and management of strategic sourcing relationships and promotes an understanding of the strategic role of supply management in effective supply/demand/value chain operations. Purchasing and supply management play an essential role in the ability of the firm to operate efficiently and be competitive in the contemporary global business environment. Included in these processes are activities involved in identifying potential suppliers, creating relationships with selected suppliers, obtaining the needed materials in the most efficient quantities at the highest quality levels, and developing strategies designed to ensure an uninterrupted flow of goods and materials. The objective of this course is to make students aware of the demands placed upon purchasing professionals, and to understand the impact of purchasing on the competitive success and profitability of the firm. They must also have an understanding of legal and ethical considerations which affect purchasing decision-making.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2535 - HEALTHCARE OPERATIONS AND SUPPLY CHAIN MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course allows students to engage in experiential learning through a project course that specializes in a topic that may touch one or several of these areas: supply chain management, value chain management, supplier diversity and global sourcing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BQOM 2537 - FORECASTING

Minimum Credits: 2

Maximum Credits: 2

This course will cover traditional forecasting methodologies along with an overview of the state-of-the-art of forecasting with methodologies ranging from judgmental to statistical knowledge sources.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2544 - PROCESS MANAGEMENT AND CONTINUOUS IMPROVEMENT

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is intended to study the interactions that govern the efficiency of the process, process of converting raw material in the most efficient way- products and services - resulting in a "satisfied" customer. The course first will focus on the study of process fundamentals. We will then illustrate complementary and contradictory relationships among the non-financial measures of process performance, thereby suggesting ground rules for value based process architecture. We will examine some of these interactions, and discuss general principles and concepts managers need to know to understand the impact of their decisions on the organization as a whole. We will present 'what if' scenarios to facilitate the continuous improvement in the business enterprise.

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course gives students a perspective on what is project management and how different project management techniques are used in practice. Time/Quality/Cost trade-offs are considered in addition to discussing how to manage renewable resources and level resource. Most of the course materials are presented in the context of practical business situations from a variety of fields such as corporate finance, investment management, manufacturing/production, distribution/logistics, purchasing, and human resources. Students master commercial software such as Microsoft Project and Excel add-ins, and through applications learn how to facilitate project management using these packages.

BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION

Minimum Credits: 1.5

Maximum Credits: 1.5

The purpose of this course is to enhance the problem-solving skills of Pitt Business students to the level necessary for them to deal with complex decision problems using optimization and simulation. It is an introduction to predictive analytics which can be roughly divided into two approaches: pattern recognition and simulation. In this course we focus on simulation, where you start by using human knowledge of cause and effect to create a model of the system in which the problem operates. You then connect the data you have available with that model to obtain a future projection. Simulation, integrates signals missing in the data and has relatively low data acquisition and processing costs while giving highly reliable predictions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2512

BQOM 2578 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides you with experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminant analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. The course is methods oriented, as opposed to being methodology oriented, so you will learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

Course Requirements: PREQ: BQOM 2557; PROG: Katz Graduate School of Business

BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Minimum Credits: 1.5

Maximum Credits: 1.5

Business Analytics: Strategic Essentials explores the growing use of Advanced Analytics ("AA"; predictive/prescriptive analytics) as a critical element for business strategy development and managerial priorities. Students will develop a fundamental understanding of how AA is being used to drive strategic change, market leadership, and functional priorities. Students will: Understand why AA is viewed as a strategic imperative for

organizations, Establish a framework to apply AA to various levels of strategic and functional priorities, Develop an overall fluency in matters that directly impact the success of AA implementations The course uses a mixture of lectures, readings, case discussions, and written case analyses. The focus is helping students build an overall framework that will assist in achieving target returns on investment related to AA-driven initiatives that students will lead in their careers.

BQOM 2585 - RESOLVING CONFLICTS WITH THE ANALYTIC HIERARCHY PROCESS

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will study the evolution of conflicts, theories used in the study of conflicts, and our approach to conflict resolution based on the Analytic Hierarchy Process (AHP). The main objective of the course is to learn how to use relative measurement to study conflicts, develop hierarchies of benefits, costs, perceived benefits and perceived costs and compute gain-loss ratios for pairs of tradeoffs used to construct a fair and equitable agreement. The course consists of seven sessions. The first six sessions provide the background for the last session in which the Conflict Resolution (CR) process based on the AHP is applied. This course will be coordinated with a Global Issue Workshop (GIW) course to be designed around the conflict studied in this class.

BQOM 2821 - HEALTH INSURANCE AND RISK MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides a broad overview of the organization, financing, and delivery of health care via health insurance. The course is organized as follows. In the first module, we will examine the history of the development of health insurance and health care delivery systems in the 20th century; including health insurance markets and the public and private providers of health insurance in the United States. In the second module, we will examine reimbursement for medical care, including incentive structures and risk adjustment. In the third module, we will assess efforts currently underway in the U.S. with respect to improving access to and quality of health care while reducing costs. In the fourth module, the class will focus on major challenges facing the U.S. health care system with case studies of high healthcare prices and social determinants of health as key challenges. This course focuses mainly on the U.S. system, with health systems in other comparable countries briefly discussed for comparison. Students are evaluated based on discussion form participation, 2 individual problem sets, one group problem set, and a take-home final exam/assignment.

BQOM 2904 - PROBLEM SOLVING AND CREATIVITY

Minimum Credits: 1.5

Maximum Credits: 1.5

The focus of this course is on creativity and associated design thinking techniques. We will examine the role of creativity in the innovation process, and explore the benefits of knowledge diversity. We will explore how to draw insight from different knowledge domains to identify important

questions whose answers can be a source of value, and to develop novel approaches to problem solving. In addition to practical exercises to understand the tools and techniques that foster value-added creativity and innovation, we will discuss recent research from a number of academic domains. Among others, we will explore the role of leadership and team work in the creative endeavor, as well as the fundamental elements of design thinking. Since the course includes several experiential components, it is not feasible to take this course without committing to attending all classes.

Radiology

RAD 5330 - IMAGING CLERKSHIP (3 WEEKS)

Minimum Credits: 0

Maximum Credits: 0

Three-week course designed to increase experience in radiology and imaging. Will be accomplished by lectures, seminars and student case presentations. All lectures are at a senior medical student level emphasizing clinical applicability. By course end students are expected to understand basic uses and limitations of anatomic and physiologic imaging modalities in diag. rad., nuc. med., and MRI. Students will be expected to acquire basic understanding of common radiographic studies and understand indications and limitations of different imaging methods used in evaluating common clinical problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

RAD 5384 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this elective may join ongoing basic research projects in the laboratory or, with permission, initiate their own projects. Students will be expected to participate in all aspects of their segment of the ongoing research; experimental design, data collection, data analysis and reporting.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

RAD 5421 - DIAGNOSTIC RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week elective in diagnostic radiology offered to those who wish to gain additional exposure to the field. Students may choose a broad based curriculum which will expose the individual to all areas of radiology or may choose to do a focused radiology elective in angio/interventional radiology, ultrasound, or neuroradiology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5422 - ADVANCED RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week intensive elective course in advanced diagnostic radiology for fourth year medical students. The course will include didactic lectures and demonstrations that will be presented by members of the radiology faculty. Students will also gain clinical exposure to radiology in some of the following assignments: thoracic imaging/musculoskeletal imaging/pediatric radiology/abdominal imaging/nuclear medicine/women's imaging/neuroradiology. Students will also have access to the radiology learning lab, teaching files, and other educational materials for individual study. Participants are required to present a comprehensive clinical case with an emphasis on the radiology features pertinent to their case presentation. The case should be of a patient the student encountered in prior clinical rotations. A written examination will be required at the end of the elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5425 - VASCULAR/INTERVENTION RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week clinical elective. Service covers all aspects of angiographic and interventional procedures below the neck. Diagnostic procedures and common interventional procedures are performed. The medical student will scrub into interventional cases with radiology staff, fellows and residents, attend daily case review sessions, and perform clinical rounds on patients being followed by the interventional radiology service.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5430 - NUCLEAR MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Nuclear medicine involves the formulation and use of radioactive substances used as tracers of metabolic processes. They may be used in vitro or in vivo in patients for therapy or for diagnosis where radioactivity is quantified and displayed by various instruments. Students are brought into the service for hands-on demos of the various procedures exemplified by clinical material. The principle routine clinical studies include functional imaging of brain, heart, bones, kidneys, liver, thyroid, adrenal and various neoplasms by means of monoclonal antibodies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5435 - CLINICAL RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week elective designed to increase understanding of diagnostic radiology. Students will be assigned to one-week rotations in four different areas: thoracic imaging, musculoskeletal imaging, pediatric radiology, abdominal imaging, nuclear medicine, women's imaging, and neuroradiology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5440 - INDEPENDENT STUDY IN RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Elective (4 weeks) is available to senior students with a particular interest in a subspecialty area of radiology. Student will design an intensive, independent study elective with a staff radiologist in the interest area. A written proposal is required to be submitted to the director of undergraduate medical education in radiology outlining the goals and objectives of the elective which has been approved by the faculty advisor. The prospectus is required a minimum of one month in advance of beginning project for credit.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5620 - CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective offers the student instruction and experience in clinical radiation oncology and an intro to radiotherapy physics at the joint radiation oncology center. Facilities will be at the university medical center, Magee Women's Hospital and Shadyside Hospital. The student will spend time with faculty members in consult, exam, treatment and follow-up of the particular subgroups of malignant disease managed by the individual physician. Student will attend department conference, treatment planning sessions, operative radioactive isotope insertion, etc.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5630 - INTRODUCTION TO CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week clinical elective offers the student instruction and experience in clinical radiation oncology and an introduction to radiobiology and radiation therapy physics in the Department of Radiation Oncology. The student will spend time with faculty members in consultation, examination, treatment, management and follow-up of the particular subgroups of malignant disease managed by the individual physician. The student will attend departmental conferences, treatment planning sessions, radiosurgery planning and treatment, operative radioactive isotope insertions, etc. The student will be introduced to the physics aspects of radiation therapy. The elective is planned so that each student will have the opportunity to obtain an overall view of the field of radiation oncology.

Academic Career: Medical School

RAD 5826 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this four week elective may join ongoing basic research projects in the lab or with permission, initiate their own related projects. This lab is involved in evaluating the role of biologic response modifiers on hematopoietic recovery after treatment of tumors in mice. In addition, we are inserting genes into hematopoietic stem cells that contain them. Objectives are experimental design, cell collection and counting, sizing and culture and DNA isolation. Involvement expected in ongoing research, experimental design, data collection, analysis and report.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5827 - EXPERIMENTAL DIAGNOSTIC RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective is designed for the student interested in a career in radiology and who wishes to pursue a research project. The student needs to find a radiology faculty member who is willing to collaborate in a research project. These research projects can vary according to the combined interest of the student and the faculty preceptor. The student and faculty preceptor need to submit a written research proposal before this elective can

be approved.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5840 - RADIATION ONCOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This elective provides research project opportunities in radiation oncology to interested and motivated students. Project areas include clinical studies, prospective or retrospective clinical studies, creating a database, evaluating outcomes of solid tumors. The objective is to teach the basic approach to research in the specialty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5841 - RESEARCH IN RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5842 - VIRTUAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students will spend time learning more about the field, its technical basis and sub-disciplines through prerecorded lectures. The student will then participate in the virtual clinical work-up of patients in preparation for radiation therapy as well as in the treatment and follow up of those already treated patients. Students will rotate with individual attendings and residents through their clinic virtually seeing and assessing patients. Students will spend time learning to contour on several cases that will be reviewed and discussed with radiation oncology residents and attendings. A small research project or discussion on a subset of radiation oncology will be completed during the fourth week with the course closing via a mini-presentation and final exam. All elements can be conducted remotely through online platform. For students who have already rotated in person or virtual, this course can provide additional depth and can be customized.

Academic Career: Medical School

Course Component: Practicum

Grade Component: Exchange MED SU5

RAD 5899 - INDEPENDENT STUDY IN RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

RAD 5900 - EXTRAMURAL RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in radiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

RAD 5901 - EXTRAMURAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in radiation oncology may be arranged at an institution other than the university of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Rehabilitation Science

REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (STAT 0200 or 1000 or 1020 or 1131) or (PSY 0201 or 0270); MIN GRADE: 'C-' for listed courses; PLAN: Rehabilitation Science (BS, BSH, BPH)

REHSCI 1200 - HUMAN ANATOMY

Minimum Credits: 3

Maximum Credits: 3

This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy with particular reference to the musculoskeletal, nervous, cardiovascular and respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [(BIOSC 0150 or 0170 or 0716)or(BIOL 0110)orBIOENG 1070] and [(BIOSC 0050or0057or0058or0070 or0715) or (BIOENG 1070) or (BIOL 0101or0111)] or BIOSC 0190; MIN GRADE: 'C-' ; PLAN: REHSCI or AT (BS, BSH, BPH); CREQ: REHSCI 1201

REHSCI 1201 - HUMAN ANATOMY LAB

Minimum Credits: 1

Maximum Credits: 1

This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy

with particular reference to the musculoskeletal, nervous, cardiovascular and respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.

Academic Career: Undergraduate

Course Component: Credit Lab

Grade Component: Letter Grade

Course Requirements: CREQ: REHSCI 1200

REHSCI 1205 - HUMAN PHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

This basic human physiology course covers general physiological processes, muscles, blood and lymph, body fluids, renal function, respiration, metabolism, and the nervous, gastrointestinal, cardiovascular and endocrine systems. Problem-based formats will be introduced with particular reference to those problems seen in clinical settings.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: [(BIOENG 0150 or 0170 or 0715) or (BIOL 0110) or (BIOENG 1070)] and [(BIOOSC 0050 or 0057 or 0058 or 0070)] or (BIOENG 1070) or (BIOL 0101 or 0111)]; MIN GRADE: 'C-' for listed courses. PLAN: REHSCI (BS, BPH) or AT (BS, BS-H, BPH)

REHSCI 1215 - EXERCISE PHYSIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculoskeletal, in individuals with disabilities.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: (REHSCI 1205) or (BIOOSC 1250 or 1070) or (NROSCI 1250) or (NUR 0013 and 0003); MIN GRADE: 'C-' for listed courses; COREQ REHSCI 1216; PLAN: Rehabilitation Science (BS, BPH) or Athletic Training (BS, BS-H, BPH)

REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS

Minimum Credits: 2

Maximum Credits: 2

Course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1200 and (PHYS 0101 or 0110 or 0140 or 0150 or 0174); MIN GRADE "C-" for all listed courses; CREQ: REHSCI 1221

REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB

Minimum Credits: 1

Maximum Credits: 1

Required lab component for rehsci 1220 kinesiology and biomechanics: course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.

Academic Career: Undergraduate

Course Component: Credit Lab

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1200 and (PHYS 0101 or 0110 or 0140 or 0150 or 0174); MIN GRADE C- for all listed courses; CREQ: REHSCI 1220 PLAN: Rehabilitation Science (BS, BSH, BPH) SUBPLAN: Pre-Athletic Training (BSPATH-SP)

REHSCI 1235 - MEDICAL TERMINOLOGY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to introduce students to the fundamentals of medical terminology. It includes word structure of basic medical and surgical terms and procedures, body parts and organs, body systems, selected medical specialties, and commonly used medical abbreviations and symbols. This course is a self-directed learning course, using a programmed text, with online quizzes (through Blackboard) and a final exam administered in a classroom.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

REHSCI 1265 - PHARMACOLOGY IN REHABILITATION

Minimum Credits: 3

Maximum Credits: 3

This course serves as a foundation to general pharmacology, and begins with lectures on the general principles affecting drug response: drug absorption, distribution, metabolism and excretion. The major drug categories will then be discussed, with an emphasis on drug classification, mechanism of action, side effects (especially those that are predictable), and significant drug interactions. At the completion of this course, the student will be able to recognize and describe the action of prototype drugs in each major drug category, compare and contrast their action with other drugs in each category, and explain the role of those drugs in the mitigation, treatment, cure or prevention of disease in humans.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PREQ: REHSCI 1205 or (BIOSC 1250 or 1070) or NROSCI 1250 or (NUR 0013 and 0003); MIN GRADE "C-" for all listed courses; PLAN: Rehabilitation Science (BS, BSH, BPH) or Athletic Training (BS, BSH, BPH)

Rehabilitation Technology

RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the fundamental principles and practices related to multiple areas of assistive technology. This includes: wheelchair seating and mobility, adaptive sports and recreation, augmentative communication, environmental control and home automation, computer and SmartPhone access, cognitive aids, low vision and hearing loss devices, adaptive driving, vehicle modifications, transportation safety, environmental accessibility as well as prosthetics and orthotics. In addition, common terminology, disability etiquette, ethics, and the service delivery process are discussed throughout. The course also includes various hands-on labs to further learn the applications of various assistive technologies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 4

Maximum Credits: 4

This course is the first course in a two-course sequence on Rehabilitation Engineering Design. RT 1102/2102 is in the Fall, and 1207/2207 is in the Spring. RT 1102/2102 covers the fundamentals of product design and development with a particular emphasis on assistive and rehabilitative

technologies. The goal of this course is for students to learn both the design process and the tools necessary to develop high-quality designs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY

Minimum Credits: 3

Maximum Credits: 3

This course investigates psychological and sociological issues of impairment regarding views of disability not as solely located within the individual, but instead as the outcome of interaction between the individual with the impairment and society. Course focuses on the experience of being disabled and includes interactions with a wide variety of disciplinary perspectives on individual, social and cultural experience of disability, gaining familiarity with key debates in these fields. Foundations of stigmatization and discrimination towards people with disabilities and their pervasiveness and effect throughout all domains of life will be examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2104 - FUNCTIONAL & MEDICAL ASPECTS OF DISABILITY RELATED TO ASSISTIVE TECHNOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a general overview of the pre-disposing factors and direct causes of disease, as well as their effects on the human body. It will also include a systemic approach to the basic disease process in terms of etiology, symptomatology, general pathological changes, diagnostic procedures. Students will examine major chronic illnesses, diseases, and disabilities in order to obtain a practical understanding of the implications of these conditions on all areas of functioning and participation to prepare for clinical rehabilitation technology applications. Case scenarios will be utilized to enhance student learning and interaction with individuals with varying types of disabilities. Students will prepare a paper and present on a specific disease or disability focusing on both the pathophysiology and the functional considerations that may be affected by use of rehabilitation and assistive technology. This course will also cover a basic introduction to medical terminology and universal precautions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to all elements of designing a research project from developing a researchable question to ethical issues. Lectures focus on basics of different research designs and key concepts of evidence-based practice. Through hands-on class exercises and journal club activities, students will gain ability to interpret and critique literature and become critical consumers of research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES

Minimum Credits: 3

Maximum Credits: 3

Develop the clinical skills needed to apply assistive technology and rehabilitation engineering solutions to help individuals with disabilities achieve their goals in the area of productivity, education, employment, communication, and environmental access. Students will match knowledge of assistive technology products gained in RT 2101 to the needs of real life "model clients". Taught using a service delivery model for assessing the

individual, the context, the technology-user interface and an interdisciplinary team approach.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: RT 2101 to be the pre-req for RT 2206 - Rehabilitation and Assistive Technology Practices

RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is the second course in a two-course sequence on Rehabilitation Engineering Design. HRS 1102/2102 is in the Fall, and 1207/2207 is in the Spring. This course is a project-based design course in which students use design methods and tools learned in 1102/2102, follow an iterative design and testing process with clients and experts, and develop assistive technology device prototypes for their clients.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2208 - ETHICAL ISSUES IN HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This course examines a variety of complex ethical issues which confront health-care practitioners and researchers as they work with clients and colleagues within the health-care system and society. By analyzing actual cases, health-care workers are enabled to make informed choices when faced with these issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2209 - CLINICAL APPLICATIONS OF SEATING AND MOBILITY

Minimum Credits: 3

Maximum Credits: 3

Course for students to develop knowledge and skill in the process and strategies to find and acquire assistive technology devices and services for people with disabilities as well as understand the underlying policies that govern funding. Course focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, strategies for preparing letters of necessity and advocacy efforts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2210 - ASSISTIVE TECHNOLOGY FUNDING, POLICY, & MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course is focused on the components necessary for people with disabilities to access Assistive Technology and Assistive Technology Services. Students will be able to apply experience from previous coursework and experience with AT devices from a context of policy (legislative and non-legislative), funding, and organizational management that surrounds services. Content will focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, and advocacy efforts. Examples of systems change activities and current topics will also be reviewed and discussed. Advocacy and procedures for due process and policy change will also be reviewed for situations when funding sources and policies are limited. The management portion will focus on the essential components of a service delivery program or business model that includes strategic planning, human resource/organizational behavior, policies and procedures, accreditation, budgets, quality improvement, business planning and resource management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2311 - CLINICAL INTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2312 - SCHOLARLY PAPER

Minimum Credits: 1

Maximum Credits: 6

A research oriented paper based on work the student has done in his or her area of study. Students will be encouraged to submit honors papers for publication or presentation at a national or state professional meeting. The adviser and an appropriate faculty reader will supervise the student's work on the scholarly paper.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2413 - GRADUATE RESEARCH PROPOSAL

Minimum Credits: 1

Maximum Credits: 6

Graduate student writes thesis proposal, receives committee approval and institutional review board (IRB) approval for thesis study.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2414 - GRADUATE RESEARCH

Minimum Credits: 1

Maximum Credits: 6

An original in-depth investigative study of a selected area of professional interest. A research report suitable in format and content for publication is required.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2415 - SOFT TISSUE BIOMECHANICS

Minimum Credits: 2

Maximum Credits: 2

Soft tissue responses to external mechanical loading are of interest in the prevention and treatment of pressure-related tissue injuries. These injuries include ulcers occurring on the plantar surface of diabetic feet, wounds at the inter face between a PROSTHeses and a residual limb and pressure ulcers over the bony prominences of immobile individuals with neuromuscular impairments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2416 - WHEELCHAIR BIOMECHANICS

Minimum Credits: 2

Maximum Credits: 2

Discuss all areas of wheelchair biomechanics including stability of wheelchairs and propulsion biomechanics. Students will use kinetic and kinematic analysis to determine the forces and moments occurring in upper extremity joints during the propulsive stroke. Clinical correlates to the biomechanical studies will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2417 - PRESSURE INJURY SCIENCE

Minimum Credits: 2

Maximum Credits: 2

Pressure injury science is a journal club style course covering historical and contemporary research on intrinsic and extrinsic factors leading to pressure injury development, effectiveness of interventions for prevention, risk assessment tools, techniques used to evaluate and study tissue integrity related pressure injury development and the evidence for the three primary theories of pressure injury etiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2719 - FUNCTIONAL AND MEDICAL ASPECTS OF DISABILITY

Minimum Credits: 2

Maximum Credits: 2

NOTE: Only register for the 2-credit course if you are a new student in Fall 2020, taking the 35-credit MRT program. This course is designed to prepare professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2922 - TEACHING INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

Supervised experience in a health-related educational program permitting the student to develop and present instructional materials, to experiment with innovative methods of instruction, and to evaluate the effectiveness of the presentations.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2999 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member

willing to undertake such a tutorial.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Health and Rehabilitation Sciences students only.

