University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to CS 07 Nondiscrimination, Equal Opportunity, and Affirmative Action Policy. For information on how to file a complaint under this policy, please refer to CS 07 Nondiscrimination and Anti-Harassment Procedure.

About the University of Pittsburgh

The University of Pittsburgh is an internationally respected center of learning and research, offering exceptional educational opportunities in the arts, sciences, and professions.

Mission

The University of Pittsburgh, founded in 1787, is one of the oldest institutions of higher education in the United States. As one of the nation's distinguished comprehensive universities, the resources of the University constitute an invaluable asset for the intellectual, economic, and social enrichment of Pennsylvania, while the international prestige of the University enhances the image of Pennsylvania throughout the world.

The University's mission is to:

- Provide high-quality undergraduate programs in the arts and sciences and professional fields, with emphasis upon those of special benefit to the citizens of Pennsylvania;
- Offer superior graduate programs in the arts and sciences and the professions that respond to the needs of Pennsylvania, as well as to the broader needs of the nation and the world;
- Engage in research, artistic, and scholarly activities that advance learning through the extension of the frontiers of knowledge and creative endeavor;
- Cooperate with industrial and governmental institutions to transfer knowledge in science, technology, and health care;
- Offer continuing education programs adapted to the personal enrichment, professional upgrading, and career advancement interests and needs of adult Pennsylvanians; and
- Make available to local communities and public agencies the expertise of the University in ways that are consistent with the primary teaching and research functions and contribute to social, intellectual, and economic development in the Commonwealth, the nation, and the world.

The trustees, faculty, staff, students, and administration of the University are dedicated to accomplishing this mission, to which they pledge their individual and collective efforts, determined that the University shall continue to be counted among the prominent institutions of higher education throughout the world.

History

The University began in the Pennsylvania wilderness as the Pittsburgh Academy in 1787, the year the U.S. Constitution was adopted. Thirty-two years later, the Pittsburgh Academy became the Western University of Pittsburgh, and in 1908, the school changed its name to the University of Pittsburgh. Graduate degrees have been conferred since 1836, and the first doctoral program was developed in 1884. A private institution for most of its past, the University of Pittsburgh became state-related in 1966, establishing a relationship with the Commonwealth of Pennsylvania that continues to benefit both partners. Today, as an elected member of the prestigious Association of American Universities, the University of Pittsburgh claims its place among the top public research universities in the nation.

Accreditation

The University of Pittsburgh is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104, (267) 284 - 5000. In addition, programs may be accredited by discipline-specific accrediting bodies. See Schools, Departments, and Programs section of this catalog for this information.

Academic Organization and Pittsburgh Campus Overview

As a state-related, coeducational institution, the University of Pittsburgh's Pittsburgh campus offers a multitude of degree-granting and other programs housed in 16 undergraduate, graduate, and professional schools. The University system includes the Pittsburgh campus and four regional campuses at Bradford, Greensburg, Johnstown, and Titusville.

There are more than 100 academic, research, and administrative buildings and residence halls located on the Pittsburgh campus, which covers 132 acres in the culturally rich Oakland neighborhood. At the heart of the campus stands a central landmark-the Cathedral of Learning, a 42-story Gothic tower, which is the tallest school building in the Western Hemisphere. The Cathedral contains the Nationality Rooms, 27 classrooms, each designed to reflect a distinct culture and providing an overall, multidimensional understanding of America's heritage.

At the Pittsburgh campus, over 4,900 faculty serve over 28,500 students, including 9,500 graduate and more than 19,000 undergraduate students. Alumni accomplishments range from managing Fortune 500 corporations, to writing best-selling novels, to unlocking the secrets of DNA ... and more.

Administrative Officers, Schools, and Campuses

Administrative Officers of the University of Pittsburgh

Douglas M. Browning, *Chairperson of the Board of Trustees*

Louis R. Cestello, *Vice Chairperson of the Board of Trustees*

Joan T.A. Gabel, *Chancellor and Chief Executive Officer*

Anantha Shekhar, *Senior Vice Chancellor for Health Sciences and
John and Gertrude Petersen Dean of the School of Medicine*

Geovette E. Washington, *Senior Vice Chancellor and Chief Legal Officer*

Narahari Sastry, *Senior Vice Chancellor and Chief Financial Officer*

David N. DeJong, *Senior Vice Chancellor for Business and Operations*

Rob A. Rutenbar, *Senior Vice Chancellor for Research*

Jeffer Choudhry, *Chief Investment Officer*

Rosalyn E. Jones, *Vice Chancellor and Secretary of the Board of Trustees*

Paul Lawrence, *Treasurer*

University of Pittsburgh Board of Trustees

The Board of Trustees is responsible for advancing the purposes of the University; promoting and protecting its independence, academic freedom, and integrity; and enhancing and preserving its assets for the benefit of future students and society at large. In addition, because the University of Pittsburgh is a state-related institution, the trustees ensure that Pitt meets its obligations both to the Commonwealth of Pennsylvania and to society generally.

General administrative, academic, and management authority is delegated to the chancellor. However, the board retains ultimate responsibility for all University affairs.

There are three or more regular meetings of the Board of Trustees each year, including an annual meeting. Special meetings also may be called. Much of the board's work is carried out by committees; many of these committees include faculty, staff, and students as non-voting representatives.

Douglas M. Browning, *Chairperson*

Academic Regulations

Advising

Academic advising is a key part of every undergraduate's experience at the University of Pittsburgh. An academic advisor helps a student determine the appropriate academic path to further the student's educational and career goals. To be a success, the advising process must work both ways: The advisor will be there to help when the student needs it, and the student must actively seek out an advisor for help. Before signing up for classes each term, students meet with their advisors. Though each school may have different advising requirements, students are generally required to meet with their advisors at least two times per term-for an advising appointment and a subsequent registration appointment. Consult with the individual school for school-specific advising services.

Allowable Credits (Credit and Course Limitations)

There are certain limitations on credits, other than those earned as part of regular undergraduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed below.

Advanced Standing Credits

Each school determines whether and under what circumstances the advanced standing credits listed below will be awarded toward a University of Pittsburgh degree or certificate offered by the school. Contact the individual schools for details.

Transfer Credit

The University will grant credit earned at other institutions based on course equivalencies, including expected learning outcomes, with those of the University curriculum and standards, subject to University policy and individual school requirements. The University will not refuse to consider a transfer credit based on the accreditation of the sending institution. Transfer credit is subject to University policy and individual school requirements.

Advanced Placement

Credits may be earned toward a University of Pittsburgh degree or certificate through standardized examinations such as the College-Level Examination Program (CLEP), Occupational Competency, Excelsior College Examination Program, and Advanced Placement (AP) Exams. In addition, some schools give credit for the International Baccalaureate Higher-Level Examinations. Students should contact their school to determine how credit may be granted based on completion of these examinations.

Credit by Examination

In some cases, students may earn credits toward a University of Pittsburgh degree or certificate by passing a course examination without registering for the course. Contact the individual department or school for information, as each sets its own policies as to the specific courses for which students may request credit by examination.

Career Development Courses

Noncredit, career development courses are not applicable to the bachelor's degree but may be included among the requirements for certain professional certificates.

Cooperative Programs

The University has established some arrangements with industries that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. These programs are administered by the Swanson School of Engineering and are available to any student with a science-related major. The experience normally starts in the sophomore or junior year. Students should contact their school or department to determine the maximum number of credits that may be earned toward their degree requirements through cooperative programs. Call 412-624-9826 for more information.

Duplication of Course Content

Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit.

Directed Reading and Research, Independent Study, Internships

Some schools offer individually designed study other than regular courses. Students are limited by the individual schools as to how many such independent study, directed reading, directed research, and internship credits can be counted among the required credits for the degree. Requirements and procedures may also differ. Contact school for details.

Directed Reading

The student undertakes a specified course of study comparable to a regular course under the direct supervision of a faculty member.

Directed Research

The student pursues a defined research project on campus under the guidance of a faculty member.

Independent Study

Independent study involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off campus with less immediate direction by the sponsoring faculty member.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

English Language Institute Courses

Credit for certain English Language Institute courses may be applied toward the undergraduate degree. See school for details.

Enrollment in Graduate Courses

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load.

Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Reserve Officer Training Corps (ROTC) Credits

Students may elect to participate in either the Air Force ROTC or Army ROTC Programs at the University of Pittsburgh or the Navy ROTC Program at Carnegie Mellon University. Contact individual schools to determine which credits earned in ROTC courses may be applied toward a degree. (For more information on ROTC, see the Special Academic Opportunities section of this catalog.)

Registration

For additional registration information, visit the University registrar's Web site at www.registrar.pitt.edu

Full-Time and Part-Time Study

Full-time study is defined as enrollment for 12 to 18 credits per term, and part-time study is defined as enrollment for one to 11 credits per term. Students are charged a flat tuition rate for full-time study in the fall and spring terms. For part-time students, tuition payment is on a per-credit basis. Students may exceed the 18-credit limit with written permission from the dean of their school, but they will be billed on a per-credit basis for each additional credit. University fees and other applicable charges are assessed on student statements. Some schools within the University may also apply academic limitations on the number of credits for which a student is permitted to enroll each term. For instance, students in Arts and Sciences must get permission to enroll for more than 18 credits. During the summer term and summer sessions, most students are billed on a per-credit basis regardless of the number of credits taken.

Registering for Classes

After students are admitted to a school they will be assigned an academic advisor. All Undergraduate students must meet with their academic advisor each term prior to enrolling in classes. Most students have the ability to use the self-service enrollment tools available through the Student Portal or Pitt PS Mobile.

Continuing students with the ability to utilize self-service enrollment will be assigned an enrollment appointment during the first two weeks of the enrollment period. Students in programs that do not permit self-service enrollment should contact their academic advisor regarding the enrollment process for their program. The enrollment period for a term or session is published in the University's *Academic Calendar*.

Once students have enrolled they may view their class schedules online via the Student Portal or Pitt PS Mobile.

In 2021, The University established a COVID-19 Vaccination Policy. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_29.pdf.

Adding and Dropping Courses

Students may add or drop courses from the start of their enrollment appointment until the end of the add/drop period. The dates for the add/drop periods are published in the University's *Academic Calendar*. Students are encouraged to consult their academic advisors regarding the impact of course changes on their academic career. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course and Resigning from the University.

Extended Drop Period

Under special circumstances, undergraduate students may be eligible to drop a course in the third week of the fall or spring semester, effective with the Spring 2018 semester. Students must meet all of the following criteria to drop a course during the extended drop period:

- Undergraduate students at all campuses

- Undergraduate courses
- Fall and spring semesters
- Students must remain in full-time status after dropping the course(s).
- The student's advisor must provide permission to drop.

Students must review the proposed drop with their academic advisor. If the student's advisor finds that the student is eligible, the advisor will process the drop(s). If the student's advisor cannot process the drop for any reason, then the advisor will request that the Registrar's Office at the student's campus process it.

Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 12 credits as an undergraduate) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit pche-pa.org/.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the University's *Academic Calendar* for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and athletic eligibility.

Resigning from the University/Termination of Registration

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript for each course in the term of resignation. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point in time of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Grading and Records

For additional grading and records information, visit the University Registrar's Web site at www.registrar.pitt.edu.

GPA

The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. Undergraduates must have a 2.00 GPA in order to graduate from the University of Pittsburgh. The value is the average of total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

Grading System

The University of Pittsburgh has a standard letter grade system (see Letter Grade Option). Some additional grading options are available in some courses as determined by the school and the instructor (see Grading Options below). Finally, undergraduate students may choose to audit a course. Students must complete Grade Option/Audit Request forms to request a grading option available in a particular course.

Grading Options

Individual schools may elect to offer a course with the following grade options:

LG Letter grade

H/S/U Honors/Satisfactory/Unsatisfactory

S/NC Satisfactory/No-Credit (Formerly the S/N Option)

LG and H/S/U Letter grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter grade and Satisfactory/No-Credit

Students may select a grade option for those courses that offer more than one option at the point of enrollment or by submitting a Grade Option/Audit Request form by the established deadline to the school offering the course (generally four weeks from the start of the term, but check with the school for specific deadlines). If the student does not select a grade option for a course when more than one grade option is available, the default option (generally the letter grade option) will automatically apply.

Letter Grade Option

The University's letter grade system identified below will be followed without exception:

Grade Quality Points

A+ = 4.00

A = 4.00 Superior

A- = 3.75

B+ = 3.25

B = 3.00 Meritorious

B- = 2.75

C+ = 2.25

C = 2.00 Adequate

C- = 1.75

D+ = 1.25

D	= 1.00 Minimal
D-	= 0.75
F	= 0.00 Failure

H/S/U Grade Option

Certain courses are offered on the H/S/U (Honors/Satisfactory/Unsatisfactory) grade option. Under this option, students earn an H if they do exceptional work (equivalent to an A- or higher under the letter grade system), an S if they do satisfactory work (equivalent to grades from a C up to a B+), or a U if they do unsatisfactory work (equivalent to a C- or lower). The H and S grades received under this option are counted toward graduation but are not computed in the student's GPA. The U grade is counted toward neither graduation nor the GPA.

S/NC Grade Option (Formerly the S/N Option)

Certain courses are offered on the S/NC (Satisfactory/No-Credit) grade option. This option was designed to encourage students to explore new and potentially difficult subjects without fear of the risks of failure. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (No Credit) is given. Courses for which an S is received are counted toward graduation, but are not computed in the GPA. Courses in which an NC is received are counted toward neither graduation nor the GPA.

Other Grades: Unfinished, Resign, Withdraw

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade

The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Auditing a Course

With the consent of the school and instructor, students may choose to audit a course. To audit a course, a student must register and pay tuition for the course. The audit grade (N) is not counted toward graduation or the GPA.

Repeating Courses

A student may repeat any course, except as noted below. No sequence course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade. This also pertains to graduate and first professional students who have passed with a B or higher grade. No course may be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at the University of Pittsburgh. The grade earned by repeating a course is used in lieu of the grade originally earned.

The following calculations apply to all students at the University of Pittsburgh:

- The original course and grade remain on the transcript and/or the academic record, however, the grade and credits originally earned are not counted in the calculation of the QPA (prior to Fall term 2005) or the GPA.
- The repeated course does not increase the number of credits counted toward meeting the degree requirements unless an F is replaced by a passing grade.

W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the QPA (prior to Fall term 2005) or GPA. Incomplete grades (G or I) will not be identified as repeated courses until the course work is completed. Students may repeat a course no more than two times. Any grade earned in the repeated course will be posted to the academic record even if it is lower than the original grade. The repeated course must be the same in which the original grade was earned. In extenuating circumstances, a department chairman, with the dean's approval, may substitute another course of similar content. Course repeat forms must be submitted to the Office of the Registrar to affect grade replacement.

Grade Changes

The instructor of a course may change a student's grade by submitting a grade change through Grade Change Work Flow which can be found on the Faculty Portal. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via Student Portal at my.pitt.edu or via Pitt PS Mobile.

Viewing Grades

Students can access their grades online via the Student Center at my.pitt.edu or via Pitt PS Mobile. Grade submission deadlines can be found in the University's *Academic Calendar*.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University Registrar. Upon graduation, the transcript reflects a student's degree and date, major, minor, or certificate, and, if applicable, honors and area of concentration.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record may display additional course details, certain academic events and detailed advanced standing/placement/transfer credit information. Students can view a copy of their academic record in the Student Center at my.pitt.edu.

Academic Standing

Undergraduate students' academic standing is maintained and monitored each term by the school in which a student is enrolled. Students who are not on academic probation or academic suspension (i.e., students who maintain a cumulative grade point average of 2.00 or higher) are considered to be in good academic standing.

Dean's List

Students whose grades indicate outstanding academic achievement are recognized on their school's Dean's List. The following schools have a Dean's List:

- Dietrich School of Arts and Sciences
- College of Business Administration
- School of Dental Medicine
- Swanson School of Engineering
- College of General Studies
- School of Computing and Information
- School of Health and Rehabilitation Sciences
- School of Nursing
- School of Pharmacy
- School of Public Health

Other Academic Honors

Schools and programs may have additional ways of recognizing academic achievement by students, such as Phi Beta Kappa, Tau Beta Pi, or a Term Honor List. More information about these opportunities is available through the school.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 12 quality point credits and whose GPA falls below 2.00 will be placed on academic probation by the dean of the school. After a certain period of time on academic probation (determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the undergraduate school's probation system are available through that school.

Effect on Financial Aid

Conditions for financial aid eligibility usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counting toward the degree). Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid in Alumni Hall at 412-624-7488.

Graduation

Requirements for Graduation

Graduation requirements differ among schools. However, all undergraduate schools require a minimum of 120 passing credits to graduate, as well as a GPA of at least 2.00. (See specific schools and programs for detailed graduation requirements.) For more policy information please refer to the University of Pittsburgh Policies page.

Application to Graduate

Students must file an application for graduation through their college or school. Generally, students must apply for graduation before the end of the term preceding the one during which they expect to complete all degree requirements. Each school establishes its own deadline by which students must apply for graduation. Students should check with their schools for the deadlines.

Graduation with Honors

Undergraduate members of a graduating class who have attained an outstanding scholastic record may be graduated with University honors. To be eligible, a student must complete at least 60 letter-graded credits at the University of Pittsburgh. All degree-related course work completed at the University is calculated in the grade point average. Receipt of University honors is based on having obtained the following grade point average at graduation:

Summa Cum Laude 3.75

Magna Cum Laude 3.50

Cum Laude 3.25

The honor status achieved by a student will appear on the student's official University transcript and diploma.

Each school may award undergraduate program honors based on the major GPA and other criteria, as determined by the school and department.

Commencement

Candidates for graduation are encouraged to appear in person at commencement, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

With the exception of students who receive their diplomas at individual school ceremonies, all diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.

Student Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see <http://www.policy.pitt.edu/>.

The information that follows summarizes several key University-wide policies affecting undergraduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures [here](#).

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read Acceptable Computing Access and Use, available in campus computing labs or online at technology.pitt.edu/security/acceptable-computing-access-and-use for details.

Students are subject to the rules and regulations as described in the University of Pittsburgh *Student Code of Conduct*. Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

Student Code of Conduct

The Student Code of Conduct is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System. For a copy of the code, please contact the judicial system office in 738 William Pitt Union at 412-648-7910 or see www.studentaffairs.pitt.edu/studentconduct.

Judicial System

The Office of Student Conduct of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the *Student Code of Conduct*. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints about nonacademic student behavior should be filed here.

Pitt Promise: A Commitment to Civility

The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. Students are asked to accept the obligation to live by these common values and commit themselves to principles of behavior that contribute to a civil campus environment and to support this behavior in others. The Pitt Promise is online at <https://www.studentaffairs.pitt.edu/dean/pittpromise/>.

Other Policies

Affirmative Action and University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in CS 07 UNIVERSITY OF PITTSBURGH POLICY, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Diversity and Inclusion, Cheryl Ruffin, Institutional Equity Manager, 4415 Fifth Avenue, 2nd Floor Webster Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to CS 07 UNIVERSITY OF PITTSBURGH POLICY. For information on how to file a complaint under this policy, please refer to CS 07 UNIVERSITY OF PITTSBURGH PROCEDURE.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law-enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or guaranteed Student Loan Program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_04.pdf.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/01-Administrative_and_Organization/Policy_AO_15.pdf.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits intimate relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself/herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition note: In this policy, the definition of faculty member refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_02.pdf.

Family Educational Rights and Privacy Act (FERPA)

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Statement of Compliance Regarding Satisfactory Academic Progress (SAP) for VA Educational Beneficiaries - 38 US Code Section 3675(b)

This policy applies to students who are VA beneficiaries and is intended to prevent the submission of VA-claims ("certifications") for those students who are suspended. Specifically:

- In this instance, VA beneficiaries are defined as students receiving VA educational benefits under Chapter-30, Chapter-33, Chapter-35 and Chapter-1606, Title 38 U.S. Code.
- Students placed on academic probation at the end of the term may be certified for VA educational benefits for the subsequent term. If the student does not meet satisfactory academic progress in that subsequent term-defined as attaining a cumulative GPA at or above 2.00 for full-time students or attaining a cumulative GPA at or above 2.00 after attempting 12 additional credits for part-time students-the university will immediately suspend further VA certifications on behalf of the student.
- Students returning from one calendar year of suspension must re-apply for admission to the university. If accepted, those students may be certified for VA educational benefits.

Certification of Chapter-31 students will be at the discretion of the student's VA vocational rehabilitation counselor.

Statement of Compliance Regarding VA Educational Beneficiaries - 38 US Code Section 3679(e)

As a matter of policy, the University of Pittsburgh allows students identified as *covered individuals** to attend and participate in all course(s) of education for any given term in which the student has been certified for VA educational benefits. This policy includes those circumstances in which VA payment(s) for student tuition and fees is late or delayed for up to 90 days after date of certification. The University retains the right to impose late fees upon those students who incur or retain an outstanding balance beyond the amount of expected VA tuition & fee payment for the term.

It is school policy to request all beneficiaries of VA educational benefits-including covered individuals*-provide the following documentation as part of certification process:

- VA Certificate of Eligibility (COE) or Statement of Benefits as printed from the VA.gov website
- Completion of a certification request form (in hard-copy or on-line), which includes biographical information necessary for submission in the VA's IT system of record-VA-Once.

Failure to provide such documentation will result in the delay of any VA claim or certification.

* Note: VA defines a **Covered Individual** as any individual who is entitled to VA educational assistance under the VA's Vocational Rehabilitation and Employment program (38 U.S. Code Chapter 31) or the VA's Post-9/11 GI Bill® (38 U.S. Code Chapter 33).

("GI Bill®" is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill).

Statement of Compliance Regarding the Johnny Isakson and David P. Roe Veterans Health Care and Benefits Improvement Act of 2020 - Section 1018

In accordance with the *"Responsible Education Mitigating Options and Technical Extensions Act"* or the "REMOTE Act" of 2021 to Section 1018 of the *Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020* (Public Law 116-315), the University of Pittsburgh provides a College Financing Plan (formerly known as Financial Aid Shopping Sheet) to every student who completes a FAFSA application including all VA beneficiaries.

Per Veterans Benefits Administration notification, "Isakson and Roe, Section 1018 Changes, dated June 13, 2022: The REMOTE Act affords the opportunity for schools to use the College Financing Plan (CFP), available through the U.S. Department of Education as a means to satisfy the requirements of section 3679(f). An Educational Training Institution that utilizes this form is providing sufficient consumer information, will be exempt from all section 3679(f) requirements, and does not need to apply for a waiver. An Educational Training Institution does not need to be participating in Federal Title IV Federal Student Aid to utilize the CFP to satisfy the requirements of section 3679(f).

Harassment Policies

Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment. Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion.

Any disciplinary action taken will depend upon the severity of the offense. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_20.pdf.

Immunization Policy

The University requires the immunization of all incoming freshmen against measles, mumps, and rubella as a condition of attendance at the University of Pittsburgh. Incoming freshmen must provide to the University Student Health Service documentation of immunization that includes the month, day, and year that the immunizations were administered. Completed immunization forms must be kept on file in the Student Health Service.

Exemptions may be granted based on a written statement from a physician that the immunization may be detrimental to the health of the student or on a student's objection to immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief. However, if an outbreak of measles, mumps, or rubella occurs, the State Health Department may exclude from classes students who do not provide proof of immunity to these diseases. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Academic/Policy_AC_61.pdf.

In 2021, The University established a COVID-19 Vaccination policy. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_29.pdf.

Patent Policy

A University student, during his or her period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management or at https://www.policy.pitt.edu/sites/default/files/Policies/Research-Innovation/Policy_RI_10.pdf.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the integrity of science, and to society as a whole. The University's Research Integrity Policy is available online at https://www.policy.pitt.edu/sites/default/files/Policies/Research-Innovation/RI_07_Policy.pdf.

Smoking Policy

Smoking is prohibited in all University-owned and -leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in University Policy 04-05-03. For complete policy text, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_21.pdf.

Student Service Indicators Policy

Access to many student services including registration and access to grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at https://www.policy.pitt.edu/sites/default/files/Policies/Academic/Policy_AC_62.pdf.

Use of Alcohol Policy

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, see https://www.policy.pitt.edu/sites/default/files/Policies/Community-Standards/Policy_CS_24.pdf.

Academic Standing

Undergraduate students' academic standing is maintained and monitored each term by the school in which a student is enrolled. Students who are not on academic probation or academic suspension (i.e., students who maintain a cumulative grade point average of 2.00 or higher) are considered to be in good academic standing.

Dean's List

Students whose grades indicate outstanding academic achievement are recognized on their school's Dean's List. The following schools have a Dean's List:

- Dietrich School of Arts and Sciences
- College of Business Administration
- School of Dental Medicine
- Swanson School of Engineering
- College of General Studies
- School of Health and Rehabilitation Sciences
- School of Computing and Information
- School of Nursing

Other Academic Honors

Schools and programs may have additional ways of recognizing academic achievement by students, such as Phi Beta Kappa, Tau Beta Pi, or a Term Honor List. More information about these opportunities is available through the school.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 12 quality point credits and whose GPA falls below 2.00 will be placed on academic probation by the dean of the school. After a certain period of time on academic probation (determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the undergraduate school's probation system are available through that school.

Effect on Financial Aid

Conditions for financial aid eligibility usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counting toward the degree). Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid in Alumni Hall at 412-624-7488.

Advising

Academic advising is a key part of every undergraduate's experience at the University of Pittsburgh. An academic advisor helps a student determine the appropriate academic path to further the student's educational and career goals. To be a success, the advising process must work both ways: The advisor will be there to help when the student needs it, and the student must actively seek out an advisor for help. Before signing up for classes each term, students meet with their advisors. Though each school may have different advising requirements, students are generally required to meet with their advisors at least two times per term—for an advising appointment and a subsequent registration appointment. The online *Schedule of Classes* can be a useful advising tool (see www.registrar.pitt.edu/schedule_of_classes.html). Consult with the individual school for school-specific advising services.

Allowable Credits (Credit and Course Limitations)

There are certain limitations on credits, other than those earned as part of regular undergraduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed below.

Advanced Standing Credits

Each school determines whether and under what circumstances the advanced standing credits listed below will be awarded toward a University of Pittsburgh degree or certificate offered by the school. Contact the individual schools for details.

Transfer Credit

Credit may be earned at other appropriately accredited institutions and accepted for transfer to the University of Pittsburgh, subject to University policy and individual school requirements.

Advanced Placement

Credits may be earned toward a University of Pittsburgh degree or certificate through standardized examinations such as the College-Level Examination Program (CLEP), Occupational Competency, Excelsior College Examination Program, and Advanced Placement (AP) Exams. In addition, some schools give credit for the International Baccalaureate Higher-Level Examinations. Credit is given for the following AP Exam scores:

- Students will have to check with the department to determine credit or waiver.
- Students wishing to take German language courses must still take the German Placement Exam at their orientation session.

Credit by Examination

In some cases, students may earn credits toward a University of Pittsburgh degree or certificate by passing a course examination without registering for the course. Contact the individual department or school for information, as each sets its own policies as to the specific courses for which students may request credit by examination. Career Development Courses

Noncredit, career development courses are not applicable to the bachelor's degree but may be included among the requirements for certain professional certificates.

Cooperative Programs

The University has established some arrangements with industries that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. These programs are administered by the Swanson School of Engineering and are available to any student with a science-related major. The experience normally starts in the sophomore or junior year. Students should contact their school or department to determine the maximum number of credits that may be earned toward their degree requirements through cooperative programs. Call 412-624-9826 for more information.

Duplication of Course Content

Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit.

Directed Reading and Research, Independent Study, Internships

Some schools offer individually designed study other than regular courses. Students are limited by the individual schools as to how many such independent study, directed reading, directed research, and internship credits can be counted among the required credits for the degree. Requirements and procedures may also differ. Contact school for details.

Directed Reading

The student undertakes a specified course of study comparable to a regular course under the direct supervision of a faculty member.

Directed Research

The student pursues a defined research project on campus under the guidance of a faculty member.

Independent Study

Independent study involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off campus with less immediate direction by the sponsoring faculty member.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

English Language Institute Courses

Credit for certain English Language Institute courses may be applied toward the undergraduate degree. See school for details.

Enrollment in Graduate Courses

Undergraduate students with sufficient preparation are permitted to enroll in graduate courses, and credits earned may be counted toward the undergraduate degree following procedures determined by each school. Credits earned in graduate courses taken by an undergraduate student typically cannot be counted subsequently toward a graduate degree. Consult the appropriate graduate or professional school bulletin for rules governing transfer credits for graduate-level courses taken by an undergraduate student.

PittOnline (formerly External Studies)

The PittOnline Program offers most courses to students in a Web-based environment. Most course materials can be accessed through CourseWeb, the University's course management system. Web courses feature Web-based instruction and interaction. Students interact with their instructors and other students through the class Web site. Students complete the course requirements within one term and move through the course materials as a cohort. Hybrid courses combine Web-based interaction and face-to-face instruction. Students are required to attend scheduled workshops and participate in online discussions and activities.

Self-paced courses utilize a flexible format where students move through assigned course materials at their own pace. Workshops and Web-based activities are features of some courses. The course syllabus provides more information about workshops and Web-based activities for these courses. Self-paced courses without CourseWeb are indicated with a SPW designation.

For additional information on PittOnline courses, contact the College of General Studies at 412-624-7210.

Hybrid Courses

All hybrid/blended courses must provide 50% or more of the instruction in a face-to-face modality. For a three credit course this would amount to 22.5 hours of face-to-face contact. The percentage of face-to-face (in-classroom) hours and the percentage of online hours must be stipulated in the course syllabus so that the expectations are clear to students.

Reserve Officer Training Corps (ROTC) Credits

Students may elect to participate in either the Air Force ROTC or Army ROTC Programs at the University of Pittsburgh or the Navy ROTC Program at Carnegie Mellon University. Contact individual schools to determine which credits earned in ROTC courses may be applied toward a degree. (For more information on ROTC, see the Special Academic Opportunities section of this bulletin.)

Grading and Records

For additional grading and records information, visit the University registrar's Web site at www.registrar.pitt.edu.

GPA

The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. Undergraduates must have a 2.00 GPA in order to graduate from the University of Pittsburgh. The value is the average of total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

Grading System

The University of Pittsburgh has a standard letter grade system (see Letter Grade Option). Some additional grading options are available in some courses as determined by the school and the instructor (see Grading Options below). Finally, undergraduate students may choose to audit a course. Students must complete Grade Option/Audit Request forms to request a grading option available in a particular course.

Grading Options

Individual schools may elect to offer a course with the following grade options:

LG Letter grade

H/S/U Honors/Satisfactory/Unsatisfactory

S/NC Satisfactory/No-Credit (Formerly the S/N Option)

LG and H/S/U Letter grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter grade and Satisfactory/No-Credit

Students may select a grade option for those courses that offer more than one option by submitting a Grade Option/Audit Request form by the established deadline to the school offering the course (generally four weeks from the start of the term, but check with the school for specific deadlines). If the student does not fill out a Grade Option/Audit Request form for a course in which more than one grade option is available, the default option (generally the letter grade option) will automatically apply.

Letter Grade Option

The University's letter grade system identified below will be followed without exception:

GradeQuality Points

A+	= 4.00
A	= 4.00 Superior
A-	= 3.75
B+	= 3.25
B	= 3.00 Meritorious
B-	= 2.75
C+	= 2.25
C	= 2.00 Adequate
C-	= 1.75
D+	= 1.25
D	= 1.00 Minimal
D-	= 0.75
F	= 0.00 Failure

H/S/U Grade Option

Certain courses are offered on the H/S/U (Honors/Satisfactory/Unsatisfactory) grade option. Under this option, students earn an H if they do exceptional work (equivalent to an A- or higher under the letter grade system), an S if they do satisfactory work (equivalent to grades from a C up to a B+), or a U if they do unsatisfactory work (equivalent to a C- or lower). The H and S grades received under this option are counted toward graduation but are not computed in the student's GPA. The U grade is counted toward neither graduation nor the GPA.

S/NC Grade Option (Formerly the S/N Option)

Certain courses are offered on the S/NC (Satisfactory/No-Credit) grade option. This option was designed to encourage students to explore new and potentially difficult subjects without fear of the risks of failure. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (No Credit) is given. Courses for which an S is received are counted toward graduation, but are not computed in the GPA. Courses in which an NC is received are counted toward neither graduation nor the GPA.

Other Grades: Incomplete, Resign, Withdraw

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

Once the deadline has passed, the G grade will remain on the record, and the student will be required to reregister for the course if it is needed to fulfill requirements for graduation.

I Grade

The I grade signifies incomplete course work due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade

The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Auditing a Course

To audit a course, a student must register and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the established deadline. Students who audit a course are given an N grade.

Repeating Courses

Students may elect to repeat a course, subject to the following stipulations. Students should check with their individual schools for other school-specific rules on repeating courses, including the need to submit appropriate forms.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G and I) are not identified as repeated courses until the course work is completed.
- Students are only permitted to repeat a course twice. Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

Changing Grades

The instructor of a course may change a student's grade by submitting a Change of Grade Card. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via the secure server at my.pitt.edu

Grade Reports

Shortly after the term ends, students can access their grades online via the University Portal at www.my.pitt.edu.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University registrar. Currently enrolled students may also receive one unofficial copy of their transcripts per term for personal use. Upon graduation, the transcript reflects a student's degree and date, major, and, if applicable, honors, area of concentration, and minor.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record provides students and advisors with admission data, academic events, detailed advanced standing/placement/transfer credit information, and standardized test scores. Students with no outstanding financial obligations to the University can receive one free copy of their academic records each term in G-3 Thackeray Hall.

Graduation

Requirements for Graduation

Graduation requirements differ among schools. However, all undergraduate schools require a minimum of 120 passing credits to graduate, as well as a GPA of at least 2.00. (See specific schools and programs for detailed graduation requirements.)

Application to Graduate

Students must file an application for graduation through their college or school. Generally, students must apply for graduation before the end of the term preceding the one during which they expect to complete all degree requirements. Each school establishes its own deadline by which students must apply for graduation. Students should check with their schools for the deadlines.

