

Graduate & Professional University Catalog 2022-2023

University of
Pittsburgh

Academic Calendar

University of Pittsburgh

ACADEMIC CALENDAR • 2022-23

Dates highlighted in yellow apply to all schools on all University campuses. Those in blue apply only to the Pittsburgh campus.

Official dates for degrees awarded apply to all schools on all University campuses. Specific dates affecting the professional programs in the Schools of Dental Medicine, Law, Medicine, Pharmacy, Health and Rehabilitation Sciences, and the Joseph M. Katz Graduate School of Business may be obtained from the appropriate Dean's Office.

* Employees covered by the collective bargaining agreements will be governed by the terms of those agreements.

NOTE: THE UNIVERSITY RESERVES THE RIGHT TO MAKE SUCH CALENDAR CHANGES AS IT DEEMS NECESSARY

 All Campus Dates

 Pittsburgh Campus Only

Mix-in: All, None

August 2022

Begins			Ends		Campus

University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to CS 07 Nondiscrimination, Equal Opportunity, and Affirmative Action Policy. For information on how to file a complaint under this policy, please refer to CS 07 Nondiscrimination and Anti-Harassment Procedure.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the humanities, sciences, and professions. A state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Johnstown, Greensburg, and Titusville; the regional campuses offer undergraduate programs only.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

- Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;
- Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;
- Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;
- Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;
- Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and
- Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh.

The recognition of graduate study at the University of Pittsburgh began with the awarding of Master of Arts degrees in 1836. By 1870, over 30 MA degrees had been awarded. These degrees were conferred for study beyond the Bachelor of Arts degree. In 1884, Chancellor Milton Goff set up a two-year professional study program leading to either a Master of Philosophy (predecessor of the Master of Science degree) or a Master of Arts degree and a three-year program leading to a Doctor of Philosophy degree. Before admission to these programs, each student was required to show proficiency in three areas of study. Both master's and doctoral candidates were required to prepare and defend theses.

In 1906, new rules were formulated for graduate study, requiring students to be in residence and requiring the completion of one year of study or 30 credits for the master's degree and three years or 90 credits for the doctoral degree. The catalogs of 1908 and 1909 announced the establishment of the Graduate School with five departments offering courses for the Doctor of Philosophy degree. These departments, plus five others, offered courses for the Master of Arts degree.

In 1910, a faculty committee drafted proposals, adopted by the board of trustees in 1913, making the Graduate School an independent administrative unit of the University and authorizing the selection of a Graduate Council. The Graduate School was grouped into three divisions (Humanities, Social Sciences, and Natural Sciences) in 1947. Until 1956, the administration of graduate study was the responsibility of the dean of the Graduate School

and the Graduate Council. At that time, the individual schools and the three divisions were given direct administrative responsibility for their graduate programs in accord with the regulations established by the University Council on Graduate Study—formerly the Graduate Council. In 1968, the dean of the Graduate School retired from his administrative role, and the position he had held was discontinued. General responsibility for the University's graduate programs was assigned to the provost pending reorganization of the University's graduate structure. The University Council on Graduate Study, the University administration, and members of the Graduate Faculty cooperated in drafting a proposed reorganization of graduate study, which was approved by written ballot by the entire Graduate Faculty and, in turn, accepted by Chancellor Wesley Posvar. This organizational structure became effective July 1, 1971, and is still the official structure.

Thus, during the 200-plus year history of the University, graduate education has grown to encompass the Dietrich School of Arts and Sciences and all 13 of the professional schools, which share a commitment to meet the nation's need for well-educated researchers, scholars, and leaders of professions and the tri-state region's need for trained professionals.

A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

Accreditation

The University of Pittsburgh is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. In addition, programs may be accredited by discipline-specific accrediting bodies. See Schools, Departments, and Programs section of this catalog for this information.

Web Address

For more information on the University of Pittsburgh, see the University's Web site at www.pitt.edu.

Organization of Graduate and Professional Education at the University

While the University Council on Graduate Study (www.pitt.edu/~graduate/ucgs.html), acting for the Graduate Faculty, develops minimum standards for graduate work throughout the University, the immediate responsibility for developing and administering graduate programs is assigned to the deans and Graduate Faculty members of the several schools and the Dietrich School of Arts and Sciences. This responsibility applies both to the traditional MA, MS, and PhD programs and to programs leading to advanced professional degrees, except for first-professional degrees (i.e., the MD, JD, LL.M., PharmD, and DMD). The provost has responsibility for the general supervision of graduate and professional programs, including first-professional degree programs, throughout the University, giving leadership to the deans and faculties in maintaining high standards of instruction and research.

Faculty are appointed to the Graduate Faculty by the provost upon recommendation by the dean on the basis of an appraisal by the faculty of a department or other appropriate faculty group. Graduate Faculty are competent in graduate instruction and in supervision of student research at all levels and are active in advancing knowledge through their own research.

Administrative Officers, Schools, and Campuses

Administrative Officers of the University of Pittsburgh

Douglas M. Browning, *Chair of the Board of Trustees*

Louis R. Cestello, *Vice Chair of the Board of Trustees*

Patrick Gallagher, *Chancellor and Chief Executive Officer*

Ann E. Cudd, *Provost and Senior Vice Chancellor*

Anantha Shekhar, *Senior Vice Chancellor for Health Sciences*

Geovette E. Washington, *Senior Vice Chancellor and Chief Legal Officer*

Narahari Sastry, *Senior Vice Chancellor and Chief Financial Officer*

David N. DeJong, *Senior Vice Chancellor for Business and Operations*

Rob A. Rutenbar, *Senior Vice Chancellor for Research*

Rosalyn E. Jones, *Vice Chancellor and Secretary of the Board of Trustees*

Jeffer Choudhry, *Chief Investment Officer*

Paul Lawrence, *Treasurer*

University of Pittsburgh Board of Trustees

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board's work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

Douglas M. Browning, *Chairperson*

Deans and Presidents of the University of Pittsburgh

Deans - Pittsburgh Campus

Eugene "Gene" Anderson, PhD, Dean Joseph M. Katz Graduate School of Business and College of Business Administration (effective, August 1, 2022)

Arjang Assad, PhD, Dean, Joseph M. Katz Graduate School of Business and College of Business Administration (serves as Dean until July 31, 2022)

Kathleen Blee, PhD, Dean, Kenneth P. Dietrich School of Arts and Sciences and the College of General Studies

Bruce Childers, PhD, Dean, School of Computing and Information

Anthony Delitto, PhD, Dean, School of Health and Rehabilitation Sciences

Jacqueline Dunbar-Jacob, PhD, Dean, School of Nursing

Elizabeth Farmer, PhD, Dean, School of Social Work

Nicola Foote, PhD, Dean, David C. Frederick Honors College

Valerie Kinloch, PhD, Dean, School of Education

Maureen Lichtveld, MD, MPH, Dean, School of Public Health

James Martin, PhD, Dean, Swanson School of Engineering

Amy Lynn Seybert, PharmD, Dean, School of Pharmacy

Anantha Shekhar, MD, PhD, Dean, School of Medicine

Carissa Schively Slotterback, PhD, Dean, Graduate School of Public and International Affairs

Amy Wildermuth, JD, Dean, School of Law

Presidents - Regional Campuses

Robert Gregerson, PhD, President, University of Pittsburgh at Greensburg

Richard T. Esch, President, University of Pittsburgh at Bradford and University of Pittsburgh at Titusville

Jem Spectar, PhD, President, University of Pittsburgh at Johnstown

Application for Admission

Graduate admissions to the University of Pittsburgh are handled by the particular graduate school or program; there is no central admissions office for graduate and professional schools at the University.

This section details only the University requirements and procedures for admission to the University. The Graduate Admissions Office of each school provides admissions information for prospective students to that school.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Graduate Admissions

Decisions regarding admission are based on an overall evaluation of all the credentials submitted by the candidate and in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Many departments or programs have a limited number of places available. Interested students should refer to the Schools, Departments, and Programs section of this catalog in addition to the general admission information provided here.

Application Procedures

Students seeking admission should apply online or call or write to the school or program of intended graduate study for application forms or information about applying online, instructions concerning the completion of all forms including the Application Data Form, and description materials. See the Schools, Departments, and Programs section of this catalog for contact information and Web site addresses.

The applicant should complete the online application and submit the application fee through the online payment system. If the applicant submits a paper application, he or she should return the completed application and a check for the application fee (payable to the University of Pittsburgh) to the department or school. Cash is not accepted for application fees.

Applicants must also request that the registrars of all undergraduate and any graduate schools attended send official transcripts of their records to the department or school of intended graduate study. In addition, many schools and departments require additional material. These materials may include any or all of the following: scores achieved on standardized examinations such as the Graduate Record Examination or the Miller Analogies Test, letters of recommendation, term papers written during previous study, evidence of work/life experience, evidence of motivation for graduate study, and a statement of career objectives. Applicants should arrange for a personal interview if requested by the department or school.

Application Deadlines

See the Schools, Departments, and Programs sections of this catalog for information about specific application deadlines, but note that students applying for fellowships and assistantships should file their applications at the earliest possible date. Applicants interested only in admission may be considered up to the deadline dates, but postponing applications may entail the risk that available spaces will be filled. Some programs admit students only for a particular term, so prospective students are encouraged to check with the school and program for specific admissions information.

International Graduate Student Admission

The admission of international graduate and first-professional students is processed by the school or department. Information about graduate and first-professional programs, access to the online application, deadlines, financial aid information, the admission requirements and procedures are available on the Web site of the school or department of intended study. Web site addresses may be found in the School, Department, and Programs section of this catalog or on the Graduate and Professional Website. International students are recommended to start the application process at least 12 months in advance of the intended term of enrollment.

International Student Academic Requirements and Credentials

The minimum requirement for admission to a graduate program is the completion of a bachelor's degree from a regionally accredited institution in the United States or the completion of education that the University of Pittsburgh deems comparable to a bachelor's degree from a regionally accredited institution in the United States.

Applicants are required to submit official original academic credentials. Official original academic credentials that are issued in a language other than English must be accompanied by a certified English translation. In cases where the transcript (grade report, academic record, examination results, mark sheet) does not attest to the awarding of a degree or an academic qualification, a certified copy of the original certificate or diploma awarding the degree or qualification must also be submitted. Certificates or diplomas that are issued in a language other than English must be accompanied by a certified English translation.

English Language Proficiency Requirements

International graduate students must possess proficiency in English at a level to enable them to succeed in graduate-level studies. The University of Pittsburgh uses the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) as a measure of having the necessary English language proficiency. Official test results are required if the applicant is a citizen of a country where English is not the official language of that country. The required minimum acceptable score for graduate admission for the TOEFL is 80 for the Internet-based test, 213 on the computer-based version or 550 on the paper-based test; or Band 6.5 on the IELTS (taking the academic writing and reading modules of the test). Some graduate programs may require higher test results. Only officially reported results of the TOEFL or IELTS are accepted in meeting this requirement. Applicants who are citizens of a country where English is the official language are exempt from submitting the results of the TOEFL or IELTS. In addition, applicants who have earned a bachelor's degree or higher degree from a regionally accredited institution in the U.S. are also exempt from submitting the results of the TOEFL or IELTS.

Students with a TOEFL score of less than 600 (250 on the computer-based test or 100 on the Internet-based test) or less than 7.0 on the IELTS must verify English language proficiency prior to completing registration by sitting for an additional Test of English Language Proficiency (TELP) administered through the English Language Institute. Individual schools or departments may require students with higher test scores to sit for this TELP. Based on the test results, students may be required by their academic department or school to take courses in English as a second language as part of their graduate program.

English Language Fluency for Teaching Assistants/Fellows

Teaching assistants (TAs) and teaching fellows (TFs) who are non-native speakers of English must be evaluated through a test designed to assess spoken English and English comprehension, approved by the Office of the Provost and administered by the English Language Institute (ELI). The Office of the Provost in consultation with ELI will establish minimum scores acceptable to permit a TA/TF to teach. Individual academic centers or departments may require higher scores than the established University minimums. All TAs/TFs with unsatisfactory scores on this test will be given non-teaching assignments and are required to take special course work until they attain a passing score. An unsatisfactory score at the time of reappointment is sufficient cause for nonrenewal of the student's TA/TF appointment.

Office of International Services

The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. OIS also provides generalized support in connecting the University's international community and their hosting departments with resources inside and outside campus. For more information, contact OIS at ois@pitt.edu or call 412-624-7120.

Process for Issuing Visa Documents for International Graduate Students

After an international student has been accepted and submitted their enrollment deposit, the school or department will inform the Office of International Services (OIS) of the student's intention to enroll. OIS will then contact the student directly to collect any documents required prior to issuance of the Form I-20 or Form DS-2019.

The deadlines for schools or departments to inform OIS of new students are:

- **Fall Term** - June 1
- **Spring Term** - October 1
- **Summer Term** - March 1

Immigration documents are mailed to the student in his/her home country, usually within 3 weeks of receiving all required information from the student.

Additional International Student Requirements

The University of Pittsburgh reserves the right, even after arrival and enrollment, to make individual curricular adjustments whenever particular deficiencies or needs of a student are identified. In such instances, students may be required to take, at their own expense and without receiving credit, courses in English language (see English Language Proficiency Requirements above) or courses prerequisite to their course of study to make up deficiencies.

It is strongly recommended that students arrive in Pittsburgh at least two weeks before the start of the term to allow sufficient time to make housing arrangements and to take part in the orientation program conducted by the Office of International Services.

Admissions Status

Admission may be granted or denied only by the dean of the school or his or her designee. However, non-immigrant students must meet U.S. Department of Homeland Security eligibility requirements for visa document issuance as determined by the Office of International Services. Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

Full Graduate Status

For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. This normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may take the PhD preliminary evaluation, take the MA/MS or PhD comprehensive examination, be considered for the award of an advanced degree or certificate, or be graduated.

Provisional Graduate Status

Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

A student on provisional or special status or on probation is not eligible to take the PhD preliminary evaluation, to take the MA/MS or PhD comprehensive examination, or to be graduated.

Special Status

Students may be granted temporary admission as "special status" under the following circumstances:

1. Students who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
2. Students who are not seeking an advanced degree but who have specific qualifications for one or more courses, including courses required for learning or certification, may register for such courses subject to review by the department and the dean of the school. Schools providing such an opportunity may specify the number of credits or courses for which a student may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the student is subsequently admitted to a graduate degree program.

See Schools, Departments, and Programs section for specific requirements connected to special status students.

Guarantees and Early Admission to Graduate and First-Professional Programs

Undergraduate students receiving an academic merit scholarship who indicate certain professional programs (including communication science, dental medicine, education, law, medicine, physical therapy, and public and international affairs) as their intended field of study on the Freshman Application to the University of Pittsburgh will be automatically reviewed for guaranteed admission into that professional program. Early application is recommended, as spaces are limited.

Exceptionally able undergraduate University of Pittsburgh students may be admitted to full graduate status if their graduate and undergraduate schools have approved early admission as a permitted option and have established standards and procedures, and if the student needs no more than 24 credits to complete the baccalaureate degree.

Tuition Deposit

Once a student is admitted to a program, some of the graduate and professional schools at the University of Pittsburgh require a tuition deposit to secure the student's place in the incoming class. Students should refer to the Financial Issues: Tuition, Fees, Loans, and Scholarships section or to the admissions information for their specific school to determine the amount required for the tuition deposit.

Deferred Admission

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Approval of a student's request to defer admission does not necessarily mean that any financial aid awarded is also deferred. See the Deferred Payments section of this catalog for more information on deferring financial aid.

Readmission

A student who has not registered for at least one credit or full-time dissertation study during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Inactive students cannot apply to graduate, nor take preliminary or comprehensive exams. Readmission is not automatic nor does it necessarily reinstate the student to the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements. Readmission is automatic, however, for students who receive prior approval for a formal leave of absence.

Changing the Field of Graduate Study

A student already admitted to graduate study and desiring to change a major department or school of graduate study must file an application for such a change in the office of the dean or the department of the school the student wishes to enter. The application for admission to the new department will be evaluated in the same manner as an application from a new student.

Admission to Graduate Study

An undergraduate degree is the minimal requirement for admission to graduate study. Students are admitted to a graduate program and granted one of the following three types of status:

1. **Full graduate status:** when all admission requirements are met;
2. **Provisional graduate status:** when some admission requirements are not (or inadequately) met;
3. **Special graduate status:** to take specific graduate-level courses for one or more terms.

All students, except those with temporary status, must apply either to the MS program or to the PhD program. Students admitted to the MS program are eligible to complete the requirements for that degree. If they wish to transfer to the PhD program, they must apply to the admissions committee, which will make its decision based on the student's performance in the MS program and on faculty recommendations.

Full Graduate Status

For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "Admission of Students from Other Countries." Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

Provisional Graduate Status

Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Special Graduate Status

Students may be granted temporary admission as "special status" under the following circumstances:

1. Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
2. Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

Application Instructions and Requirements

Apply Online

Applications for graduate study must be completed and submitted entirely online. You will be asked to set up a free account with the ApplyYourself Application Network, which enables you to work on your application over several sessions. Your information is transmitted through a secured server and is kept confidential until you submit your application.

We require you to upload copies of your undergraduate/graduate transcripts to ApplyYourself. We do not need official transcripts unless you are admitted.

We require at least three letters of recommendation, two of these must be from Professors (preferable with PhD's), especially if you are applying for a PhD degree. ALL LETTERS MUST BE SUBMITTED ONLINE. No paper recommendation letters will be accepted.

Your application will be available for review by the department once all the evaluator's letters are submitted and all the transcripts are uploaded.

We do require the GRE general exam although we do not have a minimum score requirement

The required minimum TOEFL score of 90 (with at least a score of 22 in each of the four sections of speaking, listening, reading and writing) will be required for applicants. The required minimum IELTS score of 7.0 (with at least 6.5 in each of its four sections) will be required for applicants. **If you do not meet the minimum TOEFL or IELTS scores, your application will not be considered for admission.**

For material that must be sent to the department directly (such as GRE and TOEFL scores) our institution code is: 2927. A department code is no longer required.

Begin the online application process.

Deadlines

- **January 15:** Fall admission. All application materials, including TOEFL and GRE results, must be received in the admissions office by February 28. International students cannot be admitted if materials are not received by the deadline.
- **September 15:** Spring admission. All application materials, including TOEFL and GRE results, must be received in the admissions office by September 15. International students cannot be admitted if materials are not received by the deadline.

Academic Regulations

Advising

The quality of education that graduate students receive is greatly enhanced with good academic advising at all stages of their program. Given the diversity of these needs, each school and program must determine the best way to provide these services. Each program should have a document describing its view of good graduate advising practices and a clear policy on how good graduate advising is assessed and rewarded. For more information on academic advising at the graduate level, see *Elements of Good Academic Advising*. Students are encouraged to consult with the individual school for school-specific advising services.

Allowable Credits

There are certain limitations on the credits that can be earned toward a graduate degree at the University of Pittsburgh. Those limitations are detailed below.

Acceptance of Transfer Credits

Students who have completed graduate courses in degree-granting graduate programs at other appropriately accredited institutions prior to admission to the University of Pittsburgh should submit official transcripts from those institutions at the time they apply so that the courses can be evaluated for transfer credit. In no case may the total number of credits transferred exceed the maximum number stated in the sections of this catalog pertaining to advanced degree requirements. For more detail, see credit requirement information in the sections on Regulations Pertaining to Master of Arts and Master of Science Degrees, Professional Master's Degrees, or Doctoral Degrees as well as the relevant program information in Schools, Departments, and Programs. Grades (and grade points) are not recorded for credits accepted by transfer.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA=3.00) or its equivalent has been received. No credit will be granted toward an advanced degree for work completed in extension courses, correspondence courses, courses delivered electronically, or those offered in the off-campus center of another institution unless those courses are approved for equivalent graduate degrees at that institution and the institution has an accredited program.

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their department and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Course Work Acceptable as Graduate Credit

A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate-level (master's-level) courses are numbered 2000-2999, and those at an advanced graduate-level (doctoral-level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least four courses (12 credits) or one-half the total number of credits submitted for the degree, whichever is greater, at the graduate level (2000 or 3000 series). Doctoral students must complete additional graduate-level courses as determined by their department or school. No lower-level undergraduate courses numbered 0001-1999 may be applied toward a graduate degree.

Credit by Course Examination

Some schools at the University offer credit by course examination. Each school authorized to offer graduate courses clearly specifies whether or not students may obtain credit toward a degree in this fashion and, if so, for which courses. A school granting graduate credit for life or work experience will do so only through the option of credit by examination.

Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 9 credits as a graduate student) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course

such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit pche-pa.org/.

Enrollment in Graduate Courses as an Undergraduate

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Registration (Enrollment)

Registering for Classes

After being admitted to a graduate program, students may register for classes during the enrollment period. The enrollment period for a term or session is published in the University's Academic Calendar.

Students registering for the first time are advised to complete the enrollment process well before the beginning of the term. Typically, the first day of classes is the last day for students to enroll. Students who enroll after the first day of the term will be assessed a late registration fee.

Most students have the ability to utilize self-service enrollment tools available through the Student Portal or Pitt PS Mobile. Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period.

Once students have enrolled they may view their class schedules online via the Student Portal or Pitt PS Mobile.

In 2021, The University established a COVID-19 Vaccination Policy. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_29.pdf.

Full-Time and Part-Time Study

Students must be officially admitted to the University to be eligible to register for classes. Graduate students who register for 9 to 15 credits in the fall or spring term are full-time students and are assessed the tuition rate for their school (for detail, see www.ir.pitt.edu/tuition). A school may require students enrolled in a degree program to register for more than 9 credits. Students who register for fewer than 9 credits are part-time students and are billed on a per-credit basis. During the summer term and summer sessions, most students are billed on a per-credit basis regardless of the number of credits taken. At the Joseph M. Katz Graduate School of Business, full-time MBA students are billed a flat rate in the summer term (since this is a one-year program, tuition is spread over three terms).

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for full-time dissertation study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for paying the full-time computer and network, security/transportation, wellness, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.

Maximum Credits Per Term

No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Exceptions include the following:

- The Joseph M. Katz Graduate School of Business allows its full-time MBA students to register for up to 18 credits in the fall and spring terms before additional per-credit tuition charges apply.
- The School of Computing and Information allows its graduate students to register for 16 credits in a term before additional per-credit tuition charges apply.
- The School of Law has no maximum number of credits in its first-professional programs for billing purposes, but permission of the associate dean is required to register for more than 15 credits per term.
- The School of Public Health allows students pursuing the Master of Health Administration or the Master of Public Health in environmental and occupational health to take up to 16 credits during their first year of study.
- The School of Social Work allows its students to register for 16 credits in the fall term before additional per-credit tuition charges apply.

Individual schools and departments may restrict the maximum credit load for programs of any or all of their graduate students.

Registration Status at Graduation

All graduate students must register for at least 1 credit or full-time dissertation study during the 12-month period preceding graduation (that is, must be on active status). Waivers may be requested by submitting a written request to the University Registrar from the dean of the school. The request should be based on extenuating circumstances, e.g., inability of the student's dissertation committee to meet during the final term when a student has given reasonable notice or the student has completed all degree requirements in a previous term. Waivers will not be granted to students who are inactive.

Inactive Status

Students who have not registered for at least 1 credit or full-time dissertation study (eligible doctoral students) during a 12-month period are transferred to inactive status and must file an application for readmission to graduate study (application fee required) before being permitted to register again. Students on inactive status cannot apply to graduate or take preliminary or comprehensive examinations. Also, students on inactive status are not eligible to use University facilities and should not expect to receive counseling from the faculty or active supervision by their advisor and committee.

Adding and Dropping Courses

Students may add and drop courses only during the add/drop period. The dates for the add/drop period are listed in the University's Academic Calendar. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course or Resigning from the University.

Auditing Courses

With the consent of the school and instructor, students may choose to audit a course. To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.

Registering for Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Normally, such students should be enrolled for no more than a total of 15 credits per term. Special approvals and regulations apply before a student is allowed to register for courses in pursuit of two independent graduate degrees. See discussion in Special Academic Opportunities for further detail.

Registering for Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. Before registering for courses in pursuit of a cooperative, dual-degree, or joint-degree program, a student must be admitted to both programs. See discussion in Special Academic Opportunities for further detail.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade **W** will appear on the student's transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may withdraw from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Grading and Records

GPA

The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. The value averages the total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

Academic Standards

An average of at least B (GPA=3.00) is required in the courses that make up the program for any graduate degree. Students with full graduate status are automatically placed on probation whenever their cumulative GPA falls below 3.00. Each school determines the restrictions placed on a student on probation. See Probation, Suspension, and Dismissal for further detail.

A student on provisional or special status or on probation is not eligible to take the PhD preliminary evaluation or the MA, MS, or PhD comprehensive examination, or to be graduated.

Grading System

The University of Pittsburgh has a standard letter grade system (see Letter Grades below). Some additional grading options are available in some courses as determined by the school and the instructor (see sections below on University Grading Options and Other Grades). Students are subject to the grading system of the school in which they are taking the course.

University Grading Options

Individual schools may elect to offer one of the following grade options for its courses:

LG Letter Grade

H/S/U Honors/Satisfactory/Unsatisfactory

H/HS/S/LS/U Honors/High Satisfactory/Satisfactory/Low Satisfactory/Unsatisfactory*

S/NC Satisfactory/No-Credit (Formerly the S/N Option)

LG and H/S/U Letter Grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter Grade and Satisfactory/No-Credit

*This option is available for professional students in the School of Medicine only.

From among the grading options approved by the school, each department identifies those it deems acceptable for its courses. Furthermore, course instructors may specify, within the grading options approved by the school and department, which grading options may be selected by students taking their course.

Students should choose a grading option from those listed with the course in the Class Search function within the University's Student Information system. Grade Option/Audit Request forms for graduate courses are not required. Schools establish their own deadlines and procedures for processing grade option and audit requests.

Students receive the grade H or S for satisfactory work and U for unsatisfactory work. The grades H and S are counted toward graduation but not the student's GPA. The grades NC and U are not counted toward graduation or the GPA. The S grade indicates adequate graduate attainment; in evaluating thesis or dissertation research, an instructor may only use the S/NC grading option.

Students may audit a course and receive an N grade with the consent of the instructor and school offering the course. However, to audit a course, a student must register and pay tuition for the course. The N grade is not counted toward graduation or the GPA.

Letter Grades

The University's letter grade system for graduate and professional courses is as follows:

Grade Quality Points

A+	=4.00
A	=4.00 Superior Attainment
A-	=3.75
B+	=3.25
B	=3.00 Adequate graduate-level attainment
B-	=2.75
C+	=2.25
C	=2.00 Minimal graduate-level attainment
C-	=1.75
D+	=1.25
D	=1.00
D-	=0.75
F	0.00 Failure

Courses in the first-professional programs in law, dental medicine, medicine, and pharmacy may use different attainment standards.

Other Grades: Incomplete, Withdraw, Resign

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

I Grade

The I grade signifies incomplete course work due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade

The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Repeating Courses

A student may repeat any course, except as noted below. No sequence course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade. This also pertains to graduate and first professional students who have passed with a B or higher grade. No course may be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at the University of Pittsburgh. The grade earned by repeating a course is used in lieu of the grade originally earned.

The following calculations apply to all students at the University of Pittsburgh:

- The original course and grade remain on the transcript and/or the academic record, however, the grade and credits originally earned are not counted in the calculation of the QPA (prior to Fall term 2005) or the GPA.
- The repeated course does not increase the number of credits counted toward meeting the degree requirements unless an F is replaced by a passing grade.

W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the QPA (prior to Fall term 2005) or GPA. Incomplete grades (G or I) will not be identified as repeated courses until the course work is completed. Students may repeat a course no more than two times. Any grade earned in the repeated course will be posted to the academic record even if it is lower than the original grade. The repeated course must be the same in which the original grade was earned. In extenuating circumstances, a department chairman, with the dean's approval, may substitute another course of similar content. Course repeat forms must be submitted to the Office of the Registrar to affect grade replacement.

Grade Changes

The instructor of a course may change a student's grade by submitting a grade change through Grade Change Work Flow which can be found on the Faculty Portal. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via Student Portal at my.pitt.edu or via Pitt PS Mobile.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University Registrar. Upon graduation, the transcript reflects a student's degree and date, major, minor, or certificate, and, if applicable, honors, and area of concentration.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record may display additional course details, certain academic events and detailed advanced standing/placement/transfer credit information. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

Grade Report

Students can access their grades online via the Student Center at my.pitt.edu or via Pitt PS Mobile. Grade submission deadlines can be found in the University's Academic Calendar.

Academic Honors

Schools and programs may recognize academic achievement by students through fellowships, scholarships, and other awards. Students should consult with their individual school and/or program for more information.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 9 quality point credits and whose GPA falls below 3.00 will be placed on academic probation by the dean of their school. After a certain period of time on academic probation (the period is determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the school's probation system are available through that school. Students on probation are not eligible to take the PhD preliminary evaluation or the MA, MS, or PhD comprehensive examination, or to be graduated.

Effect on Financial Aid and Scholarships

Conditions for loan eligibility and many scholarships (including those for teaching assistants, teaching fellows, graduate student assistants, and graduate student researchers) usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counted toward the degree). Questions about the effect of unsatisfactory academic standing on loans should be directed to the Office of Admissions and Financial Aid in Alumni Hall (4227 Fifth Avenue) at 412-624-7488. Questions about the effect of unsatisfactory academic standing on scholarships, including teaching and research assistantships, should be directed to the particular graduate school.

Editorial Assistance and Publication of Theses/Dissertations

All graduate students must follow University regulations regarding editorial assistance and publishing of theses and dissertations as detailed below.

Editorial Assistance

A student preparing a dissertation or other written work as part of academic requirements may, when appropriate, use the assistance of professional editors, provided that the following rules are observed:

1. The student receives the approval of the research advisor or professor of the course in which written work is being submitted.
2. The student receives assistance only in use of language and not in the subject matter of the written work.
3. The student acknowledges and describes all editorial assistance in the report.

Publication of Theses and Dissertations

Any thesis or dissertation may be published, either by the University or through an outside agency, provided due credit is given the University. No form of publication, however, will relieve the student of his or her responsibility to fulfill the University's electronic theses or dissertation (ETD) requirements. Refer to the sections on Thesis Option or Dissertation and Abstract for specific requirements and to the ETD website at www.pitt.edu/~graduate/etd.

The doctoral candidate is required to execute an agreement with Proquest University Microfilms Inc. for the publication of the dissertation in the Proquest/UMI repository.

Advisors should exercise responsibility in approving research topics that will not endanger long-term research projects or the safety or welfare of informants. Dependent upon the circumstances and the research point at which the danger is recognized, the provost's office may authorize a delay in publication of a dissertation for up to a maximum of one calendar year. Similarly, a publication may be withheld for a maximum of one year, if required, for filing a patent application.

Regulations Pertaining to Master of Arts and Master of Science Degrees

The Master of Arts (MA) and Master of Science (MS) degree programs provide an introduction to scholarly activities and research and often serve as preparation for teaching careers. These degrees are awarded for the completion of a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the faculty of the department. To carry out this responsibility, each student must be assigned a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

MA and MS Requirements

The Master of Arts and Master of Science degrees normally require the satisfactory completion of approximately 30 credits of graduate study approved by the department or school. No Master of Arts or Master of Science degree program may require fewer than 24 course credits. No more than 6 credits may be granted toward the completion of the requirements for a master's degree for work completed at another accredited graduate institution or for work previously completed at the University of Pittsburgh. See Acceptance of Transfer Credits section for further information.

At least four courses (12 credits) or one-half the master's degree program, whichever is greater, must be at the graduate-level (the 2000 or 3000 series) and must be completed with an average grade of B (3.00). No course numbered below 1000 may be applied toward graduate degree requirements.

Some master's programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. Such areas of concentration or minors are added to the transcript upon the granting of the degree.

Master's degrees are conferred only on those students who have completed all courses required for the degree with an average grade of B (i.e., a 3.00 GPA).

The requirement of proficiency in second languages is at the discretion of individual departments or schools.

Departments provide students with a copy of school and departmental regulations appropriate for their program and/or maintain current and accurate Web sites covering this information. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Comprehensive Examination

MA or MS degrees are conferred only upon those students who, in one or more comprehensive examinations or the equivalent, show that they have mastered the general field of their graduate study. Each department or similar unit is responsible for specifying the content and procedure for administration of the comprehensive examination and will specify for each candidate the field of his or her examination, which may vary from student to student. When a program substitutes an equivalent requirement for the comprehensive examination, the department should notify the University Council on Graduate Study and describe the substitution.

Students on inactive, special, or provisional status or on probation are not eligible to take a comprehensive examination. These examinations must be taken at least one month prior to the last day of the term in which the degree is to be granted. The results must be reported promptly to the office of the dean but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a two-year period after passing the comprehensive examination may be re-examined at the discretion of the department program director, or dean.

Thesis Option

The requirement of a thesis or its equivalent is at the discretion of individual departments, programs, or schools. If a thesis is submitted, its form must be in accord with specifications stipulated in the ETD Format Guidelines. Each candidate must provide a suitable number of copies of the thesis for review and use as designated by the thesis examining committee, consisting of at least three members of the faculty recommended by the major advisor and approved by the department chair. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean. After the examination, the approved ETD must be deposited to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school. A receipt for the ETD processing/microfilming fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the Office of the Dean.

Non-Thesis Option

It is typical for a program to require additional course work if a thesis is not required.

For the Master of Arts degree, students must acceptably describe, in writing, one or more substantial intellectual experiences or accomplishments. In programs in which a master's thesis is optional, the student must satisfy this requirement by submitting a paper (or papers), as designated by the major department, and must demonstrate competence in using methods of scholarship.

For the Master of Science degree, a paper or research project is usually required.

Regulations Pertaining to Professional Master's Degrees

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. The program of study is a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major advisor, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

Professional Master's Degree Requirements

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of their general field of study. The professional master's degrees normally require the satisfactory completion of more than 30 credits of graduate study approved by the department. No professional master's degree program may require fewer than 30 credits. No more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution. (See Acceptance of Transfer Credits section for further detail.) At least one-half of the credits earned in a master's degree program must be at the graduate level (the 2000 or 3000 series). No courses numbered below 1000 may be applied toward graduate degree requirements. Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers as part of demonstrating their comprehensive mastery of their field of study.

Requirements vary from school to school. Departments provide students with a copy of school and departmental regulations or maintain current and accurate Web sites appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: (a) satisfactory completion of all course requirements and (b) other performances that indicate comprehensive mastery such as examinations, internships, research projects, theses, and practica. These requirements vary from school to school; students should refer to the specific requirements of their program in the Schools, Departments, and Programs section of this catalog.

Regulations Pertaining to Doctoral Degrees

While the regulations governing doctoral study in this section represent University-wide policy, students should check the Schools, Departments, and Programs section of this catalog and with their advisor for any expansions of or exceptions to these rules.

Admission to Doctoral Study

In some doctoral programs, the requirements for admission to graduate study and for admission to doctoral study are identical, while other programs require the completion of a master's degree or its equivalent as a prerequisite for admission to doctoral study. Admission to doctoral study does not include any implication concerning admission to candidacy for the Doctor of Philosophy degree.

Normally, only one major department of graduate study is permitted for the PhD degree. However, a few formal interdisciplinary programs and, under some circumstances, some independently designed interdisciplinary doctoral programs are available (see Interdisciplinary Doctoral Programs section).

Programs of Study

PhD programs offered at the University of Pittsburgh provide a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of the content, methods, theories, and values of a field of knowledge and its relation to other fields. Each program trains the student in the methods of independent research appropriate to the discipline and provides an advisor and a committee to guide the student in an extended investigation of an original and independent research project of significance in the field.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of the department or program. To carry out this responsibility, the departments or programs must ensure that each student has a major advisor who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. The advisor may prescribe additional courses both within and outside the department that are essential and/or appropriate to the student's program.

Some doctoral programs may include approved areas of concentration used to define and describe the student's training and expertise within the broader discipline. Such an area of concentration is added to the transcript upon the granting of the degree.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Normally, courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Students must maintain a minimum cumulative GPA of 3.00 in courses to be eligible to take the preliminary and comprehensive examinations as well as to graduate.

The requirement of proficiency in the use of second languages or other tools of research is at the discretion of individual departments or schools.

Departments or programs provide students with a copy of school and departmental regulations appropriate for their program and/or maintain current and accurate Web sites covering this information. In turn, students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The minimum 72-credit requirement for the PhD degree is met by six terms of registration as a graduate student for 12 or more credits per term or the equivalent number of credits taken in a reduced load over a longer period of time. If the school requires completion of its master's degree program prior to admission into its doctoral program, at least four terms of registration for 12 or more credits per term or the equivalent number of credits in a reduced load are required as a minimum for the PhD degree. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement; some schools have more stringent requirements, including the Dietrich School of Arts and Sciences and the School of Public Health, both of which will accept only 24 credits for a master's degree awarded by another institution.

In recognition of graduate study beyond the master's degree successfully completed elsewhere, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. (See also Acceptance of Transfer Credits section.) No more than 30 credits may be accepted for a previously earned PhD degree in recognition of master's degree work, though some schools have more stringent requirements.

Graduate students already enrolled may, when approved in advance by their department or program and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In all cases, at least three terms, or 36 credits, of full-time doctoral study or the equivalent in part-time study must be successfully completed at the University of Pittsburgh.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments.

Preliminary Evaluation

The preliminary evaluation should be designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The form and nature of the evaluation should be approved at the school level and described in the school catalog. It should be conducted at approximately the end of the first year of full-time graduate study. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. Evaluation results must be reported promptly to the dean's office, but no later than the last day of the term in which the evaluation occurs. A student on provisional, inactive, or special status or on probation is not eligible to take the preliminary evaluation.

Comprehensive Examination

The comprehensive examination should be designed to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline. In some programs, the comprehensive examination is combined with the overview or prospectus meeting. It should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the comprehensive examination be taken in the same term in which the student is to graduate. Examination results must be reported promptly to the dean's office but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. A student on provisional, inactive, or special status or on probation is not eligible to take the program comprehensive examination.

Doctoral Committee

Before the student is admitted to candidacy for the PhD degree, the student's major advisor proposes, for the approval of the director of the school's doctoral program and the dean, a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the doctoral committee. The majority of the committee, including the major advisor, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy. A published Graduate Faculty Membership Roster is updated three times a year.

This doctoral committee has the responsibility to advise the student during the progress of the candidate's research and has the authority to require high-quality research and/or the rewriting of any portion or all of the dissertation. It conducts the final oral examination and determines whether the dissertation meets accepted standards.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the committee should assess the student's progress toward the degree and discuss objectives for the following year and a timetable for completing degree requirements. It is the responsibility of the dean of each school to determine a mechanism for monitoring the occurrence of these annual reviews.

The membership of the doctoral committee may be changed whenever it is appropriate or necessary, subject to the approval of the department chair, or program director and the dean.

When a doctoral committee member leaves the University, the member must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a cochair must be appointed from within the department, and the restructured committee requires the approval of the dean and either the department chair or the director of the school's doctoral program. If the defense takes place within a few months of the chair's departure, the requirement of the cochair is usually waived.

Retired faculty members may remain as members or chairs of committees if they are spending considerable time in Pittsburgh or the vicinity and are still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a cochair (but not chair) of a newly formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the dean and either the department chair or the school's director of doctoral programs.

Overview or Prospectus Meeting

Each student must prepare a dissertation proposal for presentation to the doctoral committee at a formal dissertation overview or prospectus meeting. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation; prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. For example, if the research proposed in the overview or prospectus involves human subjects, that proposed research must be approved by the University Institutional Review Board (IRB) before it may be carried out.

Admission to Candidacy for the Doctor of Philosophy Degree

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must fulfill the following requirements:

- Be in full graduate status
- Have satisfied the requirement of the preliminary evaluation
- Have completed formal course work with a minimum grade point average of 3.00
- Have passed the comprehensive examination
- Have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee

In some schools, admission to candidacy is a prerequisite to registration for dissertation credits. Students are informed of admission to candidacy by written notification from the dean, who also states the approved doctoral committee's composition.

Registering for Full-Time Dissertation Study

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full-time on their dissertations may register for Full-Time Dissertation Study, which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee but are still responsible for the full-time computer and network, security/transportation, student health, and activity fees. Students must consult with the dean's office of their school for permission to register for full-time dissertation study.

Dissertation and Abstract

Each student must write a dissertation that presents the results of his or her research project. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. The dissertation must be relevant to an identifiable field as it is currently practiced, present a hypothesis tested by data and analysis, and provide a significant contribution or advancement in that field. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

A dissertation should demonstrate the following characteristics:

- The establishment of an historical context for the presentation of an innovative and creative approach to the problem, analysis, and solution
- A clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base
- A well-defined research design
- Clarity in composition and careful documentation
- Results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph
- Sufficient detail so that other scholars can build on it in subsequent work
- The preparation of the author to assume a position within the profession

If the dissertation is the result of a collaborative research effort, the project should be structured in such a way that the student's dissertation results from one clearly identified piece of work in which the student has unquestionably supplied the major effort. The contributions of the student and the other collaborators must be clearly identified.

Published articles authored by the student and based on research conducted for the dissertation study may be included in the dissertation if the student's department and school have a written policy that this is acceptable. In any case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. The student should be the sole or primary author of the published work. If the published articles were coauthored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. The ETD Format Guidelines gives instructions on incorporating articles into the dissertation.

Candidates for the doctoral degree must provide a suitable number of copies of the dissertation, as determined by the doctoral committee and school policy, for review and use during the final oral examination. The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the ETD Format Guidelines. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must deposit the approved ETD to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the dean's office of the student's school. At least two additional copies of the dissertation abstract, a receipt for payment of the dissertation processing/microfilm fees and any necessary paperwork must be submitted to the appropriate ETD Student Services Staff in the office of the dean of the student's school. The candidate is also required to execute an agreement with Proquest Information and Learning for the publication of the dissertation on microform and in an electronic format and submit the Survey of Earned Doctorates (Forms are available in the dean's office). Students should check with their school for any additional supporting documents and/or requirements.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation advisor and committee, but only for sound reasons of scholarship. Permission shall never be granted on the grounds of the student's inadequate command of English.

Final Oral Examination

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the *University Times* or the *Pitt Chronicle*. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the doctoral committee may be present during the final deliberations and vote on the passing of the candidate. A report of this examination, signed by all the members of the doctoral committee, must be sent to the dean. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the doctoral committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

Interdisciplinary Doctoral Programs

A student may be admitted into one of two types of interdisciplinary doctoral programs, generic and individualized.

Generic Programs

Generic programs are ongoing, formally structured, and approved doctoral programs. Admission to these programs follows the same procedures as those of departmental programs.

Individualized Programs

Individualized programs are specially designed to permit an exceptionally able student who has earned a master's degree or the equivalent to pursue an interdisciplinary doctoral program structured to satisfy his or her unique goals. Such students should apply to the dean of the school if the

departments involved in the proposed program are organized within one school or to the Provost if the departments are organized within more than one school. The student must satisfy the admission requirements of each of the departments or schools involved in the proposed program.

If the request is approved, the dean or the Provost, in consultation with the departments concerned, will designate five members from these departments to serve as an advisory committee. After these advisors meet with the student, a chief advisor is selected to assume responsibility for general guidance to the student. These advisors continue their responsibility until the student is admitted to candidacy for the PhD degree and may, if it is appropriate, continue as the doctoral committee for this student.

Other Research Doctoral Degrees

The University of Pittsburgh, through its professional schools, offers the following doctoral degrees in professional fields of study: Doctor of Education and Doctor of Public Health.

These doctoral degree programs are similar to those for the PhD in the degree of rigor required; the minimum total credit requirements and permissible transfer credits; the requirements for the successful completion of a preliminary evaluation and a comprehensive examination; the admission to doctoral candidacy; the nomination of a doctoral committee; the preparation of the dissertation and abstract; the publication of the dissertation; and the successful completion of the final oral examination. These doctoral dissertations are usually based on an in-depth empirical research project by the student and are intended to permit the student to apply relevant theory and knowledge as well as to demonstrate skills in analysis of a major problem and to contribute to the improvement of practice in the student's area of specialization.

Other Professional Doctoral Degrees

The University of Pittsburgh also offers professional doctoral degree programs for practitioners, including the JSD (Law), OTD (Occupational Therapy), DNP (Nursing), AuD (Audiology), DPT (Physical Therapy), PharmD (Pharmacy), and CScD (Clinical Science). These programs provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum or a clinical component. Each experience should have associated with it clear goals and objective, a statement of what skills the student should master, a statement how those skills will be assessed objectively by the academic program, and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met.

To attain the depth of knowledge and experience required by someone earning a doctorate, a minimum nine semesters of full-time study is required. Of this no more than one-third should be internships or clinical work. A comprehensive examination will be used to assess the student's mastery of a substantial and complex body of knowledge.

The minimum admission requirements must be the same as for all graduate programs at the University of Pittsburgh. In addition, the student must have completed a defined set of prerequisites so that all students will enter with required basic knowledge. A student must attain a 3.00 GPA in order to maintain good standing and be graduated.

Statute of Limitations/Leaves of Absence

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more stringent, but not less, than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional master's degrees, within five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years, or within eight years if the student has received credit for a master's degree appropriate to the field of study. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as

documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Graduation

Requirements for Graduation

Graduation requirements for MA, MS, professional master's, and doctoral degrees are described earlier in this catalog under the relevant sections detailing the regulations pertaining to each degree. In order to graduate from the University of Pittsburgh, a graduate student must be an active University of Pittsburgh student registered for at least 1 credit or full-time dissertation study within the past 12 months. See specific schools and programs for detailed information on degree and graduation requirements.

Application to Graduate

Students must file an application for graduation in the dean's office of their school early in the term in which graduation is expected. Each school establishes its own deadline by which students must apply for graduation. Students should check with their dean's office for the deadline. As noted above, students must be active. In exceptional circumstances, students who complete all the degree requirements at the end of a term but graduate in the next term may petition the dean of the school for a waiver of this registration requirement. The requirement that a student be on active status cannot be waived.

Prior to the end of the term in which they graduate, all doctoral candidates must submit to the dean's office a completed Survey of Earned Doctorates.

Certification for Graduation

The Graduate Faculty of the department or program evaluates the performance of the student. If that performance is satisfactory, a report should be submitted to the dean certifying that the candidate has satisfactorily completed all departmental requirements for a graduate degree. The dean, after confirming that the overall school and University requirements have been met, certifies the candidate for graduation.

Commencement

Candidates for graduation are encouraged to appear in person at the Annual Commencement Convocation, usually held the Sunday after the spring term ends. Although the degree is officially conferred at commencement, diplomas are mailed to graduates several weeks later.

Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see www.provost.pitt.edu/information-on/guidelines.html.

The information below summarizes several key University-wide policies affecting graduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. Individual schools have their own academic integrity policies, and students are encouraged to review these school-specific guidelines as well.

Affirmative Action and Non-Discrimination Policy

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion,

national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, and access to and treatment in University programs and activities. Additional information on this policy is available at http://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_07.pdf.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read *Acceptable Computing Access and Use*, available in campus computing labs or online at technology.pitt.edu/security/acceptable-computing-access-and-use for details.

Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

Copyright Policy

The University of Pittsburgh affirms that, except as specifically exempted by this policy, faculty, staff, and students are entitled to claim copyright ownership, including worldwide rights, in the following works authored by them: books, articles, educational course work, similar works that are intended to disseminate the results of academic research or scholarly study, popular fiction or nonfiction works, poems, musical compositions, and other works of artistic imagination.

The University has no proprietary interest in copyrightable materials produced by faculty, staff, or students under contract with entities external to the University (in which the faculty, staff, or students have no controlling or majority interest), except as specifically exempted by this policy.

Additional information on this policy is available at https://www.policy.pitt.edu/sites/default/files/Policies/Research-Innovation/Policy_RI_10.pdf.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or Guaranteed Student Loan program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities.

For complete text on this policy, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_04.pdf.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, visit https://www.policy.pitt.edu/sites/default/files/Policies/01-Administrative_and_Organization/Policy_AO_15.pdf.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself or herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition Note: In this policy, the definition of "faculty member" refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_02.pdf.

Family Educational Rights and Privacy Act

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Statement of Compliance Regarding Satisfactory Academic Progress (SAP) for VA Educational Beneficiaries - 38 US Code Section 3675(b)

This policy applies to students who are VA beneficiaries and is intended to prevent the submission of VA-claims ("certifications") for those students who are suspended. Specifically:

- In this instance, VA beneficiaries are defined as students receiving VA educational benefits under Chapter-30, Chapter-33, Chapter-35 and Chapter-1606, Title 38 U.S. Code.
- Students placed on academic probation at the end of the term may be certified for VA educational benefits for the subsequent term. If the student does not meet satisfactory academic progress in that subsequent term-defined as attaining a cumulative GPA at or above 2.00 for full-time students or attaining a cumulative GPA at or above 2.00 after attempting 12 additional credits for part-time students-the university will immediately suspend further VA certifications on behalf of the student.
- Students returning from one calendar year of suspension must re-apply for admission to the university. If accepted, those students may be certified for VA educational benefits.

Certification of Chapter-31 students will be at the discretion of the student's VA vocational rehabilitation counselor.

Statement of Compliance Regarding VA Educational Beneficiaries - 38 US Code Section 3679(e)

As a matter of policy, the University of Pittsburgh allows students identified as *covered individuals** to attend and participate in all course(s) of education for any given term in which the student has been certified for VA educational benefits. This policy includes those circumstances in which VA payment(s) for student tuition and fees is late or delayed for up to 90 days after date of certification. The University retains the right to impose late fees upon those students who incur or retain an outstanding balance beyond the amount of expected VA tuition & fee payment for the term.

It is school policy to request all beneficiaries of VA educational benefits-including covered individuals*-provide the following documentation as part of certification process:

- VA Certificate of Eligibility (COE) or Statement of Benefits as printed from the VA.gov website
- Completion of a certification request form (in hard-copy or on-line), which includes biographical information necessary for submission in the VA's IT system of record-VA-Once.

Failure to provide such documentation will result in the delay of any VA claim or certification.

* Note: VA defines a **Covered Individual** as any individual who is entitled to VA educational assistance under the VA's Vocational Rehabilitation and Employment program (38 U.S. Code Chapter 31) or the VA's Post-9/11 GI Bill® (38 U.S. Code Chapter 33).

("GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.)

Statement of Compliance Regarding the Johnny Isakson and David P. Roe Veterans Health Care and Benefits Improvement Act of 2020 - Section 1018

In accordance with the *"Responsible Education Mitigating Options and Technical Extensions Act"* or the "REMOTE Act" of 2021 to Section 1018 of the *Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020* (Public Law 116-315), the University of Pittsburgh provides a College Financing Plan (formerly known as Financial Aid Shopping Sheet) to every student who completes a FAFSA application including all VA beneficiaries.

Per Veterans Benefits Administration notification, "Isakson and Roe, Section 1018 Changes, dated June 13, 2022: The REMOTE Act affords the opportunity for schools to use the College Financing Plan (CFP), available through the U.S. Department of Education as a means to satisfy the requirements of section 3679(f). An Educational Training Institution that utilizes this form is providing sufficient consumer information, will be exempt from all section 3679(f) requirements, and does not need to apply for a waiver. An Educational Training Institution does not need to be participating in Federal Title IV Federal Student Aid to utilize the CFP to satisfy the requirements of section 3679(f).

Graduate Student Researcher Policy Statement

Graduate student researchers (GSRs) at the University of Pittsburgh are graduate students who are receiving financial support from research funds in return for duties performed to meet the goals for which the funds were awarded. The research performed is also normally an integral part of the student's research practicum experience, thesis, or dissertation. A primary goal of the appointment, from the point of view of both the University and the student, is to provide financial support to the graduate student. For additional Graduate Student Researcher Policy information see www.pitt.edu/~graduate/gsr.html.

Harassment Policies

Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment.

Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment, will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion. Any disciplinary action taken will depend upon the severity of the offense. For more information, see

https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_20.pdf.

Human Research Subjects: Institutional Review Board

The University of Pittsburgh is guided by the ethical principles regarding all research involving humans as subjects, as set forth in the report of the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research (entitled *Ethical Principles and Guidelines for the Protection of Human Subjects for Research* [the "Belmont Report"]).

All research at the University involving interventions or interactions with living individuals or the obtaining of their identifiable private information must be reviewed and approved by an Institutional Review Board (IRB) before the research will be allowed to proceed. For complete text of the IRB's policies and practices, see www.irb.pitt.edu or contact the IRB at 412-578-3424.

Patent Policy

A University student, during the student's period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Transfer and Intellectual Property at 200 Gardner Steel Conference Center and at https://www.policy.pitt.edu/sites/default/files/Policies/Research-Innovation/Policy_RI_10.pdf.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the research of science, and to society as a whole. The University's Research Integrity Policy is available online at https://www.policy.pitt.edu/sites/default/files/Policies/Research-Innovation/RI_07_Policy.pdf.

Smoking Policy

Smoking is prohibited in all University-owned and leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_21.pdf.

Student Code of Conduct

The Student Code of Conduct is an outline of the non-academic rights and responsibilities of University students. The code defines offenses against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System Office. For a copy of the code, please contact the Judicial System Office in 738 William Pitt Union at 412-648-7918 or see www.studentaffairs.pitt.edu/studentconduct.

Student Code of Judicial Procedures

The Office of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the Student Code of Conduct. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints should be filed here.

Judicial Affairs also conducts a Student Mediation Program and screens requests for contact of students.

Student Service Holds Policy

Access to many student services including registration and receipt of grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at https://www.policy.pitt.edu/sites/default/files/Policies/Academic/Policy_AC_62.pdf.

Teaching Assistant/Teaching Fellow/Graduate Student Assistant Policy Statement

Teaching assistants (TAs), teaching fellows (TFs), and graduate student assistants (GSAs) at the University are graduate students who are receiving support in return for specified duties while gaining teaching and teaching-related experience under the guidance of faculty mentors. Their primary objective, from the standpoint of the University and the individual, is to make steady progress toward an advanced degree. TA/TF/GSA appointment status is dependent upon graduate student status. The complete policy statement for TA/TF/GSAs is available at <https://www.gradstudies.pitt.edu/sites/default/files/assets/TATFGSAPolicy6-1-22.pdf>.

Use of Alcohol Policy

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, visit https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_24.pdf.

Graduate Student Researcher Position

Graduate student researcher (GSR) positions are awarded by members of the epidemiology faculty to selected doctoral program applicants who have been accepted by Pitt Public Health or current doctoral students desiring funding support. Applications for these positions may be submitted online and are available to all faculty for review. Responsibilities may encompass work related to students' individual dissertation preparation or may be based upon other projects. All positions provide students with invaluable opportunities to collaborate with faculty and colleagues, and acquire transferrable skills.

Candidates are identified by faculty based upon individual academic background and experience sought, and in some cases, comparable research interests. Those selected for interviews are contacted directly by faculty via phone or email. Most positions are awarded by the end of April prior to the beginning of fall term, although intermittent offers are extended during the summer months. Accepted doctoral program applicants who plan to matriculate in spring term may also apply for these positions.

The GSR program is competitive because of the great demand for positions. With this in mind, it is not possible for the Department of Epidemiology to offer positions to all who apply, and those not receiving this support should be prepared to provide their own sources of funding.

Program Description

Graduate student researchers in the Department of Epidemiology are doctoral degree candidates who are receiving financial support from research funds secured by faculty in return for duties performed to meet the goals for which the funds were awarded. Candidates interested in obtaining funding must apply for these positions.

Eligibility

Only accepted doctoral program (PhD) applicants or continuing doctoral students may be considered for GSR positions in the Department of Epidemiology. Master's program (MPH or MS) applicants and continuing master's degree students are not considered for these appointments. The department will review accepted doctoral program applicants for funding eligibility. However, due to the strong interest in funding and our available financial resources, not all applicants are offered funded positions. Applicants accepting their admission offers and matriculating may receive

funding in the future, although this cannot be guaranteed. Those not receiving GSRs when they begin their programs of studies should be prepared to provide their own sources of financial support for the entire length of time required to complete their degrees.

Application submission

Continuing Pitt Public Health students accepted to an epidemiology PhD program who wish to be considered for funding should contact the Student Services Manager and Program Administrator Lori Smith about how to proceed.

Effort and course registration requirements

GSRs are expected to devote twenty (20) hours per week to the research project from which they receive remuneration. GSRs must maintain a full-time credit load during fall and spring terms (9-15 credits) and must register for at least 3 credits or Full-Time Dissertation Research (FTDR 3999) if they qualify for it in summer term.

Appointments

GSR appointments range from one to two terms at a time (fall, spring). Summer term appointments are awarded individually. Appointment renewals are subject to satisfactory job performance and availability of funding support.

Stipend

The monthly stipend payment for a GSR is currently \$2,007.50.

Tuition Scholarships

GSRs will receive full tuition scholarships to cover up to 15 credits. Tuition scholarships will be renewed each period subject to satisfactory academic performance and continuing funding availability.

Health Insurance

GSRs will be provided individual coverage under the UPMC Health Plan for graduate students. Family coverage is available at an additional cost to the student.

Regulations Governing Graduate Study at the University of Pittsburgh

History of Graduate Study at the University of Pittsburgh

The recognition of graduate study at the University of Pittsburgh began with the awarding of Master of Arts degrees—two in 1836, one in 1845, three in 1848, and two in 1849. The record does not distinguish between earned and honorary degrees, but apparently 33 MA degrees had been awarded by 1870. These degrees were conferred for study beyond the Bachelor of Arts degree and before specific programs or minimum requirements for advanced degrees had been established.

This system continued until 1884 when Chancellor Goff set up a two-year professional study program leading to a Master of Philosophy or a Master of Arts degree and a three-year program leading to a Doctor of Philosophy degree. Before admission to these graduate programs, each student was required to show proficiency in three areas of study as tested by written and oral examinations. For admission to the Master of Arts program, each student was required to have completed the four-year Bachelor of Philosophy degree in the Scientific course. The Master of Philosophy degree was, in fact, the predecessor of the Master of Science degree. Students were permitted to study in absentia under the direction of the faculty, but were required to submit annually to a rigorous examination in all prescribed courses. In addition, both master's and doctoral candidates were required to prepare and defend theses.

Between 1885 and 1903, there were 25 Master of Philosophy, 34 Master of Arts, and ten honorary Master of Arts degrees awarded. Apparently, no Master of Philosophy degrees have been awarded since 1903. Three Doctor of Philosophy degrees were awarded in 1886 and a total of 31 had been conferred by 1915. Between 1888 and 1900 ten honorary Doctor of Philosophy degrees were awarded, but apparently none have been awarded since then.

In 1906, new rules were formulated for graduate study, requiring students to be in attendance and requiring the completion of one year of study or 30 credits for the master's degree and three years or 90 credits for the doctoral degree.

The catalogues of 1908 and 1909 announced the establishment of the Graduate School with five departments (Psychology and Education, English Literature, Chemistry, History and Political Science, Economics and Sociology) offering courses for the Doctor of Philosophy degree, and these plus five additional departments (Biblical Literature and Comparative Religion, Greek, Semitic Languages and Literatures, Biology, and Astronomy) offered courses for the Master of Arts degree. The program of studies for the MA degree required one major and a minor subject and the program for the PhD degree required one major and one or two minor subjects, one of which must be from outside the department of the major. A good reading knowledge of at least one modern foreign language was required to receive a graduate degree.

Three Master of Science degrees were awarded in 1907 although the first description of the Master of Science degree appeared in the 1910 catalogue: "The Master of Arts degree will be granted only upon completion of a course mainly literary in character; the degree of Master of Science after one mainly scientific." That catalogue lists 16 departments offering courses for master's degrees and ten offering courses for the Doctor of Philosophy degree. The language requirement became more specific: "A good reading knowledge of both French and German and of other modern languages necessary to carry on graduate work is required of each candidate for the PhD" and "of French or German, or both, for Master's degrees."

In 1910, a faculty committee drafted proposals, adopted by the Board of Trustees in 1913, making the Graduate School an independent administrative unit of the University and authorizing the selection of a Graduate Council. This Council was first appointed by the Dean of the Graduate School and later elected by the Graduate Faculty from the departments offering graduate work. It consisted of representatives from the nine departments offering graduate work at the time: education, economics, ancient languages, romance languages, chemistry, botany, mathematics and physics, geology, and physiology. In 1924, a change in procedure for the selection of the Council was instituted so that 13 faculty representatives were drawn from the following groups of departments: English, fine arts, foreign languages, physical sciences, natural sciences, social sciences, psychology, engineering, business administration, medicine, dentistry, and education.

In 1947 the Board of Trustees adopted resolutions recommended by the University Senate and the Graduate Council (1) grouping the schools and departments in the Graduate School into three divisions: the Humanities, the Social Sciences, and the Natural Sciences; (2) establishing criteria for membership in the faculty of the Graduate School; and (3) defining the Graduate Council and its functions as follows: "The Graduate Council shall consist of 12 full members of the faculty of the Graduate School, four from each of the three divisions of the Graduate School, and the Dean of the Graduate School as chairman, ex officio; the faculty members of the Council shall be elected by the full members of the faculty of the Graduate School of their respective divisions for a term of four years; and the Graduate Council representing the faculty of the divisions, shall be the policy-making body of the Graduate School."

Until 1956, the administration of graduate study was the responsibility of the Dean of the Graduate School and the Graduate Council. At that time, the individual schools and the three Divisions of the Academic Disciplines were given direct administrative responsibility for their graduate programs in accord with the regulations established by the University Council on Graduate Study-formerly the Graduate Council.

In 1968, the Dean of the Graduate School retired from his administrative role and the position he had held was discontinued. General responsibility for the University's graduate programs was assigned to the Provost pending reorganization of the University's graduate structure. The University Council on Graduate Study, the University Administration, and members of the Graduate Faculty cooperated in drafting a proposed reorganization of Graduate Study which was approved by written ballot by the entire Graduate Faculty, and in turn, accepted by Chancellor Posvar. This organizational structure became effective July 1, 1971 and is still the official structure. The procedures for nomination and appointment to the Graduate Faculty were approved in 1972 and revised slightly in 1977.

Thus, since the University's founding in 1787, graduate education has grown to encompass the School of Arts and Sciences and all 13 of the professional schools, which share a commitment to meet the nation's need for well educated researchers, scholars, and leaders of professions and the tri-state region's need for trained professionals.

Organization of Graduate Study at the University of Pittsburgh

Objectives

The first objective is to place the responsibility for planning and operating graduate programs in the schools and faculties which offer such programs. This arrangement will put the graduate student and his or her program under the immediate supervision of the teaching staff and administrative officers of his or her field of study.

The second objective is to provide a means of establishing and maintaining basic standards and requirements for graduate work throughout the University. It is believed that the advanced degree programs developed and administered by the various schools and faculties, though differing in details, should conform to certain fundamental principles of good practice.

The third objective is to create effective channels of communication within the graduate community and thus to ensure that all segments of the University are represented in the policy making process.

Definitions

Graduate programs: all programs of study leading to a master's degree, an advanced doctoral degree (e.g. PhD, EdD, DPH), or a graduate certificate.

Advanced degrees: all master's and doctoral degrees awarded upon completion of graduate degree programs as defined above.

Schools: academic units of the University headed by deans, having their own teaching staffs, and offering instructional programs leading to degrees.

Interschool programs: programs of graduate instruction and research offered cooperatively by Graduate Faculty members from two or more of the academic units defined above.

Graduate Faculty: members of the various schools who have been recognized and approved as qualified: (1) to teach courses carrying graduate credit, (2) to serve on examining committees for advanced degrees, and (3) to advise graduate students and direct their research.

Graduate student: a student who is enrolled in a graduate program as defined above.

Structure

I. Administration of Graduate Programs

1. Although the University Council on Graduate Study, acting for the Graduate Faculty, establishes minimum standards for graduate work throughout the University (III.B.1), the immediate responsibility for developing and administering graduate programs is assigned to the deans and Graduate Faculty members of the schools. This responsibility applies both to the traditional MA, MS, and PhD programs and to programs leading to advanced professional degrees. Specifically, the deans and Graduate Faculty members shall be responsible in their areas for graduate admission standards and requirements and the admission of graduate students; for advanced certificate and degree requirements; for selecting and maintaining a distinguished graduate faculty; and for recommending the awarding of advanced certificates and degrees.

2. The Provost shall have responsibility for the general supervision of graduate programs throughout the University, giving leadership to the deans and faculties in maintaining high standards of graduate instruction and research.
3. The Provost or a Vice Provost as may be designated shall serve as the administrative officer of the Graduate Faculty (see V.B., below).

II. The Graduate Faculty

FM Members of the graduate faculty have been recognized and approved as qualified to teach courses carrying graduate credit, to serve on examining committees for advanced degrees, and to advise graduate students and direct their research.

1. Membership in the Graduate Faculty shall be of two classes, "Regular" and "Adjunct." Regular membership shall be recommended for full-time faculty members or part-time, tenure stream members of the University faculty who are approved to direct graduate study and research at all levels. Adjunct membership shall be recommended for persons whose primary responsibility is outside the University but who hold a part-time faculty appointment and are approved to direct graduate study and research at all levels. Only Regular members shall be eligible for election to the University Council on Graduate Study, and only Regular members may cast votes in such elections.
2. Members shall be appointed to the Graduate Faculty by the Provost. When a person is recommended for initial appointment to a faculty position, the dean who makes the recommendation will indicate whether, on the basis of an appraisal by a departmental or other appropriate faculty group, the individual should be given Graduate Faculty status. A recommendation for Graduate Faculty membership will carry the implication that the prospective appointee is judged to be: (1) competent in graduate instruction and the supervision of student research and (2) active in advancing knowledge through his or her own research. If approved for Graduate Faculty status, a full-time appointee will become a "Regular" member. A highly qualified part-time appointee whose main employment is outside the University will become an "Adjunct" member. The official contract letter from the Provost to the new faculty member will specify the class of Graduate Faculty membership, if any, that has been awarded.
3. Members shall perform the following functions:
 1. Provide instruction, conduct examinations, and direct student research in graduate programs; and
 2. Serve on faculty committees and councils charged with the development of graduate programs and policies.
4. Prior to Council's taking final action, all legislation must be sent to the deans and the chairs of schools' graduate councils, who will distribute it to appropriate councils and to Graduate Faculty and forward comments back to Council. All members of the Graduate Council shall receive from the chair of the University Council on Graduate Study an annual report of actions taken by Council. On the recommendation of the Council or the Provost or on receipt by the Provost of a request signed by 30 Regular members of the Graduate Faculty, legislation approved by Council which reflects a major change in policy shall be submitted for approval by a mail ballot to all members of the Graduate Faculty. If the proposed legislation is approved by a majority of the members responding within a 30-day period following the mailing of ballots, it will be considered to be approved for recommendation to the Chancellor.
5. All members shall be given notice of meetings of the University Council on Graduate Study through the University Times or other appropriate announcements. They shall be entitled to attend such meetings and to speak, but shall not be permitted to vote unless they are members of the Council.

III. The University Council on Graduate Study

1. Membership
 1. Provost,
 2. Vice Provosts as designated by the Provost, and
 3. Twenty-one Regular members of the Graduate Faculty, distributed according to a formula based on the number of Regular Graduate Faculty members in the schools (one representative for each 100 members and/or fraction of 100). The representation is as follows:
 - School of Arts and Sciences
 - Humanities-one representative
 - Natural Sciences-one representative
 - Social Sciences-one representative
 - At Large-two representatives
 - Joseph M. Katz Graduate School of Business-one representative
 - School of Education-two representatives
 - John A. Swanson School of Engineering-two representatives
 - School of Computing and Information-one representative
 - School of Law-one representative
 - Graduate School of Public and International Affairs-one representative
 - School of Social Work-one representative

- School of Dental Medicine-one representative
- School of Health and Rehabilitation Sciences-one representative
- School of Medicine-one representative
- School of Nursing-one representative
- School of Pharmacy-one representative
- School of Public Health-one representative
- Interschool programs-one representative

Faculty FMFM representatives shall be selected, and their terms of office determined, in accordance with procedures established for this purpose within their respective schools. No representative shall serve for more than four consecutive years, except when a school chooses to designate a representative by reason of the official role of that individual in relation to graduate study within that school.

4. A maximum of six graduate students shall be chosen as representatives in accordance with procedures established for that purpose by the Graduate and Professional Student Association. Academic units which are not directly represented by a student with voting rights on the University Council on Graduate Study may choose one student observer to attend Council meetings with the privilege of speaking but not voting.
2. Functions
 1. To develop basic standards, regulations, and policies applicable to all fields for graduate instruction and research;
 2. To transmit to the Chancellor legislation originating in the Council after such legislation has been reviewed by the subordinate faculty councils or committees (see IV.A.), and has been submitted to the Graduate Faculty, or has been approved by a majority of those members responding by a mail ballot (see II.D.);
 3. To review, evaluate, and make recommendations to the Chancellor concerning proposals for new postbaccalaureate degree and certificate programs throughout the University after such proposals have had prior review and approval by the faculty councils or committees in which the proposals originated, or in the case of interschool proposals, by the councils or committees of all the areas involved (see IV.A., B.);
 4. To keep informed regarding the quality of graduate work throughout the University by receiving annual reports from the faculty councils and committees on the current status of all graduate degree and certificate programs within their respective areas, and, when necessary, to conduct its own review of such programs; and
 5. To identify and promote creative new approaches to graduate education, whether in defining fields of study, program structure, course content, behavioral objectives, research goals, or other aspects.
3. Procedures
 1. The Council shall hold eight monthly meetings during the academic year. Additional special meetings may be called by the Provost or a designated Vice Provost.
 2. The Council may appoint ad hoc committees from its own membership or from the Graduate Faculty as a whole to review proposals for new postbaccalaureate degree programs, to evaluate existing programs, or to make such other studies as the Council considers desirable. Each such committee shall include at most two graduate student representatives. The committees may also, at the option of the Council, make use of consultants from outside the University. When formed to evaluate new programs which require substantial library holdings, or computer usage, the review committees shall include one or more representatives of the University Libraries or Computing Services and Systems Development.
 3. Prior to Council's taking final action, all legislation must be sent to the deans and chairs of schools' graduate councils, who will distribute it to appropriate councils and to Graduate Faculty and forward comments back to Council.
 4. All decisions made by the Council shall be communicated to the faculty, students, and administrative officers of the University.

IV. Faculty Councils and Committees on Graduate Study

1. Faculty councils and committees on graduate study in the various schools shall be responsible for standards and requirements in their respective areas and for reporting on programs and policies to the University Council on Graduate Study.
2. Committees may be formed to supervise interdepartmental and interschool graduate programs. If an interdepartmental program is established within a particular school, the committee in charge of that program will perform those functions normally performed by a department. If the program has broader scope than that of a single school, the committee structure and administrative relationships will be those agreed upon by the cooperating units. Graduate programs will be reviewed by the University Council on Graduate Study and by the Provost.
3. The basic standards, regulations, and policies approved by the University Council on Graduate Study shall be regarded as minimal standards by the various councils, committees, and faculties.

V. Functions of Administrative Officers in Relation to Graduate Study

1. Deans of Schools
 1. Provide leadership in the development of programs, standards, policies, and facilities for graduate instruction and research in their areas;
 2. Administer the operation of graduate programs in their areas, including admissions, student counseling, record keeping, enforcement of requirements, and recommendation of candidates for advanced degrees; and
 3. Select and maintain a Graduate Faculty of the first quality and encourage the professional growth of its members.
2. Provost or a Vice Provost as Designated
 1. Serves as administrative officer of the Graduate Faculty and Chair of the University Council on Graduate Study;
 2. Represents the central administration in developing, reviewing, and evaluating graduate programs throughout the University;
 3. Reviews the adequacy of the structure for graduate instruction and research and identifies opportunities for improving the structure;
 4. Observes and reports the extent to which the several faculties are complying with the Graduate Faculty's standards for graduate study;
 5. Encourages the development of graduate programs which involve interschool collaboration;
 6. If a designee, advises the Provost regarding appointments to the Graduate Faculty;
 7. Administers graduate fellowship programs which cannot be assigned to specific schools;
 8. Serves as liaison officer between the University and the various professional organizations and other agencies which are concerned with graduate work on the national level;
 9. Keeps informed of developments in graduate education and postdoctoral study at other graduate institutions;
 10. Fosters research and innovation related to graduate study; and
 11. Sees that bulletins, catalogues, and other materials describing the University's graduate programs are published and distributed.
3. Provost
 1. Represents the Chancellor in developing, reviewing, and evaluating graduate programs throughout the University;
 2. Cooperates with deans and department chairs in maintaining a graduate faculty of superior competence, approves appointments to the Graduate Faculty as recommended by the deans, and observes the quality of graduate instruction and research within the several schools; and
 3. Serves as a member of the University Council on Graduate Study.
4. Chancellor
 1. As chief administrative officer, reviews proposals of the University Council on Graduate Study and is responsible for final decisions regarding the structure of graduate instruction and research;
 2. Recommends University Council on Graduate Study proposals for new degrees to the Board of Trustees for final action; and
 3. Confers graduate degrees recommended by the Graduate Faculty of the several schools and approved by the Board of Trustees.

VI. Amendments

Amendments to this plan of organization may be proposed by the University Council on Graduate Study, by joint action of two or more of the faculty councils or committees, or by petition of 50 Regular members of the Graduate Faculty drawn from two or more schools. A proposed amendment shall be regarded as new legislation and shall be handled in accordance with the procedures outlined in Section II.D.

Nomination and Appointment to the Graduate Faculty

I. Qualifications for Membership in the Graduate Faculty

According to the 1971 reorganization of Graduate Study at the University of Pittsburgh, "membership in the Graduate Faculty shall be of two classes, 'Regular' and 'Adjunct.'" Regular membership shall be recommended for full-time faculty members or part-time, tenure stream members of the University faculty or academic staff with faculty status who are approved to direct graduate study and research at all levels. Adjunct membership shall be recommended for persons whose primary responsibility is outside the University but who hold a part-time faculty appointment and are approved to direct graduate study and research at all levels.

The competence to direct graduate study and research at all levels is the primary qualification for membership in the Graduate Faculty. Hence, each nomination for membership should include documentation of the candidate's experience in research, in the teaching of graduate level courses, in the supervision of graduate research, as well as in scholarly publications and professional employment. The completion of a doctoral dissertation, while highly desirable, is not in itself sufficient evidence of qualification for membership in the Graduate Faculty. At the same time, faculty members without an earned doctorate are not automatically excluded and may be designated if they have exceptional qualifications by virtue of experience and accomplishment.

Appropriately qualified faculty members who are not either Regular or Adjunct members of the Graduate Faculty may be assigned by their department chairs (if approved by the Graduate Faculty of the department) the responsibility for the teaching of graduate courses and the direction of master's level research. In addition, they may serve on doctoral dissertation committees provided that a majority (three or more) of the committee are Regular or Adjunct Graduate Faculty members. These responsibilities provide some of the experience required for later appointment to membership in the Graduate Faculty. Individuals who are candidates for advanced degrees, and especially those seeking a degree from the University of Pittsburgh, do not normally qualify for membership on doctoral dissertation committees and, except in a few professional areas, they should not normally be assigned the responsibility for the teaching of graduate courses.

II. Procedure for Nomination

All FE nominations for Regular or Adjunct membership in the Graduate Faculty must originate in the department or school offering graduate degree programs. All Regular Graduate Faculty members in the department, school, or unit must be polled, and the nomination must be signed by at least six of the Graduate Faculty members, the department chair, and the dean of the school making the nomination. If there are fewer than six Graduate Faculty members in the unit, additional support (including signatures) should be obtained from the Graduate Faculty members in closely related areas of the University.

The Graduate Faculty of any school may determine appropriate discipline sub-clusters to act on nomination procedures, if the total faculty so desire.

If a department or school nominates for Regular membership in the Graduate Faculty, an individual whose primary appointment is in another department, the nomination must include the concurrence of the department of primary appointment.

All nominations for Regular or Adjunct membership in the Graduate Faculty should be submitted on the appropriate form. The required supporting evidence should include a listing of graduate courses taught, service on graduate committees, research supervised, and scholarly publications.

III. Appointment to the Graduate Faculty

Appointment to membership in the Graduate Faculty is made by the Provost of the University.

The Provost utilizes a standard procedure for review of all nominations before final approval and appointment. This review is based upon the qualifications to teach and direct graduate research at all levels in accord with the objectives of the degree programs.

Authority and Responsibility

Authority of the Graduate Faculty

The Graduate Faculty of the University, acting through the University Council on Graduate Study, establishes general regulations and minimal requirements for graduate degrees throughout the University. This responsibility applies to the traditional MA, MS, and PhD degree programs as well as to advanced professional degrees and graduate certificates, except for the first professional degree programs in Medicine, Dental Medicine, Pharmacy and Law. The Provost has final authority in the interpretation and application of the regulations established by the University Council on Graduate Study.

The Graduate Faculty of each department or school establishes the requirements for degrees earned under its jurisdiction provided these requirements are in accord with those established by the University Council on Graduate Study. The dean of each school has final authority in the interpretation and application of these additional requirements and/or regulations.

Responsibility

Each department or school with a graduate program is expected to: (1) establish and maintain a high quality graduate program appropriate for its discipline and in accord with the regulations established by the University Council on Graduate Study; (2) provide each graduate student with a written copy of the regulations concerning graduate study and the requirements for advanced degrees; and (3) designate a faculty member (or a committee) to advise each graduate student concerning all aspects of the graduate program and provide for a thesis or dissertation adviser and the appropriate committees.

Each graduate student is expected to become familiar with the general regulations concerning graduate study and with the specific regulations of his or her major department of graduate study and to accept responsibility for the completion of degree requirements as prescribed.

Admission and Registration

Application

An inquiry from a prospective student concerning graduate study should receive from the department or school a prompt response that includes a description of the program(s), the necessary application forms or information about applying online, and instructions concerning the completion of all forms, including the Application Data form.

The applicant is expected to:

1. Complete the online application and submit the application fee through the online payment system. If the applicant submits a paper application, he or she should return to the department or school the completed application forms and a check (not cash) for the application fee payable to the University of Pittsburgh. This fee is required of all applicants and is non-refundable. It does not apply toward the payment of tuition.
2. Request the registrars of all undergraduate and any graduate schools attended to send official transcripts of their records to the department or school of intended graduate study.
3. Submit any additional material required by the department or school and, if available, other evidence of academic and personal qualifications for graduate study. These materials may include any or all of the following: scores achieved on standardized examinations such as the Graduate Record Examination or the Miller Analogies Test, letters of recommendation, term papers written during previous study, evidence of relevant work/life experience, evidence of motivation for graduate study, and a statement of career objectives.
4. Arrange for a personal interview if requested by the department or school.

No action should be taken on an application for admission to graduate study until the department or school has received: (1) the completed application form; (2) the application fee; (3) official transcripts of all work done in undergraduate and graduate schools; and (4) supporting materials as required by the department or school. (Under the Admission Status section, see Special Status for circumstances in which a student may be granted temporary admission.)

Each department or school has the responsibility to establish deadline dates both for receipt of application for admission and for application for fellowships, assistantships, or other forms of aid and to notify prospective applicants of these dates. A department or school may limit admission to a specific term only or may allow admission in any of the three terms. Each department or school is obligated both to act promptly on completed applications, if submitted before the established deadline date, and to give a thorough and fair review of each completed application. Decisions regarding admission should be based on an overall evaluation of all the credentials submitted by the candidate, and be in accord with the availability of faculty, facilities, and student support necessary to meet the applicant's expressed academic and research needs and interests. Applicants should be notified promptly of decisions concerning their applications. Many departments or programs have a limited number of places available. In cases where the number of qualified applicants exceeds the number of places available, applicants should be judged competitively.

If a department or school so approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.

Officially, admission may be granted or denied only by the dean of the school, and the issuance of visa documents may be granted or denied for non-academic reasons only by the Office of International Services. Registration is permitted only after admission is granted.

Changing the Field of Graduate Study

A student already admitted to graduate study and desiring to change a major department of graduate study must file an application for such a change in the office of the dean or the department of the school the student wishes to enter. The application for admission to the new department should be evaluated in the same manner as an application from a new student.

Admission Status

Acceptable students are admitted to graduate study in a specific department or school with "full," "provisional," or "special" graduate status depending on their qualifications and objectives. The qualifications described below represent the minimum standards of the University. These may be made more stringent or specific at the option of the department or school.

Full Graduate Status: For admission to full graduate status, an applicant must be a graduate of an accredited U.S. college or university and must be considered qualified for advanced study by the department or school. International applicants must meet the admissions guidelines described under "Admission of Students from Other Countries." Qualification for advanced study normally is demonstrated by a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program. If students with less than a B average present alternative evidence (such as completion of an advanced degree or successful relevant work experience) of superior ability, they may be considered for full graduate status on the recommendation of the department of proposed graduate study. Only students with full graduate status may be considered for the award of an advanced degree.

Provisional Graduate Status: Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either their undergraduate course program or their scholastic achievement may be considered for

provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated and recommended by the department, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.

Special Status: Students may be granted temporary admission as "special status" under the following circumstances:

1. Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted temporary admission provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.
2. Individuals not seeking an advanced degree but with specific qualifications for one or more courses, including courses required for licensing or certification, may register for such courses subject to review by the department and the dean. Schools providing such an opportunity may specify the number of credits or courses for which an individual may enroll while in this status and should also clearly specify the limitations on transfer of such credits toward a graduate degree if the individual is subsequently admitted to a graduate degree program.

Admission of Students from Other Countries

The University of Pittsburgh welcomes applications from students in other countries. An inquiry from a prospective student from abroad should receive from the department or school a prompt response that includes a description of the program(s), the necessary application forms, including the Application Data form and Supplemental Application for Foreign Students, and instructions concerning the completion of an application, including information about applying online.

When a department or school receives the completed application, including all academic records and letters of reference, it may request an admissions officer in the Office of International Services (OIS) to evaluate the duration of primary, secondary, and university education, the nature of the institution(s) attended, the system of grading in that institution, and to recommend admission or rejection of the candidate. Academic credentials must be originals written in the language in which credentials are normally issued. Certified translations must accompany credentials which are not in English.

Each foreign applicant must provide clear evidence of proficiency in English. (See English Language Proficiency.) In addition, each applicant must provide evidence of adequate financial resources for the estimated length of study at the University of Pittsburgh. The Office of International Services (OIS) will determine whether or not this requirement has been satisfied by the applicant.

When a department or school has completed its evaluation of the credentials of an applicant, it notifies the candidate that he or she is or is not academically qualified for admission. The letter to the applicant must state that the applicant will receive either a visa document or further instructions from the OIS. In all cases, a duplicate copy of the letter of admission and award of financial aid, if any, must be sent to OIS, as must copies of all rejection letters.

Upon satisfaction of all academic and non-academic requirements, the OIS will issue, as appropriate, the Form I-20 Certificate of Eligibility for Non-Immigrant "F-1" Student Status or Form DS-2019 Certificate of Eligibility for Exchange Visitor "J-1" Status. Along with visa documents, OIS will send information concerning arrival and orientation.

The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at his or her own expense, individual curricular adjustments whenever particular deficiencies or needs are found. This could include enrollment without credit in additional course work in English as a foreign language or in courses prerequisite to his or her regular course of study. New students from abroad should be encouraged to use the services of OIS to help them in their adjustment to the United States and to facilitate their total educational experience.

English Language Proficiency

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. The determination that the applicant has sufficient proficiency is made by the admitting department or school, subject to University-wide minimum standards determined by the University Council on Graduate Study. The University's full policy on Assessment for English Language Proficiency for Admission (Policy 09-02-01) can be found at <http://www.cfo.pitt.edu/policies/policy/09/09-02-01.html>. Any exceptions to this policy must be approved by the Provost or Provost's delegate after review of the entire record and consultation with the Office of International Services.

In keeping with the University policy on Certification of English Language Fluency for Teaching, students who are not native-speakers of English and are appointed as teaching assistants or teaching fellows are required to take a test of their spoken English upon arrival. Individuals are given non-teaching assignments and are required to take special course work until they attain passing scores. An unsatisfactory score at the time of reappointment is sufficient cause for nonrenewal.

Readmission

A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her adviser and committee. Readmission is not automatic nor does it necessarily reinstate the student in the academic status enjoyed prior to becoming inactive. When readmitted, the student must be prepared to demonstrate proper preparation to meet all current admission and degree requirements.

Admissions & Registration Section

Required Training for All Graduate and Professional Students

Any graduate or professional student enrolled in a graduate program requiring more than 10 credits of in-person instruction or in any other graduate program designated by the Provost is required to complete training in the recognition, prevention and reporting of sexual misconduct, harassment and sexual violence (often known as Title IX training). The Title IX training program created by Pitt's Office of Diversity and Inclusion satisfies this requirement. Under some circumstances, students may be allowed to complete special versions of the training designed to meet their specific needs. Requests for alternative training should be submitted to the Vice Provost for Graduate Studies. An approved version of the training must be completed in the student's first semester at the University.

Registration

Note: Changes to Policy 09-04-01 to reflect the changes below are in progress.

The Office of the Provost publishes the University of Pittsburgh Academic Calendar, which establishes the dates for registration. These dates also appear in the Schedule of Classes for each term, which is available online through the Office of the Registrar.

A student must be officially admitted, readmitted, or reinstated to the University before he or she may register for courses.

Faculty members are responsible for advising students concerning their programs and specific course selections each term. Students are required to follow the registration process outlined by their school, and they must adhere to registration deadlines in order to avoid the assessment of a late registration fee. Students pursuing two degrees or a degree and a certificate simultaneously must list one as the primary academic program and may list the other as a secondary academic program during the registration process. Students are billed at the tuition rate of the primary academic program. It is recommended that such students meet with advisers in both the primary and secondary academic programs. Generally, a certificate program should be listed as a secondary academic program.

Students registering for the first time should be advised to complete registration well before the beginning of the term. After the start of classes, registration is permitted for new and continuing students only with the written approval of the dean in unusual circumstances and with the payment of a late registration fee.

All graduate students are expected to be registered in accordance with the program of study they are carrying. No person should expect to receive guidance and direction from members of the Graduate Faculty unless he or she is so registered. Students must be registered in the term in which they take preliminary and comprehensive examinations. Student must have active status per Policy 09-04-01 in the term he or she expects to graduate.

The Registrar will withhold registration and add/drop services from students who so warrant for financial, academic or disciplinary reasons. The University reserves the right to change registration procedures. Current registration procedures are published each term in the Schedule of Classes.

Full-Time and Part-Time Study

Graduate students who register for nine to fifteen credits in the fall or spring term are full-time students and are assessed the current tuition rate for their school. A school may require students enrolled in a degree program to register for more than nine credits. Students who register for fewer than nine credits are part-time students and billed on a per-credit basis. Admission procedures for part-time students are the same as those for full-time students.

Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements and are working full-time on their dissertations may register for "Full-time Dissertation Study," which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee.

Maximum Programs of Study

No student is permitted to register for more than 15 graduate credits without written permission from the dean of the academic center in which the student is pursuing a degree. Graduate students who register for more than 15 credits will be billed for each additional credit that exceeds their full-time tuition rate. Individual schools and departments may restrict the maximum program of any or all of their graduate students.

Cross-registration

Through the Pittsburgh Council on Higher Education (PCHE), Carlow University, Carnegie-Mellon University, Chatham University, Duquesne University, La Roche College, the Pittsburgh Theological Seminary, Point Park University, Robert Morris University and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the fall and spring terms. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 9 credits as a graduate student) at Pitt while cross-registered. Credits earned by cross-registration in graduate courses, when approved in advance by the student's graduate adviser, are accepted as University of Pittsburgh credits for the purpose of the calculation of the grade point average and the completion of degree requirements. Each department at each institution retains the authority to establish the prerequisites for admission and the maximum enrollment in its own courses and to grant priority in registration to its own graduate students.

Course Withdrawal

Students may add or drop courses before the end of the Add/Drop period. A student who wishes to withdraw from an individual course after the Add/Drop period but prior to the end of the ninth week of the term or the deadlines noted in the Schedule of Classes for the summer sessions, must complete a Monitored Withdrawal form available from the dean, obtain the signature of the instructor, and return the completed form to the dean's office of the school offering the course. A W grade will then be issued. After the official withdrawal deadline a student may withdraw from a course only in extraordinary circumstances and with the permission of the dean.

Students may terminate their registration in all classes by informing the Office of the Registrar of their intent to do so prior to the end of the Add/Drop period for the term. Students registered for courses scheduled to begin after the end of the Add/Drop period for the term may terminate their registration by informing the Registrar's Office of their intent to do so at any time prior to the first scheduled meeting day of the class.

An official resignation occurs when the student notifies the Office of Student Accounts of the intent to terminate registration for all classes after the end of the term's/sessions' Add/Drop period but no later than the 60th calendar day of the term or the deadlines noted in the Schedule of Classes for the summer sessions. The R grade will be assigned for each course for which the student registered.

A student may withdraw from all courses after the 60th calendar day of the term or by the deadlines noted in the Schedule of Classes for the summer sessions by processing their withdrawal through the office of the student's academic dean. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

A student who stops attending a course and does not initiate the withdrawal or resignation procedures may be assigned an F grade.

Students who plan to return to the University within one calendar year must indicate this when they provide notification of resignation. Students who do not advise the University of their intent to return to the University within one calendar year are classified as permanent resignations. Students who permanently resign and later decide to return to the University must apply for readmission and pay the appropriate fees. This includes cases when the readmission date is less than one year from the effective date of resignation.

Tuition, Fees and Other Charges

Tuition rates, fees, and other charges paid by graduate students are established by the Board of Trustees in cooperation with the University Administration.

The University reserves the right to change registration procedures. For additional registration information, visit the University Registrar's website at <http://www.registrar.pitt.edu/enrollment.html>.

University Grading Policy for Graduate Courses

**Introductory (or master's level) graduate courses are assigned the numbers 2000-2999; advanced (or doctoral level) graduate courses are assigned numbers 3000-3999.*

The following policy includes all grades and their corresponding definitions which may be legitimately issued within the schools of the University of Pittsburgh. All available grading options and their uses are also included. Each school uses symbols and grading options consistent with this University Grading Policy. The Registrar will record for a particular course only those grades specified in the Schedule of Classes. An inappropriate grade reported for a student will register as invalid, hence Z. Students will be subject to the grading policy of the school in which a course is given. Graduate students wishing to register for undergraduate courses should contact the dean's office of the Academic Center offering the course to explore grading option requirements and procedures.

Grading System Definitions and Grade Points

A+ = 4.00

A = 4.00 Superior attainment

A- = 3.75

B+ = 3.25

B = 3.00 Adequate graduate level attainment

B- = 2.75

C+ = 2.25

C = 2.00 Minimal graduate level attainment

C- = 1.75

D+ = 1.25

D = 1.00

D- = 0.75

F = 0.00 Failure

G Course work unfinished because of extenuating personal circumstances

H Exceptional (honors) completion of course requirements

I Incomplete course work, due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars

N Noncredit audit

NC No Credit

NG Course work unfinished because of extenuating personal circumstances - work is no longer considered in progress

R Student resigned from the University

S Satisfactory (successful) completion of course requirements

U Unsatisfactory (failing) completion of course requirements

W Withdrawal

Z Invalid grade reported

** No grade reported

Grading Options

LG Letter Grade

H/S/U Honors/Satisfactory/Unsatisfactory

H/HS/S/LS/U Honors/High Satisfactory/Satisfactory/Low Satisfactory/Unsatisfactory*

S/NC Satisfactory/No Credit (formerly the S/N option)

LG and H/S/U Letter Grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter Grade and Satisfactory/No Credit

* This option is available for professional students in the School of Medicine only.

Each Academic Center is responsible for establishing guidelines as to which University-approved grading options are appropriate for courses offered by that Academic Center. Similarly, each department may identify from among the grading options approved by the Academic Center those it deems acceptable for the courses it offers. Furthermore, each course instructor may specify, within the range of grading options approved by the department and the Academic Center, the grading options which may be selected by students taking his or her course. A University Grade Option/Audit Request form is not required to be completed by a student and will not be accepted by the Office of the Registrar for a graduate course. Only the S/NC grading option may be used in evaluating thesis or dissertation research.

Grade Assignments

It is the responsibility of each faculty member of the University to assign a standard letter grade or option grade as listed in the Schedule of Classes to each student enrolled in an approved University course. All other grades will be recorded by the Registrar as a Z, an invalid grade.

N (Noncredit Audit) Option

A student may choose to audit any graduate course on a space available basis. After obtaining the instructor's permission to audit a course, the student follows the same procedures as registering for credit. Tuition is assessed for all audits. An N or W are appropriate grades for courses audited.

G and I Grades

A student may be graduated without removing G and/or I grades from the record provided all degree requirements have been met and the student's department recommends graduation. The individual school's grading policy should be consulted for regulations dealing with the removal of I grades. Students assigned G grades are required to complete course requirements no later than one year after the term in which the course was taken. Once the deadline has passed, the G grade will convert to NG and the student will be required to re-register for the course if it is needed for graduation.

Grade Changes

A faculty member wishing to effect a grade change must complete a Grade Change Request. The dean of the school in which the course is offered or his or her designee must approve a grade change before it will be honored by the Registrar. While each school may determine a time limit for grade changes, they should be processed no later than one year after the initial grade was assessed. There may be reasons that justify a later change of grade, but they must be of an unusual nature and considered most exceptional. Any exception must receive the dean's approval. Changes in I grades are exempt from this policy.

Official University Record: GPA Calculation

A student's graduate Grade Point Average (GPA) is obtained by dividing the total number of letter grade credits taken in the graduate program into the total number of grade points earned in the graduate program. Only letter grades with GPA values will be used in computing the Grade Point Average.

A student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser. A school may restrict the type and/or number of different courses which may be repeated during one degree program. The grade earned by repeating a course is used in lieu of the grade originally earned, although the original grade is not erased from the transcript. No course may be repeated more than twice. No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a B or higher grade. The repeated course must be the same as that in which the original grade was earned. In extenuating circumstances, a department chair or program director, with the dean's approval, may substitute another course of similar content. Grades of W, R, or N reported for the repeated course will not be counted as a course repeat.

To initiate only the last course grade being computed in the GPA, a Course Repeat form must be filed with the dean's office.

General Regulations

Academic Standards

A grade average of at least B (GPA = 3.00) is required in the courses which make up the program for any graduate degree.

A student with full graduate status is automatically placed on probation whenever his or her cumulative GPA falls below 3.00. Each school determines the restrictions placed on a student on probation. A student who remains on probation is subject to dismissal within a time period determined by the school, subject to review by the University Council on Graduate Study. A student on provisional or special status or on probation is not eligible to take the Ph.D. preliminary evaluation, the MA/MS or Ph.D. comprehensive examination, or to be graduated.

Statute of Limitations

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. Individual schools within the University may adopt policies that are more, but not less, stringent than those stated here.

All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all requirements for professional master's degrees, in five years. Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of ten years or eight years if the student has received credit for a master's degree appropriate to the field of study. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the dean for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension. Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. The length and rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the dean. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Acceptance of Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the Pittsburgh campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their department and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components is responsible for providing any financial assistance to the graduate student.

Official transcripts certifying graduate courses completed in a degree granting graduate program at another appropriately accredited institution prior to admission to the University of Pittsburgh should be submitted at the time of application and should be evaluated for acceptability as transfer credit early in the student's graduate career for acceptability as transfer credit subject to University policy, course equivalencies, and individual school requirements. In no case may the total number of credits transferred for completion of requirements for an advanced degree exceed the maximum number stated in the sections pertaining to advanced degree requirements. Grades (and grade points) are not recorded for credits accepted by transfer.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA = 3.00) or its equivalent has been received. No credit will be granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center of another institution unless those credits are approved for equivalent graduate degrees at that institution and the institution has an accredited program.

Credit by Course Examination

Each school authorized to offer graduate courses should clearly specify in its school bulletin whether or not students may obtain credit toward a degree by the procedure of "credit by course examination." If such an option is provided, the courses for which this option is appropriate should be designated as such in the school bulletin. A school granting graduate credit for life or work experience should do so only through the option of credit by examination.

Registration of Undergraduate Students for Graduate Courses

A change to the regulation below (to be effective immediately) was reviewed by UCGS and approved by the Office of the Provost on October 17, 2019.

Undergraduate students with sufficient preparation are permitted to enroll in graduate courses following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 30 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final year to register for graduate courses which will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as Advanced Standing credits on the graduate transcript.

Early Admission Program

Exceptionally able undergraduate University of Pittsburgh students may be admitted to full graduate status if their graduate and undergraduate schools have approved early admission as a permitted option, have established standards and procedures, and provided the student needs no more than 24 credits to complete the baccalaureate degree. Credits earned while enrolled in the graduate program may also be counted toward fulfilling undergraduate degree requirements.

Course Work Acceptable as Graduate Credit

A substantial proportion of courses acceptable toward a graduate degree should be designed explicitly for graduate students. Introductory graduate level (master's level) courses are numbered 2000-2999, those at an advanced graduate level (doctoral level) are numbered 3000-3999. To be eligible for a master's degree, a student must have completed at least 30 credits at the graduate level with at least an average grade of B (3.00). A doctoral student must complete additional graduate level courses as determined by his or her department or school. No lower level undergraduate course (numbered 0001-0999 or 7000-7999) may be applied toward a graduate degree.

Students may register for graduate courses at Carlow University, Carnegie-Mellon University, Chatham University, Duquesne University, La Roche College, the Pittsburgh Theological Seminary, Point Park University, and Robert Morris University under the PCHE cross-registration agreement. Such work, if approved in advance by the student's adviser, will not be considered as transfer credit and may be counted for credit toward a graduate degree; the grade earned will be used in computing the student's grade point average.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University or two different departments within the same school. Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of six credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Dual, Joint and Cooperative Degree Programs

A change to the regulation below (to be effective immediately) was reviewed by UCGS and approved by the Office of the Provost on October 17, 2019.

Dual, joint and cooperative (DJC) degree programs result in two degrees being awarded. Dual programs exist within a single school; joint programs exist between two or more schools at the University of Pittsburgh; cooperative programs are administered jointly by the University of Pittsburgh and another domestic or international institution. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These requirements must be specified in a proposal agreed to by both of the entities (programs, schools or institutions) awarding the degrees. Any degree that can be awarded by the University of Pittsburgh as part of a dual, joint or cooperative program must also be offered as a stand-alone degree.

Proposals for DJC degree programs must be reviewed by UCGS which will make a recommendation for final approval. Pitt allows that the same course, examination, or thesis may be used to fulfill requirements of both degrees only if so specified in the approved documents formally establishing the DJC program. UCGS will evaluate whether the rationale and mechanism for such sharing of requirements is reasonable. DJC degree programs may result in a student earning two separate masters' degrees, a master's and a first professional degree, a master's or first professional degree and a doctoral degree or two separate doctoral degrees.

Students are not required to be admitted to both academic programs offering the dual, joint or cooperative degrees being sought at the same time. However, both degrees must be conferred at the same time.

Graduate Certificates and Micro-Credentials

Graduate Certificate and Graduate Micro-Credential programs are coherent sets of courses and related work specifically designed to provide depth of understanding (via a certificate) or awareness (via a micro-credential) in a particular area. For students enrolled in a graduate degree program at the University of Pittsburgh, the pursuit and awarding of a given certificate or micro-credential allows for an explicit recognition of a specific set of skills or educational experiences that may not be readily apparent through the conferring of a given graduate degree. Students not concurrently enrolled in a graduate degree program at the University of Pittsburgh can also apply for admission into graduate certificate and micro-credential programs. Students seeking enrollment into graduate certificates and micro-credential programs must hold a baccalaureate degree or an advanced degree and be subject to admission requirements as outlined and governed by the academic unit(s) offering the certificate or micro-credential.

NOTE: This policy applies to newly created certificates created after 9/1/2018 or for existing certificates that are revised after 9/1/2018.

Graduate Certificates

Graduate certificates are intended to provide depth of understanding in a given topic or area. A graduate certificate requires the satisfactory completion of a minimum of 10 credits, of which at least nine (9) credits are at the graduate level. Graduate certificates may include additional requirements for non-course educational activities such as workshops, projects or other milestones. Transfer credits from other universities may be applied toward a University of Pittsburgh graduate certificate, but at least ten (10) Pitt credits must be earned towards the certificate. The certificate courses may be comprised from one academic unit or multiple academic units. At the discretion of the academic unit, graduate certificates may be offered to currently enrolled students or to students not concurrently enrolled in other graduate or professional programs at the University. Such students seeking enrollment into graduate certificates programs must hold a baccalaureate or other advanced degree and be subject to admission requirements as outlined and governed by the academic unit granting the certificate.

At the discretion of the individual academic unit(s) offering the certificate, students successfully completing courses in a graduate certificate program may apply some or all of those credits to a graduate degree program if the student meets all admission requirements for that program.

The awarding of a graduate certificate will be annotated on the official transcript of students who successfully meet the requirements as set forth by the academic unit (s) offering the graduate certificate. It is the responsibility of the academic unit offering the graduate certificate to track student progress and certify completion with the University Registrar's Office. The University Registrar's Office will not send a diploma for a graduate certificate. The issuing School(s) may develop and distribute a paper certificate following guidelines found at: <https://www.provost.pitt.edu/standards-issuing-physical-certificates>.

Graduate Micro-Credentials

Graduate micro-credentials are intended to indicate familiarity with a given topic or area and require the satisfactory completion of at least four and at most nine credits. Graduate micro-credentials may include additional requirements for non-course educational activities such as workshops, projects or other milestones. The micro-credential courses may be comprised from one academic unit or multiple academic units and are intended to be flexible and adaptive to changing demands. At the discretion of the academic unit, graduate micro-credentials may be offered to currently enrolled students seeking a graduate degree or to students who intend to pursue only a micro-credential. Students enrolled exclusively to seek a micro-credential must hold a baccalaureate or other advanced degree and are subject to admission requirements as outlined and governed by the academic unit(s) offering the micro-credential.

At the discretion of the individual academic unit(s) offering the micro-credential, students successfully completing courses in a graduate micro-credential may apply some or all of those credits to an appropriate graduate certificate or degree if the student meets all admission requirements for that program.

The awarding of a graduate micro-credential will be annotated on the official transcript of students who successfully meet the requirements as set forth by the academic unit (s) offering the graduate micro-credential. It is the responsibility of the academic unit offering the graduate micro-credential to track student progress and certify completion with the University Registrar's Office. The University Registrar's Office will not send a diploma for a graduate micro-credentials. The issuing School(s) may develop and distribute a paper micro-credential certificate following guidelines found at: <https://www.provost.pitt.edu/standards-issuing-physical-certificates>.

Graduate Programs Offered in Off-Campus Locations or via Electronic Communication

The academic standards set forth in the Regulations Governing Graduate Study apply to graduate programs offered in off-campus locations and offered via electronic communication. Admission criteria should be the same as those used by a school for its on-campus programs.

Editorial Assistance

A student preparing a dissertation or other written work as part of academic requirements may, when appropriate, use the assistance of professional editors, provided that (1) he or she receives the approval of the research adviser or professor of the course in which written work is being submitted; (2) that editorial assistance provided be limited to use of language and not to subject matter, content or meaning; and (3) that all editorial assistance be described and acknowledged in the report.

Publication of Theses and Dissertations

All theses and dissertations submitted at the University of Pittsburgh must be submitted electronically. Electronic Theses and Dissertations (ETDs) are theses or dissertations prepared as text-based PDF files that can contain non-text elements such as multimedia, sound, video, and hypertext links.

All ETDs are made publicly available on the University Library System's online catalog. Students may choose to restrict access to the ETD to University of Pittsburgh IP addresses for a maximum period of five years. After five years, the ETD will automatically become fully accessible. Full access to the ETD may be withheld for a maximum of one year if a patent application has been filed and the student receives appropriate approval from the Provost's Office.

All doctoral candidates are required to execute an agreement with ProQuest/University Microfilms Inc. for the publication of the dissertation in the ProQuest/UMI repository.

Any thesis or dissertation may be published, either by the University or through an outside agency, provided due credit is given to the University. No form of publication, however, shall relieve the student of his or her responsibility for supplying the electronic thesis or dissertation to the University Library System.

University Patent Policy

During enrollment at the University, a student may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, or cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management.

Application for Graduation

A graduate or professional student must have active status per Policy 09-04-01 in the term he or she expects to graduate.

Each candidate for graduation must file an official Application for Graduation in the office of the dean early in the term in which graduation is expected. Students are required to be registered for at least one credit at the University in the 12 month period before graduation.

Prior to the end of the term in which they are graduated, all doctoral candidates must submit to the office of the dean a completed Survey of Earned Doctorates Awarded in the United States.

Certification for Graduation

The Graduate Faculty of the department or program evaluates the performance of the student. If that performance is satisfactory, a report should be submitted to the dean certifying that the candidate has satisfactorily completed all departmental requirements for a graduate degree. The dean, after confirming that the overall school and University requirements have been met, certifies the candidate for graduation.

Regulations Pertaining to Master's Degrees

Master of Arts and Master of Science Degrees

Master of Arts (MA) degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the School of Education, and the School of Public and International Affairs; the Master of Science (MS) degree is offered in departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Medicine, the School of Public Health, the School of Pharmacy, and the School of Social Work. Some of the MA or MS degrees offered are specified as being "in" a particular discipline; e.g., Master of Science in Chemical Engineering.

Programs of Study

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. The program of study should be a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major adviser, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

At least one-half of the credits earned in a master's degree program must be at the graduate level (the 2000 or 3000 series) and must be completed with at least an average grade of B (3.00). No courses numbered below 1000 or from 7000 to 7999 may be applied toward graduate degree requirements.

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The Master of Arts and Master of Science degrees require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department or school. Not more than six credits may be granted toward the completion of the requirements for a master's degree for work completed at another graduate institution. (See Acceptance of Transfer Credits for further information.)

Comprehensive Examination

MA or MS degrees are conferred only upon those students who, in one or more comprehensive examination or the equivalent, show that they have mastered the general field of their graduate study. Each department or similar unit is responsible for specifying the content and procedure for administration of the comprehensive examination and will specify for each candidate the field of his or her examination, which may vary from student to student. Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program should notify the University Council on Graduate Study and describe the substitution.

Students on special or provisional status are not eligible to take a comprehensive examination. These examinations must be taken at least one month prior to the last day of the term in which the degree is to be granted. The results must be reported promptly to the office of the dean but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a two-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program director, or dean.

Thesis Option

The requirement of a thesis or its equivalent is at the discretion of individual departments, programs, or schools. If a thesis is submitted, its form must be in accord with specifications stipulated in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. The thesis examining committee will consist of at least three members of the faculty recommended by the major adviser and approved by the department chair or program director. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the office of the dean. After the examination, all master's theses must be submitted electronically and will be made available through PITTcat, the University Library System's online catalog.

Non-thesis Option

It is usual for a program to require additional course work if a thesis is not required.

For the Master of Arts degree, each student must describe one or more substantial intellectual experience(s) or accomplishment(s) acceptably in writing. In programs in which a master's thesis is optional, the student must satisfy this requirement by submitting a paper (or papers), as designated by the major department, and must demonstrate competence in using the methods of scholarship.

For the Master of Science degree, a paper or research project is usually required.

Professional Master's Degrees

The University of Pittsburgh, through its professional schools, offers the following master's degrees in professional fields of study: Master of Business Administration, Master of Dental Science, Master of Fine Arts, Master of Education, Master of Science in Geographic Information Systems and Remote Sensing, Master of Health Administration, Master of Health Promotion and Education, Master of Science in Information Science, Master of International Business, Master of International Development, Master of Law, Master of Library and Information Science, Master of Applied Mathematics (MA and MS), Master of Science in Nursing, Master of Occupational Therapy, Master of Physical Therapy, Master of Public Administration, Master of Public Health, Master of Public and International Affairs, Master of Public Policy and Management, Master of Social Work, Master of Arts in Teaching, and Master of Science in Telecommunications.

Programs of Study

The professional master's degree programs are generally similar to those for the MA and MS except that they emphasize instruction in professional affairs and practice and serve as preparation for careers in the professions. The program of study should be a coherent program designed to assure the mastery of specified knowledge and skills, rather than a random accumulation of a certain number of courses. The overall form and content of the student's program of study is the responsibility of the student's department or school. To carry out this responsibility, each student must be assigned a major adviser, who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines.

At least one-half of the credits earned in a master's degree program must be at the graduate level (the 2000 or 3000 series) and must be completed with at least an average grade of B (3.00). No courses numbered below 1000 or from 7000 to 7999 may be applied toward graduate degree requirements.

Master's degrees are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their programs. Students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The professional master's degrees require the satisfactory completion of a minimum of 30 credits of graduate study approved by the department. No more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another graduate institution. (See Acceptance of Transfer Credits.)

Additional Requirements

Most professional master's degree programs provide opportunities for theoretical studies and practical applications. Students are expected to acquire professional skills through course work, projects, internships, practica, and/or research papers.

Student Assessment

Professional master's degrees are conferred upon those students who demonstrate comprehensive mastery of the general field of study. This includes: a) satisfactory completion of all course requirements and b) other performances which indicate comprehensive mastery such as examinations, internships, research projects, theses, practica, and so forth. These requirements vary from school to school.

Regulations Pertaining to Doctoral Degrees

Doctor of Philosophy Degree

Doctor of Philosophy degrees are awarded for completion of graduate programs in various departments within the School of Arts and Sciences, the Joseph M. Katz Graduate School of Business, the School of Dental Medicine, the School of Education, the John A. Swanson School of Engineering, the School of Health and Rehabilitation Sciences, the School of Computing and Information, the School of Medicine, the School of Nursing, the School of Pharmacy, the School of Public Health, the School of Public and International Affairs, and the School of Social Work.

Admission to Doctoral Study

In some doctoral programs, the requirements for admission to graduate study and for admission to doctoral study are identical, while other programs require the completion of a master's degree or its equivalent as a prerequisite for admission to doctoral study. Admission to doctoral study does not include any implication concerning "admission to candidacy for the Doctor of Philosophy degree."

Normally, only one major department of graduate study is permitted for the PhD degree. However, a few formal interdisciplinary programs and, under some circumstances, some independently designed interdisciplinary doctoral programs are available (see Interdisciplinary Doctoral Programs).

Programs of Study

All PhD programs offered at the University of Pittsburgh should provide a coherent series of courses, seminars, and discussions designed to develop in the student a mature understanding of the content, methods, theories, and values of a field of knowledge and its relation to other fields. Each program should train the student in the methods of independent research appropriate to the discipline and provide an adviser and a committee to guide the student in an extended investigation of an original and independent research project of significance in the field.

The overall form and content of each student's program is the responsibility of the Graduate Faculty of the department or program. To carry out this responsibility, departments or programs must ensure that each student has a major adviser who, in consultation with the student, plans a program of study and research in accord with school and departmental guidelines. The adviser may prescribe additional courses both within and outside the department or program that are essential and/or appropriate to the student's program.

Some doctoral programs may include approved areas of concentration used to define and describe the students' training and expertise within the broader discipline. Such an area of concentration is added to the transcript upon the granting of the degree.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Normally, courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Students must maintain a minimum cumulative GPA of 3.00 in courses to be eligible to take the preliminary and comprehensive examinations as well as to be graduated.

The requirement of proficiency in the use of foreign languages or other tools of research is at the discretion of individual departments or schools.

Departments or programs are expected to provide students with a copy of school and departmental regulations appropriate for their program and, in turn, students are expected to become familiar with these and to satisfy all prescribed degree requirements.

Credit Requirements

The minimum credit requirement for the PhD degree is met by six terms of registration as a graduate student for 12 or more credits per term or the equivalent number of credits in a reduced load. If the school requires completion of its master's degree program prior to admission into its doctoral program, at least four terms of registration for 12 or more credits per term or the equivalent number of credits in a reduced load are required as a minimum for the PhD degree. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement. In recognition of graduate study beyond the master's degree successfully completed elsewhere, no more than 12 additional credits may be accepted at the time of admission to meet the minimum credit requirement. (See Acceptance of Transfer Credits) No more than 30 credits may be accepted for a previously earned PhD degree in recognition of master's degree work.

Graduate students already enrolled may, when approved in advance by their department or programs and the dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In all cases, at least three terms, or 36 credits, of full-time doctoral study or the equivalent in part-time study must be successfully completed at the University of Pittsburgh.

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again.

Residency Requirement

Students seeking the PhD degree are required to engage in a minimum of one term of full-time doctoral study, which excludes any other employment except as approved by their departments or programs.

Preliminary Evaluation

The preliminary evaluation should be designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently. The form and nature of the evaluation should be approved at the school level and described in the school bulletin. It should be conducted at approximately the end of the first year of full-time graduate study. The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. Evaluation results must be reported promptly to the dean's office, but no later than the last day of the term in which the evaluation occurs.

Comprehensive Examination

The Comprehensive Examination should be designed to assess the student's mastery of the general field of doctoral study, the student's acquisition of both depth and breadth in the area of specialization within the general field, and the ability to use the research methods of the discipline. In some programs, the comprehensive examination is combined with the overview or prospectus meeting. It should be administered at approximately the time of the completion of the formal course requirements and should be passed at least eight months before the scheduling of the final oral examination and dissertation defense. In no case may the comprehensive examination be taken in the same term in which the student is graduated. Examination results must be reported promptly to the dean's office but no later than the last day of the term in which the examination is administered. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department, program, or school.

Doctoral Committee

Before admission to candidacy for the PhD degree, the student's major adviser proposes for the approval of the doctoral program director and the dean a committee of four or more persons, including at least one from another department in the University of Pittsburgh or from an appropriate graduate program at another academic institution, to serve as the doctoral committee. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. This committee must review and approve the proposed research project before the student may be admitted to candidacy.

This doctoral committee has the responsibility to advise the student during the progress of the candidate's research and has the authority to require high quality research and/or the rewriting of any portion or all of the dissertation. It conducts the final oral examination and determines whether the dissertation meets acceptable standards.

Meetings of the doctoral candidate and his/her dissertation committee must occur at least annually from the time the student gains Admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward degree and discuss objectives for the following year and a timetable for completing degree requirements. It is the responsibility of the dean of each school to determine a mechanism for monitoring the occurrence of these annual reviews.

The membership of the doctoral committee may be changed whenever it is appropriate or necessary, subject to the approval of the department chair or program director and the dean.

When a doctoral committee member leaves the University, he or she must be replaced unless the dissertation is almost complete or the member has an essential role on the committee. In the latter case, the dean's approval should be obtained. When the chair of a committee leaves and cannot be conveniently replaced, a co-chair must be appointed from within the department, and the restructured committee requires the approval of the department chair or director of the school's doctoral program and the dean. If the defense takes place within a few months of the chair's departure, the requirement of the co-chair is usually waived.

A retired faculty member may remain as a member or chair of a committee if he or she is spending considerable time in Pittsburgh or its vicinity and is still professionally active. Retired faculty who meet these criteria may also be appointed as a member or as a co-chair (but not chair) of a newly-formed committee. Retired faculty who leave the Pittsburgh area and/or do not remain professionally active should be replaced on committees and the revised committee approved by the department chair or the school's director of doctoral programs and the dean.

Overview or Prospectus Meeting

Each student must prepare a dissertation proposal for presentation to the doctoral committee at a formal dissertation overview or prospectus meeting. The overview requires the student to carefully formulate a plan and permits the doctoral committee members to provide guidance in shaping the conceptualization and methodology of that plan. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal. The student is responsible for ensuring that all appropriate regulatory approvals are obtained for the proposed research. For example, if the research proposed in the overview or prospectus involves human subjects, that proposed research must be approved by the University Institutional Review Board (IRB) before it may be carried out.

Admission to Candidacy for the Doctor of Philosophy Degree

Admission to candidacy for the Doctor of Philosophy degree constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. To qualify for admission to candidacy, students must be in full graduate status, have satisfied the requirement of the preliminary evaluation, have completed formal course work with a minimum grade point average of 3.00, have passed the comprehensive examination, and have received approval of the proposed subject and plan of the dissertation from the doctoral committee following an overview or prospectus meeting of the committee. In some schools, admission to candidacy is a prerequisite to registration for dissertation credits. Students are informed of admission to candidacy by written notification from the dean, who also states the approved doctoral committee's composition.

Dissertation and Abstract

Each student must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research grounded in an appropriate body of literature. It is relevant to an identifiable field as it is currently practiced. It presents a hypothesis tested by data and analysis and provides a significant contribution or advancement in that field. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

Characteristics which a dissertation should demonstrate are: the establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution; a clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base; a well defined research design; clarity in composition and careful documentation; results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph; sufficient detail so that other scholars can build on it in subsequent work; the preparation of the author to assume a position within the profession.

If the dissertation is the result of a collaborative research effort, the project should be structured in such a way that the student's dissertation results from one, clearly identified piece of work in which the student has supplied the unquestionably major effort. The contributions of the student and the other collaborators must be clearly identified.

Published articles authored by the student and based on research conducted for the dissertation study may be included in the dissertation, if the student's department and school have a written policy that this is acceptable. In any case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. The student should be the sole or primary author of the published work. If the published articles were co-authored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. Instructions on incorporating articles into the dissertation are provided in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh.

Candidates for the doctoral degree must provide a suitable number of copies of the dissertation, as determined by the doctoral committee and school policy, for review and use during the final oral examination. The general format of the dissertation and the abstract is determined by the Office of the Provost and is set forth in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh. Specific instructions should be available in the office of the dean of the school. After the final oral examination is successfully completed, the candidate must electronically submit the approved complete dissertation and abstract in final form. The candidate must submit a dissertation approval form, the required agreement with University Microfilms Inc. for the publication of the dissertation on microfilm and for the publication of the abstract in Dissertation Abstracts, and any appropriate fees to the designated student services representative in the dean's office of the candidate's school.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's dean with the approval of the dissertation adviser and committee, but only for sound reasons of scholarship. Permission shall never be granted on the ground of inadequate command of English.

Final Oral Examination

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and need not be confined to materials in and related to the dissertation. Any member of the Graduate Faculty of the University may attend and participate in the examination. The date, place, and time of the examination should be published well in advance in the University Times. Other qualified individuals may be invited by the committee to participate in the examination. Only members of the doctoral committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the doctoral committee, must be sent to the dean. If the decision of the committee is not unanimous, the case is referred to the dean for resolution. The chair of the doctoral committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

Interdisciplinary Doctoral Programs

A student may be admitted into one of two types of interdisciplinary doctoral programs:

1. *Generic Programs*, which are ongoing, formally structured, and approved doctoral programs, admission into which follows the same procedures as those of departmental programs; and,
2. *Individualized Programs*, which are specially designed to permit an exceptionally able student who has earned a master's degree or the equivalent to pursue an interdisciplinary doctoral program structured to satisfy his or her unique goals. Such students should apply to the dean of the school if the departments involved in the proposed program are organized within one school or to the Provost if the departments are organized within more than one school. The student must satisfy the admission requirements of each of the departments or schools involved in the proposed program. If the request is approved, the dean or the Provost, in consultation with the departments concerned, will designate five members from these departments to serve as an advisory committee. After these advisers meet with the student, a chief adviser is selected to assume responsibility for general guidance to the student. These advisers continue their responsibility until the student is admitted to candidacy for the PhD degree and may, if it is appropriate, continue as the doctoral committee for this student.

Other Research Doctoral Degrees

The University of Pittsburgh also offers the research doctoral degrees which are not PhD degrees.

These doctoral degree programs are similar to those for the PhD in the degree of rigor required, the minimum total credit requirements and permissible transfer credits, requirements for the successful completion of a preliminary evaluation and a comprehensive examination, admission to doctoral candidacy, nomination of a doctoral committee, preparation of the dissertation and abstract, publication of the dissertation, and successful completion of the final oral examination. These doctoral dissertations are usually based on an in-depth research project by the student and are intended to permit the student to apply relevant theory and knowledge as well as demonstrate skills in analysis of a major problem and to contribute to the improvement of practice in the student's area of specialization.

Professional Doctoral Degrees

The University of Pittsburgh also offers professional doctoral degree programs which, provide a coherent curriculum designed to impart the mastery of a substantial and complex body of knowledge that will serve as preparation for leadership and excellence in the practice of the profession. The curriculum should contain a research component to achieve the goal for the research competence of the graduate. Students should deliver a report based on research that demonstrates both mastery of their subject matter and a high level of communication skills. The curriculum should contain an internship, a practicum or a clinical component. Each experience should have associated with it clear goals and objectives, a statement of what skills the student should master, a statement of how those skills will be assessed objectively by the academic program and what steps the program will take in response to those assessments. In addition, the program should have an objective way to evaluate the site where internships and/or clinical rotations take place and assure the expertise of those responsible for administering training and instruction. If the program is an accredited program, the standards of the accrediting body for a professional doctorate must be met.

To attain the depth of knowledge and experience required by someone earning a professional doctorate, a minimum of 72 credits must be required. Of this, no more than one-third should be internships or clinical work. A comprehensive examination will be used to assess the student's mastery of a substantial and complex body of knowledge.

The minimum admission requirements must be the same as for all graduate programs at the University of Pittsburgh. In addition, the student must have completed a defined set of prerequisites so that all students will enter with required basic knowledge. A student must attain a 3.00 GPA in order to maintain good standing and be graduated.

Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit varies, depending on your program of admission. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

Mandatory fees vary by campus, undergraduate and graduate level, and by full-time and part-time enrollment. Tuition rates are campus, level, and school specific. The University's tuition and mandatory fee rates are available on the Tuition Rates - Pennsylvania Residents page or the Tuition Rates - Out-of-State Residents page.

Pitt Online Tuition and Mandatory Fees

Pitt Online is a division of the University Center for Teaching and Learning. Through Pitt Online, several of the graduate programs offered in traditional classroom settings are available to qualified applicants regardless of their geographical location. Tuition and mandatory fees are available on the Pitt Online Tuition And Fees page; please note, these rates apply to students admitted to one of the Pitt Online programs, not to students taking one or more online classes as part of a traditional academic program.

Determining How Full-Time vs Part-Time Students are Billed

Undergraduate:

Undergraduate students registered for 12 to 18 credits are regarded as full-time students and are assessed the current undergraduate "flat" tuition rate for their academic center.

Undergraduate students registered for fewer than 12 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

Graduate:

Graduate students registered for 9 to 15 credits are regarded as full-time students and are assessed the current graduate "flat" tuition rate for their academic center.

Graduate students registered for fewer than 9 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

In the Summer Term:

All graduate students are billed on a per-credit basis except for students enrolled in a full-time program that charges a flat rate per term for fall, spring, and summer.

DETERMINING HOW UNDERGRADUATE VS. GRADUATE STUDENTS ARE BILLED

Students are billed at the undergraduate or graduate tuition level in accordance with University of Pittsburgh Tuition and Fees Policy 09-05-03.

- A student enrolled in an associate's or bachelor's degree program is considered an **undergraduate** student and is billed at the appropriate undergraduate tuition rate.

- A student who has already been awarded a bachelor's degree and is enrolled in a **graduate** or doctorate-professional practice program is considered a graduate student and is billed at the appropriate graduate tuition rate, even for undergraduate classes taken during the student's graduate career.
- A student who has already been awarded a bachelor's degree and is enrolled in an associate's program or in another bachelor's program is considered a **post-baccalaureate** student. Post-baccalaureate students enrolled in an undergraduate academic center are billed at the undergraduate tuition rate, while post-baccalaureate students enrolled in an academic center that has both undergraduate and graduate degree programs may be billed at either the undergraduate or graduate rate, according to the admitting school's program requirements.

About Mandatory Fees

Mandatory Fee figures are applicable to students regardless of Pennsylvania or Out-of-State residency. Not listed under Mandatory Fees are:

1. **Course/major fees** that are based upon registration in specific courses (e.g., lab fees).
2. **Academic fees** (e.g., application fees, academic program fees for programs such as Cooperative Engineering Program and Study Abroad).
3. **Service fees** (e.g., late application for graduation and lost ID cards).
4. **Professional workshop and professional development fees**
5. **Specific-student fees** such as the Freshman Socialization Fee at the Greensburg Campus.

Residency/Reduced Tuition

Admitted students who are United States citizens and have lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education may be eligible for Pennsylvania tuition rates. Students who wish to challenge their residency classification may petition for Pennsylvania tuition rates by submitting convincing evidence for review to the Student Appeals Office in Thackeray Hall. The University's policy on Pennsylvania Residency Classification is located online at <https://www.cfo.pitt.edu/policies/policy/09/09-05-04.html>.

Military affiliated students and students who are not U.S. citizens may be eligible for Pennsylvania tuition rates if they meet the qualifications and provide the documentation required by University of Pittsburgh Policy 09-05-04, Pennsylvania Residency Classification.

For any student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements to be eligible for reduced tuition.

Financial Obligation

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provides detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

Fees

Special Service Fees may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

Course Fees are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

Late Payment Fees are charged when students make payment after the published due date for their charges for the term.

Payments and Credit Balance Refunds

PittPAY is the University's online financial portal for students and the Authorized Users that students have designated as having access to their financial information.

Payments may be made in PittPAY by electronic check (eCheck) or by credit or debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable 2.75% convenience fee for all debit or credit card payments. Check payments can be mailed to the address on the Remittance Form at the bottom of the Term Statement, which students and Authorized Users can generate and print themselves.

International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way for students and Authorized Users to make international payments on the student account from almost any country, in most currencies.

PittPAY Payment Plans are available for those who elect to make payments in a series of monthly installments, instead of one payment by the due date. Participation in a payment plan is optional. To view available payment plan offers, go to the Payment Plans tab in PittPAY.

eRefunds are automatic refunds of credit balances from the student account. Credit balances occur when payments to the account, including the disbursement of loans and financial aid, exceed the amount you owe. Students and Authorized Users who are Parent PLUS loan borrowers, go to the eRefund tab in PittPAY to designate the checking or savings account where your credit balances should be directly deposited.

Tuition Rates - Pennsylvania Residents

School	Full-Time Per Academic Year	Full-Time Per Term	Part-Time Per Credit
Dietrich School of Arts and Sciences (except as follows)	\$24,962	\$12,481	\$1,003
MS in Quantitative Economics (MQE) Program	\$44,556	\$22,278	\$1,485
School of Education	\$24,962	\$12,481	\$1,003
Graduate School of Public and International Affairs (except as follows)	\$24,962	\$12,481	\$1,003
Nursing/GSPIA Program	\$29,266	\$14,633	\$1,190
School of Social Work (except as follows)	\$24,962	\$12,481	\$1,003
MSW/MBA Program	\$28,230	\$14,115	\$1,110
Joseph M. Katz Graduate School of Business (except as follows)	\$32,374	\$16,187	\$1,579
MBA Accelerated Program	\$48,561	\$16,187	\$1,579
<i>The rate shown for the above program (MBA Accelerated Program) under "Full-Time Per Academic Year" is for three terms.</i>			
MBA Part-Time Program	\$32,374	\$16,187	\$1,579
MBA Signature Program; All Dual-Degree MBA/MS Programs	\$30,794	\$15,397	\$1,579
DBA Program	\$54,000	\$27,000	\$3,000
All MS Programs	\$31,960	\$15,980	\$1,211
JD/MBA Program	\$45,630	\$22,815	-----
MSW/MBA Program	\$28,230	\$14,115	\$1,110
MHA/MBA Program	\$30,342	\$15,171	\$1,579
MSE/MBA	\$32,038	\$16,019	\$1,579

The Executive MBA and Executive MBA in Healthcare programs are five-term programs. The total, five-term cost for both programs is \$95,000.
NOTE: Current tuition rates for students admitted to the Joseph M. Katz Graduate School of Business prior to Fall 2021 are available [here](#).

Swanson School of Engineering	\$28,652	\$14,326	\$1,357
School of Law			
Graduate (MSL)	\$37,090	\$18,545	\$1,397
Graduate (LLM)	\$41,400	\$20,700	\$1,724
Doctorate - Professional Practice (JD)	\$37,090	\$18,545	\$1,397

The rates shown for Doctorate - Professional Practice under "Part-Time Per Credit" are applicable to courses outside the curriculum.

School of Computing and Information (except as follows)	\$26,246	\$13,123	\$1,067
Graduate MLIS (on-campus and online)	\$39,050	\$13,123	\$1,067

The rate shown for Graduate MLIS under "Full-Time Per Academic Year" is for three terms. For Summer Term:
- The Part-Time Per-Credit rate applies, so it may differ slightly from the Full-Time Per-Term tuition.
- Mandatory fees that apply are those referenced in the table below as Full-Time Per-Term.

School of Dental Medicine			
Graduate (except as follows)	\$55,794	\$27,897	\$2,302
Graduate (MS, PhD, in Oral Biology)	\$29,259	\$9,753	\$1,190

The rate shown for Graduate (MS, PhD, in Oral Biology) under "Full-Time Per Academic Year" is for three terms.

Doctorate - Professional Practice	\$53,432	\$26,716	\$1,168
-----------------------------------	----------	----------	---------

The rate shown for Doctorate - Professional Practice under "Part-Time Per Credit" is applicable to courses outside the curriculum.

School of Nursing	\$29,266	\$14,633	\$1,190
School of Pharmacy			
Graduate (except as follows)	\$29,266	\$14,633	\$1,190

The MSPBA program is a three-term program. The total cost for new students entering in August 2021 and after is \$38,778.

Doctorate - Professional Practice (PharmD)	\$34,762	\$17,381	\$1,340
--	----------	----------	---------

The Part-Time Per Credit rate for Doctorate-Professional Practice is for courses outside the curriculum.

School of Public Health			
Graduate (except as follows)	\$29,266	\$14,633	\$1,190
MHA/MBA Program	\$30,342	\$15,171	\$1,579

School of Medicine			
Graduate	\$29,396	\$14,698	\$1,193
Doctorate - Professional Practice	\$61,194	\$30,597	\$1,070
<i>The Part-Time Per Credit rate for Doctorate-Professional Practice is for courses outside the curriculum.</i>			
School of Health and Rehabilitation Sciences (except as follows)	\$29,266	\$14,633	\$1,190
<p>Musculoskeletal Physical Therapy and Neuromuscular Physical Therapy concentrations of the Master of Science in Health and Rehabilitation Science Program</p> <p>The SHRS Physical Therapy (MS) Program is a full-time, 1 year, 3 term-program. Tuition will be billed at the flat rate for the duration of the program. The three-term cost for students first entering in Spring 2023 is \$39,978.</p>			
<p>Doctor of Physical Therapy Program</p> <p>The SHRS Doctor of Physical Therapy (DPT) Program is a full-time, 2.3-year, 7 term-program. Tuition will be billed at the flat rate for the duration of the program. The three-term cost for students first entering in Fall 2022 is \$42,063.</p>			
<p>Doctor of Physician Assistant Studies</p> <p>The SHRS Doctor of Physician Assistant Studies (DPAS) is a full-time, 3 term program. Tuition will be billed at a flat rate each term for the duration of the program. The three-term cost for students first entering in Summer 2022 is \$20,196.</p>			
<p>Master of Science in Physician Assistant Studies (Hybrid)</p> <p>The hybrid SHRS Master of Science in Physician Assistant Studies (MS) is a full-time, 6 term program. Tuition will be billed at a flat rate each term for the duration of the program. The three-term cost for students first entering in Spring 2023 is \$49,998.</p>			
<i>Full-Time Per Academic Year includes the fall and spring terms only. Some SHRS programs require enrollment during the summer term and students will be billed an additional per-credit rate. View curriculum information on the SHRS website to determine the number of credits required by program during the summer term.</i>			

Mandatory Fees

Graduate and Doctorate-Professional Practice

Fee	Full-Time Per Academic Year	Full-Time Per Term	Part-Time Per Term
Student Activity Fee	\$60	\$30	\$15
Wellness Fee	\$510	\$255	\$127
Computing and Network Services Fee	\$350	\$175	\$100
Security and Transportation Fee	\$260	\$130	\$130
TOTAL	\$1,180	\$590	\$372

Note: The mandatory fees exhibited are applicable to Fall Term 2022 and are subject to change in subsequent terms of Academic Year 2022-2023.

Tuition and mandatory fees exhibited on the Tuition and Mandatory Fees website are subject to change without prior notice.

Tuition Rates - Out-of-State Residents

School	Full-Time Per Academic Year	Full-Time Per Term	Part-Time Per Credit
Dietrich School of Arts and Sciences (except as follows)	\$42,324	\$21,262	\$1,728

MHA/MBA Program	\$51,456	\$25,728	\$2,676
MSE/MBA	\$54,308	\$27,154	\$2,676
<i>The Executive MBA and Executive MBA in Healthcare programs are five-term programs. The total, five-term cost for both programs is \$95,000.</i>			
NOTE: Current tuition rates for students admitted to the Joseph M. Katz Graduate School of Business prior to Fall 2021 are available here.			
Swanson School of Engineering	\$48,594	\$24,297	\$2,297

School of Law			
Graduate (MSL)	\$47,734	\$23,867	\$2,090
Graduate (LLM)	\$41,400	\$20,700	\$1,724
Doctorate - Professional Practice (JD)	\$47,734	\$23,867	\$2,090
<i>The rates shown for Doctorate - Professional Practice under "Part-Time Per Credit" are applicable to courses outside the curriculum.</i>			
School of Computing and Information (except as follows)	\$44,504	\$22,252	\$1,828
Graduate MLIS (on-campus)	\$66,440	\$22,252	\$1,828
Graduate MLIS (online)	\$39,050	\$13,123	\$1,067
<i>The rate shown for Graduate MLIS under "Full-Time Per Academic Year" is for three terms. For Summer Term: - The Part-Time Per-Credit rate applies, so it may differ slightly from the Full-Time Per-Term tuition. - Mandatory fees that apply are those referenced in the table below as Full-Time Per-Term.</i>			
School of Dental Medicine			
Graduate (except as follows)	\$68,414	\$34,207	\$2,831
Graduate (MS, PhD, in Oral Biology)	\$34,947	\$11,649	\$1,426
<i>The rate shown for Graduate (MS, PhD, in Oral Biology) under "Full-Time Per Academic Year" is for three terms.</i>			
Doctorate - Professional Practice	\$64,070	\$32,035	\$1,770
<i>The rate shown for Doctorate - Professional Practice under "Part-Time Per Credit" is applicable to courses outside the curriculum.</i>			
School of Nursing	\$34,950	\$17,475	\$1,426
School of Pharmacy			
Graduate (except as follows)	\$31,216	\$15,608	\$1,270
<i>The MSPBA program is a three-term program. The total cost for new students entering in August 2021 and after is \$38,778.</i>			
Doctorate - Professional Practice (PharmD)	\$39,968	\$19,984	\$1,542
<i>The rates shown for Doctorate - Professional Practice under "Part-Time Per Credit" are applicable to courses outside the curriculum.</i>			
School of Public Health			
Graduate (except as follows)	\$49,662	\$24,831	\$2,031
MHA/MBA Program	\$51,456	\$25,728	\$2,676
School of Medicine			
Graduate	\$47,104	\$23,552	\$1,928

Doctorate - Professional Practice	\$63,576	\$31,788	\$1,457
<i>The rates shown for Doctorate - Professional Practice under "Part-Time Per Credit" are applicable to courses outside the curriculum.</i>			
School of Health and Rehabilitation Sciences (except as follows)	\$49,662	\$24,831	\$2,031
Rates for out-of-state residents in the following programs: Graduate programs in Clinical Rehabilitation and Mental Health Counseling (MS); Communication Science and Disorders (MA, MS); Health Informatics (MS) on-campus; Nutrition and Dietetics (MS); Occupational Therapy (MOT); Physician Assistant Studies (MS); Prosthetics and Orthotics (MS); Rehabilitation Technology (MRT); Doctorate - Professional Practice programs in Audiology (AuD); Occupational Therapy (OTD)	\$34,950	\$17,475	\$1,426
Health Informatics (MS) online Occupational Therapy (CScD) online	\$29,266	\$14,633	\$1,190
Musculoskeletal Physical Therapy and Neuromuscular Physical Therapy concentrations of the Master of Science in Health and Rehabilitation Science Program The SHRS Physical Therapy (MS) Program is a full-time, 1 year, 3 term-program. Tuition will be billed at the flat rate for the duration of the program. The three-term cost for students first entering in Spring 2023 is \$67,950.			
Doctor of Physical Therapy Program The SHRS Doctor of Physical Therapy (DPT) Program is a full-time, 2.3-year, 7 term-program. Tuition will be billed at the flat rate for the duration of the program. The three-term cost for students first entering in Fall 2022 is \$49,500.			
Doctor of Physician Assistant Studies The SHRS Doctor of Physician Assistant Studies (DPAS) is a full-time, 3 term program. Tuition will be billed at a flat rate each term for the duration of the program. The three-term cost for students first entering in Summer 2022 is \$20,196.			
Master of Science in Physician Assistant Studies (Hybrid) The hybrid SHRS Master of Science in Physician Assistant Studies (MS) is a full-time, 6 term program. Tuition will be billed at a flat rate each term for the duration of the program. The three-term cost for students first entering in Spring 2023 is \$49,998.			
<i>Full-Time Per Academic Year includes the fall and spring terms only. Some SHRS programs require enrollment during the summer term and students will be billed an additional per-credit rate. View curriculum information on the SHRS website to determine the number of credits required by program during the summer term.</i>			

Mandatory Fees

Graduate and Doctorate-Professional Practice

Fee	Full-Time Per Academic Year	Full-Time Per Term	Part-Time Per Term
------------	------------------------------------	---------------------------	---------------------------

Student Activity Fee	\$60	\$30	\$15
Wellness Fee	\$510	\$255	\$127
Computing and Network Services Fee	\$350	\$175	\$100
Security and Transportation Fee	\$260	\$130	\$130
TOTAL	\$1,180	\$590	\$372

Note: The mandatory fees exhibited are applicable to Fall Term 2022 and are subject to change in subsequent terms of Academic Year 2022-2023.

Tuition and mandatory fees exhibited on the Tuition and Mandatory Fees website are subject to change without prior notice.

Pitt Online Tuition And Fees

Pitt Online is a division of the University Center for Teaching and Learning. Through Pitt Online, several of the undergraduate and graduate programs offered in traditional classroom settings are available to qualified applicants regardless of their geographical location. Please note, these rates apply to students admitted to one of the Pitt Online programs, not to students taking one or more online classes as part of a regular academic program.

Tuition for Pitt Online Students	Per Credit	
	In-State	Out-of-State
Graduate School of Public and International Affairs (except for the DNP/MPPM program - see School of Nursing tuition below)	\$1,003	\$1,003
School of Education	\$1,003	\$1,003
School of Law - Online Certificates	\$767	\$767
School of Law - Online Master of Studies in Law	\$1,236	\$1,236
School of Nursing - Graduate Courses	\$1,190	\$1,190
School of Nursing - Undergraduate Courses	\$1,036	\$1,036
UCSUR - Gerontology Certificate	\$1,003	\$1,003

Fees for Pitt Online Students	Per Term	
	In-State	Out-of-State
Computing and Network Services Fee	\$175	\$175

Due Date Schedule

Notifications and Due Dates

Weekly Balance Due Notifications are sent by email and text to students and their Authorized Users from pittpay@pitt.edu when there is a balance due on the student account. To view and edit your email and mobile phone number settings for these notifications, login to PittPAY, select Actions, then Manage Notifications.

Please note, due dates provided here are for planning purposes. The due dates for future terms are estimates, and are subject to change. When balance due notifications begin for each new term, the official due date will be presented in PittPAY on the Account Summary and Account Activity tabs. The current due date is always provided on the Student Payment Center's homepage, as well.

Term	Periodic Balance Due Notifications Begin:	Balance is Due:
Summer 2022	April 20, 2022	May 18, 2022
	May 18, 2022	June 15, 2022
Fall 2022	July 20, 2022	September 14, 2022
Spring 2023	November 16, 2022	January 25, 2023

As soon as you make an online payment in PittPAY, your balance due will be updated to reflect the payment. You can view your payment receipt in Transaction History. Late fees, collection costs, and financial holds are placed on past due accounts.

If you prefer to make monthly payments, learn about the PittPAY Payment Plan. **There is a deadline to enroll in a payment plan each term** and you can take advantage of more monthly installments by enrolling in a plan early.

Kenneth P. Dietrich School of Arts and Sciences

Graduate programs in the Dietrich School of Arts and Sciences (A&S) are designed to prepare students for careers in research and teaching in the humanities, natural sciences, and social sciences responsive to the evolving needs of the private and public sectors of society as well as to the particular interests of academia.

A&S Graduate Studies has final approval over all admissions to graduate study in A&S and overall student appointments as teaching assistants, teaching fellows, graduate student assistants, A&S fellows, and graduate student researchers, as well as responsibility for processing all related tuition scholarships. It reviews and records the academic progress of graduate students, including the passing of comprehensive examinations, admissions to doctoral candidacy, and final oral examinations. It verifies the completion of theses and dissertations and certifies all graduate degrees awarded in the Dietrich School of Arts and Sciences.

Contact Information

Questions regarding admissions, teaching and research appointments, and programs of study should be addressed first to the individual graduate department or program. Questions regarding registration, tuition scholarships for teaching or research assistants, and graduate status should be addressed to:

Dietrich School of Arts and Sciences-Graduate Studies
5141 Sennott Square
412-624-6094
Fax: 412-624-6855
E-mail: graduate@as.pitt.edu
www.asgraduate.pitt.edu

Admissions

A&S offers MA, MFA, and PhD degrees and certificate programs in the humanities; MA, MS, and PhD programs in the natural sciences; and MA and PhD programs in the social sciences. Several dual and joint degree programs are available.

Students applying for admission should proceed as follows:

Interested applicants are encouraged to go to the Dietrich School of Arts and Sciences graduate Web page at www.asgraduate.pitt.edu and to visit Web pages of their departments of interest. Students should complete the online application through the ApplyYourself Application Network from the departments' Web pages. The online application is automatically sent to the appropriate department for processing.

Deferred Admission

Admission to graduate study is valid for the academic year. If a department approves, a student may defer admission for one year without having to complete any additional applications. If approved, the student is sent a new admission letter. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. The deferral of admission is independent of financial aid.

Transferring Between A&S Departments

A student desiring to change a major department of graduate study in A&S must file an application for admission in the department of intended graduate study. Applications for transfer will be evaluated in the same way as applications for admission to the designated department. An application fee is not required.

Admission of International Students

Before reading the A&S-specific details below, see the *International Graduate Student Admission section under Application for Admission* section for a complete overview of University admissions requirements, including TOEFL or IELTS scores, for students from other countries.

The Dietrich School of Arts and Sciences minimum TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing) will be required. The required minimum IELTS score of 7.0 (with at least 6.5 in each of its four sections) will be required.

Students should apply online using the ApplyYourself Application Network available from the department's Web site. The online application is automatically sent to the appropriate department for processing. All applicants should take note of specific departmental requirements, in addition to those required of all international students. A&S Graduate Studies, (in 5141 Sennott Square) will determine whether an applicant has sufficient proficiency in English.

International Student Application Deadlines and Application Fee

The deadlines for submitting a completed application and financial aid form are determined by the individual departments, but due to delays in the issuance of visas it is recommended that international students apply as early as possible, preferably at least six months prior to the start of the term of admittance, so that paperwork can be processed in a timely manner.

The application fee for all students is \$50. The fee must be submitted in the form of a check or money order made payable to the University of Pittsburgh or may be paid using a credit card when applying online.

Admission Status

For an overview of the requirements for the three admission statuses—full, provisional, and special—see Admissions Status in the Application for Admission section of this catalog.

Full Graduate Status

Only students in full graduate status may undergo preliminary evaluations, take comprehensive examinations, be advanced to degree candidacy, or receive teaching assistantships or fellowships.

Provisional Graduate Status

Transfer from provisional to full graduate status is possible only upon formal recommendation of the student's department and after:

1. removal of deficiencies noted at the time of admission, with A or B grades, and/or
2. completion of four courses (12 credits) for which graduate credit is earned with at least a 3.00 average.

Special Status

A special status student who takes courses while not seeking an advanced degree may transfer up to four courses (12 credits) taken while on special status to a degree program if the student is subsequently admitted into one, and if the department recommends the transfer. A transferred course must carry a grade of B or better.

Those special status students who earn graduate credits while on temporary admission may apply those credits toward degree requirements.

Early Admission Program

Exceptionally able students in Arts and Sciences at the University of Pittsburgh (GPA of 3.50 or above) with strong letters of recommendation from faculty in the department to which they are applying may be admitted to full graduate status in a department in A&S. At the time of admission, students must have completed 96 credits toward the baccalaureate degree, the final 30 of which must have been taken in A&S, and must have satisfied the general education requirement, second language requirement (if any), and academic major requirements (as certified by A&S). For additional information regarding requirements for the completion of the baccalaureate degree, see the *A&S section in the University of Pittsburgh Undergraduate Catalog*.

Inactive Status/Readmission

For detailed information on what constitutes inactive registration status and requirements for readmission to active status, please see *Readmission*.

Applications for readmission to A&S should be received according to the following schedule:

- Fall term readmission applications by August 1
- Spring term readmission applications by December 1
- Summer term and/or sessions by April 1

Financial Assistance

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, traineeships, tuition scholarships, and loans. Application for financial aid should be made on the regular Application for Admission to Graduate Study form except in special cases as noted below. All applications for financial assistance are reviewed at the departmental level and awards are made to the extent of available funds. Admission to graduate study does not carry any implications concerning the award of financial aid. Only students with full graduate status are eligible for teaching assistantships and fellowships.

Information concerning nationally competitive grants and fellowships is available to University of Pittsburgh Students through the Office of Research Web site at <http://www.research.pitt.edu/find-funding>.

Teaching and Research Appointments

Each year about 665 graduate students receive teaching appointments and fellowships in departments offering graduate degrees in the Dietrich School of Arts and Sciences to assist in undergraduate instruction in Arts and Sciences and the College of General Studies. In addition to financial support and medical coverage, these appointments provide teaching experience and further professional development.

In recognition of academic merit, the University offers teaching assistants (TA), teaching fellows (TF), graduate student assistants (GSA), and graduate student researchers (GSR) full or partial tuition scholarships, and students are required to register for the number of credits proportional to their appointment. If appointed in the summer term, students should register for a minimum of 3 credits (or full-time dissertation study, if eligible), unless additional registration is needed for academic purposes.

Information regarding TA/TF/GSA/GSR policies is available at <http://www.pitt.edu/~graduate/tapolicyrev.htm> and at A&S Graduate Studies, in 5141 Sennott Square. For further information on these positions and general descriptions of each appointment's job requirements, see the Financial Aid and Policies/Regulations sections in the above catalog.