Restorative Dentistry

RESTD 2113 - CLINICAL OMF RADIOLOGY CONFERENCE 3

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

RESTD 2116 - CLINICAL OMF RADIOLOGY CONFERENCE 6

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY

Minimum Credits: 2

Maximum Credits: 2

In this course, students will develop a practical understanding of tooth anatomy, structure, function, and related terminology; the relevance of these anatomic features to the practice of clinical dentistry will be emphasized. This course includes lectures and class discussions. The accompanying laboratory course, RESTD 5115, provides an opportunity for hands-on experiences in a preclinical setting.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5115 - DENTAL ANATOMY AND MORPHOLOGY LAB

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented with the anatomy of the primary and permanent teeth on a practical level, focusing particularly on the size, shape, contours, and anatomic features of the individual permanent teeth, and teaches the student how to visualize and reproduce the contours clinically. The primary goal of this course is for the student to be able to identify the primary and permanent teeth, and to be able to visualize the size, shape, contours, and anatomic features of the individual permanent teeth both radiographically and in person. A secondary goal is to develop and practice manual dexterity skills that are essential to later courses and in the profession of dentistry. This course includes small group lab sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

RESTD 5118 - DENTAL ANATOMY AND MORPHOLOGY LAB

Minimum Credits: 2

Maximum Credits: 2

In this course, students will be presented with the anatomy of the primary and permanent teeth on a practical level, focusing particularly on the size, shape, contours, and anatomic features of the individual permanent teeth, and teaches the student how to visualize and reproduce the contours clinically. The primary goal of this course is for the student to be able to identify the primary and permanent teeth, and to be able to visualize the size,

shape, contours, and anatomic features of the individual permanent teeth. A secondary goal is to develop and practice manual dexterity skills that are essential to later courses and in the profession of dentistry. This course includes small group lab sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF

RESTD 5143 - PRINCIPLES OF OPERATIVE DENTISTRY 1

Minimum Credits: 2

Maximum Credits: 2

This amalgam restorations course considers the terminology, principles and procedures of the following basic concepts in clinical operative dentistry: 1. Moisture control and soft tissue management of the operating field, 2. Rotary and hand instrumentation, 3. Dental caries, 4. Cavity preparation and restoration of all teeth using amalgam alloy, 5. Pulpal protection - varnished, liners and bases, 6. Occlusion, and 7. Dental biomaterials amalgam.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF with +/- Values

RESTD 5147 - PRINCIPLES OF OPERATIVE DENTISTRY 1 LABORATORY

Minimum Credits: 1.5

Maximum Credits: 1.5

This course provides the opportunity to develop psychomotor skills in the following operative procedures: 1. Rubber dam isolation, 2. Instrumentation, 3. Dental caries detection, 4. Preparation of various amalgam cavity preparations, 5. Placement of pulpal protection, 6. Restoration and various cavity preparations with amalgam, and 7. Occlusal adjustments.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF with +/- Values

RESTD 5172 - PRINCIPLES OF OPERATIVE DENTISTRY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be prepared with the operative dentistry knowledge and techniques to successfully restore the dentition utilizing composite resin materials. Additionally, the student will learn adjunctive esthetic information and alternative treatment modalities. This course will provide the foundational knowledge to allow the student to understand and apply the basic principles of preparation design, adhesion, and finishing of composite restorations in the pre-clinic environment. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5176 - PRINCIPLES OF OPERATIVE DENTISTRY 2 LAB

Minimum Credits: 1.5

Maximum Credits: 1.5

This pre-clinical lab course is given in conjunction with the lecture course for composite resin restorations, RESTD 5172 Principles of Operative Dentistry 2. In this course, students will acquire the psychomotor and instructional skills in treating Class I, II, III, IV, V lesions using bonded composite restorative materials. Students will also learn to restore cuspal fractures and place sealants using bonded resin materials. The student will learn how to properly evaluate their finished restorations for form, function and esthetics.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: ABCF

RESTD 5244 - GERIATRICS

Minimum Credits: 1

Maximum Credits: 1

Students will be introduced to the concepts of geriatrics and the multidisciplinary approach to the treatment of the geriatric patient in traditional and non-traditional settings. Guest lecturers will be invited to provide information germane to their specific fields.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5281 - PRINCIPLES OF OPERATIVE DENTISTRY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will continue to develop their skills in operative dentistry by reviewing the amalgam and composite preparations and restorations, which were taught in the first year curriculum, and completing them on assigned typodont teeth. This course is primarily a pre-clinical lab course. Students will continue to develop psychomotor skills to properly prepare and restore teeth using both amalgam and composite restorative materials.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

RESTD 5282 - OPERATIVE TECHNIQUES REVIEW

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

RESTD 5342 - PRACTICE ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 1

This course introduces students to the management concepts required in dental practice. Material is presented on managing the following areas of dental practice: personnel, insurance, equipment purchasing, legal responsibilities, accounting, computer usage, record keeping and other crucial areas. Although focusing primarily on private dental practice, alternative practice options are discussed, including HMOS, hospitals and publically funded dental services.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5371 - PRACTICE MANAGEMENT

Minimum Credits: 1

Maximum Credits: 1

RESTD 5371 is a continuation of the RESTD 5342 Practice Administration course. The student will be exposed to technology used in a dental office, insurance plans and options for participation, marketing, and acquiring knowledge of how a dental practice functions. Students will apply the philosophies of practice management and understand different models of health care to a level of competence.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY

Minimum Credits: 1

Maximum Credits: 1

According to a report published in the Journal of Health Affairs, consumer spending in dentistry, which was \$60 billion in 2002, surpassed \$84 billion in 2005, and government actuaries predict annual increases of 6.3 to 6.9% in expenditures to reach \$146.9 billion by 2014. It is now estimated that nearly 70% of the total consumer spending in dentistry is spent on esthetic dentistry. New concepts in esthetic dentistry involve more than

merely providing porcelain veneers, they encompass a broad approach to the total esthetic needs of patients. "Esthetic Restorative Dentistry" builds on the sound principals of restorative dentistry presented through the student's first three years. This course introduces the student to the basic knowledge, materials, armamentarium, and clinical procedures that constitute the modalities of esthetic restorative dentistry. Students will understand how in combination each modality builds the foundation for interdisciplinary patient management. Students graduating from dental school in 2014 and beyond must have the opportunity to learn and explore the special methods of esthetic restorative dentistry as today's esthetic dentistry is supported by new developments, innovative techniques, and a wealth of new scientific data.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: ABCF

RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of restorative dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in restorative dentistry for dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in restorative dentistry.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

RESTD 5449 - CLINICAL RESTORATIVE DENTISTRY 2

Minimum Credits: 2

Maximum Credits: 2

This course will provide patient care in a clinical setting under direct faculty supervision. Treatment procedures will include amalgam restorations, composite resin restorations, porcelain restorations, castings, and endodontic therapy.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: ABCF

RESTD 5870 - ORAL APPLIANCES COMMONLY USED IN THE GENERAL DENTISTRY PRACTICE

Minimum Credits: 1

Maximum Credits: 1

To empower students to recommend, fabricate (or oversee fabrication), deliver, and follow-up with patients for several Oral Appliances that are common in daily General Dentistry Practice. Students will fabricate hard/soft nightguard and whitening trays. Fluoride trays, athletic mouth guards, snoring and sleep apnea appliances will also be discussed.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

RESTD 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in restorative dentistry.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

RESTD 5924 - ADVANCED COMPOSITE TECHNIQUES

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

RESTD 5941 - ADVANCED ENDODONTICS

Minimum Credits: 3

Maximum Credits: 3

This course includes lectures, seminars and clinical practice. The lectures include advanced techniques in instrumentation and obturation of endodontic treatment of complex cases. Endodontic surgery techniques are reviewed.

Academic Career: DMED

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Russian

RUSS 2104 - DEVELOPING ENHANCED RUSSIAN READING PROFICIENCY 1

Minimum Credits: 3

Maximum Credits: 3

Through guided intensive reading of authentic primary and secondary texts in Russian culture, enrolled graduate students will further develop their ability to read such texts comfortably and use them effectively in their academic and professional careers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

RUSS 2105 - DEVELOPING ENHANCED RUSSIAN READING PROFICIENCY 2

Minimum Credits: 3

Maximum Credits: 3

Through guided intensive reading of authentic primary and secondary texts in Russian culture, enrolled graduate students will further develop their ability to read such texts comfortably and use them effectively in their academic and professional careers. This is the second course in the sequence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

RUSS 2110 - INTRODUCTION TO THE STUDY OF LITERATURE 1

Minimum Credits: 3

Maximum Credits: 3

Open to all graduate students of literature. A certain emphasis will be placed on Russian literary history, criticism and theory but all readings will be available in Russian and English. Includes a variety of approaches to literature analyzed both in terms of historical perspective and underlying perceptions of human nature, and in terms of their methodological and theoretical contributions to the systematic study of literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Russian & East European Studies

RUSS 2111 - FOURTH-YEAR RUSSIAN 1

Minimum Credits: 3

Maximum Credits: 3

The course provides an extensive practice in oral communication at the advanced level. It includes discussions of readings on topics of general sociocultural interest, analysis of interviews with native speakers, and discussions of audio- and video-recordings. Home essays, oral presentations, and mock interviews are designed to emphasize students' management of the Russian discourse.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

RUSS 2112 - FOURTH-YEAR RUSSIAN 2

Minimum Credits: 3

Maximum Credits: 3

This proficiency-based and culture-based course provides extensive practice in oral and written communication at the advanced level for the students at the mid and high intermediate levels and higher. It is organized around a topic on the personal, community, national, or international interest that students will explore via readings, listening, and viewing activities. Students will improve their fluency and accuracy in conversational activities designed to strengthen their command of informal and formal Russian incorporating the presentational, interpersonal, and interpretive modes of communication. Students will also analyze and respond to culturally-relevant texts (both written and spoken) through the essay format, presentations, and/or digital projects.

RUSS 2210 - STRUCTURE OF RUSSIAN

Minimum Credits: 3

Maximum Credits: 3

Required of Russian teaching assistants, this course approaches Russian inflectional and derivational morphology from two points of view simultaneously: how to describe it linguistically, and how to describe it to an English speaking elementary learner of Russian. Finer points of Russian sound and word structure are examined. The concepts of basic linguistic analysis are elaborated on the example of Russian material. This course is preparatory for the departmental comprehensive examination section on descriptive Russian linguistics.

RUSS 2230 - HISTORICAL GRAMMAR

Minimum Credits: 3

Maximum Credits: 3

This course traces the history of Russian grammatical structure from its state in common Slavic to the present day, concentrating particularly on the development of the verbal and nominal inflectional systems, and on the phonological system. To the extent possible, the course traces dialectal differences among the East Slavic languages, and among the major dialects of Russian.

RUSS 2307 - ANTON CHEKHOV & WORLD LITERATURE

Minimum Credits: 3

Maximum Credits: 3

The course surveys Anton Chekhov's career as a playwright, short story writer, and a medical doctor in a rigorously articulated literary, critical, and

historical context. While contemplating Russian, Western, and global mythologies about the "Chekhovian" trend in literary production, the course places Chekhov's works in conversation with a range of literary and critical texts to investigate world literature as a comparative angle and a conceptual paradigm as well as to think about the aims and methods of humanistic knowledge making in the 21st century. Each time the course is offered a unique set of additional readings is drawn from a wide range of authors, including such writers as Samuel Beckett, David Bezmozgis, William Boyd, Raymond Carver, Fyodor Dostoevsky, Inua Ellams, William Faulkner, Mavis Gallant, Maksim Gorkii, Henrik Ibsen, Nikolai Leskov, Yiyun Li, Audre Lorde, Guy de Maupassant, Alice Munro, R. K. Narayan, Joyce Carol Oates, Lyudmila Petrushevskaya, Vladimir Sorokin, Lev Tolstoi, Reza de Wet, Eudora Welty, Oscar Wilde, Tennessee Williams, and Virginia Woolf, among others.

RUSS 2474 - NEOLIBERALISM AND CULTURAL PRODUCTION

Minimum Credits: 3

Maximum Credits: 3

We will examine this contested term as it circulates in debates about cultural practice since the late 1970s. Course segments are likely to include contrastive models of the concept; their ascribed affinities to Marxist and Weberian traditions; distinctive concepts ("shock doctrine," "thought collective," Comaroff's "occult"); key historical figures and institutions (Kojève, Polanyi, Schumpeter, Hayek, Mont Pelerin); and the term's contradictory symptoms under different ideological systems, such as post-socialist modernity. The intent is to move beyond two tendencies in current debates: 1.) The deployment of the term exclusively as moral judgment; and 2.) Its explanatory capacity for All the Things. Core texts will include Morowski, Harvey, and Klein, as well as critiques of Harvey (Abercrombie, Hindess). The course will ask participants to bring their fields of expertise (both regional and disciplinary) to these debates, situating their own departmental investments in relation not only to textual content, but also to production, distribution, and exhibition. While cinema (e.g. Jia Zhangke, Ken Loach, Aleksei Balabanov) may be a core cultural emphasis, the course welcomes contributions from the fields of art history, literature, music, as well as sociology, history, and anthropology.

RUSS 2638 - RUSSIAN AND SOVIET CINEMA 1896-1934: LUMIERE TO LENIN

Minimum Credits: 3

Maximum Credits: 3

Although the Russian film industry does not begin to take shape until Aleksandra Drankov's Sten'ka Razin (1907), moving images were first introduced to the Russian empire in May 1896, when the Lumiere brothers both screened the first films in the empire and arranged to shoot the first film footage in the country - the coronation of Tsar Nikolai II. The course will examine the history of the russo-soviet film from 1896 through the displacement of the cult of Lenin by Stalin's image in the late 1930s. Films to be screened include Chardynin's and Protazanov's adaptations of queen of spades (1910 and 1917), Bauer's the revolutionary (1917), room's bed and sofa (1927), Alexandrov's circus (1936), and Kalatozov's Chkalov (1941). Special emphasis will be placed on the work of the soviet directors associated with "soviet expressive realism": Kuleshov, Eisenstein, Pudovkin, Vertov, and Dovzhenko.

RUSS 2639 - SOVIET CINEMA 1934-1953: STALIN AT THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

The imposition in 1934 of socialist realism as the exclusive method available to soviet cultural producers and the release of the "Vasil'ev brothers", Chapaev later that year permanently transformed the soviet film industry. Stalin established total control of the industry both by appointing his personal representatives to control all stages of film production and by consolidating himself as "spectator number one," not only prescreening all films prior to their release, but eventually by establishing himself as a dominant presence on the silver screen. Films to be screened include Alexandrov's circus (1934), Kozintsev and Trauberg's "maxim trilogy" (1934-38), Dovzhenko's Aerograd (1935), Dzigan's we are from Kronstadt (1936), Rmm's Lenin in October (1937), Lukov's two soldiers (1943), Eisenstein's Alexander Nevsky (1938) and Ivan the terrible (1944-46), pyr'ev's cossacks of the Kuban (1949), and Chiaureli's trilogy devoted to comrade Stalin (1946, 1949, and 1951).

RUSS 2640 - POST STALINIST CINEMA

Minimum Credits: 3

Maximum Credits: 3

Stalin's death (1953) and the start of Khrushchev's destalinization campaign (1956) not only disrupted the stability of the pre-existing interdependence between the ruling political elite and the national film industry, but also fundamentally altered the interrelationship between the film industry and the Russo-Soviet viewing public. The course will examine the changes in this triangular model through the four major periods in Russo-Soviet history since the death of Stalin: 1953-64 (the thaw), 1964-1985 (stagnation), 1986-1991 (perestroika), and post-1991 (the re-emergence of the Russian national state). Films to be screened include Kalatozov's *The Cranes are Flying* (1957), Chukhrai's *Ballad of a Soldier* (1959), Tarkovskii's *Ivan's Childhood* (1962), Askol'Dov's *Commissar* (1967; 1987), Pichul's *Little Vera* (1988), Lungin's *Taxi Blues* (1990), Mikhalkov's *Burnt by the Sun* (1994), and Balabanov's *Cargo 200* (2007).

RUSS 2670 - COLD WAR AND ITS REVENANTS

Minimum Credits: 3

Maximum Credits: 3

This course will look at the Russo-Soviet cultures of the Cold War, both during its original four decades (1945-1985) and during its contested revisitation (arguably 2007-2022). Texts are likely to include policy and journalistic writings, short stories, films, postage stamps, television shows, photographs, maps, and posters, as well as holidays, art exhibits, film festivals, and commemorative practices. What is at stake in the contemporary debates about a "new cold war"? How would we claim to know and who benefits from this debate? Are we witnessing the redivision of space between two superpowers and three "worlds"? What new financial instruments shape the process this time round? The seminar welcomes students from diverse disciplines.

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2710 - CULT & CULT CINEMA

Minimum Credits: 3

Maximum Credits: 3

While "cult" is usually a term of religious opprobrium, "cult cinema" suggests the opposite: exaggerated enthusiasm for films that may-despite initial failure-gain long-lasting recognition. What defines the cult film? Its passionate audience? Its thematic transgression? Its exclusion from mainstream distribution (through censorship or ridicule)? Its circulation as a set of citations? Its exhibition practices? Its inscrutability? Its responsiveness to a social context? With screenings of US, British, Iranian, Russian, Armenian-Georgian, and French films, we will examine several theories of cult texts, with underlying curiosity about what the category could mean beyond cinema (in relation to painting, statuary, literature, and other cultural artifacts).

RUSS 2970 - TEACHING OF RUSSIAN

Minimum Credits: 3

Maximum Credits: 3

Teaching French, Italian, and Spanish supports the concept that instructional expertise is developed in and through practice-based projects, teaching experiences, and the study of the research evidence and theories on additional language learning. The course is designed for language teaching at the university level and is primarily intended for teaching assistants, although part time instructors may enroll in this class for credit. In the course, four major areas associated with contextualized instruction are presented: 1) situations and themes as context, 2) culture as context, 3) academic subject matter as context, and 4) literature as context. All assignments are project-based and include analytical and reflective reports on the students' own teaching and lesson development projects intended to be used and evaluated in actual foreign language classes. Teaching assistants and instructors in other language are welcome to register for the course but examples are primarily in Spanish, French, Italian, and English.

Course Requirements: PREQ: SWRES 2021 and SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWWEL 2056 - HEALTH SYSTEMS AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Building on a background knowledge in social welfare, this course focuses on issues and problems in the U.S. healthcare system including the historical development of health care, the structure and function of the healthcare system, current and proposed financing mechanisms and the social, political and ethical issues which shape healthcare policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Historical development of mental health policies and the structure of the mental health delivery system and the policies and legal base that guide it. Special emphasis is given to how policies affect the care of persons with chronic mental illness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2059 - CHILD AND FAMILY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions. It also deals with children in their problems of maturing, and the state of Pennsylvania's laws which deal with children. Each student is assigned to visit and report on a home, i.e. day care, emotionally disturbed, mentally retarded, foster care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2081 - SOCIAL WELFARE

Minimum Credits: 3

Maximum Credits: 3

The course focuses on the historical development of the field of social welfare including major legislation. Current issues of poverty and related problems, the health care delivery system, and criminal justice are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWWEL 2087 - ORGANIZATIONS AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Introduced as a new course in the COSA concentration in community practice, this seminar emphasizes and examines relationships between public policy and organizational behavior. Particularly attentive to the influence of political and economic variables on human service institutions. The course examines selected historical phenomena in order to better understand future prospects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: COSA (Social Work-MS)

SWWEL 3030 - EVAL OF AMERICAN SOCIAL WELFARE

Minimum Credits: 3

Maximum Credits: 3

Emphasizes a conceptual and analytical approach to the study of American social welfare. Extending from the Elizabethan poor laws to the 1930s new deal, and to the present, it deals with social welfare in relation to a number of central themes in American society, including the interaction

among the ideologies of individualism, voluntarism, and collectivism; the conflict between opportunity-mobility and security objectives; and the nature of the social reform and social control processes in a pluralistic society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Social Work students only.

SWWEL 3037 - SOCIAL POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a basic understanding of the dimensions of public social policy and the acquisition of the skill required to use a conceptual model to analyze policy. Particular attention is paid to the value and ideological dimensions of social welfare policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWWEL 3059 - CHILD AND FAMILY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWWEL 3060 - CHILD AND YOUTH POLICY

Minimum Credits: 3

Maximum Credits: 3

This course addresses key issues in child and youth policy through the critical analysis and application of social, cultural, philosophical, psychological, and biological theory. Starting from work of John Rawls, students will develop an understanding of various philosophical frameworks pertaining to issues of equality, distribution, and liberty and will use these principles to articulate a conception of social justice to guide child and youth policy. The class will then move to consider the role of psychological and biological theories and their relationship to and meaning for child and youth policy. Following this discussion, the class will turn to critical social and cultural theories and will debate the implications of these perspectives for the ways in which we think about and treat young people.