Graduation with Honors

Undergraduate members of a graduating class who have attained an outstanding scholastic record may be graduated with University honors. To be eligible, a student must complete at least 60 letter-graded credits at the University of Pittsburgh. All degree-related course work completed at the University is calculated in the grade point average. Receipt of University honors is based on having obtained the following grade point average at graduation:

Summa Cum Laude 3.75

Magna Cum Laude 3.50

Cum Laude 3.25

The honor status achieved by a student will appear on the student's official University transcript and diploma.

Each school may award undergraduate program honors based on the major GPA and other criteria, as determined by the school and department.

Commencement

Candidates for graduation are encouraged to appear in person at commencement, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

With the exception of students who receive their diplomas at individual school ceremonies, all diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.

Registration

For additional registration information, visit the University registrar's Web site at www.registrar.pitt.edu

Full-Time and Part-Time Study

Full-time study is defined as enrollment for 12 to 18 credits per term, and part-time study is defined as enrollment for one to 11 credits per term. Students are charged a flat tuition rate for full-time study in the fall and spring terms. For part-time students, tuition payment is on a per-credit basis. Students may exceed the 18-credit limit with written permission from the dean of their school, but they will be billed on a per-credit basis for each additional credit. University fees and other applicable charges are assessed on student statements. Some schools within the University may also apply academic limitations on the number of credits for which a student is permitted to enroll each term. For instance, students in Arts and Sciences must get permission to enroll for more than 18 credits. During the summer term and summer sessions, all students (except co-op students who are doing an academic rotation) are billed on a per-credit basis regardless of the number of credits taken.

Registering for Classes

After being admitted to a school, students may register for classes after consultation with their academic advisors. The registration period for a term or session is published in the University's *Schedule of Classes*, in course descriptions, on calendars (including the University's *Academic Calendar* at www.pitt.edu/calendars.html), and in numerous other publications.

Many students have the convenience of submitting their registration forms online to a school's or advisor's office. Students may also process their registration forms in the Registration Office, G-3 Thackeray Hall. Students are required to have the signature of their academic advisors on the registration form. The student's signature on the registration form creates a financial obligation to the University of Pittsburgh. Once students have registered, they may view their class schedules online via the University Portal at www.my.pitt.edu.

Adding and Dropping Courses

Students may add and drop course(s) only during the add/drop period. The dates for the add/drop period are published in University publications, in the University's *Schedule of Classes*, in course descriptions, on calendars (including the University's *Academic Calendar* at www.pitt.edu/calendars.html), and in numerous other publications. Students not enrolled in Arts and Sciences and students who are student athletes or participants in Academic Resource Center programs must have their academic advisors sign all add/drop forms. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course and Resigning from the University.

Cross-Registration

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 12 credits as an undergraduate) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any

delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit www.pche-pa.org.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the summer *Schedule of Classes* for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and athletic eligibility.

Resigning from the University/Termination of Registration

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript for each course in the term of resignation. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point in time of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Student Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see <http://www.bc.pitt.edu/policies/>.

The information that follows summarizes several key University-wide policies affecting undergraduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu/info/ai1.html

Computing Use Policy

Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read *Ethical Guidelines for Computing*, available in campus computing labs or online at www.technology.pitt.edu/subpages/ethics.html for details.

Students are subject to the rules and regulations as described in the University of Pittsburgh *Student Code of Conduct*. Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

Student Code of Conduct

The *Student Code of Conduct* is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students. A student or University official may file a complaint of violation of the *Student Code of Conduct* at the University Student Judicial System. For a copy of the code, please contact the judicial system office in 738 William Pitt Union at 412-648-7910 or see www.studentaffairs.pitt.edu/studentconduct.

Judicial System

The Office of Student Conduct of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the Student Code of Conduct. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints about nonacademic student behavior should be filed here.

Pitt Promise: A Commitment to Civility

The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. Students are asked to accept the obligation to live by these common values and commit themselves to principles of behavior that contribute to a civil campus environment and to support this behavior in others. The Pitt Promise is online at www.studentaffairs.pitt.edu/pittpromise.

Other Policies

Affirmative Action and University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Affirmative Action, Diversity and Inclusion, Carol W. Mohamed, Director (and Title IX, 504 and ADA Coordinator), 412 Bellefield Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this Policy, please refer to Procedure 07-01-03.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law-enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or guaranteed Student Loan Program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities. For more information, see www.bc.pitt.edu/policies/policy/06/06-02-01.html.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, see www.bc.pitt.edu/policies/policy/09/09-10-01.html.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits intimate relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself/herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition note: In this policy, the definition of faculty member refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see www.bc.pitt.edu/policies/policy/02/02-04-03.html.

Family Educational Rights and Privacy Act (FERPA)

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Harassment Policies

Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment. Any individual who, after thorough investigation and an

informal or formal hearing, is found to have violated the University's policy against sexual harassment will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion.

Any disciplinary action taken will depend upon the severity of the offense. For more information, see www.bc.pitt.edu/policies/policy/07/07-06-04.html.

Immunization Policy

The University requires the immunization of all incoming freshmen against measles, mumps, and rubella as a condition of attendance at the University of Pittsburgh. Incoming freshmen must provide to the University Student Health Service documentation of immunization that includes the month, day, and year that the immunizations were administered. Completed immunization forms must be kept on file in the Student Health Service.

Exemptions may be granted based on a written statement from a physician that the immunization may be detrimental to the health of the student or on a student's objection to immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief. However, if an outbreak of measles, mumps, or rubella occurs, the State Health Department may exclude from classes students who do not provide proof of immunity to these diseases. For more information, see www.bc.pitt.edu/policies/policy/06/06-01-02.html.

Patent Policy

A University student, during his or her period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management or at www.bc.pitt.edu/policies/policy/11/11-02-01.html.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the integrity of science, and to society as a whole. The University's Research Integrity Policy is available online at www.bc.pitt.edu/policies/policy/11/11-01-01.html.

Smoking Policy

Smoking is prohibited in all University-owned and -leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in University Policy 04-05-03. For complete policy text, see www.bc.pitt.edu/policies/policy/04-04-05-03.html.

Student Service Indicators Policy

Access to many student services including registration and access to grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at www.bc.pitt.edu/policies/policy/09/09-04-09.html.

Use of Alcohol Policy

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, see www.bc.pitt.edu/policies/policy/04/04-05-02.html.

Application for Admission

Most undergraduate admissions to the University of Pittsburgh's Pittsburgh campus are handled by the Office of Admissions and Financial Aid. This section details the general requirements and procedures for admissions to the University through that office and also provides admissions information for prospective students whose applications are not handled by that office. Some schools and programs require supplemental application materials or admission requirements in addition to those requested by the Office of Admissions and Financial Aid. Those requirements are listed within the Schools and Academic Programs section of this bulletin.

The admissions information in this section is subject to change at any time. It is intended to serve only as a general source of information.

Pittsburgh Campus First-Year Student Admissions

Prospective students who have not earned college credits since graduating from high school with a diploma or GED should consult this section for information on admission to the University of Pittsburgh.

Admissions Contact Information

University of Pittsburgh
Office of Admissions and Financial Aid
Alumni Hall
4227 Fifth Ave.
Pittsburgh, PA 15260-6601
412-624-PITT (7488)
Admissions: pitt.admissions@pitt.edu
Financial Aid: finaid@pitt.edu
admissions.pitt.edu
financialaid.pitt.edu

High School Preparation

First-Year Student applicants to the University of Pittsburgh should have completed a minimum of 17 units of credit in college-preparatory-level courses in high school. Specific course requirements for first-year entry schools include:

- Swanson School of Engineering applicants should have completed four units of mathematics through trigonometry/pre-calculus-as well as a unit each of chemistry and physics.
- School of Nursing applicants should have three units of laboratory science, including one year of chemistry with a lab, and four units of mathematics.
- College of Business Administration applicants should have completed four units of mathematics through trigonometry, pre-calculus or calculus in their senior year.

Application Procedures

Students seeking admission to the University of Pittsburgh must complete the online application, a Self-Reported Academic Record or an official high school transcript, and the \$55 application fee. Students may choose to submit SAT or ACT scores but are not required to do so. The Personal Statement, included with the First-Year Student Application, is optional but required for scholarship candidates.

Exceptions: Applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).

Application Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which prospective students must apply. Applicants are considered and informed of admission decisions on a first-come, first-served basis. However, applicants who want to be automatically reviewed for institutional merit scholarships must submit applications by December 1. See Academic Merit Scholarships.

Note: International students must apply by:

- April 1: for fall and summer term admission
- October 1: for spring term admission

Academic Merit Scholarships

Applicants are automatically considered for Pitt academic merit scholarships if their applications and all supporting materials are received by December 1. Scholarships are awarded for four years or eight semesters, provided that the student adheres to University Scholarship Guidelines.

Graduate School Guarantees

Outstanding first-year students applicants who indicate certain professional programs as their intended field of study on their application will automatically be reviewed for guaranteed admission into that professional program. We offer guarantees for 20 graduate programs, including business, law, medicine, dental medicine, and physician assistant studies.

A separate application is not necessary, although some programs have additional application requirements. Pitt Guaranteed Admissions Programs are competitive, so we highly recommend you apply for admission early in your senior year of high school. Early application is recommended as spaces are limited. Please note that the Medical School Guarantee has a deadline of November 1.

Enrollment Fee/Tuition Deposit

Once accepted, students must reserve their positions in the upcoming class by submitting a nontransferable, nonrefundable \$300 enrollment fee by May 1 for the fall term. This fee is a combined \$100 tuition deposit and a \$200 orientation fee). Residence hall accommodations on the Pittsburgh campus are guaranteed to first-year students admitted for the fall term who pay the \$300 enrollment fee by May 1 and meet all housing contract and deposit deadlines. Housing is guaranteed for three full years from the time admission is offered. After that housing is available on a first-come, first-served basis.

Deferred Admission

First-Year Student applicants who are interested in deferring University of Pittsburgh admissions may do so for up to one academic year following the term for which admission was offered, provided the enrollment fee has been paid by the May 1 deadline.

Examples of deferrals may include, but are not limited to a religious activity, community service, or world travel. Students may only defer to the same term as their original admission. For example, spring term admission students may only defer to the following spring term. Please refer to the deferral website for most up-to-date information.

International first-year students are eligible for deferral but must work with the Office of International Services regarding visas.

Regional Campus Admissions

Listed below is the contact information for the admissions offices of the University of Pittsburgh's four regional campuses. Contact the regional campuses for more information on their particular requirements:

upt.pitt.edu/

Transfer Student Admissions

Prospective students who are high school graduates and have attended postsecondary institutions, colleges, or universities (except those who took college classes while in high school and are considered first-year students with advanced standing) apply for admission as transfer students through the Office of Admissions and Financial Aid. Transfers between University of Pittsburgh schools or campuses are handled through the school or campus.

Application Procedures

Degree-seeking transfer students who wish to be considered for admission to the University of Pittsburgh must complete an online application, an official high school transcript or GED, an official transcript from each postsecondary institution attended (whether or not it is intended that all

courses will be counted toward a degree at the University of Pittsburgh), official SAT or ACT test result score if either test was taken, and the \$45 application fee.

Exceptions: Applicants to the Dental Hygiene Program, and students seeking special or non-degree status should see the application procedures outlined under their respective admissions sections (PharmD Program, Dental Hygiene Program-School of Dental Medicine Admissions, and Special and Non-Degree Status).

NOTE: International transfer students must apply online.

Admission Deadlines

The University of Pittsburgh practices a rolling admissions policy, meaning there is not a specific deadline by which transfer students must apply. Applicants are considered and informed of admission decisions as they apply. The following schools practice rolling admission for all three terms, except where noted: Dietrich School of Arts and Sciences, College of Business Administration, Swanson School of Engineering, College of General Studies, School of Nursing (fall and spring term admission only) and the School of Social Work (fall and spring term admission only). However, there are several schools and programs that have definitive deadlines by which applications must be submitted for consideration. You can verify deadlines for your school of interest online.

NOTE: International applicants must apply by the deadlines specified or the specific program deadline, whichever comes first.

Articulation Agreements and Transfer Credit Guide Summaries

The University of Pittsburgh has formal articulation agreements with various higher education institutions throughout the state of Pennsylvania to facilitate the transfer of students from one institution to the other as they pursue their educational goals. The table lists the current articulation agreements and their specific requirements.

Transfer Scholarships

Transfer scholarships are available to College of General Studies students who are U.S. citizens and eligible non-citizens. Degree-seeking applicants are automatically reviewed for eligibility. These annual scholarships range in value from \$600 to \$2,500. The scholarships are offered through: the CGS Alumni Endowment Scholarship Fund including John O. Bolvin and Anne E. Levenson scholarships, The Brackmann and Saalbach Family Endowed Scholarship, Joan C. Dash Scholarship, Bruce P. McGough Scholarship, Tom R. Slone Scholarship (designated for students who are active in the Big Brothers Big Sisters youth mentoring organization), and the Grace C. Stewart Fund. Awarding of these scholarships is handled through the Office of Admissions and Financial Aid.

Evaluation of Transfer Credits

Credits earned at another accredited institution are evaluated by the admitting school, which determines the number of advanced standing credits the transfer student will be awarded and the distribution of these credits in relation to the school's degree requirements and University policy. See the appropriate school's information in this bulletin.

Deferred Admission

The University does not offer deferred admission for a subsequent term to admitted students not enrolling for the term of their admission. However, students wishing to have their applications re-reviewed for another term may submit a request in writing to the Office of Admissions and Financial Aid.

Readmission

Students who previously attended the University of Pittsburgh then attended other institutions and wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. The admitting school will evaluate the credits previously earned at

the University of Pittsburgh along with credits earned elsewhere to determine the number of credits the transfer student will be allowed. Acceptable credits from institutions other than Pitt will appear on the student transcript as advanced standing credits and will not count in the GPA calculation. Credits earned at the University of Pittsburgh will appear as term entries on the student transcript, and courses accepted toward the degree will be used when calculating the student's GPA.

Former University of Pittsburgh students who have not attended another institution may be reinstated through the dean's office of the school in which they were previously enrolled.

Dental Hygiene Program-School of Dental Medicine Admissions

The School of Dental Medicine offers a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The program is designed to fulfill the professional and academic requirements of the Commission on Dental Accreditation. Completion of the program prepares the student for licensure as a dental hygienist in most states.

Admissions Contact Information

University of Pittsburgh
School of Dental Medicine
Dental Hygiene Program
B-82 Salk Hall
Pittsburgh, PA 15261-1937
412-648-8432
hygieneadmissions@pitt.edu
dental.pitt.edu/students/dental-hygiene-program

Admission Requirements

Applicants to the Dental Hygiene Program must fulfill the following criteria before applying: have a high school diploma, have a minimum GPA of 3.0 at all academic institutions, have a minimum SAT I combined math and verbal score of 1200 or ACT score of 24, have successfully completed chemistry and biology courses with laboratory components, and have successfully completed a college-level English composition course and a college-level introduction to sociology course.

Application Procedures

Applicants to the Dental Hygiene Program must submit the following items to the School of Dental Medicine by November 1 for early decision review: a completed Dental Hygiene Program application, including the Personal Essay; three professional references; transcripts from all academic institutions attended; 15 hours of job shadowing with a practicing dental hygienist; and SAT I/ACT scores. Once the application materials have been received, the qualified applicant will be invited to attend a mandatory Applicant Seminar and participate in a personal interview with the admissions committee.

Students who complete this program also have the option of completing a Bachelor of Science in Dental Hygiene offered by the College of General Studies (see the College of General Studies listing in the Schools and Academic Programs section of this bulletin for information on BS degree completion option).

School of Nursing-RN Options (Early admissions To MSN Or DNP)

The University of Pittsburgh RN Options (Early Admission to MSN or DNP) curriculum is designed for registered nurses, who obtained their initial nursing education through either a CCNE, ACICS or ACEN [NLN] accredited diploma or associate degree or diploma program and want to pursue undergraduate education with early admission to graduate nursing program. Courses are taught by nursing leaders who are experts in their field. Faculty serve as educators, role models and mentors for their students. The RN Options curriculum builds upon the individual professional nurse's strengths and experiences to expand professional knowledge and practice skills. Graduates of the University of Pittsburgh School of Nursing possess critical appraisal/thinking skills, sophisticated clinical practice knowledge, and the ability to integrate the latest research findings to provide quality, safe and effective patient care.

Course offerings are flexible and students may begin coursework in any term (fall/spring/summer).

Applicants should apply using the online application.

Contact Information

University of Pittsburgh
School of Nursing

Pittsburgh, PA 15261
1-888-747-0794 or 412-624-4586
sao50@pitt.edu
www.nursing.pitt.edu

Admission Requirements and Application Procedures

Application Guidelines

RN-MSN or DNP early admission track:

- Successful completion of a nursing diploma or associate degree program submitting official Transcripts from institution.
- Cumulative Grade Point Average (GPA) of 3.0 for previous college and/or coursework, which must be semester credits or the equivalent.
- Copy of current RN license (All students must obtain a Pennsylvania license) (students may be permitted to take theory courses only until evidence of successful completion of NCLEX is provided)
- Successful completion of all prerequisite courses
- ≥ 3.0 GPA in Associate Degree or nursing diploma (from ACEN (NLN), ACICS, or CCNE accredited program)
- Graduate Record Exam (GRE) :

MSN track - may be waived if the RN program GPA is 3.5 or higher; or DNP track - no waiver, Verbal & Quantitative sections (competitive score), Analytical Writing (≥ 3)

- Brief type written essay (as needed DNP project statement)
- Current resume
- Three letters of professional recommendation, one from current manager
- Completed online application
- International applicants: consult nursing.pitt.edu & ois.pitt.edu

Formal interview*

Applicants must meet the admission criteria for the BSN Program and simultaneous conditional admission to the preferred graduate program. If admitted they will complete the remaining 24 credits will be at the graduate level. Full and part-time schedules are available.

*Potential students will meet with the RN Options Coordinator for an interview and must meet with the coordinator of the graduate program.

School of Nursing - Accelerated 2nd Degree BSN Program

The Accelerated 2nd Degree BSN is designed to enable individuals with a Baccalaureate Degree in another discipline the ability to earn a Bachelor's of Science Degree in Nursing (BSN) in three consecutive full-time terms. The Accelerated 2nd Degree BSN requires 122 credits: 31 credits from a previous degree, 36 to 38 prerequisite credits, and 54 curriculum credits. The curriculum is fast-paced and designed to build upon the individual's previous education while providing additional science and nursing content. At the completion, graduates are eligible to take the National Council Licensure Examination (NCLEX) to become Registered Nurses (RN).

Admission to the Accelerated 2nd Degree BSN is competitive and is based upon proven academic achievement and grades earned in prerequisite courses. The school admits three cohorts, Fall, Spring and Summer.

Contact Information

University of Pittsburgh
School of Nursing
239 Victoria Hall
Pittsburgh, PA 15261
1-888-747-0794
sao50@pitt.edu
<http://www.nursing.pitt.edu>

Admission Requirements and Application Procedures

The Accelerated 2nd Degree BSN requires an applicant to complete 36 prerequisite credits. These courses may be taken at any college or university. Courses from other institutions must be evaluated as equivalent to University of Pittsburgh courses. (Coursework taken at the University of Pittsburgh School of Nursing prior to admission may be taken as a non-degree seeking student.)

Required prerequisites include:

Course	Credits
General and Biological Chemistry *+(includes a lab)	4
English Composition (scientific/technical)	3
<i>Directed Elective</i>	3
Psychology	3
Sociology	3
Statistics (<i>descriptive, probability, & inferential</i>)	3
Human Anatomy & Physiology *+ (<i>includes a lab</i>)	6 - 8
Human Genetics *+	3
Microbiology *+ (<i>includes a lab</i>)	4
Pathophysiology	4

*Should have been completed within the past ten years

+Should have achieved a grade of "B-" or better

Application Deadlines and Other Information

Early submission of an application is recommended. New classes begin in the Fall, Spring and Summer term. Accelerated 2nd Degree BSN applications are reviewed, and admission decisions made, based on the application deadlines: Fall Term -- February 15/June 1; Spring Term--June 1/October 1; Summer Term--October 1/February 15.

Prospective students must apply online to the School of Nursing.

School of Pharmacy PharmD Program

Transfer students, both within the Pitt system and from other colleges and universities, applying for admission to the School of Pharmacy must: (1) file an online PharmCAS application with all supporting credentials by the deadline; and (2) submit a School of Pharmacy Supplemental Application by the deadline specified in the online instructions. For more information on deadlines, online applications, admission calendar, and application instructions, please visit the school's "Admission Process" Web site.

Transfer within University Schools and Regional Campuses

Transfer between Schools

Students enrolled in an undergraduate school of the University who wish to transfer to another undergraduate school at the University should contact the school in which they are currently enrolled to request a transfer of their records. The student's records will be evaluated by the receiving school, which will then notify the student of acceptance or rejection.

Transfer between Campuses

Students enrolled in one campus of the University who wish to transfer to another campus of the University should contact the school at the campus in which they are currently enrolled to request a transfer of their records. The receiving schools will evaluate the records and notify students of acceptance or rejection.

Reinstatement

Students who have left the University for one calendar year or more (whether of their own volition or as a result of a suspension) and who wish to continue their studies must apply for reinstatement through the school to which they were previously admitted.

Second-degree Candidates

Previous Degree Earned Elsewhere

Students who have earned a previous undergraduate degree from an institution other than the University of Pittsburgh and wish to earn a second degree are treated as transfer students and must apply through the Office of Admissions and Financial Aid. (See Transfer Student Admissions.)

Previous Degree Earned at the University of Pittsburgh

Students who have earned an undergraduate degree from a school or campus of the University of Pittsburgh and who now wish to earn another bachelor's degree should apply as second-degree students directly through the desired school. This process may vary with some upper-level division schools.

Each school determines the number of previously earned credits that will apply. A minimum of 30 new credits must be earned to receive a second degree. In addition to those general rules, schools may have other requirements.

Special and NonDegree Admissions

College in High School

The College in High School Program, offered through the Dietrich School of Arts and Sciences, offers qualified area high school students the opportunity to earn college credits from the University during their regular school day. Courses in chemistry, communication, computer science, French, Latin, mathematics, physics, and statistics are offered. There is a registration process and fee for this program. For further information, contact the College in High School office at 412-624-6828.

Postbaccalaureate Students

Some of the schools at the University will allow students who have already earned a bachelor's degree to take courses at the University as nondegree students. Students should contact the appropriate school for information about admission requirements.

Students interested in the Dietrich School of Arts and Sciences or the College of General Studies should contact the College of General Studies, 412-624-6600, 407 Cathedral of Learning; College of Business Administration students should contact 412-383-9600, 2100 Sennott Square; Swanson School of Engineering students should contact the Engineering Student Records Office, 412-624-9800, 151 Benedum Hall.

NOTE: International applicants should file an online application.

Guest/Visiting Students

Guest students are those who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit with the expectation that the credits will transfer back to the student's home institution. Guest students must be in good academic standing and generally must apply at least a few weeks before the start of a given term. Contact the appropriate school for other admission requirements. Admission for the fall and spring terms is handled through the school. Summer admission for visiting students is handled through the College of General Studies.

NOTE: International applicants should file an online application.

Summer Visiting Students

Students who are seeking a degree at another university but want to take courses at the University of Pittsburgh for credit during the summer should apply through the College of General Studies (CGS). Contact CGS at 412-624-6600.

EXCEPTION: International students

IB Score Information

The following is a list of international baccalaureate tests and scores accepted by the Swanson School of Engineering:

Description	Score	Credits For	# Credits
Biology HL (B grade)	5	BIOSC 0150	4
Biology HL (A grade)	6, 7	BIOSC 0150, 0160	8
Chemistry	5	CHEM 0110	4

Chemistry	6,7	CHEM 0110, 0120	8
Economics HL	6, 7	ECON 0100, 0110	6
English A1 or A	5, 6, 7	ENGLIT 0590	3
Film HL	5, 6, 7	FMST 0120	3
French HL		see dept.	
German HL	5, 6, 7	GER 0000	3
History American HL	5	HIST 0600	3
History American HL	6, 7	HIST 0600, 0601	6
History Europe HL	5	HIST 0100	3
History Europe HL	6, 7	HIST 0100, 0101	6
Math HL	5, 6, 7	MATH 0220	4
Music HL	5, 6, 7	MUSIC 0000	3
Psychology HL	5, 6, 7	PSY 0010	3
Social and Cultural Anthropology HL	5, 6, 7	ANTH 0780	3
Theatre Arts HL	5, 6, 7	THEA 0505	3
Visual Arts HL	5, 6, 7	SA 0000	3

NOTE: Of the six humanities/social science electives that students must take to graduate from the Swanson School of Engineering, only two may be satisfied by AP and/or IB credit.

NOTE: The Swanson School of Engineering only accepts the HL IB scores noted above. No SL scores will be accepted.

Please be aware that IB credits are subject to change at any time and that this list is intended as a guide. IB credit cannot be reviewed and issued until the student is enrolled as a University of Pittsburgh student.

Foundational courses in the First-Year Engineering program are taken in sequence. AP/IB credit may be used for foundational courses (e.g. Math). If a student chooses to repeat a course at Pitt for which he/she has AP/IB credit, then AP/IB credit for subsequent courses in the same sequence is forfeited. Please note that this applies to equivalent courses (e.g. CHEM 0110 and 0120/CHEM 0960 and 0970 are equivalent courses. If a student with AP Chemistry credit chooses to take CHEM 0960 at Pitt, he/she may not then use AP credit for CHEM 0120.) Additionally, if a student with IB credit repeats a class at the University and earns less than the minimum required grade to move forward in the course sequence, he/she may not retroactively use IB credit to earn credit for that course.

AP Score Information

The following is an advanced placement credit guide:

EXAM CODE	DESCRIPTION	SCORE	PITT COURSE CREDITS ISSUED	# PITT CREDITS
ARH	Art History	3, 4, 5	HA&A 0000	3

			UPDATED June 2022	
--	--	--	-------------------	--

NOTE: The 3 or 6 credits awarded for BIOSC courses may only count toward a degree in some Engineering majors.

NOTE: The 4 credits awarded for CS courses may only count toward a degree in some Engineering majors.

NOTE: The 3 credits awarded for GEOL courses may only count toward a degree in some Engineering majors.

NOTE: The 4 credits awarded for STAT courses may only count toward a degree in some Engineering majors and cannot serve as a substitute course in any engineering-specific statistics requirement (e.g., ENGR 0021, IE 1070, BIOENG 1000, etc.)

NOTE: Of the 6 humanities/social science electives students must take to graduate from the Swanson School of Engineering, only two may be satisfied by AP and/or IB credit.

The following AP exams are NOT awarded credit in the Swanson School of Engineering:

AP Computer Science Principles
AP Research
AP Seminar
AP Physics B, Physics 1, Physics 2, Physics C-E&M
AP Human Geography

Please be aware that AP credits are subject to change at any time and that this list is intended as a guide. AP credit cannot be reviewed and issued until the student is enrolled as a University of Pittsburgh student.

Foundational courses in the First-Year Engineering program are taken in sequence. AP/IB credit may be used for foundational courses (e.g. Math). If a student chooses to repeat a course at Pitt for which he/she has AP/IB credit, then AP/IB credit for subsequent courses in the same sequence is forfeited. Please note that this applies to equivalent courses (e.g. CHEM 0110 and 0120/CHEM 0960 and 0970 are equivalent courses. If a student with AP Chemistry credit chooses to take CHEM 0960 at Pitt, he/she may not then use AP credit for CHEM 0120). Additionally, if a student with AP credit repeats a class at the University and earns less than the minimum required grade to move forward in the course sequence, he/she may not retroactively use AP credit to earn credit for that course.

Campus Facilities and Student Services

Academic Resources

A strong infrastructure of services is key to ensuring academic success at any institution of higher learning. The University of Pittsburgh has a wide variety of academic resources that provide that infrastructure to aid students with their research, computing, tutoring, and advising needs.

University Library System

271 Hillman Library
412-648-7710
feedback@library.pitt.edu
www.library.pitt.edu

The University of Pittsburgh libraries and collections provide an abundant amount of information and services to the University's students, faculty, staff, administrators, and researchers. In fiscal year 2007, the University's 28 libraries and collections have surpassed 5.1 million volumes. In addition, they contain more than 5 million pieces of microforms, and more than 48,000 current serials.

Under the administration of the Hillman University Librarian and Director, the University Library System (ULS) includes the following libraries and collections: Hillman (main), African American, Allegheny Observatory, Archives Service Center, Buhl (social work), Center for American Music, Chemistry, Darlington Memorial (American history), East Asian, Engineering (Bevier Library), Frick Fine Arts, Government Documents, Katz Graduate School of Business, Langley (biological sciences, behavioral neuroscience), Mathematics, Music, Public and International Affairs/Economics, and Special Collections. Libraries are also located at each of the University's four regional campuses. The ULS maintains a high-density storage area at the Library Facility in the Point Breeze section of Pittsburgh.

The Hillman Library is the largest facility, with seating for 1,530 users. It offers an open stack arrangement and an extensive range of library services. Hillman Library houses collections in the humanities and social sciences and includes area studies, psychology, computer science, maps, and government documents. In addition to the ULS, the University offers the Barco Law Library and the Health Sciences Library System.

The Health Sciences Library System (HSLs) at the University of Pittsburgh comprises several libraries that support the educational, research, patient care, and service activities of the schools of the health sciences (Medicine, Dental Medicine, Pharmacy, Health and Rehabilitation Sciences, Nursing, and Public Health) as well as the hospitals of the University of Pittsburgh Medical Center. The HSLs include Falk Library of the Health Sciences, The Western Psychiatric Institute and Clinic Library, The Libraries at UPMC Shadyside, and the Children's Hospital of Pittsburgh Libraries. The Computer and Media Center in Falk Library is the primary health sciences facility and service point for audiovisual and microcomputer resources. HSLs Online (www.hsls.pitt.edu) is the gateway to extensive electronic resources for clinical and research needs.

This year, the University of Pittsburgh's online library catalog, PITTCat, which provides access to materials held in all University libraries, has been updated. PITTCat+ now offers, in addition to the more than five million titles from PITTCat Classic, all items from the D-Scribe Digital Collections, along with enhanced book content such as integrated article searching, access to tables of contents, jacket covers, and book reviews. Further features are a word cloud of associated search terms, spelling variants, translated terms, and thesaurus terms, as well as refined search options that allow searches based on library location. Searches can also be saved as an RSS feed that will send notifications when new items are added to the catalog.

The ULS also provides access to a comprehensive journal and magazine article discovery tool, Zoom!, as well as other online resources such as: Web of Science, Science Direct, and Scopus in the physical sciences; PsycINFO, ERIC, and Congressional Quarterly for the social sciences; Historical Abstracts, Philosopher's Index, and RILM Abstracts of Music Literature in the arts and humanities; and additional collections of article and newspaper databases from EBSCO and Lexis-Nexis.

These and hundreds of other online resources are available via the Pitt Digital Library at www.library.pitt.edu. The University of Pittsburgh is a member of the Association of Research Libraries. Through membership in several Pennsylvania consortia of libraries (PALCI, PALINET, and the Oakland Library Consortium), cooperative borrowing arrangements have been developed with other Pennsylvania institutions.

Information Technology (CSSD)

Walk-In Support Desks
Litchfield Towers Lobby
University Store on Fifth
412-624-HELP (4357)
technology.pitt.edu

University of Pittsburgh students have access to the latest information technology resources provided by Computing Services and Systems Development.

Connect to Wi-Fi

Depending on location, you'll find one of two networks on campus: PittNet in academic and administrative buildings-including the William Pitt Union-and MyResNet in all rooms, common areas, and dining facilities in residence halls. pi.tt/pittnet

Sign In Once, Authenticate Twice

Use Pitt Passport single sign-on to access many of the University's web-based services. Download the Duo Mobile app to verify your identity with multifactor authentication. For services that don't use single sign-on, Pitt Password Manager creates strong, unique passwords and saves them in a secure vault-that you can access from any device-using a single master password. pi.tt/passport

Log In to Your Pitt Email

Your email address begins with your University Computing Account username: *abc123*@pitt.edu. The email account is yours to keep, even after you graduate. pi.tt/emailsetup

Install Free Software-Including Office

Install the software you need at no charge, including Microsoft Office, Antivirus (Symantec Endpoint Protection), Anti-Malware (Malwarebytes), and nearly 70 additional titles. Gain cloud-based access to even more applications via Office 365 ProPlus, along with Office apps for Android and iPhone. pi.tt/studentsoftware

Browse the Pitt App Center

Fine nearly 50 free University-related iOS and Android apps for doing everything from viewing class assignments to checking the Panthers' score. pi.tt/appcenter

Find Focus in Student Computing Labs

Eight computing labs around campus-some open 24 hours a day-provide convenient access to Windows and Mac computers with a variety of software, as well as scanners, printers, charging stations, and space to use your own device. What's more, computer kiosks throughout campus provide a quick alternative for getting online if you forget your phone or your battery dies. pi.tt/labs

Print from Your Laptop or Smartphone

It's easy to print to any of the 80 print stations across the Pittsburgh campus. Download the Pitt Print Client from software.pitt.edu to print from your computer. Using a phone or tablet? Simply email the file to mobileprint@pitt.edu or colorprint@pitt.edu. Alternatively, visit print.pitt.edu to upload files and manage your Pitt Printing account. pi.tt/print

Manage Your Academics

Register for classes, message the instructor, get assignments, and see grades using the Pitt PS Mobile and Courseweb (Blackboard) apps. pi.tt/courseapps

On-Demand Learning

Brush up on your tech skills, learn a new topic or take up a new hobby with thousands of free courses offered through LinkedIn Learning. pi.tt/linkedin

Cloud Storage & Collaboration

Store, work on, and share files in real time, from any device, using Box and/or Microsoft OneDrive. pi.tt/collaboration

Discover Additional Online Services

Whether you need help connecting to PittNet Wi-Fi, finding a campus shuttle, or loading Panther Funds, AskCathy Service Discovery (askcathy.pitt.edu) can help you quickly find online University resources. pi.tt/askcathy

Get Help When and How You Want It

The 24/7 IT Help Desk is your central point of contact for all Pitt Information Technology services. Get fast and friendly support via phone, chat, email, walk-in locations, or an online form-even on holidays. pi.tt/help

Writing Center

Writing Center
317B O'Hara Student Center
412-624-6556
writingcenter.pitt.edu

The Writing Center provides a place for all University of Pittsburgh students to come to work on their writing. The Center is staffed by experienced consultants who have been trained to help others with their writing. The Center also offers Writers' Café (for anyone interested in the craft of creative writing) and International Café (for international undergraduate and graduate students). Online tutoring is available for students who are off campus. For more information (including our schedule of events) or to make an appointment, visit our website.