Teaching Assistants (TA)

For completion of services requiring approximately 20 hours per week, a TA receives a salary for two terms. Two-term TAs who want to receive their salary spread out across three terms should contact their department immediately.

Teaching Fellows (TF)

For teaching services, requiring about 20 hours per week, a TF receives a salary for the term of their contract, either one or two terms. Two-term TFs who want to receive their salary spread out across three terms should contact their department immediately.

Graduate Student Assistants (GSA)

A few graduate student assistantships are available in A&S. A GSA usually assists a faculty member in library research, editorial duties, or similar academic tasks. For such services, requiring about 20 hours per week, a GSA receives a salary for the term of their contract, either one or two terms. Two-term GSAs who want to receive their salary spread out across three terms should contact their department immediately.

Graduate Student Researchers (GSR)

The GSRs work under the direct supervision of and are appointed by the principal investigator (or associate) of a funded research project. Their stipends are determined by the terms of the grant within guidelines set by the Associate Dean for Graduate Studies and Research.

Fellowships and Traineeships

Fellowships and traineeships available to students in the School of Arts and Sciences can be found at <https://www.asgraduate.pitt.edu/financial-support>.

Academic Standards

In addition to those University-wide regulations and standards detailed in the section on General Regulations, each student in A&S is expected to be familiar with these school-specific regulations and academic standards:

Credits and Grade Points

Courses for which a G, I, N, R, or W grade is recorded and courses numbered below 1000 or lower (0-0999) do not contribute either credits or grade points toward graduation. When a course is repeated, only the last grade and credits are used to calculate the GPA.

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, in order to be eligible to retain teaching assistantships or fellowships, to undergo the preliminary evaluations, to take comprehensive examinations, to be admitted to candidacy for the PhD degree, and to graduate.

Independent study and individual thesis and dissertation research must be graded using the S/NC option (formerly the S/N option) and thus are not used in the calculation of the GPA required for continuation in good academic standing.

Academic Probation and Dismissal

A graduate student who fails to maintain an overall GPA of 3.00 or to make satisfactory progress in a degree program is subject to dismissal from graduate study at the University. When the overall GPA of a student falls below 3.00, the student is automatically placed on academic probation; is not eligible for a teaching assistantship, fellowship, or participation in the department comprehensive examination; and is subject to dismissal at the end of the following term. The department should so warn the student in writing.

In addition, any student who is not making satisfactory progress toward the completion of an advanced degree (completion of an acceptable number of required courses and/or research each term or year) may be placed on academic probation by the department. The student must be informed in writing of this action by the department. Normally, one term will be granted in which to correct the deficiency.

A student whose performance on a preliminary or comprehensive examination is judged to be inadequate may be subject to dismissal at the end of the term.

Withdrawal from Courses

Students may add or drop courses before the end of the add/drop period. A student who wishes to withdraw from an individual course after the add/drop period must complete a Monitored Withdrawal form available from the Dean of the school offering the course, obtain the signature of the instructor, and return the completed form to the Assistant Dean of Graduate Studies, 5141 Sennott Square. A W grade will then be issued.

Students may terminate their registration in all classes by informing the Office of the University Registrar of their intent to do so prior to the end of the add/drop period for the term. Students registered for courses scheduled to begin after the end of the add/drop period for the term may terminate their registration by informing the Office of the University Registrar of their intent to do so at any time prior to the first scheduled meeting day of the class. A student who stops attending a course and does not initiate the withdrawal or resignation procedures may be assigned an F grade.

Repetition of Courses

A student may repeat any course in which a grade of B- or lower is received if authorization is given by the student's department. When a graduate student repeats a course in which the subject matter has not changed, only the last grade received is counted in computing the grade point average. A Course Repeat form must be filed with A&S Graduate Studies, 5141 Sennott Square, to initiate proper computing of the grade point average.

Grade Changes

A grade given by an instructor for completed work will not be changed unless an error has been made in reporting or recording the grade. (Reexamination or extra work may not be used as a basis for a change of grade.) A Grade Change Request form must be filed with A&S Graduate Studies, 5141 Sennott Square, and approved by the Assistant Dean of Graduate Studies.

Independent Study

Students who are using University facilities to an extent greater than represented by their formal course load (and those students required by a fellowship or other appointment to be full-time students) are required to register for an appropriate number of additional credits of Independent Study to reflect their correct status. All graduate study not under the direct supervision of a specific faculty member is, by definition, Independent Study, course number 2990 in each program. This includes study for preliminary evaluations, comprehensive and overview examinations, the preparation of research proposals, etc. Only the S/NC Grade Option (formerly the S/N option) may be used in a 2990 course.

Directed Study

Registration for Directed Study is limited to students in good academic standing and normally beyond their first year of graduate study who wish to study or carry out a project in an area not available in a formal course. The work must be under the direct supervision of a faculty member who has approved the proposed work in advance of registration. A brief description of the work should be recorded in the student's file in the department. Either a letter grade or the S/NC option (formerly the S/N option) may be used to evaluate the quality of work performed by the student, and both the credits and the grade points (if any) will be used in determining the academic standing of the student.

Transfer Credits

Students may transfer credits earned at another accredited institution in an approved degree-granting graduate program toward the requirements for an advanced degree at the University of Pittsburgh. Students requesting advanced-standing credits by transfer should indicate this within the first year of graduate study and provide official transcripts. The department evaluates each applicant's credentials and indicates to the student at the time of admission its recommendation to the Assistant Dean of Graduate Studies concerning advanced-standing credit. Credits for course work taken 10 or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred for PhD students. For master's students, credits for course work taken four or more years prior to admission for graduate study at the University of Pittsburgh are not automatically transferred. Departments must evaluate such coursework in terms of its currency of knowledge in the field when submitting transfer credit requests for approval by A&S. Students admitted with special or provisional status cannot transfer credits until full status has been granted. Graduate students already enrolled, when approved in advance by their department and the Assistant Dean of Graduate Studies, may spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and may transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh.

A maximum of 6 credits may be accepted by transfer toward the requirements for the master's degree. A maximum of 30 credits may be transferred toward the requirements for the PhD degree for course work at the master's level earned in another approved graduate school. A student who transfers 30 credits due to completion of a master's degree at another institution is not eligible to earn a master's degree in that discipline at the University of Pittsburgh. If a student has completed relevant graduate work beyond the master's level at another institution, up to an additional 6 credits may be accepted for transfer. (No more than 36 credits can be accepted for transfer from all other graduate institutions.) Acceptance of credits by transfer from other graduate schools does not relieve the student from the requirement to register at the University of Pittsburgh and satisfactorily complete a minimum of 24 credits for a master's degree and a minimum of 36 credits for a PhD degree.

For further detail on University requirements on transfer credits, see Acceptance of Transfer Credits under the General Regulations section of this catalog.

Registration of Undergraduate Students for Graduate Credit

University of Pittsburgh undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree in A&S may be permitted, during their final term, to register for one or two courses at the 2000 level for credit toward a graduate degree. Students must obtain written permission from an A&S department admissions officer that the course may count when and if they are admitted into the degree program. This privilege should not be granted if the proposed total course program exceeds a normal full-time load or if the courses are required for the undergraduate degree. When students register for graduate study at the University, these graduate credits and grades may be transferred to the graduate transcript upon recommendation of the department and approval by the Assistant Dean of Graduate Studies. No more than 6 credits can be transferred in this manner.

Statute of Limitations and Leaves of Absence

All regulations regarding the statute of limitations for completion of degree requirements and leaves of absence are detailed under Statute of Limitations section under General Regulations. Variations and additions to those rules within A&S are as follows:

Requirements for the master's degree should be completed within a period of four consecutive calendar years from the student's initial registration for graduate study. Requirements for the PhD degree must be completed within a period of 10 years from the student's initial registration, or within eight years if the student has received a previous master's degree. Some departments may have a more stringent statute of limitations for completion of master's or doctoral degrees. There is also a strictly enforced limit of four calendar years on the master's comprehensive examination or its equivalent for students beginning or readmitted for graduate study in fall 2002 or later, and a seven-calendar-year limit on the PhD comprehensive examination for students entering graduate study programs in fall 1999 or later. (Ten-year limits on PhD comprehensive examinations apply for doctoral students enrolled prior to fall 1999.) If the student has not completed all requirements for the master's or doctoral degrees within the time limits on comprehensive examinations for degrees as specified above, the comprehensive examination for the degree must be retaken in order to graduate.

Under exceptional circumstances a candidate for an advanced degree may apply for an extension of the statute of limitations. Applications are available in the department or in A&S Graduate Studies, 5141 Sennott Square. They must state the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a detailed plan of study and proposed date for completion. The request must be approved by the Chair of the student's doctoral or master's committee and the department Chair or director of graduate studies and be submitted to the Assistant Dean of Graduate Studies for final action. Each student who requests an extension of the statute of limitations must be able to demonstrate proper preparation for the completion of all current degree requirements. There is no extension on the time limits for the master's and doctoral comprehensive examinations.

Under special conditions, graduate students may be granted a leave of absence. Only one leave of absence can be obtained by students during their graduate career. Readmission following an approved leave of absence is a formality.

Advising and Placement

Advising and placement services in A&S graduate programs are conducted within the various departments and programs. Students should consult department handbooks, their departmental advisor, their departmental director of graduate studies, their departmental graduate administrator, and/or the Chair for details. The A&S Graduate Studies Office makes every effort to keep advising and placement in the forefront of departmental concerns. All departments are responsible, with A&S oversight, for implementing policies and practices consistent with the University's in *Elements of Good Academic Advising*. Unresolved problems relating to the advising of graduate students at the department level can be taken to the Assistant Dean of Graduate Studies and research in A&S Graduate Studies, 5141 Sennott Square

A&S Degree Requirements

The general requirements for the master's degrees and doctoral degrees are detailed under Regulations Pertaining to Master of Arts and Master of Science Degrees, Regulations Pertaining to Professional Master's Degrees (including the MFA), and Regulations Pertaining to Doctoral Degrees. For further A&S-specific requirements, see below. Once the University-wide requirements and the A&S Degree Requirements below have been reviewed, see the relevant departmental description for more specific detail.

Requirements for the MA, MS, and MFA Degrees

The minimum requirement for the Master of Art and Master of Science degrees is 30 credits beyond the baccalaureate degree. Furthermore, the MFA, as a professional degree, requires a minimum of 36 credits. Not more than 6 credits may be granted toward the completion of the requirements for a master's degree for work completed at another accredited graduate institution. Most programs require more than this minimum.

Credit Requirements

In addition to the general credit requirements detailed under MA and MS Requirements at the front of this catalog, the following requirements must be satisfied:

- Completion of 12 credits from the 2000 or 3000 series with a grade of B or higher.
- All courses from the 2000 or 3000 series must be completed with an average grade of B (3.00)
- Registration for research, independent study, or directed study cannot be included among the minimum of 12 credits that must be taken from the 2000 or 3000 series with a grade of B or higher
- Independent study credits do not count towards the MA/MS/MFA degrees

Second Language Requirement

The requirement of proficiency in second languages is at the discretion of individual departments.

Comprehensive Examination

Whenever a program substitutes an equivalent requirement for the comprehensive examination, the department or program must obtain prior approval from the A&S Graduate Council and notify the University Council on Graduate Study and describe the situation. Students on inactive, special, or provisional status, or who have a GPA less than 3.00, are not eligible to take the comprehensive examination. *See Comprehensive Examination under Regulations Pertaining to Master's Degrees for further detail on requirements for comprehensive exams.*

Thesis

The requirement of a thesis or its equivalent is at the discretion of individual departments. If a thesis is submitted, its form must be in accord with specifications available from The ETD Format Guidelines Manual and approved by the Assistant Dean of Graduate Studies. A report of the final oral examination in defense of the master's thesis must be filed in 5141 Sennott Square. *For further information on thesis requirements, including the make up of the thesis committee, see Thesis Option under Regulations Pertaining to Master's Degrees.*

Application for Graduation

Each candidate for graduation must file an official Application for Graduation in 5141 Sennott Square, early in the term in which graduation is expected. (See your graduate administrator for deadline dates.) *See Application for Graduation under General Regulations for further details on graduation and graduation requirements.*

Graduation Certification

The faculty of the department evaluates the performance in course work and on comprehensive examinations. If the candidate's performance is satisfactory and all degree requirements have been met, a letter must be submitted to the Associate Dean for Graduate Studies and Research, on behalf of the department, certifying that the candidate has completed all requirements for a master's degree and indicating whether or not the candidate is recommended to proceed to doctoral study.

Requirements for the PhD Degree

An overview of the University requirements for the PhD degree is presented in Regulations Pertaining to Doctoral Degrees. A&S-specific requirements are detailed below.

Credit Requirements

The minimum requirement for the PhD degree of 72 credits may be earned in formal course work, directed study, independent study, and/or thesis and dissertation research.

Course Requirements

Students must achieve the minimum GPA established by their departments, in no case less than 3.00, to be eligible to undergo the preliminary examination, to take the comprehensive examination, to be admitted to candidacy for the PhD degree, and to be graduated.

Second Language and/or Other Tools of Research

The requirement of proficiency in the use of second languages or other tools of research is at the discretion of individual departments. The second language departments have the capacity to evaluate second language proficiency and will be available to so certify.

Preliminary Examination

The nature of the preliminary examination/evaluation and the time when it is conducted are determined by each department. In some programs, the preliminary doctoral exam/evaluation may be combined with a master's comprehensive examination. *See Preliminary Evaluation under Regulations Pertaining to Doctoral Degrees for further details on regulations pertaining to the exam. Students must be registered in the term they are completing the Preliminary Examination.*

Comprehensive Examination

Comprehensive examination results must be reported promptly to A&S Graduate Studies, 5141 Sennott Square, and no later than the last day of the term in which the examination is administered. Students must be enrolled in the term in which they are completing the Comprehensive Examination. *See Comprehensive Examination under Regulations Pertaining to Doctoral Degrees for further detail on regulations regarding the exam*

Doctoral Committee

Doctoral dissertation committees are composed of four members, three of whom must be Graduate Faculty with either a primary appointment in the candidate's department or a secondary/joint appointment in the candidate's department and a primary/joint appointment in another relevant department within the University of Pittsburgh ("internal members"). The fourth member must be Graduate Faculty external to the candidate's department within the University of Pittsburgh or a qualified scholar with an equivalent status at another accredited institution ("external member"). The Graduate Faculty Roster for the University of Pittsburgh can be viewed at the following website: <https://ir.pitt.edu/graduate-faculty-roster/>. Membership in the Graduate Faculty is not automatic and must be formally requested by the faculty member's department and approved by the Associate Dean of Graduate Studies before the faculty member can serve on a doctoral dissertation committee. The Chair of the committee must be a current (or recently departed) member of the University of Pittsburgh. Any member may serve as Co-Chair.

Notification of Committee Membership

The names of the committee members must be submitted to the Graduate Studies Office as part of the application for candidacy by the graduate student. All requests for subsequent changes to the committee should be submitted for approval to the Graduate Studies Office by the Graduate Administrator for the candidate's department. Any changes to the committee membership, internal or external, after the dissertation proposal/prospectus/overview meeting must be approved by the Assistant Dean of Graduate Studies before the dissertation defense. Forms for admission to candidacy and committee changes can be obtained by the Graduate Administrator in the A&S Graduate Handbook.

Special Requirements for External

Faculty from outside the University of Pittsburgh may serve as external committee members, but the qualifications of the proposed committee member must be reviewed and their participation approved by the Assistant Dean of Graduate Studies **before** the dissertation proposal/prospectus/overview meeting or defense is scheduled. Such a request should be accompanied by the requested committee member's current CV and a brief memo that explains the benefits for the student of the participation of this faculty member on the committee. CVs for external committee members who have been approved previously by the Assistant Dean for a particular department's graduate students need only be resubmitted once every five years. In this case, however, the memo accompanying each request for an external member's participation in a new committee must also note the date on which the CV was last submitted for this individual. If the date is not known, a new CV must be included. Requests for external members must be approved by the Assistant Dean in advance of the requested member's participation on the doctoral committee. The Assistant Dean will review the material and either approve or reject the proposed external member.

Additional Committee Members

Additional members may be added to the doctoral committee in cases where additional expertise is needed. Such additional committee members are expected to have significant involvement with the graduate student and to attend both the proposal/prospectus/overview meeting and the defense unless prior approval has been received for remote attendance. For additional committee members only, the Graduate Faculty status (or the

equivalent at another institution) requirement may be waived if prior approval from the Assistant Dean is requested and granted. Such a request should be accompanied by a brief memo that explains the benefits for the student of the participation of this faculty member on the committee and, in the case of a member who is not from the University of Pittsburgh, a current CV. The CV need only be provided every five years for committee members serving on multiple committees within the same department.

Committee Participation by Former Members of the University of Pittsburgh Faculty

Committee members who leave the University after a graduate student has been admitted to candidacy may stay on the committee in their original capacity, as long as they are willing and able to physically attend the defense (or have requested and received permission to attend remotely as described below), and providing that the defense is scheduled within 12 months of the faculty member's departure. If the departed committee member is the Chair, and continues in this role, a Co-Chair from the department must be designated. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).

Committee Participation by Retired Members of the University of Pittsburgh Faculty

Faculty who are retired from the University of Pittsburgh are eligible to serve as members on committees formed both before and after their retirement, as long as they are still active professionally in the academic community as reasonably determined by the Chair of the Department. Retired faculty may serve in any capacity including as Chair of the committee. The participation of any committee member in this category will not affect the maximum number of remote attendees permitted (two, one of whom must be external as described below).

Remote Participation by Candidate and Committee members

The candidate and the Committee Chair must attend in person both the dissertation proposal/prospectus/ overview meeting and the defense. All other committee members should also be physically present at both meetings. In exceptional circumstances, however, this requirement may be waived as described below.

External committee member only: Remote attendance may be requested from the Assistant Dean for both the dissertation proposal/prospectus/overview meeting and the defense for the external committee from a distant location if, and only if, remote attendance can be arranged according to the guidelines detailed below.

Other committee members. Remote attendance may also be requested from the Assistant Dean for no more than one of the other committee members. Where an external member from outside the University of Pittsburgh is already attending remotely, however, the request must also be accompanied by a memo from the department explaining the need for this second member to attend remotely. Such a request may not be granted by the Assistant Dean if the situation could easily be resolved by a shift in the meeting date of one month or less. A committee member who participated remotely in the overview meeting must attend the defense in person. It is the responsibility of the student to consult as early as possible with committee members about their availability such that remote attendance by more than one member is avoided if at all possible. Remote attendance by more than two committee members will not be permitted.

Remote Attendance Requirements

To satisfy the requirements of remote attendance, any remotely attending committee member must have full audiovisual interaction. The attendee must be visible to other committee members and the graduate student presenter and must be able to see the presenter as well as others in the room as necessary. The attendee must be able to hear and participate orally in all parts of the discussion and questioning. The candidate's department is responsible for arranging the necessary technology to fulfill the remote attendance requirements and it is recommended that someone with technological expertise be present to resolve difficulties if they arise. **The dissertation proposal/prospectus/overview meeting or the defense of the dissertation must be rescheduled (or finished at later time) if -**

1. it is not technologically possible to accomplish the required level of audiovisual interaction at the time and place appointed; or
2. the video portion of the connection fails before the defense is 50% completed (reasonably determined by the Committee Chair) and cannot be reestablished; or
3. the audio portion connection fails before 90% of the meeting or defense is completed (reasonably determined by the Committee Chair) and cannot be reestablished.

Chair Certification of Compliance with Remote Participation Requirements

The Chair of a dissertation committee in which any members participate remotely will be required to complete a form ("Remote Attendance Certification"), in which the Chair attests that the requirements for remote attendance have been met. This form must be included with the results of the dissertation proposal/prospectus/overview meeting or defense in the submission to the Graduate Office. If the Chair of the committee signs the student's paperwork in the name of the remotely attending member, a copy of the authorization for this signature (an email from the remotely attending member authorizing the signature is sufficient) must also be provided when the documentation is submitted.

The form is available at: Remote Attendance Certification

Admission to Candidacy for the PhD Degree

After completion of the overview, the student should, in consultation with the student's major advisor, file the application for admission to candidacy for the Doctor of Philosophy degree. Students are informed of admission to candidacy by written notification from the Assistant Dean of Graduate Studies. When the topic has been accepted and the proposed doctoral committee has been approved by the Department Chair and the Assistant Dean of Graduate Studies, the student will be informed of admission to candidacy and of the membership of the doctoral committee. Students must be enrolled in the term in which they are completing the overview for candidacy. *For a listing of requirements for admission to candidacy, see Admission to Candidacy for the Doctor of Philosophy Degree under Regulations Pertaining to Doctoral Degrees.*

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. A record of such meetings must be maintained in the student's file in the department.

Dissertation

See Dissertation and Abstract under Regulations Pertaining to Doctoral Degrees for an overview of requirements and form for the dissertation and abstract. In addition, students in A&S should note that photocopies of journal articles may be used only in the appendix and only if necessary.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted for graduate students in second language departments but only for sound reasons of scholarship. Permission shall never be granted on the grounds of inadequate command of English. Students who wish to write a dissertation in a second language shall apply formally to their Department Chair for permission. The

application must be approved by the Assistant Dean of Graduate Studies prior to submission of the paperwork for admission to candidacy. For approval, the following requirements must have been met:

1. The application must be recommended for approval by the department.
2. All members of the doctoral committee must have an adequate command of the language.
3. The student must have demonstrated full proficiency in English to the satisfaction of the Assistant Dean of Graduate Studies.

Dissertation abstracts shall in any case be in English. The final oral examination must be conducted in English.

Final Oral Examination

Students preparing to take their final oral examination in defense of their dissertation should refer to Final Oral Examination under Regulations Pertaining to Doctoral Degrees for details on the examination. Expansions on and additions to that information are given below.

Candidates for a doctoral degree must provide a suitable number of copies of the dissertation, as designated by their doctoral committee, for review and use during the final oral examination.

One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. All members of the doctoral committee must attend the examination; exceptions can be made only with the permission of the Assistant Dean of Graduate Studies. At least four weeks before the final examination, the Chair of the doctoral committee must provide the Assistant Dean of Graduate Studies with a typewritten notice, listing the title of the dissertation and the time and place for its defense, for announcement in the University Times and Pitt Chronicle. A report of this examination and a report on approval of the dissertation, signed by all members of the

doctoral committee, must be sent to the Assistant Dean of Graduate Studies for approval. The report on the approval of the dissertation may be signed concurrently with or subsequently to the report of the final oral examination. If the decision of the committee is not unanimous, the case is referred to the Assistant Dean of Graduate Studies for resolution.

When the examination is completed, the candidate must notify the Assistant Dean if they have uploaded an electronic dissertation and submit three copies of an abstract of the dissertation initialed by the dissertation advisor in the upper right-hand corner. These documents must have been prepared for publication in accordance with instructions furnished by A&S Graduate Studies, 5141 Sennott Square. Each candidate must execute an agreement for the publication of the dissertation on microfilm and for publication of the abstract in Dissertation Abstracts; respond to the Survey of Earned Doctorates; and present a Microfilm Processing Fee Receipt when the dissertation is deposited in 5141 Sennott Square. All graduation requirements are in the graduation packet available each term in 5141 Sennott Square.

Multiple Degree Options

Students in A&S have several options for dual and joint degrees that may be pursued as detailed below. Students also may pursue two independent degree programs simultaneously, either in two departments within A&S or in a department within A&S and a department in another school at the University. *For information on pursuing two independent degrees simultaneously, see Two Independent Degree Programs Simultaneously under Special Academic Opportunities.*

Dual-Degree Programs

A&S dual-degree programs are available only in mathematics and computer science. For further details, contact one of those departments and see Cooperative, Dual-Degree, and Joint-Degree Programs under *Special Academic Opportunities*.

Joint-Degree Programs

There are three joint-degree programs involving A&S:

1. The MD/PhD program offers selected students an opportunity to earn MD and PhD degrees simultaneously from the School of Medicine and certain departments in A&S. Interested applicants should contact the MD/PhD program at M211 Scaife Hall, 412-648-2324 for further information.
2. The MBA/MA in area studies program provides students who are admitted to the MBA program in the Joseph M. Katz Graduate School of Business an opportunity to earn a joint MA in area studies with foci in Asian studies, Latin American studies, Russian and East European Studies, or West European studies. Interested students should contact the International Business Center, 355 Mervis Hall, 412-648-1509 for further information.
3. The JD/MA program offers selected students the opportunity to earn the JD and the interdisciplinary MA degree in Bioethics. Interested students should see the Bioethics section of this catalog or call the School of Law at 412-648-1415.

In both the dual- and joint-degree programs, students must be admitted to both academic programs offering the degrees and must be graduated from both degree programs at the same time. *For further details, see Cooperative, Dual-Degree, and Joint-Degree Programs under Special Academic Opportunities.*

Certificate Programs

A variety of interdisciplinary programs leading to completion of a certificate may be pursued by students working toward a master's degree or doctorate in A&S.

Composition, Literacy and Pedagogy Certificate

Medieval and Renaissance Studies Master's Certificate

TESOL Certificate

Department and Program Descriptions

The minimal requirements established by the Graduate Faculty of the University, as described under General Academic Regulations, and any additional requirements of A&S Graduate Studies described under A&S Degree Requirements, should be read in conjunction with specific departmental and program requirements.

Courses numbered from 1000 to 1999, inclusive, are advanced undergraduate credits. They may not be taken for graduate credit. All courses numbered 2000 and above are open only to graduate students unless special permission is granted.

Descriptions of graduate courses offered in a particular term in departments of the Dietrich School of Arts and Sciences can be obtained by visiting the following Web site: www.courses.as.pitt.edu.

[Arts and Sciences Administration and Staff](http://www.asgraduate.pitt.edu/node/318)

<http://www.asgraduate.pitt.edu/node/318>

[Arts and Sciences Faculty](#)

Dietrich School of Arts and Sciences Faculty

[Departments/Programs](#)

Department of Anthropology

The Department of Anthropology offers the degrees of Master of Arts and Doctor of Philosophy.

The department also offers several areas of concentration:

- Linguistic Anthropology
- Archeology
- Cultural Anthropology
- Medical Anthropology
- Biological Anthropology

Students may combine work for the MA and PhD degrees, including a program in which the student earns an MPH (Master of Public Health in behavioral and community health science), as part of the PhD in anthropology. Students are encouraged to develop a regional specialization that can lead to a certificate in Latin American studies, Asian studies, West European studies, or Russian and Eastern European studies.

E-Mail: ncgrad@pitt.edu

www.anthropology.pitt.edu

Admissions

Entrance into programs leading to the MA and PhD degrees in anthropology requires a baccalaureate degree in one of the arts or sciences from an accredited institution of higher learning. Qualified students from any discipline are considered for admission. Applicants whose first language is English are required to submit Graduate Record Examination (GRE) scores. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service or the IELTS administered by the University of Cambridge (taking the academic writing and reading modules). The department admits students only for the fall term. The deadline for applications is January 15. All applicants are automatically considered for financial aid.

Financial Assistance

Graduate student financial support awarded to graduate students by the Department of Anthropology includes fellowships, teaching assistantships, research assistantships, and Heinz/Mellon Fellowships in Latin American Archeology. The University Center for International Studies is another significant source of financial assistance.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Anthropology, PhD

Requirements

Dietrich School of Arts and Sciences requirements for the PhD also apply.

Credit Requirements:

A minimum of 72 course credits is required for the PhD (doctoral) degree. Of these, at least 42 credits must be in formal courses (as opposed to readings courses and independent study). The remaining 30 credits may be any combination of formal courses, readings courses and independent study.

Core Courses/Preliminary Examinations:

The core course system of the Department of Anthropology fills the role of the preliminary examination in the Dietrich School of Arts and Sciences requirements for the PhD. PhD students are required to pass (with a grade of B or better) at least three of the four core courses (cultural anthropology [ANTH 2788], biological anthropology [ANTH 2688], archeology [ANTH 2587], and linguistics [ANTH 2491]), including the core course in the student's chosen subfield of specialization. Students may also fulfill the linguistics requirement with LING 2267 Sociolinguistics. Full-time students are expected to pass the required core courses by the end of their second term in residence. A student may petition the Graduate Studies Committee to waive the core course on the basis of an equivalent course taken in an MA or PhD program at another institution.

Language Requirement:

Before students are advanced to candidacy, they must demonstrate competence in a language other than English that possesses a substantial body of anthropological literature.

Method/Theory Requirements:

All students must pass the Method/Theory requirement with a grade of B or better by the end of the second year. Students may petition for approval of other courses to satisfy these requirements.

Students in archeology must pass ANTH 2534 and ANTH 2524 (Archeological Data Analysis 1 and 2).

Students in biological anthropology must pass BIOST 2041 and BIOST 2042 (Introduction to Statistical Methods I and II), or, with the approval of their advisor, Anthropology ANTH 2534 and Anthropology ANTH 2524 (Archeological Data Analysis I and II).

Students in cultural anthropology must pass ANTH 2763 (Field Methods) and ANTH 2750 (Seminar on Contemporary Theory) or a comparable seminar approved for this purpose by the Graduate Studies Committee.

Comprehensive Examinations:

Students must pass two comprehensive examinations designed to test breadth and depth of knowledge in the chosen areas of expertise. The acceptable forms of the exam are described in greater detail on the department's web site. Each examination is designed and administered by a faculty committee consisting of at least two members of the department and a third member. Students generally take both comprehensive examinations by the end of their third year in the program.

Dissertation Overview:

Before actively pursuing dissertation research, the student makes an oral presentation of the intended project to a dissertation committee chosen by the student subject to approval by the department chair and dean. The committee consists of three members of the department and a fourth external member. Following committee approval, the student applies for admission to candidacy for the Doctor of Philosophy degree. Students conducting research with human subjects must also have their projects approved by the IRB before advancing to candidacy.

Dissertation Defense and Graduation:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee. The defense is accompanied by a public presentation, which is open to the University community.

Joint Degree

Anthropology, PhD/MPH

Requirements

Dietrich School of Arts and Sciences requirements for the PhD also apply.

The joint degree program makes it possible to complete both the PhD in anthropology and an MPH in approximately six years. The typical program consists of completion of coursework in the first three years, a fourth year in dissertation field research, and dissertation writing in the final year(s). The program guarantees students funding for five years; pending satisfactory student progress and departmental resources, funding in the sixth year is common.

Admissions:

Students should apply to the Anthropology PhD program. They can then apply to the MPH during their first year at Pitt. Coursework in public health taken during this first year will count towards the MPH.

Credit Requirements:

The program is structured so that the student meets the general PhD requirements for anthropology including the core courses, comprehensive exam, and language requirements, and the requirements for a concentration in medical anthropology.

Language courses do not count towards the formal credit requirement, nor do any courses below the 1000 level.

Under most circumstances, the MPH essay/thesis requirement will be met by the doctoral dissertation, so that the MPH will be awarded at the same time as the PhD. As an option, the student can choose to obtain an MPH at an earlier point by writing a separate MPH essay/thesis, and completing the MPH course requirements.

Master's

Anthropology, MA

Requirements

A minimum of 30 course credits in anthropology and a paper is required for the MA (master's) degree. Of these, at least 21 credits must be in formal courses (as opposed to readings courses, independent study, or thesis credits). Full-time MA students must pass the core course in their declared subfield by the end of their second term in residence (or, for part-time students, before they have completed 18 credits), or petition for a specialized written examination (administered by their MA committee) in lieu of the core course. The MA committee consists of three graduate faculty members. Two must come from the department and include the student's advisor. The third member can be either from the department or outside of the department. All committees are approved by the faculty of anthropology. The language requirement is the same as for the PhD program. Students must pass a designated "methods" course with a B or better.

For the MA paper, students plan an original research paper with their advisory committee. This committee will also evaluate the final paper. Note that the required paper is not necessarily a "thesis" as defined in Dietrich School of Arts and Sciences requirements (although a thesis, as formally defined, would also satisfy the MA paper requirement).

Center for Bioethics and Health Law

Overview of the Department

The Center for Bioethics & Health Law (CBHL) brings together clinicians, scholars, and researchers from many schools and disciplines across the University to investigate issues in bioethics and health law by employing empirical, philosophical, humanities, and legal research methods. Founded on the premise that questions arising in healthcare, public health, and research must be addressed by integrating insights of myriad disciplines, the Center hosts programming in bioethics, health humanities, health law, healthcare and religion, and research ethics.

Faculty of the Center for Bioethics & Health Law, and its affiliated faculty, teach in the MA Program in Bioethics, serve on thesis committees, and provide clinical and research mentorship. (Faculty are listed on the Center's website at <http://bioethics.pitt.edu/people>.) They conduct empirical, legal, and scholarly research, and serve on national and international bodies addressing issues of bioethics and health policy. Their research addresses ethical issues across the lifespan, professional issues like conscientious objection, issues in research (including genomic, international, mental health, and palliative care research); and public health ethics. (Their research is described at <http://bioethics.pitt.edu/research>.)

Contact Information

Program Director: Lisa S. Parker, PhD
Program Administrator: Beth Ann Pischke
Main Office: 519 Barco Law Building
412-648-7007
Fax: 412-648-2649
bioethics@pitt.edu

Admissions

Applicants for admission must submit digital scans of all undergraduate and graduate transcripts (official transcripts are not required during the application process - applicants who are accepted will be required to submit certified transcripts when they accept the offer of admission and matriculate), three letters of recommendation, a personal statement explaining interest in the program (including plans to use this degree in further professional or graduate education or a career), and a sample of written work demonstrating critical reasoning skills and/or ability to present an argument. International applicants whose first language is not English are required to submit TOEFL scores. Applications for admission to the Bioethics Program in the fall term must be submitted no later than March 31; after that date, interested applicants should contact the program administrator. Joint program students must be admitted by both the Dietrich School and the relevant professional school.

Financial Assistance

Applicants may qualify to receive a Dean's Tuition Scholarship to defray part of the cost of tuition and fees. Applicants may apply for student loans, and qualified out-of-state students may be offered scholarship equal to the difference between out-of-state and in-state tuition.

Master's

Bioethics, MA

Overview of Degree Program

The 30-credit interdisciplinary Master of Arts in Bioethics, offered by the Kenneth P. Dietrich School of Arts and Sciences in collaboration with the Center for Bioethics & Health Law, permits students to tailor the curriculum to their interests and career paths. The degree is intended primarily to complement and enhance other graduate or professional education, although some students pursue the degree immediately upon graduation from college.

This program, founded in 1989, affords students the opportunity to observe ethical issues as they arise in clinical practice and to pursue in-depth research. The curriculum - including core courses, electives, clinical ethics practica, and a thesis project - provides opportunities to observe ethical issues as they arise in practice and to pursue in-depth research. Course work, which may be completed within one year of full-time study, allows students to combine study in ethical theory, philosophy, history of medicine, cultural and gender studies, health law, public health, and the social sciences. The program, including Master's thesis research, may be completed in one or two years, depending on the student's prior experience and education.

Joint JD/MA and MD/MA programs with the Schools of Law and Medicine allow students to integrate their dual interests during their professional education and to complete both degrees in less time than would be required to pursue the degrees separately. Joint program students must be admitted by both the bioethics program and the relevant professional school.

Requirements

- BIOETH 2604 - CLINICAL PRACTICUM 1
- BIOETH 2606 - CLINICAL PRACTICUM 2
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2661 - THEORETICAL FOUNDATIONS
- BIOETH 2664 - BIOETHICS
- Elective courses are chosen from related disciplines, as well as Bioethics
- Master's thesis

Department of Biological Sciences

Graduate education in the biological sciences provides individuals with the training, guidance, experience, and opportunity to participate in research that enables their transition from being students of biological knowledge to being fully participating members of their profession. The Department of Biological Sciences offers the degree of Doctor of Philosophy via two areas of concentration:

Molecular, Cellular and Developmental Biology (MCDB)
Ecology and Evolution (E&E)

Contact Information

Department Chair: Jeffrey G. Lawrence, PhD
Main Office: A234 Langley Hall
412-624-4350
Fax: 412-624-4349
E-mail: biophd@pitt.edu
<http://www.biology.pitt.edu/>

Additional information concerning the department's graduate programs may be obtained from the University of Pittsburgh, Department of Biological Sciences, Graduate Administrator, A234 Langley Hall, Pittsburgh, PA 15260. Phone: 412-624-4268. Fax: 412-624-4349. E-mail: biophd@pitt.edu.

Admissions

Admissions to our graduate programs are competitive, and applications must meet minimum standards (<http://www.biology.pitt.edu/graduate/how-apply>). Applications should be submitted via online at <http://app.applyyourself.com/?id=up-as>. Applications are considered for matriculation for the fall term beginning July 1, and must be completed by December 9 for applicants residing within the United States and international applicants.

Financial Assistance

Graduate students receive a competitive stipend, health insurance, tuition waivers, and other financial assistance.

Faculty

<http://www.biology.pitt.edu/all-faculty>

Doctoral

Biological Sciences, PhD

Requirements

<http://www.biology.pitt.edu/graduate>

A PhD in biological sciences involves four or more years of study and requires the completion of 72 credits. Specific requirements are as follow:

- Graduate Courses. Students in both the MCDB and EE programs are required to take 4 graduate-level courses within the first two years.
- Seminar Courses. MCDB students take two semesters of Biological Sciences Seminar (BIOSC 2450) in the first year. EE students take two semesters of Seminar in Ecology and Evolution (BIOSC 2540) in the first two years.
- Communications workshops. Students must complete three 1-credit Communication in the Biological Sciences workshops, one each in Grants, Papers, and Seminars.
- Research Rotations. Both MCDB and EE students perform research rotations in the first year in at least two (EE) or three (MCDB) different labs.
- Research Ethics. Students must complete a workshop in the ethical performance of scientific research in the first year.
- Seminars. MCDB and EE students must attend the weekly MCDB Student Research Seminar (BIOSC 2050) and EE Student Research Seminar (BIOSC 2050), respectively. After the first year, students must present their research at these seminars once per year. Students must also attend the weekly Departmental Seminar presented by outside scholars.
- Preliminary Review. Advancement to the second year of study requires successful completion of courses with an overall average of B or better, satisfactory performance in research rotations and the identification of a research mentor.
- Dissertation Research. MCDB students choose a dissertation advisor by the end of the second semester. Typically, students in the E&E program identify a research advisor prior to entry. Each student also has a Dissertation Committee made up of three other members of Department and an outside member and must meet with this committee at least once a year. Students are expected to establish their dissertation research topic during the second year.
- Comprehensive Exam. Taken in the second year, this is designed to test a student's general knowledge of MCDB or EE and their detailed knowledge of one particular area.
- Teaching. Each student must act as a Teaching Assistant for one semester. Students may teach more than this in particular if they take part in the Teaching Minor Program .
- Admission to Candidacy for the PhD Degree. This is based upon research performance and satisfactory completion of the comprehensive exam. Admission to candidacy is decided at a special overview meeting of the Dissertation Committee.
- PhD Defense. The PhD is awarded following successful defense of the dissertation with a public seminar and satisfaction of all other University, department, and program requirements.

Courses

- BIOSC 2121 - BIostatistics
- BIOSC 2435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS
- BIOSC 2540 - SEMINAR IN ECOLOGY AND EVOLUTION

- BIOSC 2545 - THE MATHEMATICS OF BIOLOGY

Department of Chemistry

The Department of Chemistry provides programs of graduate study leading to the MS and the PhD in chemistry in the fields of **analytical, biological, inorganic and materials, organic, and physical** chemistry. Interdisciplinary research is also currently conducted in the areas of surface science, combinatorial chemistry, natural products synthesis, nanotechnology, biosensors, laser spectroscopy, organometallic chemistry, and biophysical chemistry.

The Department of Chemistry is housed in a modern chemistry complex that includes Eberly Hall, Chevron Annex, Ashe Lecture Halls, and the 15-story Chevron Science Center. The Chemistry Instrumentation Center is an in-house research instrumentation laboratory that includes NMR, mass spectroscopy, and X-ray crystallography facilities. In addition to instrumentation within individual research groups, the department supports a vast array of modern research instruments, including three 300 MHz NMRs, one 500 MHz NMR, one 600 MHz NMR, two high-resolution and two low-resolution mass spectrometers, a light-scattering instrument, a circular dichroism spectrophotometer, a spectropolarimeter, X-ray systems for both single crystal and powder samples, a scanning electron microscope, an atomic force microscope, a vibrating sample magnetometer, several FT-IR and UV-VIS spectrophotometers, an X-ray photoelectron spectrometer, an AFM-Raman system, and workstation computer clusters. Additional shared research resources include in-house materials characterization laboratory, machine shop, electronics shop, and glassblowing laboratory; helium recovery system, and the Dietrich School Scientific Stockroom.

Director of Graduate Studies: Haitao Liu

Graduate Program Administrator: Christie Hay

Main Office: 234 Chevron Science Center

412-624-8200

Fax: 412-624-8611

E-mail: gradadm@pitt.edu

www.chem.pitt.edu

Admissions

A bachelor's degree in chemistry, or closely related discipline, including courses in mathematics through integral calculus, is preferred. In addition, the student must meet the general Dietrich School of Arts and Sciences requirements for admission to graduate study.

All applicants are recommended to submit Graduate Record Examination (GRE) and advanced chemistry GRE scores. International applicants must also submit TOEFL, IELTS, or Duolingo scores. The minimum acceptable TOEFL score for the Department of Chemistry is 100 with a minimum of 22 in each category. The minimum IELTS score for the Department of Chemistry is a 7.0 with a minimum of 6.5 in each section. The minimum Duolingo score is 110 but a score of 120 or higher is preferred.

Financial Assistance

All full-time doctoral students in good academic standing receive complete financial support in the form of teaching assistantships, research assistantships or competitive departmental or university fellowships. This support is available throughout a student's graduate career, including summer sessions. High quality UPMC health care coverage is provided with all assistantships and fellowships.

Faculty

<http://www.chem.pitt.edu/people/faculty>

Overview of Degree Program

The chemistry department has 32 tenured/tenure track faculty members and typically accepts ca. 40 doctoral students each year. Student interested in applying for the M.S. program should contact the department prior to applying. Typical time to earn a PhD is five years.

Degree Requirements

Entering students take appraisal exams in each of four areas of chemistry: analytical, inorganic/materials, organic and physical. In discussion with a member of the department's Graduate Student Advisement Committee, scores on the appraisal exams are considered, as each student selects and registers for appropriate coursework. Satisfactory performance in four core courses is required for students to pass the preliminary examination. Midway through the first year in residence, students are assigned to research groups. The remainder of the student's graduate program is developed in

consultation with their research advisor. All advanced degree programs require original research and course work. Additional requirements include a comprehensive examination, thesis/dissertation, and defense.

Master's

Chemistry, MS

Requirements for the Master's Degree

Four to six terms of full-time graduate work is generally required to obtain a MS degree in chemistry (a minimum of 30 credits). Special arrangements can be made for individuals who wish to pursue a MS degree as part time students. Each MS student must take a minimum of 12 credits of 2000- or 3000-level chemistry courses. These must include 2 three-credit core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820); the remaining courses can either be in the student's area of specialization or in other chemistry division areas. Students electing to present a nonresearch thesis must take one laboratory course (CHEM 1250, 1430, 1440, or 1600) for credit, in addition to the preceding requirements. Each student must also demonstrate proficiency in physical chemistry by achieving 65% or higher score on physical chemistry appraisal exam, or earn a grade of B or better in CHEM 1410 and 1420 (or equivalent) or earn a B or better grade in either CHEM 2430 or CHEM 2440.

Additional Requirements

Comprehensive Examination: The student must earn a B or higher in all required chemistry courses and must maintain an overall QPA of 3.0 or higher to be in good standing. The comprehensive examination consists of an examination of the student's record in the required core courses and the additional 2000- or 3000-level courses.

Thesis: The thesis for the MS must represent an original research project or a comprehensive and detailed survey of a research topic of current interest in chemistry. It must be defended in an oral examination.

Analytical Chemistry Concentration

Students with a concentration in Analytical Chemistry are required to take at least two out of these three courses: Electrochemistry (Chem 2210), Chemical Separations (Chem 2220), and Analytical Spectroscopy (Chem 2230) for 6 credits toward the 12-credit course requirement. The other 6 credits may be chosen based on the student's own interests, the advice of the Graduate Student Advising Committee, or the recommendation of the Major Advisor.

- CHEM 2210 - ELECTROANALYTICAL CHEMISTRY
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2230 - ANALYTICAL SPECTROSCOPY

Biological Chemistry Concentration

Biological Chemistry doctoral students will take four 3-credit courses. All external courses will need approval by the Graduate Curriculum Committee.

- CHEM 2810 - BIOLOGICAL CHEMISTRY 1
 - CHEM 2820 - BIOLOGICAL CHEMISTRY 2
- The research advisor will recommend remaining courses that include (but are not limited to):**
- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
 - CHEM 2320 - ADV ORGANIC CHEMISTRY 2
 - CHEM 2220 - CHEMICAL SEPARATIONS
 - CHEM 2830 - SYNTHETIC BIOLOGY
- These outside courses, each 3-credit, may include the following courses:**
- BIOSC 2940 - MOLECULAR BIOLOGY

- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- MSMVM 3410 - MICROBIAL PATHOGENESIS
- PHARM 3032 - MEDICINAL CHEMISTRY

Inorganic and Materials Chemistry Concentration

- CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING
- CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY
- Six other credits of graduate level classes to meet the 12-credit course requirement..

Organic Chemistry Concentration

Organic students are required to take both organic core courses (Chemistry 2310 and 2320) and Chemistry 2380 (Techniques of Organic Research). Advanced courses in the Division are treated in a two-year cycle of one month, one credit modular units (Minicourses) on Special Topics (Chemistry 3300, 3310, 3320). This program is designed to give advanced students exposure to new developments outside their area of concentration. Each doctoral candidate is required to take for credit a total of three credits of advanced-level minicourses during his or her residence but is encouraged to audit others. No single course can be used to account for all 3 credits, and a GPA of 3.00 or greater is required. In order to ensure maximum freedom of choice, students are advised to register for all three courses (3300, 3310, 3320) during any term in which he or she plans to take one minicourse for credit; before the final examination in the course, the student informs the instructor whether he or she wishes to take the course for credit or audit.

- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1
- CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Physical Chemistry Concentration

Physical Chemistry doctoral students are required to take both Physical Chemistry core courses: CHEM 2430 and CHEM 2440. The Graduate Student Advising Committee, Preliminary Examination Committee, and/or the Research Advisor will recommend additional courses, from within and outside the Department to meet the 12-credit concentration requirement.

- CHEM 2430 - QUANTUM MECHANICS AND KINETICS
- CHEM 2440 - THERMODYNAMICS & STATISTICAL MECHANICS

Chemistry, PhD

Requirements for the PhD

PhD candidates are required to earn 72 graduate credits that include 12 credits of core courses (CHEM 2110, CHEM 2120, CHEM 2210, CHEM 2220, CHEM 2230, CHEM 2310, CHEM 2320, CHEM 2430, CHEM 2440, CHEM 2810, CHEM 2820). In consultation with their research advisor or GSAC, students may take additional courses after they complete the required core selections. Candidates are required to participate in teaching activities, for at least one or two terms, during their doctoral program.

Additional Requirements

PhD Preliminary Evaluation: The preliminary exam is a 'closed door' meeting that includes the student, the student's advisor, and two other chemistry department T/TS faculty members. To pass this exam the student must demonstrate a strong likelihood for passing the comprehensive exam, which occurs in the last part of the student's second year in the program. In the preliminary exam, the student must demonstrate i) good progress in meeting the course requirement (i.e., at least 6 credits with an average GPA of 3.0 or better), ii) an understanding of their research project

(i.e., an ability to articulate their project's goals and importance), and iii) basic skills and aptitude for chemistry research (i.e., a basic understanding and experience in theory, literature, and methods that are core to their research).

Comprehensive Examination: The comprehensive examination provides the candidate an opportunity to demonstrate their potential for independent research and scholarship. The student submits a research report on their own work to committee members; the oral exam is a discussion of the student's research to date. The student must be prepared to answer questions related to the theoretical and practical aspects of the research problem. The student is also expected to show a command of graduate course work related to the field of the student's research. The department's comprehensive examination satisfies the Dietrich School of Arts and Sciences requirements for an overview examination. Upon satisfactory completion of the Comprehensive Exam, with approval by the department chair and the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD program.

Seminar: Each student in the doctoral program is required to present at least one seminar, open to the department. The seminar may be given at any time during the student's career and on any topic approved by the student's major advisor, including the results of doctoral research.

Dissertation and Final Examination: The PhD dissertation is a report of scientific investigation completed under the supervision of the student's faculty mentor/research advisor. It must represent an original contribution to knowledge and must relate what is found to what was known before. The candidate must defend his/her dissertation in an oral examination before a doctoral committee consisting of the major advisor, at least two additional departmental graduate faculty members, and one graduate faculty member from another department within the University. With prior approval, a qualified faculty member from another institution may also be appointed. The final examination is open to all members of the University community.

Analytical Chemistry Concentration

Students with a concentration in Analytical Chemistry are required to take at least two out of these three courses: Electrochemistry (Chem 2210), Chemical Separations (Chem 2220), and Analytical Spectroscopy (Chem 2230) for 6 credits toward the 12-credit course requirement. The other 6 credits may be chosen based on the student's own interests, the advice of the Graduate Student Advising Committee, or the recommendation of the Major Advisor.

- CHEM 2210 - ELECTROANALYTICAL CHEMISTRY
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2230 - ANALYTICAL SPECTROSCOPY

Biological Chemistry Concentration

Biological Chemistry doctoral students will take four 3-credit courses. All external courses will need approval by the Graduate Curriculum Committee.

- CHEM 2810 - BIOLOGICAL CHEMISTRY 1
- CHEM 2820 - BIOLOGICAL CHEMISTRY 2
- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2220 - CHEMICAL SEPARATIONS
- CHEM 2830 - SYNTHETIC BIOLOGY
- BIOSC 2940 - MOLECULAR BIOLOGY
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS
- MSMVM 3410 - MICROBIAL PATHOGENESIS
- PHARM 3032 - MEDICINAL CHEMISTRY

Inorganic and Materials Chemistry Concentration

- CHEM 2110 - CHEMICAL SYMMETRY: APPLICATIONS IN SPECTROSCOPY AND BONDING
- CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY

Organic Chemistry Concentration

Organic students are required to take both organic core courses (Chemistry 2310 and 2320) and Chemistry 2380 (Techniques of Organic Research). Advanced courses in the Division are treated in a two-year cycle of one month, one credit modular units (Minicourses) on Special Topics (Chemistry 3300, 3310, 3320). This program is designed to give advanced students exposure to new developments outside their area of concentration. Each doctoral candidate is required to take for credit a total of three credits of advanced-level minicourses during his or her residence but is encouraged to audit others. No single course can be used to account for all 3 credits, and a GPA of 3.00 or greater is required. In order to ensure maximum freedom of choice, students are advised to register for all three courses (3300, 3310, 3320) during any term in which he or she plans to take one minicourse for credit; before the final examination in the course, the student informs the instructor whether he or she wishes to take the course for credit or audit.

- CHEM 2310 - ADV ORGANIC CHEMISTRY 1
- CHEM 2320 - ADV ORGANIC CHEMISTRY 2
- CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1
- CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2

Physical Chemistry Concentration

Physical Chemistry doctoral students are required to take both Physical Chemistry core courses: CHEM 2430 and CHEM 2440. The Graduate Student Advising Committee, Preliminary Examination Committee, and/or the Research Advisor will recommend additional courses, from within and outside the Department to meet the 12-credit concentration requirement.

- CHEM 2430 - QUANTUM MECHANICS AND KINETICS
- CHEM 2440 - THERMODYNAMICS & STATISTICAL MECHANICS

Department of Classics

The Department of Classics focuses on the interpretation of the culture and society of Greco-Roman antiquity in the widest sense of those terms. Our Doctor of Philosophy is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science, <http://cpas.pitt.edu/>. The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/or ancient science. Students receive intensive training in methodologies appropriate to their special areas of concentration, reading and analysis of Greek and Roman texts, and in the secondary literature. While the students' primary association is with the Department of Classics, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science.

Admissions

Applicants must hold a Master of Arts (MA), or an equivalent qualification, in Classics or Classical Studies upon admission to the degree program, and be prepared to transfer at least 30 credits of relevant coursework. Transfer credit will not be accepted for courses in which a grade lower than B or its equivalent has been received (For more information on transfer credits, please see the Graduate and Professional Bulletin at <http://www.bulletins.pitt.edu/graduate/regulations.htm>).

Applicants should have a broad exposure to the cultural history of ancient Greece and Rome, and will have demonstrated knowledge of Ancient Greek and Latin appropriate for graduate work. All applicants will also have demonstrated reading knowledge of at least one modern foreign research language besides English (German, French, or Italian) before beginning the program. Applicants from outside the U.S. must show evidence of having completed a program of study equivalent to a Master of Arts degree and be prepared to present certification of the degree or license at the time of registration. If the credentials are incomplete or not familiar, please send a copy of the application to Office of International Services for evaluation. For applicants whose first language is not English, please refer to <http://www.asgraduate.pitt.edu/node/315> to ensure fulfillment of the University's language requirements.

Required Application Materials:

- University of Pittsburgh's on-line Application for Admission (note the \$50.00 application fee)
- A personal statement indicating your reasons for pursuing a graduate degree at the University of Pittsburgh and your academic and professional goals. You may submit your Statement of Purpose and writing sample in the "Additional Information" section of the online Application for Admission, which allows you to upload your document. Alternatively, you can mail it to the Department of Classics.
- Official or Unofficial College Transcripts. Admitted students will need to send official transcript copies before they can be matriculated.
- Current, official GRE scores
- 3 Letters of Recommendation. You must submit the names of three referees with your online Application for Admission. The recommendation form to be included with each letter of recommendation is available for download as a .pdf file once you begin your online application process. Referees may submit their recommendations either electronically or by mail directly to the Department of Classics.
- 1 sample of academic writing.
- Non-US citizens: TOEFL or IELTS scores. This process must be completed by January 15.

Financial Assistance

The Department of Classics expects to admit one graduate student every other year. Students admitted to the program receive a teaching fellowship during years 1-4. During the first year of teaching at the University of Pittsburgh, students receive a teaching assistantship (TA). If a student's teaching is deemed satisfactory by the graduate faculty based on OMETS and teaching observations, he or she will receive a teaching fellowship (TF) during their remaining years teaching in the department. The expected time to degree in the Department of Classics is 4 years. If additional time is required to complete the degree, students are expected to apply for dissertation funding (both internally and externally). Assistantships include full tuition remission, health benefits at no additional cost, and a stipend. For information on current stipend rates, see <http://www.pitt.edu/~graduate/stipends.html> . See listing of available fellowships for all graduate students at the Dietrich School of Arts and Sciences <http://www.asgraduate.pitt.edu/financial-assistance>.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Classics, PhD

Overview of Degree Program

The Doctor of Philosophy in Classics is integrated into the Joint Graduate Program in Classics, Philosophy and Ancient Science,

<http://cpas.pitt.edu/>

The program is primarily designed to train professional scholars and teachers of the Classics with a specialization in ancient philosophy, and/ or ancient science. The students' primary association is with the Department of Classics. At the same time, they will work closely with graduate students and faculty drawn from the Departments of Philosophy and the History and Philosophy of Science. The rigorous curriculum is comprised of inter-departmental seminars offered by the graduate faculty from the three participating departments, and complemented by a range of seminars from across the University's thriving intellectual departments and communities. The Ph.D. program mentors students' professionalization by actively

supporting publication, conference participation, and membership in professional organizations. It prepares students to participate in and contribute to scholarly conversations nationally and internationally. All Ph.D. students instruct a variety of undergraduate courses under mentorship of the faculty, which include Greek and Latin language classes, Greek and Roman civilization and history. Graduates of the program are well-qualified and competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and non-academic employment sectors

Requirements for the PhD

Degree Requirements

Course Requirements:

Students are required to enroll in the following courses:

- CPAS Proseminar (two terms, during year 1 in the program)
- CPAS Ancient Greek Seminar (four terms, during years 1 and 2 in the program)
- Four courses in Classics, one of which may be completed at the undergraduate level with appropriate graduate components added (e.g. papers and oral examinations, as approved by the DGS). These four must include:
 - at least two Classics graduate seminars in Ancient Science (2000-level)
 - at least two other graduate seminars in Classics or a related subfield (e.g. ancient Greek or Roman literature, history, archaeology, rhetoric, art history) approved by the student's advisor and the DGS.
- Two courses in Philosophy, including Metaphysics and Epistemology.
- One course in History and Philosophy of Science: Part One of the 'History of Science Sequence' (equals one course).
- Remaining credits may be earned through electives, Independent or Directed Study, and up to 12 credits of PhD dissertation research.

Comprehensive PhD Examinations

Students are required to demonstrate expertise in both Greek and Latin by passing a translation exam by the beginning of the Fall Term of their second year. As a preparation, students are required to carry out independent work on the departmental reading lists in both Latin and Ancient Greek authors (as specified on the departmental lists and in discussion with the student's advisor). This translation exam will represent the Doctoral Preliminary Examination. Students may petition to retake the exam subject to consensus of the Dissertation Committee (see the section 'The Dissertation Committee', below, p.8).

Before admission to Ph.D. candidacy, students must pass three Comprehensive ("Qualifying") Examinations by the beginning of their third year in the program:

1. Greek and Roman History
2. Greek and Latin Literature
3. Special Topic: either Classical Philosophy or Ancient Science

Students are required to demonstrate expertise in a second modern research language by passing a departmental exam by the beginning of their second year (one modern language qualification must have been obtained upon entry into the graduate program, see the section **Admissions Requirements**). This second modern research language must be German unless prior qualification in German has already been obtained before entry into the doctoral degree program. The modern foreign language requirement may also be satisfied by earning a 'B' or better in an appropriate reading course offered by the Departments of German and/or French and Italian Languages and Literature.

The Prospectus

The prospectus proposes the subject and plan for the completion of the dissertation. It must include the following items:

- Abstract (*ca.* 200 words). The abstract gives a clear statement of the research topic and the main conclusion(s).
- Proposal (*ca.* 3000-4000 words).
- 1. statement of the research topic, with review of earlier scholarship on the ^{[[[}topic. Make clear to the reader how your work fits into the scholarly discussion of the topic. A precise mapping of your own position relative to the views of other scholars will make it easier for you to focus your attention on your own project and to define your contribution to the scholarship.

2. description of the method(s) you will use in conducting your research. This item is related to the review of scholarship. In the course of the review you may single out the approach of a scholar or scholars that you have decided to follow in your own research; or you may reject previous approaches in favor of your own. Here you may include a specific example or examples of what kinds of evidence you will be using and how you will treat that evidence. A sample of the argumentation you will be using allows readers to see whether your method is adequate to the material you are working with.
3. statement of the contribution that the dissertation will make to scholarship on the topic. Here you will explain how your work marks an advance in some way on what previous scholars have written.
4. bibliography (not a comprehensive listing at this stage of all relevant items but rather of the works that at this point have stimulated and influenced your own thinking on the topic).
 - A Chapter Outline with a brief summary of contents for each one.
 - A Timetable for Completion, setting out a realistic schedule for completing the project.

For the submission of the prospectus, the student must file the Prospectus Form with the Graduate Administrator. A prospectus meeting is then held to discuss the student's completed prospectus. At that meeting the prospectus must be approved by the three members of the Classics faculty plus a member from outside the department (usually drawn from within the university but may, with special permission, be chosen from outside the university). These four members, all of whom must have graduate faculty status, will constitute the student's Dissertation Committee (see the section 'The Dissertation Committee' below, p.8). All these committee members must be present for the prospectus meeting and later for the dissertation defense.

The Dissertation

This written work must demonstrate the student's capacity to carry out independent and original research in the field of Classics, ancient philosophy and/ or ancient science. It must embody an extended original investigation of a problem of significance to these fields, and is the capstone to the research program of a student's education. A specific description of the requirements, and of the final oral examination, which completes the requirements for the PhD, can be found in the Faculty of Arts and Sciences Bulletin <http://www.bulletins.pitt.edu/graduate/index.html>

Dissertation Defense

When the student completes the dissertation and the supervisor believes it is ready to be defended, a dissertation defense is scheduled and the date of the defense must be published in advance in the University Times (see the Graduate Administrator about this; also note that the date of the defense must be set at least one month in advance so that it can be published on time). The student must submit to the full Dissertation Committee a complete, polished, copy-edited text with full scholarly apparatus and images. This must be submitted by November 1 at the latest to schedule a defense in the fall semester, or by March 1 at the latest to schedule a defense in the spring semester. There are no defenses in the summer semester. The defense is normally a two-hour conversation with the Dissertation Committee; all four members must be physically present. The defense is open to the public and may thus be attended by other students in the department as well as by family or friends of the student.

Students must submit an application to graduate in the term in which they plan to defend and must be enrolled for at least one credit or for **Research and Dissertation for the Ph.D. Degree (CLASS 3000)**. The university now requires all dissertations to be filed electronically. Complete instructions can be found at <http://www.pitt.edu/~graduate/etd/>. Students should have their committee members sign the Electronic Theses and Dissertations Approval Form

http://www.pitt.edu/~graduate/etd/pdf/ETD_Approval_Form.pdf at the defense.

Note: The defense must be passed no later than seven calendar years after the passage of the comprehensive exams. If a student does not pass their defense in this time limit, they must re-take the comprehensive exams in a format approved by the Dean's Office.

Summary of Milestones towards the PhD Degree

1. Modern Language Exam by beginning of Year Two
2. PhD Preliminary Examination by Beginning of Year Two
3. Three Comprehensive Exams (oral and written) by beginning of Year Three
4. Dissertation Prospectus by end of Year Three Fall Term
5. Admission to PhD candidacy at least 8 months prior to defense
 - # of courses required (list core courses, etc.)
 - PhD Prelim Evaluation
 - Comprehensive Exam
 - Proposal/overview
 - Dissertation and Final Examination

Master's

Classics, MA

The Classics Department is currently not accepting applications for the Masters Program.

Requirements for the MA

The course requirements for the MA are a minimum of ten one-term graduate credit courses (30 credits), of which at least four must be at the 2000 level or higher. Included in the program must be CLASS 2010 (Introduction to Classical Studies) and a two-term sequence, consisting of a reading course and a seminar on a single subject. Students may emphasize either Greek or Latin, but they must pass at least one course at the level of 1300 or higher in each language.

A reading knowledge of German is required. This requirement may be met either by taking two appropriate courses and receiving a letter grade of B or higher, or by passing an examination administered by the department.

The MA comprehensive examination consisting of three parts is also required. Students choose, in consultation with the graduate advisor and the department, the three fields in which they will be examined. The three are usually chosen from the following six fields: Greek translation, Latin translation, Greek literature, Latin literature, Greek history, and Roman history. Either Greek translation or Latin translation must be included.

Department of Communication

The department offers the Doctor of Philosophy in Communication. Students entering the program without a prior Communication MA may pick up one from the department along the way. The curriculum emphasizes critical, cultural, historical, philosophical, and theoretical approaches to studying contexts of power, knowledge, and desire that exert differential impacts on various bodies and groups. Departmental research, teaching, and extracurricular community interventions attend to structures of power informing race, class, gender, sex, sexuality, ability, and other intersecting axes of social difference. Many students and faculty members examine the forms of persuasion, protest, silence, coming-to-voice, testimony, noise, and imagination needed to transform such power structures that produce and reproduce inequality.

Contact Information

Director of Graduate Studies: Dr. Ronald J. Zboray

Main Office: 1433 Cathedral of Learning

412-624-6569

Fax: 412-624-1878

E-mail: zboray@pitt.edu

<http://www.comm.pitt.edu/>

Additional information concerning the department's graduate program may be obtained by contacting commgrad@pitt.edu or writing to University of Pittsburgh, Department of Communication, Graduate Admissions, 1433 Cathedral of Learning, Pittsburgh, PA 15260.

Admissions

Admission is highly selective, and limited to those who can be funded for five years. Applications to the doctoral program are reviewed holistically. In order to be considered for admission to graduate standing, students must meet the requirements of the Dietrich School of Arts and Sciences and supply (by the first business day of the year) all materials called for in the department's application guidelines, including a completed application form, copies of all post-secondary educational records, at least three letters of recommendation, a statement of purpose, and writing sample. Non-native speakers of English without a degree from an accredited institution of higher education in the U.S. must also have the Educational Testing Service send TOEFL scores as part of the application. Citizens of other nations follow a separate set of guidelines that include TOEFL requirements and, if they are offered admission, certified /notarized translations of transcripts and diplomas for applicants from countries where English is not the official language. Upon admission, candidates will be assigned an advisor who will assist them in planning a course of study.

Financial Assistance

The department makes every effort to sustain funding and full remission of tuition for five years of doctoral study for students entering directly from undergraduate or MA programs. In addition to teaching assistantships there are also several non-teaching fellowships, including some dedicated to underrepresented groups, available through the University. See the listing of available fellowships for all graduate students at the Dietrich School of Arts and Sciences <http://www.asgraduate.pitt.edu/financial-support>

William Pitt Debating Union

Graduate students interested in public argument and argumentation theory can pursue co-curricular study and teaching of argumentation practices by working with the William Pitt Debating Union (WPDU), one of the nation's most venerable debating societies.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Communication: Rhetoric and Communication, PhD

The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the PhD

- 24 courses (72 credit hours) required, two of which are core (COMMRC 2296 - PROSEMINAR and COMMRC 3384 - TEACHING PRACTICUM), 4 of which may be taken as Independent Study Opportunities (e.g., COMMRC 3902 - DIRECTED STUDY FOR PHD STUDENTS or COMMRC 3002 - PROFESSIONAL DEVELOPMENT), and 3 of which may be taken outside the Department of Communication. Students entering with a recent MA in Communication or cognate field may be able receive credit toward the PhD.
- Approved Plan of Study (by end of third semester of degree work)
- Portfolio-based Comprehensive Exam with Oral Defense (after or near the end of coursework)
- Dissertation Prospectus and Oral Defense
- Dissertation and Final Oral Defense

Master's

Communication: Rhetoric and Communication, MA

The aim of the program is to train rigorous researchers and excellent teachers. To this end it offers historical, theoretical, and critical approaches to the study of communication. The curriculum includes traditional and innovative course work drawn from four intersecting areas of emphasis: History, Theory and Criticism of Rhetoric; Media and Cultural Studies; Public Address and Argument; and Rhetoric of Science.

Requirements for the MA

- 10 courses (30 credit hours) required, two of which are core (COMMRC 2296 - PROSEMINAR and COMMRC 3384 - TEACHING PRACTICUM), one of which may be taken as COMMRC Directed Study, and two of which may be taken outside the Department of Communication.
- Approved Plan of Study (in first year of degree work)
- Written Comprehensive Exam with Oral Defense (after or near the end of coursework), along with two research papers for examination committee approval.

Program in Computational Biology

Joint Pitt-CMU PhD Program in Computational Biology

James Faeder and Russell Schwartz, Directors

Computational biology is defined as the development and application of data-analytical and theoretical methods, mathematical modeling, and computational simulation techniques to the study of biological, behavioral, and social systems.* It is an interdisciplinary approach that draws from specific disciplines such as mathematics, physics, computer science and engineering, biology, and behavior science.

The Joint CMU-Pitt PhD Program in Computational Biology is an intensive, interdisciplinary training program that provides students with a deep understanding of the current state of the art in computational biology. Students in this program acquire the quantitative background and research skills needed to advance the field of computational biology. In addition, they develop the critical thinking skills needed to appreciate the potential, strength, and limitations of computational, mathematical, and engineering tools for tackling biological problems.

Program Website:	www.compbio.pitt.edu	www.compbio.cmu.edu

Admissions

The interdisciplinary character of the program is unique and distinct from many other programs that are focused toward a specific discipline. The program seeks outstanding students from the biological, physical and computational sciences, and engineering. For example, computational biology majors, or double majors in biology and quantitative sciences, are ideal candidates.

Recommended Prerequisites

For students planning their undergraduate course schedules in anticipation of applying for the PhD in computational biology, prerequisites in life sciences, computer science, physical sciences, mathematics, statistics, and computational biology are recommended. Students whose background does not include these courses may be admitted with the additional requirement to take appropriate compensating classes. For more information on prerequisites, see http://www.compbio.cmu.edu/?page_id=91

Application

REQUIRED MATERIALS - Deadline December 15, 2017

1. The Online Application
2. Statement of Purpose
3. Three letters of Recommendation
4. Unofficial Transcripts (submitted online)
5. Conversion of GPA (for international students only)
6. Unofficial TOEFL Scores (submitted online)
7. Application Fee

Applications are reviewed by the Joint CMU-Pitt PhD Program in Computational Biology. Each admitted student is assigned an initial university of matriculation, and receives an admissions offer letter from that university. Incoming students can be placed directly in a laboratory (if mutual interest exists between a student and an advisor), or go through a period of three rotations, after which the student chooses an advisor. Students have the ability to change advisors (subject to agreement of the new advisor and availability of support) and to transfer between the two universities to reflect advisor changes.

For more information on application process, see http://www.compbio.cmu.edu/?page_id=163

Financial Aid

All students are provided with a stipend and full tuition remission. Assistance is also provided for health insurance.

Teaching Assistantships

Although all students are supported as research assistants throughout their time in the program, there are opportunities to assist in the teaching courses of the program. Students are also encouraged to develop teaching skills by mentoring other students and passing on their knowledge to lab mates and fellow students.

Terminal Masters Degree

The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Courses

http://www.compbio.cmu.edu/?page_id=87

Training Faculty

The program provides students with cross-disciplinary training in established as well as newly emerging fields of computational biology. Students have access to a community of faculty mentors from the University of Pittsburgh and Carnegie Mellon University, which not only provides a breadth of research areas for investigation, but also offers the technical and intellectual resources to make rapid progress toward their doctoral degree.

For a list of training faculty, see http://www.compbio.cmu.edu/?page_id=31615

Doctoral

Center for Neuroscience Training Program (CNUP), PhD

PhD Degree Requirements

Credits: A minimum of 72 credit hours including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neurobiology and several elective courses.

Specifically, the following core courses are required:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- MSNBIO 2010 - SCIENTIFIC ETHICS or
- NROSCI 2010 - SCIENTIFIC ETHICS

- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY

- MSNBIO 2624 - GRANT WRITING

Note:

In addition to University requirements for graduate degrees, students are also required to obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

Integrative Molecular Biology, PhD

Degree Requirements

This is an accelerated program that provides the opportunity for students to complete their degrees in approximately 4 years. Students enter the Program in the summer session, and after performing three rotations identify an advisor and area of research. Areas of research focus include Genomics, Proteomics, and Gene Function and Cellular and Developmental Dynamics. Required course work is completed during the first year. At the end of the first year students take a comprehensive examination that includes the submission of a research proposal to national fellowship programs. Students receive career mentoring during the third and fourth years to ensure a seamless transition to the postdoctoral level. Additional information can be found at the following Web site: www.pimb.pitt.edu/curriculum.php.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. 32 of these credits are completed taking required and elective course work, and 40 of these credits are taken as dissertation research credits upon completing the comprehensive examination and advancing to candidacy. Required course work includes the following:

- MSIMB 2000 or
- IMB 2000 - LABORATORY RESEARCH ROTATIONS - 9 credits - taken in the summer prior to the first year

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer of the second year
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS

- MSIMB 2050 or
- IMB 2050 - PIMB RESEARCH SEMINAR - the Department/Program Seminar and Journal Club/Conference are taken each fall and spring term until graduation

Advanced Elective Courses (6 credits total)

A large number of courses are available and are listed on the following Web site: www.pimb.pitt.edu/curriculum.php - Students are required to select courses in more than one of the following disciplines: molecular genetics, biochemistry, cell biology, and developmental biology.

Critical European Culture Studies Program

The PhD Program in Critical European Culture Studies offers a flexible interdisciplinary curriculum that appreciates the idea of Europe as a historically dynamic discourse. This new graduate program offers students discipline-specific training while fortifying it with a focus on broader issues such as transnationalism, migration, and cultural identity. It allows students to work across disciplinary boundaries to explore in depth the culture of Europe and develop new configurations in European and national cultural studies: European Studies and German/Russian/Polish/English/French/Italian/etc. These may include literary, historical, anthropological, media-based, and other studies.

Contact Information

Program Director: Professor Randall Halle
E-mail: rhalle@pitt.edu

Graduate Administrator: Briar Somerville
E-mail: kbs47@pitt.edu

Main Office: 454 Cathedral of Learning
412-624-6564
www.cecs.pitt.edu

Admissions

Admission Requirements:

- a Master's degree in a field related to Critical European Culture Studies
- proficiency in English (for non-native English speakers, TOEFL scores should be provided),
- proficiency in a second European-related language. Proficiency in this European language should be at a level sufficient to study at a European University and may be demonstrated by:

1) semester-length enrollment in a European University OR

2) a minimum score of Advanced Low or the equivalent on the ACTFL/OPI or a similar score on a nationally or internationally recognized scale (such as the Common European Framework of Reference for Languages).

Financial Assistance

Graduate student funding would combine both Research Fellowships and Teaching Fellowships for a total of four years of funding from Pitt sources. Research Fellowships will be awarded during the first and last years. In other years, Teaching Fellowships give students experience teaching within specific departments.

In addition, students will receive one summer fellowship to offer research opportunities and language improvement in Europe (students may also supplement traditional summer fellowship amounts with research and travel funds from other sources such as the European Studies Center and the Center for Russian and Eastern European Studies, when necessary).

Affiliated Faculty

Dietrich School of Arts and Sciences Faculty

PhD

Critical European Culture Studies, PhD

Credit Requirement:

The requirements for the PhD are at least 72 graduate-level credits, including language courses, elective courses in a single discipline and five required core courses. The core required courses are an Introduction to Literary and Theory Course, a Theory of Europe Course, a EU Studies Core Course, a Pedagogy Course and a research methodology course (ethnography, digital humanities, oral history, translation studies, or any other suitable methodology course that serves the students research interests and goals).

PhD Qualifying Examination:

Students take the PhD qualification exam during their 3rd semester in the program. They provide a reading list composed of all the texts read in the graduate courses up to this point. In addition to that they also submit two papers, one written in English and the other in their chosen primary European language.

Supervised Teaching Experience:

Supervised teaching experience is an integral part of the doctoral program. All PhD students will be given an opportunity to teach either a language, European history or a European culture course in their second and third years of the PhD program for a total of four semesters. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Comprehensive Examination:

Supervised teaching experience is an integral part of the doctoral program. All PhD students will be given an opportunity to teach either a language, European history or a European culture course in their second and third years of the PhD program for a total of four semesters. This experience will serve as preparation for scholarly and professional careers. Students will be supported by a pedagogy seminar to prepare and aid them.

Dissertation Overview:

Upon completion of the comprehensive examination and all other requirements, during the 5th semester, the student files an application for admission to candidacy for the Doctor of Philosophy. In consultation with a dissertation advisor the student presents a prospectus of a dissertation to a doctoral committee. The dissertation prospectus (10-15 pages) completed by the student gives a brief introduction to the topic, previous and related research done on the topic, and the specific lines of inquiry, including methodologies and specific skills used, that the dissertation will pursue. In addition, students should address how work on the dissertation will embed them in academic and non-academic networks. Students should also address how the outcome of their dissertation will address non-academic audiences? (for example, Cultural institutions, NGOs, Governmental institutions, the creative and cultural industry). After the advisor approves this prospectus, the student will defend the prospectus to the doctoral committee. Faculty members affiliated with CECS from at least three different departments should constitute the members of the doctoral committee.

Language Requirement:

By the time they defend their dissertation overviews, the students must also demonstrate an intermediate-level proficiency in a third language (in addition to English and the other, primary research language) on one of the following ways:

- passing an intermediate-level language sequence with a grade of "B" or better;
- take a nationally recognized exam such as the OPI, verifying intermediate proficiency;
- or take a departmental exam verifying such proficiency.

Dissertation Defense:

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation should engage a European-related question and include ethnographic, oral historical, digital, or other methodological approaches relevant to the chosen problematic of the research project. Due to the interdisciplinary nature of the program and the dissertation committees, the dissertation must be written in English.

Cultural Studies Program

The Graduate Program for Cultural Studies is a certificate-granting intellectual center for interdisciplinary cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. In its course offerings and other activities, the program draws upon over one hundred faculty affiliate members and ninety enrolled graduate certificate students from many of Pitt's departments and schools. The program's varied faculty members and students consistently exchange ideas about studying culture, beyond national boundaries and disciplinary divisions. The program stands as an institutional forum for responding to the increasing global need to engage, through interdisciplinary and post disciplinary lenses, the problematics of culture.

The program addresses debates concerning the theory of texts and their production; the relationship between culture and politics; the formation of disciplines and institutions; and the nature of cultural antagonisms and crises. It features a variety of recent methodologies of historical and textual interpretation, and offers students opportunities to work with faculty and other students from the following departments, programs, and schools: Anthropology, Bioethics, Classics, Communication, East Asian Languages and Literatures, Education, English, Film and Media Studies, French and Italian Languages and Literatures, Gender, Sexuality, and Women's Studies, German Languages and Literatures, Hispanic Languages and Literatures, History, History and Philosophy of Science, History of Art and Architecture, Law, Library Science, Linguistics, Medicine, Music, Philosophy, Political Science, Public and International Affairs, Public Health, Religious Studies, Slavic Languages and Literatures, Social Work, Sociology, and Theatre Arts.

The program offers a master's certificate and doctoral certificate in cultural studies, which enhance MA and PhD degrees in the disciplines.

Graduate Administrator: Allison Thompson
E-mail: amt79@pitt.edu

Main Office: 401C Cathedral of Learning
Phone: 412-624-7232

Fax: 412-624-7232
E-mail: cultural@pitt.edu
www.culturalstudies.pitt.edu/

Admissions

Students who wish to apply to the certificate program must be enrolled in a graduate or professional program at the University of Pittsburgh and must be in good academic standing. A student may earn either a master's certificate or a doctoral certificate, but not both.

Financial Assistance

Two one year fellowships are awarded annually to outstanding resident doctoral students who have passed comprehensive examinations.

Publications

Cultural studies faculty edit journals of international renown, including *boundary 2* and *Critical Quarterly*, leading publications in the study of culture. The Program Director is co-editor of the *Oxford History of Popular Print Culture, vol. 5, United States, to 1860*.

Affiliated Faculty

<http://www.culturalstudies.pitt.edu/faculty>

Certificate

Cultural Studies, Doctoral Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. The program, open to students who are and must be discipline-trained and discipline-oriented, provides a transcultural-critical expertise not generally available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Doctoral Certificate

The following are course requirements (27 credits) for the doctoral certificate in cultural studies:

- Common Seminar (CLST 2050)
- Three core courses (one from each group): A, B, or C (courses are listed at <http://www.culturalstudies.pitt.edu/courses>)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department

Students from departments without second language requirements are expected to demonstrate the ability to use primary and secondary texts in one language other than English. Courses are regularly offered in the language departments toward the achievement of this level of reading proficiency and those departments will schedule individual written examinations to demonstrate this ability.

Virtually all of the program's courses are cross-listed with offerings in other departments and schools. Each cross-listed course counts for credit both in its home department and in the cultural studies program. Thus, the certificate program normally requires only one or two extra courses beyond those mandated by students' disciplinary degree program.

Cultural Studies, Master's Certificate

This interdisciplinary program is concerned with cultural critique and analysis. The program fosters the intensive study of cultural formations, past and present, from around the world. The methodologies employed derive from the most advanced historical, social, and literary models. available in specific departments. The faculty is drawn from twenty-five areas of the humanities and social sciences at the University. The program is open to any student enrolled full time in any graduate or professional program at the University of Pittsburgh; certificates are granted at both Master's and PhD levels. Two fellowships are offered annually to outstanding students who have passed their doctoral comprehensive examinations.

Requirements for the Master's Certificate

Following are course requirements (15 credits) for the master's certificate in cultural studies:

- Common Seminar (CLST 2050)
- One core course from group A or B (courses are listed at <http://www.culturalstudies.pitt.edu/coursest>)
- One designated cultural studies course (D) in the student's home department or school
- One designated cultural studies course (D) outside the student's home department or a course from group C

Digital Studies and Methods Program

Graduate Certificate in Digital Studies and Methods

This certificate offers graduate students at the University of Pittsburgh the opportunity to acquire a proactive, mindful engagement with digital methods in the humanities and allied social sciences. While interpretive scholars have been applying computational methods to their work for as long as there have been digital computers, the arrival of the World Wide Web witnessed a more expansive group of humanists and social scientists, armed with a new array of interpretive possibilities, joining the conversation about how computing can productively enrich their research. In these recent years, such scholars have turned to using the computer not only as a revolutionary programmable calculator but also as a medium of connection, capable of supporting a wide number of approaches to scholarly investigation, interpretation, and expression. In sum, they focus on what it means to be human in a world where the dominant force-for-change seems to be technology. The Graduate Certificate in Digital Studies and Methods is designed to welcome students into this community.

Being a mode of inquiry with an expansive set of methods and tools, the use of digital techniques within the humanities and allied social sciences requires a pedagogical approach that relies on not only lecture and seminar time, but also hands-on workshop opportunities where students can apply the techniques they have been learning and discussing. To this end, this certificate includes traditional classroom hours as well as studio-based learning experiences that provide the hands-on, peer- and mentor-supported experience that this digitally-attentive approach to interpretive scholarship requires.

The methods, skills, and techniques that the students enrolled in this certificate might encounter include: network analysis, topic modeling, digital visualization techniques, geographic information systems (GIS), effective data modeling practices, and approaches to text analysis focused on the use of markup languages.

Department of East Asian Languages and Literatures

The Department of East Asian Languages and Literatures (EALL) offers an interdisciplinary Master of Arts in East Asian Studies (IDMA), focusing on China or Japan.

Contact Information

Department Chair (EALL): Hiroshi Nara
Main Office: 2714 Cathedral of Learning
Graduate Administrator: Michael Orbin
412-624-5227
Fax: 412-624-3458
E-mail: mio43@pitt.edu
<http://deall.pitt.edu/graduate>

Admission and Application Form: To apply, go to <http://deall.pitt.edu/graduate/apply> and click on Apply Yourself.

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan professional careers in government, business, journalism, or pre-college teaching; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese or Japanese language study. The interdisciplinary nature of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh.

Applicants for admission must submit a 500-600 words statement in English that identifies the student's academic and intellectual goals through discussing a book that has influenced them in applying to the IDMA program. They must submit transcripts of all college-level work, three letters of recommendation in English, and a writing sample in English. International applicants whose first language is not English are required to submit the TOEFL administered by the Educational Testing Service: The required TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing); the required minimum IELTS of 7.0 (with at least 6.5 in each of its four sections). The deadline each year for submitting applications is January 15. Notification can be expected by the middle of March. The program admits students only for the fall term.

Financial Assistance

Current as well as prospective students in Asian Studies are eligible to apply for a variety of scholarships and fellowships administered by the Asian Studies Center. See the Web site <https://www.ucis.pitt.edu/asc/students/graduate-students/funding> for descriptions of awards.

The dean of the Dietrich School of Arts and Sciences has approved some Tuition Reduction Scholarships for out-of-state students accepted into the IDMA program each year. As a result, most IDMA students pay in-state tuition rates.

Faculty

The Asian Studies faculty affiliated with the IDMA Program comprise an outstanding group of specialists in the social sciences and humanities. They share a common dedication to teaching and a vigorous commitment to scholarly research as well as service to the profession. Academic disciplines of individual faculty members and their teaching specializations are noted on the website above.

Dietrich School of Arts and Sciences Faculty

Course Note

Not all courses are offered every term. Students should consult with their academic advisers for course selections. 30 credits of graduate courses are required for the degree. For more detailed information about the requirement, refer to the department website: <http://deall.pitt.edu/graduate/requirements>.

Master's

East Asian Studies, MA

The interdisciplinary Master of Arts degree in East Asian studies (IDMA) combines advanced language training with study in the social sciences and humanities focusing on East Asia. It is designed for graduate students who plan professional careers in government, business, journalism, or pre-college teaching; or for those who want intensive area training before pursuing a doctoral program in a particular discipline. The IDMA is typically a two-year program. It is designed for students who have already had at least two years of Chinese, Japanese, or Korean language study. The interdisciplinary nature of the program comes not from specially constructed interdisciplinary courses but from taking a planned complement of graduate-level courses in different departments. The strength of this interdisciplinary approach lies in the fact that students are able to elect to work with faculty in several disciplines, as well as to take courses in different areas in the humanities and social sciences. The applicant's academic interests must be compatible with the expertise of the East Asian faculty at the University of Pittsburgh. IDMA students are eligible to apply for a variety of scholarships and fellowships administered by Asian Studies. See the Web site www.ucis.pitt.edu/asc and click on Funding for descriptions of awards.

Requirements for the MA

Requirements for the IDMA

The interdisciplinary Master of Arts in East Asian Studies (IDMA) is intended primarily for predoctoral students who want intensive area training before pursuing a doctoral program in a particular discipline, or for those planning professional careers in government, business, journalism, or pre-college teaching.

Credit Requirements: Students must earn a minimum of 30 credits of course work (excluding language credits) in two or more departments with an overall GPA no lower than 3.0. At least half of these credits must be carried in courses numbered 2000 or above. In addition, EAS 2005 - APPROACHES TO EAST ASIA, a research methodology course, must be taken in the first year.

Language Requirement: Students must have successfully completed two years of Chinese or Japanese, language training in order to apply to the program and must continue their language study as part of their graduate work. A minimum of three years' college-level language study or its equivalent is necessary to fulfill the language requirement for the degree.

Course Specialization: Students who specialize in China must take at least one 3-credit course on Japan, and those who specialize in Japan must take at least one 3-credit course on China.

History Courses: Six of the required credits must be taken in course work relating to the ancient and modern history of China or Japan.

Thesis: The thesis topic must be approved by the student's academic advisor and a faculty committee of three, which regularly included the academic advisor. The faculty committee must present at least two different departments. The thesis must demonstrate an ability to research primary East Asian language materials.

Oral Comprehensive Examination: When course work and thesis are completed, the student must pass an oral comprehensive examination administered by the student's faculty committee.

Department of Economics

The aim of the doctoral program in economics at the University of Pittsburgh is to prepare students to be professional economists in academia, business, or government.

The normal time to complete the PhD is five years. Graduate students may apply for a Master of Arts (MA) under specific circumstances as described below.

1. **Continuing Master's Degree**

Continuing students may apply for an MA in economics after they have passed all preliminary examinations and have at least 30 credits in graded coursework at the 3000 level. In addition, their GPA must be 3.0 or higher in all courses counting toward the 30-credit minimum.

2. **Non-continuing Master's Degree**

The Graduate Committee may recommend that a MA in economics be awarded to a student who is leaving the PhD program either voluntarily or because of dismissal. The requirements for the terminal master's degree are: 1) either passing each of the seven first year courses with a minimum grade of B or passing one of the preliminary exams; and, 2) completing 30 credits of graduate level coursework with a cumulative GPA of 3.0.

Continuing students do not qualify for a non-continuing master's degree.

Faculty members have a wide variety of research interests. Currently, the department's strengths are greatest in the following fields:

- Comparative Systems and Development Economics
- Econometrics
- Economic History
- Experimental Economics
- International Economics
- Labor Economics
- Macroeconomics
- Microeconomic Theory
- Public Economics
- Urban Economics

Contact Information

Department Chair: Marla Ripoll

Director of Graduate Studies: Daniele Coen-Pirani

Main Office: 4700 Wesley W. Posvar Hall

412-648-7270

E-mail: brd51@pitt.edu

www.econ.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Economics, Graduate Administrator Brian Deutsch, 4700 Wesley W. Posvar Hall, Pittsburgh, PA 15260. Phone: 412-648-7270. E-mail: brd51@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement that addresses the applicant's personal and professional goals and the reasons for pursuing doctoral study in economics. Submission of the Graduate Record

Examination is optional. International applicants whose first language is not English are required to submit official scores from either the TOEFL administered by the Educational Testing Service with a minimum score of 90 on the internet-based test (with at least a score of 22 in all four sections). Applicants may also submit scores from the IELTS administered by the University of Cambridge, Local Examinations Syndicate. The minimum acceptable score is 7.0, with at least a score of 6.5 in each of the 4 sections (taking the academic writing and reading modules). The department also accepts Duolingo scores, with a minimum of 110. Application must be received by January 15. The department admits students only for the fall term.

Financial Assistance

The department generally offers financial support beginning with the first year of graduate study. Awards are competitive; not all students who are admitted to the program are offered fellowships. All fellowships and assistantships offer full tuition as well as a stipend and some include medical coverage. Students who are admitted without funding may qualify for funding if they pass the preliminary examinations in microeconomics and macroeconomics at the end of the first year of study.

Provided there are adequate funds, students with fellowships or teaching assistantships who make satisfactory progress toward completion of the PhD can expect their financial support to continue for up to four years beyond the first year of study.

Doctoral

Economics, PhD

Requirements for the PhD

Credit Requirement

The minimum requirement is 72 credit hours. Of these, 45 credit hours must be in graded course work. Core courses include

- ECON 3010 - MATHEMATICAL METHODS OF ECONOMIC ANALYSIS
- ECON 2020 - INTRO TO ECONOMETRIC THEORY
- ECON 2100 - ADVANCED MICROECONOMIC THEORY 1
- ECON 2110 - ADVANCED MACROECONOMIC THEORY 1
- ECON 2120 - ADVANCED MICROECONOMIC THEORY 2
- ECON 2130 - ADVANCED MACROECONOMIC THEORY 2
- ECON 2150 - GENERAL ECONOMETRICS

Additional Requirements

Preliminary Examinations

The PhD preliminary exams consist of a four-hour exam in microeconomic theory and a second four-hour exam in macroeconomic theory. These exams are offered in June after the first year of study. If a student fails either or both preliminary examinations, a second attempt is offered two months later in August. Students must pass both exams by the second attempt to continue in the program.

Minimum GPA

All students must attain a minimum GPA of 3.00 in 3000-level course work in economics as well as maintain a minimum GPA of 3.00 in all courses qualifying for graduation to be certified for the PhD in economics, as well as to qualify for continued financial assistance.

Comprehensive Exam Requirement (Research Paper)

All students are required to complete a single authored, original research paper demonstrating their ability to do research in economics. This is typically begun in the latter half of the second year and completed in the first term of the third year. The paper is reviewed by two faculty members, who may ask for revisions or additions. Following their approval of the paper, the student is certified as having completed the comprehensive examination requirement.

Field Requirements

Students are required to take coursework in two major fields, consisting of two graded courses and one graded seminar in each field, and one minor field consisting of two graded courses. The two major fields must be completed within separate areas of research, as follows:

- Microeconomics
- Macroeconomics
- Applied Microeconomics
- Experimental Economics
- International, Comparative, and Developmental Economics
- Econometrics

The list of fields offered within each area is periodically updated by supervising faculty members within the relevant area.

Dissertation Overview (Admission to Candidacy)

Following successful completion of the comprehensive examination, the student begins to work full time on the doctoral dissertation. This involves searching for a topic, finding a faculty advisor, and beginning preliminary research. When a topic is selected and preliminary research is underway, the student, in consultation with the advisor, forms a dissertation committee. A dissertation overview is held at which the student presents his proposal for doctoral research, preliminary findings, and a strategy for completing the work to the dissertation committee. If the dissertation committee approves of the topic and research strategy, the student can file an application for admission to candidacy for the Doctor of Philosophy.

Dissertation Defense

The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Master's

Quantitative Economics, MS

Program Description

The MS in Quantitative Economics (MQE) program in the Department of Economics trains professionals to become experts who can inform economics and business decisions with sophisticated, state-of-the-art data analysis.

Students acquire the knowledge needed to formulate economic questions surrounding alternative policy and business strategies; identify the data needed to answer these questions; read and interpret data; produce forecasts that support core business and policy decision making; build the skills needed to effectively present and communicate data-driven knowledge.

The program is a professional 8-month program to be completed during the Fall and Spring semesters. The degree requires 30 credits, equally divided into 10 courses of 3 credits each, over two semesters. Each semester is split into two terms that are 7 weeks long, and each term includes 3 courses, with one of them running over two terms. All students are required to participate in a summer course in mid-August that will strengthen their skills in math and computer programming. MQE offers intensive Career Services that prepare students for the workplace, help them network and make mentor connections. The MS in Quantitative Economics qualifies as a STEM designated degree program.

Fall	Session 1	Individuals, Firms, and Markets	Quantitative Methods	Communicating Economic Insights
	Session 2	Incentives and Information	Economic Inference from Data	
Spring	Session 1	Global Economics and Finance	Applications of Economic Analysis Techniques	Data Design for Economic Applications (Capstone)
	Session 2	Evidence-Based Analysis in Labor, Public and Health Economics	Big Data and Forecasting in Economics	

Program Requirements

Applicants must hold a bachelor's degree from a recognized college or university, or have completed an equivalent level of education that the University of Pittsburgh deems comparable to a bachelor's degree. Applicants must have demonstrated mastery in calculus I and a basic understanding of economics and basic computer programming skills with a minimum 3.0 cumulative GPA in the total undergraduate program. For foreign students, language-test scores above certain thresholds will be required.

Submission of personal statement with a consideration for a student's ability to overcome challenges and assert strength in relevant skills.

Two letters of recommendation, preferably from an academic source, must be submitted online. Letters should be written on letterhead stationery and signed by the recommender. Applications can be submitted prior to receipt of letters.

International applicants must submit test scores in the Test of English as a Foreign Language (TOEFL), IELTS (International English Language Testing System) score (required of applicants whose official native language is not English even if English was the medium of instruction in the foreign schools attended by the applicant) or the Duolingo English Test. The required TOEFL score is 90 (with a minimum of 22 in each section), the required IELTS score is 7.0 (with a minimum of 6.5 in all sections), or the required Duolingo English Test score is 110 or higher. Applicants who have completed or are about to complete a bachelor's degree or graduate degree from a regionally accredited institution in the United States are exempt from submission of the Duolingo English Test, TOEFL or IELTS. Exemptions on a case-by-case basis are possible for applicants who hold a degree or are currently enrolled in an institution in which the only language of instruction is English. When requesting that TOEFL scores be sent to the University of Pittsburgh use code 2927.

Academic Support

The students will be academically supported by the MQE director and program director. The students will be supported in their professional development through workplace-readiness workshops, networking events and mentoring programs.

Students are required to maintain a GPA average of at least 3.0 and receive a grade of B or higher in all courses. A student failing to meet these requirements will be terminated from the program.

Contact Information

Department of Economics Chair: Marla Ripoll
MQE Director: Randall Walsh

MQE Program Director: TBD
E-mail: mqeinfo@pitt.edu
www.mqe.pitt.edu

Department of English

The Department of English offers the following degrees and certificate:

Master of Arts (MA)
Master of Fine Arts (MFA)
Doctor of Philosophy (PhD)
Certificate in Composition, Literacy and Pedagogy

Contact Information

Director of Graduate Studies: Tyler Bickford
Main Office: 526 Cathedral of Learning
412-624-6549
Fax: 412-624-6639
E-mail: engrad@pitt.edu
<http://www.english.pitt.edu/graduate/>

Additional information concerning the department's graduate program may be obtained from the Graduate Administrator, Department of English, University of Pittsburgh, Pittsburgh PA 15260. Phone: 412-624-6549. Fax: 412-624-6639. E-mail: engrad@pitt.edu. Web site: www.english.pitt.edu/graduate.

Admissions

Applicants for admission must submit an online application, transcripts of all college-level work, three letters of recommendation, a personal statement, and a writing sample (which varies by degree—please consult the application requirements link above). International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service with a minimum score of 90 (with a minimum of 22 in each section), or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 7.0 (taking the academic writing and reading modules). Applications to the MA and PhD program will be accepted for fall term admission until December 10, and applications to the MFA program are due, January 7. Newly admitted students enter the program in the fall semester only.

Applicants can apply online at the following site: app.applyyourself.com/?id=up-as.

Financial Assistance

All PhD students are offered a non-teaching fellowship for their first year of study. Students making satisfactory progress are then ordinarily supported with renewable teaching assistantships and teaching fellowships for four more years, with the possibility of a sixth year depending on the availability of funding. MFA students are admitted either as teaching assistants or as a non-teaching fellow, and these funding streams are renewable as teaching assistantships for two more years if the students are making satisfactory progress. The department does not currently offer financial assistance to MA students.

Certificate in Composition, Literacy and Pedagogy

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Composition, Literacy and Pedagogy Certificate

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Certificate in Composition, Literacy and Pedagogy

<http://www.composition.pitt.edu/graduate/certificate>

This graduate certificate recognizes sustained, advanced study in composition, literacy, and pedagogy. It can be awarded to students who have earned the MA, MFA, or PhD degree in the department of English, and to those earning graduate degrees in other programs and departments.

To qualify for the certificate, students must successfully complete 12 to 18 credits (depending upon the level of the certificate being awarded). More information about the certificate is online at http://www.composition.pitt.edu/graduate/graduate_more.html

Certificate

This graduate certificate recognizes sustained, advanced study in composition, literacy, pedagogy and rhetoric at the University of Pittsburgh. It can be awarded to students who have earned the MA, MFA, or PhD degree in the Department of English, and to those earning graduate degrees in other departments, programs, and institutions.

To qualify for the certificate, students must successfully complete ENGLIT 2500 - SEMINAR IN PEDAGOGY (or an equivalent course in writing pedagogy), and a set of additional courses described below: the MA and MFA certificate will require three (3), and the PhD certificate five (5) additional courses. These courses are selected from among an array of seminars that represent intersecting strands of work in the Composition Program:

- **Composition**, including study of the theories and practices of writing, within and beyond the field of Rhetoric and Composition;
- **Literacy**, including research into public rhetorics and the literacies of diverse groups in the larger culture beyond the academy;
- **Pedagogy**, including historical and critical inquiry into issues of schooling, teaching, and the institutions of academic writing;
- **Rhetoric**, including the history and theory of rhetoric and its functioning in institutional, political and literary spheres of communication.

Students interested in the certificate should see the Director of Composition for initial advising. He or she will identify qualifying courses for the certificate in English and may approve courses in other departments at the University of Pittsburgh. One course of Directed Study may also be accepted for the certificate, with the approval of the Director of Composition. In order to graduate with this certificate, students must apply to the certificate program at least one semester in advance of their graduation. The application form can be obtained from the Graduate Administrator in the Department of English (engrad@pitt.edu (<mailto:engrad@pitt.edu>)).

To qualify for the Graduate Certificate in composition, Literacy, Pedagogy, and Rhetoric, students are further required to produce a teaching portfolio. The portfolio must be submitted to the Director of Composition at least 3 weeks before the end of the semester in which the student plans to graduate. The portfolio assembles materials that document at least one of the following:

- An ability to design and teach an effective undergraduate course or communitybased writing workshop;
- Significant work in support of teaching: for instance, as a mentor to beginning teachers, or as an assistant in the administration of the Composition Program, the Western Pennsylvania Writing Project, or the Writing Center;
- Demonstrated ability as a writing tutor in the Writing Center, in other university support services, or in afterschool programs for children.

Portfolios characteristically include teaching materials such as syllabi, assignments, exercises, and observations by peers and faculty members. Administrative documents may include reports, proposals, newsletters, Web pages, and other materials that demonstrate the work of the position, as well as statements of evaluation. Portfolios are reviewed by a committee of the composition faculty.

Notice that students have been awarded the Graduate Certificate in Composition, Literacy, Pedagogy, and Rhetoric appears on their final transcript for the MA, MFA, or PhD degree.

Notes:

MA or MFA candidates without a teaching assistantship may replace ENGLIT 2500 - SEMINAR IN PEDAGOGY with another course in composition, literacy and pedagogy and/or rhetoric. Courses that satisfy this requirement are designated each year by the Director of Composition.

Candidates are urged to consult with a member of the composition faculty while preparing a teaching portfolio.

Composition, Literacy and Pedagogy Certificate, MA

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. Doctoral

English, PhD

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the PhD

General Requirements. The PhD requires 72 credit hours, 34 of which must be in courses at the 2000 or 3000 level, with a minimum grade point average of 3.00. Required courses are a one-credit practicum, Introduction to Graduate Study; Seminar in Pedagogy (3 credits); and a Dissertation Writing Workshop (3 credits). Additionally, three core courses in at least two programs of the department (Composition, Film, and Literature) are required. The remaining credits are earned through elective seminars, independent studies in preparation of the PhD project and dissertation research credits. PhD candidates must fulfill a language requirement by demonstrating reading knowledge of two languages other than English, advanced study in one language other than English, or beginning knowledge of a new language. PhD students must teach for at least two terms.

Earning the MA. PhD students may elect to earn an MA as they progress in the PhD program, although they are not required to do so. If they wish to earn the MA, they must successfully complete the two core courses listed above with a grade of B or better, and either complete the master's research paper (outlined above under "Requirements for the MA Degree"), or successfully pass their PhD comprehensive (project) examinations. Application for the MA must be made before the end of the student's fourth year in the PhD program.

The PhD Project. The PhD project fulfills the University requirement for a comprehensive examination prior to admission to doctoral candidacy. It is a historical and theoretical investigation of a topic that can be demonstrated by the student to be of long-term significance for critical study. The project allows students to examine and synthesize a range of interests that ordinarily lead into the more detailed inquiry of a dissertation. While we no longer insist on comprehensive knowledge of all literature written in English, the project is meant to demonstrate a breadth of knowledge as well as the ability to work on a single problem. For more specific regulations governing the PhD project, please consult the PhD website listed above.

The Dissertation. After students have passed their project examinations, they will register for independent study credits in order to write a prospectus for the dissertation. The student should choose a dissertation director and a committee at this time. Once a dissertation committee has been formed, the student will submit a formal dissertation prospectus to them for approval. When the dissertation committee has approved the prospectus, the dissertation director will submit for the student an application for admission to doctoral candidacy. Once students have had their dissertation prospectus passed and have been admitted to doctoral candidacy, they should begin the work of researching and writing the dissertation. Normally students will complete the dissertation during the fifth and sixth years in the program, the fifth through the eighth terms as a teaching fellow, or the ninth through the 12th terms in residence. Once the dissertation is completed, students must successfully defend the dissertation in order to earn the PhD.

Master's

English, MA

Graduate and Professional Degrees

The Department of English offers a PhD emphasizing Cultural and Critical Studies, and two Master's degrees: an MA in English and an MFA in Writing. The PhD in English, open to applicants with at least a BA or its equivalent, encourages interdisciplinary scholarship. PhD students typically base their work in Composition/Rhetoric, Film Studies, or Literature, but the department fosters interdisciplinary work that draws on more than one program. The department has a strong national reputation in composition and literacy studies, children's literature, global film studies, and cultural theory. Based in the Literature Program but including faculty members and PhD students across programs are four focal areas that provide curricular and extracurricular support for student work: Children's Literature and Childhood Studies; Genealogies of Modernity; Media and Material Practices; and Race, Politics, and Empire. The MA in English provides broad familiarity with advanced studies in Composition/Rhetoric, Film Studies, and/or Literature. The MFA in Writing allows students to specialize in poetry, fiction, or nonfiction, while also integrating courses in literature and literary history. The department also offers a graduate-level certificate in Composition, Literacy, Pedagogy and Rhetoric.

Requirements for the MA

General Requirements. The MA requires the completion of 30 credit hours, including a one-credit Introduction to Graduate Studies and a core course for one of the programs of the PhD (in Composition, Film, or Literature). MA students must complete a master's research paper in an elective course of their choice (see below), and must fulfill a language requirement by demonstrating reading knowledge of a language other than English or take the appropriate coursework in the study of a language other than English, undertaking the advanced study of a language, or beginning a new language.

Master's Research Paper. All MA students must also complete a master's research paper in an elective course of their choice. The master's research paper should be of professional article length, defined by the Modern Language Association (MLA) as 6,000-8,000 words not including documentation. Students must engage in primary research beyond course readings and/or what is ordinarily required for a term paper, and the Master's Research paper must reflect that research. Students must consult an instructor, and receive the instructor's approval, no later than the end of the add/drop period if they wish to write their master's research paper for that instructor's seminar. The instructor of the seminar will be solely responsible for evaluating the paper. The master's research paper must be completed no later than the last day of the spring term of a student's second year, or fourth term in residence. In order for the master's research paper to count toward earning the MA, a student must receive a grade of B or better on the paper and as a final grade for the course in which the paper was completed.

English, MFA

Requirements for the MFA

General Requirements. The MFA requires 36 credit hours with a minimum grade point average of 3.0, plus the completion of an acceptable final manuscript. Requirements vary according to the student's area of major interest (fiction, nonfiction, or poetry), but the degree requires a combination of writing workshops, graduate-level readings courses, and English courses outside the Writing Program (in composition, literature, or film). Also required is ENGLIT 2608: Genres and Genre Theory. Further information about requirements for each MFA genre can be found in the English Department's graduate handbook. There are no language requirements for MFA students.

The Final Manuscript. The final manuscript is equivalent to the MA comprehensive examination. It consists of a book-length manuscript of the student's best work in the area of major interest - 150 pages (typed, double-spaced, standard format) for fiction and nonfiction, and 50 pages for poetry. The manuscript shall be submitted to a committee of three English faculty members—two writing graduate faculty in the student's area of major interest and one English graduate faculty member outside the writing program. The student may recommend committee members, but the writing program director has final approval.

Film and Media Studies Program

The Film and Media Studies Program is an interdisciplinary program offering courses in history, aesthetics, theory, and critical studies. The Film and Media Studies Program offers the following graduate degrees and certificates:

PhD in Film and Media Studies (in conjunction with five Associated Departments)
Terminal MA in Film and Media Studies
MA Certificate in Film and Media Studies
PhD Certificate in Film and Media Studies

Contact Information

Director of Graduate Studies: Professor Mark Lynn Anderson
E-mail: andersml@pitt.edu

Graduate Administrator: Jesse Daugherty
412-624-6549
E-mail: JED110@pitt.edu

www.filmandmedia.pitt.edu

Admissions

Applicants will submit an application to the Film and Media Studies PhD program, identifying an Area of Concentration from the list of associated departments (e.g. English, French, Hispanic, History of Art and Architecture, and Slavic). The name of the Associated Department will appear on the student's transcript when the degree is granted. The application will be vetted simultaneously by Film and Media Studies and the Associated Department. Only one application fee is required.

Students who have already entered graduate programs in associated departments are welcome to apply to the Film and Media Studies PhD through the normal application process. If accepted, they are eligible to transfer a maximum of 24 credits towards the Film and Media Studies PhD degree requirements, and can petition to waive required courses that have been fulfilled, following normal University, School, and Program regulations.

Students who wish to enroll in the graduate certificate programs in Film and Media Studies (whether MA or PhD) must be matriculated for a graduate degree in a department of the Dietrich School of Arts and Sciences or in another school within the University. Students interested in pursuing a Film and Media Studies certificate at any point in their career may do so by filing the appropriate form with the Film and Media Studies Program.

Financial Assistance

Financial assistance for both the PhD and the certificates will be provided by the associated department (reflecting the student's Area of Concentration). Such aid typically takes the form of scholarships, fellowships, teaching assistantships, and/or graduate student assistantships.

Affiliated Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Film and Media Studies Doctoral Certificate

In the Spring of 2018, the Film Studies Doctoral Certificate was renamed to Film and Media Studies Doctoral Certificate. Students who were enrolled prior to the Spring 2018 term have the option to take the Film Studies doctoral certificate or change to the Film and Media Studies doctoral certificate. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Eligibility

Students engaged in an A&S doctoral program at Pitt can enroll in the Film and Media Studies Doctoral Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The doctoral certificate is awarded only after the completion of all degree requirements for the PhD in the student's home department, school, or program.

Course Work

Six film and Media Studies courses (18 credits) including:

Core Course:

- ENGFLM 2451 - FILM HISTORY/THEORY or
- ENGFLM 2452 - FILM HISTORY/THEORY 2

Five Electives:

Including at least two areas of study (e.g., national cinema, theory/themes, genre, etc.); at least two courses must be outside the student's home department.

Research Paper

The PhD Certificate requires a research paper be written in the field of Film and Media Studies (approx. 25-30 pp. in length) and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure for so doing is as follows:

At the beginning of a Film and Media Studies course that counts for the Certificate the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as well as the official Research Paper for the Certificate Program. The faculty member will then require of the student something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper over the following semester. The paper should be turned in for the Certificate requirement no later than at the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film and Media Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published).

This paper might go beyond a standard seminar paper in any or several of the following ways: (1) have a demonstrated original point of view or approach to a given topic; (2) articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies; (3) involve substantial research with primary sources; (4) forge new theoretical or historical terrain; (5) consider hitherto ignored media texts. It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.

Additional Conditions

- Only two directed study courses (supervised by Film and Media faculty) can be counted toward the doctoral certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Film and Media Studies Master's Certificate

In the Spring of 2018, the Film Studies Master's Certificate was renamed to Film and Media Studies Master's Certificate. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies master's certificate or change to the Film and Media Studies master's certificate. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Eligibility

Students engaged in an A&S master's program at Pitt can enroll in the Film and Media Studies Master's Certificate Program at any point in the course of their study by submitting a completed Graduate Certificate Application Form to filmandmedia@pitt.edu or 454 Cathedral of Learning. The master's certificate is awarded only after the completion of all degree requirements for the MA in the student's home department, school, or program.

Course Work

Four Film and Media Studies courses (12 credits) including:

Core Course:

- ENGLM 2451 - FILM HISTORY/THEORY or
- ENGLM 2452 - FILM HISTORY/THEORY 2

Three Electives

(one outside home department)

Research Paper

The MA Certificate requires a research paper in the field of Film and Media Studies (approx. 25-30 pp. in length) to be written for and evaluated by a Film and Media Studies faculty member who teaches one of the seminars that the student takes for his/her Certificate requirements.

The procedure is as follows:

At the beginning of a Film and Media Studies course that counts for the Certificate, the student will inform the faculty member teaching the course that he/she wishes for his/her seminar to count as the official Research Paper for the Certificate Program. The faculty member will then require something more ambitious than the normal seminar paper (see Guidelines for Certificate Research Paper below) and meet with the student during the term to advise him/her.

At the end of the course the student has two options: (1) submit the Certificate Research Paper for both the course and Certificate requirements or (2) submit a paper that satisfies the course requirements and continue to work on the expanded Certificate Research Paper over the following semester. The paper should be turned in for the Certificate requirement no later than the end of the semester following the course in which the paper was conceived.

Guidelines for Certificate Research Paper

The research paper that qualifies for the MA and/or PhD Certificates in Film and Media Studies should go beyond the average seminar paper for a course, though (as per above) it should begin as such a seminar paper in conjunction with a member of the Film Studies faculty. In essence, the research paper should aspire to be one publishable in an academic journal (though there is no requirement that it actually be published). Such a paper might go beyond a standard seminar paper in any or several of the following ways:

1. Have a demonstrated original point of view or approach to a given topic
2. Articulate a clear and demonstrated argument about a topic that clarifies important issues in media studies
3. Involve substantial research with primary sources
4. Forge new theoretical or historical terrain
5. Consider hitherto ignored media texts.

It will be up to the Film and Media Studies instructor/advisor to determine how the paper might meet some of the above standards.

Additional Conditions

- Only one directed study course (supervised by Film and Media Studies faculty) can be counted toward the master's certificate.
- All courses must be passed with a B or higher.
- Students should notify the program director of their intention to file for graduation at the beginning of their final semester.

Doctoral

Film and Media Studies, PhD

In the Spring of 2018, the Film Studies, PhD was renamed to Film and Media Studies, PhD. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies PhD or change to the Film and Media Studies PhD. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Requirements for the PhD

General Requirements. The PhD requires 72 credits. All Film and Media Studies PhD students will be required to fulfill the requirements of their associated department as well as the Film and Media Studies requirements. PhD students must take the three core courses in Film and Media Studies, as well as four elective film studies courses. Language and teaching requirements are determined by associated departments, but Film and Media Studies students will be required to serve as TA/TF for at least one Film and Media class.

Comprehensive Exam. The comprehensive exam will be taken in the student's associated department. While the exam structure will differ from department to department, in all cases:

- one component (or more) of the exam will focus on Film and Media Studies
- a second component of the exam will focus on the departmental field (including its relation to cinema)
- at least one member of the exam committee in the student's associated department will be a member of the graduate faculty in Film and Media Studies.

The Dissertation. The dissertation will be completed in the associated department and must involve film and/or media studies as subject matter incorporated with the student's area of concentration (as determined by the dissertation director). The chair of the dissertation committee will be a graduate faculty member in the student's associated department who is also member of the interdisciplinary Film and Media Studies graduate faculty. The external member of the committee will be a member of the Film and Media Studies graduate faculty from outside the associated department.

Master's

Film and Media Studies, MA

In the Spring of 2018, the Film Studies, MA was renamed to Film and Media Studies, MA. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies masters or change to the Film and Media Studies master. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Requirements for the MA

General Requirements: The Terminal MA in Film and Media Studies degree will be granted only to those students who have been admitted to the PhD in Film and Media Studies but are subsequently unable to finish the program. The terminal MA provides this group of students the possibility of a terminal degree that acknowledges their time of study. A total of 30 credits are needed, including the three core courses in Film and Media Studies and five electives in film studies.

Master's Research Paper: The Master's paper is required for a terminal MA in Film. This project can be based on a paper prepared for a Film and Media Studies class. It should be between 6,000-8,000 words following MLA format. One Film and Media Studies faculty member will supervise the paper (most likely the instructor for the class in which the paper was written). Two other film faculty members including the student's AOC

Department faculty advisor and one other film faculty member will serve as readers. All three must approve the paper for it to fulfill the Film and Media Studies Terminal Master's paper requirement. To pass, a paper should coherently present original research on a topic or issue relevant to the contemporary study of time-based media and/or their histories, incorporating primary research in a cogent, scholarly fashion.

Department of French and Italian

The Department of French and Italian offers programs leading to the MA in Italian, a PhD in French with an MA *en route* and the PhD in French. Students may also apply for the PhD in Film Studies with a Concentration in French (granted by Film Studies). The following tracks are offered at the MA level in French and Italian:

French
Italian

The following tracks are offered at the PhD level in French:

French
Film and Media Studies with a Concentration in French

In addition, the department encourages students to participate in various interdisciplinary programs, such as African Studies; Cultural Studies; Digital Studies and Methods; European Union Studies; Film and Media Studies; Gender, Sexuality, and Women's Studies; Global Studies, Medieval/Renaissance Studies, and West European Studies, where students may work toward a graduate certificate in conjunction with their degree.

Graduate Degree Programs

Admissions

Students accepted into the graduate program must meet the following criteria:

- They should have completed an undergraduate major (or equivalent) in the language, literature, media, and culture they propose to study at the graduate level or substantial coursework in a related field.
- They must be able to enroll in courses that are taught entirely in French and/or Italian. This presupposes a high level of skill in speaking, reading, and writing in their major language.
- It is recommended that incoming students have a reading knowledge of German, a second Romance language, or Latin.

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a personal statement, and samples of their writing in the target second language and in English. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service IBT (internet-based test) with a minimum score of 90 (with at least a score of 22 in all of the 4 sections of speaking, listening, reading, and writing), or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 7.0 (with at least 6.5 in each of its four sections). For a complete list of required items for admission, go to <https://www.frenchanditalian.pitt.edu/graduate/admissions>.

Applications for fall term admission will be accepted until April 15. For funding consideration, applications must be completed by January 15 for French and February 1 for Italian. The department admits students only for the fall term.

Financial Assistance

All applicants to the graduate program in French and Italian are considered for departmental funding. The Department of French and Italian offers teaching and research positions to graduate students at all levels. Most teaching assistantships and fellowships are renewable on a year-to-year basis

for students in good academic standing. Students in the PhD who adhere to guidelines established in the departmental graduate policy statement may receive up to five years of support as a teaching fellow.

Faculty

<http://www.frit.pitt.edu/people/faculty>

Doctoral

Film and Media Studies with a Concentration in French

The PhD in Film Studies at the University of Pittsburgh is an interdisciplinary and interdepartmental degree that stresses the history, theory, and aesthetics of international cinema, video, television, and new media. While the student will earn a PhD in Film Studies (granted by the Film Studies Program), he or she will also be a full member of French, fulfilling all requirements for the PhD in French. French will appear as an Area of Concentration on the student's transcript. Thus, the student graduating with a PhD in Film Studies will be doubly qualified: in film studies as well as in French Studies.

Students must fulfill all of the requirements for the PhD in French (listed above) and the following additional requirements:

Core Courses in Film Studies (7 credits):

a two-course (6 credit) sequence taken in any order:

- ENGFLM 2451 - FILM HISTORY/THEORY
- ENGFLM 2452 - FILM HISTORY/THEORY 2
- 1 credit Film Studies Proseminar ENGFLM 2905

Note:

This will not count toward seminar credit within the French program and will be given on a Satisfactory/Unsatisfactory basis.

Electives in Film Studies (12 credits):

- Four elective Film Studies courses (in any department).

Note:

Of the total six required seminars, the student must take at least two courses taught by a member of the faculty outside of French. These courses can include the two required core courses as well as any of the four electives.

Additional Requirements

Teaching: All film PhD students will be required to serve as TA/TF for at least one film class. If the Department of French and Italian does not offer a film course or has no TA/TF positions for a film course, students will be required to teach one term of the undergraduate course Introduction to Film (or another such introductory course developed in the future) as part of his/her overall experience as a TA/TF.

Credit Requirement: Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.

Preliminary Examination/Evaluation: The two required core courses in Film Studies (Film History/Theory I and II) will serve as the preliminary exam in Film Studies. Successful completion of these two classes with a grade of B or better will constitute passing the preliminary examination.

To maintain funding, students must also pass the required preliminary evaluation conducted by the French faculty at the end of the first year of enrollment.

Comprehensive Examination: The Comprehensive Exam must contain at least one component focusing on Film Studies, and at least one component on French Studies (including its relation to cinema).

At least one member of the exam committee will be a member of the graduate faculty in Film Studies.

Dissertation Committee: The dissertation will be completed in the Department of French and Italian and must involve film and/or media studies as subject matter incorporated with French Studies (as determined by the dissertation director).

The Chair of the dissertation committee will be a graduate faculty member in the Department of French and Italian who is also a member of the interdisciplinary Film Studies graduate faculty. The external member of the committee will be a member of the Film Studies graduate faculty from outside the Department of French and Italian. It is expected that students will have been exposed to these faculty members in taking the required Film Studies courses (taught by the interdisciplinary Film Studies faculty), elective Film Studies courses (outside the student's associated Department), and in the Proseminar (taught by the interdisciplinary faculty).

French, PhD

Requirements for the PhD

Before students may be considered for admission to candidacy for the PhD, they must complete successfully a minimum of eight 2000-level courses (24 credits) beyond the MA level, five of which must be in French (a minimum of 72 credits). In addition, the candidates must present a *précis* of their emerging dissertation research area at the end of their first year, satisfy PhD language requirements, and pass written and oral comprehensive examinations. Upon admission to candidacy, the candidate will write and defend a doctoral dissertation. The course work must include:

FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.

With the advisor's consent students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

Dissertation Committee

The dissertation committee should include one faculty member with expertise in each of the two major periods/areas.

Credit Requirement: Minimum of 72 hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching or dissertation work as detailed elsewhere in this bulletin.

Preliminary Examination/Evaluation: Students in the PhD program will undergo a preliminary evaluation at the end of the first full year of residence. The written *précis* will serve as the preliminary evaluation.

Comprehensive Examination: Students must take written and oral comprehensive examinations on a topic with historical coverage and an topic in the area of specialization. Candidates will work with a faculty advisor and a committee to prepare the reading list in the areas chosen. The purpose of the comprehensive examinations is to ensure that the candidate can develop a relevant and original approach to the study of French and Francophone literature, media, and culture. These examinations should be passed at least eight months (two terms) before the degree is to be awarded. Students may schedule their examinations only after passing all preliminary examinations and language and other requirements..

Prospectus Review: As soon as the comprehensive examinations have been passed, students and their advisor should agree on a dissertation committee including at least three members of the department (including the director) and one member chosen from another department in an area of expertise relevant to the dissertation topic. Usually during the third year, but in no case later than the first term of their fourth year, students must submit a prospectus to the director for circulation among the committee members. The scope, size, organization, and format of the prospectus are specified in a separate departmental document, which PhD students should receive or request as soon as they pass their comprehensive examinations.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Joint Degree

French, MA/PhD

Requirements for PhD with MA en route

This degree is intended for students who wish to pursue the Doctor of Philosophy (PhD) degree in French but who do not already hold an MA in this field or in a closely-related discipline. Students must first successfully complete the requirements for the MA in French listed below, normally within their first two years of full-time enrollment. Students doing the PhD with the MA en route will be awarded an MA degree at the completion of these requirements:

- A minimum of ten one-term courses is required, for a total of 30 credit hours. These courses will include FR 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY, FR 2903 - MA RESEARCH PAPER DIRECTED STUDY, and FR 2910 - COMPREHENSIVE EXAMINATION MA. Students holding Teaching Assistantships are also required to take FR 2970 - TEACHING OF FRENCH, though this does not count toward the required ten.
- Comprehensive examination: the comprehensive examination is a written examination and is given in two sessions on separate days during the fourth semester of the MA en route program. An oral interview is held after completion of the written exams to discuss the results of the exams and the MA research paper.
- Seminar Paper: each candidate must revise a paper written for a seminar under the guidance of the instructor of that seminar.
- Second language: candidates must demonstrate a reading knowledge of a second Romance Language, or German, or Latin.

To ensure the acquisition of a broad knowledge of French-language literature, media, and culture, candidates must take at least one seminar in each of the following four areas: Middle Ages/Renaissance, Early Modern, Post-Revolution/Modern, and Global South) before they reach candidacy.

Before students may be considered for admission to candidacy for the PhD, they must successfully complete a minimum of five 2000-level courses (15 credits) beyond the MA, two of which must be in French. In addition, the candidate must pass written and oral comprehensive examinations. The PhD language requirement will normally be satisfied at the MA level. The eight courses must include:

1. FR 2710 (if not taken at the MA level) and an additional course in literary or cultural theory.
2. With the adviser's consent, students are free to take some of the additional required courses in other departments. Students in French are encouraged to pursue certification in one of the various programs offered by the University (African Studies, Cultural Studies, European Union Studies, Film Studies, Gender, Sexuality, and Women's Studies, Global Studies, Medieval and Renaissance Studies, West European Studies). However, only three exterior courses may count towards the degree in French.

Upon admission to candidacy, the candidate will write and defend a doctoral dissertation.

Master's

Italian, MA

Requirements for the MA in Italian

A minimum of ten one-term courses is required. These courses will include ITAL 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY - ITAL 2903 - MA RESEARCH PAPER DIRECTED STUDY, and ITAL 2910 - COMPREHENSIVE EXAMINATION MA. Students holding Teaching Assistantships are also required to take ITAL 2970 - TEACHING OF ITALIAN, though this does not count toward the required ten. Candidates must also fulfill the following additional requirements:

- Comprehensive Examination
 - The MA comprehensive examination is a written examination and is given in three sessions on separate days during the second year of the MA program; an oral interview is held after completion of the exams to discuss the comprehensive exam results, as well as the student's research paper.
- Research Paper
 - Each candidate must write a Master's Research Paper (or tesina) of professional article quality and length (25 pp min.). Students must conduct research beyond the scope of any single graduate term paper, but are encouraged to develop and formulate their topic in the context of one particular seminar (or two, if seminars are thematically or otherwise related). Students will work

closely with the faculty member whose field is most relevant to the chosen topic to identify appropriate areas for expansion, additional texts or case studies, and relevant methodologies. The paper must be written in Italian.

- Second Language Candidates must demonstrate a reading knowledge of Latin or German or a Romance language other than Italian. Other languages will be considered upon petition.

Gender, Sexuality, and Women's Studies Program

The Gender, Sexuality, and Women's Studies Program offers graduate certificates in Gender, Sexuality, and Women's Studies at both the master's and doctoral levels. The interdisciplinary curriculum draws upon faculty expertise in the arts, humanities, and social sciences; and in business, law, library and information science, nursing, medicine, public and international affairs, public health, and social work. The program provides opportunities for students who wish to focus their study on women, gender, and sexuality or who wish to add these areas as a subspecialty.

Contact Information

Program Director: Professor Laura Lovett
E-mail: lll49@pitt.edu

Graduate Administrator:
E-mail: gsws@pitt.edu

Main Office: 401 Cathedral of Learning

Phone: 412-624-7232
E-mail: gsws@pitt.edu
www.gsws.pitt.edu

Admissions

The graduate certificate programs admit only students already enrolled in other graduate degree programs at Pitt. Interested students can find information about the certificate programs at <https://www.gsws.pitt.edu/academics/graduate-studies> and should contact the program Director for advising.

Financial Assistance

No initial financial aid is available through the GSWS Program. Graduate students who enroll in the program may apply for financial aid through a home department. Each year, the program hires advanced graduate students as instructors, lecturer, or teaching fellows and offers research grants for work on gender and sexuality.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Gender, Sexuality, and Women's Studies Doctoral Certificate

Requirements for Doctoral Certificate

The doctoral-level certificate requires 18 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least two other courses must be outside the candidate's home department, including at least one course with a GSWS course number
- At least three courses in one field, determined in consultation with the program director
- No more than 2 courses may be Directed Study

Note:

All candidates for graduate certificates must maintain a 3.00 average in courses for the certificate and submit a research paper to be read by at least one faculty member affiliated with the program. Students should notify the program director of their intention to graduate at the beginning of their final term. Students not in the Dietrich School must apply to graduate in A&S Graduate Studies. This certificate program is available only to students who are enrolled in other graduate degree programs at the University of Pittsburgh.

Gender, Sexuality, and Women's Studies Master's Certificate

Requirements for Master's-Level Certificate

The master's-level certificate requires 12 credits as detailed below:

- GSWS 2252 - THEORIES OF GENDER AND SEXUALITY
- At least one other course must be outside the candidate's home department
- At least two of the total courses must be in one field, determined in consultation with the program director
- No more than 1 course may be a Directed Study

Note:

All candidates for graduate certificates must maintain a 3.00 average in courses for the certificate and submit a research paper to be read by at least one faculty member affiliated with the program. Students should notify the program director of their intention to graduate at the beginning of their final term. Students not in the Dietrich School must apply to graduate in A&S Graduate Studies. This certificate program is available only to students who are enrolled in other graduate degree programs at the University of Pittsburgh.

Department of Geology and Environmental Science

The department offers programs that lead to the MS or PhD in Geology and Environmental Science and a Professional MS in Geographical Information Systems and Remote Sensing.. The principal objective of the graduate programs is to provide a broad and strong foundation upon which students may base careers. The PhD program is designed to educate scientists for basic or applied research and teaching. Graduate research may involve specialization in geology, geochemistry, geophysics, planetary science, and environmental science.

Contact Information

Department Chair: Josef Werne

Main Office: 200 Space Research and Coordination Center
412-624-8780

Fax: 412-624-3914

E-mail: gpsgrad@pitt.edu

www.geology.pitt.edu

Research and Facilities

Please visit www.geology.pitt.edu to find out more about research and analytical facilities available in the Department of Geology and Environmental Science

Admissions

Prospective graduate students must meet Dietrich School of Arts and Sciences requirements for entrance into graduate programs.

Financial Assistance

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, tuition scholarships, and loans.

Doctoral

Geology and Environmental Sciences, PhD

Students in MS and PhD programs have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. Most students enter the program with an undergraduate degree in the geosciences; however, students with degrees in other natural sciences or in engineering may be admitted in some cases. The department also offers a professional Master's degree in GIS/Remote Sensing. This non-thesis MS is patterned after the MBA degree and is designed to focus on the advanced concepts of GIS and remote sensing in order to give the student a competitive edge in the job market.

Requirements for the PhD

The minimum course requirement for the PhD degree is seventy-two (72) credits. A minimum of thirty-six (36) credits must be from formal courses and at least eighteen (18) of the credits must be taken within the Department of Geology and Environmental Science. Up to thirty (30) credits may be accepted from a Master of Science degree or graduate study toward the PhD from another institution. An initial evaluation, designed to explore the student's basic knowledge of the geological sciences and related fields, is required of all PhD degree candidates during their first term of residence.

A graduate student seeking the PhD degree must complete a Comprehensive Overview Examination. The written and oral comprehensive overview exams must be taken before the 7th semester of residence in the Ph.D. program, typically during third year. The written exam (i.e., the proposal or manuscript) must be passed before the oral exam. After passing both written and oral examinations (as well as the requirements of the preliminary exam), the student is admitted to "Ph.D. candidacy." Therefore, it is to the student's advantage to complete all requirements as soon as possible. However, the student does not need to complete all degree plan classes before the comprehensive overview exams. In particular, examining committees can require additional course work be taken as an outcome of the oral comprehensive overview exam.

Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.

Master's

Geographical Information Systems & Remote Sensing, MS

Curriculum & Course Information:

General Information: The GIS/RS Professional-M.S. program in the Department of Geology & Environmental Science is a multidisciplinary, multi-departmental, non-research degree. Notionally, designed to be completed in two academic years (plus one summer), the program length can be changed to slightly shorter or longer depending on the student's work limitations. The required courses are centered in the Geology and Environmental Science Department and focus on GIS and RS core proficiencies. Students are also required to take at least one course in the Schools of Business, Law, and Information Sciences. A large degree of flexibility is designed into the 41 credit program so that the student can tailor his/her coursework to fit specific future career goals, personal interests, and time constraints of work/family life.

First Semester:

Skill Sets: GIS and Remote Sensing fundamental principles & software use; communication proficiency; exposure to geospatial professionals

Total Credits: 10

Second Semester:

Skill Sets: advanced GIS/RS proficiency; introduction to computer programming

Total Credits: 9

Summer Semester:

Skill Sets: work experience utilizing geospatial analysis tools; compilation of digital dossier; oral/written presentation experience

Total Credits: 4

Third Semester:

Skill Sets: statistical data analysis; methodology of information science; introduction to business administration

Total Credits: 9

Fourth Semester:

Skill Sets: advanced GIS/RS proficiency; awareness of comparative law; personalized elective expertise; data mining & database management

Total Credits: 9

Geology and Environmental Sciences, MS

Students in MS and PhD programs have opportunities to participate in research programs encompassing many fields of current interest in geology, geochemistry, volcanology, geographic information systems (GIS), remote sensing, planetary geology, paleoclimatology, hydrology, and environmental science. In general, the research is interdisciplinary, collaborative, and employs techniques such as traditional field-based studies, advanced geochemical analytical work, sophisticated remote sensing and GIS analysis, and advanced computer modeling of natural systems. Most students enter the program with an undergraduate degree in the geosciences; however, students with degrees in other natural sciences or in engineering may be admitted in some cases. The department also offers a professional Master's degree in GIS/Remote Sensing. This non-thesis MS is patterned after the MBA degree and is designed to focus on the advanced concepts of GIS and remote sensing in order to give the student a competitive edge in the job market.

Requirements for the Master's Degree

The minimum course requirement for the MS degree is thirty (30) credits beyond the baccalaureate. A minimum of eighteen (18) credits must be from formal courses. At least twelve (12) of these credits must be numbered 2000 or higher and must be taken within the Department of Geology and Environmental Science. An initial evaluation, designed to explore the student's basic knowledge of the geological sciences and related fields, is required of all MS degree candidates during their first term of residence. Each MS candidate prepares a thesis demonstrating successful completion of the research project as well as competency in the methods and techniques of scientific investigation in the field of her/his area of specialization. The thesis should serve as a source of publishable material, and all MS students must present research results at a meeting of a national or international scientific organization. Each MS student publicly defends her/his thesis before a Thesis Committee consisting of at least three faculty members from the Department of Geology and Environmental Science. Complete descriptions of the most recent degree requirements are available at www.geology.pitt.edu.

Department of German

**German is currently not accepting graduate applications.*

The Department of German offers a PhD program that includes the MA degree as a required step toward the PhD. The program trains future scholars in German Studies and prepares them to be competitive on the national job market. It encourages interdisciplinary work and students are required to pursue a certificate or related area in programs such as Cultural Studies, Film Studies, Women Studies, European Studies, or in another related area.

Contact Information

Director of Graduate Studies: Randall Halle
412-648-2614
Fax: 412-624-6318
E-mail: rhalle@pitt.edu
<http://www.german.pitt.edu/>

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of German, 1518 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5909. E-mail: grmndept@pitt.edu.

For more on each of the following programs, visit <http://www.german.pitt.edu/graduate/>.

Admissions

All applicants apply for the PhD program. Applicants should have a BA or MA in German or a related field. Students with training in related fields will be considered for full graduate status if their background in German language and culture is sufficient to succeed in graduate-level courses. For admission to the PhD, students completing their MA at the University of Pittsburgh must pass a preliminary evaluation in their final semester of study. For students entering with an MA from another institution, this evaluation takes place by the end of their first year of study at the University of Pittsburgh.

Applications should include:

- an Application Form;
- a Statement of Intent (Please describe your intellectual background, research interests, and academic goals);
- 3 Letters of Recommendation;
- Official Transcripts from all undergraduate and graduate study (non-US degrees must be accompanied by a notarized English translation);
- an audio recording (Non-native speakers should supply a recording in which they 1) speak freely about a topic and 2) read formally a passage from a literary or academic text);
- a Writing Sample (a research paper or selection from a thesis of about 20 pages that offers an example of the applicant's ability to conduct research and provide evidence of strong writing skills. It may be in either English or German.);
- TOEFL scores (Required of Foreign Students: minimum score of 550 [paper-based test] / 80 [internet-based test]) or the IELTS administered by the University of Cambridge, Local Examinations Syndicate with a minimum score of 6.5 (taking the academic and reading modules); and
- an Application fee of \$50 (Please contact the Director of Graduate Studies if this represents a financial hardship).

Applicants are required to submit all materials for fall term admissions by January 2. Students who would like to be considered for non-teaching fellowships are encouraged to submit their applications before the New Year. Applications submitted after the deadline will be considered only if space is available. Applications are submitted online at app.applyyourself.com/?id=up-as.

Financial Assistance

Students with a high proficiency in oral German are eligible for teaching assistantships or teaching fellowships for up to five years (three years when entering with the MA). These assistantships/fellowships consist of full tuition scholarships and living expense stipends. Aid is guaranteed for the duration of the assistantship/fellowship provided the student remains in good academic standing and makes satisfactory progress toward the degree. Students may also apply for graduate tuition scholarships, Andrew Mellon Predoctoral Fellowships, the Lillian B. Lawler Scholarship/Fellowship, the Provost's Humanities Fellowships, the Fellowships in Cultural Studies, and Exchange Fellowships with the Universities of Augsburg and Bonn. A number of these fellowships are available for first-year graduate students. Interested candidates should submit their completed applications to the department by the beginning of January.

Faculty

<http://www.german.pitt.edu/people/>

Doctoral

German, PhD

Requirements for the PhD

The requirements for the PhD consist of: (1) at least 72 credits of course work, (2) a language requirement, (3) the PhD comprehensive examination, (4) the dissertation prospectus, (5) the dissertation, and (6) the completion of a certificate program or approved work in a related area. Specific details are:

- minimum 72 credits of course work, broken down as follows:
 - 30 credits from the MA
 - at least 12 seminars total (for students entering Pitt with an MA from another institution) / at least 18 seminars total (for students entering Pitt with a BA-seminars taken at the MA level count towards this requirement)
 - of these seminars, at least 6 seminars (for students with an MA from another institution) / at least 12 seminars (for students entering Pitt with a BA) should be taken in the German department.
 - at least 6 of the above seminars should be in certificate-related courses (see below).
 - at least 2/3 of the seminars taken must be taken for a letter grade;
- Language requirement: High level of oral proficiency in German (superior on OPI scale, 3 on ILR scale); reading knowledge of another language;
- Comprehensive Examination: A written examination, evaluated by a committee of 3 faculty members. Demonstrates the student's foundation in German culture from the Enlightenment to the present, as well as the student's ability to situate a specific focus within this larger context. The PhD comprehensive examination needs to be completed with an average grade of A-. The examination may be retaken only one time and needs to be retaken by the next academic term. Before completing the PhD comprehensive examination, students have to submit to their examination committee two research/seminar papers that demonstrate their scholarly potential;
- Dissertation Prospectus: 10-15 pages, submitted in the semester following the comprehensive examination. After approval by the doctoral committee, students are admitted to PhD candidacy, after which the student meets annually with the dissertation committee;
- Dissertation Defense: The dissertation must be approved by the dissertation committee after a public oral defense; and
- Completion of a certificate program or work in a related area (at least 18 credits). Approved certificates include Cultural Studies, Film Studies, and Women Studies, and West European Studies, and other related areas can be defined by the student in consultation with the Director of Graduate Studies (for example, a recently developed area of concentration is Philosophy and Literature).

Master's

German, MA

Requirements for the Master's Degree

The Master of Arts normally takes two years of study. The 30 credits include nine graduate seminars, at least six taken within the department, and a 3 credit MA project (between 35 and 50 pages long). All teaching assistants/fellows must successfully pass German 2970 as a basis for continuing financial support as a teaching assistant or fellow. In addition, all entering students must enroll in GER 2110 - INTRODUCTION TO LITERARY AND CULTURAL THEORY .

In addition to the satisfactory completion of courses, students must demonstrate a high level of proficiency in writing both in German and English by submitting for departmental approval at least one paper written in German and one paper written in English by the time of the preliminary evaluation. They must also demonstrate reading proficiency in an additional language by the end of their last term of study.

Department of Hispanic Languages and Literatures

The Department of Hispanic Languages and Literatures offers a five-year Doctor of Philosophy (PhD) with an en route Master of Arts (MA) sequence. Unlike other Spanish departments, we concentrate on Latin American Literature and Culture, including Brazil. Within that broader context, we also offer an interdisciplinary and interdepartmental PhD in film studies, and field specializations in Peninsular, Brazilian, and cultural studies.

Candidates for both the MA/PhD can also earn certificates in Latin American Studies, Cultural Studies, Film Studies, Global Studies and Gender, Sexuality, and Women Studies.

Contact Information

Department Chair: Elizabeth Monasterios
Main Office: 1309 Cathedral of Learning
412-624-2709

Fax: 412-624-8505
E-mail: elm15@pitt.edu
<https://www.hispanic.pitt.edu/person/elizabeth-monasterios>

For additional information regarding the department's graduate program, or responses to questions that are not answered elsewhere, please contact the University of Pittsburgh's Department of Hispanic Languages and Literatures' Graduate Administrator:

Michael Orbin
mio43@pitt.edu
(412) 624-5227
1301A CL

Admissions

Applicants must submit an online application, application fee of \$50, transcripts of all college-level work (along with notarized translations into English, if admitted), three letters of recommendation, a statement of academic goals, and a 15-30-page writing sample (in English, Spanish, or Portuguese; if submitting the sample in English, please also send us a short sample in Spanish).

Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) with a minimum score of 90 (with at least a score of 22 in all of the 4 sections of speaking, listening, reading, and writing), or the IELTS (administered by Cambridge University, Local Examinations Syndicate) with a minimum score of 6.5 in each of its four sections.

Completed applications for admission in the fall term must be received no later than January 18.

Financial Assistance

The department awards two types of financial assistance to incoming students: teaching assistantships (to applicants with no previous graduate studies) or teaching fellowships (to applicants who hold a MA degree), which involve teaching duties, and A&S fellowships, which do not. All students admitted receive financial assistance.

Students entering with a BA are eligible for financial aid in some combination of forms (Teaching Assistantship, A&S Fellowship, Mellon Predoctoral Fellowship, etc.) for two years for the *en route* MA and three additional years for the PhD, for a maximum of five years of support. Students entering the PhD program with an MA from elsewhere are eligible for up to five years of financial aid, under certain conditions.

Duration of the Program

It is expected that the MA/PhD program will take five years to complete. As of Fall 2005, incoming students who are offered financial assistance in the form of Teaching Assistantships, Teaching Fellowships or non-teaching University fellowships are, assuming that satisfactory academic progress is maintained, entitled to five (5) years of support, whether or not they already have an MA degree when they enter our graduate program. However, students with an MA from another university can elect to receive only four (4) years of funding and will be entitled to transfer up to 24 credits upon successfully passing the MA Comprehensive/PhD Preliminary examinations during their fourth semester. The decision to do so must be submitted to the departmental graduate office in writing by the end of the first week of their second term in graduate program (normally first week of January).

Faculty

<http://www.hispanic.pitt.edu/people/faculty>

Joint Degree

Hispanic Languages and Literatures, MA/PhD

Requirements for the PhD with En Route MA

The en route MA requires a minimum of 30 credits; 24 credits must be in substantive courses in the department, meeting major field and minor field requirements; the remaining 6 credits can consist of any combination of courses taken outside of the department (including transfer credits), a maximum of 1 Independent Reading and 1 Directed Study course.

Teaching assistants and teaching fellows new to the department are required to take a course in teaching methodology and language learning to assist them in teaching, unless a waiver is obtained.

In addition to the minimum of 30 credits, during the fourth year of full-time study (or its equivalent):

- Students must complete a long paper in the department, which is graded and serves as one part of the MA Comprehensive/PhD Preliminary examination.
- Students must also sit for the two-day MA Comprehensive/PhD Preliminary examination

Including the MA-level work, a minimum of 72 credit hours must be attained for the PhD. Students who have received the en route MA and are working toward the PhD in the department must take a total of 48 credits of substantive courses in the department. The remaining 24 credits may consist of courses taken outside of the department, credits transferred from other institutions, directed study, or PhD comprehensive exam/overview. Up to a maximum of 12 credits of PhD dissertation research credits are permitted to count toward these 24 credits.

Students who enter the department with an MA in Spanish or a related field from another institution must complete 30 credits of substantive course work out of the 72 total credits required for the PhD. The remaining 42 credits can be distributed among credits transferred from the institution from which they earned their MA's (normally, up to 24 are allowed, in exchange for the fifth year of funding), courses taken in other departments at the University of Pittsburgh, directed study and PhD comprehensive exam/overview credits, and up to 12 credits of PhD dissertation research.

PhD Preliminary Exam: Students who enter the department with an MA in Spanish from another institution must pass the two-day PhD Preliminary examination in the fourth term of graduate study in the department, after which they can petition for the transfer of credits and continue on for the PhD.

Language Requirement: Candidates for the PhD degree must give evidence of their ability to read a third language (Portuguese, French, Italian, etc.) prior to presenting their dissertation proposal. The Department strongly encourages the learning of the Portuguese language.

PhD Comprehensive Exam/Dissertation Overview: After completing 60 credits of coursework and fulfilling the Portuguese requirement, students take the PhD Comprehensive exam made up of questions based on their proposal for doctoral research, which must also be defended before their proposed doctoral committee. Upon successful completion of this two-step exam process, the student is formally nominated to candidacy for the doctoral degree.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community. The dissertation must be presented in English unless prior permission is obtained for it to be presented in a language other than English.

Department of History

The Department of History, which offers the degree Doctor of Philosophy (PhD), is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. The graduate program provides training in historical research and teaching to students who wish to find careers in colleges, universities, and other settings where the skills of the historian can be used. To advance this purpose, the department encourages a climate of intellectual inquiry and active research that embraces graduate students and faculty members alike. The hallmark of the program is the high measure of independence and flexibility it allows students in shaping a curriculum that meets their needs, within the limits of faculty expertise and available resources.

Director of Graduate Studies: Michel Gobat (mgobat@pitt.edu)
Phone: 412-648-7467
Graduate Administrator: Paris Yamamoto (pay13@pitt.edu)
www.history.pitt.edu

Admissions

Admission to the graduate program in history is highly competitive. Candidates must present a career statement, a sample of their written work on a historical topic, undergraduate and/or graduate transcripts and two letters of recommendation. Test of English as Foreign Language scores are required of all applicants whose primary language is not English. Students interested in the graduate program should contact the graduate

administrator at the University of Pittsburgh, Department of History, Pittsburgh, PA 15260; by e-mail: **Paris Yamamoto** (pay13@pitt.edu); or apply online at app.applyyourself.com/?id=up-as.

Financial Assistance

The department offers funding to most of its graduate students through a mix of teaching assistantships, teaching fellowships, departmental fellowships, and research assistantships. If students are admitted to program with funding, the University waives tuition fees and offers health benefits or provisions for benefits. While in the program, students have to opportunity to apply for a variety of non-teaching fellowships provided by the University of Pittsburgh or national and international organizations. In addition to the teaching and non-teaching fellowships, the History Department offers summer research funding to graduate students on a competitive basis, which allows students to conduct archival research or language training within the US or abroad. The funding the University of Pittsburgh provides to graduate students is competitive and covers the costs of a graduate student living in Pittsburgh.

Students specializing in East Asian, Latin American, Russian and East European, and Western European history are also eligible to apply for fellowships and research grants offered by the University of Pittsburgh's University Center for International Studies (UCIS).

Degree Requirements

The minimal requirements for the degrees established by the Graduate Faculty of the University and by Dietrich School of Arts & Sciences A&S Graduate Studies, as described elsewhere in this bulletin, should be read in conjunction with the specific departmental requirements for these degrees in the following sections.

Doctoral

History, PhD

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing a PhD degrees.

Requirements for the PhD

Prerequisite for admission is a Master of Arts in History or equivalent preparation (plus approval, for those previously enrolled in the department). Students entering the program with an MA from another institution must pass a preliminary examination at the end of the first year in the program. They must complete 9 credits in order to sit for the one-hour oral examination.

The coursework and comprehensive exam portion of the PhD program should take no more than one years beyond the MA. Required doctoral coursework includes successful completion post-MA of two graduate courses in History and the completion of the department pedagogy program.

Breadth Requirement: Ph.D. students entering the program with a B.A. must fulfill the Breadth Requirement by the end of their fifth year. This requirement is intended to help students think more broadly about their dissertation and intellectual trajectory as well as future career paths. It may be fulfilled as follows: a) a second foreign language; b) two skill-based courses agreed-upon with their advisor including but not limited to statistics, digital humanities, oral history/ethnography, and computer programing; c) two courses agreed-upon with their advisor that will permit students to enhance their knowledge in an interdisciplinary area including Gender, Sexuality & Women's Studies, Cultural Studies, or an area of the student's design; or d) in consultation with the DGS and their advisor, 6 credit hours or the equivalent accrued from internships and/or courses designed to enhance students' ability to utilize their professional skills in diverse career environments.