Social Work General

SWGEN 2005 - POVERTY AND INCOME INEQUALITY: SOCIAL RESPONSES

Minimum Credits: 3

Maximum Credits: 3

The course focuses on the nature and extent of poverty and income inequality in the United States including its causes and consequences as well as the resulting political and public policy debates and governmental efforts to combat it. The course provides a broad social science approach to understanding the intersection of gender, race, and class with poverty and income inequality. Competing theories of poverty are discussed and their relationship to different policies are assessed. The course continues with the analysis of a range of social policy debates and reform options that might further reduce poverty and income inequality. The course concludes with a discussion about the nature of social and economic justice and the role social workers and professional social work currently play and could play in taking a social action role to addressing poverty and income inequality

Academic Career: Graduate

SWGEN 2062 - ADVOCACY AND LOBBYING

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of how a nonprofit organization can engage in effective public policy advocacy and lobbying on behalf of its mission and the people it serves. Advocacy includes a broad range of activities, which attempt to influence a specific policy, legislative, regulatory or implementation outcome. Social workers play critical roles in the advocacy process, policy analysis, issue development, public education, constituency organizing, lobbying, voter engagement, and creating an entire advocacy campaign. This course will focus on the best practices to deepen your understanding of advocacy tools, processes, and models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 2080 - RACE AND SOCIAL PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

This course covers the history and evolution of the role of race in the economics, politics, media portrayals, educational systems, law enforcement, and overall social fabric of the United States. The course details historical eras and major mechanisms of racial oppression, including: slavery, reconstruction-era terror and voter disenfranchisement, 20th century economic policies, mass incarceration, and frames of political and social thought that have shaped and perpetuate the racial hierarchy of the US today. This course strives to help students understand why we see the current racial inequalities that we do in the contemporary US, particularly given the rich civic and cultural histories of West African and Native American societies. It also challenges students to develop ways to address racial injustices where they exist. Enrollment preference is given to social work students, but registrants from across the university are welcome with approval of the instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2088 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Given the changing nature of social work practice and social welfare policy, the MSW program occasionally offers courses in new and/or unique content. When offered, this course is designed to provide skill and knowledge content not covered in other MSW courses.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWGEN 2097 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

A student-initiated educational experience, guided by a faculty member that significantly supplements the social work curriculum and conforms to academic course content expectations.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to serve as foundation for specialization by providing students with the knowledge, values, and skills needed to engage in the generalist practice of social work. Professional social work activity related to various social problems (poverty, racism, sexism), system size (individual, family, group, organization, community, society), and locations of practice (host setting, the urban environment, for example) will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 2099 - GENERALIST FIELDWORK

Minimum Credits: 1

Maximum Credits: 6

This practicum will provide students with opportunities to develop an awareness of self in process of intervention; gain experience in application of knowledge, value and ethics, and practice skills; use oral and written communication consistent with language of the profession; and use professional supervision to enhance learning.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: CREQ: SWGEN 2098

SWGEN 3025 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

A doctoral course in which the student defines the topic area and obtains approval for it from a member of the faculty who serves as his/her mentor.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWGEN 3039 - COMPREHENSIVE STUDY

Minimum Credits: 1

Maximum Credits: 9

This would be limited to students who have completed all courses but have not yet passed the exam, or have two or fewer courses to take and need to be full-time. Students may register for up to nine credits, and may register twice at most. The advisor will serve as faculty of record.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

SWGEN 3044 - THEORY 1

Minimum Credits: 3

Maximum Credits: 3

The general issues involved in applicability of social science theory provides a framework for an exploration of selected social psychological theories. Concepts from role theory, interrelated with socialization and behavioral theories, are presented and analyzed. Students will then apply selected theoretical concepts to a social problem area of their choice, in order to assess the theory's contribution to an understanding of the problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWGEN 3053 - THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This course covers macro social science perspectives relevant to social work: economic, organizational and social control aspects of society. Classical theories (Marx, Weber, and Durkheim) are studied and applied to particular social problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWGEN 3066 - SEMINAR IN SOCIAL WORK EDUCATION

Minimum Credits: 3

Maximum Credits: 3

History of social work education, accreditation, and design of foundation curriculum. Selecting educational objectives, teaching methods, evaluation of student performance, and careers in social work education.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 3088 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

The Ph.D. program occasionally offers courses/seminars on research, theory, and/or policy in specific substantive areas. These are areas in which there is significant current research and practice energy that extends beyond the regular curriculum. Typically, these offerings reflect the research and scholarship program of the faculty sponsor.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

Social Work Research

SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is the second level, required research course for all COSA students. Examination of variables which influence organizational development and maintenance, adaptation and change, integration and innovation, and goal setting and planning will provide the focus for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWCOSA 2099; SBPLAN: COSA (Social Work-MS)

SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize students with the basic elements of research and their implication for social work practice. Students will gain knowledge of the various components of research methodology, including the formulation of a researchable question, strategies of research design, questionnaire construction, and data analysis and interpretation. Lab sessions will allow students to develop their skills in the various topics covered in lecture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 2023 - DIRECTED STUDY IN RESEARCH

Minimum Credits: 3

Maximum Credits: 3

A supervised experience in designing, implementing, and reporting an individually defined empirical research project. This course provides research experience for advanced research students.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWRES 2033 - EVALUATIVE RESEARCH SOCL SERVS

Minimum Credits: 3

Maximum Credits: 3

This course explores major issues and knowledge needed for evaluating the effects of social programs. Links to practice issues of accountability, program monitoring, and program planning will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2045 - QUALITATIVE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to selected methods of qualitative research. These methods are applicable to investigating questions which arise in social work practice situations and can be used to evaluate interpersonal practice. Qualitative designs, data acquisition strategies, and analytic techniques, including the use of computers, will be examined through both formal descriptions and studies that exemplify their use.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2047 - COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students primarily focused on community organizing who want to better understand theories, principles and methods of applied, action research with communities and community partners, as well as how Community-based Participatory Research (CBPR) is used in community planning and organizing to address local issues and social needs. This course is proposed to be coordinated with COSA field placements in the east end of Pittsburgh, especially Homewood, and will serve as an integrated field seminar for these students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2051 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course examines the feasibility of using single-subject methodology to evaluate effectiveness in social work practice. Single-subject research designs are examined in terms of self-monitoring and external monitoring approaches. Different social work contexts are illustrated in order to demonstrate contextual situations to which single-subject designs may be applied. Each student is expected to carry out a self-monitoring project or use single-subject research in work with a client.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 3020 - RESEARCH METHODS 1

Minimum Credits: 3

Maximum Credits: 3

Basic design issues are explored and related to specific survey research skills, such as sampling, questionnaire construction, and measurement, issues, and data collection. Alternative research designs will also be explored. The relationship of research design and methods of casual inference will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 3021 - MULTIVARIATE ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

A class research project will be designed and implemented. Alternative data analysis strategies will be learned and applied to the project data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

Research Capstone 1 involves instruction in the developmental process and refining of a research question and conceptualization attached to (1) data collected as part of the students' GSA experience, or (2) secondary data available to the student. If neither of these sources of data is relevant, the student should register for 2-3 credits of directed study to enable the collection of new data that will be the basis for later data analysis and manuscript preparation to be conducted in research capstone 2 (SWRES 3023, 3 credits, Spring term). The Capstone 1 experience involves implementation of skills in the preparation and writing of an introduction section for an APA-style empirical research paper. The end product for this term is a well-written introduction for the study that will be completed in the Capstone 2 course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2

Minimum Credits: 3
Maximum Credits: 3

In the Spring term of the capstone sequence, the student will complete the data analysis and write the method, results, and discussion sections of the manuscript. Included in this will be instruction in the preparation of tables and figures in APA style and format. Some lecture time may be devoted to statistical and psychometric procedures. Some instruction will be individualized to address the specific methodological and analytic issues raised within each student's study purpose. Each section of the manuscript will be reviewed and evaluated with feedback guiding subsequent drafts resulting in a submission-ready paper. The goal of Capstone 2 is to have a final paper ready for submission to a peer-review journal by the end of the term.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3024 - DIRECTED STUDY-RESEARCH PRACTCM

Minimum Credits: 3
Maximum Credits: 3

Provides students an opportunity to work with faculty on research projects carrying out specific research skills leading to publication of findings.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWRES 3029 - INFERNTL STAT SOCL WORKERS

Minimum Credits: 3
Maximum Credits: 3

This course deals with bivariate statistical procedures (e.g. t-tests, one-way analysis of variance, correlation and regression) applied to social work and social research problems. Solutions to the research/statistical problems are achieved by use of both mainframe computer (primarily SPSSX) and microcomputer programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3040 - DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 9

The doctoral dissertation represents a new, creative effort at a level higher than that expected in the competency paper. A doctoral student may register for dissertation research credits after successful completion of the competency, during any semester in which he/she is working on a dissertation and has completed course requirements.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Sociology

SOC 2035 - RACE & ETHNICITY

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to race and ethnicity. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2036 - BODY AND SOCIETY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

SOC 2101 - SOCIOLOGICAL THEORY CLASSICAL

Minimum Credits: 3

Maximum Credits: 3

The course provides an opportunity for in-depth study of selected writings of Karl Marx, Max Weber, Emile Durkheim and at least one other of the "classical originators" of the sociological discipline (Georg Simmel or Alexis de Tocqueville, for example). With appropriate flexibility depending on the "fourth figure" selected, the primary issues chosen for comparative examination are conceptions of the nature of knowledge, modes of theoretical reasoning, and principal substantive concerns addressed by these writers over the course of their lives.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2102 - SOCIOLOGICAL THEORY POST CLASSICAL

Minimum Credits: 3

Maximum Credits: 3

This course surveys the major works of post-classical and contemporary sociological theory. These are discussed from the standpoint of how they built upon, revised and extended the classics and how they are relevant to us today. Relevant selections from classical sociological theory are also covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2201 - INTRODUCTION TO SOCIAL STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to social statistics. Topics include descriptive statistics, frequency distributions, hypothesis tests, bivariate associations, and data visualization. This course emphasizes the application of statistics to the social sciences and requires no prior knowledge of statistics. Students will leave the course with a broader understanding of how statistics can be utilized in social scientific research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2202 - QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Complementing courses on qualitative methods, computer methods and statistics, this course will provide an overview of quantitative research

methods in the social sciences. Topics will include specification of research able questions, experimental and quasi-experimental research designs, and will concentrate on survey research issues such as sampling, measurement, questionnaire construction and item writing, and collection and organization of data. The issues will be illustrated by sociological literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2203 - QUALITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the methods of qualitative social inquiry. Students study specific qualitative techniques, such as the interview. Participant observation, analysis of documents, and unstructured observation, problems of doing research in natural settings are also considered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2204 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course studies the set of statistical methods called regression analysis. It solidifies and extends students quantitative and statistical data analysis skills. The course focuses primarily on linear regression, including modeling techniques for continuous, binary, ordinal, and count data. Students will leave the course with the tools necessary to analyze a variety of social science data. This course assumes some knowledge of statistics (descriptive statistics, frequency distributions, hypothesis tests, and bivariate associations). To register, students must have taken Introduction to Social Statistics (SOC 2201) or an equivalent class.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2205 - RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

Sociology uses many forms of research methods. These range from large scale quantitative surveys to in depth qualitative participant observation studies. Designing a research project involves selecting methods appropriate for the research problem, taking account of resources, what is already known, and other factors. This course will cover the conceptual, philosophical, and technical issues that sociologists must deal with to design a research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2251 - THEORIES OF GENDER AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of important tendencies and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship as well as foundational readings. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines (including anthropology, history, law, economics, philosophy, and literary studies) and sampling a range of methodologies, this course will work through some of the key movements and problems that have shaped and continue to shape contemporary thinking about gender and sexuality. Readings are likely to include works by Lila Abu-Lughod, Judith Butler, Nancy Chodorow, Patricia Hill Collins, R.W. Connell, Michel Foucault, Nancy Fraser, Linda Gordon, Judith Halberstam, Chandra Mohanty, Uma Narayan, and Joan Scott.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Attributes: Gender, Sexuality & Women's St

SOC 2301 - ENVIRONMENTAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course seeks an understanding of the evolution of human societies in their physical environments and resource bases. The ways in which humans use energy and matter is crucial. The time frame for the course is that of human history. Harsh and benign environments will be considered as well as the rise and fall of civilizations. Throughout, the role of technology will be kept central in an understanding of the interface between a society and its environment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2303 - POLITICAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The variety of political arrangements in the twenty-first century presents a number of puzzles that will make up the subject matter of this course. Are differing forms of government to be explained by levels of economic development, institutional histories, the actions of social movements, transnational constraints or slow-changing national political cultures? Is the state an autonomous actor or the creature of other social forces? Is "legitimacy" a useful concept? Why has it been difficult to agree on what "democracy" is? Are regime changes consequences of some sort of "structural" change, effective actions by regime opponents, or simply consequences of rulers' blunders?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Russian & East European Studies

SOC 2306 - SOCIOLOGY OF REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

An inquiry into various theories, frameworks and models elaborated by social scientists to explain the origins, dynamics and outcomes of this most complex matrix of social change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies, Russian & East European Studies

SOC 2309 - CULTURE AND POWER

Minimum Credits: 3

Maximum Credits: 3

This graduate seminar will explore the power of culture and the culture of power through different theoretical perspectives. We are especially interested in issues of cultural resistance, transformation, domination, hierarchy, and colonialism. We will also explore how culture and power shape collective and individual identities especially in societies undergoing radical transition. Our discussion will include cases from Japan, India, Germany, England, and others.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2311 - POLITICS AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to politics and culture. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2314 - SOCIOLOGY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

SOC 2341 - SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements, their development over time and what changes, if any, are brought about to the social system in which the movements occurred.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Russian & East European Studies

SOC 2342 - CULTURAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course involves discussion of the main trends in the sociological consideration of systems and patterns of beliefs, values and symbols and the social vehicles in terms of which culture is produced, sustained and interrupted. It is particularly concerned with the theoretical issue of the place of culture in sociological analysis, on the one hand, and interpretations of contemporary cultural phenomena, on the other. Thus the course has both theoretical and empirical components.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2350 - GENDER AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Gender, Sexuality & Women's St

SOC 2402 - ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to organizations. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2403 - KNOWLEDGE AND SOCIETY: SEX, GENDER, SEXUALITY, AND THE BRAIN SCIENCES

Minimum Credits: 3

Maximum Credits: 3

This course surveys scientific theories of biological sex, sex/gender/sexual difference, and their intersections with feminist and queer approaches to gender and sexual diversity, with specific application to the biomedical and behavioral brain sciences. We will attend closely to the interplay of diverse bodies, scientific approaches, and social institutions with regards to concepts, methods, theories, and empirical findings. In addition to some historical background, we will explore debates over sex/gender and sexual differences and diversity as conceived, discovered, imaged, explained, and treated in late-20th and early-21st century neurosciences and their discontents.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2432 - GENDER EQUALITY AND THE UNITED NATIONS

Minimum Credits: 1.5

Maximum Credits: 1.5

In this year-long transdisciplinary course, students will collaborate directly with the United Nations Development Program (UNDP) and other partner institutions on policy-relevant research on gender inequality in public institutions worldwide. Students will develop their skills in data collection, analysis, and reporting. Students' research will feed into an ongoing Pitt-UNDP collaboration and support gender equality as part of the United Nations 2030 Agenda for Sustainable Development. Students will have professional opportunities to interact with policymakers and practitioners at international and national levels, and are expected to present their research at the UN Secretariat in New York City during the spring semester. This course operates in conjunction with an internship program that places select students as junior researchers in partner institutions during the summer following the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Gender, Sexuality & Women's St

SOC 2465 - SOCIOLOGY OF GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline that portrays human society as a nested collection of interdependent societies. In particular, the course draws from world-systems analysis, world society, and other relevant approaches as well as from related disciplines such as anthropology, geography, and political science to consider how the 'development project' of the 20th century has evolved over time. The impacts of global economic integration on cultural and institutional change, gender relations, inequality, climate change, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how globalization and global institutions like the world bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2902 - DIRECTED STUDY FOR MA STUDENTS

Minimum Credits: 1

Maximum Credits: 12

Registration is limited to students in good academic standing who wish to study or carry out a project in an area not normally available in a regular course. The work must be under the direct supervision of a faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

SOC 2971 - GRADUATE WRITING FOR PUBLICATION

Minimum Credits: 3

Maximum Credits: 3

This graduate course will focus on practical advice for successfully turning master's thesis, seminar papers, and dissertations into journal articles and books. Students enrolled in the course will learn skills for writing and revision and gain understanding of the publishing process for academic journals and presses, as well as ideas for developing a successful work process and setting achievable writing goals. Course will be organized to allow students to work intensively on a writing project, with the goal of having a publishable article or manuscript by end of term.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology(MA)

SOC 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

All graduate study not under the direct supervision of a specific faculty member. Especially intended for those who must be registered to fulfill TA/TF requirements but no longer need formal course work. Must be approved by the student's formally validated committee chairperson at the time of registration.

SOC 3291 - TOPICS IN POLITICS AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course explores selected topics in politics and culture. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 3292 - TRADITIONS AND SOCIAL CHANGE

Minimum Credits: 3

Maximum Credits: 3

The course explores one of the least explored areas of social theory, namely the idea of "tradition" from a global and comparative perspective. It combines both theoretical and empirical materials from different societies and different time periods. It asks questions about how dynamics of social

changes are affected by specific traditions; the extent to which traditions are real or imagined social realities; how "traditional" people debate their own traditions; the factors that make something new appear tolerable; and the way by which trajectories of social change are affected by various traditions. The goal is to contribute to a comparative global understanding of modernization processes, as well as explore factors that are tied to what we call novelty, creativity, and innovation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 3391 - TOPICS IN SOCIOLOGY OF CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course explores selected topics in sociology of culture. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 3398 - TOPICS IN SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

The specific content of this course will vary from term to term. This course will focus on intensive study of important areas of social movement research and theory. Examples of such content are strategic action in social movements; the structure-agency debate in social movements; new theorizing in social movements; gender and social movements; and race and social movements. Background requirements, if any, will be announced with each offering of the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

SOC 3400 - QUANTITATIVE ANALYSIS FOR PUBLICATION

Minimum Credits: 3

Maximum Credits: 3

This course is a research practicum, where students work intensively on a research project using quantitative methods. Students may enter the class with their own research question and data to analyze, or they may work with other students and/or the instructor on a collaborative project. This course is designed to advance students' skills in research design, data analysis, and writing up quantitative results. The course goal is for students to develop a sole- or co-authored manuscript for publication.

Minimum Credits: 1
Maximum Credits: 12

Registration is limited to students in good academic standing who wish to study or carry out a project in an area not normally available in a regular course. The work must be under the directed supervision of a faculty member. The student is required to fill out departmental form outlining the study program and have it approved by the appropriate faculty person.

Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

SOC 3903 - CMPRHNSV EXAMINATION PREPARATION

Minimum Credits: 1
Maximum Credits: 6

Comprehensive examination preparation.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

Spanish

SPAN 2224 - SPECIAL TOPICS IN CULTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course allows students to do in-depth research in various aspects of contemporary culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2225 - SEMINAR:SPECIAL TOPICS CULTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the opportunity to do in depth research in various aspects of contemporary culture and to present it both orally and in written form.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2226 - READINGS IN CRITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/ knowledge, desire and the subject.

Each year a different area or topic is chosen.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Global Studies, Latin American Studies, West European Studies

SPAN 2300 - PROFESSIONAL WRITING: PROSPECTUS, PAPERS, GRANTS

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on the formulation of individual research problems in preparation for thesis research. Course requirements center around the development of a dissertation prospectus, and will include research design, review of area and theoretical literature, and significance of the proposed project. Additionally, the preparation of conference papers and articles for publication, as well as how to prepare grant proposals for funding agencies will be explored

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2307 - METHODS OF TEACHING SPANISH

Minimum Credits: 3

Maximum Credits: 3

Teaching French, Italian, and Spanish supports the concept that instructional expertise is developed in and through practice-based projects, teaching experiences, and the study of the research evidence and theories on additional language learning. The course is designed for language teaching at the university level and is primarily intended for teaching assistants, although part time instructors may enroll in this class for credit. In the course, four major areas associated with contextualized instruction are presented: 1) situations and themes as context, 2) culture as context, 3) academic subject matter as context, and 4) literature as context. All assignments are project-based and include analytical and reflective reports on the students' own teaching and lesson development projects intended to be used and evaluated in actual foreign language classes. Teaching assistants and instructors in

other language are welcome to register for the course but examples are primarily in Spanish, French, Italian, and English.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2404 - PRE-COLUMBIAN TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with specific topics on various aspects of the Mayan, Aztec and Quechuan cultures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2410 - DISCOVERY AND CONQUEST

Minimum Credits: 3

Maximum Credits: 3

This course offers an introductory survey of the Spanish and Latin American literature of the sixteenth and early seventeenth centuries through some of the main texts of the period.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2422 - COLONIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the basic texts of the Cronistas and other writers of the Colonia, concentrating on an in-depth study of their ideological points of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2428 - LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with various topics ranging from romanticism to positivism to modernism, in an attempt to develop a concept of the changing cultural and economic climates in which literature was produced in the second half of the nineteenth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2429 - SEM LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This seminar offers students the opportunity to do original research in the various areas of romanticism, positivism and modernism, in an attempt to develop a better understanding of the various ideological currents in which Latin American literature developed in the second half of the nineteenth century.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2445 - SEMINAR: VANGUARD

Minimum Credits: 3

Maximum Credits: 3

This course offers students the opportunity to do research in various aspects of vanguard literature and thought.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2450 - CONTEM LATIN AMERICAN NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This course deals with Latin American narrative since 1945, treating in depth the narrative production of the boom and the post-boom periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2452 - CONTEM LATIN AMERICAN FILM

Minimum Credits: 3

Maximum Credits: 3

This course surveys a representative sampling of recent Latin American film, primarily feature films made for commercial distribution, but also socio-political documentary.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Film Studies

SPAN 2460 - LATIN AMERICAN DRAMA

Minimum Credits: 3

Maximum Credits: 3

This course studies representative examples of contemporary Latin American drama from a literary as well as a sociocultural point of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2461 - LATIN AMERICAN NOVEL

Minimum Credits: 3

Maximum Credits: 3

This course deals with the theory and development of the novel as seen through various exemplary texts of several periods, with emphasis on the boom and post-boom periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2462 - LATIN AMERICAN POETRY

Minimum Credits: 3

Maximum Credits: 3

This course will deal with representative contemporary poets of various Latin American countries as well as specific movements and tendencies of the twentieth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2463 - LATIN AMERICAN SHORT STORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the origins and development of the short story in Latin American literature through the analysis of selected texts from romanticism to the post boom.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2464 - LATIN AMERICAN 20THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course will deal with specific topics of contemporary Latin American culture, using primarily literary but also other types of texts, including periodicals, film and television productions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies

SPAN 2465 - SEMINAR: 20TH CENTURY TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course will allow students to do research in topics of interest to them, involving primarily literary texts but not necessarily restricted to these types of documents.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2585 - BEYOND THE REVOLUTION: ARTS, LITERATURE AND PERFORMANCE IN POST-REVOLUTIONARY CUBA 1959-PRESENT

Minimum Credits: 3

Maximum Credits: 3

This course will analyze the development of the Cuban cultural field under the Revolution's socio-political project. The analysis will focus on the dialogue established between fundamental literary texts, visual art, and performance, and the specific historical circumstances.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2634 - BAROQUE TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals in-depth with various Baroque topics and builds on a prior survey of baroque literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Attributes: Latin American Studies, West European Studies