English Language Institute

M13 Parkvale Building
412-624-5901

The English Language Institute (ELI) is part of the Department of Linguistics and offers a variety of English-as-an-additional-language courses and programs, as well as courses and support for matriculated students at the University and expertise for other University-related endeavors that involve English language learners and Teaching English to Speakers of Other Languages (TESOL).

Non-Credit English Classes

- Speaking, listening, writing, reading, and grammar courses in English for speakers of other languages from abroad and the local international community who want to improve their English for academic, professional, or personal reasons

- Admission to the ELI's non-credit courses and programs does not include admission to the University of Pittsburgh.

Support for Matriculated Students at the University of Pittsburgh

- English proficiency testing of non-native speakers of English who are matriculating in University programs
- Credit and non-credit English language support courses for matriculated students and teaching assistants/fellows who are non-native speakers of English
- Specialized English instruction to University programs by request
- Assessment of teaching assistants/fellows who are non-native speakers of English to ensure compliance with the legal requirements of the Commonwealth of Pennsylvania
- Teacher training, internships, and research opportunities for matriculated students in University programs in the areas of Applied Linguistics and TESOL
- Expertise for various other University-related endeavors that involve English language learners and TESOL

Additionally, the ELI actively participates in and contributes to the development of the field of English for speakers of other languages, especially in areas of classroom instruction, second language learning and acquisition, curriculum design, program structure, and administrative practices. For more information about the English Language Institute, contact elipitt@pitt.edu, visit www.eli.pitt.edu, or call 412-624-5901.

Housing

The University provides a variety of housing options and support services to students, including Residence Life and Off-Campus Living. Students may choose to live on campus in University-owned housing or in off-campus housing.

Housing Application Process

Incoming Students

As part of the admissions process, the University provides entering freshmen with a three-year housing guarantee, provided they

- Have been admitted through the Office of Admissions and Financial Aid and their tuition deposit has been received by May 1, and
- Have submitted their Housing/Dining Services Application, contract, and deposit by the due date.

Returning Guaranteed Students

Students who have lived in University housing during their first year with a housing "guarantee" are guaranteed housing for their second and third years at the University provided that they

- Maintain their status as current and continuing full-time undergraduate students in each successive year and
- Currently reside in University Housing and meet all housing requirements (application, contract, deposit, and due date) in each successive year.

The housing application process takes place each spring and is administered by Panther Central, which is located in the Litchfield Towers main lobby. For all housing information, stop in or call Panther Central at 412-648-1100 or visit <https://www.pc.pitt.edu/housing-services>.

Residence Life

The director and assistant directors of Residence Life are responsible for resident assistants and resident directors, who work with students as their live-in advisors and resource persons within the residence halls. The office also advises the Resident Student Association (RSA), the Residence Life governing body. The staff offers a variety of educational and social activities within the residence halls, addresses student counseling and conduct issues, and provides other assistance to residents on matters affecting the quality of life in the residence halls.

Residence Life also offers students opportunities to live in focused living learning communities, which are linked with specific academic departments. Residence Life staff provide personal assistance 24 hours a day, seven days a week. For more information, students should contact the resident director in their hall, visit or call the office in 203 Bruce Hall (412-648-1200/1201), or go to www.reslife.pitt.edu.

Off-Campus Living

The Off-Campus Living (OCL) Center provides assistance to students, staff, and faculty in identifying, renting, leasing, or purchasing suitable living accommodations. Off-Campus Living provides the following: information on University-owned apartments, an apartment roommate matching service, a sublet service, maps of Pittsburgh and surrounding areas, rental tips, campus shuttle schedules, free local telephone service to contact landlords, and listings of apartments inspected and approved by the City of Pittsburgh. Call 412-624-6998, visit the office at 204 Brackenridge Hall, 3959 Fifth Avenue, or go to www.ocl.pitt.edu.

Student Resources

The University is committed to providing a high quality of life for its students and toward that end supports a variety of offices and activities designed to aid students in realizing their potential and having a fulfilling on-campus life.

Affirmative Action

In addition to its work with developing, implementing, and monitoring the University's affirmative action program, the Office of Affirmative Action is responsible for receiving, investigating, and mediating complaints from any members of the University community who believe they have been discriminated against or harassed on the basis of their race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity or expression, disability, or status as a disabled veteran or a veteran of the Vietnam era. Individuals may request information and advice anonymously if they wish. The privacy of all parties will be respected. The office is in 412 Bellefield Hall, 315 S. Bellefield Ave.; the phone number is 412-648-7860.

Athletics

The University offers a variety of opportunities for students to participate in athletics on the varsity, intramural, and club levels, as well as on-campus facilities for group sports and individual exercise.

Varsity Sports

The University offers 10 sports for men (baseball, basketball, cross country, diving, football, soccer, softball, swimming, indoor and outdoor track, and wrestling) and nine sports for women (basketball, cross country, diving, gymnastics, soccer, swimming, tennis, indoor and outdoor track, and volleyball) at the varsity level as well as cheerleading activities. For more information about these sports and contact numbers for varsity coaches, call 412-648-8200 or visit the Pittsburgh Panthers Web site at www.pittsburghpanthers.com.

Intramural and Club Sports

New outdoor playing fields are available behind the renovated Cost Sports Center. Call 412-648-8210 for more information or visit the intramural program's Web site at www.intramurals.pitt.edu.

Sports clubs offer participation in sports ranging from bowling to rowing. Contact the Student Organization Resource Center (833 William Pitt Union, 412-624-7116) for more information on sports clubs or visit the Web site at www.sorc.pitt.edu.

Sports Facilities

There are a variety of sports facilities available for use by individuals and groups. Fitness centers are available in Litchfield Towers, Schenley Quadrangle, Lothrop Hall, Sutherland Hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center in the Petersen Events Center. Gymnasiums and swimming pools are available in Trees Hall and Bellefield Hall. The Baierl Student Recreation Center has two convertible racquetball/squash courts and four racquetball courts. In addition, eight squash courts are available in the Fitzgerald Field House, and soccer fields are available through the Department of Athletics.

Visit www.intramurals.pitt.edu for a virtual tour of the facilities, reservation information, and hours of operation.

Book Centers

The University owns and operates two bookstores on campus: The Book Center and The Health Book Center. The Book Center, at 4000 Fifth Ave., carries textbooks for most University courses, as well as a general book selection, school supplies, and sundries such as art supplies, stationery, greeting cards, and calendars. Call 412-648-1455 or visit <http://www.pittuniversitystore.com/home.aspx> for more information. The Health Book Center, at 3527 Forbes Ave., carries all course books for the Schools of Medicine, Dental Medicine, Health and Rehabilitation Sciences, Nursing, and Pharmacy, as well as the School of Public Health. Call 412-648-8915 or visit <http://www.pittuniversitystore.com/home.aspx> for more information.

The University Counseling Center

The University Counseling Center, in 334 William Pitt Union, is staffed by licensed psychiatrists, psychologists, social workers, and counselors who provide a variety of services for undergraduate and graduate students. All services of the center are accredited by the International Association of Counseling Services and are confidential, free, and voluntary.

We provide individual, couples, and group counseling for students seeking assistance for relationship problems, anxiety, depression, stress, and concerns about academic progress or direction. We also provide psychiatric services and medication management for currently enrolled students. Special services such as sexual assault counseling and advocacy are provided through the center's Office of Sexual Assault Services. In addition, drug and alcohol assessments and counseling are provided at the center.

For information about the center and its services, see www.counseling.pitt.edu. To schedule an appointment, call 412-648-7930.

Sexual Assault Services/University Counseling

The Office of Sexual Assault Services provides individual and group counseling designed to alleviate the trauma associated with sexual victimization. Emergency medical, legal, and police support is provided. Students are assisted in negotiating course schedules or room changes and in obtaining medical, legal, and counseling resources available to them in the University and local communities.

The Office of Sexual Assault Services also sponsors Peers 2 Peers. This is a volunteer student outreach program whose mission is to create an awareness of the dynamics of sexual assault on the Pittsburgh campus, promote effective communication, and prevent sexual victimization through educational programming. For more information, call 412-648-7856 or 412-648-7930, visit 334 William Pitt Union, or see <http://www.saserv.pitt.edu>.

Disability Resources and Services

The Office of Disability Resources and Services (DRS) provides a broad range of support services to assist students with disabilities. Services include, but are not limited to, tape-recorded textbooks, sign language interpreters, adaptive computer technology, Braille translation, and nonstandard exam arrangements. Contact DRS at 412-648-7890 or 412-383-7355 (TTY) in 140 William Pitt Union or see www.drs.pitt.edu for more information.

Dining Services

Campus Dining Services offers students a variety of dining options. All student dining services are coordinated and administered through Panther Central, which is located in the Litchfield Towers main lobby. All students residing in residence halls are required to purchase a meal plan. Students living in University apartment-style accommodations may purchase a meal plan but are not required to do so. Students can select from a variety of meal plans, each offering different combinations of dining passes and dining dollars. Campus Dining Services invites you to check out all of our dining options across campus.

Major Residence Hall Dining Facilities

- Market Central in Litchfield Towers
- The Perch at Sutherland

Retail Operations

- Quick Zone in Litchfield Towers and Sutherland Hall
- Market to Go in Litchfield Towers
- Schenley Café in William Pitt Union
- Cathedral Café in the Cathedral of Learning
- Petersen Events Center Food Court
- Starbucks Coffee Carts across campus
- Einstein Bros. Bagels in Posvar Hall and Benedum Hall

For all dining information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/dining/index.html.

Health Care and Student Health Service

All full-time students pay a student health fee each term to cover a variety of services at the Student Health Service in Suite 500 of the Medical Arts Building, 3708 Fifth Ave., Pittsburgh, PA 15213. The Student Health Service is a multiservice health care facility that offers outpatient clinical services, gynecology, and comprehensive health education programs. Call 412-383-1800 or visit www.studenthealth.pitt.edu for more information.

The University of Pittsburgh Pharmacy, in the same suite as the Student Health Service, offers over-the-counter and prescription medicines, often at lower prices than available elsewhere. Call 412-383-1850 or visit www.studentaffairs.pitt.edu/shspharmacy for more information.

Students should have health insurance to protect themselves in the event of illness or injury. A direct-pay medical insurance plan is available to students through University health plans. The plan is designed to provide insurance benefits for services not offered at the Student Health Service as well as for hospitalization and emergency care. Applications and product information are available at the Student Health Service.

ID Cards (Panther Cards)

Every student, faculty, and staff member at the University must obtain an ID card from Panther Central, located in the Litchfield Towers main lobby. Student IDs, or "Panther Cards," are used to access residence halls (your assigned residence only), meal plan, athletic events, campus shuttle buses, recreational facilities (within your residence hall, Bellefield Hall, Trees Hall, and the Baierl Student Recreation Center), Student Health Services, computer labs, and Pitt Program Council events. The Panther Card also affords access to off-campus benefits such as free admission to some Pittsburgh cultural facilities. In addition, the Panther Card offers access to Panther Funds at local participating merchants. For all Panther Card information, stop in or call Panther Central at 412-648-1100 or visit www.pc.pitt.edu/card/index.html.

International Services

708 William Pitt Union
412-624-7120
www.ois.pitt.edu

The Office of International Services (OIS) advises international students on how to maintain their immigration status and helps to ensure compliance for both international visitors and the University, with respect to federal regulations. OIS also provides generalized support in connecting the University's international community and their hosting departments with resources inside and outside campus. For more information, contact OIS at ois@pitt.edu, or call 412-624-7120.

Parking and Transportation

The University provides a variety of parking and transportation services, both on and off campus. For more information, contact the University Department of Parking, Transportation, and Services at 412-624-8612 or visit www.pts.pitt.edu.

Parking Services

Student parking is available year-round. The Parking Services Office provides several parking options to meet the different schedules and needs of students. Commuter parking is available daily on a cash basis or by the term in selected facilities by permit only. Resident student permits are available for full-time students residing in one of the University residence halls operated through the Housing Office. Evening permits are available for parking after 2:50 p.m. weekdays and all day on weekends, except during special events, in many University lots. For more information, visit our Web site at www.pts.pitt.edu/parking. The Parking Services Office is located at 204 Brackenridge Hall, 412624-4034.

Commuting Alternatives (Ridesharing)

Daily commuter students can save money by sharing a ride. A free, computerized matching service is available to help you locate others interested in carpooling. Contact the University's ridesharing partner online at commuteinfo.org, or call 888-814-6110. For additional commuting alternatives, visit www.pts.pitt.edu/commuting.

Public Transportation

Students may ride any Port Authority bus, incline, or light-rail train within Allegheny County for free by showing their valid University ID cards. The Department of Parking, Transportation, and Services, at 3525 Forbes Ave., maintains all Port Authority rider information, including maps, schedules, and routes to facilitate the use of public transit. Port Authority bus schedules are also available in the lobby of the William Pitt Union.

Pittsburgh campus Transportation System

University of Pittsburgh students may ride all of the Pitt buses and shuttles fare-free by showing a valid University ID.

In addition, students are permitted two guest riders (space permitting). Buses and shuttles normally have a 20- or 30minute route. Detailed maps and time schedules are available online at www.pc.pitt.edu/transportation/index.html and at the William Pitt Union information desk. The Department of Parking, Transportation, and Services is located at 3525 Forbes Ave.

SafeRider

A night-time, non-emergency van service called SafeRider is available during the evening and early morning hours to transport you from one campus building to another, from local residences to campus buildings, and from campus buildings to local residences within the University boundaries, and it is not on a regular University bus route. SafeRider operates during the following hours:

Fall and Spring:

Sunday-Wednesday and days when the shuttle system operates on a holiday schedule

7 p.m.-3 a.m.

Thursday-Saturday

7 p.m.-5 a.m.

Summer:

Daily 9 p.m.-3 a.m.

For service, call the dispatcher at 412-648-CALL (2255) during these times. You will need to provide the following information when you call: your name, pick-up location and the telephone number at the pick-up location, destination, number of individuals with you, and student ID number. Consult the SafeRider brochure for additional information concerning policies and procedures.

Buses Home for the Holidays

This program is designed to give students a safe, comfortable, alternative ride home for the three major recesses: Thanksgiving, winter, and spring. Buses depart from the William Pitt Union, and most of the destinations served are direct routes. Deluxe motor coaches (Lenzer/Coach USA) transport the students in air-conditioned comfort while movies are shown en route.

Bicycle Registration Program

Registration of bicycles is recommended as a deterrent to theft, to help in the identification of lost or stolen bicycles, and to help better accommodate cyclists at the University. Registration is easy, and it is free. You may register bikes at www.pts.pitt.edu/commuting/bicycling/bike-registration.php.

Bicycle lockers are available at two convenient locations. The locker totally encloses the bicycle, protecting it from rain and snow. There is also room to store a helmet, riding shoes, and other accessories. Lockers may be rented by the term at the Parking Services Office in 204 Brackenridge Hall.

Career Development

The Career Development Office is dedicated to helping students prepare for rewarding careers by providing individual assistance and a variety of professional development programs. Career counselors and consultants assist students with choosing or changing an academic major through personal assessments, writing effective resumes and cover letters, networking with professionals, exploring internship opportunities, applying for graduate or professional school, and preparing for job interviews. Career Development has a variety of online resources that are available through the my.pitt.edu portal, including *FutureLinks*, a career management software program that enables students to apply for jobs and internships, as well as register for job fairs, career workshops, and other programs and events. Diverse educational programs are offered for students in all stages of their journey. For more information, call 412-648-7130, stop by 224 William Pitt Union, or see www.careers.pitt.edu.

Police Department

The University of Pittsburgh Police Department provides police and security services to the University community. For emergency calls, dial 811 from on-campus phones or 412-624-2121 from off-campus phones. The University of Pittsburgh Police Department's main headquarters is in G1N30 Wesley W. Posvar Hall. For general information calls (non-emergency), dial 412-624-4040 or see <http://www.police.pitt.edu>.

Student Government

Undergraduates at the University are represented by two primary governing bodies, the Student Government Board and the College of General Studies (CGS) Student Government Council.

The Student Government Board (SGB)

The Student Government Board (SGB) is an elected body of nine students that exists to promote the concerns, interests, needs, and welfare of non-College of General Studies undergraduates at the Pittsburgh campus of the University of Pittsburgh. As the governing body for students, SGB serves as the liaison to University faculty, administration, and staff. SGB also distributes student activity fee funds to student clubs and organizations.

SGB makes appointments to University committees and also oversees SGB committees, whose membership is open to all undergraduates. These SGB committees include Academic Affairs; Allocations; Communications; Community and Governmental Relations; Elections; Facilities, Technology, and Transportation; First Year Council; Judicial; Wellness; and any existing task force or ad-hoc committee. The SGB meets weekly during the fall and spring terms. For more information, call 412-648-7970, visit 848 William Pitt Union, or see www.sgb.pitt.edu.

The CGS Student Government Council

The CGS Student Government Council is composed of five elected members who represent the interests of students in the College of General Studies. The Council coordinates a variety of student programs and services and allocates the CGS student activity fee. In addition to the five members of the Council, there are five divisions that help carry out the Council's business: Budget and Finance, Judicial Affairs, First Degree, Marketing and Advertising, and Student Programs. For more information, call 412-648-7895, visit 824 William Pitt Union, or see www.cgssg.pitt.edu.

PITT Arts

Each year, 22,000 Pitt students experience the power of the visual and performing arts in Pittsburgh through the PITT ARTS program, which sponsors 110 free student outings per year, including trips to the symphony, cinema, opera, ballet, theater, and museums. Students may also use their student ID cards (Panther Card) to visit the Carnegie Museums of Art and Natural History, Phipps Conservatory and Botanical Gardens, and The Andy Warhol Museum at no cost. Visit the PITT ARTS Web site at www.pitt.edu/~pittarts to find a listing of current arts events in Pittsburgh and on campus, and explore the cheap seats page to find out about deeply discounted tickets, sold right in the William Pitt Union, to local arts organizations.

Pitt Program Council

A variety of entertainment and educational activities are planned each year by the student committees of the Pitt Program Council (PPC), the central programming organization on campus. Programs include lectures, travel packages, weekend films, miniseminars, recreational tournaments, annual homecoming activities, and art gallery exhibits. New members are always welcome. For more information, contact the Pitt Program Council at 412-648-7900, or visit www.pitt.edu/~ppc.

Student Employment and Placement Assistance

The mission of the Office of Student Employment and Placement Assistance (SEPA) is to connect Pitt students who are actively seeking jobs or internships with recruiters and human resources professionals at businesses and organizations throughout the country. SEPA staff work to build relationships with representatives in a variety of career fields and help match qualified students with companies. SEPA hosts several career fairs each semester, facilitates the on-campus interviewing process, and helps students to tap into the Pitt Career Network sponsored by the Pitt Alumni Association. Employers and students use the online career management software program *FutureLinks*, which is accessible on the my.pitt.edu portal, to make connections. For more information, call 412-648-HIRE (4473), stop by the office located at 200 William Pitt Union, or visit www.sepa.pitt.edu.

Student Media

Student-produced media creates original news and entertainment for students and provides training to students interested in working in the media.

The Pitt News publishes a daily newspaper in print, online, social media and mobile app and features news, sports, opinions, art and entertainment and videos.

WPTS-FM radio station broadcasts alternative and independent music, campus news and sports via the FM dial, webstreaming and mobile apps. Their website provides music articles, concert reviews, and news and sports reports.

UPTV-21 television station posts varied short comedic and dramatic video entertainment programs on YouTube and streams some programming live on its website.

Student Organizations

More than 500 registered student organizations provide myriad opportunities for extracurricular activity. In addition to government, media, publications, programming, fraternity, sorority, and honor societies, there are clubs for sports, recreation, performing arts, politics, religion, service, professional and academic pursuits, ethnic and cultural enrichment, and many other specialized interests. Students may also participate in organizations that represent the interest of specific student groups, such as the Black Action Society. A complete list of registered student organizations is available at www.sorc.pitt.edu. The Student Organization Resource Center (SORC) is the office that oversees registered student organizations and is located in 833 William Pitt Union.

Student Volunteer Outreach

The Student Volunteer Outreach (SVO) promotes, supports, and provides opportunities for students to participate in community service and service-learning activities ranging from one-time service projects and alternative break projects to internships and ongoing volunteer opportunities. It also

sponsors annual projects and events, including the SVO/SGB Pittsburgh Project, Pitt Partnership for Food, and the Agency Fair for student volunteers. The SVO is on the ninth floor of the William Pitt Union; its Web site is www.svo.pitt.edu.

University Child Development Center

The University Child Development Center is a developmental child-care facility for children between the ages of 6 weeks and 5 years. The center is open to children of University students, faculty, and staff. The children are free to select activities from an age-appropriate environment prepared by the teaching staff. The environment allows children to practice previously learned skills and challenges children to develop new psychosocial, cognitive, and motor skills in a relaxed, nurturing atmosphere. The center is at 635 Clyde St. and is open from 7 a.m. to 6 p.m. Monday through Friday. For more information, call 412-383-2100 or see www.hr.pitt.edu/ucdc.

Veterans Services

The staff of the Office of Veterans Services facilitates the transition of veterans from military to University life, supports their ongoing academic success, and assists veterans, guardsmen, reservists, spouses, and dependents in receiving their military education benefits. In addition to these services, the office implements the VA work study program. The Office of Veterans Services is located on the first floor of Posvar Hall, inside of the College of General Studies. Please call 412-624-3213 or email veterans@pitt.edu for more information.

William Pitt Union

The William Pitt Union, built more than 100 years ago and located across Bigelow Boulevard from the Cathedral of Learning, serves as the focal point for campus activities, student organizations, and the Division of Student Affairs. The union features a recreation center, videogame center, dining service, information service, art gallery, dance studio, lounges, meeting rooms, student organization offices, ticket office, dining rooms, and several multi-use spaces for programs. To reach the union's information desk, call 412-648-7815.

Financial Information

Tuition

Enrollment Fee or Tuition Deposit

Upon acceptance to the University, students may be required to pay a nonrefundable, nontransferable enrollment fee or tuition deposit. If paying an enrollment fee, part of that fee will be considered to be a tuition deposit, and part might be used to pay for new student programming of some nature. The tuition deposit component will be applied toward their first-term tuition. The amount of the deposit varies, depending on your program of admission. Instructions for payment will be specified in the admission letter.

Full-time and Part-time Tuition and Mandatory Fees

This information can be found on the Tuition Rates and Mandatory Fees page.

Determining How Full-Time vs Part-Time Students are Billed

Undergraduate:

Undergraduate students registered for 12 to 18 credits are regarded as full-time students and are assessed the current undergraduate "flat" tuition rate for their academic center.

Undergraduate students registered for fewer than 12 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

Graduate:

Graduate students registered for 9 to 15 credits are regarded as full-time students and are assessed the current graduate "flat" tuition rate for their academic center.

Graduate students registered for fewer than 9 credits are considered part-time and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the full-time credit limit.

[In the Summer Term:](#)

All graduate students are billed on a per-credit basis except for students enrolled in a full-time program that charges a flat rate per term for fall, spring, and summer.

DETERMINING HOW UNDERGRADUATE VS. GRADUATE STUDENTS ARE BILLED

Students are billed at the undergraduate or graduate tuition level in accordance with University of Pittsburgh Tuition and Fees Policy.

- A student enrolled in an associate's or bachelor's degree program is considered an **undergraduate** student and is billed at the appropriate undergraduate tuition rate.
- A student who has already been awarded a bachelor's degree and is enrolled in a **graduate** or doctorate-professional practice program is considered a graduate student and is billed at the appropriate graduate tuition rate, even for undergraduate classes taken during the student's graduate career.

- A student who has already been awarded a bachelor's degree and is enrolled in an associate's program or in another bachelor's program is considered a **post-baccalaureate** student. Post-baccalaureate students enrolled in an undergraduate academic center are billed at the undergraduate tuition rate, while post-baccalaureate students enrolled in an academic center that has both undergraduate and graduate degree programs may be billed at either the undergraduate or graduate rate, according to the admitting school's program requirements.

About Mandatory Fees

Mandatory Fee figures are applicable to students regardless of Pennsylvania or Out-of-State residency. Not listed under Mandatory Fees are:

1. **Course/major fees** that are based upon registration in specific courses (e.g., lab fees).
2. **Academic fees** (e.g., application fees, academic program fees for programs such as Cooperative Engineering Program and Study Abroad).
3. **Service fees** (e.g., late application for graduation and lost ID cards).
4. **Professional workshop and professional development fees**
5. **Specific-student fees** such as the Freshman Socialization Fee at the Greensburg Campus.

Residency/Reduced Tuition

Admitted students who are United States citizens and have lived in Pennsylvania for a continuous period of 12 months before enrollment in any institution of higher education may be eligible for Pennsylvania tuition rates. Students who wish to challenge their residency classification may petition for Pennsylvania tuition rates by submitting convincing evidence for review to the Student Appeals Office in Thackeray Hall. The University's policy on Pennsylvania Residency Classification is located online at <https://www.policy.pitt.edu/pa-residency-classification-eligibility-reduced-tuition>.

Military affiliated students and students who are not U.S. citizens may be eligible for Pennsylvania tuition rates if they meet the qualifications and provide the documentation required by University of Pittsburgh Policy, Pennsylvania Residency Classification.

For any student younger than 22, both the student and parent(s) or legal guardian(s) must meet the residency requirements to be eligible for reduced tuition.

Eligibility for Pennsylvania tuition (in-state rates) is governed by the University's Policy on PA Residency Classification. The policy establishes the criteria used to classify a student as a Pennsylvania Resident (PA Resident) or Non-Resident for tuition purposes. PA Residents are charged in-state tuition rates; Non-Residents are charged out-of-state rates. The term "PA Resident" for tuition billing purposes may differ from other definitions of Pennsylvania residency.

I. Scope

This policy affects tuition rates charged to students who are enrolled in classes at the University of Pittsburgh. It outlines the requirements that must be met to be considered a PA Resident and the responsibilities of those charged with managing the process governing classification of a student's residency, including the PA Residency Coordinators at each campus.

II. Definitions

A. PA Resident: Classification of students who are charged the in-state tuition rate.

B. Enrolled: Enrolled, as it pertains to this policy, means a student is registered for one or more classes.

III. Policy

One of the requirements to be considered a PA Resident for tuition purposes is that a student must live in PA for 12 continuous months immediately prior to enrollment at an institution of higher education in PA. This is called the "12 Month Requirement." Students under the age of 22 are considered minors for purposes of residency determination and are classified based on the residency information of their parent(s) or legal guardian(s).

In addition to meeting the 12 Month Requirement, Non-U.S. Citizens must submit documentation proving they fall into one of the three immigration categories in the "Non-U.S. Citizens Immigration Requirements" section of this policy.

Section V below outlines the requirements that must be met in determining residency classification. As explained in that section, PA Residency Coordinators serve as the central points of contact for submitting materials required under this Policy. Contact information for the PA Residency Coordinators at each campus is provided in Section IX-Resources, below. Where deadlines in this Policy refer to academic term and session dates, please refer to the University's official academic calendar on the Office of the University Registrar's website.

Scholarships Contingent on Non-Residency

A student receiving a scholarship or grant contingent on maintaining a residence in a state other than PA will be classified as a Non-Resident for tuition purposes.

University of Pittsburgh grants or scholarships awarded to the student based on out-of-state residency status may be reduced or cancelled if the student is subsequently reclassified as a PA Resident.

IV. Requirements

A. 12 Month Requirement

Students who have lived in PA for at least 12 consecutive months immediately prior to enrollment at any institution of higher education in PA meet the 12 Month Requirement. For U.S. Citizens, this is all that is required for classification as a PA Resident. Students who are Non-U.S. Citizens must also meet the immigration requirements described in Subsection B below in order to be eligible for reclassification to PA Resident. Students under the age of 22 are considered minors for purposes of residency determination and are classified based on the residency information of their parent(s) or legal guardian(s).

Students who do not meet the 12 Month Requirement are classified as Non-Residents. Those who wish to challenge their classification can file a petition with their campus PA Residency Coordinator. Instructions are provided below in Section VI. Petitioning to Overcome the 12 Month Requirement.

B. Non-U.S. Citizens Immigration Requirements

In addition to meeting the 12 Month Requirement, Non-U.S. Citizens must demonstrate that they fall into one of three immigration categories to be reclassified to PA Resident:

1. Asylee, refugee, or U.S. Lawful Permanent Resident (green card holder); or
2. Has an approved I-140 or I-130, along with Form I-797, the Receipt Notice for the filing of Form I-485; or
3. Has an approved I-140 or I-130, along with evidence to support that they intend, but are unable, to file a Form I-485 because they do not have a current priority date as determined by the most recent U.S. Department of State Visa Bulletin.* To provide sufficient evidence under this category, the student must provide evidence of their country of birth; in most cases, a copy of the passport identification page meets this requirement.

Filing Deadlines. Students who meet the 12 Month Requirement and fall into one of the immigration categories above must submit copies of their immigration documents to their campus PA Residency Coordinator to request reclassification by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term.
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.

If documentation is submitted after the deadline, the request for reclassification will be effective on the first day of the following term or summer term session. Residency reclassification is not retroactive to any prior terms.

** Refer to the U.S. Department of State and U.S. Citizen and Immigration Services for further information about determining your priority dates. As explained in those resources, a person's priority date is determined by the specific category of permanent residency applied for, and the country of chargeability (birth).*

C. Military Affiliated Students

Qualifications. Individuals who meet at least one of the following qualifications are eligible for PA Resident status for tuition purposes:

Under the Commonwealth of Pennsylvania Statutes Title 24 (Education), Section 2509 (the "Act").

1. Any Veteran, their spouse, dependent children, or any other individual who is eligible to receive benefits under any of the following:

1. 10 U.S.C. Chapter 1606 Montgomery GI Bill® Selected Reserve
2. 38 U.S.C. Chapter 30 Montgomery GI Bill® Active Duty
3. 38 U.S.C. Chapter 31 Vocational Rehabilitation and Employment
4. 38 U.S.C. Chapter 33 Post-9/11 GI Bill®

In addition, a child, a spouse, or a surviving spouse who is eligible to receive benefits under Chapter 35 (relating to survivors' and dependents' educational assistance) qualifies for the PA Resident tuition rate.

For purposes of the Act, a "Veteran" is any individual who served in the United States Armed Forces, including a reserve component or National Guard, and who was discharged or released from service under conditions other than dishonorable.

If you meet any of the above-listed requirements, please provide a copy of the Service Member's DD214 and your Certificate of Eligibility from the VA to the Residency Coordinator at the Pittsburgh campus.

2. Military personnel who are assigned to an active duty station in Pennsylvania and who reside in Pennsylvania, and their spouses and dependent children. If you meet this requirement, please provide a copy, to the Residency Coordinator at the Pittsburgh campus, of the active duty member's orders and a copy of the first page of the most recent IRS Form 1040/1040A displaying the name of the spouse or dependent child, if applicable.

3. Civilian personnel employed at a US Department of Defense facility who are transferred to Pennsylvania by the US Department of Defense and who reside in Pennsylvania, and their spouses and dependent children. If you meet this requirement, please provide a letter, to the Residency Coordinator at the Pittsburgh campus, from the US Department of Defense that documents the transfer to Pennsylvania specifying the name of the person employed, the applicable US Department of Defense facility in Pennsylvania, and the start date, along with a copy of the first page of the most recent IRS Form 1040/1040A displaying the name of the spouse or dependent child, if applicable.

Under the Commonwealth of Pennsylvania Consolidated Statutes Title 51 (Military Affairs), Chapter 32:

1. Service Members of the Pennsylvania National Guard who are receiving the Education Assistance Program (EAP) Grant qualify for the resident tuition rate. Beginning academic year 2020-2021, PA National Guard members' spouses, surviving spouses, and children who are eligible for benefits under the Military Family Education Program (MFEP) also qualify for the resident tuition rate. If you meet these requirements, you will be reclassified to a Pennsylvania resident once you are an enrolled student and the financial aid office has been notified by the Pennsylvania Higher Education Assistance Agency that you have been awarded EAP or MFEP benefits.

Filing Deadlines. Military affiliated students should submit the documentation described in paragraph (1), (2), or (3) above to the PA Residency Coordinator at their campus to request reclassification by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.
- date of classes for the session.

If documentation is submitted after the deadline, the request for reclassification will be effective on the first day of the following term or summer term session. Residency reclassification is not retroactive to any prior terms.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

V. Petitioning and Appealing to Overcome the 12 Month Requirement

A. Filing a Petition

Students whose initial residency classification is Non-Resident because they do not meet the 12 Month Requirement may complete the University's petition form and file it, together with supporting documentation, to the PA Residency Coordinator at their campus. Through the Petition Process and supporting documentation, the student must demonstrate that they:

1. Came to PA for reasons other than enrollment in an institution of higher education; and/or
2. Intend and are able to live in PA permanently or indefinitely upon completion of their academic studies.

Contact information for the PA Residency Coordinator at each campus, the petition form, and its filing instructions, are provided in Section IX-Resources, below.

Petition Deadlines. A student must submit their petition to the PA Residency Coordinator by:

- Fall, Spring, and Summer Terms: no later than 30 calendar days after the first official day of classes for the term.
- Summer session within the Summer Term: no later than 15 calendar days after the first official start date of classes for the session.

Petitions Filed After the Deadline. A petition filed after the deadline will be considered for the following term or summer term session.

Request for Additional Documentation. If additional documentation and information is requested by the PA Residency Coordinator, it must be submitted within 15 days of the date requested. Otherwise, the petition will be denied for that term.