Comprehensive Exam:

For students entering with a BA, the comprehensive exam needs to take place by February 1 of their third year. At the end of their first year, students must meet with their advisor and the DGS to: a) constitute a comps committee consisting of three members, all of whom need to have Graduate Faculty status; and b) identify any coursework completed in their first year that could be included in the comps portfolio. At the end of their second year, students and their full comps committee will agree upon the contents of the comps portfolio that will form the basis of the oral exam.

Students will work with faculty members who are members of the Graduate Faculty to develop expertise in: a regional field (Asia, Europe, Latin America, or United States); and a transregional or global field defined by the student in consultation with their advisor(s). Students may fulfill this

requirement in one of the following ways: a) a field in world or global history; b) a field in a transregional history such as Atlantic history or Eurasian history; or c) a thematic field with transregional scope such as gender or empire.

The portfolio will consist of: a) two to three historiographic essays in the regional field as well as a bibliography of 40-50 books; b) two to three historiographic essays in the transregional or global field as well as a bibliography of 30-40 books; and c) a teachable undergraduate course proposal that demonstrates students' ability to translate their knowledge of the historiography and recent research trends in a given field into the composition of an undergraduate course.

Students complete the comprehensive exam through an oral examination, which will take place no later than February 1 of their third year. The oral examination will be a maximum of two hours in duration, and should focus on the portfolio. Students should be able to discuss the essays, the bibliographies, and the course proposal.

Dissertation overview: After having selected a suitable dissertation topic in consultation with their advisor, students will present a written overview to their Ph.D. committee describing the purpose, scope, and method of the proposed study and the sources upon which it will be based. A PhD committee is composed of at least four members, all of whom must be members of the Graduate Faculty. There must be three graduate faculty members from the candidate's department and at least one graduate faculty member external to the candidate's department. With the acceptance of this prospectus at the overview examination and the approval of the assistant dean of graduate studies, the student is formally admitted to candidacy for the PhD.

Dissertation defense: The doctoral thesis, directed and evaluated by the student's Ph.D. committee, is expected to demonstrate the student's capacity to carry out independent, original research. Only if the dissertation is judged to demonstrate such competence, after formal defense in a final oral examination, does the department recommend the awarding of a degree.

For further details regarding the graduate program in history and the specific exam requirements, please see the latest version of the [Handbook of the Graduate Program in History](#), which can be downloaded from the History Department Website.

Master's

History, MA

The graduate program in history is committed to training area specialists with a global perspective. Our students learn how to research, interpret and teach the histories and historiographies of particular places from comparative, cross-cultural, transnational and global perspectives. Close cooperation with the interdisciplinary programs in Latin American Studies, Russian and East European Studies, West European Studies, and Asian Studies, coordinated under the University Center for International Studies, strengthen the international orientation of the program, with graduate students from Europe, Asia, and Latin America joining American students pursuing a PhD degrees.

Requirements for the Master's Degree

While the History Department does not offer a terminal Master's Degree, for students admitted with funding, graduate students get the Master's Degree while working towards their PhD. The requirements for being awarded the Master of Arts in history should be met within two years. 30 credits are required for the degree. Of these 30 credits, only 6 may be in Arts and Sciences courses numbered 1002 through 1999 series- these are undergraduate courses-subject to the approval of the student's advisor and the Director of Graduate Studies, but students are encouraged to take as much of their work as possible at the graduate seminar level. Students must take six credits in seminars or directed studies in transregional or global fields (the six credits may be in different transregional/global fields); and six credits in seminars or directed studies in a regional field (Asia, Europe, Latin America, or the United States). In addition, students must take three credits of graduate-level coursework outside of the discipline of history.

First Research Tool: The Master's degree requires the completion of the first research tool, which consists of reading proficiency in one foreign language. Students select, in consultation with their advisor, the language most useful to their specialization. Students are urged to complete language preparation before entering graduate school, not only to lighten their workload, but also because some seminars require the use of a second language.

Research paper: To complete their MA degree, students write a research paper of approximately 10,000 words, which is kept as part of their permanent record and is considered equivalent to a master's thesis. This paper, normally developed must be based on original research and should be potentially publishable.

MA committee: In consultation with their advisor, students create a three-person committee for their M.A. examination, usually chaired by their advisor. At least two of the committee members must be members of the Graduate Faculty. Before students can sit for their M.A. exam, the chair of the M.A. committee must approve the final version of the research paper.

MA examination and admission to the Ph.D. program: The M.A. examination will be a one-hour oral examination. Questions will be based on the M.A. research paper. At the conclusion of the examination, the committee will inform the student of its decision as to whether or not it recommends that the student be awarded the M.A. degree. If the student has expressed a desire to enter the Ph.D. program, the committee will also make a determination as to whether or not it recommends admission into the Ph.D. program. At the earliest opportunity, the M.A. committee's evaluation of the examination must be reported to the department, which must approve admission into the Ph.D. program.

Department of History and Philosophy of Science

The graduate program in the history and philosophy of science offers MA and PhD degrees through a combination of coursework and dissertation research. The department also offers an area of concentration in classics, philosophy and ancient science. The department supports scholarship in the history and philosophy of general science and in history and philosophy of particular sciences. It has special strengths in the history and philosophy of physical, biological, social, cognitive and neurosciences, and in ancient and 17th-century science. See <http://www.hps.pitt.edu/graduate/areas.php>.

Contact Information

Department Chair: Michael Dietrich
Main Office: 1101 Cathedral of Learning
412-624-5896
Fax: 412-624-6825
E-mail: mdietrich@pitt.edu
www.hps.pitt.edu

Admissions

Applicants for admission to the graduate program in history and philosophy of science will be expected to have a suitable undergraduate degree and to have some knowledge of the natural or social sciences. Applications are online. The deadline for completed applications is January 10. While the department awards both PhD and MA degrees, virtually all students are admitted into the PhD program.

Financial Assistance

Students in the PhD program are supported by fellowships or teaching assistantships/fellowships during their first six (6) years. The rates are set annually by the University. The department does not offer financial support to non-continuing MA students.

Degree Requirements

The graduate program consists of a series of seminars (approximately four to six are offered each term). These range from general surveys of the field and methods of research to specialized research seminars on selected topics in history and philosophy of science. These courses are divided into three areas:

- Area 1: Core sequence: a three-term introduction at the graduate level to history and philosophy of science
- Area 2: History of science
- Area 3: Philosophy of science

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

History and Philosophy of Science, PhD

The department offers a comprehensive program of study leading to the PhD. It combines core and elective seminars with more advanced, supervised study and encourages continued study of a particular science outside the department. All periods of the history of science are supported, including ancient, and 16th century to present science; as is work in general philosophy of science (confirmation, explanation, realism, scientific change, etc.) and in the philosophy of particular sciences (biology, physics, psychology, cognitive science, social sciences, etc.).

PhD Degree Requirements:

A minimum of 72 credits with an MA in history and philosophy of science or completion of MA requirements.

1. Further distribution of studies requirements: At least nine hours at the 2000 level, in one of the following:
 - Philosophy, exclusive of philosophy of science and logic
 - History, exclusive of history of science
 - A field of natural sciences, social science, or computer science
(courses taken toward the MA degree may be counted toward the requirement for the PhD)
2. Proficiency in logic (equivalent to PHIL 2499)
3. Language requirement: Good reading knowledge of one foreign language (Latin, Greek, German, French, or approved substitute). The foreign language exam must be passed before the student completes the comprehensive requirements.
4. Satisfactory fulfillment of the comprehensive requirements, which are:
 - Core seminar examinations: A pass in end-of-term examinations in the two history of science core seminars and the philosophy of science core seminar.
 - Students must submit a research paper in the history of science and a research paper in the philosophy of science. Both must pass at the PhD level.
5. Submission of a significant and acceptable dissertation on a topic in history and philosophy of science.
6. All students must acquire some supervised teaching experience during their tenure at the University.

These requirements are specific departmental requirements, in addition to the general requirements for the MA and PhD degrees laid down by the Graduate Dietrich School of Arts and Sciences.

Master's

History and Philosophy of Science, MA

MA Degree Requirements

A minimum 30 credit hours are required for the degree distributed as follows:

M.A. degree requirements:

A. Distribution-of-Studies Requirement:

1. Nine hours from Area 1 (Core Seminars). MA students must pass the end-of-term examination in all three core seminars. (See Section III E.1.)
2. Fifteen hours from Areas 2 and 3, with at least six hours in each area.
3. Six hours of Research Paper credits.

B. Language Requirement: Good reading knowledge of either French, German, Latin, Greek, or approved substitute language. (Language acquisition courses cannot count toward the degree).

C. Research Paper Requirement: Students must submit a research paper in the history of science and a research paper in the philosophy of science. Evaluations of papers will be limited to a master's pass-fail. A master's pass on both papers is required for the M.A. degree.

D. Course Credit Requirement: A minimum of 30 credit hours at the 2000 level.

Department of History of Art and Architecture

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

We strongly encourage applicants to explore our web site (www.haa.pitt.edu) for more information on faculty members, graduate program requirements, and the application process. Our program emphasizes learning and innovative research through our Constellations framework, which fosters faculty-student collaboration in the classroom and beyond on themes (such as "Visual Knowledge," "Agency," and "Environment") that inform the discipline's most adventurous and generative work. While our students acquire specialized knowledge of a particular art-historical subfield, they also produce conceptually ambitious and methodologically innovative research for their PhD. We urge all prospective students to contact a potential advisor (or advisors) from among our graduate faculty before applying to discuss your interests and find out more specific information about how they can be accommodated.

Contact Information

Ian A. Bennett
Graduate Administrator
E-mail: iab5@pitt.edu

Admissions

Applicants for admission must submit: an online application, copies of transcripts of all college-level work, three letters of recommendation, a personal statement outlining the applicant's intellectual and professional goals, and a sample of academic work that demonstrates the applicant's scholarly ability.

Applicants are expected to have successfully completed four courses of art or architectural history at the undergraduate level. However, exceptions can be made for other courses and competencies that provide students with a grounding in the visual and/or spatial arts.

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD. Students in coursework have opportunities to acquire additional language skills both on campus and beyond. Our program embraces global perspectives on art and architecture, and we welcome applicants who will contribute diverse language skills that are essential to this mission.

Applicants from outside the U.S. must meet University of Pittsburgh requirements for English language proficiency scores. Please consult the International Students page for Graduate Study in the Dietrich School of Arts and Sciences regarding minimum requirements on TOEFL, IELTS, and Duolingo English Test scores for admission.

Applications must be received by December 15. Applicants are notified of their status in spring, and admitted students enter the program the following fall.

Financial Assistance

The department offers five-year aid packages to all its admitted students. These packages consist of full tuition scholarships and living expense stipends. Aid is guaranteed for the duration of the package provided the student remains in good academic standing and makes satisfactory progress toward the degree. Aid takes the form of teaching and research assistantships, including a variety of positions at the University Art Gallery (<https://uag.pitt.edu/>), the Visual Media Workshop (<http://www.haa.pitt.edu/visual-media-workshop>), and supporting the department's Collecting Knowledge Pittsburgh (<https://www.haa.pitt.edu/ckp>) initiative. All incoming students receive a fellowship free of teaching and other employment duties for their first year and our students have a strong record of competing successfully for internal and external fellowships as they continue in the program. The department is committed to supporting all students regardless of citizenship status or country of origin. For more financial aid information, please consult our website: <http://www.haa.pitt.edu/graduate/financial-aid>.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Film and Media Studies - History of Art and Architecture Concentration, PhD

Degree Requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in history of art and architecture or film and media studies from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD. Students who have been admitted into the Film and Media Studies PhD with a concentration in History of Art and Architecture must satisfy degree requirements for both programs (for more information please visit the Film and Media Studies website).

For those entering without an MA, all graduate coursework completed in our program before conferral of the MA degree counts toward our PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA. Students entering with an approved MA from another institution may transfer 24 credits; they must also complete nine graduate-level classroom (i.e. seminar or lecture) courses during their first two years in our program. Graduate students without an MA must complete three additional graduate-level classroom courses (for a total of twelve). After required classroom courses have been completed, the remaining required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/9 graduate-level classroom courses (for students with an approved MA) are part of this requirement. Students typically complete this requirement in the first two years. The normal course load is 3 courses per semester (9 credits).

The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year.)
- ENGFLM 2451 - FILM HISTORY/THEORY 1 and ENGFLM 2452 - FILM HISTORY/THEORY 2 (to be taken in any order).
- FILMG 2905 - PROSEMINAR IN FILM AND MEDIA STUDIES .
- Four or five HAA graduate seminars (depending on MA status)
- Three or five elective courses (depending on MA status), in HAA or in other departments

The remaining credits may be amassed through various independent study options and additional courses if necessary.

In line with the department's research Constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in a specific subfield. In consultation with the student's individual advisor(s) and Director of Graduate Studies, students should select their courses with these two objectives in mind.

Languages

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam.
- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better in the final semester.
- completion of two graduate level reading courses in a research language or the second level of a two-part tiered sequence of reading courses (e.g., German for Reading 2), taken at the University of Pittsburgh, with a grade of B+ or better in the final semester.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as early in their time in the program as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an approved MA degree in history of art and architecture or film and media studies at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (except for those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper, including a one-page abstract.
- all faculty evaluations of the student's course work to date.
- a one-page form that summarizes their proposed dissertation field and lists the course requirements they have met and relevant research languages they have passed. This document must be approved and signed by the student's advisor and certified by the Director of Graduate Studies.

The graduate faculty then reviews the dossier to make sure the student's work demonstrates the ability to complete a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the graduate faculty makes a positive determination, the MA is granted, and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the graduate faculty by majority vote deems the MA paper creditable.

Preliminary Exam

In the first semester (for students entering with an approved MA) or fifth semester (for students entering without an approved MA), the first of the student's annual PhD committee meetings is held. The student presents a three-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the student's committee reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams

Doctoral students normally take their comprehensive exams in the third or fourth year (or second or third year if they are entering with an approved MA), after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam evaluation. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of their subfield(s) of specialization to carry out the dissertation. The student should be able to articulate the state of research in their subfield(s) and conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by a dissertation committee consisting of four members, including one faculty member from outside HAA.

Teaching and Mentoring Portfolio

Graduate students must produce portfolios that demonstrate their proficiency as teachers and mentors of undergraduate students to advance to candidacy. Students will develop the components of the portfolio in the context of HAA 2970 - TEACHING OF ART HISTORY. Thereafter, they should include the teaching portfolio with the materials they send to their PhD committee for their annual meetings. PhD committees give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves and as they prepare for the job market.

Dissertation

The dissertation is an in-depth research project designed to make an original scholarly contribution to the student's subfield. Our department accepts modifications to the traditional ca. 200-page manuscript format. For example, students in our program have graduated with dissertations that include, in addition to a shorter written component, digital humanities and/or curatorially related dimensions. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can serve as part of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

Once the student completes the dissertation, they must pass a defense, normally a two-hour conversation with the committee, including the external faculty member.

Time to Degree

The PhD degree is designed to take five to seven years to complete, depending on the student's subfield. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research.

For more details on degree requirements, the student-advisor relationship, and other related matters, please see the HAA's Graduate Program Handbook (<https://www.haa.pitt.edu/graduate/handbook-resources>).

History of Art and Architecture, PhD

Degree Requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

For those entering without an MA, all graduate coursework completed in our program before conferral of the MA degree counts toward our PhD requirements. Doctoral students must complete 72 credit hours, of which 30 must be completed in the first two years for the MA. Students entering with an approved MA from another institution may transfer 24 credits; they must also complete nine graduate-level classroom (i.e. seminar or lecture) courses during their first two years in our program. Graduate students without an MA must complete three additional graduate-level classroom courses (for a total of twelve). After required classroom courses have been completed, the remaining required credits for the PhD may be fulfilled through additional coursework or independent studies directed toward comprehensive exam and prospectus preparation, and dissertation research. The final requirement for the degree is the successful defense of the dissertation.

Course work

The PhD requires a total of 72 credits.

12 graduate-level classroom courses (for students without an MA)/9 graduate-level classroom courses (for students with an approved MA) are part of this requirement. Students typically complete this requirement in the first two years. The normal course load is 3 courses per semester (9 credits). The courses must include:

- HAA 2005 - METHODS RESEARCH AND SCHOLARSHIP and HAA 2007 - HISTORIOGRAPHY (Methods and Historiography are alternated every other fall semester and must be taken in the student's first and second year.)
- Four or five HAA graduate seminars (depending on MA status)
- Three or five elective courses (depending on MA status), in HAA or in other departments

The remaining credits may be amassed through various independent study options and additional courses if necessary.

In line with the department's research Constellations, students are expected to take courses on many different historical and geographical topics, while at the same time acquiring in-depth knowledge and expertise in a specific subfield. In consultation with the student's individual advisor(s) and Director of Graduate Studies, students should select their courses with these two objectives in mind.

Language Requirement

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

Certification in research languages may be achieved in the following ways:

- through passage of a departmentally administered exam.
- completion through the intermediate level (typically the third semester) of a language, taken at the University of Pittsburgh during the period of the student's graduate study, with a grade of B+ or better in the final semester.
- completion of two graduate level reading courses in a research language or the second level of a two-part tiered sequence of reading courses (e.g., German for Reading 2), taken at the University of Pittsburgh, with a grade of B+ or better in the final semester.
- completion of an accredited language immersion program, in the United States or abroad.
- certification of language qualification attained at another accredited graduate degree program.

Graduate students will establish a schedule for completion and certification of the language requirement in consultation with their academic advisors. All students are strongly encouraged to be certified in both languages as early in their time in the program as possible. Pre-MA students must be certified in at least one of the two languages required for the PhD by the fourth semester review if they wish to continue in the PhD program. No student will become ABD without completing language requirements.

The MA Paper and Degree

In the case of students who did not earn an MA degree in history of art and architecture at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate-level credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

Fourth Semester Review

In their fourth semester, all students (except for those who entered with an MA) undergo a review for continuation in the PhD program. Students submit a dossier including:

- their completed MA paper, including a one-page abstract.
- all faculty evaluations of the student's course work to date.
- a one-page form that summarizes their proposed dissertation field and lists the course requirements they have met and relevant research languages they have passed. This document must be approved and signed by the student's advisor and certified by the Director of Graduate Studies.

The graduate faculty then reviews the dossier to make sure the student's work demonstrates the ability to complete a dissertation successfully. More specifically, the faculty looks for evidence of ability to carry out original research in the student's field, to master secondary literature, to frame an original argument, and to write lucidly.

If the graduate faculty makes a positive determination, the MA is granted, and the student is officially approved to continue in the PhD program. All graduate coursework done to this date counts toward the PhD degree. A dissertation committee is named, consisting of the student's advisor and two other faculty members drawn from HAA.

If the faculty determines that the student's work does not merit continuation in the PhD program, the student may be granted a terminal MA degree providing they have met the MA requirements and the graduate faculty by majority vote deems the MA paper creditable.

Preliminary Exam

In the first semester (for students entering with an approved MA) or fifth semester (for students entering without an approved MA), the first of the student's annual PhD committee meetings is held. The student presents a three-page description of the dissertation topic, and the student and committee together decide on comprehensive exam areas and procedures. Once the student's committee reviews and approves the dissertation topic and exam areas, the "prelim" is passed.

Comprehensive Exams

Doctoral students normally take their comprehensive exams in the third or fourth year (or second or third year if they are entering with an approved MA), after they have completed their coursework requirements. While a committee member from outside the department is not required at this stage, it is recommended to have an outside member participate both in the formulation of the exam contents and in the exam evaluation. The comprehensive exams have two broad goals. The first goal is to test whether the student has sufficient knowledge of their subfield(s) of specialization to carry out the dissertation. The student should be able to articulate the state of research in their subfield(s) and conversant with current trends in scholarship. The second goal is to test whether the student has sufficient knowledge to teach one or more broadly defined areas.

Upon passing the comprehensive exams, the student prepares a dissertation prospectus that must be approved by a dissertation committee consisting of four members, including one faculty member from outside HAA.

Teaching and Mentoring Portfolio

Graduate students must produce portfolios that demonstrate their proficiency as teachers and mentors of undergraduate students to advance to candidacy. Students will develop the components of the portfolio in the context of HAA 2970 - TEACHING OF ART HISTORY. Thereafter, they should include the teaching portfolio with the materials they send to their PhD committee for their annual meetings. PhD committees give further feedback to the student as appropriate, especially as the student's thinking about pedagogy evolves and as they prepare for the job market.

Dissertation

The dissertation is an in-depth research project designed to make an original scholarly contribution to the student's subfield. Our department accepts modifications to the traditional ca. 200-page manuscript format. For example, students in our program have graduated with dissertations that include, in addition to a shorter written component, digital humanities and/or curatorially related dimensions. Ideally, students begin to focus their dissertation topic early in their graduate career, within the first two years. The MA paper can serve as part of the final dissertation. As soon as possible, students should design their curriculum to enrich and advance their dissertation project.

Once the student completes the dissertation, they must pass a defense, normally a two-hour conversation with the committee, including the external faculty member.

Time to degree

The PhD degree is designed to take five to seven years to complete, depending on the student's subfield. Actual time to degree varies depending on many factors, including the language preparation and/or specialized skills needed to conduct dissertation research.

For more details on degree requirements, the student-advisor relationship, and other related matters, please see HAA's Graduate Program Handbook (<https://www.haa.pitt.edu/graduate/handbook-resources>).

Master's

History of Art and Architecture, MA (for admitted PhD students only)

General requirements

The University of Pittsburgh's PhD program in History of Art and Architecture (HAA) provides close mentoring from internationally renowned scholars dedicated to maintaining and building on the program's tradition of excellence and inclusivity. Students in our graduate program enjoy five years of fully funded support regardless of whether they enter with a BA or an MA degree. Because ours is solely a PhD program, we do not admit applicants seeking a terminal MA degree, nor do we offer advanced degrees in Architectural Practice or Design. Students entering without an MA in the discipline from another approved institution are expected to complete an MA degree in the second year of our program as a stepping-stone in their progress toward the PhD.

Six credits (two courses) may be transferred from another approved graduate program.

Requirements

In the case of students who did not earn an MA degree in history of art and architecture at another institution prior to entering our program, the MA is typically granted at the end of the second year of study as a required step toward the PhD. The MA degree requires a total of 30 graduate-level credits including:

- HAA 2005 (Methods).
- HAA 2007 (Historiography).
- a minimum of 3 additional HAA graduate seminars.
- One graduate-level cognate course outside HAA.
- HAA 2000 Research and Thesis MA Degree (up to 6 credits).
- at least one research language certified.
- an MA paper passed by majority vote of the graduate faculty.

Language Requirement

Competency in languages other than English is necessary for advanced degree work in our program. Admitted students are expected to demonstrate competency in a research language other than English before or shortly after beginning coursework; the language chosen should be appropriate for

their area of study. Native and/or heritage speakers of a language other than English fulfill this requirement if their competency sufficiently facilitates research in their chosen field. All other applicants are strongly encouraged to have at least two years/four semesters of college-level instruction in the research language, with a grade of B+ or better, or equivalent knowledge prior to admission. Certification in a second research language relevant to the student's area of study and professional goals is expected for award of the PhD.

The MA Paper

The MA paper is a 25-to 45-page paper with an original argument based on original research. The paper functions as a demonstration of the student's ability to carry out research and writing of PhD caliber. Ideally, it will be based on a seminar paper written in the first year, which is then reworked and polished over the following summer and fall. In some cases, with the approval of a faculty advisor, the student may embark on a new paper not already written in a seminar.

It must be submitted by a deadline in January of the student's fourth semester.

Interdisciplinary Programs

Doctoral

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

<http://cmispitt.edu/course-requirements>

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

<http://cmisp.pitt.edu/course-requirements>

A minimum of 24 credits of graduate level courses from categories I - IV will be required. It is anticipated that students entering the program will be able to complete the six core courses in categories I - III in their first year and the concentration requirements in the second year.

Computational Modeling and Simulation Seminar Series: All students enrolled in the program are expected to attend the Computational Modeling and Simulation seminar program each semester they are enrolled. Students will receive one credit for each term they are enrolled in the Seminar Series. Seminars will be held typically twice per month, during the academic year. Each enrolled student will be required to give a seminar in this series, at least six months before the PhD defense.

University Credit Requirement: All students in the program must satisfy the university's requirement of a minimum of 30 credits for an MS. At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Interdisciplinary Studies - Medical Informatics Concentration, PhD

Requirements for the PhD

Students pursuing the Doctor of Philosophy degree in ISP must complete a program of study approved by an advisory committee of faculty. A total of 72 graduate credits are required for this degree. This program must include:

(a) The required courses:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- ISSP 2030 - ADVANCED TOPICS IN INTELLGENT SYSTEMS
- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC or
- CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) Two courses from the following:

- ISSP 2170 - MACHINE LEARNING or
- CS 2750 - MACHINE LEARNING
- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG or
- CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

(c) A theory course from both A and B

A

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2

- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

B

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

(d) an additional course from either A or B

(e) four advanced courses numbered 2000 or higher

(must be approved by advisor)

(f) GPA of 3.0 or better

(g) Successful defense of a proposal and doctoral dissertation

Concentration Requirements

<http://www.isp.pitt.edu/about/degrees>

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

Master's

Computational Modeling & Simulation, MS

Requirements

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Interdisciplinary Studies - Medical Informatics Concentration, MS

Requirements for the Master's Degree

Overlapping with ISP requirements of the Dietrich School of Arts and Sciences (A&S). Students should speak with their advisors to make sure they complete both sets of requirements.

Students pursuing the Master of Science degree in ISP must complete a minimum of 24 credits including:

(a) First year students are encouraged, but not required, to take the following:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS (fall)
- ISSP 2030 - ADVANCED TOPICS IN INTELLGENT SYSTEMS (spring)
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

(b) The required courses:

- ISSP 2160 - FOUNDTNS OF ARTIFICIAL INTELLGNC or

Two courses from the following:

- ISSP 2170 - MACHINE LEARNING or
- CS 2750 - MACHINE LEARNING

- ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG or
- CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG

(c) A theory course from both A and B

A

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

B

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

(d) Four advanced courses numbered 2000 or higher

(must be approved by advisor)

(e) GPA of 3.0 or better

(f) MS-Level Project

Approved by the faculty after an oral prospectus presentation, involving significant research, design, or development work and a written report.

Concentration Requirements

<http://www.isp.pitt.edu/about/degrees>

The curriculum assumes that a student already has training in a health care field. If this is not so the faculty will select a set of courses that teaches the student basic medical knowledge, and the student may take these courses as electives.

Department of Linguistics

The Department of Linguistics offers the degrees of Master of Arts and Doctor of Philosophy in both linguistics and Applied Hispanic linguistics, with areas of concentration in applied linguistics and Sociolinguistics. The MA Program requires a minimum of 10 courses (30 credits). The Dietrich School of Arts and Sciences requires a minimum of 72 credits beyond the baccalaureate for a PhD degree.

Master of Arts in Linguistics

Doctor of Philosophy in Linguistics

Master of Arts and Doctor of Philosophy in Hispanic Linguistics

Doctor of Philosophy in Sociolinguistics

Students may fulfill requirements for the TESOL Certificate in conjunction with their graduate study or as a stand-alone post baccalaureate certificate.

Contact Information

Department Chair: Scott Kiesling
Main Office: 2816 Cathedral of Learning
412-624-5900
Fax: 412-624-6130
E-mail: lingpitt@pitt.edu
www.linguistics.pitt.edu

The best and most current information is at the department website. Potential applicants are encouraged to thoroughly explore this site for further information. **See especially the Graduate Handbook.**

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Linguistics, Graduate Administrator, 2816 CL, Pittsburgh, PA 15260. Phone: 412-624-6568. Fax: 412-624-6338.

In addition to graduate and undergraduate education in the field of linguistics, the Department of Linguistics is responsible for the following programs and centers:

Less Commonly Taught Languages Center
Robert Henderson Language Media Center
TESOL Certificate Program
English Language Institute (non-credit)

Admissions

In order to be admitted to graduate standing in linguistics, students must meet the admission requirements of the Dietrich School of Arts and Sciences and have at least two years, or the equivalent, of university-level study of a second language. The Graduate Record Examination is required for all applicants. PhD applicants must also submit samples of written work in linguistics. To be considered for financial aid, complete applications should be received by December 15. Applicants for Hispanic linguistics must be fluent in Spanish in addition to the above admissions requirements (determined by interview following review of other application materials).

Financial Assistance

Funding is mainly through teaching assistantships, while occasionally there are research assistantships through grant funding. There are two to five such teaching assistantships each year, usually involving some sort of research work and sometimes teaching or faculty-teaching support. Some of the aid offered by the department is in the form of teaching assistantships in the Department of Linguistics in the English Language Institute, which is offered for both MA and PhD students. There are about two new positions per year. For all assistantships, applicants whose native language is not English may be eligible for two or three of these positions. For all assistantships, applicants are ranked mainly on the basis of their academic qualifications, but relevant teaching experience or research can help. Students in the Hispanic linguistics program teaching Spanish language courses must be enrolled in Methodology for Teaching Spanish (SPAN 2307). There are a total of 6 funded positions in Applied Hispanic linguistics.

Besides assistantships, there are a limited number of predoctoral fellowships from the Andrew Mellon Foundation and Provost's Humanities Fellowship program, for which PhD applicants in linguistics are eligible. Applicants should realize that these are very prestigious fellowships, granted on the basis of a University-wide competition. Promising applicants are invited to apply based on their admissions materials. The application deadline is February 1. *For more information on these fellowships, see Fellowships and Traineeships in the A&S section of this catalog.*

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Linguistics, MA/PhD

The PhD programs in linguistics (also referred to as the MA/PhD program) combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

Required Core Courses for the PhD (all concentrations)

The following courses are required of all students in the PhD program. Students entering with an MA degree from another institution may petition to have coursework from that MA degree apply to the PhD degree at Pitt (see also the Preliminary exam requirement for students with an existing MA).

Courses normally required to be taken in the first year:

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2144 - RES METHODS IN APPLIED LING
- LING 2773 - MORPHOLOGY
- LING 2777 - SYNTACTIC THEORY
- LING 2579 - PHONOLOGY

Required courses that can be taken any time:

One course in sociolinguistics/language change.

- LING 2267 - SOCIOLINGUISTICS
- LING 2253 - PIDGIN AND CREOLE LANGUAGES

Required upper level course:

Choose one advanced level core course approved by the student's advisor and DGS or Chair.

Applied Linguistics PhD Course Requirements:

In addition to core requirements above.

Required Courses:

- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- A course in psycholinguistics or first language development
- A course in statistics
 - One of the following:
 - LING 2147 - CUR ISSUES IN SECOND LANG LRNG
 - LING 2149 - ADV SECOND LANGUAGE ACQUISITION

Hispanic Linguistics PhD Requirements:

In addition to core requirements above.

Required Courses:

- LING 2394 - SPANISH DIALECTOLOGY
- LING 2391 - PHONOLOGY OF SPANISH
- Two Special Topics courses in Hispanic Linguistics
- A course in statistics

Other Hispanic Linguistics requirements:

Entrance requirement: Advanced Low Proficiency in Spanish as measured by an OPI or equivalent. Students are also interviewed by faculty in Spanish during the admissions process.

In core courses, students are encouraged to work on topics in Hispanic linguistics and to use Spanish sources.

Further specialization within Hispanic Linguistics:

Students may wish to focus on Applied Spanish Linguistics or Spanish Sociolinguistics, but these are not official ARCOs. The following are suggested courses.

Applied Spanish Linguistics:

- Second Language Acquisition
- Approaches and Methods of TESOL
- Techniques and Procedures of TESOL

Spanish Sociolinguistics:

- Language Contact
- Discourse Analysis
- Variation Analysis

Sociolinguistics PhD Course Requirements:

In addition to core requirements above.

Required Courses:

- LING 2267 - SOCIOLINGUISTICS (if not already taken)
- LING 2441 - FIELD METHODS IN LINGUISTICS
- SOC 2102 - SOCIOLGCL THRY POST CLASSICAL
- A statistics course
- Two of the following:
 - LING 2761 - DISCOURSE ANALYSIS
 - LING 2274 - LANGUAGE CONTACT
 - LING 2269 - CURRN ISSUES IN SOCIOLINGUISTICS
 - LING 2860 - INTRO TO HISTORICAL LINGUISTICS

Other MA/PhD Requirements:

Language requirement:

Native speakers of English:

1. three semesters of a language taught at the college level plus
2. at least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Non-native speakers of English:

1. English-language proficiency
2. At least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic.

Candidates for the Hispanic Linguistics ARCO:

1. English-language proficiency
2. At least one semester with a grade of B or better in a language that is not Germanic, Greek, Italic (Romance, including Latin), or Slavic,
3. Satisfactorily completing the Spanish language proficiency required of candidates. See the DGS to set up a language exam.

Preliminary exam:

Students entering without an MA:

The preliminary exam is fulfilled by attaining a grade of B+ or better on the final exam of all core courses with a B+ grade or better, and by submitting a portfolio of written work from coursework. See the Graduate Handbook for procedures.

Students entering with an MA:

Students entering with an MA degree may petition to have core courses waived. In order to waive phonetics, phonology, morphology or syntax, a student must demonstrate knowledge by providing course syllabi and passing an oral interview. In order to fulfill the portfolio requirement when entering with an MA, a student must submit an identical portfolio as outlined above from their MA coursework by the end of their first semester of study. Students will be notified of the outcome by the end of the next semester.

Comprehensive exam:

Two comprehensive papers are required to fulfill the comprehensive exam requirement for the Linguistics PhD. The topics of the two papers must be substantially different. Although the topics can be in the same specialty of linguistics, at least one paper should involve linguistic form or structure (for example, by analyzing the acquisition of a particular syntactic construction, by investigating variation of a phonological variable, or by doing a theoretical analysis in syntax or phonology). Both papers have a paper and presentation portion, but only one of the presentations must be public in department colloquium. The second paper can be presented to the readers only, but it is possible to present it publicly.

Dissertation proposal:

When the student has successfully completed the PhD comprehensive examination, they must prepare a dissertation proposal and present it in a formal dissertation proposal defense. A dissertation proposal must have at least two main elements: a knowledge essay and a proposal. The dissertation advisor will determine exactly the format for these two elements. See the Graduate Handbook for procedures.

Dissertation:

After being admitted to candidacy, the student will conduct dissertation research and write a dissertation primarily in consultation with the main advisor, with secondary consultation with committee members when needed. A dissertation defense should be scheduled at least six months in advance. The dissertation draft should be submitted to the committee at least one month before the defense, and the defense draft must be approved by the advisor. See the Graduate Handbook for specific procedures and further advice.

Master's

Linguistics, MA

The degree programs in linguistics combine a solid foundation in the core areas of linguistic theory (phonetics, phonology, syntax) with courses in specialized fields of applied linguistics, Hispanic linguistics and sociolinguistics/sociology of language. Within applied linguistics, students may choose from topics such as second language acquisition, language teaching methodology, and the development of teaching materials/tests. The department also offers a certificate in teaching English to speakers of other languages (TESOL). In sociolinguistics, students may focus on discourse analysis, variation and change, and socio-phonetics. In Hispanic linguistics, students may focus on phonetics, sociolinguistics, and second language acquisition.

Requirements:

Required Courses for all linguistics MA degrees:

- LING 2578 - PHONETICS AND PHONEMICS
- LING 2579 - PHONOLOGY
- LING 2777 - SYNTACTIC THEORY

- LING 2144 - RES METHODS IN APPLIED LING
- One course in sociolinguistics/language change. Choose one from:
 - LING 2267 - SOCIOLINGUISTICS
 - LING 2860 - INTRO TO HISTORICAL LINGUISTICS
 - LING 2253 - PIDGIN AND CREOLE LANGUAGES
 - LING 2146 - SECOND LANGUAGE ACQUISITION

Other MA Requirements:

Comprehensive exam:

Students must attain a B+ in all core courses. If the grade is lower than a B+, a student must re-take the final exam the following year-or take an exam through other arrangements-and attain a grade of B+ on the exam, or retake the course.

Language requirement:

Proficiency in one second language is required for the MA degree. This requirement is satisfied by examination for students whose native language is English. Students whose native language is not English and who complete their MA work with a grade point average of B (3.0) or better will have fulfilled this requirement automatically.

Teaching English to Speakers of Other Languages (TESOL), MA

This one-year degree is available beginning in Fall 2020. It consists entirely of 30 credits (15 per semester) of coursework, and is intended for students who wish to teach English as a Second Language to adults both in the United States and internationally.

The curriculum is fixed and all courses are required.

Admission Requirements

The requirements for entry to the program will be the same as for the two-year MA.

Contact Information

Chair: Professor Scott Kiesling (kiesling@pitt.edu)

Admissions and Advisor One-year MA/TESOL and Two Year MA with TESOL Certificate: Dr. Alan Juffs (juffs@pitt.edu)

Program Requirements:

The degree program will require 30 credits. The following summarizes the sequences of courses.

Fall

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- LING 2144 - RES METHODS IN APPLIED LING
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- LING 2148 - COMPUTER-ASSISTED LANGUAGE LEARNING (3 credits)
- LING 2195 - PRACTICUM ESL TEACHING
- LING 2579 - PHONOLOGY

Total 15 Credits

Spring

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2195 - PRACTICUM ESL TEACHING
- LING 2579 - PHONOLOGY

Total 15 Credits

Note:

The LING 2195 - PRACTICUM ESL TEACHING (Fall and Spring) includes observation of classes in English as an additional language (EAL) in higher education contexts, supervised practice teaching of adult English language learners, application of course-work content and tools to teaching contexts, and interactions with EAL teaching faculty and students outside the classroom.

Department of Mathematics

The Department of Mathematics offers programs leading to Master of Arts, Master of Science, and Doctor of Philosophy degrees in the mathematical sciences. Students are given ample opportunity to attain scientific excellence by working with an active and broad-based research faculty in diverse areas of pure and applied mathematics..

Contact Information

Department Chair: Jon Rubin
 Main Office: 301 Thackeray Hall
 412-624-1175
 Fax: 412-624-8397
 E-mail: mathga@pitt.edu
www.mathematics.pitt.edu/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Mathematics, Graduate Administrator, 301 Thackeray Hall, Pittsburgh, PA 15260. Phone: 412-624-1175. Fax: 412-624-8397. E-mail: mathga@pitt.edu

Admissions

To qualify for admission to full graduate status, an applicant must have a bachelor's degree in mathematics or a closely related field, a minimum overall QPA of 3.0 (relative to a possible maximum of 4.0) in all undergraduate subjects, and a minimum QPA of 3.25 in the mathematics curriculum. It is desirable that the applicant's undergraduate background include courses in calculus, linear and abstract algebra, differential equations, and real and complex analysis. It is also strongly suggested that applicants provide their scores on the GRE General Test and, if possible, on the GRE Subject Test in mathematics.

Official TOEFL scores from the Educational Testing Service are required if you are an international student whose native language is not English. International applicants whose first language is not English must attain either a minimum TOEFL (administered by the Educational Testing Service) score of 577 (paper-based test), 90 (internet-based test), or an IELTS (administered by the University of Cambridge, Local Examinations Syndicate) score of 7.0. All applicants are required to submit official GRE scores and are highly encouraged to submit GRE Mathematics subject test scores.

Financial Assistance

All full-time PhD students receive financial assistance from the University for 5 years as long as they are in good standing. This funding is extendable to 6 years in special circumstances. Most hold appointments as teaching assistants (TAs) or teaching fellows (TFs). A few are graduate student researchers (GSRs) or Andrew Mellon fellows. Most of the TA commitments are made as a fall/spring package. Summer support is dependent upon the teaching needs of the department during the summer term, so there is no guarantee of more than two terms of support per year. No University support is available to Master students.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Mathematics, PhD

Requirements for the PhD

A student must maintain a B average over 72 credit hours of course work and pass departmental preliminary and comprehensive examinations. The main requirement for the Doctor of Philosophy (PhD) degree in mathematics is the successful completion and defense of a dissertation embodying a substantial piece of original mathematical research. The main stages are listed below.

PhD Preliminary Examination: Students must pass a written preliminary examination on advanced linear algebra and multivariable calculus. The preliminary examination should be attempted as early as possible and must be passed by April of their second year for support to be extended for a third year.

Comprehensive Examination: Students must pass a PhD comprehensive examination demonstrating their competence in their chosen area of mathematics after approximately one year of course work beyond the preliminary examination or within three years of study.

Dissertation Overview: Following successful completion of the comprehensive examination, students file an application for admission to candidacy for the Doctor of Philosophy. At this stage, students present a proposed topic for doctoral research and a research work plan for its execution to be reviewed by their dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Most candidates will require from three to five years of full-time study to complete the degree. Part-time students may be allowed as many as 10 years to finish all requirements.

Additional information and details concerning examinations, requirements, and the advising system can be found in the departmental handbook.

Joint Degree

Mathematics and Computer Science, MA/MS

Requirements for the Dual Degree

The dual degree program requires the completion of a minimum of 45 credits of course work through either a thesis or non-thesis option. The total set of courses taken must include, as a subset, the course requirements for MA degree in mathematics and a MS degree in computer science.

Mathematics/Civil Engineering, MS/MSCE

Joint Master's Degree

A student is able to earn the Master of Science Civil Engineering degree and the Master of Science degree in mathematics at the same time. In general, 42 credits are required, and students must complete the fundamental courses in both areas.

Master's

Mathematics, MA

Degree Requirements

Requirements for the MA

<http://www.mathematics.pitt.edu/graduate/graduate-handbook#masters><http://www.mathematics.pitt.edu/graduate/graduate-handbook#masters>

The MA in mathematics requires completion of at least ten mathematics courses (30 credits) and an oral comprehensive examination. Six of the ten courses must be taken at the 2000-3000 level; the remaining ones may be those given by the department at the 1000 level or those cross-listed with other departments. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. The MA program requires 30 credits (minimum of 7 departmental, with 5 (of the 7) at the 2000 level or above) and an oral comprehensive examination. An MS option is available that requires a total of 30 credits and a thesis (24 course credits + 6 credits-thesis).

Requirements for the MS

<http://www.mathematics.pitt.edu/graduate/graduate-handbook#masters>

The MS in mathematics requires completion of at least eight mathematics courses (24 credits) and the completion and defense of a thesis in mathematics (6 credits). Six of the eight courses must be taken at the 2000-3000 level; the remaining ones may be those given by the department at the 1000 level or those cross-listed with other departments. Achievement of an overall course average of B or better is required for all courses.

The master's programs in applied mathematics contain several tracks, each having a selection of required and elective courses. The MA program requires 30 credits (minimum of 7 departmental, with 5 (of the 7) at the 2000 level or above) and an oral comprehensive examination. An MS option is available that requires a total of 30 credits and a thesis (24 course credits + 6 credits-thesis).

Medieval and Renaissance Studies Program

Students doing graduate work in the Medieval and Renaissance periods require a particularly broad interdisciplinary background. To meet this need, the faculty involved in MRST at the University of Pittsburgh have instituted a certificate program that is designed to enrich the student's work in the major department while allowing the student to undertake inventive interdisciplinary projects.

Each year the MRST Program organizes a series of lectures featuring visiting national and international scholars and distinguished speakers from the Pittsburgh area. We collaborate with PCMRS, the Pittsburgh Consortium for Medieval and Renaissance Studies (www.pcmrs.org), in regularly bringing together faculty and graduate students from Pitt, Carnegie Mellon, Duquesne, and many other area universities.

Contact Information

Director: Christopher Nygren
Graduate Administrator: Briar Somerville
Main Office: 454 Cathedral of Learning
Phone: 412-624-6564
E-mail: kbs47@pitt.edu
<http://www.medren.pitt.edu/>

Admissions

Students who are already enrolled in a graduate degree program at Pitt can apply for the Certificate in Medieval and Renaissance Studies at any time during their graduate studies, but are encouraged to apply as early in their program of study as possible. Contact Graduate Administrator Briar Somerville at kbs47@pitt.edu for a certificate application form.

Requirements for the Certificate

For students wishing to complete the MRST certificate at the graduate level, the most important requirement is a research paper focused on medieval and/or Renaissance Studies. As specified by the University, a MA certificate also requires at least 15 credits (5 courses) and a PhD certificate requires 18 credits (6 courses). Many of these credits may be drawn from coursework already required for the student's degree in the home department (for instance, the requirements for English, HAA, or French and Italian). Working with the Director of MRST, the student will create an individually tailored course of study that gives consideration both to the requirements of home departments and to the importance of interdisciplinary study.

Faculty

Dietrich School of Arts and Sciences Faculty

Certificate

Medieval and Renaissance Studies Doctoral Certificate

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

PhD Certificate Requirements

1. A PhD thesis of an interdisciplinary nature focused on medieval and/or Renaissance studies.
2. At least four graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.
3. A reading knowledge of one language other than English. We also strongly recommend (but do not require) that PhD certificate candidates acquire a reading knowledge of Latin.
4. A one-page cover letter attached to the thesis. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

Medieval and Renaissance Studies Master's Certificate

This is a certificate program for MA or PhD students in one of the disciplines who desire to pursue additional interdisciplinary work in Medieval or Renaissance studies.

MA Certificate Requirements

1. A major interdisciplinary research paper in medieval and/or Renaissance studies. This may be either an MA thesis or a substantial term paper (20 - 30 pages).
2. At least two graduate courses focused on medieval and/or Renaissance studies. We strongly encourage students to take courses outside of their home departments. In some cases-involving, for instance, infrequent course offerings or research abroad-students may petition the Director to reduce the number of courses required.
3. We strongly recommend (but do not require) that MA certificate candidates acquire a reading knowledge of at least one language other than English.
4. A one-page cover letter attached to the research paper. The letter should be addressed to the Program Director and should use direct language and specific examples. In this letter, we would like you to reflect on what you have learned from earning a certificate from the Program in Medieval and Renaissance Studies.

Molecular Biophysics and Structural Biology Program

The Molecular Biophysics and Structural Biology graduate program at the University of Pittsburgh and Carnegie Mellon University educates students to conduct research at the interface between biology, chemistry, and physics. The disciplines of Molecular Biophysics and Structural Biology aim to unravel and explain biological phenomena and processes in atomic and molecular detail. Research carried out by program faculty covers a diverse range of topics in Molecular Biophysics and Structural Biology. Areas of study focus on understanding fundamental principles involved in reactions and regulatory interactions in biological systems. Our research projects attempt to answer the key questions, such as: How do proteins fold and can we prevent misfolding? Can we design proteins with novel functions? How does the coordinated interaction between proteins and nucleic acids lead to cellular differentiation and the formation of an organism? How do macromolecules assemble into molecular machines and viruses? How do these assemblies operate? How do signals traverse membranes?

www.mbsb.pitt.edu

Program Co-Directors: Andrew Hinck (UPSOM) and Gordon Rule (CMU)

Admission Requirements and Procedures

Students with at least a baccalaureate degree in physics, chemistry, and mathematics or cellular and molecular biology are encouraged to apply. Admissions are based upon the student's academic record, CV, letters of recommendation, previous research experience, written statement of interest, and a personal interview. Applicants who are citizens of countries where English is not the official language (and the Province of Quebec in Canada) are required to submit evidence of English Language proficiency by submitting the official results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). A minimum TOEFL score of 600 (paper) or 250 (computer) or 100 (iBT), or IELTS score of at least 7.00 is required for admission to the Program. We actively seek qualified applicants from underrepresented minorities and students with disabilities.

Additional information and a link to the online application can be found at <http://www.mbsb.pitt.edu/index.php/apply-for-the-mbsb-program>

Financial Assistance

All students receive complete financial support in the form of stipend, tuition, and health insurance.

Training Faculty

Dietrich School of Arts and Sciences Faculty

Degree Requirements

All students enter the Program in the fall session and after performing three rotations identify an advisor and area of research. Areas of research focus include: Macromolecular recognition; Virus, lipid and protein structure and interactions; Principles of protein structure and dynamics; Membrane proteins; Gene regulation and signaling; Cellular biophysics; Chemical structure and dynamics. Methodologies employed comprise NMR spectroscopy, X-ray crystallography, cryo electron microscopy, atomic force microscopy, mass spectrometry, infrared spectroscopy and computational molecular biology. Required coursework is completed during the first two years. Students are required to complete the Comprehensive Exam by August 31 of their second year in the graduate program.

A minimum of 72 credits beyond the baccalaureate degree is required for the PhD degree. The 72 credits are completed by taking required and elective course work as well as dissertation research credits upon being admitted to candidacy.

- MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS - taken during the first fall, spring & summer term of the first year.
- INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE - taken during the fall term of the first year
- MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE - taken during the fall term of the first year
- MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS - taken during the spring term of the first year
- 09763 - MOLECULAR MODELING AND COMPUTATIONAL CHEMISTRY - taken during the spring term of the first year at Carnegie Mellon University
- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH - taken during the summer term of the first year
- INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS - taken during the summer term of the first year
- MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR - taken every fall and spring term through graduation
- MOLBPH 2030 - DATA AND LITERATURE CLUB - beginning with the spring term of the first year, D&L Club is taken every fall and spring term through graduation

Advanced Elective Courses (6 Credits Total)

The courses taken here will be chosen on an individual basis based on the background and interests of the individual student. During the first year, the choice will be made by the student in consultation with the First Year Advisor or Dissertation Advisor. Upon proper approval, the elective courses can be taken either at the University of Pittsburgh (both the Dietrich School of Arts & Sciences and the School of Medicine) as well as Carnegie Mellon University.

Additional information on the core curriculum can be found at <http://www.mbsb.pitt.edu/index.php/training/curriculum>.

- MSMBPH 2030 - DATA AND LITERATURE CLUB OR
- MOLBPH 2030 - DATA AND LITERATURE CLUB -taken every fall and spring semester through graduation.
- Advanced Elective Courses-6 credits total-with the permission of his/her advisor, students are permitted to choose from a number of courses offered at Pitt as well as CMU.

Additional Information

Terminal Masters Degree

The program does not admit students whose goal is to attain a Master's of Science degree. However, it might become necessary for a PhD student to transfer to an MS track for academic reasons or reasons beyond the student's control, e.g., medical circumstances or a change in family circumstances necessitating a long-distance move.

Department of Music

The Department of Music offers the degrees of Master of Arts and Doctor of Philosophy in music.

The graduate program in music consists of four areas of concentration:

- Musicology
- Ethnomusicology
- Composition and Theory
- Jazz Studies

Students may combine work for the MA and PhD degrees with a program of theoretical, historical, or area studies specialization leading to a certificate in Cultural Studies, Medieval and Renaissance Studies, Global Studies, Asian Studies, Latin American Studies, European Union Studies, West European Studies, Russian and East European Studies, Film Studies or Gender, Sexuality, and Women's Studies.

Fax: 412-624-4186

E-mail: and59@pitt.edu, musicdpt@pitt.edu, music.grad.info@pitt.edu

www.music.pitt.edu

Admissions inquiries concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Music, Director of Graduate Admissions, Dr. Amy Williams, 110 Music Building, Pittsburgh, PA 15260. Phone: 412-624-4120. Fax: 412-624-4186. E-mail: amywill@pitt.edu

Admissions

The deadline for receipt of all elements of the application is **January 5**.

Prospective students should apply online by filling out the online application form (app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=up-as), paying the application fee and attaching pdf files of the statement of purpose, transcripts, resumé/CV and work samples. Applicants must include letters of recommendation with the online application. Please send all additional application materials (music scores, CDs, test scores) to:

University of Pittsburgh
School of Arts and Sciences
Department of Music
Amy Williams, Director of Graduate Admissions
110 Music Building
4337 Fifth Avenue
Pittsburgh, PA 15260

The elements of the application are:

1. *Application form* and \$50 application fee.
2. *Statement of purpose*, an essay of about two pages that describes the applicant's academic background and professional goals.
3. *Undergraduate and graduate transcripts* from all higher education institutions attended. These should be scanned and included with online application. Students will be required to forward official transcripts/translations at the time of matriculation (upon enrollment) to the Graduate School to clear transcript contingencies.
4. *CV or Resumé*.
5. *Three letters of recommendation*, preferably by persons who have taught the applicant in subjects related to the four research subdisciplines, rather than in performance lessons.
6. *Official scores of the general test of the Graduate Record Examination (GRE)*. Please note that international applicants from a country whose official language is not English are exempt from taking the GRE. All others are required to take the test (including international students who hold or will hold a degree from an English-language institution). Applicants are encouraged to take the test by November 1, if possible, so that scores can reach the department by January 5. For information, go to www.gre.org (<http://www.gre.org>). The University of Pittsburgh GRE code is 2927.
7. *Samples of work*. Applicants in historical musicology and ethnomusicology should submit two papers on an analytical, historical, or theoretical topic. Applicants in composition and theory should submit three scores and a CD of recent compositions, together with one paper on an analytical or theoretical topic. Applicants in jazz studies should submit a recording that demonstrates their ability to improvise on an original jazz composition and a jazz standard. They should also send a full score of an original work for a large jazz ensemble/orchestra and a full score of an original or standard composition for a small jazz ensemble (up to 9 players). Finally, they should submit a research paper on a style or period in the history of jazz. **Please note:** papers can be submitted online. However, in order to submit two papers, both must be merged into a single pdf document first and then submitted.
8. *TOEFL or IELTS Exam scores*. International applicants whose country's official language is not English must submit certified scores of one of these exams. A minimum TOEFL score of 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading and writing) is required. The required minimum IELTS score is 7.0 (with at least 6.5 in each of its four sections).

For information on music department admissions, contact the department's Director of Graduate Admissions, Professor Amy Williams (amywill@pitt.edu). More general information can be found on the University Graduate Admissions (<http://www.asgraduate.pitt.edu/applicationadmission>) and the Graduate Studies (<http://www.asgraduate.pitt.edu>) home pages.

International students are urged to consult the website of the Office of International Services (<http://www.ois.pitt.edu>).

Financial Assistance

A graduate student receiving a fellowship or teaching assistantship/teaching fellowship from the University of Pittsburgh who maintains satisfactory progress toward the degree can expect to receive up to four years of financial aid; continuing students must request renewal of financial assistance for the following year no later than February 15. Students who have successfully passed the PhD comprehensive examinations in their fourth year may receive additional financial assistance if there are adequate funds. The department nominates the most outstanding candidates for University- and school-wide fellowships. Students seeking financial assistance must request consideration for aid at the time of application for admission; admission by itself carries no commitment of financial assistance.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Music - Composition and Theory Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st - century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Ethnomusicology Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st - century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music - Jazz Studies Concentration, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Preliminary Evaluation: The faculty formally evaluates each student in the first year in residence beyond the master's degree, to identify those students who may be expected to complete the PhD degree and to reveal areas of weakness in their preparation that need to be remedied.

Comprehensive Examination: Students take a written comprehensive examination normally during the third year at the completion of their formal course work. The examination in Musicology covers the history of Western music and musical analysis; in Ethnomusicology it covers the intellectual history, theory, and methodologies used in the field, as well as topics in the students' geocultural areas of interest; in Jazz Studies it covers jazz literature and history, performance, and jazz composition and analysis; in Composition and Theory it covers tonal and atonal analysis, 20th and 21st - century musical language, and orchestration.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Music, PhD

Requirements for the PhD:

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, and dissertation work as detailed in the department's Graduate Handbook which can be downloaded at www.music.pitt.edu/graduate.

The University will accept up to 24 transfer credits for graduate courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies.

PhD candidates must also satisfy the following requirements (distinctions between the various program requirements are detailed):

Language Requirement: For Musicology, reading knowledge of German and one other research language besides English. For Ethnomusicology and Jazz Studies, reading knowledge of a language relevant to the field of specialization and chosen in consultation with the department's Director of Graduate Studies. For Composition and Theory, reading knowledge of one language besides English, chosen in consultation with the department's Director of Graduate Studies.

First Year Evaluation: At the end of the first year of graduate study all first-year students meet with the faculty at a regularly scheduled faculty meeting for an oral interview/evaluation of their progress in the program.

Dissertation Overview: Following successful completion of the comprehensive examination, students prepare a written prospectus of the dissertation project for review by their dissertation committee. Approval of the overview brings admission to candidacy for the PhD degree.

Dissertation: Candidates in Musicology and Ethnomusicology submit a major work of original scholarship. Candidates in Jazz Studies submit a major work of original scholarship and produce a one-hour recital of original compositions. Candidates in Composition and Theory submit a large-scale composition and work of original scholarship in music theory.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Master's

Music - Composition and Theory Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the

department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Ethnomusicology Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Jazz Studies Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. All entering graduate students enroll in at least four out of five available proseminars (MUSIC 2111, MUSIC 2121, MUSIC 2131, MUSIC 2141, MUSIC 2151) providing perspectives for scholarly research in the field as a whole and in the disciplines represented within the department. Much of the remainder of the MA curriculum consists of more specialized required and elective courses that are specified for each discipline, e.g., Orchestration, Electronic and Computer Music, and private tutorials in composition and analysis for students in Composition and Theory; Field and Lab, area courses and seminars for Ethnomusicology; Introduction to Jazz Literature, Advanced Jazz Composition and Analysis for Jazz Studies; and topical seminars for Musicology. Students in Musicology must demonstrate a reading knowledge of a second research language.

Music - Musicology Concentration, MA

Requirements for the MA:

All students must apply to and be admitted to the PhD program. Those who do not hold a Master's degree will first complete the necessary requirements for the MA. For the master's degree, students must earn 30 credits with a B average or better in courses numbered 2000 or above, and write a thesis (if required); the University will accept up to six transfer credits for courses comparable in scope and content to those required by the department, as judged by the department's Director of Graduate Studies. Students in Musicology must demonstrate a reading knowledge of a second research language.

Department of Neuroscience

The Center for Neuroscience (CNUP) Training program is an interschool PhD degree-granting program offered cooperatively by the School of Arts and Sciences (Neuroscience, NROSCI) and the School of Medicine (Neurobiology, MSNBIO). The program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research. Research interests of the training faculty focus on several prominent themes, including behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and the neurobiology of disease.

We are highly invested in enhancing diversity, which is expressed in multiple forms - race, ethnicity, gender and gender identity, sexual orientation, socioeconomic status, language, culture, national origin, religious commitments, age, (dis)ability status and political perspective. In addition, we strive to create a community that is equitable, so that all persons have equal opportunity, and inclusive, so that everyone feels welcomed. We hope you share our values and goals.

This large research-based training program offers outstanding opportunities for students to pursue research in laboratories within more than 30 different departments and University centers. Major features of the program include extensive collaborative interactions among its faculty members and its affiliation with Auditory Neuroscience, the Brain Institute, the Center for the Neural Basis of Cognition (a joint program with Carnegie Mellon University), Conte Center for Translational Mental Health Research, Pittsburgh Hearing Research Center, Pittsburgh Institute for Neurodegenerative Diseases, Pittsburgh Center for Pain Research, and other on-campus research centers.

Training is also available for a master's degree through the Department of Neuroscience in the Dietrich School of Arts and Sciences. It is important to note that this is a departmental program rather than a component of CNUP. Thus, training is only available with faculty with primary or secondary appointments in the Department of Neuroscience. Applicants must also arrange for a faculty sponsor before their application will be considered. A more detailed explanation of the program requirements is available on the Department of Neuroscience Web site at <http://neuroscience.pitt.edu/programs/masters-program>

Contact Information

Center for Neuroscience
A210 Langley Hall
412-383-7582
E-mail: argenzio@pitt.edu
<https://www.cnup.pitt.edu/phd-program-training/prospective-students>

Admission Requirements and Procedures

Students are admitted into the CNUP training program on the assumption that they will be able to meet all requirements for the PhD degree. Those that are selected show evidence of a high level of intellectual talent, a strong interest in neuroscience, and a commitment to scholarship and research.

Admission decisions are based on many factors including the candidate's statement of interest and goals in the field of neuroscience, evidence of research experience and accomplishment, letters of recommendation, grades, and personal interviews. An outstanding record in one of these areas may compensate for poorer performance in another area. In general, successful applicants have a BS degree in biology, chemistry, computer science, mathematics, neuroscience, or psychology with a cumulative grade point average of at least 3.40 (on a 4.00 scale).

Success in scientific research requires personal qualities not measured by tests - attributes such as curiosity, creativity, adaptability, self-motivation, passion for research, conscientiousness, persistence, self-organization, grit, resilience, and integrity, just to name a few. Select elect one or two traits you feel are your greatest strengths and provide an example from your life experience that illustrate each trait.

Additional information and a link to our on-line application can be found at: <https://www.cnup.pitt.edu/phd-program-training/prospective-students>

Financial Assistance

All students receive full stipend support and individual health benefits. This support is derived from University fellowships and numerous grants funded by the federal government and private agencies. Students in the program also have access to sponsorship on NIH training grants.

Doctoral

Neuroscience, PhD

Overview of Degree Program

Neuroscience is the study of the structure and function of the nervous system. The field has emerged over the past two decades as one of the fastest-growing disciplines within the biomedical sciences, attracting people from many different disciplines in the natural sciences. By now, the study of mind and brain is arguably the most exciting scientific enterprise of our time.

Understanding the nervous system provides key insights into human nature as well as treatments for a host of devastating neurologic and psychiatric disorders. Our graduate program introduces students to the fundamental issues and experimental approaches in neuroscience and trains them in the theory and practice of laboratory research.

The CNUP Graduate Training Program has been designed to accomplish several objectives:

- To develop competence in conducting laboratory research including planning, executing, reporting, and defending an original piece of research relevant to the study of neuroscience.
- To develop general competence in neuroscience and specific expertise in one or more areas of neuroscience such as behavioral/systems/cognitive, cell and molecular, development/plasticity/repair, and neurobiology of disease.
- To develop a general professional competence in oral and written expression, necessary for a career in science and/or teaching.
- To develop fundamental skills in scientific reasoning required to redefine research questions and devise innovative multidisciplinary strategies as a means for adapting to the continually evolving landscape of neuroscience and neuroscience research.

In formulating the graduate training program, the faculty has been guided by several principles. First, the program should aid each student in the development of an individualized training program based on the student's background and interests.

Second, research experience should form the core of each student's training and as such should not be postponed by a lengthy period of time devoted exclusively to coursework.

Third, students should be able to complete the program in approximately five years.

Fourth, students should be evaluated in terms of those competencies that are important to a research scientist: designing, conducting and evaluating research, both their own and that of others.

Thus, the progress that a student makes in the program is considered primarily in terms of the student's performance as an investigator.

Degree Requirements

<https://www.cnup.pitt.edu/phd-program-training/current-students/phd-requirements>

Credits: A minimum of 72 credit hours, including a 23-credit course requirement covering fundamental material in cellular and molecular neurobiology, systems neuroscience, and several elective courses.

- MSNBIO 2010 - SCIENTIFIC ETHICS or
- NROSCI 2010 - SCIENTIFIC ETHICS
- MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1 or
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2 or
- NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
- MSNBIO 2102 - SYSTEMS NEUROBIOLOGY or
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- MSNBIO 2624 - GRANT WRITING

Other Requirements

In addition to University requirements for graduate degrees, students are also required to complete a graduate level statistics course, obtain research experience in at least two separate laboratories; attend journal clubs and research seminars; pass a reprint exam following their first year of study, a comprehensive exam, and a doctoral dissertation and defense; and, to serve as a teaching assistant for at least one term (or course).

Master's

Neuroscience, MS

The following sections outline the academic courses, the research experiences, and the oral and written examinations (herein referred to as "milestones") that the student must successfully complete prior to being awarded the master's degree. These requirements are described in terms of the academic and research accomplishments expected during each year of the student's progress through the program. Deviations from the outlined sequence and time schedule need to be approved by the Director of Graduate Studies.

MS Degree Requirements

Credits: A minimum of 30 credit hours, including 12 credit hours of graduate course work in courses numbered 2000 or above.

- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
OR
 - NROSCI 2011 - FUNCTIONAL NEUROANATOMY
- AND
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
 - NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2
OR
 - NROSCI 2012 - NEUROPHYSIOLOGY
 - NROSCI 2017 - SYNAPTIC TRANSMISSION
 - A graduate-level course in statistics also is strongly recommended though not required

Additional

Students must also participate in a journal club every fall and spring term (this could be either a CNUP journal club or a more specialized journal club), and must attend the neuroscience seminar series (NROSCI 2106). Journal club and seminar series credits should account for no more than 3 of the 12 required course credits. A minimum grade of B is required to pass a course, and a cumulative grade point average of at least 3.0 must be maintained throughout the course of study.

Students must complete at least 12 credit hours of coursework toward the total of 30 credits required for the master's degree. Course credits completed before admission to the Department of Neuroscience Master's Degree program cannot be applied to the credit hour requirements required for the master's degree, although prior coursework may satisfy specific course requirements.

Students are also required to pass two milestones en route to the master's degree: the Reprint Exam and the Master's Thesis Defense. Specific details regarding these milestones are provided later in this document.

Yearly Sequence of Requirements and Expectations

Entering Students

Entering students should schedule an introductory meeting with the Director of Graduate Studies. The purpose of this meeting is to answer any questions that the student may have and to assist the student in getting settled in the program. Prior to the beginning of the student's first term, the student, with the aid of their research mentor and the Director of Graduate Studies, outlines a complete plan of study leading to the Master's Degree.

First Year

The major objectives of the first year are to become actively engaged in laboratory research, to complete core course requirements, and to obtain sufficient experience to pass the Reprint Exam. Participation in journal clubs, research seminars, and involvement in critical assessment of the literature through readings with the mentor and peers is integral to meeting these objectives.

It is required that students participate in the following activities during the fall and spring terms of their first year:

1. laboratory research
2. core courses in neuroscience
3. journal club
4. neuroscience seminar series.

During the summer term at the end of their first year, students should focus primarily on research, although some course work may be appropriate (e.g., statistics). During the first year, the students typically register for 3-9 research credits of Directed Study (NROSCI 2902) per term; the students should register for this course pass/fail.

Students are required to submit a research progress report at the end of the first year of study. This report is due by the last day of final exam week of the second term.

The Reprint Exam (see Section 9.1) must be completed by May 31 of the first year of study.

This assumes that the student initiated study in the program at the beginning of the fall term. Because admission into the program is considered on a rolling basis, it is not unusual for students to enter the program in the spring or summer terms. In these instances, completion of the reprint examination should take place at the end of the first month following the second term of study.

Second Year

After completion of the first year, the only remaining requirements are to finish course requirements and complete a master's thesis project. A list of elective courses currently offered can be obtained from the administrative office. Selection of the coursework that will be used to satisfy the requirements of the program should be made in consultation with their mentor and is subject to approval by the Director of Graduate Studies. However, given the time constraints of completing the degree it is expected that research will be the principal focus of students throughout their program of study.

During each fall and spring term the student is enrolled in the program, the student must participate in:

1. research (registered for as 6-9 credits, NROSCI 2990, pass/fail)
2. journal club
3. neuroscience seminar series (NROSCI 2106).

Department of Philosophy

The Department of Philosophy offers the degrees of Master of Arts and Doctor of Philosophy.

It is possible for students in the Department of Philosophy to plan a combined program with the Department of History and Philosophy of Science by fulfilling specific requirements in each of the departments. The Departments of Classics, Philosophy, and History and Philosophy of Science jointly offer a graduate program leading to the MA and PhD degrees with an area of concentration in classics, philosophy, and ancient science.

Fax: 412-624-5377
E-mail: jrs164@pitt.edu
<http://www.philosophy.pitt.edu/>

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Philosophy, Graduate Administrator, 1017 Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5774. Fax: 412-624-5377. E-mail: jrs164@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a statement of purpose, and a writing sample. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing Service or the IELTS administered by the University of Cambridge, Local Examination Syndicate. The required minimum TOEFL score is 90 (with at least a score of 22 in all of the four sections of speaking, listening, reading, and writing). The required minimum IELTS score 7.0 (with at least 6.5 in each of its four sections). Applications will be accepted for fall term admission until January 10. The department admits students only for the fall term.

Financial Assistance

Many students in the PhD program are supported by fellowships or teaching assistantships/fellowships. The rates are set annually by the University. The department does not offer financial support to non-continuing MA students.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Philosophy, PhD

Requirements for the PhD

The University requirement for the PhD is 72 credits. The department requires that 36 of these credits must be obtained by taking 12 seminars (including directed studies) offered by the philosophy department (or an approved seminar offered by another department) passed with a grade of at least B, and the remainder are typically satisfied by dissertation research.

Departmental requirements are fully spelled out in the *Handbook of Rules and Policies for Graduate Study in Philosophy at the University of Pittsburgh (PDF)*. In summary, these requirements include:

1. proficiency in French, German, Greek, or Latin, shown by passing a departmental translation examination
2. proficiency in basic and advanced logic, normally shown by passing (with a grade of at least B) PHIL 2500
3. proficiency in ethics, metaphysics and epistemology, and philosophy of science
4. proficiency in the history of philosophy, shown by doing three units, where a unit is a graduate seminar or departmental examination covering a historical topic

When these requirements have been satisfied, the student is comprehensively evaluated and starts working on a paper to serve as the basis for comprehensive examination, which is the student is expected to take by the end of his or her seventh term. Students who pass this examination are then allowed to form a dissertation committee and to present this committee a prospectus for a dissertation. If the prospectus is approved, the student is admitted to Ph.D. candidacy and proceeds to writing the dissertation. Once the dissertation is approved for examination, the student must pass a final oral exam on the dissertation and their research.

Teaching Internship

In order to qualify for the PhD, each graduate student must, under the supervision of the faculty, teach or lead discussion sections for at least two different courses. Teaching assistants and teaching fellows satisfy this requirement in the course of fulfilling their teaching duties. Special arrangements are made to enable other graduate students to satisfy this requirement.

Master's

Philosophy, MA

M.A. in Philosophy

The department has no regular terminal M.A. program. Students enrolled in the Ph.D. program may apply for an M.A. when they have satisfied the requirements for comprehensive evaluation described in §4.1 of this handbook and been comprehensively evaluated. Except in extraordinary circumstances, students working towards an M.A. in Philosophy who are not enrolled in the Philosophy Ph.D. program are Ph.D. students in other departments at the University who are seeking a "secondary M.A.". Students pursuing a secondary M.A. are supervised by the Director of Graduate Studies and must satisfy the following requirements:

- A. The student must satisfy the Area Requirement in the field of metaphysics and/or epistemology, and in addition one of the other Area Requirements (i.e. either ethics or the philosophy of science), as described in §3.3 of this Handbook. These requirements may (but need not) be

satisfied by taking the core courses for Ph.D. students (described in §3.4 of this Handbook). But M.A. students may not take the M&E Core Seminar or Ethics Core Seminar in the Fall term: courses in the Core Sequence are open to M.A. students only in the spring term.

B. The student must do at least two units of history (where a "unit" is defined in §3.5 of this Handbook), such that one is in ancient philosophy and the other in modern/nineteenth century philosophy.

C. The student must either pass the Basic Logic Exam or Phil 2499 (or a more advanced logic course), as described in §3.1 of this Handbook.

D. The student must pass (with a grade of B or better) at least 10 courses (30 credits) offered by the Department at the 2000 level or above. Neither Directed nor Independent Studies may count. Courses that are offered by other departments and cross-listed with Philosophy do not automatically count. Students, may, however, petition the Graduate Committee to use them to satisfy this requirement.

None of the courses used to fulfill these requirements can be among those used to fulfill requirements for another degree, including residency requirements for the student's "home" degree. When requirements (A) through (D) have been met, the student must submit to the Graduate Committee a dossier of three papers written for courses taken in our program, together with any available comments from instructors on these papers. This portfolio will be comprehensively evaluated by the Department and, if the evaluation is favorable, the Department will recommend the conferral of the secondary M.A. degree. Students must register for at least one credit in the term of graduation and be registered for a minimum of three credits in the 12-month period preceding the graduation month. Note that the M.A. degree is only conferred upon students with an overall QPA of 3.0 or higher. All requirements for the secondary M.A. degree should be completed within a period of four calendar years from the student's initial registration for graduate study.

To apply to the secondary M.A. program, students must submit the following to the Director of Graduate Studies: a writing sample, copies of undergraduate and graduate transcripts, and a letter of recommendation from the Director of Graduate Studies in the student's home department indicating that the home department supports the student's application to the secondary M.A. Program. The University allows a maximum of six credits taken prior to admission to a secondary M.A. Program to count toward the requirements for the secondary M.A.

Secondary M.A. Programs in other departments

Students enrolled in the regular Ph.D. program in the Department may pursue a secondary M.A. degree in other departments at the University. The University allows a maximum of six credits taken prior to admission to a secondary M.A. Program to count toward the requirements for the secondary M.A. If the secondary M.A. would contribute significantly to the student's philosophical training, or form an integral part of their projected dissertation project, the student may submit a written request to the Graduate Committee that his or her pursuit of the secondary M.A. be officially endorsed by the Department. The Graduate Committee, with the approval of the Chair, may endorse the student's secondary M.A. in which case an additional year of financial support by the Department will be granted, and the timing of requirements will be appropriately adjusted.

Department of Physics and Astronomy

The Department of Physics and Astronomy offers the MS and PhD degrees in physics. The graduate program provides a broad experimental, observational, and theoretical foundation upon which students build careers as scientists prepared for both teaching and research at major academic, government and industrial laboratories, educators at universities and colleges, and as independent scientific entrepreneurs.

Contact Information

Main Office: 100 Allen Hall
412-624-9066 or 412-624-9000
Fax: 412-624-9163
E-mail: pagrad@pitt.edu
www.physicsandastronomy.pitt.edu

Research

The graduate programs in the Department of Physics and Astronomy are designed primarily for students who wish to obtain the PhD degree, although the MS degree is also offered without financial support. Both the PhD and the MS programs provide high-quality training for students. A set of core courses is to be taken by all graduate students unless the core course material has been demonstrably mastered in other ways. These core courses cover dynamical systems, electromagnetic theory, quantum mechanics, and statistical physics & thermodynamics. In addition, elective courses are offered in several advanced areas of physics. PhD thesis topics may be chosen from a variety of research fields, including astrophysics/cosmology, condensed matter physics, particle physics, biophysics, and physics education research. Topics in astrophysics/cosmology

include: observational, numerical, and theoretical cosmology; dark matter and dark energy; galaxy formation and evolution; active galactic nuclei and quasars; galactic and intergalactic medium; stellar atmospheres; massive stars; supernovae; and physics of the early universe. Topics in condensed matter physics include: nanoscience; quantum information; quantum kinetics; quantum optics; quantum states of matter; semiconductor physics; statistical physics; superconductivity; and ultrafast optics. Topics in particle physics include: the origin of mass and flavor; the search for new symmetries of nature; neutrino physics; CP violation; heavy quarks; baryogenesis; precision test of the Standard Model; effective field theory; and strong interaction field theory. Topics in biophysics include: bacteria dynamics, scaling laws of epigenetic expression, turbulence and stochastic fluctuations, theoretical statistical physics of cell sensing and behavior. Topics in physics education research include: cognitive issues in learning physics; and development and evaluation of research-based curricula for introductory and advance physics courses. Multidisciplinary thesis research may also be carried out in, for example, particle astrophysics, biophysics, chemical physics, laser physics, materials science, nanoscience, and surface science. This research may be done in cooperation with faculty from other departments of the University.

Admissions

To be considered for admission, a student must have earned a baccalaureate degree; one of the physical sciences, mathematics, astronomy/astrophysics or engineering with relevant physics courses is required. Research experience is recommended but not required. Must have an impressive undergraduate record; and must submit a complete application. The application also serves as an application for financial aid from the department, if the candidate so desires. A complete application consists of the following. Application details are provided on our website under "How to Apply".

- An online application
- Transcripts (clear downloads) from all college-level institutions attended (unofficial until admitted)
- Proof of degree(s) either posted on the transcript or in another form
- Minimum GPA for admission with full status is 3.0 on a 4.0 scale
- Graduate Record Examination (GRE) General and Advanced Physics test scores are optional, consult department's FAQ.
- Brief statement of purpose, including rank ordered list of research preferences; in addition to list of textbooks used for intermediate/advanced level physics classes.
- Evidence of any research experience (recommended but not required)
- Curriculum Vitae
- Three letters of recommendation
- International applicants only: TOEFL (Test of English as a Foreign Language), IELTS or Duolingo English test scores and completed Certification of Financial Responsibility and International Graduate Student Supplemental Form for the Dietrich School of Arts and Sciences (Refer to department's graduate application details website for minimum score information)

Financial Aid

Financial aid is normally provided to doctoral students through teaching or research assistantships. In addition, numerous competitive fellowships are available for students. All qualified applicants are entered into a pool for these fellowships. The department endeavors to support all students throughout their entire graduate career, provided good academic standing is maintained and progress is being made toward the degree.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Physics, PhD

Requirements for the Doctor of Philosophy

The PhD program in physics, described in more detail in the referenced documents, aims to assure that graduates are well versed in the fundamentals of their fields, have a broad knowledge of contemporary developments, and are experts in the techniques and current state of the subject area of their research. Students are required to complete the six core courses (PHYS 2373, PHYS 2513, PHYS 2541, PHYS 2555, PHYS 2565, PHYS 2566) within the first two years of their program. Students that are already familiar with the material of one or several core courses may directly take the course exam(s) at the start of the term. Students entering with a Masters degree from another institution are encouraged to review Section A.5 of the departmental requirements document. At least four classes numbered above 3000 are also required for the degree. Teaching practice, presentation and attendance of seminars, and writing and an oral presentation of a dissertation give candidates broad experience in the effective communication of their work.

A minimum of 72 graduate credits are required for the PhD degree.

The PhD preliminary evaluation, which also serves as the comprehensive examination for the MS, is based on final examination scores in the core graduate and/or advanced undergraduate subjects. All students are required to pass the preliminary examination by the end of the first year.

PhD students are also required to complete the PhD comprehensive examination, which is based on final examination scores in the core graduate courses. This examination should be passed within the first two years of residency. Students who were exempted from a particular core course are required to take the final examination in that course.

The PhD dissertation research, a major part of the PhD program, must contribute significantly to the advancement of knowledge in physics or astronomy. Students will be required to meet annually with their thesis committee and successfully defend their dissertation before this committee and the University community.

Master's

Physics, MS

Requirements for the Master of Science

A minimum of 30 credits (3.0 GPA) is required for the MS for both thesis and non-thesis options. The student must be in compliance with all of the University's degree requirements. At least four physics courses (12 credits) at the graduate 2000-level must be completed with a grade of B (3.00). A 3000-level course can be substituted for one of these, but only with the Academic Advisor's approval. At most, up to 12 credits of 1300-level undergraduate coursework listed in the "Advising" section of this document as acceptable for graduate credit may also be used to satisfy the department's 30-credit requirement. No more than six credits of graduate work completed at another institution may be accepted by the Graduate Committee toward the completion of the residence requirement. Credits earned for PHYS 2997 and PHYS 2998 may not be used to satisfy this requirement. No more than two non-physics graduate-level courses, approved in advance by the Director of Graduate Studies, will be considered for credit for the MS degree. Please refer to department's graduate website for details about the course and thesis options for this degree.

Department of Political Science

Overview of Department

The Department of Political Science offers the degrees of Master of Arts and Doctor of Philosophy. However, the MA degree functions primarily as a stepping-stone to the PhD. The department does not have a distinct MA program, and does not, except under very unusual circumstances, admit students for graduate study who seek a terminal Master of Arts degree. However, PhD students who, for various reasons, choose to discontinue their training after two years are eligible for a terminal MA, contingent upon the successful completion of the requirements outlined below.

Contact Information

Department Chair: Jae-Jae Spoon

Main Office: 4600 Wesley W. Posvar Hall

412-648-7250

Fax: 412-648-7277

E-mail: polisci@pitt.edu

<http://www.polisci.pitt.edu>

Graduate Program

The Department of Political Science offers the degrees of Master of Arts and Doctor of Philosophy. However, the MA degree functions as a stepping-stone to the PhD. The department does not have a terminal MA program, and does not admit students for graduate study who seek a terminal Master of Arts degree. However, PhD students who, for various reasons, choose to discontinue their training after two years are eligible for a terminal MA, contingent upon the successful completion of the requirements outlined below.

The graduate program in political science incorporates five fields:

- American Politics
- Comparative Politics
- Mass Political Behavior
- Political Research Methodology

- World Politics (International Relations)

Students choose two of these fields as areas of specialization. Students may combine work for the MA and PhD degrees with a program of regional or global specialization leading to a certificate in Global Studies, Latin American studies, Asian studies, West European studies, or Russian and East European studies.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University. For fall term admission and awards consideration, complete applications must be submitted by early January (see deadlines) 1. The department admits students only for the fall term.

Financial Assistance

Graduate students entering the program with a fellowship or teaching assistantship/teaching fellowship who have demonstrated high-quality graduate work and are maintaining good academic progress can expect to have financial aid renewed for up to five years. A graduate student who has not passed the PhD comprehensive examination in September of the fourth year of graduate work ordinarily is not eligible for additional financial assistance until these examinations are passed.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Political Science, PhD

Requirements for the PhD

Credit Requirement: A minimum of 72 credit hours, including the master's degree, earned from any suitable combination of formal course work, independent study, research, teaching, or dissertation work.

Course Requirements: Students must complete at least four graduate seminars from their examination field and at least three graduate seminars from their second field and receive a grade of an A- or above in at least two of these three classes and a grade of B+ above in the other class.

Comprehensive Examination: Students must successfully pass comprehensive examination in one of the department's examination fields in August following the successful completion of the MA qualifying paper. The purpose of the examination is to demonstrate that the student is capable of teaching a graduate-level seminar in the examining field and to assure that the student can synthesize and critically evaluate the literature.

Dissertation Overview: The overview consists of a carefully developed research design for the proposed Ph.D. dissertation. Students are expected to defend dissertation overview at the end of their third year in residence.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Supervised Teaching Experience: Supervised teaching experience is an integral part of the doctoral program. Normally, teaching experience is gained by conducting recitation sections of an introductory course or by assisting a faculty member in an undergraduate course, followed by the teaching of one's own course, in the fourth or fifth year of study.

The specifics of the PhD degree requirement can be found at Graduate Student Handbook.

Master's

Political Science, MA

Requirements for the MA

The department does not admit students who intend to pursue a terminal MA degree. Instead, the degree is assumed to be a milestone on the way toward a Ph.D. Terminal MA's are offered only to students who, for personal or professional reasons, cannot or choose not to continue their training beyond a minimum of two years of study.

Preliminary Examination: At the end of the first year of coursework, the full faculty assess the performance of each first-year student. This assessment comprises the college-mandated preliminary examination. Students who have earned a grade of A- or higher in each of their courses in the first year are automatically considered to have passed the preliminary examination. Students who have earned a grade of B+ or lower in one or more courses must submit a remediation plan to the Graduate Education Committee, via the Director of Graduate Studies, to remain in good standing in the program.

Credit Requirement: For the MA degree, students must earn 30 hours of credit with a B+ average or better in courses numbered 2000 level. Credits received from "Directed Reading" and "Directed Research" count toward this requirement, credit from PS 2905 (Teaching and Research in Political Science) does not. These courses must involve the completion of the eight-credit sequence of core courses (PS2000, PS2020, PS2030). These courses should be taken during the first year of graduate work, although they may be deferred to the second year in the case of conflicts in the students' academic schedule and with the permission of the Director of Graduate Studies and the instructor. In addition, students must complete at least four graduate seminars in one of the following fields: American Politics, Comparative Politics, International Relations, Mass Political Behavior, and Political Methodology.

MA Qualifying Paper: Students are required to write an MA qualifying paper and successfully defend it before the entire department by the end of their second year in the program.

The specifics of the MA degree requirement can be found at Graduate Student Handbook.

Department of Psychology

The department offers graduate training leading to a Doctor of Philosophy in psychology. Specialization in the fields of biological and health psychology, clinical psychology, cognitive psychology, developmental psychology, and social psychology is available, along with joint programs in clinical/developmental and clinical/health psychology. A specialization in Cognitive/Neuroscience is also available. The area of concentration in clinical psychology is accredited by the American Psychological Association. All graduate programs emphasize training in science and experimental research methods, including the clinical psychology program, which has the aim of producing the next generation of clinical scientists.

Contact Information

Department Chair: Julie Fiez
Main Office: 3137 Sennott Square
412-624-4502
Fax: 412-624-4428
E-mail: psygrad@pitt.edu
<http://www.psychology.pitt.edu/graduate-studies>

Admissions

Applications for admission must be submitted online by December 1. Admission is in the fall only. Applicants for admission to graduate study in psychology must submit academic transcripts, 3 letters of recommendation, and a statement of goals -which include reasons for pursuing a PhD, past research experience, clinical experience (if applicable), and other skills and experiences, including challenges one may have overcome, and if desired, any issues relevant to diversity, broadly considered. GRE requirements vary by program and applicants are advised to view the department's webpage for the latest details: [How to Apply | Psychology | University of Pittsburgh](#). Applicants to the clinical and joint-clinical programs may also submit scores for the GRE Subject test which is recommended, not required. Students may obtain information concerning the dates and places of administration of the GRE from the Graduate Record Examination, Educational Testing Service, Princeton, NJ 08541-0001; from www.ets.org; or from the testing service of their own college or university. International students must submit certified TOEFL scores; the minimum acceptable score is 90 on the Internet-based exam.

As preparation for graduate study, the department recommends broad undergraduate training including courses in biology, mathematics, the physical sciences, the social sciences, and effective oral and written expression. The department recommends college-level mathematics and 12 credits of psychology, including experimental psychology, statistics, and, for applicants to the clinical program, psychopathology (abnormal psychology).

Financial Assistance

The Department of Psychology provides tuition and stipend support for students admitted to its graduate programs. Support may be in the form of a fellowship, research assistantship, or teaching assistantship. Qualified students are encouraged to apply for relevant fellowships. Historically, the

department has been able to continue support for most students throughout their graduate training; however, funding is only guaranteed for four years.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Psychology, PhD

Requirements for the PhD

A minimum of 72 credits is required for the PhD. The credits are readily earned in the course of completing the regular requirements. Up to 24 credits may be granted for a master's degree awarded by another institution.

In addition to the credit requirement, the PhD in psychology requires:

1. Demonstration of proficiency in the program-specific core and required courses as described in the following links: biological and health, clinical, cognitive, developmental, and social.
2. Demonstration of competence in research at the master's level, with an oral defense of a master's thesis or equivalent work. (This may be waived for students entering with a master's degree.)
3. Maintenance of a B average (3.0) in all course work.
4. A comprehensive examination in a field of specialization.
5. Demonstration of teaching competence in a formal course setting.
6. A dissertation based on empirical research.
7. An oral examination concerned primarily with the dissertation.

It is possible to complete these requirements in four years, although most students take four to six years to complete the work for a PhD.

Clinical Program Note: Clinical students are also required to complete a one-year internship in an approved setting. This internship normally takes place after the student has met the requirements for admission to doctoral candidacy. For this reason, the minimum time in which a PhD may be earned in clinical psychology is one year longer.

Supervised Teaching: Each student is required to fulfill a requirement of teaching at least one supervised course.

Master's

Psychology, MS

Requirements for the Master's Degree

Normally, students are only admitted for graduate study leading to the PhD. If a student wishes, he or she may also obtain a master's degree by submitting an approved master's thesis and fulfilling the 30 credit course requirement. Satisfactory completion of the program's specific core courses (as described in the following links: biological and health, clinical, cognitive, developmental, and social) constitutes the comprehensive examination for the MS.

Minor

Quantitative Methodology Minor

Students pursuing a doctorate within the major of Psychology may now obtain a Minor in Quantitative Methodology.

Approval to pursue the Minor is contingent on:

A.) Being a student pursuing a graduate degree in Psychology in good standing. Written approval of the student's primary advisor.

B.) Completion of the standard 2-course sequence in graduate statistics in the Department with a grade of B+ or higher, or an approved waiver of this criterion based on equivalent prior coursework. The two required courses are Statistical Analysis 1 (PSY 2005) and Statistical Analysis 2 (PSY 2010).

C.) Completion of 3 additional courses in advanced quantitative methods with a grade of B+ or higher. These courses may be completed within or outside of the Department of Psychology. Courses taken to fulfill this requirement from other departments require approval by the current faculty administrator of the Minor. The psychology department currently offers three advanced quantitative methodological courses on a regular basis: Structural Equation Modeling (PSY 2090), Applied Longitudinal Data Analysis (PSY 2575 - Special Topics in Psychology), and Mixed Effects Models (PSY 2575 - Special Topics in Psychology). In addition, students may take advanced quantitative courses in other departments in the college (e.g., Department of Statistics, Department of Political Science), or outside of the college (e.g., School of Education, Carnegie Mellon University Machine Learning program). A list of previously approved courses can be found here: /sites/default/files/Quantcourses_asofNov2021_0.xlsx). Additional courses can be proposed by trainees and will be approved on an ad hoc basis following a review of the syllabus by a faculty member of the committee.

D.) Enrollment in (1 credit) and attendance of at least one semester's worth (6 lectures) of the Community for Advanced Methodological Learning (CAMEL: <https://psychology.pitt.edu/graduate/camel>) series, including a presentation of one lecture on a topic approved by the CAMEL organization committee.

E.) Demonstration of mastery of quantitative methodology through the inclusion of an advanced technique as part of a milestone or independent project that has been approved by one of the affiliated faculty.

For the purposes of evaluation, a number of faculty will constitute the Quantitative Minor review committee. Initially this review committee will comprise Drs. Aidan G.C. Wright, Elizabeth Votruba-Drzal, and Scott Fraundorf, and Rebecca Reed, and will be expanded or modified as needed moving forward and contingent on the availability of faculty with adequate expertise. The review committee will meet in the early spring semester of each academic year to review applications for the minor and each of the proposed requirements from those students who are pursuing the minor.

Evaluation of each of the proposed requirements are as follows:

For academic requirements B and C above, successful completion of the coursework with a grade of B+ or higher in each of the 5 courses will be evaluated by a review of the trainee's transcript. The Psychology Department graduate administrator will maintain a list of courses that are approved.

For academic requirement D, confirmation of attendance to CAMEL will be ascertained by review of the sign-in sheets collected at each meeting, and satisfactory presentation will be judged by one of the review committee faculty in attendance on the date of the student's presentation.

Finally, successful completion of requirement E, inclusion of an advanced methodological technique in a milestone project (i.e., Master's Thesis, Comprehensive Exam, or Doctoral Dissertation) or independent project, will be evaluated by one review committee member. The criterion for satisfactory completion will be commensurate with the requirements associated with the milestone project (i.e., the technique would need to be judged to be acceptable for satisfactory completion of the milestone project) or consistent with expected publication standards in the field, should the student choose to pursue an independent project. A review committee faculty member is not required to be part of the milestone project committee, and in the case that there is not an affiliated faculty member on the committee an independent evaluation of the application of the advanced statistical technique will be performed.

We wish that students currently enrolled, and who began their graduate training on or after the Fall Semester of 2014, be allowed to enroll in the Minor and retroactively apply their previously completed coursework, projects, and participation in CAMEL to the requirements of the Minor.

If you wish to pursue the Quantitative Minor, please do the following:

At least one year before you plan to graduate, email the Chair of the Quantitative Minor Committee (and cc your faculty mentor) to indicate that you intend to complete the quantitative minor. In this email, outline how you have completed or plan to complete the requirements A through E listed above.

At least one semester before you plan to graduate, complete this survey to obtain final approval for the Quantitative Minor: https://pitt.co1.qualtrics.com/jfe/form/SV_er4NdkNmRKg6Xoa.

Current Chair of the Quantitative Minor Committee: Rebecca Reed, PhD. Additional information can be found here: <https://psychology.pitt.edu/graduate/cross-training-options/minor-quantitative-methodology>.

Required Courses

- PSY 2005 - STAT ANAL 1/ADV STATS-UG
- PSY 2010 - STATISTICAL ANALYSIS 2
- PSY 2090 - STRUCTURAL EQUATION MODELING
- PSY 2575 - TOPICS IN PSYCHOLOGY
- EFOP 2416 - APPLIED MULTIVARIATE ANALYSIS
- STAT 2320 - APPLIED TIME SERIES

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers the degrees a Master of Arts (as a degree leading to the Doctor of Philosophy) and a Doctor of Philosophy, with an area of concentration in Russian literature and culture, including cinema. Students may combine work for the MA and PhD degrees with a program of regional specialization leading to a certificate in Russian and East European Studies; Cultural Studies; Film Studies; Gender, Sexuality, and Women's Studies; Jewish Studies; and others.

Eligible Slavic PhD students may apply, before taking the Slavic PhD comprehensive examinations, to transfer to Pitt's Interdisciplinary Film Studies PhD (with a concentration in Slavic), thereby working towards a single PhD in two disciplines. For information on the Interdisciplinary Film Studies PhD, see <http://www.english.pitt.edu/graduate/phd-film-studies>.

Contact Information

Department Chair: Bella Grigoryan
Main Office: 1225 Cathedral of Learning
412-624-9958
Fax: 412-624-9714
E-mail: slavic@pitt.edu
www.slavic.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Slavic Languages and Literatures, Graduate Administrator, 1301A Cathedral of Learning, Pittsburgh, PA 15260. Phone: 412-624-5227. Fax: 412-624-9714. E-mail: kec176@pitt.edu.

Admissions

Applicants for admission must submit transcripts of all college-level work, three letters of recommendation, a career statement, an academic writing sample, and scores on the verbal, quantitative, and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required to submit either the TOEFL administered by the Educational Testing or the IELTS administered by the University of Cambridge, Local Examinations Syndicate. Applications will be accepted for fall term admission until April 15. For awards consideration, applications must be completed by January 15. The department admits students only for the fall term. The department normally admits students only for the fall term.

Financial Assistance

Graduate students who have been admitted with a teaching or non-teaching fellowship for their first year of study will have their support renewed for at least an additional four years as long as 1) their teaching performance is satisfactory and 2) they are making regular progress in their graduate studies.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Slavic Languages and Literature, PhD

Requirements for the PhD

Credit Requirement: 72 graduate credits (36 beyond the MA), of which 12 may be dissertation credits; at least 60 credits must be completed by the end of the semester in which the examination is to be taken.

Approved Second Area: Nine-15 credits outside the department (but in the 72-credit total) in an approved second area (e.g., Russian and East European Studies, Cultural Studies, Film Studies, Study of Women, Gender and Sexuality, Jewish Studies, European literature, etc.).

Research Languages: A reading knowledge of both French and German is required before taking the PhD comprehensive exam.

PhD Qualifying Examinations: The MA comprehensive exam also serves as the PhD qualifying exam for those students who wish to pursue graduate work at the PhD level.

Supervised Teaching Experience: Supervised teaching experience is an integral part of the doctoral program. All PhD candidates have the opportunity to teach courses in language, literature, and culture, initially by assisting other instructors, and, at a more advanced stage, in stand-alone courses.

Comprehensive Examination: Students take a PhD comprehensive examination after approximately two years of coursework beyond the MA. For examination procedures visit <http://www.slavic.pitt.edu/graduate/examinations>.

Dissertation Overview: Following successful completion of the comprehensive examination, the student files an application for admission to candidacy for the Doctor of Philosophy. At this stage the student presents a proposed topic for doctoral research and a research design for its execution to be reviewed by the dissertation committee.

Dissertation Defense: The final oral examination in defense of the doctoral dissertation is conducted by the doctoral committee and is open to the University community.

Master's

Slavic Languages and Literature, MA

Requirements for the MA

For the MA, students must earn 36 hours of graduate credit with a B average or better in courses numbered 1000 or above. At least half of these credits must be in courses numbered 2000 or above. All MA students are required to complete RUSS 2110 - INTRODUCTION TO THE STUDY OF LITERATURE 1, RUSS 2210 - STRUCTURE OF RUSSIAN, and RUSS 2230 - HISTORICAL GRAMMAR. Courses are chosen in consultation between the student and DGS and are subject to approval by the latter. The remainder of student coursework is used to develop competence in Russian literature and culture or in an approved second area (see below). MA candidates must also demonstrate a reading knowledge of either French or German before taking the MA comprehensive exam.

The MA comprehensive exam covers material from a reading list. For examination procedures see <http://www.slavic.pitt.edu/graduate/examinations>.

Department of Sociology

The Department of Sociology offers the degrees of Master of Arts and Doctor of Philosophy. However, a terminal Master's degree is infrequently awarded, as students awarded Master's Degrees usually continue in the Department to receive PhD Degrees.

The faculty conduct research and offer courses within two broadly defined areas: 1) social movements and 2) politics and culture. Within each of these areas, graduate students are able to pursue a variety of theoretical, substantive, and methodological interests.

Graduate students are encouraged to combine their work in sociology with multidisciplinary study in a particular area by enrolling in any of the following certificate programs: African Studies, Asian Studies, European Studies, Global Studies, Latin American Studies, Russian and Eastern European Studies, Cultural Studies, or Gender, Sexuality, and Women's Studies.

412-648-7580
Fax: 412-648-2799
E-mail: lbrush@pitt.edu
www.sociology.pitt.edu/graduate/

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Sociology, Graduate Administrator, 4603 Posvar Hall, Pittsburgh, PA 15260. Phone: 412-648-7270. E-mail: pay13@pitt.edu.

Admissions

Qualified students from any discipline are considered for admission. Qualifications include preparation for graduate-level work in sociological theory and both qualitative and quantitative research methods, including a required course in social science applications of multivariable regression models. Applicants must submit to the departmental director of graduate studies transcripts of all college-level work, three letters of recommendation, a career statement, and a brief writing sample. International applicants are also required to submit TOEFL scores, unless they hold an undergraduate or graduate degree from an accredited U.S. college or university. All applications and application fees must be submitted on-line. Applications are accepted for fall term admission until January 15. The department admits students only for the fall term.

How to apply: <https://www.sociology.pitt.edu/graduate/how-apply>

Financial Assistance

Teaching assistantships and fellowships, Andrew W. Mellon Predoctoral Fellowships, Foreign Language and Area Studies Fellowships (administered by the University Center for International Studies), Provost Development Fellowships, and graduate student research assistantships are available.

Faculty

Dietrich School of Arts and Sciences Faculty

<http://www.sociology.pitt.edu/faculty>

Doctoral

Sociology, PhD

Requirements for the PhD

Admission: Prerequisite for admission is a Bachelor of Arts degree or equivalent preparation (plus approval from the Admissions Committee). If a Student has not yet received a Master's Degree at the time of application, the Department will require the student to pursue a Master's Degree at the University of Pittsburgh. The requirements for the Master's Degree are listed below. Those students entering with an MA degree from another institution may petition the Admissions Committee for a transfer of credits but core courses are usually not waived.

Credit Requirement: The PhD program requires 72 credits earned from a combination of the required core course sequences, MA courses, additional graduate sociology seminars, and any suitable combination from course work, independent study, research, and dissertation work as detailed elsewhere in this bulletin.

Supervised Teaching Experience: Supervised teaching experience is an integral part of the doctoral program. Typically, teaching experience is gained by conducting recitation sections of an introductory course and, once the MA is completed and the student has conducted recitations, by teaching an undergraduate course with the guidance of a faculty mentor.

Comprehensive Examination: The PhD comprehensive examination is an individually designed review essay using relevant research literatures to develop research questions for the dissertation and to support those questions with appropriate methodological and theoretical "best practices" in the field and substantive findings related to the dissertation project.

Dissertation Overview: At this stage students will have selected, in consultation with their dissertation committee, a suitable dissertation topic. Students present a written prospectus to their committee describing the purpose, scope, and method of proposed study and the sources upon which it will be based. Students are encouraged to give careful thought early on in their graduate work to possible doctoral research topics and discuss their interests with related faculty.

Final Oral Examination: The final oral examination in defense of the doctoral dissertation is conducted by the dissertation committee and is open to the University community.

Master's

Sociology, MA

Requirements for the Master's Degree

For the MA, students must earn 36 credits in approved graduate courses. The 36 credits must include completion of the nine credit core course sequence: Research Design, Social Theory, Qualitative Methods and Quantitative Methods, as well as at least 14 credits of elective graduate coursework in the sociology program with grades of B or better.

Students also write and defend a master's thesis for which they receive up to 6 credits.

Remaining credits may be earned with sociology electives (which may include 3 credits of directed study) or graduate coursework in other programs.

Department of Statistics

The Graduate Faculty offers various programs of study and research in statistics. Degree programs lead to the Master of Arts or Master of Science in applied statistics, the Master of Arts or Master of Science in statistics, and the Doctor of Philosophy in statistics. These may be pursued by full-time and part-time students. The department also provides courses for students engaged in graduate studies in other disciplines requiring statistics and for individuals requiring specialized statistical skills in the workplace. Full details of all programs and departmental regulations are available on the website at the address listed below.

Contact Information

Chair: Satish Iyengar

Main Office: 1800 Wesley W. Posvar Hall

412-624-8368

Graduate Admissions Administrator: Jay Drummond

E-mail: statadmin@pitt.edu

www.statistics.pitt.edu

Additional information concerning the department's graduate program may be obtained from the University of Pittsburgh, Department of Statistics, Academic Coordinator, 1800 Wesley W. Posvar Hall, Pittsburgh, PA 15260. Phone: 412-624-8280. E-mail: statadmin@pitt.edu.

Admissions

<http://www.statistics.pitt.edu/graduate/admissions>

A basic requirement for admission to the graduate program in statistics is the completion of a bachelor's degree from an accredited institution in the United States or the completion of a level of education that the University of Pittsburgh deems comparable to a U.S. bachelor's degree. Applicants whose native language is not English and who have not already completed a degree program in a U.S. college or university are required to submit either the TOEFL (administered by the Educational Testing Service) or the IELTS (administered by Cambridge University, Local Examinations Syndicate). Graduate Record Examination (GRE) scores are required.

Decisions regarding admission are based on the applicant's official credentials, grade point averages, and the availability of faculty and facilities to meet the applicant's expressed academic or research needs and interests. With limited space available, not all qualified applicants can be admitted.

The minimal course requirements for admission into the graduate programs of the Department of Statistics are:

- Three terms of calculus
- Linear algebra
- One year of probability and statistics, preferably an introductory mathematical statistics sequence

Students lacking some of these prerequisites may be admitted provisionally at the discretion of the Graduate Committee. In addition, students intending to pursue the PhD should either have taken a one-term course in advanced calculus, or be prepared to take such a course in the first year of graduate study.

Financial Assistance

<http://www.statistics.pitt.edu/graduate/financial-assistance>

Financial assistance for graduate students (PhD only) is provided in the form of teaching and research assistantships, fellowships, tuition scholarships, and loans. Application for financial aid should be made on the application form for admission to graduate study. All applications for financial assistance are reviewed in the department with award decisions made on the basis of prior academic excellence and achievement and perceived potential for contributions to the field of statistics.

Students applying for fellowships or assistantships for the fall term should file their applications no later than January 15 of the same year.

Requirements for the Master's Degree in Statistics or Applied Statistics

<http://www.stat.pitt.edu/graduate-programs>

The department encourages its students to obtain a broad background in statistics, including both methods and theory courses, regardless of whether they specialize in applied statistical methodology or in statistical theory. Consequently, two-term sequences in applied statistical methods (STAT 2131-STAT 2132) and intermediate mathematical statistics (STAT 2630-STAT 2640) are common to all master's degree programs offered by the department, and are also generally taken by students whose goal is the PhD in statistics.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Statistics, PhD

Requirements for the PhD

The main requirement for the Doctor of Philosophy in statistics is the successful completion and defense of a dissertation making a substantial and original contribution to statistics, probability, or their application. Prior to embarking on their research, candidates must pass the qualifying exam (see Requirements for the Master's Degree above) at the PhD level. To be admitted to PhD candidacy, candidates must successfully pass an oral PhD Comprehensive examination over an area of research chosen in consultation with their advisory committee. The purpose of the comprehensive examination is to demonstrate that students are able to understand, summarize, and make use of the statistical literature in an area of potential research that is of interest to them. Students who have found a specific topic for their dissertation are encouraged to combine the comprehensive examination with the presentation of the thesis proposal. Students who are not yet ready to present a proposal can still take the comprehensive exam, but must later submit a thesis proposal orally and in writing to their advisory committee.

Course requirements for the PhD are STAT 2631 - THEORY OF STATISTICS 1, STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS, STAT 2661 - LINEAR MODELS THEORY 1, and STAT 2711-STAT 2712 (Probability Theory) or their equivalent. PhD candidates are also required to take at least three credits in statistical consulting; those students anticipating a career involving consulting are advised to take a substantial number of consulting credits. The remaining courses of the 72 credits required for the PhD will be decided in conjunction with the student's advisor and should consist of mainly formal courses prior to the commencement of research for the dissertation.

The department has no second language requirements for the PhD. Although not required, facility in the use of one or more computer programming languages, especially those used in writing statistical software (for example, SAS, R), is highly recommended.

Full-time graduate students usually take between four and five years to complete a PhD. Part-time students may be allowed as many as 10 years to finish all requirements. Additional information concerning examinations and requirements can be found in the Graduate and Professional Bulletin and the Kenneth P. Dietrich School of Arts and Sciences (A&S).

Master's

Applied Statistics, MA

Master of Arts

Department requirements for the Master of Arts in Applied Statistics and Master of Arts in Statistics are the completion of 30 credits.

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 30 credits and the passing of the Preliminary Evaluation as explained about.

Applied Statistics

1. Five Required Courses:

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

2. Three graduate level statistics elective courses (9 credits). Currently four statistics electives (12 credits) are required.

3. Two graduate courses in a field other than statistics to which students might apply statistical methods (6 credits).

Statistics

1. Four Required Courses (12 credits):

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

2. Six graduate level statistics elective courses (18 credits).

Applied Statistics, MS

Master of Science

The requirements for the Master of Science, either in applied statistics or in statistics for a total of 30 credits.

Applied Statistics

1. Five Required Courses (15 credits):

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

2. One graduate level statistics elective courses (3 credits).

3. Two graduate courses in a field other than statistics to which students might apply statistical methods (6 credits).

4. Two graduate level thesis credit courses (6 credits)

Statistics

1. Four Required Courses (12 credits):

- STAT 2630 - INTERMEDIATE PROBABILITY
- STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2631 - THEORY OF STATISTICS 1
- STAT 2632

2. Four graduate level statistics elective courses (12 credits).

3. Two graduate level thesis credit courses (6 credits)

Statistics, MA

Master of Arts

Department requirements for the Master of Arts in Applied Statistics and Master of Arts in Statistics are the completion of 30 credits.

The Master of Arts in Statistics differs from the Master of Arts in Applied Statistics by replacing the requirements of a two-course sequence in a discipline other than statistics and 3 credits in consulting with the requirement that three additional 3-credit graduate-level statistics courses be taken. Both master's degrees require completion of 30 credits and the passing of the Preliminary Evaluation as explained about.

Teaching of English to Speakers of Other Languages (TESOL) Program

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition or teaching English language learners, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).

- Higher Education Course
- ESL Program Specialist Course

Application Deadline:

March 15 for the following fall term start date.

Certificate

TESOL Certificate

TESOL is an acronym for Teachers of English to Speakers of Other Languages. Professionals in TESOL may be involved in teaching, administration, curriculum development, materials development, assessment, research, and advocacy. They work in a variety of contexts including various age levels, countries, and specialist areas such as English for specific purposes. This TESOL certificate program includes the study of: linguistics at an introductory level, structures of English, theories and practices of teaching second language, second language acquisition, materials and curriculum development, and assessment.

The Department of Linguistics offers two courses in the Teaching of English to Speakers of Other Languages (TESOL).

- ESL Program Specialist Course
- Higher Education Course

ESL Program Specialist Course

Requirements

Any student who wished to earn the certificate must fulfill the following requirements:

Prerequisite

(or taken concurrently with the first certificate course)

LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT

TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS

TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

TEACHING PRACTICUM - TLL 2791 - SUPERVISED RESEARCH - FOREIGN LANGUAGE (Term varies)

Please note:

1. LING 2195 - PRACTICUM ESL TEACHING involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING. Candidates fulfill the requirement by signing up for TLL 2791 and completing their practicum in a K-12 context with the support of the School of Education, Department of Teaching, Learning, and Leading, or, with permission of the TESOL Certificate advisor, another ESL teaching context.
2. The certificate candidate must earn a grade of B or higher in each certificate course.

Degree Prerequisite for Admission

Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).

Instructional I Prerequisite

Applicants must hold a Pennsylvania Instructional I certificate (or equivalent from another state) and be able to provide a copy as part of the application packet.

Additional Language Learning Prerequisite for Admission

Native Speakers of English:

Native speakers of English must have classroom foreign language learning experience equivalent to at least one year of college level study of a language other than English and/or have learned a foreign language during an overseas living/work experience.

Native Speakers of Other Languages:

- Recommendations for applicants who are non-native speakers of English are as follows:
- Recommended TOEFL Score: 95 or higher on the iBT TOEFL (Skill Requirements: Reading and Listening - 22 or above; Speaking and Writing - one skill must be at the level of Advanced)
- Recommended IELTS Score: 7 or higher on the IELTS (Skill Requirements: Speaking and Writing - combined minimum of 13)
- Admitted students in TESOL-related programs who are non-native speakers of English must have good spoken English skills as determined by a score of at least 4 on the International Teaching Assistant interview test administered by the University of Pittsburgh. These students must successfully complete the interview before graduating.

Transcripts and CV and Teaching Certificate

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application. In addition, a copy of the applicant's state teaching certificate must be included in the application materials.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications. Additional paperwork for the state endorsement must be filed with the Pennsylvania Department of Education with the help of the School of Education.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

Four-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

Fall:

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

- [PRACTICUM]

Spring:

- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

***Note:**

Students must enter the program in the fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Higher Education Course

Requirements

Higher Education Course Requirements

Any student who wishes to earn the certificate at the MA or PhD level:

Prerequisite

(or taken concurrently with the first certificate course)

- LING 1000 - INTRODUCTION TO LINGUISTICS

Course Requirements

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2146 - SECOND LANGUAGE ACQUISITION
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- LING 2195 - PRACTICUM ESL TEACHING (Term varies)
- *PhD students must take an additional 3 credit course approved by the TESOL Certificate Advisor*

Please Note:

1. LING 2195 - PRACTICUM ESL TEACHING involves supervised language teaching concurrent with or following LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING . Teaching Assistants who are teaching in the English Language Institute automatically fulfill the Practicum requirements, but they must sign up for LING 2195 - PRACTICUM ESL TEACHING once during their teaching terms. Other candidates fulfill the requirement by signing up for LING 2195 - PRACTICUM ESL TEACHING and teaching during that term in an informal ESL course run by the English Language Institute, OR, with permission of the TESOL certificate advisor, another ESL teaching context.
2. The certificate candidate must earn a grade of B or higher in each certificate course.
3. Those applying for graduate degrees will completed the TESOL Certificate program application process after gaining acceptance to the degree program.

Degree Prerequisites for Admission

Applicants must hold a baccalaureate degree or its foreign equivalent with a minimum grade point average of B (3.0 on a 4-point scale). Preference is given to applicants who have studied abroad, worked with international students, and/or have any EFL/ESL teaching experience (including volunteer).

Additional Language Learning Prerequisite for Admission

Native Speakers of English:

Native speakers of English must have classroom foreign language learning experience equivalent to at least one year of college level study of a language other than English and/or have learned a foreign language during an overseas living/work experience.

Native Speakers of Other Languages:

- Recommendations for applicants who are non-native speakers of English are as follows:
- Recommended TOEFL Score: 95 or higher on the iBT TOEFL (Skill Requirements: Reading and Listening - 22 or above; Speaking and Writing - one skill must be at the level of Advanced)
- Recommended IELTS Score: 7 or higher on the IELTS (Skill Requirements: Speaking and Writing - combined minimum of 13)
- Admitted students in TESOL-related programs who are non-native speakers of English must have good spoken English skills as determined by a score of at least 4 on the International Teaching Assistant interview test administered by the University of Pittsburgh. These students must successfully complete the interview before graduating.

Transcripts and CV

Undergraduate transcripts (and graduate if applicable) and a CV (including a list of references) must be submitted as part of the application.

Plan of Study

Students must complete a TESOL certificate plan of study form after consultation with the TESOL Certificate advisor during the first term of study. The student then will work with academic advisor if earning a graduate degree, or the TESOL Certificate advisor if not in a degree program.

Completion of Requirements

When nearing completion of all TESOL certificate requirements, students must apply for graduation from the TESOL Certificate program through the Arts and Sciences Dean's Office. This graduation application is separate from any other degree graduation applications.

Suggested Sequence of Courses

Two-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- [PRACTICUM]
- Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]
- Elective for PhD-level students

Four-term Option

(entering in the fall term)

Fall:

- LING 1000 - INTRODUCTION TO LINGUISTICS (if needed)
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- Elective for PhD-level students

Spring:

- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 2146 - SECOND LANGUAGE ACQUISITION
- Elective for PhD-level students

Fall:

- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective for PhD-level students
- [PRACTICUM]

Spring:

- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- [PRACTICUM]

Note:

*Students must enter the program in the Fall term. Students may complete LING 1000 - INTRODUCTION TO LINGUISTICS prior to the fall term, however.

Department of Theatre Arts

The Department of Theatre Arts, founded in 1982, offers the MA, MFA, and PhD degrees, which integrate training and practice in the theater with scholarship and research in the liberal arts tradition. The minimal requirements for the degrees established by the Graduate Faculty and by A&S Graduate Studies, as described elsewhere in this bulletin, should be read in conjunction with the specific departmental requirements outlined in the Theatre Arts Graduate Handbook. A printed version may be requested by writing the Graduate Student Services Administrator: jes379@pitt.edu

For additional information on these aspects of study in the theatre arts at Pitt, visit the department website: www.play.pitt.edu.

Contact Information

Admissions

Applicants to the PhD program in Theatre and Performance Studies should demonstrate a desire for rigorous research at the PhD level; potential for teaching excellence; interest in the exploration of artistic practice; and capacity for creative and critical risk-taking (in terms of research, artistic practice, and teaching). An MA in theatre arts is not a prerequisite for admission to the program. The department admits some highly qualified students with BAs directly into the PhD program.

Applicants to the MFA Program in Performance Pedagogy must demonstrate a desire to develop a pedagogical approach to teaching performance; exhibit potential for teaching excellence; show interest in practice-based research; demonstrate ability to collaborate across degree programs; and display a willingness to continue professional experience outside of the classroom. Successful applicants will be seasoned professional actors willing to make a full commitment of time and energy to the program.

An undergraduate major in theatre arts is normally a prerequisite for admission to the program, though exceptions can be made if circumstances warrant. Because candidates will be teaching extensively during their residency, some teaching experience is preferred.

Please check the department website for updates on when we will be admitting the next MFA class.

Rubrics with admissions criteria are available for both programs on our department website.

Financial Assistance

The department offers teaching assistantships (TAs) and teaching fellowships (TFs) to MFA and PhD students. The requirements established by the Office of Admissions and Financial Aid must be met in order for students to be eligible. All students receiving TAs and TFs, receive a full aid package that includes tuition, health benefits, and a stipend. Doctoral students also are eligible for university fellowships, including the Provost's Humanities Fellowship and K. Leroy Irvis Fellowship.

Faculty

Dietrich School of Arts and Sciences Faculty

Doctoral

Theatre and Performance Studies in Theatre Arts, PhD

The PhD program in Theatre and Performance studies prioritizes the integration of scholarship with teaching and artistic practice in order to prepare students to be competitive candidates for academic positions at a variety of institutions, post-doctoral research opportunities, and employment sectors beyond academia. In line with the department's intellectual vision, the program integrates theory and practice and focuses on underrepresented groups and areas of research, including migration, disability studies, race, gender, sexuality, religion, and transnationalism, across historical, historiographical, literary, performance, and practice-based research methodologies.

The program integrates scholarship with experiential learning opportunities through a curricular requirement called the Immersive Practice Credential. Each student develops a 12-15 credit program of individualized study focused on an area of artistic practice, such as directing, dramaturgy, or playwriting, or a professional career outside of the academy, such as Public Humanities or Education and Community Engagement. In their Immersive Practice Credential coursework, students work with Theatre Arts faculty and MFA students as well as pursue professional training and internship opportunities outside of the university.

Mentored by faculty, each student develops their pedagogy through scaffolded teaching opportunities. These experiences allow students to acquire and practice pedagogical skills in smaller practice-based classes as well as larger lecture and discussion courses in theatre history, performance studies, and script analysis for majors and non-majors.

Degree Requirements

A minimum of three years or six terms of full-time residency is required. It is not possible to complete the degree on a part-time basis.

72 credit hours, of which 30 can be granted for an approved Master's degree or its equivalent, are required past the BA, made up of courses stipulated in the curriculum and electives (including independent study, directed study, in-training programs, and dissertation credits).

Students are required to demonstrate advanced knowledge in one foreign language sufficient to read criticism and drama in the language and sufficient to allow them to attend a play in the language and understand it reasonably well. The language requirement may be fulfilled in four ways.

Up to three sections of World Theatre (as designated by the Diagnostic Exam)

Nine seminar-level courses in history, literature, and critical theory of theatre and performance studies. During the first two semesters of a full-time PhD student's program, they must take at least three of these seminars in the Department of Theatre Arts.

At least seven of the nine required courses will be advanced graduate seminars in the Department of Theatre Arts (2000 series). The others may be graduate-level (2000 series) listed in any appropriate University department. Courses labeled "research," "directed study," or "independent study" cannot be used to fulfill this requirement, except by approval of the Graduate Faculty. The student's advisor will regularly monitor selection of courses, and approve the overall sequence chosen. No lower-level undergraduate courses numbered 0001-0999 may be applied toward a graduate degree.

PhD Prelim Evaluation

All students who enter the PhD program are required to take the preliminary examination. Students in their first year of doctoral study must take a minimum of three seminars in the department. Their work in those seminars shall constitute the basis for the prelim exam. The exam is designed to assess students' critical thinking, facility with methodology, and writing skills as well as ability to articulately discuss the course material in the selected seminars.

Comprehensive Exam

By the end of their second year, students should begin to consider and discuss with faculty areas for their comprehensive exam that fall into the three categories: Critical Methodologies and Theoretical Discourses; Historical Discourses; Textual Discourses. By the beginning of their third year, three areas of study should be approved. Through the comprehensive examination, students demonstrate both breadth and depth in regards to theatre and performance history, theory, and practice.

Proposal/overview

The prospectus proposes the subject and plan for the completion of the dissertation. The graduate faculty member who will serve as chair for the student's dissertation committee will provide guidance for the completion of the prospectus. Once the committee chair has approved the prospectus, the student will schedule a defense with all of the members of their PhD committee.

Dissertation and Final Examination

The University of Pittsburgh's *Graduate and Professional Bulletin* outlines the requirements for the final stage of the degree, which is the preparation and defense of a dissertation. This written work, which must embody an extended original investigation of a problem of significance to theatre arts or performance studies, is the capstone to the research program of a student's training.

Master's

Performance Pedagogy in Theatre Arts, MFA

Designed to equip working, professional actors with the tools to expand their employment opportunities in teaching at the college and university level, the MFA in Performance Pedagogy at the University of Pittsburgh offers a dynamic synthesis of teaching, practice, and scholarship.

This program is based on the premise that the professional actor has already gained a level of craft and broad experience that can become the foundation for solid teaching skills. Therefore, emphasis is placed on exploration and strengthening of pedagogical techniques as related to areas of acting and performance training.

Each student is given the mentorship of an experienced teacher of performance and works closely with the mentor to create opportunities for independent studies in pedagogy and curriculum development. Students gain experience applying theory to the practice of teaching acting and performance classes every semester, creating a course, conducting master class workshops, working on production assignments, and coaching or advising undergraduate students as needed. Students are encouraged to develop an area of specialty and to develop other areas of training in order to broaden their knowledge and remain competitive in the academic market.

Degree Requirements

The curriculum for the MFA degree in Performance Pedagogy centers around three focus areas:

1. Pedagogical Study
2. History/Literature/Criticism
3. Practice of Acting and/or other performance styles
4. Other Electives

Each semester students are expected to carry a 15-credit load in addition to teaching two performance classes. Classroom teaching serves as fulfillment of the student's work obligation to the university in addition to providing a laboratory for applying the pedagogical ideas under study.

of courses required (list core courses, etc.)

60 credits are required for the program: 36-39 credits in pedagogy; 15 credits in History, Literature and Criticism; and 3-6 credits in electives. Core courses include: Techniques in Performance Pedagogy, Course Development, Production Mentorship, and Directed Studies in Pedagogy.

Thesis and Final Examination

The thesis project is the final requirement for the Performance Pedagogy degree. It is comprised of an original, created course, a substantial written document that serves as a teaching guidebook for other instructors interested in using the thesis topic in the classroom, and an oral defense of the written document. The thesis document identifies a pedagogical question, investigates that question through research and classroom work, and identifies conclusions reached and considerations for future revisions of the course. Thesis documents typically range from 40-80 pages in length and are directly connected to the created course devised by the student.

Last Name	First Name	Rank	Department	Highest Degree	Conferring Institution
Alter	Joseph	Professor	Anthropology	PhD	California, Berkeley, University of
Alvarado	Louis	Assistant Professor	Anthropology	PhD	New Mexico, Albuquerque, University of
Arkush	Elizabeth	Associate Professor	Anthropology	PhD	California, Los Angeles, University of
Bermann	Marc	Associate Professor	Anthropology	PhD	Michigan, Ann Arbor, University of
Cabot	Heath	Associate Professor	Anthropology	PhD	California, Santa Cruz, University of
Constable	Nicole	Professor	Anthropology	PhD	California, Berkeley, University of
Drennan	Robert	Distinguished Professor	Anthropology	PhD	Michigan, Ann Arbor, University of
Dubuisson	Darlène	Assistant Professor	Anthropology	PhD	Columbia University
Ebert	Claire	Assistant Professor	Anthropology	PhD	Pennsylvania State University
Hanks	Bryan	Associate Professor	Anthropology	PhD	Cambridge, University of
Judd	Margaret	Associate Professor	Anthropology	PhD	University of Alberta
Lukacs	Gabriella	Associate Professor	Anthropology	PhD	Duke University
Matza	Tomas	Assistant Professor	Anthropology	PhD	Stanford University

Strathern	Andrew	Andrew Mellon Professor	Anthropology	PhD	Cambridge, University of
Wanderer	Emily	Assistant Professor	Anthropology	PhD	Massachusetts Institute of Technology
Arndt	Karen	Professor	Biological Sciences	PhD	California, Berkeley, University of
Ashman	Tia-Lynn	Distinguished Professor	Biological Sciences	PhD	California, Davis, University of
Ashmore	Lesley	Lecturer II	Biological Sciences	PhD	Pennsylvania, University of
Berman	Andrea	Associate Professor	Biological Sciences	PhD	Yale University
Boyle	Jon	Associate Professor	Biological Sciences	PhD	Wisconsin, Madison, University of
Brodsky	Jeffrey	Professor/(Avinoff Professor)	Biological Sciences	PhD	Harvard University
Brouwer	Nathan	Lecturer	Biological Sciences	PhD	Pittsburgh, Main, University of
Butela	Kristen	Lecturer II	Biological Sciences	PhD	Pittsburgh, Main, University of
Cahoon	Laty	Assistant Professor	Biological Sciences	PhD	Northwestern University
Campbell	Gerard	Associate Professor	Biological Sciences	PhD	Leicester, University of
Carlson Rosenbaum	Anne	Assistant Professor	Biological Sciences	PhD	Washington, University of
Carson	Walter	Associate Professor	Biological Sciences	PhD	Cornell University Endowed Colleges
Chapman	Deborah	Associate Professor	Biological Sciences	PhD	Columbia University, Main Division
Damiani	Candice	Lecturer II	Biological Sciences	PhD	West Virginia University
Donovan	Samuel	Lecturer	Biological Sciences	PhD	Wisconsin, Madison, University of
Durrant	Jacob	Assistant Professor	Biological Sciences	PhD	California, San Diego, University of
Gardner	Kathryn	Lecturer II	Biological Sciences	PhD	North Carolina, Chapel Hill, University of
Gharaibeh	Burhan	Lecturer II	Biological Sciences	PhD	Texas Tech University
Gribble	Suzanna	Lecturer II/Co-Director of Undergraduate Program	Biological Sciences	PhD	Utah, University of
Hainer	Sarah	Assistant Professor	Biological Sciences	PhD	Pittsburgh, Main, University of
Hatfull	Graham	Professor/(Eberly Family Prof)	Biological Sciences	PhD	Edinburgh, University of
Hedayati	Stefanie	Lecturer	Biological Sciences	PhD	Stanford University

Hildebrand	Jeffrey	Associate Professor	Biological Sciences	PhD	Virginia, University of
Kaplan	Craig	Associate Professor	Biological Sciences	PhD	Harvard University
Kaufmann	Nancy	Senior Lecturer	Biological Sciences	PhD	Harvard University
Kelsey	Ellen	Lecturer II	Biological Sciences	MS	Rochester, University of
Kiselyov	Kirill	Associate Professor	Biological Sciences	PhD	Russian Academy of Science, Moscow
Kitzes	Justin	Assistant Professor	Biological Sciences	PhD	California, Berkeley, University of
Kohl	Kevin	Assistant Professor	Biological Sciences	PhD	Utah, University of
Kuebbing	Sara	Assistant Professor	Biological Sciences	PhD	Tennessee, Knoxville, University of
Lawrence	Jeffrey	Professor & Chair	Biological Sciences	PhD	Washington University
Lee	Miler	Assistant Professor	Biological Sciences	PhD	Pennsylvania, University of
Levin	Tera	Assistant Professor	Biological Sciences	PhD	California, Berkely, University of
McGreevy	Erica	Lecturer II	Biological Sciences	PhD	Pittsburgh, Main, University of
Newman-Griffis	Anna	Lecturer	Biological Sciences	PhD	Ohio State University
O'Donnell	Allyson	Assistant Professor	Biological Sciences	PhD	Dalhousie University, Canada
Oke	Valerie	Senior Lecturer/Co-Director of Undergraduate Program/Assistant Chair	Biological Sciences	PhD	Harvard University
O'Reilly	Linda	Lecturer	Biological Sciences	PhD	University College Dublin
Payne	Kimberly	Lecturer	Biological Sciences	PhD	Pittsburgh, Main, University of
Pipas	James	Professor and Herbert W. and Grace Boyer Chair	Biological Sciences	PhD	Florida State University
Rebeiz	Mark	Associate Professor	Biological Sciences	PhD	California, San Diego, University of
Richards-Zawacki	Corinne	Professor & PLE Director	Biological Sciences	PhD	Michigan, Ann Arbor, University of
Roberts	Laurel	Senior Lecturer	Biological Sciences	PhD	Pittsburgh, Main, University of
Saunders	William	Associate Professor	Biological Sciences	PhD	Johns Hopkins University
Schwacha	Anthony	Associate Professor	Biological Sciences	PhD	Harvard University
Slinsky Legg	Alison	Senior Lecturer	Biological Sciences	PhD	Pittsburgh, Main, University of
Stephenson	Jessica	Assistant Professor	Biological Sciences	PhD	Cardiff University Wales

Swigonova	Zuzana	Lecturer II	Biological Sciences	PhD	Rutgers University, New Brunswick
Turcotte	Martin	Assistant Professor	Biological Sciences	PhD	California, Riverside, University of
Van Demark	Andrew	Associate Professor	Biological Sciences	PhD	Johns Hopkins University
Wagner	Katie	Lecturer	Biological Sciences	PhD	Cincinnati, University of
Wandelt	Jessica	Lecturer II	Biological Sciences	PhD	Arizona, University of
Warner	Marcie	Lecturer II	Biological Sciences	PhD	Pittsburgh, Main, University of
West	Abagael	Lecturer	Biological Sciences	PhD	Columbia University
Wetzel	Dan	Lecturer	Biological Sciences	PhD	Kentucky, University of
Zapanta	Laura	Lecturer II	Biological Sciences	PhD	Pennsylvania State University, Main
Zhu	Xiaodong	Lecturer	Biological Sciences	PhD	Pittsburgh, Main, University of
Amemiya	Shigeru	Associate Professor	Chemistry	PhD	Tokyo, University of
Asher	Sanford	Distinguished Professor	Chemistry	PhD	California, Berkeley, University of
Bandik	George	Senior Lecturer	Chemistry	PhD	Pittsburgh, Main, University of
Brummond	Kay	Professor	Chemistry	PhD	Harvard University
Childers	William	Assistant Professor	Chemistry	PhD	Emory University
Chong	Lillian	Associate Professor	Chemistry	PhD	California, San Francisco, University of
Coalson	Rob	Professor	Chemistry	PhD	Harvard University
Cooper	N. John	Professor	Chemistry	DPhil	Oxford, University of
Curran	Dennis	Distinguished Service Professor/(Bayer Prof)	Chemistry	PhD	Rochester, University of
Deiters	Alexander	Professor	Chemistry	PhD	Munster, University of
Floreancig	Paul	Professor	Chemistry	PhD	Stanford University
Fortney	Carol	Lecturer	Chemistry	PhD	Pittsburgh, Main, University of
Garrett-Roe	Sean	Assistant Professor	Chemistry	PhD	California, Berkeley, University of
Grabowski	Joseph	Associate Professor	Chemistry	PhD	Colorado, Boulder, University of
Horne	William	Associate Professor	Chemistry	PhD	Scripps Research Institute

Huston	Erica	Senior Lecturer	Chemistry	PhD	Maryland, College Park, University of
Hutchison	Geoffrey	Associate Professor	Chemistry	PhD	Northwestern University
Islam	Kabirul	Assistant Professor	Chemistry	PhD	Indian Institute of Science, India
Jordan	Kenneth	Distinguished Professor and Richard King Mellon Professor	Chemistry	PhD	Massachusetts Institute of Technology
Koide	Kazunori	Associate Professor	Chemistry	PhD	California, San Diego, University of
Laaser	Jennifer	Assistant Professor	Chemistry	PhD	Wisconsin, Madison, University of
Lambrecht	Daniel	Assistant Professor	Chemistry	PhD	Tubingen, University of
Liu	Haitao	Associate Professor	Chemistry	PhD	California, Berkeley, University of
Liu	Peng	Assistant Professor	Chemistry	PhD	California State University, Los Angeles
Liu	Xinyu	Assistant Professor	Chemistry	PhD	Swiss Federal Institute of Technology
Maleckar	Susan	Lecturer	Chemistry	PhD	Pittsburgh, Main, University of
Meyer	Tara	Associate Professor	Chemistry	PhD	Iowa, University of
Michael	Adrian	Professor	Chemistry	PhD	Emory University
Millstone	Jill	Associate Professor	Chemistry	PhD	Northwestern University
Morris	Hannah	Lecturer	Chemistry	PhD	Pittsburgh, Main, University of
Nelson	Scott	Professor	Chemistry	PhD	Rochester, University of
Rosi	Nathaniel	Professor	Chemistry	PhD	Michigan, Ann Arbor, University of
Hernández Sánchez	Raúl	Assistant Professor	Chemistry	PhD	Harvard University
Saxena	Sunil	Professor	Chemistry	PhD	Cornell University Endowed Colleges
Star	Alexander	Professor	Chemistry	PhD	Tel Aviv University
Wagner II	Eugene	Senior Lecturer	Chemistry	PhD	North Georgia, University of
Waldeck	David	Professor	Chemistry	PhD	Chicago, University of
Wang	Yiming	Assistant Professor	Chemistry	PhD	UC Berkley

Ward	Michelle	Lecturer II	Chemistry	PhD	Pittsburgh, Main, University of
Weber	Stephen	Professor	Chemistry	PhD	McGill University
Wilcox	Craig	Professor	Chemistry	PhD	California Institute of Technology
Wipf	Peter	Distinguished University Professor	Chemistry	PhD	Zurich, University of
Bromberg	Jacques	Assistant Professor	Classics	PhD	Pennsylvania, University of
Hoenig	Christina	Associate Professor	Classics	PhD	Cambridge, University of
Jones	Nicholas	Professor	Classics	PhD	California, Berkeley, University of
Possanza	D. Mark	Associate Professor	Classics	PhD	North Carolina, Chapel Hill, University of
Wildberg	Christian	Andrew W. Mellon Professor	Classics	PhD	Cambridge, University of
Bruce	Caitlin	Assistant Professor	Communication	PhD	Northwestern University
Clarke	Lynn	Lecturer	Communication	PhD	Northwestern University
Johnson	Paul	Assistant Professor	Communication	PhD	Iowa, University of
Kuchinskaya	Olga	Associate Professor	Communication	PhD	California, San Diego, University of
Malin	Brenton	Associate Professor	Communication	PhD	Iowa, University of
Marshall	David	Associate Professor	Communication	PhD	Johns Hopkins University
Matheson	Calum	Assistant Professor	Communication	PhD	North Carolina, Chapel Hill, University of
Mitchell	Gordon	Associate Professor	Communication	PhD	Northwestern University
Olson	Lester	Professor	Communication	PhD	Wisconsin, Madison, University of
Zboray	Ronald	Professor	Communication	PhD	New York University
Ahn	Daniel	Assistant Professor	Computer Science	PhD	Illinois, Urbana, University of
Chang	Shi-Kuo	Professor	Computer Science	PhD	California, Berkeley, University of
Childers	Bruce	Professor	Computer Science	PhD	Virginia, Main, University of
Chrysanthis	Panos	Professor	Computer Science	PhD	Massachusetts, Amherst, University of
Farnan	Nicholas	Lecturer	Computer Science	PhD	Pittsburgh, Main, University of

Hauskrecht	Milos	Professor	Computer Science	PhD	Massachusetts Institute of Technology
Hwa	Rebecca	Associate Professor	Computer Science	PhD	Harvard University
Kosiyatrakul	Thumrongsak	Lecturer	Computer Science	PhD	Syracuse University, Main
Kovashka	Adriana	Assistant Professor	Computer Science	PhD	Texas, Austin, University of
Labrinidis	Alexandros	Associate Professor	Computer Science	PhD	Maryland, College Park, University of
Lange	John	Associate Professor	Computer Science	PhD	Northwestern University
Lee	Adam	Associate Professor	Computer Science	PhD	Illinois, Urbana, University of
Litman	Diane	Professor	Computer Science	PhD	Rochester, University of
Melhem	Rami	Professor	Computer Science	PhD	Pittsburgh, Main, University of
Misurda	Jonathan	Lecturer II	Computer Science	PhD	Pittsburgh, Main, University of
Mosse	Daniel	Professor	Computer Science	PhD	Maryland, College Park, University of
Pruhs	Kirk	Professor	Computer Science	PhD	Wisconsin, Madison, University of
Ramirez	John	Senior Lecturer	Computer Science	PhD	Pittsburgh, Main, University of
Wang	Jingtao	Assistant Professor	Computer Science	PhD	California, Berkeley, University of
Wiebe	Janyce	Professor	Computer Science	PhD	State University of New York, Buffalo
Zhang	Youtao	Associate Professor	Computer Science	PhD	Arizona, University of
Znati	Taieb	Professor	Computer Science	PhD	Michigan State University
Cheng	Bei	Assistant Instructor	East Asian Languages and Literatures	MA	Iowa, University of
Exley	Charles	Assistant Professor	East Asian Languages and Literatures	PhD	Yale University
Fan	Fan	Visiting Assistant Instructor	East Asian Languages and Literatures	MS	Indiana University Bloomington
Hsieh	Wan-Ching	Assistant Instructor	East Asian Languages and Literatures	MEd	Pennsylvania, University of
Joo	Kyungok	Assistant Instructor	East Asian Languages and Literatures	MA	Columbia University
Kanisawa Kowalchuck	Noriko	Assistant Instructor	East Asian Languages and Literatures	MEd	Pittsburgh, Main, University of

Kim	Mi-Hyun	Lecturer	East Asian Languages and Literatures	PhD	Hawaii, Manoa, University of
Kyung Jung	Boo	Assistant Instructor	East Asian Languages and Literatures	Unknown	Unknown
Luft	Stephen	Lecturer	East Asian Languages and Literatures	PhD	Ohio State University Main
Nara	Hiroshi	Professor	East Asian Languages and Literatures	PhD	Kansas, Main, University of
Oshimo	Junzo	Assistant Instructor	East Asian Languages and Literatures	MEd	Pittsburgh, Main, University of
Oyler	Elizabeth	Associate Professor	East Asian Languages and Literatures	PhD	Stanford University
Qian	Kun	Assistant Professor	East Asian Languages and Literatures	PhD	Cornell University Endowed Colleges
Shin	Seung-hwan	Visiting Assistant Professor	East Asian Languages and Literatures	PhD	Pittsburgh, Main, University of
Sun	Cecile	Professor	East Asian Languages and Literatures	PhD	Indiana University Bloomington
Takabatake Howard	Sachiko	Assistant Instructor	East Asian Languages and Literatures	MA	Indiana, Pennsylvania, University of
Xu	Yi	Associate Professor	East Asian Languages and Literatures	PhD	Arizona, University of
Albanesi	Stefania	Professor	Economics	PhD	Northwestern University
Beeson	Patricia	Professor	Economics	PhD	Oregon, University of
Becker	Neal	Senior Lecturer	Economics	PhD	Pittsburgh, Main, University of
Beresteanu	Arie	Associate Professor	Economics	PhD	Northwestern University
Berkowitz	Daniel	Professor	Economics	PhD	Columbia University, Main Division
Caldwell	Jane	Senior Lecturer	Economics	MA	Pittsburgh, Main, University of
Coen Pirani	Daniele	Professor	Economics	PhD	Rochester, University of
DeJong	David	Professor	Economics	PhD	Iowa, University of
Duquenois	Claire	Assistant Professor	Economics	PhD	University of California, Berkeley
Ferrera	Andreas	Assistant Professor	Economics	PhD	Warwick, University of
Gihleb	Rania	Assistant Professor	Economics	PhD	Boston University
Giuntella	Osea	Assistant Professor	Economics	PhD	Boston University

Hanley	Douglas	Assistant Professor	Economics	PhD	Pennsylvania, University of
Hewitt	David	Lecturer	Economics	PhD	California, Irvine, University of
Huffman	David	Professor	Economics	PhD	California, Berkeley, University of
Husted	Steven	Professor Emeritus	Economics	PhD	Michigan State University
Khan	Muhammad Yasir	Assistant Professor	Economics	PhD	University of California, Berkeley
Kosterina	Svetlana	Assistant Professor	Economics	PhD	Cornell University
Maksymenko	Svitlana	Senior Lecturer	Economics	PhD	Temple University
Maloy	James	Lecturer II	Economics	PhD	London, University of
Mylovanov	Tymofiy	Associate Professor	Economics	PhD	Wisconsin, Madison, University of
Rawski	Thomas	Professor Emeritus	Economics	PhD	Harvard University
Richard	Jean-Francois	Distinguished University Professor	Economics	PhD	Université catholique de Louvain
Rigotti	Luca	Associate Professor	Economics	PhD	Yale University
Ripoll	Marla	Professor	Economics	PhD	Rochester, University of
Sharifvaghefi	Mahrad	Assistant Professor	Economics	PhD	University of Southern California
Shave	Kevin	Lecturer II	Economics	PhD	Washington University
Shertzer	Allison	Associate Professor	Economics	PhD	California, Los Angeles, University of
Tourek	Gabriel	Assistant Professor	Economics	PhD	Harvard University
Treado	Carey	Lecturer	Economics	PhD	Pittsburgh, Main, University of
van Weelden	Richard	Associate Professor	Economics	PhD	Yale University

Joseph M. Katz Graduate School of Business

The Joseph M. Katz Graduate School of Business creates and disseminates knowledge that enhances the quality of the management of organizations. The Katz School, through faculty research programs and our doctoral program, produces high-quality research in areas of importance and infuses knowledge created by this research into all programs, but especially the MBA and related professional programs. Our school's reputation, primarily resulting from our MBA, Master's and doctoral programs, allows us to attract international, national, regional, and campus partners, with whom collaboration results in specialty professional programs with the MBA program as a foundation. This includes areas such as international business, technology management/engineering, and the health sciences. Our culture of teamwork, adaptability, and flexibility permits the school to readily adapt to future environments and strategic opportunities.

The Katz School is accredited by AACSB-the International Association for Management Education.

Application Procedures

Please refer to individual program descriptions in this section for further information regarding application procedures for Master of Business Administration (MBA), Master of Science (MS), Doctor of Business (DBA) and the Doctor of Philosophy (PhD) degrees.

Degree Options

The Katz School awards the Master of Business Administration (MBA), the Master of Science (MS), Doctor of Business (DBA) and the Doctor of Philosophy (PhD) degrees. Full-time, Part-time and Executive MBA degree programs are offered, as well as a number of MS degree programs. The Executive MBA, the Executive MBA in Healthcare, the Executive DBA, as well as the Signature MBA, are each offered in a cohort-based model.

The MBA and PhD degree programs have concentrations in accounting, finance, information systems and technology management, business analytics and operations, organizational behavior and human resources management, strategy, and marketing.

Additionally, the Katz School offers a number of MS, dual-degree and joint-degree options for students who wish to specialize and/or add a second professional degree. Many of the specialized degree options in business analytics, supply chain management, and management of information systems qualify as STEM programs.

Master of Business Administration (MBA) Programs

- Executive MBA
- Executive MBA in Healthcare
- Accelerated MBA
- Signature MBA
- Part-Time MBA
- MBA with Business Analytics

Master of Science (MS) Programs

- MS in Accounting
- MS in Accounting and Business Analytics
- MS in Marketing Science
- MS in Marketing Science and Business Analytics
- MS in Finance
- MS in Finance and Business Analytics
- MS in Supply Chain Management
- MS in Supply Chain Management and Business Analytics
- MS in Management

- MS in Management and Business Analytics
- MS in Management of Information Systems

Dual Degree Programs

- MBA and MS in Finance
- MBA and MS in Marketing Science
- MBA and MS in Supply Chain Management
- MBA and MS in Management of Information Systems

Joint Degree Programs

- MBA and Master of Public and International Affairs
- MBA and Master of International Development
- MBA and MS degrees in Engineering
- MBA and Master of Health Administration
- MBA and Master of Social Work
- MBA and Juris Doctorate
- MS in Supply Chain Management and MS in Industrial Engineering

The Katz school also offers micro-credential certificate programs. Micro-credentials are mini-qualifications designed to provide students with knowledge, skills, and abilities in a specific area of business. Micro-credential programs are available in the following areas.

- Accounting
- Corporate Finance
- Data Programming for Business Insights
- Digital Innovation
- Innovation and Entrepreneurship
- Leading People in Organizations
- Management Consulting

In cooperation with the University of Pittsburgh's College of Business Administration, the Katz School offers accelerated BSBA and MS programs.

- 3+1/BS in Business Administration and MS in Accounting
- 3+1/BS in Business Administration and MS in Management of Information Systems

Special Academic Opportunities

The Katz School offers the following special opportunities/programs:

Professional Workshops

Students participate in a variety of workshops throughout the program. Students work closely with their academic and career advisors to identify areas for professional development and develop a plan to engage in workshops related to those areas. Workshops are offered on topics such as presentation skills, project management, problem solving, time management, data visualization, team dynamics, and diversity/equity/inclusion.

Study Abroad

As part of a credit-bearing MBA international elective course, students spend time studying at a school in another country (past countries include the Czech Republic and India).

International Field Studies

As part of a 3-credit international elective course, MBA and MS students spend a week or more in another part of the world studying business culture and practices and visiting different companies in other parts of the world. Regions visited include Asia, Europe, and Latin America.

Corporate Connections

There are also a number of programs that bring CEOs of major firms to the Katz School to meet and interact with students including Best Practice Partners, Executive Faculty, Executive Women's Panel, Executive Spotlight, and the Katz on Wall Street Panel.

Graduation

A special Katz School graduation ceremony for all graduating Master's and Doctoral students is held in the spring of each year.

MBA and Master's Programs

The following section details the full range of programs for students interested in pursuing an MBA, an MS, or an MBA and another degree at the same time. Unless otherwise noted, additional information regarding these programs may be obtained by contacting the Admissions Office.

Contact Information

Joseph M. Katz Graduate School of Business
Director of Master's Admissions
301 Mervis Hall
412-648-1508
Fax: 412-648-1659
E-mail: admissions@katz.pitt.edu

Application Procedures

<https://www.katz.business.pitt.edu/apply>

Applicants should have earned an undergraduate degree from an accredited U.S. college or university or its international equivalent. Applicants should demonstrate quantitative and qualitative competence via academic coursework and/or GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or a personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is recommended. The Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or Duolingo test is a requirement for international applicants. International applicants should also see the section on Admissions of International Students in the front section of this catalog.

University of Pittsburgh undergraduate applicants from any campus who meet the following conditions can waive the GMAT/GRE:

- Overall 3.25 cumulative GPA
- Completed at least six credits of quantitative coursework with minimum 3.0 GPA

Financial Assistance

The primary sources of financial assistance for incoming full-time Katz MBA students are tuition scholarships and loans. Limited scholarships are available for the MS programs.

Merit-based scholarships are awarded in various dollar amounts and are directly applied against tuition charges. Katz School scholarships are available to full-time U.S. citizens, U.S. permanent residents, and international students. Award notifications are mailed along with the official admission decision. While consideration for scholarship candidate is independent of the admissions decision, there is no additional application required.

There are several educational loan programs available for students. All of them offer very reasonable interest rates.

Tuition and Fees

Financial Information

Actual tuition for the full-time Accelerated MBA and full-time Signature MBA programs is approximately the same. However, students in the Signature MBA program will incur additional professional development fees for an integrated learning, immersive capstone experience in their final term of the program.

MBA and Master's Program Academic Standards

The following section details academic standards for the full-time Masters' programs.

Good Academic Standing

In order to maintain good academic standing, a cumulative grade point average of 3.00 or above in all courses applicable to the degree is required throughout the program and for graduation from the Katz program.

Academic Probation and Dismissal Policy

Any student whose GPA falls below 3.00 at any time during the program may be subject to academic probation and/or dismissal from the full-time program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the Associate Dean for Graduate Programs.

Dean's List

The Dean's List for full-time students is compiled at the end of each term and consists of 20 percent of the student body with the highest grade point averages (3.75 or above).

Transfer of Graduate-Level Courses

Students are permitted to transfer no more than one-third graduate credit hours from other AACSB-accredited graduate business programs. Moreover, these credits may not have been applied to another degree. If a student earned a degree at another school, the student must verify by letter that the courses desired for transfer did not apply to that degree; if a degree was not earned then a letter is not necessary. All courses must be completed with a grade of "B" or higher to be eligible for transfer consideration.

If a student wishes to have previously earned graduate credits applied to the Master's degree as transfer credits, the appropriate forms must be completed and returned to the school's student records office. The appropriate faculty members will inform the student of the results after a review.