SPAN 2635 - SEMINAR: BAROQUE

Minimum Credits: 3

Maximum Credits: 3

This seminar deals in-depth with various Baroque topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2657 - 19TH CENTURY TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with various nineteenth century topics, including romanticism, positivism and early modernism, with special emphasis on national and continental movements and tendencies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2695 - SEMINAR: 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This seminar deals in depth with various topics of the literature and culture of the Franco and post-Franco periods.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2704 - SPEC TOPICS LITERARY CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This course deals with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2705 - SEMINAR: LITERARY CRITICISM

Minimum Credits: 3

Maximum Credits: 3

This seminar deals in-depth with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2902 - MA DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

SPAN 2910 - COMPREHENSIVE EXAMINATION MA

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students taking the ma comprehensive/Ph.D. preliminary examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

SPAN 2950 - SPANISH TEACHING PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This practicum provides graduate students in the department of Hispanic languages and literatures the opportunity to gain teaching experience at another institution of education. In addition to teaching, the student will evaluate the approach/method used at the institution in question and meet at regular intervals with the Spanish language coordinator at the University of Pittsburgh to discuss his/her experiences and observations.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

SPAN 2990 - MA COMPREHENSIVE INDEPENDENT

Minimum Credits: 1

Maximum Credits: 3

Students work independently on projects or areas of their own definition in preparation for the ma comprehensive examination and the PhD preliminary examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Attributes: West European Studies

SPAN 3000 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 12

Students work individually under the guidance of their dissertation director in preparation for and during the writing of the dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Attributes: West European Studies

SPAN 3902 - PHD DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

SPAN 3905 - TEACHING APPRENTICESHIP

Minimum Credits: 1

Maximum Credits: 12

Available to Ph.D. students who will work with a faculty member in teaching an upper level literature, language or civilization course.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

SPAN 3910 - COMPREHENSIVE EXAMINATION, PH.D

Minimum Credits: 1

Maximum Credits: 6

This course is intended for Ph.D. candidates the term they present themselves for their Ph.D. comprehensive examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Attributes: West European Studies

SPAN 3990 - PHD INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work independently on projects or areas of their own definition to develop their dissertation topic and in preparation for the dissertation overview.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Attributes: West European Studies

Statistics

STAT 0200 - BASIC APPLIED STATISTICS

Minimum Credits: 4

Maximum Credits: 4

This course teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression the analysis of variance, and contingency tables. Students will learn how to use a statistical computer package.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1000 - APPLIED STATISTICAL METHODS

Minimum Credits: 4

Maximum Credits: 4

This course is an intensive introduction to statistical methods. It is designed for students who want to do data analysis and to study further ideas in applied statistics beyond this course. The topics covered include descriptive statistics, elementary probability, random sampling, controlled experiments, hypothesis testing, regression and the analysis of variance. Emphasis will be placed on the statistical reasoning underlying the methods. Students will also become proficient at the use of a statistical software package.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1151 - INTRODUCTION TO PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course presents at both a theoretical and applied level the basic probability concepts required for statistical inference. Topics include set theory and basic probability, independence and Bayes' theorem, discrete random variables and their distributions--Bernoulli, Binomial, Poisson, and geometric, continuous random variables and their distributions--uniform, exponential, gamma, beta, and normal, transformation of random variables, moment and moment generating functions, multivariate discrete distribution, marginal and conditional distribution and independent variables.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0235 or 0240 or 0245

STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the elementary concepts of statistical inference. Topics include functions of random variable, sampling distributions, decision criterion, estimation, hypothesis testing, regression, analysis of variance, and non-parametric methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151

STAT 2001 - RESEARCH AND THESIS FOR MS DEGREE

Minimum Credits: 1

Maximum Credits: 6

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

STAT 2020 - TEACHING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

STAT 2131 - APPLIED STATISTICAL METHODS 1

Minimum Credits: 3

Maximum Credits: 3

This introductory graduate level course on applied statistics covers a wide variety of problems. We begin with simple data description and go on to standard estimation and testing problems. We then study various types of linear models. We make extensive use of the computer; the student will learn BMDP and Minitab.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2132 - APPLIED STATISTICAL METHODS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of STAT 2131.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2131

STAT 2200 - APPLIED NONPARAMETRIC STATISTICS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course will be to prepare students to use standard nonparametric tests for problems that frequently occur in applications. The Wilcoxon, Fisher (sign), Ansari-Bradley, Miller (jackknife), Kruskal-Wallis, Kendall, and Kolmogorov-Smirnov tests will be discussed. Minitab subroutines will be used to facilitate computation. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2210 - APPLIED CATEGORICAL DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide contingency table techniques for research workers in the social sciences, medical sciences and other areas where it is necessary to investigate relationships between qualitative variables. Course deals with the Chi-square test and standard 2x2 and RXC contingency tables, as well as log-linear and other special types of contingency tables analysis. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2220 - APPLIED REGRESSION

Minimum Credits: 3

Maximum Credits: 3

This course covers simple linear regression (one variable) and one way analysis of variance followed by more complicated regression models. More complex ANOVA models are treated if time permits. Some computer applications will usually be considered. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with statistical methods for describing and analyzing multivariate data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2240 - APPLIED SAMPLING

Minimum Credits: 3

Maximum Credits: 3

This course considers basic applied principles and approaches for conducting a sample survey. The following will be discussed: how to design a

survey, how to analyze a survey with attention paid to different types of survey techniques and corresponding statistical methods. The course will provide survey skills for the social sciences, psychology, economics, marketing and management, and health sciences. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

STAT 2250 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course teaches students to design valid statistical experiments and to analyze them. Among the designs considered are: completely randomized designs, randomized block designs, Latin lemmas, factorial designs, and complete block designs. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 2250 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course is involved with statistical methods for quality and process control. It is intended for all students who will use statistics in an industrial setting. Introductory topics include probability models and statistical estimation for quality. The main focus will be on control charts and tolerances. Acceptance sampling will also be discussed. A final but quite important topic will be Taguchi methods. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2260 - PRINCIPLES OF DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to data science. Data science is an emerging interdisciplinary field stemming from statistics, mathematics and computer science. At its core, data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. The objective of this course is to provide students with a principled introduction to data science that properly combines inferential thinking and computational thinking. Students will learn the fundamental pipeline of data science, ranging from data acquisition, data clean-up, data exploration and visualization, modeling and inference, to professional reporting.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Graduate students in statistics or applied statistics.

STAT 2261 - SURVIVAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to cover the design and analysis of clinical trials.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2270 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is a collection of tools to discover patterns and relationships in data, often large observational databases. This course covers some of the main methods of data mining.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2280 - DATA SCIENCE WITH PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to the field of data science and machine learning. You will learn how to import data, tidy and transform it, visualize it, and how to join data sets. You will also learn about training, tuning, and testing various machine learning models, and ultimately generating reproducible reports. Python as well as a collection of powerful, open-source tools will be explored and experienced within the context of solving data science problems: Jupyter notebook (creating reports) numpy (data structure) pandas (data wrangling) matplotlib (data visualization) scikit-learn (machine learning) ; Learning Objectives Workflow of Data Science Data Wrangling and Visualization Machine Learning Models Python and Jupyter Notebook By the end of the course, you should be able to get the data, explore it, formulate a research question, use tools and techniques in data science to explore the answer to the question, and share your findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

STAT 2292 - TOPICS IN APPLIED STATISTICS 3

Minimum Credits: 3

Maximum Credits: 3

Various topics concerning the applications of statistics will be taught on an irregular basis depending on faculty interests and students' needs. Example of possible topics include re-sampling techniques in statistics; statistical graphics; cluster analysis; and classification methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2293 - TOPICS IN APPLIED STATISTICS 4

Minimum Credits: 3

Maximum Credits: 3

This course is a gentle introduction to the field of data science and machine learning. Major topics include data import, data wrangling, data visualization, training, tuning, and testing various machine learning models, and generating reproducible reports. Python basics and a collection of packages, such as Jupyter Notebook, NumPy, Pandas, Matplotlib, and Scikit-Learn, will be studied within the context of solving data science problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

STAT 2300 - STATISTICAL PACKAGES

Minimum Credits: 3

Maximum Credits: 3

This course will cover a variety of topics concerning computing and statistics. Basic statistical analysis packages such as BMPD, SPSS, Minitab, and IMSL will be discussed and compared. Other computational issues that will be discussed include simulation, graphics, elementary database management, and certain stand-alone statistical programs. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2301 - STATISTICAL COMPUTING AND INTRODUCTION TO DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the basics of statistical programming. Students will be introduced to basic machine learning topics as well as the basics of optimization. Examples from data science will be used throughout the course for demonstration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2310 - APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

We start with the basic concepts of regression and correlation. After developing the necessary linear algebra, we will study the multivariate normal and then go on to do one or more of the following: cluster analysis, discriminant analysis, directional data, and factor analysis. We will make use of the Minitab and BMDP computer packages. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2320 - APPLIED TIME SERIES

Minimum Credits: 3

Maximum Credits: 3

The objective of the course is to present at the elementary level, a unified and reasonably complete exposition of statistical methods used in time series analysis. Serious consideration is given to both time and frequency domain approaches. Real data from a number of subject fields will be analyzed as they occur in the exposition. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2220

STAT 2321 - APPLIED ADVANCED TIME SERIES

Minimum Credits: 3

Maximum Credits: 3

This course is an attempt to provide a uniform coverage of both time domain and frequency domain time series methods which can be easily understood by students with varied backgrounds.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2360 - STATISTICAL LEARNING AND DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide a broad introduction to the field of data science and to expose students to many of the statistical tools most commonly used by modern data scientists. We will explore a wide variety of models and algorithms in a data-driven fashion. Topics will include modeling techniques ranging from classic statistical modeling (e.g. linear and logistic regression) to modern statistical learning (e.g. regularization and lasso) to fundamental machine learning (e.g. random forests and support vector machines). Particular attention will be given to the sorts of scientific questions that can be asked and answered within the different frameworks. Students will have the opportunity to utilize modern, interesting datasets to both provide data-driven analytical solutions and also to formally assess the uncertainty in making such determinations. The R language will be used extensively for statistical computing. Some prior knowledge or experience with R or related programming languages is helpful but not essential.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2381 - SUPERVISED STATISTICAL CONSULTING

Minimum Credits: 1
Maximum Credits: 6

In this course students will consult with clients in the consulting center. The consulting will be under the supervision of experienced consultants. Students will be taught how to provide statistical methods in conjunction with real problems and how to analyze and report the results.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2132

STAT 2391 - ADVANCES IN APPLIED STATISTICS 1

Minimum Credits: 3
Maximum Credits: 3

Foundations as well as recent developments in applied statistics will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2392 - ADVANCES IN APPLIED STATISTICS 2

Minimum Credits: 3
Maximum Credits: 3

Foundations as well as recent developments in applied statistics will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2521 - TIME SERIES 1

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the theoretical aspects of time series analysis. In this course we discuss the probabilistic foundations of time series in both the time and frequency domains. Students should have a strong background in mathematical statistics, but the course does not assume a prior knowledge of time series analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2611 - THEORY OF MULTIVARIATE ANALYSIS 1

Minimum Credits: 3
Maximum Credits: 3

This course covers both classical and modern theoretical developments in multivariate statistical analysis. Topics include multivariate distributions, estimation, testing, classification, principal components, correlation analysis, dimensionality reduction, and factor analysis. Time permitting, statistics on manifolds and other special topics will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2131 and 2132 and STAT 2631

STAT 2630 - INTERMEDIATE PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is the first half of a two term sequence in mathematical statistics intended for undergraduate students and graduate applied statistics majors. Topics to be covered include probability concepts, random variable, discrete and continuous variables, joint distributions, functions of random variables, and some sampling distributions

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2631 - THEORY OF STATISTICS 1

Minimum Credits: 3

Maximum Credits: 3

This is an introductory graduate course in the theory of statistical estimation. The following topics will be covered. The use of orthogonal transformations in statistical distribution theory, distribution of quadratic forms, the theory of linear estimation, the general theory of estimation and estimation from a decision theoretic point of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL

Minimum Credits: 3

Maximum Credits: 3

This course is the second half of a two term course. Topics to be covered include estimation, inference, linear models, and an introduction to bayesian estimation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

A careful study of some standard asymptotic techniques in statistics and their modern refinements. Topics include stochastic convergence, delta method, M-estimators, contiguity, local asymptotic normality, concepts of efficiency, projection and U-statistics, likelihood ratio tests, bootstrap, Bayes procedures along with some empirical process methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2650 - INTRODUCTION TO BAYESIAN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course will give an introduction to Bayesian statistics. Topics to be covered include prior and posterior distributions, multi-level models, model checking and selection, stochastic simulation by Markov Chain Monte Carlo.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2651 - BAYESIAN ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Introduction to the foundations of Bayesian inference, its practical applications in diverse areas, and the computational algorithms developed for the Bayesian inference.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2660 - LINEAR REGRESSION

Minimum Credits: 3

Maximum Credits: 3

The topics to be covered include: fitting a straight line, examination of residuals, two independent variables, polynomial models, selection procedures, and model building.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2661 - LINEAR MODELS THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course will follow a co-ordinate free approach to the general linear model. As much as possible proofs will be done from a geometric perspective. Topics include matrix theory for statistics, estimation, hypothesis testing, distribution theory, generalized inverses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2691 - NONPARAMETRIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the statistical analysis of data when no parametric assumptions are made.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2711 - PROBABILITY THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course begins with an introduction to Lebesgue integral. Then distribution functions, probability measures and random variables are introduced. Convergence concepts and topics from the laws of large numbers and random series are also covered.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2631

STAT 3611 - TOPICS MULTIVARIATE ANALYSIS 1

Minimum Credits: 3

Maximum Credits: 3

An introduction to biological 'omic' data and data analysis. We will consider SNP, bulk and single cell RNAseq, DNA methylation, microbiome, and metabolomic data. Statistical topics will include high dimensional factor analysis, multiple hypothesis testing, empirical Bayes, adjusting for latent confounds, missing data, and biological networks, among others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 3691 - TOPICS IN ADVANCED STATISTICS 1

Minimum Credits: 3

Maximum Credits: 3

This is a PhD level topic course on multiple hypothesis testing, variable selection, and high-dimensional models. The course will start from multiple testing problems, and introduce a range of methods for controlling family-wise error rate (FWER) and false discovery rate (FDR). Several examples including needles in a haystack problem and sparse mixture models will be studied in detail. In the second part, we will formulate the variable selection problem for linear models as a multiple testing one, and build connections between model selection criteria and multiple comparison results for special design matrices. At the same time, we will also introduce the recently developed knockoff framework for FDR control and discuss its applications in genetics.

Strategic Planning & Policy

BSPP 2016 - STRATEGIC VISIONING FOR A GLOBAL FUTURE

Minimum Credits: 2

Maximum Credits: 2

As globalization gathers pace across the business landscape, senior managers must learn to cope with increasing levels of strategic uncertainty. Globally contestable markets, radical technological and business process innovation, and shifting consumer preferences combine to stress-test corporations' strategic planning and execution capabilities. In particular, there is a need for new models of strategy and competition--incorporating concepts such as real options, scenario thinking, non-market factors, and "new game" strategies (e.g., "bottom of the pyramid" approaches). Accordingly, this course provides participants with a set of rigorous tools and frameworks for making sense of today's high-ambiguity global environment.

BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course covers theory, conceptual frameworks, and tools used to formulate strategies for commercializing new technologies. The analytical frameworks cover elements of commercialization strategy that are equally critical to start-ups and to corporate technology ventures. In addition, we discuss some of the key challenges that differ for start-ups versus established firms. The primary deliverable in the course is a professional quality project which evaluates the commercialization alternatives for an emerging technology. Your project team will be paired with a local inventor, unless you prefer to evaluate a technology of special interest to your team. Experienced entrepreneurs and experts in financing new technology ventures will also address the class.

BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER

Minimum Credits: 1.5

Maximum Credits: 1.5

This course addresses the critical role of a firm's top management in guiding a firm toward more positive innovation outcomes. We specifically focus on the role of executive leadership in developing a firm's capability for breakthrough innovation 'a primary source of sustained competitive advantage and economic growth. We distinguish between what leaders need to do during invention and innovation, and emphasize barriers that hinder established firms' capabilities to produce breakthrough innovations. We examine how strategic leaders can augment a firm's ability to 'innovate smarter' by better utilizing the diversity of expertise that resides within the organization and within the firm's partnerships. The concepts we'll discuss are grounded in decades of research on creativity and technological innovation, as well as strategic management, leadership, and teams. We'll discuss how strategic leaders apply these concepts today.

BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on strategic management in business contexts of high uncertainty and extreme complexity created by the interaction of (i) the inevitability of increasing globalization, (ii) the importance of innovation to ensure sustainable competitive advantage and (iii) the emerging social and economic imperative of building business models that focus on shared value. The business of humanity project at the KATZ graduate school of business has researched the responses of businesses across the world to these challenges. The course will cover (i) the radically different strategic planning processes and analytical techniques, (ii) the new rules of strategy, (iii) the dynamic organizational structures and (iv) the new leadership models that are responsive to the imperative and potential of meeting fundamental human and societal needs. These processes, rules, techniques and models have been demonstrated to be effective in dealing with technological disruptions, extreme price-point pressures in growth sectors, rising societal expectations and wicked problems

Course Requirements: PREQ: BSEO 2407 or BSPP 2409; PROG: Joseph M. Katz Grad Sch Bus

BSPP 2409 - STRATEGIC MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

"Strategy" in the context of management, focuses on creating a harmonious relationship between separate units within an organization, and between a firm and its environment. The core strategic management course explores this classic concept of strategy and how it can be adapted to today's changing and turbulent environments. While the course adopts the perspective of a general manager (e.g. Head of a strategic business unit), it provides critical insight to functional managers who must align their departments' activities with the firm's overall objectives and approach to creating and capturing value (i.e. Its competitive strategy). The strategic management course employs a multi-method pedagogy. Students learn a set of perspectives, conceptual frameworks, and tools - drawn from industrial organization economics and the behavioral sciences and sociology, with which to understand the opportunities and challenges involved in developing world-class capabilities for competing effectively in globally-linked economies. Through case studies, we explore how a firm's competitive strategy shapes the way it engages customers, suppliers, competitors, and others comprising its value net. Through project assignments, we investigate how competitive advantage can be quantified using publicly available data. Together, the multiple modes of inquiry will provide insight into why competitive advantage is fundamental to a firm's long-term success; how the various activities in a firm's value chain can contribute to competitive advantage; and why, although industries support many competitive strategies, each firm tends to employ only one at a time.

Examines various streams of research which have contributed to our understanding of competitive behavior at both the business unit and corporate levels of diversified organizations. Prior studies are critiqued as a means of developing proposals for improved research designs.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 3014 - RESEARCH IN CORPORATE STRATEGY

Minimum Credits: 3

Maximum Credits: 3

In this course we will focus on a core sub-field of strategy, corporate strategy, which has the following defining question: "what businesses should the firm compete in, and how should resources be allocated across those businesses?" Corporate strategy comprises an inter-related set of three key phenomena and associated research; value creation (e.G., Diversification and vertical integration), scope (e.G., Mergers and acquisitions), and execution (e.G., Role of the corporate office). While corporate strategy is often studied purely as a "content" field, we will adopt an integrative

content-process orientation in this course. Our approach will also be evidence-based, in that we'll make a conscious attempt to understand and use systematic review tools, such as meta-analyses, to arrive at a sophisticated understanding of the corporate strategy literature.

BSPP 3521 - STRATEGIC RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will introduce the underlying theory and primarily focus on the practice of strategic planning. Strategic planning considers the organization as a whole, and its operating and general environment. Strategic planning embraces defining the organizational identity, vision, mission or concept of business, determining long-term objectives, developing organizational strategies and translating these into goals and programs of actions. The course will progress through the implications of organizational types and taxonomies of uncertainty on the processes and techniques of strategic planning. It will end with a review of the current literature in the area with the intent of identifying emerging challenges faced by organizations and developing strategic planning processes and techniques that respond to these challenges.

BSEO 2000 - STRATEGY SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This seminar covers practical frameworks for strategic problem solving and develops analytical and communication skills for addressing complex projects in consulting and other industry contexts. Using projects to tackle complex strategy or performance-improvement challenges shouldn't just be the domain of a few thousand highly-paid strategy consultants. Projects are increasingly at the center of problem-solving and innovation for all executives. This seminar will focus on key fundamentals of the end-to-end consulting (project) process. Students will be exposed to a variety of cutting edge analytical tools and techniques. Particular emphasis will be put on best practices in structured problem-solving, work planning, and executive communication - capabilities that are at the core of the top strategy houses' own internal training and development programs. This course will be of interest to future management consultants, but also more broadly to professionals who might expect future internal strategic projects or task force assignments.

BSEO 2500 - BENCHTOP TO BEDSIDE

Minimum Credits: 3

Maximum Credits: 3

This 10-week course is designed to teach research scientists how to navigate the path necessary to bring a basic science discovery out of the university and into the clinic. Participants will learn the criteria used by the private sector to assess the potential of discoveries that have therapeutic or diagnostic applications. They will understand how proof-of-concept and validation experiments define the application, increase value, and reduce risk. The course will focus on the importance of intellectual property protection as the engine that creates a barrier to entry for competition and also enables investment from the private sector to fund the climb over regulatory and reimbursement hurdles to reach patients. This course is open to all scientific researchers and those interested in gaining knowledge of the commercial development process. The core faculty for the course will include OED staff members, and numerous guest speakers and panelists from the scientific and entrepreneurial community.

Academic Career: Graduate

BSEO 2509 - BUSINESS AND POLITICS

Minimum Credits: 2

Maximum Credits: 2

The financial crisis, international negotiations toward a climate change agreement, and crises in such industries as pharmaceuticals and even toy manufacturing have highlighted the increasing interdependence of business and government, as well as the means by which business gains strategic benefits from government regulation. This course will examine methods and patterns of business influence on government, policy-making on issues affecting business, the performance of regulatory agencies, and the behaviors of groups and trade associations in politics. The course begins with an extended case study that asks, what caused the current financial crisis that some call "the great recession"? The crisis had multiple, often interacting causes, and involved both public sector and private sector failures. Besides examining the bases of the crisis, we will ask what institutional reforms, and what critical decisions, might have ameliorated the crisis, and might prevent a future crisis. The course will examine both regulatory failure patterns and the means by which firms gain strategic, competitive advantage through shaping government decisions and programs. In examining techniques of lobbying, the course will focus on the U.S. setting and identify both effective and ineffective methods of lobbying. By the end of the course, students should have obtained a good working knowledge of the U.S. regulatory system, the major instruments of regulation, and the typical interactive patterns of regulators and regulated parties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT

Minimum Credits: 2

Maximum Credits: 2

Given the frequency and magnitude of mergers and acquisitions (M&A) activity, most Pitt MBAS can expect their careers to be impacted by M&A transactions sooner or later - whether as analysts in the pre-merger, phase, as managers or consultants in charge of implementing the merger, or simply as professionals whose career trajectories are inevitably shaped by the event. In order to help you prepare for these roles, acquisitions and divestment will address the strategic and organizational challenges of integrating companies so as to realize the promise of value creation. Building on the premise that the real work of M&A begins after the deal is signed, this course will utilize current research findings, case studies, and practitioner experiences to equip you with a working knowledge of effective post-merger integration. At a time that most companies realize that M&A's have a poor track record of success precisely due to poor post-merger integration, the educational experience in this course will provide you with a valuable skill set. The course should be of special interest to students interested in management consulting careers, or who expect to have significant general management responsibilities in their jobs, or who want to be knowledgeable about M&A events that are likely to affect their careers sooner or later.