B. Factors Considered

The following factors may be taken into consideration by the University when rendering a decision on a petition or appeal for reclassification. No required number of factors must be met, since each case is decided on the basis of the facts provided, the quality and reliability of the documentation submitted, and *the student's intentions and actual ability to live permanently or indefinitely in PA*.

- Payment of appropriate PA state and local taxes.

- Agreement for permanent, full-time employment in Pennsylvania.
- Lease or purchase of a permanent, independent residence in Pennsylvania by the student.
- Transfer of bank accounts, stocks, automobiles, and other registered property to Pennsylvania from another state.
- Membership in social, civic, political, athletic, and religious organizations located in Pennsylvania.
- Procurement of a Pennsylvania driver's license.
- Procurement of a Pennsylvania motor vehicle registration.
- Registration to vote in Pennsylvania
- A notarized statement by the student or their parent(s) or legal guardian(s) in the case of a minor declaring their intention to make Pennsylvania their residence either permanently or for an indefinite period of time.
- A notarized statement from the parent(s) or legal guardian(s) of a student under the age of 22 setting forth facts to establish the student's financial independence and separate residence. The student should provide financial documentation demonstrating the ability to fully and independently support themselves to substantiate this condition.

C. PA Residency Coordinator Decision

The PA Residency Coordinator will review the petition and supporting documentation, and then render a decision and provide written notification to the student.

If the petition was submitted by the deadline for the term, and the petition is approved, the residency reclassification will remain in effect going forward.

A petition filed after the deadline for a term, if approved, will be effective on the first day of the following term or summer term session. Reclassification is not retroactive to any prior terms.

If the petition is denied, the student has 30 days from the date of notice of denial to inform their PA Residency Coordinator in writing if they wish to appeal by appearing before the University Residency Appeals Committee (the Committee) as noted in Subsection D below. The PA Residency Coordinator will notify the Committee of the student's request.

D. University Residency Appeals Committee

If a student properly files an appeal of the PA Residency Coordinator's decision, the student will be invited to the next regularly scheduled meeting of the Committee so the Committee can review the PA Residency Coordinator's decision. The student has the option to attend that meeting with the Committee to discuss their case and answer questions. After the meeting, the Committee will deliberate and render a final decision that will be provided to the student in writing. If the student wishes to be accompanied to the meeting by legal counsel, the attorney will be limited to observing and cannot participate in the meeting, nor respond to questions on behalf of the student.

If the initial petition form was submitted by the deadline, and the Committee approves the student's appeal, the effective beginning term of reclassification will be term in which the student filed the petition.

If the initial petition form was submitted after the deadline for a term, and the Committee approves the appeal, the effective beginning term of reclassification will be on first day of the following term or summer term session. Reclassification is not retroactive to any prior terms.

VI. Notifications

1. When a student moves from Pennsylvania to another state they must give written notice to their campus PA Residency Coordinator.
2. When parents of a student under 22 years of age move, the student must give written notice of any change in their parent's/parents' or legal guardian's/legal guardians' address to their campus PA Residency Coordinator.

VII. Adjustments and False Information

Students who are found eligible for in-state rates due to an error in classification are subject to retroactive reclassification as Non-Residents and are responsible for the payment of all related tuition and fees.

Students who are found eligible for in-state rates as a result of false or concealed facts are subject to University discipline and are responsible for the immediate payment of all Non-Resident tuition and fees. Failure to make payment in full may result in legal action and additional costs, including legal fees, court costs, and collection costs that may include an additional percentage of the total amount due to the University, if the unpaid account balance is assigned to a Collection Agency.

The University reserves the right to periodically audit and make any necessary adjustment in the classification of all students.

VIII. Governance or Responsibilities

A. Student

- Under 22, notifies the University of a change in residency of their parent(s) or legal guardian(s);
- Notifies the University of a change in their residency status;
- Files a petition with their campus PA Residency Coordinator, if they receive a Non-Resident classification; and
- Notifies their PA Residency Coordinator if they wish to file an appeal of a decision to deny their petition of a Non-Resident classification.

B. PA Residency Coordinator

- Reviews residency petitions and makes decisions on residency classification;
- Communicates results to the student as needed and when appropriate;
- Notifies the University Residency Appeals Committee of a student's appeal of the PA Residency Coordinator's decision on a petition; and
- Provides written notification to the student of the Committee's final decision, if the student has elected to have the Committee review the appeal.

C. University Residency Appeals Committee

- Reviews student appeals; and
- Provides final decisions on residency classification based on information provided during the review of the appeal.

[Petitioning for Eligibility for Reduced Tuition Rates](#)

Instructions for Petitioning

Financial Obligation

Students establish a financial obligation to the University when they enroll in courses and will be asked to acknowledge that obligation to be permitted to enroll in classes each term. The agreement to pay (Promissory Note) the student electronically agrees to provides detailed information about the student's financial obligation and also the consequences of default of that obligation. Unpaid accounts may be referred to a collection agency, reported to credit bureau(s), and/or the student may be subject to legal action. In either case, the student will be responsible for any and all expenses incurred, including attorney fees. Students will bear the University's costs and fees associated with all collection activity resulting from the student's failure to make payment under the agreement they will sign each term.

Fees

Special Service Fees may be charged for University transactions that are processed beyond deadlines, due dates, and specified time limits. Special service fees are listed each term in the Schedule of Classes.

Course Fees are associated with certain courses and will be charged when the student enrolls in those courses. These courses are identified in the Schedule of Classes and Course Descriptions. Course fee information is also available on the Academic Regulations page.

Late Payment Fees are charged when students make payment after the published due date for their charges for the term.

Payments and Credit Balance Refunds

PittPAY is the University's online financial portal for students and the Authorized Users that students have designated as having access to their financial information.

Payments may be made in PittPAY by electronic check (eCheck) or by credit or debit card. While there is no charge for eCheck transactions, our vendor will charge a non-refundable convenience fee for all debit or credit card payments. Check payments can be mailed to the address on the Remittance Form at the bottom of the Term Statement, which students and Authorized Users can generate and print themselves.

International Payments can be processed in PittPAY through the University's partnership with Flywire. Flywire offers a streamlined and cost effective way for students and Authorized Users to make international payments on the student account from almost any country, in most currencies.

PittPAY Payment Plans are available for those who elect to make payments in a series of monthly installments, instead of one payment by the due date. Participation in a payment plan is optional. To view available payment plan offers, go to the Payment Plans tab in PittPAY.

eRefunds are automatic refunds of credit balances from the student account. Credit balances occur when payments to the account, including the disbursement of loans and financial aid, exceed the amount you owe. Students and Authorized Users who are Parent PLUS loan borrowers, go to the eRefund tab in PittPAY to designate the checking or savings account where your credit balances should be directly deposited.

Tuition Rates and Mandatory Fees

Undergraduate Cost of Attendance

Pittsburgh Campus

Cost of Attendance includes Tuition, Mandatory Fees, and Other Estimated Expenses. Tuition and Mandatory Fees are the board-approved rates. Tuition and mandatory fees also apply to the summer term.

Costs charged to the student account include tuition and mandatory fees, on-campus housing, university meal plans, some course materials, and certain program-related fees. Examples of costs that are not charged to the student account are off-campus housing and food, misc. personal expenses, and transportation costs.

Tuition Rates for Pennsylvania Residents

School/College	Full-time, Two terms	Full-time per Term	Part-time per Credit
Dietrich School of Arts and Sciences	\$20,154	\$10,077	\$839
School of Social Work	\$20,154	\$10,077	\$839

*The Other Estimated Expenses displayed are the same for PA and non-PA students. Your actual expenses may vary based on student choice, travel habits, and academic program.

Due Date Schedule

Notifications and Due Dates

Weekly Balance Due Notifications are sent by email and text to students and their Authorized Users from pittpay@pitt.edu when there is a balance due on the student account. To view and edit your email and mobile phone number settings for these notifications, login to PittPAY, select Actions, then Manage Notifications.

Please note, due dates provided here are for planning purposes. The due dates for future terms are estimates, and are subject to change. When balance due notifications begin for each new term, the official due date will be presented in PittPAY on the Account Summary and Account Activity tabs. The current due date is always provided on the Student Payment Center's homepage, as well.

Term	Periodic Balance Due Notifications Begin:	Balance is Due:
Summer 2023	April 19, 2023	May 17, 2023
	May 17, 2023	June 14, 2023
Fall 2023	July 26, 2023	September 13, 2023
Spring 2024	November 15, 2023	January 24, 2024

As soon as you make an online payment in PittPAY, your balance due will be updated to reflect the payment. You can view your payment receipt in Transaction History. Late fees, collection costs, and financial holds are placed on past due accounts.

If you prefer to make monthly payments, learn about the PittPAY Payment Plan. **There is a deadline to enroll in a payment plan each term** and you can take advantage of more monthly installments by enrolling in a plan early.

College of Business Administration

The College of Business Administration (Pitt Business) is the undergraduate division of the Joseph M. Katz Graduate School of Business and awards the Bachelor of Science in Business Administration (BSBA) degree. Detailed information about the College of Business Administration is available at our website: <http://www.cba.pitt.edu/about/>. Pitt Business offers full-time and part-time programs with majors in accounting, business information systems, finance, global management, human resources management, marketing, and supply chain management. Double-degree programs are also available to BSBA students in conjunction with the Dietrich School of Arts and Sciences, School of Information Sciences (SIS) and the College of General Studies. Pitt Business also offers certificate programs in international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics for students in the BSBA degree program.

Additional degree programs include the arts and sciences/business dual major program offered through the Dietrich School of Arts and Sciences in conjunction with Pitt Business, and a post-baccalaureate career development certificate program in accounting available through the College of General Studies. Pitt Business draws its faculty from the Katz School and is accredited by AACSB International-The Association to Advance Collegiate Schools of Business.

Contact Information

University of Pittsburgh
College of Business Administration
Office of Admissions
2100 Sennott Square
Pittsburgh, PA 15260
412-383-9600
admissions@business.pitt.edu
www.cba.pitt.edu

Application Procedures

First-time freshman and external transfer admissions to Pitt Business are handled through the Office of Admissions and Financial Aid. Students planning to relocate to Pitt Business from another Pitt academic program or campus should contact the program in which they are currently enrolled to have their records forwarded to Pitt Business for evaluation. Details for freshman and transfer admissions, as well as for relocation, are provided in the Application for Admission section of this catalog.

Special Admissions

Under certain circumstances, second-degree, post-baccalaureate, and guest students may apply directly to the College of Business Administration for admission. Students applying under one of these statuses are considered for admission based on the strength of their academic records. (See Second Degree Candidates and Special and Nondegree Admissions sections of this catalog for more information.) Contact the Pitt Business Office of Admissions for specifics on admission requirements and other procedures.

Evaluation of Transfer Credits

Students transferring from other colleges or universities are encouraged to apply to the College of Business Administration through the Office of Admissions and Financial Aid. (See Transfer Student Admissions section of this catalog for detailed information.) Upon admission to Pitt Business, transfer students will receive a BSBA degree requirements checklist by email. Pitt Business will evaluate coursework from other colleges based on content and equivalency to coursework offered at the University of Pittsburgh. The degree checklist shows how the transferred courses will apply to the student's BSBA degree. To transfer, a course must be completed with a grade of C or better. The University does not accept grades for transfer, only credits. A minimum of 40 credits must be completed at the University of Pittsburgh. Students who have questions about their credit evaluation should contact the Pitt Business Office of Admissions. Please see our website for additional details on transfer credits:

<http://www.cba.pitt.edu/admissions/transfer/credit-policies>

Academic Standards

The following section details the school's academic standards:

Academic Standing Policy

The academic standing of all BSBA students is reviewed at the end of the fall and spring terms. As a result of this review, students are assigned one of the following academic standing codes: good academic standing, academic probation, academic suspension, or academic dismissal.

Good Academic Standing

Students remain in good standing as long as they maintain a cumulative grade point average (GPA) of 2.00 in all courses taken at the University of Pittsburgh.

The cumulative GPA includes all courses taken on a Letter Grade grading basis at all campuses of the University of Pittsburgh. The course repeat rules require the most recent grade of a repeated course be included in the GPA.

Academic Probation

Any student who has a cumulative GPA below 2.00 is placed on academic probation.

Academic Suspension

Full-time students

If after one term of additional enrollment, the cumulative GPA of a full-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

Students on probation

Students on probation who enroll and then withdraw from all courses are still subject to suspension because they have not raised their cumulative GPA to 2.00 after an additional term of attempted enrollment.

Part-time students

If, after attempting 12 additional credits, the cumulative GPA of a part-time student on probation remains below 2.00, the student is subject to suspension or dismissal.

An academic suspension from Pitt Business prohibits students from enrolling in courses at the University of Pittsburgh for one calendar year. Students will not be awarded transfer credit for courses taken at other colleges or universities while on academic suspension.

Reinstatement after the First Suspension

After one calendar year, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Reinstated students return on academic probation and have one term of enrollment to raise their cumulative GPA to 2.0 or be subject to a second suspension or dismissal.

Second Academic Suspension

If suspended a second time, a student is not eligible for reinstatement for five years. After five years, suspended students are eligible to apply for reinstatement to the College of Business Administration by writing to the Pitt Business Associate Dean presenting a rationale for reinstatement.

Academic Dismissal

Dismissal from Pitt Business is a permanent action, and dismissed students are not eligible for reinstatement at any University of Pittsburgh school or campus.

Grade Point Average Standards

Overall GPA

A cumulative grade point average (GPA) of 2.00 is required in all courses applied toward the BSBA degree.

Major GPA

A minimum cumulative GPA of 2.25 (C+ average) is required in all courses applied toward a student's major. A C- or better must be earned in each individual course applied toward a student's major.

For full-time students: If a full-time student's major GPA drops below 2.25 for two consecutive terms, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

For part-time students: If a part-time student's major GPA drops below 2.25 for 9 consecutive credits in his/her major, no new major courses may be taken until the major GPA is raised to 2.25 through course repeats.

Satisfactory/No-Credit Grade Option Policy

All required BSBA core courses and all courses to be applied to a student's major must be taken on a letter grade basis. In addition, courses taken to fulfill the requirements in microeconomics, macroeconomics, calculus, and statistics must also be taken on a letter grade basis. Language classes, arts and sciences general education courses, and electives may be taken on a satisfactory/no-credit (S/NC) grade basis.

Under the satisfactory/no-credit option, a student who does satisfactory work (C or better) receives the grade of S for the course and earns credit for the course. If a student does unsatisfactory work (defined as C- or lower), the student receives the grade of NC and does not earn credit for the course. These courses are not calculated as part of the GPA.

Students may select the S/NC grade option when enrolling online or by visiting 140 Thackeray Hall and completing the grade option form prior to the appropriate deadline.

Course Repeat Policy

A Pitt Business student may repeat a required Arts & Sciences course (including calculus, statistics, microeconomics, macroeconomics and composition), a business core requirement and/or a business major requirement once. If the minimal acceptable grade is not earned after repeating the course, the student may have to transfer out of Pitt Business, or select a different business major.

In the calculation of the major and overall grade point averages, the grade earned in the second taking of a course replaces the grade earned in the first taking; however, the grade earned in the first taking of the course, remains on the student's transcript with a notation indicating the course was repeated.

Academic Integrity

All Pitt Business students are responsible for adhering to Pitt Business policies on academic integrity. The Pitt Business academic integrity guidelines follow the University's guidelines with some procedural changes. Please see the guidelines for details.

Advising

Students pursuing the BSBA degree receive academic advising from full-time professional academic advisors in the College of Business Administration. Each new BSBA student is assigned an academic advisor, establishing a relationship that usually continues through graduation unless the student requests an advisor assignment change.

Academic advisors are information resources. Advisors meet with BSBA students at least once during the fall and spring academic terms to help students create customized academic and career individual development plans and prepare for course enrollment. BSBA students are required to meet with their academic advisor at least once per term, prior to enrollment.

BSBA students are responsible for their academic and career development choices and decisions, but Pitt Business academic advisors are an integrative information and planning resource for students.

BSBA Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations courses):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate business management literacy.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in professional communication and leadership.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Major and Degree Options

The College of Business Administration offers the following degree options:

BSBA Degree

The College of Business Administration awards the Bachelor of Science in Business Administration (BSBA) degree and offers majors in accounting, business information systems, finance, global management, human resources management, marketing and supply chain management.

Pitt Business Certificate Programs

BSBA students have the opportunity to specialize their studies in business analytics, innovation and entrepreneurship, international business, leadership and ethics, supply chain management, innovation and entrepreneurship and business analytics through certificate programs.

The Certificate Program in Business Analytics (CPBA) is designed to give students a strong foundation in the theory, processes, and tools of business analytics in the organizational setting. The CPBA will help students to understand both the statistical and managerial sides of business analytics so that students can add value to organizations of all sizes and types.

The Certificate Program in Innovation and Entrepreneurship (CPIE) is a unique opportunity for Pitt Business students who wish to explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking.

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship. Students majoring in Global Management may not also earn the Certificate in International Business. (15 credits, plus foreign language study, and international experience).

The Certificate Program in Leadership and Ethics (CPLE) builds upon the core curriculum in the College of Business Administration. Students admitted to the CPLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership. (16 credits)

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

The Certificate Program in Innovation and Entrepreneurship (CPIE) builds upon the core curriculum in the College of Business Administration. CPIE students will explore the interface between innovation and entrepreneurship as an enhancement to their business major. The CPIE will contribute to a student's preparation for an entrepreneurial endeavor or a career within an organization committed to innovation and entrepreneurial thinking. (15 credits)

The Certificate Program in Business Analytics (CPBA) builds upon the core curriculum in the College of Business Administration. CPBA students will develop a comprehensive understanding of business analytics. Students will learn how to diagnose problems and envision solutions from an evidence-based perspective. They will develop the capability to build statistical models, measure the data, interpret the results, and then synthesize the findings in order to improve organizational performance. This holistic education will teach students both the statistical and managerial sides of business analytics. (15 credits)

Pitt Business/A&S Double Degree

Pitt Business offers the double degree program for students seeking to earn degrees in both business and the arts and sciences. Students earning degrees from both Pitt Business and A&S complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and A&S, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Pitt Business/SIS Double Degree

Pitt Business offers a double degree program for BSBA students seeking to earn degrees in both business and information sciences. Students earning degrees from both Pitt Business and SIS complete a 150-credit program of study, generally requiring five years of study. Students considering this option should consult with advisors in both Pitt Business and SIS, as well as a representative from Career Services, to determine how this program will advance their academic and career goals.

Special Academic Opportunities/Programs

The College of Business Administration offers the following special programs:

Internship Programs

Internships and other career development experiences are an absolutely essential part of business education. The Office of Career Development team works closely with business students to prepare them to successfully launch their careers. A wide range of services, including individualized resume development reviews, mock interviews and career coaching are provided by the Career Development team. The Career Development team also works closely with a wide network of employers and alumni to help business students find internships, as well as full-time positions upon graduation.

Additionally, an international internship program is available to qualified Pitt Business students. This six-credit global immersion program provides a valuable professional experience for students to develop their functional skills, gain a better understanding of cultural differences in the workplace, and enhance their language skills. Sites include: Berlin, Germany; San Paulo, Brazil; Dublin, Ireland; Beijing, China; and Madrid, Spain.

Study Abroad

The Pitt Business International Programs Office connects students to opportunities in more than 75 countries, and the insights Pitt Business students gain into other cultures and economies through these experiences abroad helps them stand out in the competitive global marketplace. Each program is designed to promote cultural development and adheres to our standard of academic excellence. For additional details, please visit our website at: http://www.cba.pitt.edu/study_abroad.

Student Organizations

Business students must diversify their experiences at Pitt and develop hands-on leadership skills essential to a career in business. Pitt Business student organizations are a good way to do this. Designed to run like small businesses, the organizations put students in control. We count on members to coordinate speaker visits from the corporate community, to arrange site visits to local offices of financial institutions and accounting firms, to sponsor social activities for members, and much more. As a member of a student organization, you will make friends for life and develop skills that enhance your resume for your first job. For additional details, please visit our website at: <http://www.cba.pitt.edu/studentlife/organizations>.

BSBA Degree Program Descriptions

BSBA students may choose a major in accounting, finance, general management, global management, or marketing. To earn the BSBA degree in any of these majors, students must complete a minimum of 120 credits, fulfill all arts and sciences foundation requirements, complete all BSBA core curriculum requirements, and fulfill any major-specific requirements as detailed below.

Certificate

Sports Management Certificate

A total of 18 credits is needed to complete the CPSM certificate. This includes a 6-credit required core, plus 9 credits of elective courses and a 3-credit required experience-based learning component course, a sport or sports-related internship, or a global sports or sports-related experience. Students are strongly encouraged to participate in related non-credit sports or sports-related immersion experiences such as competitions, workshops sponsored by local sports-based organizations (e.g. WISE workshops) or activities sponsored by sports or sports-related organizations (e.g. Pirates Charities or Pitt Athletics events). The courses outlined have been selected to build a solid business foundation while permitting students an in-depth analysis of a chosen major field complemented by a personal interest in sports.

Required Courses (6 credits)

The following courses are required:

- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSHRM 1689 - SPORTS MANAGEMENT

Elective Courses (9 credits)

Select three (3) from the following (elective choices can correspond to elective choices within the student's major).

- BUSHRM 1675 - HUMAN RESOURCES STAFFING
- BUSHRM 1688 - HUMAN RESOURCE ANALYTICS
- BUSENV 1760 - BUSINESS LAW
- BUSORG 1660 - MANAGING DIVERSITY IN ORGANIZATIONS
- BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
- BUSMKT 1470 - SPORTS MARKETING
- USBIS 1625 - ELECTRONIC COMMERCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT
- BUSSCM 1750 - REVENUE MANAGEMENT
- BUSSCM 1760 - DATA MINING

Experiential Learning Requirement (3 credits)

Select one of the following.

- BUSHRM 1686 - SPORTS MANAGEMENT PROJECT COURSE
- BUSHRM 1690 - HUMAN RESOURCES MANAGEMENT INTERNSHIP

Major

Business Analytics, BSBA

Over a period of just four years, the existing 15 credit Business Analytics Certificate has grown to be the most popular certificate of the college; 15% of spring 2021 graduates earned it. The major proposed here takes the existing required courses of the certificate and adds one more to create an 18 credit major.

The Katz/CBA faculty developed and approved the 18-credit undergraduate Business Analytics major. The proposed 18-credit program would build upon the emphasis on business analytics in the recent curriculum changes recommended by the Undergraduate Programs Committee (UPC) and adopted by the faculty of Katz/CBA.

The foundation for the proposed Business Analytics major is provided by the three the new business analytics courses required of all Pitt Business undergraduate students as a result of the 2021 curriculum revision that was adopted by the Katz/CBA faculty. These courses are part of the business core, a set of courses required of all BSBA students, regardless of major.

Required Courses

The three new, required, foundation courses approved by the faculty are:

- USBIS 0100 PROGRAMMING ESSENTIALS FOR BUSINESS ANALYTICS (3 credits)
- BUSQOM 0101 BUSINESS ANALYTICS 1 (3 credits)
- BUSQOM 0102 BUSINESS ANALYTICS 2 (3 credits)

Students pursuing the Business Analytics major would take five additional required courses and one elective. The five required courses for the proposed Business Analytics major are:

- BUSXXXX: Data Visualization and Storytelling (3 credits)
- BUSQOM 1090 APPLIED OPTIMIZATION AND SIMULATION (3 credits)
- USBIS 1605 DATABASE MANAGEMENT (3 credits)
- BUSSCM 1760 DATA MINING (3 credits)

- BUSQOM 1085 APPLIED BUSINESS ANALYTICS PROJECT (3 credits) (CAPSTONE)

Elective Options

The three-credit elective requirement will be fulfilled by taking courses from the set of existing courses across business areas, e.g., finance, marketing, supply chain (and from outside business if enrollment capacities allow) that have been reviewed for their analytics focus and have been approved by the faculty for fulfilling this requirement.

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION
- BUSQOM 0050 - DECISION ANALYTICS
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSSPP 1080 - STRATEGIC MANAGEMENT
- BUSXXX - XXXX - Elective Course

Total Credits for Major: 27

Total Credits for Degree: 120

Minor

Business for Non-Business Students Minor

This document proposes the creation of an eighteen-credit business minor that will be offered to and taken only by non-business students. The proposed program would include five three-credit courses that are part of the current CBA degree requirements and a specially-developed, three-credit capstone course. The program would admit students who have completed their freshman year who have completed 30 or more University credits and who meet admissions requirements of an overall GPA and performance in program prerequisites. Except for the capstone, students in the minor take classes with CBA students, and would need comparable preparation for those classes. The capstone will be designed for this program as a final, integrative, experiential class and would serve as the vehicle for assessment of student learning in the minor.

Choose 5 of the following (15 credits)

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSQOM 0050 - DECISION ANALYTICS

Required (3 credits)

Department of Business Administration

Certificate

Innovation & Entrepreneurship Certificate

A total of 15 credits are required to complete the CPIE. This includes both required and elective coursework focused on innovation and entrepreneurship. CPIE elective coursework allows students to tailor their program to their specific business major and to one of three "tracks" including: corporate (innovation and development inside the organization), traditional (business ownership), and social impact (social entrepreneurship). The program culminates in an experience-based learning component (EBL). Students can complete the EBL component by selecting an entrepreneurship project course, an entrepreneurship internship, or a global entrepreneurship experience. To earn the CPIE, students must maintain a minimum GPA of 2.25 (C+ average) across all courses in the program.

Students are also strongly encouraged to participate in related non-credit entrepreneurship immersion experiences such as competitions and student organizations.

Required Courses (6 Credits)

The following courses are required:

- BUSORG 1640 - THE ENTREPRENEURSHIP PROCESS
- BUSORG 1645 - CORPORATE ENTREPRENEURSHIP

Selective Required Course (3 credits)

Select one of the following:

- BUSENV 1785 - SOCIAL ENTREPRENEURSHIP
- BUSSPP 1750 - COMMERCIALIZING NEW TECHNOLOGY
- BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
- BUSORG 1665 - LAW, ENTREPRENEURSHIP, AND INNOVATION
- BUSORG 1705 - MINORITY AND IMMIGRANT ENTREPRENEURSHIP

Elective Course (3 credits)

Select one from the following: Note: This course should correspond to elective choices within the student's business major and may also be counted towards the completion of the business major.

- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSFIN 1321 - INVESTMENT MANAGEMENT
- BUSMKT 1426 - ADVERTISING AND SALES PROMOTION
- BUSHRM 1675 - HUMAN RESOURCES STAFFING
- USBIS 1625 - ELECTRONIC COMMERCE
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- USBIS 1630 - PROJECT MANAGEMENT
- BUSENV 1760 - BUSINESS LAW
- ENGR 1060 - SOCIAL ENTREPRENEURSHIP- ENGINEERING FOR HUMANITY
- BUSORG 1701 - SOCIAL ENTREPRENEURSHIP
- BUSORG 1705 - MINORITY AND IMMIGRANT ENTREPRENEURSHIP

Experiential Learning Requirement (3 credits)

Select one of the following:

- BUSENV 1791 - PROJECTS IN ENTREPRENEURSHIP
- Entrepreneurial Internship (3 credits)
- Global Entrepreneurship Experience (3 credits)

International Business Certificate

The Certificate Program in International Business (CPIB) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Requirements include satisfactory completion of level 4 of a second language (a two-year, four-course sequence at the University of Pittsburgh), specialized course work, and one term of approved study abroad or an international internship (3-12 credits). Students majoring in Global Management may not also earn the Certificate in International Business.

Leadership and Ethics Certificate

The Certificate Program in Leadership and Ethics (CPLE) builds upon the core curriculum in the College of Business Administration and is available only to BSBA students. Students admitted to the CPLE will be required to successfully complete all requirements for the BSBA degree requirements including satisfactory completion of specialized course work, internships, and a service-learning project integrating ethics and leadership.

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) is offered jointly by the College of Business Administration and Swanson School of Engineering. Enrollment is available to BSBA students and students enrolled in the BS engineering programs in the School of Engineering. The CSCM provides students with the opportunity to understand important concepts in supply chain management and develop managerial and technical skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations. The CSCM requires 15 credits and is comprised of coursework offered by both CBA and the School of Engineering.

Program Requirements

1. IE 1080 - SUPPLY CHAIN ANALYSIS - 3 Credits (BUSQOM 1070 is for business students only)
2. BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS - 3 Credits
3. **CBA Supply Chain Elective Course** - 3 Credits - Choose one of the following:
 - BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT
 - BUSSCM 1750 - REVENUE MANAGEMENT
4. **Industrial Engineering Elective Course** - 3 Credits - Choose one of the following:
 - IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING (Note that since Industrial Engineering (IE) students are required to take IE 1055, they must take one of the other courses from this list. Prerequisites can be waived for non-IE engineering students on a case-by-case basis.)
 - IE 1045 - TRANSPORTATION PLANNING METHOD: OR APPLICATIONS
 - IE 1102 - LEAN SIX SIGMA I (GREEN BELT)
 - IE 1203 - WAREHOUSE OPERATIONS
 - IE 1204 - APPLIED SUPPLY CHAIN ANALYTICS
5. **Global Supply Chain Project Elective Course** - 3 Credits - Choose one of the following:
 - BUSSP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE (does not require travel)
 - ENGR 1228 - EXCHANGE URUGUAY-UNIVERSITY OF MONTEVIDEO
 - ENGR 1450 - ENGINEERING- THE GERMAN WAY
 - ENGR 1600 - INTERNATIONAL TECHNOLOGY: INNOVATION AND LEADERSHIP
 - ENGR 1625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA
 - *Other international project courses may also be considered*

In addition, the student must obtain a grade of C or better in each course counted toward the Certificate and a minimum QPA of 2.25 (C+ average) across all courses in the Certificate.

Joint Major

Business Information Systems, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

120 credits are required for graduation with a BSBA degree. A minimum of 41 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCOMP 0201 or ENGCOMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCOMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)

- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Design Specialization Concentration

In the Design Specialization ARCO, students gain design thinking skills that help integrate the needs of people, the possibilities of technologies, and the requirements for business success. Students will tackle real-world business issues and learn to create solutions that are functional, emotionally meaningful, and economically viable.

Required Course

Students earning the Design Specialization ARCO will have to complete the following required course:

- BUSBIS 1655 - DESIGN THINKING

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Enterprise Systems Specialization Concentration

Enterprise systems are the backbone of vital business processes of firms, including enterprise resource planning, supply chain management, and customer relationship management functions. In this track students will learn about the important business processes, their interconnections, and the ways systems can be configured and used to facilitate those business processes.

Required Course

Students earning the Enterprise Systems Specialization ARCO will have to complete the following required course:

- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

IS Consulting Specialization Concentration

IS Consulting is the practice of working with organizations to improve their performance. This ARCO prepares a student to be a consultant who has mastered the hard and soft skills needed to work with a client and engage over an IS Implementation.

Required Course

Students earning the IS Consulting Specialization ARCO will have to complete the following required course:

- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

Project Management Specialization Concentration

The Project Management ARCO prepares a student to master the skills for handling IS Projects. A project is a time bound endeavor with a specific goal. Almost all initiatives in the industry are managed through projects which needs a thorough understanding of Project Management skills to succeed. This track prepares a student to master the skills needed to be a successful Project Manager.

Required Course

Students earning the Project Management Specialization ARCO will have to complete the following required course:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Requirements

The major in accounting is designed to provide students with the general, business, and accounting knowledge necessary for them to succeed as professional accountants. As accounting is a dynamic field, all accounting majors will learn how to keep their knowledge up to date so they can continue to grow throughout their professional careers. Accounting majors will acquire the communication, computer, and interpersonal skills necessary to successfully resolve complex problems in unstructured settings. Accounting majors benefit from participation in extracurricular activities and organizations such as the University of Pittsburgh Accounting Association and Beta Alpha Psi, the national accounting honorary society.

All accounting majors must complete the two (2) BSBA core courses in accounting, two (2) Intermediate Financial Reporting Courses, and choose four (4) other accounting major courses from the list below for a total of eight (8) Accounting classes for 24 credits (6 credits of BSBA core and 18 credits of Accounting Major courses). All courses are three credits unless noted otherwise.

BSBA Core Courses in Accounting (6 Credits)

Students must complete these courses with a C or better in each course to be eligible to take additional accounting courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING

Required Accounting Courses for all Accounting Majors (6 Credits)

Courses are offered on a rotating basis.

- BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1
- BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2

Choose 4 Accounting Courses from this List (12 Credits)

Courses are offered on a rotating basis.

- BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
- BUSACC 1221 - STRATEGIC COST MANAGEMENT
- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSACC 1238 - AUDITING
- BUSACC 1242 - TAXES AND DECISION MAKING
- BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS

Additional Accounting Electives

- BUSACC 1296 - ACCOUNTING INTERNSHIP (requires CBA approval)
- BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY (requires CBA approval)

BSBA Program Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Students preparing for the Certified Public Accounting (CPA) Exam will need to complete 150 total credit hours. These credits may be completed through the BSBA program and/or through the MS in Accounting program. Particular CPA Exam requirements vary by state. Academic Advisors and members of the Accounting faculty provide guidance to students preparing for the CPA exam, but students are responsible for confirming with the appropriate state board of accountancy that all educational and experiential requirements are met.

Finance, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

120 credits are required for graduation with a BSBA degree. A minimum of 41 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCOMP 0201 or ENGCOMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCOMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Design Specialization Concentration

In the Design Specialization ARCO, students gain design thinking skills that help integrate the needs of people, the possibilities of technologies, and the requirements for business success. Students will tackle real-world business issues and learn to create solutions that are functional, emotionally meaningful, and economically viable.

Required Course

Students earning the Design Specialization ARCO will have to complete the following required course:

- BUSBIS 1655 - DESIGN THINKING

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Enterprise Systems Specialization Concentration

Enterprise systems are the backbone of vital business processes of firms, including enterprise resource planning, supply chain management, and customer relationship management functions. In this track students will learn about the important business processes, their interconnections, and the ways systems can be configured and used to facilitate those business processes.