If a student must relocate during his or her studies at the Katz School, one-third of the total required credits may be taken at an AACSB-accredited graduate business program to complete the graduate business degree at the University of Pittsburgh. Courses taken at other institutions must be approved by the Katz School faculty. It is therefore recommended that each course be pre-approved for transfer before enrollment.

A student must have earned two-thirds of their total required credits from the University of Pittsburgh in order to qualify for a Master's degree from the Katz School. Note that all transfer credits are subject to the guidelines imposed by the statute of limitations.

Statute of Limitations

The Katz School requires completion of all degree requirements within four years of original registration. Under extraordinary circumstances, this statute may be extended, one year at a time, to a maximum of six years. The program director, upon written request, will consider extension of the statute of limitations. A detailed request must be filed before the end of the statutory period. Under no circumstances will a student be allowed more than six years to complete the degree.

This statute of limitations also governs the acceptability of transfer credits. Credits earned outside the Katz School must have been earned within the four-year period of the date of graduation. Credits more than four years old but less than six years as of graduation will be considered for acceptance upon written petition to the associate dean.

Academic Integrity

All students are expected to adhere to the school's *Code of Academic Standards*, copies of which are available in the dean's office. These standards follow the University's guidelines with several procedure changes. Students may also contact the school's academic integrity officer for advice or clarification of academic integrity guidelines.

Career Management

The Career Management team assists all master's students. The mission is to be a collaborative career management partner with both students and corporate recruiters, as well as an industry leader in professional development. The team is committed to providing advice in a manner that is designed to tailor a career path to fit each student's unique strengths and professional competencies, and develop and execute a job search plan to secure employment post-graduation. More information on the career management team can be found at <https://business.pitt.edu/career-management/>.

Student Services

The goal of the MBA and MS Programs team is exceptional student satisfaction. The Master's Program Office staff are subject matter experts who assist advisors and faculty in the delivery of various Masters Programs: Accelerated Full Time MBA, Signature Full Time MBA, Part Time MBA, Corporate MBA Programs, Special International Programs and Specialized MS Programs. The team also manages student events and activities, including Orientation, Academic Workshops and Professional Skills Development. The Program Office also manages matriculation, registration, curriculum delivery and graduation processes for Masters students.

Academic advisors are responsible for advising students regarding requirements and procedures of their program. The advisors will verify degree requirements, and are responsible for making sure students stay on track for graduation. The academic advisors collaborate closely with the career advisors.

Doctoral Program

The theoretically based, managerially relevant doctoral program in business administration seeks to prepare students for careers in research and teaching in management and related areas at leading business schools and universities. This is accomplished by fostering a learning environment in which students can achieve intellectual growth and fulfillment. Successful completion of the doctoral program therefore entails much more than the satisfaction of a set of formal requirements. Doctoral students are expected to assess their knowledge and skills in regular consultation with the faculty and to develop a set of educational experiences that will fulfill their needs and facilitate the pursuit of personal goals.

Contact Information

University of Pittsburgh
Joseph M. Katz Graduate School of Business
Doctoral Program
Director
282 Mervis Hall
412-648-1522
www.katz.business.pitt.edu/phd

Application Procedures

All application materials must be submitted by January 1 of the year of expected entry into the program. The basic prerequisite for admission to the doctoral program is the equivalent of an American bachelor's degree. Many applicants also have advanced degrees and professional experience. Scores on the GMAT or GRE (as well as on the TOEFL for international students) are required, along with recommendation letters and transcripts.

Financial Aid

Most financial aid for doctoral students is in the form of an assistantship that requires research and some teaching. The assistantship provides a stipend, tuition remission, and health insurance. Assistantships are available to domestic as well as international students. Funds associated with specific research projects are sometimes available to students, and faculty often help students obtain funding for dissertation research.

Sequence of Study

Progress to the PhD consists of: the seminar phase, comprehensive examinations, teaching requirement, and the dissertation. Students complete course work in the seminar phase. This is the time during which the student sets scholarly standards and goals. Every student prepares a written statement called the Field Statement upon declaring the student's areas of study. This is also the time to form relationships with faculty members and begin developing research skills.

Most doctoral courses involve research projects and the majority of students, including all those with assistantships, work on faculty research from an early stage. A minimum of 72 post baccalaureate credits is required for the PhD degree. A maximum of 30 credits from a previously earned master's degree may be applied.

Formal requirements in the seminar phase are:

- Work to ensure a basic level of competence in the disciplines and functions relevant to management. Students choose 6 credits of MBA course work. Some or all of these requirements may be exempted depending on educational background and doctoral course objectives.
- Eight courses in the major area of study and three courses in the minor area of study or a seven course research methodology minor.
- A 6-credit teaching requirement.
- At least four courses in research methodology or a seven course research methodology minor.
- A grade point average of 3.3.
- A preliminary evaluation (comprehensive examinations).

Comprehensive examinations are written and oral examinations in both the major and minor area of study. Each student's exams are designed individually, focusing on the area(s) of study. The student is expected to demonstrate comprehensive ability, meaning the ability to synthesize and build on all that the student has learned.

Dissertation

Doctoral students are required to demonstrate their capacity to engage in a sustained research effort by completing a doctoral dissertation. The dissertation entails an independent investigation of a problem of acknowledged significance and size in a management-related area. Only if the dissertation is judged to demonstrate such competence, after a formal defense in a final oral examination, does the department recommend the awarding of a degree.

For more details on requirements of doctoral students, see Regulations Pertaining to Doctoral Degrees.

Teaching

All Katz doctoral students are required to teach six credits as the primary instructor, at the University of Pittsburgh as part of their graduation requirements.

Timeline to Graduation

Most students earn the PhD in four to five years. The seminar phase typically lasts two years, while the comprehensive exams and the dissertation together require an additional two years to complete.

Statute of Limitations

The statute of limitations represents the maximum time permitted for the fulfillment of all requirements for the PhD degree. The statute of limitations is as follows:

1. Comprehensive examinations must be completed no later than the seventh term of study.

2. The dissertation overview examination must be successfully completed before the end of the fourth year.
3. The dissertation defense must be completed successfully before the end of the sixth year.

Exceptions to the Katz Doctoral Program statute of limitations, not to exceed the University of Pittsburgh's statute of limitations, must be approved by the Katz Doctoral and Research Committee.

Placement

The Katz School's goal is to place PhD graduates in universities that consistently produce highquality business research, and a successful record has been established in this regard.

Individual Curriculum Design

Students must choose from the following areas of study leading to the PhD in Business Administration:

- Accounting
- Business Analytics and Operations
- Finance
- Information Systems and Technology Management
- Marketing
- Organizational Behavior and Human Resource Management
- Strategic Management

Within the framework of these standard areas, every PhD student plans a unique, individual area of study. A student may choose any of the areas as a primary (major) area of study or as a secondary (minor) area of study. Each of the areas of study provides additional choices to meet student interests and developmental needs. All have subspecialties; all explore a range of current topics. In addition, to expand the option in the core areas, students are invited to draw on courses and research opportunities at the Katz School, as well as other parts of the University, and other institutions.

Two goals must be balanced in planning an individual program. One is to acquire a sound body of knowledge in recognized disciplines and methods. The other is to choose a mix of courses, mentors, and research topics geared to the student's own interests and talents. Ideally, this will lead to a truly original dissertation, followed by a career of meaningful research.

Faculty

Katz Graduate School of Business Faculty

Programs & Courses

Doctoral

Executive Doctor of Business Administration, DBA

Graduates would receive an Executive DBA degree from the University of Pittsburgh upon successful completion of the following degree requirements:

- 72 credits (includes 27 credits that can be satisfied by transfer from an approved master's program, 33 credits of core courses, and 12 credits of supervised Practicum Research Project coursework.
- Practicum Research Project
- 3.0 GPA or higher to graduate
- Comprehensive exam following the last content-specific course and before the Practicum related activities
- One-week residency during each of the first two summers. Students facing travel/visa restrictions can request to participate virtually.

The Executive DBA coursework would be delivered via 10 courses over two years, plus an 11th course and 12 Practicum Research Project credits in the third year utilizing a distance education model. The minimum load is 72 credits, including 27 transfer credits from a master's degree or equivalent, 33 credits of coursework, and 12 credits for the Practicum Research Project. A Katz faculty member would supervise the Practicum Research Project (co-supervise in the case of an international program partner). An additional faculty member (from Katz and/or a partner institution) could serve as a co-advisor if additional specialty expertise is needed.

Total Credits: 72

Dual

Dual-degree Business Administration, MBA / Finance, MS

An option for those who desire both a wide-ranging understanding of business and a deep specialization in Finance, our Katz Dual Degree MBA / MS Finance program allows you to pair your MBA with a Katz Master of Science (MS) degree in Finance. The full-time two-year program option is designed to be completed in 21 months with time for a summer internship experience and includes an integrated learning capstone experience. Distinguish yourself with two graduate business degrees. Part-time students may complete the program at their own pace, typically within 3 to 4 years.

MBA Degree Requirements

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Areas of Study

In place of majors, the Katz School offers areas of study in accounting, business analytics, finance, management of information systems, marketing, organizational behavior, supply chain / operations management, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from electives in these fields.

Students who are pursuing a dual-degree MBA/MS program will complete BOTH the MBA Core Curriculum and the Core Curriculum of the Master of Science degree that they are pursuing.

Areas of Study

MBA students may choose electives from specific areas of study to demonstrate competence in a functional area, or combine electives from multiple areas of study to customize their degree. A description of each of the areas of study follows:

Business Analytics

The study of business analytics prepares students for data management and business intelligence roles that provide new insights and support strategic decision-making. Methodologies to perform descriptive, predictive and prescriptive statistical analysis, data mining, and data visualization result in data-driven decision-making are learned through course and real-world projects for an integrated learning experience.

Students pursuing the MBA with Business Analytics must meet these additional academic requirements for the MBA core curriculum:

- Minimum grades of B+ (3.25) in BQOM 2401 (Statistical Analysis: Uncertainty, Prediction, and Quality Improvement)
- Minimum grad of B (3.0) in BQOM 2421 (Decision Technologies in Manufacturing and Operations Management)

Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems prepares students to lead and manage technology projects and organizations to increase operational efficiency, support enterprise integration and growth, and enable innovation. Though course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, students prepare for careers as leaders in a diverse variety of today's organizations that rely heavily on information technology for success.

Marketing

This area of study is designed to prepare students for careers in marketing management or marketing analytics. Marketing is a critical decision area in both for-profit and non-profit industries such as healthcare, government, and education. Studies include marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resource Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Supply Chain Management, Operations Management, Decision Sciences

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of supply chain management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

[Taking electives at other Professional Schools at Pitt](#)

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

MS Finance Core Curriculum

The following courses are required of all MS Finance students:

- BACC 2401 - FINANCIAL ACCOUNTING
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2145 - FINANCIAL MODELING
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2030 - VALUATION 1
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS

Dual-degree MBA / Marketing Science, MS

For those who desire both a broad understanding of business and a deep specialization in consumer behavior and marketing research, our Katz Dual Degree MBA / MS Marketing Science program allows you to pair your MBA with a Katz Master of Science (MS) degree in Marketing Science. Distinguish yourself with two graduate business degrees.

The full-time two-year program option is designed to be completed in 21 months with time for a summer internship experience and includes an integrated learning capstone experience. Part-time students may complete the program at their own pace, typically within 3 to 4 years.

- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS

Master of Business Administration/Management Information Systems Dual Degree, MBA/MS-MIS

The Katz School offers a dual-degree program that awards both an MBA and an MS in the Management of Information Systems. The curriculum extends the one-year MBA program to include advanced MIS course work and a practicum in information management. Full-time students can complete the dual-degree program (66 credits required) in 20 months, four of which are usually spent working in an internship position. The program can be completed on a part-time/evening basis (66 credits required).

For additional program information, contact mba@katz.pitt.edu, or visit our Web site at <http://www.business.pitt.edu/katz/mba/academics/programs/mba-mis.php>

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

[Taking electives at other Professional Schools at Pitt](#)

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

MS-MIS Core Course Requirements

The following courses are required of all MS-MIS students.

- BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2588 - DATA BASE MANAGEMENT

Graduate Certificate

Accounting Certificate

This 15-credit certificate is designed to equip students with the foundational skills in accounting.

Prospective student who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Accounting. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

The Graduate Certificate in Accounting would require the successful completion of 15.0 credits including 3.0 credits of required coursework and 12.0 elective credits to include BACC 2*** coursework or other with Accounting Faculty Director approval.

A student who has completed the Katz Micro-Credential in Accounting would be able to count, or stack, the credits to the Graduate Certificate in Accounting. The Katz Graduate Certificate in Accounting would be efficiently stackable to the following Katz degree programs:

- Master of Business Administration (MBA)
- Master of Science in Accounting (MAcc)
- BACC 2401 - FINANCIAL ACCOUNTING

Total Credits: 15

Finance Certificate

This 15-credit certificate is designed to equip students with the financial management skills.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Finance. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Required Courses

The Graduate Certificate in Finance would require the successful completion of 15.0 credits including 3.0 credits of required coursework and 12.0 elective credits to include BFIN 2*** coursework or other with Finance Faculty Director approval.

A student who has completed the Katz Micro-Credential in Finance would be able to count, or stack, the credits to the Graduate Certificate in Finance. The Katz Graduate Certificate in Finance would be efficiently stackable to the following Katz degree programs:

- Master of Business Administration (MBA)
- Master of Science in Finance (MSF)
- Dual-Degree MBA/MSF

The following courses are required for the Graduate Certificate in Finance:

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2

Total Credits: 15

Management Science Certificate

This 15-credit certificate is designed to equip students with the quantitative skills in management science.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Management Science. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

The Graduate Certificate in Management Science would require the successful completion of 15.0 credits including 4.5 credits of required coursework and 10.5 elective credits to include BQOM 2*** coursework or other with Business Analytics & Operations (BAO) Faculty Director approval.

A student who has completed the Katz Micro-Credential in Management Science would be able to count, or stack, the credits to the Graduate Certificate in Management Science. The Katz Graduate Certificate in Management Science would be efficiently stackable to the following Katz degree programs:

- Master of Business Administration (MBA)
- Master of Science in Management of Information Systems (MIS)
- Master of Science in Supply Chain Management (SCM)
- Dual Degree MBA/MIS
- Dual Degree MBA/SCM
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Total Credits: 15

Technology Management Certificate

This 15-credit Graduate Certificate in Technology Management prepares students for roles managing and leading technology projects, programs, and data analysis.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Technology Management. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Curriculum

The Graduate Certificate in Technology Management would require the successful completion of 15.0 credits including 1.5 credits of required coursework and 13.5 elective credits to include BMIS 2*** coursework or other with Information Systems & Technology Management (ISTM) Faculty Director approval.

A student who has completed the Katz Micro-Credential in Technology Management would be able to count, or stack, the credits to the Graduate Certificate in Technology Management. The Katz Graduate Certificate in Technology Management would be efficiently stackable to the following Katz degree programs:

- Master of Business Administration (MBA)
- Master of Science in Management of Information Systems (MIS)
- Dual Degree MBA/MIS
- BMIS 2409 - INFORMATION SYSTEMS

Total Credits: 15

Joint Degree

Social Work, MSW/MBA

The MBA/Master of Social Work joint degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. The degree is offered jointly through the University of Pittsburgh School of Social Work and the Joseph M. Katz Graduate School of Business.

Faced with an increasingly competitive market, nonprofit organizations are beginning to emulate management methods and paradigms being practiced by for-profit companies, such as financial operations, human resource and data management, market and economic analysis, and evidence-based strategic planning. As philanthropic organizations become more concerned about their accountability and utility of financial supports provided to various human service organizations, they are beginning to evaluate nonprofits beyond program outcomes or average cost per client to more advanced assessments, such as cost-efficiency and effectiveness and cost-benefit ratio. Unfortunately, such analytic methodologies are rarely offered to social work students by the traditional social work curriculum.

Initially, the proposed MSW/MBA dual-degree program will be open to the SSW's Community Organization and Social Action (COSA) students. Upon successful execution of this initiative, the school plans to open the program to all MSW full-time students (COSA and Direct Practice students).

Students who want to earn a dual-degree must gain acceptance into both graduate degree programs by applying separately to each school. The joint-degree program applicants will also be required to submit their Graduate Management Admission Test (GMAT) or Graduate Records Exam (GRE) examination scores to both schools. Specific questions may be addressed to:

Daniel Rosen

MSW/MBA Joint Degree Admissions Criteria

1. SSW Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MSW program.
 1. Undergraduate students with social work and human service backgrounds are preferred.
 2. In general, we would expect an undergraduate GPA of 3.0 or better for admission.
 3. International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
 4. Paid work experience is preferred but not required.
2. GMAT/GRE scores are not required for regular MSW students applicants but for the joint degree applicants in MSW and MBA must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business (KGSB), by the admission deadline.

3. Applicants will submit a 3-5 page double spaced typed personal statement describing their post-graduate career goals, skills in which they excel, and key accomplishments.
4. Applicants will submit three recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
5. Applicants will submit their current resume.
6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English)- the Test of English as a Foreign Language (TOEFL) with minimum acceptable score: Internet-based test: 100; paper-based test: 600.
7. Non-refundable application fee is \$40.
8. Prospective candidates, domestic or international, may be interviewed before admission, in person or by telephone.
9. Submission of online MSW application form by the admissions deadline date of **May 31**.

2. Katz GSB Requirement

1. A Baccalaureate degree that must be completed prior to the program start date. Applications must include transcripts of coursework completed at the time of submission of the application. Admission will be contingent upon submission of an official, final transcript of the completed Bachelors program before the start of the MBA program.
 1. Undergraduate students with strong analytical backgrounds are preferred.
 2. In general, we would expect an undergraduate GPA of 3.0 or better for admission.
 3. International students must submit originals or certified copies of transcripts/mark sheets and degree/diploma certificate in the original language plus a certified English translation (if the original is not in English).
 4. Work experience is not necessary, though highly desirable.
2. GMAT/GRE scores: Applicants must have their official Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) score reports forwarded directly to the University of Pittsburgh, Katz Graduate School of Business, by the admission deadline. In general, we would expect a GMAT score of 600 or higher for admission. (Corresponding GRE scores will be equivalent to these levels, after conversion.).
3. Applicants will submit a 250 word essay describing their post-graduate career goals, skills in which they excel, and key accomplishments.
4. Applicants will submit two recommendations from persons who have known the applicant in academic or professional capacities. At least one from a faculty member is preferred. (Recommendations from friends and family will not be accepted.)
5. Applicants will submit their current resume.
6. English Proficiency Exams (for international applicants who are citizens of countries where the official language is not English): Either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing Systems (IELTS) is required.
 1. TOEFL Minimum acceptable score: Internet-based test: 100; paper-based test: 600.
 2. IELTS Minimum acceptable score: 7.0
7. \$50 non-refundable application fee.
8. Prospective candidates, domestic or international, may be interviewed before admission, in person or by Skype.

Learning outcome goals

The MSW/MBA dual-degree program is designed to provide students with a unique combination of social work knowledge and skills, with exceptional strength in management decision-making and leadership. In addition to the MSW learning outcomes that are already in place, supplementary MSW/MBA objectives include:

1. Proficiency in the management functions of accounting, finance, computer information systems, marketing, operations management, organizational behavior, human resource management, and social enterprise.
2. Special emphasis on development of skills and abilities to lead strategically and to position an organization effectively for continued growth and development in both for-profit and nonprofit sectors.
3. Knowledge and understanding of complex organizations, their development and transformation, administrative principles, the decision-making process, and competence in managerial functions.
4. To provide applied learning experiences, the required field practicum will include professional supervision through appropriate concentration settings that will focus on community and human service organization management.

Program requirements

1. A graduate-level course grade of B or higher must be maintained throughout the joint-degree program.
2. The MBA program requires a minimum 45 credits for the part-time or one-year program, of which at least 33* credits must be from KGSB courses, while the balance maximum of 17 credits may be from other graduate programs.

**On July 27, 2021 the program requirements for the program were approved to be decreased from 34.5 to 33 to align with the overall MBA redesign approved in 2019.*

**In Fall 2022, modifications were approved for the MBA Degree Requirements, retroactive to Fall 2021. Students will have until Summer 2023 to complete old program curriculum requirements. In order to maintain accurate records, updates were made in the catalog on September 14, 2022.*

Core Courses

The following MBA "core" courses (total of 19.5 credits) are required:

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

Program requirements

3. All MSW/MBA joint degree students will be required to take at least 34.5 credits of KGSB credits, consisting of the above 22.5 credits of core courses plus an additional 12 credits of KGSB electives. Thus, up to 16.5 credits will be accepted from courses successfully completed in the MSW program to achieve the total of 51 credits required for the completion of the Katz MBA degree.
4. All MSW/MBA joint degree students will be required to take a course entitled Social Entrepreneurship (1.5 credits) from the KGSB.
5. The following KGSB courses will count as credits towards the MSW degree:
 1. BACC 2401 - FINANCIAL ACCOUNTING will qualify as equivalent to SWCOSA 2085 - FINANCIAL MANAGEMENT SOCIAL SERVICE INSTITUTIONS (3 credits), and will count as 3 credits for both the MSW and MBA programs,
 2. BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS and Strategic Management (1.5 credits) will qualify as equivalent to SWRES Organizational Research, and will count as 3 credits for both the MSW and MBA programs (SA track only),
 3. SW General Elective 1-One 3-credit or two 1.5-credit required MBA courses (e.g., BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS), which will count as 3 credits for both the MSW and MBA programs, and
 4. SW General Elective 2- One 3-credit or two 1.5-credit required MBA courses (e.g., BIND 2444 - MANAGEMENT SIMULATION CAPSTONE), which will count as 3 credits for both the MSW and MBA programs.

Thus, the double-counted credits make it possible for students to earn both degrees without having to take the total sum of credits required for completing the two degree programs separately.

1. It should be noted that a long-standing educational policy of the SSW is that students who, within the past seven academic calendar years, have received a social work degree from a CSWE-accredited undergraduate program are eligible for advanced standing. Those granted advanced standing during the admission process can receive up to 12 academic credits and six field education credits that will count towards completion of the MSW program.
2. Thus, full-time COSA students with advanced standing must earn grand total of 64.5 credits for CO students, and 61.5 credits for SA students (adding all MSW and MBA courses). This means total of 30 social work credits (including total of 12 field credits) to be taken by CO students and 27 credits (including total of 12 field credits) to be taken by SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.
3. Full-time COSA students **without** advanced standing must earn grand total of 85.5 credits for CO students, and 82.5 credits for SA students (adding all MSW and MBA courses). This means total of 51 social work credits to be taken by CO students and 48 credits to be taken by

SA students. Additionally, they must take minimum of 34.5 credits of MBA courses, which includes 22.5 and 12 credits of required and electives, respectively.

Master's

Business Administration with Business Analytics, MBA

The STEM-designated MBA with Business Analytics major was designed to meet the demands of graduate business students who seek broad business knowledge as well as an in-depth specialization in business analytics afforded by the curriculum included in the Graduate Certificate in Business Analytics. The students will complete the required courses for both the MBA and Graduate Certificate in Business Analytics, with sufficient elective credits remaining to elect to participate in an Integrated Learning Institute (6 – 12 credits), complete a Micro-Credential (9 credits) or select electives to individualize their studies.

Program Requirements:

Students in the MBA in Business Analytics program must fulfill the following requirements in order to receive their degree:

- A minimum of 63 credits of approved graduate work
- The appropriate distribution of required core courses and elective courses
- A minimum cumulative grade point average (GPA) of 3.0

Required Courses (37.5 Credits):

The following core courses are required of all full-time MBA students (22.5 credits total):

The following core courses are required of all full-time MBA students (22.5 credits total):

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Additionally, students in the two-year MBA with Business Analytics program must also complete the following core courses (12 credits, as required for the Certificate in Business Analytics):

- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BMIS 2588 - DATA BASE MANAGEMENT
NULL
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
OR
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON

There is an additional EBL course requirement for MBA in Business Analytics (3 credits):

- FACULTY DIRECTOR APPROVED "ANALYTICS" PROJECT (3 credits) (Consulting Field Project, Global Research Practicum, Six Sigma, Applied Behavioral Economics, Internship, or similar)

ELECTIVES (MINIMUM: 25.5 CREDITS):

These courses will cover electives permissible towards an MBA degree with at least 3 credits of electives approved under the Graduate Certificate in Business Analytics.

Executive Master of Business Administration, MBA

Graduates would receive an Executive MBA degree from the University of Pittsburgh upon successful completion of the following degree requirements:

- 45 credits (include 33 credits in the core MBA curriculum and 12 credits in theme-specific courses, electives and practicum)
- Coursework
- 3.0 GPA or higher to graduate
- Completion of 3-hour research practicum

The Executive MBA coursework would be delivered in a blended format with in-person sessions held one weekend a month. The Executive MBA can be completed in 19 months over five terms, beginning every September.

For additional program information, contact us via phone: 412-648-1600, e-mail: executiveprograms@katz.pitt.edu or visit www.emba.pitt.edu.

Executive Masters of Business Administration Healthcare, MBA

Graduates would receive an Executive MBA degree from the University of Pittsburgh upon successful completion of the following degree requirements:

- 45 credits (include 33 credits in the core MBA curriculum and 12 credits of electives and practicum)
- Coursework
- 3.0 GPA or higher to graduate
- Completion of 3-hour research practicum

The Executive MBA coursework would be delivered in a blended format with in-person sessions held one weekend (two full-day sessions) a month. The Executive MBA is designed for healthcare professionals who are seeking to advance their careers equipping students with the skills and tools that they need to lead healthcare organizations into the future. It can be completed in 19 months over five terms, beginning every May.

For additional program information, contact us via phone: 412-648-1600, e-mail: executiveprograms@katz.pitt.edu or visit: www.emba.pitt.edu.

Program Requirements

- BFIN 2306 - FINANCIAL MANAGEMENT
- BMIS 2911 - HEALTHCARE INFORMATION TECHNOLOGY
- BQOM 2801 - STATSTCL ANAL: UNCERT
- BACC 2802 - FINANCIAL ACCOUNTING IN HEALTHCARE ORGANIZATIONS
- BACC 2256 - STRATEGIC COST MANAGEMENT
- BFAE 2850 - HEALTHCARE ECONOMICS
- BIND 2101 - PRACTICUM FOR EMBA HEALTHCARE STUDENTS
- BMKT 2554 - MARKETING DESIGN AND ANALYSIS
- BORG 2402 - LEADING PEOPLE IN HEALTHCARE ORGANIZATIONS
- BQOM 2821 - HEALTH INSURANCE AND RISK MANAGEMENT
- BSEO 2901 - STRATEGY, MISSION AND VALUES
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT

Master of Business Administration - Accelerated MBA

INSERT UPDATED CATALOG DESCRIPTION FROM LAURA FOR ONE YEAR MBA PROGRAM HERE

MBA Degree Requirements

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Areas of Study

In place of majors, the Katz School offers areas of study in accounting, business analytics, finance, management of information systems, marketing, organizational behavior, supply chain / operations management, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from electives in these fields.

Students who are pursuing a dual-degree MBA/MS program will complete BOTH the MBA Core Curriculum and the Core Curriculum of the Master of Science degree that they are pursuing.

Areas of Study

MBA students may choose electives from specific areas of study to demonstrate competence in a functional area, or combine electives from multiple areas of study to customize their degree. A description of each of the areas of study follows:

Business Analytics

The study of business analytics prepares students for data management and business intelligence roles that provide new insights and support strategic decision-making. Methodologies to perform descriptive, predictive and prescriptive statistical analysis, data mining, and data visualization result in data-driven decision-making are learned through course and real-world projects for an integrated learning experience.

Students pursuing the MBA with Business Analytics must meet these additional academic requirements for the MBA core curriculum:

- Minimum grades of B+ (3.25) in BQOM 2401 (Statistical Analysis: Uncertainty, Prediction, and Quality Improvement)
- Minimum grad of B (3.0) in BQOM 2421 (Decision Technologies in Manufacturing and Operations Management)

Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems prepares students to lead and manage technology projects and organizations to increase operational efficiency, support enterprise integration and growth, and enable innovation. Through course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, students prepare for careers as leaders in a diverse variety of today's organizations that rely heavily on information technology for success.

Marketing

This area of study is designed to prepare students for careers in marketing management or marketing analytics. Marketing is a critical decision area in both for-profit and non-profit industries such as healthcare, government, and education. Studies include marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resource Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Supply Chain Management, Operations Management, Decision Sciences

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of supply chain management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

[Taking electives at other Professional Schools at Pitt](#)

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

One-Year Program

In 1963, the Katz School launched a unique MBA program that presented the classical two-year American MBA format in one calendar year. This is not a general management program, but contains full concentration in all business disciplines—all conducted in parallel with the core of business, arts and sciences, and logistically integrated by the world-class faculty dedicated to the merger of research and teaching.

The one-year MBA is typically for people who do not require an internship to reach their career goals. It begins in May and ends in April and, through its module format, covers the same ground that a traditional MBA program does in two years.

Master of Business Administration - MBA

Admissions

Students in the MBA program are admitted in the fall term. Applicants should check the school's Web site for preferred deadlines.

Candidates must have a bachelor's degree from an accredited U.S. school or the non-U.S. equivalent, and demonstrated quantitative competence via academic coursework and GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is required, and for international applicants, the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) is also a requirement.

Tuition and Fees

MBA students pay a full-time tuition, available here: [Tuition Rates - Out-of-State Residents](#) [Tuition Rates - Pennsylvania Residents](#). In addition to the University-wide fees, a professional workshop fee is required each term.

Academic Probation and Dismissal Policy

If the student's GPA falls below 3.0 at any time during their studies, the student will be subject to academic probation and/or dismissal from the program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the Director of Graduate Programs.

MBA Degree Requirements

[*In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.*](#)

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

Areas of Study

MBA students may choose electives from specific areas of study to demonstrate competence in a functional area, or combine electives from multiple areas of study to customize their degree. A description of each of the areas of study follows:

Business Analytics

The study of business analytics prepares students for data management and business intelligence roles that provide new insights and support strategic decision-making. Methodologies to perform descriptive, predictive and prescriptive statistical analysis, data mining, and data visualization result in data-driven decision-making are learned through course and real-world projects for an integrated learning experience.

Students pursuing the MBA with Business Analytics must meet these additional academic requirements for the MBA core curriculum:

- Minimum grades of B+ (3.25) in BQOM 2401 (Statistical Analysis: Uncertainty, Prediction, and Quality Improvement)
- Minimum grad of B (3.0) in BQOM 2421 (Decision Technologies in Manufacturing and Operations Management)

Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems prepares students to lead and manage technology projects and organizations to increase operational efficiency, support enterprise integration and growth, and enable innovation. Through course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, students prepare for careers as leaders in a diverse variety of today's organizations that rely heavily on information technology for success.

Marketing

This area of study is designed to prepare students for careers in marketing management or marketing analytics. Marketing is a critical decision area in both for-profit and non-profit industries such as healthcare, government, and education. Studies include marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resource Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Supply Chain Management, Operations Management, Decision Sciences

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of supply chain management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

[Taking electives at other Professional Schools at Pitt](#)

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

Master of Business Administration - Part-time MBA

Part-Time MBA Program

The Part-Time MBA program offers nearly the same curriculum and encompasses the same teaching philosophies as the Accelerated and Full-Time MBA programs offered in a format that meets the needs of working professionals who don't want to put their careers on hold in order to pursue their MBA. The Part-Time MBA can be earned in three years by taking approximately 6 credits per term. The program runs year-round with fall, spring, and summer semesters of 12 or 14 weeks each. Classes are conducted on weekday evenings and select weekends, and are offered in both on-campus and hybrid (combined on-campus and online) formats.

The degree program may now be completed entirely online with the exception of required course BIND 2454 Integrated MBA Capstone (1.5 credits) which is an on-campus immersion weekend. Students would also be required to attend an on-campus Orientation which includes completion of required courses BIND 2404 (0.5 credits) and BIND 2406 (0.5 credits). Approximately 5.5% (2.5 of 45 credits) would be required on-campus, with 94.5% online.

Part-Time Degree Requirements

All students must fulfill the following requirements in order to receive the Part-Time MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

Part-Time/Evening MBA Core Curriculum

The following core courses (totaling 19.5 credits) are required of all Part-Time MBA students. Electives are similar to the full-time MBA offerings.

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.

- BACC 2401 - FINANCIAL ACCOUNTING
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT I
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECHN IN MFG & OPER MGT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BIND 2454 - INTEGRATED MBA CAPSTONE

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework (totaling 6 credits):

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR - COMMUNICATING STRATEGICALLY

Note:

The remaining credits required for the degree are to be taken in the student's area of study and in other elective course work.

Areas of Study

In place of majors, the Katz School offers areas of study in accounting, business analytics, finance, management of information systems, marketing, organizational behavior, supply chain / operations management, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from electives in these fields.

Students who are pursuing a dual-degree MBA/MS program will complete BOTH the MBA Core Curriculum and the Core Curriculum of the Master of Science degree that they are pursuing.

Areas of Study

MBA students may choose electives from specific areas of study to demonstrate competence in a functional area, or combine electives from multiple areas of study to customize their degree. A description of each of the areas of study follows:

Business Analytics

The study of business analytics prepares students for data management and business intelligence roles that provide new insights and support strategic decision-making. Methodologies to perform descriptive, predictive and prescriptive statistical analysis, data mining, and data visualization result in data-driven decision-making are learned through course and real-world projects for an integrated learning experience.

Students pursuing the MBA with Business Analytics must meet these additional academic requirements for the MBA core curriculum:

- Minimum grades of B+ (3.25) in BQOM 2401 (Statistical Analysis: Uncertainty, Prediction, and Quality Improvement)
- Minimum grad of B (3.0) in BQOM 2421 (Decision Technologies in Manufacturing and Operations Management)

Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems prepares students to lead and manage technology projects and organizations to increase operational efficiency, support enterprise integration and growth, and enable innovation. Through course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, students prepare for careers as leaders in a diverse variety of today's organizations that rely heavily on information technology for success.

Marketing

This area of study is designed to prepare students for careers in marketing management or marketing analytics. Marketing is a critical decision area in both for-profit and non-profit industries such as healthcare, government, and education. Studies include marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resource Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Supply Chain Management, Operations Management, Decision Sciences

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of supply chain management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

Taking electives at other Professional Schools at Pitt

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

Admissions

Part-Time MBA students are admitted in the fall, spring, and summer terms. Applicants should check the school's Web site for preferred deadlines.

Candidates must have a bachelor's degree from an accredited U.S. school or the non-U.S. equivalent, and demonstrated quantitative competence via academic coursework and GMAT or GRE. Applicants should be able to demonstrate excellent communication and interpersonal skills that are evaluated through written essays, test scores, and/or personal interview.

The Graduate Management Admission Test (GMAT) or the Graduate Record Exam (GRE) is required, and for international applicants, the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) is also a requirement.

Tuition and Fees

Part-Time MBA students pay on a per credit basis each term (1.5-8.5 credits considered part-time), which can be found here: <http://www.ir.pitt.edu/tuition/index.php>. In addition to the University-wide fees, a professional workshop fee is required each term.

Academic Probation and Dismissal Policy

If the student's GPA falls below 3.0 upon completion of 12 credits or any time thereafter, the student will be subject to academic probation and/or dismissal from the program. Exceptions to the school's guidelines and procedures may be considered only through written petition to the Director of Graduate Programs.

Part-Time/Evening MBA Core Curriculum

The following core courses (totaling 19.5 credits) are required of all evening MBA students. Electives are similar to the full-time MBA offerings.

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.

- BACC 2401 - FINANCIAL ACCOUNTING
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT I
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BIND 2454 - INTEGRATED MBA CAPSTONE

Part-Time/Evening MBA Professional Courses

The following "professional" courses (totaling 6 credits) are required of all MBA Part-Time/Evening students:

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Master of Business Administration - Signature, MBA

MBA Degree Requirements

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements.

Students enrolled in an MBA program must fulfill the following requirements in order to earn the MBA degree:

1. A minimum of 45 credits of approved graduate work
2. The appropriate distribution of required core courses and elective courses
3. A minimum cumulative grade point average (GPA) of 3.0

MBA Core Curriculum

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS

- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Areas of Study

In place of majors, the Katz School offers areas of study in accounting, business analytics, finance, management of information systems, marketing, organizational behavior, supply chain / operations management, and doctoral studies. Students can customize their MBA to suit their career goals by choosing from electives in these fields.

Students who are pursuing a dual-degree MBA/MS program will complete BOTH the MBA Core Curriculum and the Core Curriculum of the Master of Science degree that they are pursuing.

Areas of Study

MBA students may choose electives from specific areas of study to demonstrate competence in a functional area, or combine electives from multiple areas of study to customize their degree. A description of each of the areas of study follows:

Business Analytics

The study of business analytics prepares students for data management and business intelligence roles that provide new insights and support strategic decision-making. Methodologies to perform descriptive, predictive and prescriptive statistical analysis, data mining, and data visualization result in data-driven decision-making are learned through course and real-world projects for an integrated learning experience.

Students pursuing the MBA with Business Analytics must meet these additional academic requirements for the MBA core curriculum:

- Minimum grades of B+ (3.25) in BQOM 2401 (Statistical Analysis: Uncertainty, Prediction, and Quality Improvement)
- Minimum grad of B (3.0) in BQOM 2421 (Decision Technologies in Manufacturing and Operations Management)

Finance

The study of finance is designed to prepare students for managerial careers in corporate finance, investment analysis, financial consulting, and financial institutions. The coursework presents an integrated treatment of the economic foundations of finance, and the functions of capital markets and financial institutions. The courses provide a thorough understanding of how capital and financial markets operate, and how to manage corporate assets and financial claims in the marketplace.

Management of Information Systems

An MBA with a focus in information systems prepares students to lead and manage technology projects and organizations to increase operational efficiency, support enterprise integration and growth, and enable innovation. Through course and project work related to the specification, evaluation, and management of technology-enabled business initiatives, students prepare for careers as leaders in a diverse variety of today's organizations that rely heavily on information technology for success.

Marketing

This area of study is designed to prepare students for careers in marketing management or marketing analytics. Marketing is a critical decision area in both for-profit and non-profit industries such as healthcare, government, and education. Studies include marketing strategy, new product development, marketing research, pricing, distribution, advertising and promotion, brand management, and global marketing.

Organizational Behavior and Human Resource Management

Organizational behavior and human resources management focuses on understanding human behavior at work and developing effective management strategies for maximizing the human capital within organizations. This program examines current issues such as employee involvement, high-performance work systems, and the use of teams within organizations.

Strengths of this area are its interdisciplinary nature that relies on a solid grounding in the behavioral sciences, applied statistics, and economics.

Supply Chain Management, Operations Management, Decision Sciences

The "operations" function of a firm deals with the effective production and distribution of goods and services, and thus forms an integral part of supply chain management activity in industries as diverse as banking, financial services, software, telecommunications, electronics, and automobiles. An MBA with a focus in operations prepares students for a line job in such industries as well as for a career in management consulting.

Strategy

Organizations of all sizes and degrees of complexity depend on the planning and implementation skills of their general managers for the attainment of their objectives. The strategic planning and policy field is concerned with the development of frameworks and processes for analyzing and responding to strategic problems and opportunities confronting corporate-level executives and managers of business units. Students are encouraged to pair Strategy with a second area of study in order to demonstrate a strategic functional area of expertise.

[Taking electives at other Professional Schools at Pitt](#)

Students may also choose to take elective courses at other professional schools at the University, including the School of Law, the Swanson School of Engineering, the School of Social Work, the Graduate School of Public and International Affairs, and the School of Computing & Information.

Students enrolled in a joint-degree MBA program complete all requirements of both degrees, including the MBA core curriculum.

Two-Year Program

The two-year MBA program is built on the solid foundation of the established one-year program. Students begin in August, add a professional internship during the summer, and return in the subsequent fall. After finishing the core curriculum, students may choose up to 34.5 credits from electives across the school. Graduation takes place in April of the second year.

The two-year MBA is typically for people who wish to develop their professional focus, and who need an internship to confirm and advance that professional focus. Individualized coaching and mentoring programs are designed to support the professional growth and development of each student.

PhD

Business Administration, PhD

Area of Accounting

Master's

Accounting and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which prepares students to pass the CPA Exam while gaining technical skills in multivariate data analysis, data programming, data mining, and database management. The program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the 150 credit-hour requirement of Pennsylvania and many other U.S. states. Students enrolled in this program must complete the appropriate number of prerequisites, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0. Students can complete a minimum number of 33 credits to complete the degree, depending on previous coursework.

Required Courses (Required total: 31.5 credits):

- BACC 2251 - FORENSIC ACCOUNTING
- BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING
- BACC 2252 - CORPORATE TAX ACCOUNTING AND PLANNING
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BSEO 2315 - BUSINESS LAW
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BMIS 2588 - DATA BASE MANAGEMENT
- BQOM 2578 - DATA MINING
- BACC 2523 - ACCOUNTING DATA ANALYTICS

Programming course (choose one):

- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Elective Courses (Required minimum 1.5 credits):

The additional 1.5 elective credits will allow students to participate in an internship for credit experience, complete other accounting or business analytics elective courses or an Experience-Based Learning course.

Programming course (choose one):

- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Accounting, MS

The Master of Science in Accounting is a 30 credit program designed to be completed in two terms, on a full-time basis. The program prepares students for leadership roles in financial accounting and managerial accounting. Students gain general business knowledge and specialized accounting skills necessary for success. In addition, the program prepares students to pass the CPA Exam, both by covering the content areas of the exam and by satisfying the 150 credit-hour requirement of Pennsylvania and many other U.S. states. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 24 credits):

- BACC 2251 - FORENSIC ACCOUNTING
- BACC 2558 - NON-PROFIT AND GOVERNMENTAL ACCOUNTING
- BACC 2254 - ADVANCED FINANCIAL ACCOUNTING
- BACC 2258 - STRATEGIC COST MANAGEMENT
- BACC 2252 - CORPORATE TAX ACCOUNTING AND PLANNING
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BSEO 2315 - BUSINESS LAW
- BACC 2559 - TAXES AND DECISION MAKING

Elective Courses (Required minimum: 6 credits):

- BACC 2542 - ACCOUNTING AND FINANCE LAW
- BACC 2543 - TAX POLICY 1
- BACC 2544 - TAX POLICY 2
- BACC 2557 - ACCOUNTING RESEARCH AND WRITING
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- BACC 2534 - CONTROLLERSHIP
- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BACC 2524 - INTERNAL AUDIT: RISK & ADVISORY
- BACC 2100 - MACC INTERNSHIP

Micro-Credential

Accounting, Micro-Credential

The Micro-credential in Accounting is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in the fundamentals of accounting. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a microcredential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following course is required:

- BACC 2401 - FINANCIAL ACCOUNTING

Choose 6 credits from the following list of courses:

- BACC 2258 - STRATEGIC COST MANAGEMENT
- BSEO 2315 - BUSINESS LAW
- BACC 2466 - RISK MANAGEMENT AND COMPLIANCE ISSUES FACING INTERNATIONAL ORGANIZATIONS
- BACC 2510 - INTERMEDIATE FINANCIAL REPORTING AND ANALYSIS 1
- BACC 2511 - INTERMEDIATE FINANCIAL REPORTING AND ANALYSIS 2
- BACC 2525 - FINANCIAL STATEMENT ANALYSIS
- BACC 2528 - MANAGERIAL ACCOUNTING
- BACC 2537 - TAXES AND MANAGEMENT DECISIONS
- BACC 2549 - STRATEGIC COST ANALYSIS

Total Credits: 9

PhD

Accounting, PhD

The Katz Accounting Doctoral Program discipline prepares graduates to succeed as accounting scholars and educators at top business schools in the United States and abroad. The program features rigorous coursework, thorough research training and close working relationships between doctoral students and faculty to prepare students to be leading accounting academics. Our graduates have an excellent track record of placements at research-oriented business schools and in succeeding in those environments.

Accounting students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within accounting, at least four courses in research methodology, and at least three courses in a minor area

of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, accounting doctoral students typically complete Katz accounting doctoral seminars (BACC 3000 and above) that may include the courses listed below. Students will take additional coursework in areas such as Finance, Econometrics, Game Theory, Cognitive Psychology, Experimental Design and other areas as appropriate. These remaining courses toward the student's program of study must be approved in advance by the Accounting faculty and the Katz Doctoral Program Director. Students are also required to register for independent study courses and independent dissertation work/credits to complete the degree requirements.

Accounting doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year. The financial assistance is awarded one year at a time.

Curriculum

The following accounting seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BACC 3001 - INTRODUCTION TO ACCOUNTING RESEARCH
- BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING
- BACC 3014 - EXPERIMENTAL RESEARCH IN ACCOUNTING
- BACC 3017 - ACCOUNTING WORKSHOP
- BACC 3021 - ARCHIVAL RESEARCH IN MANAGERIAL ACCOUNTING
- BACC 3025 - CAPITAL MARKETS RESEARCH IN ACCOUNTING
- BACC 3050 - CRITICAL THINKING IN ACCOUNTING
- BACC 3052 - CRITICAL THINKING IN ACCOUNTING II
- BACC 3099 - READINGS IN ACCOUNTING
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Area of Business Analytics and Operations

Certificate

Graduate Certificate in Business Analytics

This 15-credit certificate is designed to equip students with the quantitative skills to collect and evaluate data, and the qualitative skills to communicate the findings. Students will learn how to conduct data mining, database management, data programming, and other forms of advanced data analysis. Ultimately, students will be able to use data as a strategic asset to make better decisions and drive results. Upon completion, students will earn an official University credential.

Prospective students who have completed an undergraduate degree are welcome to apply for the University of Pittsburgh Graduate Certificate in Business Analytics. Any Pitt graduate student is eligible to pursue the certificate in addition to their declared degree program.

Admissions to the Graduate Certificate in Business Analytics program may be conditional pending the successful completion of pre-requisite coursework:

- Earn minimum 3.25 (B+) in BQOM 2401 Statistical Analysis or equivalent
- Earn minimum 3.00 (B) in BQOM 2421 Decision Technologies or equivalent

Curriculum

The curricular requirements of the Graduate Certificate in Business Analytics will help students develop the necessary knowledge of business analysis for the specialization.

Core: 12 Credits

- BQOM 2578 - DATA MINING
- BUSSCM 1760 - DATA MINING
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Electives: 3 Credits

- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2544 - SHOPPER ANALYTICS
- BACC 2523 - ACCOUNTING DATA ANALYTICS
- BQOM 2537 - FORECASTING
- BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Doctoral

Business Analytics and Operations

The Business Analytics and Operations discipline offers flexible options for a doctoral student in a variety of related research topics including Supply Chain Management, Data Mining and Business Analytics, Decision Sciences, Project Management, Revenue Management, Simulation Methodology, Stochastic Modeling and Applied Statistical Methods, and Business Analytics. These programs require coursework for two years, followed by a period of dissertation-related research. The doctoral program prepares students for a career in teaching and research at institutions of higher learning.

Business Analytics and Operations students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Business Analytics and Operations, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses (BQOM 3000 and above), as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, Business Analytics and Operations doctoral students will complete Katz doctoral seminars (BQOM 3000 and up) that may include Linear and Nonlinear Programming, Simulation, Statistics, Stochastic Processes, Decision Theory, Current Topics in Operations, Value Chain, Data Mining, Business Analytics, Project Management, and Readings in Operations. Students may also take additional coursework from Katz seminars in other disciplines such as Marketing or Finance. They may request courses from the Industrial Engineering Department and from other University of Pittsburgh approved graduate courses in addition to approved courses from other cross-registration eligible institutions.

The following business analytics and operations doctoral seminars may be offered by the Katz Doctoral Program (subject to student enrollment). Students may supplement their programs of study with additional courses as noted. The following list suggests seminars and courses that students may use, with the permission of their advisors and the Katz Doctoral Program Director, to satisfy the course work phase of their programs of study.

Curriculum

Business Analytics and Operations doctoral students are provided with up to five years (14 terms) of financial support. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

- BQOM 3020 - SIMULATION
- BQOM 3023 - DATA MINING SEMINAR
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 3099 - READINGS IN OPERATIONS RESEARCH
- BFAE 3001 - MICROECONOMICS
- IE 2081 - NONLINEAR OPTIMIZATION
- IE 2100 - SUPPLY CHAIN ANALYSIS
- IE 2007 - STATISTICS AND DATA ANALYSIS
- IE 3094 - MARKOV DECISION PROCESSES
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Joint Degree

Supply Chain Management and Industrial Engineering, MSSCM/MSIE (STEM-designated)

Program Requirements

This joint degree program, offered by the Industrial Engineering Department of the Swanson School of Engineering and the Joseph M. Katz Graduate School of Business, combines quantitative and analytical engineering coursework with coursework in business topics. It positions individuals with an undergraduate degree in engineering or the hard sciences to leverage their skills and become supply chain professionals who can work in a business environment. With a full load of classes, this program can be completed in 4 terms of coursework over a 20-month period and results in two degrees: the MSIE from Swanson and the MSSCM from Katz.

A total of 24 credits from the Department of Industrial Engineering (IE) are required, maintaining a 3.0 GPA:

- 12 credits in required classes, comprising the Department's 3-course, required core (IE 2001 - OPERATIONS RESEARCH, IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, IE 2006 - INTRO TO MANUFACTURING SYSTEMS) plus IE 2100 - SUPPLY CHAIN ANALYSIS from the elective core.
- 12 credits in IE electives:
 - At least 3 elective credits (i.e. one course) must come from the remaining four courses in the elective core: IE 2003 - ENGINEERING MANAGEMENT, IE 2007 - STATISTICS AND DATA ANALYSIS, IE 2088 - DIGITAL SYSTEMS SIMULATION and IE 2303 - WORK DESIGN (Note: students without an undergraduate degree in Industrial Engineering are required to take IE 2303 from the elective core).
 - The 9 remaining elective credits can come from the elective core or any other graduate IE course.

A total of 24 credits from the Joseph M. Katz Graduate School of Business are required, maintaining a 3.0 GPA:

- 13.5 credits in required classes with a minimum requirement of a C grade or better.
- 10.5 credits in supply chain management electives. Must complete experience-based learning requirement through a 3-credit consulting field project course focused on supply chain management, a 3-credit global research practicum on supply chain management or complete an internship (with approval from faculty director).

For application instructions and details on the curriculum requirements for the MSSCM portion of the program, please visit the Joseph M. Katz Graduate School of Business website.

Master's

Management and Business Analytics, MS

The STEM-designated Master of Science in Management and Business Analytics helps to launch a professional career in business analytics for students with little to no work experience. This program provides a specialization in business analytics with the foundations of business management, practical training, and industry connections.

This 17-month, 39-credit program includes core business courses aligned to the foundational MBA curriculum with deep learning of business analytics skills that are highly desired by today's organizations.

Requirements

Students are required to take the following courses, 31.5 credits.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2588 - DATA BASE MANAGEMENT
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT

Experienced Based Learning (3 credits)

One of the below classes are required or other approved by Faculty Director.

- BIND 2024 - CONSULTING FIELD PROJECT
- BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS
- BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE

Supply Chain Management and Business Analytics, MS (STEM-designated)

This STEM-designated program combines broad supply chain knowledge in sourcing, logistics, planning, process improvement, inventory, and pricing with in-depth business analytics skills in data analysis, data mining, data programming, and database management. Streamline process, manage risk, and deliver results in today's global business environment. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 28.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2523 - PROCESS ENGINEERING

- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
 - BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
 - BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
 - BQOM 2578 - DATA MINING
 - BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
 - BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
 - BMIS 2588 - DATA BASE MANAGEMENT
- EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT; BIND 27** Global Research Practicum; OR Internship that has been approved by the faculty director (may substitute BQOM 2139 with faculty director approval)

Supply Chain Elective Courses (Minimum 6.0 credits):

- BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Analytics Elective Courses (Minimum 3.0 credits):

- BQOM 2537 - FORECASTING
- BMKT 2544 - SHOPPER ANALYTICS
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON

Business Elective Courses (Minimum 1.5 credits):

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2306 - MARKETING MANAGEMENT
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Supply Chain Management, MS (STEM-designated)

The Master of Science in Supply Chain Management is a 30 credit program designed to be completed in two terms, on a full-time basis. The program provides students with broad supply chain knowledge and technical skills in sourcing, logistics, planning, inventory, pricing, and consulting. The program has a strong interdisciplinary flavor, letting students select from a wide range of electives that relate to everything from information technology, to accounting, to strategy.

Required Courses (Required total: 16.5 credits):

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
 - BQOM 2421 - DECISION TECH IN MFG & OPS MGT
 - BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
 - BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT
 - BQOM 2523 - PROCESS ENGINEERING
 - BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS
- EBL requirement: BIND 2024 - CONSULTING FIELD PROJECT, BIND 27** Global Research Practicum; or Internship that has been approved by the faculty director (may substitute BQOM 2139 with faculty director approval) 3 cr.
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS

Supply Chain Elective Courses (Minimum 9.0 credits):

- BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2537 - FORECASTING
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Business Elective Courses (Up to 4.5 credits):

- BECN 2509 - GLOBAL MACROECONOMICS: INSTITUTIONS AND POLICY
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMKT 2409 - MARKETING MANAGEMENT
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2544 - SHOPPER ANALYTICS
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BQOM 2904 - PROBLEM SOLVING AND CREATIVITY
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Micro-Credential

Data Programming for Business Insights

Admissions to the micro-credentials are similar to admissions to the PMBA, EMBA, and MS programs. All requirements associated with the graduate micro-credential are most similar to the PMBA and EMBA except we do not require the GMAT, letters of recommendations, or interviews. Specifically we require a Bachelor's degree with a 3.0 cumulative GPA from an accredited U.S. university or the non-U.S. equivalent. The application consists of a \$50 fee, academic transcripts, resume, essay, and TOEFL/IELTS for international applicants.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Management Science, Micro-Credential

The Micro-credential in Management Science is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in evidence-based decision making through management science. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a micro-credential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following two courses are required:

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Choose 4.5 credits from the following list of courses:

- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2523 - PROCESS ENGINEERING
- BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT
- BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS I
- BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION
- BQOM 2578 - DATA MINING

Total Credits: 9

Area of Finance

Doctoral

Finance, PhD

The finance discipline doctoral program seeks to prepare students to make significant contributions to the existing body of academic research in corporate finance, mergers and acquisitions, capital structure, internal firm organization, corporate diversification, corporate restructuring, financial institutions and investments and others. The program produces graduates that can independently identify important research questions and carry out theoretical and empirical investigation at levels suitable for publication in the top academic journals. The finance faculty works closely with students to develop suitable research topics and very often collaborates with students on joint research. In short, we strive for our graduates to obtain academic placements at top research institutions.

Finance students take courses from both the University of Pittsburgh Katz Graduate School of Business and the Department of Economics as part of their training. The finance faculty offers seminars that provide the core of the doctoral students' training. These seminars introduce the theoretical underpinnings of finance. Beyond these seminars, students are expected to take additional finance seminars that focus on their chosen areas of interest. Since strong methodological skills are critical to a successful scholarly career, finance doctoral students typically also take courses in econometrics, statistics, and mathematical methods. Students are free to matriculate into courses within the Katz school, other colleges at the University of Pittsburgh (such as Statistics or Mathematics), or at Carnegie Mellon University.

A minimum of eight major and seven methodology-related courses are necessary to fulfill coursework requirements. Students typically pursue four courses per semester for two years prior to taking their comprehensive exams in late summer following their second year.

Students are also required to complete an independent research proposal/paper and submit it to the finance faculty at the end of the spring in their second year of study. It is anticipated that this proposal will eventually develop into a publishable research article; however, the main goal of the assignment is for students to gain experience in identifying important research questions and carrying out theoretical and empirical investigation of these questions.

The following finance doctoral seminars are offered by the Katz Doctoral Program (subject to student enrollment):

Curriculum

The following finance doctoral seminars are offered by the Katz Doctoral Program (subject to student enrollment)

- BFIN 3000 - FINANCE FUNDAMENTALS
- BFIN 3010 - INDEPENDENT STUDY IN FINANCE
- BFIN 3031 - CORPORATE FINANCE THEORY AND METHODS
- BFIN 3032 - CORPORATE FINANCE SEMINAR 1
- BFIN 3033 - CORPORATE FINANCE SEMINAR 2
- BFIN 3034 - CORPORATE FINANCE SEMINAR 3
- BFIN 3036 - EMPIRICAL ASSET PRICING
- BFIN 3037 - FINANCE SEMINAR IN MARKET MICROSTRUCTURE
- BFIN 3038 - PROPERTY RIGHTS AND THEORY OF THE FIRM
- BFIN 3099 - READINGS IN FINANCE
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Additional

The Economics, Math, and cross-registered courses may include:

- ECON 3001 - INTRO TO MATHEMATICAL METHODS
- ECON 3010 - MATHEMATICAL METHODS OF ECONOMIC ANALYSIS
- ECON 2020 - INTRO TO ECONOMETRIC THEORY
- ECON 2100 - ADVANCED MICROECONOMIC THEORY 1
- ECON 2120 - ADVANCED MICROECONOMIC THEORY 2
- MATH 3225 - MATHEMATICS OF FINANCE 1
 - CMU 0723 Seminar in Finance 1-4

Note

Finance doctoral students are provided with up to five years (14 terms) of financial support. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Master's

Finance and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which allows students to master the quantitative and qualitative aspects of Finance-- valuation techniques, forecasting methods, application of time value of money, building pro-forma financial statements, managing corporate finance functions, and investing & portfolio management. In addition, students will learn data mining, multivariate data analysis, programming, and database management to enable powerful financial decision-making. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 39.0 credits):

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2145 - FINANCIAL MODELING
- BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS

- BFIN 2036 - CORPORATE FINANCE
- BFIN 2030 - VALUATION 1
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING
- BMIS 2588 - DATA BASE MANAGEMENT
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Elective Courses (Required minimum: 6.0 credits):

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2051 - INTRODUCTION TO DERIVATIVES
- BFIN 2068 - MARKETS AND TRADING
- BFIN 2069 - FIXED INCOME SECURITIES
- BFIN 2130 - VALUATION 2
- BFIN 2140 - REAL ESTATE FINANCE

Finance, MS

The Master of Science in Finance is a 30 credit program designed to be completed in two terms, on a full-time basis. The program provides students with a broad overview of the quantitative and qualitative aspects of finance, helping them understand what steps should be taken to maximize shareholder wealth. Students learn the technical skills of everything from valuation techniques, to forecasting methods, to the application of the time value of money, to building pro-forma financial statements. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 22.5 credits):

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS
- BFIN 2030 - VALUATION 1
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2145 - FINANCIAL MODELING

Elective Courses (Required minimum: 7.5 credits):

- BFIN 2069 - FIXED INCOME SECURITIES
- BFIN 2068 - MARKETS AND TRADING
- BFIN 2042 - ACQUISITION OF PRIVATELY HELD COMPANIES
- BFIN 2043 - INTERNATIONAL FINANCIAL MANAGEMENT
- BFIN 2051 - INTRODUCTION TO DERIVATIVES
- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2130 - VALUATION 2

Micro-Credential

Corporate Finance, Micro-Credential

In Summer 2022 the Corporate Finance, Micro-Credential was terminated. Students can complete this micro-credential until Spring 2023 or switch to the new Finance, Micro-Credential.

Admissions to the micro-credentials are similar to admissions to the PMBA, EMBA, and MS programs. All requirements associated with the graduate micro-credential are most similar to the PMBA and EMBA except we do not require the GMAT, letters of recommendations, or interviews. Specifically we require a Bachelor's degree with a 3.0 cumulative GPA from an accredited U.S. university or the non-U.S. equivalent. The application consists of a \$50 fee, academic transcripts, resume, essay, and TOEFL/IELTS for international applicants.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2
- BFIN 2036 - CORPORATE FINANCE

Choose 3 of the following 6 credits

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2030 - VALUATION 1
- BFIN 2130 - VALUATION 2
- BFIN 2031 - CREATING VALUE THROUGH RESTRUCTURING

Finance, Micro-Credential

The Micro-credential in Finance is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in the fundamentals of finance. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a microcredential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following two courses are required:

- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BFIN 2410 - FINANCIAL MANAGEMENT 2

Choose 6 credits from the following list of courses:

- BFIN 2015 - SHORT-TERM FINANCING
- BFIN 2030 - VALUATION 1
- BFIN 2036 - CORPORATE FINANCE
- BFIN 2039 - INVESTMENT MANAGEMENT/CAPITAL MARKETS
- BFIN 2068 - MARKETS AND TRADING
- BFIN 2130 - VALUATION 2

Total Credits: 9

Area of Information Systems and Technology Management

Doctoral

Information Systems and Technology Management

The doctoral program discipline in Information Systems and Technology Management prepares students for successful scholarly careers in research universities. The program provides students with theoretical knowledge and methodological skills to enable them to become productive researchers. Students in Information Systems and Technology Management study problems that practicing IS professionals and managers face as they design, use, and apply information systems and technologies to solve business problems.

Information Systems and Technology Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Information Systems and Technology Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

To achieve the fifteen course total, Information Systems and Technology Management doctoral students typically complete Katz ISTM doctoral seminars (BMIS 3000 and above) as noted below and combine these with choices from other disciplines, for example from Psychology or Statistics.

Students are strongly encouraged to register for all seminars offered by the ISTM faculty. See list below.

ISTM doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following ISTM seminars may be offered toward the major by the Katz Doctoral Program (subject to student enrollment):

- BMIS 3010 - INDEP STUDY MGT INFOR SYSTEMS
- BMIS 3012 - FDS INFORMATION SYSTEMS RESEARCH
- BMIS 3019 - HUMAN/COMPUTER INTERACTION
- BMIS 3025 - TECHNOLOGY INNOVATION ADOPTION DIFFUSION
- BMIS 3042 - DESIGN INFORMATION SYSTEMS RESEARCH
- BMIS 3044 - QUANTITATIVE METHODS IN INFORMATION SYSTEMS RESEARCH
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDO 0000 - FULL-TIME DISSERTATION STUDY

Master's

Management Information Systems, MS (STEM-designated)

This program equips students with both the technical and business skills needed to manage an organization's IT resources. The MS in Management Information Systems is a STEM-designated program and can also be pursued with a Graduate Certificate in Business Analytics, as a dual degree with

the MBA or in a part-time format. Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Business-Oriented Elective Courses (10.5 credits): Credits in this category can be completed in general business areas, such as finance, accounting, or marketing.

Required Courses (Required total: 13.5 credits):

- BMIS 2409 - INFORMATION SYSTEMS
- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
- BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2588 - DATA BASE MANAGEMENT

Elective Courses (Required minimum: 6 credits):

- BMIS 2034 - INFORMATION TECHNOLOGY GOVERNANCE
- BMIS 2053 - DESIGNING THE USER EXPERIENCE
- BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS
- BMIS 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Micro-Credential

Digital Innovation, Micro-Credential

In Summer 2022 the Digital Innovation, Micro-Credential was terminated. Students can complete this micro-credential until Spring 2023 or switch to the new Technology Management, Micro-Credential.

Admissions to the micro-credentials are similar to admissions to the PMBA, EMBA, and MS programs. All requirements associated with the graduate micro-credential are most similar to the PMBA and EMBA except we do not require the GMAT, letters of recommendations, or interviews. Specifically we require a Bachelor's degree with a 3.0 cumulative GPA from an accredited U.S. university or the non-U.S. equivalent. The application consists of a \$50 fee, academic transcripts, resume, essay, and TOEFL/IELTS for international applicants.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

- BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Technology Management, Micro-Credential

The Micro-credential in Technology Management is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in the fundamentals of technology and information systems management. Intended for working professionals, courses are offered in the evening or

weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a micro-credential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following course is required:

- BMIS 2409 - INFORMATION SYSTEMS

Choose 7.5 credits from the following list of courses:

- BMIS 2053 - DESIGNING THE USER EXPERIENCE
- BMIS 2525 - CURRENT ISSUES IN COMPUTING
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES

Total Credits: 9

Area of Marketing and Business Economics

Doctoral

Marketing

The marketing doctoral program discipline seeks to prepare students to contribute to the marketing discipline via the discovery, development, and dissemination of knowledge. The program is designed to equip students with the requisite theoretical background and methodological skills for successful scholarly careers at institutions of higher learning. The marketing group feels strongly that the apprenticeship model is the most efficacious approach to doctoral training and, to that end, students typically engage immediately in research projects with faculty. Recent students have been successful in publishing these projects in leading journals such as the Journal of Consumer Research, the Journal of Marketing Research, and the Journal of Marketing

The marketing interest group offers seminars that provide the theoretical core of marketing doctoral students' training. These seminars introduce the central conceptual and phenomenological aspects of the marketing field, as well as the methodological approaches employed in their examination. Since the field of marketing scholarship segments into consumer behavior, modeling, and marketing management, seminars are offered in each of these areas, plus a methodological and marketing theory seminar.

- BMKT 3001 - CONSUMER BEHAVIOR 1
- BMKT 3002 - CONSUMER BEHAVIOR 2
- BMKT 3010 - INDEPENDENT STUDY IN MARKETING
- BMKT 3014 - MARKETING STRATEGY
- BMKT 3017 - MARKETING MODELS
- BMKT 3018 - SPECIAL TOPICS IN MARKETING
- BMKT 3025 - MARKET BEHAVIOR RESEARCH
- BMKT 3099 - READINGS IN MARKETING
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Beyond these seminars, students are expected to take additional seminars (the minimum major course requirement is eight courses) that focus on their chosen area of interest. Students are free to matriculate into courses within the Katz School, other departments at the University of Pittsburgh (such as Psychology, Economics, or Statistics), or at Carnegie Mellon University.

Since strong methodological skills are critical to a successful scholarly career, marketing doctoral students typically take seven or more courses in analytical methods, statistics, and/or econometrics (the minimum course requirement for a combined research methods/minor is seven). A focus in analytical methods or advanced statistics is the norm. Below is a list of some of the topics offered to satisfy this requirement. These topics are offered University-wide, within Katz, or at Carnegie Mellon University. Other choices may be proposed by the student and approved by the faculty advisor.

Analysis of Variance
Probability Theory
Experimental Design
Multivariate Statistics
Mathematical Statistics
Introduction to Econometric Theory
Human Judgment and Decision Making
Behavioral Economics
Katz Microeconomics
Learning and Memory
Advanced Data Analysis
Advanced Topics in Emotion and Decision Making

Students are required to complete an independent research paper and submit it to the marketing faculty in the summer of their first year of study (third term). It is anticipated that this paper will develop into a publishable research article.

Marketing doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Master's

Marketing Science and Business Analytics, MS (STEM-designated)

Differentiate yourself with this STEM-designated program which allows students to gain technical skills in multivariate data analysis, data programming, data mining, and database management. In addition, the program helps students develop an in-depth understanding of consumer behavior through the study of customer insights, research techniques, digital marketing, and social media marketing with advanced data analysis and decision making techniques and skill. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 31.5 credits):

- BMKT 2409 - MARKETING MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY
- Marketing Science Project Course, minimum 1.5 credits (ex: Consulting Field Project, Applied Behavioral Economics or other approved by Faculty Director)
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BQOM 2512 - ADVANCED DECISION TECHNOLOGY
- BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1
- BQOM 2578 - DATA MINING

- BMIS 2588 - DATA BASE MANAGEMENT
- Programming course (choose one): BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON/BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R

Elective Courses (Required minimum: 7.5 credits):

- BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS
- BMKT 2569 - BRAND MANAGEMENT
- BMKT 2532 - PRICING STRATEGIES AND TACTICS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BIND 2024 - CONSULTING FIELD PROJECT
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE

Total Credits: 39

Marketing Science, MS

The Master of Science in Marketing Science is a 30 credit program designed to be completed in two terms, on a full-time basis. The program prepares students for the future of marketing, offering a broad introduction to marketing alongside in-depth study of customer insights, research techniques, data analytics, digital marketing, and social media marketing. Students learn how to build effective marketing strategies based on data and the latest technological tools. Students enrolled in this program must complete the appropriate number of required and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Required Courses (Required total: 18 credits):

- BMKT 2409 - MARKETING MANAGEMENT
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BMKT 2031 - MARKETING RESEARCH
- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2551 - DIGITAL AND SOCIAL MEDIA ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY
- Marketing Science Project Course Requirement (ex: minimum 1.5 credit relevant EBL course approved by Faculty Director)

Elective Courses (Required minimum: 12 credits):

- BMKT 2032 - APPLIED BEHAVIORAL ECONOMICS
- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2532 - PRICING STRATEGIES AND TACTICS
- BMKT 2569 - BRAND MANAGEMENT
- BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS
- BQOM 2578 - DATA MINING
- BIND 2024 - CONSULTING FIELD PROJECT
- BMIS 2526 - ADVANCED DATA PROGRAMMING WITH R
- BMIS 2542 - DATA PROGRAMMING ESSENTIALS WITH PYTHON
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES

- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE

Total Credits: 30

Micro-Credential

Marketing Analysis, Micro-Credential

The Micro-credential in Marketing Analytics is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in marketing analytics. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a microcredential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following course is required:

- BMKT 2409 - MARKETING MANAGEMENT

Choose 7.5 credits from the following list of courses:

- BMKT 2544 - SHOPPER ANALYTICS
- BMKT 2553 - SOCIAL MEDIA STRATEGY
- BMKT 2*** - DIGITAL MARKETING ANALYTICS

Total Credits: 9

Marketing Foundations, Micro-Credential

The Micro-credential in Marketing Foundations is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in the fundamentals of marketing. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a micro-credential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following course is required:

- BMKT 2409 - MARKETING MANAGEMENT

Choose 7.5 credits from the following list of courses:

- BMKT 2031 - MARKETING RESEARCH
- BMKT 2513 - CONSUMER BEHAVIOR 1
- BMKT 2530 - SERVICES MKTG:STRATEGIES/TACTICS
- BMKT 2533 - BUSINESS TO BUSINESS

Total Credits: 9

Marketing Strategy, Micro-Credential

The Micro-credential in Marketing Strategy is a cost-effective, mini-qualification designed to provide you with knowledge, skills, and abilities in the nuances of marketing strategy. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a micro-credential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following course is required:

- BMKT 2409 - MARKETING MANAGEMENT

Choose 7.5 credits from the following list of courses:

- BMKT 2526 - PRODUCT DEVELOPMENT & MANAGEMENT
- BMKT 2528 - ADVERTISING
- BMKT 2532 - PRICING STRATEGIES AND TACTICS
- BMKT 2569 - BRAND MANAGEMENT

Total Credits: 9

Area of Organizations and Entrepreneurship

Doctoral

Organizational Behavior and Human Resources Management

The OBHR doctoral program discipline focuses on preparing students to impact the study of people, process and outcomes within the fields of organizational behavior and human resources management. Through research, collaboration and dissemination of knowledge, students understand how to impact organizational effectiveness in a variety of different environments, industries and across multiple levels of analyses. Our expectation is that students will craft a program of research that is built upon rigorous theory as well as strong methodological skills that are both necessary for effective scholarship. We encourage collaboration with OBHR faculty that has a proven track record of publishing within a variety of top outlets.

Organizational Behavior and Human Resources Management students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Organizational Behavior and Human Resources Management, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses. For example students often choose psychology, decision sciences, statistics and research methodology to name a few. Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

Organizational Behavior and Human Resources Management doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following OBHR seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BOAH 3002 - FOUNDATIONS OF ORGANIZATIONAL BEHAVIOR
- BOAH 3027 - OBHR RESEARCH WORKSHOP I
- BOAH 3028 - OBHR RESEARCH WORKSHOP II
- BOAH 3099 - RDGS ORGNZTNL BEHAVIOR/HR MGT
- BORG 3010 - INDEP STUDY ORGNZTNL STUDIES
- BORG 3020 - TOPICS ORGANIZATIONAL BEHAVIOR
- BORG 3099 - READINGS ORGANIZATIONAL STUDIES
- BUSADM 3011 - INTERNATIONAL MANAGEMENT
- BUSADM 3013 - WORK AND ORGANIZATIONS
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Master's

Management, MS

The Master of Science in Management is a 30 credit program designed to be completed in two terms, on a full-time basis. The curriculum includes 19.5 credits of core business management courses that overlap with the Katz MBA curriculum. Students also choose 10.5 credits of electives from areas of study in finance, management of information systems, marketing, organizational behavior, human resource management, and entrepreneurship.

Students enrolled in this program must complete the appropriate number of prerequisite, required, and elective courses according to program requirements, and maintain a minimum GPA of 3.0.

Core Courses

Students are required to complete 19.5 credits of core courses.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT I
- BMKT 2409 - MARKETING MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Electives

Students will choose 7.5 credits that reflect their business discipline interest, as well as a 3.0 credit Experienced Based Learning course that complements their elective choices as a "business block". Although MSM students may select electives from the full Katz Masters course catalog to build their own business focus, academic advisors will provide students with "blocks" (or tracks) of suggested electives that are in-demand by employers and of interest to today's students. Students will be encouraged to consider selecting electives as a "business block" in order to develop specific skills, however, this will not be a requirement.

Micro-Credential

Innovation and Entrepreneurship

Admissions to the micro-credentials are similar to admissions to the PMBA, EMBA, and MS programs. All requirements associated with the graduate micro-credential are most similar to the PMBA and EMBA except we do not require the GMAT, letters of recommendations, or interviews. Specifically we require a Bachelor's degree with a 3.0 cumulative GPA from an accredited U.S. university or the non-U.S. equivalent. The application consists of a \$50 fee, academic transcripts, resume, essay, and TOEFL/IELTS for international applicants.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES

Choose 3 of the following 10.5 credits

- BSEO 2012 - SOCIAL ENTREPRENEURSHIP
- BSEO 2525 - COMPETITIVE INTELLIGENCE
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE

Leading People in Organizations

Admissions to the micro-credentials are similar to admissions to the PMBA, EMBA, and MS programs. All requirements associated with the graduate micro-credential are most similar to the PMBA and EMBA except we do not require the GMAT, letters of recommendations, or interviews. Specifically we require a Bachelor's degree with a 3.0 cumulative GPA from an accredited U.S. university or the non-U.S. equivalent. The application consists of a \$50 fee, academic transcripts, resume, essay, and TOEFL/IELTS for international applicants.

Requirements

This micro-credential is designed as a 6-credit program with a curriculum comprised of core and elective courses currently offered to Katz Masters students.

- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSPP 2409 - STRATEGIC MANAGEMENT

Choose Two Courses: (3 Credits)

- BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG
- BOAH 2517 - INTERPERSONAL SKILLS MANAGERS 1
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BOAH 2537 - CONFLICT RESOLUTION IN THE WORKPLACE 1
- BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER
- BSEO 2538 - STRATEGIC LEADERSHIP

Area of Strategic Management

Doctoral

Strategic Management

Students in the Strategy discipline study the problems and issues facing general managers who must formulate and implement strategies for organizations in uncertain and ambiguous environments. Seminars cover theory and empirical findings related to strategy formulation and implementation, and are intended to familiarize students with the variety of research perspectives relevant to the strategy field. In addition, each faculty member leading a course will ask participants to build upon extant research to develop their own research topics as a first step toward publishing articles.

Strategy students must complete a total of 15 seminars/courses (17 courses if they do not exempt the MBA course requirement). This includes eight courses in their major area of study within Strategy, at least four courses in research methodology, and at least three courses in a minor area of study. Students may instead choose to complete eight courses in their major area and seven total courses in research methodology for a research methodology minor. Students should choose individually approved seminars and courses from the enclosed list of Katz seminars and courses, as well as from approved University of Pittsburgh seminars and courses.

Finally, on a limited basis students may also cross-register into approved seminars and courses at other institutions to support their overall program of study. Each program of study must be approved by the student's faculty advisor and the Director of the Katz Doctoral Program. Any subsequent seminar/course changes must also be approved.

Strategy doctoral students are provided with up to five years (14 terms) of financial support in the form of Graduate Student Assistantship, Teaching Assistant or Teaching Fellow. Typically students provide research assistance to their faculty mentors for approximately four years and provide teaching and teaching assistance for up to one year.

Curriculum

The following Strategy seminars are offered by the Katz Doctoral Program (subject to student enrollment):

- BSPP 3010 - INDEP STUDY STRATGC PLNNG POLICY
- BSPP 3011 - STRATEGIC PLANNING SYSTEMS
- BSPP 3012 - RESEARCH IN COMPETITIVE STRATEGY
- BSPP 3013 - FOUNDTNS OF STRATEGY RESEARCH
- BSPP 3014 - RESEARCH IN CORPORATE STRATEGY
- BSPP 3018 - THEORY BUILDING IN MANAGEMENT
- BSPP 3019 - SEMINAR IN ENTREPRENEURSHIP
- BSPP 3099 - READINGS STRATEGC PLNNG & POLICY
- BUSADM 3199 - RESEARCH AND DISSERTATION PHD
- FTDF 0000 - FULL-TIME DISSERTATION STUDY

Micro-Credential

Management Consulting, Micro-Credential

The Management Consulting Micro-Credential offers students the opportunity to become familiar with the structure and workings of this industry, as well as the essential toolkit of a consultant. Intended for working professionals, courses are offered in the evening or weekends in as little as two semesters. There is flexibility to start a micro-credential any semester of the year and you can take up to three years to complete a micro-credential.

Requirements

Micro-credentials are designed as a 9-credit programs with a curriculum comprised of core and elective courses currently offered to Katz Masters students. The following two courses are required:

- BSPP 2409 - STRATEGIC MANAGEMENT
- BSEO 2570 - FUNDAMENTALS OF MANAGEMENT CONSULTING

Choose 6 credits from the following list of courses:

- BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER
- BSEO 2509 - BUSINESS AND POLITICS
- BMIS 2551 - PROJECT MANAGEMENT CONCEPTS AND PROCESSES
- BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1
- BIND 2072 - ENTREPRENEURSHIP START-UP ESSENTIALS
- BIND 2204 - MANAGING THE PROFESSIONAL SERVICES FIRM
- BSEO 2538 - STRATEGIC LEADERSHIP
- BIND 2203 - ORGANIZATIONAL TRANSFORMATION
- BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT
- BENV 2115 - MARKET MANIPULATIONS
- BSEO 2525 - COMPETITIVE INTELLIGENCE
- BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Total Credits: 9

The University of Pittsburgh's School of Computing and Information (SCI) opened on July 1, 2017, building upon the traditions of excellence embodied by the Department of Computer Science and School of Information Sciences. SCI aims to position the University as a leader in preparing students for this increasingly interconnected world by providing students with excellent disciplinary foundations and training to support our mission of making the world a better place through polymathic education and the science of interacting systems. Our degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. We foresee a future with increased opportunities to expose our students to a multidisciplinary approach to knowledge creation, information management, and computing; expanded experiential learning opportunities; and extended career networks.

SCI represents the confluence of computing and information along with diverse academic disciplines, serving as a valuable resource to researchers, students, and organizations across the University and around the world. SCI is a new school for a new era of research and learning, one in which the power of information and computing will accelerate knowledge discovery and creativity.

The regulations set forth in the following document apply to students who were admitted to the School of Computing and Information during the 2020-2021 Academic Year. Students admitted prior to this academic year should refer to the Archived Catalogs for the regulations governing their graduate studies.

Students admitted PRIOR to the 2017-2018 Academic Year will find the School-level rules to which they are bound by going to the Archived Catalogs for either Arts & Sciences (Computer Science or Intelligent Systems degrees) or School of Information Sciences (Information Science, Library & Information Science, and Telecommunications degrees).

Office of the Dean

Information Sciences Building, Fifth floor
135 North Bellefield Avenue
Pittsburgh, PA 15260

Detailed contact information for all departments, offices, and staff can be found on the SCI Contact Us webpage.

Admission Requirements and Procedures

General guidelines for applying to a graduate program at the University of Pittsburgh should be reviewed prior to submitting an application for admission. These guidelines are available on the University's Application for Admission Catalog page.

The School of Computing and Information seeks students with diverse interests and abilities for its graduate degree and certification programs. All applicants will be judged on their own merits. Applicants for master's study must have earned a bachelor's degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better; the doctoral programs have more stringent requirements. For those who have been in the workforce, admission will be based upon academic achievement, area of study, career orientation, and work experience.

Apply Online: Applications for graduate study must be completed and submitted entirely online. Applicants must set up a free account that enables you to work on your application over several sessions. Your information is transmitted through a secured server and is kept private until you submit your application. After submission, your application materials will be managed confidentially within the review process.

Individual programs require supplemental application materials, and some programs require prerequisite coursework and skills knowledge. More details regarding expectations for the statement of intent or writing portfolio, pre-requisite courses, and other supplemental application materials can be found on the individual program pages (through the appropriate program).

Admissions Status

Students are admitted to a graduate program and granted one of the following three types of graduate status: Full, Provisional, or Special.

1. Full graduate status: when all admission requirements are met; For full details, see *Admission Status* in the Regulations Governing Graduate Study at the University of Pittsburgh.
2. Provisional graduate status: when some admission requirements are not (or inadequately) met.
 - Applicants who are graduates of a recognized college or university but who do not qualify for admission to full graduate status because of deficiencies in either appropriate background courses or their scholastic achievement may be considered for provisional graduate status if strong supporting evidence of their ability to complete a graduate program is provided. Courses taken to remove deficiencies do not contribute toward the completion of graduate degree requirements. Transfer from provisional to full graduate status is initiated by the student and recommended by the Department or Program, and is possible only after removal of deficiencies and other conditions noted at the time of admission and satisfactory progress in graduate work.
 - Students should confer with their Department regarding their graduate status and may request a new admissions letter after full graduate status has been obtained.
3. Special graduate status: to take specific graduate-level courses for one or more terms without the intent of earning a degree or certificate.

Note: students with special graduate status must apply and be admitted to a degree program in order to change to full graduate status. Upon admission to the degree program, students must seek Department recommendation for the transfer of credits from special to full graduate status. Classes completed while on special status will be treated the same as external transfer credits, guided by the same policies and processes.

Application Processing

Begin the online application process at www.sci.pitt.edu.

Your application will be available for review by the Department or Program once all the recommendation letters are submitted and all test results and transcripts are uploaded.

Please note that, during the December-January time frame, numerous applications are received. Due to the volume of submissions, there may be a delay in the confirmation of receipt of materials.

Applicants are encouraged to check their online application account to ascertain if documentation has been received or if an admissions decision has been made PRIOR to contacting the School for such details. Note, the status of your application, related documents, and admission decision cannot be verified until you have submitted the application fee (which is the final step in submitting your application).

Applicants are notified via e-mail when an admissions decision has been posted to the online application system.

The University of Pittsburgh participates in the Council of Graduate Schools' (CGS) "Resolution Regarding Graduate Scholars, Fellows, Trainees and Assistantships" also known as the "April 15 Resolution." Participation in the resolution allows admitted graduate students to consider all offers of financial support through April 15. In turn, the resolution binds students to their decisions made or held in place after April 15. SCI's cooperation ensures that both students and Programs conduct their admissions in an ethical manner, and that they receive equal treatment and consideration in the financial support decision-making process. Further details regarding the "April 15 Resolution," including a list of participating institutions, can be found on the Council of Graduate Schools Web site.

Deadlines

Deadlines for US Citizens and Permanent Residents

See the School of Computing and Information's Graduate Admissions FAQ webpage for application deadlines. Priority consideration will be given to applications received by these deadlines; late applications may be deferred to the next application cycle.

Deadlines for international students' applications to the School of Computing and Information are posted on the School of Computing and Information's Graduate Admissions FAQ webpage.

Deadlines for International Students

Due to delays in the issuance of visas, it is recommended that international students apply as early as possible, preferably at least six months prior to the start of the term of admittance. Deadlines for international students' applications to SCI are posted on the School of Computing and Information's Graduate Admissions FAQ webpage.

Admission of International Students

Non-US Citizens must read through the International Graduate Student Admission section of the University's Application for Admission page for a complete overview of University admissions requirements, including TOEFL, IELTS, or Duolingo scores, for students from other countries.

English Language Proficiency Requirements

Graduate students must possess sufficient knowledge of English to study without being hindered by language problems, to understand lectures, and to participate successfully in class discussion. International applicants must submit either the TOEFL, the IELTS, or Duolingo scores (taken within two years of the date of application).

Applicants must contact Educational Testing Services directly to request that an official score report be sent to the School of Computing and Information. The institution code for the University of Pittsburgh is 2927. Submission of test results is required for admission to graduate study in this School. Individual degree programs may have varying minimum requirements, which are outlined on each program's Catalog page. Applicants who are citizens of a country where English is the official language are exempt from submitting the results of the TOEFL, IELTS, or Duolingo tests. In addition, applicants who have earned a bachelor's degree or higher degree from a regionally accredited institution in the U.S. are also exempt from submitting test results. However, the School reserves the right to ask for scores if deemed necessary for the evaluation of the application. Please note that degrees, where anything less than the entire degree was completed in-residence within the English-speaking country, will be reviewed on a case-by-case basis. Students in these circumstances may be required to complete the TOEFL, IELTS, or Duolingo test with the required minimum score upon review.

Prior to registration, students with TOEFL scores less than 100 (Internet-based), IELTS scores less than Band 7.5, or Duolingo English Test scores less than 125 will be required to complete the on-campus English Language Proficiency Test.

If remedial courses in English as a second language are recommended as an outcome of the test, the student must complete the remedial course during the first academic year of study; some programs may require students to follow a shorter completion timeline for remedial courses. Progress in the remedial English language courses is monitored by SCI Academic Records. Failing to enroll in and successfully complete the required language course will result in restrictions on future enrollment activity and will count against a student's progress toward a degree in SCI's review of Academic Standing (see Academic Standing and Dismissal section for details).

Special Admissions

Deferred Admissions

Admission to graduate study is valid for the academic year. A student may defer admission for up to one year without reapplication. The student must submit a deferral request through the online application system. Additional course work taken during the deferred year and a new affidavit of financial support should also accompany any financial aid request. Approval of a student's request to defer admission does not necessarily mean that any financial aid awarded is also deferred; the offer of financial aid will be reassessed for the student's deferred admit term.

Reinstatement

Students who have left the University for one calendar year or more (whether of their own volition or as a result of a suspension), who did not complete work at another institution, and who wish to continue their studies must apply for reinstatement through the School's online application system; exceptions noted in the Leave of Absence (LOA), Readmission, and Reinstatement section.

Readmission

Students who previously attended the University of Pittsburgh before attending another institution and who wish to return to the University will be considered after submitting a new application to their graduate degree program via the School's online application system. All supporting materials must be submitted; revision of essays is suggested. Inclusion of all transcripts -including new coursework completed during the period of leave- is required.

Students who have completed credits at another institution during a break from the University of Pittsburgh may request that these credits be reviewed for transfer. All such requests are bound to the University, School, and Department policies for transfer credits and will be reviewed after a student has matriculated to the University.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Leave of Absence (LOA), Readmission, and Reinstatement section of the SCI Catalog page.

Transferring Between SCI Departments or Programs

Students may request to transfer to a different Department or Program within SCI. Transfers between SCI Departments or Programs will be reviewed by the receiving Department's admissions committee, including a thorough assessment of the student's academic performance in previous institutions and SCI. Faculty will review the student's original application materials and may require that the student submit supplemental application materials.

To initiate a transfer between SCI Departments or Programs, a student must submit the Graduate Academic Plan Change Form at least one month prior to the start of the new admission term. If a University break occurs during that time, students should allow for additional time for their transfer to be evaluated by the Department's admissions committee and their official student record to be processed.

Students should note that transfer to a different Department or degree is not guaranteed. Additionally, students will not be reconsidered for a program for which they have already been previously reviewed but not admitted.

Appointments and Financial Information

Teaching and Research Appointments

Financial assistance for graduate students is provided in the form of teaching and research appointments, fellowships, traineeships, tuition scholarships, and loans. Interest in these sources of financial assistance should be indicated on the application for admission to graduate study. All applications for financial assistance are reviewed at the Departmental or Program level and awards are made to the extent of available funds. Admission to graduate study does not carry any implications concerning the award of financial aid. Only students with full graduate status are eligible for teaching assistantships and fellowships. Please note: teaching assistantships and fellowships are typically awarded to doctoral students only.

In recognition of academic merit, the University offers teaching assistants (TA), teaching fellows (TF), graduate student assistants (GSA), and graduate student researchers (GSR) full or proportional tuition scholarships, and students are required to register for the number of credits proportional to the appointment. If appointed in the summer term, students should register for a minimum of three credits (or full-time dissertation study, if eligible), unless additional registration is needed for academic purposes.

Policies governing TA/TF/GSA/GSR positions can be found on the Provost's Guidelines and Resources web page.

SCI-Based Funding

Additional and limited funding, beyond the aforementioned teaching and research appointments, may be available to graduate students. Applications for these financial aid opportunities are submitted only after an offer of admission is made. Admitted students must apply for these opportunities through the University's Student Portal, under the heading "Apply for a Scholarship > PittFund\$Me."

Further details regarding financial assistance, international students' proof of funding, and federal student aid or loans should refer to SCI's Graduate Admissions FAQ.

Tuition Fees and Billing

The University updates the Financial Information page in July for the upcoming academic year.

Academic Regulations and Standards

University Registration Policies

Policies on full-time/part-time status, adding and dropping courses, cross-registration, grading systems, etc., are governed by the University at large. Students should refer to the University's Academic Regulations for general information and contact SCI Academic Records for more details on applying these policies in practice.

Highlighted are frequent topics of inquiry: Satisfactory/No-Credit, Registration (Enrollment), Cross-Registration, Withdrawing or Resigning, Grading and Records, Academic Record and Grade Reports.

In addition to those University-wide regulations and standards detailed in the section on General Academic Regulations, each student in the School of Computing and Information is expected to be familiar with the following School-specific regulations and academic standards.

Grading Policies

Courses for which a G, I, N, R, or W grade is recorded and courses numbered below 1000 (0-0999) do not contribute either credits or grade points toward graduation. Courses numbered 1000-1999 only contribute credits or grade points toward graduation when approved by the Department or Program PRIOR to enrollment.

Students must achieve the minimum GPA, in no case less than 3.00, and individual course grade minimums established by their Department or Program in order to be eligible to retain teaching assistantships or fellowships, undergo the preliminary evaluations, take comprehensive examinations, be admitted to candidacy for the PhD degree, and graduate. No grade lower than a C will be counted toward graduation requirements, yet all letter grades will be calculated into the student's cumulative GPA unless if a class is repeated and a course repeat form processed. See the Repetition of Courses section below for more information.

Auditing Courses and Selecting a Grading Option

With the consent of the instructor, students may choose to audit a course or complete it with a Satisfactory/No Credit (S/NC) option. Regulations for S/NC credit allowances are governed by the Departments and are subject to the grade options allowed for each particular course (i.e., not all courses may be taken as S/NC). To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.

Graduate students do not choose a grading option (letter grade or S/NC) during enrollment; rather, students must complete the Grade Option/Audit Form no later than four weeks after the start of term. This decision may not be changed, nor may a grade of one kind received for a course be changed to a grade of the other kind (e.g., from an S/NC grade to a letter grade).

Note: The University's Office of the Registrar does not require submission of a Grade Option/Audit Request form for graduate courses. **However, SCI Academic Records does require this documentation for course auditing and S/NC grade options.**

The default is for all classes to be graded with a letter grade (unless otherwise stipulated by the Course Catalog), and decisions to select an alternative grading option (S/NC or Audit) should be discussed with the student's advisor. After a grading option has been selected and documented, this decision may not be changed.

Grade Changes

Grade changes are submitted by the course instructor. Grades will not be changed more than one year after the term's end, nor if a student's record has become inactive or if a student has graduated.

Incomplete (G or I) Grades

The G grade signifies unfinished course work due to extenuating personal circumstances. A student assigned a G grade is required to complete course requirements no later than one year after the term in which the course was taken, though instructors may require a shorter turnaround time to complete coursework. If an instructor is to assign an incomplete grade, the student and instructor must come to an agreement regarding the expected timeline of completion, grading, etc. SCI Academic Records can provide assistance in documenting and enforcing this agreement through an "Incomplete Grade Contract."

After the contract expiration deadline has passed, the G grade will be changed by the instructor to the fallback grade noted in the contract. Students who have a signed contract and are working to complete coursework to replace a G grade should not re-enroll in the class. If the University's one-year deadline has passed, the G grade will automatically be replaced by "NG" or "no grade" and will remain on the record. Students with an NG grade will be required to reregister for the course if it is needed to fulfill the requirements for graduation.

The I grade signifies incomplete course work due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

Repetition of Courses

Required courses for a major must be repeated or replaced by a comparable course if a grade does not meet the degree's minimum requirements (see Department or Program page for specifics). Course repetitions are subject to further regulations:

- Students typically only repeat a course in which the grade of C- or lower has been earned. However, upon Department or Program approval, the student may repeat a course in which they have earned a B- or lower.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript, but the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G and I) are not identified as repeated courses until the course work is completed.
- Students are only permitted to repeat a course up to two times. Departments or Programs may have stricter course repeat policies.
- Any grade earned in the repeated course will be recorded on the academic transcript and calculated in the GPA, even if it is lower than the original grade.

The School automatically submits a course repeat form for students, though it is the responsibility of the student to ensure their repeat course grades have been updated with the "Repeated - Excluded from GPA" flag on their academic record and that all credits have been calculated correctly. Students should discuss repeat courses with their advisor at the beginning and end of the term of enrollment.

Credit and Enrollment Policies

Pre-requisite courses, and any coursework required to prepare for pre-requisite courses, are not calculated in the total credits required to earn a degree. For a list of pre-requisite courses for a degree and/or a degree specialization, refer to the individual degree Catalog pages.

The School of Computing and Information allows its graduate students to register for 16 credits in a term before additional per-credit tuition charges apply.

Transfer Credits

University Academic Regulations allow transfer credits to be applied towards an advanced degree. Students who have completed graduate courses in degree-granting graduate programs at other appropriately accredited institutions, or who have completed graduate-level coursework enrolled under "special status" at the University of Pittsburgh, and who would like to request a transfer of credits should request that their department or program evaluate these courses for transfer credit. Students should follow the process specified by their degree program to initiate this process. Once approved, the Department or Program will work with SCI Academic Records to ensure the posting of all accepted credits to the student's Pitt transcript; this process requires the submission of official transcripts from the institution(s) at which the student completed the courses to be transferred.

Requests must adhere to the University's limitations for transfer credits. See the University's Academic Regulations for details.

Advising

The quality of education that graduate students receive is greatly enhanced with good academic advising at all stages of their Program. Given the diversity of these needs, each Program must determine the best way to provide these services. Academic advising provides the foundation upon which students plan their studies. It is the policy of the School for each student to have an academic advisor whose responsibilities include providing guidance in developing the student's career goals and academic programs, approving course selections, and advising as needed on issues affecting the student's academic and professional careers. Students are matched with an advisor upon admission; they may, however, change advisors at any time. A student's assigned advisor can be viewed in the Student Center via my.pitt.edu. The goal of academic advising is to develop a consistent academic program coordinated to meet general program requirements and specific needs of individual students. Ideally, the student and faculty advisor function as a team working toward the objective of career preparation by means of the strongest possible academic experiences for the student. Students should meet each term with their advisors to ensure timely progress through their Program.

All Departments and Programs are responsible, with Dean's Office oversight, for implementing policies and practices consistent with the University's in *Elements of Good Academic Advising*. Unresolved problems relating to the advising of graduate students at the Department or Program level should first be addressed with the Chair of the Department or Program.

Note regarding Graduate Faculty advisors and enrollment: Advising holds/service indicators, permission numbers, withdrawals, and enrollment-related policies and procedures should be referred to the SCI Academic Records. Course selection, research development and interests, and curriculum-based inquiries should be vetted through the student's advisor.

Exemptions to enrollment policies and degree requirements are approved by the Department or Program and are mediated through the student's advisor. Exemptions are then relayed to SCI Academic Records for inclusion in the student's academic record. See the SCI Current Students webpage for related forms.

Tracking your degree progress

In order for students to verify that they are making progress toward graduation, they should meet regularly with their academic advisor and review their progress and plans for future study.

In addition, graduate students should make use of the academic advisement report (AAR) as a self-advising tool. This report is used by the School to certify a student's graduation eligibility and by students to track their progress toward degree attainment. The AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment. It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

Where questions regarding course substitutions for or waivers of requirements are concerned, the student should contact their academic advisor. The Department or Program's decision to amend requirements is communicated to SCI Academic Records for documentation and correction on the AAR. Requests for updates include "Best Fit" changes (re-directing courses to the appropriate requirement area), authorized student exemptions, and corrections to transfer credits. See the School's Student Resources > School Forms webpage for related forms.

Informational videos and documents related to the AAR can be found on the Registrar's Student Training website. Detailed advising information is available on the program offering pages.

Statute of Limitation

University limitations on the time allowed for completion of Master's and Doctoral degrees can be found in the General Regulations section of the Regulations Governing Graduate Study at the University of Pittsburgh. The School of Computing and Information does not further restrict these limitations, though some degree programs may have a more stringent statute of limitations for completion of master's or doctoral degrees. See the program offerings for specific details.

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. Requests for an extension must state the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a detailed plan of study and proposed date for completion. The request must be approved by the chair of the student's doctoral or master's degree committee (if applicable) and the Department or Program Chair or Director of graduate studies, and be submitted to the Dean's Office for final action.

Leave of absence (LOA), Readmission, and Reinstatement

Graduate students may be granted a leave of absence under special conditions. Students who have resigned without requesting a leave of absence or have been away from the University for one or more years must apply for readmission or reinstatement. By University definitions, *readmitted students* previously attended the University of Pittsburgh and then enrolled at another external institution. *Reinstated students* previously attended the University of Pittsburgh and left for one or more calendar years, not attending external institutions in the meantime. These terms are attached to specific graduation requirements. All students interested in readmission or reinstatement must submit an application except for those on an approved leave of absence (see Special Admissions section for details).

Readmitted students follow the School and degree graduation requirements and rules based upon their term of readmission. Their statute of limitations is reset to their term of readmission and their transfer credits, advanced standing, and previously authorized exemptions will be reevaluated at the point of readmission.

Reinstated students follow the School and degree requirements and rules based upon their original term of entry to the School. Their statute of limitations is calculated against their original term of entry to the University and their transfer credits, advanced standing, and previously authorized exemptions will be accepted as previously approved at the point of reinstatement.

Exceptions to the reinstatement rules include:

- Students whose leave exceeds two years. All students who have been away from the University more than two years will be subject to the requirements of the School and of their major and/or certificate programs at the time of their reinstatement, rather than those in place at the time of their last attendance.
- Students on an approved leave of absence.

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to Doctoral students or one year to Master's students. The length and rationale for the leave of absence must be stated in advance, submitted via the School's Leave of Absence Request form (found on the Current Students webpage), recommended by the Department or Program, and approved by the Dean's Office.

If granted approval by the Dean's Office, a student is ensured that the time of the leave shall not count against the degree's statute of limitation and that the student's transfer credits and previously authorized exemptions will be accepted as previously approved. If a student petitioned the faculty and received permission to enroll in an external institution during their LOA for transfer credit in advance of their LOA, the credits may still transfer upon the student's return.

Students who have an approved LOA do not have to apply for readmission nor reinstatement. Instead, instructions for returning to the School will be shared with the student in the letter sent approving their leave.

A note on advising appointments and a returning from a break in continuous enrollment: Since registration open enrollment begins in the twelfth week of the preceding term, applications for reinstatement should be received prior to that period so that the student's application can be reviewed and their record updated. Similarly, students who are returning from an LOA should keep this timeline in mind for setting up an appointment with their advisor and/or notifying SCI Academic Records of their return to studies. Only after a student on an approved LOA has notified SCI Academic Records will their enrollment service indicator (registration hold) be released from their record.

Regardless of the conditions surrounding a student's leave-e.g., an intentional leave of absence, suspension, or an extended lapse in enrollment requiring reinstatement-when a student returns, they return in the standing attached to their record (good, warning, or probation) at the term of their departure.

Academic Integrity

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Academic Standing and Dismissal

Academic standing is maintained and monitored each term by the Dean's Office in conjunction with the School's various Departments and Programs. A student's academic standing is comprised of two factors: cumulative GPA and progress toward a degree. In order to be in good academic standing, students are expected to maintain a cumulative GPA of 3.00 or above and make continued progress towards their degree.

Students are placed in the **Academic Probation** status after earning a cumulative GPA below 3.00. Students may also be placed on Academic Probation if they fail to make progress toward their degree, as determined by their Department or Program, or fail to meet provisional conditions as outlined in their admissions letter (if applicable). Students placed on Academic Probation will be notified in writing by the Dean's Office. It is important to note that students on Academic Probation are neither eligible for teaching assistantships or fellowships, nor are they eligible to complete degree milestones (i.e., comprehensive examinations, thesis proposal, oral defense, or graduation).

Students who are on Academic Probation for failing to meet GPA requirements must earn a GPA of at least 3.00 for each term that they enroll until they have achieved a cumulative GPA of 3.00 or above. If such a student fails to earn 3.00 term GPA, they are subject to **Academic Dismissal**. Students who are on Academic Probation for failure to make degree progress must satisfy the conditions set forth by the Department or Program and communicated by the probation letter by the specified deadline. If such a student fails to satisfy these conditions by the specified deadline, they are subject to Academic Dismissal. *Dismissal is a final action. Dismissed students are neither eligible for reinstatement nor readmission at the School of Computing and Information.*

A student whose performance on a preliminary or comprehensive examination is judged to be inadequate may be subject to Academic Dismissal at the end of the term.

Professional Master's Degree

SCI offers the following Master's degrees in professional fields of study: Master of Science in Information Science, Master of Library and Information Science, Master of Science in Telecommunications.

For additional information regarding the Regulations of Professional Master's Degrees, please see the relevant section of the University's Academic Regulations.

Master's Degree Requirements

University policies governing Master's programs can be found in the *Regulations Pertaining to Master's Degrees policy*. The information below summarizes further SCI-specific regulations.

Credit Requirements

The minimum requirement for any Master's degree is 30 credits. Per University regulations, not more than one-third of the total credits required to obtain a professional Master's degree may be granted for work completed at another graduate institution. The School of Computing and Information offers the following professional Master's degrees: Master of Science in Information Science, Master of Science in Telecommunications, and Master of Library and Information Science. No more than six credits may be granted toward the completion of the requirements for all other Master's degrees for work completed at another graduate institution. Students must achieve the minimum GPA established by their Department or Program, in no case less than 3.00, to take the comprehensive examination and to graduate. For additional information on credit requirements and grade minimums, students should refer to the individual program page.

Comprehensive Examination

Whenever a program substitutes an equivalent requirement for the comprehensive examination, the Department or Program must obtain prior approval from the SCI Academic Council and notify the University Council on Graduate Study and describe the situation. Students on inactive, special, or provisional status, or who have a GPA less than 3.00, are not eligible to take the comprehensive examination. The results must be reported promptly to the Office of the Dean but no later than the last day of the term in which the examination is administered; the report of examinations for the Comprehensive Exam must be approved by the Department or Program Chair or Director of graduate studies. See *Comprehensive Examination* under Regulations Pertaining to Master's Degrees for further detail on requirements for comprehensive exams.

Thesis Option and Procedures

The requirement of a thesis or its equivalent is at the discretion of individual Departments or Programs. If a thesis is submitted, its form must be in accord with specifications determined by the Office of the Provost and is set forth in the ETD Format Guidelines. Specific instructions are available on the University's ETD website. After the thesis defense is successfully completed, the candidate must deposit the approved ETD to the ETD Online System where it will be reviewed by the ETD Student Services Staff in the SCI Dean's Office. Students should check the SCI Current Students webpage for deadlines specific to the School. For further information on thesis requirements, including the makeup of the thesis committee, see *Thesis Option* under Regulations Pertaining to Master's Degrees.

PhD Degree Requirements

University policies governing PhD programs can be found in the Regulations Pertaining to Doctoral Degrees policy. The information below summarizes further SCI-specific regulations.

Credit Requirements

The minimum requirement for the PhD degree of 72 credits may be earned in formal course work, directed study, independent study, and/or thesis and dissertation research. No more than 30 credits may be accepted for a master's degree awarded by another institution to meet the minimum credit requirement; in recognition of graduate study beyond the Master's degree successfully completed elsewhere, no more than 12 additional credits may be accepted to meet the minimum credit requirement. Students must achieve the minimum GPA established by their Department or Program, in no case less than 3.00, to be eligible to undergo the preliminary examination, take the comprehensive examination, be admitted to candidacy for the PhD degree, and graduate.

Preliminary Examination

The nature of the preliminary examination and the time at which it is conducted are determined by each Department or Program. In some programs, the preliminary doctoral exam/evaluation may be combined with a Master's comprehensive examination. The results must be reported promptly to the

Office of the Dean but no later than the last day of the term in which the examination is administered; the report of examinations for the Preliminary Exam must be approved by the Department or Program Chair or Director of graduate studies. See *Preliminary Evaluation* under the Regulations Pertaining to Doctoral Study for further details on regulations pertaining to the exam. Students must be registered in the term they are completing the Preliminary Examination.

Comprehensive Examination

Comprehensive examination results must be reported promptly to the SCI Dean's Office, and no later than the last day of the term in which the examination is administered; the report of examinations for the Comprehensive Exam must be approved by the Department or Program Chair or Director of graduate studies. Students must be enrolled in the term in which they are completing the Comprehensive Examination. See *Comprehensive Examination* under the Regulations Pertaining to Doctoral Study for further detail on regulations regarding the exam.

Doctoral Committee

Departmental Membership Status

University of Pittsburgh faculty members with a primary or joint appointment in an SCI Department are considered internal members of that Department. Individuals holding primary appointments outside of the Department are considered external to the Department. However, a University of Pittsburgh faculty member who holds a secondary appointment in an SCI Department and is an active participant within the Department may petition the Department to be considered as an internal member, as determined by departmental criteria. Upon receiving internal status within a Department, a faculty member may no longer act in an external capacity.

Committee Composition

Doctoral dissertation committees are comprised of at least four members, including at least three internal members and at least one external member from another Department at the University of Pittsburgh or from an appropriate graduate program at another academic institution. Under certain circumstances, active researchers with appointments outside of academia may be approved as external committee members. The primary advisor and chair of the doctoral dissertation committee must be an internal member of the doctoral candidate's home Department or Program. The majority of the committee, including the major advisor, must be full or adjunct members of the Graduate Faculty. The composition of the committee must be approved by the Department Chair or Program Director and the Associate Dean for Academic Programs prior to scheduling the dissertation proposal.

Internal committee members who leave the University after a graduate student has been admitted to candidacy may remain on the committee in their original capacity for a period of up to 12 months. If the Chair of the dissertation committee leaves the University, they may continue to serve as the sole Chair of the committee for a period of up to 6 months; after this time, a Co-Chair must be appointed from within the Department or Program. After this 12-month period, a departed committee member is no longer eligible to be an internal member or Committee Chair, but may be added to the committee as an external member; this may necessitate the addition of further internal committee members. If a committee member retires, they may remain on the committee as long as they are still willing to serve, and are still active professionally in the academic community.

Any changes in the membership or roles of the committee must be approved by the Department Chair or Program Director and the Associate Dean for Academic Programs.

Admission to Candidacy for the PhD Degree

After completion of the overview/proposal, the student should, in consultation with the student's major advisor, file the application for admission to candidacy for the Doctor of Philosophy degree. Students are informed of admission to candidacy by written notification from the Associate Dean for Academic Programs. Students must be enrolled in the term in which they are completing the overview for candidacy. For a listing of requirements for admission to candidacy, see *Admission to Candidacy for the Doctor of Philosophy Degree*.

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. A record of such meetings must be maintained in the student's file in their home Department or Program.

Dissertation

See *Dissertation and Abstract* under the Regulations Pertaining to Doctoral Degrees for an overview of requirements and form for the dissertation and abstract.

Language of the Doctoral Dissertation

The language in which doctoral dissertations are written shall normally be English. Exceptions may be granted by the student's Dean with the approval of the dissertation adviser and committee, but only for sound reasons of scholarship. Permission shall never be granted on the ground of inadequate command of English.

Final Oral Examination

Students preparing to take their final oral examination in defense of their dissertation should refer to *Final Oral Examination* under the Regulations Pertaining to Doctoral Degrees for details on the examination. School-specific timelines and processes are outlined, below.

The final examination date must be announced at least four weeks in advance of the scheduled date. This allows adequate time for review of eligibility and announcement in the University Times as required by University regulations. When determining a date for the examination, students should consider the ETD processing deadlines, allowing themselves sufficient time between final oral examination and ETD deadline to revise their dissertation and gather the related paperwork.

When an examination date is established, a representative of the student's Department or Program must submit a defense announcement form to the Dean's Office, listing the title of the dissertation and the time and place for its defense.

At least two weeks prior to the dates set for the final oral examination, all members of the doctoral committee should be provided with a copy of the dissertation.

All members of the doctoral committee must physically attend the examination; exceptions can be made with the permission of the Associate Dean for Academic Programs. A report of this examination and a report on the approval of the dissertation, signed by all members of the doctoral committee, must be sent to the Associate Dean for Academic Programs for approval. The report on the approval of the dissertation may be signed concurrently with or subsequently to the report of the final oral examination. If the decision of the committee is not unanimous, the case is referred to the Associate Dean for Academic Programs for resolution.

It is the responsibility of the student's advisor to ensure that the dissertation is in the final form before requesting the signatures of all committee members. After the final oral examination is successfully completed, the student must submit their dissertation electronically. As well, the University requires students to submit various forms, publication agreements, and fees in addition to the Electronic Thesis and Dissertation (ETD). Students submit all materials outlined on the University's ETD website (What to Do After You Defend). School-specific ETD deadlines can be found on the SCI Graduation Procedures webpage.

After submission of the ETD and paperwork, SCI Academic Records will review all items for completion and adherence to University formatting guidelines. Students must be available to make additional edits to the formatting of their ETD; this process typically takes one month to complete before the document is approved for publication.

Students will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students who have completed all credit requirements for the PhD degree may register for "Full-Time Dissertation Study." If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

Graduation

Student Status During Term of Graduation

Graduate students are required to be in "active status" (registered for one credit per academic year).

If a Doctoral or Master's thesis student completes all thesis or dissertation work in a given term, including the defense, but has not met the Electronic Thesis and Dissertation or graduation application deadlines for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to approval. Students in this situation must provide a valid and extenuating reason for this policy exemption via the request for a Graduation Enrollment Waiver form. All requests for this policy exemption will be reviewed by SCI Academic Records and approved by the SCI Dean's Office.

Application

Graduation is not an automatic process. Students must submit the SCI application for graduation by the School's deadlines. The student will first complete an exit survey for their graduation term and then receive a link to the graduation application in the survey's completion notification.

If your graduation is postponed, *you must reapply* by completing another Graduation Application.

Graduation Ceremonies

University Commencement

Candidates for graduation are encouraged to appear in person at the University Commencement Ceremony. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony. Neither walking in the Commencement Ceremony nor being named in the Commencement Program is an official indication of graduation. Students will be contacted by the School several weeks after the ceremony regarding their final graduation certification status.

School Ceremony

The School of Computing and Information hosts an event to recognize its graduating students and awardees at the end of each term.

Certification of degree graduation requirements is processed after the recognition ceremony; Reading of a student's name at the Recognition Ceremony is not an indication of the student has met graduation requirements.

Event details, travel tips, and information regarding tickets are hosted on the School's website at www.sci.pitt.edu.

Post-Graduation Processing

Certification

Graduation certification is the process run by advisors and staff to ensure students have met all graduation requirements. This process is run after grades are posted for the term in question. Students who are concerned about their graduation eligibility should first review their academic advisement report (AAR) and then meet with their academic advisor.

Documentation (transcripts, diplomas, etc.)

Official documentation of graduation is managed by the University Registrar's Office. Inquiries regarding transcripts and diplomas should be directed to that office's Graduation/Diplomas service area.

All diplomas are mailed to students approximately six to eight weeks after the official certification date for each graduation period.

Special Academic Opportunities/Programs

Multiple Independent Degree Programs within SCI

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

For further detail, please refer to the University policy regulating the pursuit of Two Independent Degree Programs Simultaneously.

Joint SCI/GSPIA MSIS Degree Program

The School of Computing and Information will continue to honor the joint degree agreement made between the School of Information Sciences and the Graduate School of Public and International Affairs (GSPIA). The program allows students to complete the Master of Science in Information Science (MSIS) degree and one of three degrees in GSPIA simultaneously. To be admitted fully into the joint program, students must be accepted by both GSPIA and SCI. Admissions and course of study details are available on the MSIS degree requirements page of this catalog.

School of Computing and Information Faculty

Programs and Course Offerings

Doctoral

Computational Modeling and Simulation, PhD

Requirements

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

A minimum of 24 credits of graduate level courses from categories I - IV will be required. It is anticipated that students entering the program will be able to complete the six core courses in categories I - III in their first year and the concentration requirements in the second year.

Computational Modeling and Simulation Seminar Series: All students enrolled in the program are expected to attend the Computational Modeling and Simulation seminar program each semester they are enrolled. Students will receive one credit for each term they are enrolled in the Seminar Series. Seminars will be held typically twice per month, during the academic year. Each enrolled student will be required to give a seminar in this series, at least six months before the PhD defense.

University Credit Requirement: All students in the program must satisfy the university's requirement of a minimum of 30 credits for an MS. At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Graduate Certificate

Applied Data-Driven Methods Graduate Certificate

The Applied Data-Driven Methods (ADDM) Graduate Certificate is a 12-credit graduate certificate designed to develop a computationally- and data-oriented foundation that dovetails into expertise developed during the student's undergraduate studies, on-the-job training, or subsequent/concurrent coursework. In particular, this certificate engages with the following five concept areas:

- *Computational foundations:* This concept area includes topics such as basic abstractions, algorithmic thinking, programming concepts, data structures, and simulations.
- *Data Management and Curation:* This concept area includes topics such as data provenance, data preparation/cleansing/transformation, data management (of a variety of data types), record retention policies, data subject privacy, missing and conflicting data, and modern databases.
- *Data Description and Visualization:* This concept area includes topics such as data consistency checking, exploratory data analysis, grammar of graphics, attractive and sound static and dynamic visualizations, and dashboards
- *Data Modeling and Assessment:* This concept area includes topics such as machine learning, multivariate modeling and supervised learning, dimension reduction techniques and unsupervised learning, deep learning, model assessment and sensitivity analysis, and model interpretation.
- *Workflow and Reproducibility:* This concept area includes topics such as workflows and workflow systems, documentation and code standards, source code (version) control systems, reproducible analysis, and collaboration.

The core courses are structured such that the introductory course provides all necessary background for the other core courses. An introductory course in statistics is recommended but not required for students pursuing this graduate certificate. No prior programming experience is assumed.

It is expected that students will complete this certificate over the course of one calendar year, typically in three semesters. This graduate certificate is designed to be stackable towards graduate programs with an emphasis on topics related to data science. In some situations, this certificate may serve as a gateway that opens students to the possibility of completing further study in a related MS or PhD program, while in others such as our MLIS program, this coursework could even count towards such a degree.

Admissions Requirements

To be considered for admissions to this graduate certificate program, students are expected to meet the following requirement:

- Have obtained a Bachelor's degree with a B average (a grade point average of 3.00 on a 4.00 scale) or better in the total undergraduate program.

It is strongly recommended that applicants have completed an introductory statistics course with a grade of C or higher. This course should cover topics including measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Example courses at the University of Pittsburgh include STAT 0200: Basic Applied Statistics, and STAT 1000: Applied Statistical Methods

No prior programming experience is required for admission to this graduate certificate program.

This program is now offered as an online option.

Introductory Course

The following introductory course is required:

- CMPINF 2100 - DATA-CENTRIC COMPUTING

Core

Complete two of the following three courses:

- CMPINF 2110 - MANAGING, QUERYING, AND PRESERVING DATA
- CMPINF 2120 - APPLIED PREDICTIVE MODELING
- CMPINF 2130 - THE ART OF DATA VISUALIZATION

Electives

Complete at least one elective course. Students may either complete any course approved for the Core requirement which has not already been used toward that requirement, or they may complete one of the following:

- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
- INFSCI 2160 - DATA MINING
- INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2710 - DATABASE MANAGEMENT
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Grade Requirements

All courses taken to satisfy requirements for this graduate certificate should be passed with a grade of C or higher. In addition, students are expected to maintain a 3.0 or higher GPA in all certificate courses to remain in good academic standing.

Master's

Computational Modeling and Simulation, MS

For more information regarding the Master of Science in Computational Modeling and Simulation degree program, visit the Dietrich School of Arts & Sciences Catalog.

Requirements

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the he program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

The remaining credits will be met by directed study (i.e., research).

Department of Computer Science

The faculty of the Department of Computer Science are committed to high quality graduate education. The broad scope of their research enables them to convey to graduate students a comprehensive, state-of-the-art understanding of computer science and its application to a wide range of other disciplines. A substantial level of sponsored research has been achieved thereby providing financial support for many graduate students in the form of research assistantships.

The graduate program in Computer Science is designed to prepare students for leadership careers in research and education in computer science. Our graduate students come from all corners of the globe to pursue education and research in most areas within computer science and in many application areas within other disciplines. They engage deeply with current research in computer science, and learn to carry out original research and contribute to the expanding body of knowledge within their research area. They are able to take advantage of the diverse faculty research collaborations and pursue multidisciplinary research with other departments and programs within the School of Computing and Information and across University schools, including the Intelligent Systems Program, the Learning Research and Development Center, the Dietrich School of Arts and Sciences, the School of Engineering, and the School of Medicine.

Policies for the Department of Computer Science

Advisors and Student Evaluations

New students are assigned a temporary advisor when they enter the program. The temporary advisor is a faculty member of the Department of Computer Science whose main role is to guide the new student, until a permanent research advisor is selected. Responsibilities of a temporary advisor include helping incoming students select coursework, approving their registration each term, providing advice and information about their academic program, and helping them acquaint themselves with faculty research interests to enable them to make an informed decision about selecting a permanent advisor. The temporary advisor must run the annual review and evaluation of the student's performance, unless a permanent advisor has been selected.

Doctoral students must select a research advisor, whose research interests closely align with their own, by the end of the second year. Master students who seek to engage in independent work on either a thesis or a project must negotiate with a faculty member to supervise their work and become their research advisor. Doctoral and MS Students may change advisors at any time, after securing the consent of a new research advisor. It is the responsibility of the student to drive the process of switching advisors.

The research advisor assumes the responsibility for guiding the student in his or her academic program, for approving registration each term, and for presenting information about him or her at the annual student performance evaluation meeting. The research advisor also guides the student in selecting an appropriate research problem for a MS project, MS thesis, or PhD dissertation, and oversees the work. All students should meet with their advisor at least once per term. Students engaged in research are expected to hold weekly meetings with their advisor.

A student who loses his or her advisor, for whatever reason, must inform the GPEC Chair about the situation. The student must find a new research advisor within a reasonable period of time, not to exceed one term from when separation has occurred. A temporary advisor may be appointed until a new permanent advisor is selected.

Doctoral students, particularly those who seek to conduct inter-or multi-disciplinary dissertation research, may opt to select two co-advisors from fields of their interest to supervise their doctoral program. At least one of the co-advisors must be a full-time tenured or tenure-track faculty member of the Computer Science Department (CSD). The co-advisors have the responsibility to provide their doctoral student knowledgeable support concerning their academic programs, to establish and maintain a research program consistent with departmental standards, and to serve as intellectual mentors to ensure timely progress toward completing their research program.

The CSD co-advisor is responsible for approving the student's registration every term and for attending the CSD student annual performance review meeting to discuss the student's results, progress through the program, and other matters as they arise.

Annual Student Performance Evaluation Meeting

Once a year, the CSD faculty will hold a meeting to evaluate student progress. In that meeting, information about each student's academic progress during the previous 12-month period is presented by his or her advisor. It is the student's responsibility to fill out a self-evaluation form when requested by the Graduate Program Administrator. After the meeting, students will receive a letter from the GPEC chair describing the faculty's assessment. Students who are not making satisfactory progress in the program will be sent a warning letter stating specific future performance goals. Failure to meet those goals may result in termination from the program.

Responsibilities

Students and advisors share the responsibilities for timely academic progress:

A student is expected to:

- be knowledgeable of SCI and departmental regulations and policies;
- register for courses on time (preferably as early as possible);
- fill in the online yearly evaluation form when requested to do so;
- assist the Graduate Program Administrator in keeping current his or her file, including an up-to-date mailing address;
- notify the Graduate Program Administrator if he or she changes advisor;
- (for doctoral students) file an application for candidacy for the PhD degree, after passing the dissertation proposal examination and at least eight months before the defense of the dissertation;
- follow the published instructions on SCI procedures for graduation, including filing an official application for graduation early in the term in which graduation is expected.

An advisor is responsible for the following:

- assist the student in selecting courses;
- counsel the student and verify that his or her planned program is appropriate, given the student's academic goals and the CSD regulations;
- assess the student's progress towards a degree and provide him or her with advice;
- present information about the student's progress at the annual student performance evaluation meeting;
- assist the student in selecting a research area;
- validate the appropriateness of the student's research problem for a MS project or thesis or PhD Dissertation;
- assist the student in forming thesis, comprehensive examination, proposal and/or dissertation committees, as appropriate;

- oversee the student's oral examination for an MS thesis, doctoral comprehensive examination, doctoral dissertation proposal meeting, and doctoral dissertation defense examination. In all cases, after the examination has been completed the advisor will secure the signatures of all committee members, complete the required forms, give them to the administrator in the CSD Graduate Programs office, and communicate the results to the student.

The Chairperson of GPEC is expected to:

- act on petitions for transfer of credit, substitution of course requirements, and similar matters;
- report the results of the prelim examinations to the student and the student's advisor.

Registration Requirements and Statute of Limitations

The CSD abides by the SCI registration requirements and regulations pertaining to statute of limitations. See the *SCI Credit & Enrollment Policies* for details regarding these items.

Under exceptional circumstances a candidate for an advanced degree may apply for an extension of the statute of limitations. Students seeking support in extending their statute of limitations, should provide the CSD with the reason for the delay, evidence of continuing progress toward the completion of the degree and a plan and proposed date for the completion of the degree. The request must be made in writing, approved by the student's advisor, GPEC, and the Department Chairperson. The Department will submit recommended extensions to the Dean for final action. Each student who requests an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Under special circumstances, a graduate student may be granted one leave of absence. Consistent with regulations, a maximum leave of two years may be granted to doctoral students or one year to master's students. An application for a leave of absence must state the reason for the request, and must be approved by the student's advisor, GPEC, and the Department Chairperson, and then submitted to the Dean for final action. If approved, the time of the leave shall not count against the total time allowed for the degree(s) being sought by the student.

Grading Options

All formal course requirements in the CSD must be completed with letter grades. Directed and independent study, and thesis and dissertation research must be taken with the S/N grading option. This includes CS 2000, CS 2003, CS 2910, CS 2990, CS 3000, and CS 3900.

Transferring Credit

Normally, students will fulfill CSD course requirements by taking graduate-level courses within the CSD, while they are enrolled in the department. However, in some cases, it may be desirable for a student to count coursework done outside the CSD and/or prior to the time the student enrolls in the department. In such cases, written approval of GPEC is required.

Students can petition GPEC to use courses taken outside the Department in two different ways. First, students may apply to transfer the credits for these courses, using the credits towards the total number needed for a degree. Second, students may apply to use these courses to place out of requirements, i.e., to substitute a course taken elsewhere for a course required by the CSD.

Note that these actions neither entail one another nor are mutually exclusive. For example, a student might enter the CSD having previously taken a graduate-level course in Operating Systems. In that case, he or she might petition both to receive 3 transfer credits and to place out of the requirement to take CS 2510. In another case, a student might have taken a course that is relevant to graduate studies in computer science, but does not directly correspond to any course required by the CSD, for example, a course in Signal Processing. In that case, the student might petition only for a transfer of 3 credits.

Petitions to count courses taken outside of the CSD must be submitted according to the following schedule:

1. A petition to count a course to be taken outside the CSD during a given term must be submitted no later than 2 weeks after the start of the registration period for that term.
2. A petition to count course(s) taken prior to enrolling in the CSD must be submitted within the first two terms after entering the program. A student must submit all petitions to transfer or substitute courses taken prior to enrollment at the same time. Petitions should be submitted during the first three weeks of any given term and GPEC will meet shortly thereafter to evaluate the merit of these petitions.
3. Normally, an incoming student will not enroll for credit in courses outside the CSD during his or her first term in the program. In unusual cases, an incoming student may petition GPEC during the first week of classes to count such a course.

The University's Academic Regulations for transfer credits apply to courses taken outside the CSD. The following restrictions also apply to CSD students:

- For the MS degree, no more than one course (3 credits) that is either taken out-of-department or is 1600-level / CS 20xx can be counted. This does not include the required course in theory or algorithms (CS 1510 or CS 1511). In no case will a 1000-level course taken prior to enrollment in the CSD count towards the MS degree (including CS 1510 / CS 1511).

- For the PhD degree, no more than 24 credits taken at the MS level may be transferred from out of the department. In addition, for courses taken beyond the MS level, 12 more credits may be transferred. Note however, that at most 4 of the 12 required courses for the PhD may be transferred. Thus, additional transfer credits (beyond 12 used to satisfy required courses) may be used towards the 72-credit requirement, but students must still complete 8 of the required courses after enrolling into the PhD program.
- After enrolling in the program, students will not normally be given approval to take a course outside the CSD in place of a required CSD course, if the student could take the required CSD course within the next academic year. At most two courses taken outside the CSD can be counted towards the required courses after joining the PhD program.

Petitions to transfer credit and/or place out of requirements must be submitted to GPEC. For each course the student must submit the following:

- A transfer/course petition form, available from the administrator in the CSD Graduate Programs Office. The form provides information about the material to be submitted along with the petition.

If GPEC recommends approval, it will send the recommendation to the Dean, who will make a final decision and notify the student.

The Dean's Office then shares the approval with the Records Office for processing. Forms and School-level regulations regarding transfer credit are linked and explained on the . All materials noted on the SCI Transfer Credit Request Form must be submitted with a student's petition to transfer credit.

Awarding of Assistantships

The CSD supports a number of students with Teaching Assistantships (TA) and Teaching Fellowships (TF). The following policies apply to the awarding of TAs and TFs; note that these policies are subject to the Department having adequate funds, as discussed below.

- Students may be admitted with or without support. Those offered support will be offered full support, except under extenuating circumstances. Students may be offered partial support during the summer.
- All PhD students admitted with support typically continue with the same level of support for the first two years, provided that he/she meets the eligibility requirements for the Assistantship.
- The eligibility requirements for a Teaching Assistantship or Fellowship are:
 - They are not placed on probation.
 - They score at least a 4 in the English Language Fluency Test.
 - They perform their Teaching Assistantship duties satisfactorily.
 - They complete their preliminary examinations by the end of the second regular term of enrollment.
 - They have been in the program no more than 5 years.
 - They have maintained an S in the CS 2003 course.
- PhD students in their 3rd year or beyond are also typically given support. However, responsibility for providing the financial support typically moves from the department to the student's advisor. Students must consult with advisors regarding financial support by the end of their second spring term of residence.
- All other students will be considered for support on a case-by-case basis. Criteria used in giving support to these students will include:
 - the number of course requirements already completed
 - scholarly performance, including GPA and evidence of research potential
 - the results of attempts to pass the preliminary examination
 - the score in the English Language Fluency Test, and
 - the quality of previous teaching performance (if applicable)
 - Note that it is often the case that some teaching assistantship positions become available only on very short notice before the start of a term. In order to satisfy the Department's teaching needs, these positions may be filled on an "emergency" basis, following these criteria as preferences. Students receiving these emergency appointments should be aware that their appointment does not imply any preferential treatment for appointments in subsequent terms.
- A student who has signed an assistantship contract may resign from all or part of the assignment for a given term any time up to four weeks before the start of that term. If a student does not resign from the assistantship assignment, he or she is bound by that assignment. Students violating this rule will not be eligible for assistantship positions in any subsequent term.

Fellowships and Awards

Each year, there are several opportunities for graduate fellowships and awards. It is the student's responsibility to watch for these opportunities, to determine eligibility, to seek faculty endorsement, and to complete an application.

For some external fellowships and awards, the CSD may nominate a maximum number of students. When a fellowship or award limits the number of nominations, the CSD will follow a four-step procedure to select the actual nominations. Note that a nomination by the department does not necessarily imply the awarding of a fellowship.

1. **Determine eligibility:** student is eligible for a fellowship if he/she meets the criteria established by the organization that grants the fellowship. In addition, a student must be in a good academic standing and meet certain criteria that are determined by the department. The specific department criteria will be announced each year prior to the fellowship deadline.
2. **Seek advisor endorsement:** An eligible student must discuss the fellowship with her/his advisor and get the agreement of the advisor to write a letter of recommendation.
3. **Complete an application:** If a student is eligible and has an advisor's endorsement, then a fellowship application should be completed and submitted to the Computer Science Department.
4. **Selection of final nominees:** The applications will be made available to the whole CSD faculty, who will vote on the final set of nominees. The faculty will vote based on the application materials and additional information about students' departmental activities that include attendance of departmental colloquia, and participation in the departmental research competitions. A student should write the application in a way that is clear to a non-specialist. The final set of nominees may submit their applications to the fellowship organization.

As an example of department criteria for fellowship eligibility:

1. Passed preliminary examination
2. An author on at least two papers
3. Primary author on at least one paper
4. A GPA of 3.60 or better

Grievance Procedures

Students who believe that a decision about their academic program has been made on the basis of incomplete or incorrect information may appeal the decision. To do this, the student should prepare a letter that outlines his or her position and provide evidence that supports the claim that the decision was inappropriate. The student should send the letter to the CSD Chairperson, after securing the endorsement of his or her advisor. The CSD Chairperson may either reject the appeal or forward it to the Dean for consideration. Appeals must be made within thirty days of the date of notification of any decision.

PhD Admissions Requirements

Students may be admitted to the PhD program even if they do not have an MS degree. Moreover, students admitted to the MS program are eligible to complete the requirements for the PhD degree, and if they wish to transfer to the PhD program, they must apply to the admissions committee, which will make its decision based on the student's performance in the MS program and on faculty recommendations.

The department is open to applications from exceptional students transitioning to graduate study in Computer Science from other undergraduate fields. Transitional students with demonstrated computing aptitude, as evidenced by outstanding grades in at least 4 of the required computer science courses noted below, may be considered for admission to the graduate program. Completed minimally a selection of courses in the following topical areas (the corresponding Pitt course numbers are indicated):

In Computer Science, one course in each of:

- Intermediate Programming (CMPINF 0401)
- Discrete Structures (CS 0441)

- Information/Data Structures (CS 0445)
- Computer Organization/Assembly Language (CS 0447)
- Theory (CS 1510 or CS 1511)
- Languages (CS 1520 or CS 1621)
- Systems (CS 1550 or CS 1651)

In Mathematics, the following:

- The two-course calculus sequence (MATH 0220 , MATH 0230)
- A course in linear algebra (MATH 1180 or MATH 0280)
- A course in probability and statistics, requiring calculus as a prerequisite (STAT 1151 , STAT 1152)

Residency Requirements

All students seeking the PhD degree in the CSD must engage in a minimum of one term of full time graduate study by the end of the term in which the comprehensive examination is taken.

Course Requirements

The PhD degree requires 72 credits of formal course work, independent study, directed study, and/or dissertation research. In addition to the credit requirement, twelve courses are required for the PhD categorized as follows: four foundation courses, six elective courses, CS 2001 (Research Topics in Computer Science) and CS 2002 (Research Experiences in Computer Science). CS 2001 must be taken during the first fall term and CS 2002 must be taken during the following spring term.

The four foundation courses must cover each of the following four foundation areas.

- **Architecture and Compilers**
 - CS 2410 Computer Architecture or
 - CS 2210 Compiler Design
- **Operating Systems and Networks**
 - CS 2510 Computer Operating Systems or
 - CS 2520 Wide Area Networks
- **Artificial Intelligence and Database Systems**
 - CS 2710 Foundations of Artificial Intelligence or
 - CS 2550 Principles of Database Systems
- **Theory and Algorithms**
 - CS 2110 Introduction to Theory of Computation or
 - CS 2150 Design and Analysis of Algorithms.

The six elective courses must be 2100-level or higher CSD courses and cannot be independent study courses (CS 2990 , CS 3000), graduate internship (CS 2900), thesis project or research courses (CS 2910, CS 3900). At least two of the six courses must be at the 3000-level.

The following requirements apply to the 12 required courses:

- All must be taken for a letter grade.
- Students are required to complete the four required foundation area courses by the end of the fourth regular term of study. Regular terms include the fall and spring and do not include the summer session.
- The student must receive a grade of B or better in each of the required foundation area courses, and a grade of B-or better in each of the six additional courses; in addition, he or she must maintain an overall average QPA of 3.0 or better.
- No more than 6 of the 12 courses may be taken outside of the CSD. This includes up to four courses that are transferred from other universities at the time of admission. All courses from outside the CSD must be approved by GPEC.
- All 12 courses must be successfully completed before admission to candidacy for the PhD (This normally occurs when the student passes the oral examination during the dissertation proposal.)

CS 2003 Requirements

After completing CS 2001 and CS 2002 , students must enroll in CS 2003 until receiving a satisfactory grade of S for 4 regular terms.

In order to receive a satisfactory grade of S, students must:

- Attend at least seventy percent (70%) of Departmental Research Colloquia offered at the regularly scheduled course time over the course of the term. If there are an unexpectedly high number of Colloquia in a term (approximately more than one per week), attending only 10 Colloquia is required.
- GSO-sponsored colloquia occurring within the regularly scheduled course time shall be included in the count of colloquia offered for this requirement.
- Perform at least one (1) approved Research Activity during a regular term (fall or spring) of each academic year. Options include: Presenting a GSO-sponsored colloquium for CS 2003. Other related activities may be presented to GPEC in petition for approval.

This annual requirement shall be evaluated only in the spring term and shall consider the academic year beginning with the prior fall term. As such, students may receive an S in the fall term having only fulfilled requirement (a), with the expectation that requirement (b) will be fulfilled in the spring.

Preliminary Examination

To complete the PhD Preliminary requirement, each student must pass the following Computer Science Department courses during the first two regular terms of study:

- At least 2 courses at the 2100 -2899 level with a grade of A-or higher
- At least 2 courses at the 2100 -2899 level with a grade of B or higher

At least one of the courses taken for an A- must be a required foundation area course. Students are not permitted to repeat a class that they have passed (i.e., earned B or better) in order to improve the grade (i.e., to A or A-). Regular terms include the fall and spring and do not include the summer term.

Comprehensive Examination

The purpose of the comprehensive exam is to test the depth of knowledge of the student in one or more areas that are related to the student's area of research and that are approved by the comprehensive examination committee.

To pass the comprehensive exam a student must demonstrate sufficient expertise and depth of knowledge in a selected area of foundation to conduct research leading to a dissertation in that area.

The comprehensive exam is an oral exam and is administered by at least three (3) CSD faculty that compose the PhD comprehensive examination committee. The committee has to be approved by the department chair at least four (4) weeks before the scheduled exam date.

The student will prepare a 30-minute presentation which will be followed by an oral question and answer session. The exam is based on a reading list. The student should agree on a reading list with each member of the comprehensive exam committee at least two weeks prior to the exam. The length of the exam is at least two hours and the focus and goal of the presentation and the question and answer session will be specified by the committee at least two weeks before the exam.

Dissertation Proposal

The student must meet with their entire dissertation committee at least once per year during the time in which the research is being done. The student will also be meeting regularly with their advisor or co-advisors.

Upon completion of the research, the student prepares a written dissertation, and, in consultation with their dissertation committee, schedules a public oral defense.

The oral defense must take place at least 8 months after the admission to candidacy. The normal format for the defense of dissertation is a public oral presentation of the research followed by questions by the dissertation committee and general audience. Only the dissertation committee will vote on the result. If the outcome is not unanimous, the case is referred to the Dean for resolution.

The oral defense is public and open to all members of the University community. Students must complete the defense announcement form at least four weeks prior to the scheduled exam date to allow sufficient time to publish the defense in the University Times.

It is the responsibility of the student's advisor or co-advisors to ensure that the dissertation is in final form before requesting signatures of all committee members. After the final oral examination is successfully completed, the student must submit their theses or dissertation electronically. Check the graduation procedures website to see what you will need to submit for the Electronic Thesis and Dissertation (ETD).

Doctoral Committee

Each PhD student should have a research advisor who must be a full time (primary appointment) CSD faculty member and a member of the SCI graduate faculty. If a student chooses to have two research co-advisors, at least one of the co-advisors should be a full time (primary appointment) CSD faculty member and a member of the SCI graduate faculty. A co-advisor who is not a full time CSD faculty should have a secondary (including adjunct) appointment in the CSD and be a member of the SCI graduate faculty. The student should work carefully with their advisor (or co-advisors) to select a doctoral committee. The committee is composed of:

- The research advisor or the two research co-advisors
- At least two other faculty members with a primary appointment in the CSD, one of whom must be tenured in the CSD.
- At least one faculty member from another department within the University that would serve as an external member. The external member(s) should also be a member of the graduate faculty. With the approval of the Dean, the external member of the committee may come from outside the University. The external member cannot serve as a co-advisor.

A majority of the committee members must be members of the SCI graduate faculty. Regulations require that the doctoral candidate and their committee meet at least once per year to evaluate the candidate's progress. The membership of the committee may be changed whenever it is appropriate or necessary, subject to the approval of the CSD chair and the Dean. The committee, or any change to its membership, has to be approved by the department chair at least four (4) weeks before distributing the proposal or the dissertation to the committee. Note that the doctoral committee need not be identical to the comprehensive examination committee, although usually there will be significant overlap between the two.

Written Proposal

A written proposal must be distributed to the examining committee at least two weeks in advance of the oral examination on the proposal.

There is no specific requirement on the length of the written proposal. However, each member of the Doctoral Committee may request that the student provides them with a short document (about 30-40 double-spaced pages) that summarizes the proposed research. This document normally contains:

- a clear statement of the problem to be solved,
- proposed methods of solution,
- scholarly review of related work,
- preliminary results obtained from a prototype program and/or a partial analysis, and
- a detailed research plan, stating the issues remaining to be addressed and suggestions for how they will be addressed, within a specified time frame.

Additional documents (including papers or technical reports) may be provided as appendices.

Oral Examination of the Proposal

After writing the proposal and conferring with their advisor (or co-advisors), the student must schedule an oral examination and send an announcement of the examination to all faculty and graduate students at least one week in advance of it.

The oral examination (sometimes called the prospectus meeting) consists of two parts:

- a public presentation of the proposal open to all members of the University community, followed by questions from the general audience; this component is normally 40-50 minutes in length, and
- a private examination by the doctoral committee.

Any CSD faculty member may attend the private examination, but only the examining committee will vote on results. The doctoral committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree.

The oral examination must be announced to the CSD community via the faculty and graduate student mailing lists. This announcement must be at least one week prior to the examination. The announcement should include a title, abstract, committee member names, date of examination and location of examination. The abstract is due at least four (4) weeks before the scheduled proposal date.

It is the student's responsibility to schedule meetings with members of the examining committee within a few weeks after the examination to review criticisms and suggestions.

After passing the oral examination on the proposal, a student gains the official status of a PhD candidate.

Dissertation Research and Defense

The student must meet with their entire dissertation committee at least once per year during the time in which the research is being done. The student will also be meeting regularly with their advisor or co-advisors.

Upon completion of the research, the student prepares a written dissertation, and, in consultation with his or her dissertation committee, schedules a public oral defense.

The oral defense must take place at least eight months after the admission to candidacy. The normal format for the defense of dissertation is a public oral presentation of the research followed by questions by the dissertation committee and general audience. Only the dissertation committee will vote on the result. If the outcome is not unanimous, the case is referred to the Dean for resolution.

The oral defense is public and open to all members of the University community. Students must complete the defense announcement form at least four weeks prior to the scheduled exam date to allow sufficient time to publish the defense in the University Times.

It is the responsibility of the student's advisor or co-advisors to ensure that the dissertation is in final form before requesting signatures of all committee members. After the final oral examination is successfully completed, the student must submit their theses or dissertation electronically. Check the graduation procedures on the SCI Current Students web page to see what you will need to submit for the Electronic Thesis and Dissertation (ETD).

Research, Internship Training Requirement

Research Training

Because the PhD degree is a research degree, students should expect to participate in research projects as a way of learning the art of doing research. Normally, a student will start by working with a faculty member on a pre-defined research problem, and later will define their own research problem as the subject of the dissertation.

There is no departmental requirement that students participate in the preparation of research grant proposals. However, it is desirable that all doctoral students have some exposure to the process of preparing and submitting research grant proposals. Normally this will be part of the mentoring by each student's advisor.

Internships

When an international student does an internship, he or she must use Curricular Practical Training (CPT). If a student on an F-1 visa has engaged in 12 months or more of full-time Curricular Practical Training, he/she will be ineligible for Optional Practical Training (OPT).

Expected Timetable

Milestone	Limits
Preliminary Exam	Must be passed within two (2) regular terms after full status admission.
Foundation Area Courses	Must be passed within four (4) regular terms after admission.
Comprehensive Exam	Must be passed within four (4) calendar years of admission.

Oral Proposal	Must be passed within five (5) years after full status admission.
Defense and Dissertation	Submit an approved dissertation to the SCI Dean a minimum of eight (8) months after passing the proposal.
Statute of Limitations	PhD degree must be completed within a period of ten calendar years from the student's initial registration for graduate study (or within eight calendar years for students who enter with a master's degree). These limits apply to all students, whether full-time or part-time.

Master's

Computer Science, MS

Admissions Requirements

The department is open to applications from exceptional students transitioning to graduate study in Computer Science from other undergraduate fields. Transitional students with demonstrated computing aptitude, as evidenced by outstanding grades in at least 4 of the required computer science courses noted below, may be considered for admission to the graduate program. Completed minimally a selection of courses in the following topical areas (the corresponding Pitt course numbers are indicated):

In Computer Science, one course in each of:

- Intermediate Programming (CMPINF 0401)
- Discrete Structures (CS 0441)
- Information/Data Structures (CS 0445)
- Computer Organization/Assembly Language (CS 0447)
- Theory (CS 1510 or CS 1511)
- Languages (CS 1520 or CS 1621)
- Systems (CS 1550 or CS 1651)

In Mathematics, the following:

- The two-course calculus sequence (MATH 0220, MATH 0230)
- A course in linear algebra (MATH 1180 or MATH 0280)
- A course in probability and statistics, requiring calculus as prerequisite (STAT 1151, STAT 1152)

At the time of enrollment, the student must hold a BS degree.

Degree Requirements

Course Requirements

The MS degree requires 30 credits of formal course work. The 30 credits include a total of 24 credits plus an MS thesis, CS 2000; or 27 credits plus an MS project, CS 2910.

The 30 credits must include one course from each of the following foundation areas.

Foundation area courses must be completed with a grade of "B" or better.

Theory and Algorithms

- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS or
- CS 2110 - THEORY OF COMPUTATION or

- CS 2012 - ALGORITHM DESIGN or
- CS 1511 - INTRODUCTION TO THEORY OF COMPUTATION

Architecture and Compilers

- CS 2410 - COMPUTER ARCHITECTURE or
- CS 2210 - COMPILER DESIGN

Operating Systems and Networks

- CS 2510 - COMPUTER OPERATING SYSTEMS or
- CS 2520 - WIDE AREA NETWORKS

Artificial Intelligence and Database Systems

- CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE or
- CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

In addition to the 12 credits needed to satisfy the foundation courses, a student has to complete additional credits based on one of the two following options:

- Thesis Option: six credits for the MS thesis + at least 12 additional credits of graduate (2100-level or higher) Department of Computer Science courses.
- Project Option: three credits for the MS project + at least 15 additional credits of graduate (2100-level or higher) Department of Computer Science courses.

All additional coursework must be completed with B- or better.

The additional credits cannot include independent or directed study courses (CS 2990, CS 3000), MS thesis or project, or research courses (CS 2910, CS 3900, ...).

To fulfill the additional credits, a student may count either (a) one CS 20xx course (excluding 2000-2009) or (b) petition GPEC to count one out-of-department course.

All coursework must be completed with an overall grade point average of 3.0 (B) or higher.

Timetable

MS degrees must be completed within four calendar years from the student's initial registration for graduate studies. This limit applies to all students, whether full-time or part-time. Normally, full-time students will complete the degree within two years.

Copies of the thesis must be submitted to the committee at least two weeks in advance of the examination.

The project report must be submitted to the advisor at least a week in advance of the end of the term.

MS Thesis or Project

There are two options for completing the MS degree: the thesis option and the project option.

For the thesis option, the student must complete a written thesis, taking six credits of CS 2000, which must be taken with the S/N grading option. The student's advisor will assist him or her in selecting a thesis committee, to consist of at least three faculty members, at least two members must be from Computer Science (one being your advisor) and at most one from outside the department or University (all three could be from Computer Science). The committee will conduct a public oral final examination. The committee must be formed with all names sent to the graduate administrator at least four weeks before the examination date.

The committee will vote on the outcome and sign a report that will be filed in the SCI Graduate Students Office. The oral examination is public and open to all members of the Computer Science Department. It must be announced to CSD via the faculty and graduate mailing lists at least one week prior to its scheduled date. The announcement must include a title, an abstract, name of advisor(s), name of committee members, date of examination, and location of examination.

For the project option, the student must complete a Master's project, taking three credits of CS 2910, with the S/N grading option. Approval of a project report by the advisor is required.

Both CS 2000 and CS 2910 are closed courses, requiring approval of the faculty advisor for enrollment.

MS Internships and Co-Ops

MS students are eligible to enroll in MS Internship (CS 2900) or Co-Op (CS 2905) to supplement their in-class education with practical training. MS students can register at most twice for any combination of CS 2900 or CS 2905 (two CS 2900, two CS 2905 or one CS 2900 and one CS 2905). International students must complete two semesters of full-time study prior to qualifying for Curricular Practical Training (CPT). Note that OIS is unlikely to approve CPT authorization during the final semester of study; please talk to the graduate studies administrator or the DGS for more information regarding these issues.

Students wishing to complete an MS Internship (CS 2900) or Co-Op (CS 2905) as part of their MS degree must fill out a learning agreement in conjunction with their employer and their faculty advisor in the CS Department. Please note that MS Internships or Co-Ops not contributing substantively to a student's graduate education will not be approved by the Department.