BSEO 2570 - FUNDAMENTALS OF MANAGEMENT CONSULTING

Minimum Credits: 1.5

Maximum Credits: 1.5

This course will be focused on the fundamentals of what is known in Strategy Consulting as the "delivery" portion of a strategy (problem-solving) project. All aspects of the consulting delivery process will be introduced, but primary attention will be given to those elements most unique and essential to strategy consulting delivery: Problem definition; work planning (including hypothesis generation and analytical tool selection); and client management (including executive communication). Students participating in a future Katz Consulting Field Study (KCFS) should consider this course a recommended prerequisite. More broadly, the consulting skill set is a valuable addition to your resume. Those planning a post-MBA/MS career in consulting, external or internal, will find this course beneficial. Consulting companies (global and boutique) are active recruiters of MBAs and MS graduates in areas as diverse as Strategy, IT, Supply Chains, Organizational Performance, Analytics and Project Management. Even students taking line management roles will find the strategy consulting skill set to be relevant for future short-term problem-solving or task force assignments.

BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY

Minimum Credits: 1.5

Maximum Credits: 1.5

This course is designed to enhance your ability to understand current challenges and opportunities in sustainability worldwide. Sustainability is of great interest to multiple stakeholders including customers, employees, investors, regulators and activists. Much of the recent attention to sustainability is attributable to its "business case" or the notion that when done right, sustainability initiatives can not only affect positive social or environmental change but also contribute to competitive advantage, reputational gains, etc., and overall to a company's bottom line in the process. Although this kind of - triple bottom line - thinking is powerful and would benefit both businesses and society immensely, achieving this symbiotic relationship between business, society and the environment requires a strategic understanding of when, why and how sustainability initiatives create value. The Sustainable Business course will provide you with the requisite knowledge so that you emerge as leaders who will leverage the power of business to create social and environmental value. The course will blend theory and practice in a way that emphasizes both critical thinking and experiential learning. This will be accomplished through multiple components. First, through case studies and articles, you will be exposed to theories and principles that can be applied to formulate, implement and evaluate sustainability initiatives through the entire value chain - from procurement to disposal. The second, interrelated component will highlight experiential learning. Via a series of projects and mini-workshops, you will analyze the sustainability performance of companies to discover firsthand the mechanisms by which sustainability initiatives yield both business and social returns.

Supply Chain Management

BUSSCM 1760 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminate analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. This course is methods-oriented, as opposed to being methodology-oriented, so students learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

SURG 5100 - MD-OMS RESIDENCY (7 MONTHS)

Minimum Credits: 0

Maximum Credits: 0

This program is multi-disciplinary incorporating basic physiology, pharmacology, microbiology, histology, anatomy and physical diagnosis. This rotation permits the medical student oral and maxillofacial surgery resident to gain insight as to how the basic sciences effect the overall body with emphasis on the head and neck region. Early exposure to ambulatory patients stresses the underlying pathophysiologic process of the presenting disease. Student evaluation is based on several written examinations and participation in small group problem-based conferences.

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 1

SURG 5323 - PLASTIC SURGERY PRECEPTORSHIP

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will provide the student with a preliminary exposure to the specialty of plastic and reconstructive surgery. This preceptorship allows an opportunity to observe and have minor involvement in the clinical care of patients on the service. In addition to direct attending and resident interaction, education is obtained from weekly teaching conferences. Emphasis will be placed on the scope and interaction of plastic surgery with other specialties and the various methods of reconstruction available for each type of deformity. Areas to be experienced will include reconstructive techniques in traumatic, congenital, neoplastic and cosmetic deformity as well as the basic biology of wound healing and wound management

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5345 - SURGERY CLERKSHIP REPEAT

Minimum Credits: 0
Maximum Credits: 0

This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5360 - ORAL-MAXILLOFACIAL SURGERY

Minimum Credits: 0
Maximum Credits: 0

Four-week junior clerkship conducted as a resident in oral- maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, first surgical assist, primary management of post-operative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conferences held by the department of plastic and oral-maxillofacial surgery.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5371 - SURGERY AND PERIOPERATIVE CARE

Minimum Credits: 0
Maximum Credits: 0

Eight-week rotation with students participating in general surgery and anesthesiology. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5372 - SURGERY AND PERIOPERATIVE CARE CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

Six-week rotation with students participating in general surgery. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties. Registration must accompany registration in MSANE 5372

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5375 - SURGICAL SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

Four-week course designed to teach the essentials, knowledge and skills in the management of common diseases in the specialties of otorhinolaryngology, orthopedics, ophthalmology and urology. Learning accomplished through didactic lectures, prepared written syllabi, case reports, multi-media computerized instruction and clinical experience in offices of university faculty. Assessment of student performance accomplished through a multiple-choice examination, objective evaluation of clinical skills, and estimation of clinical expertise in the ambulatory setting.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

SURG 5401 - SURGERY ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Four-week clerkship, conducted as an acting internship in general surgery. Responsibilities: patient evaluating, primary management of pre- and postop care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. Daily rounds with house staff and attendings. Attend postgrad teaching rounds and conferences held by the department of surgery.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5402 - EXTRAMURAL ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will register for this course when participating in a surgery acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

Course Attributes: School of Medicine Year 4

SURG 5403 - SURGERY ACTING INTERNSHIP FOR MD/ORAL MAXILLOFACIAL PROGRAM

Minimum Credits: 0

Maximum Credits: 0

This four-week course is conducted as an acting internship on the endocrine service. Students eligible to register for this course will be participants in the professional medicine/oral maxillofacial surgery combined program (md/oms). Participants will have responsibility for patient evaluating, primary management of pre- and post-op care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. There will be daily rounds with housestaff and attendings. Attendance at the postgrad teaching rounds and conferences held by the department of surgery is expected.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5410 - GENERAL SURGERY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Four-week clerkship offered at a private area medical facility student works directly with a surgical resident and attending surgeons. Responsibilities:

preoperative diagnosis, intraoperative surgical assisting and post-op care. Daily rounds with house staff and attendings. Attend surgical conference and is requested in advance to participate by way of case presentation or prepared problem discussion. Student "night call" approximately every fourth night corresponding to the surgical resident on service.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5411 - SURGERY INTERNSHIP PREPARATION COURSE

Minimum Credits: 0

Maximum Credits: 0

This 4-week rotation was developed especially for 4th-year medical students matching into surgical specialties, including general surgery, vascular surgery, cardiothoracic surgery, plastic surgery, OB/GYN, and urology. Participants will have the opportunity to work with surgical specialists and residents in order to develop skill sets that are necessary for successful matriculation into a surgical internship. The course consists of interactive didactics, simulation, and technical skills practice. A wide range of topics will be covered, including management of emergencies on the surgical ward, discharging patients, dosing common medications, wound care, suturing, use of radiologic tests, placement of chest tubes and central lines, and many others. This course provides a unique opportunity for students to attain the tools needed for the transition into surgical internship with confidence, with the intention of improving patient safety, decreasing surgical intern anxiety, and improving surgical resident efficiency.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5420 - COMMUNITY HOSPITAL CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Four-week elective provides student with exposure to general surgery as practiced outside the university environment, in suburban or rural community hospital. Elective is structured as a preceptorship. Student will evaluate patient problems, be involved in daily patient management, assist in operating room, and attend outpatient office hours with precepting surgeon. Room and board is provided at hospital outside Pittsburgh.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5430 - NEOPLASTIC DISEASE ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Four-week elective in oncology. Through the national surgical adjuvant breast project headquartered at Scaife Hall, student will study in depth, contemporary theories of tumor biology from clinical and laboratory perspective. Outpatient clinics and/or exposure, but major focus is conducting cooperative clinical studies regarding the management of patients with breast or colon cancer.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5440 - PEDIATRIC SURGERY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Four-week elective tailored to fully integrate a student into a specific position of the house staff. Student serves as an intern, with participation in all clinics, rounds, conferences and capabilities. Time spent each week seeing patients. Special adaptations of program to particular requests can be made, including part pediatric medicine and part pediatric surgery. Will learn differences between childhood and adult diseases, take pediatric history and do complete physical.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

SURG 5482 - RENAL, PANCREATIC AND LIVER TRANSPLANTATION

Minimum Credits: 0

Maximum Credits: 0

This is a four (4) week elective for medical students interested in learning about renal, pancreatic or liver transplantation. The student will have an opportunity to participate as a member of a busy transplant team. They will be involved in the evaluation and treatment of a large number of patients referred here with hepatic or renal disease for consideration of resection or transplantation therapy, or patients with type I diabetes mellitus for pancreas transplantation. They will attend the various conferences and, if possible, pre- and post-transplant clinics. Students will be offered the opportunity to scrub in the operating room on both living and deceased donor transplants. There will be no mandatory call; however, students should be aware of the fact that many transplantations occur at night or on the weekends. The student can participate in the post-operative care of transplant patients, including experience in the surgical ICU. Both through selected reading materials that offer an introductory exposure to transplantation, and through participation in patient care and rounds, students will learn the basic principles of evaluation and management both pre- and post-transplantation, immune-suppression, and infectious prophylaxis.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5485 - BIOLOGICAL AND GENE THERAPY

Minimum Credits: 0

Maximum Credits: 0

This 4-week elective will provide an opportunity to study contemporary theories of tumor biology and tumor immunology both from a clinical and laboratory perspective. While outpatient clinics will be part of the experience, the major focus will be the rewards and challenges of conducting clinical studies regarding the management of patients with various tumors managed with biologic therapies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5486 - SURGICAL SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

This is a four week course. The student may select two areas of special interest, and will spend two weeks on each selected specialty. Available specialties are; cardiothoracic surgery, orthopedics, neurological surgery, plastics & reconstructive surgery, urological surgery, vascular surgery, and gynecological oncology. The student will gain clinical exposure through attending clinics, participating in daily inpatient rounds, and in the operating rooms. Instruction will be by the residents and attending surgeons on the selected services. Performance will be evaluated on a number of criteria including knowledge, patient evaluation and management planning, motivation, responsibility, and interpersonal actions. The purpose of this course is to allow students to explore possible areas of interest for which they might not get exposure in the standard curriculum. The student is expected to learn to perform a basic history and physical evaluation of patients as required by each specific service. Each student should be able to discuss the service specific approach to patient management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5490 - ORAL-MAXILLOFACIAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in

the school of medicine. Responsibilities include: admission, evaluation, first surgical assist, primary management of postoperative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conference held by the department of plastic and oral-maxillofacial surgery.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5650 - SURGICAL SPECIAL STUDIES

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5700 - SURGICAL LIFE SCIENCES

Minimum Credits: 0

Maximum Credits: 0

A four week elective combining anatomic dissection, imaging modalities, and clinical pathology in a systematic manner. The course will be divided into four areas, each lasting one week. Thoracic anatomy, digestive tract anatomy, musculoskeletal and gynecological/genitourinary anatomy. The course includes lectures in anatomy, pathology and imaging modalities and precepted anatomical dissections. Exposures will vary and include seeing patients and follow their evaluation and treatment.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5884 - HISTORY OF MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Four-week elective. Student examines various aspects of the history of medicine, from the beginning of medical practice into the 1980s, read selected group of historical monographs and participate in in-depth discussions with members of a group of interested senior faculty, and write a short research paper.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

SURG 5885 - SURGICAL RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5900 - EXTRAMURAL GENERAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in general surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

SURG 5902 - INDEPENDENT STUDY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Teaching, Learning and Leading

EFOP 3095 - ORGANIZATIONAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT

Minimum Credits: 3

Maximum Credits: 3

One way to see the act of education is that it is essentially about what occurs between teachers and learner. In other words the key unit of analysis is the classroom or activity structure. The classroom is important, but teaching and learning are also shaped by their context. Individuals are situated in organizations, which are situated in broader social, cultural, and political environments. Consequently, reform and improvement efforts must not only take seriously individual factors, they must understand the ways in which individual action is enabled and constrained by organizational and environmental contexts. This seminar will focus on schools as organizations drawing on theoretical and empirical work grounded in organizational theory. We will interrogate the institutional, organizational, and day-to-day contexts of work in schools. We also explore how reform efforts targeting organizational features can intervene and perhaps, improve teaching and learning. In order to grapple with the concepts from the literature, students will analyze several cases or organizational improvement efforts and conduct a small study examining an improvement effort in a local educational organization.

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2002 - INTRODUCTION TO URBAN EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Students will explore the systemic issues unique to urban education historically as well as uncover how urban education is/can be a vehicle for social justice and equity in our country. The course will include the impact of policies, national movements, systemic racism, and their implications for students in urban schools over time in the united states as well as a deep understanding of the condition of students today with a focus on race, socioeconomic status, equity, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2003 - UNDERSTANDING TEACHING THROUGH A SOCIAL WORKERS LENS

Minimum Credits: 3

Maximum Credits: 3

One critical key to being an effective teacher is being able to delve deep into seeing and understanding people's lived experiences. To do so well, requires that one adopt the 'lens' of a social worker in addition to that of a teacher. Diverse urban school students often have experiences that our predominately white, suburban, middle class teaching force haven't, the knowledge of which can assist teachers in better interpreting behaviors and contextualizing their work. Such topics as trauma, health, family dynamics, violence, and poverty are addressed. This course is a collaboration with the school of social work faculty.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2004 - RELATIONSHIP BUILDING: STUDENTS, FAMILIES AND COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

Students will learn ways to develop and nurture meaningful relationships with the students, families and communities they serve. This course provides opportunities and assignments designed to actively engage in the relationship development process as well as document it along with evidence of studying about demographics and historical content and contexts that provide the anchor for their work with and perspectives of the urban spaces in which they learn and educate.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2005 - URBAN SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This seminar series provides a deep dive into some of the most salient issues of teaching in urban schools. It is designed to take the students on a journey that begins in the summer with an examination of identity, their own as well as a lens in which to see and understand their students in personal and contextualized ways. The fall seminar takes their newfound understanding and wraps it into meaningful relationship building between the self and student as the foundation for developing classrooms as communal learning spaces for all to thrive. Doing such work in understanding identity and relationships with students in urban spaces includes an explicit look at power and privilege in powerful ways that helps teachers understand their and their students lived experiences in ways that lead to opportunities to more clearly see where inequities lie in our educational and broader systems. This then builds to be the foundation for the spring seminar that provides framing and support in becoming a change agent in educational institutions in ways that disrupt such aspects of the environment, such as systemic institutionalized racism.

TLL 2006 - CULTURALLY RESPONSIVE TEACHING

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on STEAM-based instructional approaches, which includes the ways in which teachers structure the classroom environment, tasks, and resources to facilitate deep learning. These instructional approaches include problem-based, student-driven, authentic tasks, and technology integration, as well as support for equitable participation (the ways in which the classroom facilitates access and engagement in learning for all students, with specific attention to abilities and resources).

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2008 - STEAM: INSTRUCTIONAL DESIGN

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the instructional content of STEAM, which includes subject-matter alignment (the ways in which teachers present material from multiple disciplines or content areas in clear and connected ways), discipline integration (the selection of material across disciplines - including concepts, methods, and approaches - as well as how they are synthesized to support deeper learning), and ways to employ problem-solving skills. These skills include cognitive skills (modeling, analyzing, interpreting), collaborative skills (communication, problem-solving), and creative skills (designing, creating) necessary for 21st century learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2009 - STEAM: ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3

This course focuses on assessment practices that support learning. This includes the iterative process of refining instruction and evaluating learning in real-world contexts using multiple forms of data. Assessment types explored include formative and summative assessment and ways to make assessments authentic, embedded, with regular feedback that drives adjustments to teaching. Another key component of this course is peer supports including peer review and self-reflection.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2010 - STEAM: IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3

This course investigates the ways to implement STEAM teaching and develop collegial support outside of the classrooms. Participants will implement STEAM practices and critically reflect on ways to refine teaching. The course utilizes peer evaluation from other instructors, peer and instructor feedback, and encourages refining teaching practice during implementation of the unit.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2041 - INTRO TO EARLY CHILDHOOD ED

Minimum Credits: 3
Maximum Credits: 3

The course is a general introduction to the theoretical, political, economic, and social issues that are inherent in the conduct and development of services for young children. The primary thrust is intended to provide students with both an overview of current issues and a basis for assessment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

Minimum Credits: 3
Maximum Credits: 3

An introduction to language and literacy for children birth through grade 4. Includes applied theories and stages of language development, transitions from oral to written expression, family literacy, and guidelines for the selection and use of quality literature.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2045 - YOUNG ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3

Maximum Credits: 3

Prospective early childhood education teachers will identify, investigate and assess impacts of a variety of social agencies, organizations and current issues in early childhood education through planned interviews as well as class lectures, discussions and reports.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2047 - INTEGRATED CURRICULUM PRE-K-4

Minimum Credits: 3

Maximum Credits: 3

The second half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.

Grade Component: Grad SN Basis

TLL 2101 - PENNSYLVANIA SCHOOL LAW

Minimum Credits: 3

Maximum Credits: 3

The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2115 - SUPERVISION AND TEACHER LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on skills and strategies school leaders need to know to supervise teachers and develop structures for on-going teacher learning and development. Students study the history of supervision and how it continues to evolve. They analyze their own district's induction and professional development plans and design supervision models appropriate for a differentiated teaching staff.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2117 - DIFFERENTIATED INSTRUCTIONAL PRACTICES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to give practitioners a strong theoretical background in differentiated modes of instruction and the skills needed to work with teachers as they strive to improve and expand their pedagogy. Discussions and readings will explore classroom strategies that improve student achievement, the elements of effective instruction, instructional design related to state standards, and ways to use assessment to drive instruction. Finally, the course will discuss ways that school leaders can work with teachers to enhance their instruction and student learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2123 - SUMMER LEADERSHIP INSTITUTE

Minimum Credits: 3

Maximum Credits: 3

Students learn to diagnose adaptive leadership challenges while developing a foundation of individual and group communication skills and a disciplined practice of reflection. The leadership institute will offer a coherent experience of teaching and learning about and for leadership supported

by an approach to adult development as meaning/making (Kegan, 1994). The institute develops skills in: team building, problem framing analysis, group process skills, interpersonal skills, communication skills, writing (annotated bibliography, art of critique), shared decision-making, multicultural education/diversity (awareness of diversity, classroom interactions, and diversity in schools), school culture, and reflective practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of literacy research and instructional approaches that relate to language and language systems with emphasis on the historical development of English, linguistic and sociocultural perspectives on second language learners and speakers of dialects, and instructional approaches for encoding and decoding.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1

Minimum Credits: 3

Maximum Credits: 3

This course is intended for teacher candidates who are pursuing prek-4 certification. It is the first in a two-course sequence that focuses on classroom teaching methods for literacy. It is also part of a set of courses that focus on literacy development and instruction. Other courses in the set include reading/writing methods 2: grades 2-4, language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 1 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) oral language development, (b) emergent literacy, (c) concepts about print, (d) comprehension, and (e) writing. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in pre-kindergarten - grade 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2209 - READING WRITING METHODS 2: GRADE 2-4

Minimum Credits: 3

Maximum Credits: 3

This course is intended for teacher candidates who are pursuing prek-4 certification. It is the second in a two-course sequence and builds on concepts introduced in reading/writing methods 1. It is also part of set of courses that focus on literacy development and instruction. Other courses in the set include language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 2 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) word study-decoding, spelling, and vocabulary, (b) comprehension, and (d) composition, including handwriting. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in grades 2-4.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2211 - COMPREHENSION AND VOCABULARY

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth consideration of reading processes related to comprehension and learning from text, and instructional approaches that support student text comprehension, including vocabulary instruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of reading processes and assessments of those processes with a focus on phonology, fluency, vocabulary, and comprehension. The course also provides an introduction to the response to intervention model and its application in various contexts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS

Minimum Credits: 3

Maximum Credits: 3

This course engages candidates in working with students in kindergarten through grade 3 to assess students' literacy abilities in decoding, spelling, vocabulary, fluency, and comprehension, and to design instruction targeted to support students' literacy development. The course is also an opportunity for candidates to videotape and analyze their interactions with students.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS

Minimum Credits: 3

Maximum Credits: 3

This course involves working with middle school students who are experiencing difficulties with reading. The course takes place at a school site for 3 weeks, 9:00-12:00, Monday through Friday, students meet at the University of Pittsburgh, 9:00-12:00, for three specific dates to prepare for the practicum sessions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 2219 - DISCIPLINARY LITERACY

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the literacy development of adolescents with particular attention to the demands of discipline-specific reading and writing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2226 - SPECIAL TOPICS - WRITING

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2228 - SUMMER INSTITUTE FOR TEACHERS

Minimum Credits: 6

Maximum Credits: 6

An intensive, teacher-centered, teacher-led professional development program in the teaching of writing, based on the highly successful national writing project model. Open to teachers in all grade levels (k-16) and all content areas.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

TLL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1

Minimum Credits: 3

Maximum Credits: 3

In this course, teacher candidates are introduced to current issues and effective teaching practices in secondary English language arts education. Teacher candidates will learn the characteristics of English language arts classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for adolescents.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2235 - THEORY AND PRACTICE IN TEACHING LANGUAGE, GRAMMAR AND USAGE

Minimum Credits: 3

Maximum Credits: 3

The purpose of this seminar is to teach students current best practices for the teaching of language, grammar and usage in multicultural and multilingual secondary English language arts classes. The course will introduce students to basic linguistic concepts and will help students understand how language and grammar are intertwined with all four language arts (reading, writing, listening and speaking). Students will practice developing language and grammar curriculum that is imbedded in reading and writing instruction and developmentally appropriate, explaining grammar and usage concepts clearly and appropriately, and assessing students' understanding of language, grammar, and usage concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2239 - THEORY AND PRACTICE IN TEACHING NEW MEDIA AND LITERACIES