Required Course

Students earning the Enterprise Systems Specialization ARCO will have to complete the following required course:

- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

IS Consulting Specialization Concentration

IS Consulting is the practice of working with organizations to improve their performance. This ARCO prepares a student to be a consultant who has mastered the hard and soft skills needed to work with a client and engage over an IS Implementation.

Required Course

Students earning the IS Consulting Specialization ARCO will have to complete the following required course:

- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

Project Management Specialization Concentration

The Project Management ARCO prepares a student to master the skills for handling IS Projects. A project is a time bound endeavor with a specific goal. Almost all initiatives in the industry are managed through projects which needs a thorough understanding of Project Management skills to succeed. This track prepares a student to master the skills needed to be a successful Project Manager.

Required Course

Students earning the Project Management Specialization ARCO will have to complete the following required course:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Requirements

The major in finance is designed to provide students with the financial knowledge and skills required for a successful business career. It attempts to give students a thorough understanding of the theoretical financial principles and the practical implementation of these principles in the world of business. Students learn how financial markets operate and how to make effective investment and financial decisions. The major is designed to develop analytical skills and problem-solving abilities.

Finance knowledge and practice have become crucial for the success of corporations and of the individuals employed by them. Financial markets are the major conduits through which investments are channeled in the global marketplace.

Understanding these markets and how to make investment decisions are crucial for success in business.

In addition to the BSBA core course, BUSFIN 1030 - INTRODUCTION TO FINANCE, at least fifteen (15) credits in finance course work are required for the finance major.

BSBA Core Course in Finance

This course must be completed with a C or better to take additional finance courses:

- BUSFIN 1030 - INTRODUCTION TO FINANCE

Required Finance Major Courses

- BUSFIN 1311 - CORPORATE FINANCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT

Finance Electives

Courses are offered on a rotating basis.

(A minimum of three courses must be taken.)

- BUSFIN 1316 - ADVANCED CORPORATE FINANCE
- BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
- BUSFIN 1327 - RISK MANAGEMENT
- BUSFIN 1328 - CAPITAL MARKETS
- BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS
- BUSFIN 1341 - INTERNATIONAL FINANCE
- BUSFIN 1345 - MARKETS AND TRADING
- BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES

- BUSFIN 1351 - FINANCIAL MODELING
- BUSFIN 1354 - Valuation
- BUSFIN 1390 - FINANCE INTERNSHIP
- BUSFIN 1395 - FINANCE INDEPENDENT STUDY

BSBA Program Learning Goals

Graduates of the University of Pittsburgh's College of Business Administration should achieve the following learning outcomes in the four broad components of the BSBA program (major, electives, core and foundations):

Demonstrate in-depth knowledge and skills in at least one academic/career focus through completion of majors, certificates, minors and electives.

Demonstrate what every BSBA graduate is expected to know about business and management at graduation. This literacy is developed in courses taught in CBA and in particular courses required of all students and offered by the School of Arts and Sciences.

Demonstrate competency in the fundamentals of analyzing problems and making decisions with standard business data and data sources using appropriate quantitative and qualitative methodologies.

Demonstrate competency in interpersonal skills, including concise and persuasive written and presentation communication.

Demonstrate competency in applying acquired knowledge and skills in real-world situations.

Acquire a basic knowledge of at least one nation, region or culture in areas such as language, history, political systems, literature and artistic expression.

Acquire an exposure to the knowledge and methodologies used to explore natural, individual, social and cultural phenomena.

Total Credits: 6

Requirements

The major in general management provides students with interests in more than one discipline with the flexibility to concentrate their elective course work in two areas. Course work in the areas noted below may be used for the general management major. Courses with significant international content are offered in several areas. Students with international business interests should also consider a study abroad program.

The core courses in the two focused areas of study must be completed with a C or better to take additional courses in those areas. Courses are offered on a rotating basis.

Accounting

- BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1
- BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2
- BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS
- BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING
- BUSACC 1221 - STRATEGIC COST MANAGEMENT
- BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS
- BUSACC 1238 - AUDITING
- BUSACC 1242 - TAXES AND DECISION MAKING
- BUSACC 1296 - ACCOUNTING INTERNSHIP *
- BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY **

Finance

- BUSFIN 1311 - CORPORATE FINANCE
- BUSFIN 1316 - ADVANCED CORPORATE FINANCE
- BUSFIN 1321 - INVESTMENT MANAGEMENT
- BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS
- BUSFIN 1327 - RISK MANAGEMENT
- BUSFIN 1328 - CAPITAL MARKETS

- BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS
- BUSFIN 1341 - INTERNATIONAL FINANCE
- BUSFIN 1345 - MARKETS AND TRADING
- BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES
- BUSFIN 1351 - FINANCIAL MODELING
- BUSFIN 1355 - VALUATION
- BUSFIN 1390 - FINANCE INTERNSHIP *
- BUSFIN 1395 - FINANCE INDEPENDENT STUDY **

Human Resources Management

- BUSHRM 1665 - NEGOTIATING IN BUSINESS
- BUSHRM 1670 - GLOBAL WORKFORCE MANAGEMENT AND CHANGE
- BUSHRM 1675 - HUMAN RESOURCES STAFFING
- BUSHRM 1680 - COMPENSATION AND PERFORMANCE MANGEMENT
- BUSHRM 1685 - EMPLOYMENT AND LABOR RELATIONS
- BUSHRM 1690 - HUMAN RESOURCES MANGEMENT INTERNSHIP *
- BUSHRM 1695 - HUMAN RESOURCES MANGEMENT INDEPENT STUDY **

Management Information Systems

- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- BUSBIS 1600 - TECHNOLOGY-ENABLED BUSINESS TRANSFORMATION
- BUSBIS 1605 - DATABASE MANAGEMENT
- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1630 - PROJECT MANAGEMENT
- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
- BUSBIS 1615 - BUSINESS INFORMATION SYSTEMS INTERNSHIP
- BUSBIS 1620 - BUSINESS INFORMATION SYSTEMS INDEPENDENT STUDY

Marketing

- BUSMKT 1411 - MARKETING RESEARCH
- BUSMKT 1422 - PRINCIPLES OF SELLING
- BUSMKT 1425 - SALES LEADERSHIP AND MANAGEMENT
- BUSMKT 1426 - ADVERTISING AND SALES PROMOTION
- BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
- BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
- BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
- BUSMKT 1435 - SERVICES MARKETING
- BUSMKT 1441 - CONSUMER BEHAVIOR
- BUSMKT 1451 - RETAIL MANAGEMENT
- BUSMKT 1461 - INTERNATIONAL MARKETING
- BUSMKT 1481 - BRAND MANAGEMENT
- BUSMKT 1485 - PROJECTS IN MARKETING
- BUSMKT 1490 - MARKETING INTERNSHIP *
- BUSMKT 1495 - MARKETING INDEPENDENT STUDY **

Supply Chain Management

- BUSQOM 1725 - GLOBAL SUPPLY NETWORKS AND MANUFACTURING CULTURES IN LATIN AMERICA
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS
- BUSQOM 1790 - SUPPLY CHAIN MANAGEMENT INTERNSHIP *

Organizational Behavior

- BUSORG 1640 - THE ENTREPRENEURSHIP PROCESS
- BUSORG 1645 - CORPORATE ENTREPRENEURSHIP
- BUSORG 1655 - INTERNATIONAL DIMENSIONS OF ORGANIZATIONAL BEHAVIOR
- BUSORG 1660 - MANAGING DIVERSITY IN ORGANIZATIONS
- BUSORG 1670 - ORGANIZATIONAL BEHAVIOR INDEPENDENT STUDY **

Note:

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

Global Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

120 credits are required for graduation with a BSBA degree. A minimum of 41 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCOMP 0201 or ENGCOMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCOMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I
or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

BUS 0020 - YOUR CAREER SUCCESS This one-credit course is required of all new CBA transfer students. In the course, students will participate in career exploration, develop and implement a personal strategy for career goal setting and planning, learn and practice communication and other professional skills, and become familiar with the internship and job search processes.

Design Specialization Concentration

In the Design Specialization ARCO, students gain design thinking skills that help integrate the needs of people, the possibilities of technologies, and the requirements for business success. Students will tackle real-world business issues and learn to create solutions that are functional, emotionally meaningful, and economically viable.

Required Course

Students earning the Design Specialization ARCO will have to complete the following required course:

- BUSBIS 1655 - DESIGN THINKING

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Enterprise Systems Specialization Concentration

Enterprise systems are the backbone of vital business processes of firms, including enterprise resource planning, supply chain management, and customer relationship management functions. In this track students will learn about the important business processes, their interconnections, and the ways systems can be configured and used to facilitate those business processes.

Required Course

Students earning the Enterprise Systems Specialization ARCO will have to complete the following required course:

- BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1625 - ELECTRONIC COMMERCE
- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

IS Consulting Specialization Concentration

IS Consulting is the practice of working with organizations to improve their performance. This ARCO prepares a student to be a consultant who has mastered the hard and soft skills needed to work with a client and engage over an IS Implementation.

Required Course

Students earning the IS Consulting Specialization ARCO will have to complete the following required course:

- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

Project Management Specialization Concentration

The Project Management ARCO prepares a student to master the skills for handling IS Projects. A project is a time bound endeavor with a specific goal. Almost all initiatives in the industry are managed through projects which needs a thorough understanding of Project Management skills to succeed. This track prepares a student to master the skills needed to be a successful Project Manager.

Required Course

Students earning the Project Management Specialization ARCO will have to complete the following required course:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Requirements

The global management major enables students to develop expertise in important dimensions of management in a global context. The GLMGT major requires six (6) courses exposing students to the management of people (International Dimensions of Organizational Behavior, Global Workforce Policy), process (Managing Global Supply Chains), and policy (International Economic Issues for Managers; Global Strategy and Competitive Advantage), plus an integrative, senior-level course, focusing on either a company project or a major global industry. We see these three dimensions as intertwined and mutually critical for those who seek to add value to the management function of today's organizations and the firms of tomorrow. To the core understanding of a traditional management foundation, we add knowledge of a second language at the conversational level with the goal of preparing students to conduct business in a second language.

Second Language Requirement

Global management majors must complete second language study through Level 4 at the University of Pittsburgh with a minimum grade of C+ in each course, along with an additional 3-credit course in the language, also to be completed with a minimum grade of C+. If, for a particular language, the University offers instruction only through Level 4, this requirement is fulfilled by 3 credits of a course specific to the region in which the language is widely spoken, completed with a minimum grade of C+. For students already fluent in a second (or third) language, it is required that they will earn at least 8 credits in another language with a minimum grade of C+ in each course.

A student is not permitted to earn both a Global Management major and a Certificate in International Business.

Required Global Management Major Courses

Earn a minimum grade of C (2.00) in each of the following prerequisites to GLM courses:

- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Global management majors must successfully complete the following courses

Global management majors must successfully complete the following courses with a C- or better in each course and a cumulative grade point average of 2.25.

- BUSORG 1655 - INTERNATIONAL DIMENSIONS OF ORGANIZATIONAL BEHAVIOR
- BUSECN 1508 - INTERNATIONAL ECONOMICS FOR MANAGERS
- BUSHRM 1670 - GLOBAL WORKFORCE MANAGEMENT AND CHANGE
- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
- BUSSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE

Note:

Global management majors must also earn a minimum GPA of 2.25 in nine (9) credits of second language beyond Level II or 6 credits of language beyond Level II plus 3 credits of a course specific to the region in which the language is widely spoken.

Complete a study abroad experience of at least four weeks in an internationally-based educational or work experience, preferably one making active use of a student's second language training. With permission, up to six (6) credits of the major area courses may be taken abroad as part of a semester study outside of the U.S. Permission will be based on examination of all course material.

* Plans for Internships must be approved by CBA Career Services before registration for the course is permitted. Internships will not be counted toward fulfilling Major requirements for students declaring after August 26, 2012.

** Plans for Independent Study courses must be approved by the Associate Dean before registration for the course is permitted.

Human Resources Management, BSBA

BSBA Degree Requirements

The following sections describe the general requirements for all majors within the Bachelor of Science in Business Administration (BSBA) degree program:

The degree requirements applicable to a particular student are based upon the student's term of entry into the program and reflect any requirement changes that have been approved since this bulletin was published. These requirements and the student's progress toward the BSBA degree are noted on the student's online Undergraduate Advisement Transcript.

Graduation Requirements

120 credits are required for graduation with a BSBA degree. A minimum of 41 credits must be taken in the arts and sciences.

A student may use one course to fulfill two arts and sciences requirements.

Arts and Sciences Foundations: Basic Skills Requirements

There are seven basic skills that all BSBA students must master; these basic skills prepare students for future classes. The basic skills requirements include:

English Composition

- Students who earn 500 or above on SAT Verbal (Critical Reading) are placed into Seminar in Composition (or equivalent course).
- Students who earn below 500 on SAT Verbal (Critical Reading) will be placed into a Workshop in Composition course.
- Recommendations for ENGCOMP 0201 or ENGCOMP 0151 (tutorials) will be based on class diagnostic writing during add/drop period.
- English as a Second Language students will be placed into appropriate courses based on English Language proficiency.

All students are strongly encouraged to complete their English composition requirement(s) in the freshman year.

Students earning a score of 600 on the critical reading portion of the SAT, who also earn a score of 5 on the Advanced Placement (AP) English exam, will be awarded advanced standing credit for ENGCOMP 0200 - SEMINAR IN COMPOSITION and 3 additional credits in English composition.

Second Language

Any one of the following fulfills the language requirement:

- Three years of study of a single second language in high school, passed with an average of C or better over the three years.
- Placement into level III of a second language on a University of Pittsburgh language placement test.
- Placement into level II of a second language on a University of Pittsburgh language placement test and completion of the appropriate course from the second course list below.
- Completion of an approved two course sequence of a foreign language.

Students should discuss specific foreign language course options with their academic advisor.

Calculus

Taking one course from the following list fulfills this requirement:

Note: *Only one of these courses may apply to the 120 total credits required for graduation.*

- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I
or both
- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2

Statistics

- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT fulfills this requirement.

Economics

Both of the following courses must be taken to fulfill this requirement:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY

Arts and Sciences General Education Electives

In addition to fulfilling the basic skills requirements, students further supplement their business curriculum by taking courses from six general education categories including:

- Literature (one course)
- Music/art (one course)
- Philosophy (one course)
- Social sciences (two courses, each from a different discipline)
- Natural sciences (two courses)
- Foreign culture (two courses or participation in an approved study abroad program)

Note: *All students, including international students and U.S. citizens who have lived abroad for any length of time, must complete the foreign culture requirement.*

Contact the school for a complete listing of approved courses that meet these elective requirements.

Business Core Curriculum

The Business Core Curriculum:

The following courses (36 credits) are required of all CBA students:

- BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION (prerequisite 30 credits)
- BUSFIN 1030 - INTRODUCTION TO FINANCE (prerequisite 30 credits)
- BUSMKT 1040 - INTRODUCTION TO MARKETING (prerequisite 30 credits)
- BUSECN 1010 - MANAGERIAL ECONOMICS (prerequisite 30 credits)
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Other Business Requirements

CBA students must also satisfy one of the following requirements:

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS This one-credit course is required of all first-time CBA freshmen. In the course, new BSBA students will explore the majors offered in CBA, investigate global opportunities, develop networking and professional skills, create a resume, and learn how to connect with CBA's Career Services team regarding events, internship opportunities, and career development.

Requirements

The major in marketing is designed to provide students with the conceptual background and practical skills necessary to address questions such as what new products a firm should introduce, how products should be priced, how to identify the best channels of distribution, and how best to promote new and existing products. Students majoring in marketing can pursue careers in retailing, sales management, marketing research, advertising and promotion, consumer product marketing, or industrial marketing.

In addition to the general BSBA requirements, 18 credits in marketing course work, plus the BSBA core course BUSMKT 1040 - INTRODUCTION TO MARKETING, are required for the marketing major.

BSBA Core Course in Marketing

Students must complete this course with a C or better to be eligible to take additional marketing courses:

- BUSMKT 1040 - INTRODUCTION TO MARKETING

Required Marketing Major Courses

- BUSMKT 1411 - MARKETING RESEARCH
- BUSMKT 1441 - CONSUMER BEHAVIOR

Marketing Electives

Courses are offered on a rotating basis.

(A minimum of four courses must be taken.)

- BUSMKT 1422 - PRINCIPLES OF SELLING
- BUSMKT 1425 - SALES LEADERSHIP AND MANAGEMENT
- BUSMKT 1426 - ADVERTISING AND SALES PROMOTION
- BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
- BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
- BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
- BUSMKT 1435 - SERVICES MARKETING
- BUSMKT 1451 - RETAIL MANAGEMENT
- BUSMKT 1461 - INTERNATIONAL MARKETING
- BUSMKT 1481 - BRAND MANAGEMENT
- BUSMKT 1485 - PROJECTS IN MARKETING
- BUSMKT 1490 - MARKETING INTERNSHIP (requires CBA approval)
- BUSMKT 1495 - MARKETING INDEPENDENT STUDY (requires CBA approval)

- BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS

Supply Chain Management, BSBA

IS Consulting is the practice of working with organizations to improve their performance. This ARCO prepares a student to be a consultant who has mastered the hard and soft skills needed to work with a client and engage over an IS Implementation.

Required Course

Students earning the IS Consulting Specialization ARCO will have to complete the following required course:

- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
- BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
- BUSBIS 1670 - DATA WAREHOUSING

Total Credits: 6

Project Management Specialization Concentration

The Project Management ARCO prepares a student to master the skills for handling IS Projects. A project is a time bound endeavor with a specific goal. Almost all initiatives in the industry are managed through projects which needs a thorough understanding of Project Management skills to succeed. This track prepares a student to master the skills needed to be a successful Project Manager.

Required Course

Students earning the Project Management Specialization ARCO will have to complete the following required course:

- BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Course Options

In addition to the required course, students must complete one of the courses from the following list:

- BUSBIS 1640 - IT ARCHITECTURE & PLATFORMS
- BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
- BUSBIS 1655 - DESIGN THINKING
- BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Total Credits: 6

Pitt Business

Arjang Assad, Henry E. Haller Jr. Dean, MIT

Robert S. Atkin, Clinical Professor, PhD, University of Pittsburgh

Haimanti Banerjee, Clinical Assistant Professor, PhD, University of Iowa

Heidi Bartholomew, Clinical Assistant Professor of Business Administration and Faculty for the Kenneth R. Woodcock Leadership Fellows Program

Jacob G. Birnberg, Robert W. Murphy Jr. Professor of Management Control Systems Emeritus, PhD, University of Minnesota

Andrew R. Blair, Professor of Business Administration and of Economics, PhD, Fordham University

Elise Boyas, Clinical Assistant Professor

Nicole Cade, Assistant Professor, PhD, University of Washington

John C. Camillus, Donald R. Beall Professor of Strategic Management, Doctor of Business Administration, Harvard University

Rabikar Chatterjee, Associate Dean, Gulf Oil Foundation Professor of Business, PhD, University of Pennsylvania

Jongwoon (Willie) Choi, Ben L. Fryrear Faculty Fellow and Assistant Professor, PhD, Emory University

Susan K. Cohen, Associate Professor, PhD, University of Minnesota

Nicole Verrochi Coleman, Assistant Professor of Business Administration, PhD, University of Pennsylvania

James A. Craft, Professor of Business Administration, PhD, University of California at Berkeley

David J. Denis, Roger S. Ahlbrandt, Sr. Chair and Professor of Business Administration, PhD, University of Michigan

Diane K. Denis, Katz Alumni Chair in Finance, Professor of Business Administration, and Area Director for Finance, PhD, University of Michigan

John Harry Evans III, Katz Alumni Professor of Accounting and Area Director for Accounting, PhD, Carnegie Mellon University

Lawrence Feick, Professor of Business Administration, PhD, The Pennsylvania State University

Mei Feng, Associate Professor of Business Administration, PhD, University of Michigan

Gary Florkowski, Associate Professor of Business Administration, PhD, Syracuse University

Richard Franklin, Clinical Assistant Professor of Business Administration, MS in Information Science, University of Pittsburgh

Esther Gal-Or, Glenn Stinson Chair in Competitiveness, PhD in Managerial Economics and Decision Sciences, Northwestern University

Dennis Galletta, Professor of Business Administration and Director of the Doctoral Program, PhD, University of Minnesota

Tansev Geylani, Associate Professor of Business Administration, PhD, Carnegie Mellon University

Robert J. Gilbert, Clinical Associate Professor of Business Administration, PhD, University of Pittsburgh

Kimberly Gleason, Clinical Associate Professor of Business Administration

Deborah Good, Clinical Assistant Professor of Business Administration

Josh Gunn, Assistant Professor of Business Administration, PhD, University of Missouri

Paul Harper, Clinical Assistant Professor of Business Administration, University of Virginia

G.G. Hegde, Associate Professor of Business Administration, PhD, University of Rochester

Vicky B. Hoffman, Professor of Business Administration and James H. Rossell Endowed Faculty Fellow, PhD, University of Michigan

Brian Hogan, Clinical Assistant Professor of Business Administration, PhD, Case Western University

Zia Hydari, Assistant Professor of Business Administration, PhD, Carnegie Mellon University

J. Jeffrey Inman, Associate Dean for Research and Faculty Albert Wesley Frey Professor of Marketing and Professor of Business Administration, PhD, University of Texas

Ray Jones, Clinical Associate Professor of Business Administration, Mehta Family Faculty Fellow, and Coordinator, Certificate Program in Leadership and Ethics, PhD, University of Pittsburgh

Folke Kafka, Clinical Associate Professor of Business Administration, PhD, University of Pittsburgh

Jocelyn D. Carlin, CPA, Clinical Assistant Professor of Business Administration, MS, Duquense University

Chris F. Kemerer, David M. Roderick Professor of Information Systems, Professor of Business Administration, and Area Director for Information Systems and Technology Management, PhD, Carnegie Mellon University

James F. Kimpel, Clinical Associate Professor of Business Administration, D.Sc, Robert Morris University

Laurie J. Kirsch, Vice Provost for Faculty Development and Professor of Business Administration, PhD, University of Minnesota

Paul Klein, Clinical Associate Professor of Business Administration, J.D., Duquense University

Andrew Koch, Assistant Professor of Business Administration, PhD, University of Texas

Cait Lamberton, Ben L. Fryrear Chair of Marketing and Associate Professor of Marketing, PhD, University of South Carolina

Carrie Leana, George H. Love Professor of Organizations and Management; Secondary Appointments in the School of Medicine, the School of Public and International Affairs, and the Learning Research and Development Center, PhD, University of Houston

R. David Lebel, Assistant Professor of Business Administration, PhD, University of Pennsylvania

Kenneth M. Lehn, Samuel A. McCullough Professor of Finance, PhD, Washington University

Chan Li, Associate Professor of Business Administration and Robert L. Worthington Faculty Fellow, PhD, University of Kansas

Leming Lin, Assistant Professor of Business Administration, PhD, University of Florida

Peggy Liu, Assistant Professor of Business Administration, PhD, Duke University

Ravi Madhavan, Professor of Business Administration, Alcoa Foundation International Faculty Fellow, and Director of the International Business Center, PhD, University of Pittsburgh

Ronald A. Magnuson, Clinical Assistant Professor of Business Administration, MBA, Mount St. Mary's College

Kiersten M. Maryott, Clinical Assistant Professor of Business Administration, PhD, Duke University

Jerrold H. May, Professor of Business Administration, PhD, Yale University

Prakash Mirchandani, Professor of Business Administration, Director of the Center for Supply Chain Management, PhD, MIT

Barry M. Mitnick, Professor of Business Administration and Professor of Public and International Affairs, PhD, University of Pennsylvania

Sara B. Moeller, Associate Professor of Business Administration, PhD, Ohio State University

Donald V. Moser, Professor of Business Administration and Dean's Excellence Faculty Fellow, PhD, University of Wisconsin

Audrey J. Murrell, Associate Dean, College of Business Administration, Director, David Berg Center for Ethics and Leadership, Associate Professor of Business Administration, Psychology, Public and International Affairs, and Kenneth R. Woodcock Faculty Fellow, PhD, University of Delaware

Nisha Nair, Clinical Assistant Professor of Business Administration, PhD, IIM Ahmedabad

Josephine E. Olson, Professor of Business Administration and Katz Excellence in Service Fellow, PhD, Brown University

Eric Paljug, Clinical Associate Professor of Business Administration, PhD, University of Pennsylvania

Marios Panayides, Assistant Professor of Business Administration, PhD, Yale University

G. Richard Patton, Clinical Associate Professor of Business Administration, PhD, Purdue University

Anna Marie Pavone, Clinical Assistant Professor, MBA, University of Pittsburgh

Frits K. Pil, Professor of Business Administration and Research Scientist, PhD, University of Pennsylvania

John E. Prescott, Thomas O'Brien Chair of Strategy, Professor of Business Administration, and Area Director for Organizations and Entrepreneurship

Adam Presslee, Assistant Professor of Business Administration, PhD, University of Waterloo

Narayan Ramasubbu, Associate Professor of Business Administration, PhD, University of Michigan

Lauren C. Reid, Assistant Professor of Business Administration, University of Tennessee

Anthony F. Rodi, Clinical Associate Professor of Business Administration, D.Sc., Robert Morris University

Thomas L. Saaty, Distinguished University Professor, PhD, Yale University

Akin Sayrak, Visiting Assistant Professor of Business Administration

Frederik P. Schlingemann, Associate Professor of Business Administration, PhD, Ohio State University

Jennifer Shang, Professor of Business Administration and Area Director for Business Analytics and Operations, PhD, University of Texas

Karen Shastri, Clinical Associate Professor of Business Administration and Director of the Masters of Science in Accounting Program, PhD, University of Pittsburgh

Dennis Patrick Slevin, Professor of Business Administration, PhD, Stanford University

George M. (Bud) Smith Jr., Visiting Clinical Professor, M.S., MIT

Dhinu Srinivasan, Associate Professor of Business Administration, PhD, University of Minnesota

Jay W. Sukits, Clinical Assistant Professor of Business Administration, MBA, Harvard University

Vanitha Swaminathan, Thomas Marshall Professor of Marketing, PhD, University of Georgia

Pandu R. Tadikamalla, Professor of Business Administration, PhD, University of Iowa

Ryan A. Teeter, PhD, Rutgers University

Shawn Thomas, Professor of Business Administration and J.R. Allen Faculty Fellow, PhD, University of Florida

Gary Tsarsis, Clinical Assistant Professor of Business Administration, PhD, Pace University

Luis Vargas, Professor of Operations, Decision Science and Artificial Intelligence, PhD, University of Sevilla

R. Venkatesh, Professor of Business Administration and Area Director, Marketing & Business Economics, PhD, University of Texas

Andrew Washburn, Clinical Assistant Professor, MBA, Harvard University

Richard E. Wendell, Professor of Business Administration, PhD, Northwestern University

Yun-Oh Whang, Clinical Assistant Professor of Business Administration, PhD, University of Southern California

Eugenia Wu, Assistant Professor of Business Administration and Katz Faculty Fellow in Marketing, PhD, Duke University

Yue Wu, Assistant Professor of Business Administration, PhD, INSEAD

Chad J. Zutter, Associate Professor of Business Administration and Dean's Excellence Faculty Fellow, PhD, Indiana University

College of General Studies

The College of General Studies (CGS) provides adult and nontraditional students with a wide variety of learning options. Students who enroll in the College of General Studies can complete a Bachelor of Arts or Bachelor of Science degree in career-oriented fields and in concentrations in the arts and sciences. In addition to a degree, students may prepare for transfer to any of the University's upper-division and professional schools. The College also offers a wide range of certificate programs in specialized fields such as health services, accounting, and information sciences. For those students who already have a degree but desire career-related study or preparation for graduate study, the College of General Studies permits them to register in a non-degree program. The College of General Studies uses the same faculties as the Dietrich School of Arts and Sciences and the professional schools of the University to provide instruction.

Professors and instructors teaching for the College of General Studies come from several undergraduate and professional schools across the University of Pittsburgh. CGS instructors include full-time faculty, regular part-time faculty, adjunct, graduate students, and professionals and leaders from throughout the greater Pittsburgh region. A list of CGS-affiliated instructors is available on the CGS Web site.

The College of General Studies targets its curriculum to adult and transfer students who have been out of high school at least two years. Most of the students attending the College have full-time work or family responsibilities and therefore take full advantage of the unique delivery systems available for instruction. Students may enroll in traditional day classes, evening classes, or they may enroll for CGS Online courses.

Admission through the Office of Admissions and Financial Aid

Degree-seeking students are admitted to the College of General Studies by the Office of Admissions and Financial Aid (OAFA).

Degree-Seeking Students

Those students who desire to complete a degree at the University of Pittsburgh, either in the College of General Studies or ultimately transferring elsewhere in the University, are required to apply as degree-seeking students through the University's Office of Admissions and Financial Aid (OAFA).

Students must meet a number of specific admissions criteria, depending on their previous experience. For details, refer to the Office of Admissions and Financial Aid website.

Admission through the College of General Studies

Transfers from Other University of Pittsburgh Schools at the Pittsburgh Campus

To transfer to CGS from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to CGS. CGS will review the student records and send letters of acceptance to students who are eligible to transfer into CGS. To qualify, students must have:

- a minimum overall GPA of 2.0,
- at least 12 completed credits in their current program, and
- fulfilled the Mathematics and Seminar in Composition requirements.

Upon acceptance into CGS, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled CGS skills and general education requirements. To graduate with a degree from CGS, students are required to earn their last 30 credits while enrolled in CGS and to earn at least one-half of the major or 15 credits, whichever is greater, at the University of Pittsburgh, Pittsburgh campus.

Relocation from University of Pittsburgh Regional Campuses

- For students seeking guaranteed relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 2.5.
- For students seeking guaranteed relocation who have earned 30 or more credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 2.5 in all courses is required.
- Students with a 3.0 GPA, who would have been directly admissible to the Pittsburgh campus as freshmen, may be considered for relocation with fewer than the above number of college credits.
- You must have completed the Algebra and Seminar in Composition requirements with a grade of C- or better.

Students Seeking a Second University of Pittsburgh Degree

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in CGS should apply directly to CGS. Applicants should note the following.

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree.
- Students must earn a minimum of 30 new credits. No coursework repeated from the first degree will count toward the second degree.
- At least half of the credits for the second major toward the second degree must be earned while enrolled in CGS.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

Students Seeking Reinstatement

The following students must apply for reinstatement through the College of General Studies.

- CGS students who have not enrolled for three consecutive terms (one calendar year);
- CGS students who have completed their suspension periods and wish to continue their studies; and
- Students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to CGS.

Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or summer session. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to CGS. Students' academic standing upon reinstatement will continue to be that attained at the end of their last term in residence.

Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major at the time of their reinstatement, rather than those in place at the time of their last attendance.

Certificate Program Admission

Students looking to broaden their educational experience or seeking professional development may elect to enroll in an academic certificate program. Certificate programs offer a course concentration in a specific area of study and may partially fulfill the student's degree requirements.

Students seeking admission to one of the certificate programs in the College of General Studies must meet CGS certificate admission criteria and complete the CGS online application. Students are required to provide transcripts from all colleges and universities attended. Students must take at least one-half of the coursework for the certificate at the University of Pittsburgh and earn a 2.0 or better GPA in certificate courses. The certificates offered by CGS are as follows:

- Accounting (post-baccalaureate program)
- Communication
- Community health assessment
- Corporate/community relations
- Digital media
- Disability Studies
- Gender, sexuality, and women's studies
- Information system design
- Leadership
- Managing health services programs and projects
- National preparedness and homeland security
- Nonprofit management
- Writing
- Writing for the professions

* Please note that the Leadership certificate must be earned in conjunction with a degree. To enter the Accounting certificate, students must already have a bachelor's degree with at least a 2.75 GPA.

Non-Degree Admission

Post-Baccalaureate Students

Students who already hold a bachelor's degree and desire to complete University course work as preparation for graduate study or for personal or professional interest, but do not desire to complete a second degree, may apply for admission as non-degree students. These students need to complete the CGS online application for admission and provide transcripts for all previous college work. Students who enroll under this program and later desire to earn a degree will be reviewed for admission under the normal admission criteria. Additional details are available on the CGS Admissions website.

Guest, Visiting, and Summer Visiting Students

Guest, Visiting, and Summer Visiting students are students enrolled in an undergraduate degree program at another university who plan to take courses for credit at the University of Pittsburgh with the intention of transferring those courses back to their home institution. To be eligible for admission, students must have a minimum 2.0 cumulative or overall GPA. Additional details are available on the CGS Admissions website.

Financial Aid

The Office of Admissions and Financial Aid handles all financial aid processing for College of General Studies students. Obtain information regarding the necessary forms and important deadline dates from the University's Financial Aid website, or call 412-624-7488 (option 2).

Students who wish to be considered for supplemental financial aid may apply through the Office of the Associate Dean. Students must have a completed current Free Application for Federal Student Aid (FAFSA) on file with the Office of Admissions and Financial Aid. CGS supplemental aid is awarded on a rolling basis and is need-based. Information about the CGS supplemental financial aid application is available in the CGS Scholarships section online.

Academic and need-based scholarships are available through CGS. Information concerning these scholarships for enrolled CGS students is available in the CGS Scholarships section online.

Career Services

A CGS career consultant is available to assist students with the formulation of career objectives and preparation for the job search. Various seminars are offered throughout the year, and a variety of resource materials are available for student use. For more information on CGS career services, visit the CGS Career Services webpage.

Class Locations and Times

Students in the College of General Studies have an array of options for where and when to pursue their course work.

Pittsburgh Campus

The full range of courses offered by the College of General Studies is available at the Pittsburgh campus. The 120-acre campus is located in Oakland.

CGS Online

CGS Online provides students with the opportunity to earn credit towards degrees and certificates through two course formats. All courses offered through CGS Online are Web-based, meaning that most course materials can be accessed through the University's course learning management system. CGS Online courses are offered in the following formats:

- **Web** courses feature online asynchronous instruction and interaction. Students interact with their instructors and other students through the Learning Management System Web site. Students are required to participate in online discussions and activities. Students complete the course requirements within one term and move through the course materials as a cohort.
- **Hybrid** courses combine online asynchronous interaction and face-to-face or virtual, synchronous instruction. Students are required to attend scheduled workshops and participate in online discussions and activities. Students complete the course requirements within one term and move through the course materials as a cohort.