Completed Learning Agreement forms (with all signatures) should be turned in to the graduate studies administrator prior to the add/drop deadline for the term in which the Internship or the Co-Op will take place.

Financial Support

Students whose goal is a terminal Masters degree do not receive financial support from the department. Occasionally, opportunities for financial support for part time instruction may be available. It is the responsibility of the student to watch and apply for these opportunities, when they are announced.

Department of Informatics and Networked Systems

The Department of Informatics and Networked Systems is dedicated to innovating in education and research at the junction of information, networks, and human behavior towards discovery and modeling of new social and technical phenomena. We envision empowering humans and society through modeling and designing systems that are accountable, resilient, trustworthy, sustainable, and ethical. We seek to synthesize and advance fundamental science in information, networks, and human behavior.

We offer Master's degree programs that balance theoretical principles with hands-on learning experiences in all aspects of information systems and networks, from storing and retrieving information to communicating information among systems. Our coursework and experiential learning opportunities enable students to explore and understand the interaction between people and information systems as well as the role of information systems and technologies in both business and society. The Master's degree and Graduate Certificate programs we offer will prepare you for exciting careers in virtually every industry — health care, law, finance, manufacturing government, higher education, and more. Students in the Master's programs are encouraged to participate in research opportunities through Independent Study or Thesis coursework. Moreover, since the University is situated within a major urban area, our students have a vast array of internship and employment opportunities with major US corporations. Our students acquire more than technical expertise; they learn how to connect people with technologies that can enhance their lives. Our goal is to educate people who are efficient on the job from day one, while providing the foundation for them to prosper professionally as their careers progress.

Our PhD students will have amazing opportunities to learn from faculty engaged in cutting-edge research funded by the National Science Foundation, Google, Air Force Office of Scientific Research, National Institutes of Health, Facebook, and more. As Pitt is one of the top 25 public research universities, our doctoral students have access to research projects and laboratories that will develop the next generation of information technologies.

Academic Advising

At the time of initial registration or before the completion of the first term, the student is encouraged to discuss a plan of study with their advisor. A plan of study is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional. This plan is outlined in, and completion is tracked through the Academic Advisement Report (AAR). Students coming into the program without prior course work or work experience in the areas covered by the plan of studies should adhere fairly closely to the suggested plan. If there has been course work or experience in one or more of the content areas of the program, students may be permitted to substitute and take courses in an area in which additional background is needed. Substitutions and exceptions must have approval of the advisor and must be documented through the Records Office. Information regarding documenting exceptions is available on the School's Current Students webpage.

Details regarding advising and resources for tracking your degree progress (the AAR) are available on the School's Catalog page, under the Advising section .

Each student must ensure that the AAR meets all of the program requirements for graduation. At the completion of the program, the Records Office coordinates with the Department to certify all students for graduation. See the SCI Catalog page for more details and regulations pertaining to graduation.

Stricter advising guidelines and regulations apply to the doctoral students. See the Doctoral Program regulations for details.

Policies for the Department of Informatics and Networked Systems

Beyond the School's Grading and Credit policies , the Department imposes stricter rules. Rules pertaining to DINS students are as follows.

Maintenance of a 3.0 GPA

Each student must maintain a 3.0 Grade Point Average (GPA) for all credits of graduate level coursework for either a degree or graduate certificate. Failure to maintain a cumulative 3.0 GPA will result in the student being placed on academic probation. If the student does not raise the GPA to a 3.0 after the next nine credits, the student will be dismissed from the program in which he or she is enrolled. Students should refer to the Academic Standing and Dismissal section of the SCI Catalog page for full definitions and explanations of the academic standing review.

Grades for Individual Courses

All students must earn satisfactory grades in each course taken. A grade of C-, D+, D, D-, F and NC are unacceptable for graduation credit. A course for which such an unacceptable grade is earned must be repeated if it is a course that is a degree requirement. Courses may be repeated only once. Elective courses need not be repeated; another course may be taken to replace it. However, the original course remains on the transcript and a higher grade must be earned to maintain a 3.0 GPA. Full details regarding SCI Grade and Course Repeat policies are available on the School's Catalog page.

Declaring a Specialization

The MSIS Program offers areas of concentration, commonly referred to as "specializations," that appear on the student's transcript. Students may change their specialization until the end of the term in which they earn 18 credits. To do so, they must complete the Graduate Academic Plan Change Form available on the SCI Current Students website (School Forms). Please note that approval of the academic advisor is required.

After the term in which the student earns 18 credits, no changes in specialization will be permitted with one exception: students may change to the general Plan of Study up until their last term of study. For example, a student will not be permitted to switch from the Geoinformatics specialization to the Big Data Specialization. But, they would be permitted to switch from the Big Data specialization to the General Plan of Study.

At the time of graduation, if a student has successfully earned the required number of credits for graduation but failed to meet a requirement of a specialization, the student will automatically be switched to graduate from the general program of study.

Satisfactory (S/NC) /Audit Grading System

Students are permitted to earn at most six credit hours with the grading option S as part of the credits required for the degree. An S grade is equated with a grade of B, B+, A-, A or A+. Course performance equivalent to a B-or lower will result in the assignment of an audit (N grade) and will not count towards graduation. A grade of satisfactory (S) has no quality points associated with it and is not used in calculating the GPA.

See the SCI Catalog for information regarding the selection of an alternative grading option (S/NC or Audit).

Certificate

Big Data Analytics, Graduate Certificate

The Department of Informatics and Networked Systems provides several options for advanced study in information science beyond a Bachelor's or Master's degree. The Certificate of Advanced Study (CAS) offers a highly-concentrated curriculum on the theory and application of the most current information field trends.

The 15-credit certificate program in Big Data Analytics is designed to address the needs of professionals with a Bachelor of Science or a Master of Science degree in Information Science or a related field in order to expand their professional skills and qualifications in effectively handling large amounts of disparate data.

Big data involves three major dimensions: data size, data rate, and data diversity. Students completing the certificate will gain essential, in-depth knowledge of techniques and technologies relevant for big data management.

The courses offered allow you to tailor your program of study to your individual interests. Please note that some courses in the Certificate Program may have pre-requisites which must be taken prior to enrolling in the specific course. Any coursework taken to meet a pre-requisite will not count towards the credits for graduation from the Certificate Program.

15-credit Post-Bachelor's Certificate

Post-Bachelor's students must complete three of the following courses with a grade of C or better:

- INFSCI 2160 - DATA MINING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2750 - CLOUD COMPUTING

Elective courses

Post-Bachelor's students must complete two of the following courses with a grade of C or better:

- INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
- INFSCI 2430 - SOCIAL COMPUTING
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 2809 - SPATIAL DATA ANALYTICS
- INFSCI 2125 - NETWORK SCIENCE AND ANALYSIS
- INFSCI 2415 - INFORMATION VISUALIZATION

15-credit Post-Master's Certificate

Core Courses

Post-Master's students must complete three of the following courses with a grade of B or better:

- INFSCI 2160 - DATA MINING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2750 - CLOUD COMPUTING

Elective courses

Post-Master's students must complete two of the following courses with a grade of B or better:

- INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
- INFSCI 2430 - SOCIAL COMPUTING
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 2802 - LOCATION-BASED SERVICES
- INFSCI 2809 - SPATIAL DATA ANALYTICS
- TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS

- INFSCI 2415 - INFORMATION VISUALIZATION

Coursework must be completed within a period of four calendar years from the student's initial registration in the certificate program.

Admissions Requirements

The following are requirements and prerequisites for admission to this Program.

All applicants must submit:

- Official transcript
- Two letters of recommendation that attest to the applicant's aptitude and motivation to pursue studies at a level beyond the Bachelor's or Master's degree
- Personal statement
- Resume
- Successful completion of at least one three-credit college course with a grade of B or better in each of the following:
 - **Structured programming language.** A course on structured programming using Java, C# or C++ is required. CMPINF 0401 - INTERMEDIATE PROGRAMMING is recommended to meet this requirement.
 - **Statistics.** A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Either STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS is recommended to meet this requirement.
 - **Mathematics.** A college-level mathematics course, in discrete mathematics or calculus, is required. Any of the following Pitt courses are recommended to meet the requirement: MATH 0120 - BUSINESS CALCULUS, MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1, or MATH 0400 - FINITE MATHEMATICS.

15-Credit Post-Bachelor's Certificates

A BS/BE degree from an accredited college or university in Computer Science, Information Technology, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

15-Credit Post-Master's Certificates

A MS degree from an accredited college or university in Computer Science, Information Technology, Information Science, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

15-Credit Post-Bachelor's Certificates

A BS/BE degree from an accredited college or university in Computer Science, Information Technology, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

15-Credit Post-Master's Certificates

A MS degree from an accredited college or university in Computer Science, Information Technology, Information Science, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

Cybersecurity, Policy and Law, Graduate Certificate

Cybersecurity is a multidisciplinary domain that involves technical issues, security policies, regulation, and law. Our integrated curriculum - incorporating coursework from Pitt's School of Computing and Information, Graduate School of Public and International Affairs, and School of Law -- provides students with the skills to develop comprehensive cybersecurity policies and strengthen cybersecurity ecosystems to minimize risk.

As part of the certificate's multidisciplinary approach, the certificate requires courses to be taken from all three Pitt schools. Students must complete a minimum of three courses from SCI, one course from GSPIA, and one course from the School of Law to earn the certificate from the School of Computing and Information.

Program Requirements

Courses

School of Computing and Information courses

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- TELCOM 2821 - NETWORK SECURITY
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- TELCOM 2811 - HACKING FOR DEFENSE
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- CS 2053 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY
- CS 2530 - COMPUTER AND NETWORK SECURITY
- CS 3525 - ADVANCED TOPICS IN SECURITY AND PRIVACY

Graduate School of Public and International Affairs courses

- PIA 2156 - ETHICS AND POLICY IN CYBER SPACE
- PIA 2379 - INTRODUCTION TO CYBER CRIMES
- PIA 2360 - CYBER SECURITY POLICY
- PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD
- PIA 2327 - TERRORISM AND COUNTER TERRORISM
- PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE
- PIA 2365 - TRANSNATIONAL CRIME
- PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

School of Law courses

- LAW 5623 - CYBER POLICY, CRIME & NATIONAL SECURITY
- LAW 5380 - CYBERCRIME
- LAW 5404 - CYBERSPACE AND THE LAW
- LAW 5430 - INFORMATION PRIVACY: LAW AND PRACTICE
- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5877 - PUBLIC POLICY SEMINAR

Prerequisite Requirements

Students must have at least a BA or BS in Computer Science, Information Science, Engineering, or similar type of degree.

Admissions Requirements

The following are requirements and prerequisites for admission to the Cybersecurity, Policy, and Law program.

All applicants must submit:

- Official transcript
- Two letters of recommendation that attest to the applicant's aptitude and motivation to pursue studies at a level beyond the bachelor's or master's degree
- Personal statement
- Resume

Applicants must have successfully completed at least one three-credit college course with a grade of B or better in each of the following:

- **Structured programming language.** A course on structured programming using Java, C# or C++ is required. CMPINF 0401 - INTERMEDIATE PROGRAMMING is recommended to meet this requirement.
- **Statistics.** A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Either STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS is recommended to meet this requirement.
- **Mathematics.** A college-level mathematics course, in discrete mathematics or calculus, is required. Any of the following Pitt courses are recommended to meet the requirement: MATH 0120 - BUSINESS CALCULUS, MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1, or MATH 0400 - FINITE MATHEMATICS.

Information and Network Security, Graduate Certificate

This 15-credit Graduate Certificate in Information & Network Security is designed to address the needs of professionals who hold a Baccalaureate or Master's degree in Information Science or a related field in order to expand their professional skills and qualifications in Cybersecurity.

The University of Pittsburgh's School of Computing and Information is widely recognized for our excellence in cybersecurity research and education. The School has been designated a National Center of Academic Excellence in Information Assurance Education (CAE-IAE) since 2004 and enjoys a top ten ranking among more than 400 institutions of higher education with programs in Cybersecurity.

Students in the Graduate Certificate in Information and Network Security Program must:

- complete the two core courses with a grade of B- or better
- complete three of the elective courses with a grade of C or better.

Course work must be completed within a period of four calendar years from the student's initial registration in the graduate certificate program.

Required Core Courses

Students must complete the two following courses with a grade of B- or better:

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- TELCOM 2821 - NETWORK SECURITY

Elective Courses

Students must complete three elective courses with a grade of C or better. A list of recommended elective courses is provided below. With advisor approval, students may choose an alternate elective.

- INFSCI 2170 - CRYPTOGRAPHY
- TELCOM 2820 - CRYPTOGRAPHY
- INFSCI 2560 - NETWORK AND WEB DATA TECHNOLOGIES
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- TELCOM 2120 - NETWORK PERFORMANCE
- TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS

Admissions Requirements

The following are requirements and prerequisites for admission to the certificate program.

15-Credit Post-Bachelor's Certificates

A BS/BE degree from an accredited College or University in Computer Science, Information Technology, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

15-Credit Post-Master's Certificates

An MS degree from an accredited college or university in Computer Science, Information Technology, Information Science, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

Pre-requisite coursework

Applicants must have successfully completed at least one three-credit college course with a grade of B or better in each of the following:

- **Structured programming language.** A course on structured programming using Java, Python, C# or C++ is required. CMPINF 0401 INTERMEDIATE PROGRAMMING is recommended to meet this requirement.
- **Statistics.** A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Either STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS is recommended to meet this requirement.
- **Mathematics.** A college-level mathematics course, in discrete mathematics or calculus, is required. Any of the following Pitt courses are recommended to meet the requirement: MATH 0120 - BUSINESS CALCULUS, MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1, or MATH 0400 - FINITE MATHEMATICS.

Required application documents

In addition to the online application, applicants must provide official transcripts for previous coursework.

Information Science, Graduate Certificate

The 24-credit Certificate of Advanced Study (CAS) provides personalized program of studies beyond the MSIS degree. The program will provide you with an opportunity to explore a specific field of interest or to update skills and competencies. This certificate program is designed for people who do not wish to pursue the PhD degree.

In this quickly-evolving field, it is critical for professionals to gain knowledge of leading-edge topics and to update their skills to reflect the latest in technology and research. Our CAS will keep your skills current.

Courses

Candidates for the Information Science certificate must complete the following requirements:

- A total of 24 credits in graduate-level courses acceptable to the advisor and passed with a grade point average of at least B (3.00 on a 4.00 scale)
- 15 of the 24 credits must be taken from among the approved courses for the MSIS degree program.

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program.

Admissions Requirements

A MS degree from an accredited college or university in Computer Science, Information Technology, Information Science, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better.

All applicants must submit:

- Official transcript

- Two letters of recommendation that attest to the applicant's aptitude and motivation to pursue studies at a level beyond the bachelor's or master's degree
- Personal statement
- Resume
- Successful completion of at least one three-credit college course with a grade of B or better in each of the following:
 - **Structured programming language.** A course on structured programming using Java, C# or C++ is required. CMPINF 0401 - INTERMEDIATE PROGRAMMING is recommended to meet this requirement.
 - **Statistics.** A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Either STAT 0200 - BASIC APPLIED STATISTICS, or STAT 1000 - APPLIED STATISTICAL METHODS is recommended to meet this requirement.
 - **Mathematics.** A college-level mathematics course, in discrete mathematics or calculus, is required. Any of the following Pitt courses are recommended to meet the requirement: MATH 0120 - BUSINESS CALCULUS, MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1, or MATH 0400 - FINITE MATHEMATICS.

Telecommunications, Graduate Certificate

Students who have graduated from a Master's program may pursue a certificate in Telecommunications.

In consultation with an advisor, students project a Plan of Study to meet their specific interests or needs, and these plans may change as the program proceeds. Students may select graduate-level courses in other departments within the University as well as at Pittsburgh Council on Higher Education-cooperating institutions. Admission to all courses is contingent upon meeting course prerequisites and is subject to the advisor's approval.

Courses

Candidates for the Telecommunications certificate must complete the following requirements:

- A total of 24 credits in graduate-level courses acceptable to the advisor and passed with a grade point average of at least B (3.00 on a 4.00 scale)
- 15 of the 24 credits must be taken from among the approved courses for the MST degree program.

Course work must be completed within a period of four calendar years from the student's initial registration in the certificate program.

Admissions Requirements

The following are requirements and prerequisites for admission to the certificate program.

A MS degree from an accredited college or university in Computer Science, Information Technology, Information Science, Telecommunications, Computer or Electrical Engineering, Mathematics or a related field with a scholastic average of a B (3.0 on a 4.0 scale) or better

All applicants must submit:

- Official transcript
- Two letters of recommendation that attest to the applicant's aptitude and motivation to pursue studies at a level beyond the bachelor's or master's degree
- Personal statement
- Resume
- Successful completion of at least one three-credit college course with a grade of B or better in each of the following:
 - **Structured programming language.** A course on structured programming using Java, C# or C++ is required. CMPINF 0401 - INTERMEDIATE PROGRAMMING is recommended to meet this requirement.
 - **Statistics.** A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability and sampling, Bayesian analysis, significance tests, and hypothesis testing. Either STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS is recommended to meet this requirement.

- **Mathematics.** A college-level mathematics course, in discrete mathematics or calculus, is required. Any of the following Pitt courses are recommended to meet the requirement: MATH 0120 - BUSINESS CALCULUS, MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1, or MATH 0400 - FINITE MATHEMATICS.

Doctoral

Information Science with a Focus in Telecommunications, PhD

The Doctor of Philosophy (PhD) degree in Information Science with a Focus in Telecommunications (henceforth called PhD in Telecommunications for short) prepares students for independently engaging in advanced work in high-quality research and teaching. It provides research oriented graduate study and professional specialization in telecommunications and emphasizes both scholarly and applied research. To earn a PhD degree, a student must demonstrate breadth of knowledge, give evidence of superior scholarship and mastery of a specialized field, and must demonstrate their ability to do significant and relevant research. In addition, the student must conceive, write and defend a PhD dissertation representing a significant and original contribution to current academic research as demonstrated by a public dissertation defense and publication in established peer-reviewed academic conferences and/or journals. Major milestones en-route to the PhD degree are the preliminary examination, the comprehensive examination, the dissertation proposal, and the dissertation defense.

PhD Admissions Requirements

All applicants to the School of Computing and Information must adhere to the admissions requirements outlined in the School's policies . In addition, the following are requirements for admission to graduate study in Telecommunications for pursuing a PhD degree.

1. A Master's degree from an accredited university, a recognized international program, or the equivalent. Exceptional students with a technical Bachelor's degree may also be admitted. Such students must still satisfy all other requirements that follow.
2. Attainment in graduate work of a minimum grade point average of 3.3 (on a scale with A having a value of 4 points per credit). An international student's grade point average will be calculated on the basis of equivalency from universities that use a different scale.
3. As evidence of the ability to undertake doctoral work, an essay (not exceeding 1000 words) indicating, as specifically as possible, the student's academic and professional goals in relation to the Telecommunications doctoral program and identifying potential areas and/or topics in which the student expects to pursue dissertation research.
4. At least three references from persons in the professional and academic communities. The faculty may, on occasion, require additional references.
5. Evidence of academic completion of:
 - Two different scientific computer programming languages,
 - Introductory class in probability and statistics
 - Differential and integral calculus

In addition, a candidate may elect to include the following optional material:

1. A complete curriculum vitae that provides an overview of education, work, publication, and other professional activities.
2. An example of published writing.
3. A description of any published or unpublished research, contributions to the professional or scholarly literature, and other professional or academic experience relevant to an assessment of his or her capacity to pursue doctoral study successfully.

Students whose complete credentials are not available for full admission may register as special students until the completed credentials are received, provided all other requirements have been satisfied. Students with deficiencies in either coursework or scholastic achievement may be admitted provisionally. Prerequisite courses should be completed within the first two terms.

Purpose of the Degree

The Doctor of Philosophy (PhD) degree in Information Science with a Focus in Telecommunications (henceforth called PhD in Telecommunications for short) prepares students for independently engaging in advanced work in high-quality research and teaching. It provides research oriented graduate study and professional specialization in telecommunications and emphasizes both scholarly and applied research. To earn a PhD degree, a student must demonstrate breadth of knowledge, give evidence of superior scholarship and mastery of a specialized field, and must demonstrate their ability to do significant and relevant research. In addition, the student must conceive, write and defend a PhD dissertation representing a significant and original contribution to current academic research as demonstrated by a public dissertation defense and publication in established peer-reviewed

academic conferences and/or journals. Major milestones en-route to the PhD degree are the preliminary examination, the comprehensive examination, the dissertation proposal, and the dissertation defense.

Degree Requirements

A candidate for the PhD should have broad knowledge of the field of telecommunications as well as a specialization in the area of major interest. Every candidate should have, in addition, a strong background in research methodologies.

The Telecommunications PhD program requires a minimum of 48 credits beyond a master's degree. Exceptional students with a technical bachelor's degree may be admitted on occasion and in such cases, a minimum of 72 credits beyond the baccalaureate degree is required. The 72 credits must include the required courses (or their equivalent) for the MST degree at the University of Pittsburgh.

All PhD candidates must complete:

- 12 credits of required courses
- 12 credits of doctoral seminars
- 6 credits of minor courses
- At least 18 credits of dissertation research and writing (no more than 18 credits applied toward graduation)
- 48 of the 72 credits must be advanced coursework beyond the MST degree (or its equivalent).

A plan of study should be designed by the advisor and student as early as possible after admission. A copy of the plan of study must be on file in the student's folder and should be consulted during each registration period.

While these are minimum credit requirements, every PhD student may be required to take more credits of coursework to obtain the breadth and depth of knowledge required to successfully complete their dissertations. Graduation depends upon meeting the minimum credit requirements and all other requirements.

Preliminary Examination Requirements

The preliminary examination, according to Regulations Governing Graduate Study at the University of Pittsburgh, is held:

"...to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently...." The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation.

The Telecommunications and Networking faculty has clarified further that the overall objectives of the preliminary examination are:

- To test the PhD students for breadth of knowledge;
- To evaluate their skills, and their ability to apply them;
- To evaluate their ability to do research.

Every student must complete the preliminary examination within four semesters of his/her admission (not counting Summer) into the program unless an exception is granted by the PhD Committee. Exceptions are typically not allowed for full-time students. Exceptions may be made for part-time PhD students in consultation with their advisors. The preliminary examination consists of authorship, presentation, and public defense of a publishable quality research paper as described below.

Eligibility and Preparation

To be admitted to the preliminary examination a student must:

- Have completed a Master's degree in a closely related field (e.g., telecommunications, information science, computer science, engineering, mathematics); Exceptional students admitted after a Bachelor's degree must have completed all pre-requisite coursework.
- Be admitted to full graduate status (i.e., all provisional admission requirements must be completed);
- Have attended the PhD orientation session;
- Be registered in the term in which the preliminary examination is taken; and

- Apply in writing, with the advice and consent of a faculty advisor, to the Telecommunications PhD Chair and Department administration by the announced deadline.

Traditional preparation for the preliminary examination includes graduate-level coursework and familiarity with reading and reviewing papers and identifying research gaps. In addition, doctoral students should become familiar with the proceedings of the relevant professional societies of the field and copies of recent preliminary examination papers available from Department administrators.

Content and Format

The preliminary examination consists of two parts:

1. Research Project and Paper

During the first year of doctoral study, under the direction of the advisor (or another full or adjunct member of the Program's graduate faculty), students will design and complete a research project. The project should reflect only those activities undertaken during the first year of study. A previous Master's thesis or other work completed prior to the start of doctoral study may not be submitted for this requirement. While much research involves working in a larger team, the student's role in the project and in writing the paper should be significant. The student must be the primary author, and ideally should be the sole author. The student should seek a project or a part of a project in which the student can take the lead in conducting the research and writing up the results under the direction of the advisor. However, unlike a dissertation or thesis, the research paper submitted for the preliminary evaluation may include co-authors. In this case, the role of each co-author should be clearly stated in writing by the student and submitted along with the research paper. Furthermore, the paper may be integrated with other work and later submitted for publication with a longer list of authors.

Research papers take many forms, and some venues require particular nomenclature or forms. The paper submitted to the faculty to meet this requirement should include the following components:

- A clear statement of the problem
- An innovative idea that addresses the problem
- A survey of the relevant research literature
- An explication and implementation of a methodology for addressing the problem
- Evidence that the described idea achieves its goal
- Analysis and evaluation
- Discussion of the research, including but not limited to shortcomings of the work and directions for future work.
- A list of references

While it is possible to deviate from this structure, this should only be done with the support of the advisor.

2. Oral presentation and defense

Submission and presentation of the paper must be made not later than in the last January of the first four terms in in the program. Students must complete 6 credits of doctoral courses and 6 credits of doctoral seminars before taking the preliminary examination. The due date for submission of the paper is the second Friday of January. On the fourth Friday of January, papers will be presented orally in conjunction with the IS PhD oral presentations to graduate faculty in a public forum. Each student will give a 20-minute long oral presentation of their paper to the faculty, followed by a 20-minute discussion. All presentations will be made on a single day. Faculty will meet the same day to grade the written and oral performance. The result of the exam will be: (a) pass, (b) fail with one more chance to re-take the exam the following year, or (c) fail with no chance to re-take the exam.

Timing and Completion of Milestone

A student has to pass the preliminary exam at the earliest opportunity (within the first four semesters) and should not wait till completion of coursework to attempt the preliminary exam. A student will have successfully completed the prelim exam after passing the oral presentation and defense and completion of the coursework as required.

With the successful completion of the preliminary examination, the student is fully admitted to doctoral study in telecommunications. The Program Chair will notify the student, in writing, of admission to doctoral study. After admission, the student must complete the remaining coursework

including doctoral level seminars; probability and statistics, research design, and information science course requirements; and the residency requirement.

A student whose performance on the preliminary examination is judged to be inadequate may be subject to Academic Dismissal at the end of the term.

Comprehensive Examination

The student must satisfactorily pass a comprehensive examination designed to assess mastery of the general field of telecommunications, acquisition of both depth and breadth in the area of specialization within the field, and ability to use the research methods of the discipline. The purpose of the comprehensive examination is to assess the student's ability to understand a sub-area of telecommunications in depth. In order to do research, a student must be able to read, understand, present, and criticize research papers in the field. It is also important that the student be able to explain it in depth to someone who is unfamiliar with that area. Thus, this examination centers on the development of a tutorial as well as a lecture in which the student must explain the subject to the satisfaction of the entire Telecommunications faculty. From a learning perspective, this provides the student with the experience of structuring and explaining a technical topic in detail.

Eligibility and Preparation

Prior to the comprehensive examination, a student must complete most of the course and seminar requirements. This includes:

1. Completed most of the graduate course and seminar work for completion of a PhD. These credits include:
 1. 12 credits of doctoral-level classes (as determined by the advisor),
 2. 6 credits of minor requirement (Telecommunications courses excluded), and
 3. 12 credits in doctoral seminars;
2. Completed a "state-of-the-art" paper to be submitted to graduate faculty two weeks prior to examination date;
3. Be registered in the term in which the comprehensive examination is taken; and
4. Apply to the Chair of the PhD program for permission to take the comprehensive examination.

Content and Format

The comprehensive examination has a written component and an oral component. In preparation for the one-hour oral examination, the examinee must prepare a written "tutorial" paper that must be submitted to the Telecommunications faculty two weeks prior to the scheduled exam date. The "tutorial" paper is a critical essay that explores the literature of the selected topic; the student identifies, synthesizes, and evaluates the relevant literature on the topic.

The comprehensive examination will be conducted by at least four members of the graduate Telecommunications faculty. The exam will be directed at the "tutorial" paper and the various relationships among the components of telecommunications. Goals of the comprehensive examination committee are to assess the student's understanding of the topic of the "state-of-the-art" paper, the theoretical framework that supports it; the quality of the student's research skills necessary to understand, integrate, and extend knowledge gained through scholarly inquiry; and the relationships of the topic to telecommunications. The results of the exam are conveyed to the student, by the examination committee, usually within an hour after completion of the exam. The result of the comprehensive examination is a pass or fail. If a student fails, they may retake the exam one more time. A student who fails the comprehensive examination twice is no longer eligible to continue in the PhD program.

Process

The procedure to schedule and take the comprehensive examination is as follows:

1. The student will select a topic of interest in his research area in consultation with his advisor. When the advisor is satisfied that the student understands the subject matter in sufficient depth, the student prepares a tutorial paper.
2. The student will prepare a comprehensive literature survey of the research on this topic and prepare a tutorial document that is referenced and complete in itself. This document must not exceed 20 pages in length, with a font size of 12pt, and margins of 1 inch on the left and right. Also, the document must be prepared so that the faculty can easily read it. A researcher in Telecommunications who is not familiar with the research topic should be able to understand and appreciate the issues in this topic by reading this document.
3. The work should be completely done by the student except for informal suggestions from the advisor. The advisor may provide only grammatical feedback; it is up to the student to decide what content is necessary, and how to organize it, because this is a crucial part of the tutorial. Occasionally, the advisor may suggest inclusion of certain topics.

4. The student finds a date for the presentation where at least four of the telecommunications faculty can attend. At least two weeks prior to the examination date, the student must deliver a final copy of the tutorial document to all faculty members.
5. It is strongly recommended that the student provide some preliminary research results on an advancement in the topic or at least reproduce the most relevant work conducted by researchers in this topic.
6. The student has to publicly present the material from this document orally on the day of the examination to the faculty in a presentation lasting 45 minutes. The presentation will be tutorial in nature with additional results if any. The faculty may question the student to assess his or her understanding of the topic in question as well as in any general topic in the area. The faculty may ask questions for clarification and to test the student's grasp of the subject as well as closely related subjects and methodologies.

The response of the faculty may take on several forms, including:

- Unconditional pass
- Conditional pass, with conditions such as
 - Additional recommended or required coursework
 - Specific modification to the tutorial paper
 - Re-attempt the oral presentation
- Fail

All Telecommunications students are encouraged to attend comprehensive exams to see what is expected and learn from the tutorial presentation.

Timing and Completion of Milestone

The Comprehensive should be taken after the student has completed almost all coursework, seminars, etc. and after the student has successfully completed the Preliminary examination. Typically, a student will complete the comprehensive exam within 18 months of completing the preliminary exam.

After successfully completing the comprehensive examination, the student is admitted to doctoral pre-candidacy and works with a faculty advisor to prepare a dissertation proposal and form a dissertation committee. The dissertation proposal must be approved by the student's dissertation committee. Successful completion of the comprehensive examination and approval of the dissertation proposal permit the student's academic advisor to recommend the student for doctoral candidacy. Normally a student will begin to register for dissertation credits after being admitted to doctoral candidacy. A minimum of 18 dissertation credits is required. To be eligible for the dissertation defense the student must complete the residency requirement (three terms of full-time study of which two terms must be consecutive). The final defense of the dissertation is a public session announced in University-wide media. The dissertation must be unanimously approved by the dissertation committee.

A student whose performance on the comprehensive examination is judged to be inadequate may be subject to Academic Dismissal at the end of the term.

Candidacy and Dissertation Requirements

Pre-Candidacy and the Dissertation Proposal

Dissertation Advisor and Committee

Students must gain the agreement of a member of the Telecommunications faculty, who is also a member of the graduate INS faculty, to chair the dissertation committee that will advise the student on the area of research. In most cases, the student's academic advisor continues as the dissertation advisor and Chair of the dissertation committee. The advisor's agreement is recorded in the student's file. Any request to change the dissertation advisor must be submitted in writing to the Chair of the Doctoral Committee and SCI Academic Records for an update to the student's digital record. Approval for the change and the selection of another dissertation advisor is filed in the student's folder.

The student's dissertation advisor:

1. Assists in choosing the dissertation committee and in confirming the eligibility of all members selected;
2. Arranges with the program administration to schedule the dissertation proposal presentation;
3. Reviews progress toward completion of the research;
4. Arranges with support staff to schedule the dissertation defense;
5. Chairs the dissertation defense;

6. Secures appropriate signatures from dissertation committee members and assures that all required paperwork is submitted in accordance with the Telecommunications, SCI, and University procedures.

Members of the dissertation committee are to be selected by the student in consultation with the dissertation advisor. One of the members must hold a primary faculty appointment outside of the Informatics and Networked Systems graduate faculty. The dissertation committee is responsible for monitoring the research, conducting and evaluating the oral defense of the dissertation, and approving the final written presentation of the dissertation. The dissertation advisor directs the dissertation research and writing, but all committee members have the responsibility to assist the student as consultants. All members of the committee may vote.

According to University policy, meetings of the doctoral candidate and their dissertation committee must occur at least annually from the time the student gains Admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward degree and discuss objectives for the following year and a timetable for completing degree requirements.

While the student prepares a dissertation proposal, they are required to enroll in and complete a minimum of 18 dissertation credits as part of their study.

Students should refer to the School's Catalog page , specifically the *advising section*, for further resources on the advisor/advisee relationship.

Dissertation Proposal

The student schedules a public presentation of the dissertation proposal, notifies the Department administration, and provides a written copy of the proposal to the committee members at least two weeks prior to the presentation date. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree.

The dissertation proposal represents a contract between the student and the dissertation committee. The student should specify in as much detail as possible the problem they wish to solve and the method they intend to use to solve it.

Students demonstrate their ability to complete a sound project of original research by presenting and defending the dissertation proposal to their dissertation committee. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal.

Originality may be reflected in a number of ways. For example, a candidate may pose an important new problem or formulate an existing problem in a novel and useful way. A candidate may investigate previously ignored material or develop new techniques for investigating issues. Extensions of previous investigations are acceptable provided they incorporate important new elements in the design or execution of the research.

Normally, a satisfactory dissertation will form the basis for one or more publishable articles. The dissertation committee may offer an opinion on the publishable content of the proposed research.

Written notice of the student's meeting with the dissertation committee to approve the proposal will be distributed to the Telecommunications faculty at least one week in advance. The notice will contain the student's name, the title and abstract of the proposal, the date, time, and place of the meeting. The committee will conduct the proposal hearing and must unanimously approve the dissertation topic and the research plan. The student is responsible for filing a copy of the approved proposal with the department.

When the proposal has been successfully defended, the Chair of the student's dissertation committee shall notify the Chair of the PhD Committee, the Chair of the Department, and the Dean that the student has achieved formal candidacy.

Timing and Completion of Milestone

The proposal may be done any time after the successful completion of the comprehensive examination. University rules require that the proposal be completed at least eight months prior to the final defense of the dissertation. The timing of the proposal depends heavily on the student's dissertation project. The actual timing depends on the student's ability to demonstrate the project's feasibility to the committee. For some, this will occur early in the research cycle; for others, this will occur later. It is generally in the student's interest to do this earlier rather than later, since it defines the scope of the completed dissertation. In any case, every student should aim at completion of their dissertation proposal within one year of passing the comprehensive exam.

Candidacy

For admission to formal candidacy for the PhD degree, a student must have:

1. Passed the preliminary examination;
2. Completed all coursework requirements (with the possible exception of dissertation credits) with a GPA of 3.3 or higher;
3. Passed the comprehensive examination;
4. Successfully presented a dissertation proposal and received permission from the dissertation committee to begin research.

When these steps have been taken, the chair of the student's dissertation committee will notify the Chair of the PhD Committee, the Chair of INS, and the Dean that the student has achieved formal candidacy. The Chair of the PhD Committee will notify the student of his admission to doctoral candidacy in writing. A copy of the notice will be placed in the student's folder. The student is expected, at this time, to schedule and present a colloquium on their research in an open forum in the School of Computing and Information.

Dissertation Research Procedural Requirements

The student must submit all forms, letters, and questionnaires related to the dissertation research to the members of the dissertation committee for approval before any such documents are publicly distributed.

The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are found in the University of Pittsburgh's Guidelines to the Use of Human Subjects in Psychosocial Research. The School has a faculty representative on the Psychosocial Institution Review Board who may be contacted with questions of procedure. The student must prepare a final copy of the dissertation conforming to the University of Pittsburgh's Style and Form Manual for the format of the dissertation. Since the bibliographic style is best determined by the subject of the dissertation, a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

For details regarding the University's formatting guidelines and other paperwork related to the Electronic Theses and Dissertations (ETD) submission process, refer to the School's Current Students page on graduation procedures. Specifically, the PhD Graduation Checklist will assist students with resources, deadlines, and related items.

If University facilities and/or faculty time are being used in dissertation research and/or the writing of the dissertation, then students are required to register for at least 3 credits per term or such greater amount as the School or Program deems appropriate. Students who have completed all credit requirements for the PhD degree and are working full time on their dissertations, should register for fixed-fee full time dissertation credits. If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

Dissertation Defense

The purpose of the final defense is to assess the student's ability to present and defend the result(s) of their original research project. The student must be able to clearly communicate the problem, the method, the assumptions, and the results of the project. He or she must be able to clearly articulate and support all assumptions and decisions that were made toward the process of completing the project. While the student's committee makes the final decision, the defense is public and questions are accepted from any attendee.

Dissertation

After completing the investigation and preparing the dissertation, the candidate is advised to submit the first draft to the dissertation advisor early in the term in which he/she expects to receive the degree. This allows time for any necessary revisions and for preparation of the final copies in an acceptable style and format.

Any exceptions to the style manual approved for the School must have prior approval by the advisor. Final decisions concerning style and format rest with the student's dissertation advisor. Note the dissertation can either follow the traditional book format model or a collection of published research articles. If the latter case, the published work must be logically connected and integrated into the dissertation in a coherent manner, and sufficient detail must be presented to satisfy the characteristics of a dissertation. If the published articles were co-authored, the contribution of the student must be clearly delineated in the introduction so the committee can ascertain that the student's own work satisfies the requirements of a dissertation. Instructions on incorporating articles into the dissertation are provided in the Format Guidelines for Electronic Thesis and Dissertation Preparation at the University of Pittsburgh.

Eligibility for the Dissertation Defense

To be eligible to defend the dissertation, a student must have:

1. Completed the residency requirement;
2. Completed required documents to schedule and request formal, public announcement of the defense in the University Times through the School at least four weeks prior to the date of the defense;
3. Distributed copies of the dissertation to the dissertation committee at least four weeks prior to the date of the defense.

Registration Requirements

Students completing their research work for the dissertation will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students must submit an application for graduation for the term in which they have planned the dissertation defense. The application for graduation and the related deadlines and late fee structure are available on the School's Current Students webpage.

If a student does not complete all the work in a given term, including the dissertation oral examination, and has been cleared for graduation too late to be included on the graduation list for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to approval by the Dean's office. If a student is unable to complete the work during the expected term of graduation due to some extenuating circumstances related to the School and University (beyond control of the student and attested to by the Dean's office), the student will not be required to register for additional credits in the term of graduation.

All requests for exceptions to the policy stated above should be sent to the Chair of the Department of Informatics and Networked Systems from the advisor for clearance and recommendation and then to the Dean for approval consideration.

Defense of the Dissertation

The dissertation defense is scheduled by the dissertation advisor early enough in the term to allow for necessary revisions and final editing of the manuscript before the graduation deadline. The candidate must submit copies of the dissertation to the dissertation advisor and to the dissertation committee at least four weeks prior to the scheduled dissertation defense. A copy must also be filed with the Department at least four weeks before the date of the dissertation defense meeting. Notice of the dissertation topic/title/abstract; the defense date, time, and location; and the availability of the final draft copy of the dissertation will be publically posted and notice sent to the faculty at least one week ahead of the scheduled defense.

Dissertation defenses must be publicly announced and are open to the University community, but only the dissertation committee may vote. A student defends their dissertation successfully if the dissertation committee unanimously approves it. Although the dissertation defense is dedicated primarily to the field of the dissertation, other questions relating to telecommunications may be considered at this time. The chair of the dissertation committee serves as the session moderator.

A student who successfully defends the dissertation with conditions to be completed must satisfy those conditions with the approval of the dissertation advisor within one year.

Completion of the Dissertation

The dissertation should be completed within the statute of limitations described below. If the statute of limitations is about to be exceeded and there is evidence of reasonable progress, the Department may recommend an extension to the statute by a specific period usually not exceeding one year. It is the student's responsibility to present evidence of progress to their advisor along with a request for extension prior to the end of the statute of limitation period. All requests for extension must be approved Department; approved requests will be submitted to the Dean's Office for final action. See details regarding the *statute of limitations* in the SCI Catalog page.

Publication of the Dissertation and ETD Guidelines

All candidates for a PhD degree are required to submit their official dissertations electronically using the University of Pittsburgh's procedures and formatting for Electronic Theses and Dissertations (ETD). In that case, the candidate is required to pay a fee specified by the University to Student Accounts and submit various items as outlined on the School's PhD Graduation Checklist.

Any dissertation may be published after the final defense provided that the dissertation submitted for publication is approved as to form and content by the dissertation advisor and also provided that due acknowledgment is made to the University. No form of publication, however, shall relieve the student of the responsibility for following the University's Electronic Theses and Dissertations (ETD) formatting and submission guidelines as outlined on the School's PhD Graduation Checklist.

For ETD formatting guidelines and general information, please visit the University of Pittsburgh Electronic Theses and Dissertations website. For deadlines and contact information regarding the School's required graduation and ETD paperwork, please visit the School's Current Students webpage on graduation procedures.

Journal Requirement

All PhD students are required to submit an article of publishable quality (based on their dissertation) to a journal before the degree is awarded. This shall be noted when applying for graduation with signatures of the student and the advisor.

Additional Requirements

Grade Policy

Graduation depends upon meeting the minimum credit requirements and all other requirements. Graduate degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Grades of C or lower are unacceptable for graduation credit.

Residency Requirements

Full-time study on campus is considered most beneficial to students, but it is recognized that students may have off-campus responsibilities as well. The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Three terms of full-time study are required, two of which must be consecutive and must be taken after successful completion of the preliminary examination. Full-time study is defined as nine or more graduate credits per term.

Transfer of Credits

Upon petition to the faculty and with the consent of the student's advisor, a student may be granted up to 6 credits of advanced standing. This credit for graduate course work completed at another institution may be granted if the credit has not been applied to a previous degree, has been earned within the 6-year statute of limitations, and is relevant to the student's doctoral studies in the School of Computing and Information. Advanced standing is granted at the time of admission or during the first term of course work, if approved. Petitions for transfer of credits must be received at the time of application or during the first term of attendance. Transcripts verifying the graduate courses must accompany the petition along with sufficient documentation to permit the faculty to evaluate their relevance to the doctoral program.

Transfer credits must be earned at an accredited institution granting degrees at the doctoral level. No credit will be granted toward doctoral degrees for work completed in extension courses or in off-campus centers of another institution unless those credits are approved for graduate degrees at that institution. Transfer credits will not be accepted for courses in which grades lower than a "B," or its equivalent, has been received. For details, see the *University's policy on transfer of credits*.

Please note these transfer credits will not be applied to core courses, independent study or doctoral seminars.

Probation and Termination

All students pursuing the doctoral degree are required to maintain a cumulative GPA of at least 3.3 after admission to graduate study and for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.3. The graduate faculty will terminate students on probation for two consecutive terms. A cumulative GPA of 3.3 or better is required for admission to doctoral study and for the award of the doctoral degree. In addition, students must show adequate progress through an annual review to be held in May.

Statute of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the Program. More details regarding the statute of limitations and extensions can be found in the SCI Catalog.

Note: All students who are candidates for doctoral degrees are governed by the regulations of the University Council on Graduate Study, which establishes minimum standards for graduate work throughout the University as well as by those regulations established by the School of Computing and Information faculty. See the University's Academic Regulations for details.

Information Science, PhD

PhD Admissions Requirements

IS PhD applicants must either have or demonstrate the following prerequisite knowledge. These courses or their equivalents should be taken before seeking admission but may be taken during the first four terms of study. All courses must be at the graduate level and may have been taken in the course of pursuing another graduate degree:

- Statistics or Discrete Math (INFSCI 2020 - MATHEMATICAL FOUNDATIONS FOR INFORMATION SCIENCE)
- Cognitive Psychology (INFSCI 2300 - HUMAN INFORMATION PROCESSING or INFSCI 2350 - HUMAN FACTORS IN SYSTEMS)
- Systems Analysis and Design (INFSCI 2510 - INFORMATION SYSTEMS ANALYSIS AND DESIGN)
- Data Structures (INFSCI 2500 - DATA STRUCTURES)
- Database Management (INFSCI 2710 - DATABASE MANAGEMENT)

Applicants must have a Master's degree from an accredited university, a recognized international program, or the equivalent is required and have attained a minimum grade point average (GPA) of 3.3 (on a scale with an "A" having a value of 4 points per credit). Exceptional students with a technical Bachelor's degree may also be admitted. Such students must still satisfy all other requirements that follow. An international student's GPA will be calculated on the basis of equivalency from universities that use a different scale.

Your application should include:

- **Letters of Recommendation:** identify and seek the recommendations of three individuals (e.g., professors, employers, information professionals) who are in a position to evaluate your academic performance or your potential as an information professional. Two must be from professors, preferably with PhDs.
- **Transcripts:** Only scanned copies of official transcripts will be accepted and processed at the application stage.
- **Graduate Record Examination (GRE)**
- **Other Required Documentation:** Please include the following with your online application:
 - CV; and
 - Statement of Intent (not to exceed 1,000 words) indicating, as specifically as possible, you're your academic and professional goals related to the Information Science doctoral program and identifying potential areas and/or topics in which the student expects to pursue dissertation research.
- **For International Applicants:** Graduate students must possess sufficient knowledge of English to participate successfully in graduate study. International applicants must submit either the TOEFL or the IELTS (taken within two years of the date of application).

PhD Degree Requirements

There are three stages of admission to the doctoral program:

1. admission to graduate study when the student first matriculates
2. admission to doctoral study following successful completion of the preliminary examination
3. admission to candidacy following successful completion of the comprehensive examination and the approval of the dissertation proposal.

A minimum of 48 credits, including 30 course and seminar credits beyond the Master's degree, and at least 18 dissertation credits are required. Students without a Master's degree will be required to take a minimum of 24 additional credits of coursework or seminars, for a total of 72 credits beyond the Bachelor's degree. Students who did not take the prerequisite courses as part of earlier studies should expect to complete admission requirements or equivalent courses.

A student pursuing a PhD degree is first admitted to graduate study in Information Science. During the first year of study and in preparation for the preliminary examination, PhD students should complete initial course work and attend the PhD orientation session (a two-hour review of requirements for the PhD degree).

Preliminary Examination Requirements

Preparation for the Preliminary Examination

Core Courses

Four graduate-level courses, one in each of the following areas. Students, who have taken two or more of these courses (in any cluster described below) as part of a degree at the University of Pittsburgh, may take additional courses from the remaining areas.

Prerequisites for the core courses are not counted as part of the PhD course requirements.

- Research methods
 - INFSCI 2040 - RESEARCH DESIGN
 - INFSCI 2160 - DATA MINING
 - INFSCI 2591 - ALGORITHM DESIGN
- Foundations
 - INFSCI 2125 - NETWORK SCIENCE AND ANALYSIS
 - INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
 - INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
 - INFSCI 2170 - CRYPTOGRAPHY
- Design
 - INFSCI 2430 - SOCIAL COMPUTING
 - INFSCI 2460 - SPATIAL REASONING FOR GIS
 - INFSCI 2470 - INTERACTIVE SYSTEM DESIGN
 - INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- Information
 - INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
 - INFSCI 2415 - INFORMATION VISUALIZATION
 - INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT
 - INFSCI 2801 - GEOGRAPHIC INFORMATION SYSTEMS

Independent Research

Six credits of independent study focused on a research project are required. This research will normally be supervised by the student's advisor over two terms, but any IS faculty member who is a member of the graduate faculty may supervise the student. The student may opt to have different faculty supervise different parts of the independent study.

The result of this research will be an original, publishable quality research paper, which will serve as the basis of the preliminary exam (see below). Previously published work may not be used to fulfill this requirement, although the independent research project might build upon previous work done by the student.

Doctoral Seminars

Three doctoral seminars (9 credits), including a required INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM, are required. INFSCI 3005 is offered every fall and should be taken during the first year of study. This course will cover the scope of research in Information Science. Advanced doctoral seminars will be focused on single research themes.

While the preliminary examination can be taken before the completion of the core courses and doctoral seminar, the preliminary examination requirement will not be considered satisfied until all core courses and doctoral seminars are completed.

Preliminary Examination

The goal of the preliminary evaluation is to assess your breadth of knowledge and ability to conduct research in information science. The evidence of your breath of knowledge is your performance in the core courses and seminars. The evidence of your ability to conduct research is provided by authorship, presentation, and public defense of a publishable quality research paper that:

- presents work you have done under the direction of a graduate faculty member in the department;
- demonstrates your ability to conduct research and clearly report the results of that research;
- shows your mastery of the subject matter, both in the written paper and in your oral presentation and defense.

Research Project and Paper

During the first year of doctoral study, under the direction of your advisor (or another full or adjunct member of the department graduate faculty), students will design and complete a research project. The project should reflect only those activities undertaken during the first year of study. A previous master's thesis or other work completed prior to the start of doctoral study may not be submitted for this requirement. While much research involves working in a larger team, your role in the project and in writing the paper should be significant. You must be the primary author, and ideally you will be the sole author. You should seek a project or a part of a project in which you take the lead in conducting the research and writing up the results under the direction of your advisor. However, unlike a dissertation or thesis, the research paper submitted for the preliminary evaluation may include co-authors. In this case, the role of each co-author should be clearly stated in writing by the student and submitted along with the research paper. Furthermore, the paper may be integrated with other work and later submitted for publication with a longer list of authors.

Research Paper Components

Research papers take many forms, and some venues require particular nomenclature or forms. The paper submitted to the faculty to meet this requirement should include the following components:

1. a clear statement of the problem
2. an innovative idea that addresses the problem
3. a survey of the relevant research literature
4. an explication and implementation of a methodology for addressing the problem
5. evidence that the described idea achieves its goal
6. analysis and evaluation
7. discussion of the research, including but not limited to shortcomings of the work and directions for future work.
8. a list of references

While it is possible to deviate from this structure, this should only be done with the support of your advisor.

Submission and Presentation of Research Papers

Submission and presentation of your paper must be made not later than in January following your second fall semester in the program. Students must complete the 6 credits of Independent Research Study and IS 3005 before taking the preliminary examination. The due date for submission of the paper is the second Friday of January. On the fourth Friday of January, papers will be presented orally to the IS graduate faculty in a public forum. Each student will give a 20-minute long oral presentation of his/her paper to the faculty, followed by a 20-minute discussion. All presentations will be made on a single day. Faculty will meet the same day to grade the written and oral performance. The result of the exam will be: (a) pass, (b) fail with one more chance to re-take the exam the following year, or (c) fail with no chance to re-take the exam. While the submission and presentation of your paper may be made before the completion of the core courses and doctoral seminar, the preliminary evaluation will not be considered satisfied until all core courses and doctoral seminars are completed.

Comprehensive Examination Requirement

Preparation for the Comprehensive Exam

Students will have successfully completed the preliminary examination. In preparation for the comprehensive exam, it is expected that the student will complete 3 credits of advanced statistics. To be admitted to the comprehensive examination a student must have:

- successfully completed the preliminary examination;
- completed the 1-term residency requirement; and
- notify via e-mail the Chair of the PhD Committee and Department administration of the comprehensive examination at least two weeks before the exam.

This notification should include the title of the Comprehensive Exam, the date, and the Committee members.

Comprehensive Examination

The comprehensive examination requires successful completion of the preliminary exam. The student will propose three areas of concentration. These areas must be approved by the examining committee, which will consist of the advisor who will chair the examining committee, and two other full-time graduate faculty members from INS selected by the student with the approval of the advisor. To gain this approval, the student should complete and send the "Comprehensive Areas of Concentration Approval" form to all committee members for their signatures. In exceptional cases, where the student's focus requires outside expertise, one committee member may come from outside the INS graduate faculty body if recommended by the advisor and approved by the chair of the PhD Program.

The student must meet with the members of the committee to discuss the topics and foci. The student, with the consent of the committee, is free to select areas within information science that are not on the list of topics on the areas of concentration form, so long as the committee is unanimous in approving the topics. Once the committee and the topic areas are selected, the student will prepare an activity and reading list with the advice and approval of the committee members. The student will then proceed with the review of literature, based on the reading list. When the student is ready, he/she will inform the advisor who will ask each member of the committee to submit one or more questions to the advisor. The advisor will be responsible for coordinating the exam with appropriate balance over the three topic areas. The student will be given the questions and allowed one week to prepare written answers to the questions. After review of the written answers, two-hour oral examination will be scheduled and open to the public. The final reading list, questions and answers should be published and available to the SCI community on the School's website. As soon as finalized, forward this information with "Comprehensive Exam Submission Approval for Web Publishing" form to the staff, with copies sent to the PhD Chair and all comprehensive committee members. The oral examination will normally be within a week of the completion of the written exam, but in all cases no later than within three weeks. The student will make a 10-minute presentation on the key points. The oral questions will cover the answers on the written examination, and more broadly, about knowledge of the material in the three areas of concentration. The result of the comprehensive examination will be a pass or fail. If a student fails, they may retake the exam one more time.

All required forms are available on the School's Current Students webpage.

Candidacy and Dissertation Requirements

Pre-Candidacy

Once the comprehensive examination is successfully completed, the student can propose and defend a dissertation topic. The student and the dissertation advisor should select the dissertation committee.

Dissertation

Each student must write a dissertation that presents the results of a research project carried out by the student. This research project involves a substantive piece of original and independent research grounded in an appropriate body of literature.

Dissertation Credits

Doctoral students are required to take a minimum of 18 dissertation credits as a part of their study. Dissertation credits should be taken during terms when a student is actively working on the dissertation. Most research activities during the first two years of the Program are better completed as part of an independent study or a doctoral seminar. In any term in which a student is enrolled for dissertation credits, the student should meet with their advisor on a regular basis to monitor that appropriate progress is being made towards the completion of the dissertation proposal or the dissertation. The specific activities in a given term should depend on the current stage of the dissertation process. In addition to writing the proposal and dissertation itself, other appropriate activities may include reviewing the literature, programming, prototyping, running preliminary studies, writing grant proposals, preparing journal articles related to the dissertation or presenting preliminary results at conferences.

Doctoral students who have completed all credit requirements for the PhD degree, including minimum dissertation-credit requirements, are encouraged to register for "Full-time Dissertation Study," with a fixed-fee registration per term plus applicable fees. Enrollment in this course provides a student with full-time status and fulfills the University requirements for registration in the term of graduation.

Dissertation Advisor

Students must gain the agreement of a member of the INS graduate faculty to chair the dissertation committee that will advise on the area of research and the design of the dissertation study. The advisor's agreement is recorded in the student's file. Any request to change the dissertation advisor must be submitted in writing to the Chair of the IS PhD Program Approval for the change and the selection of another dissertation advisor is placed in the student's file.

The student's dissertation advisor together with the student:

- assists in choosing the dissertation committee and in confirming the eligibility of all members selected;
- arranges with the staff to schedule the dissertation proposal presentation;
- reviews progress toward completion of the research;
- arranges with support staff to schedule the dissertation defense;
- chairs the dissertation defense;
- secures appropriate signatures from dissertation committee members and assures that all required paperwork is submitted in accordance with School and University procedures.

Dissertation Committee

The dissertation committee composition is dictated by SCI regulations; see the *Doctoral Committee section* of the SCI Catalog for details. The dissertation committee is responsible for monitoring the research, conducting and evaluating the oral defense of the dissertation, and approving the final written presentation of the dissertation. The dissertation advisor directs the dissertation research and writing, but all committee members have the responsibility to assist the student as consultants.

Dissertation Proposal

After successfully completing the comprehensive examination, the student, in consultation with the dissertation advisor, must prepare a dissertation proposal. The written proposal is presented to the dissertation committee and defended in a hearing before the dissertation committee.

Students must demonstrate their potential to complete a sound project of original research by presenting and defending the dissertation proposal to their dissertation committee. The dissertation committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal.

Originality may be reflected in a number of ways. For example, a candidate may pose an important new problem or formulate an existing problem in a novel and useful way. A candidate may investigate previously ignored material or develop new techniques for investigating issues. Extensions of previous investigations are acceptable provided they incorporate important new elements in the design or execution of the research.

The student must submit the dissertation proposal to the committee at least two weeks prior to the scheduled hearing. Copies of the dissertation proposal are made by the student at their own expense. When the proposal has been successfully defended, the student's dissertation advisor shall notify the Chair of the PhD Committee, the Chair of the Information Science Program, and the Dean that the student has achieved formal candidacy. After approval of the dissertation proposal, major changes may not be made without approval of the student and the dissertation committee. The student is responsible for filing a copy of the approved proposal in the IS Program office.

Electronic notice of the student's meeting with the dissertation committee to approve the proposal will be distributed to the INS faculty at least two weeks ahead of time. The notice will contain the student's name; the title of the proposal; the date, time, and place of the meeting; and a link to the electronic version of the dissertation proposal.

The dissertation proposal meeting is open to all INS faculty and PhD students who wish to attend and others by invitation of the student.

Once the comprehensive examination is successfully completed, the student is officially a doctoral candidate. After becoming a doctoral candidate, the student can propose and defend a dissertation topic.

Candidacy

For admission to candidacy for the PhD degree, a student must have:

- passed the preliminary examination;

- completed a minimum of 30 credits beyond the master's degree with a GPA of 3.3 or higher;
- passed the comprehensive examination;
- successfully presented a dissertation proposal and received approval of the dissertation proposal by the dissertation committee.

Admission to candidacy must be at least eight months before the defense of the dissertation in order to provide an opportunity for the members of the doctoral committee to review, criticize, and monitor the proposed research.

When these steps have been taken, and the dissertation advisor has notified the Program and the School, the Program Chair will notify the student in writing of his admission to doctoral candidacy. A copy of the notice will be placed in the student's folder. The student is expected, at this time, to schedule and present a colloquium on their research to the Program and the public.

Meetings of the doctoral candidate and the dissertation committee must occur at least annually from the time the student gains admission to doctoral candidacy. During these meetings, the advisor should assess the student's progress toward the degree, discuss objectives for the following year, and project a timetable for completing degree requirements.

Eligibility for the Dissertation Defense

To be eligible to defend the dissertation, a student must have:

- completed the residency requirement;
- at least four weeks before the date of the defense, requested the formal announcement of the defense in the University Times;
- at least two weeks before the date of the defense, distributed copies of the dissertation to the dissertation committee and make it available to the School's faculty. These copies are provided by the student at their own expense.

Preparation for the Defense

Procedural Requirements

The student should work with the advisor to ensure that the dissertation will be produced in an acceptable style and format. Document preparation materials are located here. The student must submit all forms, letters, and questionnaires related to the dissertation research to the departmental members of the dissertation committee for approval before any such documents are publicly distributed. The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are found in the University of Pittsburgh's Reference Manual for the Use of Human Subjects in Research . The school has a faculty representative on the Institutional Review Board who may be contacted with questions of procedure.

The student must prepare a final copy of the dissertation conforming to the University of Pittsburgh's Style and Form Manual for the format of the dissertation. Since the bibliographic style is best determined by the subject of the dissertation, a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

If University facilities and/or faculty time are being used in dissertation research and/or the writing of the dissertation, then students are required to register for at least three credits per term or such greater amount as the School deems appropriate or Full-Time Dissertation Study.

Registration Requirement

Students completing their research work for the dissertation will be required to register for at least one credit in the term during which they expect either to complete degree requirements or have the oral defense. Students who have completed all credit requirements for the PhD degree may register for "Full-Time Dissertation Study." If the student is a doctoral candidate and off-campus, not using University facilities and/or faculty time, the candidate need only register for 1 credit per academic year to maintain active enrollment status.

If a student does complete all the work in a given term, including the dissertation defense, and has been cleared for graduation too late to be included on the graduation list for that term, the student may apply to graduate the following term and need not enroll for any courses or any credits, subject to approval by the Dean's office. Students must submit an application for graduation for the term in which he or she has planned the dissertation defense. The application for graduation and the related deadlines and late fee structure are available on the School's Current Students webpage.

If a student is unable to complete the work during the expected term of graduation due to some extenuating circumstances related to the School and University (beyond the control of the student and attested to by the Dean's office), the student will not be required to register for additional credits in the term of graduation.

All requests for exceptions to the policy stated above should be sent to the Program Chair from the advisor for clearance and recommendation and then to the Dean for consideration and approval.

Defense of the Dissertation

Dissertation defenses must be publicly announced four weeks in advance and are open to the University community, but only the dissertation committee may vote. A student defends their dissertation successfully if the dissertation committee unanimously approves it. Although the dissertation defense is dedicated primarily to the field of the dissertation, other questions relating to information science may be considered at this time. The chair of the dissertation committee serves as the session moderator.

A student who successfully defends the dissertation with conditions to be completed must satisfy those conditions with the approval of the dissertation advisor within one year.

Publication of the Dissertation

The candidate for a PhD degree is required to pay a fee specified by the University to Student Accounts and submit various items as outlined on the School's PhD Graduation Checklist.

The abstract must not be more than 350 words (2450 typewritten characters) in length. With 70 characters per line there are at most 35 lines in the abstract. All copies of the abstract must be approved and initialed by the dissertation advisor in the upper right-hand corner of the abstract. The dissertation and abstract will be examined and approved by the student's dissertation advisor for style, format, and related matters.

Any dissertation may be published after the final defense provided that the dissertation submitted for publication is approved as to form and content by the dissertation advisor and also provided that due acknowledgment is made to the University. No form of publication, however, shall relieve the student of the responsibility for following the University's Electronic Theses and Dissertations (ETD) formatting and submission guidelines as outlined on the School's PhD Graduation Checklist.

For ETD formatting guidelines and general information, please visit the University of Pittsburgh Electronic Theses and Dissertations website. For deadlines, forms, and contact information regarding the School's required graduation and ETD paperwork, please visit the graduation procedures section of the SCI Current Students webpage.

Summary of Course Requirements and an Ideal Timeline

All students will complete:

- Required coursework (30 credits)
 - Four core courses (12 credits)
 - One introductory doctoral seminar (3 credits)
 - Two topical doctoral seminars (6 credits)
 - Two independent research studies (6 credits)
 - One advanced statistics course (3 credits)
- Dissertation work (18 credits)
- A minimum of 18 credits of dissertation study

Typical Timeline for Coursework/Exams:

Year	Term	Exams/Defenses	Student Registers in Credits via Enrollment System			
First	Fall		INFSCI 3005	Core Course	Core Course	
	Spring		Core Course	Doctoral Seminar	Core Course	Research Study

	Summer		Independent Study, research and/or teaching
	Fall		Doctoral Seminar Advanced Statistics Research Study
Second	Spring	Preliminary Examination	Dissertation Work - 9 credits
	Summer		Independent Study, research and/or teaching
Third	Fall	Comprehensive Exam	Dissertation Work - 9 credits
Fourth	Fall	Dissertation Proposal Defense	Dissertation Work - FTDJ
Fifth	Fall	Dissertation Defense	Dissertation Work - FTDJ

Note: International students must maintain full-time status in Fall and Spring terms. ALL students must be enrolled in a minimum of 1 credit during their graduation term.

Additional Requirements

Grade Policy

Doctoral degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.3 GPA. Courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program.

Residency Requirements

Full-time residency, in addition to requiring full-time study, affords the student the opportunity for daily professional interaction with faculty and other PhD students. This interaction is a major component in the student's preparation for research. Despite the benefits that full-time residency affords, it is recognized that students may have off-campus responsibilities as well.

The PhD degree, therefore, can be completed by a combination of full-time and part-time study. Two terms of full-time study are required. Full-time study is defined as nine or more graduate credits per term. All students, whether on campus or away, must maintain active status by registering according to the requirements stated below.

Note: No matter your status, you must meet with their advisor at least once per year. Annually, students will submit an annual progress report to the PhD Program Chair, Program administrator and the advisor. The report is due on the second Friday of January. The INS graduate faculty will meet to discuss annual reviews in the last week of January.

Registration Requirements

Students must register each term for the number of credits of course work, independent study, or research equivalent to the anticipated use of faculty time and University facilities. A student who has not registered for at least one credit during a 12-month period will be transferred automatically to inactive status and must file an application for readmission to graduate study (and pay the application fee) before being permitted to register again. Upon readmission, the student is required to adjust the program of studies to meet the current PhD degree program, School, and University requirements.

In keeping with University policy, all graduate students must be enrolled for a minimum of one credit in the term in which they graduate.

Doctoral students who have completed all credit requirements for the PhD degree, including minimum dissertation credit requirements, and are working full time on their dissertations, are encouraged to register for "Full-time Dissertation Study," with a fixed-fee registration per term plus fees. Enrollment in this course fulfills the University requirements for registration in the term of graduation.

Transfer of Credits

Upon petition to the faculty and with the consent of the student's advisor, a student may be granted up to 6 credits of advanced standing. This credit for graduate course work completed at another institution may be granted if the credit has not been applied to a previous degree, has been earned within the 6-year statute of limitations, and is relevant to the student's doctoral studies in the School of Computing and Information. Advanced standing is granted at the time of admission or during the first term of course work if approved. Petitions for transfer of credits must be received at the time of application or during the first term of attendance. Transcripts verifying the graduate courses must accompany the petition along with sufficient documentation to permit the faculty to evaluate their relevance to the doctoral program.

Transfer credits must be earned at an accredited institution granting degrees at the doctoral level. No credit will be granted toward doctoral degrees for work completed in extension courses or in off-campus centers of another institution unless those credits are approved for graduate degrees at that institution. Transfer credits will not be accepted for courses in which grades lower than a "B," or its equivalent, has been received. For details, see the University's policy on transfer of credits .

Please note these transfer credits will not be applied to core courses, independent study, or doctoral seminars.

Probation and Termination

All students pursuing the doctoral degree are required to maintain a cumulative GPA of at least 3.3 after admission to graduate study and for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.3. The graduate faculty may choose to terminate students on probation for two consecutive terms. A cumulative GPA of 3.3 or better is required for admission to doctoral study and for the award of the doctoral degree. In addition, students must show adequate progress through an annual review to be held in the last week of January.

Statute of Limitations

All requirements for the PhD degree must be completed in not more than six calendar years from the time of first registration. Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program.

Note: All students who are candidates for doctoral degrees are governed by the regulations of the University Council on Graduate Study, which establishes minimum standards for graduate work throughout the University as well as by those regulations established by the School of Computing and Information faculty. See the University's Academic Regulations for details.

Master's

Information Science, MS

The Master of Science in Information Science Program explores the junction of information, networks, and human behavior. We provide students with the skills and knowledge to model and design systems that are accountable, resilient, trustworthy, sustainable, and ethical. Our graduates design, build, manage, and protect the systems and networks that make information useful and accessible. They enjoy the limitless potential for exciting careers in virtually every industry -- health care, finance, law, manufacturing, government, higher education, and more. The Master of Science in Information Science (MSIS) degree program prepares students for careers as information professionals, including systems analysts and designers, database developers and managers, information security experts, and more.

Admissions Requirements

Applicants for graduate study must have earned a baccalaureate degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better.

Prerequisites for admission to the Master of Science in Information Science (MSIS) degree program include one (three-credit or higher) college course in each of the following (the corresponding Pitt course numbers are indicated):

- Programming: A course on object-oriented programming using Java, Python, C#, or C++. (CMPINF 0401)

- Probability and Statistics: A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability, and sampling, Bayesian analysis, significance tests, and hypothesis testing. (STAT 0200 or STAT 1000)
- Mathematics: A college-level mathematics course in linear algebra, calculus, or discrete mathematics (MATH 0120, MATH 0220, or MATH 0400)

Areas of Concentration

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: General, Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Security Assured Information Systems, and Telecommunications and Distributed Systems.

Requirements for the various areas of concentration are linked below:

- Big Data Analytics
- Database and Web Systems
- Geoinformatics
- Human Centered Computing
- Information Systems
- Telecommunications and Distributed Systems

Note that students are NOT required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent plan of study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

MSIS Degree Requirements

If no Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five courses.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Elective Courses

Students will take seven courses from the department's standard graduate course offerings.

As a part of the elective courses, students may also pursue up to 6 credits of other opportunities (e.g., independent study and practicum experiences) and some that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Big Data Analytics

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent plan of study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Big Data Analytics Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five classes. Students must submit a petition to the faculty to waive any required core course.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Big Data Analytics Required Courses

Students in the Big Data Analytics specialization must take the following three required courses:

- INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 2160 - DATA MINING
- INFSCI 2595 - MACHINE LEARNING

Big Data Analytics Electives

Students in the Big Data Analytics specialization must take two electives from the following list:

- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
- INFSCI 2410 - INTRODUCTION TO NEURAL NETWORKS
- INFSCI 2440 - ARTIFICIAL INTELLIGENCE
- INFSCI 2750 - CLOUD COMPUTING
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 2809 - SPATIAL DATA ANALYTICS

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Database and Web Systems

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent plan of study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Database and Web Systems Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Classes

All MSIS students are required to take the following five classes.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Database and Web Systems Required Courses

Students in the Database and Web systems specialization must take the following three required courses:

- INFSCI 2560 - NETWORK AND WEB DATA TECHNOLOGIES
- INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)

Database and Web Systems Electives

Students in the Database and Web Systems specialization must take two Electives from the following list:

- INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 2750 - CLOUD COMPUTING

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999).

These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Geoinformatics

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent plan of study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Geoinformatics Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five classes.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Geoinformatics Required Courses

Students in the Geoinformatics specialization must take the following three required courses:

- INFSCI 2160 - DATA MINING
- INFSCI 2801 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 2809 - SPATIAL DATA ANALYTICS

Geoinformatics Electives

Students in the Geoinformatics specialization must take 2 electives from the following list:

- INFSCI 2140 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 2415 - INFORMATION VISUALIZATION
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2711 - ADVANCED TOPICS IN DATABASE MANAGEMENT
- INFSCI 2750 - CLOUD COMPUTING
- TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Human Centered Computing

The MSIS Degree Program offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent Plan of Study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Human Centered Computing Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five classes.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Human Centered Computing Required Courses

Students in the Human Centered Computing specialization must take the following three required courses:

- INFSCI 2415 - INFORMATION VISUALIZATION
- INFSCI 2430 - SOCIAL COMPUTING
- INFSCI 2470 - INTERACTIVE SYSTEM DESIGN

Human Centered Computing Electives

Students in the Human Centered Computing specialization must take two electives from the following list.*

- INFSCI 1430 - USER EXPERIENCE ENGINEERING *
- INFSCI 1450 - GAME DESIGN *
- INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES *
- INFSCI 2440 - ARTIFICIAL INTELLIGENCE
- INFSCI 2460 - SPATIAL REASONING FOR GIS

Counts toward the maximum of 6 credits in upper-level undergraduate classes.

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999).**

**These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Security Assured Information Systems

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent Plan of Study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Security Assured Information Systems Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five classes.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Information Security Required Courses

Students in the Information Security specialization must take the following three required courses:

- INFSCI 2160 - DATA MINING
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- TELCOM 2821 - NETWORK SECURITY

Information Security Electives

Students in the Information Security specialization must take 2 electives from the following list:

- INFSCI 2170 - CRYPTOGRAPHY
- INFSCI 2430 - SOCIAL COMPUTING
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2620 - DEVELOPING SECURE SYSTEMS
- INFSCI 2750 - CLOUD COMPUTING

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Information Science, MS - Telecommunications and Distributed Systems

The MSIS Degree Programs offers a number of Areas of Concentration, which are closely tied to career paths and academic areas of interest: Big Data Analytics, Database and Web Systems, Geoinformatics, Human Centered Computing, Information Security, and Telecommunications and Distributed Systems.

Note that students are not required to select an Area of Concentration; however, if an Area of Concentration is chosen, students will follow a more stringent plan of study specific to the chosen Area of Concentration. As well, some Areas of Concentration have additional pre-requisites; therefore, students may need to complete courses above and beyond the standard 36 credit requirement.

Areas of Concentration may be selected, or changed, until the end of the term in which 18 credits will be completed.

If the Telecommunications and Distributed Systems Area of Concentration is selected, students will follow the curriculum outlined in the following sections.

Required Core Courses

All MSIS students are required to take the following five classes.

- INFSCI 2150 - INFORMATION SECURITY AND PRIVACY
- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS

Telecommunications and Distributed Systems Required Courses

Students in the Telecommunications and Distributed Systems specializaiton must take the following three required courses:

- TELCOM 2120 - NETWORK PERFORMANCE
- TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS
- TELCOM 2821 - NETWORK SECURITY

Telecommunications and Distributed Systems Elective

Students in the Telecommunications and Distributed Systems specialization must take two electives from the following list:

- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
- INFSCI 2160 - DATA MINING
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2621 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- INFSCI 2750 - CLOUD COMPUTING
- INFSCI 2170 - CRYPTOGRAPHY
- TELCOM 2321 - WIDE AREA NETWORKS
- TELCOM 2010 - COMPUTER NETWORKING LABORATORY

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Telecommunications, MST

Telecommunications now relies upon data analytics, machine learning, and information processing and how networks can serve humans - for example by enabling surgeons to perform remote surgery with low latency 5G networks. The Master of Science in Telecommunications (MST) program explores how information flows through networks to support human needs. Networks, traditionally the focus of phone service and then the internet, are now present in most aspects of our lives, from smart homes to cyber-physical systems. On a daily basis, communication and computer networks are utilized to support business operations, educational pursuits, health care, transportation networks, and social networks (both physical and virtual) for human well-being. The MST program is designed to produce telecommunications professionals who will design, build, secure, and manage networks and infrastructure that accommodate innovative usages of the networks by people, organizations, and businesses.

Graduates will gain a strong foundation in the design of network protocols, wireless networks, network security, and performance enhancement for communication networks. Coursework in data mining, machine learning, and algorithms prepares students for careers that call for maximizing network utilization, supporting information flow in the cloud, and tailoring networks to user needs and expectations. Graduates will have the skills and knowledge sought after by telecommunications equipment manufacturers, wireless providers, enterprise network users such as financial or pharmaceutical companies, and data center owners. Graduates also have chances to examine general network science and analysis to gain knowledge on emerging communication services from stand-alone streaming media to information flow on social networks.

Admissions Requirements

Applicants for graduate study must have earned a baccalaureate degree from an accredited college or university with a scholastic average of B (3.0 on a 4.0 scale) or better.

Prerequisites for admission to the MST degree program include one college course (3 credits or more) in each of the following (the corresponding Pitt course numbers are indicated):

- Programming: A course on object-oriented programming using Java, C#, or C++. (CMPINF 0401)
- Probability and Statistics: A course covering data collection, descriptive and inferential statistics is optimal. It should cover measures of central tendency and variability, regression, correlation, non-parametric analysis, probability, and sampling, Bayesian analysis, significance tests, and hypothesis testing. (STAT 0200 or STAT 1000)
- Mathematics: A college-level mathematics course, in linear algebra, calculus, or discrete mathematics (MATH 0120, MATH 0220, or MATH 0400)

Required Core Courses

All MST students are required to take the following five classes. Students must submit a petition to the faculty to waive any of the required core courses.

- INFSCI 2300 - HUMAN INFORMATION PROCESSING
- INFSCI 2591 - ALGORITHM DESIGN
- INFSCI 2710 - DATABASE MANAGEMENT
- TELCOM 2310 - APPLICATIONS OF NETWORKS
- TELCOM 2810 - INFORMATION SECURITY AND PRIVACY

MST Required Courses

Students in the MST degree program must take the following three required courses:

- TELCOM 2120 - NETWORK PERFORMANCE
- TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS
- TELCOM 2821 - NETWORK SECURITY

MST Required Seminar Course

Students in the MST degree program must take the following required course:

- TELCOM 2011 - TELECOMMUNICATIONS SEMINAR

MST Electives

Students in the MST degree program must take two electives from the following list:

- INFSCI 2160 - DATA MINING
- INFSCI 2595 - MACHINE LEARNING
- INFSCI 2750 - CLOUD COMPUTING
- TELCOM 2010 - COMPUTER NETWORKING LABORATORY
- TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS
- TELCOM 2321 - WIDE AREA NETWORKS
- TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- TELCOM 2820 - CRYPTOGRAPHY

Additional Approved Electives

Students may select two courses from the department's standard graduate course offerings, including independent study and practicum experiences.

Students may also pursue opportunities that fall outside of the department's standard graduate course offerings such as the Pittsburgh Council on Higher Education cross-registration, doctoral seminars, courses offered in other Pitt graduate departments, or undergraduate upper-level coursework in information science or computer science (1100-1999). These opportunities may not exceed six credits and require advisor approval prior to enrollment.

Department of Information Culture and Data Stewardship

For more than 120 years, the University of Pittsburgh has been educating professionals to lead in the information age: librarians, information and knowledge managers, archivists, and digital-content managers. As the nature and form of data and information evolve and become more complex with each passing year, the education of its managers becomes increasingly vital. The MLIS curriculum is centered around "the Goals for MLIS Graduates," which are long-term transferable goals that describe what students should know and be able to do upon graduation. The foundational core of the curriculum consists of five courses focused on the lifecycles of data and information, design methods, data and information in systems, and the information professional in the community. All students, regardless of career pathway, are required to register for these five classes. In addition, each student chooses seven elective courses that will prepare them for a career pathway of their choosing.

The Information Culture and Data Stewardship (ICDS) Department offers two graduate degree programs and several areas of focus designed to prepare students for careers in this critical profession. The Master of Library and Information Science (MLIS) degree, recognized internationally, is accredited by the American Library Association (ALA).

The Doctor of Philosophy in Library and Information Science program prepares students for advanced work in research, teaching, and administration. The program provides students opportunities to gain the skills in teaching and research appropriate for careers at major research universities, teaching institutions, and knowledge organizations.

ICDS faculty, students, and alumni drive the Department's reputation in a top-tier research University. Students engage in challenging course work, experiential learning, and opportunities to interact with alumni and professional associations to build the skill set they need to succeed as a leader in the information professions.

Academic Integrity

All students in the School of Computing and Information are expected to follow the Academic Integrity Policy of the School.

Grievance Procedures

Students who believe that a decision about their academic program has been made based on incomplete or incorrect information may appeal the decision. To do this, students should prepare a letter that outlines their position and provide evidence to support their claim that the decision was inappropriate. Students should send their letters to the ICDS Chair, after securing the endorsement of their advisors. The ICDS Chair may either reject or approve the appeal for grievances pertaining to department-level policies. In some instances, the ICDS Chair will forward it to the Dean of the School for consideration. Students should make their appeals within thirty days of the date of notification of any decision.

Glossary

- **ICDS** - Department of Information Culture and Data Stewardship
- **School** - School of Computing and Information
- **GPA** - Grade Point Average

Doctoral

Library and Information Science, PhD

Purpose of the Program

The Doctor of Philosophy in Library and Information Science program, in the Department of Information Culture and Data Stewardship (ICDS), prepares students for careers in research, education, and professional practice. The primary purpose of the PhD program is to develop an understanding of library and information science beyond the master's degree, with particular emphasis on the conduct of original research, the production of significant research findings, and the contribution of such findings to public knowledge.

Admissions Requirements

The following are requirements for admission to the PhD/LIS Program:

- A master's degree from a program accredited by the American Library Association, a recognized international program, or the equivalent in a closely related field of study. Students must submit official transcripts as evidence.
- Attainment in previous graduate work of a minimum quality point average of 3.50 (on a scale with A having a value of 4 points per credit). An international student's quality point average will be calculated on the basis of equivalency from universities that use a different scale.
- Submission of scores from a predictor test, such as the Graduate Record Examination (or other test as listed below) taken within the last three years.
- At least three (3) references from persons in the academic and professional communities. The LIS Committee on Doctoral Studies may, on occasion, require additional references.
- An interview (in person, by telephone or using web conferencing tools) may be required as part of the admissions process for selected candidates, after an initial screening of their application materials.
- Submission of an application fee.

The Department of Information Culture and Data Stewardship seeks students with diverse educational and career backgrounds. By nature, LIS degrees are multi-disciplinary, and we welcome applicants with bachelor's degree and/or advanced degrees from diverse disciplinary backgrounds. Our multi-disciplinary nature is reflected in the wide range of standardized tests that are accepted by our admissions committee, which include the GRE, MAT, MCAT, GMAT, and LSAT

Supporting Documents for Admission

As evidence of the ability to undertake doctoral work, the student's application must be accompanied by:

- An essay (not exceeding 1,000 words) indicating, as specifically as possible, the student's detailed academic and professional goals in relation to the Library and Information Science doctoral program and discussing in detail potential areas and/or topics in which the student expects to pursue dissertation research. Students SHOULD identify one or more ICDS faculty members with whom they want to work.
- A complete curriculum vitae that provides an overview of education, publications, work, and other activities.
- At least one example of scholarly research or professional writing in any format (print or electronic), which should be authored solely by the applicant. The applicant should explain the status of any published or unpublished research, thesis, contributions to the professional or scholarly literature, and other professional or academic experience relevant to an assessment of his or her capacity to pursue research successfully. If the only suitable writing sample available for submission is a co-authored publication, the applicant must explain the nature and extent of his or her contribution to the work (e.g., percentage of the finished work written by the applicant), and should attach additional evidence as verification (for example, a statement by the primary author or co-author of the work, confirming the parts of the work contributed by the applicant).
- If the candidate has had appropriate professional work experience in libraries, information centers, publishing, the information industry, education, or similarly related areas of professional activity, a brief description should be provided.

Credentials of prospective students are reviewed by the ICDS Committee on Doctoral Studies.

However, students who are applying for financial aid should be aware that they must be admitted and meet financial aid deadlines to ensure consideration for funding.

Beyond the criteria and materials previously outlined for application submission, these programs do not require specific coursework for admissions consideration.

Application Deadline

All admissions materials must be submitted by January 15th of each year for beginning studies in the forthcoming fall term and for consideration for financial aid.

Commencement of Study

PhD students may begin their studies only in the Fall Term in order to ensure a coherent program of study.

Matriculation

On-Campus English Proficiency Test:

Upon arrival, students who have not met the minimum TOEFL or IELTS scores will be given the on-campus administered English Language Proficiency Test. If remedial courses in English as a foreign language are recommended, the student must complete the remedial course during the first two terms of study. This may extend the length of the program of study.

Academic Advising and Plan of Studies

An advisor will be assigned to the student upon entering the program; however the student is free to select a different advisor for subsequent advising and registration. The PhD student should seek a faculty Program Advisor who is knowledgeable in the student's major area of study. The advisor must be a member of the graduate faculty in the Information Culture and Data Stewardship Department who is able to spend the time and effort necessary for the advising role, will be available for examinations, and with whom a productive and comfortable working relationship can be established.

Program Advisor

The advisor selected by the student for the period prior to the dissertation stage of the program is the Program Advisor. The Program Advisor and the Dissertation Advisor may be the same person, but the student has the option to select a different advisor for the dissertation. Upon agreement of the faculty member to act as the student's advisor, the signed agreement is placed in the student's folder. Any subsequent change of Program Advisor should be submitted in writing to the Chair of the ICDS Committee on Doctoral Studies and placed on record in the student's folder.

Doctoral students are ultimately responsible for their own direction and progress through the program and are encouraged to seek advice from any member of the SCI faculty or other University faculty in this endeavor. The Program Advisor, however, is the one primarily responsible for providing guidance, insight, advice, information, explanation of University and School policies, and general assistance in the pursuit of the PhD degree. The Program Advisor will also approve those actions requiring a faculty signature.

The Program Advisor assists the student in:

1. developing a plan for the program of study and
2. arranging for the preliminary and comprehensive examinations.

Degree Requirements

This PhD degree requires a minimum of 54 credits beyond the master's degree with a total credit minimum of 72. A minimum of 36 credits must be taken in advanced course work. The student must receive a letter grade in each course taken in this 36-credit requirement, except for the teaching practicum course.

An additional 18 credits are required which must be applied to dissertation research and writing; however, regardless of the number of credits taken, no more than 18 credits for dissertation research and writing may be applied toward graduation. The grade for these credits will appear as an "S" on the student's transcript. In order to register for, and successfully complete, dissertation credits, students must show evidence of work toward the dissertation by completing the "Dissertation Credit Tracking Checklist" and updating it at the end of the term.

The minimum of 36 credits of course work, all of which must be on the graduate level, must be distributed as follows:

- 3 credits: LIS 3000 INTRODUCTION TO DOCTORAL STUDIES
- 9 credits: 3000-level doctoral seminars offered by SCI
- 3 credits: LIS 3950 TEACHING PRACTICUM or FACDEV 2200 PRACTICUM ON UNIVERSITY TEACHING
- 6 credits: Courses in research methodology and statistics
- 6 credits: Courses in cognate field
- 9 credits: Courses may be:
 - 3000-level independent studies or doctoral seminars offered by SCI (maximum of 6 credits)
 - Additional 3000-level doctoral seminars offered by SCI
 - Additional cognate courses (up to 6 credits)
 - Additional research methodology courses
 - 2000 level courses in SCI (subject to approval by the students' advisor)

Additional Requirements

GPA Requirement

PhD degrees are conferred only on those students who have completed all courses required for the degree with at least a 3.50 GPA.

Cognate Requirement

Doctoral students are required to devote some portion of their studies to work on other disciplines in order to broaden their perspectives and deepen their understanding of library and information science. To fulfill the cognate requirement, students are required to take a minimum of 6 credits and a maximum of 12 credits in some area of graduate study outside the field of library and information science. These credits may be from more than one department or school.

Students may enroll for all or part of their cognate course work at institutions other than the University of Pittsburgh, but only when prior approval has been obtained from the ICDS Committee on Doctoral Studies. Courses in the School of Computing and Information generally cannot be used to fulfill the cognate requirement. Cross listed courses may be counted as cognates if they originate outside the School. SCI courses may occasionally be approved as cognate courses if the subject matter is highly specialized and clearly distinct from the student's disciplinary focus; students must

petition the ICDS Committee on Doctoral Studies for approval in advance of registering for the course. Cognate areas and courses shall be selected with consultation and approval by the student's advisor.

If a student has significant course work at the graduate level or an advanced degree in another discipline and desires that it be considered as the cognate field, the student has the right to petition the ICDS Committee on Doctoral Studies for exemption from the cognate requirement. A minimum of 36 course credits and 18 credits of dissertation writing and research will still be required for the PhD students who opt to petition for exemption from the cognate requirement. Such a petition should be submitted as early as possible, preferably in the first term, in order to plan a coherent program of study.

Research Methodology Requirement

Research methodology courses may include courses in statistical analysis, general research methodology, and specific research methods or research methods used in specific fields of study, for instance, historiography, ethnography, or case and field study. Doctoral students should work with their advisors to identify the appropriate research methodology courses. Research methodology courses may be taken within SCI or in another School.

Research methodology courses taken from schools outside SCI cannot be used to fulfill the cognate requirement. The research methodology course requirement must be fulfilled prior to taking the Preliminary Examination.

Teaching Practicum

A three-credit teaching practicum is required for all doctoral students in order to provide the student with teaching experience that may become part of the student's professional dossier. The teaching practicum is usually taken after completion of two terms of study. The student is responsible for identifying an appropriate course related to his or her area of interest and obtaining the agreement of the instructor of record. Appropriate activities as part of the teaching practicum include involvement in course design, attendance at all class sessions, presentation of some course materials, office or tutorial hours, and involvement in grading. The student's teaching responsibility should involve preparation and presentation of specific topics throughout the term, and sole responsibility for at least one class session. The teaching practicum is graded on a pass/fail basis.

Doctoral students may also fulfill this requirement by completing the University Teaching Practicum course offered through the Faculty of Arts and Science. The course, FACDEV 2200, is graduate seminar designed for Teaching Assistants and Teaching Fellows who will be teaching a class independently for the first time.

Public Presentation Requirement

During the course of the PhD program, each student is required to make a formal presentation to faculty and students in the School or in another academic setting. The topic of this presentation may be a research project the student is engaged in or preliminary results of the dissertation project. This presentation may be a guest lecture in a course, a public colloquium, presentation sponsored by the Doctoral Guild or a presentation at an academic conference.

Documentation of presentation should be provided for inclusion in the student's file. Attendance at colloquia is required of students in their term of residence, and is recommended throughout the PhD program.

Probation and Termination

All students pursuing the LIS doctoral degree are required to maintain a cumulative GPA of at least 3.5 after admission to graduate study for all course work applicable to the degree. Students are automatically placed on academic probation when their cumulative GPA falls below 3.5. The graduate faculty may choose to terminate students on probation for two consecutive terms. A cumulative GPA of 3.5 or better is required for admission to LIS doctoral study and for the award of the LIS doctoral degree. In addition, students must show adequate progress in the subsequent benchmark examinations and defenses.

Each student will submit LIS Doctoral Student Annual Progress Report in the spring term for review by the ICDS Committee on Doctoral Studies.

Residence and Registration Guidelines

The University's Regulations Pertaining to Doctoral Degrees contains myriad policies related to registration and residence. Students must review these regulations as well as those governed at the School level. In addition, PhD students should adhere to the following guidelines.

A student may not register for dissertation credits until the successful completion of the preliminary exam.

Full time dissertation study is achieved once all required courses (36 credits minimum) and all dissertation credits (18 credits of LIS 3999 minimum) are completed. Once the preliminary exam is successfully completed (after a minimum of 24 credits of coursework) students may begin taking a combination of dissertation credits and required credits until both requirements have been completed. Students may, with the approval of their dissertation advisor, register for up to 9 dissertation credits per semester until the 18 credits are achieved, but a combination of dissertation credits and required coursework can also be taken in each semester, so long as at least 9 credits of one or the other or both are taken in each fall and spring semester. If additional coursework (beyond the required 36 credits) is desired by the student or recommended by the advisor (for example, classes in statistical methods, programming, additional cognate courses, etc.), a mix of dissertation credits and such additional coursework may be taken as well (for example, 6 credits of dissertation and one 3-credit additional course, or 3 credits of dissertation and 6 credits of additional coursework).

Doctoral students who have completed all credit requirements for the PhD degree, including the 36 required credits and the 18 dissertation credits (54 credits total), have had their Dissertation Proposal approved, and are working full time on their dissertations, should register for "Full-time Dissertation Study." Enrollment in this course fulfills the University requirements for registration in the term of graduation.

International students studying on an F-1 visa must maintain full-time registration status on an exact and regular basis that is stricter than the residency rules required by the school as stated above. Due to federal immigration regulations, if the term preceding a student entering full-time dissertation status occurs during the fall or spring terms, the student must enroll full-time (9 or more credits). A "reduced course load" request cannot be approved by the Office of International Services (OIS) unless the request is made for the student's term of graduation. Even if a student needs to complete only 6 credits before entering full-time dissertation status, federal regulations trump the school's program requirements, and they must enroll full-time in all fall and spring terms excepting their term of graduation.

Preliminary Examination

The Preliminary Examination, according to Regulations Governing Graduate Study at the University of Pittsburgh, is held:

...to assess the breadth of the student's knowledge of the discipline, the student's achievement during the first year of graduate study, and the potential to apply research methods independently... The evaluation is used to identify those students who may be expected to complete a doctoral program successfully and also to reveal areas of weakness in the student's preparation. (Pittsburgh, 2008)

Eligibility & Scheduling Expectations

All students should work with their faculty advisor to prepare for the Preliminary Exam. Following the Regulations Pertaining to Doctoral Degrees, students will take the Preliminary Exam in the term following the first year of academic study as scheduled by the doctoral studies committee chair. For example, students starting in the fall term would take the preliminary exam in the fall term of the following year. Students are expected to work with faculty mentors to determine the appropriate term to take the preliminary exam.

Failure to adhere to the required timeline will result in academic probation for the following academic term. The Preliminary Exam must be taken as a condition for exiting academic probation. Failure to exit academic probation will result in dismissal from the program. Considerations for extenuating circumstances may be granted, but *must* be documented and approved by the Doctoral Studies Committee (DSC). It should be noted students on academic probation are not eligible for teaching assistantships or fellowships.

Preliminary Examination Procedure

The DSC Chair, in coordination with relevant faculty advisors, will pick a date for the preliminary exam. The date selected will be announced at least eight weeks before the beginning of each term in which there are doctoral students expected to take the exam. Students should anticipate an examination date at the beginning of the term. Students will be expected to submit their portfolio presentation two weeks before the scheduled exam date to the ICDS Department Administrator. Preliminary exams will only occur once a term, and only in the Fall and Spring terms.

All faculty on the DSC are expected to participate in the examination by reviewing student materials and attending the presentations. The DSC Chair will begin the preliminary exam presentation session with a vote to attest an appropriate quorum of DSC membership is present. A quorum can be no less than two-thirds the DSC faculty.

Preliminary Examination Portfolio

The preliminary examination consists of several items: a course plan, a research prospectus, an example of a scholarly work, and an oral presentation to the DSC.

Course Plan

The course plan should contain the following information:

- A list of courses completed (with term)
- A projected list of remaining courses (with anticipated term)
- A brief (250 words max) self-assessment of how course selection has or will impact scholarship growth

Research Prospectus

The research prospectus describes the student's continued research trajectory. The prospectus is a concise, direct narrative. It has four required sections, outlined below:

- Concentration (500 word max) - This section should describe the research question(s), phenomena of interest, and/or problem being addressed. It should clearly and concisely describe the research area and community where the proposed work will make intellectual and scholarly contributions.
- Justification (500 word max) - The justification for the work should be oriented towards the broader societal impact of the research. It should describe why the individual, community, or societal problem or phenomena that are being addressed have intellectual and scholarly value to society. The justification should directly explain the "so what" perspective on the proposed research.
- Motivation (500 word max) - The motivation section should personalize the research trajectory. It should explain why the research is of interest to the student. It should explain the background or context the student is bringing to the research. This section should add some personal narrative about what is driving the interest to pursue this research. This section should also connect to the course plan to describe what the student has learned or plan to learn, and how it has stimulated research interests.
- Approach (1000 word max) - The final section should describe the approach to the proposed research. This might include a discussion of the methodologies, theoretical frameworks, or tentative research design. This section should provide evidence of thought about the mechanics of the proposed research. The approach could connect to the course plan by referencing proposed coursework in a particular methodological or theoretical area.

Example of Scholarly Work

A student is expected to be productive in scholarship from the start of their doctoral training. To demonstrate achievement towards this goal, students will be expected to submit an item of scholarship as part of the Preliminary Exam portfolio. The scholarship should be in a format suitable for external presentation and/or dissemination. Acceptable examples include, but are not limited to, a published or submitted conference paper, journal article, or curated exhibition. A faculty advisor may direct the student to submit a scholarship example in an alternative form or format. The faculty advisor will communicate directly to the DSC a justification for this deviation. Submitted scholarship cannot be unmodified assignments from coursework, unless that assignment takes the form of scholarship that the faculty advisor recognizes as potentially publishable. Scholarship that is attributed to multiple authors is acceptable; the student must explain the nature and extent of the contributions of each co-author.

Presentation to the Doctoral Studies Committee

The oral presentation to the DSC should provide an overview of the structure and salient elements of the Research Prospectus. The presentation is expected to be 10-15 minutes in length. The presentation should include appropriate visual materials for effective communication. A 15-20 minute question & answer session with present DSC members will follow the presentation. The total presentation session should last no more than 30 minutes. The entire session will be private, only open to the doctoral student and the DSC faculty.

Preliminary Examination Outcomes

The DSC will use an established rubric to assess the student's performance across all Exam elements (contact the department administrator for a copy of the rubric). Individual DSC members will independently use this rubric, which will inform the discussion and vote. A majority vote of the

participating faculty will be used to determine the final outcome. In the rare case of a tie, the final determination will be made by the DSC Chair, ICDS Department Chair, and the student's primary advisor.

A summary of the assessment and outcome will be completed within two weeks of the exam by the DSC Chair. The student should expect a clear description of the assessed strengths and weaknesses. This summary will be sent to the student, advisor, and student's permanent file maintained by Academic Records.

Upon successful completion of the preliminary examination, the student will be allowed to continue within the doctoral program.

If the overall performance on the preliminary examination is determined to be unacceptable by a majority of DSC members present for the Exam the student will fail. The summary assessment will clearly articulate a plan from the DSC for the student to prepare for re-examination. This may include specific types of courses, work products, or other elements necessary for the student to attain target criteria for passing the preliminary examination. Failure on the first attempt requires the Exam to be taken again the next term the Exam is offered. Failure to pass the Exam on the second attempt will result in dismissal from the doctoral program.

Comprehensive Examination

Eligibility

To be admitted to the comprehensive examination a student must:

- Have completed 36 credits of study;
- Be registered in the term in which the comprehensive examination is taken;
- Apply in writing using the "Application to Sit for the Comprehensive Exam" form and with the advice and consent of a faculty advisor to the ICDS Department support staff at least six weeks before the scheduled exam time.

Full-time students should take the comprehensive exam in the fall or spring term of the second year. All students must successfully complete the Comprehensive Exam within 18 months of passing the preliminary examination (24 months for part-time students).

Comprehensive Examination Procedure

In the Information Culture and Data Stewardship Department, the Comprehensive Examination will have written and oral components, and will normally be offered in the fall and spring terms. Students will notify their advisor and the Chair of the ICDS Committee on Doctoral Studies of their interest in taking the Comprehensive Examination at least six weeks prior to the examination date, using the form provided. The dates for each student will be determined in consultation with the student and the student's comprehensive examination committee.

Students will be examined in two areas:

- A broad perspective in current issues in library and information science, or archival studies, and
- The student's designated research focus.

In the PhD Library and Information Science program, the following procedures apply:

- The examination will be conducted by a 3-person committee: the student's advisor and two faculty members chosen by the student and the faculty advisor. Faculty members chosen to serve on the committee must give their consent.
- The examination will consist of two parts: a written, take-home exam over two weeks (three weekends) and an oral examination conducted by the student's committee.
- The written examination will consist of four questions, two in each of the areas of the examination. The student will choose one of the two questions in each area. Though the student is required to answer only two questions, there is the expectation that the response will be comprehensive and include a high level of analysis of the material. In terms of length, 12-15 pages would constitute a minimal answer for each question though longer papers are expected. The student will be given two weeks (including three weekends) to complete the written examination.
- The second part of the examination will be an oral examination expanding on any points from the written work that the committee wishes to address or any questions arising from the broad, general area of interest. The oral examination (approximately two hours) will take place as soon as possible after the written component has been evaluated.

Comprehensive Examination Outcomes

The result of the comprehensive examination will be a pass or fail. If a student fails, he/she may retake the exam one more time. Students use the Comprehensive Examination Results Form to document this benchmark. Failure to pass the Comprehensive Examination on the second attempt will result in dismissal from the doctoral program.

Failure to pass the Comprehensive Examination within the required time frame of within 18 months of passing the preliminary examination (or 24 months for part-time students), will result in dismissal from the doctoral program.

Dissertation

Dissertation Advisor

Students must gain the agreement of a member of the ICDS graduate faculty to chair the Dissertation Committee that will advise on the area of research and the design of the study. The advisor's agreement must be obtained and recorded in the student's file. Any request to change the Dissertation Advisor must be submitted in writing to the Chair of the ICDS Committee on Doctoral Studies after discussion with the Dissertation Advisor. Students retain the right to change advisors with impunity. It is important for students to be aware of and sensitive to various issues, including: 1) the importance of mutual consideration in the relationship between advisor and advisee; and 2) the academic benefits of continuity in the relationship with a major advisor and other members of the dissertation committee.

Approval for the change and the selection of another Dissertation Advisor is filed in the student's folder.

The student's dissertation advisor:

- Assists in choosing the members of the Dissertation Committee and in confirming the eligibility of all members selected;
- Arranges with ICDS support staff to schedule the dissertation proposal presentation;
- Reviews progress toward completion of the research;
- Arranges with LIS support staff to schedule the dissertation defense;
- Chairs the dissertation defense;
- Secures appropriate signatures from Dissertation Committee members and assures that all required paperwork is submitted in accordance with the ICDS, School of Computing and Information, and University procedures.

Dissertation Committee

The Dissertation Committee, selected by the student and major dissertation advisor, shall consist of at least four members, with the majority being from the graduate faculty of the School of Computing and Information. At least one, but not more than two, should be from another School of the University. Work in the cognate area may provide the student with the opportunity to select an appropriate outside member for the Dissertation Committee from a discipline related to the student's area of specialization. Upon the recommendation of the Dissertation Advisor, and with the approval of the LIS Committee on Doctoral Studies, a member may be appointed from outside the University. Outside members of the Dissertation Committee are not obligated to attend dissertation related events in person. If an outside person from another University or agency does attend in person, the ICDS Department is not responsible for covering any expenses involved in the attendance of the outside member at meetings. Finally, the major advisor proposes the members of the committee for approval to the ICDS Doctoral Program Chair and the Dean, using the Doctoral Committee Form to document approval of committee composition.

Meetings of the doctoral candidate and the Dissertation Committee must occur at least annually from the time the student gains admission to Doctoral Candidacy. During these meetings, the committee should assess the student's progress toward the degree, discuss objectives for the following year, and project a timetable for completing degree requirements. Any language requirement relates to proficiencies necessary for successful completion of doctoral research. Depending upon the student's program, proficiencies in modern languages, linguistics, and/or computer languages may be specified. The student's Dissertation Advisor will determine the language requirement in consultation with the Dissertation Committee at the time the proposal is accepted.

Dissertation Procedural Requirements

The student must submit all forms, letters, and questionnaires related to the dissertation research to the ICDS members of the Dissertation Committee for approval before any such documents are publicly distributed.

The student is also responsible for meeting University requirements when human subjects are used in research. These requirements are enforced by the University's Human Research Protection Office (HRPO) and the Institutional Review Board (IRB). The school has a faculty representative on the Institutional Review Board who may be contacted with questions of procedure.

Bibliographic style is best determined by the subject of the dissertation; a style manual of the student's choice may be used for the content of the dissertation and must be applied consistently throughout.

The final approved version of the dissertation must be submitted electronically to the University. For the full instructions on the formatting and submission of Electronic Thesis and Dissertation (ETD), please visit the University's ETD website and the Graduation Procedures section of the SCI Current Student webpage.

Dissertation Proposal Defense

Prior to scheduling the dissertation proposal defense, the student must have completed all required coursework, and successfully completed the Preliminary and Comprehensive Examinations, which may not be scheduled in the same term as the dissertation proposal defense. Please complete the required form containing the scheduling information and the abstract.

The student should defend the proposal of the dissertation within 18 months of successfully completed the comprehensive exam (24 months for part-time students). All students must successfully complete the Dissertation Proposal Defense within 24 months of passing the Comprehensive Examination (36 months for part-time students). Failure to successfully complete the dissertation proposal defense within the required time period will result in dismissal from the doctoral program.

The student should work closely with the Dissertation Advisor during the preparation of the proposal for dissertation research. Only when the proposal is reviewed and approved by the Dissertation Advisor will the student initiate the proposal defense process. The proposal must be submitted to the members of the Dissertation Committee at least two weeks prior to the scheduled time of the proposal defense. The presentation portion of the proposal defense is an open event and will be announced to the faculty and students in the school. If scheduling problems for committee members occur, telephone conferencing may be used. Faculty discussion about the presentation is closed and only the members of the Dissertation Committee will participate.

The Dissertation Committee must unanimously approve the dissertation topic and research plan before the student may be admitted to candidacy for the doctoral degree. However, approval of the proposal does not imply either the acceptance of a dissertation prepared in accordance with the proposal or the restriction of the dissertation to this original proposal. Please use this Report on Examinations form to document the results of the defense.

Candidacy

For admission to formal candidacy for the PhD in LIS degree, a student must have fulfilled the following requirements:

- Passed the Preliminary Examination;
- Completed a minimum of 36 credits beyond the master's degree with a GPA of 3.5 or higher;
- Passed the Comprehensive Examination;
- Successfully defended the dissertation proposal and received permission from the Dissertation Committee to begin research.

When these steps have been taken, the chairperson of the student's Dissertation Committee will notify the Chair of the ICDS Committee on Doctoral Studies, the Chair of the Information Culture and Data Stewardship Department, and the Dean of SCI that the student has achieved formal candidacy.

Dissertation

In accordance with the University Regulations Pertaining to the Doctor of Philosophy, each student must write a dissertation that presents the results of a research project carried out by the student. An appropriate research project involves a substantive piece of original and independent research, grounded in an appropriate body of literature, and employing systematic methods and procedures to investigate a defined question or problem. It is relevant to an identifiable field as it is currently practiced and provides a significant contribution or advancement in that field. It presents either a hypothesis tested by data and analysis, or an analysis of data supporting the development of a theory or leading to new or substantially improved insights. It is the responsibility of the student's doctoral committee to evaluate the dissertation in these terms and to recommend the awarding of the doctoral degree only if the dissertation is judged to demonstrate these qualities.

Characteristics which a dissertation should demonstrate are:

- The establishment of a historical context for the presentation of an innovative and creative approach to the problem analysis and solution;
- A clear understanding of the problem area as revealed by analysis and synthesis of a broad literature base;
- A well-defined research design;
- Clarity in composition and careful documentation;
- Results of sufficient merit to be published in refereed journals or to form the basis of a book or monograph;
- Sufficient detail so that other scholars can build on it in subsequent work;
- The preparation of the author to assume a position within the profession.

Dissertation Defense

The student should work with the Dissertation Advisor to decide the right time for dissertation defense. The student must obtain the Dissertation Advisor's approval before initiating the dissertation defense process. The student is responsible for presenting one copy of the dissertation in final form to each member of the Dissertation Committee at least two weeks prior to the date of the defense. The deliverable format is to be determined by each individual committee member.

The date, time, location, and subject of the dissertation defense shall be publicized in The University Times four weeks before the defense is held. All members of the Dissertation Committee and such other persons as are interested may attend the final defense, but acceptance of the dissertation is determined by a vote of members of the Dissertation Committee. Only members of the Dissertation Committee may be present during the final deliberations and may vote on the passing of the candidate. A report of this examination, signed by all the members of the Dissertation Committee, must be sent to the ICDS Department Chair and to the Dean. If the decision of the committee is not unanimous, the case is referred to the Dean for resolution. The Chair of the Dissertation Committee should ensure that the dissertation is in final form before requesting signatures of the members of the committee.

A student who defends the dissertation, but with conditions to be met before the degree can be awarded, must meet those conditions within the required time frame:

- Minor corrections (largely presentation, e.g., typographical errors) - to be completed within one calendar month, subject to approval by the Dissertation Advisor;
- Substantial amendments (involving more significant revisions and/or additions, e.g., rewriting sections of chapters) - to be completed within three calendar months, subject to approval by members of the Dissertation Committee.

In both of the above cases, the student's statute of limitations will automatically be extended if necessary for the period specified, without the need for a petition.

A student who does not successfully defend the dissertation, may revise and resubmit the dissertation for examination within the time frame allowed by their statute of limitations.

Students must be registered for at least one credit or full-time dissertation credit in the term in which they defend their dissertation.

Graduation

Eligibility

The student must have successfully defended their dissertation and received final approval of the dissertation, including all corrections, by the Dissertation Committee. All students apply to graduate; receipt of the graduation application initiates a review of the student's coursework, grades, and milestone completion. As well, an international student's SEVIS record will be updated with a new "program end date." Registration is required for a minimum of one credit (or full-time dissertation) in the term of graduation although exceptions may be approved by the Dean's Office on a case-by-case basis. Finally, the student's Dissertation Chair and the School's Director of Records must approve the submission and publication of the Electronic Thesis and Dissertation (ETD).

For the full instructions on the formatting and submission of ETDs, please visit the University's ETD website and the Graduation Procedures section of the SCI Current Students webpage.

Statute of Limitations

All requirements for the PhD degree must be completed in not more than 6 calendar years from the time of first registration (or 8 calendar years for part-time students). Students may, in extenuating circumstances, submit a formal request for extension of their statute of limitations or for a leave of absence from the program. Requests for either an extension to a statute of limitations or for a leave of absence are submitted through online forms; these forms are shared with the student's advisor and then presented to the ICDS Committee on Doctoral Studies for a decision.

In all other matters of policy, see the University and School's Catalogs, consult with the School's Director of Academic Records.

Master's

Library and Information Science, MLIS

The MLIS Degree and the Information Profession

The roles of information professionals have changed dramatically as the volume of available data and information has increased, technology for information search and retrieval has advanced, and communities and individuals are in greater need of information. In response, the MLIS faculty initiated a redesigned curriculum in 2019 with a foundational core that features three courses in the lifecycles of data and information, data and information in systems, and the roles of information professionals in communities; a two-course Design Methods Sequence that highlights immersive experiential learning, and a choice of seven electives that allow students to tailor their coursework to their career interests.

The MLIS degree program includes education across the range of the information professions. The new foundational core, based on the culture and values of librarianship and the library, archival, and information sciences, prepares students to understand the roles information and data play in society. The MLIS program, accredited by the American Library Association, is responsive to the information marketplace and encourages the development of creativity, professionalism, and a proactive attitude to the needs of various clienteles in library and information service environments.

Goals for Graduates of the MLIS Program

Upon completion of the Master of Library and Information Science (MLIS) degree, graduates will incorporate into their practice the theories, knowledge, competencies, ethical foundations, and social responsibilities of the information professions for the benefit of the individuals, organizations, and communities they serve.

Specifically, MLIS graduates will be able to:

1. Adopt and apply the ethical and historical foundations and core values of the information professions and of related disciplines.
2. Lead in meeting the information needs of people, organizations, and communities, especially those that are marginalized or underrepresented.
3. Apply principles of the management of data, information, resources, and organizations to various functions in data and information environments.
4. Select, plan, implement, and apply information technology using creative, people-centered, and ethical approaches.
5. Design, plan, implement, evaluate, and advocate for information services that embody a commitment to diversity, inclusion, and dedication to all, especially to underrepresented and marginalized users and communities.
6. Understand and apply research in the library, archival, and information sciences, as well as other disciplines.
7. Advance the contributions of the information professions to society through advocacy and continuing professional development for information professionals and the people, organizations, and communities they serve

Revised and affirmed by the faculty of the Department of Information Culture and Data Stewardship in November 2020.

MLIS Program Policies

This section, updated annually, describes the policies and procedures that govern the MLIS program.

Graduate Admissions

The Department of Information Culture and Data Stewardship (ICDS) seeks students with diverse educational and career backgrounds. By nature, MLIS degrees are multi-disciplinary, and the faculty welcomes applicants with bachelor's degrees and/or advanced degrees from diverse disciplinary backgrounds.

The MLIS degree does not require specific coursework for admission.

The MLIS Admissions Committee makes all decisions on MLIS applicants.

Admission Status

There are three categories of admission status:

Full Graduate Status

Students admitted with full graduate status meet all admission requirements for the MLIS degree program.

Provisional Graduate Status

Applicants may be admitted to the MLIS degree program with provisional status in exceptional circumstances if their academic record does not meet full admission standards if they submit evidence of academic success (e.g., outstanding scores on the Graduate Record Exam) or professional potential (e.g., outstanding letters of recommendation and/or outstanding work experience). If granted provisional status, students must complete their first 12 credits of coursework by earning a minimum grade of B or better in each course. When students complete this requirement, the MLIS Admissions Committee recommends admitting the student to full graduate status. If students fail to achieve a grade of B or better in each course at the conclusion of the first twelve credits, they are dismissed from the MLIS program.

Special Non-degree Student Status

Students may be admitted as special non-degree students to take specific courses with the approval of the MLIS Admissions Committee. Special non-degree students are not admitted to any degree program.

Applicants who have already completed a graduate degree in library and information science and who wish to pursue the School Library Certification Program, may apply and be admitted with Special Non-degree Student Status.

Registration Requirements and Statute of Limitations

University and the School regulations impose certain conditions on a student's registration, including the following:

- **Continuous registration:** MLIS students who do not register for at least one credit during a 12-month period are automatically placed on inactive status by the University. To resume study, students must reapply for admission and pay the application fee. If readmitted, students must complete any review work stipulated by the MLIS Admissions Committee.
- **Level of registration:** Students must be registered at all times for a number of credits fairly reflecting their utilization of departmental resources. Moreover, a student must be registered for at least one credit during the 12-month period preceding graduation and must be registered during the term of graduation. Note: international students should consult appropriate INS legislation to determine level of registration for legal purpose (see OIS).
- **Statute of Limitations:** Students must complete requirements for the MLIS degree within a period of four calendar years (twelve terms) from the student's initial registration for graduate study.

Students are not permitted to continue in the MLIS program once the statute of limitations has been reached. Under exceptional circumstances, students may apply for an extension of the statute of limitations by stating the reason for the delay, provide evidence of continuing progress toward the completion of the degree, and include a plan and proposed date for the completion of the degree. Students must submit a request in writing and

receive the approval of their advisors and the ICDS Department Chair. Students who request an extension of the statute of limitations must be prepared to demonstrate proper preparation for the completion of all current degree requirements.

Under special circumstances, MLIS students may be granted one leave of absence for up to one year. An application for a leave of absence must state the reason for the request, and the leave must be approved by the student's advisor and the ICDS Department Chair. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student.

Degree Requirements

The MLIS degree is a 36-credit graduate degree program that can be completed in three consecutive terms of full-time study or up to four years (twelve terms) of part-time study.

Students register for a series of five required core courses and seven elective courses that may be tailored to career goals or chosen area of interest. It is important for students to plan carefully, in consultation with their faculty advisors, to make the best use of the educational opportunities available. A thesis is not a requirement of the MLIS degree.

Core Courses

Students must earn a B or better in each of the five-core course and maintain a 3.0 grade point average. All course work must be completed in residence in the MLIS degree Program (i.e., registered while matriculated as an SCI student) at the University of Pittsburgh.

Design Methods Sequence Core (courses must be taken sequentially)

- LIS 2021 - IDENTIFYING INFORMATION NEEDS OF KNOWLEDGE ORGANIZATIONS
- LIS 2022 - IMPLEMENTING SOLUTIONS FOR KNOWLEDGE ORGANIZATIONS

Other Core Classes

- LIS 2020 - LIFECYCLES OF DATA AND INFORMATION
- LIS 2030 - DATA AND INFORMATION IN SYSTEMS
- LIS 2040 - THE INFORMATION PROFESSIONAL IN THE COMMUNITY

Career Pathways

Students may select a career pathway, which is a specialized area of study that includes recommended aligned elective courses. Students may take seven elective courses in addition to the five required core courses.

The career pathways have been developed in response to expressed needs of the information profession. In addition to the core knowledge base and competencies of the information professions, students gain specific skill sets to match their career goals.

We offer several elective career pathways:

- Academic Information Services
- Archives and Information Science
- Children and Youth Services
- Civic Engagement
- Public Library Resources and Services
- School Library Certification Program

Students may also choose an Individualized pathway in consultation with their advisors.

The following section describes the career pathways; students should discuss which seven related elective courses they should take with their academic advisors. The Academic Advisement Report (AAR) can be used to monitor overall MLIS degree requirements. For more details regarding this dynamically generated advising tool, see the Advising section of the SCI Catalog.

Applicants may indicate their career pathway on their application for admission to the MLIS program, and they may change this at any time.

Academic Information Resources and Services

The Academic Information Resources and Services pathway provides students with the theoretical knowledge base, contextual understanding, and practical competencies to work effectively as an information professional in institutions of post-secondary education, ranging from community colleges to research-intensive institutions. Elective courses prepare students for the challenges and demands of planning, managing, delivering, and assessing resources and services in academic libraries, through exploration of their historical contexts, current trends, and future directions.

Archives Resources and Services

Recordkeeping, from governmental to organizational to personal, is one of the most ancient and essential human and institutional functions. Records are created and maintained for purposes of evidence; accountability; and personal, social, and corporate memory. Archives serve a crucial cultural function, providing society with a sense of identity and memory. Records management programs help organizations comply with regulatory agencies, be responsible to constituent groups, and use informational resources efficiently and effectively. Critical to the administration of records is their maintenance over long time periods. Maintenance of records is traditionally called preservation, which is now being influenced by issues of digital curation and stewardship. In an engaging and intellectually stimulating environment, students build skills and knowledge to identify and analyze recordkeeping systems from legal, evidential, historical, and cultural perspectives.

Children and Youth Resources and Services

The University of Pittsburgh MLIS Program has its roots at the Carnegie Library of Pittsburgh where in 1901 it became the first program in the United States to educate librarians to serve youth. The Department proudly continues to educate librarians to serve children and young people in the 120 years since that beginning. Youth librarians in public libraries build engaging and satisfying careers working with young people themselves building their multiple literacies and enjoyment of reading as well as partnering with caregivers and other adults.

Civic Engagement

Information professionals contribute to the advancement of social justice, intellectual freedom, and citizen participation in government by promoting equity-oriented services and innovative tools, providing inclusive access to information and technology, and designing ethics-embedded systems. Building on the foundation of the community-focused MLIS core courses, students enroll in seven elective courses that prepare them to be community-minded and participatory information professionals who facilitate greater civic engagement by information and technology users. Through these courses, students develop an enhanced understanding of the ethical and legal dimensions of their work as information professionals and the impact of public policy on information and technology access and use.

Individualized

Students who seek a broader range of coursework can work with their advisors to identify elective courses that are useful across a wide variety of careers.

Public Library Resources and Services

Elective courses in the Public Libraries Resources and Services pathway prepare students for the challenges and demands of planning, managing, delivering, and assessing resources and services for patrons of all ages. Students develop understandings of how public libraries are embedded in their communities and help community members from diverse backgrounds, especially those who are marginalized and underserved.

School Library Certification Program

Students who choose to work with children and young people in educational settings can pursue the School Library Certification Program through two options. For students who have already earned a teaching certificate, there is the Endorsement Option in which students earn the MLIS degree and add an additional teaching subject—Library Science PK-12—to an existing teaching certificate. For students who have not already earned a teaching certificate, there is the Intern Option in which students earn the MLIS degree as well as a second credential—a teaching certificate as a school librarian. In both options, students collaborate with practitioners in a Practicum experience in a school setting. Students prepare to embark upon one of the most challenging and rewarding careers in the Library and Information Sciences field.

Independent and Experiential Learning Opportunities

The MLIS Program provides students with experiential learning and the theoretical knowledge to build competencies for managing and making decisions related to chosen pathways. As part of coursework, students can gain critical experiential learning in a knowledge organization through LIS 2921 - FIELD EXPERIENCE. Students must have completed a minimum of twelve credit hours in good academic standing to register for LIS 2921 - Field Experience. The LIS 2921 - Field Experience Requirement, Process and Application form must be completed and sent to the Associate Chair for final approval before the student is permitted to register for this course.

Students may also gain independent research experience under the supervision of a faculty member through LIS 2901 - INDIVIDUAL RESEARCH 1 / LIS 2902 - INDIVIDUAL RESEARCH 2. A student who wishes to register for LIS 2921 or LIS 2901/2902 must submit a request form for approval by the supervising faculty member. The Individual Research Request Form must be submitted to the Associate Chair before the student is permitted to register for these courses. Students may register for both LIS 2901 and LIS 2902 for a total of six credits.

Academic Advising

The MLIS Admissions Committee assigns each new student an academic advisor at the time of admission to graduate study. After the first term of study, a student may change advisors. If a student elects to switch advisor because of a changing career interest, the change requires the notification of the original advisor and the consent of the new advisor. The change must be reported to the ICDS Associate Chair through the Change of Graduate Advisor Form.

At the time of initial registration, students are encouraged to discuss their plan of study with their advisor. A plan of study is a series of courses designed to meet the minimum exit competencies judged by the faculty to be necessary for employment as an information professional; this plan is tracked through the Academic Advisement Report (AAR).

Details regarding advising and resources for tracking degree progress (the AAR) are available on the School's Catalog page, under the Advising section. Each student must ensure that the AAR meets all program requirements for graduation. At the completion of the program, the Records Office coordinates with the Department to certify students for graduation. See the School's Catalog page for more details and regulations pertaining to graduation.

Grade Policies for MLIS Students

Maintenance of a 3.0 GPA

Each MLIS student must maintain good academic standing with a minimum 3.0 Grade Point Average (GPA) for all credits of graduate-level coursework. Failure to maintain a cumulative 3.0 GPA results in the student being placed on academic probation. For full details regarding academic standing, see the Academic Standing and Dismissal of the SCI Catalog .

Grade Requirements for MLIS Core Courses

There are five required core courses that form the foundational knowledge and competencies for information professionals:

- LIS 2021 - IDENTIFYING INFORMATION NEEDS OF KNOWLEDGE ORGANIZATIONS
- LIS 2022 - IMPLEMENTING SOLUTIONS FOR KNOWLEDGE ORGANIZATIONS
- LIS 2020 - LIFECYCLES OF DATA AND INFORMATION
- LIS 2030 - DATA AND INFORMATION IN SYSTEMS
- LIS 2040 - THE INFORMATION PROFESSIONAL IN THE COMMUNITY

A student must earn a grade of B or better in each of the five core courses. If a student does not earn a grade of B or better in each core course, the student must register for the course in the next term offered and earn a grade of B or better. A core course may be repeated only once; all other School policies regarding the repetition of courses apply (see Academic Standing and Dismissal section).

Grade Requirements for MLIS Elective Courses

All students must earn a satisfactory grade in each elective course taken. Grades of C-, D+, D, D-, F, and Unsatisfactory are unacceptable for credit toward graduation. A course for which such a grade is earned must be replaced with another course or retaken with a grade of C or better earned. In either case, a higher grade must be earned, and a 3.0 GPA must be maintained. A course for which a grade of C- or lower was earned may be repeated only once.

Grade Requirements for Field Experience and Practicum

All formal course requirements in the MLIS program must be completed with letter grades. Students enrolled in LIS 2921 Field Experience or LIS 2922 Practicum in School Libraries earn either a Satisfactory (S) grade or a Not Satisfactory (N) grade.

Transfer Credits

Normally, MLIS students fulfill course requirements by taking graduate-level courses within ICDS. In some cases, however, it may be desirable for a student to count coursework completed outside ICDS prior to or during the time the student is enrolled in the MLIS program.

A student might have taken a course at another university that is relevant to MLIS studies. In that case, the student might petition for a transfer of credits. The following restrictions apply:

- Only a graduate-level course taken at an accredited institution in which the student received a grade of B or better will be considered for transfer of credit;
- The course must be no more than five years old at the time of admission to the MLIS program.
- The course cannot have been applied toward another degree earned.
- The student must explain how the course fits into the student's career objectives.
- The course, if approved, may be used as an elective course.
- No credit approved for transfer may be used as a substitute for any of the five required core courses.

Students may apply to transfer up to six credits (two courses) toward advanced standing within the first term of registering for classes and have the credits applied toward the 36 credits required for the MLIS degree. In such cases, the student completes a Transfer Credit form and seek the written approval of the advisor. The ICDS Chair provides the final approval of the request. The form must include the following information:

- Transcript showing the course name and grade;
- Explanation of course numbering and grading systems at the university where the course was taken;
- Course description;
- Course syllabus;

Explanation of how the course relates to the student's career objectives.

Incomplete Grades and Class Enrollment for Master's Students

MLIS students who have two grades of "Incomplete" or "In Progress" (either "G" or "I") on their transcript will not be permitted to enroll in further courses until the incomplete coursework has been completed and the letter grades earned.

Calculating GPA and Repeating Courses

The Grade Point Average (GPA) of MLIS students is computed using grades in all graduate-level courses taken during the fulfillment of MLIS degree requirements, even if more than the minimally required number of 36 credits. This includes courses taken outside the ICDS Department, with advisor approval, after enrolling in the MLIS program.

MLIS students are required to earn a grade of B or better in the five required MLIS core courses. Students who do not earn a grade of B or better may repeat the course once and the second (or subsequent) grade is counted toward the GPA.

Academic Probation

Students with full graduate status may be placed on academic probation if they fail to maintain a cumulative Grade Point Average (GPA) of 3.0. Students who have received two grades of G (incomplete), I (in-progress), W (withdraw) or N (unsatisfactory) will not be permitted to register

for additional courses until work has been completed for these courses. These students are notified that their academic progress is unsatisfactory. (Students with provisional status are not placed on probation because they already have specific performance goals that must be met.) Students will be removed from academic probation when they raise their GPAs to a minimum of 3.0. Students who fail to raise their GPA after completing nine additional credits will be dismissed from the MLIS program.

Intelligent Systems Program

The Intelligent Systems Program (ISP) is a degree-granting program in the University of Pittsburgh's School of Computing and Information that enables graduate students to pursue diverse interdisciplinary studies in applied artificial intelligence. The scope of the program is broad, but encourages students to explore concentrations in specific areas, such as biomedical informatics, machine learning and decision making, intelligent tutoring systems and educational technology, natural language processing and information retrieval, AI and law, and social computing.

Many of Pitt's acclaimed schools are represented through our associated faculty, including the School of Medicine, the School of Law, the School of Education, the Graduate School of Public and International Affairs, the Dietrich School of Arts and Sciences, and the Swanson School of Engineering. There are especially strong connections to research groups in the Department of Computer Science, the Department of Informatics and Networked Systems, the Department of Biomedical Informatics, the Law School, and the Learning Research and Development Center.

The program offers Master of Science and Doctor of Philosophy degrees and an area of concentration in biomedical informatics.

Admissions Information

Briefly, an application consists of the standard School of Computing and Information admission form and supplemental materials. Applicants must also include a concise statement of purpose, providing information on the following points:

- Objective in pursuing a PhD or MS in intelligent systems.
- Theoretical background in relevant areas.
- Background in relevant tools and applications, particularly programming languages, including the level of proficiency.
- Relevant practical experience, including industrial or commercial experience.

Applicants to the Biomedical Informatics track of the Intelligent Systems Program must specifically indicate their interest in this track on their application to the Intelligent Systems Program.

Financial Assistance

Students in the ISP program are funded through a variety of sources, including externally supported research and training grants, University fellowships, and program funds.

Policies for the Intelligent Systems Program

- When a new student arrives, the student is assigned space. Once the student finds an advisor and starts working on projects, he/she usually moves to other labs designated for that faculty.
- The progress of all ISP students is reviewed and an evaluation letter is mailed to the students once per academic year.
- ISP students are eligible to apply for a limited amount of conference travel funds each year. To find out more, refer to the ISP webpage.
- Every ISP student is expected to maintain a website listing their current up-to-date contact information, publications and current research interests. They are also responsible for ensuring that the website is linked from the ISP Student Directory.
- ISP students are required to attend all but two of the scheduled AI Forum talks per term and sign in so they get credit. In case of extenuating circumstances, the student should communicate the possible absence to the ISP director and administrator as soon as possible prior to the Forum.
- Failure to meet this requirement will be taken into account when determining a student's eligibility for funding such as the Provost Fellowship in ISP candidacy, summer GSA funding, ISP Travel Grants and similar funding. *In case of extenuating circumstances, the student should communicate the possible absence to the ISP director and administrator as soon as possible prior to the Forum.*

- ISP students are required to complete the Research Integrity Module. "Upon completion of this activity, participants should be able to describe generally accepted practices and ethical principles associated with authorship and publication, generation and use of data, mentoring, research misconduct, and other investigator responsibilities". Once completed, the last page must be printed and submitted to the ISP administrator. This module is completed as part of the INFSCI 3005, Introduction to the Doctoral Program course which is a required course for all ISP PhD students. Once a student has joined a faculty lab, they are responsible for checking with their faculty mentor to see what modules need completed for that specific lab.

Maintenance of a 3.0 GPA

Each student must maintain a 3.0 Grade Point Average (GPA) for all credits of graduate level coursework for either degree. Failure to maintain a cumulative 3.0 GPA will result in the student being placed on academic probation. Students should refer to the Academic Standing and Dismissal section of the SCI Catalog page for full definitions and explanations of the academic standing review.

Grades for Individual Courses

Students must earn a grade of B- or better in each of the courses in the appropriate ISP curriculum (the General Intelligent Systems Track or the Biomedical Informatics Track).

Transfer Credits

Transfer credit limits are determined by the University while the process is managed at the School level. See the Academic Regulations and Standards of the SCI Catalog page for details and forms. Note, the explicit approval of the student's advisor and of the ISP director are required. Students must provide all items outlined in the Transfer Credit Request Form in order for the request to be reviewed by the ISP Director.

Substituting Other Courses at the University of Pittsburgh

Course substitutions require approval of the student's advisor and the ISP director. To apply for a course substitution, a student should first obtain the approval of his or her advisor. Then, the student should submit the following information to the ISP director: (1) whether the class is a graduate or undergraduate class, (2) exactly which requirement the course is meant to satisfy, (3) an indication of approval by the student's advisor, (4) justification for the substitution, and (5) sufficient information about the course syllabus for the director to judge whether the substitution would be appropriate.

Course substitution must be documented and shared with the Records Office in order to expedite graduation certification review.

Doctoral

Intelligent Systems, PhD

Requirements for the PhD

The student's adviser must be a member of the ISP faculty. New students are generally assigned to the ISP Director for their first year in the program.

To obtain a degree, a student must be in good standing and at full student status (not provisional). To remain in good standing, a student must make sufficient progress on their degree requirements and attend all but two (2) of the scheduled AI Forum talks per term. In case of extenuating circumstances, the student should communicate the possible absence to the ISP director and administrator. Failure to meet this requirement may affect application for various fellowship candidacies, GSA positions, travel grants and other internal opportunities.

Students pursuing the Doctor of Philosophy degree in ISP must adhere to the SCI requirements for graduation and complete a minimum of 72 credits as outlined below. Students must earn a grade of B- or better in each of the courses in the appropriate ISP curriculum (the general track or the Biomedical Informatics track) and maintain a GPA of at least 3.0

Course Requirements

Students are expected to have the pre-requisites needed to take the courses necessary to obtain the PhD degree in ISP. These may be required if not already taken.

General Intelligent Systems Track

First-year students

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
- ISSP 2030 - ADVANCED TOPICS IN INTELLGENT SYSTEMS

Core

ISSP 2160 / CS 2710 - FOUNDTNS OF ARTIFICIAL INTELLGNC
AND Choose Two of the Following:

- ISSP 2170 / CS 2750 - MACHINE LEARNING
- ISSP 2230 / CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG
- ISSP 2180 / CS 2770 - COMPUTER VISION

Theory

Applied or mathematical statistics. Choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

Theory of computation, algorithms. Choose one of the following:

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

One additional course required. Any of the theory courses listed above are acceptable.

Advanced courses

Four ISSP advanced lecture courses, numbered 2000 or higher and approved by the PhD adviser.

Biomedical Informatics Track (ISP/MI)

This assumes that a student already has training in a health care field; if this is not so, then the faculty will select a set of courses that teach the student basic medical knowledge, and the student may take these courses as electives.

First-year students

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
- ISSP 2030 - ADVANCED TOPICS IN INTELLGENT SYSTEMS

Core

- ISSP 2083 / BIOINF 2032 - BIOMEDICAL INFORMATICS JOURNAL CLUB
- ISSP 2016 / BIOINF 2070 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1

- ISSP 2160 / CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Then choose:

One of the following:

- ISSP 2170 / CS 2750 - MACHINE LEARNING
- ISSP 2230 / CS 2731 - INTRO NATURAL LANGUAGE PROCESSING
- ISSP 2180 / CS 2770 - COMPUTER VISION

AND choose one of the following:

- CS 1510 - ALGORITHM DESIGN
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS
- CS 3150 - ADV TOPICS DESIGN & ANALYSIS ALGORITHM

AND choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

AND choose two of the following:

- ISSP 2070 / BIOINF 2101 - PROBABILISTIC METHODS
- ISSP 2017 / BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2
- ISSP 2240 / INFSCI 2130 - DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS
- BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS
- BIOINF 2117 - APPLIED MEDICAL INFORMATICS
- BIOINF 2016 - FOUNDATIONS OF TRANSLATIONAL INFORMATICS
- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Advanced Courses

Three (3) advanced lecture courses, numbered 2000 or higher, relevant to ISP and approved by the academic adviser.

TA

TA any biomedical informatics (BIOINF) course that is cross listed as an ISSP course.

MS Project and PhD Preliminary Examination

For this requirement, the student must complete a research project, approved by the student's preliminary evaluation committee, involving (1) significant research, design, or development work, (2) a written report, and (3) an oral presentation. Students must form a MS project committee (MS) or a preliminary evaluation committee (PhD) consisting of three faculty members, two of whom must be ISP faculty. The student's adviser chairs the committee, and must be an ISP faculty member.

Preferably, the research project is completed by the end of the summer term of the second year. Students who have not defended their research project by end of the fall term of their third year in the program will be placed on provisional status in the program, unless extenuating circumstances warrant an extension.

Although not a requirement, it is strongly suggested that the student submit the project report for publication in a refereed journal or conference. Thus, the scope of the research project is intended to be at the level of a paper that is of publishable quality in a peer-reviewed AI journal or conference.

The steps to completing the project are as follows:

- Submit a project proposal to your committee for its approval.
- Perform the work, and write a project report.
- Submit your project report to your committee at least two weeks in advance of your oral presentation of the work.
- Present your work in a talk given to your committee. As a guideline, you should give about a 30-minute talk and leave about 30 minutes for questions and discussion. The ISP faculty should be invited to the oral presentation. General questions relating to the field of AI are appropriate at this examination. The oral presentation may take place in an open forum, such as the ISP AI Forum, followed by a closed session with just your committee and any other ISP faculty members who wish to be present.

The committee will evaluate the project and presentation. The following criteria should be considered: The project and presentation should represent independent research, design, or development work. They should be technically sound and relevant to the ISP. The student should display breadth of knowledge as well as understanding of the significance and motivation of the work. The committee will combine that evaluation with a review of the student's progress in coursework to arrive at an overall assessment.

- Pass at the PhD level.
- Provisional pass at the PhD level: Must complete additional requirements specified by the committee in order to obtain a pass.
- Pass at the MS level: Student obtains a terminal MS degree, once all course requirements for the MS are completed.
- Fail.

Students who pass will need to have the Report on Examinations form signed by their committee and submitted to the SCI Records office and the ISP Administrator. All paperwork concerning courses, graduation, and milestones etc. can be found on the School Forms section of the SCI Current Students webpage. Should you have difficulty finding what you need, please contact the ISP administrator (paum4b@pitt.edu).

PhD Comprehensive Examination

For the PhD comprehensive examination, students should follow these steps:

Form a comprehensive examination committee consisting of at least three faculty members, two of whom must be ISP faculty. The student's PhD adviser chairs the committee and must be an ISP faculty member. The faculty on a given student's comprehensive examination committee are often the same as the faculty on that student's preliminary evaluation committee, but they need not be. Choose three major subareas of AI. One of these areas is flexible; the other two should be chosen from the ISP list of sub-areas below. The flexible area must be unanimously approved by the student's committee (but does not need to be approved by the director). Biomedical Informatics students should choose "Biomedical Informatics" as one of the subareas.

- AI and Business/Accounting
- AI and Law
- AI and Medicine
- AI and MIS
- Bioinformatics
- Case-based Reasoning
- Cognitive Architectures (or Subsymbolic Approaches)
- Connectionist Approaches
- Statistics and Evaluation Methods
- Expert Systems
- Intelligent Interfaces
- Intelligent Tutoring Systems
- Knowledge Representation
- Machine Learning
- Biomedical Informatics
- Natural-language Processing
- Planning
- Reasoning About Uncertainty
- Robotics
- Vision

Work with the committee to finalize the reading for the three chosen subareas. Have the committee approve the list.

Work with your committee members to set the following dates for the examination:

- The date and time the written examination is distributed to you.
- The date and time you return the examination, which by default is nine days after receiving it. Your committee can designate an examination period of fewer or more than nine days, and through your adviser you may request that they do so.
- The date and time you orally defend your examination answers before your committee. You should schedule two hours for your oral exam defense, although typically less time will be needed.

Your committee will provide a list of written questions. Unless an exception is made by your committee, you will have nine days to provide the written answers to these questions. At the end of those nine days, you should distribute your answers to each of your committee members. Be sure to check that each has received your answers.

An oral examination will take place after the comprehensive committee has read your answers; the committee should be given a minimum of three days to read your answers before the oral examination. Only the ISP faculty will be invited to the oral examination. You will be asked questions by your committee concerning your answers on the written examination, and more broadly about your knowledge of the material in the three areas of concentration you have chosen.

At the end of your oral examination, your committee will evaluate your performance as one of the following:

- Pass.
- Provisional pass: Must complete additional requirements specified by the committee in order to obtain a pass.
- Fail.

An evaluation by the comprehensive examination committee of "fail" will be considered by the ISP faculty at large, who will make a determination about the status of the student in the ISP, including whether the student is allowed to re-take the examination or whether he or she is terminated from the program.

Students who pass will need to have the Report on Examinations form signed by their committee and submitted to the SCI Records office as well as the ISP Administrator. All paperwork concerning courses, graduation, and milestones etc. can be found on the School Forms section of the SCI Current Students webpage. Should you have difficulty finding what you need, please contact the ISP administrator (paum4b@pitt.edu).

PhD Dissertation

In pursuing the PhD dissertation, students should follow these steps:

1. Find a dissertation adviser and form a dissertation committee. The composition requirements for the Doctoral dissertation committees are detailed in SCI Catalog page; see the Doctoral Committee section for information.
2. Write a dissertation proposal. Present the proposal to your committee. Your committee must approve your proposal and sign the Report on Examinations form.
3. Carry out the research. Write the dissertation.
4. Announcement of your dissertation defense must appear in University Times and Pitt Chronicle. Send information to the ISP administrator at least five weeks before your oral defense date. This information will be sent to the University Times and Pitt Chronicle. The announcement includes the student name, the title of the dissertation, and the time and place of the defense.
5. Have an oral defense that is open to the University at large.
6. Students who pass will need to have the Report on Examinations form signed by their committee and submitted to the SCI Records office as well as the ISP Administrator. All paperwork concerning courses, graduation, and milestones etc. can be found on the School Forms section of the SCI Current Students webpage. Should you have difficulty finding what you need, please contact the ISP administrator (paum4b@pitt.edu).
7. Credit for doctoral research is ordinarily obtained through the course ISSP 3000 - RESEARCH AND DISSERTATION PHD. Students who have completed all course requirements, passed the PhD comprehensive examination, completed 72 credits of graduate student, and are working full-time on their dissertations are encouraged to register for FTDJ 0000 - FULL-TIME DISSERTATION STUDY

Master's

Intelligent Systems, MS

Degree Requirements

Students pursuing the Master of Science degree in ISP must adhere to the SCI requirements for graduation and complete a minimum of 30 credits as outlined below, as well as an MS Project. Students must also earn a grade of B- or better in each of the courses in the appropriate ISP curriculum (the general track or the Biomedical Informatics track) and maintain a GPA of at least 3.0.

General Track Curriculum

First-year students are encouraged but not required to take:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM
- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Core

• ISSP 2160 / CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE
AND Choose Two of the Following:

- ISSP 2170 / CS 2750 - MACHINE LEARNING
- ISSP 2230 / CS 2731 - INTRO NATURAL LANGUAGE PROCESSING
- ISSP 2180 / CS 2770 - COMPUTER VISION

Theory

Applied or mathematical statistics. Choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

Theory of computation, algorithms. Choose one of the following:

- CS 2110 - THEORY OF COMPUTATION
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS

One additional course required. Any of the theory courses listed above are acceptable.

Advanced courses

Four ISSP advanced lecture courses, numbered 2000 or higher and approved by the academic adviser.

Biomedical Informatics Track (ISP/MI)

This assumes that a student already has training in a health care field; if this is not so, then the faculty will select a set of courses that teach the student basic medical knowledge, and the student may take these courses as electives.

First-year students are encouraged but not required to take:

- ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS
- INFSCI 3005 - INTRODUCTION TO THE DOCTORAL PROGRAM

- ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Core

- ISSP 2083 / BIOINF 2032 - BIOMEDICAL INFORMATICS JOURNAL CLUB
- ISSP 2016 / BIOINF 2070 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 1
- ISSP 2160 / CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Then choose;

One of the following:

- ISSP 2170 / CS 2750 - MACHINE LEARNING
- ISSP 2230 / CS 2731 - INTRO NATURAL LANGUAGE PROCSSNG
- ISSP 2180 / CS 2770 - COMPUTER VISION

AND choose one of the following:

- CS 1510 - ALGORITHM DESIGN
- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS
- CS 3150 - ADV TOPCS DSGN & ANALYS ALGORTHM

AND choose one of the following:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1
- BIOST 2042 - INTRODUCTION TO STATISTICAL METHODS 2
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

AND choose two of the following:

- ISSP 2070 / BIOINF 2101 - PROBABILISTIC METHODS
- ISSP 2017 / BIOINF 2071 - FOUNDATIONS OF BIOMEDICAL INFORMATICS 2
- ISSP 2240 / INFSCI 2130 - DECISION ANALYSIS AND DECISION SUPPORT SYSTEMS
- BIOINF 2121 - HUMAN-COMPUTER INTERACTION AND EVALUATION METHODS
- BIOINF 2117 - APPLIED MEDICAL INFORMATICS
- BIOINF 2016 - FOUNDATIONS OF TRANSLATIONAL INFORMATICS
- BIOINF 2124 - PRINCIPLES OF GLOBAL HEALTH INFORMATICS

Three (3) Graduate level (2000 or higher, three (3) credits) ISSP lecture courses that have been approved by your advisor as being relevant to your studies in the ISP.

MS Project

For this requirement, the student must complete a research project, approved by the student's preliminary evaluation committee, involving (1) significant research, design, or development work, (2) a written report, and (3) an oral presentation. Students must form a MS project committee (MS) or a preliminary evaluation committee (PhD) consisting of three faculty members, two of whom must be ISP faculty. The student's adviser chairs the committee, and must be an ISP faculty member.

Preferably, the research project is completed by the end of the summer term of the second year. Students who have not defended their research project by end of the fall term of their third year in the program will be placed on provisional status in the program, unless extenuating circumstances warrant an extension, as judged by the student's preliminary evaluation committee.

Although not a requirement, it is strongly suggested that the student submit the project report for publication in a refereed journal or conference. Thus, the scope of the research project is intended to be at the level of a paper that is of publishable quality in a peer-reviewed AI journal or conference.

The steps to completing the project are as follows:

- Submit a project proposal to your committee for its approval.
- Perform the work, and write a project report.
- Submit your project report to your committee at least two (2) weeks in advance of your oral presentation of the work.
- Present your work in a talk given to your committee. As a guideline, you should give about a 30-minute talk and leave about 30 minutes for questions and discussion. The ISP faculty should be invited to the oral presentation. General questions relating to the field of AI are appropriate at this examination. The oral presentation may take place in an open forum, such as the ISP AI Forum, followed by a closed session with just your committee and any other ISP faculty members who wish to be present.

The committee will evaluate the project and presentation. The following criteria should be considered: The project and presentation should represent independent research, design, or development work. They should be technically sound; and should be relevant to the ISP. The student should display breadth of knowledge, as well as understanding of the significance and motivation of the work.

The committee will combine that evaluation with a review of the student's progress in coursework to arrive at an overall assessment.

MS

- Pass.
- Provisional pass: Must complete additional requirements specified by the committee in order to obtain a pass.
- Fail.

Students who pass will need to have the Report on Examinations form signed by their committee and submitted to the SCI Records office as well as the ISP Administrator. All paperwork concerning courses, graduation, and milestones etc. can be found on the SCI website. Navigate to the "Current Students" area and choose "School Forms" from the box on the right. Should you have difficulty finding what you need, please contact the ISP administrator (paum4b@pitt.edu).

See the ISP PhD Catalog Page for further details about doctoral degree requirements.

Grand-parenting and the new School of Computing and Information

Computer Science (CS) graduate students who matriculated into the University of Pittsburgh PRIOR to Fall 2017 received a communication allowing a choice to either remain in the School of Arts & Sciences or transfer to the new School of Computing and Information for completion of their CS degree.

- If a student chose to remain in the School of Arts & Sciences, they should refer to the Arts & Sciences catalog for the regulations, policies, and requirements for their degree.
- If a student applied to transfer to the School of Computing and Information, they should refer to the new school's catalog for the regulations, policies, and requirements for their degree.

Note: If a student took no action in response to the grand-parenting e-mail, they will remain in the School of Arts & Sciences by default.

Any student matriculating into the University of Pittsburgh AFTER Fall 2017, must apply to the School of Computing and Information in order to pursue an undergraduate degree in either Computer Science or Information Science and should refer to this School's catalog for information.

If you have additional questions or concerns, please contact the School's Office of Student Services at SCIreg@pitt.edu.

Academic Libraries

This area of interest is designed to provide you with the theoretical knowledge, contextual understanding, and practical skills to work effectively as a librarian or information professional in a higher education sector that is continually evolving. Our teaching is informed and inspired by personal experience, current research and leading thinking in the field. The courses will equip you for the challenges and demands of planning, managing and delivering resources and services in academic libraries, through exploration of their historical contexts, current positions, and future directions.

Individualized

Available to both the on-campus and online MLIS students, this area of interest will give you the practical skills and theoretical knowledge necessary to succeed as an information professional in a wide variety of positions.

Information Technology

This area of interest will enable graduates to assess, organize, and manage the various electronic systems that support library services. Faculty will explore the theoretical underpinnings of such systems as well as provide a thorough understanding of their functions. The program will emphasize database design and implementation, information architecture, and information visualization.

Public Libraries

Our teaching is informed and inspired by personal experience, current research and leading thinking in the field. The courses in the Public Libraries area of interest will equip you for the challenges and demands of planning, managing and delivering resources and services through exploration of their historical contexts, current positions, and future directions.

Resources & Services: Children and Youth

The iSchool acknowledges the changing landscape of children's and young adult librarianship. Without forgetting our important roots in children's literature, our school prepares information professionals who can reach out to the child of the 21st century.

Resources & Services: Health

The intent of this area of interest is to orient prospective health-information professionals to the theory, methodology, and practice of medical information management, including but not limited to medical librarianship. The iSchool curriculum is designed to support the concept that medical librarians and medical-information managers are team players in the integrated information environments characteristic of modern medicine. The curriculum also encourages study into the nature of health and medical information, and the traditional and the electronic means by which such information is organized, stored, and retrieved.

Resources & Services: Reference

The Reference area of interest at the iSchool will provide students with working knowledge of a wide array of reference sources and services in areas such as government documents, social sciences, science and technology, law, health, and humanities. This course of study will enable you to analyze users' needs to determine what information is appropriate; to make useful judgments about the relevance, trustworthiness, and quality of sources; and to assess methods for delivering the desired information.

School Library Certification Program

The School Library Certification Program (SLCP) will allow you to earn both your MLIS degree and your Instructional I teaching certificate in Library Science, K-12, from the Pennsylvania Department of Education. You will gain the critical skills needed through competency-based learning experiences in collaboration with practitioners. You will be prepared to embark upon one of the most challenging and rewarding careers in the Library and Information Sciences field.