Minimum Credits: 3

Maximum Credits: 3

Teaching new literacies, multimodal forms of expression and technology in the English classroom will be the emphasis of the course. Students will follow a media literacy framework to learn theory into practice as they review and research current literature on digital tools such as wikis, blogs, social networking sites, and digital audio and video production applications. Methods for incorporating new literacies in the classroom will be explored and shared by the students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2240 - THEORY AND PRACTICE: ASSESSMENT IN ENGLISH EDUCATION

Minimum Credits: 3

Maximum Credits: 3

TLL 2240 theory & practice: assessment in English education this course will be a survey of the range of assessment tools and practices appropriate for use in evaluating student learning in the secondary English classroom. Students will explore the purposes, methods, and uses of classroom assessment as well as state and national assessments. Topics explored in this course will include standardized testing, formative and summative assessments, designing writing and project-based assessments and rubrics, providing feedback on student writing, analyzing the results of assessments in order to guide instruction, and other topics related to the design and use of assessments.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2243 - THEORY & PRAC IN TCHNG WRITING

Minimum Credits: 3

Maximum Credits: 3

This seminar critically studies various approaches to the teaching of writing from both theoretical and applied perspectives. Students are expected to have had some experience teaching writing.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

TLL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2

Minimum Credits: 4

Maximum Credits: 4

In this course, teacher candidates learn how to draw upon English language arts classroom research, learning theory, and knowledge of adolescent development to design and implement effective English language arts instruction. The course will emphasize the design and implementation of cognitively challenging reading and writing tasks as well as the appropriate instructional supports to help students succeed at those tasks. Teacher candidates will have opportunities to develop instructional plans and practice teaching techniques while receiving feedback from peers and the course instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2246 - THRY & PRAC: MULTI-CULTURAL LIT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide teachers with a multicultural philosophical perspective, criteria for selecting multicultural literature, and strategies and techniques for infusing literature from diverse cultures into a literature program.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

TLL 2250 - TECHNOLOGY IN FOREIGN LANGUAGE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Attributes: Asian Studies

TLL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

A basic introduction course dealing with the most current issues in foreign language education in elementary, middle and secondary schools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce students to foreign language classroom instruction, management, and methodology. Students will be introduced to the ACTFL national standards for foreign language learning and will explore instructional practices for helping learners develop proficiency in the target language and culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Minimum Credits: 3

Maximum Credits: 3

In this course, students become familiar with the most current language testing and assessment principles and procedures through discussion and hands-on practice. Topics covered include test usefulness, validity, reliability, practicality, impact, interactiveness, and so on. Student's practice creating tools ranging from multiple choice and short answer to portfolio and performance assessments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3

Minimum Credits: 3

Maximum Credits: 3

In this course, students discuss a variety of issues that relate to the actfl national standards for foreign language learning. In addition, teaching techniques that address these issues are modeled and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

TLL 2255 - TECHNQ/PROCDR FOREIGN LANG TCH

Minimum Credits: 3

Maximum Credits: 3

The course will present strategies and techniques for teaching the four skills (listening, speaking, reading and writing), culture, and generic principles for effective proficiency-oriented instruction. The emphasis of this course is on practical applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED

Minimum Credits: 3

Maximum Credits: 3

The course deals with current issues in foreign language teaching. Issues are determined by the current concerns and research in the field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Global Studies

TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3

Maximum Credits: 3

This course will explore strategies for teaching English language learners (ell's) in formal and informal education settings. Students will be introduced

to foundational theories and current research on the social and academic factors that influence ell's learning experiences. The class will include a video component so students can observe instructional approaches for working with linguistically and culturally diverse ell's.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2

Minimum Credits: 4

Maximum Credits: 4

In this course, students discuss and practice a variety of teaching techniques and assessment tools that support the ACTFL national standards for foreign language learning. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1

Minimum Credits: 3

Maximum Credits: 3

In this course, students will draw upon research, policy, and curriculum documents to develop an overview of current issues in social studies education. The course is organized around three guiding questions: (1) what are the key practices of social studies educators? (2) What do classrooms in which powerful teaching and learning in social studies look like? And (3) what do teachers need to know and be able to do in order to engage students in powerful learning in social studies?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies

TLL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2

Minimum Credits: 4

Maximum Credits: 4

In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support social studies instruction. Teacher candidates utilize various curricular resources (e.g. Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates will have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2265 - ISSUES IN HISTORY EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Students will explore the historical development of approaches to teaching us history and world history.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2269 - SPECIAL TOPICS: SOCIAL STUDIES

Minimum Credits: 3

Maximum Credits: 3

Students will research social studies topics of special interest. Content varies based on professional expertise and students' needs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL

Minimum Credits: 3

Maximum Credits: 3

To introduce preservice classroom teachers to art and music contents and processes with relevance to their expected role in integrating authentic arts learning experiences in their instruction. Emphasis placed on developmental aspects of children's' responsive and expressive skills in art and music.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2277 - COMPARATIVE AND GLOBAL PERSPECTIVES ON EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course, held on the campus of the University of cape town in cape town, South Africa, explores and compares the 20th century human/civil rights-related histories of the united states and South Africa, and examines implications these histories have had on the education systems (particularly in a context of social studies education) of each country. In their comparative survey of historical, social, and educational contexts, instructors will place special emphases on the philosophies, work, and legacies of key historical individuals including Mohandas K. Gandhi, Dr. Martin l. King, Jr., Nelson Mandela, among others. Study will incorporate a critical analysis of the universal declaration of human rights (1948), lectures by noted historical experts, visits to sites of historical significance, visits to schools and other learning environments, and group discussions of relevant texts and experiences.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

TLL 2281 - LEADERSHIP SCHOOL LITERACY PROG

Minimum Credits: 3

Maximum Credits: 3

This course examines theories about leadership of the school literacy program. Leadership skills are defined and applied. Leadership theory and research as related to literacy curriculum and instruction are discussed; example of how reading specialists and others (principals, teachers) can fulfill a leadership role as described. Course combines theory with practical application.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2282 - FOREIGN LANGUAGE IN ELEMENTARY SCHOOL

Minimum Credits: 3

Maximum Credits: 3

This purpose of this course is to introduce students to the various types of elementary foreign language programs, to review and apply instructional practices that are appropriate for young foreign language learners, and to discuss topics that are unique to teaching foreign language in K-8 school settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2290 - RESEARCH SEMINAR FOR MED STUDENTS

Minimum Credits: 3

Maximum Credits: 3

The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2291 - SUPERVISED RESEARCH - READING

Minimum Credits: 1

Maximum Credits: 6

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

TLL 2296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Minimum Credits: 1

Maximum Credits: 9

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Full Time Dissertation

Grade Component: Grad SN Basis

TLL 2298 - DIRECTED STUDY - READING

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2391 - SUPERVISED RESEARCH IN ENGLISH

Minimum Credits: 1

Maximum Credits: 6

The student works collaboratively with a sponsoring faculty member in carrying out a research project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2398 - DIRECTED STUDY IN ENGLISH

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2402 - HEALTH, MENTAL HEALTH AND SAFETY

Minimum Credits: 2

Maximum Credits: 2

Within the leader as learner block in leadership initiative for transforming schools (lifts), a k-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2403 - TEACHER SUPERVISION AND EFFECTIVENESS

Minimum Credits: 2

Maximum Credits: 2

The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2404 - INSTRUCTIONAL LEADERSHIP

Minimum Credits: 5

Maximum Credits: 5

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to action research as a method of improving their practice. Students will learn what action research is, how it is carried out, and where it falls in the spectrum of research methodologies. The role of literature in supporting practitioners and their action research

and how to develop a literature review will be addressed. Students will design an action research project on a topic relevant to their own practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2406 - PUBLIC LEADERSHIP: ASSESSMENT AND ACCOUNTABILITY

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2407 - POLITICS OF EDUCATION: SCHOOL COMMUNITY PARTNERSHIP

Minimum Credits: 1

Maximum Credits: 1

A major premise of this course is that to serve as a community leader, one must have a clear vision and a strong organizational style that mirrors a community's social, political, economic and organizational profile. A second premise is that to be truly effective within a community, a community leader must epitomize Aristotle's belief that we have the responsibility to be 'political animals'.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2408 - POSITIVE BEHAVIOR SUPPORT

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2409 - MULTI-TIERED SYSTEM OF SUPPORT

Minimum Credits: 3

Maximum Credits: 3

In this course, students learn about CI3T, a multi-tiered system of support or MTSS, "to address academic, behavioral, and social-emotional domains for a comprehensive approach to student support and school improvement" (Lane, Oakes, & Menzies, 2014, p. 4). Through required readings and class assignments, students first develop an understanding of the core principles of CI3T/MTSS and acquire many of the leadership skills necessary for implementation in the school environment: *¿* Understand a multi-tiered, preventative approach to schoolwide supports for all students. *¿* Gain knowledge about the foundational principles, critical components, and implementation procedures of CI3T/MTSS. *¿* Learn to use practical tools associated with effective implementation and evaluation of CI3T/MTSS. *¿* Understand how to use data to increase the fidelity and effectiveness of CI3T/MTSS practices in the school environment. Next, we study racial disproportionality in school discipline as an exclusionary practice before moving to preferred inclusionary practices, motivational interviewing, and coaching techniques. This is not a special education course on inclusion for students with disabilities. However, students with disabilities related to emotional and behavioral challenges especially benefit from the strategies we will focus on in this course: - coach teachers in evidenced-based Tier 1 and other classroom interventions - help teachers understand how to support students with mental health issues and mental health conditions - show teachers how to observe their own attitudes when faced with troublesome behaviors - guide teachers to understand classroom social dynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2410 - INSTITUTIONAL LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2411 - PUBLIC LEADERSHIP: SCHOOL LAW

Minimum Credits: 1

Maximum Credits: 1

The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1

Minimum Credits: 3

Maximum Credits: 3

In this course, teacher candidates will draw upon research, policy, and curriculum documents to develop an overview of current issues in science education. The course is organized around three guiding questions: (1) what are some key practices of scientists? (2) what do classrooms in which students engage in key science practices look like? And (3) what do teachers need to know and be able to do in order to support learning in classrooms where students learn science ideas through engagement in science practices?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2

Minimum Credits: 4

Maximum Credits: 4

In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support science instruction. Teacher candidates utilize various curricular resources (e.g. Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2432 - TEACHING & LEARNING IN SECONDARY SCIENCE 3

Minimum Credits: 3

Maximum Credits: 3

Designed to develop an overall rationale for dealing with classroom science instruction; students design, teach and evaluate teaching strategies for secondary school; specific materials for teaching science and strategies for their effective use are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS

Minimum Credits: 3

Maximum Credits: 3

This course investigates methods for teaching mathematics to elementary school children of diverse backgrounds. The course is intended to contribute to your development as a critical, equity-oriented, anti-racist, reflective, and effective elementary teacher of mathematics. We will use readings, assignments, projects, and our classroom discussions to facilitate your understanding of important issues related to equitable mathematics teaching and learning. We will focus on topics such as number sense, growth mindset, mathematics identity, equitable pedagogical and assessment practices, culturally relevant pedagogy, social justice pedagogy, and building relationships with students and their families. You will work in small groups, partnerships, and individually in class and for your assignments and projects. Our class community will support each other's progress toward the course learning goals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS

Minimum Credits: 3

Maximum Credits: 3

How do teachers assist elementary children in doing science and understanding science concepts? What environment facilitates elementary children's understanding in science? What equitable and just methods can teachers employ to ensure all elementary children can access and engage with science? These are just a few of the questions we will be addressing over the course of this semester. You will explore these ideas through thinking about yourself as a science learner; by demonstrating reflective teaching practices; and through examining how elementary science teaching and learning can be integrated across disciplines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2445 - ASSESSMENT AND EVALUATION IN MATH EDUCATION

Minimum Credits: 3

Maximum Credits: 3

In this course we will examine current assessment practices in mathematics education, both historically and in terms of their forms and purposes in today's educational and political climate. Most importantly, however, we will focus on improving current assessment practices to support students' learning in the mathematics classroom. Based on an integrated view of assessment and instruction, students will be expected to employ ideas from the course to improve their own assessment practices.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1

Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global

communities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

TLL 2470 - REASONING AND PROVING IN SECONDARY MATH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on addressing three overarching questions: 1) what is reasoning-and-proving? 2) How do secondary students benefit from engaging in reasoning-and-proving? 3) How can teachers support the development of students' capacity to reason-and-prove? Teachers explore these questions through engagement in a variety of activities that include: solving and discussing challenging mathematical tasks; analyzing narrative cases that make salient the relationship between teaching and learning and the ways in which student learning can be supported; examining and interpreting student work that features a range of solution strategies, representations, and misconceptions; and making connections to their own teaching practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2473 - MATH FOR ELEMENTARY TEACHERS

Minimum Credits: 3

Maximum Credits: 3

Students will improve their mathematics knowledge of concepts and skills in numeration systems, integers, rationales, geometry, probability/statistics, and other selected topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2474 - PROPORTIONAL REASONING IN MIDDLE SCHOOL MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

Focuses on developing teacher's ability to reason proportionally and capacity for designing instructional experiences that foster's child understanding of proportional relationships. Includes solving math tasks related to proportional reasoning and analyzing teaching and learning situations that highlight pedagogical approaches that support student learning in this domain.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2476 - TEACHING AND LEARNING IN SECONDARY MATH 1

Minimum Credits: 3

Maximum Credits: 3

Basic orientation to the issues, lectures, and resources in the field of mathematics education. Issues currently affecting the teaching and learning of mathematics focused on middle and secondary schooling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2477 - TEACHING AND LEARNING IN SECONDARY MATH 2

Minimum Credits: 4

Maximum Credits: 4

Topics include learning, instruction and assessment, planning lessons, effective learning environments, successful teaching strategies, and materials and resources. Responsibilities and professionalism will also be discussed.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2478 - TEACHING AND LEARNING IN SECONDARY MATH 3

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the development and support of learning contexts in which adolescents have opportunities to engage in challenging mathematical practices. Drawing on cognitive change learning theory, teacher candidates learn to select and develop various assessments that reveal students' thinking and to draw upon their understanding of students' ideas to scaffold learning experiences in the classroom. Emphasis is placed on strategies that build and support students' capacity to engage in mathematical discourse.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2484 - MATH PROBLEM SOLVING K-12

Minimum Credits: 3
Maximum Credits: 3

Students will become familiar with various theories of problem solving. They will solve challenging mathematical problems, discuss strategies, and identify ways to translate what they learn into their own mathematics classrooms.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2491 - SUPERVISED RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 3

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 2495 - INTERNSHIP - MATH

Minimum Credits: 1
Maximum Credits: 9

Interns (mat program) work with cooperating teachers in a school setting to master teaching skills and to enhance their professional attitudes. Responsibility includes half-day teaching.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2496 - INTERNSHIP - SCIENCE

Minimum Credits: 1
Maximum Credits: 9

Interns assume half-time teaching in a secondary school working with cooperating teachers and supervisors to master concepts, skills and professional attitudes. Career goal orientation is rigorously tested.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis

TLL 2498 - DIRECTED STUDY - MATH

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2500 - FOUNDATIONS OF SPECIAL EDUC

Minimum Credits: 3

Maximum Credits: 3

Course provides an overview of the field of special education. It includes such topics as 1) identification; 2) placement; 3) programming; 4) inclusion; 5) advocacy; and other topics relating to individuals with disabilities, and gifted and talented individuals. The course examines the various philosophical views of exceptionality.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM

Minimum Credits: 3

Maximum Credits: 3

Course is an introduction to teaching students with disabilities in elementary general education classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding inclusive educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, and (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

Minimum Credits: 3

Maximum Credits: 3

Course is an intro to teaching students with disabilities in sec level general EDUC classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding INCL educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges, & adapting instruction & curricula.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 2503 - STUDENT TEACHING FOR DUAL CERTIFICATION IN SECONDARY SCHOOLS

Minimum Credits: 3

Maximum Credits: 3

Student teaching for dual certification in secondary schools teacher candidates engage in fieldwork five days a week in secondary school sites for 14 weeks. Teacher candidates will collaborate with both content area and special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the term, assume responsibility for the majority of provided instruction and classroom management. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

TLL 2504 - STUDENT TEACHING SPECIAL EDUCATION

Minimum Credits: 1

Maximum Credits: 7

Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will present information on the characteristics of and intervention approaches for children with autism spectrum disorders (ASDS). Introductory material will include diagnosis criteria and characteristics of ASDS. Current research on theories of etiology will be explored and analyzed. Screening tools and assessments specific to this population will be examined in detail. Intervention approaches (e.g., LBI/Discrete Trial, ABBLS, precision teaching, teach) will be described and analyzed in terms of basic premises, research base, associated curricula, and evaluative guidelines from the autism society of America and national institute of mental health. Representatives from local education and behavioral health systems serving children with ASDS will present services/intervention models available in the area.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM

Minimum Credits: 3

Maximum Credits: 3

The course will consider programming and strategies for facilitating the communication and social development of young children with autism. Communication strategies will include a focus on nonverbal children, echolalic, and verbal children. Strategies will include sign language, picture systems, developmental approaches, naturalistic teaching, and discrete trial formats. Social interventions will examine play, peer interactions, and peer relationships. For both areas, assessment tools and strategies; published curricula; and a range of intervention procedures will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2505

TLL 2507 - EARLY INTERVENTION CONSULTATION

Minimum Credits: 1

Maximum Credits: 1

This module focuses on providing students with skills for consulting with families, childcare providers, related service personnel, other teachers and paraprofessionals, to assist them in carrying out interventions for young children with autism, in homes, inclusive classrooms, and the community. The class will place special emphasis on classroom-based services. The module emphasizes a collaborative approach to consultation. Communication and interpersonal skills, relationship-building, the inclusion of families in all consultations, and techniques for assisting others to carry out interventions are considered. Finally issues related to interagency collaborations with emphasis on strategies to overcome challenges that occur in the daily life of a consulting professional in a variety of settings will be investigated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT

Minimum Credits: 3

Maximum Credits: 3

The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group and class room-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills and providing positive behavior support for changing behaviors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS

Minimum Credits: 3

Maximum Credits: 3

This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community, vocational, and functional academics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB

Minimum Credits: 3

Maximum Credits: 3

Course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with mild disabilities, with emphasis on assessment for teaching reading, written language and mathematics. Course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

TLL 2513 - INSTRNL METH-HIGH INCDNC DISABS

Minimum Credits: 3

Maximum Credits: 3

This course explores the methods and procedures for developing literacy for students with learning disabilities, mild mental retardation, and behavioral disorders. The focus of the first 5 sessions is on learning to teach young students who have extraordinary difficulty; the next sections address the literacy needs of older students.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2518 - POSITIONING, HANDLING AND MOBILITY: YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 1

Maximum Credits: 1

Focuses on knowledge and recognition of normal and abnormal gross motor development of children, aged birth to 5, with an emphasis on analysis and facilitation of movement, handling and positioning, adaptive equipment, and safety.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2519 - ORAL MOTOR AND FEEDING STRATEGIES: YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 1

Maximum Credits: 1

Provides an overview of medical, motor, sensory, psychological and social aspects of feeding children. The class reviews the development of normal oral motor and self-feeding skills and the impact that disabilities may have on these processes. Use of descriptive, criterion-referenced evaluations and clinical observations to identify a child's level of oral motor control will be reviewed. Students will have an opportunity to use assessment procedures and devise treatment plans to address oral motor and feeding needs of children.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM

Minimum Credits: 3

Maximum Credits: 3

General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their secondary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general secondary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE

Minimum Credits: 3

Maximum Credits: 3

The course provides knowledge of curriculum content, teaching techniques and instructional materials for children and youth with emotional disturbance through a focus upon academic content areas and social skills. The utilization of instruction as therapeutic programming will be the central theme.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS

Minimum Credits: 3

Maximum Credits: 3

General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their elementary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general elementary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM: VI

Minimum Credits: 5

Maximum Credits: 5

This course is required by the pa department of education for certification to become a teacher of the visually impaired. Placements for this clinical experience are arranged by the vision studies program faculty and may be conducted in the student's home area. The approximate length of the placement is 14-weeks serving children who are blind or visually impaired ages three to 21-years.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI

Minimum Credits: 3

Maximum Credits: 3

This course evaluates many facets of assistive technology for individuals who are blind or visually impaired. Coursework includes projects and a weekend workshop for direct experiences with adapted software, hardware, and peripheral devices.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2527 - LEVEL 1 OBSERVATIONAL PRACTICUM: VI

Minimum Credits: 1

Maximum Credits: 2

This clinical experience requires students to engage in observations of practitioners serving a wide range of needs of individuals who are blind or visually impaired.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2529 - BRAILLE

Minimum Credits: 3

Maximum Credits: 3

This course places emphasis on reading and writing braille. It emphasizes proficiency in reading and writing contracted and uncontracted braille, as well as teaching pre-braille and braille readiness to individuals who are blind or visually impaired.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION

Minimum Credits: 3

Maximum Credits: 3

This course presents an overview on the anatomy and physiology of the eye. It also presents information about visual pathology and its effect upon learning and function.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2531 - EDUCATION OF CHILDREN WITH VI 1

Minimum Credits: 3

Maximum Credits: 3

This methods course reviews the concepts and philosophies of educating children who are blind or visually impaired. It presents information on serving the needs of children in public schools, with emphasis on the itinerant model of delivery. This methods course examines assessment, programming, instructional materials and methods, and their theoretical and research basis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2532 - EARLY INTERVENTION FOR CHILDREN WITH VI

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the topics unique to children aged birth through five who are blind and visually impaired and their families. Focus will be on typical and atypical development as a basis for assessing the child's needs and designing appropriate interventions and family supports. The course includes individual and collaborative work in the areas of family-centered practices and collaboration among professional agencies across disciplines. Emphasis will be placed on assessment and intervention in the areas of sensory, cognitive, motoric, and communicative development as well as providing developmentally appropriate orientation and mobility.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare teachers of the visually impaired with the knowledge and skills to provide initial level sensory, cognitive, and motor skill development to children who are blind or visually impaired. Students will learn the basic skills of sighted guide and self-protective techniques including assessment and remediation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS

Minimum Credits: 3

Maximum Credits: 3

This course is designed for SOE students in the Program for Visual Impairments, and will cover instruction, techniques, and strategies of literacy and communication skills for students with visual impairments. Topics will include instruction for children with visual impairments in the emergent literacy stage, instruction in formal literacy for students who use braille, supporting classroom instruction for students with low vision who use print and large print, and the use of specialized materials, methods, and technology for supporting literacy instruction for all students with visual impairments. Special topics will include instruction of students who are visually impaired and have additional disabilities, students who have CVI, and students who are dual media learners or who have been print readers now acquiring braille skills. Pre-Requisite course is IL 2529, Braille.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY

Minimum Credits: 3

Maximum Credits: 3

This fully on-line course is taken prior to IL 2750. It integrates relevant aspects of the process of teaching O&M (I. E., Sensory, cognitive) to individuals who are blind or with visually impaired who may also possess additional disabilities. In addition the history, philosophy, and aspects of professional ethics are covered. Service delivery models are discussed along with O&M resources, supervision, and program administration.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY

Minimum Credits: 3

Maximum Credits: 3

This fully on-line is taken prior to IL 2752. This course builds upon the knowledge students acquired in IL 2540 to understand assessment and instructional strategies for teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Aspects related to research in the field of O&M are also presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2542 - WEB CURRNT ISSUES & TRENDS SP ED

Minimum Credits: 3

Maximum Credits: 3

This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Online

TLL 2545 - EDUCATION OF CHILDREN WITH VI 2

Minimum Credits: 3

Maximum Credits: 3

This course builds on the concepts presented in IL 2531 for developing teaching methodologies and adaptation techniques for children who are blind or visually impaired who may also possess additional disabilities. Curricular and classroom adaptations and modifications are stressed with emphasis placed on teaching academic and functional skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2547 - NEMETH CODE/ABACUS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide instruction in the mathematical braille code (Nemeth code) as well as the Cranmer abacus. Students will be instructed in arithmetic computation and mathematical problem solving using both systems. Students will also learn instructional strategies to assist students who are blind or visually impaired to obtain mathematical literacy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2548 - SPECIAL TOPICS SPECIAL EDUCATION

Minimum Credits: 3

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2552 - STUDENT TEACHING-SPECIAL EDUCATION IN SECONDARY SCHOOLS

Minimum Credits: 3

Maximum Credits: 3

Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2561 - PROGRAMMING IN EARLY INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

Focuses on the development of curriculum and instructional strategies for children under five years of age with disabilities and their implementation in a variety of settings, including inclusive classrooms, home-based programs, and clinical settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2562 - ASSESSMENT OF YOUNG CHILDREN WITH DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

Focuses on the identification and assessment of children with disabilities under five years of age and the use of assessment information to plan programs for children in partnership with families and other professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2563 - SEMINAR: INCLUSION IN EARLY CHILDHOOD

Minimum Credits: 2

Maximum Credits: 3

This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals from other disciplines.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

Minimum Credits: 3

Maximum Credits: 3

This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2564 and 2565

TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3

Maximum Credits: 3

This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2564 and 2565

TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2564 and 2565

TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending

planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACH) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2575 - TRANSITION PROCESSES AND SPECIAL EDUCATION PROCEDURES

Minimum Credits: 3

Maximum Credits: 3

Course covers critical information related to transition and special education services for students with disabilities in secondary settings

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4

Minimum Credits: 2

Maximum Credits: 3

This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

Minimum Credits: 3

Maximum Credits: 3

This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in ABA I through ABA V. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2564 and 2565

TLL 2579 - TREATMENT FIDELITY AND COACHING: AUTISM

Minimum Credits: 3

Maximum Credits: 3

This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2505

TLL 2582 - WORKING WITH FAMILIES

Minimum Credits: 3

Maximum Credits: 3

Course focuses on understanding family systems theory and its application to early intervention, including the development of individualized family service plans. Family centered practices, cultural, ethnic, racial, educational, and economic diversity among families, and accessing community resources will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2505

TLL 2586 - AUTISM INTERVENTIONS IN SCHOOL AND COMMUNITY SETTINGS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to prepare graduate students to teach school-aged students with ASD in a range school and community settings, with a particular focus on interventions and strategies appropriate for inclusive classrooms. Through readings, presentations, class discussions, and activities, students will acquire information and skills needed to implement evidence-based interventions approaches to assessment and intervention for students with ASD. As part of the final project, students will develop and deliver an assessment-based intervention for one of the suggested outcome areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2505

TLL 2587 - SPECIAL TOPICS - INCLUSION

Minimum Credits: 3

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

TLL 2591 - LITERACY TUTORING

Minimum Credits: 1
Maximum Credits: 1

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 2594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1

Minimum Credits: 1
Maximum Credits: 3

This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2596 - INTERNSHIP IN SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 3

An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

TLL 2598 - DIRECTED STUDY IN SP ED

Minimum Credits: 1
Maximum Credits: 6

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2690 - RESEARCH SEMINAR ONLINE

Minimum Credits: 3
Maximum Credits: 3

This is a required three-credit course for graduate level students in education. It offers opportunities for students to investigate research questions, collect and interpret data and present research documents. Overall, students will be expected to write and submit a research proposal, conduct the research described in the proposal, and use information in the proposal to write a research paper that describes their research. Students will also write an abstract of their research paper.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

TLL 2691 - SUPERVISED RESEARCH - EARLY CHILDHOOD

Minimum Credits: 1

Maximum Credits: 3

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2698 - DIRECTED STUDY - EARLY CHILDHOOD

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

TLL 2700 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues in or about the arts that are of concern to educators.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2701 - FIELD SEMINAR: PRIMARY PLUS

Minimum Credits: 1

Maximum Credits: 1

Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Attributes: Asian Studies

TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2710 - ADVANCED SOCIAL STUDIES METHODS

Minimum Credits: 3

Maximum Credits: 3

This course explores and examines theoretical discourses and advanced methods and materials for improving social studies instruction in the secondary (grades 7-12) social studies classroom. Course content, procedures, and activities focus on effective strategies for engaging and teaching learners from diverse backgrounds and developmental levels. Approaches include investigation and analysis of constructionist ideas, student empowerment, historical thinking, historiography, global citizenship, real-world connectedness, and various technologies as they apply to teaching and learning in the secondary social studies classroom.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2711 - SPECIAL TOPICS - FOREIGN LANGUAGE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 2712 - HISTORICAL THINKING AND HISTORIOGRAPHY: SECONDARY SOCIAL STUDIES CLASSROOM

Minimum Credits: 3

Maximum Credits: 3

This online course is an examination of teaching strategies and techniques related to historical thinking and historiographical analysis in the secondary social studies classroom. Course participants will investigate recent research supporting historical thinking and historiographical analysis strategies and techniques, engage in various projects intended to increase their knowledge and skills in these strategies and techniques, and explore creative ways to enrich their own classroom instruction by getting students engaged in "doing" history.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Online

TLL 2722 - PRACTICUM IN FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 3

Prospective teachers experience the reality of teaching the foreign languages in a public school setting.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

TLL 2729 - PRACTICUM IN K-12 FOREIGN LANGUAGE 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction. In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1

Minimum Credits: 3

Maximum Credits: 3

This first part of this two part methods course, which is offered on-campus in summer two, is designed to introduce the student to the elementary level travel skills (e.g., Use of human guidance) and procedures (e.g., Sensory development) used when teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Students begin their knowledge of teaching travel skills indoors and gradually transition to the introductory level outdoor environment. Students wear simulation materials designed to fully or partially occlude vision while traveling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course is designed for students entering the teacher preparation program in mental and physical disabilities. Instruction concerning how to prepare for instruction, write lesson plans, and implement lessons is provided. Field observations and micro-teaching experiences are also provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2

Minimum Credits: 3

Maximum Credits: 3

This second part of a two part methods course, which builds upon the knowledge gained in IL 2750, is offered on-campus in summer two. It introduces the student to developing instructional strategies for teaching more complex o & m travel skills (e.g., Use of public transportation systems)

and procedures (e.g., Use of tactile maps) to individuals who are blind or visually impaired who may also possess additional disabilities who travel in a variety of indoor and outdoor environments. The course also covers teaching strategies for serving the o & m needs of children as well as adults through simulated teaching activities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

The focus of this online course is on designing assessment and instructional strategies for various populations of individuals who are blind or visually impaired. Specific populations to be examined include: persons with low vision, individuals with dual sensory loss (deaf blindness), infants and preschoolers, school-aged students, individuals with cognitive impairments, students with cortical visual impairments, and dog guide users.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Online

TLL 2780 - AUTISM ENDORSEMENT PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

As part of this practicum course, students will get practical experience working with students with ASD of various age groups in different educational and community settings. They will also get an in-depth experience at their primary practicum placement by working closely with a mentor teacher and a University supervisor on a variety of application-based projects. All practicum activities will be completed at an approved practicum site (E.G., Autistic support classroom in a public school; general education classroom). Students will acquire competencies related to assessment, intervention, and collaboration with professionals, families, and community organizations. The practicum meetings will be used for group supervision and sharing of the experiences, ideas, and challenges with a team of peers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: IL 2505 and 2586

TLL 2791 - SUPERVISED RESEARCH -FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 3

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED

Minimum Credits: 1

Maximum Credits: 10

Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2803 - STUDENT TEACHING SEMINAR - PRIMARY PLUS

Minimum Credits: 1

Maximum Credits: 1

This course supports student teaching. Students work on topics such as instructional management, behavior management, lesson planning, addressing student needs for the department of education.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

TLL 2804 - STUDENT TEACHING - PRIMARY PLUS

Minimum Credits: 2

Maximum Credits: 5

This is a 14-week student teaching experience under the guidance of a mentor teacher and a supervisor from the university. Students are expected to learn to plan for and teach all four elementary subject areas for an extended period of time during the course of the term. Towards the end of the term, the student teachers are also expected to take on primary teaching responsibility for all subject areas for two weeks.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3

Minimum Credits: 3

Maximum Credits: 3

This course builds upon teaching and learning in secondary English language arts 2 by emphasizing the role of assessment, long-term curricular planning, language and grammar instruction, process drama, and technology in effective English language arts instruction. The course will also introduce current controversies in English language arts instruction and ways that teachers can address them. Teacher candidates will have opportunities to develop instructional plans and practice teaching techniques while receiving feedback from peers and the course instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 2822 - INTERNSHIP IN FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 10

Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad LG/SU3 Basis

TLL 2824 - STUDENT TEACHING SEMINAR

Minimum Credits: 1

Maximum Credits: 3

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2826 - STUDENT TEACHING SEMINAR-FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 2

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Attributes: Global Studies

TLL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the development and support of learning contexts in which adolescents have opportunities to engage in challenging social studies learning. Drawing on cognitive change learning theory, teacher candidates learn to select and develop various assessments that reveal students' thinking and to draw upon their understanding of students' ideas to scaffold learning experiences in the classroom. Emphasis is placed on instructional strategies that build and support students' capacity to engage in powerful social studies discourse.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 2

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad LG/SU3 Basis

TLL 2834 - SPECIAL TOPICS - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2842 - STUDENT TEACHING SEMINAR-MATHEMATICS

Minimum Credits: 1

Maximum Credits: 3

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2843 - STUDENT TEACHING SEM - SCIENCE

Minimum Credits: 1

Maximum Credits: 2

A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2845 - PRACTICUM IN SECONDARY SCIENCE

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

TLL 2850 - PRACTICUM - PRESCHOOL

Minimum Credits: 1

Maximum Credits: 3

This course involves direct contact with preschoolers with disabilities. Students are placed in various types of supervised community settings where preschoolers with disabilities and their families are served. A seminar will be held weekly.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

TLL 2852 - PRACTICUM - INFANTS & TODDLERS

Minimum Credits: 1

Maximum Credits: 3

This course involves direct contact with infants and toddlers with disabilities. Students are placed in various types of supervised community settings where infants and toddlers with disabilities and their families are served. A seminar will be held weekly.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES

Minimum Credits: 2

Maximum Credits: 6

Teacher candidates engage in fieldwork five days a week in school sites with students with high incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2854 - STUDENT TEACHING WITH LOW INCIDENCE OF DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

Teacher candidates engage in fieldwork five days a week in school sites with students with low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

Minimum Credits: 6

Maximum Credits: 6

Full or part-time clinical experience, minimum 350 clock hours of direct instruction is necessary to fulfill this course requirement. Students must be supervised by an on-site, full-time ACVREP certified O&M specialist, with supplemental support provided by university faculty. Placements are arranged by the vision studies program faculty. Students must be able to demonstrate teaching competence with a variety of individuals who are blind and visually impaired (i.e., Ages, cognitive level), as well as teaching competence in a variety of environments (i.e., Simple as well as complex travel settings) successfully in order to apply to take the national certification exam in O&M.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION

Minimum Credits: 2

Maximum Credits: 2

This weekly seminar is offered concurrently with the full-time student teaching requirement. The seminar permits teacher candidates to discuss and process situations and problems as they arise in the field and assists teacher candidates in the completion of program and student teaching requirements. A focus on the preparation of a professional portfolio prepares teacher candidates for the job search and interview process.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

TLL 2860 - PRACTICUM IN SPECIAL EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher. Teacher candidates will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment, and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

TLL 2861 - PRACTICUM IN SECONDARY SPECIAL EDUCATION - SPECIAL EDUCATION TEACHER PREPARATION

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher and will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. This practicum experience will support the completion of assignments from coursework

as well as prepare teacher candidates for the full-time student teaching experience.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC

Minimum Credits: 1

Maximum Credits: 9

School-based practicum for graduate students seeking teacher certification and the master of arts in teaching degree. Requires a half-time placement for the entire year under the supervision of a mentor. Interns observe, analyze, and practice basic teaching skills in different grade levels and subject fields.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad LG/SU3 Basis

TLL 2882 - INTERNSHIP - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 7

In this course, students engage in supervised field work in a local school district. Students co-plan with their assigned mentor teacher and receive feedback from a university supervisor.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Instruction and Learning (MAT)

Course Attributes: Global Studies

TLL 2883 - INTERNSHIP - SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 9

School-based practicum for students seeking teacher certification and the master of arts in teaching degree. Requires placement for the entire school academic year under the supervision of a mentor teacher. Interns observe, analyze, and practice basic teaching skills while teaching the social studies at the secondary level.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 2890 - ADVANCED TEACHING PRACTICUM

Minimum Credits: 1

Maximum Credits: 9

Course designed for students seeking additional field teacher certification. Includes a school-based practicum in accordance with the student's experience and interests.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

TLL 2891 - SUPERVISED RES - SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 6

The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 1

Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

TLL 2898 - DIRECTED STUDY - SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS

Minimum Credits: 3

Maximum Credits: 3

This course provides the foundation for teaching infants, toddlers, and preschoolers, in group settings in centers outside the home. Topics include developmentally appropriate curriculum and instruction, program design and implementation, legal compliance and program enhancement, family and community relations, professionalism, and advocacy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES

Minimum Credits: 2

Maximum Credits: 3

This interdisciplinary course focuses on the role of the professional in supporting families of young children with and without disabilities by linking them with formal and in formal community resources. The course explores rationale; family-centered principles; models and practices for supporting families; and considerations in the development of community resources. It surveys available resources through guest speakers, on-site visits, and the development of a resource directory.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the role of the professional in supporting families of young children (pre-k - grade 4), including families of children with disabilities and other diverse characteristics. Students will learn about family systems, including how family characteristics affect the development of children, how to communicate, interact, and collaborate with families in school settings, and how to link families with formal and informal community resources.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2928 - WEB LEGL & LEGISLTV FDS OF SP ED

Minimum Credits: 3
Maximum Credits: 3

This web-based course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Online

TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS

Minimum Credits: 3
Maximum Credits: 3

The student proposes, carries out, and prepares a careful report of a study Germane to the student's professional role.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 3002 - CLASSROOM DISCOURSE

Minimum Credits: 3
Maximum Credits: 3

The purpose of this course is to introduce students to the theoretical underpinnings, methodological concerns, and pedagogical implications of the study of classroom discourse ' the study of who can say what to whom, when and where, for what purposes, under what conditions, and with what outcomes in a range of classroom contexts. The course critically reviews empirical research on classroom discourse (both recent and classical investigations), and covers the accepted methods for conducting research on classroom discourse including different approaches to collecting, recording, and analyzing both verbal and nonverbal discourse. A range of theoretical approaches to analyzing discourse are also covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3003 - RESEARCH INTERVIEWING

Minimum Credits: 3
Maximum Credits: 3

This course is designed to introduce doctoral students to the theories and methodologies of research interviewing in the social sciences. The course introduces students to aspects of research interviewing such as designing research questions that can be answered through interview data, identifying potential participants, creating interview protocols, transcribing interviews, coding interviews, and recognizing the role/bias of the interviewer. The course will also teach students how to critically analyze the representation and use of interview data in educational research. Students are expected to read published studies, collect and analyze data from interviews, and critically evaluate various approaches in light of their own research questions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3004 - IDENTITY IN EDUCATIONAL SETTINGS

Minimum Credits: 3
Maximum Credits: 3

Recent approaches to conceptualizing and studying identity in complex social environments will be reviewed through course readings and discussions. The historical background of this work will also be addressed. Particular attention will be paid to the identity development of students who are often marginalized in educational settings. Qualitative and interpretive methods for studying identity will also be covered. Students will be

expected to actively participate in discussions and complete a term project (either a review of the literature or a small-scale study of identity formation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3007 - CULTURE AND COGNITION

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to the field of cultural psychology and its perspective on the language and thinking of children, adolescents, and adults. Research conducted from a cultural psychology perspective will be reviewed and applied to the assessment of the thinking, speaking, and acting of people from diverse ethnic, racial, economic, and national backgrounds. Instructional practices that have been employed with multicultural populations will be reviewed and evaluated. Students will be expected to actively participate in discussions and complete several short papers and one in-class presentation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3008 - EDUCATIONAL POLICY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 3009 - LEARNING SCIENCES AND POLICY WRITING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

TLL 3011 - THE STUDY OF TEACHING

Minimum Credits: 3

Maximum Credits: 3

Advanced graduate course for students interested in research on teachers and teaching. Covers mainstream and alternative paradigms, including behavioral, cognitive, and ethnographic modes of pedagogical inquiry. Offers a critical analysis of recent studies on the nature of expertise in teaching, and new approaches to teacher performance assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3012 - CRITICAL READING IN LANGUAGE LITERACY AND CULTURE 1

Minimum Credits: 3

Maximum Credits: 3

This course is part of a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 3013 - CRITICAL READINGS IN LANGUAGE, LITERACY, AND CULTURE 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 3014 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 1

Minimum Credits: 3

Maximum Credits: 3

This course is the first in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3015 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3016 - PHD WRITING SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course is a writing workshop designed to provide LLC Ph.D. students beyond their first year of study with regular feedback on their academic writing, including research articles, grant proposals, and milestone documents.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

TLL 3020 - INFORMAL LEARNING

TLL 3080 - DIRECTED STUDIES - LSAP

Minimum Credits: 1

Maximum Credits: 6

Student pursues study of various topics under direction of faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

TLL 3081 - DOCTORAL DISSERTATION RESEARCH IN LSAP

Minimum Credits: 1

Maximum Credits: 18

Student plans and completes a doctoral dissertation under the guidance of the dissertation advisor.

Academic Career: Graduate

Course Component: Full Time Dissertation

Grade Component: Grad SN Basis

TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION

Minimum Credits: 3

Maximum Credits: 3

Knowledge management considers knowledge as a strategic asset within emerging contexts. Using technologies and systems, KM deals with the policies, tools and practices that an organization uses to classify, produce, implement, and safeguard information. Contemporary school districts and non-profit organizations are increasingly dedicating resources to knowledge management in their educational, business, technology, and human resource operations. Knowledge management focuses on organizational goals such as improved student performance, data management, organizational development and innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3091 - SUPERVISED RESEARCH - SCIENCE

Minimum Credits: 1

Maximum Credits: 6

The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

TLL 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 3

Provides an opportunity for the student to gain practical experience and demonstrate the knowledge, skills, and competencies obtained during the process of the training program in educational administration. It also furnishes the context of reality within which the student may acquire additional knowledge skills, and competencies as theory translated in the working world of the school system.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

TLL 3096 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course examines ideas that lie at the intersection of research in mathematics and science education, curriculum research, and education policy. Specifically, the course will focus on research that is or will become relevant for the new policy climate created by the common core state standards (CCSS) and the next generation science standards (NGSS). We will begin by examining the CCSS and NGSS, analyzing their similarities and differences from past standards, and chronicling the assessment and curricular activities that have followed in their wake. We will then identify ways in which research conducted during past standards-based eras (e.g., the first and second cycles of NCTM standards; state standards in the NCLB era) can inform the direction of state and district policies surrounding curriculum and assessments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3097 - SUPERVISED RESEARCH

Minimum Credits: 1

Maximum Credits: 6

Student demonstrates ability to apply research skills by planning and completing a research project under the direction of an appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3098 - DIRECTED STUDY - SCIENCE

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

TLL 3099 - DOCTORAL DISSERTATION RESEARCH - SCIENCE

Minimum Credits: 1

Maximum Credits: 15

The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This is a required course for all students in administrative studies which reviews and analyzes major issues and the means for managing institutional resources in education. Emphasis is placed on fiscal, human, and physical resources in both basic and higher education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3102 - TEACHING PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

Practicum will entail curriculum planning; co-teaching; office hours; grading; weekly planning for course activities coinciding with course readings; and facilitating in-class discussions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES

Minimum Credits: 3

Maximum Credits: 3

Schools have a responsibility for students' health and safety while they are at school. Students who successfully complete this course will demonstrate their knowledge of research-based approaches to apply in accordance with Pennsylvania law in the areas of health, mental health, safety, and crisis management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Minimum Credits: 3

Maximum Credits: 3

This course presents a review of organization theories as they apply to schools and universities. Topics include organizational typologies, competing models of organizational structure, organization-environment linkages, and the evaluation of organizational effectiveness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: LG/SU3 Elective Basis

TLL 3248 - SPECIAL TOPICS-LANGUAGE AND LITERACY

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 3291 - SUPERVISED RESEARCH-LANGUAGE, LITERACY, AND CULTURE

Minimum Credits: 1

Maximum Credits: 6

The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

TLL 3295 - DIRECTED STUDY IN LANGUAGE, LITERACY, AND CULTURE

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Minimum Credits: 1

Maximum Credits: 9

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Full Time Dissertation

Grade Component: Grad HSU Basis

TLL 3298 - DIRECTED STUDY - READING

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3299 - DOCTORAL DISSER RES - READING

Minimum Credits: 1

Maximum Credits: 15

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

TLL 3391 - SUPERVISED RESEARCH IN LLC

Minimum Credits: 1

Maximum Credits: 9

The student works collaboratively with a sponsoring faculty member in carrying out a research project.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

TLL 3398 - DIRECTED STUDY IN LLC

Minimum Credits: 1

Maximum Credits: 6

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

TLL 3399 - DOCTORAL DISSERTATION RES IN ENG

Minimum Credits: 1

Maximum Credits: 18

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

TLL 3452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1

Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

TLL 3470 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

In this course students will draw on the research literature and their own professional experiences to examine current practices of large- and small-scale assessment and teacher evaluation in mathematics and science education - both historically and in terms of their forms and purposes in today's educational and political climate. Current research and practice will be examined with respect to equity, theories of learning, methodology, and policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3471 - INSTRUCTIONAL ISSUES IN MATH AND SCIENCES EDUCATIONS

Minimum Credits: 3

Maximum Credits: 3

The aim of this course is to introduce students to current approaches to understanding and studying instructional practices in mathematics and science education. A historical perspective on the use of observations to document effective teaching will be reviewed. Students will be introduced to recent research on increasing students' agency, authority, and accountability through classroom discourse. Additional topics will include: the impact of high cognitive demand tasks on student learning and fostering equity in instruction. Students will apply course readings to the analysis of classroom artifacts and videotapes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3474 - COLLEGE SCIENCE TEACHING PRACTCM

Minimum Credits: 3

Maximum Credits: 3

Issues associated with higher education in the science disciplines are explored to develop a perspective for the college science instructor. Supervised teaching handout preparation, cognitive patterns of the adult, and evaluation of learning are studied.

Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad HSU Basis

TLL 3475 - PROFESSIONAL LEARNING IN MATH-SCIENCE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3476 - ASSESSMENT & EVAL IN MATH & SCIENCE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
International, national, and local perspectives on mathematics assessment will be presented. Areas include classroom and large-scale assessment and curriculum and program evaluation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

TLL 3491 - SUPERVISED RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 3498 - DIRECTED STUDY - MATH

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 3499 - DOCTORAL DISSERTATION RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

TLL 3501 - WEB FINANCING SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 1
This web-based course is designed to provide prospective special education supervisors with an overview of the development and content of

mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Attributes: Online

TLL 3509 - ADV SEMINAR: EARLY INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

This course will acquaint students with the latest research in early education and will apply those findings to infants, toddlers and preschoolers with disabilities.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

TLL 3526 - PRACTICUM IN COLLEGE TEACHING

Minimum Credits: 1

Maximum Credits: 3

Students prepare and teach a course under the direct supervision of a faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

TLL 3536 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Course covers single subject research methodology applied in studies involving exceptional populations.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

To develop successful educational innovations, a systems view must be taken, analyzing instructional goals, constraints and resources, considering alternative approaches to conveying ideas, motivating students, and guiding students to instructional objectives. Students will work in teams to enact an innovative educational design process with real projects and real clients. In the past, educational systems being (re)designed included museum exhibits, high school robotics units, afterschool digital literacy workshops, college lab courses, processes for selecting student assessments tools, and a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3541 - WEB INSTRNL PRACTICES SP EDUC

Minimum Credits: 3

Maximum Credits: 3

This web-based course focuses on the most current research on instructional practices for students with disabilities and prepares the prospective supervisor for what should be happening in special education classrooms and in the provision of special education services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Online

TLL 3542 - WEB CURRNT ISSUES & TRENDS SP ED

Minimum Credits: 3

Maximum Credits: 3

This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Online

TLL 3548 - SPECIAL TOPICS-SPEC EDUCATION

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within program.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 3564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

Minimum Credits: 3

Maximum Credits: 3

This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES

Minimum Credits: 3

Maximum Credits: 3

This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3

Maximum Credits: 3

This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN ABA

Minimum Credits: 3

Maximum Credits: 3

This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TLL 3569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACB) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad HSU Basis

TLL 3571 - SUPERVISION AND FINANCING OF SPECIAL EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course reviews problems and practices in special education supervision. Emphasis is placed in increasing interpersonal skills and developing technical skills in observing, planning and evaluating instruction. The course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade
Course Attributes: Online

TLL 3577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4

Minimum Credits: 2
Maximum Credits: 3

This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

TLL 3578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

Minimum Credits: 3
Maximum Credits: 3

This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in aba i through aba v. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 3564 and 3565

TLL 3579 - TREATMENT FIDELITY AND COACHING: AUTISM

Minimum Credits: 3
Maximum Credits: 3

This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505

TLL 3585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

TLL 3591 - SUPRVSD RESEARCH IN SPECIAL EDUC

Minimum Credits: 1

Maximum Credits: 9

The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

TLL 3592 - SUPERVISION PRACTICUM IN SP ED

Minimum Credits: 1

Maximum Credits: 3

The student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional supervision skills. This practicum may be completed in conjunction with the professional sequence of coursework in supervision at approved educational sites.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

TLL 3593 - RESEARCH PRACTICUM IN SPEC EDUC

Minimum Credits: 1

Maximum Credits: 3

Course is a field-based internship in research methodology. Purpose of the course is to provide opportunities for students to get hands-on experience and direct supervision in the development, implementation and dissemination of educational research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

TLL 3594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1

Minimum Credits: 1

Maximum Credits: 3

This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

TLL 3595 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Students will address selected topics for study.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3596 - INTERNSHIP IN SPECIAL EDUCATION

Minimum Credits: 1

Maximum Credits: 3

An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

TLL 3598 - DIRECTED STUDY IN SP ED

Minimum Credits: 1

Maximum Credits: 6

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3599 - DOCTRL DISSER RES - SPECIAL ED

Minimum Credits: 1

Maximum Credits: 15

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

TLL 3702 - SPECIAL PROJECT FOREIGN LANGUAGE EDUCATION PHD

Minimum Credits: 1

Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Attributes: Asian Studies

TLL 3791 - SUPERVISED RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 6

The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

TLL 3798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3799 - DOCTORAL DISSERTATION RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1

Maximum Credits: 15

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

TLL 3891 - SUPERVISED RES - SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 6

The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TLL 3898 - DIRECTED STUDY - SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 9

The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

TLL 3899 - DOCTRL DISSER RES-SOCIAL STUDIES

Minimum Credits: 1

Maximum Credits: 15

The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

TLL 3928 - WEB LEGL & LEGISLTV FDS OF SP ED

Minimum Credits: 3

Maximum Credits: 3

This course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Telecommunications

TELCOM 2000 - INTRODUCTION TO TELECOMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Introduction to telecommunications for non-TELCOM majors. Top-down orientation relates networking technologies to organizational goals and needs. Data communications and internet technologies and basic system performance analysis. TCP/IP, LANs, WANs, internetworking, and signals and communications media.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Information Science (MSI) or Telecommunications (MST)

TELCOM 2010 - COMPUTER NETWORKING LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and wlan performance and management, ip address planning and management, ip router configuration including RIP, OSPF, BGP, MPLS protocols, TCP connection control, stateful packet filtering, network monitoring and management, signaling protocols for voip services, and web-based services configuration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2011 - TELECOMMUNICATIONS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Exposure to the latest issues in the telecommunications industry and research through talks by invited experts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2100 - FUNDAMENTALS OF TELECOMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of network technology based on a layered protocol stack. Telephone network and internet architecture. Summary of upper layer protocols (HTTP, SMTP), transport protocols (UDP, TCP), and network protocols (IP). Analysis of link layer protocols and their performance. Overview of local area networks (CSMA/CD and CSMA/CA). Introduction to cables and signals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2110 - NETWORK DESIGN

Minimum Credits: 3

Maximum Credits: 3

Methods and techniques for the design of computer/telecommunication networks. Management and business perspectives on network design, estimation of traffic demand and application requirements, network cost analysis, topological design, capacity assignment, graph theory and optimization based design algorithms, virtual network design, network design tools, wireless network design issues, availability analysis and survivable network design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications TELCOM-MST/TCOMM-MST or Telecommunications Certificate TELCOM-AC/TCOMM-AC or Info Science PHD w/TELE option PHDTEL-TR)

TELCOM 2120 - NETWORK PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to techniques for performance modeling and analysis of computer systems and communication networks. Analysis of measurements, discrete event simulation and queuing theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course explores networks as a primary metaphor and mechanism for a variety of information-related phenomena. The advancement of interconnected information and communication technologies has made networks one of the dominant ways of analyzing the use and flow of information among individuals, institutions, and societies. The course starts with the basics of graph theory and moves to understand network structures such as social networks, ecological webs, it and infrastructure systems, telecommunications networks, and market distribution and allocation structures. As a prerequisite, students should have a command of mathematics through linear and matrix algebra at the Undergraduate level.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/ TELE option (PHDTEL-TR)

TELCOM 2215 - UNIFIED COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

After describing how humans communicate orally and visually, this course goes on to describe the technology and network architectures that provide audio and video telecommunications using conventional circuit-switched telephony, newer packet-switched "internet telephony" (VOIP), and streaming video over the internet. Basic knowledge of the physical layer is helpful, but students must be familiar with TCP/IP.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2227 - INTERNET TELEPHONY

Minimum Credits: 3

Maximum Credits: 3

Technology for offering telephony over an internet including: voice-over-IP end points and protocols, end-to-end delay, telephony signaling protocols, gateways and network components, telephone service provision, multi-point, network issues, and the future. Presents market, policy, and economic issues; differentiates VoIP on public or private internets.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) and 2200 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2310 - APPLICATIONS OF NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Foundational principles, architectures, and techniques employed in computer networks. Protocols and mechanisms used in the internet TCP/IP protocol suite, including the operation of both wide-area and local-area networks. Special emphasis on analysis of network and transport layer protocols.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: TELCOM 2200; or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2321 - WIDE AREA NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Basic principles of broadband networks. Protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and SMDS. Design issues for high speed networks including network characterization, application performance guarantees, traffic policing and congestion control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (NFSCI 1071 or TELCOM 2310) and TELCOM 2100; CREQ: TELCOM 2120; PROG: School of Information Science or Sch Computing and Information

TELCOM 2326 - ADVANCED TOPICS IN DATABASE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Advanced graduate course on database systems. Key issues that typically arise in the context of large-scale enterprise database management in heterogeneous wide-area environments including distributed and non-relational database systems, network-centric data management, web-based information systems, heterogeneous databases, information integration, and wireless data management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INFSCI 2710 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2420 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Techniques and tools to assist in the managing process. Uses case study approach.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS

Minimum Credits: 3

Maximum Credits: 3

For students with a basic background of telecommunications who are not for telecom majors. Principles of wireless communications and how they differ from wired communications. Fundamental concepts including: transmission and mitigation techniques (e.g., Modulation and coding, propagation, interference and antennas) for wireless systems, multiplexing techniques, wireless system architectures, mobility management, security, protocols and location technology. Systems include: cellular phone networks (e.g., Cdma2000, umts), wireless local area networks (e.g., Ieee 802.11G), personal area networks (e.g., Bluetooth), fixed point broadband wireless (e.g., WiMAX) and satellite systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2727 - APPLICATION DEVELOPMENT FOR MOBILE DEVICES

Minimum Credits: 3

Maximum Credits: 3

Focus on information system applications that run on top of wireless infrastructure such as multimedia messaging, mobile inventory control, location aware services including wireless technologies (gsm, cdma2000, umts, 802.11, Bluetooth), mobile information systems and applications (m-business, location-based services, wireless crn), wireless information system challenges and architectures (security, reliability, mobility, power conservation, gateways, proxies), mobile application protocols (SMS, ems, mms, wap), thin and thick client mobile application development (wml, vxml, Java, j2me, j2ee, .Netcf, c#), and business case studies of mobile applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: [(INFSCI 0017 or 0015 or CS 0401) and INFSCI 1052] or [PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Information Science PHD (ISCI-PHD)]

TELCOM 2810 - INFORMATION SECURITY AND PRIVACY

Minimum Credits: 3

Maximum Credits: 3

Fundamental issues and first principles of security and information assurance (confidentiality/privacy, integrity, authentication, identification, authorization, availability, access control). Business issues of risk analysis and management of resources. Issues in information systems security; analysis, design, and coding of information systems/ networks for security; techniques for building secure organizational systems; e-commerce related security issues; policy, legal and ethical issues in security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2811 - HACKING FOR DEFENSE

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing

to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3

Maximum Credits: 3

Security management in information systems and networks. Intrusion detection systems, anomaly detection, network forensics, application logging, auditing and data management, contingency planning, digital immune systems; alarm and responses; security standards; ethical and legal issues in information; cyber-evidence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or 2821 or INFSCI 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2820 - CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (des, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (rsa, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2821 - NETWORK SECURITY

Minimum Credits: 3

Maximum Credits: 3

Principles of network security and management. Review of network vulnerabilities, security at the link, network and transport layers; dial-up security (pap, chap, radius, diameter), ipsec, ssl, and vpns. Email security (PGP, S/MIME); Kerberos; x.509 Certificates; AAA and Mobile IP; SNMP security; firewalls; filters and gateways; policies and implementation of firewall policies; state full firewalls; fire wall appliances.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or 2820 or INFSCI 2150) and (TELCOM 2000 or 2100 or IS 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2825 - INFORMATION SYSTEMS AND NETWORK INFRASTRUCTURE PROTECTION

Minimum Credits: 3

Maximum Credits: 3

Techniques for the protection and survivability of information systems and networks. Critical infrastructure definition, risk management, vulnerability and risk analysis, fault and attack trees, availability analysis, traffic restoration schemes and survivable network design and management techniques; critical infrastructure simulation, CIP policy and legal issues, SCADA systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or 2810 or INFSCI 1070 or 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2829 - ADVANCED CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Algorithm complexity, advanced number theory (Galois fields, quadratic residues, zero knowledge schemes, one-time signatures), efficient implementation of encryption schemes in hardware and software and other advanced topics in cryptography.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2820 or INFSCI 2170) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2830 - CAPSTONE IN SECURITY

Minimum Credits: 3

Maximum Credits: 3

Integrative class for master's students in their final semester of the SAIS track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.

Academic Career: Graduate

Course Component: Lecture

TELCOM 2982 - TELECOMMUNICATIONS COOPERATIVE PROGRAM

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Theatre Arts

THEA 2000 - RESEARCH AND THESIS MASTER'S DEGREE

Minimum Credits: 1

Maximum Credits: 12

Individual research designed by the MA students in connection with their Master's Degree Thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

THEA 2100 - PEDAGOGY AND PROFESSIONALIZATION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

THEA 2110 - SECONDARY EMPHASIS - PEDAGOGY

Minimum Credits: 1

Maximum Credits: 3

The student will focus on an area of specialization designed to supplement foundational performance pedagogy. Under supervision and advisement from faculty, the student will choose an area of specialization (which may include voice, movement, advanced acting techniques, stage combat, directing, etc.) Based on their own present experiences and create a strategy and timeline for completion of chosen goals. The quantity of knowledge and experience to be achieved will be discussed between the advisor and student at the beginning of the course. The student will meet with their advisory on a regular basis and write a research or response paper summarizing and analyzing their experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2120 - PRODUCTION MENTORSHIP

Minimum Credits: 1

Maximum Credits: 6

The student will serve as actor, director, coach or other supportive function of a main-stage production at the University of Pittsburgh. This role will include active mentorship and teaching of undergraduate performers. Under supervision and advisement from faculty, the student will create a syllabus outlining their own research questions for their mentorship role on the production and how it may inform their own pedagogical practices. The student will write a research or response paper summarizing and analyzing their experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2135 - COURSE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Course content to be decided between teacher and student.

Academic Career: Graduate

Course Component: Practicum

THEA 2145 - DIRECTED STUDY-DRAMATURGY

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the dramaturgy in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2147 - TECHNIQUES PERFORMANCE PEDAGOGY

Minimum Credits: 3

Maximum Credits: 3

Techniques in Performance Pedagogy is designed for graduate students to address the unique needs of teaching theatre performance at the college level. Students will examine various Stanislavski-based training methods and compare those methods with physical and/or ensemble-based methodologies as they apply to university training programs (in a BA, BFA or MFA program). Students will formulate their own style and teaching philosophy as they develop lesson plans, create innovative pedagogical exercises, conduct warm up sessions, coach acting scenes and develop methods of grading performance work. In addition, students will create a sample master class in order to be competitive on the academic job market.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

THEA 2149 - PROFESSIONAL ORIENTATION

Minimum Credits: 1

Maximum Credits: 3

Experimental learning credits based outside of the university. Focus on some aspect of performance that substantiates the pedagogical experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2150 - DIRECTED STUDY-ACTING

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory, preparation and execution of acting in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2155 - DIRECTED STUDY - PEDAGOGY

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory and practice of education in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2160 - DIRECTED STUDY-DIRECTING

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory, preparation and execution of directing in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2168 - NEW PLAY PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

The New Play Practicum is an advanced course designed for theatre artists (playwrights, directors, actors, mainly though there is room for stage management duties) to try the new scripts produced by students in Playwriting 2 and in some cases from Playwriting 1. The scripts will be assigned in class, table-workshopped at first, and then assigned to teams. Most rehearsals will take place outside of class with the aim of presenting seated readings or staged readings as we can in lunchtime venues throughout the term. Teamwork is key. Each student will have several practical assignments; written assignments will be tailored to each student's needs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Attributes: Capstone Course

THEA 2170 - DIRECTED STUDY-SET, COSTUME, LIGHTS

Minimum Credits: 1

Maximum Credits: 9

Faculty directed supervision in the study of theory, preparation, and execution of design for the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2187 - DIRECTED STUDY - OBSERVATIONS IN PERFORMANCE PEDAGOGY

Minimum Credits: 1

Directed Study - Observations in Performance Pedagogy

Academic Career: Graduate

Grade Component: Grad Letter Grade

THEA 2200 - DIRECTED STUDY-HISTORY,LITERATURE,CRITICISM,THEORY

Minimum Credits: 1

Maximum Credits: 12

Faculty directed supervision in the study of history, literature, criticism and theory of the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2201 - MATERIALS AND METHOD RESEARCH FOR THEATRE

Minimum Credits: 3

Maximum Credits: 3

Materials and Methods aims to introduce the research methods and tools appropriate for scholarly work in theatre and performance studies.

Throughout the semester, students will be introduced to several of the primary genres of scholarly writing in the field and significant theoretical orientations current and controversial.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

THEA 2202 - THEORIES OF THEATRE AND DRAMA

Minimum Credits: 3

Maximum Credits: 3

This course covers a specialized topic in Theatre Arts. Topics vary every semester. Current course descriptions can be found in the notes section.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2204 - THEORIES OF ACTING AND DIRECTING

Minimum Credits: 3

Maximum Credits: 5

Students hone, diversify and/or solidify their directing craft through tude staging assignments and personalized, practical projects designed in consultation with the instructor. Students will engage with foundational director-driven, directing and devising texts in our field, from Brecht, Artuad, and Grotowski to Aikalitis, Bogart, and others, with particular attention to both practical and pedagogical application as well as critical evaluations of methods, cultural institutions, and representation. Students will gain facility with expectations of academic institutions and programs including, but not limited to: moving between roles of director, coach and acting teacher in production; scaffolding connections between rehearsal, performance and studio work; collaborating within an academic department; mobilizing community-academic and/or interdisciplinary engagement through production

work; practice as research; and standards for documenting, narrating and framing directorial work across institutional environments and positions (ie, as an MFA, a PhD, an MFA-PhD; at R1, liberal arts and/or community colleges).

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Minimum Credits: 3

Maximum Credits: 3

World Theatre 500 BCE to 1640 is the first in a three-part world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performances from the 5th century BCE to today. World Theatre 500 BCE to 1640 investigates histories of theatre and performance (scripts, embodiment, design, audiences, conventions, cultural functions, etc.) within local and global social, artistic and political contexts. The course focuses on evidence and interpretation as well as historical causation. Within each survey section, we will analyze and compare representative case studies to better understand performance as a practice and as a site of history making, with particular attention to questions of race, gender, sexuality, and class. Throughout the semester, we will explore a variety of theatre and performance forms, including Roman comedy, early Sanskrit drama, medieval commemorative drama, and Japanese theatre forms including Noh and Kabuki, among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. Students will produce historical knowledge about theatre and performance with respect to questions of racial, gender, sexual, and class diversity throughout the semester.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Attributes: Medieval & Renaissance Studies, West European Studies

THEA 2206 - WORLD THEATRE: 1640 TO 1890

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to the present. In World Theatre: 1640 to 1890 we will discuss the history of theatre arts which includes looking at drama, design, performance traditions and audiences--from the comedies of Restoration England to emerging realism of Buchner, Zola and Ibsen. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. In addition, we will discuss some contemporary scholarship examining these theatrical events.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Attributes: West European Studies

THEA 2207 - WORLD THEATRE: 1890-Present

Minimum Credits: 3

Maximum Credits: 3

This is the third in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to 1970. In world theatre: 1890 to 1970, we will discuss the history of the theatrical arts which includes looking at drama, design, performance traditions and audiences' from the late dramas of Ibsen to the plays of Beckett and Pinter. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. Our focus will be on western theatre with occasional references to non-western forms of performance and production. In addition, we will discuss some contemporary scholarship examining these theatrical events.

Academic Career: Graduate

Course Component: Lecture

Urology

URLGY 5321 - UROLOGIC ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is intended for the less experienced medical student to provide a hands-on experience in a surgical specialty. Students will be exposed to the urology service working closely with both attending and resident staff. Time will be spent in the outpatient clinic, operating room, and on the inpatient floors to provide exposure to all aspects of the practice of urologic surgery. The focus is on urologic oncology but students will also have exposure to patients with a wide range of general urologic diseases. The course objectives are: to learn to take a urologic history and perform a focused urologic physical examination; to develop experience in the performance of basic urologic procedures, possibly even to include cystoscopy; to become familiar with the proper evaluation and treatment of common urologic diseases such as prostate cancer, bladder cancer, benign prostatic hyperplasia, and urolithiasis; and to develop expertise in the role and interpretation of a wide array of imaging studies utilized in urology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 3

URLGY 5470 - UROLOGICAL SURGERY (ADULT)

Minimum Credits: 0

Maximum Credits: 0

Four-week clinical clerkships in urology. Rotations through more than one hospital may be elected. The clerkship stresses inpatient and outpatient experience as an acting intern.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

URLGY 5471 - PEDIATRIC UROLOGICAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week clinical elective. Student closely involved in evaluation and care of both inpatient and outpatient. Weekly pediatric urology/pediatric surgery/radiology conference will be attended in addition to weekly conferences. Student may participate in lab research.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

URLGY 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

URLGY 5810 - UROLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student to gain valuable experience in urological surgery. The student will be given the opportunity to learn research techniques and to participate in research in progress.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

URLGY 5899 - INDEPENDENT STUDY IN UROLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Course Attributes: School of Medicine Year 4

URLGY 5900 - EXTRAMURAL UROLOGIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in urologic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U