CGS Online courses meet the same standards for content excellence and expert instruction as our traditional classroom courses.

Saturday Classes

Saturday classes are offered on the Pittsburgh campus for students who find Saturday a convenient time to attend class.

Advanced Standing Policy

Applicants must submit official transcripts from each accredited college or university attended, whether or not it is intended that the courses be counted toward a degree. Grades for credits transferred are not used in computing a student's grade point average (GPA). All credits eligible for transfer are subject to the following regulations:

- Only courses with C or better grades will be considered for transfer.

- Courses must correspond with those offered by the University in objectives and content.
- The number of credits granted for a given course cannot exceed the number on the transcript from the school where they were earned, nor can it exceed the number earned in the corresponding courses at the University of Pittsburgh.
- A maximum of 90 credits may be transferred from a four-year institution and 60 credits from a two-year institution, however no more than 90 credits can be transferred.
- All of the credits required for a degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, the statute of limitation may be waived. In such cases, the waiver is for a specific period during which the program must be completed.
- Upper-class students (those who have earned 60 or more credits) may not take courses at two-year schools.
- All transfer credits may be subject to reevaluation if a student transfers from one school to another or from one major to another within the University of Pittsburgh or becomes inactive and is subsequently readmitted.
- If a course for which advanced standing is given is repeated at the University of Pittsburgh, the advanced-standing credit is cancelled.

Advanced Placement and Credit by Examination

Students in CGS may also earn advanced standing credits through the following means:

College Level Examination Program (CLEP)

The CLEP program provides a way of earning college credits through testing. Specific regulations governing the awarding of CLEP general examination credits are available by calling 412-624-6480, from an academic advisor, or at www.cgs.pitt.edu/clep-exams.

Credit by Examination

In rare circumstances, credit by examination may be offered. Contact the Office of Student Records (studentrecords@as.pitt.edu or 412-624-6480) with questions. Students may be given credit for successfully completing the advanced-standing tests of the College Entrance Examination Board.

Students who are majoring in administration of justice and who have successfully completed Pennsylvania Act 120 or state police cadet training can receive up to 15 credits of advanced standing. The credits are awarded for specific courses.

Reserve Officer Training Corps (ROTC) Courses

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC) through cross registration at Carnegie Mellon University are accepted toward a College of General Studies degree. CGS will grant up to four credits toward graduation for the following courses in lieu of or in combination with physical education courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0011, MILS 0012, MILS 0021, and MILS 0022; or first-year/sophomore level Navy ROTC courses from CMU.

Also, four junior and senior level courses from these three ROTC programs may be used as professional electives for the CGS degree program, if professional electives are permitted. These courses are AFROTC 1013, AFROTC 1014, AFROTC 1015, and AFROTC 1016 (all 3-credit courses); MILS 1031, MILS 1032, MILS 1041 and MILS 1042 (all 1-credit courses); and similar courses from Navy ROTC.

Internships

An internship is a supervised, work-related experience, volunteer or paid, which is related to an academic discipline and is sponsored, evaluated, and graded by a University faculty member. The internship is a new experience and does not represent credit for past work or continuation of the current employment situation. A detailed outline of CGS internship requirements is available on the CGS Internships webpage.

PLEASE NOTE: Several CGS majors require that students complete an internship at a facility that may or will require a criminal background check, an ACT 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Global Experiences (Study Abroad / Study Away / Virtual)

College of General Studies students are encouraged to enhance their undergraduate education by including a global experience. Credit may be earned toward a CGS degree through participation in either Pitt Panther, Pitt Partner, Exchange, or Pitt-Recognized Programs and Institutions. Students may study in virtually any part of the world in these programs or others offered by many American and international institutions. Some programs are of short duration to fit the schedules of students with extensive work, family and other commitments.

Approval for credit must be obtained before studying abroad. The Global Experiences Office provides program approval and CGS Academic Affairs approves course selection and credits. You should have at least a 2.75 GPA before seeking permission to study abroad.

See the CGS Study Abroad website for further details.

Students with a GPA of 3.5 or better planning to pursue graduate work at the University of Pittsburgh may want to consider the Early Admission Option for Graduate Study. This option allows students to use the first 24 credits of graduate work as the last 24 elective credits of their undergraduate program. The following graduate schools at Pitt allow this option in conjunction with the College of General Studies degree program: Graduate School of Public and International Affairs (GSPIA), School of Public Health, and the School of Law.

Note: Students interested in the early admission option for graduate study should contact their CGS advisor as soon as possible to discuss their intention and the process that needs to be followed.

Guidelines:

- Must be superior graduate school candidates and be admitted to the Pitt graduate program. Admissions requirements can be obtained from the graduate schools.
- Must have completed a minimum of ninety-six (96) credits toward the CGS degree, including all general education and major requirements (and no G grades), before the graduate program begins.
 - At least, the last thirty (30) of the ninety-six (96) undergraduate credits should be taken while the student is in residence in CGS, and before acceptance as a graduate student. Satisfactory completion of these requirements does not guarantee acceptance into the graduate program. This decision is made by the graduate program.
 - All other regulations governing the completion of credits for a CGS degree also apply.
- The graduate program must include a minimum of twenty-four (24) credits of graduate-level coursework. Students must earn a B or better grade in all graduate coursework. (S or H grades in the MSL program)
- Twenty-four (24) credits is the maximum number of graduate credits that can be used to fulfill free elective requirements of the undergraduate degree. A student may seek to use fewer than twenty-four (24) graduate credits toward their free elective credits if they have already partially fulfilled their elective requirements.
- Students must apply for graduation from CGS after completion of the first twenty-four (24) credits in their graduate program with grades of B or better. Students must have earned a total of at least 120 credits.

Note: Students who choose this option must be aware that enrolling as a graduate student may affect their financial aid package. Students are responsible for contacting the Financial Aid Office regarding this issue.

Academic Standards

Students and faculty are expected to familiarize themselves with the published rules and regulations governing academic integrity, the ethical standards of integrity by which each student and faculty member is expected to operate. As members of a community of learners, all students and instructors are expected to adhere to these behavioral, academic, and ethical standards of the University community and of their field of study. The Academic Integrity Code sets the standards for protocol regarding issues such as how to handle cheating or plagiarizing.

Read the full code online. Matters pertaining to academic integrity and the code of student conduct at CGS will be handled in accordance with the academic integrity procedures established by the Dietrich School of Arts and Sciences and fall under the purview of the Office of the Associate Dean for Undergraduate Studies and CGS.

Graduation Requirements

- Students are required to make a graduation appointment with their advisor when registering for classes for their final term. During this appointment, students and their advisor review all the requirements and plan for their last term, as well as share details concerning commencement and graduation ceremonies at the University. Learn more on the CGS Graduation webpage.
- Students must apply for graduation from CGS in the semester prior to their final term. Students must have minimum of 120 credits in order to graduate.
- Students receive a BA or BS degree depending upon the CGS major. The final undergraduate transcript will specify the major completed in CGS.
- The GPA for graduation from CGS will be calculated solely on the earned Pitt credits on the undergraduate transcript. The graduate program courses appear on the graduate transcript and the undergraduate transcript is noted: Baccalaureate degree awarded in conjunction with graduate degree.
- In order for CGS students to graduate with honors from the University, they must have at least 60 letter-graded University of Pittsburgh credits at the undergraduate level. Courses at the graduate level and undergraduate courses graded S or H are not included in this 60 credit requirement.

The Bachelor of Arts or Bachelor of Science degree will be awarded upon the fulfillment of the following conditions:

- Completion of at least 120 credits of University work in one of the prescribed curricular courses, by advanced standing, or by examinations.
- Completion of at least one-half of the major or 15 credits, whichever is greater, at the University of Pittsburgh, Pittsburgh campus.
- Completion of the senior year (30 credits) in the College of General Studies.
- Attainment of at least a cumulative grade point average of 2.00 in courses taken at the University of Pittsburgh.
- Attainment of at least a cumulative grade point average of 2.00 in the major.
- Satisfactory completion of all required CGS and major courses.

Grading Policy

There are two grading options available to students registering for courses offered by the College of General Studies: the letter grade option and the satisfactory/no-credit (S/NC) option (formerly the S/N option).

Core requirement courses in the student's major must be taken for the letter grade. Students can apply "S" grades only to internship, study abroad, experiential learning, and elective courses in the major. Students can take a maximum of six credits with the S/NC grade and have those credits applied to CGS major requirements.

Under the S/NC option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of "S." If the student's work is not satisfactory (a grade of C- or lower), the grade of "NC" (for no credit) is given. Courses for which "S" grades are earned are counted toward graduation but are not computed in the GPA. Courses for which "NC" grades are earned are not counted toward graduation because the "NC" designates that no credit was earned. These courses cannot be applied toward university requirements.

For most courses, students who wish to take a course with the S/NC Grade Option will need to complete the S/NC Grade Option/Audit Request form (Registrar's Office) and the CGS Grade Option Waiver form by the end of the fourth full week of classes during a term (second full week of classes during summer sessions 1 and 2). If the student does not fill out a Grade Option/Audit Request form for a course in which more than one grade option is available, the default option (generally a letter grade) will automatically be selected. There are some formal limitations to a student's choice of grading systems (see below); Students should consult with their academic advisor before deciding to take a course S/NC. See also the CGS Advising page for details.

Limitations to the choice of the satisfactory/no-credit (S/NC) grade option in the College of General Studies:

1. Students can take a maximum of 6 credits with the S/NC grade and have those credits applied to CGS major requirements. There is one exception to this policy: Students who study abroad and take courses that will be applied as S grades through transfer credit can apply up to nine credits to their major requirements. Students can only apply "S" grades to internship, experiential learning, and elective courses in the major. Core requirement courses must be taken for the letter grade
2. Under certain circumstances, departments may declare a course available only for a letter grade or as satisfactory/no-credit. In such courses, students will not have a choice for the other grade option.

G Grade

At the discretion of an instructor, a G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken, including the summer term, or by an earlier deadline established by the instructor. After that year, the grade will automatically change to NG; an NG grade cannot be changed, and the credits will no longer appear as "in progress." The student will be required to re-register for the course if it is needed to fulfill requirements for graduation. The College of General Studies encourages students with G grades to work with their instructors to complete the requirements for the course as soon as possible. G and NG cannot be applied to graduation requirements.

At the time of requesting a G grade, the student should arrange with the instructor a plan and schedule for completing the course work. The instructor and student must also fill out the CGS G-grade Contract form. For additional information, visit www.cgs.pitt.edu/faculty-resources.

Academic Standing

The College of General Studies is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. Students in the College of General Studies are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Academic Alert is a marker designed to notify students who show signs, early on and throughout their academic career, of jeopardizing successful progress toward the completion of their undergraduate degree. This may be due to their inability to maintain a satisfactory GPA and/or failing to fulfill the algebra or composition requirement within the first two terms of full-time enrollment. Students who receive two consecutive **Academic Alerts** will be placed on **Academic Probation**.

Students are placed on **Academic Probation** after earning a GPA between a 1.50 and a 1.99 over two consecutive terms or have one semester at or below a 1.49 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree (e.g. failing to earn any academic credits).

Students currently on Academic Probation who earn a term GPA below a 2.00 or fail to make progress toward their degree will be subject to **Academic Suspension**. After being suspended, students are not eligible to re-enroll for one calendar year. Following suspension, students are required to apply for reinstatement at the Undergraduate Dean's Office. Students returning from academic suspension are reinstated on academic probation and are required to develop an academic success plan upon their return. These reinstated students' records are reviewed after each subsequent term of enrollment.

Students who have been reinstated from Academic Suspension must earn at least a 2.00 GPA for each term that they enroll until they have achieved a cumulative GPA of a 2.0 or above. If a student fails to earn a 2.00 term GPA, they are subject to **Academic Dismissal** from the University. Dismissed students are not eligible for reinstatement.

Dean's List

Following the fall and spring terms, full-time College of General Studies students whose grades in the preceding term indicate outstanding academic achievement are recognized on the Dean's List. To be placed on the Dean's List, a student must have earned at least 12 credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50. Part-time students will be recognized following each spring term.

Degrees Conferred

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Academics website.

Students admitted to CGS can choose from the following majors. Many majors are available by combining on-campus and online courses.

Bachelor of Arts:

- Administration of Justice - this major is no longer accepting new students, effective Fall 2021

- Health Services
- Humanities - this major is no longer accepting new students, effective Fall 2020
- Law, Criminal Justice, and Society
- Legal Studies - this major is no longer accepting new students, effective Fall 2021
- Liberal Studies
- Media and Professional Communications
- Public Service
- Social Sciences - this major is no longer accepting new students, effective Fall 2020

Bachelor of Science:

- Dental Hygiene
- Health Services
- Natural Sciences

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the algebra and seminar in composition requirements. Admission is determined by the Dietrich School of Arts and Sciences.

Second Degree

Students who are interested in pursuing a second degree must complete all CGS degree and major requirements. These may be completed by combining CGS courses with transfer credits from previous academic course work.

For the second degree, students must complete a minimum of 30 credits in CGS, including at least half of the credits required for the new major (15-18 credits depending on the major).

Double and Triple Majors and Credit Overlap

Students can declare a double or triple major, but will usually earn only one degree. If one major leads to the BA degree and another to the BS degree, students must decide when applying for graduation which degree they wish to receive.

Double Degrees

College of General Studies students may choose to pursue more than one undergraduate degree simultaneously, either within CGS (i.e., both a BA and a BS) or in another undergraduate school of the University. In general, earning two degrees requires a minimum of 150 credits and the completion of the curriculum requirements of both schools.

- The College of General Studies (CGS) and the College of Business Administration (CBA) offer a Double Degree program in which students earn both the BA in Health Services through CGS and the BS in Business Administration (BSBA) through CBA. The double degree program is designed for students who are interested in the intersection of health care management and business administration.

Overlapping Courses Between Majors, Certificates, and Minors

This policy is effective for students who declare their CGS program(s)/plan(s) for Spring 2019 and beyond.

Overlapping (Double-Counting) credits between CGS programs and programs in other schools

A maximum of two courses can overlap (double-count) between a CGS major or certificate and any additional major in another school. No course overlaps are allowed between a CGS certificate and a certificate in another school. No course overlaps are allowed between a CGS minor and another minor, certificate, or major outside of CGS.

Overlapping (Double-Counting) credits between majors, certificates and minors within CGS

Courses used for a minor cannot overlap (double-count) with courses used for a major, minor, or a certificate. Students can overlap (double-count) a maximum of six (6) credits between a CGS certificate and a CGS major and/or CGS certificate. The following exceptions apply:

* Students cannot receive a certificate in a program in which they are pursuing their major and/or area of concentration. These programs include: Public Service BA (all three tracks and corresponding certificates), Health Services BA (all two tracks and corresponding certificates), Media and Professional Communications BA (all three tracks and corresponding certificates). Note: Media and Professional Communications majors CAN pursue a certificate outside their area of concentration (major track), in which case they are only allowed to overlap core requirements between their major and a certificate.

Program and Course Offerings

Certificate

Accounting Certificate

Develop a practical and theoretical foundation in accounting while earning a certificate. Offered by the College of General Studies and the College of Business Administration, the 24-credit part-time evening program enables students to take the same subjects required for accounting majors in the Bachelor of Science in Business Administration program offered by the College of Business Administration.

Participants benefit from the academic instruction of the College of Business Administration and the nontraditional student services available through the College of General Studies. Credits earned may be counted toward certain state licensure requirements.

Who should participate:

Professionals who already have earned a bachelor's degree in any field and wish to develop careers in accounting or another business field in which substantial knowledge of accounting is an asset.

Upon completion of this certificate, participants will be able to:

- Apply substantial knowledge of accounting
- Enhance their careers in the business field
- Meet many of the requirements to sit for the certified public accountant (CPA) examination in Pennsylvania.

This certificate is applicable to fields such as public accounting, auditing, taxation, corporate accounting, governmental accounting, and other careers in business that require a substantial knowledge of financial and/or managerial accounting.

CPA preparation

Becoming a CPA in the state of Pennsylvania will require 150 credit hours of coursework, 36 credits of which must be in accounting, auditing, finance, tax, and business law. At that time, completing the certificate program will no longer be sufficient preparation to sit for the CPA exam. To learn about becoming a CPA in Pennsylvania, visit the Pennsylvania Institute of Certified Public Accountants Web site at www.picpa.org. You can also contact the Pennsylvania State Board of Accountancy for more information at 717-783-1404 or by E-mail at st-accountancy@pa.gov.

Admission Requirements

A bachelor's degree and a 2.75 or higher cumulative grade point average are required for admission to the program. A certificate application must be completed online. For an application and additional information on admissions guidelines, see the CGS Admissions webpage. Credits earned at other accredited educational institutions will be evaluated for transfer. However, a minimum of 15 credits must be earned at the University of Pittsburgh. Students must earn a grade of C or better in all University accounting courses.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (24 credits)

Students must complete their required courses and a minimum of one elective course for a total of 24 credits. A grade of C or better is required for all courses in the program. Students must follow the approved prerequisites for each course. All courses are three credits, and all courses are offered in the evenings.

Required Courses

- CDACCT 6030 - FINANCIAL ACCOUNTING
- CDACCT 6040 - MANAGERIAL ACCOUNTING
- CDACCT 6204 - INTERMEDIATE FINANCIAL REPORTING 1
- CDACCT 6205 - INTERMEDIATE FINANCIAL REPORTING 2
- CDACCT 6236 - ACCOUNTING INFORMATION SYSTEMS
- CDACCT 6238 - AUDITING
- CDACCT 6242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Electives

Take a minimum of one course.

- BUSENV 1760 - BUSINESS LAW
- CDACCT 6210 - FINANCIAL STATEMENT ANALYSIS
- CDACCT 6221 - STRATEGIC COST MANAGEMENT
- CDACCT 6216 - ADVANCED FINANCIAL ACCOUNTING

Additional Information

Requirements subject to change. Check with an academic advisor before registering.

Communication Certificate

The Certificate in Communication is a 24-credit program designed to train students to be more effective communicators. Courses, taught by faculty of the Department of Communication, include a range of specialized communication topics. Participants may elect to concentrate their studies in such areas as nonverbal, small group, interpersonal, organizational, or mass communication; persuasion in political settings; or the construction, analysis, and delivery of public speech.

Who should participate:

- Business and professional people whose success may be enhanced by improved communication skills and further understanding of the communication process
- Those who wish to increase their personal knowledge of communication for use in their careers
- Citizens involved in community and public positions in which persuasive delivery and analysis are vital
- Persons seeking a better understanding of the impact of interpersonal, organizational, public, and mass communication in the contemporary world
- Students already enrolled in the College of General Studies or other University programs who want to concentrate on communications skills

Upon completion of this certificate, participants will be able to:

- Understand the makeup of a persuasive presentation
- Polish and refine their communication skills
- Apply concentrated knowledge of a specialized communication topics

This certificate is applicable to fields such as education, writing, broadcasting, public relations, sales, communication training, personnel, promotions, advertising, market research, lobbying, politics, communications, and related fields.

Admission Requirements:

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (24 credits)

- The Communication certificate requires 24 credits, including nine (9) credits of core classes and 15 elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Up to nine credits earned at other accredited educational institutions may be transferred with approval. A minimum of five courses (15 credits) must be completed at the University of Pittsburgh.

Required Courses (9 credits)

Choose three of the following courses. All courses are 3 credits, unless otherwise noted.

- COMMRC 0500 - ARGUMENT
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION
- COMMRC 0550 - SPEECH COMPOSITION

Electives (15 credits)

Choose five COMMRC courses. All courses are 3 credits, unless otherwise noted. Prerequisite courses are in parentheses; English Composition 0200 is required for all 1000-level courses. Included below is a sampling of courses that can be used to fulfill the certificate requirements:

- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0310 - RHETORIC & SOCIETY
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION (0300)
- COMMRC 1103 - RHETORIC AND CULTURE (0310 or 0320)
- COMMRC 1104 - POLITICAL COMMUNICATION (0310 or 0320)
- COMMRC 1105 - TELEVISION AND SOCIETY (0320)
- COMMRC 1106 - SMALL GROUP COMMUNICATION (0300)
- COMMRC 1109 - NONVERBAL COMMUNICATION (0300)
- COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION (0300)
- COMMRC 1111 - THEORIES OF PERSUASION (0520 and 0310 or 0320)
- COMMRC 1112 - THEORIES OF RHETORIC (0310 or 0520)
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS (0310 or 0320)

- COMMRC 1117 - PROPAGANDA AND MISINFORMATION IN THE 21ST CENTURY (0310 or 0320)
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2 (0310 or 0320)
- COMMRC 1121 - HISTORY OF MASS MEDIA (0320)
- COMMRC 1122 - MEDIA CRITICISM (0320)
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1900 - COMMUNICATION INTERNSHIP or CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR

Notes

Requirements are subject to change. Check with an academic advisor before registering.

Community Health Assessment Certificate

Earning a certificate in community health assessment from the College of General Studies will provide a foundation in theory as well as an understanding of the diverse populations you may serve. This flexible program is perfect for social services or community health employees, nonprofit professionals interested in healthcare advocacy, and for those looking to advance into leadership positions.

Students who successfully complete this certificate may apply the credits to an undergraduate degree in the University of Pittsburgh College of General Studies (CGS), such as our bachelor of arts in health services.

Graduates of the program will be able to:

- communicate and interact effectively and professionally with people from diverse backgrounds;
- understand how social, cultural, legal, and environmental factors may impact the behaviors of both patients and health care workers and apply this knowledge to their careers;
- identify behaviors that tend to promote or compromise health;
- apply administrative and managerial skills to nonprofits and community health organizations; and
- identify, recognize, gather, and analyze data that are pertinent to the health services field.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and returned to the CGS.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Program Requirements

- The community health assessment certificate requires 18 credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

Curriculum (18 credits)

Required courses

- COMMRC 1181 - HEALTH COMMUNICATION
Note: New course number effective Spring 2023; formerly COMMRC 1730: Special Topics: Health Communication (SEC 75XX)
- NUR 1765 - RISK FACTORS AND HEALTH
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBHLT 0330 - INTRODUCTION TO EPIDEMIOLOGY
Formerly: HRS 1017 Introduction to Epidemiology
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
Choose one of the following:
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- SOC 0477 - MEDICAL SOCIOLOGY
- URBNST 0506 - URBAN PLANNING PROCESS
- URBNST 0512 - NEIGHBORHOOD PLANNING

Corporate/Community Relations Certificate

The Certificate in Corporate and Community Relations is an interdisciplinary course of study that helps students to develop the skills they need to effectively communicate a business or organization's mission and achievements to the outside community. It also teaches them how to effectively communicate organizational news and policies internally to fellow employees. Students learn to develop messages and communications strategies that engage the community and promote an organization's image in a positive way.

The certificate is available as a stand-alone option or can be pursued as part of a degree.

Who should enroll:

- Individuals charged with communicating company and organizational news, policies, benefits, and messages to fellow employees
- Individuals charged with communicating and disseminating company and organizational news to an external audience, thereby improving public perception of the organization
- Individuals interested in advancing the causes of community, civic, or volunteer organizations
- Recent graduates or current students who wish to pursue a career incorporate or community communications

Upon completion of this program, students will be able to:

- apply a theoretical understanding of mass media process, history, and ethics to communications-related careers in broadcasting, journalism, legal professions, government, nonprofits, and other fields;
- identify and analyze audience traits, perspectives, and motivators and develop messages appropriate to each audience;
- manage and navigate professional relationships with a wide range of constituents;
- develop and write clear messages that support specific organizational goals and enhance the image of a professional organization in the public's mind; and
- create professional and effective communication strategies as well as persuasive written materials, customized to the needs of a specific profession, such as business proposals, speeches, marketing plans, and news stories.

This certificate is applicable to such fields as corporate communications, nonprofit management, advocacy, public relations, broadcasting, sales, communication training, promotions, advertising, lobbying and politics, human resources and relations, and training and development.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application must be completed and returned to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the

submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The Corporate and Community Relations certificate requires 18 credits, including six (6) credits of core classes, six (6) elective credits, and six (6) specialization credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

Required Courses (6 credits)

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

Electives (6 credits)

Choose two courses from the following:

- BUSERV 1940 - MARKETING FUNDAMENTALS
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1182 - MEDIA RELATIONS
New course number effective Spring 2023; formerly COMMRC 1732: Special Topics: Public and Media Relations
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Note

CBA students: BUSERV 1940 Marketing Fundamentals may be substituted with BUSMKT 1040 Intro to Marketing.

Specializations (6 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION : Communication and New Media Technologies
- ENGCOMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 0641 - WRITING FOR CHANGE
- ENGCOMP 1103 - PUBLIC RELATIONS WRITING
- ENGCOMP 1104 - CORPORATE STORYTELLING
- ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCOMP 1120 - HISTORY AND ETHICS OF ADVERTISING AND PUBLIC RELATIONS
- ENGCOMP 1270 - PROJECTS IN BLACK RHETORIC
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS

- ENGCOMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCOMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- FMST 1890 - THE BUSINESS OF BROADCASTING
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- SOC 0490 - MASS MEDIA
- URBNST 0512 - NEIGHBORHOOD PLANNING

Digital Media Certificate

Businesses and media organizations today must create, produce, and manage content for multiple platforms, from print and broadcast to online. Whether you're an emerging media professional or work in the marketing or communications department of a business or nonprofit organization, you can benefit from training in digital media.

The 18-credit interdisciplinary Digital Media certificate program offered by CGS introduces you to the power of multimedia content-written, audio, and visual-and how it can be used to communicate with and persuade audiences. You'll choose from a variety of courses in communications, arts, English, film studies, psychology, and political science.

This certificate can be completed as a stand-alone program or in conjunction with another degree at the University of Pittsburgh.

Who should participate:

- Professionals operating in multimedia environments
- Individuals responsible for e-commerce efforts
- People interested in producing content for online publications and sites, films, documentaries, etc.
- Entrepreneurs
- Educators

Upon completion of this certificate, participants will be able to:

- Understand how concepts, design, and technology work together to communicate with mass audiences
- Design, create, and manipulate digital communication vehicles
- Understand the importance of visual and textual communication in maintaining organizational success
- Produce engaging interactive programs, such as for training or sales purposes

This certificate is applicable to such fields as interactive online training; electronic catalogs; DVDs for sales, marketing, or training purposes; multimedia businesses; and general e-commerce.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The digital media certificate requires 18 credits, including nine (9) credits of core classes and nine (9) elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine (9) credits must be earned at the University of Pittsburgh.

Required Courses (9 credits)

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 1122 - MEDIA CRITICISM
- ENGFLM 0355 - VISUAL LITERACY or ENGFLM 0401 - IMAGES, ICONS, AND IDEAS

Electives (9 credits)

Choose three of the courses listed below.

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR
- COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- CS 0134 - WEB SITE DESIGN AND DEVELOPMENT
- ENGCOMP 0425 - DIGITAL HUMANITY cross-listed with HAA 0425
- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENGCOMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- ENGFLM 0400 - INTRODUCTION TO FILM
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1485 - FILM AND POLITICS
- ENGFLM 1683 - DOCUMENTARY FILM
- ENGFLM 1695 - HORROR FILM
- ENGLIT 0354 - WORDS AND IMAGES
- ENGLIT 0550 - INTRODUCTION TO POPULAR CULTURE
- ENGWRT 0650 - READINGS IN JOURNALISM
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- FILMST 0001 - FILMMAKING 1: FUNDAMENTALS
- FILMST 0120 - PHOTOGRAPHY 1
- FILMST 0121 - ANIMATION 1
- FILMST 0250 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA
- FILMST 0400 - POST-PRODUCTION
- FILMST 0430 - AUDIO PRODUCTION
- FILMST 0601 - FILMMAKING 2: SIGHT AND SOUND
- FILMST 0610 - DIGITAL EFFECTS 1
- FILMST 1001 - BROADCASTING
- FILMST 1132 - ELEMENTS OF SCREENWRITING
- FILMST 1600 - FILMMAKING 3: STORY TO SCREEN
- FMST 1890 - THE BUSINESS OF BROADCASTING

- FMST 1898 - TELEVISION NEWS PRACTICUM: PITT TO THE POINT
- HAA 0090 - INTRODUCTION TO CONTEMPORARY ART
- HAA 0470 - PHOTOGRAPHY AND ART
- PS 1836 - POLITICS THROUGH FILM
- PSY 1080 - PSYCHOLOGY AND THE MEDIA
- SA 0110 - VISUAL THINKING
- SA 0130 - DRAWING STUDIO 1
- SA 0180 - PHOTO STUDIO 1
- SA 1270 - DIGITAL STUDIO: IMAGING
- SOC 0490 - MASS MEDIA

Notes

Requirements subject to change. Check with an academic advisor before registering.

Disability Studies Certificate

Equity, inclusion, and understanding are at the heart of Disability Studies. As a powerful challenge to the assumptions about people with disabilities, Disability Studies looks at disability as a facet of society and culture, and as an individual experience that is not solely governed by a medical model. The significance of disability is important in all professional and academic contexts such as cultural studies, law, health research and practice, and education.

This 18-credit, interdisciplinary undergraduate certificate is offered in partnership with the Writing Institute and housed in the College of General Studies. Our program offers a diverse course selection representing a range of academic departments from English Composition to Rehab Sciences, from Film Studies to Sociology. Understanding the history and experiences of people with disabilities is valuable across career paths in our increasingly diverse society.

The certificate is available as a stand-alone option or can be pursued as part of a degree.

Who Should Participate

- Those who identify as disabled and want to gain perspective and engage with the idea of disability.
- Those who interact with individuals with disabilities in the course of their daily work (therapists, teachers, health providers, care givers, technologists, legal counselors).
- Those who wish to more accurately and fully represent the experiences and perspectives of people with disabilities.
- Those who work in any setting and who recognize that disability is a form of diversity and want to be better, more informed allies.
- Those who want to work in advocacy roles for constituencies that include people with disabilities. Students already enrolled in the College of General Studies or other University programs who want to concentrate on communication skills

Program Expectations

Graduates of this program will be able to:

- Ethically represent people with disabilities in expressive forms such as writing, film and television media, and music.
- Identify barriers to access for people with disabilities, including environmental, attitudinal, policy, and social barriers.
- Develop strategies for increasing accessibility in a variety of public, professional, and institutional settings.
- Advocate for social, legal, educational, and other concerns impacting populations with disabilities.
- Critically examine the intersection of disability and other identity and cultural constructs, such as gender, sexuality, and race.

Program Requirements

- The Disability Studies certificate requires 18 credits, including one core course, and five elective courses. Courses must be taken from at least three (3) subjects. No more than nine (9) total credits (Core Course and two [2] Electives) can come from ENGCOMP; no more than six (6) credits can come from any other single subject code (ENGFLM, GSWS, SOC, etc.).
- Credits earned at other accredited educational institutions may be eligible for transfer on a case by case basis.
- A minimum of nine (9) credits must be earned at the University of Pittsburgh.

- A cumulative grade point average of 2.0 or higher is required in courses being applied to the certificate.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Core Course

The following 3-credit course is required for this certificate:

- ENGCOMP 0540 - INTRODUCTION TO DISABILITY STUDIES

Elective Courses

Five elective courses must be taken from at least three different academic departments (ENGCOMP can count as one of these three departments). Courses must be approved for Disability Studies credit. With permission of the director, students will be able to count the internship or independent study courses in their majors as electives. Consult Pitt's Course Catalog for current listings. Some approved courses include:

- ASL 1625 - THE DEAF AND SOCIETY
- ASL 1725 - SOCIOLINGUISTICS OF SIGN LANGUAGE OR
- LING 1725 STRUCTURE OF ASL AND ENGLISH
- ENGCOMP 0415 - WRITING AND ANXIETY
- ENGCOMP 05XX - LANGUAGE AND DISABILITY
- ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
- ENGCOMP XXXX - DISABILITY IN THE WORKPLACE
- ENGCOMP XXXX - INTERSECTIONAL DISABILITY STUDIES
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY OR
- ENGFLM 1192 - IRISH FILM
- FMST 1533 - DISABILITY IN FILM AND TELEVISION
- ENGLIT X7XX - EMBODIMENT AND DISABILITY
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 1533 - DISABILITY IN FILM AND TELEVISION OR
- FR 0088 - AILING BODIES: NARRATIVES OF HEALTH AND ILLNESS
- GSWS 1130 - GENDERED BODIES
- GSWS XXXX - GENDER, DISABILITY, AND TRAUMA
- MUSIC 1306 - MUSIC AND DISABILITY STUDIES
- PS 1216 - MODERN CIVIL RIGHTS IN AMERICAN POLITICS
- REHSCI 1280 - PSYCH AND SOCLGY OF DISABILITY
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY
- SOC 1421 - BODY POLITICS: TECHNOLOGIES, DISABILITY, DIFFERENCE
- SOC 1450 - HEALTH AND ILLNESS
- THEA 1349 - DISABILITY AND PERFORMANCE

Total Credits: 18

Gender, Sexuality, and Women Studies Certificate

The undergraduate Certificate in Gender, Sexuality, and Women's Studies is an interdisciplinary academic program providing students with the opportunity to broaden their understanding of the changing role that gender plays, both in the United States and around the world. The GSWS Certificate is housed in the College of General Studies and offered in partnership with the Gender, Sexuality, and Women's Studies program.

Participants benefit from the academic instruction of GSWS faculty and the nontraditional student services available through the College of General Studies.

Students who want to explore the intersection of gender with race, class, ethnicity, ability, and sexual orientation will find courses of interest, as will students who want to know more about the role of women in history, literature and the arts, media, and science. Students who are planning careers in medicine, the creative arts, social work, education, counseling, law, therapy, and business often find that a background in women's studies enhances their professional activities.

The certificate is available as a stand-alone option or can be pursued as part of a degree.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Certificate Requirements (18 credits)

The gender, sexuality, and women's studies (GSWS) certificate requires 18 credits, including six credits of core classes, nine elective credits (which must be taken from two academic departments), and one advanced GSWS course.