School of Computing and Information Faculty

Name	Title	Department	Highest Degree	Awarding Institution
------	-------	------------	----------------	----------------------

Daniel Ahn	Teaching Assistant Professor	Computer Science	PhD	University of Illinois at Urbana-Champaign
Malihe Alikhani	Assistant Professor	Computer Science	PhD	Rutgers University
Katharine Anderson	Visiting Assistant Professor	Informatics and Networked Systems	PhD	University of Michigan
Amy Babay	Assistant Professor	Informatics and Networked Systems	PhD	Johns Hopkins University
Dmitriy Babichenko	Clinical Associate Professor	Informatics and Networked Systems	PhD	University of Pittsburgh
Mary K. Biagini	Associate Professor	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Jacob Biehl	Associate Professor	Computer Science; Information Culture and Data Stewardship	PhD	University of Illinois at Urbana-Champaign
Peter Brusilovsky	Professor	Informatics and Networked Systems	PhD	Moscow State University
Matthew Burton	Lecturer	Information Culture and Data Stewardship	PhD	University of Michigan
Shi-Kuo Chang	Professor	Computer Science	PhD	University of California at Berkeley
Bruce R. Childers	Professor, Dean	Computer Science	PhD	University of Virginia
Panos Chrysanthis	Professor	Computer Science	PhD	University of Massachusetts at Amherst
James "Kip" Currier	Assistant Professor	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Luis de Oliveira	Teaching Assistant Professor	Computer Science	PhD	University of Porto
Nicholas L. Farnan	Lecturer II	Computer Science	PhD	University of Pittsburgh
Rosta Farzan	Associate Professor	Informatics and Networked Systems	PhD	University of Pittsburgh
Morgan Frank	Associate Professor	Informatics and Networked Systems; Information Culture and Data Stewardship	PhD	Massachusetts Institute of Technology
William C. Garrison	Lecturer II, Assistant Dean Academic Programs	Computer Science	PhD	University of Pittsburgh
Chelsea Gunn	Teaching Assistant Professor	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Milos Hauskrecht	Professor	Computer Science	PhD	Massachusetts Institute of Technology
Daqing He	Professor	Informatics and Networked Systems	PhD	University of Pittsburgh
Stephen Hirtle	Professor	Informatics and Networked Systems	PhD	University of Michigan
Timothy L. Hoffman	Lecturer	Computer Science	Master's	University of Pittsburgh
Rebecca Hwa	Associate Professor	Computer Science	PhD	Harvard University
Seong Jae Hwang	Assistant Professor	Computer Science	PhD	University of Wisconsin-Madison

Ahmed Ibrahim	Teaching Assistant Professor	Informatics and Networked Systems	PhD	University of Kentucky
Xiaowei Jia	Assistant Professor	Computer Science	PhD	University of Minnesota, Twin Cities
James B.D. Joshi	Professor	Informatics and Networked Systems	PhD	Purdue University
Hassan Karimi	Professor	Informatics and Networked Systems	PhD	University of Calgary
Sherif Khattab	Lecturer I	Computer Science	PhD	University of Pittsburgh
Thumrongsak Kosiyatrkul	Lecturer II	Computer Science	PhD	Syracuse University
Konstantinos Kosta	Visiting Assistant Professor	Computer Science	PhD	University of Cyprus
Adriana I. Kovashka	Assistant Professor	Computer Science	PhD	University of Texas in Austin
Prashant Krishnamurthy	Professor; Chair	Informatics and Networked Systems	PhD	Worcester Polytechnic Institute
Alexandros Labrinidis	Professor; Chair	Computer Science	PhD	University of Maryland, College Park
John R. Lange	Associate Professor	Computer Science	PhD	Northwestern University
Alison Langmead	Associate Professor	Information Culture and Data Stewardship	PhD	Columbia University
Adam J. Lee	Associate Professor; Associate Dean	Computer Science	PhD	University of Illinois-- Urbana Champaign
Stephen Lee	Assistant Professor	Computer Science	PhD	University of Massachusetts, Amherst
Michael Lewis	Professor	Informatics and Networked Systems	PhD	Georgia Institute of Technology
Yu-Ru Lin	Associate Professor	Informatics and Networked Systems	PhD	Arizona State University
Diane J. Litman	Professor	Computer Science	PhD	University of Rochester
Elizabeth Mahoney	Lecturer	Information Culture and Data Stewardship	PhD	University of Albany
Eleanor Mattern	Teaching Assistant Professor	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Leona Mitchell	Professor of Practice	Informatics and Networked Systems	Master's	University of Pittsburgh
Rebecca Morris	Teaching Assistant Professor	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Danie Mosse	Professor	Computer Science	PhD	University of Maryland, College Park
Paul Munro	Associate Professor	Informatics and Networked Systems	PhD	Brown University
Balaji Palanisamy	Associate Professor	Informatics and Networked Systems	PhD	Georgia Institute of Technology

Konstantinos Pelechrinis	Associate Professor	Informatics and Networked Systems	PhD	University of California, Riverside
Robert Perkoski	Assistant Professor	Informatics and Networked Systems	PhD	University of Pittsburgh
Kirk R. Pruhs	Professor	Computer Science	PhD	University of Wisconsin-Madison
John C. Ramirez	Senior Lecturer	Computer Science	PhD	University of Pittsburgh
Marcia Rapchak	Lecturer	Information Culture and Data Stewardship	Ed.D.	Duquesne University
Song Shi	Visiting Assistant Professor	School of Computing and Information	PhD	University of Massachusetts, Amherst
Xulong Tang	Assistant Professor	Computer Science	PhD	Pennsylvania State University
David Tipper	Professor	Informatics and Networked Systems	PhD	University of Arizona
Erin Walker	Associate Professor	Computer Science	PhD	Carnegie Mellon University
Martin Weiss	Professor	Informatics and Networked Systems	PhD	Carnegie Mellon University
Lingfei Wu	Assistant Professor	Informatics and Networked Systems/Information Culture and Data Stewardship	PhD	City University of Hong Kong
Joseph Yurko	Teaching Assistant Professor	School of Computing and Information	PhD	Massachusetts Institute of Technology
Vladimir Zadorozhny	Associate Professor	Informatics and Networked Systems	PhD	Russian Academy of Sciences, Moscow
Youtao Zhang	Associate Professor	Computer Science	PhD	University of Arizona

School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences^[1] and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull.

Every day, the positive contributions of our faculty, staff, residents and students—the Pitt Dental Medicine family—demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the School of Public Health; and bachelor of science (BS).

The four-year Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre-doctoral curriculum with the rest of the class.

The Department of Oral and Craniofacial Sciences encompasses the study of fundamental biological phenomena related to the development, structure, and function of the craniofacial region as well as the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area with the aim of improving health. Current research focuses involve craniofacial regeneration and genetics.

The School of Dental Medicine offers advanced residency certificate and Master of Dental Medicine degree programs in each of the full array of dental specialties.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The interprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education. To learn more about the Dental Hygiene Program, please visit the Pitt Undergraduate Catalog.

General Dentistry and Specialty Clinics

The School of Dental Medicine provides clinical education and patient care through 15 dental clinics encompassing general dentistry, anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, endodontics, prosthodontics, radiology, and restorative dentistry/comprehensive care.

Clinical Centers

The Multidisciplinary Implant Center focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.

The Center for Patients with Special Needs was established by Dean Thomas W. Braun as a school priority to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.

University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

Research Strengths

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Demographics

For the 2016 -17 academic year, the School of Dental Medicine accepted 80 incoming first professional degree or doctor of dental medicine students from a pool of 2,003 applicants. Forty-four percent of the 315 students enrolled in the doctoral program are women. There are 63 students in the dental hygiene certificate program and 27 in the bachelor of science in dental hygiene program. The School of Dental Medicine has 97 full-time, 107 part-time, 115 adjunct, and 16 emeritus faculty members.

Mission

The mission of the University of Pittsburgh School of Dental Medicine is to improve oral health through Teaching, Research and Service:

- Teaching a new generation of clinicians to deliver oral health care with skill and compassion
- Research that expands the boundaries of our knowledge and builds on discoveries to enhance human life
- Service to the diverse community of patients who entrust themselves to our care

Vision

The University of Pittsburgh School of Dental Medicine will be a diverse, welcoming and supportive community widely recognized for excellence and leadership in the improvement of oral health.

- We will train our students to care for patients skillfully, professionally, and compassionately; to treat each patient with respect and kindness; and to be aware at all times of the privilege and responsibility of being entrusted with the care of another human being. We will model evidence-based treatment and the importance of life-long learning.
- We will actively contribute to the mission of the University of Pittsburgh to be a leading research institution, broadening the scientific foundations of dental and craniofacial medicine and translating new knowledge into life-enhancing treatments for people everywhere.
- We will be known for our clinical expertise and serve as a regional resource to which our neighbors will turn for comprehensive care. We will use the best techniques and current technologies to create optimal outcomes for our patients.
- We will maintain a strong and enduring connection with our alumni ^[1]to help ensure our School's success for generations to come. ^[1]Our alumni will carry on our mission through clinical excellence, service ^[1]to the dental profession, and generous outreach to people in need.

Values

- Service: Providing exemplary service to our students, faculty, patients, and society
- Passion for Excellence: Continuously striving to achieve the highest level of excellence in education, research, and service
- Professionalism and Integrity: Adhering to the highest ethical and professional standards of our profession
- Leadership: Serving as role models and mentors to students, faculty, and staff to shape the future of oral health care
- Collaboration: Embracing a team approach to accomplish shared goals
- Humanism: Respecting the contributions of each person within the School of Dental Medicine family to foster an environment of trust, safety, and fairness

School of Dental Medicine Faculty

Predoctoral (DMD) Program

Welcome to Pitt Dental Medicine

Students from Pennsylvania, across the country and around the world come to study at the University of Pittsburgh School of Dental Medicine. Among the best dental schools in the country, the School of Dental Medicine seeks only the most qualified students for admission to nationally recognized predoctoral and graduate academic programs. The central program at the school is the Doctor of Dental Medicine (DMD) program. Providing students with a solid evidence-based education in dental medicine, graduates of the program are well prepared to be practicing clinicians or researchers. The four-year predoctoral program begins at the White Coat Ceremony and leads to a Doctoral degree in Dental Medicine (DMD). Advanced dental education and residency programs are available to students, including the Oral Biology Graduate Program.

Competency-Based Educational Program

The four-year predoctoral program prepares students to provide basic health promotion and disease prevention, diagnose and develop treatment plans, analyze complex medical and dental cases, and achieve competency in all areas defined for general practitioners. The competency-based curriculum also reflects the school's commitment to supporting the development of professionalism, life-long learning, and synthesis of clinical and biomedical science concepts.

[View our four-year curriculum.](#)

Beyond the Classroom

Student learning continues far beyond the classroom. Community service is encouraged through the Student Community Outreach Program and Education (SCOPE) and the University of Pittsburgh WISER Center offers dental students hands-on medical experience in a world-class multidisciplinary simulation-based training facility. The Simulation Clinic gives students life-like experience with simulated patients in a classroom, clinical learning environment and the Fassinger Learning Resource Center lets students continue learning past the traditional hours and space of the classroom meetings.

Students are encouraged to participate in any of a number of the school's active student organizations to connect with others sharing and investigating the same interests. Student organizations focus on advancing knowledge and extend the frontiers of a particular segment of oral health. Personal, academic and career counseling are available through the school's Office of Student Affairs for all students. An extensive library system, learning skills center, housing resource center, student health care and recreational and fitness facilities are available through the University.

Research opportunities abound for students in good academic standing to study many different aspects of dental research, including craniofacial genetics, tissue regeneration, informatics, public health and other fields. With an extended history of profound dental research, the University of Pittsburgh School of Dental Medicine also fosters interactions between dental students and researchers in other disciplines. Academic rewards and contributions to the dental profession are just two reasons many students conduct research at the school. Students have opportunities to share their projects and results at national meetings and conferences and provide excellent learning and networking opportunities with colleagues. Student researchers also may compete for awards, scholarships, and other opportunities at the University.

About the School of Dental Medicine

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Class of 2020

- Class Size: 80
- Male: 49 Female:31
- Average Age: 24
- Undergraduate Schools Represented: 54

Academics

- DAT AA: 21.4
- Average Total GPA: 3.64
- Average Science GPA: 3.55

Ethnicity/Race

- Caucasian: 60*
- Asian: 17*
- Hispanic: 5*
- African American: 4*
- American Indian: 4*
- Asian-Indian: 2*
- *Multiracial: 7

Important Information

- Type of degree granted: DMD
- Class size: 80
- Length of program: 4 years
- DAT: required
- Applications accepted through AADSAS
- Interview are granted by invitation in the fall and early spring
- Have questions? Email us at dentaladmissions@dental.pitt.edu

The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Doctoral

Advanced Standing (DMD) Program

The University of Pittsburgh School of Dental Medicine is committed to diversity within the dental profession. We have recruited students from more than 20 countries around the globe. Our Advanced Standing students are integrated seamlessly into the predoctoral DMD program and are provided with the same opportunities and incentives as our regular class. We believe in embracing and learning from each other's diverse backgrounds. Our program also provides numerous possibilities for research, community outreach and a personalized educational experience apart from the already rich, holistic and innovative clinical experience that we provide to our students.

Our Advanced Standing Program for dentists holding a dental degree from other countries employs a mandatory two-year curriculum. Qualified Advanced Standing Program students are placed in the First Professional Program (DMD) as third-year dental students following a mandatory summer program, and must complete the third- and fourth-year curriculum as prescribed. No waiver of classes is granted.

Education and Clinical Care

Our comprehensive clinical care model, coupled with evidence-based practice, allows for limitless student experiences. Utilizing advanced technologies, such as simulation patient labs, CBCT imaging, CAD/CAM, implants, 3D printing and more, provides unlimited opportunities which are student driven and faculty guided. With all eight specialty training programs, plus the country's flagship dental anesthesiology program, students are trained by experts in these specific fields while enjoying a low student to faculty ratio and a collaborative *Pitt Dental Family* atmosphere. Additionally, students gain valuable experience in our renowned Center for Patients with Special Needs and Multidisciplinary Implant Center. Students also may choose to pursue various certificates ranging from dental public health to academic dentistry. Being a part of one of the oldest programs in the country with a strong alumni base and support, students have the prerogative to participate in mentoring experiences, leadership possibilities, and many other social activities.

The University of Pittsburgh School of Dental Medicine participates in the Centralized Application for Advanced Placement for International Dentists (CAAPID) program. The deadline for application is **July 5** of the year prior to starting the program. Applications for the Advanced Standing Program that are sent directly to the University of Pittsburgh will not be accepted. Please visit the CAAPID website for specific information.

For detailed information about the program and application requirements and processes, please visit our website. If you have questions, please email us at kaa77@pitt.edu.

About the School

The interprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

Research Strengths

Pitt Dental Medicine is ranked 7th nationally for NIDCR research funding. Students have the opportunity to participate in innovative research involving craniofacial and dental genetics, craniofacial regeneration, informatics, caries research, the county's first DNA registry and repository obtained from saliva samples, and many clinical and translational projects.

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Advanced Standing Curriculum

Advanced Standing students are required to take a summer course before they join other DMD students in their third and fourth years. Learn more about the third- and fourth-year curriculum for Predoctoral DMD students.

Doctor of Dental Medicine, DMD

DMD Curriculum

Following is a listing of all DMD courses and a typical curriculum for each of the four years of the program:

First Year-Fall Term

- DENT 5118 - QUALITIES OF A GENERAL DENTIST 1
- DIASCI 5110 - FUNDAMENTALS OF RADIOLOGY 1
- DMED 5110 - FOUNDATIONS OF PERSON-CENTERED CARE
- DMED 5112 - PRINCIPLES OF PROFESSIONAL PRACTICE
- OCS 5115 - MICROBIAL PHYSIOLOGY AND IMMUNOLOGY
- OCS 5118 - EMBRYOLOGY AND ORAL TISSUES
- OCS 5119 - MOLECULAR AND CELL BIOLOGY
- OCS 5120 - BODY TISSUES
- RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY
- RESTD 5118 - DENTAL ANATOMY AND MORPHOLOGY LAB

First Year-Spring Term

- DENT 5148 - QUALITIES OF A GENERAL DENTIST 2
- DIASCI 5140 - FUNDAMENTALS OF RADIOLOGY 2
- DMED 5142 - FOUNDATIONS OF PERSON-CENTERED CARE 2
- DMED 5143 - PRINCIPLES OF PROFESSIONAL PRACTICE 2
- OCS 5140 - SYSTEMIC GROSS ANATOMY
- OCS 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1
- OCS 5143 - HEAD AND NECK SOFT TISSUE ANATOMY
- OCS 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2
- PERIO 5141 - PERIODONTOLOGY 1
- PERIO 5143 - PERIODONTOLOGY 1 LAB
- PROSTH 5142 - DENTAL MATERIALS

First Year-Summer Term

- DENT 5178 - QUALITIES OF A GENERAL DENTIST 3
- DIASCI 5170 - GENERAL AND SYSTEMIC PATHOLOGY
- DMED 5170 - CARIOLOGY AND CARIES MANAGEMENT 2
- DMED 5171 - CARIOLOGY AND CARIES MANAGEMENT 2 LAB
- DMED 5172 - APPLICATIONS OF PERSON-CENTERED CARE
- OCS 5176 - IMMUNOLOGY
- PERIO 5181 - PERIODONTOLOGY 2
- PERIO 5183 - PERIODONTOLOGY 2 LAB
- PROSTH 5171 - PRINCIPLES OF DENTAL OCCLUSION

Second Year-Fall Term

- CDENT 5241 - PRINCIPLES AND PRACTICE OF DENTAL PUBLIC HEALTH
- DENT 5211 - DIAGNOSIS AND TREATMENT PLANNING 1
- DENT 5218 - QUALITIES OF A GENERAL DENTIST 4
- DMED 5212 - APPLICATIONS OF PROFESSIONAL PRACTICE 1
- DIASCI 5213 - INTRODUCTION TO RADIOLOGY 3
- DIASCI 5214 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 1
- ENDOD 5210 - ENDODONTICS 1
- ENDOD 5216 - ENDODONTICS 1 LAB
- PEDENT 5211 - PEDIATRIC DENTISTRY 1
- PERIO 5214 - PERIODONTOLOGY 3
- PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
- PROSTH 5211 - FIXED PARTIAL DENTURES 1
- PROSTH 5213 - COMPLETE DENTURES 1
- PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB
- PROSTH 5217 - COMPLETE DENTURES 1 LAB

Second Year-Spring Term

- DENT 5242 - DIAGNOSIS AND TREATMENT PLANNING 2
- DENT 5248 - QUALITIES OF A GENERAL DENTIST 5
- DIASCI 5244 - ORAL AND MAXILLOFACIAL PATHOLOGY AND RADIOLOGY 2
- DMED 5243 - APPLICATIONS OF PROFESSIONAL PRACTICE 2
- DSANE 5241 - ANESTHESIA 1: LOCAL ANESTHESIA
- DSANE 5245 - LOCAL ANESTHESIA TECHNIQUE LAB
- ENDOD 5247 - ENDODONTICS 2 LAB
- ENDOD 5252 - ENDODONTICS 2
- ODO 5242 - INTRODUCTION TO ORTHODONTICS
- OCS 5244 - CRANIOFACIAL GENETICS
- ORSUR 5241 - ORAL SURGERY 1
- PEDENT 5242 - PEDIATRIC DENTISTRY 2 LAB
- PEDENT 5253 - PEDIATRIC DENTISTRY 2
- PERIO 5241 - PERIODONTAL INSTRUMENTATION
- PERIO 5243 - PERIODONTAL CLINIC
- PROSTH 5241 - REMOVABLE PARTIAL DENTURES
- PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY
- PROSTH 5251 - FIXED PARTIAL DENTURES 2

- PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB

Second Year-Summer Term

- CDENT 5272 - STUDENT COMMUNITY OUTREACH PROGRAM AND EDUCATION (SCOPE) 1: COMMUNITY OUTREACH
- CDENT 5282 - CLINICAL APPLICATION OF PROBLEM-SOLVING SKILLS
- DENT 5278 - QUALITIES OF A GENERAL DENTIST 6
- DENT 5283 - DIAGNOSIS AND TREATMENT PLANNING 3
- DSANE 5272 - ANESTHESIA 2: MEDICAL EMERGENCIES
- ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB
- ORSUR 5282 - ORAL SURGERY 2
- PROSTH 5271 - DIGITAL DENTISTRY 1
- PROSTH 5273 - FIXED PARTIAL DENTURES 3
- PROSTH 5276 - FIXED PARTIAL DENTURES 3 LABORATORY
- PROSTH 5282 - COMPLETE DENTURES 2
- RESTD 5282 - OPERATIVE TECHNIQUES REVIEW

Third Year-Fall Term

- DENT 5310 - SPECIAL NEEDS DENTISTRY
- DENT 5317 - SUCCESSFUL PRACTICE MANAGEMENT 1
- DENT 5318 - QUALITIES OF A GENERAL DENTIST 7
- DIASCI 5320 - MANAGEMENT OF DENTAL EMERGENCIES
- DSANE 5311 - PATIENT MANAGEMENT: ENTERAL SEDATION
- DSANE 5313 - ANESTHESIA 3: PAIN AND ANXIETY CONTROL
- DSANE 5315 - NITROUS OXIDE LAB
- DSANE 5317 - ADVANCED LOCAL ANESTHESIA TECH LAB
- ENDOD 5313 - ENDODONTICS 3
- ORSUR 5313 - ORAL SURGERY 3
- ORSUR 5314 - PHYSICAL DIAGNOSIS AND EVALUATION
- PROSTH 5311 - IMPLANTOLOGY 1

Third Year-Spring Term

- DENT 5347 - SUCCESSFUL PRACTICE MANAGEMENT 2
- DENT 5348 - QUALITIES OF A GENERAL DENTIST 8
- DIASCI 5341 - SEMINARS IN ORAL PATHOLOGY AND ORAL MEDICINE
- DSANE 5342 - CLINICAL MEDICINE
- DSANE 5344 - MEDICAL EMERGENCIES - WISER CENTER
- OCS 5340 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- ODO 5319 - CLINICAL ORTHODONTICS
- ORSUR 5344 - ORAL SURGERY 4
- PROSTH 5346 - IMPLANTOLOGY 2
- PROSTH 5347 - CURRENT TRENDS IN DIGITAL DENTISTRY
- PROSTH 5348 - DIGITAL DENTISTRY 2

Third Year-Summer Term

- CDENT 5342 - INTRODUCTION TO BEHAVIORAL DENTISTRY
- DENT 5377 - SUCCESSFUL PRACTICE MANAGEMENT 3

- DENT 5378 - QUALITIES OF A GENERAL DENTIST 9
- DENT 5383 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 1
- DENT 5388 - CLINICAL SPECIAL NEEDS DENTISTRY 1
- DMED 5370 - MULTIDISCIPLINARY CASE STUDIES
- DIASCI 5389 - CLINICAL EMERGENCY 1
- ENDOD 5388 - CLINICAL ENDODONTICS 1
- ORSUR 5388 - CLINICAL ORAL SURGERY 1
- PERIO 5379 - CLINICAL PERIODONTICS 1
- PROSTH 5375 - CLINICAL PROSTHODONTICS 1
- RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY
- RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 1

Fourth Year-Fall Term

- DENT 5000 - FULL-TIME DENTAL MEDICINE STUDY
- DENT 5417 - SUCCESSFUL PRACTICE MANAGEMENT 4
- DENT 5418 - QUALITIES OF A GENERAL DENTIST 10
- PROSTH 5377 - SIMULATED PATIENT TREATMENT

Fourth Year-Spring Term

- CDENT 5440 - STUDENT COMMUNITY OUTREACH AND EDUCATION PROGRAM (SCOPE) 2
- DENT 5440 - SENIOR CASE PRESENTATION
- DENT 5447 - SUCCESSFUL PRACTICE MANAGEMENT 5
- DENT 5448 - QUALITIES OF A GENERAL DENTIST 11
- DENT 5455 - CLINICAL ORAL DIAGNOSIS AND TREATMENT PLANNING 2
- DENT 5459 - CLINICAL SPECIAL NEEDS DENTISTRY 2
- DIASCI 5459 - CLINICAL RADIOLOGY
- DIASCI 5469 - CLINICAL EMERGENCY 2
- ENDOD 5448 - CLINICAL ENDODONTICS 2
- ORSUR 5449 - CLINICAL ORAL SURGERY 2
- PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2
- PERIO 5449 - CLINICAL PERIODONTICS 2
- PROSTH 5448 - CLINICAL PROSTHODONTICS 2
- PROSTH 5469 - CLINICAL IMPLANT DENTISTRY
- RESTD 5449 - CLINICAL RESTORATIVE DENTISTRY 2

Advanced Dental Education and Residency Programs

The School of Dental Medicine offers ten Advanced Dental Education and Residency Programs leading to a Certificate of Completion in the respective program. Programs of three-year duration offer an optional educational tract leading to a Master of Dental Science degree (MDS).

All residents in the various specialties begin their advanced education by studying a core curriculum. It includes, but is not limited to, an orientation program; Clinical Operations; BLS Certification; Infection Control Policies and Procedures; Ethics in the Dental Specialties; Chemical Dependency; Hospital Protocols and Procedures; Conferences / Classes; Advanced Oral Pathology; Applied Head and Neck Anatomy; Clinical Pharmacology; Intravenous and Inhalation Sedation; Management of Medical Emergencies; Mineralized Tissue Biology; Multidisciplinary Treatment Planning Grand Rounds; Oral and Maxillofacial Radiology and Imaging; Pathobiology and Immunology; and Research Design and Methodology

Details about the residency programs at Pitt Dental Medicine is available on our website at <https://www.dental.pitt.edu/education/advanced-dental-education-and-residency-programs>.

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 123 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences^[1] and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull. Every day, the positive contributions of our faculty, staff, residents and students-the Pitt Dental Medicine family-demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

General Dentistry and Specialty Clinics

The School of Dental Medicine provides clinical education and patient care through 15 dental clinics encompassing general dentistry, anesthesiology, special needs, emergency, endodontics, implants, oral and maxillofacial pathology, oral and maxillofacial surgery, orthodontics and dentofacial orthopaedics, pediatric dentistry, periodontics and preventive dentistry, dental hygiene, endodontics, prosthodontics, radiology, and restorative dentistry/comprehensive care.

Clinical Centers

The Multidisciplinary Implant Center focuses on patient care, teaching, and research related to the treatment of tooth loss and the functional bone and soft tissue deficits that can follow tooth loss.

The Center for Patients with Special Needs was established by Dean Thomas W. Braun as a school priority to centralize and increase treatment capacity for patients with physical, developmental, neurological, and intellectual disabilities.

University Dental Health Services (UDHS) is a legally separate nonprofit practice plan that is closely affiliated with the School of Dental Medicine. UDHS providers are full- or part-time faculty members, many of whom are board-certified specialists and nationally recognized experts in their respective fields.

Research Strengths

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Certificate

Dental Anesthesiology Certificate

The Department of Dental Anesthesiology directs and coordinates the three-year, CODA accredited, dental anesthesiology residency program. The goal of this program is to prepare dentists to manage pain and anxiety in adult, pediatric and special needs patients by using pharmacologic and non-pharmacologic techniques. A significant portion of the University of Pittsburgh School of Dental Medicine Residency Program in Dental Anesthesiology is a unit of the medical anesthesiology residency program, administered through the UPMC Medical Education Program (UPMC-MEP). At the conclusion of the program, the dentist will earn a certificate in dental anesthesiology and be proficient in providing all levels of anesthesia services for ambulatory patients undergoing a variety of medical and dental procedures.

A maximum of four dental anesthesiology residents are selected each year. They have the same responsibilities and are expected to meet the same competencies as medical residents. Residents in dental anesthesiology have standard postgraduate salaries and benefits.

Program Description by Year

The first year of the resident's clinical experience begins at the dental school with the resident attending all introductory courses and conferences in anesthesiology intended for post-graduate first-year residents. The dental resident becomes familiar with the anesthetic management of patients undergoing an array of dental procedures, including pediatric, special needs, oral surgery and implant surgery. Within this first year, one month is devoted to training in pediatric emergency medicine. The first-year residents are also responsible for teaching a course in medical emergencies to the other dental residents at the school.

The second and third years of the residency continue with rotations through UPMC Presbyterian and Montefiore Hospitals, UPMC St. Margaret's, Children's Hospital of Pittsburgh of UPMC, and Magee-Womens Hospital, along with one-month off-service rotations in: internal medicine, critical care medicine and advanced lung disease. During this rotation cycle, residents will participate in the anesthetic management of patients undergoing general surgery, complex head and neck procedures, orthopedic surgery, and transplantation operations. Three months at UPMC St. Margaret's will provide experience in a high-paced operating room that prepares the resident for private practice. Regional anesthesia and advanced pain management techniques are also developed. Children's Hospital of Pittsburgh of UPMC offers a diversity of experiences in managing the anesthetic requirements of children of all physical sizes and ages who are undergoing a wide variety of surgical procedures. Magee-Womens Hospital gives the resident an opportunity to learn about epidural and spinal anesthesia techniques intended for obstetric procedures. Magee-Womens Hospital utilizes an after-hours call schedule. The residents will be present at the dental school for several months in the second and third years providing clinical care and spending time with the adjunct faculty in private practice.

A focus of the training includes developing skills in the management of special needs patients receiving dental care. The University of Pittsburgh School of Dental Medicine has an active Center for Patients with Special Needs that provides the resident with a unique opportunity to provide anesthesia services to this underserved population. Residents will take part in regular journal reviews of current literature and a structured lecture series in anesthesiology. In addition, residents are expected to attend at least one national conference per year and initiate work on a mentored clinical research project.

The applicant must submit the American Dental Education Association Postdoctoral Application Support Service (ADEA PASS) application and register for the Match Program.

Learn more about requirements and application to the program by visiting dental.pitt.edu/dental-anesthesiology

The advanced general dentistry education program in dental anesthesiology is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Endodontics Certificate

The University of Pittsburgh School of Dental Medicine's Endodontic Residency Program was initiated by Dr. Andrew Michanowicz in May, 1969. This fully accredited two-year program enrolls four students per year. Residents start their program on July 1 of each year.

Throughout the years, the Endodontic Residency Program has continuously incorporated the latest innovations in the field. The use of endodontic

microscopy is the standard for each procedure. Residents are expected to have a working knowledge and experience with different file systems from various companies. Each resident has their own ultrasonic and advanced irrigation devices.

Research opportunities in several fields are available. The residents have the opportunity to work with National Institute of Health (NIH) funded researchers. Projects regarding microCT, bone biology, and craniofacial regeneration are available for resident participation.

The program helps the residents develop knowledge regarding every aspect of endodontics and prepares them to become members of the American Board of Endodontics.

On average, residents complete at least 350 cases prior to graduation. Cases include standard root canal therapy, retreatments, endodontic microsurgery, and pulpal regeneration.

Overall, the Endodontic Residency Program prides itself in helping residents develop and master endodontic skills while simultaneously identifying and pursuing avenues of interest in relevant basic science and endodontic technology.

Application

Applications are processed using ADEA Postdoctoral Application Support Service (PASS), or the self-managed application. A fee of \$50 is charged to those who chose to use the self-managed application. The application deadline is Sept. 2nd of the previous year. Interviews will be granted on a rolling basis.

For more information, please visit dental.pitt.edu/endodontics-residency

The advanced specialty education program in endodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

General Practice Residency

The General Practice Residency (GPR) Program, co-sponsored by the University of Pittsburgh Medical Center (UPMC) Graduate Medical Education, offers a one-year program that provides residents with postdoctoral clinical and didactic experiences. Based in the UPMC Montefiore Dental Center on the UPMC Presbyterian/Shadyside Campus, the program enrolls a combined total of three (3) residents each year. Residents completing the GPR earn a certificate of training.

Guided by the philosophy that oral health is an integral and interactive aspect of total health, residents engage in approximately nine months of comprehensive dental care. The remaining three months are spent on hospital-based rotations in internal medicine, anesthesia, emergency medicine, and oral and maxillofacial surgery.

In addition to intensive exposure to hospital-based dentistry, the program provides clinical and didactic training across a range of dental specialties. These include endodontics, periodontics, implant dentistry, prosthodontics, oral and maxillofacial surgery, oral pathology/oral medicine, community outreach and patients with complex medical conditions. Instruction is also provided in ancillary topics pertinent to dental practice, such as patient evaluation and physical examination, emergency medical care, inpatient care and hospital organization, and a multitude of other medical and dental subjects. The residents attend regular journal club and cross-disciplinary case conferences. The program also attends one professional development conference per year.

Residents will treat patients in the UPMC Dental Center at Montefiore Hospital, The University of Pittsburgh School of Dental Medicine and the Catholic Charities of Pittsburgh Free Health Care Center Dental Clinic.

Throughout the program, residents focus on the attainment of several objectives, all of which are derived from the Commission on Dental Accreditation's Standards for Advanced Education Programs in General Practice Residency. Upon completion of the program, General Practice residents are prepared to:

- Act as primary providers of dental care, delivering emergency and comprehensive oral health care which is patient-focused and coordinated across disciplines;
- Use advanced dental treatment modalities;
- Direct health promotion and disease prevention;
- Function effectively in hospital and non-hospital health care environments;
- Function effectively as members of multi-disciplinary teams;
- Apply scientific principles to learning and oral health care, which entails thinking critically, making evidence/outcomes-based clinical decisions, and utilizing technology-based information retrieval systems;
- Engage in research, scientific writing, and presentations in order to advance dental medicine;
- Adopt a system of values that emphasizes lifelong learning, patient-centered care, exercise of professional ethics, adaptability, and acceptance of cultural diversity among patients and colleagues;
- Understand public oral health needs and practice community service.

While in the program, residents receive UPMC Health System's postgraduate trainee stipend and benefits package. Those interested in making application to the program may do so through the American Dental Education Association's Postdoctoral Application Support Service (PASS).

For additional information, please visit dental.pitt.edu/gpr

The general practice dental residency program is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Oral and Maxillofacial Pathology

The School of Dental Medicine Department of Diagnostic Sciences Residency Program in Oral and Maxillofacial Pathology is a 3-year residency certificate program offered through the University of Pittsburgh Medical Center Medical Education (UPMCME). This program is fully accredited by the Commission on Dental Accreditation. The program will accept a maximum of one resident a year. Successful completion of the program will lead to a certificate in Oral and Maxillofacial Pathology and will qualify the graduate to sit for the specialty board examination in Oral and Maxillofacial Pathology.

Curriculum

Faculty members are certified by their specialty boards of Oral and Maxillofacial Pathology, Oral and Maxillofacial Radiology, Oral Medicine, or Anatomic Pathology, and possess a wide range of clinical, teaching, research, and surgical pathology experience. The residency program offers a mix of didactic courses, electives, microscopic general and oral pathology, clinical oral pathology, oral and maxillofacial radiology, hospital rotations, and research. Clinical patients are seen at the University of Pittsburgh School of Dental Medicine and through the faculty practice plan at the University Dental Health Services, Inc., as well as during the rotation in dermatopathology.

Rotations

Most pathology rotations take place at UPMC-Presbyterian Hospital, in the Oakland section of Pittsburgh, across the street from the University of Pittsburgh School of Dental Medicine. UPMC is a major regional, tertiary care and transplant center that will expose the resident to a large volume and a wide variety of experiences. Rotations include 12 weeks in head and neck anatomic pathology, 6 weeks in dermatopathology, 4 weeks in hematopathology-lymph node, 2 weeks in molecular and genomic pathology, 2 weeks in bone and soft tissue pathology, 4 weeks in pediatric pathology, and 2 weeks in autopsy, with additional opportunities in gastrointestinal pathology ("GI quicks"), thoracic pathology, surgical breast pathology, pathology informatics, or research. The program allows some flexibility for the resident to concentrate on a particular area of oral and maxillofacial pathology.

More information including requirements and making an application to the program are available by visiting dental.pitt.edu/omp-residency

The program in dental education is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Oral and Maxillofacial Surgery

The Department of Oral and Maxillofacial Surgery (OMS) at the University of Pittsburgh School of Dental Medicine offers a **six-year, dual-degree program**, and a **four-year program**. Three residents are accepted each year (two six-year positions and one four year position), and they commence training as interns in the department. In the six-year, dual-degree program, two residents join their corresponding medical school class in the spring of the first year. These residents earn a medical degree and participate in advanced surgical training in oral and maxillofacial surgery, spending a total of 33 months on the oral and maxillofacial surgery service. The four-year program offers a total of 33 months on the oral and maxillofacial surgery service and rotations on medicine, general surgery and anesthesia services the other 15 months.

Five full-time oral and maxillofacial surgery faculty members, as well as part-time faculty and private practice oral and maxillofacial surgeons from the Pittsburgh area, provide surgical training and mentoring. The School of Dental Medicine has, on-site, a modern ambulatory surgical suite with full anesthesia support and facilities that enhance caseload and outpatient surgical management. The department provides instruction in anesthesia, dentoalveolar surgery, dental implants, head and neck pathology, cleft and craniofacial disorders, craniofacial trauma, and temporomandibular joint surgery.

The program is designed to be truly "integrated" and allow for the maximal benefit of coordinated medical training, and progression of knowledge and skill in oral and maxillofacial surgery. Residents are exposed to the full scope of oral and maxillofacial surgery throughout their training-including interdisciplinary care. From day one, new residents work with dental students in a training and supervisory role in the undergraduate OMS clinic. They are involved in managing emergency cases at the UPMC Montefiore Dental Center and in assist the attending surgical faculty in the operating rooms of UPMC Presbyterian/Shadyside, Mercy Hospital, and Children's Hospital of Pittsburgh of UPMC. During the entire final year of the program, the chief residents devote a full 12 months to the OMS service. Residents are also required to attend the Multidisciplinary Surgery Grand Rounds, Journal Clubs, treatment planning conferences in the Dentofacial Deformities Program, and the weekly Surgical Treatment Planning Conference.

Application

The annual application deadline is October 1 of the preceding year. Late applications will not be accepted. Applicants must graduate from an ADA-accredited dental school, must apply through the ADEA Postdoctoral Application Support Service (PASS), and must participate in the Postdoctoral Dental Matching Program (MATCH).

Interview and Selection

Applicants are screened for interviews that occur in November of each year. In late January, through the MATCH Program, two applicants are selected for the six-year program and one for the four-year program to matriculate into the first year of residency, which commences in late June. Applicants matched to the University of Pittsburgh are enrolled in both the Department of Oral and Maxillofacial Surgery residency and the University of Pittsburgh School of Medicine.

For additional information, please visit dental.pitt.edu/oms-residency

The Department of Oral and Maxillofacial Surgery adheres to the University of Pittsburgh's non-discrimination policy.

The advanced specialty education program in oral and maxillofacial surgery is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Orthodontics and Dentofacial Orthopedics Certificate

The Orthodontics and Dentofacial Orthopedics Advanced Dental Education/Residency Program at the University of Pittsburgh School of Dental Medicine requires a three-year course of study. The goals of the program are to provide an excellent advanced education in the specialty of orthodontics and dentofacial orthopedics, to provide high quality clinical care, and to conduct research designed to advance the knowledge of the specialty. The curriculum reflects this mission and provides residents with the necessary knowledge and experience to enter the specialty well prepared for practice. The curriculum is based upon a solid foundation of scientific principles and methods that residents may use as a rational framework for understanding treatment and evaluating future changes in the specialty. The application of basic and clinical scientific knowledge to the practice of orthodontics is the fundamental tenet of the curriculum.

Successful completion of the program leads to a certificate in orthodontics and dentofacial orthopedics, and enables graduates to participate in the American Board of Orthodontics certifying examination. Students may also pursue a course of study leading to a Master of Dental Science degree in Orthodontics and Dentofacial Orthopedics.

Components of the program are:

- Clinical training which prepares the resident for specialty board certification
- Education from a broad curriculum, which provides residents with greater insight on the nature of orthodontics
- Research to enrich the profession and develop critical thinking skills

The curriculum for the Orthodontics and Dentofacial Orthopedics Residency Program is designed to be taught at the postdoctoral level. The path of study followed by the residents comprises a core curriculum of graduate level basic sciences, followed by a broad course of study in craniofacial biology, clinical sciences, and orthodontic techniques. A significant portion of the curriculum is devoted to clinical orthodontics, allowing the resident to develop proficiency through a broad, diverse experience in patient care.

Conferences provide an excellent foundation in the basic and clinical sciences and provide opportunity for study in growth and development, dental statistics, occlusion and malocclusion, development of the dentition, dentofacial abnormalities, biomechanical orthodontics, genetics, bone biology, cephalometrics, diagnosis and treatment planning, evidence-based care, surgical orthodontics, practice management, and orthodontic technique. Orthodontic conferences and literature review sessions provide opportunities for critical analysis of historical and current literature with application to contemporary orthodontic principles in case diagnosis and treatment planning.

Scholarly activity in the form of basic or clinical research is a fundamental component of the curriculum. Residents design, implement, and complete a research project that provides greater knowledge of the specialty and permit residents to develop the ability to apply the scientific method.

Applicants must apply through the Postdoctoral Application Support Service (PASS). Four residents are accepted each year, and all positions are awarded through the Postdoctoral Dental Matching Program in the Phase I (fall) match. The program is fully accredited by the Commission on Dental Accreditation.

Read more about the Orthodontics and Dentofacial Orthopedics Residency Program by visiting dental.pitt.edu/ortho-residency.

The advanced specialty education program in orthodontics and dentofacial orthopedics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Pediatric Dentistry Certificate

The Department of Pediatric Dentistry offers a two-year residency program resulting in a Certificate in Pediatric Dentistry. Residents are trained in the advanced diagnostic and clinical techniques necessary to provide specialty care to children, adolescents, and patients with special health care needs. Residents are eligible to participate in the American Board of Pediatric Dentistry certification examinations, upon successful completion of the Program.

All facilities within the School of Dental Medicine are available for resident use, and there is a vast Health Science Center Library system housed in the medical school directly across the street from the School of Dental Medicine.

Rotations

Rotations are scheduled at UPMC - Children's Hospital of Pittsburgh of and UPMC - Presbyterian Hospital.

The following rotations are completed at UPMC - Children's Hospital of Pittsburgh:

- Pediatric Medicine
- Anesthesiology
 - Hospital Based Operating Room
 - Hospital Grand Rounds

Advanced Pediatric Dentistry residents also rotate through the Pre-doctoral Pediatric Dentistry Clinic and the Preclinical Simulation Clinic to provide instruction and clinical supervision to pre-doctoral dental students.

Applications to the Department of Pediatric Dentistry Residency Program must be filed through the Postdoctoral Application Support Service (PASS) and the Postdoctoral Dental Matching Program (MATCH).

Applications are due by **September 15** of the preceding year.

For additional information about the residency program in pediatric dentistry, including how to apply, please visit dental.pitt.edu/pediatric-dentistry-residency

The advanced specialty education program in pediatric dentistry is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Periodontics Certificate

The residency in periodontics is a three-year certificate program. Each resident is exposed to all periodontal diagnostics and therapies and is expected to be competent in all phases of clinical periodontal care. This includes competency in implant therapy and the provision of moderate parenteral sedation. All residents are encouraged to participate in the American Academy of Periodontology board certification process, and to graduate as board-certified periodontist. A master's degree option is available to residents in the Department of Periodontics. Three residents are accepted annually for the three-year program.

Residents in the Periodontics Residency Program may elect to pursue a master of dental science degree (MDS) alongside their certificate. Eligible residents who elect this option must pass the Master of Dental Science Entrance Examination and enroll in the tract with the Pitt Registrar's Office. Please talk with the dental residency program administrator for details.

All residents must be graduates of an accredited U.S. or Canadian dental school. U.S. citizenship is not a requirement.

Applications to the residency program are accepted through the ADEA Postdoctoral Application Support Service (PASS) or the self-managed application through the Office of Residency Education (**412-648-8406**). Applications are due before August 1 of each year.

Learn more about the Periodontics Residency Program by visiting [Advanced Education & Residency Program in Periodontics | School of Dental Medicine \(pitt.edu\)](http://Advanced Education & Residency Program in Periodontics | School of Dental Medicine (pitt.edu)).

The advanced specialty education program in periodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Prosthodontics Certificate

The Advanced Education Program in Prosthodontics is an American Dental Association-accredited three-year certificate program with the option to complete a master's degree. Students who pursue a master's degree will receive their MDS upon completion of the extra required didactic courses within the three year limit. The Program's didactic and clinical components are designed to train and equip the graduate to transfer new prosthodontic knowledge and approaches, to implement evidence-based prosthodontic decision-making in clinical practice, and to prepare for certification by the American Board of Prosthodontics.

Residents in the Prosthodontics Residency Program may elect to pursue a master of dental science degree (MDS) alongside their certificate. Eligible residents who elect this option must pass the Master of Dental Science Entrance Examination and enroll in the tract with the Pitt Registrar's Office. Please talk with the dental residency program administrator for details.

Objectives

The objectives of the residency program in the Department of Prosthodontics are to:

Provide clinical training in all aspects of prosthodontics including:

- clinical experiences to ensure proficiency in all aspects of prosthodontics;
- clinical experiences to ensure proficiency in diagnosis, treatment planning, and management of multi-disciplinary cases;
- to recruit and retain faculty with broad and varying backgrounds in clinical prosthodontics, who espouse diverse philosophies in patient care and prosthodontic procedures, and effectively communicate their knowledge and skills to residents.

Provide biologically and scientifically based education in order to:

- develop, monitor, and update all prosthodontic seminars and conferences to present contemporary, technologically, and biologically-oriented information;
- provide opportunities for scholarly activities, applied research, scientific articles, and clinical and/or research presentations.

Prepare and train residents for a career in prosthodontic practice and/or academics to:

- require all residents to complete annual comprehensive examinations (ACP Annual Board Review Examinations);
- provide opportunities for completion of a treatment case suitable for presentation to the American Board of Prosthodontics;
- provide residents with opportunities to pursue academic degree(s) in related disciplines.

Provide quality and professional care to all patients to:

- ensure ethical and professional conduct by all individuals involved in patient care;
- ensure proper care of all patients in the prosthodontic residency program;
- ensure patient satisfaction with the care they receive.

Program Requirements

The program's clinical components focus on diagnosis, treatment planning, and treatment of edentulous, partially edentulous, and completely edentulous patients. Fixed, removable, and implant prosthodontics constitute the major portion of the clinical training, with occlusion, temporomandibular disorder, and geriatrics as integral components of all phases of care. Residents are required to manage and treat patients requiring complete dentures, removable partial dentures, fixed partial dentures, and implant restorations. Clinical training for residents in implant dentistry emphasizes all aspects of implant treatment including implant placement. Additionally, the program requires the resident's involvement in the treatment of patients with congenital and acquired defects.

To learn more about the Residency Program in Prosthodontics, please visit dental.pitt.edu/prosthodontics-residency

The advanced specialty education program in prosthodontics is accredited by the Commission on Dental Accreditation (CODA). The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at 312-440-4653, or at 211 East Chicago Avenue, Chicago, IL, 60611. The Commission's web address is <http://www.ada.org/100.aspx>.

Department of Oral and Craniofacial Sciences

The School of Dental Medicine Department of Oral Biology Graduate Program offers basic, translational, and clinical studies in oral biology, biomedical research and health that span spatial scales from the molecular and cellular levels to the whole organism level. Studies include fundamental biological phenomena related to the development, structure, and function of the craniofacial region and the development of new therapies, biomaterials, and diagnostic tools for the treatment of diseases and disorders in the craniofacial area. The Graduate Program provides a stimulating and collegial environment to prepare motivated and qualified students for careers in academia, industry, and government.

Students may earn Doctor of Philosophy (PhD) and Master of Science (MS) degrees in Oral Biology within one of two research concentrations:

- Craniofacial and Dental Genetics
- Craniofacial Tissue Regeneration

Students will work with faculty in the Department of Oral Biology on research in these concentrations.

The program is open to post-baccalaureate students, pre-doctoral dental students, and dental residents. School of Dental Medicine pre-doctoral students and residents may apply for a dual degree option with the PhD or MS Graduate Programs in Oral Biology. Pre-doctoral dental medicine students may also pursue dual degrees while enrolled in the School of Dental Medicine through collaborative programs with the School of Public Health, the School of Law, and the School of Education.

Admissions will only be considered for the fall term. However, early applications are encouraged, and offers may be extended to suitably qualified candidates before the application deadline.

To read detailed information about the program options as well as how to apply, please visit dental.pitt.edu/oral-biology-academic-programs.

About the School

Established in 1896, the University of Pittsburgh School of Dental Medicine has been educating students to take their places among the best dental practitioners, researchers and educators in our region, across the country, and even around the world. We are one of six Schools of Health Sciences at the University and are the only school to manage our own clinic. Our accomplishments reflect the dedication and success of each member of the School of Dental Medicine family.

We are proud of our long tradition as innovators in dental medicine. Our first female student was admitted 117 years ago, and today more than half of our vibrant and diverse first-year pre-doctoral class are women. We nurture in our students a strong foundation in the biological, behavioral and clinical sciences and a belief in the importance of professionalism and life-long learning.

Half a century ago we pioneered the specialty dental care that we now deliver in our fully equipped Center for Patients with Special Needs. The School's general dental clinics and 11 specialty clinics play an integral role in improving the oral health of the patient population of southwestern Pennsylvania and beyond. Some patients travel hundreds of miles to access the high-quality care our clinics provide every day.

Our researchers expand the horizons of knowledge and are internationally renowned for their groundbreaking developments in the areas of craniofacial genetics and craniofacial regeneration. We are identifying genes that contribute to complex human phenotypes, and are using tissue engineering to heal wounds and restore function and appearance to defects of the face and skull.

Every day, the positive contributions of our faculty, staff, residents and students—the Pitt Dental Medicine family—demonstrate their commitment to our mission of advancing the future of dental medicine through teaching, research and service.

Degree Programs

Along with several specialized degree programs, degrees offered at the School of Dental Medicine include the doctor of dental medicine (DMD); doctor of philosophy (PhD); master of science (MS); master of public health (MPH) offered in conjunction with the School of Public Health; and bachelor of science (BS).

The four-year doctor of Predoctoral (DMD) Program prepares students to provide comprehensive care to a diverse patient population. The competency-based curriculum emphasizes health promotion and disease prevention, and prepares students to provide individualized treatments using the best scientific evidence available. Graduates are equipped to practice as independent, entry-level general practitioners.

The Advanced Standing (DMD) Program places qualified graduates of foreign dental schools as third-year dental students. These students are integrated into the program and complete the third- and fourth-years of the pre-doctoral curriculum with the rest of the class.

In collaboration with Pitt Public Health, the four-year DMD/MPH in dental public health offers customizable course selection with a special emphasis on oral health-specific public health issues.

The University of Pittsburgh School of Dental Medicine's Dental Hygiene Program provides students a unique academic environment where they can earn either an Associate of Science or a Bachelors Degree in Dental Hygiene. The interprofessional educational experiences within the school's specialty dental clinics and the University-based hospitals, in conjunction with didactic, community outreach, and research activities, affords the delivery of high-quality education.

Research Strengths

Research efforts include dental and craniofacial genetics, craniofacial anomalies, caries, periodontal disease, pharmacology, pain control, tissue engineering, craniofacial regeneration, educational research, informatics, and implantology.

Identification

The School of Dental Medicine is undertaking investigations to identify genes that contribute to complex human phenotypes, primarily those involved in dental and craniofacial disorders, including behavioral and epidemiological factors. New territory is being charted to develop the first-known collection of DNA samples paired with anonymized dental records to support genetics research.

Treatment

Tissue engineering-based approaches are being developed to treat complex multi-structural wounds and defects of the face and skull in a way that restores both function and appearance. The school is at the forefront of research to develop relevant translational treatment solutions usable by practicing dentists.

Application

The School of Dental Medicine is identifying factors that lead to oral health disparities in children and families in Appalachia. Oral public health research leads to improved interventions, understanding, and advancements for the future of oral health education and treatment.

Master's

Oral and Craniofacial Sciences, MS Program

The Oral Biology major was renamed effective Spring 2021. Students currently enrolled in the program will be given the option to complete the program under the original major name or transfer to the new name. The last semester that students can be admitted under the original major is Spring 2021 and the last semester a student can graduate from the original major is Fall 2026.

The MS Program requires about two years, but no longer than four, to complete. It is distinct from the PhD Program. MS students may apply to be accepted for the PhD Program once they are accepted into the MS program. If the student is accepted into the PhD program at a later date, courses taken toward the MS will satisfy doctoral degree credit and residency requirements.

Requirements for the MS Degree

- Total of 30 credits (28 didactic and 2 in research);
- Successful completion of core curriculum
- Scientific Ethics/Fundamentals of Research course;
- Quantitative methods and design course(s);
- A one-year research project leading to an master's thesis;
- Defense of the master's thesis before a thesis committee research; and,
- A master's thesis.

Students must successfully complete the first-year required curriculum and receive a **grade of B, or better**, in all required courses.

A student who earned a master of science degree from another institution may petition the Graduate Studies Committee to waive the preliminary examination.

Fall Term First Semester

- OCS 3504 - JOURNAL CLUB
- OCS 3516 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1

- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENSIS
- OCS 3505 - DIRECTED RESEARCH

Spring Term Second Semester

- OCS 3504 - JOURNAL CLUB
- OCS 3546 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 2
- OCS 3553 - FOUNDATIONS IN GENETIC EPIDEMIOLOGY
- OCS 3554 - FOUNDATIONS OF CRANIOFACIAL ANATOMY
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENSIS
- OCS 3505 - DIRECTED RESEARCH

Summer Term Third Semester

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- OCS 3504 - JOURNAL CLUB
- OCS 3505 - DIRECTED RESEARCH

Fall Term Fourth Semester

- OCS 3505 - DIRECTED RESEARCH

Spring Term Fifth Semester

- OCS 3508 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- OCS 3505 - DIRECTED RESEARCH

Summer Term Sixth Semester

- OCS 3511 - THESIS RESEARCH

PhD

Oral and Craniofacial Sciences, PhD Program

The Oral Biology major was renamed effective Spring 2021. Students currently enrolled in the program will be given the option to complete the program under the original major name or transfer to the new name. The last semester that students can be admitted under the original major is Spring 2021 and the last semester a student can graduate from the original major is Fall 2026.

The PhD Program requires approximately four to five years to complete and employs a curriculum which is separate from the MS Program . Students may enter the PhD program directly following their undergraduate degree and do not necessarily have to earn a master's degree first. Earning a master's degree can be incorporated into the PhD program without increasing the total length of time in studies.

Requirements for the PhD degree (a total of 72 credits of coursework; 50 didactic and 22 research)

- Scientific ethics/fundamentals of research course;
- Quantitative methods and design course(s) (two for students in the Craniofacial Genetics Tract);
- Written comprehensive examination after the sixth semester (for advancement to PhD candidacy);
- Dissertation proposal defense;
- Approval of a Dissertation Committee and dissertation research; and
- Dissertation defense.

Students must maintain a **minimum cumulative GPA of 3.0** in required courses to be eligible to take the comprehensive examinations, as well as to graduate.

Fall Term First Semester

- OCS 3504 - JOURNAL CLUB
- OCS 3516 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENSIS
- OCS 3505 - DIRECTED RESEARCH

Spring Term Second Semester

- OCS 3504 - JOURNAL CLUB
- OCS 3546 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 2
- OCS 3553 - FOUNDATIONS IN GENETIC EPIDEMIOLOGY
- OCS 3554 - FOUNDATIONS OF CRANIOFACIAL ANATOMY
- ORBIOL 3555 - GENERAL EMBRYOLOGY & CRANIOFACIAL ORGANOGENSIS
- OCS 3505 - DIRECTED RESEARCH

Summer Term Third Semester

- INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH
- OCS 3504 - JOURNAL CLUB
- OCS 3505 - DIRECTED RESEARCH

Fall Term Fourth Semester

- OCS 3603 - HUMAN GROWTH AND DEVELOPMENT
- OCS 3505 - DIRECTED RESEARCH

Spring Term Fifth Semester

- OCS 3508 - CURRENT TOPICS IN ORAL HEALTH RESEARCH
- OCS 3505 - DIRECTED RESEARCH
- OCS 3509 - COMPOSITION, STRUCTURE, AND FUNCTION OF MINERALIZED TISSUES
- OCS 3512 - CRANIOFACIAL GENETICS

Summer Term Sixth Semester

- OCS 3505 - DIRECTED RESEARCH

Fall Term Seventh Semester

- OCS 2110 - TEACHING PRACTICUM
- OCS 3505 - DIRECTED RESEARCH

Spring Term Eighth Semester

- OCS 3505 - DIRECTED RESEARCH

Summer Term Ninth Semester

- OCS 3505 - DIRECTED RESEARCH

Following Terms Tenth through Twelfth

School of Education

Mission/Vision

The following statement is the Mission/Vision of the School Education, which was adopted in January 2019. It encapsulates what we do, what we believe, and who we continually seek to become as members of the School community.

We ignite learning. We strive for well-being for all. We teach. We commit to student, family, and community success. We commit to educational equity. We advocate. We work for justice. We cultivate relationships. We forge engaged partnerships. We collaborate. We learn with and from communities. We innovate and agitate. We pursue and produce knowledge. We research. We disrupt and transform inequitable educational structures. We approach learning as intertwined with health, wellness, and human development. We address how national, global, social, and technological change impacts learning. We shape practice and policy. We teach with and for dignity. We think. We dream. We lead with integrity. We are the School of Education at the University of Pittsburgh.

Admission

Admission Procedure

Faculty members in the program to which the student applies evaluate the applicant's credentials and recommend admission for those applicants meeting the criteria set by the program.

Approved applicants will be notified of their admission for a specific term and asked to indicate whether or not they accept the offer of admission. Should they be unable to register for courses for the term specified in their admission letter, they should notify the Office of Admissions and Enrollment Services. Approved applicants may defer admission for up to one year from the term specified in their admission letter. Approved applicants unable to register for courses within one year of the term specified in their admission letter must reapply for admission.

Changing Programs for Graduate Study

A student wishing to change programs for graduate study must file a new application for admission. All work taken both in undergraduate and graduate study will be reviewed by the program to which the student is applying before a decision will be made about admission to the new program. Any change from one program to another in the School of Education while the student is on active status will not alter that status. Thus, the student must register within the dates set for continuing active students.

Financial Assistance

Financial assistance is available to graduate students through graduate student assistantships (GSA), teaching assistantships (TA), teaching fellowships (TF), graduate student researchers (GSR), a variety of scholarships and fellowships, and loan programs. GSA, TA, TF, and tuition scholarship awards are primarily merit-based. GSA, TA, and TF awards provide a stipend and tuition in return for carrying out assigned duties. (*See Teaching and Research Appointments under Financial Aid for further detail.*) Other merit-based scholarships and fellowships established through gifts or grants both within and outside the University may also be available to students.

Advising

Each student is assigned an academic advisor at the time of admission to a program. All course work scheduled must be approved by the academic advisor, who assists in the preparation of a student's plan of studies and who regularly meets with the student to review the student's academic progress. Most School of Education faculty members are not in residence from May until late August. Thus, students should consult with their academic advisors prior to the end of the Spring term to complete registration forms for the upcoming Summer and Fall terms.

Each graduate student who is completing a master's thesis or doctoral dissertation works with a research advisor who provides guidance during the conduct of the thesis or dissertation research. The research advisor may be the same faculty member as the academic advisor or another faculty member. Whatever the case, the faculty member's consent to serve as the research advisor must be formally obtained. A student continuing from a master's program involving a thesis to a doctoral program may select a different research advisor to provide guidance for the doctoral dissertation.

The student, the advisor, the program, or the department may initiate a change of the academic advisor or the research advisor.

Commonwealth Teacher Education Certification Programs

Teacher education certification programs are offered in both general and special education.

Option 1. Initial Certification-Available for Primary Plus PreK-4, Teacher of Students with Visual Impairments (TVI) PreK-12, secondary content areas - Math, English, Science and English Education 7-12 and World and Heritage Languages (K-12). These programs result in eligibility for a teaching certification without a graduate degree.

Option 2. Certification Plus a Graduate Degree-for students seeking initial general or special education teacher certification along with a master's degree (e.g., Master of Arts in Teaching [MAT] or Master of Education [MEEd]).

Option 3. Dual certification (MOSAIC/CASE) e.g. Secondary Certification and preK-12 special education; PreK-4 and preK-12 special education.

Option 4. Additional Field Certification-for students already certified in one or more teaching fields who are seeking teacher certification in an additional specialty area but who are not pursuing a graduate degree.

Advanced certification programs include:

- Supervisory Certification (e.g., Curriculum and Supervision, Special Education)
- Educational Specialist Certification (e.g., as a reading specialist, TVI, Special Ed Teacher Prep.)
- Administrative Certification (e.g., as a principal, superintendent)

University certificates are awarded to students who complete commonwealth teacher education certification programs offered in Teaching, Learning, and Leading. Students in these programs must apply for graduation at the beginning of the term prior to the term they expect to complete their programs. Eligibility for the University certificate is verified at the same time that a student's application for commonwealth certification is endorsed by the School of Education and sent to the Pennsylvania Department of Education in Harrisburg..

Option 5. Joint Program - Available for students in the MSW/CAST program are eligible for an initial teaching certificate secondary content areas - Math, English, Science and English Education 7-12 and World and Heritage Languages (K-12) paired with and a Masters Degree in Social Work (MSW).

Commonwealth Teacher Education Certification Regulations

The following section details regulations pertaining to the school's teacher education certification programs.

Instructional I and II Certification

The **Instructional I**, or provisional, certificate is issued by the Pennsylvania Department of Education (PDE) to applicants who:

- possess a baccalaureate degree with a 3.0 grade point average;
- have successfully completed a PDE-approved teacher certification program;
- pass all required PRAXIS, PECT and/or PAPA Examinations; and
- are recommended for certification by the college or university offering the PDE-approved teacher certification program.

An Instructional I certificate is valid for six years.

The **Instructional II**, or permanent, certificate is issued by PDE to applicants who have completed all of the following:

- A PDE-approved induction program for beginning teachers.
- Three years of satisfactory teaching in the field specified on an Instructional I certificate, attested to by the chief school administrator of the approved public or non-public school in Pennsylvania in which the most recent service of the applicant was performed.
- Twenty-four credit hours of post-baccalaureate study or in-service courses approved by PDE. (Some credits earned beyond the baccalaureate degree in teacher education study at the University of Pittsburgh may be used to satisfy this requirement.)

Applicants already holding the Instructional I certificate who are seeking admission to the School of Education in pursuit of Instructional II certification may be admitted under special graduate status. Applicants desiring to combine Instructional II certification with a master's or doctoral degree must apply for admission to an academic program offering the desired degree.

Additional Field Certification

The School of Education offers additional field certification study opportunities to students already holding a Pennsylvania Instructional I or Instructional II certificate. Students must complete major field prerequisites, course work in the subject area pedagogy, and an advanced teaching practicum (modified student teaching) and pass the PRAXIS or PECT Examination specialization test in the additional area. They must also successfully complete a PDE 430 in the additional area. Individuals who possess an Instructional II certificate and who complete requirements for an additional certification area will receive Instructional II certification in the additional certification area.

Grade Point Average/Academic Probation

All students enrolled for teacher education study are required to maintain a grade point average (GPA) of at least 3.00. The cumulative GPA is based on all course work taken after enrollment for teacher education study. A student is automatically placed on academic probation when the cumulative GPA, exclusive of transfer credits, falls below 3.00. No student on academic probation is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum. Although the credits allowed for acceptable work completed elsewhere by transfer students count toward the total number of credits required for teacher education study, the grades earned in such courses are not included in GPA computations, except in determining the GPA required for admission to the School of Education.

Credit Requirements

Teacher education study in the Instructional I certification program requires the satisfactory completion of a minimum of 30 credits of course work approved by the department and the school. The Master of Arts in Teaching option requires 36 credits. Credit requirements for other certification options vary. Certification by the Pennsylvania Department of Education is recommended only for those students who have satisfactorily completed all courses required for certification with at least a 3.00 GPA.

Teacher Certification Testing Program

The PAPA/core battery of tests, required for some students seeking their first Instructional I certificate, consists of a series of examinations to assess basic communication skills, general knowledge, professional knowledge, and specialized area knowledge. Persons with an undergraduate degree already holding a Pennsylvania Instructional I or II certificate are exempt from the PAPA/core series. Individuals seeking Instructional I certification in more than one area must take and pass specialization area tests in all areas in which certification is sought. Individuals seeking additional field certification must pass the PRAXIS Examination in the specialization area.

Students completing an Instructional I certificate in preK-4 education, a certificate in preK-4/preK-12 special education or a secondary/preK-12-12 special education certificate must pass the appropriate PECT and Praxis tests.

Students may take the PRAXIS Examinations at any point during or after attendance at a post-secondary institution. The tests are administered four times each year at the University of Pittsburgh. Some tests are offered every day (when the testing sites are open) while others are administered during a "testing window" which is usually a two week period, usually occurring monthly. Go to the PRAXIS website for information on registering to take the exams.

Student Teaching

In most programs, field experience in local public schools is required throughout the academic year (August to June). When a student accepts their offer of admission, they are required to complete information about student teaching. Applicants must also submit results from a tuberculin test, child abuse clearance, and criminal history check, as required by Pennsylvania Acts 33 and 34. Students must also submit results from a Federal Criminal History Record check by obtaining fingerprint results through the FBI. Lastly, students must successfully pass an online training, Protecting Children from Abuse and also read the PA Mandated Reporter law and sign to indicate understanding.

Student teaching usually begins in late August and sometimes sooner than the opening day of University classes. Specific procedures and regulations governing student teaching practicum can be found in the student teaching handbook.

Teaching Internship

Students in the Master of Arts in Teaching option must complete an academic year (August to June) teaching internship in lieu of student teaching. The internship requires a minimum of 20 hours per week in the Fall term and 30 hours per week in the Spring and Summer terms. To qualify for the internship and the Pennsylvania Teacher Intern certificate, applicants must:

- As required by Pennsylvania Acts 33 and 34 submit the following clearances: Federal Criminal History Record by obtaining fingerprint results through the FBI; Pennsylvania State Criminal Record Check; Pennsylvania Child Abuse History Clearance. If there is a criminal infraction on any of these clearances, school placement for the school is unlikely, which will require the student to withdraw from the class. The University cannot guarantee that a person with entries in their criminal record will be permitted to do assignments in a school. While State law bars certain offenders from schools, districts often impose more extreme requirements. Students who have entries in their records should consult the Coordinator of Clinical Practice on whether a placement will be likely
- Pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- Satisfy the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)

Students must also successfully pass an online training, Protecting Children from Abuse, submit a signed Arrest/Conviction Report and Certification Form, and also read the PA Mandated Reporter law and sign to indicate understanding

Advanced Teaching Practicum

Students in the additional field certification option must complete an advanced teaching practicum, (modified student teaching experience) which vary based on the program requirements.

Master's Degree Requirements

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Common Requirements

Most master's degrees awarded by the School of Education require the completion of an approved plan of studies consisting of a minimum of 30 credits and the passing of a comprehensive examination.

Acceptance of Transfer Credits

For University-wide rules, see Acceptance of Transfer Credits under General Academic Regulations. School-specific detail follows.

A maximum of 6 transfer credits may be counted toward an MA or MS degree. A maximum of 12 transfer credits may be counted toward an MAT or MEd degree. Only graduate courses taken as a graduate student may be transferred and applied toward a master's degree. The only exceptions are courses taken while an undergraduate student at the University of Pittsburgh during undergraduate study that meet the requirements in the Academic Regulations

Grade Point Average/Academic Probation

All students enrolled in master's degree programs are required to maintain a grade point average (GPA) of at least 3.000. The cumulative GPA is based on all course work taken after enrollment in the appropriate graduate program. A student is automatically placed on academic probation when the cumulative GPA after 6 credits or more, exclusive of transfer credits, falls below 3.00. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.500 GPA in the next term (of at least 6 credits) or raise the cumulative grade point average above 3.000. A student can only

be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of a letter from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after one term on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Statute of Limitations

All requirements for a master's degree must be completed within a period of 4 consecutive calendar years from the student's initial registration for master's study in an MA or MS degree program or within 5 years in an MAT or MEd program.

Under certain conditions, the dean/assistant dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean's Office of the school. The statute of limitations can only be extended once.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of one year to may be granted to master's students. The rationale for the leave of absence must be stated in advance, recommended to the dean by the department, and approved by the Dean's Office. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student. Readmission following an approved leave of absence is a formality.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Plan of Studies

Before completion of 15 credits, students, in consultation with their academic advisor, should complete a Plan of Studies that conforms to program requirements. The plan of studies, approved by the academic advisor and the program coordinator.

Any changes in the Plan of Studies must be approved by the academic advisor and the program coordinator, conform to program requirements. At the time of graduation, completed courses must comply with the approved Plan of Studies.

Basic Areas of Education Requirement*

All master's degrees conferred by the School of Education require a minimum of 9 credits of study from the Basic Areas of Education (BAE), 3 credits each from courses offered in the content areas of psychological perspectives on education, social and cultural perspectives on education, and research methods. Individual programs achieve the distribution requirements in various ways, including integrating the content across multiple courses or by offering a choice of various electives in each content area. See individual program curricula.

School of Education Master's Degree Comprehensive Milestone Assessment Policy

Students invest in graduate school to advance their knowledge and skills. With many different training experiences and course assignments, this newly-acquired knowledge and skill base can feel disjointed or segmented.

World-class training programs create synthesizing experiences for students to organize and apply their knowledge and skills. The University of Pittsburgh requires completion of a comprehensive exam or its equivalent for all M.A., M.Ed. and M.S. degree completion. Comprehensive exams are separate from a thesis for programs with a thesis option and are required regardless of thesis completion. This requirement takes different forms across the School of Education and is referred to as comprehensive milestone experiences or assessments throughout this policy.

Programs with Culminating or Comprehensive Milestone Experiences:

Master-level students may be required to complete other kinds of scholarly and/or professional milestone experiences that serve as a student's comprehensive milestone assessment as determined by their majors, programs, or departments. Culminating milestones that are capstone courses, theses, projects, portfolios, practicums, demonstrations, simulations, or presentations will follow the requirements on the timelines established by their respective majors, programs, or departments.

Programs with Comprehensive Milestone Assessments:

Completion of comprehensive, end of program milestones (ex. take home or timed exams, oral exams, etc.) are one key mechanism promoting integration of that knowledge. Against the backdrop of this worthy learning goal, however, is the reality that milestone assessment completion, especially one that influences successful completion of a training program, can produce high levels of anxiety.

Mindful of this unintended consequence, faculty in the School of Education have handcrafted the following student-centered milestone policy.

Assessment window:

Fall and spring terms: Comprehensive milestone assessment administration will take place between weeks 6-8 of the term. All milestone assessments must be submitted by week 8. Scoring occurs between weeks 8-10. Following, students will receive an official email from the program coordinator noting successful completion of this milestone assessment and completion is noted on the student transcript through Career Services.

With the joint aims of fairness and transparency, milestone assessments will be scored by a faculty committee and rated as "pass," "needs revision," or "unsatisfactory." It is not unusual given the scope of the task and for the fact that many students have never attempted a task of this kind before, that a student may need more support to be successful. We've planned for this reality in our scoring process. In the case that a student needs more support, milestone assessments scored "needs revision" will be returned to students for improvements through a revision process and resubmitted by week 11. Revised milestone assessments will be re-scored and students will be notified of their revised score by week 12. Many students report the opportunity to revise work was among the single greatest learning experience of their program. For this reason, revising a milestone assessment is not viewed as a failure, but rather an opportunity for further learning. To provide students the most optimal conditions for success, students may only revise and resubmit once per term.

To ensure that a student has obtained the skills and knowledge commensurate with the degree, we offer students an additional term of study. So that if a student scores "unsatisfactory" on the first attempt or if the revisions are scored as "unsatisfactory," the student returns the next term the milestone assessment is offered to retake a new comprehensive milestone assessment for graduation. In the rare case that a student is not successful on their second attempt, faculty will counsel the student on options for next steps. Additional attempts are not guaranteed and can only be provided to students who are considered active by the university and within their statute of limitations.

Summer terms: Comprehensive milestone assessment administration will take place between weeks 1-2 of a six week term. Students enrolled in a 12 week summer term will have the comprehensive milestone assessment administered during weeks 3-5. Scoring and notification of results will occur 2 weeks after the submission window closes.

Milestone assessments will be scored by a faculty committee and rated "pass," "needs revision" or "unsatisfactory." Milestone assessments that are scored needs revision will require revision and resubmission one week after notification. Revised milestone assessments will be scored and students will be notified of their revised score one month prior to graduation. Students will only be given one chance to revise and resubmit once per term.

If a student scores unsatisfactory on the first attempt or if the revisions are scored as unsatisfactory, the student must return the next term the milestone assessment is offered to retake a new comprehensive milestone assessment for graduation. Successful completion of the milestone assessment is required for graduation.

Signing up for the comprehensive milestone assessment:

Two weeks prior to the milestone assessment window, students are required to sign-up for the comprehensive milestone assessment via the School of Education intranet. Students sign up via the following link:

Comprehensive Exam Sign Up

Directions for signing up for the comprehensive milestone assessment:

1. Log into my.pitt.edu.
2. Go to Pitt's School of Ed. home page: <https://www.education.pitt.edu>
3. At the bottom of the page under: SOE Resources click SOE Portal
4. On the right hand side, click on Masters Comprehensive Milestone Assessment Sign up
5. Click on the plus sign that says NEW
6. Complete the form choosing your advisor and program

7. Click save (you will not receive a confirmation)

Thesis, Thesis Equivalent, and Research Paper Requirements

Some MA and MS degree programs within the School of Education are offered with a thesis requirement while others are offered with the option of completing either a thesis or a thesis equivalent. All MAT degree programs and some MEd programs require the completion of a research paper.

Master's Degree with Thesis

The master's degree with thesis is intended for graduate students who have pursued advanced graduate study in at least one field of education specialization and have demonstrated through the master's thesis the capability to plan and carry through a project of original research. The plan of studies should include at least 6 credits in thesis work.

Thesis Overview

The thesis overview is a written proposal for the thesis. The overview is presented to the master's committee, which consists of a minimum of three faculty members (at least one from another program or department) selected in consultation with the student by the research advisor and approved by the department. The student must submit a form for approval of the thesis committee. A student must be registered in the term during which the thesis overview meeting is scheduled. A unanimous vote of the master's committee is required for approval of the overview. The outcome of the overview meeting is submitted on the appropriate form to the Office of Student and Career Services.

Approval of Research with Human Subjects

If the research proposed in the overview involves human subjects, the proposed research must be approved by the University Institutional Review Board (IRB) for the Protection of Human Subjects before it may be carried out. Information on materials that must be submitted and the procedures that must be followed for an IRB review are available in departmental offices.

Advancement to Master's Candidacy

To be advanced to candidacy for the master's degree with thesis a student must:

- be admitted to full graduate status;
- have a minimum grade point average of 3.00 (transfer credits not considered);
- have completed a plan of studies approved by academic advisor;
- have passed the comprehensive examination;
- have an approved overview; and
- if the proposed research involves human subjects, have a letter from the IRB approving the proposed research.

Thesis Preparation

The thesis research is completed and the thesis is prepared under the direction of the research advisor according to the approved overview. In preparing the thesis, the student must follow the University's ETD Format Guidelines, and specific departmental or program requirements.

Final Oral Examination

The completed thesis is submitted to the master's committee for the final oral examination. The student must be registered in the term during which the final oral examination is scheduled. The final oral examination is devoted primarily to the thesis, and an affirmative vote by a majority of the committee members is required to pass the examination. The form showing a passed final oral examination must be submitted to the Office of Student and Career Services prior to the term's graduation deadlines. The dean/assistant dean must approve any exception to this requirement.

Master's Degree with Thesis Equivalent Option/Research Paper

Master's degrees with the thesis equivalent option or research paper requirement are intended for graduate students who have pursued advanced study in at least one field of educational specialization and have demonstrated capability of presenting information relevant to an issue or problem in education. The plan of studies should include at least 3 credits in a research seminar, supervised research, or directed study involving research in the student's focus area.

Research Paper Requirements

Each candidate for the master's degree with the thesis equivalent option or research paper requirement must complete, in acceptable form, a research paper that demonstrates the ability to locate, organize, and summarize information bearing on an issue or problem in education. This project is

usually initiated and completed in the research seminar of the student's major. For certain majors, this requirement may be met by other means, such as successful exhibits or demonstrations.

** On 9/1/2022 the following requirements section was updated in the published catalog. In an effort to provide accurate information the update was made on 9/2/2022.*

Doctoral Degree General Requirements (EdD and PhD)

The requirements presented in this section are school-wide requirements that have been established in addition to the University-wide requirements detailed under general academic regulations. Students should review the general academic regulations section in addition to the specific school information detailed below.

Doctoral Programs

Doctor of Education (EdD) and Doctor of Philosophy (PhD) degree programs are offered by the School of Education to provide advanced graduate study and professional specialization in education. Each recipient must show evidence of superior scholarship, mastery of a special field of knowledge, and ability to conduct significant and relevant research. In doctoral study in the School of Education, a distinction is made between the preparation of education professionals resulting in the EdD degree and the preparation of education professionals resulting in the PhD degree. While both the EdD and PhD degrees produce experts in critical inquiry, the School of Education distinguishes the degrees according to, among other factors, the focus of the area of inquiry, the type of knowledge advanced, and the career path chosen by the individual student.

PhD research focuses on the study of basic problems arising primarily from behavioral and social science theory with the goal of advancing such theory and knowledge. Individuals pursuing this degree often seek academic positions in universities or research institutes. EdD research focuses on the study of applied, practical problems with the goal of contributing to solutions. Careers for these individuals often center on professional positions as administrators, curriculum developers, or specialists in schools and clinical settings.

Credit Requirements

PhD degrees require a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. EdD degrees require a minimum of 84 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 66 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree.

Grade Point Average/Academic Probation

All students enrolled in doctoral degree programs are required to maintain a grade point average (GPA) of at least 3.300. The cumulative GPA is based on all course work taken after enrollment in the appropriate doctoral program. A student is automatically placed on academic probation when the cumulative GPA after 9 credits or more, exclusive of transfer credits, falls below 3.300. Although the credits allowed for acceptable work completed elsewhere by students enrolled in the School of Education count toward the total number of credits required for the graduate degree, the grades earned in such courses are not included in GPA computations.

While on probation students are limited to registering only for courses in which a letter grade is given. To be removed from probation status, a student must achieve a 3.500 GPA in 6 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of an email from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate graduate study after one term on probation. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) or the academic advisor, and be supported by both the advisor and department chair, with the recommendation approved by the Assistant Dean for Student Engagement of the school.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students. The length and rationale for the leave of absence must be stated in advance, supported by the advisor and department chair, and approved by the Assistant Dean for Student Engagement. If approved, the time of the leave shall not count against the total time allowed for the degree being sought by the student.

Academic Integrity Policy

Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These general procedures may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu. The School of Education has its own academic integrity policies, posted on the School of Education website. Students are encouraged to review these school-specific guidelines as well.

Doctor of Education Specific Requirements

The three-year structured EdD program is built on a cohort model. The cohort of students admitted complete a three-year, 84-credit program, which includes 24 credits transferred from relevant graduate coursework. The majority of EdD experiences are shared across areas; however, students pick one of the following academic majors:

1. Education Leadership
2. Health and Physical Activity
3. Higher Education
4. Out of School Learning
5. Science, Technology, Engineering & Math
6. Social and Comparative Analysis in Education (Education Policy and Social Change will replace this major starting in the summer 2023 term)
7. Special Education
8. Urban Education

EdD students take eight core courses (24 credits). This includes four courses (12 credits) focused on building foundational knowledge and four courses (12 credits) specifically focused on improvement and research methodology. Candidates will also develop specialized knowledge in their academic major through course projects, relevant applied experiences, and four 3000 level courses (12 credits). Students take six credits each term, making them part time students throughout the duration of the program.

Coursework will be offered by varied delivery models, including in-person class sessions, online activities, a week-long intensive on-ramp experience, and applied experiences. Integrating diverse learning environments offers a range of structures and opportunities for doctoral students and faculty to form and access "communities of practice" face-to-face in a classroom or via Canvas (discussion boards, wikis, blogs, Zoom, etc.). Communities of practice are intentionally created collaborative learning environments that extend and enrich intellectual discourse within a socially constructed space. This flexible structure is especially important for part time doctoral students to thrive as scholarly practitioners.

A school-wide EdD admissions committee reviews all applications for the EdD degree program. The prospective advisor also reviews the application to affirm the match between student and faculty interests. A 3.5 master's GPA is recommended and GRE scores are not required. For international students a TOEFL score of 100 on the internet-based test with a minimum of 21 on each subtest, 240 on the computer-based test, or 600 on the paper-based test.

Acceptance of Transfer Credits

EdD students apply a maximum of 24 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (*see Acceptance of Transfer Credits*). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. The registrar, after notification of acceptance of transfer credits, will enter the transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA=3.0) or its equivalent.
- The course must be judged relevant to a student's doctoral studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

Course Requirements

The EdD includes the following degree requirements:

- EdD Foundations Courses (12 credits)
- EdD Practitioner Inquiry Courses (12 credits)
- Academic Major Courses (12 credits)
- Additional relevant Courses (24 transfer credits)
- Supervised Practitioner Inquiry and Laboratory of Practice (6 credits)
- Dissertation in Practice (18 credits)

All EdD students will complete eight common core courses: four EdD Foundations Courses (12 credits) and four EdD Practitioner Inquiry Courses (12 credits) designed specifically for EdD students and aligned with the requirements of the program. In addition to the eight common courses, students take four courses in their academic major. Each academic major has specified the courses which fulfill this requirement.

Supervised Practitioner Inquiry and Internship

Students in enroll in Supervised Practitioner Inquiry to prepare a critical review of literature related to a problem of practice that students identify in consultation with their advisors. The Laboratory of Practice is intended to engage students in integrating their learning from multiple experiences and courses throughout the program. Three types of experiences are possible:

1. **Job-embedded experience.** Students already working in their field of choice may elect to engage in a laboratory of practice experience within their place of work. If the advisor and student agree that the student may conduct such a project, then a plan will be developed that will engage the student in a learning project within their job.
2. **Aspirant experience.** Students may elect to have an apprenticeship experience in which they shadow and collaborate with a trained mentor in their discipline.
3. **Global studies experience:** Students may elect to design and conduct an international experience that provides direct observation or experience with practice or policy in another country.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the EdD must be completed within a period of 12 years (or 10 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Advancement to Doctoral Study

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh; and
- have successfully completed the comprehensive examination as described below.

Comprehensive Examination

Completion of EDUC 3008, Practitioner Inquiry 4 constitutes successful completion of the comprehensive exam. Successful completion of this course signals that the student has completed the EdD program of courses and is ready to embark upon their Dissertation in Practice.

Dissertation in Practice

The Dissertation in Practice denotes a culminating, doctoral- level project that focuses on addressing a problem of practice. Unlike a PhD Dissertation, which focuses on original research, the Dissertation in Practice is an applied improvement project, rooted in a student's context (most often their place of employment). Students prepare for this improvement project in their first and second years and carry out the project in their third year. We require students to provide Institutional Review Board (IRB) approval-or evidence that IRB review is not required-before carrying out the proposed project. The culmination of the Dissertation in Practice is the defense meeting, held in students' final semester, in which the committee comes together with the student to discuss the project. The Dissertation in Practice is ultimately put into Electronic Thesis and Dissertation (ETD) format and uploaded to D-Scholarship at Pitt (<http://d-scholarship.pitt.edu>), making the document publicly available.

Doctoral Committee

EdD doctoral committees are constructed in consultation between the student and their advisor. Committees must consist of at least three members. Some students choose to invite a 4th member in order to round out the committee's expertise. The following requirements apply:

- All members must have earned a terminal degree (EdD, PhD, JD, MD, MFA, etc.)
- 1 member must be the student's designated School of Education advisor.
- 1 additional member must be full-time faculty of the School of Education: tenured, tenure stream, or appointment stream; one may be recent emeritus (i.e., retired within 2 years).
- 1 member must be a practitioner (currently or previously active) who holds expertise or a faculty member who has appropriate practitioner knowledge related to the student's problem of practice*.

*A practitioner (currently or previously active) is defined as a person engaged in (or previously engaged in) the activities related to the problem of practice addressed in the Dissertation in Practice. A practitioner may also be someone who has appropriate practitioner knowledge related to the problem of practice addressed in the Dissertation in Practice. The goal for having this member serve on the Committee is to benefit and advance the student's work by providing specialized expertise and perspectives relevant to practice. This person will facilitate the project by serving on the committee and advising the student in their study. No particular affiliation is required for the practitioner committee member.

The proposed committee goes through the following approval process: it is first approved by the student's advisor, then the coordinator of the student's major, and finally, the Director of the EdD. Any subsequent changes in the doctoral committee must go through this same process.

The doctoral committee will decide on the acceptability of the final Dissertation in Practice submission, with each committee member indicating whether they deem the project to be a pass or fail.

Additional Program Requirements

The following requirements are designed to help the students successfully move toward their Dissertation in Practice: the Problem of Practice Statement, guidelines and supports around assembling a doctoral committee, and the Dissertation Overview meeting in which a student's project plan is presented.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

The following requirements must be completed as outlined by the Doctoral Graduation Checklist for the intended graduation term and submitted to the Department of Student and Career Services:

- Dissertation defense form (submitted in the online milestone system)
- ETD approval form (submitted in the online milestone system)
- Completed Association of American Universities Data Exchange (AAUDE) survey
- Receipt from the Student Payment Center for payment of the ETD processing fee

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable form and style. For dissertation preparation style information refer to the ETD Format Guidelines. Questions not answered in these documents regarding form and/or style will be referred to the dean/associate dean for review and final decision.

Doctor of Philosophy Specific Requirements

The Doctor of Philosophy degree in the School of Education is a research-intensive training model that prepares students to be nationally competitive for research careers in both academic and non-academic institutions

International students require a minimum of 100 or higher TOEFL composite score with sub-scores of 21 or higher or 7.0 IELTS with sub-scores of 6.0 or higher. After screening, a small group of applicants will be interviewed prior to a final decision. Only applicants committed to full-time study will be considered (except in unusual circumstances where the applicant works in a setting where research opportunities are available such as a research assistant on a funded project at a research institute).

The students are admitted into one of the following areas of concentration:

- Applied Developmental Psychology
- Education Leadership
- Education Policy
- Exercise Physiology
- Higher Education

- Language, Literacy & Culture
- Learning Sciences and Policy
- Research Methodology
- Special Education
- Vision Studies

Plan of Studies

Prior to advancement to the formal stage called Doctoral Study, the student, in consultation with the academic advisor, must complete a plan of studies that conforms to program requirements. The plan of studies, approved by the academic advisor, the program coordinator, and department is filed in the Office of Student and Career Services.

PhD students are required to file a Plan of Studies during the first year in the program. In formulating the doctoral Plan of Studies, both the student and the academic advisor must pay close attention to these School of Education requirements as well as requirements specific to the particular program or department in which the degree specialization is taken. It is the responsibility of the student to learn particular requirements from the academic advisor. The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh.

Courses approved for transfer credit must be listed individually on the plan of studies. Also, when a student plan of studies lists directed study credits, a directed study agreement form must be completed, signed by both the student and faculty supervisor, and submitted for each directed study at the time of registration. Forms are available from the department.

Any changes in the plan of studies must be approved by the academic advisor and the program coordinator and must conform to program requirements. At the time of graduation, completed courses must comply with the approved plan of studies.

Credit Requirements

The PhD degree requires a minimum of 90 credits in a degree program beyond the baccalaureate, distributed as follows: a minimum of 72 course credits (including transfer credits) and a minimum of 18 dissertation credits. Doctoral-level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study if approved on a plan of studies. Generally, courses numbered below 2000 do not meet the minimum requirements for doctoral study. Exceptions require the approval of the program or department. No lower-level undergraduate course (numbered 0001-0999) may be applied toward a doctoral degree. Department and program websites list specific degree requirements.

Acceptance of Transfer Credits

PhD students apply a maximum of 30 post-baccalaureate credits for transfer from other institutions in keeping with University-wide requirements (*see Acceptance of Transfer Credits*). Both applicants for admission and continuing University of Pittsburgh doctoral students seeking acceptance of transfer credits toward a doctoral degree must submit their transcripts with a completed "Course Credits Accepted" form, available on the School of Education website. When approved, transfer credits must appear on the student's Plan of Studies. The registrar, after notification of acceptance of transfer credits, will enter the individual transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

Each course transferred must meet the following conditions:

- The course grade must be at least B (GPA = 3.00) or its equivalent.
- The course must be judged relevant to a student's doctoral Plan of Studies by the program or department.
- The course must be approved for equivalent graduate degrees at the accredited institution, extension, or off-campus center of other institutions at which the course was taken.

The completion of requirements for the doctorate must be satisfied through registration at the University of Pittsburgh. However, under certain circumstances, a student may earn in an accredited graduate institution other than the University of Pittsburgh a limited number of credits toward a doctoral degree.

Doctoral students desiring to take courses at another institution following admission to the University of Pittsburgh should review the course descriptions and receive approval from their academic advisors and program or department prior to registering for those courses if they wish to ensure that these credits will be acceptable for transfer.

Residency

PhD students are required to be enrolled for full-time study, including involvement in research activities.

Supporting Field

PhD students are required to complete a minimum of nine credits in an academic discipline outside of education. This requirement may be met in one of three ways:

1. For a student who does not have a bachelor's degree or an equivalent number of credits to that for a bachelor's degree in an appropriate academic discipline, a minimum of 18 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration (e.g., Latin American Studies or psycholinguistics) as approved by the program or department. No more than 6 of these credits may be used to satisfy research methodology requirements.
2. For a student who has a bachelor's degree or an equivalent number of credits for a bachelor's degree in an academic discipline, a minimum of 9 credits must be taken outside the School of Education in one field or in an interdisciplinary concentration as approved by the program or department. None of the 9 credits may be used to satisfy research methodology requirements.
3. For a student who has a master's degree or an equivalent number of credits toward a master's degree in a relevant academic discipline outside of education, no additional credits outside the School of Education need to be taken.

Supervised Research

PhD students are required to complete a supervised research experience that results in a written report of the experience. Enrollment for six credits of supervised research, internship, practicum, or directed study is required.

Statute of Limitations

From the student's initial registration for doctoral study at the University of Pittsburgh, all requirements for the PhD must be completed within a period of 10 years (or 8 years if the student has received credit for a master's degree appropriate to the field of study).

Under certain conditions, the dean/associate dean may grant an extension of a student's statute of limitations. The request for extension must include a recommendation made by the academic advisor, with the recommendation approved by the Dean of the school. The statute of limitations can only be extended once.

Doctoral Preliminary Evaluation

Each doctoral student is required to take a preliminary evaluation designed to assess the breadth of the student's knowledge of the discipline, the student's achievement during the initial phase of graduate study, and the student's potential to apply research methods independently. The preliminary evaluation is administered by the program or department to which the student has been admitted. Procedures of administration are available from the program or department.

Advancement to Doctoral Study

To advance to doctoral study, a student must:

- be admitted to full graduate status;
- have completed at least 15 post-master's graduate credits at the University of Pittsburgh;
- have earned a GPA of at least 3.30 (transfer credits not considered) in post-master's graduate study at the University of Pittsburgh;
- have a Plan of Studies approved by the academic advisor and the program coordinator on file in the Office of Admissions and Enrollment Services; and
- have passed the doctoral preliminary evaluation.

Comprehensive Examination

After advancement to doctoral study, each doctoral student is required to take a comprehensive examination. The comprehensive examination is constructed, administered, and scored by the department or program to which the student has been admitted. Procedures and schedules of administration are available from the department or program.

A student must be registered in the term during which the comprehensive examination is taken. In no case may the student be graduated in the same term in which the comprehensive examination is taken. After the comprehensive examination is passed, the student has the remaining time specified by the statute of limitations to complete all remaining doctoral degree requirements. Satisfactory completion of the doctoral comprehensive examination requirement is part of the demonstration of doctoral competency.

Ordinarily, students do not register for dissertation credits until they have passed the comprehensive examination.

Doctoral Competency

Each doctoral student is required to demonstrate doctoral competency by satisfactorily completing the supervised research requirement and doctoral comprehensive examination.

Doctoral Committee

For the PhD student, the doctoral committee consists of the research advisor and at least three other members, including one member from another department outside the School of Education at the University of Pittsburgh or from an appropriate graduate program outside education at another academic institution. The research advisor and a majority of the total committee must be full or adjunct members of the graduate faculty of the University of Pittsburgh. Current graduate faculty membership may be found on the University's Institutional Research website.

The program faculty, the department chairperson, and the dean/associate dean must approve membership on and subsequent changes in the doctoral committee. The student initiates the "Proposed Doctoral Committee" form, using the online milestone system, to obtain the signatures of the program coordinator, the department chairperson, and the dean/associate dean. The dean/associate dean must give final approval of the doctoral committee before the overview examination may be scheduled.

Dissertation Overview

The dissertation overview is a written proposal and must be presented to the doctoral committee for approval after doctoral competency has been demonstrated.

The Overview Examination

The overview examination is conducted by the doctoral committee, is chaired by the research advisor, and is open to any faculty member of the graduate faculty of the University wishing to attend. Although any faculty member may participate in the examination, only members of the doctoral committee may be present during the final deliberation and vote on approving the overview. The student initiates the "Dissertation Overview and Advancement to Doctoral Candidacy" form, using the online milestone system, to obtain committee signatures. The committee must unanimously approve the overview in order for the student to be advanced to doctoral candidacy.

Dissertation

Students should review the information detailed under Dissertation and Abstract and Final Oral Examination for University-wide regulations regarding dissertations and dissertation defenses. School of Education-specific rules follow:

The Dissertation Defense

The same rules apply here as detailed under The Overview Examination above.

Vote on the Dissertation Defense

Each member of the doctoral committee must approve the dissertation defense form, using the online milestone system and vote to pass or fail the student on the dissertation defense. If the decision of the committee is not unanimous, the case is referred to the Assistant Dean for Student Engagement for resolution.

Submission Requirements and Fees

For general information concerning preparation of the dissertation, refer to the ETD website.

The following requirements must be completed as outlined by the Doctoral Graduation Checklist for the intended graduation term and submitted to the Department of Student and Career Services:

- Dissertation defense form (submitted in the online milestone system)
- ETD approval form (submitted in the online milestone system)
- Completed Association of American Universities Data Exchange (AAUDE) survey
- Receipt from the Student Payment Center for payment of the ETD processing fee
- Survey of Earned Doctorate

Information concerning requirements for preparing the abstract, the forms to be completed, and the amount of the fees to be paid is available in the Office of Admissions and Enrollment Services. The dissertation and abstract will be examined there to see that they are prepared in an acceptable form and style. For dissertation preparation style information refer to the ETD Format Guidelines. Questions not answered in these documents regarding form and/or style will be referred to the dean/associate dean for review and final decision.

Faculty

School of Education Faculty

Akiva, Thomas Matthew Schweinh - PhD, University of Michigan
Anderson, Eleanor - PhD, Northwestern University
Arlotta-Guerrero, Anna M - PhD, University of Pittsburgh
Bachman, Heather J - PhD, Loyola University of Chicago

Wang, Ming-Te - PhD, Harvard University
Wanless, Shannon Beth - PhD, Oregon State University

Program and Course Offerings

The School of Education is organized into three academic departments:

Department of Educational Foundations, Organization, and Policy

Programs within the Department of Educational Foundations, Organization, and Policy (EFOP) prepare graduates for careers in educational institutions and organizations. Our graduates work in formal and non-formal educational settings, including schools, higher education institutions, community agencies, policy organizations, and non-profit organizations. In our most advanced programs, students are prepared for research and teaching careers in colleges and universities, and for research and policy study careers in local, state, national, and international agencies.

The EFOP program faculty are grouped in several overlapping areas: (1) Higher Education, (2) Urban Education, (3) Education Policy, (4) Comparative and International Education, and (5) Research Methodology. The department is home to multiple degree programs: (1) Master of Education in Higher Education; (2) Master of Arts in Education Policy, with optional areas of concentration in Comparative & International Education and Higher Education Policy; (3) Doctor of Education in Education Policy & Social Change, Higher Education, and Urban Education; and (4) Doctor of Philosophy in Higher Education; Urban Education; and Education Policy, with optional area of concentration in Comparative & International Education. EFOP also provides service courses for students from other departments and schools at the master's and doctoral levels in sociological perspectives in education and research methodology.

Detailed program information appears below.

General Contact Information

Chair: Michael G. Gunzenhauser
Email: mgunzen@pitt.edu
Phone: 412-648-2119

Associate Chair: Lori Delale-O'Connor
Email: loridoc@pitt.edu
Phone: 412-624-1332

Department Address: 5900 Posvar Hall, 230 S. Bouquet St., Pittsburgh, PA 15260

Please note: In the Fall of 2021 the Administrative and Policy Studies MA, MEd and PhD degree programs were terminated. Students already admitted to these programs may continue to complete these programs at a normal pace. All students must complete the MA and MEd degree programs by Summer 2027. All students must complete the PhD degree program by Summer 2032.

Doctoral

Education Policy and Social Change, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. The day includes opportunities to meet program faculty, EdD program information, and cohort-building activities as well as an introductory session with other students in your academic major. Orientation typically takes place in March or April.
- **Intensive on-ramp:** The EdD cohort will participate in a full-week, on-campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience typically takes place in June, and is a component of the first summer courses (Foundations 1 and Practitioner Inquiry 1).
- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is *required*.

SCHEDULE

Year 1: Summer	Year 1: Fall	Year 1: Spring	Year 1: Summer
EDUC 3002 FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER EDUC 3001 PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT (3 credits)	EDUC 3004 FOUNDATIONS: CONTEXTS OF EDUCATION Major: Course 1 (3 credits)	EDUC 3003 FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major: Course 2 (3 credits)	EDUC 3005 FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 SUPERVISED PRACTITIONER INQUIRY
Year 2: Fall	Year 2: Spring	Year 2: Summer	
EDUC 3006 PRACTITIONER INQUIRY 2 Major: Course 3	EDUC 3007 PRACTITIONER INQUIRY 3 Major: Course 4	EDUC 3008 PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3012 LABORATORY OF PRACTICE	
Year 3: Fall	Year 3: Spring	Year 3: Summer	
EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	

CORE COURSES: 24 credits

Foundation Courses: 12 credits

- EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: (3 credits)

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY
Students will identify, review, and synthesize relevant scholarship that supports their focus on addressing a problem of practice.

Laboratory of Practice: 3 credits

- EDUC 3012 - LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

Guidance In Scholarly Practice: 18 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE
Students conduct their Dissertation in Practice, with the support from their advisor.

Education Policy and Social Change Academic Major Courses (12 credits)

- EFOP 3014 - DOCTORAL SEMINAR IN EDUCATION AND SOCIETY
- EFOP 3007 - EDUCATION AND INTERNATIONAL DEVELOPMENT
- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- EFOP 3008 - COMMUNITY ENGAGEMENT IN EDUCATION

Education Policy, PhD

The education policy PhD program provides students with foundational grounding in education policy analysis. Students learn frameworks and methods for evaluating how policies and systems produce educational opportunities and systemic inequities. Students gain a nuanced understanding of the education policy process including policy formulation, implementation, and evaluation, and the methodological approaches used to examine these processes and their effects. And students explore how the (re)design of policies and systems create substantive improvements in learning opportunities for students of all ages. The program includes core content in: education policy systems and implementation, disciplinary grounding, the social contexts of education, policy analysis methods, and electives exploring specific policy topics and issues. The flexible curricular design enables students to choose courses that match their interests. Through apprenticed research experiences, students gain expertise in policy analysis necessary to prepare them to do independent research and pursue careers in policy research.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Policy core courses

Students take 2 policy core courses (6 credits):

- EFOP 3010 - EDUCATIONAL SYSTEMS, MACRO POLICY, AND POLITICS, PHD
- EFOP 3011 - EDUCATION POLICY IMPLEMENTATION: STUDENTS, FAMILIES, EDUCATORS, AND POLICYMAKERS, PHD SEMINAR

Social contexts of education

Students take 1 course (3 credits) from the following (other courses on this list can be taken as electives):

- EFOP 2133 - GENDER AND EDUCATION

- EFOP 2305 - SOCIOLOGY OF EDUCATION
- EFOP 2306 - HISTORY OF EDUCATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EFOP 2343 - EDUCATION AND CULTURE
- EFOP 2352 - ANTHROPOLOGY OF EDUCATION
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3003 - THEORIES OF EDUCATIONAL INEQUALITY

Research Methods

Students take a total of 7 courses (21 credits) including the schoolwide PhD research methods core (EDUC 3100 / EDUC 3103 / EDUC 3104) plus 4 additional courses based on interests. Recommended methods courses include but are not limited to the following:

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS (required)
- EDUC 3103 - QUANTITATIVE METHODS 2 (required)
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS (required)
- EDUC 2205 - FIELD METHODS
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- TLL 3003 - RESEARCH INTERVIEWING
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS

Electives

Students select elective courses to develop a coherent plan of studies. Some options are listed below, but students can select any graduate level courses relevant to their program of studies.

- EDUC 3016 - URBAN SCHOOLS AND SOCIAL POLICY
- EDUC 3114 - BLACK EDUCATIONAL THOUGHT
- EFOP 2096 - INTERNSHIP IN EDUCATIONAL FOUNDATIONS, ORGANIZATIONS & POLICY
- EFOP 2104 - LATIN AMERICA SOCIAL & PUBLIC POLICY
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3095 - ORGANIZATIONAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT
- TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Optional ARCO: Comparative and International Education

Students can opt to add an area of concentration in Comparative and International Education. Students interested in pursuing a more generally-focused policy degree enroll in the Education Policy major with no ARCO. The Comparative and International area requires the following courses:

- EFOP 3085 - COMPARATIVE & INTERNATIONAL EDUCATION PHD SEMINAR (3 credits required)
- EFOP 3343 - COMPARATIVE EDUCATION OR EFOP 3136: COMPARATIVE HIGHER EDUCATION
- EFOP 2359 - GENDER, EDUCATION, & INTERNATIONAL DEVELOPMENT
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3301 - SOCIAL THEORIES AND EDUCATION GLOBAL CONTEXT
- EFOP 3302 - EDUCATION & DEVELOPMENT DEBATES

Supporting field:

For students with an undergraduate degree in a discipline outside education, 9 credits of graduate coursework are required outside of the School of Education. If a student has an undergraduate degree in education the requirement is 18 credits outside of School of Education.

Other required courses:

Students enroll in the First Year Seminar (EDUC 3102 / EDUC 3105), 6 credits of Supervised Research (EFOP 3097), and 18 dissertation credits. The total number of credits required for the PhD degree, including transfer credits, is 90 credits.

Higher Education, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. The day includes opportunities to meet program faculty, EdD program information, and cohort-building activities as well as an introductory session with other students in your academic major. Orientation typically takes place in March or April.
- **Intensive on-ramp:** The EdD cohort will participate in a full-week, on-campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience typically takes place in June, and is a component of the first summer courses (Foundations 1 and Practitioner Inquiry 1).
- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is *required*.

CORE COURSES: 24 credits

Foundation Courses: 12 credits

- EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: (3 credits)

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY
Students will identify, review, and synthesize relevant scholarship that supports their focus on addressing a problem of practice.

Laboratory of Practice: 3 credits

- EDUC 3012 - LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

Guidance In Scholarly Practice: 18 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE
Students conduct their Dissertation in Practice, with the support from their advisor.

Higher Education Academic Major Courses (12 credits)

- EFOP 3104 - HIGHER EDUCATION INSTITUTIONAL STRATEGIC PLANNING
- EFOP 3129 - HIGHER EDUCATION HUMAN RESOURCE MANAGEMENT
- EFOP 3209 - HIGHER EDUCATION INSTITUTIONAL ASSESSMENT & ACCREDITATION
- EFOP 3128 - HIGHER EDUCATION BUDGET MANAGEMENT

Higher Education, PhD

The PhD in Higher Education is committed to advancing scholarship, research, and practice in the field of higher education. Students have research interests ranging from student access to student outcomes, diversity, equity, and justice, international and comparative education, student affairs, faculty and administration, and policy studies. The program is focused on critical scholarship and centers equity and justice.

The PhD degree program in higher education includes a core set of courses designed for students to gain an understanding of historical, political, philosophical, and social elements that shape and continue to reshape higher education. The curriculum is designed to ground students in the study of higher education as a discipline and critical scholarship within the field. Students develop an area of research specialization. The curriculum in higher education is complemented by courses within other programs in the Educational Foundations, Organizations, and Policy Department and School of Education. Students also take courses outside of the School of Education for their supporting field (per School of Education guidelines). In addition, through a strong focus within the program on rigorous methodological training, students gain competency in both quantitative and qualitative research methods and take advanced courses in the methodological approaches they plan to utilize in their research.

90 credits are required for this degree program.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Required Courses (21 credits)

- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2131 - HIGHER EDUCATION ADMINISTRATION
- EFOP 2055 - STUDENT DEVELOPMENT THEORY
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3151 - THEORETICAL FRAMEWORKS FOR THE STUDY OF HIGHER EDUCATION
- EFOP 3153 - RESEARCH PERSPECTIVES ON DIVERSITY, EQUITY, AND INCLUSION IN HIGHER EDUCATION

Electives (18 Credits)

Students enroll for 18 credits of electives, including 9 credits of higher education courses taught in the program. Program courses include but are not limited to the following:

- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3134 - CONTEMPORARY LATINX ISSUES IN US HIGHER EDUCATION

Research Methodology (18 credits)

Students enroll for 18 credits of research methodology, including:

Three required courses (9 credits):

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS (required)
- EDUC 3103 - QUANTITATIVE METHODS 2 (required)
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS (required)

Research Methodology electives (9 credits) include the following:

- EDUC 3107 - WAYS OF KNOWING
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH

- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3209 - HIGHER EDUCATION INSTITUTIONAL ASSESSMENT & ACCREDITATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- EFOP 3501- Critical Policy Analysis
- EDUC 3000 - ADVANCED APPLIED STATISTICAL ANALYSIS
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS
- TLL 3003 - RESEARCH INTERVIEWING

Supervised Research (6 credits)

Students enroll in 6 credits:

- EFOP 3097 - SUPERVISED RESEARCH

Supporting Field (9 credits)

For students with an undergraduate degree in a discipline outside education, 9 credits of graduate coursework are required outside of the School of Education. In this case half of their elective units should be taken outside of the School of Education. If a student has an undergraduate degree in education the requirement is 18 credits outside of School of Education; in other words, they will take all of their elective credits outside of the School of Education.

Independent Research (18 credits)

- EFOP 3099 - GUIDANCE IN THE DOCTORAL DEGREE (18 credits of EFOP 3099 are required)
- EDUC 3102 - FIRST YEAR SEMINAR 1 (Does not count toward total of 90 credits)
- EDUC 3105 - FIRST YEAR SEMINAR 2 (Does not count toward total of 90 credits)

Social and Comparative Analysis in Education, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. The day includes opportunities to meet program faculty, EdD program information, and cohort-building activities as well as an introductory session with other students in your academic major. Orientation typically takes place in March or April.
- **Intensive on-ramp:** The EdD cohort will participate in a full-week, on-campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience typically takes place in June, and is a component of the first summer courses (Foundations 1 and Practitioner Inquiry 1).
- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is *required*.

EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)

CORE COURSES: 24 credits

Foundation Courses: 12 credits

- EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: (3 credits)

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY
Students will identify, review, and synthesize relevant scholarship that supports their focus on addressing a problem of practice.

Laboratory of Practice: 3 credits

- EDUC 3012 - LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

Guidance In Scholarly Practice: 18 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE
Students conduct their Dissertation in Practice, with the support from their advisor.

Urban Education Academic Major Courses (12 credits)

- EDUC 3010 - INTRODUCTION TO THE HISTORY & SOCIAL CONTEXTS OF URBAN EDUCATION
- EDUC 3015 - CRITICAL PERSPECTIVES IN URBAN EDUCATION
- EDUC 3011 - PEDAGOGIES AND PRACTICES IN URBAN EDUCATION
- EDUC 3014 - URBAN SCHOOLS, LAW, & SOCIAL POLICY

Urban Education, PhD

The PhD program in Urban Education prepares scholars who conduct critical research in K-16 urban education understanding, engagement, and application of theories of law, policy, and the social and cultural contexts of education. Doctoral students have the opportunity to specialize in critical quantitative and qualitative methodologies, ranging from evaluation to ethnography. The program is built with a transdisciplinary, experiential,

inquiry-focused curriculum that prepares scholars to address the multifaceted issues in urban education alongside the insurgent and self-determined educational praxes of communities and peoples. The Urban Education program prepares students research careers in both academic and non-academic institutions.

Students collaborate with mentor scholars to develop rigorous thinking and methodological tools to examine the structure of urban education in relation to broader sociopolitical and economic processes that shape schooling and learning. The program centers Black and Indigenous knowledge traditions across multitudinous curricula, including credit-bearing coursework, research collaborations, writing groups, and symposia. Located in what is known as the City of Pittsburgh, the program draws upon its affiliated Center for Urban Education and its local relationships with community residents while building connections with social actors across the country and around the world.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Program Core (13 credits)

FOUNDATIONS OF EDUCATION AND SOCIETY

- EDUC 3010 - INTRODUCTION TO THE HISTORY & SOCIAL CONTEXTS OF URBAN EDUCATION
- EDUC 3013 - EDUCATION LAW, POLICY & SCHOOL REFORM
- EDUC 3015 - CRITICAL PERSPECTIVES IN URBAN EDUCATION
- EDUC 3067 - FREEDOM SEMINAR (1 credit per seminar)

Electives

Elective credits include approved transfer credits and approved additional credits to achieve 90 total credits for the PhD degree.

Cognate Courses (9-18 credits)

For students who do not have bachelor's degrees in appropriate academic disciplines, 18 credits must be taken outside of the SOE in the appropriate academic disciplines. Students with a master's degree in an appropriate academic discipline do not have to take any courses outside of the SOE and 18 credits from their masters will count here for cognate courses. Students with a bachelor's degree in an appropriate academic discipline are only required to take 9 credits outside of the SOE in appropriate academic disciplines.

Research Methodology (18 credits)

Required courses:

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- EDUC 3107 - WAYS OF KNOWING

Advanced Research Methodology

At least two courses in advanced quantitative methods:

- TLL 3536 - SINGLE SUBJECT RESEARCH
- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3412 - GENERAL LINEAR MODELS
- EFOP 3416 - MULTIVARIATE STATISTICS
- EFOP 3417 - STRUCTURAL EQUATION MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH

At least one course in advanced qualitative methods:

- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EFOP 2355 - ADVANCED QUALITATIVE RESEARCH
- EDUC 3012 - LABORATORY OF PRACTICE
- EFOP 3208 - CASE STUDY METHODS IN EDUCATION
- TLL 3002 - CLASSROOM DISCOURSE
- TLL 3003 - RESEARCH INTERVIEWING
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS

Supervised Research (6 credits)

- EFOP 3097 - SUPERVISED RESEARCH

Dissertation (18 credits)

- EFOP 3099 - GUIDANCE IN THE DOCTORAL DEGREE

Professional Seminars (3 credits)

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Writing Workshops (Year 2 through completion; 1 credit/semester for 6-8 credits)

- EFOP 3087 - WRITING SEMINAR

The Writing Workshops provide students with an opportunity to get feedback on manuscripts and milestone documents. The group commits to reading drafts in advance of bi-weekly meetings and provides constructive feedback.

Field Placement/Teaching Practicum (2 courses, 6 credits)

- EFOP 3135 - SEMINAR IN COLLEGE TEACHING

Two semesters spent in supervised field placement in areas relevant to the Urban Education PhD Program. Potential sites for field placement include local non-profit institutions, RAND Corporation (through application through their summer internship program), and the Center for Urban Education. Students may also fulfill one semester in a field placement and one spent developing instructional skills for teaching at the university level (as an instructor or co-instructor with a faculty member) or developing a course under the supervision of a faculty member (e.g., an on-line course in an area relevant to Urban Education).

Master's

Education Policy, MA

The education policy master's program provides students with foundational grounding in equity-driven education policy analysis. Students learn frameworks and methods for evaluating how policies and systems produce educational opportunities and systemic inequities. Students learn about educational policy trends and effects. And students explore how the (re)design of policies and systems create substantive improvements in learning opportunities for students of all ages. The program includes core content in: education policy systems and implementation, disciplinary grounding, the social contexts of education, policy analysis methods, and electives exploring specific policy topics and issues. The flexible curricular design enables students to choose courses that match their interests. Through community-engaged capstone projects students gain practical experience in

policy analysis that is relevant to careers in program evaluation, policy organizations, and research. The program is designed to accommodate part-time and full-time students. Full time students can complete the program in as little as 3 semesters.

Students complete 36 credits.

Policy Foundations

Students take 2 policy core courses (6 credits):

- EFOP 2010 - EDUCATIONAL SYSTEMS, MACRO POLICY, AND POLITICS, MA
- EFOP 2011 - EDUCATION POLICY IMPLEMENTATION: STUDENTS, FAMILIES, EDUCATORS, AND POLICYMAKERS, MA SEMINAR

Social Contexts of Education

Students select 1 course (3 credits) from the following (other courses on this list can be taken as electives):

- EDUC 2100 - EDUCATION AND SOCIETY
- EFOP 2133 - GENDER AND EDUCATION
- EFOP 2305 - SOCIOLOGY OF EDUCATION
- EFOP 2306 - HISTORY OF EDUCATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EFOP 2343 - EDUCATION AND CULTURE
- EFOP 2352 - ANTHROPOLOGY OF EDUCATION
- EFOP 2398 - ECONOMICS OF EDUCATION
- EFOP 3003 - THEORIES OF EDUCATIONAL INEQUALITY

Psychological perspectives on education

Students select 1 course (3 credits) from the following options:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE
- TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE

Research Methods

Students select 3 courses (9 credits) from the following options:

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- EDUC 3107 - WAYS OF KNOWING
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EDUC 3506 - MIXED METHODS RESEARCH
- EFOP 2001 - INTRODUCTION TO RESEARCH METHODOLOGY
- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE

- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 2353 - APPLIED ANTHROPOLOGY OF EDUCATION
- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EFOP 3012 - QUALITATIVE DATA MANAGEMENT, ANALYSIS, AND PRESENTATION
- EFOP 3201 - INTRODUCTION TO EDUCATIONAL EVALUATION
- EFOP 3208 - CASE STUDY METHODS IN EDUCATION
- EFOP 3408 - HIERARCHICAL LINEAR MODELING
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH
- EDUC 3106 - ADVANCED APPLIED QUALITATIVE ANALYSIS
- TLL 3003 - RESEARCH INTERVIEWING

Electives

Students select 3 courses (9 credits) or an ARCO to satisfy their elective requirement.

- EDUC 3114 - BLACK EDUCATIONAL THOUGHT
- EDUC 3501 - CRITICAL POLICY ANALYSIS
- EDUC 3505 - RESEARCH-PRACTICE PARTNERSHIPS: APPROACHES TO COLLABORATIVE DESIGN, INQUIRY & CHANGE
- EFOP 2096 - INTERNSHIP IN EDUCATIONAL FOUNDATIONS, ORGANIZATIONS & POLICY
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE
- TLL 3008 - EDUCATIONAL POLICY
- EFOP 3095 - ORGANIZATIONAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT
- TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Comparative and International Education ARCO

Optional ARCO: Students choosing this area of concentration select 3 courses (9 credits) from the following:

- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3343 - COMPARATIVE EDUCATION
- EFOP 3006 - SOCIAL CHANGE IN LOCAL AND GLOBAL CONTEXTS
- EFOP 3007 - EDUCATION AND INTERNATIONAL DEVELOPMENT

Higher Education Policy ARCO

Optional ARCO. Students choosing this area of concentration select 3 courses (9 credits) from the following:

- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3141 - POLICY STUDIES IN HIGHER EDUCATION
- EFOP 3150 - FOUNDATIONS FOR THE STUDY OF HIGHER EDUCATION

Capstone

Students enroll in 3 credits of EFOP 2090 if completing an applied policy project or 6 credits of EFOP 2090 and/or EFOP 2099 if pursuing the thesis option.

- EFOP 2090 - CAPSTONE SEMINAR IN EDUCATION POLICY
- EFOP 2099 - GUIDANCE IN THE MASTER'S DEGREE

Higher Education, MEd

The Master of Education (MEd) in Higher Education provides students with the professional competencies, experiential learning, and personal development needed to serve in entry-level positions in a variety of offices and departments that serve students in higher education. Our curriculum centers equity and justice through practitioner-oriented coursework. 36 credits are required for this degree program. The MEd in Higher Education requires an approved plan of studies, an internship, and a capstone project. The capstone project serves as the comprehensive examination.

Required Coursework

- EFOP 2051 - M.ED RESEARCH METHODS FOR HIGHER EDUCATION
- EFOP 2052 - M. ED INTERNSHIP IN HIGHER EDUCATION
- EFOP 2055 - STUDENT DEVELOPMENT THEORY
- EFOP 2056 - PROGRAM ASSESSMENT IN HIGHER EDUCATION
- EFOP 2131 - HIGHER EDUCATION ADMINISTRATION
- EFOP 2135 - PROFESSIONAL DEVELOPMENT SEMINAR IN HIGHER EDUCATION
- EFOP 2140 - HIGHER EDUCATION CAPSTONE SEMINAR
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION

Electives

- EFOP 2057 - CULTURE, INNOVATION & ORGANIZATION PERFORMANCE
- EFOP 2058 - LEGAL ISSUES FOR HIGHER EDUCATION PROFESSIONALS
- EFOP 2059 - ADVISING AND SUPPORTING SKILLS FOR HIGHER EDUCATION PROFESSIONALS
- EFOP 2128 - LEADERSHIP
- EFOP 2129 - SOCIAL JUSTICE IN HIGHER EDUCATION SETTINGS
- EFOP 2132 - PROGRAM DESIGN AND DELIVERY IN COLLEGE STUDENT AFFAIRS
- EFOP 3015 - ETHICAL ISSUES IN HIGHER EDUCATION
- EFOP 3131 - STUDENT, CAMPUS, AND SOCIETY
- EFOP 3132 - ADVANCED STUDENT DEVELOPMENT THEORY
- EFOP 3134 - CONTEMPORARY LATINX ISSUES IN US HIGHER EDUCATION
- EFOP 3136 - COMPARATIVE HIGHER EDUCATION
- EFOP 3138 - WOMEN, GENDER, AND SEXUALITY ISSUES IN HIGHER EDUCATION

Department of Teaching, Learning, and Leading

The Department of Teaching, Learning, and Leading is guided by our School's Mission/Vision and organized by our faculty's purposes, principles, commitments, and praxes.

Our shared purposes are to:

- Support the self-determination of peoples to practice knowledge traditions

- Join in global efforts of collective educational liberation
- Contribute to societal transformation toward freedom through our full range of educational endeavors
- Cultivate rigorous intellectual praxis in educators

Our shared principles are:

- Reciprocal and just relationality
- Common cause and collective responsibility
- Freedom through practice of knowledge traditions
- Refusal of systems and structures of domination

We are committed to:

- Bold, collective study toward liberation
- Struggling together in the internal tensions of freedom work
- Learning, recovering, and recentering knowledge traditions historically excluded from our field
- Collectively imagining and practicing free alternatives and futures Collaboratively cultivating freedom and justice in praxis

Our shared praxes are:

- Lifting up, studying, growing, and working across multiple liberatory knowledge and epistemic traditions
- Building community through dialecticism, dialogism, and difference
- Centering freedom stories and storytelling
- Prioritizing the obligations of purposes, principles, and commitments
- Embracing action and activism

The department offers MAT, MEd EdD, and PhD degrees.

Degree and Certification Requirements

For additional degree requirement information for many of the following degrees, refer to the school sections on Degree Requirements.

Certificate

Applied Behavior Analysis Certificate

The ABA Certificate program fulfills the coursework requirement set forth by the Behavior Analyst Certification Board, Inc. (BACB).

Program Duration: 12 months (Part Time)

Time Commitment: Part Time

Term of Enrollment: Summer

Course Requirements: 21 Credits

Certificate Program

- TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
- TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
- TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
- TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
- TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
- TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

BACB Requirement (Optional)

For students wishing to pursue the national BCBA

- TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Early Childhood Education - Primary Plus: PreK-4 Teacher Preparation Certificate

The Primary Plus: PreK-4 Teacher Certification Program is intended for individuals from a wide range of undergraduate degree and work backgrounds. Through coursework and field experiences with pre-kindergarteners and children in grades K-4, students will acquire an integrated understanding of academic content and child development in diverse inclusive settings. Upon completion of the program, students are eligible to apply for a Pennsylvania Instructional I Certificate for PreK-4.

The Primary Plus: PreK-4 Teacher Certification Program prepares students to teach young children ages 4-9 in Pre-kindergarten and K-4 classrooms and to work collaboratively with parents and other professionals. Students will develop skills for employment in public and private schools and early childhood centers. This 36 credit program is designed for full-time study.

Requirements

- TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES
- TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1
- TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4
- TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM

- TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED
- TLL 2047 - INTEGRATED CURRICULUM PRE-K-4
- TLL 2209 - READING WRITING METHODS 2: GRADE 2-4
- TLL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
- TLL 2804 - STUDENT TEACHING - PRIMARY PLUS

English Education - English Instructional I Certificate

The Instruction I Teaching Certification Program in English Education offers students a rigorous course of instruction in teaching English topics in grades 7-12. The program satisfies the requirements for earning a Pennsylvania Instructional I Certificate in Secondary English Education.

Our program approaches pedagogy centered on dialogic, student-centered instruction that addresses literature, literary theory, and writing in the secondary ELA classroom. We also focus on issues of equity, justice, and engagement in today's schools.

30 credits required for this program.

PY Core Curriculum (Instructional I Certification)

- TLL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- TLL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2
- TLL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC
- TLL 2824 - STUDENT TEACHING SEMINAR
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Substitutions for 2022-23 Academic Year

*For the 2022-23 academic year, students will take two 1-credit offerings of Freedom Seminar (EDUC 3067) as substitutions for Attentional Teaching Practices 1 (HHD 2265) and 2 (HHD 2266).

Executive Cohort for Educational Leadership Certificate leading to a Superintendent's Letter of Eligibility

- 24 Credits over twenty months or 5 terms
- All courses approved for Act 45 Credit
- Blended Delivery System (Online + Monthly Campus Class)
- Three 1 credit internship experiences

Curriculum

- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION

- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE
- TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION
- TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES
- TLL 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION
This course is taken in three (3) separate terms for one (1) credit each
- TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES
- TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

K-12 Principal Certificate - School Leadership

K-12 Principal Cert program is for the emerging education leader interested in an administrative position in a K-12 education. Students ground their academic study in the personal and professional growth of aspiring school leaders in three themes: Ethics, Inquiry, and Integrity. Students study leadership through the lens of ethics as the wisdom to lead schools well in complex and uncertain times; inquiry as understanding the dynamics of the production of knowledge; and integrity to navigate the moral context of education for equity and justice.

The K-12 Principal certificate program is a 15-month cohort-based program. Responding to the growing complexity of the role of the principal, the preparation program equips leaders with the ability to be effective change agents through four study areas, including leader as learner, instructional leadership, institutional leadership, and public leadership. Other unique features of the program include an intensive internship each term with mentor principals, week-long summer institutes face-to-face during the first and second summers, evidenced-based coherent curriculum, online and hybrid courses.

The K-12 principal requires 24 credits, including a 4-credit internship.

Curriculum

- TLL 2123 - SUMMER LEADERSHIP INSTITUTE (3 credits)
 - TLL 2402 - HEALTH, MENTAL HEALTH AND SAFETY (2 credits)
 - TLL 2404 - INSTRUCTIONAL LEADERSHIP (5 credits)
 - TLL 2406 - PUBLIC LEADERSHIP: ASSESSMENT AND ACCOUNTABILITY (2 credits)
 - TLL 2407 - POLITICS OF EDUCATION: SCHOOL COMMUNITY PARTNERSHIP (1 credit)
 - TLL 2410 - INSTITUTIONAL LEADERSHIP (3 credits)
 - TLL 2097 - INTERNSHIP (4 credits taken across 4 semesters)
 - TLL 2411 - PUBLIC LEADERSHIP: SCHOOL LAW (1 credit)
 - TLL 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS (2 credits)
 - TLL 2408 - POSITIVE BEHAVIOR SUPPORT (1 credit)
- *As of summer 2023, a new course TLL 2409 - Multi-Tiered System of Supports (3 credits) will replace TLL 2412 Leadership for Inclusive Schools (2 credits) and TLL 2408 - Positive Behavior Support (1 credit).

Mathematics Education (7-12) Instructional I Certificate

The Instructional I Certificate program in Mathematics Education offers students a rigorous course of instruction in teaching Mathematics in grades 7-12. The program combines methodological course-work and practical experience student teaching in a public-school classroom. Our program is focused on research-based best practices that support all children to learn and is committed to fostering practices that further social justice. Candidates graduate satisfying the requirements to earn a Pennsylvania Instructional I Certificate. It requires 30 credit hours and an intensive student teaching experience, both of which are completed over the course of two semesters, fall and spring.

Requirements

- TLL 2476 - TEACHING AND LEARNING IN SECONDARY MATH 1
- TLL 2740 - PRACTICUM IN SECONDARY MATHEMATICS
- TLL 2477 - TEACHING AND LEARNING IN SECONDARY MATH 2
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2478 - TEACHING AND LEARNING IN SECONDARY MATH 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2495 - INTERNSHIP - MATH
- TLL 2842 - STUDENT TEACHING SEMINAR-MATHEMATICS
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Orientation and Mobility for Individuals with Visual Impairments and Blindness Certificate

This program provides students with the professional competencies and experiential learning to become eligible for certification by the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP), the national certifying body in O&M.

26 overall credits are required for this program.

Curriculum

All courses are 3 credits unless otherwise indicated.

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS
- TLL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

Reading Specialist Certificate of Advanced Study K-12

The School of Education offers preparation that leads to certification as a Reading Specialist (K-12). Coursework is completed in a blended format of on-campus and online study. The curriculum for the Reading Specialist Certificate of Advanced Study (K-12) is designed to provide candidates with opportunities to build specialized knowledge, engage in principled practice in supervised settings, and prepare for leadership roles in schools and school districts. The curriculum addresses the International Literacy Association's *Standards for the Preparation of Literacy Professionals* (2017) in the areas of:

- Foundational Knowledge
- Curriculum and Instruction
- Assessment and Evaluation
- Diversity
- Literate Environment
- Professional Learning and Leadership

Prerequisites

It is required that applicants have an initial teaching certificate. If initial certification does not include PDE-required special education courses (9 credits) and an English Language Learners course (3 credits), then those courses must be completed before application for certification. Teaching experience is advised.

In addition, the following prerequisites are required for this program:

- Teaching of Reading OR Language Arts - 3 credits
- Human Development OR Educational Psychology - 3 credits
- Children's or Adolescent Literature - 3 credits

Requirements

A minimum of 24 credit hours are required for this program.

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- TLL 2211 - COMPREHENSION AND VOCABULARY
- TLL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS
- TLL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS
- TLL 2219 - DISCIPLINARY LITERACY
- TLL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS
- TLL 2243 - THEORY & PRAC IN TCHNG WRITING
- TLL 2281 - LEADERSHIP SCHOOL LITERACY PROGM

Science Education - Science (7-12) Instructional I Certificate

The Instructional I Certificate program in Science Education offers students a rigorous course of instruction in teaching grades 7-12, combining methodological course-work and practical experience student teaching in a public-school classroom. In our program, students select one of the following areas of specialization in science: Biology, Chemistry, Earth and Space Science, General Science, or Physics. Our program is focused on research-based best practices that support all children to learn and is committed to fostering practices that further social justice. Candidates graduate satisfying the requirements to earn a Pennsylvania Instructional I Certificate. 30 credits are required for this program.

Requirements

- TLL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1
- TLL 2845 - PRACTICUM IN SECONDARY SCIENCE
- TLL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2432 - TEACHING & LEARNING IN SECONDARY SCIENCE 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2843 - STUDENT TEACHING SEM - SCIENCE
- TLL 2496 - INTERNSHIP - SCIENCE
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Social Studies Education (7-12) Instructional I Certificate

The Instructional I program in Social Studies Education offers students a rigorous course of instruction in teaching Social Studies topics in grades 7-12. The program satisfies the requirements for earning a Pennsylvania Instructional I Certification. This intensive, twoterm program combines rigorous coursework with substantial hands-on teaching experience to give graduates both the theoretical grounding and real-world skill they will need to embark upon their teaching careers.

Our program is focused on research-based best practices that support all children to learn and is committed to fostering practices that further social justice.

30 credits are required for this program.

Requirements

- TLL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1
- TLL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2
- TLL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES
- TLL 2502 - STUDENT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2883 - INTERNSHIP - SOCIAL STUDIES
- TLL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Supervisor of Special Education Certificate

The Supervisor of Special Education Certification program is a part-time, hybrid program featuring 1 course per semester and a flexible internship that results in Pennsylvania Department of Education Certification.

This program provides candidates with the knowledge necessary to implement high quality programming for individuals with disabilities and to comply with federal and state regulations. The major distinguishing characteristic of this program is the application of supervisory theory to the context of special education.

15 credits are required for this program.

Students are also required to complete a 3-credit internship, which provides opportunities to learn more practically the duties, roles, and responsibilities of supervisors/administrators in special education. Students are required to secure a local, on-site mentor with whom to collaborate in completing the required activities.

Requirements

This certification option in special education is built on the assumption that most supervisory operations in education are, in principle, generic, with their fundamentals of theory and practice in common. The major distinguishing characteristic of this option is the application of supervisory theory to the context of special education. Specific emphasis is placed upon activities, relationships, facilities, agencies, persons, and processes that have particular relevance to special education. Students complete a plan of studies including courses in supervision, finance, curriculum development, current and legal issues in the specialization, and a supervision internship.

Current Issues and Trends in Special Education

- TLL 2542 - WEB CURRNT ISSUES & TRENDS SP ED

Teacher of Students with Visual Impairments and Blindness (TVI) Certificate

The Teacher of Students with Visual Impairments and Blindness program provides students with the professional competencies and experiential learning to become eligible for PA certified pre-K-12 special education teachers for students who are blind or visually impaired.

29 credits are required for this program.

Curriculum

All courses are 3 credits, except where indicated.

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2529 - BRAILLE
- TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS
- TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2545 - EDUCATION OF CHILDREN WITH VI 2
- TLL 2547 - NEMETH CODE/ABACUS
- TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM: VI

Doctoral

Education Leadership, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. The day includes opportunities to meet program faculty, EdD program information, and cohort-building activities as well as an introductory session with other students in your academic major. Orientation typically takes place in March or April.
- **Intensive on-ramp:** The EdD cohort will participate in a full-week, on-campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience typically takes place in June, and is a component of the first summer courses (Foundations 1 and Practitioner Inquiry 1).
- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is *required*.

SCHEDULE

Year 1: Summer	Year 1: Fall	Year 1: Spring	Year 1: Summer
EDUC 3002 FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER EDUC 3001 PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT (3 credits)	EDUC 3004 FOUNDATIONS: CONTEXTS OF EDUCATION Major: Course 1 (3 credits)	EDUC 3003 FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major: Course 2 (3 credits)	EDUC 3005 FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 SUPERVISED PRACTITIONER INQUIRY

EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	

CORE COURSES: 24 credits

Foundation Courses: 12 credits

- EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: (3 credits)

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY
Students will identify, review, and synthesize relevant scholarship that supports their focus on addressing a problem of practice.

Laboratory of Practice: 3 credits

- EDUC 3012 - LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

Guidance In Scholarly Practice: 18 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE
Students conduct their Dissertation in Practice, with the support from their advisor.

Education Leadership ARCO Curriculum

- TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION
- TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES
- TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES
- TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Education Leadership, PhD

The Education Leadership Major leading to the PhD degree prepares students to understand the implications of education policy and practice. They will pursue scholarship as it relates to education reform, educational inequality, comparative education, research methods, and the moral context of education for equity and justice.

This degree requires a minimum of 90 credits.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Doctor of Philosophy Degree

The University of Pittsburgh School of Education's Doctor of Philosophy (PhD) programs prepare students to be nationally competitive and highly qualified for research careers in both academic and non-academic institutions. Our full-time, research-intensive PhDs produce scholars who demonstrate excellent writing and research skills, independent scholarship and productivity, and proficiency in teaching. Under the guidance of our distinguished graduate faculty, students will have the opportunity to produce peer-reviewed publications, present at professional conferences, and collaborate on grant-writing and review, positioning them to excel in their careers as researchers and faculty. Because the PhDs are full-time, students can be fully immersed in their coursework and research in preparation for an impactful scholarly career.

Degree Requirements: This degree requires a minimum of 90 credits.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements and to the Education Leadership webpage.

Required Courses (6 credits)

- EFOP 3003 - THEORIES OF EDUCATIONAL INEQUALITY
- EFOP 3001 - RESEARCH METHODS IN EDUCATION POLICY AND PRACTICE

Specialization Courses (30 credits)

Includes 21 credits of Education Leadership major courses.

Research Methodology (18 credits)

Required courses (9 credits):

- EDUC 3100 - INTRODUCTION TO QUANTITATIVE METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

Supporting Field (9-18 credits)

Supervised Research (6 credits)

- TLL 3097 - SUPERVISED RESEARCH

Dissertation Credit (18 credits)

Additional Required Courses

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2
- Writing Seminar

Language, Literacy and Culture, PhD

The Language, Literacy, and Culture (LLC) PhD is for students who aim to conduct research on the interconnection of culture, language, and literacy in both formal and informal educational settings. The goal of the LLC program is to develop interdisciplinary knowledge complemented by specialized knowledge of teaching and learning in foreign and second language, literacy, social studies, and early childhood education. We frame the exploration of teaching and learning within perspectives that promote equity, social justice, and democratic values. Students engage closely with and learn from faculty who conduct research in the field and have a strong commitment to high-quality teaching.

90 credits are required for this program.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Curriculum

PhD students in the Language, Literacy, and Culture program who enter the program without a Masters degree in a relevant field are required to take eight to nine courses within the major field of LLC, five research methods courses, six courses in a cognate (supporting) field, the first year seminar, annual writing workshops, and elective courses as needed. Students with a Masters degree in a related field can transfer credits toward the PhD with approval by the LLC faculty. PhD students are also required to complete one research practicum and one teaching practicum. Furthermore, all PhD students are required to be full-time students. PhD students must successfully pass required doctoral milestone projects in order to continue in the program. The PhD program culminates with completion of a doctoral dissertation.

Major Field Courses (24-27 credits)

- TLL 3248 - SPECIAL TOPICS-LANGUAGE AND LITERACY

Research Methods (15 credits)

- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminars (3 credits)

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Research Practicum (3 credits)

- TLL 3291 - SUPERVISED RESEARCH-LANGUAGE, LITERACY, AND CULTURE

Teaching Practicum (3 credits)

- TLL 3526 - PRACTICUM IN COLLEGE TEACHING

Electives (variable credits)

Writing Workshops (variable credits)

Dissertation (18 credits)

- TLL 3296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Learning Sciences and Policy, PhD

The Learning Sciences and Policy (LSAP) PhD program brings three groups of faculty expertise together into a collaborative research and training environment: learning sciences in education; content-based educational research; and education policy and organizational change. The goal for the program has been to produce a yearly cohort of 5 to 8 nationally-competitive research scholars who have the training, track-record, and vision to become leaders in understanding and promoting educational change.

Our program is based on the belief that understanding learning, teaching, and organizations is best undertaken as an interactive system, and that an integrated and coordinated interdisciplinary approach is best suited to understand, design, and implement educational change. The program combines disciplines in learning sciences, teaching in the content disciplines, and organization and policy studies with the goal of improving instruction at scale, and is predicated on the idea that successful policy solutions will require learning on the part of educational professionals at all levels of the system.

Innovative features of the LSAP PhD Program:

- Students will be immersed in **rigorous interdisciplinary research and training** experiences from their first day in the program.
- Access to Pittsburgh's rich **talent pool of analysts and research in education policy and learning** including research scientists at Learning Research and Development Center (LRDC), policy specialists at the RAND Corporation, research methodologists at Carnegie Mellon, and education reform specialists at the Institute for Learning.
- Admitted students will be guaranteed **full funding** (for three years) through research assistantships that will allow them to work alongside active researchers on funded research programs.
- Students will be provided opportunities to participate in a semester of **field placement** and/or a semester of teaching practicum at the college level. Field placements provide experiences outside the university (e.g., museums, school districts, community centers, and research centers).
- Active involvement in ongoing **research projects**.
- **Integrated** coursework that covers the fields of Learning Sciences, Learning Policy and Organizations, and Content Area Learning.
- Rigorous training in **quantitative, qualitative, and mixed research methods**.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Degree Requirements

Doctoral students in the Learning Sciences and Policy program who enter the program without a master's degree in a relevant field are required to take six core courses, a minimum of six research methods courses, and eight advanced seminars in an area of specialization. Students also participate as part of a faculty member's research team throughout their time in the program. As part of that research team, students engage in every phase of the research process, apprenticing under the active mentoring of the faculty member. Additionally, doctoral students are expected to complete at least two independent research projects under the supervision of the faculty. Students will be provided opportunities to participate in practica/internships, the purposes of which are to expose students to a range of kinds and forms of research and build students' professional skills. Students with a Masters degree in a related field can transfer credits toward the PhD with approval by the LSAP faculty.

Requirement	Classes	Credits
A. Core Courses	4	12
- Learning Sciences and Educational Change	(1)	
- Education Policy	(1)	
- Organizational Perspectives on Educational Improvement	(1)	
- Design	(1)	
- First Year Seminar (EDUC 3102 and 3105) ¹	2	3
- Writing Seminar ²	9	9
B. Research Methods	6	18
- Required coursework in year 1 includes Quantitative 1 (EDUC 3100) and 2 (EDUC 3103); Qualitative 1 (EDUC 3104)	(3)	
C. Advanced Seminars/Directed Studies in Area of Specialization ³	12	30-36
- Supervised Research	(2)	
D. Internship	2	0-6
E. Doctoral Dissertation Research	6	18
Total		90

¹ First Year Seminar meets every other week, with 1 credit in fall and 2 credits in spring, taken over and above the typical 9-credits course load. These credits are above and beyond the 90 credits required for graduation.

² Writing Seminar taken over and above the typical 9-credit course load beginning in the second year of study.

³ This includes courses taken outside the School of Education.

- EFOP 3095 - ORGANIZATIONAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT
- TLL 3096 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION
- TLL 3097 - SUPERVISED RESEARCH
- TLL 3080 - DIRECTED STUDIES - LSAP
- TLL 3081 - DOCTORAL DISSERTATION RESEARCH IN LSAP

Special Education, PhD

The goal of the Special Education PhD degree is the preparation of leadership personnel to assume academic faculty positions at the university level. The focus of preparation for the PhD program is on teaching graduate and undergraduate courses, mentoring graduate students, developing a research agenda that will result in funded and published research and translating research outcomes for the improvement of educational and related service programs for children and youth with disabilities. PhD candidates are mentored by a faculty adviser who shares their research interests and are supported by graduate faculty in Special Education. Students may focus their studies in one or more of the following areas: applied behavior analysis, autism, emotional and behavior disorders, learning disabilities, or severe disabilities. The PhD program is writing, and research-intensive and PhD candidates will have multiple opportunities to learn and participate in the review of research literature, the preparation and submission of research grant proposals, the design and implementation of research studies, and the preparation and dissemination of research reports. The PHD program has a minimum of 90 credits of course work which includes dissertation research. Also, the PhD program requires, at minimum, on full-time (9 credits) semester.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Special Education Major Field (24 credits minimum)

Required:

- 18 credits minimum at the 3000-level or equivalent
- 15 credits minimum at the University of Pittsburgh

Possible classes:

- Professional Seminar in Special Education 1
- Issues and Trends in Special Education
- Instructional Practices in Special Education
- Professional Seminar in Special Education 2
- Legal and Legislative Issues in Special Education
- Advanced Single-Case Design
- Grant Writing in Special Education

Cognate (Supporting Field)

0-18 credits

Research Methodology (15 credits)

- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS
- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3105 - FIRST YEAR SEMINAR 2
- 2 additional research methods elective classes (6 credits)

First Year Seminars (3 credits)

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Research Practicum (3 credits)

Teaching Practicum (3 credits)

Special Education Writing Seminars (6-8 credits)

One credit per semester, starting in year 2.

Electives (variable credits)

Dissertation (18 credits)

Vision Studies, PhD

Blindness/Vision Impairment/Orientation and Mobility, Doctor of Philosophy (PhD)

Total of 90 credits minimum (maximum of 30 credits from master's degree)

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Major Field (DIL) Studies

30-36 credits with at least 18 credits at the 3000 level with a minimum of 15 credits at the University of Pittsburgh

- TLL 3590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Research Methodology (12 credits minimum)

Approved courses in Research Methodology - 12 credits

Research Practicum Courses (6 credits)

Approved Research Practicum - 6 credits

Academic Area (9-18 credits)

Nine credits are taken outside of the School of Education if the student's bachelor's degree is in an academic discipline or the equivalent. Eighteen credits are taken outside the School of Education if the degree is not in an academic discipline. 9-18 credits

Electives (Credits variable)

Electives are chosen to bring breadth and/or depth to the program of study. Because of the broad areas of specialty within the field of Special Education, these courses may be taken within the School or from across the University.

Dissertation (18 credits)

Graduate Certificate

Critical Technology and Digital Media for Learning Certificate

This CriT-DML certificate program seeks to deepen students' understanding of how we use digital media and technology to communicate, create, design, collaborate, teach, learn, and assess within a range of educational contexts. Through this program, course facilitators and students will work collaboratively to interrogate, deconstruct, and think critically about how we produce and use digital media and technology in education and society. To intentionally work toward equity, justice, and freedom, we seek to design learning experiences that center and support people and human processes. This certificate program is designed for educators, instructional designers, administrators, leaders, school technology directors, technology curriculum specialists, or technologists who wish to broaden their understanding of and experience with digital media and technology applications for learning. Students should identify strongly with the School of Education's mission/vision for equity and justice and apply this lens to their scholarship in the program. The CriT-DML certificate can be a doorway to expanded career opportunities in technology applications across and outside the field of education.

12 credits are required for this certificate program.

Requirements

- EDUC 2300 - DIGITAL MEDIA FOR LEARNING
- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
- EDUC 2303 - TECHNOLOGY IN CONTEXT

Total Credits: 12

Science, Technology, Engineering, Art & Mathematics (STEAM), Online Certificate

Curriculum

All students must complete 12 course credits for this STEAM Education Certificate within the Department of Instruction and Learning.

- TLL 2008 - STEAM: INSTRUCTIONAL DESIGN
- TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES
- TLL 2009 - STEAM: ASSESSMENT
- TLL 2010 - STEAM: IMPLEMENTATION

Field-based hours are required (30 hours) to meet the STEM Endorsement and therefore will be a part of all courses. These hours will be embedded in coursework of STEAM Transdisciplinary Learning Approaches and STEAM Implementation.

World and Heritage Language Education Graduate Certificate

In the Fall of 2021 the Foreign Language Education - Foreign Language Instructional I Certificate was renamed to World and Heritage Language Education Graduate Certificate

The Instructional I Teaching Certification Program in World and Heritage Language Education offers students a rigorous course of instruction in teaching specific world language areas in grades PK-12. The program satisfies the requirements for earning a Pennsylvania Instructional I Certificate.

Certification studies are available in French, German, Italian, Spanish, Chinese, Japanese, or Latin.

This program prepares students for PA PK-12 certification in world language education. It requires 30 credit hours and an intensive student teaching experience, both of which are completed over the course of two semesters, fall and spring. Graduates must complete the appropriate Pennsylvania Department of Education approved certification examination(s) in order to obtain PA certification.

Certificate Requirements

- TLL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1
- TLL 2882 - INTERNSHIP - FOREIGN LANGUAGE
- TLL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2
- TLL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE
- TLL 2502 - STUDENT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2826 - STUDENT TEACHING SEMINAR-FOREIGN LANGUAGE
- TLL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Joint Degree

World and Heritage Language Education with TESOL Certificate, MEd

Master of Education Degree with TESOL Certificate

This option permits qualified individuals for the MEd with a specialization in World and Heritage Language Education to be considered upon application by the Department of Teaching Learning and Leading and by the Department of Linguistics for admission to the University of Pittsburgh certificate program in the Teaching of English to Speakers of Other Languages (TESOL). If accepted, students combine course work for the MEd in World and Heritage Language Education with required courses for the TESOL certificate. Students complete a minimum of 37 credits in this combined specialization. The University of Pittsburgh TESOL certificate is not to be confused with state certification for teaching in the public elementary or secondary schools. The degree is ideal for individuals seeking positions as English language teachers in other countries or in university English Language Institutes. Each applicant who is not a native speaker of English must: (1) achieve a score of 100 or higher on the internet-based TOEFL (Skill Requirements: Reading and Listening - High; Speaking and Writing - one skill must be at the level of Good) or 7.5 or higher on the IELTS (Skills Requirement: Speaking and Writing - combined minimum of 13) and (2) have good spoken English skills.

- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
- TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION

- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- Elective - Graduate level 2000 or higher (Suggested: TLL 2255, 2722, or 2257)
- LING 2146 - SECOND LANGUAGE ACQUISITION
- LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT
- LING 2195 - PRACTICUM ESL TEACHING
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Master's

Applied Behavior Analysis, MEd

The Applied Behavior Analysis MEd program provides intensive instruction in the theoretical bases of Applied Behavior Analysis as well as the clinical and pedagogical application of the theory and principles. The courses are aimed at special educators and behavioral health providers and are designed to specifically prepare students to apply for the certification examination of the Behavior Analyst Certification Board, Inc (BACB). Students may have the opportunity to complete supervised practicum as well.

33 credits required for this program

Curriculum

- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION
- TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1
- TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
- TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
- TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS
- TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS
- TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Electives

Students will take 9 credits total in electives. All classes are 3 credits, except TLL 2569 - Applied Behavioral Analysis Practicum, which can be taken for 2-3 credits.

- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM
- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- TLL 2529 - BRAILLE
- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM
- TLL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Combined Accelerated Studies in Education (CASE), MEd

The Combined Accelerated Studies in Education (CASE) program is a dual-certification, dual-degree program in the Pitt School of Education. Students complete prerequisite courses in the freshman and sophomore years, and then apply to transfer into the Pitt School of Education. Students work on their B.S. in Applied Developmental Psychology in the junior and senior years, then move directly onto the master's in education program. Students are prepared for both the Pennsylvania PK-4 Early Childhood Education and PK-12 Special Education teacher certifications.

The CASE program spans over the Departments of Health and Human Development (HHD) and Teaching, Leading and Learning (TLL) in the School of Education. Students gain a deep knowledge of child and youth development, as well as methodology and best practices in the content areas of instruction. A social justice and equity focus in the CASE program supports students' preparation for teaching in 21st-Century schools. Teacher certifications cannot be obtained until the completion of the graduate year of study.

Students are required to complete 127 credits of prerequisite and major courses to earn their Bachelor of Science in Applied Developmental Psychology. Students are then required to complete 40 credits in the graduate level major of Combined Study in Early Childhood and Special Education leading to the Master of Education degree.

Overall credits required for the MEd program: 40

Students are required to complete a comprehensive exam

Requirements

- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2513 - INSTRNL METH-HIGH INCDNC DISABS
- TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES
- TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED
- TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES
- TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Curriculum & Instruction, M.Ed.

All students complete a minimum of 30 credits in this non-thesis degree. Students in the program complete 10 shared courses (30 credits) which focus on evidence-based best practices for teaching that centers equity-oriented education. This approach also allows students to dive more deeply into topics relevant to their professional goals by offering engaging transdisciplinary work in STEAM (12 credits) and Literacy (9 credits). Students will also take core courses (9 credits) in central theoretical stances, research in the classroom, and on digital media for learning across the curriculum. The students will create a capstone project in the form of a professional portfolio. In addition to graduating with their master's, all students would also have completed the requirements for the STEM endorsement from the Pennsylvania Department of Education (available to PA licensed teachers).

STEAM-Oriented Courses

- TLL 2008 - STEAM: INSTRUCTIONAL DESIGN
- TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES
- TLL 2009 - STEAM: ASSESSMENT
- TLL 2010 - STEAM: IMPLEMENTATION

Literacy Focused Courses

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- TLL 2219 - DISCIPLINARY LITERACY
- TLL 2243 - THEORY & PRAC IN TCHNG WRITING

General Courses

- EDUC 2100 - EDUCATION AND SOCIETY
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- EDUC 2300 - DIGITAL MEDIA FOR LEARNING

Elective Courses

- EDUC 2301 - ONLINE PEDAGOGY AND PRAXIS
- EDUC 2302 - CRITICAL DIGITAL LITERACIES, SCHOOLING, AND IDENTITY
- EDUC 2303 - TECHNOLOGY IN CONTEXT

Total Credits: 30

Early Childhood Education, MEd

The Early Childhood Education M.Ed. program is designed to provide candidates with a strong academic and practical background to support the education of young children (from birth to age 8) in varied settings including schools, community agencies, homes, and other settings. Through rigorous coursework, field placements, and hands-on learning, students develop competence in the use of culturally responsive and developmentally appropriate practices to educate infants, toddlers, preschoolers, and primary-age children.

30 credits are required for this program. Students in this program must pass the comprehensive exam requirement at the end of the program to earn the M.Ed. Students have the option to do a professional portfolio and related presentation or to complete a take home exam in fulfillment of this requirement.

Introduction to Early Childhood Education (3 credits)

- TLL 2041 - INTRO TO EARLY CHILDHOOD ED

Special Education (3 credits)

Choose one of the following 3-credit courses:

- TLL 2500 - FOUNDATIONS OF SPECIAL EDUC
- TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
- TLL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS
- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Community Resources (3 credits)

Choose one 3-credit course:

- TLL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES
OR
- TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES

Methods Courses (9 credits)

Choose three of these 3-credit courses over the entirety of the program (9 credits total).

- TLL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD
- TLL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL
- TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS
- TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1
- TLL 2209 - READING WRITING METHODS 2: GRADE 2-4
- TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4
- TLL 2047 - INTEGRATED CURRICULUM PRE-K-4
- TLL 2563 - SEM: INCLUSION EARLY CHILDHOOD
- Other Elective Approved by Advisor - 3 credits

Introduction to Research Methods (3 credits)

Choose one of the following 3-credit courses:

- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
OR
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Research Seminar (3 credits)

- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Education & Human Development/ Psychological Perspectives on Education (3 credits)

Choose one of the following 3-credit courses:

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
OR
- EDUC 2007 - HUMAN LEARNING

Approved Elective (3 credits)

Choose one 3-credit practicum or approved elective related to Early Childhood Education or Family Studies.

Education Leadership, MEd

The Education Leadership Major leading to the Master of Education degree is for the emerging education leader interested in an administrative position in K-12 education. MEd students ground their academic study in the personal and professional growth of aspiring school leaders in three themes: Ethics, Inquiry, and Integrity. Students study leadership through the lens of ethics as the wisdom to lead schools well in complex and uncertain times; inquiry as understanding the dynamics of the production of knowledge; and integrity to navigate the moral context of education for equity and justice.

30 credits are required for this program. Students in this program must successfully complete a Capstone project as part of their Master's Research Seminar class

Curriculum

- TLL 2123 - SUMMER LEADERSHIP INSTITUTE (3 credits)
- TLL 2402 - HEALTH, MENTAL HEALTH AND SAFETY (2 credits)
- TLL 2404 - INSTRUCTIONAL LEADERSHIP (5 credits)
- TLL 2406 - PUBLIC LEADERSHIP: ASSESSMENT AND ACCOUNTABILITY (2 credits)
- TLL 2407 - POLITICS OF EDUCATION: SCHOOL COMMUNITY PARTNERSHIP (1 credit)
- TLL 2410 - INSTITUTIONAL LEADERSHIP (3 credits)
- TLL 2097 - INTERNSHIP (4 credits taken across 4 semesters)
- TLL 2411 - PUBLIC LEADERSHIP: SCHOOL LAW (1 credit)
- EDUC 2100 - EDUCATION AND SOCIETY (3 credits)
- TLL 2290 - RESEARCH SEMINAR FOR MED STUDENTS (3 credits)
- TLL 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS (2 credits)
- TLL 2408 - POSITIVE BEHAVIOR SUPPORT (1 credit)

*As of summer 2023, a new course TLL 2409 - Multi-Tiered System of Supports (3 credits) will replace TLL 2412 Leadership for Inclusive Schools (2 credits) and TLL 2408 - Positive Behavior Support (1 credit).

English Education, MAT

The Master of Arts (MAT) program in English Education offers students a rigorous course of instruction in teaching English topics in grades 7-12. The MAT satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master's in Teaching upon graduation.

Our program approaches pedagogy centered on dialogic, student-centered instruction that addresses literature, literary theory, and writing in the secondary ELA classroom. We also focus on issues of equity, justice, and engagement in today's schools.

36 credits are required for this program

MAT Program

- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2502 - STUDENT W/DISAB IN SECNDRY CLSSRM
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION
- TLL 2824 - STUDENT TEACHING SEMINAR
- TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC
- TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- TLL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1
- TLL 2245 - TEACHING & LEARNING IN SECONDARY ENGLISH 2
- EDUC 2200 - DISCIPLINED INQUIRY
- TLL 2820 - TEACHING AND LEARNING IN SECONDARY ENGLISH 3
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Mathematics Education, MAT

The Master of Arts in Teaching (MAT) program in Mathematics Education offers students a rigorous course of instruction in teaching Mathematics in grades 7-12, combining methodological course work and practical experience in a full-year internship in a public school classroom. Capstone courses that support learning from teaching culminate in a reflective teaching portfolio and project.

- requires Teaching Interns to take and pass the Content Knowledge test (Praxis II) during the first semester of their program in order to obtain their Intern Certificate
- satisfies the requirements for a Pennsylvania Instructional I Certificate (pending passing scores on the national PRAXIS II Exam, successful completion of the PA Statewide Evaluation Form for Student Professional Knowledge and Practice (PDE 430), and satisfactory performance in courses and in the internship)
- is completed in three terms (fall, spring, summer 1 session) beginning in late August of the admission year and concluding in mid-June of the following year
- consists of 36 credits of graduate course work combined with an internship in a local school district from August through June

Required Courses

- TLL 2476 - TEACHING AND LEARNING IN SECONDARY MATH 1
- TLL 2740 - PRACTICUM IN SECONDARY MATHEMATICS
- TLL 2477 - TEACHING AND LEARNING IN SECONDARY MATH 2
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- TLL 2478 - TEACHING AND LEARNING IN SECONDARY MATH 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2495 - INTERNSHIP - MATH
- TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2
- TLL 2842 - STUDENT TEACHING SEMINAR-MATHEMATICS

Orientation and Mobility for Individuals with Visual Impairment and Blindness, M.Ed.

The Orientation and Mobility for Individuals with Visual Impairment and Blindness, M.Ed. provides students with the professional competencies and experiential learning to become orientation and mobility specialists eligible for certification by the Academy for Certification of Vision Rehabilitation and Education Professionals (ACVREP), the national certifying body in O&M.

32 credits are required for this program.

Curriculum

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY
- TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1
- TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2
- TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY
- TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS
- TLL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Reading Education, MEd

The curriculum for the Reading Specialist Certificate of Advanced Study (K-12) program + M.Ed. is designed to provide candidates with opportunities to build specialized knowledge, engage in principled practice in supervised settings, and prepare for leadership roles in schools and school districts. In addition, candidates take a six-credit sequence of research courses that allow them to study their own practice or advance their knowledge in the field of reading education. Students are expected to complete 30 credits for this program.

Requirements

- TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS
- TLL 2211 - COMPREHENSION AND VOCABULARY
- TLL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS
- TLL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS
- TLL 2219 - DISCIPLINARY LITERACY
- TLL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS
- TLL 2243 - THEORY & PRAC IN TCHNG WRITING
- TLL 2281 - LEADERSHIP SCHOOL LITERACY PROGM
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS or
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Science Education, MAT

The Master of Arts in Teaching (MAT) program in Science Education offers students a rigorous course of instruction in grades 7-12, combining methodological course-work and practical experience in a full-year internship in a public-school classroom. Capstone courses that support learning from teaching culminate in a reflective teaching portfolio and project.

Our program is focused on research-based best practices that support all children to learn and is committed to fostering practices that further social justice.

Candidates graduate satisfying the requirements to earn a Pennsylvania Instructional I Certificate and a Master of Arts in Teaching degree.

In our program, students select one of the following areas of specialization in science: Biology, Chemistry, Earth and Space Science, General Science, or Physics.

36 credits are required for this program.

Master of Arts in Teaching Degree

- TLL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1
- TLL 2845 - PRACTICUM IN SECONDARY SCIENCE
- TLL 2431 - TEACHING & LEARNING IN SECONDARY SCIENCE 2
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- TLL 2432 - TEACHING & LEARNING IN SECONDARY SCIENCE 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2496 - INTERNSHIP - SCIENCE
- TLL 2843 - STUDENT TEACHING SEM - SCIENCE
- TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Social Studies Education, MAT

The Master of Arts (MAT) program in Social Studies Education offers students a rigorous course of instruction in teaching Social Studies topics in grades 7-12. The MAT satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master's in Teaching upon graduation.

The program is geared toward students who wish to teach within the field of social studies at the secondary level. This intensive, three-term program combines rigorous coursework with substantial hands-on teaching experience to give graduates both the theoretical grounding and real-world skill they will need to embark upon their teaching careers.

Our program is focused on research-based best practices that support all children to learn and is committed to fostering practices that further social justice.

36 credits are required for this program.

Master of Arts in Teaching Degree

- TLL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1
- TLL 2262 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 2
- TLL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- TLL 2827 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 3
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2883 - INTERNSHIP - SOCIAL STUDIES
- TLL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES
- TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2

Special Education and English Education, MEd

The Special Education and English Education, MEd program prepares students to teach adolescents both with and without disabilities. MOSAIC offers the unique opportunity to earn dual certification in Special Education and a Secondary Content Area, making graduates stand out in the job field. This rigorous 12-month program blends challenging coursework with full-time student teaching, giving candidates not only the knowledge but the experience to thrive in the classroom.

This program provides future teachers with the skills, knowledge, and experience to effectively teach adolescents with and without disabilities.

The program's rigorous academic curriculum centers on evidence-based practices in Special Education and English Education coursework. Candidates develop their teaching skills through practical experiences in a variety of public middle- and high-school classrooms.

42 overall credits are required for this program. This Master's Degree requires the completion of a comprehensive exam.

Curriculum

- TLL 2527 - LEVEL 1 OBSERVATIONAL PRACTICUM: VI
- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2513 - INSTRNL METH-HIGH INCIDNC DISABS

Special Education PreK-12, MEd

The Special Education PreK-12 MEd program focuses on preparing teachers to implement evidence-based instructional methods for school-age children with disabilities. Graduates will meet training eligibility for the Instructional I Special Education PreK-12 teaching certificate from the Pennsylvania Department of Education and earn a Master of Education degree.

33 overall credits are required for this program.

Curriculum

Summer (9 credits):

- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2575 - TRANSITION PROCESSES AND SPECIAL EDUCATION PROCEDURES
- TLL 2513 - INSTRNL METH-HIGH INCDNC DISABS

Fall (10 credits):

- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 2861 - PRACTICUM IN SECONDARY SPECIAL EDUCATION - SPECIAL EDUCATION TEACHER PREPARATION (1 credit)
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- Elective Course - 3 credit graduate level, must be approved by advisor. Possible electives for fall include: TLL 2203 LANGUAGE AND LANGUAGE SYSTEMS, TLL 2208 READING/WRITING METHODS 1: PRE K - GRADE 1, TLL 2505 AUTISM: CHARACTERISTICS AND INTERVENTIONS, EDUC 2100 EDUCATION AND SOCIETY

Spring (14 credits):

- TLL 2503 - STUDENT TEACHING FOR DUAL CERTIFICATION IN SECONDARY SCHOOLS (4 credits)
- TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2824 - STUDENT TEACHING SEMINAR
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Teacher of Students with Visual Impairments and Blindness (TVI) MEd

The Teacher of Students with Visual Impairments and Blindness (TVI) MEd program provides students with the professional competencies and experiential learning to become eligible for PA certified pre-K-12 special education teachers for students who are blind or visually impaired.

35 overall credits are required for this program. Students in this program must pass a comprehensive exam at the end of the program to earn the M.Ed.

Curriculum

- TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION
- TLL 2531 - EDUCATION OF CHILDREN WITH VI 1
- TLL 2529 - BRAILLE
- TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS
- TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
- TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI
- TLL 2545 - EDUCATION OF CHILDREN WITH VI 2
- TLL 2547 - NEMETH CODE/ABACUS
- TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM: VI
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY
- TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

World and Heritage Language Education, MAT

In Fall 2021 the Foreign Language Education, MAT was renamed to World and Heritage Language Education, MAT.

The Master of Arts (MAT) program in World and Heritage Language Education offers students a rigorous course of instruction in teaching specific foreign language areas in grades K-12. The MAT satisfies the requirements for earning a Pennsylvania Instructional I Certificate and provides students with a Master's in Teaching upon graduation.

Certification studies are available in French, German, Italian, Spanish, Chinese, Japanese, or Latin.

36 credits are required for this program.

Native speakers of the language of certification are not exempt from prerequisite course work in the culture, civilization literature, and structure of their language. Applicants who are non-native speakers of the language of certification are also required to achieve at least an Advanced-Low rating on an oral proficiency interview by an individual certified by the American Council on the Teaching of Foreign Languages. 36 credits.

Master of Arts in Teaching Degree

- TLL 2252 - TEACHING AND LEARNING IN K-12 FOREIGN LANGUAGE 1
- TLL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2
- TLL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE
- TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- EDUC 2200 - DISCIPLINED INQUIRY
- TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM
- TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS
- HHD 2265 - ATTENTIONAL TEACHING PRACTICES 1
- HHD 2266 - ATTENTIONAL TEACHING PRACTICES 2
- TLL 2826 - STUDENT TEACHING SEMINAR-FOREIGN LANGUAGE
- TLL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3
Internship Experience During Spring and Summer Terms
- TLL 2882 - INTERNSHIP - FOREIGN LANGUAGE

World and Heritage Language Education, MEd

In the Fall of 2021 the Foreign Language Education, MEd was renamed to World and Heritage Language Education, MEd.

The Master of Education (MEd) program with a specialization in world language education is a professional degree for individuals wishing to pursue advanced study in the field of teaching and learning world languages. Courses implement a practice-based approach to enhance students' knowledge and application of particular teaching strategies that have been identified as essential to the field of world language education.

The program coursework emphasizes practical application of current theories and methods for teaching and evaluating students as well as curriculum and materials development.

36 credits required for this program.

Unique features of the program include six credits of practicum coursework and six credits of research methodology

Curriculum:

A Comprehensive Exam must be taken in the Fall or Spring of the second year of study.

- TLL 2255 - TECHNQ/PROCDR FOREIGN LANG TCH
- EFOP 2106 - INTERNATIONAL AND GLOBAL EDUCATION
OR
- EDUC 2100 - EDUCATION AND SOCIETY

- TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED
- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- TLL 2722 - PRACTICUM IN FOREIGN LANGUAGE
- TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
- TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT
- TLL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS
- TLL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION

Electives

Choose 6.0 credits from the following courses

- TLL 2250 - TECHNOLOGY IN FOREIGN LANGUAGE EDUCATION
- TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS
- TLL 2711 - SPECIAL TOPICS - FOREIGN LANGUAGE EDUCATION
- LING 1000 - INTRODUCTION TO LINGUISTICS
- TLL 2041 - INTRO TO EARLY CHILDHOOD ED

Department of Health and Human Development

Programs within the Department of Health and Human Development prepare graduates for professional careers in clinical settings, teaching, research, and professional practice. Doctoral studies are offered with areas of concentration in applied developmental psychology, exercise physiology, and research methodology. We also offer an EdD in Health and Physical Activity. Graduates receiving doctoral degrees serve in academic and research capacities in universities, government agencies, public and private research, and testing centers.

Master's degrees are offered with areas of concentration in applied developmental psychology, research methodology, clinical exercise physiology, and health and wellness management. Pitt School of Education HHD students will embrace the primacy of developing responsive relationships with faculty and community partners as the basis for personal growth, networking, and career success. *As students, you will become...*

- Future leaders in your chosen specializations by modeling ethical behavior and equitable professional practices
- Committed professionals in Exercise Science, Health and Wellness Promotion, and Physiology (e.g. wellness, exercise prescription, cardiac and pulmonary rehabilitation, sports performance, prevention of chronic disease)
- Specialized professionals in Applied Developmental Psychology with competencies in both applied service and applied research (e.g. children with special healthcare needs-child life, behavioral health, infant mental health, child and youth development, program evaluation, early childhood intervention)
- Researchers who inform recommended practices for promoting health and development
- Faculty who educate the next generation of health and development professionals
- Committed professionals who understand the importance of enlightened public policies
- Engaged professionals who use social and political advocacy as a tool for ensuring the human rights of our most vulnerable citizens

Certificate

Infant Mental Health Certificate

The Certificate in Infant Mental Health is aligned with the Alliance for the Advancement of Infant Mental Health set of core theoretical principles of infant and early childhood development and mental health practice: that all work with children, families, and the individuals who work with them should be relationship-based, culturally sensitive, grounded in an understanding of developmental theory and research, and supported by reflective practice.

12 credits required for program completion

Curriculum

- HHD 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH 1
- HHD 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH 2
- HHD 2006 - INFANT MENTAL HEALTH INTERVENTIONS I
- HHD 2009 - INFANT MENTAL HEALTH INTERVENTIONS 2

Doctoral

Applied Developmental Psychology, PhD

The PhD program in Applied Developmental Psychology prepares students for research careers answering meaningful practice and policy questions relevant to improving the lives of children, youth, and families. Students will study the following areas in depth:

- The influence of individual, interpersonal, and contextual factors on learning and well-being outcomes for children and youth in school and out-of-school settings
- How human development and context interact to generate dynamic patterns of child and youth behavior
- The effectiveness of interventions to promote learning and wellbeing outcomes for children and youth

Students complete coursework in a diverse set of topics to learn academic writing skills, real-world applied research design, data analytics tools that match the complexities of the context under study, and authentic assessment strategies.

The PhD degree requires 90 credits distributed as follows: 9 credits in core courses, 12 in development in context course work, 15 credits in area of concentration, 9 credits in a supporting field or study, 1 credit of writing workshop, 3 credits of first year seminar, 30 credits in research methodology, 3 credits in supervised research, 3 credits in teaching practicum, and 18 credits in dissertation coursework. The program also requires two terms of supervised research, a research project, a practicum in college teaching, and a dissertation.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Core Courses

- PSY 2330 - DEVELM PSYCH: COGNITV DEVELP
- PSY 2325 - DVLPMNTL PSY: SOCIAL DEVELOPMENT
- Learning and Motivation in Context

Development in Context

12 Credits - Select at least 4 from the following (other options available with advisor consent):

- HHD 3589 - SPECIAL TOPICS
- HHD 3531 - FAMILY INFLUENCE ON CHILD DEVELOPMENT
- HHD 3535 - CULTURE AND COGNITION
- HHD 2588 - SPECIAL TOPICS

Area of Concentration

15 Credits

With you advisor, develop a coherent set of courses for your scholarly development.

Courses may be drawn from outside the School of Education or University of Pittsburgh.

Cognate Field

With your advisor, develop a coherent set of courses for your scholarly development in a related area that complements your academic interests.

Courses may be drawn from inside or outside of the School of Education or University of Pittsburgh.

Research, Teaching Practicum, and Dissertation Courses

All courses are 3 credits unless otherwise specified.

Research Methods

- HHD 3632 - APPLIED RESEARCH DESIGN
- HHD 3190 - RES SEM IN PSYCHOLOGY IN EDUC
- 1 Assessment Course
- 4 Additional Research Methods Courses

Supervised Research

- HHD 3591 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Teaching Practicum

- HHD 3592 - PRACTICUM IN COLLEGE TEACHING

Dissertation Credits

- HHD 3599 - DISSERTATION RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Exercise Physiology, PhD

The PhD in Exercise Physiology is focused on training students to prepare for academic research careers related to exercise and physical activity to prevent and treat chronic health-related conditions, health and well-being, and the underlying physiological and/or behavioral mechanisms. This degree will prepare students for academic careers focused on research, teaching, mentoring, and translation of research findings to a variety of settings. For students interested in an academic research career, this degree will also prepare students for post-doctoral fellowships and faculty positions.

Minimum of 90 credits beyond the baccalaureate degree. A maximum of 30 credits can be transferred from the Master's-level degree plus 9 post master's doctoral-level courses may be applied to the doctoral plan of studies.

For additional degree requirement information, refer to the School of Education section on Doctoral Degree Requirements.

Exercise Physiology Requirements

- The Plan of Study is to be submitted for Graduate Faculty review in the second semester of doctoral study.
- A minimum of 90 credits is required in the Doctoral Program

- A maximum of 30 credits from the master's degree, plus 9 post master's doctoral-level courses may be applied to the doctoral plan of studies.
- A minimum of 15 credits must be at the 3000 level for courses taken at the University of Pittsburgh. Note that only 3 hours can be in a Directed Study or Clinical Internship, and only 3 hours can be in a College Teaching Practicum (enrollment in a College Teaching Practicum Requires Prior Department Approval).

Major Field Health and Physical Activity, Exercise Physiology (30-36 Credits)

Collateral Area (9-18 Credits Minimum)

Courses in academic discipline studies supportive of the candidate's major field of specialization. These credits must be in coursework outside the School of Education.

Research Methodology (15 Credits Minimum)- Minimum requirement is for the student to demonstrate coursework through ANOVA and ANCOVA, and HPA 3400 Advanced Research Methodology

Research Practicum (6 Credits Minimum)

Electives (Credits Variable)

Dissertation (18 Credits Minimum)

PhD Core Curriculum

Methods Courses

Preparing students to tackle problems of practice and policy, and create innovative research agendas, requires intentionality in the methods coursework that supports students' development of independent projects, meaningful contributions to advisors' research, and critical analysis of past research. To help ensure that students develop the necessary analytic competencies, students across the areas of concentration (ARCOs) for the PhD in the School of Education are required to complete **a minimum of 5 methods courses**: Quantitative 1 (EDUC 2100) and 2 (EDUC 3100); Qualitative 1 (EDUC 3104); and 2 seminars in advanced quantitative or qualitative methods, determined by the student and their advisor.

- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3103 - QUANTITATIVE METHODS 2
- EDUC 3104 - INTRODUCTION TO QUALITATIVE METHODS

First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools, resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Health and Physical Activity, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. The day includes opportunities to meet program faculty, EdD program information, and cohort-building activities as well as an introductory session with other students in your academic major. Orientation typically takes place in March or April.
- **Intensive on-ramp:** The EdD cohort will participate in a full-week, on-campus, experience that includes intense work focused on understanding enduring problems of practice in education, health, and human development. This one-week experience typically takes place in June, and is a component of the first summer courses (Foundations 1 and Practitioner Inquiry 1).
- **Hybrid seminars:** You will experience a hybrid model of education through online course experiences and in-person, once per month (typically on Saturdays) sessions on the Pittsburgh campus. Attendance at in-person, on campus sessions is *required*.

SCHEDULE

Year 1: Summer	Year 1: Fall	Year 1: Spring	Year 1: Summer
EDUC 3002 FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER EDUC 3001 PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT (3 credits)	EDUC 3004 FOUNDATIONS: CONTEXTS OF EDUCATION Major: Course 1 (3 credits)	EDUC 3003 FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS Major: Course 2 (3 credits)	EDUC 3005 FOUNDATIONS: POLICY AS A LEVER FOR CHANGE EDUC 3009 SUPERVISED PRACTITIONER INQUIRY
Year 2: Fall	Year 2: Spring	Year 2: Summer	
EDUC 3006 PRACTITIONER INQUIRY 2 Major: Course 3	EDUC 3007 PRACTITIONER INQUIRY 3 Major: Course 4	EDUC 3008 PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY EDUC 3012 LABORATORY OF PRACTICE

EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	EDUC 3099 GUIDANCE IN SCHOLARLY PRACTICE (6 credits)	

CORE COURSES: 24 credits

Foundation Courses: 12 credits

- EDUC 3002 - FOUNDATIONS 1: BECOMING A LEADER SCHOLAR PRACTITIONER
- EDUC 3003 - FOUNDATIONS: LEADERSHIP IN GROUPS AND ORGANIZATIONS
- EDUC 3004 - FOUNDATIONS: CONTEXTS OF EDUCATION
- EDUC 3005 - FOUNDATIONS: POLICY AS A LEVER FOR CHANGE

Practitioner Inquiry Courses: 12 credits

- EDUC 3001 - PRACTITIONER INQUIRY 1: THE SCIENCE OF IMPROVEMENT
- EDUC 3006 - PRACTITIONER INQUIRY 2
- EDUC 3007 - PRACTITIONER INQUIRY 3
- EDUC 3008 - PRACTITIONER INQUIRY 4: APPLYING DISCIPLINED INQUIRY

Supervised Practitioner Inquiry: (3 credits)

- EDUC 3009 - SUPERVISED PRACTITIONER INQUIRY
Students will identify, review, and synthesize relevant scholarship that supports their focus on addressing a problem of practice.

Laboratory of Practice: 3 credits

- EDUC 3012 - LABORATORY OF PRACTICE
Students will complete a Laboratory of Practice, a setting where theory and practice inform and enrich each other and facilitate transformative and generative learning that is measured by the development of scholarly expertise and implementation of practice (Carnegie Project on the Education Doctorate, 2010). Students choose from three types of experiences: job embedded, aspirant, or global.

Guidance In Scholarly Practice: 18 credits

- EDUC 3099 - GUIDANCE IN SCHOLARLY PRACTICE
Students conduct their Dissertation in Practice, with the support from their advisor.

Health and Physical Activity Academic Major Courses (12 credits)

Health and Physical Activity ARCO Courses

- HHD 3114 - EVIDENCE BASED LIFESTYLE PROGRAM DESIGN AND EVALUATION
- HHD 3115 - HEALTH PROMOTION POLICY AND PROGRAM IMPLEMENTATION
- HHD 3116 - RESOURCE AND FUNDING ACQUISITION FOR HEALTH PROMOTION PROGRAMMING
- HHD 3117 - HEALTH PROMOTION PROGRAM TRANSLATION AND SUSTAINABILITY

Out-of-School Learning, EdD

EdD Curriculum

The EdD program is a three-year 84-credit program, including 24 credits transferred from relevant graduate work. Students are required to transfer 24 credits of graduate work into the EdD program.

The EdD curriculum is delivered in several stages, through a variety methods:

- **Orientation:** The EdD cohort participates in a full-day, on-campus, orientation in the spring before the summer start of the program. First Year Seminar

To further support students' research competencies, PhD students also participate in a school wide first year seminar (EDUC 3102) and EDUC 3105). This seminar meets every other week (1 credit in fall and 2 credits in spring, taken over and above the typical 9 credit course load) and focuses on familiarizing students with practical and ethical issues in research (e.g., necessary clearances for working in schools,

resolving questions of authorship and authorship order, human subjects guidelines), and supporting students work on their pre-dissertation proposal (e.g., developing innovative research questions, conducting a literature review).

- EDUC 3102 - FIRST YEAR SEMINAR 1
- EDUC 3105 - FIRST YEAR SEMINAR 2

Additionally, PhD students enroll in writing seminar courses taken over and above the typical 9-credit course load beginning in the second year of study. These credits are above and beyond the 90 credits required for graduation.

Master's

Applied Developmental Psychology, MS

The Applied Developmental Psychology Master of Science program at the Pitt School of Education emphasizes the correlation between research and practice in the promotion of positive outcomes in human development for children, youth, and families. Students who complete the Master of Science degree in Applied Developmental Psychology become experts in applying knowledge of child development and evidence-based practices to address real-world problems in real-world settings. Students also become experienced in interdisciplinary collaboration as they design, implement, and evaluate innovative intervention programs for children, youth, and families.

The Master of Science degree requires 36 credits distributed as follows: Applied Developmental Psychology (ADP) Core courses (18 credits), elective specialization courses (12 credits), and Community-Based Practice Learning (with capstone project) courses (6 credits).

Additional requirements for graduation include successful completion and oral defense of a written Capstone project that may include community-based placement.

Core Courses

All full-time students in the 36-credit Master of Science (MS) program in Applied Developmental Psychology (ADP) complete a common set (18 credits) of core, foundational courses.

- HHD 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE
- HHD 2510 - ASSESSMENT OF CHILDREN'S DEVELOPMENT IN REAL WORLD CONTEXTS
- HHD 2530 - APPLIED DEVELOPMENTAL PSYCHOLOGY (ADP): PROFESSIONAL IDENTITY AND LEADERSHIP
- HHD 2542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS I
- HHD 2543 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS 2

Specialization Courses

In the second year of the program, students complete in-depth study and training in courses aligned with their chosen concentration/specialization area, as well as complete a community-based practice learning experience that consists of a field placement and development of the Master's capstone project. ADP Master of Science students presently may select from five concentrations, Applied Research Methods for Child and Youth Serving Organizations (ARMO), Behavioral Health in Schools and Communities (BHSC), Children with Special Healthcare needs with Child Life Option (CSHCN), Child Youth Development (CYD), and Infant Mental Health (IMH), or, they may design their own course of study with advisor approval. See typical course offering by concentration below.

ADP MS options include completion of the Applied Behavior Analysis Certificate, Study Abroad, and taking additional elective courses.

Choose 12.0 credits from the following courses (**other courses may be chosen based on specialization with advisor approval**):

- HHD 2113 - DEVELOPMENTAL PSYCHOPATHOLOGY

- TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- HHD 2632 - APPLIED RESEARCH DESIGN
- HHD 2532 - PSYCHOSOCIAL ASPECTS OF ILLNESS
- HHD 2520 - INTRODUCTION TO COUNSELING
- HHD 2349 - CHILD LIFE PRACTICE IN HOSPITALS
- HHD 2524 - BEHAVIORAL ASSESSMENT AND INTERVENTION
- HHD 2006 - INFANT MENTAL HEALTH INTERVENTIONS I
- HHD 2007 - FOUNDATIONS OF INFANT MENTAL HEALTH 1
- HHD 2008 - FOUNDATIONS OF INFANT MENTAL HEALTH 2
- HHD 2009 - INFANT MENTAL HEALTH INTERVENTIONS 2
- TLL 2594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1
- HHD 2562 - PLAY THERAPY AND FIELD WORK
- HHD 2588 - SPECIAL TOPICS

Capstone Courses

Students will create and complete a community-based Capstone project with the support of ADP MS and University of Pittsburgh faculty. The Capstone experience includes a total of six (6) credits including two pro-seminar classes and four (4) credits of community-engaged practice.

- HHD 2316 - ADP PROFESSIONAL SEMINAR 1 (1 credit)
- HHD 2317 - ADP PROFESSIONAL SEMINAR 2 (1 credit)

Students will complete a total of four (4) credits from the following list:

- HHD 2622 - CHILD LIFE PRACTICUM
- HHD 2722 - CHILD LIFE INTERNSHIP
- HHD 2490 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY
- HHD 2765 - COMMUNITY-BASED PRACTICE LEARNING 1
- HHD 2766 - COMMUNITY-BASED PRACTICE LEARNING 2

Health and Physical Activity - Clinical Exercise Physiology, MS

Admission Requirements

The admission requirements include the following:

1. Applicants who possess an undergraduate degree in Exercise Science or a closely related field, or who can demonstrate foundational knowledge in key areas (human anatomy, human physiology, exercise physiology, exercise testing and prescription) are admitted to the Master of Science degree program provided that they meet all other School of Education admission requirements.
2. Applicants who do not possess an undergraduate degree in Exercise Science or a closely related field, or who cannot demonstrate foundational knowledge in key areas are provisionally admitted to the Master of Science Program provided that they complete coursework in the following areas prior to admission into the Master of Science Program in the Department of Health and Human Development (this was previously approved by the University in Spring 2018):
 1. Human Anatomy
 2. Human Physiology
 3. Exercise Physiology
 4. Exercise Testing and Prescription

Undergraduate Degree Requirement or Foundational Knowledge Requirement for Admission to the Master of Science Program in the Department of Health and Human Development	Provisional Admission Requirement*	
<ul style="list-style-type: none"> • Undergraduate degree in Exercise Science or a related field of study. 	*Completion of courses in the following areas:	Options for Completing this Admission Requirement

OR		
<ul style="list-style-type: none"> Foundational knowledge in Anatomy, Human Physiology, Exercise Physiology, Exercise Testing and Prescription 		
	<ul style="list-style-type: none"> Human Anatomy 	Complete HHD 1011/12 (Applied Human Anatomy) or complete a comparable course.
	<ul style="list-style-type: none"> Human Physiology 	Complete HHD 1033 (Human Physiology) or complete a comparable course.
	<ul style="list-style-type: none"> Exercise Physiology 	Complete HHD 1042 (Physiology of Exercise) or complete a comparable course.
<i>* Indicates that when the application is reviewed, only those courses where a gap in the core knowledge is identified will be required for admission.</i>	<ul style="list-style-type: none"> Exercise Testing and Prescription 	Complete HHD 1224 (Fitness Assessment and Exercise Prescription) or complete a comparable course.

Prerequisites

Human Anatomy

Academic Requirements

- A minimum of 30 credits for the non-thesis degree and 36 credits for the thesis degree option are required for the Clinical Exercise Physiology degree.
- Students must complete a comprehensive examination based on core competencies prior to graduation. Student will be eligible to sit for the comprehensive examination after completion of a minimum of 24 credits. Students will be provided a study guide/directions to assist in their preparation for the comprehensive examination.
- Students must complete courses in the appropriate order as outlined on the Plan of Study to be given permission to register for the appropriate courses in this degree.
- All students must complete a minimum of 30 credits in the non-thesis option and a minimum of 36 credits in the thesis option.

Course Requirement	Non-Thesis Option	Thesis Option
HHD 2268 - PHYSICAL ACTIVITY AND HEALTH	X (3 credits)	X (3 credits)
HHD 2381 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 1	X (3 credits)	X (3 credits)
HHD 2380 - BEHAVIOR CHANGE AND HEALTH COACHING	X (3 credits)	X (3 credits)
HHD 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH	X (3 credits)	X (3 credits)
HHD 2382 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 2	X (3 credits)	X (3 credits)

Option 1: (Non-Thesis option): HHD 2385 - INTERNSHIP IN HEALTH AND PHYSICAL ACTIVITY Option 2: (Thesis option): Elective (within or outside of HHD)	X (3 credits)	X (3 credits)
HHD 2999 - MASTER'S THESIS RESEARCH		X (6 credits)
TOTAL CREDITS	30	36

Health and Physical Activity - Health and Wellness Management, MS

Admission Requirements

Admission Requirements for the Department of Health and Human Development and School of Education. The admission requirements will be consistent with what is currently required for other Master of Science degree programs in the Department of Health and Human Development. These requirements include the following:

1. Applicants who possess an undergraduate degree in Exercise Science or a closely related field, or who can demonstrate foundational knowledge in key areas (human anatomy, human physiology, exercise physiology, exercise testing and prescription) are admitted to the Master of Science degree program provided that they meet all other School of Education admission requirements.
2. Applicants who do not possess an undergraduate degree in Exercise Science or a closely related field, or who cannot demonstrate foundational knowledge in key areas are provisionally admitted to the Master of Science Program provided that they complete coursework in the following areas prior to admission into the Master of Science Program in the Department of Health and Physical Activity:
 1. Human Anatomy
 2. Human Physiology
 3. Exercise Physiology
 4. Exercise Testing and Prescription (not required for the "Health and Wellness Marketing" degree program)

Undergraduate Degree Requirement or Foundational Knowledge Requirement for Admission to the Master of Science Program in the Department of Health and Physical Activity	Provisional Admission Requirement*	
<ul style="list-style-type: none"> • Undergraduate degree in Exercise Science or a related field of study. OR <ul style="list-style-type: none"> • Foundational knowledge in Anatomy, Human Physiology, Exercise Physiology, Exercise Testing and Prescription 	*Completion of courses in the following areas:	Options for Completing this Admission Requirement
	<ul style="list-style-type: none"> • Human Anatomy 	Complete HHD 1011/12 (Applied Human Anatomy) or complete a comparable course.
	<ul style="list-style-type: none"> • Human Physiology 	Complete HHD 1033 (Human Physiology) or complete a comparable course.
<i>* Indicates that when the application is reviewed, only those courses where a gap in the core knowledge is identified will be required for admission.</i>	<ul style="list-style-type: none"> • Exercise Physiology 	Complete HHD 1042 (Physiology of Exercise) or complete a comparable course.

The Katz Graduate School of Business has the following admission requirements:

1. Four-Year Undergraduate Degree or Similar. Bachelor's degree from an accredited U.S. university, as determined by the Commission on Recognition of Postsecondary Accreditation, or the non-U.S. equivalent.
2. GMAT or GRE Test Results. Official and satisfactory GMAT or GRE scores.
3. TOEFL or IELTS Test Results (international applicants). TOEFL (100 or higher) or IELTS (7 or higher).

NOTE: Students must meet the admission requirements for both the Department of Health and Human Development (School of Education) and the Katz Graduate School of Business to be admitted into this academic program.

Academic Requirements

- A minimum of 30 credits for this non-thesis degree.
- Students must complete a comprehensive examination based on core competencies prior to graduation. Student will be eligible to sit for the comprehensive examination after completion of a minimum of 24 credits. Students will be provided a study guide to assist in their preparation for the comprehensive examination.
- Students must complete courses in the appropriate order as outlined on the Plan of Study to be given permission to register for the appropriate courses in this degree.

All students must complete a minimum of 30 credits in this non-thesis degree. The courses for this degree are as follows:

- HHD 2380 - BEHAVIOR CHANGE AND HEALTH COACHING
- HHD 2386 - HEALTH AND PHYSICAL ACTIVITY PROMOTION AND MARKETING
- HHD 2322 - EVIDENCE BASED HEALTH PROGRAM PLANNING

Select one of the following HPA courses: (3 credits)

- HHD 2268 - PHYSICAL ACTIVITY AND HEALTH
- HHD 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH
- HHD 2381 - CLINICAL EXERCISE AND PHYSICAL ACTIVITY PHYSIOLOGY 1

The remaining credits are from Katz Business School and the courses are as follows:

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BMIS 2409 - INFORMATION SYSTEMS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Total Credits: 30

Health and Physical Activity Programming and Promotion, MS

Admission Requirements

The admission requirements will be unchanged compared to what is currently required for the Master of Science degree programs in the Department of Health and Human Development. These requirements include the following:

1. Applicants who possess an undergraduate degree in Exercise Science or a closely related field, or who can demonstrate foundational knowledge in key areas (human anatomy, human physiology, exercise physiology, exercise testing and prescription) are admitted to the Master of Science degree program provided that they meet all other School of Education admission requirements.
2. Applicants who do not possess an undergraduate degree in Exercise Science or a closely related field, or who cannot demonstrate foundational knowledge in key areas are provisionally admitted to the Master of Science Program provided that they complete coursework

in the following areas prior to admission into the Master of Science Program in the Department of Health and Human Development (this was previously approved by the University in Spring 2018):

1. Human Anatomy
2. Human Physiology
3. Exercise Physiology
4. Exercise Testing and Prescription

Undergraduate Degree Requirement or Foundational Knowledge Requirement for Admission to the Master of Science Program in the Department of Health and Human Development	Provisional Admission Requirement*	
OR <ul style="list-style-type: none"> • Undergraduate degree in Exercise Science or a related field of study. • Foundational knowledge in Anatomy, Human Physiology, Exercise Physiology, Exercise Testing and Prescription 	*Completion of courses in the following areas:	Options for Completing this Admission Requirement

Research Methodology, MA

The Research Methodology Master of Arts degree program at the Pitt School of Education provides advanced training in measurement, research design, and statistical methods. The MA degree program features applied research projects in which students translate research findings for application to educational settings, design and build assessment instruments, and assist professional educators with analyses and interpretation of data. Our graduates are prepared for positions at testing agencies, school systems, government agencies, ministries of education, colleges and universities, and businesses.

Research Methodology Core

18 credits of required courses for the Research Methodology Core

- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- EFOP 2030 - EXPERIMENTAL DESIGN
- EFOP 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Research Methodology Specialization

Choose 9 credits from among the following, with advisor consultation.

- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EFOP 2416 - APPLIED MULTIVARIATE ANALYSIS
- EFOP 2422 - DATA ANALYSIS USING COMPUTER PACKAGES
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS
- EFOP 3472 - CAUSAL INFERENCE IN EDUCATIONAL RESEARCH

Psychological Perspectives

Choose 3 credits from among the following.

- EDUC 2000 - PSYCHOLOGY OF LEARNING AND DEVELOPMENT FOR EDUCATION
- EDUC 2007 - HUMAN LEARNING
- EDUC 2008 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- EDUC 2009 - DEVELOPMENT: MIDDLE CHILDHOOD/ADOLESCENCE

Social and Cultural Perspectives

Choose 3 credits from among the following.

- EDUC 2100 - EDUCATION AND SOCIETY
- EFOP 2133 - GENDER AND EDUCATION
- EFOP 2305 - SOCIOLOGY OF EDUCATION
- EFOP 2306 - HISTORY OF EDUCATION
- EFOP 2307 - POLITICS AND HISTORY OF HIGHER EDUCATION
- EFOP 2310 - CONTEMPORARY PHILOSOPHY OF EDUCATION
- EFOP 2343 - EDUCATION AND CULTURE
- EFOP 2352 - ANTHROPOLOGY OF EDUCATION

Guided Research

Choose from among three options:

Option 1: Thesis, 6 credits of EFOP 2499 or EFOP 2099

Option 2: Non-thesis option: Supervised Research Project - 3 credits of EFOP 2491 and 3 credits of EFOP 2494

Option 3: Non-thesis option: Supervised Research Project and Literature Review - 3 credits of EFOP 2491 and 3 credits of EFOP 2494

- EFOP 2491 - SUPERVISED RESEARCH IN RES METH
- EFOP 2494 - M.A. PROJECT IN RSRCH METHODLGY
- EFOP 2499 - THESIS RES IN RSRCH METHODOLOGY

Minor

Quantitative Research Methodology Minor

Requirements

A minor in Quantitative Research Methodology is awarded to students who successfully complete a minimum of 18 credits in intermediate and advanced quantitative research methodology course work in the Department of Psychology in Education with a minimum grade point average of 3.25.

The course work must be distributed as follows:

- A minimum of 6 credits in statistical methods.
- A minimum of 3 credits in measurement.
- A minimum of 3 credits in research design.

Statistical Methods Courses

Minimum of 6 credits chosen from:

- EFOP 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EDUC 3100 - INTRODUCTION TO QUAN METHODS: DESCRIPTIVE AND INFERENTIAL STATISTICS
- EFOP 2019 - STATISTICS 2: ANALYSIS OF VARIANCE
- EFOP 2410 - APPLIED REGRESSION ANALYSIS
- EDUC 3103 - QUANTITATIVE METHODS 2

Measurements Courses

Minimum of 3 credits chosen from:

- EFOP 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT
- EFOP 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS

Research Design Courses

Required course - 3 credits:

- EFOP 2030 - EXPERIMENTAL DESIGN

John A. Swanson School of Engineering

Graduate study in engineering at the Swanson School is designed for those professionals who wish to further develop the ability to apply engineering principles to the solution of modern society's problems. The programs are flexible and can be used by those interested in research, design, management, and related technical positions in both the public and private sectors. PhD programs are designed for those individuals interested in an academic or research career.

The Swanson School of Engineering offers graduate education leading to the Master of Science degree in bioengineering, bioengineering-medical product engineering, chemical engineering, electrical and computer engineering, civil engineering, industrial engineering, materials science and engineering, mechanical engineering, nuclear engineering, petroleum engineering, and sustainable engineering. Swanson School of Engineering MS degree programs have two tracks: a professional track and a research track. The school offers PhD degrees in bioengineering, chemical engineering, civil engineering, electrical and computer engineering, industrial engineering, materials science and engineering, and mechanical engineering as well as computational modeling and simulation. Also offered is a MD/PhD Program with the School of Medicine, a DPT/PhD program with the School of Health and Rehabilitation Sciences, a MS/MBA program with the Katz School of Business, and Certificate programs in medical product innovation, construction management, health care systems engineering, nuclear engineering, physical metallurgy, safety engineering, and sustainable engineering.

Contact Information

The Swanson School of Engineering is housed in the Michael L. Benedum Hall of Engineering. Inquiries and correspondence concerning graduate study toward a PhD, MS, or graduate Certificate, should be addressed to the graduate coordinator of the appropriate department or program. Inquiries of a general nature can be sent to:

Associate Dean for Graduate Education
151 Benedum Engineering Hall
Swanson School of Engineering
Pittsburgh, PA 15261
E-mail: GradAD_ssoe@pitt.edu
www.engineering.pitt.edu

Admissions

All applicants will be judged on their own merits. For recent graduates of an ABET-accredited program, admission will be based primarily on the undergraduate academic record. Typically, a B average (cumulative grade point average of 3.0 on a 4.0 scale) or better is required for admission. GRE scores are not required for applications and admissions, but may be optionally submitted by students who want them included as part of their application package.

Applicants from non-ABET accredited programs also are considered on an individual basis with emphasis given to academic achievement, area of study, career orientation, and work experience. Depending on the program, applicants who do not have an engineering degree may have to take certain prerequisite courses before beginning their graduate engineering degree program. Applicants may be admitted provisionally until specified prerequisites are completed and/or a 3.000 grade point average is achieved. Undergraduate courses cannot be used to satisfy graduate degree requirements.

Graduate Special Student - A student not currently enrolled at the University of Pittsburgh will be granted temporary admission, typically only for one term and at most for a total of six credits. Students in this classification cannot earn credits toward the completion of degree requirements at the University of Pittsburgh, with the following exception: students who are unable to meet the deadline for filing an official application for admission may be granted temporary admission status by the appropriate Graduate Coordinator. Regular admission must be granted within the first term of registration as a Special Student. Graduate credits earned during this temporary admission period can be applied toward a graduate degree, with approval of the appropriate Department Graduate Coordinator.

Admissions Procedures

1. See the Swanson School of Engineering Web site for the online application. A fee is associated with the application and is not refundable. Requests for an application fee waiver should be directed to the Graduate Coordinator of your intended degree or certificate program.

2. Request an official transcript for each undergraduate and graduate school attended from the respective University Registrars. Official transcripts should be emailed to ssoeadm@pitt.edu or mailed to the University of Pittsburgh; Swanson School of Engineering Office of Admissions; 151 Benedum Engineering Hall; Pittsburgh, PA 15261. An official transcript of the undergraduate record is required unless the applicant is a graduate of the University of Pittsburgh.

Once all application materials, including the application fee and complete transcripts, are received, the application will be reviewed. As application deadlines vary by department, please review the information found here: <https://www.engineering.pitt.edu/Graduate/>. Deadlines for financial assistance vary by department and program; details can be found here:

<https://www.engineering.pitt.edu/academics/graduateadmissions/admissions/admission-deadlines/>.

Additional Requirements for International Students

Please see Graduate Admissions of International Students in the front section of this bulletin for additional University regulations on admissions.

International Students: In addition to academic review by the Swanson School of Engineering, the Office of International Services (OIS) admissions officer will process international student applications for non-academic qualifications. The document needed to apply for a non-immigrant visa will be issued only after the applicant has been admitted and has provided evidence of adequate financial support and English language proficiency. The procedure for international applicants is as follows:

1. Preliminary inquiries concerning graduate programs, research, and financial aid may be directed to the appropriate graduate program coordinator.
2. Following review (and acceptance) by the program based upon the applicant's academic qualifications, the OIS admissions officer will review the applicant's financial and language qualifications to determine eligibility for a visa document.
3. Prior to completion of registration for the first academic term, entering engineering graduate students with TOEFL scores of less than 100 on the iBT or Duolingo English Test Scores below 120 (or equivalent) must take an additional test of English language proficiency administered by the English Language Institute (ELI). International students who are citizens of countries where English is the official language, international students who have completed degrees at regionally accredited institutions in the U.S., and international students who have results on the TOEFL above 100 on the iBT or above 120 on the Duolingo English Test (or equivalent) may be exempted from taking the additional test of English language proficiency by the student's academic department.

This procedure applies also to international applicants who are already in the United States.

The University reserves the right, even after the arrival and enrollment of a student from another country, to require, at the student's expense, individual curricular adjustments whenever particular deficiencies or needs are found. This may include enrollment without credit in English as a Foreign Language or other prerequisite courses. New international students are encouraged to use the services of OIS for help in adjusting to the United States and to facilitate their total educational experience.

Financial Aid

The Swanson School of Engineering provides a considerable amount of financial assistance to highly qualified, full-time graduate students. Applicants interested in being considered for financial assistance, including teaching and research assistantships, should check with the department or program of their choice for any additional information concerning applications for assistantships. Deadlines for financial assistance vary by department and program; details can be found here: <https://www.engineering.pitt.edu/academics/graduateadmissions/admissions/admission-deadlines/>.

Financial aid includes:

1. Fellowships awarded to students of outstanding ability, usually as an unrestricted grant.
2. Traineeships awarded to students for training in selected areas.
3. Teaching assistantships and teaching fellowships awarded to exceptionally well-prepared students in return for assistance in laboratories, recitation sections, and other instructional duties. Partial to full tuition scholarships are provided with these assistantships.
4. Research assistantships awarded to students for assistance to research programs. Partial to full tuition scholarships are provided as part of the assistantship.

Advisors

Three types of advisors are primarily responsible for guiding engineering students through their program:

Graduate Coordinator or Vice Chair

The Graduate Coordinator or Vice Chair is the faculty member responsible for the operation of the department's graduate program. The coordinator supervises the operations of admissions, registration, course scheduling, assignment of advisors, graduation, and academic disciplinary procedures. The graduate coordinator generally is the best source of information and advice when questions arise or problems are encountered during graduate study.

Faculty Advisor

Each student is assigned a faculty advisor when admitted into a graduate program, and the Faculty Advisor may be the Graduate Coordinator or Vice Chair for the department. This advisor assists the student in planning a course of study and is responsible for approving the student's registration and all course changes. Once the student begins thesis or dissertation research, the duties of the faculty advisor are assumed by the student's major research advisor.

Major Research Advisor(s)

The major research advisor (or advisors if joint advisors are designated) is the graduate faculty member who directs the student's research and supervises the preparation of the thesis or dissertation. Generally, the major advisor fulfills the role of faculty advisor and also serves as the chair of the final oral examination (defense) committee for the student's thesis or dissertation.

Responsibility for Academic Progress

It is the responsibility of students to check their academic progress by contacting either the Graduate Coordinator/Vice Chair or their faculty advisor. The student should also become familiar with the program degree requirements and pertinent academic regulations, including department handbooks, this SSoE Graduate Catalog, and the Regulations Governing Graduate Study and other policies maintained by the Provost's office (<https://www.provost.pitt.edu/policies-guidelines>).

Academic Integrity and Code of Conduct

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study and their conduct in and out of the classroom. Violations of the Academic Integrity Policy can impact a student's grade or status with the University; some serious or subsequent violations could lead to suspension or dismissal. Academic Integrity violations can also affect a student's eligibility for scholarships and assistantships. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established University of Pittsburgh and Swanson School of Engineering guidelines on academic integrity and the University Code of Conduct. The Swanson School of Engineering and the University of Pittsburgh Guidelines on Academic Integrity are available to faculty and students at <https://www.engineering.pitt.edu/Academic-Integrity-Guidelines/>. The University's student Code of Conduct is available at https://www.studentaffairs.pitt.edu/wp-content/uploads/2017/08/Code-of-Conduct_10-1-2020.pdf

Probation, Suspension and Dismissal

A graduate student whose cumulative GPA falls below 3.000 will be placed on academic probation for the following term. Students on probation are not eligible to take the PhD preliminary evaluation or the MS or PhD comprehensive examination and will not be graduated. A student's whose cumulative GPA remains below 3.000 for the next academic year term (i.e., the cumulative GPA is below 3.000 for two successive academic year terms) will be dismissed from the Swanson School. Students who are dismissed will normally be suspended from the University for one calendar year, and students who are dismissed will not be re-admitted to the Swanson School of Engineering.

Course Work for Graduate Credit

Only graduate courses (i.e., 2000 or 3000 level courses) will count for graduate credit. Students may not use undergraduate courses taken at either the University of Pittsburgh, or another university to satisfy a graduate requirement.

Online courses:

Online courses are allowed only with the support of the academic department Graduate Coordinator or Vice Chair, and must be approved by the Associate Dean for Graduate Education, on a case by case basis. These courses must be:

1. Offered by an appropriate academic graduate program.
2. Suitable for the student's academic program and typically not available on the University of Pittsburgh campus

Statute of Limitations Requirements

The Swanson School of Engineering adheres to the University of Pittsburgh statute of limitations for all MS, Professional MS (non-thesis), and PhD programs.

Master of Science Programs

All departments in the Swanson School of Engineering offer MS degree programs that have two tracks: a professional (non-thesis) track and a research track. The differences are detailed below. At the discretion of the appropriate Graduate Coordinator, students may transfer no more than six credits of appropriate graduate course work from another graduate program to satisfy the course requirements of both the professional and research MS degrees.

Professional MS Track

The professional track consists of approximately 30 credits (10 courses). The faculty of the degree-granting program determines the actual course content and requirements. These programs typically have a set of required core courses. Students may have an opportunity for more in-depth study in a particular area of interest through a two- or three-course concentration. As a professional degree, while no thesis or comprehensive examination is required, the department may require a special projects course.

The professional MS programs are oriented toward full-time students seeking a career in industry and part-time students currently working in industry. Certain programs may be offered off campus at industrial sites or online. Although students who have an undergraduate degree in a technical area (e.g., mathematics, physics, computer science, or chemistry) may be accepted, depending on the particular program, they may be required to take additional specified prerequisite courses. These undergraduate pre-requisite courses cannot be used to satisfy graduate course requirements. Interested students should contact the appropriate Graduate Coordinator for details.

Research MS Track

The research track is primarily for those students who wish to pursue the PhD. Students in this track will be advised to take courses best suited for a research degree. The MS research track requires a minimum of 24 course credits, depending on the selected degree, and six credits of thesis research. The department may also specify credit distribution requirements for courses in the major and related areas. The student should see his or her major advisor for detailed information. Students working under the MS research option are required to present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation. Certain programs may permit a project to be completed in place of the thesis. A comprehensive examination or equivalent is required, which is usually met through the final oral exam for the thesis.

A graduate student may commence MS thesis work only after obtaining full graduate status. A graduate student should initiate preliminary thesis and research work as early as possible. Once research and thesis work has begun, the student must register for thesis credits of research in each succeeding term until successful completion of the thesis and the final oral examination. Exceptions to this rule can be made only upon the recommendation of the student's major advisor. Only six credits of MS thesis may be used as partial fulfillment of the requirements for the MS degree.

MS Thesis Oral Examination (Defense)

The purpose of this examination is to evaluate the student's MS thesis and is part of the MS thesis requirements as specified by the program. For additional information on the thesis exam, see Thesis Option under Regulations Pertaining to Master of Arts and Master of Science Degrees.

Residency and Statute of Limitations Requirements

A graduate student may complete all requirements for the MS degree on a part-time basis. All degree requirements for the MS degree, however, must be fulfilled within a period of four calendar years after the student's first registration for graduate study.

Electronic Thesis and Dissertation (ETD)

All graduate students preparing a thesis or dissertation must go to the ETD Online System and follow the instructions in the ETD Format Guidelines for submission of an ETD. The ETD Approval form and other necessary documentation are to be submitted to the Swanson School of Engineering Records Office. Questions and problems can be addressed by contacting the School of Engineering Records Office at ssoadm@pitt.edu

Joint MBA/MS Degree Program

The Swanson School of Engineering and the Joseph M. Katz Graduate School of Business have established joint MBA/MS (non-thesis) programs with each engineering Department graduate degree programs and the sustainability program. These programs are designed to meet the clear and growing need felt by various industry sectors for managers with sophisticated business and engineering skills. In today's environment, such cross-functional skills are essential in addressing multifaceted problems involving issues related to product development, quality, information systems, modeling and quantitative analysis, finance and accounting, international relations, and marketing.

Both full-time and part-time options are available. The full-time option can be completed in two academic years, whereas the part-time option may typically require a period of four to five years. The programs generally consist of 64.5 credits full time (or 69 credits part time). These programs are designed for students with undergraduate degrees in engineering and, in some cases, the physical sciences, preferably with industry work experience. Candidates must meet the admissions criteria of both the MBA program and the specific professional (non-thesis) MS engineering program of interest.

Students accepted into the program will be expected to complete both degrees concurrently. Courses will be scheduled in such a manner as to preclude students from receiving one degree before the other. This program is only for those students seeking a professional MS engineering degree. Students interested in the research MS engineering degree track will not be admitted. Because of the high credit demand, students in the program will not be able to hold either research or teaching assistant positions. Students who enroll in the joint degree program are expected to complete both degrees. Full-time students will register for the program through the Joseph M. Katz Graduate School of Business for four semesters. For more information see <https://business.pitt.edu/mba/joint-degree-mba/mba-and-master-of-science-in-engineering/>.

Doctor of Philosophy Programs

The general PhD requirements of the Swanson School of Engineering are listed below. Further information concerning degree requirements and options can be found under each program's catalog description.

Entrance to the PhD Program

A graduate student who has received the Master of Science degree in one engineering program area or has equivalent preparation is eligible to enter a doctoral program in that same area. To be accepted for a doctoral program, a graduate student must have achieved a superior scholastic record and shown great promise for conducting independent research. A prospective doctoral student should have a cumulative graduate grade point average of at least 3.00 in graduate course work. Evidence of research aptitude, including favorable recommendations, is required. Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree according to the established criteria and qualifications set by each department. Admission to a doctoral program does not include any implication concerning admission to candidacy for the PhD degree.

Course and Dissertation Credit Requirements

An objective of the PhD program is to attain a high degree of competence in the student's chosen field of specialization. Completion of the PhD program requires a total of 72 credits, of which at least 30 must be for research. The graduate faculty determines the minimum course requirements for each PhD program. Typically, each program has a core of well-coordinated courses followed by advanced course work in one or more specialty areas, with the number of course credits varying among programs. Additional course work may be prescribed in accord with the student's specific needs. However, all PhD students must take a minimum of 24 credits of graduate level didactic coursework (2000 or 3000 level). A student may further attain the required degree of competence beyond these 24 credits by other means including independent study under faculty supervision. Regardless of how the required competence is obtained, it must be certified by passing the appropriate series of examinations.

Prior to completing the Comprehensive Examination (or Dissertation Proposal), students register for preliminary dissertation research using a 3990 or 3997 course, as appropriate to the Department or Program. Upon passing the Comprehensive Exam, students are admitted to PhD candidacy and register for dissertation research (3999). The number of dissertation credits for which a student registers should be commensurate with the independent research effort to be undertaken during the term. Minimum registration is three credits per term. Of the minimum 30 credits of dissertation research, at least 12 credits must be for the program's PhD dissertation research course (3999).

Once a student registers for dissertation research (3999), he or she must continue to register for dissertation research in successive terms (not including the summer term) until they have completed the necessary 72 credits required for PhD study. Doctoral students who have completed all credit requirements for the degree, including any minimum dissertation credit requirements, and are working full time on their dissertations should register for Full-Time Dissertation Study (FTD), which carries no credits or letter grade but provides students full-time status. Students so enrolled are assessed a special tuition fee.

Doctor of Philosophy Evaluation/Examinations

To complete the PhD program, students must pass the preliminary evaluation, comprehensive and final oral examinations. Students who have less than a 3.00 cumulative GPA for all courses that satisfy graduation requirements are considered to be on probation and will not be permitted to take any of these examinations until their GPA is brought above 3.00.

Preliminary Evaluation (Qualifier)

See Preliminary Evaluation under Regulations Pertaining to Doctoral Degrees for an overview of the purpose of this examination; school-specific information follows. This examination is usually taken within the first two to four terms of graduate study and is a first step towards the student's formal admission to candidacy for the Doctor of Philosophy degree. Each program determines the exact format and content of this examination, which may consist of written and oral components. Qualifier examinations are usually given once or twice a year at a time specified by the program.

Comprehensive Examination

See Comprehensive Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations of this examination; school-specific information follows. The nature and timing of this examination is determined by the department; it may be combined with students' formal presentation of their dissertation proposal. However, the Comprehensive Examination cannot be taken until at least one full term after successfully completing the Preliminary Examination. The formal thesis proposal should be scheduled as soon as the candidate is prepared to present his/her topic and research plan, since there must be at least two full terms between its successful completion and the Final Oral Examination.

Final Oral Examination (Defense)

See Final Oral Examination under Regulations Pertaining to Doctoral Degrees for an overview of the purpose and regulations regarding this examination; school-specific information follows. This examination cannot occur sooner than two full terms following the formal thesis proposal. The final oral examination determines the acceptability of a student's dissertation and the student's ability to comprehend, organize, and contribute to the chosen field of research. One copy of the dissertation must be submitted to each member of the doctoral committee at least two weeks before the date set for the final oral examination. Because a portion of the defense is open to the public, the student should ensure that the dissertation defense is formally announced at least two weeks prior to the defense date.

Admission to PhD Candidacy

See Admission to Candidacy for the Doctor of Philosophy Degree under Regulations Pertaining to Doctoral Degrees for the requirements for admission. An Application for Admission to Candidacy for the Doctoral Degree must be filed after these requirements have been met.

In order to have the dissertation topic approved, the student must prepare, in consultation with their major advisor(s), a dissertation proposal. A formal dissertation proposal conference will then be held in which the members of the doctoral committee will review the proposal and either accept, revise, or reject it. Depending on the department's procedure, this conference may be held in conjunction with the comprehensive examination. Approval of the proposal does not imply either the acceptance of a dissertation prepared in accord with the proposal or the restriction of the dissertation to this original proposal.

If the dissertation proposal is accepted by the doctoral committee, the student is formally admitted to candidacy for the Doctor of Philosophy degree. Such admittance to PhD candidacy must be accomplished at least two terms before the student plans to graduate.

Doctoral Committee

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the committee's make up and responsibilities. In addition, the following school-specific rules apply in the School of Engineering:

Faculty who hold a secondary appointment and actively participate in the department will be considered as internal rather than external members of the doctoral committee. Hence, they may serve as the major advisor. Faculty members whose secondary appointment within the department is

viewed as a courtesy appointment may be considered as an external committee member but cannot serve as the student's sole committee chair (major advisor).

The composition of the Doctoral Committee must be approved by the department's graduate coordinator and the Associate Dean for Graduate Education prior to the presentation of the formal dissertation proposal. A committee must consist of four or more persons, including at least one from outside the department. This external member must hold a Ph.D. and may be from another department within the University of Pittsburgh, an appropriate graduate program at another academic institution, a government agency, or industry. The majority of the committee, including the major adviser, must be full or adjunct members of the Graduate Faculty. Typically, the committee will consist of three internal (from the department) and one external members. In certain cases, the graduate coordinator or associate dean may recommend one or more additional members of the committee, if appropriate. Once the dissertation proposal is approved, the student is expected to meet at least annually with his/her Doctoral Committee.

If a committee member leaves the University, that member can continue to serve as an internal committee member provided that he/she has an adjunct appointment in the student's home department. If the major advisor (committee chair) leaves the University, then a new major advisor must be appointed by the graduate coordinator and approved by the Associate Dean for Graduate Education. The new major advisor will typically be selected from among the remaining committee members. The former major advisor may remain on the committee as a member, but only if he/she has an adjunct appointment. The graduate coordinator and School administration must be informed of any proposed committee changes in the term they occur.

A major advisor has an obligation to assist the student to the successful completion of his/her dissertation. In those rare cases where the major advisor no longer feels that he/she can adequately work with the student, then it is incumbent on the department chair and graduate coordinator to meet with the committee and, if it is decided that the student is able to complete the dissertation, then select a new major advisor, typically from among the remaining members of the committee. A replacement committee member must also be appointed.

PhD Dissertation

Each student must prepare a dissertation embodying an extended original, independent investigation of a problem of significance in the student's field of specialization. The dissertation must add to the general store of knowledge or understanding of that field. Dissertations must be written in English. It is highly recommended that the student use a plagiarism-detection software (e.g., iThenticate) to ensure that no plagiarism, which is considered research misconduct, has been committed, overtly, covertly, or inadvertently.

A dissertation submitted to the Swanson School of Engineering in partial fulfillment of the requirements for an advanced degree must be free from any restriction, other than the author's copyright, concerning its publication by any agency outside the University. Any publication of a dissertation must be with appropriate acknowledgment to the University of Pittsburgh. After the dissertation has been prepared and approved by the major advisor, the final oral examination can be held.

Electronic Thesis and Dissertation (ETD)

All graduate students preparing a thesis or dissertation must go to the ETD Online System and follow the instructions in the ETD Format Guidelines for submission of an ETD. The ETD Approval form and other necessary documentation are to be submitted to the Swanson School of Engineering Records Office. Questions and problems can be addressed by contacting the School of Engineering Records Office at ssoeadm@pitt.edu.

Departmental Requirements

The policies enumerated above represent minimum requirements. In certain cases, individual departments may have stricter requirements. It is the ultimate responsibility of the student to understand the policies/requirements of their graduate program; questions should be directed to their Graduate Coordinator or Vice Chair.

Computational Modeling and Simulation PhD Program

The Computational Modeling and Simulation (CMS) PhD Program at the University of Pittsburgh provides its graduate students with an integrated program of creative, independent research, course work, and teaching. Our students pursue research in diverse areas of engineering and sciences with concentration on numerical methods and computational schemes. Coupled with the University Center for Research Computing (www.crc.pitt.edu), this program offers unparalleled opportunities for individualized training in high performance computing and physical modeling. An extensive seminar series exposes students and faculty alike to the world's leading scientists and their latest research. Pitt's outstanding research and placement resources, coupled with the university's commitment to being one of the top centers for computational research, uniquely positions us to help our PhD candidates to meet their objectives. For a review of our PhD Program in CMS, and application to this program, please see: www.cmsp.pitt.edu

Joint MD/PhD Degree Program/Medical Scientist Training Program

The Medical Scientist Training Program (MD/PhD) offers exceptionally talented individuals the opportunity to undertake a physician-scientist training program tailored to their specific research interests. This program is funded partly by the Medical Scientist Training Program of the National Institutes of Health. For students who have a clearly defined interest in biomedical research, the MSTP serves as a bridge between the University of

Pittsburgh School of Medicine and 20 graduate programs in basic sciences or engineering at either the University of Pittsburgh or Carnegie Mellon University. During a period of seven to eight years, these individuals meet the degree requirements of both a graduate school and the medical school, thus acquiring the knowledge, skills, and experience to begin careers in some of the most exciting areas of medical research. More information can be found here or by contacting MD/PhD program at 5585 Scaife Hall, 412-648-2324 for further information. <http://www.mdphd.pitt.edu/>

Cooperative Education

With the renewed emphasis on professional master degree programs and the development of such initiatives as the MS/MBA, and 3+1+1 (first three years at a home institution, a fourth year at the SSoE to earn the BS degree, and a fifth year at the SSoE to earn an MS degree) programs, there is a strong need to provide graduate students, including international graduate students, with a work opportunity that is an essential part of their education. This also includes PhD students who desire to take a term off in order to obtain industrial experience and perspective. Not only does the program provide them with needed experience, but it enables them to earn a reasonable amount of money over a 12-16 plus week work rotation. For more information, please visit <http://www.engineering.pitt.edu/coop/>.

SSOE Diversity Initiatives

Alliances for Graduate Education and the Professoriate - Transition to the Doctorate by Adaptable Engagement (PITT - STRIVE)

The University of Pittsburgh Swanson School of Engineering Transition to the Doctorate by Adaptable Engagement (PITT - STRIVE) is funded by the National Science Foundation (NSF) Alliance for Graduate Education and the Professoriate-Knowledge Adoption and Translation (AGEP-KAT). The University of Pittsburgh PITT - STRIVE program is housed in and administered by the Swanson School of Engineering Office of Diversity.

Studies reveal that Black/African Americans (5.3%), Hispanic/Latinos (3.5%), Asian Americans (9.1%), and American Indians (1.4%) are significantly underrepresented in the professoriate compared to the university/college student populations. The primary goal of the PITT - STRIVE program is to improve the transitions of Underrepresented Minorities (URM), who are US citizens, into doctoral engineering programs at the University of Pittsburgh and to ensure their successful completion by employing evidence-based strategies for student and faculty engagement and fostering an inclusive academic climate for URM doctoral students.

The primary goals of PITT - STRIVE are to (a) significantly increase the number of underrepresented minorities (i.e., African Americans, Hispanics, American Indians, Alaska Natives, and Native Hawaiians or other Pacific Islanders) obtaining graduate degrees in science, technology, engineering and mathematics (STEM), and (b) enhance the preparation of underrepresented minorities for faculty positions in academia.

The overarching goals of PITT - STRIVE at the University of Pittsburgh Swanson School of Engineering are to:

1. Improve the transition of URM (African/Black American, Hispanic/Latino Americans, Native Americans) students, who are US citizens, into doctoral engineering programs at the University of Pittsburgh; and
2. Create a systemic engineering culture and climate that ensures the success of URM transition to the doctorate through adoption/adaptation of evidence-based strategies for student and faculty engagement.

Student Objectives:

- Adapt and implement evidence-based strategies with URM doctoral student participants in engineering, who are US citizens.
- Enhance professional and educational skills of URM doctoral student participants in engineering, who are US citizens.
- Increase the number of URM doctoral student participants, who are US citizens, to continue and maintain an interest in the engineering PhD program.

Faculty Objectives:

- Improve faculty engagement with URM graduate students, who are US citizens in engineering.
- Improve faculty awareness of the problems facing URM graduate students who are US citizens in engineering.
- Develop a shared vision among vested faculty regarding the success of URM graduate students within the school of engineering.
- Fostering an inclusive academic culture climate for the success of URM doctoral students.

Who is eligible to participate in PITT - STRIVE?

- Member of an underrepresented minority group (Black/African American, American Indian, Hispanic/Latino, Alaska Native, and Native Hawaiian or Pacific Islander).

- US citizens (permanent residents and students with disability also eligible).
- Graduated from an accredited STEM undergraduate program with a 3.3/4.0 GPA and show strong motivation for entering a PhD program at University of Pittsburgh Swanson School of Engineering. All PITT - STRIVE Scholars must maintain a cumulative GPA of 3.300 to maintain the award. Activities associated with PITT - STRIVE include a Mentor/Mentee Weekend Retreat; the Discover Graduate Recruitment Weekend; and the Faculty-Student Engagement Training.

For more information on PITT - STRIVE please visit <http://www.engineering.pitt.edu/diversity/agep/>.

Graduate Engineering Education Scholarship (GEES)

The Graduate Engineering Education Scholarship (GEES) program, funded by the National Science Foundation, is designed to create access to MS Degrees through Scholarships and to Create Bridges to Professional Careers (BPC) through a thesis or project-based Master of Science degree program in any of the engineering degree programs. The GEES program will provide partial scholarships to support eligible MS students with unmet financial need and offer curriculum and co-curricular activities to enable the student to be successful in either the workforce or in their entrepreneurial pursuits.

GEES provides partial scholarships of up to \$20,000 per scholar toward the completion of an MS degree program. The project provides faculty-guided course selection and mentorship to train an engineering graduate workforce capable of performing as creative engineers. Other strategies include building capacity for research and innovation (CRI), industrial internship, Individual Developmental Plan (IDP) structured to guide the scholars through plans for career, academic, industrial, and project developments, mentorships through faculty-structured apprenticeship, and providing graduate-student-centered community activities.

To be eligible, students must:

- Have unmet financial need.
- Have an overall BS GPA of 3.0/4.0 or above in any STEM field.
- Be interested or enrolled in a thesis or project-based MS degree in any engineering field.
- Be a US citizen or permanent resident.
- Perform well in the interview process to assess motivation and preparation for graduate engineering education.

Graduate Diversity Workshop

The Graduate Diversity Workshop is mandatory for all graduate students in their first year of the program. It discusses principles of intercultural communication and acceptable classroom and research group behaviors.

Program and Course Offerings

Master's

Sustainable Engineering, MSSE

Overview

The Master of Science Degree in Sustainable Engineering (MS SE) is housed within the Mascaro Center for Sustainable Innovation (MCSI), with the degree granted from the Swanson School of Engineering. The 30-credit degree was designed to integrate with current MS programs in engineering, providing students with the opportunity to complete two MS degree programs with a limited time increase.

Program Objectives

- Provide advanced education to graduate students to identify and solve sustainability issues using systems approaches in the context of the triple bottom line of environmental, societal, and economic problems.
- Create a rigorous program with breadth and depth to propel graduate students to foster sustainable technologies, science, and practices in the U.S. and abroad.
- Create regional and nationally scalable sustainability solutions through service learning projects with a cohort of students.
- Provide students with experiences that enable them to communicate sustainability issues and solutions to multiple audiences.

For more information or to create a plan of study, please contact the Program Director:

David Sanchez
153 Benedum Hall
david.sanchez@pitt.edu

Course Requirements

A total of 30 credits are required to earn the MS SE professional master's degree. The degree is structured so the participating student is required to take five core courses and five electives.

The five core courses are as follows:

- ENGR 2905 - CURRENT ISSUES IN SUSTAINABILITY
- CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
- CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
- ENGR 2007 - SUSTAINABILITY CAPSTONE

Choose one of the following:

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL
- PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
- BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY
- BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT

Electives:

Students can choose five electives from the areas below. Related courses that are not listed below may be taken as an elective if it is approved by the Program Director.

Sustainable Built Environment & Infrastructure

- CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING
- CEE 2340 - CONCRETE STRUCTURES 2
- CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES
- CEE 2720 - URBAN TRANSPORTATION PLANNING

Energy

- ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
- ECE 2781 - SMART GRID TECHNOLOGIES AND APPLICATIONS
- ECE 2795 - SPECIAL TOPICS POWER
- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - ADVANCED POWER SYSTEMS ANALYSIS

Environmental and Water Sustainability

- CEE 2410 - WATER RESOURCES ENGINEERING
- CEE 2500 - ENVRNMNTL ENGRG MICROBIOL
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

Green Computing

- ECE 2160 - EMBEDDED COMPUTER SYSTEM DESIGN
- ECE 2161 - EMBEDDED COMPUTER SYSTEM DESIGN 2
- ECE 2192 - INTRODUCTION TO VLSI DESIGN
- ECE 2193 - ADVANCED VLSI DESIGN
- ECE 2162 - COMPUTER ARCHITECTURE 1
- ECE 3162 - ADVANCED COMPUTER MICROARCHITECTURE
- ECE 2140 - SYSTEMS-ON-A-CHIP DESIGN

Data Science

- CMPINF 2100 - DATA-CENTRIC COMPUTING
- Others will be added by Spring 2020, including courses on Data Management, Data Visualization, and Machine Learning and Predictive Modeling. See Program Director.

Department of Bioengineering

Contact Information

Department Chair: Sanjeev Shroff, PhD

Main Office: 302F Benedum

412-624-6445

Fax: 412-383-8788

E-mail: sshroff@pitt.edu

<http://www.engineering.pitt.edu/bioengineering/>

Graduate Degree Programs

The Department of Bioengineering offers three graduate degrees: (1) Doctor of Philosophy (PhD) in Bioengineering, (2) Master of Science in Bioengineering, and (3) Master of Science in Bioengineering - Medical Product Engineering. The department also offers a certificate program in Medical Product Innovation. In addition, it participates in the MD/PhD program with the School of Medicine's Medical Scientist Training Program, the DPT/PhD program in Physical Therapy with the School of Health and Rehabilitation Sciences, and the MBA/MS program with the Katz Graduate School of Business.

The graduate program in bioengineering incorporates six programmatic tracks:

- Bioimaging and Signals
- Biomechanics
- Medical Product Engineering*
- Molecular, Cellular, and Systems Engineering
- Neural Engineering**
- Tissue Engineering and Regenerative Medicine

* This track has separate tracks for the MS and PhD.

** The department also offers a Professional MS degree whose curriculum focuses on neural engineering.

The department has an active, interdisciplinary graduate bioengineering program in conjunction with faculty from the School of Medicine, the School of Health and Rehabilitation Sciences, the School of Dental Medicine, the clinicians at the University of Pittsburgh Medical Center hospitals, and other schools and departments at the University of Pittsburgh and Carnegie Mellon University.

The graduate program is directed toward engineering and life science education and research, with particular emphases on the PhD and the Professional Master's degrees. Its scope is broadly defined to incorporate the application of engineering principles, methods, and technology in two general areas: (1) scientific queries into fundamental biological phenomena and (2) the development of instrumentation, materials, devices, and systems relative to application in the biological sciences and medicine. Thus, the bioengineering faculty are applying various forms of engineering principles, mathematics, computation, technology, and methodology to a broad variety of medical and life sciences problems.

Admissions

Applicants for admission are expected to have a minimum GPA (3.5 for PhD, 3.0 for MS) from an accredited BS program. They must submit transcripts of all college-level work, three letters of recommendation, and a statement of purpose. Reporting scores on the verbal, quantitative, and analytical writing sections of the Graduate Record Examination (GRE) is optional. International applicants whose first language is not English are required to submit either TOEFL scores or Duolingo English Test Scores.

Students with a non-engineering background may be admitted provisionally on a case-by-case basis, and often are required to take undergraduate engineering and math courses considered as prerequisite for graduate course work in these areas. These undergraduate courses do not count toward their graduate degree credit requirements. Likewise, an undergraduate knowledge of physiology and basic biology and chemistry is assumed. In addition to the above basic requirements, evidence of significant research and/or industrial experience is very important as further evidence of ability to perform well at the graduate level. These experiences should be detailed clearly in recommendation letters, as well as in the student's statement of purpose. Please note that incomplete applications will not be considered.

Financial Assistance

All doctoral students in the Department of Bioengineering are currently supported either by research or departmental funds. Financial assistance is typically arranged between a student and a faculty advisor. Students with exceptional qualifications will be considered for additional departmental support and fellowships.

Certificate

Bioengineering - Medical Product Innovation Certificate

Requirements

The Graduate Certificate in Medical Product Innovation (C-MPI), offered by the Department of Bioengineering in conjunction with Center for Medical Innovation (CMI) is multi-faceted, reflecting the multidisciplinary nature of medical innovation, with the objectives:

- To educate engineering graduate students at the MS and PhD levels in clinical, engineering, business, and legal aspects of the medical device design and development process;
- To educate students of the health sciences (residents, fellows and clinicians) in engineering, business, and legal methodologies in identifying and developing innovative solutions to their problems;
- To educate law students in engineering methodology, regulatory constraints, medical device intellectual property, and commercialization aspects of medical innovation;
- To educate business (MBA) students in clinical, engineering, regulatory, and legal aspects of medical innovation and entrepreneurship; and

- To train all of the above disciplines in the art of working in multi-disciplinary teams to accomplish the medical innovation process, from medical technology ideation, through development, to realization and commercialization.

Certificate candidates must complete a minimum of 5 courses (15 credits) drawn from the following areas:

Medical Product Innovation Core Curriculum - 6 credits

Per approval by program director

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

Electives - 9 credits

Select 3 credits from each of the following subgroups:

Medical Ethics

Per approval by program director - 3 credits

- BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC
- BIOETH 2001 - ETHICS AND AGING
- BIOETH 2661 - THEORETICAL FOUNDATIONS
- BIOETH 2664 - BIOETHICS
- BIOETH 2698 - SPECIAL TOPICS
- CMU 80245 - MEDICAL ETHICS
- LAW 5464 - BIOETHICS AND LAW
- LAW 5980 - ETHICAL ISSUES IN CLINICAL CARE

Entrepreneurship/Engineering Management

Per approval by program director - 3 credits

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION
- BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES
- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSEO 2500 - BENCHTOP TO BEDSIDE
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
- CLRES 2730 - FROM BENCHTOP TO BEDSIDE
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2076 - TOTAL QUALITY MANAGEMENT
- IE 2123 - PROJECT MANAGEMENT FOR ENGINEERS
- LAW 5135 - COMMERCIALIZING NEW TECS

Legal Aspects of Medical Product Engineering

Per approval by program director - 3 credits

- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
- LAW 5135 - COMMERCIALIZING NEW TECS
- LAW 5210 - PATENT LAW

- LAW 5260 - INTELLECTUAL PROPERTY
- LAW 5631 - LAW AND ENTREPRENEURSHIP

Note:

Students currently enrolled in any graduate program in the University (MS, MBA, JD, PhD, etc.) are eligible to obtain the C-MPI upon completion of the Certificate requirements. No formal admissions process is required, but eligible students must submit their intent to graduate with the C-MPI Certificate.

Post-baccalaureate and post-professional students interested only in obtaining the C-MPI need to apply to the Department of Bioengineering for admission to the Certificate program.

Doctoral

Bioengineering, PhD

PhD Requirements

The course requirements for the PhD in Bioengineering include the following:

- Graduate Engineering Mathematics (from an approved list of Math courses) - 3 credits
- Statistics for Bioengineers (from an approved list of Statistics courses) - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (BIOENG 2241 or equivalent) - 3 credits
- Life Sciences (from an approved list of Life Science courses) - 6 credits
- Track Courses (from a menu of courses for specific track, please see the links below)
 - Bioimaging and Signals Track - 12 credits
 - Biomechanics Track - 9 credits
 - Medical Product Engineering (MPE) - PhD Track - 9 credits
 - Molecular, Cellular, and Systems Engineering (MCSE) Track - 9 credits
 - Neural Engineering (NE) Track - 9 credits
 - Tissue Engineering and Regenerative Medicine (TERM) Track - 9 credits
- Graduate Electives - 3 credits for Bioimaging and Signals Track; 6 credits for all other tracks. These can be any courses in science or engineering that are deemed useful for the student's career with the approval of the Graduate Program Director.
- Grant Writing in Bioengineering (BIOENG 2900) - 1 credit
- Seminar - 6 credits total, 4 credits must be the Bioengineering Seminar, which is BIOENG 2023 or BIOENG 2024. One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023, BIOENG 2024 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - 18 credits minimum, of which 12 credits of 3999 to be taken after the proposal; generally, students take 35 or more research credits

Total number of credit hours: 72 credits minimum (not including credits from foundational courses, if applicable.)

Of the 35 credits allocated for research, students must register for a minimum of 18 research credits, of which at least 12 credits must be from BIOENG 3999, an option that is available only after advancing to candidacy; the remaining 6 credits are generally used for BIOENG 3997. The remaining 17 (or more) credits may be applied toward research classes (3997, 3999) or, with approval from research advisor and graduate program director, other didactic courses relevant for the student's professional objectives.

PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Students typically take the PhD preliminary exam after their first year in the program, and PhD proposal (comprehensive examination) is presented generally by the middle of the third year. A final public PhD defense is made by each PhD candidate based on the student's research work. All students must always maintain a 3.0 cumulative GPA to remain in good standing in the program.

Preliminary Exam

The PhD Preliminary Exam is given once a year, typically in early June, and is to be taken by students pursuing the PhD degree and in good academic standing after their first two semesters of full-time course work. A student is allowed no more than two opportunities to take the preliminary examination.

The purpose of the preliminary examination is to evaluate the student's ability to use fundamental principles of biomedical science and engineering approaches to investigate solutions to bioengineering problems. The exam tests the student's ability to think, present, and defend in an academic environment, as well as demonstrate a sufficient background in the biomedical science and engineering aspects of the chosen problem. It explores a student's strengths, weaknesses, and breadth of knowledge in relation to the proposal as well as assesses the student's potential to become an independent investigator. The examinations will be coordinated within the current graduate tracks. The scheduling will be handled by the track coordinators, who will also determine the suitability of the research question (having both engineering and biomedical science components).

The basis of the examination is a specific research question (problem), chosen by the student and communicated through both written and oral formats. The written proposal conforms to the NIH R03 grant format. The oral presentation focuses on presenting and defending the proposed research question and the approach to its solution. The student is encouraged to focus on one to two experiments and note both alternatives and potential limitations in each experiment. Proper referencing of sources is required for both the oral and written components. The research proposal may be supported by preliminary data, but this is not a requirement. The student may seek assistance from their advisor or any other faculty member for choosing the question but must observe the usual strict standards on plagiarism. In addition, students must provide a written statement, signed by their advisor, that clarifies the student's contribution in developing and writing the proposal.

The final result of the preliminary examination will be based on the combined evaluation of the written and oral components, with three possible outcomes: unconditional pass, conditional pass, and fail. Conditional pass will be accompanied by specific corrective actions, such as remedial courses to be taken by the student. A minimum of B grade must be achieved in each condition-contingent course; otherwise, the conditional pass is converted to fail outcome. In the case of failure from the first exam, the candidate may retake the Preliminary Exam one additional time in the following year.

Dissertation Committee Selection

Each PhD student's Dissertation Committee must have at least four faculty, and the following restrictions must apply: (1) The student's advisor is the Chair of the committee. (2) The majority of the Committee members must hold Graduate Faculty status. (3) At least three Committee members must have appointments in Bioengineering (primary or secondary). (4) At least one Committee member must have a primary appointment in Bioengineering. (5) At least one Committee member must have a primary appointment outside of Bioengineering. Students are required to receive approval from the faculty Graduate Program Director of the committee, ideally 1-2 months prior to the proposal defense.

PhD students are advised to form and meet with a PhD Dissertation Committee within one year of passing the Preliminary Exam and no later than the end of their third year in the PhD program. The student must meet with this committee at least annually thereafter and provide a progress report to the department; otherwise, registration will be withheld for the subsequent semester.

PhD Proposal and Comprehensive Exam

Formal admission to candidacy for the Doctor of Philosophy degree (typically in the 3rd year) constitutes a promotion of the student to the most advanced stage of graduate study and provides formal approval to devote essentially exclusive attention to the research and the writing of the dissertation. **Note that it is a departmental requirement that students complete their proposal by the end of their third full year in the program.** To qualify for admission to candidacy, students must have obtained full graduate status and have satisfied the requirement of the preliminary examination. Note that a student does not necessarily need to have all coursework completed before completing their proposal. The student should submit the written proposal in NIH R01 format to the committee at least two weeks in advance of the oral defense to the approved committee. The approval of the proposal and defense of it constitutes passing the proposal and Comprehensive Examination.

Upon successfully proposing the dissertation project, the student must obtain signatures from the committee members on the "Admission to Candidacy" form. This document can be obtained from the Graduate Administrator, and the completed form must be returned to the Graduate Administrator for submission to the school for approval. Furthermore, the student must meet with the committee at least annually during the remainder of their PhD program culminating in the Dissertation Defense. The outcome of the annual meeting and the student's dissertation progress must be documented in the "Graduate Student Annual Dissertation Committee Meeting Update" form.

Once a student has completed the proposal and comprehensive exam, they may then register for 3999 credits, or "post-proposal" research credits. After the student completes 12 credits of 3999, which can easily be completed in one semester, they can then register for FTDH, or Full Time Dissertation Hours, up to and including the semester in which they graduate. Please note that no courses can be taken once a student registers for FTDH. It is important to note that students may switch into 3999 credits if they propose before the end of the add/drop period of the semester in which they complete their proposal.

Graduation info

SSOE policy requires a minimum of 2 terms to elapse between the student's approval of a PhD proposal and the first attempt of defending the dissertation. Students are expected to be prepared to announce their dissertation defense date at least two weeks before their defense by emailing the information including the dissertation date, time, and location, the name and full title of their advisor, along with an abstract of no more than 400 words, to the Graduate Administrator, after which a notice will be sent out to the school. At the defense, the student is to prepare the ETD approval forms, the abstract, a copy of all publications (including journal articles, presentations, and proceedings,) and a copy of the PhD rubric form for each member of their dissertation committee.

Joint Degree

Bioengineering, MD/PhD

MD/PhD Requirements

The MD/PhD program supports well-integrated basic and clinical science pre-doctoral training program. The training program links many PhD programs in six graduate schools within the University of Pittsburgh and Carnegie Mellon University. It is important to keep in mind that MD/PhD students are working toward TWO degrees, not just "two for the price of one". However, it is recognized that some relaxation of the requirements is appropriate for these students. Traditionally, we have waived the life science (6 credits) requirements, as medical school education covers these topics. MD/PhD students cannot use their MD courses to opt out of the advanced engineering/math/statistics course requirements for the PhD.

The course requirements for the MD/PhD in Bioengineering closely follow the PhD requirements in Bioengineering with a few exceptions:

- Track Courses (from a list of approved courses for specific tracks) - 9 credits*
- Graduate Electives (can be most graduate level courses per approval of Graduate Coordinator) - 6 credits*
- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Seminar - 6 credits total, 4 credits must be the Bioengineering Seminar, which is BIOENG 2023 or BIOENG 2024 . One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023, BIOENG 2024 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- Grant Writing in Bioengineering, BIOENG 2900 - 1 credit
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 -18 credits minimum, of which 12 credits of 3999 to be taken after the proposal; generally, students take 35 or more research credits

* The standard policy is 9 credits of track courses and 6 credits of electives. There is an exception for the Bioimaging and Signals track, for which the requirement is 12 credit of track courses and 3 credits of electives.

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill the life science requirements but does not include credits from foundational courses if applicable.

The department does not enforce the 3-credit ethics requirements for MD/PhD students if they have acquired this knowledge through their medical school education. Students may acquire these three credits through another course (didactic or graduate project).

Of the 35 credits allocated for research, students must register for a minimum of 18 research credits, of which at least 12 credits must be from BIOENG 3999, an option that is available only after advancing to candidacy; the remaining 6 credits are generally used for BIOENG 3997. The remaining 17 (or more) credits may be applied toward research classes (3997, 3999) or, with approval from research advisor and graduate program director, other didactic courses relevant for the student's professional objectives.

MD/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department.

Please see Department of Bioengineering's PhD Requirements page for more details.

Bioengineering/Business Administration, MS/MBA

The Department of Bioengineering and the Katz Graduate School of Business (KGSB) offer a dual MBA/MS program, with the following requirements for the Professional MS in Bioengineering:

Candidates must complete a minimum of 11 courses (30 credits) [25.5 engineering credits] drawn from the following areas:

Graduate Engineering Math or Statistics - 3 credits

Per approval by program director

- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT

Medical Product Engineering Core Curriculum - 12 credits

Per approval by program director

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

Graduate Engineering/Science Electives - 9 credits

Per approval by program director

- 1st Graduate Engineering/Science Elective
- 2nd Graduate Engineering/Science Elective
- 3rd Graduate Engineering/Science Elective

Medical Ethics - 3 credits

Per approval by program director

- BIOENG 2241 - SOCTL, POL & ETHCL ISS BIOTEC

MBA/MS Project Courses - 3 credits

Per approval by program director

- BIND 2200 - INTEGRATED PROJECT FOR MBA/MS IN ENGINEERING PROGRAM
- BIOENG 2095 - GRADUATE PROJECTS

MBA Degree Requirements - 33*

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

*On July 27, 2021 the credit requirements for the program were approved to be decreased from 39 to 33 to align with the overall MBA redesign approved in 2019. In order to maintain accurate records, the update was made on 9/28/2021.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BIND 2444 - MANAGEMENT SIMULATION CAPSTONE
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e., Accelerated vs. Signature vs. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

Note:

All students must maintain a 3.0 GPA at all times to remain in good standing in the program.

Physical Therapy/Bioengineering, DPT/PhD

Program Overview

The Doctor of Physical Therapy (DPT) - PhD in Bioengineering program combines the entry-level DPT leading to licensure as a physical therapist, with a PhD in Bioengineering that will prepare the student to become an independent researcher. The program will integrate clinical and research experiences, with students receiving mentorship from faculty in the departments of Physical Therapy and Bioengineering. Students should have a Bachelor's degree or higher in engineering or engineering-related discipline, with a strong interest in physical therapy.

Contact Information

Patrick Sparto, PhD, PT
Co-Director, DPT-PhD Program
Department of Physical Therapy
Bridgeside Point 1, Suite 210
Pittsburgh, PA 15219-3130
Phone: 412-383-6732
E-mail: psparto@pitt.edu

Application Process

Applications will need to be submitted through the PT Centralized Application Service (PTCAS) by December 1 for admission to the program the following August. The application is reviewed by faculty in both departments.

Admission Requirements

Students will need to meet the admission requirements of both programs. Applicants must have a minimum of a Bachelor's degree in a field of engineering or closely related (e.g. physics, or applied mathematics, kinesiology). Applicants must demonstrate evidence of exposure to the field of Physical Therapy (PT) through volunteer or work experience. Applicants must submit 3 letters of reference: one physical therapist with whom the student has volunteered or worked for, one academic advisors, and one research supervisor. A minimum GPA of 3.0 is required but competitive applicants typically have a 3.5 GPA or greater. Reporting of GRE scores is optional; typically, admitted students have GRE scores greater than the 50th percentile.

Prerequisite Coursework (minimum credit hours listed is based on a semester system equivalent)

- Chemistry I and II sequence with labs - 8 credit hours
- Physics I and II sequence with labs - 8 credit hours
- Biology I and II sequence with labs - 8 credit hours
- *Anatomy (human, vertebrate, comparative or anatomical kinesiology) - 3 credit hours
- *Physiology (human physiology preferred) - 3 credit hours
- Exercise Physiology - 3 credit hours
- Two courses in Psychology: should include a general psychology course and a specialized psychology course such as: developmental psychology, abnormal psychology, psychology of disability, sports psychology - 6 credit hours
- Statistics - 3 credit hours
- English Writing (English composition or an upper-division writing course) - 3 credit hours
- **Engineering Statics - 3 credit hours
- **Advanced Mathematics (e.g. calculus) - 3 credit hours

*A two-course sequence of anatomy/physiology may meet the anatomy and physiology requirements as long as there is a total of 6 credit hours.

**Enrollment in PhD part of the program can be deferred until courses are completed.

Academic Standards

In addition to the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the DPT program is regulated by the *SHRS Academic Standards*.

Curriculum Overview

Students will follow the typical plan of study for DPT residential students for the initial seven terms (i.e., 2.3 years) of the program. Then students will follow the plan of study for PhD students in Bioengineering. Clinical internships and research experiences will be performed throughout the program. At a minimum, the program will take 6 years to complete. After completing the didactic and clinical requirements of the DPT program, the student will be allowed to take the licensing exam. Students are required to write and orally defend a dissertation to complete their PhD degree.

DPT Curriculum

Our rigorous curriculum is built around 4 key areas: basic science, clinical science, leadership & professional development, and critical inquiry. The DPT plan of study integrates the basic sciences and clinical practice, emphasizes evidence based practice and includes a comprehensive array of course offerings in musculoskeletal, neuromuscular, integumentary, cardiopulmonary, geriatric, and pediatric physical therapy, as well as course content related to leadership & professional development.

We want to make sure our graduates are well prepared to enter the workforce so we complement our didactic education program with a clinical program that includes 42 weeks of full-time clinical internships. The curriculum is designed to emphasize early and intensive integration of our students into the clinical environment throughout their educational program. Our students begin their clinical affiliations during the 2nd semester in the program and conclude with two consecutive 15-week termal clinical education experiences.

PhD Requirements

The Department of Bioengineering follows university guidelines on students working toward joint degrees like the DPT-PhD in Bioengineering. Typically, we have waived the life science requirement (6 credits) as comparable coursework is covered in the physical therapy curriculum. The remaining course requirements closely follow requirements for the PhD in Bioengineering.

- Bioengineering Track Courses - 9 credits
- Graduate Electives - 6 credits
- Graduate Engineering Mathematics - 3 credits
- Statistics for Bioengineers - 3 credits
- Societal, Political, and Ethical Issues in Bioengineering (or equivalent bioethics course) - 3 credits
- Seminar - 6 credits total, 4 credits must be the Bioengineering Seminar, which is BIOENG 2023 or BIOENG 2024 . One of the four seminars can be substituted with a Preparation for STEM academic career course, when combined with appropriate certification. The other 2 credits may be from BIOENG 2023, BIOENG 2024 or any other seminars deemed appropriate by the Graduate Program Director. Please see list of Approved Seminar Courses for suggestions.
- Grant Writing in Bioengineering - 1 credit
- Doctoral Dissertation Research, BIOENG 3997 and BIOENG 3999 - 12 credits of 3999 to be taken after the proposal - 35 credits

Total number of credit hours: 72 credits minimum, which includes 6 credits to fulfill life science requirement but does not include credits from foundational courses if applicable.

DPT/PhD students are also required to complete two teaching practicums before presenting their PhD proposal (comprehensive examination). No more than one practicum can be undertaken in a semester. There is no course registration for this educational experience, and fulfillment is monitored by the department. Students typically take the PhD preliminary exam in the next summer term after they have completed 2 full terms in the program but may be taken after only one term if approved by the Department. The PhD proposal (comprehensive examination) is presented generally at the end of the second year. A final public PhD defense is made by each PhD candidate based on the student's research work.

Please see the Department of Bioengineering's PhD Requirements page for more details.

Master's

Bioengineering, MS

Students interested in pursuing a Master of Science in Bioengineering have three options:

1. **"Research MS" program:** This is a thesis-based program in which the student completes a combination of didactic coursework and, under the mentorship of an advisor, performs and defends a scholarly thesis project.
2. **"Professional MS" program, Medical Product Engineering:** This is a nonthesis-based form of education focused of didactic coursework related to medical product engineering and yields a Master of Science in Bioengineering - Medical Product Engineering. It provides opportunities for students to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization. It is ideally positioned to offer a premier educational program in response to the strong interest and support for medical product innovation and product development. It is ideal for current industry professionals or students desiring a career in the healthcare industry.
3. **"Professional MS" program, focus on Neural Engineering:** This is a nonthesis-based form of education focused of didactic coursework related to neural engineering and yields a Master of Science in Bioengineering. Students will gain a deeper knowledge of the nervous system and, from an engineering perspective, the knowledge to develop computational models and build neuro-mimetic devices for treatment of neurological disorders and application to non-biological systems.

MS Bioengineering (Research or Thesis Track) Requirements

The course requirements for the MS in Bioengineering (thesis track) include the following:

- Graduate Engineering Mathematics (from a list of approved Math courses) - 3 credits
- Statistics for Bioengineers (from a list of approved Statistics courses) - 3 credits
- Societal, Political and Ethical Issues in Bioengineering (BIOENG 2241 or equivalent) - 3 credits

- Life Sciences (from a list of approved Life Science courses) - 3 credits
- Track Courses (from a list of approved courses for specific tracks) - 9 credits
- Elective Course - 3 credits
- BIOENG 2999 - M.S. THESIS - 6 credits
- Bioengineering Seminar (BIOENG 2023) - 3 semesters

Total number of credit hours - 30 credits (in addition to credits from foundational courses, if taken). Other required courses may be tailored to the student's background and interests. Students must always maintain a 3.0 GPA to remain in good standing in the program. Research-based MS students are also required to complete 1 teaching practicum. There is no course registration for the educational practicum experience, and fulfillment is monitored by the department.

Typically, completion of the Research MS program requires two years. Within the first year of enrollment (preferably within the first semester), the MS candidate is expected to finalize the general area in which they will write a thesis and an advisor who will guide their work. By the third semester of enrollment, the student is to prepare a Master's Thesis, following University requirements for Electronic Theses and Dissertations (ETDs.) The student (under the guidance of their advisor) selects a thesis committee that consists of three faculty members and at least two need to be member of the Bioengineering faculty. The third member can also be a Bioengineering faculty, although an outside member is recommended. The student's advisor will act as Chairman of this committee. The committee meets at least once per year and oversees the Thesis Defense.

MS Bioengineering - Medical Product Engineering (Non-Thesis Track) Requirements

The Department of Bioengineering offers a Master of Science degree in Bioengineering - Medical Product Engineering in the professional or non-thesis program of graduate education. The focus on medical product engineering is ideal for current industry professionals or students desiring a career in the healthcare industry. It provides opportunities to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization. It is ideally positioned to offer a premier educational program in response to the strong interest and support for medical product innovation and product development.

MS Bioengineering Requirements (Non-Thesis Track; Neural Engineering focus)

This curriculum in the professional or non-thesis program of graduate education prepares students to work in the exciting and dynamic field of neural engineering including neural prosthetics, brain-computer interface systems, epilepsy monitoring, deep brain stimulation, engineering approaches to psychiatric disorders, and brain-inspired computation. It is a fast-growing field that provides clinical and technological benefits.

Neural engineering students will pursue didactic coursework that builds core competency in at least two areas. Example concentration areas include but are not limited to:

- Brain-computer interfaces
- Neural tissue interfaces
- Neural imaging and signals
- Neural devices and neuromorphic engineering

The concentrations for core competency will be selected in consultation with the program director and will take into consideration the student's previous training and career aspirations.

The course requirements for the MS in Bioengineering (professional track) include the following:

- 12 credits in Concentration 1
- 9 credits in Concentration 2
- 3 credits in life science
- 3 credits in medical ethics
- 3 credits in mathematics/statistics

Total number of credit hours - 30 credits (in addition to credits from foundational courses, if taken). All students must maintain a 3.0 GPA at all times to remain in good standing in the program.

Medical Product Engineering, MS-MPE

The Master of Science in Bioengineering - Medical Product Engineering program is a non-thesis program of graduate education in Bioengineering aimed at current industry professionals and students desiring a career in the healthcare industry. The program will provide opportunities for students to acquire relevant business, advanced engineering, and technology skills such as entrepreneurship, product development, regulatory processes, and commercialization.

The University of Pittsburgh, through BioE and SSOE and in cooperation with SOHS and KGSB, is ideally positioned to offer a premier educational program in response to the strong regional interest and support for medical product innovation and product development. The Master of Science in Bioengineering - Medical Product Engineering degree will be awarded by SSOE and administered through the Department of Bioengineering.

Medical Product Engineering program will combine bio/medical engineering, hands-on product design, development, and commercialization. Working with practicing healthcare and biomedical professionals, student teams will be challenged to create new solutions addressing unmet clinical needs in diagnosis, treatment, surgery, hospital care, patient rehabilitation, or home healthcare environments.

The MS-MPE program will be attractive to students who want to pursue an advanced degree in Bioengineering, but who do not want to pursue a research-based MS or PhD degrees. Although the program is specifically directed toward undergraduate engineering students, individuals with strong, quantitative background in a STEM discipline are also eligible candidates. Qualified students in SOHS, KGSB, and Law and professionals currently working in the health care field who are seeking to complement their education with a graduate degree in Medical Product Engineering may be interested. In addition, the MS-MPE program could be of interest to undergraduate students pursuing the 5-year BS/MS program and it will satisfy the requirements for the joint MBA/MS program co-sponsored by the KGBS and SSOE.

Most of the special courses offered as part of the MS-MPE program are also available to all eligible Pitt students (graduate and undergraduate) as electives. These special courses are also available to Pitt students who are already enrolled in a graduate program and not prepared to complete the 30-credit MS-MPE program, but wish to obtain the 15-credit Graduate Certificate in Medical Product Innovation (C-MPI). The Graduate Certificate was approved by the Provost in 2012. A PRMS document for the Certificate program is on file with the Provost's office.

I. Four Required (Core) Courses: 12 credits

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

II. One Required Biomedical Ethics Course: 3 credits

Students will be expected to enroll in "Societal, Political, and Ethical Issues in Biotechnology" (BIOENG 2241), which is offered both semesters by the Department of Bioengineering. In the event of class conflict, students can enroll in a course offered by another department (e.g., Bioethics) with the approval of the graduate coordinator.

III. One Required Math/Stats Course: 3 credits (choose one course from the approved lists of graduate level math and statistics courses):

Approved Math Courses

Approved Statistics Courses

Another option that may be well-suited for MS-MPE students is:

BIOENG 2351 - COMPUTER APPLICATIONS IN BIOENGINEERING

Prerequisites: None

Description: This course is designed to teach you programming in the context of real-world tasks that you will likely encounter in future academic or industrial work.

- BIOENG 2351 - COMPUTER APPLICATIONS IN BIOENGINEERING

IV. Elective Courses relevant to Medical Product Engineering curriculum (Per approval by program director): 12 credits (four Advanced Engineering/Science courses)

Students can take any program relevant 2000+ level courses as electives. Since program students can explore and examine all facets of the medical product engineering process from ideation to prototyping to clinical evaluation, the following list of elective courses, which have been offered one or more times since Fall 2011, are highly appropriate for graduate study in Medical Product Engineering.

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2166 - MANAGING MEDICAL PRODUCT RESEARCH AND DEVELOPMENT
- BIOENG 2167 - MANAGING MEDICAL PRODUCT INNOVATION
- BIOENG 2173 - MEDICAL DESIGN FOR LOW RESOURCE ENVIRONMENTS
- BIOENG 2175 - HUMAN FACTORS ENGINEERING IN MEDICAL DEVICES
- BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
- BIOENG 2385 - ENGINEERING MEDICAL DEVICES FOR QUANTITATIVE IMAGE ANALYSIS AND VISUALIZATION
- BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING
- BIOENG 2601 - PRINCIPLES AND PROPERTIES OF COMPLEX ENGINEERED MATERIALS
- BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR
- BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES
- BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS
- BIOENG 3780 - HUMAN FACTORS OF AGING
- CHE 3460 - ADVANCED SCIENTIFIC VISUAL COMMUNICATION
- ENGR 2017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL
- ENGR 2051 - PRODUCT REALIZATION
- ENGR 2080 - LEAN LAUNCHPAD: EVIDENCE-BASED ENTREPRENEURSHIP
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2011 - FUNDAMENTAL OF MICRO AND NANOMANUFACTURING
- IE 2023 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS
- IE 2123 - PROJECT MANAGEMENT FOR ENGINEERS
- IE 2188 - SIMULATION MODELING AND APPLICATIONS
- IE 2201 - BIOMATERIALS AND BIOMANUFACTURING
- IE 2303 - WORK DESIGN

V. One Rotation of Co-op/Internship: 0-3 credits

Minimum one rotation of individually arranged co-op/internship is highly recommended. The co-op/internship requirement is waived for students working full-time. As such, when students enter the MS-MPE program, the internship requirement is co-determined with the Program Director.

MS-MPE students can opt to earn 0-3 course credits toward degree requirements, which are a part of the 12 required elective credits. Thus, if a student earns less than 3 credits for the co-op/internship, electives must be taken to hit the required total 30 credits.

- BIOENG 2095 - GRADUATE PROJECTS
- ENGR 2090 - GRADUATE ENGINEERING COOPERATIVE PROGRAM

Graduate Degree Programs

The Department of Chemical and Petroleum Engineering awards Master of Science degrees in chemical engineering and the Doctor of Philosophy degree in chemical engineering; offers several dual degree programs; and participates in joint degree programs with the Katz Graduate School of Business and the School of Medicine. The general objective of all programs is to develop the ability of the chemical or petroleum engineer to carry out original research at advanced levels.

The aim of the doctoral program is to develop individuals for careers in academic and industrial research. The program is flexible. Its primary emphasis is on innovative and distinctive research on the cutting edge of engineering science. Students wishing to pursue the PhD should have an outstanding academic background and a desire and ability to carry out original research. PhD students here are given independence and responsibility. They are not only encouraged, but are expected, to develop research ideas, which they propose and defend. They work closely with their faculty research advisors and often participate in a research group addressing relevant engineering problems. To supplement their research, students take advanced courses in areas related to their research work. Candidates for the PhD achieve a high level of proficiency through this advanced course work and individual study in their research area and related areas.

The graduate program offers MS and PhD students the opportunity to pursue independent research in five research focus areas in which the department has developed national and international reputations: biotechnology, catalysis, environment and energy, materials, and multi-scale modeling. Additional research areas exist in programs that have exploited opportunities at the interface between disciplines. The department's recognized research activities impact the following boundaries between established disciplines: biotechnology/environment; biology/medicine/engineering; energy/environment; polymer chemistry/physics; catalysis/chemistry/materials; catalysis/energy; and catalysis/environment.

Admissions

Chemical Engineering: For admission to full graduate status, students should have an undergraduate degree in chemical engineering with high academic standing from an ABET accredited curriculum.

Students from chemistry or from another engineering discipline who desire to pursue a graduate degree in chemical engineering must have a high grade point average and prepare for graduate course work by taking selected undergraduate courses in chemical engineering. See requirements for students with non-Chemical Engineering BS degree for PhD or MS (select program from the programs list, below). Each case for admission will be evaluated individually, and applications are encouraged. Interested students may apply online. Questions can be sent to che@pitt.edu. Please be sure to include your name and complete mailing address.

Send surface mail to:

University of Pittsburgh
Department of Chemical and Petroleum Engineering
Vice Chair for Graduate Education

Pittsburgh, PA 15260

Financial Assistance

While admission to the graduate program does not imply the granting of financial aid, most fulltime PhD students are supported. All students who qualify for financial assistance are awarded departmental fellowships. In addition, a select few top students receive supplementary dean's fellowships. An applicant interested in obtaining financial aid should request information directly from the department. Applications for admission and financial aid should be submitted by January 1 for the following fall term.

Doctoral

Chemical Engineering, PhD

The following special regulations pertain to the Department of Chemical and Petroleum Engineering. *For additional requirements, review the school-wide information in the Doctor of Philosophy Programs section as well as the Regulations Pertaining to Doctoral Degrees.*

Entry to the PhD Program

In order to enter the PhD program, a student must have completed an MS degree and passed the PhD oral qualifying preliminary examination. Especially well-prepared students, with consent of the department faculty, may be granted permission to obtain the PhD degree directly without obtaining an MS degree. This eliminates the required completion of the MS thesis. All MS-level course work is still required.

During the summer of the first year as a graduate student in the department, the student wishing to continue into the PhD program must take the oral preliminary examination. Failure to take this examination at this time will forfeit one of two opportunities to pass this examination. The structure and content of the PhD oral qualifying examination is subject to change in order to meet the requirements of the faculty and PhD program.

PhD Course Requirements

A student's course series will be designed by the student and his/her thesis advisor, approved by the PhD committee, and signed off by the graduate coordinator. This sequence should include courses in the student's research area as well as courses not related to his/her research area. Forty-two credits beyond the MS degree are required and must include the following courses:

- XX 2/3XXX Electives (Science, Math, or Engineering) 12 credits
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING (if not taken at MS level)
- CHE 3990 - ADVANCED GRADUATE PROJECTS (18 credit minimum)
- CHE 3999 - PH.D. DISSERTATION (taken after PhD proposal/comprehensive exam defense), 12 credits (minimum)

Additional course requirements may include the following, if the student has not previously completed courses in these areas at the master's level:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1

Note:

Students must also register for one credit in PhD research methodology and one credit of CHE 3001 - GRADUATE SEMINAR each term. A minimum of 72 graduate credit hours, including MS courses and thesis credits, are required. All full-time students must fulfill a two-term teaching requirement during their course of study; this requirement is three terms for students starting their PhD from a BS degree.

Dissertation Requirement

A dissertation topic should be selected after passing the PhD oral qualifying examination. This is done by submitting a formal request in writing to the departmental graduate faculty for appointment of a faculty advisor (or advisors). Preliminary work (at least 18 credits) can be done on the dissertation by registering for CHE 3990. After being admitted to PhD candidacy, the student should concentrate on the dissertation, registering for CHE 3999 (minimum 12 credits). Most students complete more than 30 credits of these courses.

PhD Comprehensive Examination and Proposal Conference

This is an oral examination covering chemical engineering at the PhD level and is based upon a written dissertation proposal. If this examination is passed, a doctoral committee will be officially appointed. This exam should be taken at least 18 months before completion of the dissertation and preferably within the first year beyond the MS.

PhD Final Oral Examination

A final review (defense) of the thesis must be conducted by the dissertation committee in order to determine the acceptability of the dissertation.

Off-Campus Research

Occasionally, a research program can be conducted at a government or industrial site. In those situations the student should submit a proposal for such research to the Vice Chair for Graduate Education for approval by the faculty. The faculty advisor must be actively involved in the research.

Joint Degree

Chemical and Petroleum Engineering Dual Degree, MS

Requirements

A program of study is available in which a student may pursue a dual degree between chemical engineering and petroleum engineering. At least 48 credits are required, including the fundamental courses in the two areas. Both thesis and non-thesis options are possible. The required chemical engineering courses are:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
and the required petroleum engineering courses are:
- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS

Additional requirements for the Dual Degree MS, non-thesis options:

- CHE 2910 - SPECIAL PROJECTS
- 3 course credits in Chemical or Petroleum Engineering coursework
- PETE 2211 - RESERVOIR SIMULATION and 6 additional course credits from the approved list (as specified in the Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology

Additional requirements for Dual Degree MS with thesis:

- 6 course credits from the approved list (as specified Master of Science in Petroleum Engineering) of graduate offerings in engineering or geology
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING
- CHE 2999 - M.S. THESIS or PETE 2999 - M.S. THESIS
- Registration for one credit of CHE 2980 - MS RESEARCH METHODOLOGY or PETE 2980 - MS RESEARCH METHODOLOGY each fall and spring term until graduation
- Registration for CHE 3001 - GRADUATE SEMINAR each fall and spring term

MS Final Examination

A final review (oral defense) of the MS Thesis must be conducted by the thesis committee in order to determine the acceptability of the thesis. The committee consists of the student's major advisor and two (2) other members of the faculty.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see <http://www.egr.msu.edu/> for details about the bridging courses ChE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the dual MS in Chemical and Petroleum Engineering required courses. Students who do not have an undergraduate engineering degree are also required to take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with an MS degree.

Computational Modeling & Simulation, PhD

Requirements

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

All students enrolled in the program will be required to satisfy the following requirements:

1. Two courses (3 credits each) in Numerical Methods
2. Two courses (3 credits each) in Scientific Computing/Programming
3. Two courses (3 credits each) from a participating department outside Computer Science, Math, and Statistics, in the Dietrich School of Arts and Sciences or the Swanson School of Engineering
4. 12 credits in a concentration area in a participating department in the School of Arts and Sciences or in the Swanson School of Engineering
5. Enrollment in the Computational Modeling and Simulation Seminar series for all fall and spring semesters in residence

A minimum of 24 credits from categories I-IV are required, there can be overlap in courses satisfying requirement IV and those satisfying I, II, and III.

Preliminary Exam

A student will satisfy the preliminary exam requirements by passing (grade B or higher) the six courses in areas I-III described above. In the case that a student received one grade below B in one of the three main areas, he/she can counter that with a grade of B or above in an additional approved course in that area. If a student receives two grades below B, he/she will no longer be able to continue in the program. Students who do not meet these requirements but who have an overall grade average of B or better, have the option of doing a literature-based Master's thesis.

Comprehensive Exam

The comprehensive exam will be taken by the end of the student's seventh semester at Pitt, and will focus on the progress that the student has made to date on his/her research. The comprehensive exam will consist of a written report prepared by the student on his/her research, followed by an oral examination. The exam will be administered by a committee of four faculty members, at least two of whom (including the student's advisor) will be from the Department of the student's concentration, and at least one of whom will be from an outside department. If a student does not pass the comprehensive exam, he/she will have the option of continuing in the program for another semester and submitting a Master's thesis based on independent research. The student's committee will decide on whether the thesis warrants awarding the MS degree.

Dissertation/Thesis

Every graduate student has to write a thesis or dissertation before being awarded a MS or PhD degree. Browse our publications section for recently posted theses, dissertations, and presentations. All theses and dissertations are submitted online. Visit the EDT Web site for more information on the process.

Course Requirements

<http://cmsp.pitt.edu/course-requirements>

A minimum of 24 credits of graduate level courses from categories I - IV will be required. It is anticipated that students entering the program will be able to complete the six core courses in categories I - III in their first year and the concentration requirements in the second year.

Computational Modeling and Simulation Seminar Series: All students enrolled in the program are expected to attend the Computational Modeling and Simulation seminar program each semester they are enrolled. Students will receive one credit for each term they are enrolled in the Seminar Series. Seminars will be held typically twice per month, during the academic year. Each enrolled student will be required to give a seminar in this series, at least six months before the PhD defense.

University Credit Requirement: All students in the program must satisfy the university's requirement of a minimum of 30 credits for an MS. At least 24 of these credits will be satisfied by the core program, including the concentration area, described above, and at least 4 credits will be satisfied by enrollment and participation in the Computational Modeling and Simulation seminar program. The remaining credits will be met by directed study (i.e., research).

Master's

Chemical Engineering (Professional Engineer Program), MSChE

Students who wish to pursue advanced study in chemical engineering may apply for admission to the Professional Engineer Program. It differs from the regular MS program in two important respects:

1. Course work replaces the MS thesis requirement.
2. The student completes a 3-credit special project course, CHE 2910, during their last term in the program. This course could be satisfied, for example, by a project with a faculty member, or a project based on their professional work (for engineers currently working in industry) for which a faculty member agrees to serve as advisor. Submission of a term paper, which is completed under the advisement of a member of the faculty, is required.

A minimum of 31 credit hours of course work is required.

These must include the five core courses and elective courses listed below.

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2910 - SPECIAL PROJECTS
- ChE 2XXX - Chemical Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- ENGR 2/3XXX - Engineering Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)
- XX 2/3XXX - Elective (Graduate Level)

Note:

Up to 6 credit hours may be elected in approved graduate course offerings outside the department (denoted by XX, above); approvals are granted by the ChE Vice Chair for Graduate Education. Students who wish to enter this program should first apply for admission to graduate study in chemical engineering. Once admitted, students can then request admission to the Professional Engineer Program.

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see <http://www.egr.msu.edu/> for details about the bridging courses CHE 804 and 805). In addition, students must take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with the MS, offered in the spring and summer terms. Neither of these courses can serve as an elective nor core course substitute in the MS in Chemical Engineering required courses.

Chemical Engineering (Research-Oriented Program), MSChE

Requirements

The candidate for the Master of Science degree must demonstrate proficiency in basic chemical engineering subjects by successfully taking the following required courses:

- CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
- CHE 2201 - FUNDAMNTL OF REACTION PROCESSES
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- CHE 2410 - MATHMTCL METHD IN CHEMCL ENGRG 1
- CHE 2982 - ISSUES IN RESEARCH AND TEACHING

In addition to these 15 credits, the student must satisfactorily complete the following courses:

- At least 9 additional credits of graduate-level course work, at least 3 of which must be in chemical engineering. Approved courses, with the permission of the student's major advisor and/or the ChE Vice Chair for Graduate Education, can be taken outside the department.
- 6 credits of CHE 2999 - M.S. THESIS must also be taken.
- 3 credits of Research Methodology are required (see below).

A full-time student will normally take 24 didactic credits, 6 thesis credits, 3 credits of research methodology, and up to 3 credits of seminar.

Full-time students are required to register each term for Research Methodology, a 1-credit course. In Research Methodology, a letter grade will be given each term based upon the student's research performance. Full-time students are also required to register for CHE 3001 - GRADUATE SEMINAR during the fall and spring terms. It should be emphasized that the preceding course requirements are minimum requirements, and additional work may be necessary for an individual student, especially if the student's undergraduate degree is not in chemical engineering.

A student who does not maintain a B (3.00 GPA) average in all MS-level courses is put on academic probation. The graduate faculty of the Department of Chemical and Petroleum Engineering will review all cases of probation each term and determine whether the student will be permitted to continue to pursue graduate study. Should a student receive a grade lower than B- in a required MS course, the student will be required to repeat that course and receive a B- grade or better before being permitted to graduate.

A student with full-time status should discuss possible thesis topics with at least three members of the departmental faculty and then submit a written request to the Vice Chair for Graduate Education for assignment of a thesis advisor. After the faculty assigns an advisor, the student can begin the thesis. The MS thesis oral examination is given at the completion of the thesis.

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see <http://www.egr.msu.edu/> for details about the bridging courses CHE 804 and 805). Neither of these courses can serve as an elective nor core course substitute in the MS required courses. Students who do not have an undergraduate engineering degree are also required to take ChE 0613 (senior-level) "Systems Engineering 2: Process Design" prior to graduating with an MS degree. This requirement is waived for students who complete a PhD in Chemical Engineering.

Petroleum Engineering, MSPE

The candidate for the degree of non-thesis Master of Science in Petroleum Engineering must demonstrate proficiency in petroleum engineering by passing the following:

Mandatory Courses:

- PETE 2160 - PETROLEUM RESERVOIR ENGINEERING
- PETE 2201 - RECOVERY OF OIL BY WATERFLOODING
- PETE 2204 - ENHANCED OIL RECOVERY PROCESSES
- PETE 2205 - PETROLEUM PRODUCTION ENGINEERING
- PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING
- PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN
- PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS
- CHE 2410 - MATHEMATICAL METHOD IN CHEMICAL ENGRG 1 or PETE 2211 - RESERVOIR SIMULATION

Note:

In addition to these 24 credits, the student must satisfactorily complete two other courses from the accepted electives list in order to fulfill the 30 credits required for the MS degree.

Accepted Electives:

- GEOL 2110 - PLATE TECTONICS
- GEOL 2151 - GROUNDWATER GEOLOGY
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
- GEOL 2640 - ADV GEOHAZARDS & RISK MGMT
- ME 2055 - COMPUTER AIDED ANALYSIS OF TRANSPORT PHENOMENA
- ME 2060 - NUMERICAL METHODS
- CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
- CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING
- CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE
- CEE 2800 - ENGINEERING GEOLOGY
- CEE 3501 - ENVIRONMENTAL ENGRG PROCESSES 1
- CEE 3502 - ENVIRONMENTAL ENGRG PROCESSES 2
- CEE 3805 - ROCK MECHANICS
- ENGR 2637 - STRATA CONTROL ENGINEERING
- ENGR 2638 - MINING HEALTH AND SAFETY
- PETE 2910 - SPECIAL PROJECTS

Note:

No single course can be used to satisfy both a core requirement and elective requirement.

Students without a BS degree in engineering must take, in addition, either the online "bridging course" offered in Jan (1st class) and May (2nd class) by Michigan State University (see <http://www.egr.msu.edu/> for details about the bridging courses CHE 804 and 805) or the ChE Bridging Program offered by Pitt during the summer term immediately preceding matriculation to the graduate degree program. Neither of these courses can serve as an elective nor core course substitute in the MS in Petroleum Engineering required courses.

Department of Civil and Environmental Engineering

Contact Information

Department Chair: Radisav D. Vidic
 Main Office: 742 Benedum Hall

Graduate Degree Programs

<http://www.engineering.pitt.edu/Departments/Civil-Environmental/Graduate-Overview/>

The Department of Civil and Environmental Engineering offers graduate study and research leading to the Master of Science in Civil Engineering and Doctor of Philosophy degrees. Also offered is a joint degree program resulting in a second Master of Science degree in mathematics, and a joint degree program with the Katz Graduate School of Business resulting in a MBA degree. The MS in Civil Engineering and the PhD in engineering may be pursued in one of the following areas:

The Master of Science degree in Civil and Environmental Engineering is primarily designed for students with an undergraduate degree in engineering, although students with other backgrounds can be accommodated with specially designed programs. An MS degree can be pursued by either a full-time or part-time student in one of the following areas:

- Construction Management
- Environmental Engineering
- Geotechnical and Pavement Engineering
- Structural Engineering and Mechanics
- Sustainable Engineering
- Transportation Engineering
- Water Resources Engineering

The areas of study for the Ph.D. in Civil Engineering in the Department of Civil and Environmental Engineering within the Swanson School of Engineering are divided into two integrated research areas and sub-component specialty areas as follows:

- **Sustainability and Environmental Engineering (SEE):**
 - Environmental Engineering;
 - Sustainable Engineering; and
 - Water Resources Engineering
- **Advanced Infrastructure Systems (AIS):**
 - Geotechnical and Pavement Engineering;
 - Structural Engineering and Mechanics; and
 - Transportation Engineering.

Certificate

Civil and Environmental Engineering - Construction Management Certificate

The Construction Management Certificate Program is directed at Part-time students currently employed in the construction industry as well as other students interested in obtaining credentials in construction management.

The Academic Requirements associated with the Graduate and Post-Baccalaureate Certificate in Construction Management include the completion of fifteen (15) credits of coursework within the Civil and Environmental Department from among the following Graduate Level courses:

- CEE 2201 - CONSTRUCTION COST ENGINEERING*
- CEE 2202 - CONSTRUCTION SCHEDULING*
- CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT*
- CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT
- CEE 2205 - CONSTRUCT FINANCE & COST CONTROL
- CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY
- CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING

Students must complete three (3) required courses above (designated with an asterisk *) and may select any two (2) of the remaining courses above as electives in the completion of their Certificate. Additional graduate level courses within the Swanson School of Engineering may be considered as substitutes for the two (2) elective courses with permission of the Program Director to customize the Certificate to meet the educational goals of the student. All courses can be taken either on campus or online.

Doctoral

Civil Engineering - Advanced Infrastructure Systems - Geotechnical and Pavement Engineering Specialty, PhD

PhD Track Requirements

Students pursuing the PhD must complete a minimum of 72 post-baccalaureate credits, including the following:

- a minimum of 24 course credits (e.g., eight, 3-credit lecture courses) in their major area as agreed in consultation with their primary advisor
- a minimum of 9 course credits (e.g., three, 3-credit lecture courses) in a chosen minor area
- a minimum of 18 credits of dissertation research

Remaining credits may be course credits or special investigation credits or doctoral research credits in their area of concentration or a closely related area as agreed in consultation with their primary advisor.

The total number of credits above these minimum requirements will depend on the student's background and academic achievement upon entering the program and their dissertation topic. This decision will be made in consultation with their primary advisor.

Each student must complete a minimum of 8 courses towards the *Major Concentration* and 3 courses towards their *Minor Concentration* for a **total of 11 Lecture Courses**, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study elsewhere. The coursework shall be comprised of lecture courses and not include seminar or research courses.

Independent of any credits transferred from prior post-baccalaureate study, each student must complete at least 9 course credits (approximately 3 courses) at Pitt. At least 3 of these credits (typically 1 course) must come from "CEE" designated courses.

Up to 30 credits may be applied to the Major Concentration and/or Minor Concentration from previously completed post-baccalaureate study (e.g., an earned Master of Science degree in civil and environmental engineering or related discipline).

A minor area of concentration can be within any approved coherent area of study outside of CEE.

Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.

At least 12 credits of the Dissertation Research credit must be taken as Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION), which may only be taken following successful completion of the Comprehensive Examination (i.e., PhD Dissertation Proposal Exam). The remaining 6 credits of Dissertation Research may be taken as Doctoral Research (CEE 3997 - RESEARCH, PH.D) or Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION).

All students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of full-time residency (i.e., full-time study in the PhD program).

All PhD students are subject to all applicable guidelines and rules set out by SSOE and The University of Pittsburgh.

Additional Information

Plan of Study

The PhD Plan of Study is prepared by the student with the aid of the student's faculty advisor during the student's first two terms of graduate study. It shall be approved and signed by the faculty advisor, majority of faculty members in the program area, the graduate coordinator, and the department chair. Copies should be made available to the student, the faculty advisor, and the academic coordinator. Any change in the Plan of Study must be approved by the faculty advisor and the academic coordinator, and should likewise be recorded.

PhD Examination Structure

All PhD candidates must pass the preliminary, comprehensive, and final oral examinations:

Preliminary Examination

The purpose of this examination is to determine the student's potential to complete the PhD program. It is organized by the advisor and faculty from the student's program area, before or sometime during the first two terms of the program. Not counting the summer term, full-time students already with an MS (or equivalent) must take the exam following completion of their first 2 terms of study, while full-time students without an MS (or equivalent) should take the exam no later than completion of their first 3 terms of study.

Comprehensive Examination

All PhD students must take this examination toward the end of their course work. Students must submit a written proposal of their expected dissertation research and pass a presentation and comprehensive oral examination administered by the student's doctoral committee. The comprehensive examination committee will typically also serve as the final dissertation examination committee and shall consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering. The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the final oral examination (dissertation defense).

Final Oral Examination

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

Civil Engineering - Advanced Infrastructure Systems - Structural Engineering and Mechanics Specialty, PhD

PhD Track Requirements

Students pursuing the PhD must complete a minimum of 72 post-baccalaureate credits, including the following:

- a minimum of 24 course credits (e.g., eight, 3-credit lecture courses) in their major area as agreed in consultation with their primary advisor
- a minimum of 9 course credits (e.g., three, 3-credit lecture courses) in a chosen minor area
- a minimum of 18 credits of dissertation research

Remaining credits may be course credits or special investigation credits or doctoral research credits in their area of concentration or a closely related area as agreed in consultation with their primary advisor.

The total number of credits above these minimum requirements will depend on the student's background and academic achievement upon entering the program and their dissertation topic. This decision will be made in consultation with their primary advisor.

Each student must complete a minimum of 8 courses towards the *Major Concentration* and 3 courses towards their *Minor Concentration* for a **total of 11 Lecture Courses**, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study elsewhere. Independent of any credits transferred from prior post-baccalaureate study, each student must complete at least 9 course credits (approximately 3 courses) at Pitt. At least 3 of these credits (typically 1 course) must come from "CEE" designated courses.

Up to 30 credits may be applied to the Major Concentration and/or Minor Concentration from previously completed post-baccalaureate study (e.g., an earned Master of Science degree in civil and environmental engineering or related discipline).

A minor area of concentration can be within any approved coherent area of study outside of CEE.

Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.

At least 12 credits of the Dissertation Research credit must be taken as Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION), which may only be taken following successful completion of the Comprehensive Examination (i.e., PhD Dissertation Proposal Exam). The remaining 6 credits of Dissertation Research may be taken as Doctoral Research (CEE 3997 - RESEARCH, PH.D) or Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION).

All students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of full-time residency (i.e., full-time study in the PhD program).

All PhD students are subject to all applicable guidelines and rules set out by SSOE and The University of Pittsburgh.

Additional Information

Plan of Study

The PhD Plan of Study is prepared by the student with the aid of the student's faculty advisor during the student's first two terms of graduate study. It shall be approved and signed by the faculty advisor, majority of faculty members in the program area, the graduate coordinator, and the department chair. Copies should be made available to the student, the faculty advisor, and the academic coordinator. Any change in the Plan of Study must be approved by the faculty advisor and the academic coordinator, and should likewise be recorded.

PhD Examination Structure

All PhD candidates must pass the preliminary, comprehensive, and final oral examinations:

Preliminary Examination

The purpose of this examination is to determine the student's potential to complete the PhD program. It is organized by the advisor and faculty from the student's program area, before or sometime during the first two terms of the program. Not counting the summer term, full-time students already with an MS (or equivalent) must take the exam following completion of their first 2 terms of study, while full-time students without an MS (or equivalent) should take the exam no later than completion of their first 3 terms of study.

Comprehensive Examination

All PhD students must take this examination toward the end of their course work. Students must submit a written proposal of their expected dissertation research and pass a presentation and comprehensive oral examination administered by the student's doctoral committee. The comprehensive examination committee will typically also serve as the final dissertation examination committee and shall consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering. The written proposal is recommended to be in the format of a standard federal research proposal (e.g., National Science Foundation) in terms of length, formatting, and technical content. A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the final oral examination (dissertation defense).

Final Oral Examination

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

Civil Engineering - Sustainability and Environmental Engineering - Sustainable Engineering Specialty, PhD

PhD Track Requirements

Students pursuing the PhD must complete a minimum of 72 post-baccalaureate credits, including the following:

- a minimum of 24 course credits (e.g., eight, 3-credit lecture courses) in their major area as agreed in consultation with their primary advisor
- a minimum of 9 course credits (e.g., three, 3-credit lecture courses) in a chosen minor area
- a minimum of 18 credits of dissertation research

Remaining credits may be course credits or special investigation credits or doctoral research credits in their area of concentration or a closely related area as agreed in consultation with their primary advisor.

The total number of credits above these minimum requirements will depend on the student's background and academic achievement upon entering the program and their dissertation topic. This decision will be made in consultation with their primary advisor.

Each student must complete a minimum of 8 courses towards the *Major Concentration* and 3 courses towards their *Minor Concentration* for a **total of 11 Lecture Courses**, i.e., a minimum of 33 credits of post-baccalaureate coursework taken at Pitt (2XXX level or higher) or transferred in from post-baccalaureate study elsewhere. The coursework shall be comprised of lecture courses and not include seminar or research courses.

Independent of any credits transferred from prior post-baccalaureate study, each student must complete at least 9 course credits (approximately 3 courses) at Pitt. At least 3 of these credits (typically 1 course) must come from "CEE" designated courses.

Up to 30 credits may be applied to the Major Concentration and/or Minor Concentration from previously completed post-baccalaureate study (e.g., an earned Master of Science degree in civil and environmental engineering or related discipline).

A minor area of concentration can be within any approved coherent area of study outside of CEE.

Doctoral Research (CEE 3997 - RESEARCH, PH.D) may only be taken following successful completion of the PhD Preliminary Exam.

At least 12 credits of the Dissertation Research credit must be taken as Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION), which may only be taken following successful completion of the Comprehensive Examination (i.e., PhD Dissertation Proposal Exam). The remaining 6 credits of Dissertation Research may be taken as Doctoral Research (CEE 3997 - RESEARCH, PH.D) or Doctoral Dissertation (CEE 3999 - PH.D. DISSERTATION).

All students must enroll in the departmental seminar (CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR) every semester of full-time residency (i.e., full-time study in the PhD program).

All PhD students are subject to all applicable guidelines and rules set out by SSOE and The University of Pittsburgh.

A student must have a cumulative GPA of 3.0/4.0 or higher to be allowed to participate in the examination. The examination can be administered no sooner than 1 term (i.e., 4 months) following completion of the Preliminary Exam and no later than 2 terms (i.e., 8 months) prior to the final oral examination (dissertation defense).

Final Oral Examination

This is an oral defense of the student's PhD dissertation. The examination will be administered by the doctoral committee. The doctoral committee will consist of the major advisor as chair, at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering, and at least one faculty member from outside the Department of Civil and Environmental Engineering.

Joint Degree

Civil Engineering/Mathematics, MSCE/MS

The general requirements for the two options for the Master of Science in Civil and Environmental Engineering/Mathematics degree (thesis and professional) are detailed below:

Thesis Option: 24 course credits (eight courses) minimum and thesis (6 credits), with comprehensive and final examinations.

Professional Option: 30 course credits (10 courses) minimum

Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option. The professional option is not available to students supported as graduate research or teaching assistants.

MS Final Examination

Students pursuing the thesis and project MS options must take and pass both a comprehensive examination and a final oral examination.

Comprehensive Examination

This examination is given to all students during the last term of the program. It may be either an oral examination or, at the recommendation of the area faculty, a written examination. It is administered by an MS committee made up of the faculty advisor (as chair), plus a minimum of two other faculty members from fields related to the student's interest. If the result of the examination is unsatisfactory, subsequent action is at the discretion of the MS committee.

Final Oral Examination

The purpose of this examination is to evaluate the student's MS thesis or project and/or related course work. The examination is administered by the MS committee, chaired by the student's major advisor.

Master's

Civil and Environmental Engineering - Construction Management Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Construction Management Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

- a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent
- b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent
- c) 3 credits - CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT or Equivalent
- d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent
- e) 3 credits - CEE 2205 - CONSTRUCT FINANCE & COST CONTROL or Equivalent
- f) 3 credits - CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS or Equivalent
- g) 12 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

MS Thesis Degree Requirements

- a) 3 credits - CEE 2201 - CONSTRUCTION COST ENGINEERING or Equivalent
- b) 3 credits - CEE 2202 - CONSTRUCTION SCHEDULING or Equivalent
- c) 3 credits - CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT or Equivalent
- d) 3 credits - CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT or Equivalent
- e) 3 credits - CEE 2205 - CONSTRUCT FINANCE & COST CONTROL or Equivalent

f) 3 credits - CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY - OR - CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS or Equivalent

g) 6 credits - Graduate Technical Electives

Notes: Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count toward the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Environmental Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Environmental Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2500 - ENVRNMNTL ENGRG MICROBIOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVRNMNTL ENGRG PROCESSES 1 or Equivalent

e) 3 credits - CEE 3502 - ENVRNMTL ENGRG PROCESSES 2 or Equivalent

f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 2500 - ENVRNMNTL ENGRG MICROBIOL or Equivalent

b) 3 credits - CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY or Equivalent

c) 3 credits - CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING or Equivalent

d) 3 credits - CEE 3501 - ENVRNMTL ENGRG PROCESSES 1 or Equivalent

e) 3 credits - CEE 3502 - ENVRNMTL ENGRG PROCESSES 2 or Equivalent

f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Geotechnical Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Geotechnical Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent

b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent

- c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent
- d) 3 credits - CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent
- e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

MS Thesis Degree Requirements

- a) 3 credits - CEE 2800 - ENGINEERING GEOLOGY or Equivalent
- b) 3 credits - CEE 2801 - ADVANCED SOIL MECHANICS or Equivalent
- c) 3 credits - CEE 2802 - GEOTECHNICAL ANALYSIS or Equivalent
- d) 3 credits - CEE 2814 - SLOPES & EARTH RETAINING STRUCT or Equivalent
- e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996) No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

- f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Pavement Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Pavement Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

- a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
- b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent

- c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent
- d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or Equivalent
- e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

- a) 3 credits - CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
- b) 3 credits - CEE 2715 - PAVEMENT MAINTENANCE AND REHAB or Equivalent
- c) 3 credits - CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE or Equivalent
- d) 3 credits - CEE 3714 - ADVANCED PAVEMENT DESIGN & ANAL or Equivalent
- e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996) No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

- f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Structural Engineering and Mechanics Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Structural Engineering and Mechanics Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

- a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS
- b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent
- c) 3 credits - SEM Graduate Design Elective - CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING
- d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

- e) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

MS Thesis Degree Requirements

- a) 3 credits - CEE 2320 - ADVANCED MECHANICS OF MATERIALS or CEE 2321 - ELASTICITY, PLASTICITY AND FRACTURE MECHANICS
- b) 3 credits - CEE 2333 - INTRODUCTION TO FINITE ELEMENTS or Equivalent
- c) 3 credits - SEM Graduate Design Elective - CEE 2340 - CONCRETE STRUCTURES 2, CEE 2341 - DESIGN OF STEEL STRUCTURES, CEE 2343 - PRESTRESSED CONCRETE, CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES or CEE 2347 - BRIDGE ENGINEERING
- d) 6 credits - SEM Graduate Technical Elective - CEE 2330 - ADVANCED STRUCTURAL ANALYSIS, CEE 2343 - PRESTRESSED CONCRETE, CEE 2347 - BRIDGE ENGINEERING, CEE 2360 - DYNAMICS OF STRUCTURES or CEE 2370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Note: CEE 2330 - ADVANCED STRUCTURAL ANALYSIS may not be taken for graduate credit if the student's undergraduate program includes an equivalent course.

- e) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements).

- f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Sustainable Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Sustainable Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

- a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent
- b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent
- c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent
- d) 3 credits - CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent
- e) 18 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

- a) 3 credits - CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or Equivalent
- b) 3 credits - CEE 2610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or Equivalent
- c) 3 credits - CEE 2620 - ADVANCED GREEN BUILDING AND CONSTRUCTION or CEE 2630 - DESIGN FOR CIRCULAR ECONOMY or Equivalent
- d) 3 credits - CEE 2515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN or CEE 2531 - AIR POLLUTION AND CONTROL or Equivalent
- e) 12 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

- f) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Transportation Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Transportation Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

- a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent
- b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent
- c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent
- d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
- e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION
- f) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

- a) 3 credits - CEE 2700 - TRAFFIC MGMNT AND OPERATIONS or Equivalent
- b) 3 credits - CEE 2710 - TRAFFIC CONTROL SYSTEMS or Equivalent
- c) 3 credits - CEE 2720 - URBAN TRANSPORTATION PLANNING or Equivalent
- d) 3 credits - CEE 2730 - HIGHWAY ENGINEERING or CEE 2714 - PAVEMENT DESIGN AND ANALYSIS or Equivalent
- e) 3 credits - CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION
- f) 9 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

g) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Civil and Environmental Engineering - Water Resources Engineering Area, MSCE

The general requirements for the option for the Master of Science in Civil and Environmental Engineering - Water Resources Engineering Area degree (thesis and professional) are detailed below:

Requirements

Professional Option: 30 course credits (e.g., ten, 3-credit lecture courses) minimum

Thesis Option: 24 course credits (e.g., eight, 3-credit course equivalents) minimum and 6 thesis research (CEE 2999) credits

All M.S. students enter the professional MS program. Students interested in the thesis option should meet with program faculty to explore project options and can transition to the thesis option if they find a thesis advisor and project.

Students pursuing the thesis option must complete novel research that advances the current state of knowledge in their field, is composed in a written dissertation, and presented to their faculty committee during a thesis defense. Their committee will consist of their primary research advisor and at least two faculty members from the student's program area within the Department of Civil and Environmental Engineering.

The professional option is not available to students supported as graduate research or teaching assistants. Students supported as graduate research assistants and all students intending to continue for a PhD degree are required to pursue the thesis option.

The detailed course requirements for these two degree options are as follows:

Professional MS Degree Requirements

a) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

b) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

c) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

d) 21 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996). No more than six credits of CEE 2996 may count towards the degree program coursework requirements.

MS Thesis Degree Requirements

a) 3 credits - CEE 3414 - ADVANCED HYDROLOGY

b) 3 credits - CEE 2410 - WATER RESOURCES ENGINEERING

c) 3 credits - CEE 2411 - CURRENT ISSUES AND CHALLENGES IN WATER RESOURCES

d) 15 credits - Graduate Technical Electives

Graduate Technical Electives may include any advisor-approved program-related graduate course (i.e., course numbers 2XXX or 3XXX), including guided special investigations (CEE 2996; although no more than six credits of CEE 2996 may count towards the degree program coursework requirements).

e) 6 credits - CEE 2999 - M.S. THESIS

Thesis Defense

Students pursuing the MS Thesis Option must pass an oral presentation and defense of their completed thesis, administered by the student's thesis committee. The committee shall be comprised of 3 or more members (including the student's graduate advisor). The chair of the committee and at least one other committee member must be appointed to the University of Pittsburgh Graduate Faculty.

Department of Electrical and Computer Engineering

Contact Information

Department Chair: Alan D. George

Main Office: 1238 Benedum Hall

412-624-8002

Fax: 412-624-8003

E-mail: ecemain@pitt.edu

<http://www.engineering.pitt.edu/ECE/>

Additional information concerning the Electrical and Computer Engineering graduate programs may be obtained from the department's Graduate Program Administrator, located at 1238 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261, and available by email at ecegrad@pitt.edu.

Graduate Degree Programs

The Department of Electrical and Computer Engineering offers a program of graduate study and research for master's and doctoral degree students whose career choice is oriented toward basic or applied research in industry, government, or academic institutions. Degrees awarded are the Master of Science in Electrical and Computer Engineering and the Doctor of Philosophy in Electrical and Computer Engineering. Course work and faculty/student research in the graduate Electrical and Computer Engineering program are concentrated in the following four areas:

- Computer Engineering
- Optical and Electronic Devices
- Electric Power Engineering
- Signal Processing and Systems

and include research in computer architecture, reconfigurable and high-performance computing, computer-aided design (CAD), very-large-scale integrated (VLSI) design, optical interfacing, embedded systems, parallel processing architectures, networking, photonic and electronic devices, plasmonics, quantum photonic devices, micro/nanorobotics and systems, fiber optics, ultrafast laser processing, 2D/low-dimensional materials and devices, semiconductor device modeling and characterization, power electronics, pattern recognition, biomedical image processing, speech processing, statistical signal processing, wavelets, intelligent and neural control, human-centered control, networked control, radio-frequency identification (RFID) and tags, electric power systems analysis, simulation and modeling: transmission, distribution systems and technologies, real-time control of power systems, renewable energy interconnections, and smart grid.

Graduate Admissions

<https://www.engineering.pitt.edu/ece>

Applicants for admission must submit transcripts of all college-level work, two letters of recommendation and scores on the verbal, quantitative and writing assessment-analytical sections of the Graduate Record Examination. International applicants whose first language is not English are required

to submit the TOEFL administered by the Educational Testing Service with a minimum score of 80 (internet-based test). For awards consideration, applications must be completed by February 1.