- Transfer courses will be accepted on a case-by-case basis up to a maximum of two courses.
- A cumulative grade point average of 2.0 or higher is required in courses being applied to the certificate.
- A minimum of 12 credits must be earned at the University of Pittsburgh.
- The GSWS Certificate may not be pursued concurrently with the B.A. in Gender, Sexuality, and Women's Studies or with the GSWS minor.
- All certificate students are expected to meet at least once per year with the GSWS undergraduate advisor to update their files and discuss what courses are needed to fulfill certificate requirements.

Core Courses (6 credits)

A minimum of two courses (six credits) are required (preferably to be completed early in the student's academic program).

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
 - GSWS 0150 - GENDER IN THE PROFESSIONS
 - GSWS 0500 - INTRODUCTION TO FEMINIST THEORY *or*
 - GSWS 0550 - SEX AND SEXUALITIES
- Students are advised to take all four core courses to cover the key areas represented by the program (in which case two of these courses will count towards the program electives).

Electives (9 credits)

Three elective courses must be taken from at least two different academic departments (GSWS can count as one of these 2 departments). **Courses must be approved for GSWS credit.** Consult the GSWS Program website for current listings. Some approved courses include:

- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA

- ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY
- ANTH 1728 - GENDER AND GLOBALIZATION
- ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0625 - DETECTIVE FICTION
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 0670 - QUEER AND TRANSGENDER LITERATURE
- ENGLIT 0715 - AUSTEN AND BRONTE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0070 - KINGS & QUEENS: FROM VIKINGS TO THE GUILLOTINE
- FR 0088 - AILING BODIES: NARRATIVES OF HEALTH AND ILLNESS
- FR 0090 - EURO CHIC: THE INVENTION OF FASHION
- GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
- GSWS 0600 - GLOBAL LGBTQ LITERATURE
- HIST 0707 - SEX AND GENDER: A GLOBAL HISTORY OF THE MODERN WORLD
- HIST 1082 - WOMEN, GENDER AND SPORT
- HIST 1661 - GENDER AND SEXUALITY IN THE US SINCE 1865
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW
- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
- LCJS 1583 - SEX, LAW AND MARRIAGE
- PS 1550 - GENDER AND GLOBAL POLITICS
- PSY 0184 - PSYCHOLOGY OF GENDER
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- PSY 1113 - PSYCHOLOGY OF WOMEN+
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1448 - WORKING WOMEN
- Either GSWS 1900 - INTERNSHIP or GSWS 1901 - INDEPENDENT STUDY may be used to meet an elective requirement, but in this case, the two other courses must each be in different departments. Consult with the GSWS advisor. Special permission from the GSWS advisor required.

Interdisciplinary Course (3 credits)

Choose one upper-level advanced GSWS course (three credits); GSWS 0100 and GSWS 0500 (or GSWS 0550) are prerequisites for some of these courses. Below is a sample list of approved courses. For all upper-level GSWS courses, see the GSWS Major page.

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1210 - GENDER AND THE DIGITAL
- GSWS 1220 - WOMEN OF COLOR FEMINISM
- GSWS 1230 - GENDER AND MEDICINE
- GSWS 1280 - TRANSNATIONAL SEXUAL POLITICS
- GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM
- GSWS 1450 - GENDER AND SUSTAINABILITY
- GSWS 1460 - GENDER, SEXUALITY, AND CHILDHOOD IN A GLOBAL CONTEXT
- GSWS 1610 - QUEER AND FEMINIST MEDIA ART
- GSWS 1715 - FEEDING THE SOUL: FOOD, GENDER AND RELIGION

Notes

Requirements subject to change. Check with an academic advisor before registering.

Information System Design Certificate

This innovative 18-credit program responds to the increasing industry demand for information system professionals. Offered in partnership with the School of Computing and Information (SCI), this multifaceted undergraduate certificate can be completed as a stand-alone continuing education program or serve as preparation for a bachelor's, master's, or doctoral degree.

Who should participate:

- Professionals in another field who wish to enter the information management field
- Individuals working in the technology field who want or need more formal training to progress in their careers
- People wanting to prepare for a master's degree in information sciences

Upon completion of this certificate, participants will be able to:

- Use scientific programming language to introduce information structures such as linked lists, stacks, and queues
- Develop program modules using a current programming language
- Utilize the theories of data structures and programming language design

These competencies may be applied to positions such as system designer, database developer, database manager, interactive system designer, expert system designer, information retrieval specialist, network designer, database marketer, or administrator who advises and implements technology purchases and upgrades.

This certificate is applicable to fields such as banking, healthcare, library science, judicial systems, communication, education, agriculture, private industry, and government.

Admission requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Program Prerequisites

Before applying to this program, students should have completed 1) a college algebra class, and 2) an introductory information systems course or a programming course, earning a C or better in both.

- Recommended programming courses: INFSCI 0010 INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY, CS 0007 INTRODUCTION TO COMPUTER PROGRAMMING, CS 0008 INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON , or CS 0004 INTRODUCTION TO COMPUTER PROGRAMMING-BASIC .

Please note: Catalog numbers and titles changed as of Fall 2020 (Term: 2211). For course codes and titles prior to Fall 2020, visit the AY 19-20 University Catalog program page: Information System Design Certificate

See also the SCI Courses website for updated course descriptions.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

Students must complete a total of 18 credits as follows. All courses must be completed with a C or better grade.

- INFSCI 0017 - FUNDAMENTALS OF OBJECT-ORIENTED PROGRAMMING Computer Science students may use CS 0401 in lieu of INFSCI 0017 (effective Fall 2020: CMPINF 0401 INTERMEDIATE PROGRAMMING)
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS (effective Fall 2020: INFSCI 1500 DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS)
- INFSCI 1024 - ANALYSIS OF INFORMATION SYSTEMS (effective Fall 2020: INFSCI 1400 ANALYSIS OF INFORMATION SYSTEMS)
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN (effective Fall 2020: INFSCI 0410 HUMAN-CENTERED SYSTEMS)
- INFSCI 1070 - INTRODUCTION TO TELECOMMUNICATIONS AND NETWORKS (effective Fall 2020: INFSCI 0610 NETWORKS AND INFORMATION)

Choose one elective from the following:

- INFSCI 1014 - GRAPHICS
- INFSCI 1025 - DESIGN OF INFORMATION SYSTEMS
- INFSCI 1027 - IT PROJECT MANAGEMENT (effective Fall 2020: INFSCI 1460 IT PROJECT MANAGEMENT)
- INFSCI 1031 - GOING DIGITAL: TRANSFORMATIONAL CHANGE
- INFSCI 1052 - USER CENTERED DESIGN (effective Fall 2020: INFSCI 1420 USER-CENTERED DESIGN)
- INFSCI 1059 - WEB PROGRAMMING
- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS) (effective Fall 2020: INFSCI 1550 SPATIAL INFORMATION)
- INFSCI 1074 - COMPUTER SECURITY (effective Fall 2020: INFSCI 1620 ADVANCED SECURITY AND PRIVACY)
- INFSCI 1075 - NETWORK SECURITY (effective Fall 2020: INFSCI 1600 SECURITY AND PRIVACY)

Notes

Requirements subject to change. Check with an academic advisor before registering.

Leadership Certificate

The Certificate in Leadership provides a structured framework of courses and experiences for acquiring the basic practical and analytical skills required of successful public and private sector leaders. Offered by the University of Pittsburgh College of General Studies, this program uses the skills and knowledge of students to help advance their careers further, and take their organizations to the next level.

This 18-credit program is designed for students looking to become a more attractive candidate for a managerial or leadership position in their chosen field, or for those students looking to enter into the business, nonprofit, government, or corporate world.

Who should participate:

The Certificate in Leadership is open to any University of Pittsburgh degree-seeking student, regardless of current school or college, who anticipates moving into a leadership role in business, nonprofit, or other organization.

Upon completion of this certificate, participants will be able to:

- Demonstrate knowledge of leadership theories and models, such as situational, participative, transformational, and servant leadership
- Identify and evaluate the effectiveness of different communicative styles, and communicate clearly and effectively themselves
- Analyze an organization in its cultural, social, historical, developmental, geographic, and/or competitive aspects, and decide which type of leadership style would be most effective in that situation
- Determine one's fit to the leadership-related challenges of an organization and what one would need to be more effective as a leader in that situation.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Pre-Requisite Requirements

Students seeking a leadership certificate must be in good academic standing and should have already completed two basic courses in communication, one each in oral and written, with a grade of C or better.

Recommended Pre-Requisite Courses

- COMMRC 0520 - PUBLIC SPEAKING
BUSORG 1101 and COMMRC 0500 can be substituted for COMMRC 0520
- ENGCMPT 0400 - WRITTEN PROFESSIONAL COMMUNICATION
ENGCMPT 0420, ENGCMPT 0440, and ENGCMPT 0450 or ENGWRIT 0550 and ENGWRIT 0610 can be substituted for ENGCMPT 0400.
Alternatively, refer to the following thematic course clusters and select a lower-level professional writing course that best fits your academic interests and needs.

Note

Applicants without this coursework may be admitted provisionally but must complete the prerequisites prior to taking the LDRSHP 1200 Seminar course.

Co-Curricular Requirement: Emerging Leaders Program

This certificate has a co-curricular requirement: completion of Pitt's Panther Leadership Academy, a 20-week non-credit program run by the Office of Student Affairs. In the course of this program, participants gain exposure to leadership-related issues through workshops and sessions on communications, conflict management, power, influence, diversity, ethics, and personal development plans.

Note: *Students must send proof of completion of Pitt's Panther Leadership Academy program to CGS Advising at cgsadv@pitt.edu.*

You may request to use an alternative, comparable leadership experience (e.g., ROTC Leadership Training, president of student government, or VIH program participant, etc.). This request should be made to a CGS academic advisor and include a detailed rationale explaining how this leadership experience supports the goals of the certificate and your course of study.

Curriculum (18 credits)

The leadership certificate requires 18 credits of core and elective courses.

- a. A required two-course sequence for a total of six credits, covering leadership theories and how to have situational effectiveness as a leader.
- b. Four elective courses (12 credits) from the areas of Leadership and Ethics, Interpersonal Relations, and Situational Analysis. Students may petition for a non-listed course (of personal interest or from their discipline) to fulfill the fourth elective requirement or choose a course from the list of approved electives. At least half of the courses must be at the 1000-level.
 - Achieve a minimum grade of C (2.0) or better for all courses required for the program.
 - Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh.

Required Courses (6 credits)

Students must complete LDRSHP 1100 and the program pre-requisite requirements listed above prior to registering for LDRSHP 1200. The co-curricular requirement can be completed prior or concurrently with the Leadership Seminar.

- LDRSHP 1100 - THEORIES OF LEADERSHIP
- LDRSHP 1200 - LEADERSHIP SEMINAR

Electives (12 credits)

Complete at least one course from each of the three designated areas, four courses in all (a minimum of 12 credits). At least half of the courses must be at the 1000-level.

Area One: Leadership and Ethics

Select a course from Philosophy and elsewhere on ethical reasoning and decision-making.

- COMMRC 1161 - COMMUNICATION ETHICS
- PHIL 0300 - INTRODUCTION TO ETHICS
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES
- PHIL 1300 - ETHICAL THEORY
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1340 - STRATEGIC PLANNING PUBLIC SECTOR
- These may be used as leadership electives for qualified students.
- AFROTC 1014 - LEADING AND COMMUNICATIONS 2
- MILS 0021 - LEADERSHIP & DECISION MAKING
- NUR 1085 - ETHICS IN NURSING AND HEALTH CARE
- PS 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR (cross-listed with PUBSRV 1910)
- REHSCI 1230 - REHABILITATION ETHICS

Area Two: Interpersonal Relations

Choose from courses in Psychology, Communications, English Composition, and elsewhere on advanced interpersonal communications, including negotiation, persuasion, dispute resolution, and small group behavior.

- AFRCNA 1535 - DIMENSIONS OF RACISM
- ANTH 1760 - ANTHROPOLOGY OF LAW
- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1111 - THEORIES OF PERSUASION
- ECON 0200 - GAME THEORY PRINCIPLES
- ENGCOMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
- ENGCOMP 1103 - PUBLIC RELATIONS WRITING
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 0405 - LEARNING AND MOTIVATION
- PSY 1135 - SOCIAL PERCEPTION AND COGNITION
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- SOC 0431 - BUREAUCRACIES

Area Three: Situational Analysis

Take a course from Anthropology, Sociology, and elsewhere and gain insight into a broader dimension or aspect of an organization of interest, or the population with which it interacts.

- ANTH 0701 - CULTURAL ANTHROPOLOGY: OVERVIEW
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- ANTH 1737 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY Semiotic Anthropology
- ANTH 1738 - GENDER PERSPECTIVES IN ANTHROPOLOGY
- ANTH 1755 - URBAN ANTHROPOLOGY
- ECON 0150 - ECONOMIC DATA ANALYSIS
- ECON 0800 - INTRODUCTION TO ECONOMICS Students with a grade of C or better in ECON 0100 and ECON 0110 can substitute for ECON 0800. Use one for the requirement.
- LING 1235 - LANGUAGE, GENDER AND SEXUALITY (cross-listed with GSWS 1235)
- PS 1241 - PUBLIC ADMINISTRATION AND POLITICAL SYSTEM
- PUBSRV 1130 - PLANNING IN THE PUBLIC SECTOR
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 0150 - SOCIAL THEORY
- SOC 0432 - WEALTH AND POWER
- SOC 0444 - URBAN SOCIOLOGY
- SOC 1448 - WORKING WOMEN
- URBNST 0114 - URBAN SUSTAINABILITY
- URBNST 0300 - REMAKING CITIES THROUGH POLICY AND PRACTICE
- URBNST 0506 - URBAN PLANNING PROCESS
- URBNST 0512 - NEIGHBORHOOD PLANNING

Note

Students may not use more than one of each of the courses in these groups: 1) ANTH 0701 and 0780; 2) ANTH 1755, SOC 0444 and URBNST 1614.

Note

Requirements subject to change. Check with an academic advisor before registering.

Managing Health Services Programs and Projects Certificate

Improve your administrative and business skills and earn a Certificate in Managing Health Services Programs and Projects. This 18-credit, interdisciplinary program emphasizes grant and research project management, and is designed to educate health service workers in the areas of sociology, communications, public administration, and management.

The program is applicable to positions such as health project manager, health administration director, health program director, and medical office manager. Students who successfully complete this certificate may apply the credits earned to an undergraduate degree at the University of Pittsburgh College of General Studies (CGS).

Upon completion of this certificate, students will be able to:

- manage health services research projects, grants, contracts, and finances;
- demonstrate the skills necessary to assume an administrative or managerial role in a health care organization;
- apply organizational theory and concepts to health care facilities; and
- analyze how physical, social, and cultural factors may help or hinder communication about health care needs.

Who should enroll:

- Health care workers who have been charged with, or would like to take on, management of grants and research projects
- Public and community health workers who seek an understanding of how physical, social, and cultural factors may help or hinder communication about health care needs
- Health care employees looking to take on leadership roles in the workplace

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Program Requirements

- The Managing Health Services Programs and Projects certificate requires 18 credits, including five (5) required courses and at least one (1) elective.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of 9 credits must be earned at the University of Pittsburgh.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the certificate.

Required Courses (15 credits)

Complete all five courses.

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- COMMRC 1181 - HEALTH COMMUNICATION
New course number effective Spring 2023; formerly COMMRC 1730: Special Topics: Health Communication (SEC 75XX)
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBHLT 0330 - INTRODUCTION TO EPIDEMIOLOGY
Formerly: HRS 1017 Introduction to Epidemiology
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Electives (3 credits)

Take a minimum of one course.

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR

National Preparedness and Homeland Security Certificate

The Certificate in National Preparedness and Homeland Security (NPHS) is designed to teach current and future emergency professionals to analyze information and make decisions in dynamic and complex crisis environments using new and powerful analytic tools. Through experience-based learning activities, certificate students will develop the skills they need to thrive in homeland security and emergency preparedness careers.

This unique 18-credit certificate incorporates hands-on learning methods. The program features dynamic modeling tools developed at the University of Pittsburgh to plan for and respond to disasters; exercises and simulations that follow protocols established by the U.S. Department of Homeland Security; and tools that use virtual reality, visualization, and Geographic Information Systems (GIS) software to integrate information for crisis decision making.

Who should participate:

- Employees of local, state, and federal entities engaged in emergency preparedness, homeland security, and related fields
- Business people who are charged with risk management and are interested in applying industry tested analytics to developing emergency management and continuity of operations (COOP) plans
- Professionals in organizations with first-responders and first receivers, and those looking to step into such leadership positions
- Veterans interested in building on their expertise in decision-making and crisis leadership
- Career changers and current degree seekers looking to enter a growing and important field that uses a data-driven approach to preparedness activities involving both planning and implementation.

Upon completion of this certificate, participants will be able to:

- Develop and implement organizational risk profiles, COOP plans, business recovery plans, and other risk management activities
- Use knowledge of federal, state, and local agency responsibilities to effectively plan and execute emergency response plans
- Apply incident command protocols and consensus building approaches
- Communicate effectively in a crisis, orally and in writing, and transfer information effectively to obtain positive outcomes
- Plan prevention and preparedness operations and measures that help communities handle efforts related to damage limitation, emergency response, and recovery

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

The certificate is composed of twelve credits of required core courses, and six credits of elective courses. Core courses cover foundational content and procedures central to national preparedness and emergency response, in addition to analytical tools and approaches. They include a capstone experience in which students will plan, role-play, and report on a complete disaster scenario involving critical infrastructure sectors such as energy, government, transportation, health, and telecommunications. Elective courses allow students to gain further knowledge or experience relevant to their current or intended career paths in such fields as health, information security, and business continuity. All courses are 3 credits, unless otherwise noted.

- No course with a grade below C will be accepted for certificate credit
- To earn the certificate, students must maintain at least a 2.0 grade point average

- All four required core courses must be completed at the University of Pittsburgh to earn the certificate
- A maximum of six credits may be accepted from other institutions for elective courses
- Students should consult with their advisor and/or core course faculty early in their program to identify elective courses appropriate for their career and/or academic interests

Required Courses (12 credits)

Students must have successfully completed at least one other core course prior to registering for the capstone course. The capstone course may be taken concurrently with another core course.

- NPHS 1510 - FEDERAL AND INTERNATIONAL FRAMEWORK FOR EMERGENCY PREPAREDNESS
- NPHS 1520 - STATE AND LOCAL FRAMEWORK FOR EMERGENCY PREPAREDNESS
- NPHS 1530 - ANALYSIS, INTELLIGENCE AND DECISION TOOLS FOR EMERGENCY PREPAREDNESS
- NPHS 1540 - CAPSTONE COURSE IN EMERGENCY PREPAREDNESS

Electives (6 credits)

The following list shows a sample of courses already approved as electives:

- CS 1655 - SECURE DATA MANAGEMENT AND WEB APPLICATIONS
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- CS 1699 - SPECIAL TOPICS IN COMPUTER SCIENCE Privacy in Electronic Society
- ECON 0150 - ECONOMIC DATA ANALYSIS
- GEOL 0820 - NATURAL DISASTERS
- IE 1015 - GEOGRAPHIC INFORMATION SYSTEMS
- INFSCI 0610 - NETWORKS AND INFORMATION
Note: Course number and title change as of Fall 2020; formerly listed as INFSCI 1070 Intro to Telecom and Networks.
- INFSCI 1550 - SPATIAL INFORMATION
Note: Course number and title change as of Fall 2020; formerly listed as INFSCI 1068 Geospatial Info System / GIS.
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY
Note: Course number and title change as of Fall 2020; formerly listed as INFSCI 1074 Computer Security.
- LCJS 1520 - CYBERCRIME
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY (cross-listed with PUBSRV 1425 - PRINCIPLES OF HOMELAND SECURITY)
- LCJS 1571 - TERRORISM
- NPHS 1900 - INTERNSHIP
- NPHS 1901 - INDEPENDENT STUDY
- NUR 1061 - INDEPENDENT STUDY
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1509 - CONFLICT AND WAR THEORY
- PS 1583 - TOPICS IN INTERNATIONAL RELATIONS European and Global Security
- PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS
- URBNST 0518 - SMART CITIES: FRONTIERS IN URBAN ANALYTICS & BIG DATA

Notes

Students must meet all relevant course prerequisites. NPHS Internship and NPHS Independent Study courses may be repeated for credit with permission.

Note: With the approval of the NPHS advisor, students enrolled in the SHRS Emergency Medicine (EM) program may apply up to six (6) credits of EM courses toward the NPHS certificate electives.

Requirements subject to change. Check with an academic advisor before registering.

Center for National Preparedness

The Center for National Preparedness (www.cnp.pitt.edu) is an interdisciplinary collaboration of experts and departments at the University of Pittsburgh. It provides research, education, and service aimed at advancing the science, policy and implementation of effective federal, state, and local preparedness efforts across the public and private sectors. The Center possesses expertise in business continuity, information technology, engineering, medical research, national security policy, and public health.

Nonprofit Management Certificate

Nonprofit agencies of all kinds are being established to fulfill needs in our communities, while existing community benefit organizations are expanding to meet increasing demand for services. This growth means new opportunities in the rewarding nonprofit sector.

The 18-credit nonprofit management certificate is offered by the College of General Studies in partnership with Pitt's Graduate School of Public and International Affairs. The program provides a solid foundation for those looking to enter the field of public service, to enhance their current roles, or to assume leadership positions. Coursework covers topics including management, fundraising, human resources, and more.

This certificate can be pursued as a standalone program or in conjunction with the completion of another degree at Pitt. The credits you earn while completing this certificate may also be transferred to a bachelor's degree program at CGS, such as our BA in public service.

Who should enroll:

- Professionals with public relations experience
- Professionals with an interest in fundraising
- Professionals with a background in program development
- Professionals with knowledge of marketing and advertising
- Recent graduates or current students who wish to pursue a career in the nonprofit field
- Undergraduate degree-seeking students who wish to have an intermediate credential
- Technology workers
- Entrepreneurs who wish to start a nonprofit

Upon completion of this certificate, participants will be able to:

- organize, manage, or supervise a nonprofit organization;
- hire and train an efficient staff;
- understand the structural and financial issues unique to nonprofits;
- effectively raise revenue through fundraising; and
- write grant proposals.

This certificate is applicable to positions such as grant writers, fundraisers, development officers, accountants, information technology workers, and office managers.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Credit Requirements

- The Nonprofit Management certificate requires 18 credits of core courses, including a three-credit internship.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited educational institutions may be eligible for transfer. However, a minimum of nine credits must be earned at the University of Pittsburgh.

Curriculum (18 credits)

Complete all six required courses.

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1220 - HUMAN RESOURCE MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV 1900 - INTERNSHIP SEMINAR

Note: PUBSRV 1910 Institute of Politics Internship/Seminar (4 cr.) may be used in place of PUBSRV 1900 Internship Seminar. Check with your CGS advisor prior to registering.

Notes

Although courses for the certificate can be taken in any order, we strongly recommend that students consider completing PUBSRV 0020 *Introduction to Public Service* first in order to gain exposure to main theories and practices in the field. Normally the internship would be completed last; however, students should start planning their internship early and review their options with a CGS advisor.

- The internship requires 120 hours at the internship site along with registration for the PUBSRV 1900 course. Visit our Internships page for details.
- PUBSRV 1900 is a 3-credit course and may not be divided over two semesters. However, the student could work with their internship instructor to see if the 120 hours could be divided over two terms.
- Students who work at the University should consult with the PUBSRV internship instructor as to whether they need to complete internship hours outside of Pitt or in a different department on campus.

Gainful Employment Information

Requirements are subject to change. Check with an academic advisor before registering.

Writing Certificate

The Certificate in Writing is a 21-credit program designed for those who desire to improve their writing skills. In today's world, the skillful use of the written word is fundamental. This program consists of academic courses taught by faculty of the Department of English. Participants may choose electives to focus on a particular style of writing or to obtain an overview of several writing styles. The program also offers internships with local media, including newspapers, magazines, and television.

Who should participate:

- Students already enrolled in a degree program in the College of General Studies who wish to concentrate on the development of writing skills

- Those who already have a degree, but who wish to develop their writing skills for personal or professional advancement
- People seeking to embark upon writing as a profession

Upon completion of this certificate, participants will be able to:

- Write clearly and accurately
- Apply writing skills to both fiction and nonfiction works
- Understand different forms and techniques used in various types of writing

This certificate is applicable to fields such as media, industrial organizations, governmental agencies, community groups, service providers, and businesses. Skilled writers may work in any organization or field.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies.

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (21 credits)

In addition to Seminar in Composition, students must complete seven courses (21 credits). These classes should include two English writing courses (6 credits) and five English writing electives (15 credits).

- A minimum of five of the required seven courses must be completed at the University of Pittsburgh.
- No course will be accepted for certificate credit with a grade below C, and no course will be accepted as a prerequisite for a higher-level course if the grade earned is lower than a C

Required Courses (6 credits)

All courses are 3 credits.

- ENGWR 0520 - INTRODUCTION TO FICTION WRITING
- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

Electives (15 credits)

All courses are 3 credits.

Courses offered vary by term. Choose five additional courses from any combinations of poetry, fiction, and nonfiction. A sampling of courses that can be used to fulfill the certificate requirements include:

Poetry

- ENGWR 0530 - INTRODUCTION TO POETRY WRITING
- ENGWR 1210 - POETRY WORKSHOP
- ENGWR 1730 - SENIOR SEMINAR IN POETRY

Fiction

- ENGWR 1010 - INTERMEDIATE FICTION
- ENGWR 1090 - MASTERING POINT OF VIEW
- ENGWR 1091 - AUTOBIOGRAPHY AND CREATIVE IMPULSE
- ENGWR 1092 - WRITER'S JOURNALS
- ENGWR 1094 - READINGS IN CONTEMPORARY FICTION
- ENGWR 1710 - SENIOR SEMINAR IN FICTION

Nonfiction

- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWR 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGWR 1390 - READINGS IN CONTEMPORARY NON-FICTION
- ENGWR 1391 - WRITING THE REVIEW
- ENGWR 1393 - SPORTS WRITING
- ENGWR 1399 - TOPICS IN NON-FICTION: NEWSPAPER
- ENGWR 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWR 1750 - SENIOR SEMINAR IN NONFICTION
- ENGWR 1900 - INTERNSHIP: WRITING

Notes

Requirements subject to change. Check with an academic advisor before registering.

Writing for the Professions Certificate

In today's business climate, employees have discovered that the ability to research, organize, and write various kinds of documents is a critical component of many positions, including those that are primarily technical in nature. Organizations expect employees to communicate clearly and effectively with both colleagues and non-expert stakeholders.

This 18-credit certificate provides participants with a strong foundation for developing these vital writing skills. You will learn techniques that are critical for producing clearly written documents-critiquing, analyzing, and researching-as well as the practical applications that build on this groundwork.

Who should participate:

Individuals for whom writing will be a major component of their job responsibilities, e.g., broadcasters, legal professionals, or reporters.

Upon completion of this certificate, participants will be able to:

- Identify and analyze audience traits and perspectives
- Determine a specific goal and/or purpose of a document, then organize and develop clearly written prose in support of that purpose
- Apply concentrated knowledge of a specialized communication topic

This certificate is applicable to such fields as print and online writing professions, health professions, and nonprofit organizations.

Admission Requirements

Students must meet requirements for admission to the College of General Studies. A certificate application form must be completed and submitted online to the College of General Studies..

Obtaining the Certificate

To receive the certificate, you must fill out an online graduation application through the Pitt Portal prior to completing your last term in the program. Visit Graduation / Diplomas on the Registrar's website for the instructions and check the Graduating with a CGS degree/ certificate website for the submission deadline. Contact a CGS advisor to confirm that all requirements for the certificate have been met. To avoid a late fee, you should complete this process when registering for the term.

Curriculum (18 credits)

- The Writing for the Professions certificate requires 18 credits, including 9 credits of core classes and 9 elective credits.
- Students must achieve a minimum grade of C (2.0) or better for all courses required for the program.
- Credits earned at other accredited institutions may be eligible for transfer. However, a minimum of 9 credits must be earned at the University of Pittsburgh.

Required Courses (9 credits)

- ENGCOMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
 - ENGWRIT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- And choose one of the following two courses:
Note: Either course may be used towards the elective requirement if both courses are taken.
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
 - ENGWRIT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Electives (9 credits)

Choose three courses from the following:

- COMMRC 1182 - MEDIA RELATIONS
New course number effective Spring 2023; formerly COMMRC 1732: Special Topics: Public and Media Relations (SEC 77XX)
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION : Communication and New Media Technologies
- ENGCOMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 1103 - PUBLIC RELATIONS WRITING
- ENGCOMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
- ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCOMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCOMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRIT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRIT 1370 - JOURNALISM BOOT CAMP: WRITE NOW
- ENGWRIT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
- ENGWRIT 1391 - WRITING THE REVIEW
- ENGWRIT 1393 - SPORTS WRITING
- ENGWRIT 1399 - TOPICS IN NON-FICTION: NEWSPAPER

- ENGWR 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWR 1750 - SENIOR SEMINAR IN NONFICTION

Notes

Requirements subject to change. Check with an academic advisor before registering.

Major

Administration of Justice, BA

In Spring 2021, the Administration of Justice, BA was officially terminated. The last semester students were permitted to declare the existing Administration of Justice major was Fall 2021. Students enrolled in the program will have until August 2028 to complete their degree.

In American society, the justice system is a central social institution. Its effects on individuals and social groups give it a pivotal role in a changing society. The administration of justice program is an upper-division undergraduate course of interdisciplinary study in the liberal arts and sciences that leads to a Bachelor of Arts degree. The goal of this baccalaureate program is to develop an understanding of the evolution, theory, structure, functioning, and processes of change in the total system of criminal justice in our society.

Administration of justice majors develop competence in one of four specialized areas:

- Adult and juvenile corrections
- Law enforcement practice
- Forensics
- Cybercrime

Major Requirements

Students must complete a minimum of 120 credits (approximately 40 courses) for the Bachelor of Arts degree with a major in administration of justice. Of this total, 30 credits (10 courses) make up the major, which is satisfied by taking courses to complete the core requirements, area of concentration, and major electives. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

An outline of the Administration of Justice major requirements follows:

Core Requirements: 12 credits (four courses)

Administration of Justice

- LCJS 1200 - CRIMINAL LAW Formerly ADMJ 1400
- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE Formerly ADMJ 0500
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE Formerly ADMJ 1450
- LCJS 1900 - PRESERVICE INTERNSHIP Formerly ADMJ 1900

Area of Concentration: 9 credits (three courses)

Choose one of the four areas of specialization. All courses listed under a given area are required.

Adult and Juvenile Corrections

- LCJS 1310 - LAW AND DEVIANCE Formerly ADMJ 1220

- LCJS 1420 - CORRECTIONS Formerly ADMJ 1300
- PSY 0205 - PSYCHOPATHOLOGY

Law Enforcement Practice

- LCJS 1110 - CRIMINOLOGICAL THEORY Formerly ADMJ 1265
or LCJS 1100 CRIMINOLOGY Formerly ADMJ 0600
- LCJS 1210 - CRIMINAL PROCEDURE Formerly ADMJ 1410 (cross-listed with LEGLST 1141)
- LCJS 1410 - LAW ENFORCEMENT AND POLICING Formerly ADMJ 1200

Forensics

- LCJS 1440 - CRIMINAL INVESTIGATION Formerly ADMJ 1100
- LCJS 1500 - CRIMINALISTICS Formerly ADMJ 1115
- LCJS 1510 - PSYCHOLOGY AND LAW Formerly LEGLST 1230

Cybercrime

- LCJS 1520 - CYBERCRIME Formerly ADMJ 1234

Choose two of these four concentration courses

- ADMJ 1246 - FINANCING TERRORISM
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING Formerly ADMJ 1238
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME Formerly ADMJ 1236
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY Formerly ADMJ 1425 (cross-listed with PUBSRV 1425)

Major Electives: 9 credits (three courses)

- ADMJ 1210 - JUVENILE DELINQUENCY
- ADMJ 1246 - FINANCING TERRORISM
- ADMJ 1495 Criminal Justice Study Abroad (UPitt-Bradford)
- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY Formerly ADMJ 0100
- LCJS 1100 - CRIMINOLOGY Formerly ADMJ 0600
- LCJS 1110 - CRIMINOLOGICAL THEORY Formerly ADMJ 1265
- LCJS 1210 - CRIMINAL PROCEDURE Formerly ADMJ 1410 (cross-listed with LEGLST 1141)
- LCJS 1310 - LAW AND DEVIANCE Formerly ADMJ 1220
- LCJS 1410 - LAW ENFORCEMENT AND POLICING Formerly ADMJ 1200
- LCJS 1420 - CORRECTIONS Formerly ADMJ 1300
- LCJS 1430 - THE JUVENILE JUSTICE PROCESS Formerly ADMJ 1225
- LCJS 1440 - CRIMINAL INVESTIGATION Formerly ADMJ 1100
- LCJS 1500 - CRIMINALISTICS Formerly ADMJ 1115
- LCJS 1501 - CRIMINALISTICS LAB Formerly ADMJ 1118
- LCJS 1510 - PSYCHOLOGY AND LAW Formerly LEGLST 1230
- LCJS 1520 - CYBERCRIME Formerly ADMJ 1234
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING Formerly ADMJ 1238
- LCJS 1530 - ORGANIZED CRIME Formerly ADMJ 1235
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME Formerly ADMJ 1236
- LCJS 1540 - WHITE COLLAR CRIME Formerly ADMJ 1230
- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE Formerly ADMJ 1242

- LCJS 1571 - TERRORISM Formerly ADMJ 1245
- LCJS 1572 - INTRODUCTION POLICE MANAGEMENT Formerly ADMJ 1205
- LCJS 1560 - PROBATION AND PAROLE Formerly ADMJ 1350
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY Formerly ADMJ 1425 (cross-listed with PUBSRV 1425)
- LCJS 1599 - INDEPENDENT STUDY Formerly ADMJ 1901 (cross-listed with LEGLST 1901)
- URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION
- any Pitt Prison Education Project (PPEP) course (codes vary)

Note:

This major requires that you complete an internship at a facility outside the University, and that facility may require a criminal background check, Act 33/34 clearance, and perhaps drug screening to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Transfer Credit Agreement

A transfer credit agreement has been established between the criminal justice program at Butler County Community College and the administration of justice program at Pitt. The agreement gives a course-by-course outline of the associate's degree program and the equivalent course or requirement fulfilled for CGS. Courses transfer if graded C or better. For a copy of the transfer agreement for a specific community college, contact CGS.