Financial Aid

The Department of Electrical and Computer Engineering offers graduate students support in a variety of ways. Many full-time students are supported by graduate research assistantships or teaching assistantships. There are also several fellowships available for highly qualified graduate students.

Graduate Regulations

In addition to the general regulations of the Swanson School of Engineering, the electrical and computer engineering department has the following requirements:

Certificate

Electric Power Engineering Certificate

- Via Synchronous, Interactive, Distance-Enabled Delivery

The University of Pittsburgh Swanson School of Engineering has established an Electric Power Engineering Post-Baccalaureate/Graduate Certificate Program that rises to the challenge of meeting the nation's critical development needs for electric power engineering professionals. This is a distance-enabled program in electric power engineering that allows students to take classes either synchronously or asynchronously, depending on the course.

The program is deeply rooted in core electric power engineering principles and focuses on the expansion and enhanced reliability and resilience of electric power grid infrastructure through application of power electronics and advanced control technologies, as well as renewable energy integration and smart grids. Program content - combined with innovative distance-enabled delivery and collaborative program components - makes this program an attractive and unique choice in graduate engineering, particularly for individuals in industry/business. For additional information and to apply, please visit www.engineering.pitt.edu/powercertificate.

Certificate Curriculum

Credit-hours required: 15

Students may select any five of the following courses:

- ECE 2250 - POWER ELECTRONICS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - ADVANCED POWER SYSTEMS ANALYSIS
- ECE 2775 - ADVANCED ELECTRIC MACHINES AND DRIVES
- ECE 2776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES
- ECE 2777 - POWER SYSTEMS TRANSIENTS I
- ECE 2778 - FACTS AND HVDC TECHNOLOGIES
- ECE 2780 - RENEWABLE AND ALTERNATIVE ENERGY
- ECE 2795 - SPECIAL TOPICS POWER Protective Relaying and Substation Automation
- ECE 2795 - SPECIAL TOPICS POWER Electrical Distribution System Engineering & Analysis II
- ECE 2795 - SPECIAL TOPICS POWER Power Magnetic Devices

Additional Information

Admission Requirements

- BS in electrical engineering from an ABET-accredited university program (no industry experience required) *OR*
- BS in any engineering field, PLUS a minimum of three years of power industry experience
- Completed application via EngineeringCAS, Pitt's online application portal
- At least two references preferred

- No GRE required
- Applications and references will be reviewed by the program director prior to admission

<https://www.youtube.com/watch?v=OPinGSYS6VI>

For more information about the Electric Power Engineering program, contact:

Alexis Kwasinski, PhD, Program Director
Associate Professor, Electrical & Computer Engineering
akwasins@pitt.edu

Doctoral

Electrical & Computer Engineering, PhD ECE

In Fall 2019, the Electrical Engineering, PhD was renamed to Electrical and Computer Engineering. Students currently enrolled will be moved over to the updated program name.

The objective of the PhD program is to achieve a high degree of competence in one major field in Electrical and Computer Engineering.

Application Procedure and Admission Requirements

Applicants to the following terms: Summer 2021, Fall 2021, and Spring 2022 should consider the GRE an optional submission. If an applicant has already taken the GRE and believes their score demonstrates outstanding academic ability, beneficial to portraying you as a wholistic student and applicant, you may submit -- but it is optional. The GRE scores will not be considered as part of our admissions criteria for these application cycles. For students applying to terms after those listed above, please check back in the future for updates, as the Swanson School is still evaluating whether waiving the GRE will be permanent.

Students who obtained the MS degree from Pitt ECE:

Students must have a QPA of 3.30 or better and the recommendation from the MS advisor. Students must submit an application to continue into the PhD program. Application forms can be obtained from the Graduate Program Administrator.

Students who obtained the MS degree from outside Pitt ECE:

Students must follow the regular application procedure for admission to the ECE Graduate Program and submit the following materials: transcripts (both BS and MS); minimum two letters of recommendation; GRE general exam and TOEFL, IELTS or Duolingo (if required) score reports; statement of purpose; resume.

Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree.

Students who are currently enrolled in the MS program at Pitt ECE:

The request to transfer an MS student to the PhD program without an MS degree should be initiated by the students' thesis advisor in a letter submitted to the Graduate Program Director. The decision to approve the request is the responsibility of the Graduate Program Director. To be eligible for transfer, the student should have completed a minimum of 15 credits of graduate course work at Pitt and have maintained a minimum QPA of 3.5.

Students who obtained the BS degree only and would like to apply to the PhD program:

To be eligible for direct admission, students must have a minimum QPA of 3.5 and strong recommendations. Students must take the regular application procedure for admission to the ECE Graduate Program, submitting the following materials: transcripts (BS); minimum two letters of recommendation; GRE general exam and TOEFL, IELTS or Duolingo (if required) score reports; statement of purpose; resume.

Degree Requirements

Students who obtained the MS degree:

Beyond the 30 credit MS requirement, a minimum of 42 credits and a dissertation are required for the PhD degree. The dissertation should embody an extended original and independent investigation of a problem of significance in Electrical and Computer Engineering. Of those 42 credits, at least 18 must be in dissertation research (6 or more in ECE 3997 and 12 or more in ECE 3999), and at least 24 course credits must be attained beyond the MS degree. The 24 credits must include:

1. At least 4 courses (12 credits) that are in the catalog.*
2. A maximum 12-credit combination of ECE 3998 and ECE 3995 research/project courses.**

ECE 3995 should be directed toward research. This research course requires the approval of the student's Program Conference Committee (i.e. the Preliminary Exam should be completed before taking this course). In addition, the student is required to write a 1-2 page proposal for each such course citing the topic, the teacher, the rationale for the course, and a deliverable from the course experience. The deliverable can be a submitted journal/conference paper, a research proposal for funding, or a complete patent application.

* A student who came with non-Pitt MS thesis and gets credit transfer of a total 17 credits or less can take a minimum 3 courses (9 credits) beyond the 30-credit MS requirement.

** A maximum 15-credit combination of ECE 3998 and ECE 3995 will count toward the 24-credit requirement for PhD degree for the students who are allowed to take a minimum 3 courses (9 credits) beyond the MS requirement.

Students who obtained the BS degree only:

Students must complete a minimum of 72 credits beyond the BS degree. Of those credits, at least 18 must be in dissertation research (6 or more in ECE 3997 and 12 or more in ECE 3999), and at least 54 course credits must be attained beyond the BS degree. The 54 credits must include:

1. At least 8 courses (24 credits) that are in the catalog; of those 24 credits, at least 4 courses (12 credits) must be ECE courses at the 2000 or 3000 level.*
2. A maximum 30 credit combination of ECE 3998 and ECE 3995 research/project courses.

* Prior courses taken at Pitt ECE (2000 or 3000 level) will count toward the PhD requirements.

Entrance Requirements

To be accepted into the PhD program a student who graduated from the University of Pittsburgh with an MS degree in Electrical and Computer Engineering must have a QPA of 3.30 or better and the recommendation from the MS thesis committee. The student must submit an application to continue into the PhD program. Applications can be obtained from the Graduate Program Administrator. For students who obtained the MS degree from other institutions, the QPA and letters of recommendation, GRE general exam and TOEFL (if required) results will be used for admission. Exceptionally well-qualified students may be permitted to enter the PhD program without an MS degree (see Section 3.4).

Exams

There are four separate exams that must be passed in order to obtain the PhD degree. The student must also have a Program Conference with a faculty committee to approve his/her plan of study. Descriptions of each follow.

Program Conference

During the first year, a PhD student must schedule a meeting with a faculty committee to present a tentative program of study for approval. The committee consists of the student's advisor, who chairs the committee, and a minimum of two other faculty members from the department.

On the Program Conference form, the student must list all of the courses he/she has taken as a graduate student in the department as well as those for which he/she has obtained advanced standing. Courses that he/she is planning to take in the future in Electrical and Computer Engineering as well as in related areas (see Section 6.2) should also be included. Finally, the form should list the four courses that are required for the PhD Comprehensive Exam and a tentative schedule for the different exams and the residency requirements. The committee can approve, reject or make modifications to the proposed program. The advisor is responsible for supervising the student's progress in the approved program.

Preliminary Exam

The purpose of the preliminary exam is to ascertain the capabilities of a student to do independent research. The exam generally consists of an oral presentation of a written document, prepared by the student, to a committee of ECE faculty members. The student and his/her advisor will determine the subject of the document.

Students completing the MS research option who are interested in pursuing doctoral studies have already demonstrated their ability to do independent research. Therefore, their MS thesis oral and the preliminary exam may be administered simultaneously.

Continuing MS students who elected the professional option or who obtained their degrees from other institutions must schedule a preliminary exam. The student must prepare a written document of the same caliber as an MS thesis. This may be done by either taking a graduate project course (ECE 3998) or by using a thesis presented at another institution. The student's advisor will then assist the student in forming a committee with a composition similar to that of an MS thesis exam committee. Two weeks before the exam, the written report should be given to the committee members and the Graduate Program Administrator should be informed of the composition of the committee, time, title and abstract of the thesis in order to publish an announcement.

PhD Comprehensive Exam

To complete the Comprehensive PhD exam, a student must obtain a minimum QPA of 3.3 in the four courses assigned by the PhD program conference committee no later than the first two years of enrollment in the PhD program.

If the student fails to achieve this requirement, he/she must pass an oral exam that takes place at the same time as the PhD Proposal exam and answer general questions related to his/her research area. If he/she fails this oral exam, the student may take it once more three months later.

To complete the PhD Comprehensive exam, a student must select four courses in his/her area of specialization and have earned a grade of B or higher in each.

Dissertation Proposal Exam

For the dissertation proposal examination, the student prepares a written proposal of his/her dissertation and presents it orally to an exam committee. Students must have a cumulative graduate QPA of 3.30 to be considered for doctoral candidacy. The committee consists of at least five members, four of whom must be from the Electrical and Computer Engineering Department, and at least one who must be from outside the department (external member). Three of the departmental members must be graduate faculty members and at least one of the external members must be a graduate faculty member from another department in the university. Other appropriate member(s) may also serve on the committee. A faculty member from another accredited university may serve as an external graduate faculty member of the committee if that individual's academic background is comparable to the qualifications for graduate faculty status at the University of Pittsburgh.

The dissertation proposal should be given to the committee members at least two weeks before the exam, and the student must inform the Graduate Program Administrator of the composition of the committee and provide a proposal with a completion time line as well as a title and an abstract at least two weeks prior to the exam date.

If the doctoral committee approves the dissertation proposal, the student is then formally admitted to Candidacy for the Doctor of Philosophy Degree. The proposal exam must be completed at least two semesters before the student plans to graduate. Students can register for ECE 3997 for preliminary work for the PhD proposal exam.

Final Oral Exam

The final oral exam is administered by the doctoral committee and determines the acceptability of the student's dissertation and his/her ability to comprehend, organize and make original contributions to his/her area of research.

Only students who have passed the dissertation proposal exam may register for dissertation research (ECE 3999). A minimum of 18 research credits is required for graduation, of which at least 12 must be in ECE 3999. Once a student registers for research, he/she must continue to register for Fall and Spring terms until the final oral examination has been passed.

At least two weeks before the date set for the exam, the student must submit a copy of the dissertation to each member of the exam committee and register with the Graduate Program Administrator. The final oral exam is open to the public.

Students scheduling their final oral exam must submit at least one paper from their thesis work to a refereed journal. The publication form must be signed by the major advisor and submitted to the Graduate Program Administrator at least two weeks before the final oral exam. Submitting a paper to a refereed journal is a requirement for the PhD degree.

Master's

Electrical & Computer Engineering, MS ECE

In Fall 2019, the Electrical Engineering, MSEE was renamed to Electrical and Computer Engineering. Students currently enrolled will be moved over to the updated program name.

As a general rule, the admission requirements for the Master of Science degree in Electrical Engineering are a minimum QPA of 3.0, two letters of recommendation, GRE General Test scores, and TOEFL for international applicants.

Applicants to the following terms: Summer 2021, Fall 2021, and Spring 2022 should consider the GRE an optional submission. If an applicant has already taken the GRE and believes their score demonstrates outstanding academic ability, beneficial to portraying you as a wholistic student and applicant, you may submit -- but it is optional. The GRE scores will not be considered as part of our admissions criteria for these application cycles. For students applying to terms after those listed above, please check back in the future for updates, as the Swanson School is still evaluating whether waiving the GRE will be permanent.

The degree of Master of Science in Electrical Engineering can be obtained by following either a research or a professional option. The research option includes a thesis while the professional option is 30 credits of course work. Students who intend to continue for a PhD degree are highly encouraged to take the research option.

Course selection for either the research or the professional degree options is to be done in consultation with the student's advisor according to the following requirements:

1. the course selection must include at least 15 graduate credits in ECE, and
2. courses outside ECE must come from the list of recommended courses (see section 6.2).

Courses that are required of students admitted on a provisional status are to be considered additional to these requirements. If the student chooses the research option, only 6 credits of ECE 2999 will count towards the degree requirement. Notice that credits in ECE 2997, research for the MS, and in ECE 3893, the graduate seminar, will not be considered towards the degree requirements.

Professional Option. A minimum of 30 credits of course work conforming to the requirements in section 3.1 is required. Although not required, a three credit graduate project course (ECE 2998) is highly recommended for students who might later choose to enter the PhD program. No comprehensive exam is required for students following the professional option.

Research Option. A minimum of 24 credits of course work is required. In addition, a thesis (with a minimum of six credits of ECE 2999, MS Thesis) must be completed and presented at an oral defense.

It should be emphasized that the above credit requirements for both options are the minimum acceptable and may not necessarily satisfy the degree requirements. In some instances it might be necessary for a student to take undergraduate courses to be accepted into full graduate status. Thus, depending upon the student's background and program, it may be necessary to take more than the minimum number of credits required.

Thesis Requirement. MS students taking the research option must prepare a thesis showing marked attainment in their area of investigation (see section 2.9). A graduate student begins thesis work after the fulfillment of the following conditions:

- Completing at least 12 credits,
- Being on full graduate status, and
- Achieving a cumulative QPA of 3.00 or higher.

Students in the research option must defend their theses orally. A committee consisting of three Electrical and Computer Engineering graduate faculty members and chaired by the student's major advisor is formed to evaluate the thesis and defense. Faculty members with a secondary appointment in Electrical and Computer Engineering may also chair such a committee. The student must provide this committee with copies of the thesis at least two weeks prior to the day of the oral exam. The names of the faculty on the committee, the time, the title and the abstract of the thesis should be submitted to the Graduate Program Administrator at least two weeks before the desired exam date in order to publish an announcement. The oral exam is open to the public. If the student is interested in pursuing a PhD, this exam may be combined with the PhD Preliminary Exam and the Program Conference.

Department of Industrial Engineering

Contact Information

Interim Department Chair: Lisa Maillart
Main Office: 1025 Benedum Hall
412-624-9830
Fax: 412-624-9831
E-mail: maillart@pitt.edu
<http://www.engineering.pitt.edu/industrial/>

Additional information concerning the department's graduate program may be obtained from the graduate secretary; please send email to gradie@pitt.edu.

Graduate Degree Programs

The Department of Industrial Engineering's graduate programs prepare engineers to assume leadership positions in industry, government, and service organizations. The Master of Science in Industrial Engineering program is very flexible, and students could either choose to focus on some specific area of interest or opt for a more broad-based curriculum with coursework spanning multiple areas. Narrower concentration areas in Data Science, Engineering Management and Safety Engineering are also available.

In addition, the department offers two options in cooperation with the Joseph M. Katz Graduate School of Business: a joint degree MSIE/MBA program and a joint degree MSIE/MSSCM (Master of Science in Supply Chain Management) program. The department also offers several other options with the Master's program, including (1) a Graduate Certificate in Safety Engineering, (2) opportunities for Lean Six Sigma Certification, (3) a Graduate Certificate in Healthcare Systems Engineering in cooperation with the School of Public Health, and (4) a Graduate Certificate in Nuclear Engineering in cooperation with the Department of Mechanical Engineering and Materials Science.

The Doctor of Philosophy degree is the department's flagship graduate program. Currently, the primary areas of research include all aspects of operations research, analytics, and data science; and manufacturing science and nontraditional manufacturing. Doctoral graduates are qualified for academic research careers as well as technical leadership positions in industry.

Admissions

Applicants must possess an undergraduate or graduate degree from an ABET-accredited program in any engineering discipline, or a degree in a complementary technical discipline, such as mathematics, statistics, or computer science. Outstanding applicants from other disciplines such as physics, chemistry, biology, economics, information systems and quantitative business will also be considered, as long as they have the required prerequisites of undergraduate calculus, linear algebra, and calculus-based probability and statistics. Proficiency in computer programming is also an asset.

Applicants for admission must submit the application form and fee, transcripts of all college-level work, three letters of recommendation, and a statement of career goals/objectives. Submission of scores from the Graduate Record Examination (GRE) is optional. International applicants whose first language is not English must take either the Test of English as a Foreign Language (TOEFL) administered by the Educational Testing Service with a minimum score of 550 (paper-based test)/213 (computer-based test)/80 (internet-based test), the International English Language Testing System (IELTS) exam with a minimum Band of 6.5 (taking the academic writing and reading modules of the test), or the Duolingo English Test with a minimum score of 105. It is desirable for PhD applicants to have an interview with a faculty member, although this is not a requirement for admission.

All applicants are considered on an ongoing basis. However, the following deadlines are strongly recommended for international applicants: Fall term - April 15, and Spring term - September 30. Also, all PhD applicants who wish to be considered for financial assistance must apply before January 31. International applicants are not accepted for enrollment beginning in a summer term. Prospective students are encouraged to apply early whenever possible.

Applications may also be completed online by going to <https://www.engineering.pitt.edu/departments/industrial/admissions/graduate-admissions/>.

Applicants to the MSIE-MBA and MSIE-MSSCM programs must apply through the Joseph M. Katz Graduate School of Business.

Financial Assistance

It is the department's policy to provide graduate teaching or research assistantships to as many PhD students as possible. However, these awards are limited in number and highly competitive, and are awarded on the basis of merit and departmental research/teaching requirements. Financial support comes from the department, not individual faculty, and is generally restricted only to students interested in pursuing a doctoral degree. All decisions on assistantships are made by the chair based upon the recommendations of the departmental graduate committee. Barring unforeseen circumstances, students who are awarded financial support will have their financial support continued as long as they maintain their level of academic excellence.

and make satisfactory progress toward their degree objectives. For full consideration, students must apply early for financial support and in no case later than January 31 for the fall term and July 31 for the spring term.

Certificate

Health Care Systems Engineering Certificate

The certificate in Health Care Systems Engineering is intended for individuals pursuing careers in health systems management and process engineering. Primarily designed for Master's degree students in the Department of Health Policy & Management and the Department of Industrial Engineering, this program provides a rigorous and multi-disciplinary education as a complement to the core curriculum of both programs. With a focus on enhancing innovation, effectiveness and efficiency in health care and public health, the Certificate's ultimate goal is to produce well-educated professionals and leaders in their disciplines. The HSE certificate is not a stand-alone option but is open to all Master's students in Industrial Engineering, and students must formally apply for this option. For IE graduate students, the MS degree in IE along with the HSE certificate requires a total of 37-38 credits. Students interested in the HSE certificate are strongly encouraged to map out their study plans immediately after enrolling in the department.

A recommended study plan for MSIE students who choose the HSE Certificate option is shown below.

Fall Year 1 (10 Credits)

- IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
- IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- IE 2106 - OPERATIONS IMPROVEMENT IN HEALTHCARE
- PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH
- IE 2110 - HEALTH SYSTEMS ENGINEERING SEMINAR

Spring Year 1 (12 Credits)

- IE 2001 - OPERATIONS RESEARCH
- IE 2102 - LEAN SIX SIGMA I (GREEN BELT)
- IE 2303 - WORK DESIGN
- IE 2108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS

Fall Year 2 (9 Credits)

- HPM 2207 - QUALITY ASSESSMENT AND PATIENT SAFETY
- HPM 2220 - COST EFFECTIVENESS ANALYSIS HEALTH CARE
- HPM 2217 - CLINICAL DECISION ANALYSIS
- HPM 2105 - INTRODUCTION TO THE US HEALTHCARE DELIVERY SYSTEM 1
- IE Core Elective¹ - 3 credits

Spring Year 2 (6-7 Credits)

- HPM Elective¹ - 2-3 credits
- HPM 2106 - HEALTH SYSTEMS LEADERSHIP AND PROFESSIONAL DEVELOPMENT 2
- IE 2998 - GRADUATE PROJECTS/PRACTICUM ²

Note

¹These electives can be switched around, or the last term could be reduced to just 3 credits if these elective credits are taken earlier in the program (e.g. during the fall or summer)

²Cannot be taken until the last term

Safety Engineering Certificate

The certificate in Safety Engineering program is intended for engineers seeking training in safety engineering to enhance their operational abilities or if they become newly assigned to positions that have higher levels of safety engineering responsibilities. It is also designed to enhance the capabilities of non-engineering based safety professionals seeking training in safety engineering, and affords the opportunity for engineers and other working professionals to maintain their certifications and licensure as safety professionals. A minimum of 15 credits are required to complete this certificate and the certificate may be obtained as a stand-alone program or in conjunction with the MS degree.

Required Courses (9 credits):

The following courses are required for this certificate:

- IE 2301 - INTRODUCTION TO SAFETY ENGINEERING
- IE 2302 - ENGINEERING FOR PROCESS SAFETY
- IE 2303 - WORK DESIGN

Electives (6 credits):

Students may select any two of the following courses (other courses may be chosen with prior approval from the Program Director):

- CEE 2201 - CONSTRUCTION COST ENGINEERING
- CEE 2202 - CONSTRUCTION SCHEDULING
- CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT
- CEE 2205 - CONSTRUCT FINANCE & COST CONTROL
- CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS
- CEE 2230 - BUILDING INFORMATION MODELING
- CEE 2347 - BRIDGE ENGINEERING
- CEE 2700 - TRAFFIC MGMNT AND OPERATIONS
- CEE 2710 - TRAFFIC CONTROL SYSTEMS
- CEE 2711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES
- CEE 2725 - PUBLIC TRANSPORTATION SYSTEMS
- CEE 2730 - HIGHWAY ENGINEERING
- CEE 2750 - PROJECT DEVELOPMENT AND IMPLEMENTATION
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2774 - ADVANCED POWER SYSTEMS ANALYSIS
- ECE 2777 - POWER SYSTEMS TRANSIENTS 1
- ECE 2250 - POWER ELECTRONICS
- ECE 2795 - SPECIAL TOPICS POWER - Protective Relaying and Automation
- ECE 2795 - SPECIAL TOPICS POWER - Renewable and Alternative Energy Systems
- ENGR 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING
- ENGR 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL
- ENGR 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY
- ENGR 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- ENGR 2110 - NUCLEAR MATERIALS

- ENGR 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- ENGR 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS
- ENGR 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS
- ENGR 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- ENGR 2130 - THE NUCLEAR FUEL CYCLE
- ENGR 2635 - MINE VENTILATION ENGINEERING
- ENGR 2638 - MINING HEALTH AND SAFETY
- ME 2045 - LINEAR CONTROL SYSTEMS
- ME 2053 - HEAT AND MASS TRANSFER

Doctoral

Industrial Engineering, PhD

This is the department's flagship graduate program and prepares the student for the rigorous demands of a career in research and development, or academia. It requires a strong background in mathematics, probability & statistics, optimization techniques and manufacturing. The PhD student is expected to be a full-time student. Although it is possible to seek candidacy as a part-time student, the PhD candidate must spend at least one academic year on campus full time. The graduate faculty typically works closely with individual doctoral students to create a flexible program tailored to individual needs.

Entrance to the PhD Program: To be admitted to the doctoral program, students must pass the PhD qualifying examination, which is typically given once a year in late April or early May. The examination allows the department to assess students' ability to conduct doctoral-level research by testing their academic preparation and creativity. Students are expected to take the examination in April/May of the calendar year following the one in which they entered the graduate program, although it is acceptable to take the examination earlier. The student must seek faculty approval to take this examination. For approval to take the exam, a student is expected to (i) have a very good academic record, (ii) have an eligible departmental faculty advocate, and (iii) show promise for doing independent research.

Currently, there are four components to the qualifying examination:

1. The student must have an overall GPA of at least 3.67 in the courses comprising the qualifying core.
2. The student must select two areas from: (1) Linear Optimization, (2) Stochastic Processes, (3) Statistics & Data Analysis, and (4) Manufacturing Systems, and pass two oral examinations (typically, 45 minutes to an hour each) conducted by a committee of two to four faculty members that cover the selected areas.
3. The student must satisfactorily participate in independent research with a faculty member (either by registering for 3 credits of research or as part of the student's research assistantship duties).
4. The student must read and review one or more research papers that will be assigned by an examination committee and then defend their critique before the committee.

The entire faculty then meets and discusses each candidate's performance along with the recommendations of the examination committees to decide on whether the student passes or not.

Doctoral Course and Dissertation Credit Requirements: In addition to the basic core courses, doctoral students take additional courses that may be required in preparation for the PhD degree and the student's dissertation topic. These courses are selected in conjunction with a program approved by the student's advisor. According to University regulations, the PhD requires at least 72 credits beyond the bachelor's degree or 42 credits beyond the master's degree, including 18 credits for dissertation research. Currently, the department requires a minimum of 45 credits in pedagogical coursework; credits typically include the following:

- Qualifying core (IE 2006, IE 2007, IE 2081, IE 2084, IE 2011): 12-15 credits
- Other required courses (IE 2100, IE 2088): 6 credits
- Additional course work (at least 6 credits of which must come from offerings outside the Department of Industrial Engineering): at least 24-27 credits
- Dissertation research (IE 3997 & IE 3999): at least 18 credits

Additional Doctoral Requirements: All full-time students must enroll in and attend IE 3095 (Graduate Seminar) each term they are in residence; the credits for these do not count toward the 72-credit requirement.

The comprehensive examination is taken by students typically after completing most of the course work in their concentration. The PhD comprehensive exam is combined with the dissertation proposal presentation and has a three-fold purpose: (1) to test the student's proficiency

(knowledge and skills) in his or her major area of interest; (2) to identify deficiencies in the student's background and suggest remedial work; and (3) to test the student's ability to prepare an acceptable dissertation in his or her area of concentration.

All doctoral students are expected to pursue research by working with individual faculty in areas that can lead to a potential doctoral dissertation. A PhD candidate must demonstrate the ability to conduct research of an original nature by completing a dissertation and preparing one or more papers of publishable quality. The dissertation topic is selected by the student in some theoretical or methodological area of interest in consultation with a faculty advisor. A faculty committee must approve the dissertation proposal before the student embarks on dissertation research. Information regarding the PhD program can be obtained by going to <https://www.engineering.pitt.edu/departments/industrial/graduate/doctoral-program/>.

Teaching Requirements for PhD Students: All PhD students should complete the following concentration in Scientific Communication, with two elements:

1. **Training program** requires the completion of the following:
 1. Attendance at a minimum of one teaching workshop run by the Pitt Center for Integrating Research, Teaching and Learning (PITT-CIRTL) and approved by the department; see <https://www.engineering.pitt.edu/cirtl>
 2. Attaining a score of at least four in the ELI English Comprehensibility Test for TAs
 3. ENGR 2050 - TECHNICAL WRITING or ENGR 2052 - INTRODUCTION TO TECHNICAL COMMUNICATION
2. **Mentorship-in-practice:** The goal of this requirement is to provide a mentored experience to the PhD students, regardless of their funding support, in classroom-based pedagogy. This requires one term as a TA and one term as an independent instructor. Satisfaction of this requirement, or any exceptions, must be approved by the graduate program director.

Joint Degree

Industrial Engineering/Business Administration, MSIE/MBA

This joint degree program, offered in conjunction with the Joseph M. Katz Graduate School of Business, positions individuals with an undergraduate degree in engineering or the hard sciences to take a management role in a company that has a significant engineering and/or technological focus. Full-time students can complete both degrees in 20 months, while part-time students can do so in four years. Prospective students must apply via the Joseph M. Katz Graduate School of Business to the joint program; students who are already in the MBA program are not permitted to enroll in the joint program.

A total of 25.5 credits from the Department of Industrial Engineering are required (12 credits in core classes, 12 credits in electives, and 1.5 credits in an integrated project).

In particular these credits are divided as follows:

- Required Core (2 courses: 6 credits)*
 - IE 2001 - OPERATIONS RESEARCH
 - IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- Elective Core: at least two of the following (2 courses: 6 credits)
 - IE 2003 - ENGINEERING MANAGEMENT
 - IE 2007 - STATISTICS AND DATA ANALYSIS
 - IE 2088 - DIGITAL SYSTEMS SIMULATION
 - IE 2100 - SUPPLY CHAIN ANALYSIS
 - IE 2303 - WORK DESIGN*
- Free Electives (4 courses: 12 credits)
 - Any elective offered by the IE Department (including courses in the elective core above)
- Integrated Project (1.5 credits)
 - IE 2998 - GRADUATE PROJECTS/PRACTICUM

*IE 2303 - WORK DESIGN is required for students without an undergraduate degree in IE

For details on the curriculum requirements for the MBA portion of the program, please visit Joseph M. Katz Graduate School of Business.

MBA Degree Requirements

In Fall 2022, modifications were approved for the MBA Degree Requirements. Students will have until Summer 2023 to complete old program curriculum requirements

The following core courses are required of all full-time MBA students:

Accelerated MBA, Signature MA, Part-Time MBA and Dual-Degree MBA/MS programs; MBA with Business Analytics students also complete the MBA Core Curriculum with additional credits required from business analytics curriculum. Joint-Degree MBA students also complete the MBA Core Curriculum, with some exceptions.

- BACC 2401 - FINANCIAL ACCOUNTING
- BECN 2401 - ECONOMIC ANALYSIS FOR MANAGERIAL DECISION: FIRMS AND MARKETS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- BQOM 2421 - DECISION TECH IN MFG & OPS MGT
- BFIN 2409 - FINANCIAL MANAGEMENT 1
- BMIS 2409 - INFORMATION SYSTEMS
- BMKT 2409 - MARKETING MANAGEMENT
- BSPP 2409 - STRATEGIC MANAGEMENT
- BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS
- BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM
- BIND 2454 - INTEGRATED MBA CAPSTONE

MBA Professional Courses

In addition to the MBA Core Curriculum, MBA students also complete "professional" coursework:

- Quant Methods for Business
- Programming for Business
- Business Communications

The content of these courses is designed to accelerate a students' academic and personal development as a business professional. The timing, delivery, and credit-load may vary by program (i.e. Accelerated v. Signature v. Part-Time MBA). Any credits earned count toward the minimum 45-credits required for the MBA degree.

- BIND 2404 - PROBABILITY & STATISTICS: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2406 - BUSINESS MATH: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BIND 2506 - TIME VALUE OF MONEY: FUNDAMENTALS OF MBA QUANTITATIVE METHODS
- BMIS 2402 - COMPUTATIONAL THINKING FOR BUSINESS LEADERS
- BOAH 2528 - ORGANIZATIONAL BEHAVIOR- COMMUNICATING STRATEGICALLY

Supply Chain Management and Industrial Engineering, MSSCM/MSIE

Program Requirements

This joint degree program, offered by the Industrial Engineering Department of the Swanson School of Engineering and the Joseph M. Katz Graduate School of Business, combines quantitative and analytical engineering coursework with coursework in business topics. It positions individuals with an undergraduate degree in engineering or the hard sciences to leverage their skills and become supply chain professionals who can work in a business environment. With a full load of classes, this program can be completed in 4 terms of coursework over a 20-month period and results in two degrees: the MSIE from Swanson and the MSSCM from Katz.

A total of 24 credits from the Department of Industrial Engineering (IE) are required, maintaining a 3.0 GPA:

- 12 credits in required classes, comprising the Department's 3-course, required core (IE 2001 - OPERATIONS RESEARCH, IE 2005 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, IE 2006 - INTRO TO MANUFACTURING SYSTEMS) plus IE 2100 - SUPPLY CHAIN ANALYSIS from the elective core.
- 12 credits in IE electives:

- At least 3 elective credits (i.e. one course) must come from the remaining four courses in the elective core: IE 2003 - ENGINEERING MANAGEMENT, IE 2007 - STATISTICS AND DATA ANALYSIS, IE 2088 - DIGITAL SYSTEMS SIMULATION and IE 2303 - WORK DESIGN (Note: students without an undergraduate degree in Industrial Engineering are required to take IE 2303 from the elective core).
- The 9 remaining elective credits can come from the elective core or any other graduate IE course.

A total of 24 credits from the Joseph M. Katz Graduate School of Business are required, maintaining a 3.0 GPA:

- 13.5 credits in required classes with a minimum requirement of a C grade or better.
- 10.5 credits in supply chain management electives. Must complete experience-based learning requirement through a 3-credit consulting field project course focused on supply chain management, a 3-credit global research practicum on supply chain management or complete an internship (with approval from faculty director).

For application instructions and details on the curriculum requirements for the MSSCM portion of the program, please visit the Joseph M. Katz Graduate School of Business website.

Master's

Industrial Engineering, MSIE

Requirements for the MSIE Degree

The Master of Science in Industrial Engineering program is very flexible and requires 30 credits of graduate study. It may be obtained with or without a thesis option. With either option, the student is required to take three core courses (IE 2001, IE 2005, and IE 2006) that count for 9 credits, and at least two courses from the elective core (currently IE 2003, IE 2007, IE 2088, IE 2100 and IE 2303) that count for an additional 6 credits. Students who do not have an undergraduate degree in Industrial Engineering are required to select IE 2303 from this elective core.

- With the non-thesis option, the remaining 15 credits may be freely chosen from the elective core or other departmental graduate courses based on the student's individual interests and the approval of his or her academic advisor. With the permission of the advisor, the student may also take up to 9 of the 15 credits from other relevant graduate offerings outside the department.
- With the thesis option, 9 of the 15 remaining credits may be freely chosen from the elective core or other departmental graduate offerings. In addition, the student must complete a 6 to 8-credit thesis. With this option, approved out-of-department electives could account for 3 of these 15 credits.

In both cases, students who have already taken one or more of the core courses as undergraduates or as part of another graduate program are encouraged to skip such courses and substitute them with more advanced course work in the same area.

Normally the program can be completed in three terms of full-time study or two to three years of part-time study. Many graduate courses are offered in the evening for the convenience of working professionals. Courses are also offered over the summer term. Information regarding the MS program can be obtained by going to: <http://www.engineering.pitt.edu/industrial/graduate/>

Department of Mechanical Engineering and Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science (MEMS) offers MS and PhD degrees in both areas, as well as an MS degree in Nuclear Engineering. In addition, the Department offers graduate certificates in Nuclear Engineering and Processing, Properties and Performance of Engineering Metals, which are open to all graduate students within the Swanson School of Engineering. These certificates are also available to qualified post-baccalaureate students who are not seeking to earn an MS degree.

Materials Science and Engineering

The Department of Mechanical Engineering and Materials Science offers broad-based educational and research programs in materials science and engineering leading to the degrees of Master of Science and Doctor of Philosophy in Materials Science and Engineering. These programs are oriented toward the application of fundamental knowledge of materials science and engineering to the solution of real-world materials problems that impede technological progress. They are designed to educate engineers by providing them with the tools to become successful in research, development, production, management, and teaching. The department also offers a dual degree Masters program with the Katz Graduate School of Business.

Basic courses on the structure, properties, and energetics of materials are taken in common. The student, working with faculty advisors, tailors the program to suit individual interests and demands of the student's chosen field of specialization through advanced and specialty courses.

The range of research projects in materials science and engineering reflects the broad spectrum of interest of the faculty. However, interest in the structure and properties of materials and their relationship to materials processing is a common thread that ties together many of the programs. Research is aimed at building an understanding of basic phenomena that will lead to solutions of materials problems at the forefront of technological and social progress.

Current research interests are centered in several areas of metals and ceramics, including corrosion and oxidation; high-temperature materials; materials for energy applications; additive manufacturing; metal-forming processes; phase transformations in metals and ceramics; intermetallic phases; plastic deformation of metals; surfaces and interfaces; thermomechanical processing of steels; ceramic processing and sintering science; electronic properties of ceramics; nanostructured materials; catalytic materials; thin film science and technology; and laser processing of materials.

Application Deadlines

January 15 - Fall semester admission

July 1 - Spring semester admission

February 1 - Summer semester admission

Master of Science Program

The Master of Science in Materials Science and Engineering degree (MSMSE) may be pursued as either a Professional MS Track program (for practicing engineers) or a Research MS Track program. Students can tailor their individual MS program to emphasize different aspects of materials science and engineering (e.g., ceramics, metallurgy, etc.).

Admissions

A bachelor's or master's degree holder applying to the program must have a quality point average (QPA) or cumulative grade point average (GPA) equal to or higher than 3.0 (B) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duo Lingo. The required minimum acceptable score for TOEFL is 80 for the Internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test.

In some cases, depending on previous background and QPA or cumulative GPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.0 (B) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

Doctor of Philosophy Program

The Doctor of Philosophy Program in Materials Science and Engineering is a research degree leading largely to careers in teaching and research in academia and industry. This program is designed for excellent students. As the studies progress, students develop an understanding at the highest level in their area of specialization that must lead to an original contribution to the field in the PhD dissertation.

Admissions

A bachelor's or master's degree holder applying to the program must have a QPA or cumulative equal to or higher than 3.3 (B+) or equivalent. Students who do not meet this requirement may be able to enter the program based on experience demonstrating their excellence, as evaluated by the Graduate Committee. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duo Lingo. The required minimum acceptable score for TOEFL is 80 for the Internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test.

In some cases, depending on previous background and QPA or cumulative GPA, students may be admitted initially on a provisional basis. This usually requires students to secure grades of 3.3 (B+) or better in courses that are required to obtain a better background in materials science and engineering and/or other graduate-level courses as deemed necessary by the Graduate Admissions Committee.

Processing, Properties, and Performance of Engineering Metals Certificate

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science.

Graduate Materials Science Courses

Six core courses (MSE 2003, MSE 2011, MSE 2013, MSE 2015, MSE 2030 and MSE 2067) are offered annually and other graduate courses are offered on a two-year rotation. A full list of MSE courses is available at the end of this catalog page.

Mechanical Engineering

The Department of Mechanical Engineering and Materials Science offers Doctor of Philosophy (PhD) and Master of Science (MS) degrees in mechanical engineering. Each graduate program student's plan of study is developed individually under the guidance of a faculty advisor and is carefully tailored to meet his or her needs and objectives while meeting the minimum requirements for the degree.

The graduate curriculum is an integrated program of study in applied sciences and mathematics, and modern computational methods that are pertinent to the research emphasis in the department. The research in the department is focused on seven major areas: (1) Advanced Manufacturing and Design; (2) Materials for Extreme Conditions; (3) Soft Matter Biomechanics; (4) Computational and Data-Enabled Engineering; (5) Cyber-Physical Systems and Security; (6) Nuclear and other Sustainable Energies; (7) Quantitative and In Situ Materials Characterization.

In addition to the MS and PhD degrees, the Department also offers a dual-degree program with the Katz Graduate School of Business.

Application Deadlines

January 15 - Fall semester admission

July 1 - Spring semester admission

February 1 - Summer semester admission

Master of Science Program

The Master of Science in Mechanical Engineering (MSME) degree may be pursued as either a Professional MS course-only program, suitable for most practicing engineers, or a thesis-based, Research-Track MS program that requires the completion of a thesis.

Admissions

A bachelor's degree in mechanical engineering, or a closely related field is required. Applicants must have a cumulative grade point average of 3.0 or higher on a scale of 4.0 from their undergraduate degree. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or Duolingo. The required minimum acceptable score for TOEFL is 80 for the internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test. GRE scores are not required, but applicants who have taken the GRE exam are welcome to submit their scores.

Applicants must include in their application official transcripts from each higher education institution attended, a minimum of two confidential reference letters and a statement of purpose and goals. Official academic credentials that are issued in a language other than English must be accompanied by a certified English translation.

Applicants who do not meet these requirements, but demonstrate academic excellence in other areas may be admitted initially on a provisional basis upon the recommendation of the Graduate Admission Committee.

Applicants are urged to visit the Department and the Swanson School of Engineering websites for further details.

Doctor of Philosophy Program

The goal of the Doctor of Philosophy in Mechanical Engineering program is to prepare the student for the rigorous career demands of engineering research either in the industry or academia. Students are expected to develop a commanding knowledge in their area of specialization that must culminate in the form of original contributions to the field of engineering and sciences in the PhD dissertation.

Admissions

A bachelor's degree in mechanical engineering, or a closely related field is required. Applicants must have cumulative grade point average of 3.3 or higher on a scale of 4.0 from their undergraduate degree. International applicants, who do not hold a Bachelor of Science or Master of Science degree from an accredited U.S. institution of higher education must demonstrate proficiency in English by submitting official test results from one of the following tests: TOEFL, IELTS, or DuoLingo. The required minimum acceptable score for TOEFL is 80 for the internet-based test, 213 on the computer-based test, or 550 on the paper-test; or Band 6.5 on the IELTS; or 105 on the Duolingo English Test. GRE scores are not required, but applicants who have taken the GRE exam are welcome to submit their scores.

Applicants must include in their application official transcripts from each higher education institution attended, the names of a minimum of two persons who can provide confidential reference letters, and a statement of purpose and goals. Official academic credentials that are issued in a language other than English must be accompanied by a certified English translation.

Applicants who do not meet these requirements, but demonstrate academic excellence in other areas may be admitted initially on a provisional basis upon the recommendation of the Graduate Admission Committee.

Applicants are urged to visit the Department and the Swanson School of Engineering websites for further details.

Financial Aid

Academic admission to the graduate program does not imply the granting of financial aid. The Department provides financial aid to exceptionally qualified students in the form of teaching and research assistantships, which includes a monthly stipend, tuition waiver and individual premium health insurance coverage. Financial aid is competitive. Students applying for the PhD programs are prioritized for financial aid considerations. An applicant interested in applying for financial aid should indicate so when completing the on-line application under Application Information. Financial

aid in the form of scholarships may be available to Master and PhD students through the Swanson School of Engineering. Applicants are urged to check the financial aid information on School's website.

The Nuclear Engineering Graduate Program

The Department of Mechanical and Materials Science offers graduate studies in advanced nuclear engineering. The graduate faculty is committed to high-quality research and teaching. The curriculum is an integrated program of study in applied sciences, applied mathematics, and modern computational procedures that are relevant to the research emphasis in the department. The research is focused on: (1) Nuclear Energy Technology (2) Nuclear Operations and Safety (3) Nuclear Materials (4) Nuclear Modeling and Simulations and (5) Radiology and Radiochemistry.

Degree Programs

An application for the MS program is judged on the student's prior academic record, the accreditation of the prior degree granting school, and the capability of the department to match the applicant's interest with the program. A foreign national student who did not receive his or her Bachelor of Science from an accredited U.S. institution is required to take the TOEFL exam and receive a score of at least 550 (213 for the computer-based exam / 79-80 internet-based exam) or the International English Language Testing System (IELTS) and receive a minimum result of Band 6.5. Students with a Bachelor of Science degree in another engineering field, mathematics, or physics will also be considered for the graduate program with the possibility that prerequisite courses may be required. A part-time program is available for students who are employed in local industries. Part-time students usually carry from three to six credits per term in either day or evening classes.

Applicants who do not meet these requirements will be considered on an individual basis with strong emphasis given to academic promise, career orientation, work experience, and preparation in engineering and related disciplines. In some cases, applicants may be admitted provisionally until certain deficiencies in either coursework or academic achievement are satisfied.

Nuclear Engineering Graduate Certificate

The Department of Mechanical Engineering and Materials Sciences is offering a certificate for students in the Swanson School of Engineering with an interest in nuclear science and technology. Students from the Bioengineering, Civil, Chemical, Industrial, Mechanical, Materials Science, and Electrical/Computer engineering programs may be most interested in obtaining this certificate.

Fifteen units are required to complete the certificate. This certificate may be combined with graduate courses in any one of the School's seven Master of Science (MS) degree programs or the certificate may be awarded stand-alone as a post-baccalaureate certificate. All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Those labeled NUCE/ME can also count toward an MS or PhD degree in Mechanical Engineering.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. This focus on nuclear operations and safety not only fulfills a recognized educational need, but is also designed to take advantage of unique industrial resources in the Pittsburgh area which will greatly facilitate student learning.

The renaissance of nuclear science and technology in the United States has created a need in the marketplace once again for engineers with nuclear knowledge. The University of Pittsburgh aims to meet these marketplace needs by preparing engineers through the graduate certificate in nuclear engineering. Classes are taught by current and former nuclear engineers, including faculty with experience conducting commercial nuclear operations programs for Westinghouse or the Beaver Valley Nuclear Station and with certificates or operation licenses from the US Nuclear Regulatory Commission.

Objectives

The objectives of the nuclear engineering certificate are:

- To develop the basic competencies needed by science and engineering graduates to contribute quickly and effectively to the renaissance of nuclear science and technology in the United States and abroad.
- To create a benchmark educational program that can serve as a model throughout academia.

Certificate

Nuclear Engineering Certificate

Graduate Certificate in Nuclear Engineering Overview

A key need in the nuclear technology marketplace is for engineers from diverse disciplines who possess knowledge of nuclear phenomenology and technology. The University of Pittsburgh meets these marketplace needs by preparing engineers through the graduate certificate in Nuclear Engineering. In Summer 2022, the Nuclear Engineering Certificate was approved to have a 100% online option. Students now have the option to complete the Nuclear Engineering Certificate fully online as one path to fulfill program requirements.

Objective

The objective of the nuclear engineering certificate is to provide the advanced competencies needed by science and engineering graduates to contribute quickly and effectively to nuclear science and technology in the United States and abroad.

This program provides coursework for graduate level nuclear engineering education with a focus on nuclear operations and safety. The certificate may be combined with graduate courses in any one of the seven MS degree programs (Bioengineering, Chemical, Civil, Electrical and Computer, Industrial, Materials Science and Mechanical Engineering) or taken as a post-baccalaureate certificate. The focus on nuclear operations and safety not only fulfills a recognized educational need, but also takes advantage of unique industrial resources in the Pittsburgh area which greatly facilitate student learning.

All nuclear courses (labeled NUCE) count toward a Nuclear Engineering certificate. Those labeled NUCE/ME can also count toward an MS or PhD degree in Mechanical Engineering.

Requirements

All students must successfully complete five of the nuclear courses listed below in order to earn the graduate certificate. Nuclear Engineering certificates are conferred only on those students who have completed all course requirements with at least a 3.00 GPA.

Contacts

If you have questions about the curriculum, please contact either the Director or Associate Director of the Nuclear Engineering program. Currently, these posts are occupied by Dr. Heng Ban (heng.ban@pitt.edu) and Dr. Tom Congedo (tvc9@pitt.edu), respectively.

If you have questions about registration, please contact the Graduate Administrator, Mr. Richard Mishler (rim76@pitt.edu or 412-624-9722).

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING (NUCE/ME)
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL (NUCE/ME)
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS
- NUCE 2110/MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
- NUCE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS (NUCE/ME)
- NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
- NUCE 2120 - MATHEMATICALL MODELING OF NUCLEAR PLANTS
- NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- NUCE 2130 - THE NUCLEAR FUEL CYCLE
- NUCE 2131 - SPECIAL TOPICS IN NUCLEAR ENGINEERING, METAL COOLED REACTORS
- NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY

Note:

Courses designated as "NUCE/ME" will also be recognized for credit toward an MS or PhD in Mechanical Engineering. These courses include NUCE/ME 2100, NUCE/ME 2102, and NUCE/ME 2115, described above.

Doctoral

Materials Science and Engineering, PhD

Requirements for the PhD Degree

A minimum of 72 credits is required for the PhD. Of the total of 72 credits required for the PhD degree a minimum of 36 credits must be coursework beyond the Bachelor of Science (BS) degree. PhD students must maintain a minimum QPA of 3.3 (B+) in this coursework. The coursework consists of (I) a materials core (six required courses students must take in the first year of enrollment), (II) a group of courses tailored for each student's research and as required technical broadening beyond the MSE focus, (III) courses to address mathematical/numerical skills, and (IV) PhD Research and Dissertation credits. The student's advisor must approve the course sequence selection.

The 18 credits core course component must be taken within the first year of the program. Typically, PhD students will carry a course load of three courses per term until their coursework is completed. If a student's background is insufficient for a given graduate course, the student must prepare by attending appropriate undergraduate courses or through independent study. This should be arranged in consultation with the student's faculty advisor and the lecturing faculty of the relevant course(s).

In addition to core courses, a student must take at least twelve (12) credits from advanced and technical elective courses in the MSE graduate program and relevant science and engineering disciplines. As a part of advanced and technical elective courses, a total of up to twelve (12) credits may be taken in relevant engineering disciplines outside of the MSE designation of graduate level courses and in relevant science disciplines outside of SSoE. The selection of courses, in general, must be acceptable to the student's advisor.

In addition to core and advanced/technical elective courses, the student is required to take three (3) credits from mathematics/numerical courses.

Minimum credit requirements include:

Core Courses (18 credits)

- MSE 2003 - STRUCTURE OF MATERIALS
- MSE 2011 - ENERGETICS
- MSE 2013 - KINETICS IN MATERIALS SCIENCE
- MSE 2015 - ELECTROMGNTC PROPS MATERIALS
- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Note:

A student must score at least a B (3.0) in each of these six classes. If a student does not get at least a letter grade of B, the class must be taken a second time. These classes must be successfully completed before the student can apply for admission to PhD Candidacy. If a student has a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the Program Director. In this case, one (1) more advanced/technical elective course must be substituted for MSE 2067 to complete the requirements for the PhD degree.

Advanced and Technical Elective Courses

A student must take advanced courses and technical elective courses. These are comprised of at least two courses (6 credits) selected by the student and his or her advisor as the best advanced preparation for research in the area of the dissertation, and two courses (6 credits), as a broadening experience, to complement the student's PhD specialization and contribute significantly to career preparation.

Mathematics Courses

A student must take one mathematics/numerical course for three (3) credits beyond those required for the materials science and engineering Bachelor of Science degree. This can be satisfied by many courses. This requirement may be waived if it was met in a previous graduate program which the student attended before entering MSE, PhD program.

PhD Research and Dissertation Credits

Each student must also have:

- At least six (6) credits of MSE 3997 (PhD Research);
- At least 12 credits of MSE 3999* (PhD Dissertation);

*Please note that registration for MSE 3999 is allowed only after the student has passed the Comprehensive Examination and defended the PhD Proposal, which qualifies the student for the status of PhD Candidacy.

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Note that completion of the PhD degree and admission PhD candidacy require a GPA of B+ or better (≥ 3.3).

Mechanical Engineering, PhD

The goal of the Doctor of Philosophy program in the Mechanical Engineering and Materials Science (MEMS) Department is to develop the student for the rigorous career demands of engineering research either in the industrial or academic fields. The student is educated at the pioneering edge of technical, management, systems design, and decision-making concepts. This work requires a strong background in mathematics and one of the specialty areas of mechanical engineering. The PhD student is expected to attend full time. It is possible, however, to seek candidacy as a part-time student with the stipulation that the PhD candidate must spend at least one full-time academic year on campus.

A graduate student who has completed eight courses of the master's program in good academic standing can go directly into the PhD program. An applicant who has received the Master of Science in mechanical engineering from a university with an Accreditation Board for Engineering and Technology (ABET)-accredited mechanical engineering curriculum, or who has substantially equivalent preparation, is eligible to enter the Doctor of Philosophy program in the MEMS Department.

If deficiencies in engineering preparation are noted, as in the case of science majors from accredited institutions, admission may be granted after the completion of such designated undergraduate courses as may best correct the deficiencies. Only those individuals whose preparation has been judged satisfactory for graduate study in the MEMS Department will be admitted to full graduate status.

Doctoral level courses are numbered in the 3000 series, but courses numbered in the 2000 series may also be appropriate for doctoral study. Courses numbered below 2000 do not meet the minimum requirements for doctoral study, although they may be taken to supplement a doctoral program. Students must maintain a minimum cumulative Quality Point Average (QPA) of 3.30 in courses to be eligible to take the preliminary and comprehensive examinations as well as to graduate. Students are urged to review the Graduate Handbook available on the department website for more information about the PhD program requirements.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Plan of Study

A minimum of 72 credits is required for the PhD degree. Of the total 72 credits, a minimum of 36 credits must be completed as coursework at the 2000 or higher levels beyond the Bachelor of Science (BS) degree. Students entering the PhD program with a master's degree in mechanical engineering or a closely related field are required to complete at least 12 graduate course credits. PhD students must maintain a minimum QPA of 3.3 (B+) in their coursework. Students can transfer up to 30 credits from an M.S. or equivalent degree, subject to approval by the graduate program committee. Students must take and pass the PhD preliminary (qualifying) exam at approximately the end of their first year. Students who fail the qualifying exam in their first attempt will have a second chance in the following semester. Students who fail the exam at both attempts cannot proceed with the PhD program and are terminated.

Each student must also have:

- At least six (6) credits of ME 3997 (PhD Research);
- At least 12 credits of ME 3999 (PhD Dissertation);

Please note that registration for ME 3999 is allowed only after the student has passed the Comprehensive Examination and defended the PhD Proposal, which qualifies the student for the status of PhD Candidacy.

The course requirements described in these guidelines are a minimum requirement. The minimum requirement of 72 credits of graduate work must be satisfied by combinations of research, course work and transfer credits for the award of a PhD degree. Students are allowed to take additional courses with the agreement of their advisors. In some cases, these courses may be suggested by the PhD Committee for better preparation for a given research area. Note that completion of the PhD degree and admission PhD candidacy require a QPA of B+ or better (≥ 3.3). Students are urged to review the Graduate Handbook available on the department webpage for details and additional requirements for coursework.

Total Credits: 72

Graduate Certificate

Processing, Properties, and Performance of Engineering Metals Certificate

The graduate-level Certificate in Processing, Properties, and Performance of Engineering Metals is designed primarily to meet the needs of working engineers who wish to pursue or enhance a particular aspect of materials science and engineering and of traditional graduate students in science and/or engineering who want to supplement their program with courses having a metals focus.

The academic requirements associated with the Certificate in Processing, Properties, and Performance of Engineering Metals include the completion of fifteen (15) credits of coursework within the Department of Mechanical Engineering and Materials Science as follows:

Required Courses

Students must complete the following two (2) courses:

- MSE 2030 - MECHANICAL BEHAVR OF MATERIALS
- MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Electives

Students may select three (3) of the following courses as electives:

- MSE 2045 - ADV FERUS PHYSICAL METALLURGY
- MSE 2046 - PHYSICAL METALLURGY ENGR ALLOYS
- MSE 2047 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE
- MSE 2055 - PRIN OF SOLIDIFICATION ENGRNG
- MSE 2088 - POWDER PROCESSING OF MATERIALS
- MSE 2090 - CORROSION AND FAILURE ANALYSIS

Note:

If students have a bachelor's degree in Materials Science and Engineering, MSE 2067 can be waived upon the permission of the Program Director. In this case, one (1) more elective course must be substituted for MSE 2067 to complete the requirements of the Certificate. All courses must be taken on campus.

Master's

Materials Science and Engineering - Professional Track, MSMSE

The professional MS track is primarily oriented toward part-time students currently working in industry.

MS Track Requirements

The professional track consists of a minimum of 30 course credits (equivalent to 10 courses). There are no thesis or comprehensive examination requirements for this degree. Up to nine (9) credits of coursework counting towards the 30 course credits requirement may consist of non-MSE courses in other Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six credits may be granted to a student as transfer credit for work done at another accredited graduate institution. At least 21 course credits must be obtained from MSE 2000 and 3000 courses, **not** including Graduate Seminar (MSE 3023 and 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). An independent graduate project (MSE 2998) can be conducted after consultation with the student's faculty advisor and may account for 3 of the 21 required MSE credits. Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). MS degrees are conferred only on those students who have completed all course requirements with at least a 3.00 (B) GPA.

Materials Science and Engineering - Research Track, MSMSE

The research track is primarily for full-time students who have the intention to pursue a PhD or are strongly oriented toward a research career. The University transcript will include an entry indicating that a student is in the research MS track.

Research MS Track Requirements

The Research Track MS degree requires a minimum of 30 credits of course and research based graduate study, including at least 24 course credits. At most up to nine (9) credits of coursework counting towards the required minimum of 24 course credits may consist of technical courses in other non-MSE Engineering, Science or Mathematics disciplines that are approved by a student's advisor. No more than six (6) credits may be granted toward completion of the requirements for the Research Track MS for work completed at another accredited graduate institution. A minimum of 15 course credits must be derived from 2000- and 3000-level MSE courses, not including credits associated with Graduate Seminar (MSE 3023 and MSE 3024), MS Research (MSE 2997), and MS Thesis (MSE 2999). Students with non-MSE backgrounds are strongly encouraged to take for credit introductory courses (e.g. MSE 2067 or equivalent). The student's advisor must approve the course sequence selection. In addition to coursework requirements a minimum of six (6) credits of MS Thesis (MSE 2999) are required. Master's degrees are conferred only on those students who have completed all courses required for the degree with an average grade of least a 3.00 (B) GPA.

MS Thesis

An MS student should initiate research work as early as possible. Once thesis preparation has begun, a student must register for thesis credits (MSE 2999) in each succeeding term until successful completion of the thesis and a final oral defense and comprehensive exam. The MS thesis document is at least expected to be a report on independently conducted research and must adhere to the School of Engineering defined style and format. A Style and Form Manual for a thesis is available in the Engineering Office of Administration.

The purpose of an MS thesis oral defense is to evaluate an MS thesis and the student's command of the research subject. The successful completion of a defense is a requirement for the MS degree. The thesis examining committee consists of at least three members of the MSE faculty who are recommended by the student's advisor and approved by the department chair. After successfully completing a defense, a student must deposit an electronic and/or hard copies of the approved thesis in accordance with the current guidelines for thesis submissions available from the Office of Administration of the School of Engineering or the MSE Program Office.

Part-time students may pursue the research MS track. However, they must recognize that, although their thesis topics may be related to the broad technical area of their employment, results of work-related routine technical activities, analysis, surveys, or studies conducted for employers are not acceptable for inclusion in MS theses. Furthermore, part-time students should become aware of the University Intellectual Property Ownership Policy before undertaking theses. Prospective students must clarify all of these issues before contemplating a research-based MS degree.

Mechanical Engineering - Professional Track, MSME

Master of Science - Professional Track

The Master of Science, Professional Track is designed for individuals seeking advanced study in mechanical engineering. The program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry.

During the first term in the program the student must submit a plan of study for approval by the department. This plan of study should be prepared under the guidance of the student's faculty advisor with the purpose of developing mastery of specified knowledge and skills in one or more of the following areas: (1) Dynamic Systems and Control; (2) Thermal and Fluid Sciences (3) Micro-nano Electromechanical Systems; (4) Advanced Manufacturing and Design; (5) Solid Mechanics and Materials; and (6) Computational and Data-Enabled Engineering.

Completion of the professional master's degree requires a total of 30 didactic letter-graded course credits. At least one of the courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or science departments with the approval of their faculty advisor.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Mechanical Engineering - Research Track, MSME

Master of Science - Research Track

The Master of Science, Research Track is designed for individuals seeking an in-depth research experience in mechanical engineering. Students will gain a deep understanding of their area of interest through an extended research project under the supervision of a major research advisor. This option is particularly appropriate for students interested in pursuing a PhD degree. Students working under the MS research track are required to pursue a thesis project and present a thesis that demonstrates marked attainment in some area of the student's major subject, as well as acquisition of the methods and techniques of scientific investigation.

During the first term in the program the student must submit a plan of study for approval by the department. This plan of study should be prepared under the guidance of the student's major advisor.

Completion of the MS degree requires at least 24 didactic letter-graded course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS). At least one of the didactic courses must be a mathematics course from the following list:

- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2646 - LINEAR SYSTEM THEORY or
- ECE 2646 - LINEAR SYSTEM THEORY

Students may take up to 9 graduate course credits from other engineering, mathematics, or physics departments with the approval of their faculty advisor. In addition, each full-time MS student is required to register for ME 2085 - GRADUATE SEMINAR during each fall and spring terms. Students must maintain a minimum cumulative QPA of 3.0.

The most current list of courses in the MEMS Department can be found at the bottom of the Department page.

Nuclear Engineering, MS

The Nuclear Engineering Graduate Program

The Department of Mechanical Engineering and Materials Science offers graduate studies in nuclear engineering. Broad areas covered in the curriculum include: (1) Nuclear Energy Technology, (2) Nuclear Operations and Safety, (3) Nuclear Materials, (4) Nuclear Modeling and Simulations, and (5) Radiochemistry and Radiation Measurement. In Summer 2022, the Nuclear Engineering, MS program was approved to have a 100% online option. Students now have the option to complete the Nuclear Engineering, MS program fully online as one path to the degree.

Master of Science Program

The degree requirements can be met by either of the two options described below. Upon entering, the student plans a program of study with the aid of a faculty advisor.

Thesis Option (Research M.S. Track)

The research MS track is primarily for those students focused on technology development. Further, full time graduate students who are supported by department scholarships must choose the research MS track. The thesis examining committee will consist of at least three members of the faculty recommended by a major advisor and approved by the MEMS Department Chair. The final oral examination in defense of the master's thesis is conducted by the thesis committee, and a report of this examination signed by all members of the committee must be filed in the Office of the Dean.

Requirements

Completion of the research MS degree in Nuclear Engineering requires at least 24 didactic course credits and at least six credits of thesis research (ME 2999 - M. S. THESIS).

The didactic courses must also include at least five of the nuclear engineering courses listed below (totaling at least 15 credits).

Students may take up to 9 graduate course credits (6 for MS/MBA students) from other engineering, mathematics, or physics departments, as approved by the Nuclear Engineering program directors. Students must maintain a minimum cumulative QPA of 3.0.

Non-Thesis Option (Professional M.S. Track)

The professional MS program is oriented toward full-time students seeking a career in industry, and part-time students currently working in industry. Full-time Grad Student Research-supported students might change to the Professional MS track, upon approval by the sponsoring faculty advisor and the graduate program.

The professional master's degree requires the completion of at least 30 course credits of graduate study approved by the Nuclear Engineering program directors, with at least a 3.00 GPA. No more than six credit hours may be granted as transfer credit for work done at another accredited graduate institution. All credits earned in the ME master's degree program must be at the graduate level (the 2000 or 3000 series courses).

Requirements:

To complete the requirement of 30 graduate credits for the Professional MS, students must complete:

At least five of the nuclear engineering courses listed below (totaling at least 15 credits)

Up to 9 graduate credits (6 for MS/MBA students) from courses offered in other engineering departments or in the mathematics or physics departments (totaling up to 9 credits) as approved by Nuclear Engineering program directors.

MS/MBA students are also required to complete an integrated project course. Please contact the Graduate Directors for a copy of the guidelines for the integrated project course.

Nuclear Engineering Graduate Courses

- NUCE 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING (NUCE/ME)
- NUCE 2101 - NUCLEAR CORE DYNAMICS
- NUCE 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL (NUCE/ME)
- NUCE 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE
- NUCE 2104 - NUCLEAR OPERATIONS AND SAFETY
- NUCE 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS

- NUCE 2110/MSE 2110 - NUCLEAR MATERIALS
- NUCE 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY
- NUCE 2113 - RADIATION DETECTION AND MEASUREMENT
- NUCE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS (NUCE/ME)
- NUCE 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY
- NUCE 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS
- NUCE 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER
- NUCE 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS
- NUCE 2130 - THE NUCLEAR FUEL CYCLE
- NUCE 2131 - SPECIAL TOPICS IN NUCLEAR ENGINEERING, METAL COOLED REACTORS
- NUCE 2132 - BOILING WATER REACTOR SYSTEMS AND SAFETY
- ME 2097 - SPECIAL STUDY MECHANICAL ENGRG (as agreed with Advisor)

Note:

Courses designated as "NUCE/ME" will also be recognized for credit toward an MS or PhD in Mechanical Engineering. These courses include NUCE/ME 2100, NUCE/ME 2102, and NUCE/ME 2115, described above.

Approved Math Courses

All graduate level courses offered through the Department of Mathematics will satisfy this requirement. Most applicable or commonly taken courses that fulfill the math requirement include:

- BIOENG 2001 - MATHEMATICAL METHODS IN BIOENGINEERING 1
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- CHE 2410 - MATHEMATICAL METHODS IN CHEMICAL ENGRG 1
- ECE 2671 - OPTIMIZATION METHODS
- ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
- ENGR 2300 - LINEAR ALGEBRA FOR MACHINE LEARNING
- ME 2001 - DIFFERENTIAL EQUATIONS
- ME 2002 - LINEAR AND COMPLEX ANALYSIS
- ME 2050 - THERMODYNAMICS
- STAT 2220 - APPLIED REGRESSION
- STAT 2661 - LINEAR MODELS THEORY 1

Approved Life Sciences Courses

- BIOENG 2520 - MOLECULAR CELL BIOLOGY
- BIOENG 2585 - QUANTITATIVE CELLULAR NEUROSCIENCE
- BIOENG 2586 - QUANTITATIVE SYSTEMS NEUROSCIENCE
- BIOENG 2731 / MSCMP 2730 - MOLECULAR MECHANISMS OF GROWTH & DIFFERENTIATION
- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2306 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION
- HRS 2307 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION
- HRS 2356 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1
- HRS 2771 - FUNCTIONAL ANATOMY AND KINESIOLOGY
- HRS 2772 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS
- HRS 2869 - ANATOMICAL BASIS SPORTS MEDICINE
- HRS 3898 - LAB TECHNIQUES SPORTS MEDICINE 1
- INTBP 2100 - BIOLOGY OF VISION

- MSBMS 2050 - HUMAN ANATOMY
- MSBMS 2210 - SYSTEMS NEUROPHYSIOLOGY
- MSCBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY
- MSCMP 2740 - MOLECULAR PATHOBIOLOGY
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY
- MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION
- MSIMM 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE
- MSMGDB 2525 - DEVELOPMENTAL MECHANISMS OF HUMAN DISEASE
- MSMPHL 3360 - MOLECULAR PHARMACOLOGY
- MSNBIO 2070 - HUMAN PHYSIOLOGY
- MSNBIO 2614 - NEUROPHARMACOLOGY
- NROSCI 2005 - COGNITIVE NEUROSCIENCE
- NROSCI 2011 - FUNCTIONAL NEUROANATOMY
- NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1
- NROSCI 2102 - SYSTEMS NEUROBIOLOGY
- NROSCI 2112 - NEUROBIOLOGY OF DISEASE

Approved Seminar Courses - Bioengineering PhD

Bioengineering students in the PhD program must complete 6 semesters of research seminar. Four of the six semesters must be BIOENG 2023 or BIOENG 2024, with one exception (see below). The other 2 credits may be from BIOENG 2023, BIOENG 2024 or any other seminar deemed appropriate by the Graduate Program Director. Commonly taken seminars to fulfill these 2 credits are listed below. Bioengineering student pursuing the thesis-based (research) MS degree must complete two semesters of research seminar. This course must be BIOENG 2023. In exceptional cases, students may enroll in BIOENG 2024 but must get prior approval from the Graduate Program Director.

Seminar series commonly taken by Bioengineering graduate students include:

- BIOENG 2023 - BIOENGINEERING SEMINAR SERIES
- BIOENG 2024 - BIOENGINEERING SEM FOR PROF MS
- BIOENG 2027 - GRAND ROUNDS SEMINAR
- BIOENG 2028 - BIOENGINEERING IN PSYCHIATRY SEMINAR
- BIOENG 3760 - REGENERATIVE MEDICINE RESEARCH SEMINAR
- ECE 3893 - GRADUATE SEMINAR
- NROSCI 2106 - NEUROSCIENCE SEMINAR SERIES

Exception: One of the 4 seminars can be replaced with a preparation for a STEM academic career course, provided the student completes a minimum of "Associate Level" certification in STEM Teaching. This program is offered through the University of Pittsburgh Center for Integrating Research, Teaching, and Learning (Pitt-CIRTL). Relevant courses include:

- ENGR 3001 - PREPARATION FOR THE STEM CLASSROOM
- ENGR 3002 - ADVANCED LEARNING THROUGH EVIDENCE-BASED STEM TEACHING
- ENGR 3004 - ADVANCED PREPARATION FOR FUTURE STEM FACULTY

Approved Statistics Courses

All graduate level courses offered through Statistics or Biostatistics departments will satisfy this requirement. Most applicable or commonly taken courses that fulfill the statistics requirement include:

- BIOENG 2525 - APPLIED BIOSTATISTICS
- BIOINF 2118 - STATISTICAL FOUNDATIONS OF BIOMEDICAL INFORMATICS
- BIOST 2039 - BIOSTATISTICAL METHODS
- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS
- BIOST 2049 - APPLIED REGRESSION ANALYSIS
- BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
- CLRES 2020 - BIOSTATISTICS
- PSY 2010 - STATISTICAL ANALYSIS 2
- STAT 2220 - APPLIED REGRESSION
- STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS
- CMU 36-759 - STATISTICAL MODELS OF THE BRAIN

Approved Track List

- Bioimaging and Signals Track
- Biomechanics Track
- Medical Product Engineering (MPE) - PhD Track
- Molecular, Cellular, and Systems Engineering (MCSE) Track
- Neural Engineering (NE) Track
- Tissue Engineering and Regenerative Medicine (TERM) Track

Biomechanics Track

This graduate track has a specific menu of courses to satisfy the 9-credit "Track Courses" requirement for the Research MS, PhD, DPT/PhD, or MD/PhD.

At the University of Pittsburgh there are broad and extensive research activities in Biomechanics. Application areas include cardiovascular, musculoskeletal, ergonomic, occupational, rehabilitation, and urological. Our educational goal is to expand on the fundamental knowledge gained at the undergraduate level of both biomechanics and the biological sciences, and demonstrate how they can be applied to solve basic and applied biomedical problems. We believe that biomechanics concentration students should be exposed to all areas of biomechanics, and not just their area of specialty. Further, since many areas of biomechanics share similar background material, our courses should present fundamental material first, followed by application examples to give the students a feel for "theory and application" in biomechanics. The fundamental philosophy of the approach is multi-scale, wherein Biomechanics is taught as a means to solve biomedical problems, regardless of problem scale (cell to whole body).

Due to the wide breadth of student interests, we offer the following two sub-tracks:

Sub-track I - Biosolid-fluid mechanics/Biological materials

Sub-track II - Biodynamics/Rehabilitation and Human Movement

Each sub-track has a set of three required courses (see below), as well as special options for a second/third life science courses that would be relevant to their area of interest.

Required courses for the biological materials and biofluids sub-track option:

1. BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS
2. BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
3. BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES

Required courses for the biodynamics/rehab sub-track option:

1. BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
2. BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
3. Choose one of the following options:
 1. BIOENG 2067 - MUSCULOSKELETAL BIOMECHANICS
 2. BIOENG 2370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

3. HRS 2867 - PATHOKIN ORTHOPADC/ATHL INJURIES
4. RT 2416 - WHEELCHAIR BIOMECHANICS
5. HRS 3898 - LAB TECHNIQUES SPORTS MEDICINE 1
6. HRS 3897 - LAB TECHNIQUES SPORTS MEDICINE 2

Life Science Requirement:

Students may satisfy their 6-credit life science course requirements for the PhD program with any of the courses from the BioE approved list of life science courses , or prior approval of courses not on the list.

Elective Requirement:

Students are required to fulfill 6 credits of elective courses for the PhD program. The list below provides recommendations categorized by areas of interest.

- Cardiovascular:

BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING

- Human Movement/Rehabilitation:

BIOENG 2635 - TRIBOLOGY: THE STUDY OF ADHESION, FRICTION, LUBRICATION AND WEAR

BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT

RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS

- Tissue Engineering/Biomaterials:

BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY

- Mechanical Engineering/Civil Engineering:

ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS

ME 2027 - ADVANCED DYNAMICS

ME 2045 - LINEAR CONTROL SYSTEMS

ME 2047 - FINITE ELEMENT ANALYSIS

ME 2062 - ORTHOPAEDIC ENGINEERING

ME 2074 - ADVANCED FLUID MECHANICS 1

ME (CMU) 759 - CELL MECHANICS

CEN (CMU) 12775-FINITE ELEMENTS IN MECHANICS

- Electrical Engineering/Information Science:

ECE 2646 - LINEAR SYSTEM THEORY

ECE 2671 - OPTIMIZATION METHODS

ECE 3650 - OPTIMAL CONTROL

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES

ECE 2523 - DIGITAL SIGNAL PROCESSING

ECE 3526 - MODERN SPECTRAL ESTIMATION

INFSCI 2350 - HUMAN FACTORS IN SYSTEMS

- CMU Robotics:

CMU ROBOTICS INSTITUTE 16-601 / 16-701 - MACHINE LEARNING

CMU ROBOTICS INSTITUTE 16-684 - ROBOTIC MANIPULATION

CMU ROBOTICS INSTITUTE 16-711 - KINEMATICS, DYNAMIC SYSTEMS AND CONTROL

CMU ROBOTICS INSTITUTE 16-720 - COMPUTER VISION

CMU ROBOTICS INSTITUTE 16-721 - ADVANCED PERCEPTION

CMU ROBOTICS INSTITUTE 16-722 - SENSING AND SENSORS

CMU ROBOTICS INSTITUTE 16-741 - MECHANICS OF MANIPULATION

CMU ROBOTICS INSTITUTE 16-811 - MATHEMATICAL FUNDAMENTALS FOR ROBOTICS

CMU ROBOTICS INSTITUTE 16-862 - INTRODUCTION TO MOBILE ROBOT PROGRAMMING

Bioimaging and Signals Track

The Bioimaging and Signals track is geared towards students with interests in any of the following areas:

1. Development and application of imaging devices;
2. Signal and image processing methods;
3. Biological/biomedical signal acquisition and analysis;
4. Computational modeling of biomedical signals and systems;
5. Biological/biomedical control systems; and/or
6. Biologically inspired signal and image processing.

This track may be particularly attractive to students with undergraduate degrees in bioengineering/biomedical engineering; electrical engineering; computer science and engineering; math; and/or physics, but it is open to all bioengineering graduate students.

Students who have not had "signals and systems" and/or "linear systems" courses at the undergraduate level, similar to BIOENG 1320 or MEMS 1014 offered at Pitt, may find that they lack the prerequisites for many of the track courses. Moreover, knowledge of the fundamentals of signals and systems provided in these courses will be required to pass the Preliminary Exam in the Bioimaging and Signals Track. Accordingly, students lacking this background are strongly encouraged to audit or take one of these three courses prior to taking the prelim exam in the late Spring of the first year. (Note that undergraduate courses do not fulfill graduate degree requirements.)

Students in the Bioimaging and Signals Track must complete 12 credits (4 different graduate level courses) in order to satisfy track requirements. At least one of these courses must be in the "bio-imaging" area, and at least one must be in the "signals and systems" area, as follows:

Signals and systems course requirements (choose at least one):

BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

ECE 2523 - DIGITAL SIGNAL PROCESSING

ECE 2646 - LINEAR SYSTEM THEORY

Bioimaging course requirements (choose at least one):

BIOENG 2330 - BIOMEDICAL IMAGING

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES

BIOENG 3195 - ADVANCED TOPICS IN BIOENGINEERING

CMU 16-725 - (BIO)MEDICAL IMAGE ANALYSIS

The remaining two track courses may be selected from the lists above, or from the list below of the variety of bioimaging and signals courses available through Pitt and CMU that fulfill track requirements. However, the list is by no means comprehensive, and students are free and encouraged to explore course offerings from other science and engineering departments, at Pitt and CMU, including Electrical and Computer Engineering; Computer Science; Physics; and Neuroscience. Coupled with one additional open elective, the track requirements provide flexibility for students, in consultation with their research mentor, to design an appropriate curriculum of graduate study to complement their research.

Possible courses for the 3rd and 4th required track courses:

Note: courses not listed here require pre-approval by the Track Coordinators in order to fulfill track requirements:

BIOENG 2005 - RADIOFREQUENCY MEDICAL DEVICES AND APPLICATIONS OF ELECTROMAGNETICS IN MEDICINE

BIOENG 2045 - COMPUTATIONAL CASE STUDIES IN BIOMEDICAL ENGINEERING

BIOENG 2330 - BIOMEDICAL IMAGING

BIOENG 2340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS

BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY

BIOENG 2390 - ARTIFICIAL INTELLIGENCE APPLICATIONS IN BIOENGINEERING

BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES

BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING

ECE 2195 - SPECIAL TOPICS: COMPUTERS

ECE 2372 - PATTERN RECOGNITION

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES

ECE 2523 - DIGITAL SIGNAL PROCESSING

ECE 2556 - NEURO-SIGNAL MODELING AND ANALYSIS

ECE 2646 - LINEAR SYSTEM THEORY

ECE 2671 - OPTIMIZATION METHODS

ECE 3374 - APPLICATIONS OF WAVELET TRANSFORMS

ECE 3526 - MODERN SPECTRAL ESTIMATION

ECE 3650 - OPTIMAL CONTROL

CMU 8-792 - ADVANCED DIGITAL SIGNAL PROCESSING

CMU 10-601 - MACHINE LEARNING

CMU 15-883 - COMPUTATIONAL MODELS OF NEURAL SYSTEMS

CMU 16-725 - (BIO)MEDICAL IMAGE ANALYSIS

CMU 18-660 - NUMERICAL METHODS FOR ENGINEERING DESIGN AND OPTIMIZATION

CMU 18-697 - STATISTICAL DISCOVERY AND LEARNING

CMU 18-781 - SPEECH RECOGNITION AND UNDERSTANDING

CMU 18-790 - WAVELETS AND MULTIREOLUTION TECHNIQUES

CMU 42-631 - NEURAL DATA ANALYSIS

CMU 42-632 - NEURAL SIGNAL PROCESSING

The "core" knowledge for first-year graduate students in the BioImaging & Signals track consists of a fundamental understanding of circuits, signals and systems that is commonly taught in the undergraduate curriculum in electrical, mechanical, or biomedical engineering. A partial listing of relevant topics includes, but is not limited to:

- Current-voltage relationships of common electric devices, such as resistors, capacitors and inductors, and/or their mechanical analogues (springs, masses and dashpots). Characteristics and solutions of 1st- and 2nd-order circuits / constant-coefficient differential equations.
- Linear, time-invariant (LTI) systems: properties (i.e. linearity, time-invariance, stability, causality); input-output relations; impulse response; step response; transfer function; frequency response; inverse systems; feedback (closed-loop control) systems; superposition theory
- Transforms: Fourier, Laplace.
- LTI filters: low-pass, high-pass, band-pass; time and frequency domain responses. Basic circuit configurations for RC, RL and RLC analog filters. Signal-to-noise ratio (SNR). Bode plots. Polezero plots.
- Discrete-time vs. continuous-time signals and systems: Sampling and aliasing, Shannon sampling theorem, Nyquist rate, Nyquist frequency; s-domain vs. z-domain representations; discrete Fourier vs. continuous Fourier.

In addition, graduate students are expected to have mastered the material covered in their first-year graduate courses.

Students should have a deeper understanding of those areas that are closely related to, or used in, their research; the more closely related to the student's research, the deeper the knowledge is expected to be. Finally, the student should have an understanding of those areas of his/her research that may fall outside of the core Track knowledge.

Molecular, Cellular, and Systems Engineering (MCSE) Track

Faculty research interests in the Molecular, Cellular and Systems Engineering track are quite broad including but not limited to fundamental understanding of cellular processes (example: cell migration, cell adhesion, cell cycle control) in physiology and pathology (example: cancer, sickle cell disease), stem cell engineering, tissue morphogenesis, vascular engineering, modeling of signal transduction and cardiac mechanics. Students in this track are expected to have core competency in either cell biology or physiology and biomedical imaging. The following curriculum enables the students in this track to meet the core competency criteria and expand their knowledge in bioengineering, computational biology and molecular regulation or deregulation of biological events in physiology and pathology. *Note that in addition to the following category of courses, students in his track will need to satisfy their general requirements in math, statistics, ethics, and electives as mandated by the graduate program.*

Life Science (6 credits): MCSE track students are required to take cellular and/or physiology coursework to fulfill this requirement.

- BIOENG 2520 - MOLECULAR CELL BIOLOGY
- BIOENG 2731 - MOLECULAR MECHANISMS OF TISSUE GROWTH AND DIFFERENTIATION
- MSBMS 2110 - ORGAN SYSTEMS PHYSIOLOGY
- MSNBIO 2070 - HUMAN PHYSIOLOGY

Track Courses (9 credits):

Course #1 - Category 1: Bioimaging

- BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY
- BIOENG 2505 - MULTI MODAL BIOMEDICAL IMAGING TECHNOLOGIES: FUNCTIONAL, MOLECULAR AND HYBRID IMAGING TECHNIQUES
- MSCBMP 2860 - MULTIPARAMETRIC MICROSCPC IMAGNG
- MSCBMP 2885 - IMAGING CELL BIOLOGY IN LIVING SYSTEMS

Course #2 - Category 2: Analytical / Engineering / Design Courses

- BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS
- BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING
- BIOENG 2810 - BIOMATERIALS & BIOCOPATIBILITY
- BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS
- ECE 2180 - COMPUTING AND BIOLOGY
- MSCBIO 2030/CMPBIO 2030 - INTRODUCTION TO COMPUTATIONAL STRUCTURAL BIOLOGY
- MSCMP 3780 - SYSTEMS APPROACH INFLAMMATION
- CMU 02-730 / MSCBIO 2041 / CMPBIO 2041 - CELLULAR AND SYSTEMS MODELING

Course #3 - Either one additional course from category 2 or one from the following list:

- BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING
- MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN
- MSCMP 3710 - CANCER BIOLOGY AND THERAPEUTICS
- MSCMP 3735 - EXTRACELLULAR MATRIX IN TISSUE BIOLOGY AND BIOENGINEERING
- MSCMP 3740 - STEM CELLS
- MSCMP 3750 - ANGIOGENESIS
- MSCMP 3770 - CELL THERAPY
- MSIMM 2210 - COMPREHENSIVE IMMUNOLOGY
- MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION

Tissue Engineering and Regenerative Medicine (TERM) Track

The PhD track in Tissue Engineering and Regenerative Medicine (TERM) prepares the students for a career in cutting edge research and development of cell- and biomaterial-based medical products. The MPE track introduces students to the use of cells, materials, biochemical and biomechanical factors in the development of functional substitutes that restore, maintain, or improve tissue or organ function. The students can expect to apply engineering principles to a diverse range of medical fields with the goal of solving critical clinical challenges.

Engineering Track Course - one of your required track courses must be taken from one of the courses below:

- BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
- BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING
- CMU 42-624 - BIOLOGICAL TRANSPORT AND DRUG DELIVERY

TERM track courses:

BIOENG 2016 - FUNDAMENTAL PRINCIPLES OF BIODEGRADABLE

BIOENG 2040 - TRANSPORT PHENOMENA FOR BIOMEDICAL AND CHEMICAL ENGINEERS

BIOENG 2230 - CARDIO ORGAN REPLACEMENT

BIOENG 2250 - CARDIO CLINICAL INTERNSHIPS (special permission is required)

BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING

BIOENG 2620 - INTRODUCTION TO TISSUE ENGINEERING

BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS

BIOENG 2671 - IMAGING IN REGENERATIVE MEDICINE

BIOENG 2810 - BIOMATERIALS & BIOCOPATIBILITY

BIOENG 2820 - SYNTHETIC BIOLOGY-ENGINEERING LIVING SYSTEMS

MSCMP 2730 - MOLEC MECHS TIS GROWTH & DIFFRN

MSCMP 3740 - STEM CELLS

MSCMP 3750 - ANGIOGENESIS

MSCBMP 2860 - MULTIPARAMETRIC MICROSCPC IMAGNG

CHE 2754 - PRINCIPLES OF POLYMER ENGINEERNG

CHEM 2600 - SYNTHESIS & CHARCTRZTN POLYMERS

Neural Engineering (NE) Track

Neural Engineering is an exciting new field, which applies engineering techniques to understand, repair, replace, enhance, or otherwise exploit the properties of neural systems. The neural engineering track is designed to prepare the students for the fundamental understanding of both neuroscience and engineering principles.

This graduate track has a specific menu of courses to satisfy the "Life Science" and "Track Courses" requirement for the PhD.

Life Science Requirements: neural track students are required to take one cellular level and one systems level neuroscience course to fulfill their life science requirement.

For molecular neuroscience, choose between 1) BIOENG 2585 (Quantitative Cellular Science 3 credits); and 2) NROSCI 2100 and NROSCI 2101 (Cellular and Molecular Neurobiology I and II, 8 credits); both are offered in the fall.

For systems neuroscience, choose between 1) BIOENG 2586 (Quantitative Systems Neuroscience, 3 credits) and 2) NROSCI 2102 (Systems Neurobiology, 6 credits); both are offered in the spring.

There are four different combinations of possibilities:

- BIOENG 2585 and BIOENG 2586, equaling 6 credits
- BIOENG 2585 and NROSCI 2102, equaling 9 credits
- NROSCI 2100, NROSCI 2101 and BIOENG 2586, equaling 11 credits
- NROSCI 2100, NROSCI 2101 and NROSCI 2102, equaling 14 credits

These courses are typically taken at the first year. Students without a biology background will need to take foundational biology courses (e.g., BIOENG 2520, fall) before taking any of the cellular and systems neuroscience courses. Students who have taken graduate-level equivalent neuroscience courses can petition to take other more advanced life science courses.

Track Courses Requirement: please select at least three track courses from the following courses:

- BIOENG 2540 - NEURAL BIOMATERIALS AND TISSUE ENGINEERING
- BIOENG 2615 - INTRODUCTION TO NEURAL ENGINEERING
- BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT
- BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
- BIOENG 2811 - MICROFABRICATION AND CHARACTERIZATION OF NEURAL INTERFACE DEVICES
- ECE 2195 - SPECIAL TOPICS: COMPUTERS
- ECE 2556 - NEURO-SIGNAL MODELING AND ANALYSIS
- ECE 2646 - LINEAR SYSTEM THEORY
- ECE 2680 - ADAPTIVE CONTROL
- ECE 3650 - OPTIMAL CONTROL
- NROSCI 2005 - COGNITIVE NEUROSCIENCE
- NROSCI 2011 - FUNCTIONAL NEUROANATOMY
- NROSCI 2012 - NEUROPHYSIOLOGY
- NROSCI 2039 - PROCESSING IN NEURAL CIRCUITS

- CMU 10-601 - MACHINE LEARNING
- CMU 15-883 - COMPUTATIONAL MODELS OF NEURAL SYSTEMS
- CMU 18-612 - NEURAL TECHNOLOGY: SENSING AND STIMULATION
- CMU 36-759 - COMPUTATIONAL NEUROSCIENCE METHODS
- CMU 42-631 - NEURAL DATA ANALYSIS
- CMU 42-632 - NEURAL SIGNAL PROCESSING

Elective Courses Requirement: a minimum of 6 credits are required in this category. By taking the track-specific life science courses, (total of 14, or 12 or 10 credits, depending on which option you take) the students in this track would satisfy the 6 life science credits with extra credits that can be counted as elective credits. Any additional graduate level courses approved by the advisor can be considered as electives.

Center for Neural Basis of Cognition (<http://www.cnbc.cmu.edu/>): the majority of NE track students are members of CNBC and participate in the CNBC graduate training program (<http://www.cnbc.cmu.edu/training/>). All three of the CNBC core courses can be considered track or elective courses. If you are in CNBC, you must satisfy both BIOENG and CNBC requirements before graduation.

For more information, please contact the Track Coordinator.

Medical Product Engineering (MPE) - PhD Track

The PhD track in Medical Product Engineering (MPE) emphasizes preparation for an industrial or academic career in medical product research and development. The MPE track introduces students to principles of engineering innovation targeted to the identification of and the solution to important challenges and unmet clinical needs in health care technology and delivery. The program of study emphasizes education in medical product design and development, the development of advanced engineering skills, and knowledge of cellular and systems level physiology pertinent to the healthcare field in which the student is doing research.

Life Science Requirements (6 credits)

MPE track students are required to take one cellular level physiology course and one systems level physiology course to satisfy their Life Science Requirement. These courses should be chosen based on a student's interest and upon prior approval from the track coordinator.

Track Courses Requirement (9 credits)

- BIOENG 2150 - MEDICAL PRODUCT IDEATION
- BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT

The third track course elective must be selected from the following list based on the student's interest and research:

- BIOENG 2265 - BIOMEDICAL FLUID MECHANICS
- BIOENG 2632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
- BIOENG 2633 - BIOMECHANICS 4: BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
- BIOENG 2230 - CARDIO ORGAN REPLACEMENT
- BIOENG 2330 - BIOMEDICAL IMAGING
- BIOENG 2515 - CARDIO SYSTEM DYNAMICS & MODELING
- BIOENG 3780 - HUMAN FACTORS OF AGING
- CHE 2301 - FUNDAMNTL TRANSPORT PROCESSES 1
- ECE 2523 - DIGITAL SIGNAL PROCESSING
- ECE 2654 - DIGITAL CONTROL SYSTEMS
- CMU 42-698C INTRODUCTION TO BIOMEDICAL SIGNAL PROCESSING
- CMU 42-624 BIOLOGICAL TRANSPORT AND DRUG DELIVERY

Electives (6 credits)

The elective requirement is met through two, not previously taken, courses that ideally align with the student's interests. A list of our popular and highly recommended courses is provided here:

- BIOENG 2165 - MEDICAL PRODUCT ENTREPRENEURSHIP
- BIOENG 2170 - CLINICAL BIOENGINEERING
- BIOENG 2171 - MEDICAL PRODUCT PROTOTYPING

- BIOENG 2230 - CARDIO ORGAN REPLACEMENT
- BIOENG 2810 - BIOMATERIALS & BIOCOMPATIBILITY
- BSEO 2531 - ENTREP & NEW VENTURE INITIATION
- BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
- ECE 2646 - LINEAR SYSTEM THEORY
- ENGR 2051 - PRODUCT REALIZATION
- ME 2045 - LINEAR CONTROL SYSTEMS
- IE 2003 - ENGINEERING MANAGEMENT
- IE 2006 - INTRO TO MANUFACTURING SYSTEMS
- IE 2012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS
- IE 2076 - TOTAL QUALITY MANAGEMENT

SOE Faculty

STEVEN D. ABRAMOWITCH, Associate Professor and William Kepler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh

MURAT AKCAKAYA, Assistant Professor, Electrical and Computer Engineering, PhD, Washington University

DAVID ANDERSON, Assistant Professor, Electrical and Computer Engineering, PhD, University of Rochester

HESSAM BABAEI, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Louisiana State University

ANNA C. BALAZS, Distinguished Professor and John A. Swanson Chair, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

HSEEN BALED, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

HENG BAN, R.K. Mellon Professor in Energy, Mechanical Engineering and Materials Science, PhD, University of Kentucky

IPSITA BANERJEE, Associate Professor, Chemical and Petroleum Engineering, PhD, Rutgers University

MASOUD BARATI, Assistant Professor, Electrical and Computer Engineering, PhD, Illinois Institute of Technology

MATTHEW BARRY, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

AARON P. BATISTA, Associate Professor, Bioengineering, PhD, California Institute of Technology

CARLA APARECIDA BAUMEL, Assistant Professor, Civil and Environmental Engineering, PhD, Northwestern University

TARYN BAYLES, Vice Chair for Education and Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

ERIC J. BECKMAN, George M. and Eva M. Bevier Chair Professor, Chemical and Petroleum Engineering, PhD, University of Massachusetts

MOSTAFA BEDEWY, Assistant Professor, Industrial Engineering, PhD, University of Michigan

KURT E. BESHORNER, Associate Professor, Bioengineering, PhD, University of Pittsburgh

MARY BESTERFIELD-SACRE, Associate Dean for Academic Affairs and Nickolas A. DeCecco Professor, Industrial Engineering, PhD, University of Pittsburgh

BOPAYA BIDANDA, Chair and Ernest E. Roth Professor, Industrial Engineering, PhD, Pennsylvania State University

HODA BIDKHORI, Assistant Professor, Industrial Engineering, PhD, Massachusetts Institute of Technology

MELISSA M. BILEC, Associate Professor and Roberta Luxbacher Faculty Fellow, Civil and Environmental Engineering, PhD, University of Pittsburgh

HARVEY S. BOROVETZ, Distinguished Professor, Bioengineering, PhD, Carnegie Mellon University

IONNIS BOURMPAKIS, Assistant Professor and Bicentennial Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of Crete

BRYAN N. BROWN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

DANIEL D. BUDNY, Associate Professor, Civil and Environmental Engineering; Director, Freshman Engineering Program, PhD, Michigan State University

ANDREW P. BUNGER, Associate Professor and R.K. Mellon Faculty Fellow, Civil and Environmental Engineering, Chemical and Petroleum Engineering, PhD, University of Minnesota

KAREN BURSIC, Associate Professor and Undergraduate Program Director, Industrial Engineering, PhD, University of Pittsburgh

LEONARD W. CASSON, Associate Professor, Civil and Environmental Engineering, PhD, University of Texas at Austin

RAKIE CHAM, Associate Professor, Bioengineering, PhD, University of Pittsburgh

JUN CHEN, Assistant Professor, Electrical and Computer Engineering, PhD, Chinese Academy of Sciences

APRIL CHAMBERS, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

KEVIN P. CHEN, Paul E. Lego Professor, Electrical and Computer Engineering, PhD, University of Toronto

MARKUS CHMIELUS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Technical University, Berlin, Germany

SUNG KWON CHO, Professor, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

YOUNGJAE CHUN, Associate Professor, Industrial Engineering, PhD, University of California, Los Angeles

MINKING CHYU, Associate Dean for International Initiatives; Leighton E. and Mary N. Orr Chair Professor, Mechanical Engineering and Materials Science, PhD, University of Minnesota

RENEE CLARK, Assistant Professor, Industrial Engineering, PhD, University of Pittsburgh

WILLIAM W. CLARK, Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

DANIEL G. COLE, Associate Professor, Mechanical Engineering and Materials Science, PhD, Virginia Polytechnic Institute and State University

XINYAN CUI, William Keppler Whiteford Professor, Bioengineering, PhD, University of Michigan

AHMED DALLAL, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

MONI KANCHAN DATTA, Assistant Professor, Bioengineering, PhD, Indian Institute of Technology, India

LANCE A. DAVIDSON, Professor and Wellington C. Carl Faculty Fellow, Bioengineering, PhD, University of California at Berkeley

RICHARD E. DEBSKI, Professor and William Keppler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh

SAMUEL J. DICKERSON, Assistant Professor and Director, Electrical and Computer Engineering, PhD, University of Pittsburgh

AMRO EL-JAROUDI, Associate Professor and Director, Electrical and Computer Engineering, PhD, Northeastern University

MAHMOUD EL NOKALI, Associate Professor, Electrical and Computer Engineering, PhD, McGill University

ROBERT M. ENICK, Bayer Professor and Vice Chair for Research, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

WILLIAM FEDERSPIEL, William Keppler Whiteford Professor, Graduate Coordinator, Bioengineering, PhD, University of Rochester

SUSAN FULLERTON, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Pennsylvania State University

GIOVANNI P. GALDI, Leighton E. and Mary N. Orr Professor, Mechanical Engineering and Materials Science, PhD, University of Naples, Italy

NEERAJ J. GANDHI, Professor, Bioengineering, PhD, University of California, San Francisco

JIN GAO, Assistant Professor, Bioengineering, PhD, Chinese Academy of Sciences

WEI GAO, Associate Professor, Electrical and Computer Engineering, PhD, Pennsylvania State University

CALIXTO I. GARCIA, Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

MARK J. GARTNER, Professor of Practice, Bioengineering, PhD, Carnegie Mellon University

ALAN D. GEORGE, Ruth E. and Howard T. Mickle Professor and Chair of Electrical and Computer Engineering, PhD, Florida State University

LEANNE GILBERTSON, Assistant Professor, Civil and Environmental Engineering, PhD, Yale University

PEYMAN GIVI, Distinguished Professor and James T. MacLeod Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

BRIAN M. GLEESON, Chair and Harry S. Tack Professor, Mechanical Engineering and Materials Science PhD, University of California at Los Angeles

ANDRES GOMEZ ESCOBAR, Assistant Professor, Industrial Engineering, PhD, University of California, Berkeley

BRANDON GRAINGER, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

KILICHAN GURLEYIK, Assistant Professor, Bioengineering, DSc, Washington University in St. Louis

SARAH HAIG, Assistant Professor, Civil and Environmental Engineering, PhD, University of Glasgow

JOEL M. HAIGHT, Professor, Industrial Engineering, PhD, Auburn University

KENT A. HARRIES, Professor and Bicentennial Board of Visitors Faculty Fellow, Civil and Environmental Engineering, PhD, McGill University

ALAN HIRSCHMAN, Professor, Bioengineering, PhD, Carnegie Mellon University

GERALD D. HOLDER, Distinguished Service Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

KATHERINE MARY HORNBOSTEL, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

JINGTONG HU, Assistant Professor, Electrical and Computer Engineering, PhD, University of Texas at Dallas

HENG HUANG, John A. Jerenko Professor, Electrical and Computer Engineering, PhD, Dartmouth College

TIN-KAN HUNG, Professor, Bioengineering, PhD, University of Iowa

ANTHONY T. IANNACCHIONE, Associate Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

TAMER S. IBRAHIM, Associate Professor, Bioengineering, PhD, The Ohio State University

STEVEN P. JACOBS, Professor, Electrical and Computer Engineering, DSc, Washington University

TEVIS D. B. JACOBS, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pennsylvania

DANIEL R. JIANG, Assistant Professor, Industrial Engineering, PhD, Princeton University

J. KARL JOHNSON, William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University

ALEX K. JONES, Professor and COE Undergraduate Program Director, Electrical and Computer Engineering, PhD, Northwestern University

BISTRA JORDANOVA, Assistant Professor, Bioengineering, PhD, Carnegie Mellon University

JOHN A. KEITH, Assistant Professor and R.K. Mellon Faculty Fellow, Chemical and Petroleum Engineering, PhD, California Institute of Technology

ROBERT JOHN KERESTES, Assistant Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

VIKAS KHANNA, Associate Professor, Civil and Environmental Engineering, PhD, The Ohio State University

LEV KHAZANOVICH, Anthony E. Gill Chair Professor and Civil and Environmental Engineering, PhD, University of Illinois

HONG KOO KIM, Bell of PA/Bell Atlantic Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

TAKASHI DANIEL YOSHIDA KOZAI, Assistant Professor, Bioengineering, PhD, University of Michigan

PRASHANT N. KUMTA, Edward R. Weidlein Chair Professor, Bioengineering, PhD, University of Arizona

ALEXIS KWASINSKI, Associate Professor and R.K. Mellon Faculty Fellow, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign

JUNG-KUN LEE, Professor and William Kepler Whiteford Faculty Fellow, Mechanical Engineering and Materials Science, PhD, Seoul National University, Korea

KEEWON LEE, Assistant Professor, Bioengineering, PhD, Mayo Clinic College of Medicine

SANGYEOP LEE, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

PAUL LEU, Associate Professor and B.P. America Faculty Fellow, Industrial Engineering, PhD, Stanford University

GUANGYONG LI, Associate Professor, Electrical and Computer Engineering, PhD, Michigan State University

LEI LI, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Michigan

XU LIANG, William Keppler Whiteford Professor, Civil and Environmental Engineering, PhD, University of Washington

JEEN-SHANG LIN, Associate Professor, Civil and Environmental Engineering, ScD, Massachusetts Institute of Technology

STEVEN LITTLE, Chair and William Kepler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

PATRICK J. LOUGHLIN, Professor, Bioengineering, PhD, University of Washington

NIATIKUN LOUIS LUANGKESORN, Assistant Professor, Industrial Engineering, PhD, Northwestern University

ARASH MAHBOOBIN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

SPANDAN MAITI, Assistant Professor, Bioengineering, PhD, University of Illinois, Urbana-Champaign

LISA M. MAILLART, Professor, Industrial Engineering, PhD, University of Michigan

SCOTT X. MAO, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, Tohoku University

ZHI-HONG MAO, Associate Professor and William Kepler Whiteford Faculty Fellow, Electrical and Computer Engineering, PhD, Massachusetts Institute of Technology

JAMES R. MARTIN, II, U.S. Steel Dean of Engineering, Swanson School of Engineering, Civil and Environmental Engineering, PhD, Virginia Tech

JOSEPH J. MCCARTHY, William Kepler Whiteford Professor and Vice Provost for Undergraduate Studies, PhD, Northwestern University

JAMES R. MCKONE, Assistant Professor, Chemical and Petroleum Engineering, PhD, California Institute of Technology

RAVI S. MEENAKSHISUNDARAM, William Kepler Whiteford Professor, Industrial Engineering, PhD, Purdue University

IRENE MENA, Assistant Professor and Director of the First Year Engineering Program, Mechanical Engineering and Materials Science, PhD, Purdue University

NATASA MISKOV-ZIVANOV, Assistant Professor, Electrical and Computer Engineering, PhD, Carnegie Mellon University

KARTIK MOHANRAM, Associate Professor, Electrical and Computer Engineering, PhD, University of Texas at Austin

BADIE I. MORSE, Professor, Chemical and Petroleum Engineering, PhD, ScD, Institut National Polytechnique de Lorraine-Ecole Nationale Supérieure des Industries Chimiques

JOHN MURPHY, Professor, Chemical and Petroleum Engineering, Duquesne University

SITTICHAJ NATESAKHAWAT, Assistant Professor, Chemical and Petroleum Engineering, PhD, The Ohio State University

IAN NETTLESHIP, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Leeds

TAGBO HERMAN ROLAND NIEPA, Assistant Professor, Chemical and Petroleum Engineering, PhD, Syracuse University

ROBERT S. PARKER, Robert V.D. Luft Professor and Vice Chair for Graduate Education, Chemical and Petroleum Engineering, PhD, University of Delaware

THOMAS PICCONE, Assistant Professor, Mechanical and Petroleum Engineering, PhD Massachusetts Institute of Technology

OLEG A. PROKOPYEV, Professor, Industrial Engineering, PhD, University of Florida

JAYANT RAJGOPAL, Professor and Graduate Program Director, Industrial Engineering, PhD, University of Iowa

MARK S. REDFERN, Vice Provost for Research and William Kepler Whiteford Professor, Swanson School of Engineering; Professor, Bioengineering, PhD, University of Michigan

GREGORY F. REED, Professor, Electrical and Computer Engineering, PhD, University of Pittsburgh

PIERVINCENZO RIZZO, Professor, Civil and Environmental Engineering, PhD, University of California at San Diego

ANNE M. ROBERTSON, William Kepler Whiteford Professor, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

JOAQUIN RODRIGUEZ, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

ABHIJIT ROY, Assistant Professor, Bioengineering, PhD, Indian Institute of Technology

PARTHA ROY, Associate Professor, Bioengineering, PhD, University of Texas, Southwestern Medical Center

WARREN RUDER, Assistant Professor, Bioengineering, PhD, Carnegie Mellon University

STEVEN G. SACHS, Assistant Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

JOSEPH T. SAMOSKY, Assistant Professor, Bioengineering, PhD, Massachusetts Institute of Technology

DAVID SANCHEZ, Assistant Professor, Civil and Environmental Engineering, PhD, University of Pittsburgh

WISSAM SAIDI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Ohio State University

SHERVIN SAMMAK, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

DAVID SCHMIDT, Associate Professor, Mechanical Engineering and Materials Science, PhD, Carnegie Mellon University

JOHN SEBASTIAN, Professor of Practice, Civil and Environmental Engineering, MBA, University of Pittsburgh

ERVIN SEJDIC, Associate Professor and Fulton C. Noss Faculty Fellow, Electrical and Computer Engineering, PhD, University of Western Ontario

INANC SENOCAK, Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Florida

JASON SHOEMAKER, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of California, Santa Barbara

SANJEEV G. SHROFF, Chair, Distinguished Professor and Gerald E. McGinnis Chair, Bioengineering, PhD, University of Pennsylvania

WILLIAM S. SLAUGHTER IV, Associate Professor and Undergraduate Director, Mechanical Engineering and Materials Science, PhD, Harvard University

PATRICK SMOLINSKI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Northwestern University

MAX STEPHENS, Assistant Professor, Civil and Environmental Engineering, PhD, University of Washington

GEORGE DEWITT STETTEN, Professor, Bioengineering, PhD, University of North Carolina

SUSHENG TAN, Associate Professor, Electrical and Computer Engineering, PhD, Chinese Academy of Sciences

ALBERT C. F. TO, Associate Professor and CNG Faculty Fellow, Mechanical Engineering and Materials Science, PhD, University of California at Berkeley

GELSY TORRES-OVIEDO, Assistant Professor, Bioengineering, PhD, Georgia Institute of Technology and Emory University

LUIS E. VALLEJO, Professor, Civil and Environmental Engineering, PhD, University of Wisconsin

JONATHAN VANDE GEEST, Professor, Bioengineering, PhD, University of Pittsburgh

JULIE M. VANDENBOSSCHE, Associate Professor, Civil and Environmental Engineering, PhD, University of Minnesota

SACHIN S. VELANKAR, Associate Professor, Chemical and Petroleum Engineering, PhD, University of Delaware

OLEG VELIKOKHATNYI, Assistant Professor, Bioengineering, PhD, Institute of Strength Physics and Materials Science of Russian Academy of Sciences

GÖTZ VESER, Nickolas A. DeCecco Professor, Chemical and Petroleum Engineering, PhD, Fritz-Haber-Institute of the Max-Planck-Society

NATASA VIDIC, Assistant Professor, Industrial Engineering, PhD, University of Pittsburgh

RADISAV D. VIDIC, Chair William Keppeler Whiteford Professor, Civil and Environmental Engineering, PhD, University of Cincinnati

JEFFREY S. VIPPERMAN, Professor and Vice Chair, Mechanical Engineering and Materials Science, PhD, Duke University

DAVID VORP, Associate Dean for Research, and John A. Swanson Professor, Bioengineering, PhD, University of Pittsburgh

GUOFENG WANG, Associate Professor, Mechanical Engineering and Materials Science, PhD, California Institute of Technology

QING-MING WANG, Professor and ME Graduate Director, Mechanical Engineering and Materials Science, PhD, Pennsylvania State University

DOUGLAS WEBER, Associate Professor, Bioengineering, PhD, Arizona State University

JUSTIN WEINBAUM, Assistant Professor, Bioengineering, PhD, Washington University in St. Louis

JOHN WHITEFOOT, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Michigan-Ann Arbor

JÖRG M. WIEZOREK, Professor, Mechanical Engineering and Materials Science, PhD, University of Cambridge

CHRISTOPHER E. WILMER, Assistant Professor, Chemical and Petroleum Engineering, PhD, Northwestern University

SYLVANUS N. WOSU, Associate Dean for Diversity Affairs; Associate Professor, Mechanical Engineering and Materials Science, PhD, University of Oklahoma

FENG XIONG, Assistant Professor, Electrical and Computer Engineering, PhD, University of Illinois at Urbana-Champaign

WEI XIONG, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Massachusetts Institute of Technology

JUDITH C. YANG, William Keppeler Whiteford Professor, Chemical and Petroleum Engineering, PhD, Cornell University

JUN YANG, William Keppeler Whiteford Professor, Electrical and Computer Engineering, PhD, University of Arizona

VICTOR YASHIN, Assistant Professor, Chemical and Petroleum Engineering, PhD, Moscow State University

BO ZENG, Assistant Professor, Industrial Engineering, PhD, Purdue University

MIN HEE YUN, Associate Professor, Electrical and Computer Engineering, PhD, Arizona State University

XIAYUN ZHAO, Assistant Professor, Mechanical Engineering and Materials Science, PhD, Georgia Institute of Technology

LIANG ZHAN, Assistant Professor, Electrical and Computer Engineering, PhD, University of California, Los Angeles

School of Health and Rehabilitation Sciences

Established in 1969 as a health sciences school of the University of Pittsburgh, SHRS stands on its solid reputation as an international leader in rehabilitation and disabilities education, research, and community service, improving the lives and independence of all people with a focus on people at risk for or having chronic conditions or disabilities and those who have traditionally been underserved and underrepresented.

Our Vision

To be a catalyst for a world free of barriers and disparities that allows all people, regardless of health, to have opportunities to participate in life to the fullest; to be accomplished through education, research and service.

Our Mission

To advance health, rehabilitation and reintegration service delivery through teaching, research and professional service.

We advance our Mission and pursue our Vision by:

- Providing an unparalleled environment for education and training
- Supporting an inter-professional approach to research to address challenges of people with acute and chronic conditions and disabilities
- Collaborating with local, national and international partners to address and improve integration of rehabilitation services in health care delivery systems, community engagement and models of care

Our Values

- **Advocacy** - for those less fortunate or with limited access seeking greater independence
- **Excellence** - in all endeavors and facets of our work
- **Inclusion** - in student enrollment and faculty and staff composition with a major focus on inclusion of people with disabilities
- **Innovation** - in teaching and educational curricula, research, technology, and product development
- **Integrity** - through uncompromising adherence to ethical principles, truthfulness, dignity and respect in all that we do
- **Service** - to all, including the disabilities community, in regard to rehabilitation and health services with a commitment to social responsibility

Philosophy of Graduate Education

The faculty of the School of Health and Rehabilitation Sciences (SHRS) believes that it has a major responsibility in graduate education to broaden the perspectives and awareness of students in the health professions toward high standards of scholarship and recognition of its relevance to technological and human needs.

Graduate programs provide depth in a substantial area of the student's profession and foster critical thinking through a variety of scholarly and creative activities thereby generating an atmosphere of scientific inquiry. These substantive areas include the knowledge of the scientific basis for the development of advanced clinical expertise within the professions represented in the School. An equally important function is to encourage health professionals to be sensitive to the needs of the human beings they are serving and to adapt their methods to the changing social, economic and technological environments in which they practice. Accordingly, these professionals should develop the capability to perform newly emerging and expanding roles of advanced clinical services, research, teaching and administration in the health care systems, advancing the frontiers of their particular field of expertise.

On the assumption that the accumulation and mastery of basic factual knowledge have been accomplished, graduate education focuses on synthesis and integration to allow for new systemic insights into the application and extension of that knowledge. The linkage of various educational experiences with research projects enhances problem-solving skills. Through interdisciplinary and multi-disciplinary didactic, clinical and research experiences, individual professional identity is fostered, while the ability to function both on an independent and collaborative level with colleagues from other disciplines is enhanced.

Programs and Certificates

Accelerated Programs

- Athletic Training Program (BS-MS)
- Dietitian Nutritionist Program (BS-MS)

Master's Programs

- Athletic Training (MS)
- Clinical Mental Health Counseling (MS)
- Health Informatics (MS)
- Master of Rehabilitation Technology (MRT)
- Musculoskeletal Physical Therapy (MS)
- Neuromuscular Physical Therapy (MS)
- Nutrition and Dietetics (MS)
- Occupational Therapy (MS)
- Physician Assistant Studies (MS)
- Physician Assistant Studies Hybrid (MS)
- Prosthetics & Orthotics (MS)
- Speech-Language Pathology (MA/MS)
- Sports Medicine (MS)
- Sports Science (MS)

Doctoral Programs

- Doctor of Audiology (AuD)
- Doctor of Clinical Science in Speech-Language Pathology (CScD)
- Doctor of Clinical Science in Occupational Therapy (CScD)
- Doctor of Occupational Therapy (OTD)
- Doctor of Physical Therapy (DPT)
- Doctor of Physical Therapy (DPT)/Doctor of Philosophy in Bioengineering (PhD)
- Communication Science (PhD)
- Rehabilitation Science (PhD)

Certificate Programs

- Advanced Practice Certificate in Implementation of Evidence in Clinical Practice
- Health Data Analytics
- Health Information Cybersecurity
- Leadership in Health Informatics
- Revenue Cycle Management

Admission

SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Each program at SHRS has specific admission requirements. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Application Procedures

Application portals vary by program. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Admission Status

Full Status: The student has been admitted into a SHRS degree program. To maintain full graduate status, the student must achieve a minimum cumulative GPA of 3.000 (based on 4.000) in his/her graduate study. Students whose cumulative GPA drops below a 3.000 while in the program will be placed on academic probation (please see the Academic Probation policy in this catalog).

Students enrolled in accelerated programs must maintain a 3.000 minimum GPA to progress from the undergraduate to graduate portion of their program.

Conditional Status: Individuals who are seeking advanced degrees but who are unable to meet the deadline for filing all required credentials for admission may be granted conditional admission at the discretion of the Program Director provided they present acceptable evidence concerning their qualifications for graduate study. Regular admission must be accomplished within the first term of registration.

Non-Degree Status: Applicants who do not wish to enroll in a degree program may apply for admission as non-degree students to take one or more courses of particular interest, if written permission is obtained from the course instructor. Non-degree students are permitted to take a total of six (6) credits. A non-degree student wishing to register for more than 6 credits must receive approval from the Department Chair/Program Director. Information concerning such requests should be directed first to the Director of Admissions, 4044 Forbes Tower, University of Pittsburgh, Pittsburgh, PA 15260 or via email at admissions@shrs.pitt.edu.

Reinstatement: Reinstatement is not automatic, nor does it necessarily reinstate the student to the academic status enjoyed prior to becoming inactive. Students must formally re-apply for admission and pay the application fee. If the requirements for successful completion of the specific graduate program in which the student was enrolled have changed during the period of non-enrollment, the re-admitted student may be required to meet the revised requirements of the program that are in effect at the time of readmission. This will be decided by the Department Chair of the student's particular program; for the doctoral program the decision will be made by the Associate Dean of Graduate Studies. Upon readmission, the student's Plan of Study will be adjusted to meet the requirements at the time of readmission.

Financial Information

Tuition and Fee Rates

Tuition and fee rates are available on the Financial Information page in the University Catalog and the tuition chart is on-line at Tuition Rates - Pennsylvania Residents, Tuition Rates - Out-of-State Residents .

Full Tuition

Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current graduate "flat" tuition rate for their academic center. Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

Summer Term

All students are billed on a per-credit basis. (except for the Doctor of Physical Therapy program)

Residency/Reduced Tuition

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates, available on-line at <http://payments.pitt.edu/pa-tuition-rate-eligibility>.

Additional Fees

Lab Fees: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

Financial Obligation of Students

The University of Pittsburgh has the right to withhold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

Scholarships, Grants and Financial Aid

If you are interested in applying for loans, scholarships, grants, or work study, you should call, or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT. The website for information is <https://oafa.pitt.edu/>

The website specifically for graduate students is: Graduate School Financial Aid Instructions.

SHRS Scholarships and Awards

General information on scholarship and awards can be found at: SHRS Financial Information Page. Information on merit, individual department and school wide scholarship and awards can be found at: Schoolwide Scholarships.

Contact individual departments for information on scholarships and awards specific to your area of study.

SHRS Academic Regulations

Minimum Academic Standard

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic standards:

- It is the student's responsibility to review her/his academic standing, to identify graduate program requirements and prerequisites for intended graduate program(s) and to monitor their completion.
- All required and prerequisite coursework must be taken for a grade, when letter grade option is available, unless approved by the Department Chair/Program Director.
- Students must receive a grade of C or better in all courses required by their program curriculum.
- Students who receive a grade below a C in a required course must repeat that course and attain a grade of C or better to graduate. (Note: University regulations state that a student may repeat any course in which a grade of B- or lower is received if an authorization to repeat the course is given by the student's adviser/faculty. If authorization to repeat the course is not given, the student may face dismissal from the program.)
- Students will not be permitted to register for a course until they attain a C or better in its prerequisites.
- Failure to receive an acceptable grade after the second opportunity to complete a required course may result in the student being dismissed from the program and SHRS.

Allowable Credits

Transfer Credits

The completion of requirements for advanced degrees must be satisfied through registration at the Oakland Campus of the University of Pittsburgh. Graduate students already enrolled may, when approved in advance by their Department Chair and the Dean, spend a term or more at another graduate institution to obtain training or experience not available at the University of Pittsburgh and transfer those credits toward the requirements for an advanced degree at the University of Pittsburgh. In such instances, neither the University nor any of its components are responsible for providing any financial assistance to the graduate student.

Transcripts certifying graduate courses completed at another institution prior to admission to the University of Pittsburgh should be submitted at the time of application and will be evaluated for acceptability as transfer credits early in the student's graduate career by the advisor and Department

Chair.

For Master of Arts and Master of Science degrees, no more than six (6) credits may be transferred. The Office of Student Services will enter the transfer credits on the student's transcript. Grades (and quality points) are not recorded for credits accepted by transfer.

For Professional Master no more than one-third of the total number of required credits may be granted to a student as transfer credit for work done at another accredited graduate institution.

For Doctor of Philosophy up to 30 credits taken at the graduate level (2000 & 3000 level courses) toward a master's degree may be transferred. In all cases, at least 36 credits must be completed as a PhD student at the University of Pittsburgh. No Undergraduate credits (1000 level course) may be applied towards the doctoral degree. All transfer credits must be submitted to and approved by the Associate Dean of Graduate Studies. Please note, credits transferred from another institution may not be used to substitute for credits of courses required in the degree study plan. For example, credits transferred for a statistics course taken at another institution will not count toward the 9 credits of statistics required in the PhD program here at the University of Pittsburgh. The student will still need to take 9 credits of statistics at the University of Pittsburgh.

Transfer credits will not be accepted for courses in which a grade lower than B (GPA = 3.000), or its equivalent, has been received. No credit is granted toward an advanced degree for work completed in extension courses, correspondence courses, or in the off-campus center or another institution unless those credits are approved for the equivalent graduate degrees at the institution, and provided that the institution has an accredited program.

Advising

Master and Clinical Doctorates

Master's students are assigned an advisor who must be a member of the SHRS faculty holding a regular, research, clinical, or adjunct appointment, and having at least a master's degree. The director of the program to which the student has been accepted selects advisors for SHRS graduate students. Students are notified of their advisor after their enrollment. It is the student's responsibility to contact the advisor to schedule an initial meeting.

Doctor of Philosophy

PhD students are assigned an academic advisor in the student's main area of specialization. The academic advisor and student will plan course work and other experiences to enable the student to meet program requirements and her/his academic goals.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a *Change of Advisor* form, located on the SHRS website under forms. The student must complete the form and secure the required signatures and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

More information on Advisor roles and responsibilities can be found in the SHRS Graduate Handbook.

Plan of Study

Every student in SHRS must have a Plan of Study, signed by academic/faculty advisor. Any revisions to the Plan of Study must be approved by the academic/faculty advisor or Department Chair.

To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study will be submitted to Student Services, by the department administrator in the graduating term.

Internships

Internships

Overview: An internship is a period of supervised, planned, practical experience providing an opportunity to apply previously learned skills or theories designed to complement the didactic phase of the academic program. The internship may be primarily clinical, teaching, or administrative in nature. Many programs require internship experiences, coordinated by the student's advisor or an identified Clinical Coordinator, who provides

oversight regarding internship objectives and activities, administrative and contractual relationships with the site, and ensures that students meet all SHRS and site criteria.

Clinical Internships

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.

Clinical Education

Clinical learning experiences are an integral part of SHRS professional programs. Clinical learning experiences provide the student with the opportunity to apply his/her knowledge in a supervised environment to develop clinical skills and judgment.

Independent Study - HRS 2999 or CSD 2990

Independent Study provides an opportunity for the student to complete an intense, self-designed project with faculty supervision in an area of special interest. A maximum of six (6) independent study credits may be accepted toward meeting degree requirements for the program.

More information on Internships, Clinical Education, Independent Studies can be found in the SHRS Graduate Handbook.

Thesis and Non-Thesis Options and Procedures

Thesis Option

A thesis is a written report of an investigative study conducted by the student during his/her graduate program. The completion of a thesis requires that the student has the necessary knowledge and skills to conduct a valid study and that the thesis project is the investigation of a research question appropriate to his or her focus of study. The thesis is usually a concluding experience in Master of Science programs and completed under the guidance of a research mentor.

Completion of a thesis may be required for specific graduate programs within SHRS. Students should refer to the specific program requirements to determine if a thesis is required for completion of his/her program. Thesis credits can be obtained in the following courses: HRS 2924, HRS 2925, and CSD 2000. Students should refer to his/her program requirements for specific guidelines for completing the thesis, the minimum number of thesis credits required, and for required courses.

Non-Thesis Option

Many SHRS graduate programs provide a non-thesis option as an alternative to completing a thesis. The non-thesis option is program-specific and reflects the culminating assignment to demonstrate the student's mastery of his/her area of study. Some programs require the student to complete the non-thesis option while others may give the student the opportunity to choose between completing a thesis or the non-thesis option. Students should refer to their home program/department for specific information on the non-thesis option.

Scholarly Paper

As part of the non-thesis option for a Master of Science degree, some programs/departments may require a scholarly paper. A scholarly paper is of publishable quality in a focused area.

Examples of scholarly papers include but are not limited to: substantial reviews of the literature on a particular topic, development of health care policies, or development of evidence-based treatment procedures. Students who complete this option must register for HRS 2926 Scholarly Paper for 1-6 credits depending on the requirements of his/her plan of study.

More information on Thesis and Non-Thesis options and Scholarly Paper can be found in the SHRS Graduate Handbook.

Comprehensive Examination

Comprehensive Examinations are required for many graduate programs in SHRS. Successful completion of the Comprehensive Examination is needed for the student to demonstrate mastery of his/her field of graduate study. Each individual department/program will specify the content and procedure for the scheduling, administration, and grading of the Comprehensive Examination. Please refer to individual program descriptions or handbooks for details of Comprehensive Examinations for each program.

Enrollment Status

Graduate students cannot enroll for more than (15) units without the dean's approval. Only an advisor or the University Registrar's Office can enroll you after you receive approval for the additional unit(s). Graduate students registered for 9 to 15 credits in the Fall and Spring Terms are regarded as full-time students. Students cannot enroll in courses that meet at the same time.

Active Status

Graduate students are required to register for at least 1 credit in the fall and spring terms. PhD students who have completed their course work and have successfully passed their dissertation proposal, must be enrolled in dissertation credits or FTDI (Full time Dissertation Study) in the fall and spring terms to maintain active status.

Inactive Status

A student who has not registered for at least 1 credit or for full-time dissertation study during a 12- month period will be transferred automatically to inactive status. Inactive students cannot apply to graduate or take Preliminary or Comprehensive Examinations. While on inactive status, a student is not eligible to use University facilities and should not expect to receive counseling by the faculty or active supervision by his/her advisor and committee.

More information on enrolling in courses can be found in the SHRS Graduate Handbook.

Monitored Withdrawal

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring.

Because summer sessions vary in length, students should check the University's [Academic Calendar](#) for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

The form must be signed by the instructor of the course and be returned to the Director of Student Services, Registrar, within the first nine weeks of the term in the fall and spring.

Late Withdrawal Procedure

Procedure for an Appeal for Late Withdrawal

- After the Monitored Withdrawal deadline has passed, students may appeal to withdraw from a course by submitting an Appeal for Late Withdrawal. Form can be found on the SHRS website, under current students/forms.
- All appeals for late withdrawal must be for non-academic reasons, i.e. medical or family emergencies. If you are trying to withdraw without extenuating circumstances, your appeal will be denied.
- Appeals must be submitted to the Dean's Office of the school offering the course, regardless of the student's home school.

Appeals for Late Withdrawal from SHRS courses should be submitted to the Registrar, Kellie Beach

- The appeal requires information on the class, including class number, catalog/course number, subject, and course title. This information can be found in your Student Center/PeopleSoft.
- The signature of the instructor-or an email from the instructor indicating the date of last attendance, grade earned, and acknowledgment of your withdrawal-is required. You must print and attach copies of the emails.
- Attach a typed statement explaining the extenuating circumstances which you feel merit consideration of withdrawal beyond the deadline. Please provide relevant documentation, such as certification from a doctor, hospital receipts, an obituary, etc.
- Please address the documentation and the letter to SHRS, Associate Dean for Graduate Studies, Dr. Kelley Fitzgerald
- Please include your PeopleSoft ID and your University of Pittsburgh e-mail address on each submitted document.

- Please sign and date each document.
- You will be notified of the Associate Dean's decision via your student email account.
- Appeals for late withdrawal must be submitted before the end of the 13th week of the semester. After the 13th week, students can only appeal to withdraw from the entire semester.
- If your request is approved and you accept the grade of "W" there is no tuition adjustment for withdrawing from the course.

Repetition of Courses

Consult your dean's office for the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again. University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

Graduate Students are only permitted to repeat a course once.

- Note: Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.
- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
- Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.
- Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

Masters

The purpose of the statute of limitations is to ensure that a graduate degree from the University of Pittsburgh represents mastery of current knowledge in the field of study. All requirements for MA and MS degrees must be completed within a period of four consecutive calendar years from the student's initial registration for graduate study; all professional masters within five years (includes both full time and part time students). Dual degrees and joint degrees that require course work in excess of 50 credit hours may be granted a longer statute of limitations by the University Council on Graduate Study.

PHD/Doctoral

From the student's initial registration for graduate study, all requirements for the PhD degree must be completed within a period of 10 years or within eight years if the student has received transfer credits. A student who is unable to complete all degree requirements within a five-year period after passing the comprehensive examination may be re-examined at the discretion of the department or school. Programs for professional doctoral degrees, for which the majority of candidates pursue part-time study while working full-time within their chosen disciplines, may be granted a longer statute of limitations by the schools offering the degrees.

Extension

Under exceptional circumstances, a candidate for an advanced degree may apply for an extension of the statute of limitations. The request must be approved by the department or departmental committee (master's or doctoral) and submitted to the Associate Dean of Graduate Studies for final action. Requests for an extension of the statute of limitations must be accompanied by a departmental assessment of the work required of the student to complete the degree as well as documented evidence of the extenuating circumstances leading to the requested extension.

Students who request an extension of the statute of limitations must demonstrate proper preparation for the completion of all current degree requirements.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may process a withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Leave of Absence

Under special conditions, graduate students may be granted one leave of absence. A maximum leave of two years may be granted to doctoral students or one year to master's students. All requests for a leave of absence need to be put in writing to the Associate Dean of Graduate Studies, using the SHRS request of Leave of Absence from a graduate Program.

SHRS Request of Leave of Absence from a Graduate Program

The length and rationale for the leave of absence must be approved by the Associate Dean. If approved, the time of the leave shall not count against the total time allowed for the degree (statute of limitations) being sought by the student.

To request of leave of absence, you must complete the "Request of Leave of Absence from a Graduate Program" form which can be found on the SHRS website under current students/forms. This form must be submitted to Student Services for approval.

Note: If the reason for your leave is medical in nature, a formal note from a Doctor must be included with this form.

Grading Policy

All SHRS graduate programs adhere to the University's grading system and grading policies for graduate students. Please refer to the Office of the University Registrar on Grades or the University Catalog on Grading and Records

SHRS Policy and Procedure for G and I Grades

SHRS (G) Grade Policy

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken.

Once the deadline has passed, the G grade will be changed automatically to a (NG) - No Grade. The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Action required by the student and faculty member for a "G" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of G Grade Credits Form (the form and the SHRS G grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

SHRS (I) Incomplete Grade Policy

The I grade indicates that the work of the course for which it is awarded has not been completed due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars. It is to be awarded only to students who have been doing the regular work of the course but who need more time than the term allows to complete the course work. That is, if extenuating circumstances ought to arise from the nature of the course work rather than from the student's personal difficulties (in which case a G grade is appropriate; see above).

All incomplete grades are expected to be completed by no later than the end of the next consecutive semester. It is the responsibility of the faculty member to clearly state to the student the expected due date.

- If the incomplete grade is given in the spring, it is expected to be completed by the end of the summer term in August.

Action required by the student and faculty member for a "I" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of Incomplete Credits Form (the form and the SHRS I grade Policy and instructions can be found on the SHRS website)
- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

- Failure to submit the paperwork and/or complete the work by the set forth deadlines, will lead to the grade being changed to a NC (no Credit) grade.

Student Services will be following up on any Incomplete grades that are not changed within the expected time frame at the end of every term.

Satisfactory/No Credit (S/NC) grading option

- Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a B or better.
- More information on Grading Policies can be found in the SHRS Graduate Handbook.

Academic Probation and Dismissal Policy

- Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and/or suspension and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.
- To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies.
- Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Graduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.
- Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.
- A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a Graduate degree from SHRS are as follows:

- Student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions
- Students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating
- Satisfactory completion of required credits
- Minimum cumulative GPA 3.000
- GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- Completion of all requirements for the program in which student has enrolled
- No outstanding D, F, G or I grade in a required course
- Updated and approved Plan of Study on file in Student Services.
- An application for graduation must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of these deadlines will be sent to students in the prior term.
- A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Credits Required

The number of credits required for the Master's degree varies among the departments within SHRS, but all departments require at least 30 credits. Many departments offer a variety of emphases. Individual departments should be contacted for the number of credits and Plan of Study specific to that department and focus.

SHRS Student Organizations

The SHRS Graduate and Professional Student Organization (SHRS GPSO) is a member of the Graduate and Professional Student Government (GPSG) of the University of Pittsburgh. All full- time and part-time graduate students of SHRS who have active status, as defined by the School, and who are in good standing, as defined by the University, are members of the SHRS GPSG. Further information on becoming active in this organization can be obtained by sending an email to: shrssab@shrs.pitt.edu.

Ombudsperson

The Ombudsperson assists students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department. The Ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The Ombudsperson directs students to further resources on campus as appropriate. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (Non-faculty) for students with whom they can engage in informal discussions.

The Ombudsperson for SHRS is Kellie Beach, Director of Student Services, and Registrar. She can be reached at kbeach@pitt.edu to make an appointment. More information on the role of an Ombudsperson for SHRS can be found on the SHRS website under the Orientation page.

SHRS Programs and Course Offerings

Department of Communication Science and Disorders (CSD)

Master of Arts and Master of Science Degrees in Communication Science and Disorders

The Communication Science and Disorders program provides students with a specialized academic education in communication processes and disorders, including disorders of speech, language, swallowing, hearing and balance. It includes the knowledge and skills needed to critically evaluate empirical research, and clinical expertise in the diagnosis and treatment of individuals having communicative disorders.

The master's degree program has two concentrations: one in speech-language pathology, and one in audiology. There is also an option for meeting educational certification requirements to be a speech-language pathologist in Pennsylvania schools. For students interested in the clinical practice degree in audiology, please see the section on the Doctor of Audiology (AuD) degree in this bulletin.

A research track (resulting in the Master of Science degree) in speech-language pathology is also available for students electing to do a master's thesis.

The Master's degree programs in speech-language pathology and the AuD program in audiology at the University of Pittsburgh are accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA), Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071. Website: <https://caa.asha.org/>.

Contact Information for Admissions

General Admission Requirements (CSD MA/MS) Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics or Chemistry), Behavioral Sciences (Sociology, Psychology), and Statistics (not research design). These requirements must be met before students enroll in the MA/MS program courses.

Students enrolling in the speech-language pathology program must complete at least 25 total hours of guided clinical observation to be eligible for clinical certification by CFCC. Prior to beginning the MA/MS SLP program courses students must complete a minimum of 15 of the total 25 observation hours.

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). International applicants who have earned an undergraduate or graduate degree in the United States do not need a transcript evaluation.

International applicants whose native language is not English must complete a test of English Language Proficiency (Duolingo, IELTS, or TOEFL) within 12 months of the due date of the application. Applicants from Quebec Province are required to submit English Language Proficiency scores; all other Canadian applicants are exempt from the English language proficiency requirement.

Your application for admission will not be reviewed until your credential evaluation and English Language Proficiency scores have been received.

Graduate students must have a 3.0 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.0 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with their advisor. To be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within their next two terms of study. Failure to do so may result in the student's immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Academic Standards

In addition to following the University-wide academic rules and regulations as detailed in the *General Academic Regulations* section of this bulletin, the master's degree program is regulated by the *SHRS Academic Standards*, as well as the departmental *Student Handbook on Academic and Clinical Requirements*.

Doctor of Clinical Science (CScD) Degree in Medical Speech-Language Pathology

The CScD is an advanced clinical doctorate recommended for the student or clinician seeking to employ state of the art clinical excellence and leadership as a speech-language pathologist in settings such as medical centers, private practices, educational settings, and academic institutions.

The primary objectives of the CScD program are to provide students with advanced academic course work, clinical skills, case-based learning experiences, leadership skills, and knowledge and skill in supervision. Graduates of this program will excel in their specialties and assume leadership roles. Graduates will be prepared for independent clinical practice in the medical setting and clinical faculty positions.

Students are expected to meet the eligibility requirements for application for both American Speech-Language-Hearing Association certification (Certificate of Clinical Competence CCC-SLP) and appropriate state licensure over the course of their studies. There is no dissertation project required for the CScD degree; however, students will demonstrate expertise in the critical analysis and application of scientific information.

Email: csdadmissions@shrs.pitt.edu
www.shrs.pitt.edu/csd

Admission Requirements

A SLP MS/MA is required in order to fulfill the clinical component of this program.

Once your application is complete, it will be forwarded to the CSD Department for review by the CScD Admissions Committee.

Applicants will be required to participate in interviews addressing content knowledge and discussions of the program.

The department has an application **deadline of January 15th** to begin the program the following fall term. All application materials must be received by the deadline. Rolling admissions means the department will review and admit qualified applicants until a class is full.

All applicants considering the CScD must email CSD admissions before starting the application process.

All applicants are advised to ensure that they meet the certification and licensing requirements before applying to the program.

Graduate students must have a 3.000 cumulative GPA to be eligible to graduate.

Graduate students who have completed at least 9 credits and whose cumulative GPA falls below a 3.000 will be placed on academic probation and will receive written notification of this status. At this point, it is the student's responsibility to meet with his or her adviser. In order to be removed from academic probation, the student will need to achieve a cumulative GPA of 3.000 within his or her next two terms of study. Failure to do so may subject the student to immediate dismissal from the program. Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or be dismissed from the program.

Doctor of Audiology (AuD) Degree

The primary objective of the AuD program is to provide students with the academic course work, clinical skills, and experience (beyond that obtained with the master's degree) needed to be a licensed audiologist, enter the professional community and assume independent leadership roles. The AuD is the required entry-level degree for audiologists. Graduates will be prepared for independent clinical practice and academic positions upon graduation and will be immediately eligible for professional licensure and for Certification from the American Speech-Language and Hearing Association and American Board of Audiology.

The Doctor of Audiology degree education program in audiology at the University of Pittsburgh is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA). Address: 2200 Research Boulevard #310, Rockville, MD 20850. Phone: 800-498-2071. Website: <https://caa.asha.org/>.

General Admission Requirements AuD Degree

- A baccalaureate degree from an accredited institution. Applicants who do NOT have a CSD major will need to satisfactorily complete the prerequisite coursework listed below.
- A minimum overall and prerequisite GPA of 3.0 is required. However, a GPA of 3.5 or higher is strongly recommended.
- A grade below C- in a CSD major or prerequisite course is not acceptable and must be repeated.
- Applicants who do not meet the minimum requirements for admission may be considered if strong evidence of their ability to complete a graduate program is provided.
- Ability to satisfactorily perform all of the technical standards required for this profession.
- Graduate Record Examination scores (GRE-general). The GRE **must be within the past 5 years**.

Prerequisite Coursework

Applicants should have a minimum of one 3-credit course in each of the following topic areas:

- Anatomy and Physiology of Speech and Hearing
- Language Development
- Speech and Hearing Science
- Transcription Phonetics
- Linguistics

ASHA Requirements

In order to be eligible for clinical certification by the American Speech-Language-Hearing Association (ASHA), you must meet the standards specified by the Council for Clinical Certification in Audiology and Speech-Language Pathology (CFCC). This includes satisfactory completion of at least one 3-credit course in each of the following areas prior to starting the graduate program: Biological Sciences (Human Biology, Anatomy & Physiology), Physical Sciences (Physics, Chemistry), Behavioral Sciences (Sociology, Psychology), Statistics (not research design).

Information for International Applicants

All international degrees will need a credential evaluation. We only accept a 4-year bachelor's degree or an international degree that is equivalent as determined by one of the following transcript evaluators: Educational Credential Evaluators Inc. or World Education Services (WES). The program's foreign transcript policies do not apply to study abroad coursework that is itemized on a US college or university transcript (study abroad is processed in the same way as US coursework). E-mail: csdadmissions@shrs.pitt.edu

Website: www.shrs.pitt.edu/aud/

The PhD program in Communication Science and Disorders is oriented toward the basic scientific questions in the discipline, with an emphasis on basic and applied research.

The expectations of graduating PhD students are that they are able to conduct a program of independent, creative, scholarly research, and that they can plan and execute effective teaching at all levels of pedagogy.

Admission Requirements

Applicants will apply online using the GradCAS application.

No one will be admitted to the CSD PhD program without a suitable advisor in their main area of specialization. Thus, anyone interested in PhD education is encouraged to contact individual faculty members whose research interests mesh most closely with theirs.

PhD applications are due by January 15th. Applicants will be interviewed by faculty members as part of the admissions process. A final admission decision depends on the availability of a suitable research adviser and a review and recommendation by the PhD Admissions Committee.

International applicants must provide English Language Proficiency scores (Duolingo, IELTS or TOEFL) and an academic credential evaluation from Educational Credential Evaluators Inc. or World Education Services (WES).

Submission of GRE scores to institution code 2927 is optional.

It is the responsibility of the applicant to complete all admission requirements prior to enrollment.

Financial Aid

Acceptance into the PhD program does not guarantee financial aid, but each admitted student is automatically put into a merit-based competition for available teaching assistantships, doctoral traineeships, and positions on research grants. Financial assistance is often available from a variety of sources, including teaching assistantships, PhD traineeships, and graduate research assistantships. Such appointments typically require 20 hours each week of teaching, research, and/or clinical service in exchange for a monthly stipend. A scholarship based on merit covers at least partial tuition remission, fees, and health insurance. The Department's Financial Aid Committee works with each admitted student's advisor to secure a funding opportunity that is rewarding both academically and financially. Prospective applicants who are interested in financial support should indicate this on their application for admission.

Doctoral

Communication Science and Disorders, PhD

Doctor of Philosophy in Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders (CSD) research doctoral program is oriented toward scientific inquiry in the discipline of communication science and disorders with an emphasis on basic and applied research training. Much of the CSD PhD program is individually tailored and designed to meet a variety of academic and professional goals.

Program Requirements

A minimum of 72 credits beyond the bachelor's degree level is needed for the PhD degree in communication science and disorders at the University of Pittsburgh. *For further detail on allowable credits, see Credit Requirements under Regulations Pertaining to Doctoral Study.*

All CSD PhD students are required to take CSD 3048 and a minimum of three additional departmental PhD seminars: one in speech/language/voice/swallowing, one in hearing, and one in the student's major area of study (hearing or speech/language/voice/swallowing).

CSD PhD students also take a minimum of 12 credits of coursework in statistics and experimental design, and 6 credits of PhD research practicum. In each semester, until they enter full-time dissertation status, PhD students are required to attend the departmental Proseminar (CSD 3060), to participate in professional development sessions, attend invited colloquium talks, and present their own research. Students also have the opportunity to take courses in teaching and grant preparation, and to complete teaching practica.

Four formal degree requirements must be satisfied before a student initiates PhD dissertation work:

1. No later than the second term of study, students, with the help of their major advisers, develop a proposed Plan of Study that specifies their background, goals, and tentative plans for their program of study. Students schedule a Plan of study meeting with a faculty committee, to review this document and their plans (see *Major Adviser and Advising Committees, below*).
2. Annually after the initial plan of study meeting, the student must convene an annual review meeting, in which their Plan of Study and progress will be reviewed.
3. The student must complete a pre-dissertation research project, culminating in a publishable manuscript resulting from a research practicum experience. This project must be completed prior to initiating the comprehensive examination.
4. The student must pass a comprehensive examination consisting of a substantive written deliverable and an open-ended oral examination. Students on provisional or special status, or on probation, are not eligible to take the comprehensive exam.

Students must then successfully complete both the written dissertation overview (prospectus document) and oral examination of their prospectus. After the prospectus is passed, students file an application for admission to candidacy for the Doctor of Philosophy degree. For details *see below and also Admission to Candidacy for the Doctor of Philosophy Degree in this bulletin for details.*

Major Advisor and Advising Committees

Students admitted to the PhD program are assigned a major adviser in their main area of specialization. The adviser is primarily responsible for providing assistance and advice to the student throughout all facets of the PhD program, and typically serves as the chair of the Plan of Study, Comprehensive Examination, and Dissertation Committees. Either PhD students or their advisers may initiate a change of adviser, but no student may remain in the program without an adviser.

The student, upon consultation with the major adviser, secures the agreement of at least two other departmental faculty members with graduate faculty status to serve with the adviser on the student's Plan of Study Committee. This committee initially convenes to review and make recommendations about the student's Plan of Study. Thereafter, the committee meets annually with the student to review and make recommendations about the student's progress in the PhD program. This committee, with or without changes in faculty membership, also administers and evaluates the student's comprehensive examination.

See Doctoral Committee under Regulations Pertaining to Doctoral Degrees for an overview of the dissertation committee's makeup and responsibilities.

Overview or Prospectus Meeting

See Overview or Prospectus Meeting under Regulations Pertaining to Doctoral Study for the regulations pertaining to this meeting and then read the following information that is specific to the PhD program in Communication Science and Disorders. After securing the adviser's approval, each PhD student must submit a written dissertation proposal to the Dissertation Committee at least two weeks prior to a formal overview meeting with that committee. *(See Dissertation and Abstract section for details on the characteristics of an appropriate dissertation.)*

Final Oral Examination

See Final Oral Examination under Regulations Pertaining to Doctoral Study and then note the following additional program-specific information. After securing the adviser's approval, the student submits copies of the complete document to the dissertation committee at least two weeks prior to the final oral examination in defense of the dissertation.

PhD Curriculum

For the CSD PhD degree, a minimum of 72 credits beyond the bachelor's degree is needed.

Required coursework includes: the departmental PhD Research Seminar (CSD 3048); a minimum of 3 additional PhD seminars: one in hearing/perception/sensation/balance, one in speech/language/voice/swallowing, and one more in the student's major area of study (hearing/perception/sensation/balance or speech/language/voice/swallowing); a minimum of 12 credits in research design and statistics; and attendance each fall and spring term at the weekly departmental Proseminar (CSD 3060). The proseminar includes student and faculty presentations, a colloquium series, and professional development sessions.

Otherwise, coursework and other experiences are individually tailored for each student, in consultation with the student's adviser and the adviser-chaired Plan of Study committee.

- CSD 3048 - INTRODUCTION TO PHD STUDIES
- CSD 3060 - PHD PROSEMINAR

Doctor of Audiology, AuD

Degree Requirements

Students with bachelor's degrees in communication science and disorders can complete the program in four years, while students with a master's degree in Audiology can complete the program in approximately two years. Students applying to the AuD program with a completed master's degree will be required to complete two years of study with a minimum of 30 credits (typically about 38 credits) to satisfy academic and clinical requirements for the degree. A review of successfully completed graduate coursework in the master's degree in CSD (focus in Audiology) will be conducted after being admitted to the AuD Program. Students applying to the AuD program with a completed bachelor's degree (major in CSD) will require four years of study with a minimum of 75 credits (typically about 100 credits) to satisfy academic and clinical requirements for the

degree. Students with a bachelor's degree without a CSD major will have to complete an additional year of post-baccalaureate study. Other requirements include the successful completion of two comprehensive examinations, a mentored research project, and a full-time clinical externship.

Comprehensive Examinations

Students in the AuD program are required to successfully complete two comprehensive examinations before the Doctor of Audiology degree can be awarded. The Comprehensive Exam I is a formative examination that will identify strengths and/or weaknesses in the student's knowledge base. An ad hoc committee of reviewers administers this comprehensive examination.

In addition, students pursuing the AuD are required to successfully complete Comprehensive Exam II. During this examination, the student will demonstrate an ability to apply theoretical knowledge to a real clinical case with which the student has been extensively involved during clinical training. Comprehensive Exam II will have both written and oral portions. The student will identify a case from the student's own clinical experience in which they have been primarily responsible for case management. This case will be thoroughly presented in conjunction with in-depth background information, including relevant clinical research on all aspects of the case. A panel of three reviewers will be constituted to evaluate each individual student's examination performance.

All audiology students in good academic standing are expected to pass their comprehensive examination(s). However, regardless of academic standing, failure to pass either of the above examinations within three examination cycles will result in the student's dismissal from the audiology program.

AuD Curriculum

- CSD 2021 - CLINICAL PROCEDURES LAB 1-1
- CSD 2022 - CLINICAL PROCEDURES LAB 2-2

Medical Speech-Language Pathology, CScD

The Clinical Doctorate in Speech-Language Pathology is being redesigned. While we are not currently accepting students into the program, announcements will be posted on our website when the new program is approved and open for applications.

Master's

Communication Science and Disorders - Audiology Concentration, MA/MS

Program Requirements

Clinical Practicum

Clinical practicum requirements are met through the Audiology Network and Outplacements clinical rotations. These experiences include varied settings such as hospitals, rehabilitation centers, specialty clinics, private practices, schools for the Deaf, and public schools.

Proseminar

All students must complete the proseminar requirement, which consists of attending a specified number of scientific and professional presentations that have relevance to communication science and disorders.

Comprehensive Exam for MA

All students in the Master of Arts program are required to pass an oral comprehensive examination in the spring of their second year. The comprehensive examination assesses students' ability to think critically, to communicate their thoughts in oral form, and to demonstrate their grasp of the major academic and clinical content provided in their graduate program. Requirements for passing the comprehensive examination are provided in the Academic Handbook.

Students seeking the Doctor of Audiology (AuD) degree must complete a second comprehensive examination which includes a written and oral component. Details about that comprehensive examination can be found in the section on the AuD degree.

Thesis Option for Master of Science (MS) degrees

Students pursuing the Master of Science degree in audiology must successfully complete a thesis project. Thesis students will have an examining committee of at least three University of Pittsburgh faculty members (including the research director, who serves as chair).

Additional requirements are outlined in the academic handbook, which is distributed to students at the beginning of their academic programs.

Concentration

This program is designed for those students who do not plan to provide clinical services, but would like to pursue a research track in audiology. Students pursuing the AuD degree (Clinical Doctorate) also may pursue a research track. The audiology concentration for the master's degree requires a minimum of 30 credits of coursework. All credits must be passed with a B grade or better in order to count towards graduation.

Audiology Curriculum