Police Academy Certification

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to LCJS 1400, LCJS 1200, LCJS 1210, and two ADMJ elective courses.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;

2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Dental Hygiene, BS

Opportunities for health care professionals are becoming available as a result of the changes in health care delivery formats. To prepare dental hygiene graduates for employment opportunities created by these changes, the University of Pittsburgh's College of General Studies and the School of Dental Medicine have developed a course of study that leads to a Bachelor of Science in dental hygiene. This degree is intended for those students who have graduated from accredited dental hygiene programs with a certificate or associate's degree. (See School of Dental Medicine listings in this bulletin for information about the Associate of Science in Dental Hygiene program.) The Bachelor of Science degree enhances the already completed professional training and provides important exposure to the liberal arts. The combination of basic sciences, clinical experiences, and liberal arts strengthens the career opportunities for dental hygienists in business, sales, dental hygiene education, and research.

Program Requirements

The following program requirements must be met to receive the Bachelor of Science degree:

- Students must earn a minimum of 131 credits to complete the Bachelor of Science degree. These 131 credits are comprised of transfer credits and credits completed at Pitt. Of the 131-credit total, 30 credits must be at the 1000 (junior/senior) level. The courses must be completed within five years of enrolling in the program.
- Students who are transferring from Pitt's associate degree hygiene program to the College of General Studies (CGS) dental hygiene Bachelor of Science degree program complete 40 credits of CGS general education, dental hygiene track, and elective course work.
- At least 30 of the 40 credits must be completed at the University of Pittsburgh in order to fulfill the CGS residency requirement.
- Contact Krista Stokes, CGS dental hygiene academic advisor, for information about transferring credits from other institutions or if you completed your dental hygiene certificate at Pitt before 1995.

Required Courses

The required courses are listed below.

Dental Hygiene Tracks

Students must choose a concentration in health management, education, or research.

Health Management

- DENHYG 1921 - HEALTH MANAGEMENT SEMINAR
- DENHYG 1922 - HEALTH MANAGEMENT PRACTICUM

Education

- DENHYG 1901 - ALLIED HEALTH EDUCATION
- DENHYG 1902 - ALLIED HEALTH EDUCATION PRACTICUM

Research

- NUR 0067 - NURSING RESEARCH: AN INTRODUCTION TO CRITICAL APPRAISAL AND EVIDENCE-BASED PRACTICE or
- PSY 0036 - RESEARCH METHODS LECTURE and
- PSY 0037 - RESEARCH METHODS LABORATORY
Formerly: PSY 0035
- SOC 0230 - SOCIAL RESEARCH METHODS
- Elective - Topic and subject will vary. See Dental Hygiene program website for a list of recommended electives.

General Education Courses

To satisfy the general education component of the program, students take courses in the following general education categories:

Writing (6 credits)

- Two "W" courses

Writing-intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20-24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as W-Courses. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses (except for Professional Communication).

Mathematics (3 credits)

- Algebra or CS course

Students are exempt from having to take Algebra if they earned 620 on the SAT Math or 27 on the ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of diversity. They provide students with analytical skills needed to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course (3 credits) that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course).

Students will work with their CGS advisor to identify the most appropriate course.

Humanities and Arts, Social Sciences, and Natural Sciences (15 credits)

- 6 credits in 2 courses that satisfy 2 of the 3 following general education requirements: *The Arts, Creative Work, Philosophical Thinking or Ethics*.
- 3 credits in a course that satisfies the Social Science general education requirement.
- 3 credits in a course that satisfies the Literature general education requirement.
- 3 credits in a course that satisfies the Historical Analysis general education requirement.

Global Awareness and Cultural Understanding (9 credits)

- 3 credits in a course that satisfies the Global Issues general education requirement.
- 3 credits in a course that satisfies the Specific Geographic Region general education requirement.
- 3 credits in a course that satisfies the Cross-Cultural Awareness general education requirement.

General Education Program Notes:

- 9 to 15 credits of the courses above must be at the 1000-level, depending on the student's area of concentration in the major. One of the courses must also satisfy the General Education Diversity requirement. These credits, when combined with the 15 credits for DENHYG 1544, 1545, 1547, 1549, and 1689 completed in Pitt's dental hygiene program, meet the CGS requirement for 30 credits of 1000-level course work. For a complete list of approved general education courses, see: CGS General Education Catalog (PDF).
- If you were admitted to the CGS Dental Hygiene Program prior to Fall 2018, your general education requirements are listed in the undergraduate catalog here. See also the CGS Comprehensive Course List (PDF) for courses that satisfy your General Education Requirements.

Health Services, BA

The health services major is an interdisciplinary course of study designed to prepare students to work in health care. The program analyzes the structure of the health care industry; identifies cultural, legal, and environmental factors that impact health; and provides students with communication and management skills.

Students choose one of two fields:

- Managing health services programs and projects gives students key administrative and business skills, with an emphasis on grant and research project management.
- Community health assessment provides skills to assess the physical, social, and environmental factors influencing health behaviors.

Major Requirements

A minimum total of 120 credits is required for the Bachelor of Arts degree with a major in health services. Of this total, the major consists of 3 credits of prerequisite courses and 33 credits of core and specialization courses. The remaining credits for the degree are outlined on the General Education Requirements section on this page.

Prerequisite: Computer Competency

Choose one of the following courses to fulfill the 3-credit prerequisite coursework. Check with an advisor for information about other options.

- CS 0004 - INTRODUCTION TO COMPUTER PROGRAMMING-BASIC
- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- INFSCI 0010 - INTRODUCTION TO INFORMATION, SYSTEMS AND SOCIETY
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES

Health Field Core (15 credits)

- COMMRC 1181 - HEALTH COMMUNICATION
New course number effective Spring 2023. Formerly: COMMRC 1730: Special Topics: Health Communication (SEC 75XX)
- NUR 1829 - CONTEM ISSUES CROSS CULTL HEALTH
- PUBHLT 0330 - INTRODUCTION TO EPIDEMIOLOGY
formerly: HRS 1017 Introduction to Epidemiology
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- SOC 0477 - MEDICAL SOCIOLOGY

Specialization Tracks (18 credits)

Students take a total of two required courses and four elective courses. Check with an academic advisor for course availability and additional elective options.

Track 1: Managing Health Services Programs and Projects

Required, choose two:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR or
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION or
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR or
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

Note

If two organizational courses are taken, one will count as an MHSP electve.

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1722 - CULTURE AND POLITICS OF MENTAL HEALTH
- ANTH 1726 - GLOBAL PHARMACEUTICALS
- ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR or PUBSRV 1900 - INTERNSHIP SEMINAR
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- HI 1250 - FOUNDATIONS OF HEALTH INFORMATICS AND INFORMATION MANAGEMENT
- HIM 1455 - QUALITY MANAGEMENT
- HIST 0709 - HISTORY OF GLOBAL HEALTH
- HIST 1090 - HISTORY OF MEDICINE AND HEALTH CARE
- HIST 1706 - DRUGS IN GLOBAL HISTORY
- HPS 0612 - MIND AND MEDICINE
- HRS 1006 - INTRO TO HUMAN NUTRITION
- NROSCI 0081 - DRUGS AND BEHAVIOR
- PHIL 1360 - BIOMEDICAL ETHICS
- PSY 1210 - INTRODUCTION TO CLINICAL PSYCHOLOGY
- PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1120 - HUMAN RESOURCES MANAGEMENT IN THE PUBLIC SECTOR
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH

Track 2: Community Health Assessment

Required, choose two:

- NUR 1765 - RISK FACTORS AND HEALTH
- SOC 1450 - HEALTH AND ILLNESS
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE

Electives, choose four:

- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- ANTH 1722 - CULTURE AND POLITICS OF MENTAL HEALTH
- ANTH 1726 - GLOBAL PHARMACEUTICALS
- ANTH 1727 - HEALTH AND ENVIRONMENT IN PITTSBURGH
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR or PUBSRV 1900 - INTERNSHIP SEMINAR
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- HIST 0709 - HISTORY OF GLOBAL HEALTH
- HIST 1090 - HISTORY OF MEDICINE AND HEALTH CARE
- HIST 1706 - DRUGS IN GLOBAL HISTORY
- HPS 0613 - MORALITY AND MEDICINE
- HRS 1006 - INTRO TO HUMAN NUTRITION
- NROSCI 0081 - DRUGS AND BEHAVIOR
- NUR 1634 - HEALTH CARE DELIVERY IN OMAN
- PSY 0515 - REHABILITATION PSYCHOLOGY
Note: Cross-listed with HRS 1515 - REHABILITATION PSYCHOLOGY
- PSY 1210 - INTRODUCTION TO CLINICAL PSYCHOLOGY
- PSY 1215 - HEALTH PSYCHOLOGY
- PSY 1230 - PSYCHOLOGY OF DEATH AND DYING

- PSY 1235 - ALCOHOL USE AND ABUSE
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBHLT 1001 - INTRODUCTION TO GLOBAL HEALTH
- PUBHLT 1002 - SPECIAL TOPICS IN GLOBAL HEALTH
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- REHSCI 1245 - HUMAN DEVELOPMENT
- REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH
- URBNST 0506 - URBAN PLANNING PROCESS
- URBNST 0512 - NEIGHBORHOOD PLANNING

Notes

Requirements subject to change. Check with an academic advisor before registering.

An internship is available through the College of General Studies. Please see your advisor for additional information.

Pitt Business-Health Services Double Degree

The College of General Studies (CGS) and the College of Business Administration (CBA) offer a double degree program in which students earn both the BA in Health Services through CGS and the BS in Business Administration (BSBA) through CBA. The double degree program is designed for students who are interested in the intersection of health care management and business administration. Learn more.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the

importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;

4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Health Services, BS

The Bachelor of Science in Health Services is an interdisciplinary degree completion program designed for allied health professionals who have already received their technical education and licensure in diagnostic medical sonography, radiological technology or respiratory therapy and for community college graduates who have already completed a designated allied health profession associate degree. The core of this flexible program provides students with communication and management skills as well as broadening students' understanding of health-related issues.

Requirements

Students must earn a minimum of 120 credits to complete the Bachelor of Science degree with a major in health services. Of this total, the degree consists of 12 credits of required health services courses and up to 24 credits of professional courses, with the remainder consisting of general education courses and electives.

Note: Licensed diagnostic medical sonographers, radiological technologists, and respiratory therapists, or those who've earned an associate's degree in an approved allied health profession, will be awarded 24 professional education credits. Credits earned at other colleges or universities will be evaluated for transfer. Please check with an academic advisor for specifics related to your associate's degree program.

Health Service Courses: 12 credits

A minimum of 12 credits, or four courses, are required as follows:

A. Health Field: 6 credits

Students choose two courses from the following list:

- NUR 1765 - RISK FACTORS AND HEALTH
- PHIL 1360 - BIOMEDICAL ETHICS
- PSY 1215 - HEALTH PSYCHOLOGY
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1450 - HEALTH AND ILLNESS

B. Administration/Management Field: 3 Credits

Students choose one course from the following list:

- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR or BUSORG 1020 - ORGANIZATIONAL BEHAVIOR or COMMRC 1102 - ORGANIZATIONAL COMMUNICATION or PSY 1635 ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION
- PUBSRV 1120 - HUMAN RESOURCES MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS

C. Related Field: 3 credits

Students choose one additional course from the Health Field or Administration/Management Field lists above or else from the list below:

- ANTH 1726 - GLOBAL PHARMACEUTICALS
- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR or PUBSRV 1900 - INTERNSHIP SEMINAR
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 1181 - HEALTH COMMUNICATION
New course number effective Spring 2023. Formerly: COMMRC 1730: Special Topics: Health Communication (SEC 75XX)
- HIST 1706 - DRUGS IN GLOBAL HISTORY

- HRS 1006 - INTRO TO HUMAN NUTRITION
- PSY 0515 - REHABILITATION PSYCHOLOGY
Note: Cross-listed with HRS 1515 - REHABILITATION PSYCHOLOGY
- PSY 1255 - PRINCIPLES OF BEHAVIOR MODIFICATION
- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY

Notes

Requirements are subject to change. Many courses are available in an online format. Check with an academic advisor for course availability and additional elective options before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our General Education Requirements changed for students entering as of Fall 2018 (2191) term. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Humanities, BA

The CGS Humanities BA was phased out beginning Fall 2020 and is no longer accepting new students. Inactive students will be able to re-enroll in this major no later than Spring 2023. All students enrolled in the program must complete their degrees by Fall 2028.

Humanities is a liberal arts major with a focus on courses from three humanities departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Humanities degree graduates have a variety of skills that make them attractive to prospective employers. Career fields pursued by humanities graduates include the following:

- Acting and drama
- College administration
- Event planning
- Human resources
- Politics
- Teaching

- Publishing
- Journalism
- Marketing and advertising
- Public relations
- Insurance
- Real estate
- Social work
- Occupational therapy
- Travel and tourism

Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in humanities. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications below. The remaining credits required for the degree are outlined in the *General Education Requirements* section on this page.

Standard Option

Choose a minimum of 36 credits (approximately 12 courses) from any three departments/programs below. All courses taken must be humanities related.

- Africana Studies (courses must be humanities related)
- Classics
- Communication
- English Composition (0300 and above)
- Film Studies
- English Literature
- English Writing
- Foreign language departments (literature and culture courses)
- History of Art and Architecture
- Music
- Philosophy
- Religious Studies (courses must be humanities related)
- Studio Arts
- Theatre Arts

Notes

- At least five courses must be taken from one department, and at least three courses must be taken from each of the two other departments.
- At least half of the courses taken for the major must be upper-division (1000-level) courses.
- All courses selected for the humanities major must be approved by an academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see an advisor for additional information.

Pre-Education Option

The College of General Studies and the Pitt School of Education have collaborated on a curriculum within the humanities major that incorporates all of the prerequisite course work needed for admission into the certificate program in comprehensive English education. This option may be used by students interested in the Master of Arts in Teaching (MAT) or Professional Year (PY) programs offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.

Students pursuing this track take a wide variety of English courses in literature, writing/composition, and literary/film/media theory, in addition to a required foundations course in special education, for a total of 36 credits (approximately 12 courses). At least half of these courses must be at the 1000 level.

Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program. See a CGS advisor for more information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.

- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Law, Criminal Justice, and Society, BA

Law, Criminal Justice, and Society

Are you considering law school or graduate study in the social sciences after Pitt? Are you interested in pursuing a career in one of the many criminal justice professions or advocacy organizations? The Law, Criminal Justice, and Society (LCJS) major examines the workings of the criminal justice system in the broader context of society and the legal system. A core curriculum fosters comprehension and critical analysis of the legal system, criminological theory, criminal justice institutions, criminal law, and social inequality. Students also will complete six credits of professional skills and a capstone course on ethics in criminal justice. The LCJS major equips students with the knowledge and skills they need to pursue advanced degrees in law and social science, and to succeed as professionals and advocates in the justice-oriented professions and organizations that serve American society's diverse and dynamic communities. This major is offered jointly between the Dietrich School and the College of General Studies.

Students completing this major will:

- examine the major institutions of the criminal justice system, and situate the workings of these institutions in a broader legal, social, and historical context;
- develop knowledge and legal reasoning skills in criminal law;
- examine the law's conflicting role in securing social order and security, on the one hand, and in creating and reinforcing social inequality on the other; and,
- develop basic professional knowledge and demonstrate ethical reasoning in preparation for being positive and successful contributors to law and justice-oriented career fields as professionals and/or public policy advocates.

This major requires 36 credits for completion, which are distributed as follows.

- Foundations - 6credits
- Core areas - 15 credits
- Electives - 6credits
- Professional skills - 6credits
- Capstone - 3credits

Except as noted, all courses are 3-credit courses.

Foundations

Both of the following courses are required.

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY Formerly ADMJ 0100
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW Formerly LEGLST 0200

Core

Select courses according to the guidelines stated. Course selections must comprise a total of at least 15 credits.

Theories of Crime

Choose one of the following courses.

- LCJS 1100 - CRIMINOLOGY Formerly ADMJ 0600
- LCJS 1110 - CRIMINOLOGICAL THEORY Formerly ADMJ 1265

Criminal Law

Select one of the following courses.

- LCJS 1200 - CRIMINAL LAW Formerly ADMJ 1400 (cross-listed with LEGLST 1140)
- LCJS 1210 - CRIMINAL PROCEDURE Formerly ADMJ 1410 (cross-listed with LEGLST 1141)

Power, Inequality, and Social Change

Select two of the following courses.

- LCJS 1300 - LAW AND POLITICS Formerly LEGLST 1210 (cross-listed with PS 1213)
- LCJS 1310 - LAW AND DEVIANCE Formerly ADMJ 1220
- *Or* SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- LCJS 1320 - CIVIL RIGHTS LAW Formerly LEGLST 1340
- *Or* PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY Formerly LEGLST 1355
- LCJS 1340 - LAW AND SOCIAL CHANGE Formerly LEGLST 1155
- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE Formerly ADMJ 1242
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE Formerly ADMJ 1450
- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1535 - DIMENSIONS OF RACISM
- AFRCNA 1537 - RACE AND THE CRIMINAL JUSTICE SYSTEM
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1632 - THE HISTORY OF THE CIVIL RIGHTS MOVEMENT
- SOC 0432 - WEALTH AND POWER
- SOC 0434 - POLITICAL SOCIOLOGY

- URBNST 0112 - SOCIAL JUSTICE AND THE CITY

Criminal Justice Institutions

Select one of the following courses.

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE Formerly ADMJ 0500
- LCJS 1430 - THE JUVENILE JUSTICE PROCESS Formerly ADMJ 1225
- LCJS 1410 - LAW ENFORCEMENT AND POLICING Formerly ADMJ 1200
- LCJS 1420 - CORRECTIONS Formerly ADMJ 1300
- LCJS 1440 - CRIMINAL INVESTIGATION Formerly ADMJ 1100
- URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION

Elective courses

Select two courses from list A or one course from each list A and list B. Please keep in mind that course selections must comprise a total of at least 6 credits.

List A

- LCJS 1500 - CRIMINALISTICS Formerly ADMJ 1115
- LCJS 1501 - CRIMINALISTICS LAB Formerly ADMJ 1118
- LCJS 1510 - PSYCHOLOGY AND LAW Formerly LEGLST 1230
- LCJS 1520 - CYBERCRIME Formerly ADMJ 1234
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING Formerly ADMJ 1238
- LCJS 1530 - ORGANIZED CRIME Formerly ADMJ 1235
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME Formerly ADMJ 1236
- LCJS 1540 - WHITE COLLAR CRIME Formerly ADMJ 1230
- LCJS 1560 - PROBATION AND PAROLE Formerly ADMJ 1350
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY Formerly ADMJ 1425 (cross-listed with PUBSRV 1425)
- LCJS 1571 - TERRORISM Formerly ADMJ 1245
- LCJS 1572 - INTRODUCTION POLICE MANAGEMENT Formerly ADMJ 1205
- LCJS 1580 - THE LEGAL SYSTEM Formerly LEGLST 0080
- LCJS 1581 - INTERNATIONAL LAW Formerly LEGLST 1327
- LCJS 1582 - PUBLIC LAW AND MORAL REASONING Formerly LEGLST 0020
- LCJS 1583 - SEX, LAW AND MARRIAGE Formerly LEGLST 1315
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE Formerly LEGLST 1152
- LCJS 1586 - CONSUMER LAW Formerly LEGLST 1325
- LCJS 1599 - INDEPENDENT STUDY Formerly ADMJ 1901 and LEGLST 1901
- ADMJ 1210 - JUVENILE DELINQUENCY
- ADMJ 1495 COMPARATIVE JUSTICE STUDY ABROAD (UPitt Bradford)
- Any LCJS course not used to fulfill any other major requirement.
 - Any Pitt Prison Education Project (PPEP) course; offerings will vary.

List B

- GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
- ENGLIT 0365 - IMAGINING SOCIAL JUSTICE
- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0663 - 20THC AFRICAN AMERICAN WOMEN'S HISTORY

- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
- HIST 1640 - AMERICA CHILDHOODS: RACE, GENDER, AND CITIZENSHIP, 1865-PRESENT
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1675 - POLITICS OF HUMAN RIGHTS
- PSY 0205 - PSYCHOPATHOLOGY
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- SLAV 1225 - BEHIND BARS: CROSS CULTURAL REPRESENTATIONS OF PRISON IN THE 20TH CENTURY
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- Any non-LCJS course not used to fulfill any other major requirement.

Professional Skills

Select at least one course from each category. Course selections must comprise a total of at least 6 credits.

Research or Practical Skills

- ENGCOMP 0450 - RESEARCH WRITING
- LCJS 1610 - Data Analysis in Criminal Justice
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH Formerly LEGLST 1410
- LCJS 1900 - PRESERVICE INTERNSHIP Formerly ADMJ 1900
- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE
- PSY 0036 - RESEARCH METHODS LECTURE
- SOC 0230 - SOCIAL RESEARCH METHODS
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS

Professional or Public-Oriented Writing

- ENGCOMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
- ENGCOMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 0521 - WRITING WITH DATA
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 0641 - WRITING FOR CHANGE
- ENGCOMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- LCJS 1630 - WRITING IN THE CRIMINAL JUSTICE PROFESSIONS

Capstone

- LCJS 1700 - ETHICS IN CRIMINAL JUSTICE (CAPSTONE)

Writing course

Students must complete at least one W-course in the major. LCJS 1700 - ETHICS IN CRIMINAL JUSTICE (CAPSTONE) will fulfill this requirement.

Additional information

Grade Requirements

A minimum GPA of 2.0 in courses for the LCJS major is required for graduation.

Satisfactory/No Credit option

Students may apply up to six credits of coursework taken on an S/NC basis to the LCJS major. Student may apply up to nine credits if three of those credits are earned as part of a Study Abroad course that applies toward the major.

Transfer credits for Police Academy Certification

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to the Core Area requirements for Criminal Law (3 credits) and Criminal Justice Institutions (3 credits); two major electives (6 credits); and LCJS 1600 Pre-Service internship, which fulfills the Research/Practical Skills Course (3 credits) requirement in the Professional Skills area.

Legal Studies, BA

In Spring 2021, the Legal Studies, BA was officially terminated. The last semester students were permitted to declare the existing Legal Studies major was Fall 2021. Students enrolled in the program will have until August 2028 to complete their degree.

The Legal Studies major is an interdisciplinary course of study that combines the theories and methods of several social science disciplines and law. While not designed as a prelaw program, the major seeks to develop an understanding of the nature, content, and operation of American law and legal institutions.

Career Opportunities

Courses in legal studies provide a background for graduate work in administration of justice, business, legal studies, and law as well as work in law-related fields like insurance, social security, and social services. The courses help prepare students for careers in the following settings:

- banking
- children's rights
- civil liberties organizations
- collective bargaining/labor relations
- corporate sales divisions
- credit-related agencies
- judicial administration
- legal research
- human resources
- planning commissions
- privacy protection
- public government aid/legislation
- public welfare
- real estate agencies
- tax consultation firms
- workers' compensation bureaus

Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in legal studies. Of this total, 30 credits make up the major, which is satisfied by taking courses to complete the core requirements, legal studies electives, and outside electives. Below is an outline of these major course requirements. The remaining credits required for the degree are outlined in the General Education Requirements section on this page. Some legal studies courses fulfill the College of General Studies social sciences curriculum requirements. See the current time schedule of classes for specific information.

Core Requirements: 6 credits (two courses)

- LCJS 1580 - THE LEGAL SYSTEM Formerly LEGLST 0080
Choose one of the following:
- LCJS 1300 - LAW AND POLITICS Formerly LEGLST 1210 (cross-listed with PS 1213)
- PS 1213 - LAW AND POLITICS (Political Science)

Legal Studies Electives: 18 credits (choose six courses)

- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW
- LCJS 1200 - CRIMINAL LAW Formerly LEGLST 1140 (cross-listed with ADMJ 1400)
- LCJS 1210 - CRIMINAL PROCEDURE Formerly LEGLST 1141 (cross-listed with ADMJ 1410)
- LCJS 1320 - CIVIL RIGHTS LAW Formerly LEGLST 1340
- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY Formerly LEGLST 1355
- LCJS 1340 - LAW AND SOCIAL CHANGE Formerly LEGLST 1155
- LCJS 1430 - THE JUVENILE JUSTICE PROCESS Formerly ADMJ 1225
- LCJS 1510 - PSYCHOLOGY AND LAW Formerly LEGLST 1230
- LCJS 1581 - INTERNATIONAL LAW Formerly LEGLST 1327
- LCJS 1582 - PUBLIC LAW AND MORAL REASONING Formerly LEGLST 0020
- LCJS 1583 - SEX, LAW AND MARRIAGE Formerly LEGLST 1315
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE Formerly LEGLST 1152 (cross-listed with PUBSRV 1300)
- LCJS 1586 - CONSUMER LAW Formerly LEGLST 1325
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH Formerly LEGLST 1410
- LCJS 1900 - PRESERVICE INTERNSHIP Formerly ADMJ 1900
- LEGLST 1150 - LAWYERS AND LEGAL PROFESSION
- LEGLST 1260 - LAW, LITERATURE, AND CINEMA
- LEGLST 1318 - SEPARATION, DIVORCE AND CUSTODY
- LEGLST 1320 - LAW AND ENVIRONMENT
Or GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
- LEGLST 1901 - INDEPENDENT STUDY

Outside Electives: 6 credits (choose two courses)

The final degree requirement is completion of 6 credits (two courses) from a list of approved electives outside legal studies. The following represents approved elective courses from various disciplines:

Administration of Justice

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY Formerly ADMJ 0100
- LCJS 1310 - LAW AND DEVIANCE Formerly ADMJ 1220
- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE Formerly ADMJ 0500
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING Formerly ADMJ 1238
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE Formerly ADMJ 1450

- ADMJ 1495 - CRIMINAL JUSTICE STUDY ABROAD (UPITT - Bradford)

Communication

- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS

English Composition

- ENGCMPT 0410 - WRITING IN THE LEGAL PROFESSIONS

History

- HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
- HIST 1190 - MEDIEVAL GOVERNMENT AND SOCIETY
- HIST 1191 - ENGLISH ORIGINS OF AMERICAN LAW

Political Science

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1211 - LEGISLATIVE PROCESS
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1614 - THEORIES OF JUSTICE (Honors)
- PS 1675 - POLITICS OF HUMAN RIGHTS

Psychology

Pitt Prison Education Project Courses

- Any Pitt Prison Education Project (PEEP) course (codes vary)

Notes

Students interested in a minor, rather than a major, in legal studies should check with their academic advisor.

Requirements are subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Liberal Studies, BA

Designed for the returning adult learner, the Liberal Studies major allows students the flexibility to explore a wide range of subjects across disciplines and to apply their academic studies to professional, career, and educational goals. With its interdisciplinary and integrated approach to learning, this program blends liberal arts strengths with the professional knowledge and skills needed for success in the diverse workplace of the 21st century.

This major is an excellent choice for working professionals looking to earn their first or second undergraduate degree and to advance their careers around their schedule and at their own pace.

Degree Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in liberal studies. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications below. See our General Education program section for the remaining degree requirements.

Multidisciplinary Curriculum

The Liberal Studies major curriculum is comprised of 36 credits, or 12 multidisciplinary courses, unified by a central theme. At least 15 credits (approx. 5 courses) must come from one discipline, which will be your primary academic field of study. The remaining theme-related courses may be selected from one or several disciplines within the humanities, social sciences, or natural sciences areas. Professional credits may also be used in the major with prior approval.

Designing the Liberal Studies Concentration: Tools and Resources

To design your concentration, you will combine courses from two or more disciplines and apply knowledge and modes of thinking to study your chosen topic in depth. You will work with your CGS advisor to prepare a proposal and have it approved by the Undergraduate Studies Dean's Office in advance.

Four-Year Sample Degree Map

Students have a variety of options when designing their Liberal Studies degree plan and major concentration. This degree map provides a sample pathway for completing the program in four years when enrolled full-time in the fall and spring terms.

Sample Themes

You can choose to combine undergraduate courses offered by departments and programs from various disciplines and schools. Here are a few sample concentrations to help get you started thinking critically and creatively about the array of topics that lend themselves well to multidisciplinary exploration.

Planning and Getting Your Proposal Approved

Crafting a strong proposal requires time for planning and research, as well as guidance from your academic advisor and professors. Find tips and instructions for this process and a link to the proposal form [here](#).

Program Notes

- Students must have their proposal approved by an Assistant Dean in the Undergraduate Studies Dean's Office by the first semester of their senior year at CGS (see program residency requirement below).
- At least two disciplines must be represented in the plan of study.
- Up to 12 professional (non-liberal arts) credits can be used in the major.
- Any subsequent changes to the plan of study must be reviewed and approved through the course substitution appeal process.
- Students are encouraged to pursue an internship / study abroad experience as part of the major. Up to 6 internship credits and 9 study abroad credits are accepted.
- A maximum of 6 credits with the S/NC grade may be used in the major.
- This major cannot be pursued as a double major. Students can add a minor or a certificate to complement their studies (CGS course overlap rules apply).
- Liberal Studies students must earn a minimum of 30 college level credits and half of the major requirements at the University of Pittsburgh and have a minimum GPA of 2.0 for graduation. The remaining program credits may include transfer credit and/or advanced standing credits (see CGS transfer credit policy).
- 30 credits for the degree must be completed in upper-level classes (1000-level or equivalent) and at least half of the major requirements must be upper-level.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies

- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Media and Professional Communications, BA

This major provides students with a rigorous education in the theories of mass media process, history, and ethics as well as the opportunity to specialize in one of three professional practice areas: corporate and community relations, writing for the professions, or digital media.

The three tracks are designed to strengthen both the knowledge base and proficiencies of students pursuing careers in communication fields, such as print, television, radio, film, new media, and corporate and organizational communications. This program also will benefit students pursuing careers in a variety of industries in which communication with internal and external audiences is critical. Learn more about our featured internship opportunity with Pitt Panther TV, and other internship opportunities, today.

Major Requirements

Students must earn a minimum of 120 credits for the Bachelor of Arts degree with a major in media and professional communications. Of this total, the major consists of 12 credits of required core courses and 24 credits of specialization courses. The remaining credits for the degree are outlined in the General Education Requirements section on this page.

Note: English composition (ENGCOMP) courses and writing-intensive courses (officially designated as W courses in the catalog) that are taken for the major must be passed with a grade of C or higher (grades of C- or lower are not acceptable).

Core Courses (12 credits)

The following four courses are required for all three tracks. Some courses serve as prerequisites to more advanced courses in the MPCOMM major. Please review individual catalog descriptions and plan your schedule accordingly.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 1121 - HISTORY OF MASS MEDIA
- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Specializations (24 credits)

Choose one of the specialization tracks that follow.

TRACK 1: Corporate/Community Relations

Required Courses (9 credits)

- BUSERV 1940 - MARKETING FUNDAMENTALS
- COMMRC 1111 - THEORIES OF PERSUASION

- COMMRC 1182 - MEDIA RELATIONS

Note: New course number effective Spring 2023; formerly COMMRC 1732: Special Topics: Public and Media Relations (SEC 77XX)

Note

BUSERV 1940 Marketing Fundamentals may be substituted with BUSMKT 1040 Intro to Marketing.

Electives, choose four (12 credits)

- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION Communication and New Media Technologies
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0515 - PERSASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1103 - PUBLIC RELATIONS WRITING
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1120 - HISTORY AND ETHICS OF ADVERTISING AND PUBLIC RELATIONS
- ENGCMP 1270 - PROJECTS IN BLACK RHETORIC
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- FMST 1890 - THE BUSINESS OF BROADCASTING
- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 1635 - ORGANIZATIONAL PSYCHOLOGY
- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- SOC 0490 - MASS MEDIA
- URBNST 0512 - NEIGHBORHOOD PLANNING

Internship, choose one (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR
- THEA 1484 - DIRECTED PROJECT BUSINESS MGT

Track 2: Writing for the Professions

Required Courses (6 credits)

- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS
and choose one of the following courses:
- ENGCMPT 0400 - WRITTEN PROFESSIONAL COMMUNICATION or
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Note

COMMRC 1114 may be substituted with either COMMRC 1161 Communication Ethics (3cr.) or, if not used as an elective, ENGCMPT 1103 Public Relations Writing (3cr.).

Electives, choose five (15 credits)

- COMMRC 1182 - MEDIA RELATIONS
Note: New course number effective Spring 2023; formerly COMMRC 1732: Special Topics: Public and Media Relations (SEC 77XX)
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION *Communication and New Media Technologies*

Internship (3 credits)

- CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Natural Sciences, BS

The natural sciences major is a liberal arts major with a focus on courses from multiple natural sciences departments. Students customize this major to meet their interests and personal or career goals, choosing from a variety of courses with a concentration in areas, such as anthropology, biological sciences, chemistry, computer science, geology and planetary science, history and philosophy of science, mathematics, neuroscience, physics, psychology, and statistics.

Also available are a pre-medicine option (for those preparing for medical school or another health professional school); a pre-physician assistant option (for those preparing to apply to Physician Assistant education programs), and two pre-education options (for those preparing for teaching careers).

Natural Sciences Standard (Multi-Disciplinary) Major (36 credits)

Choose a minimum of 36 credits (approximately 11-12 courses, not including labs) from two to four departments below. All courses taken must be related to natural sciences and selected in consultation with your CGS advisor. At least 15 credits (approx. five courses) must be taken from one department, which provides a disciplinary base. The other courses should be selected based on your professional and academic goals and approved by your academic advisor.

- Anthropology (natural sciences-related course)
- Astronomy
- Biological Sciences
- Chemistry
- Computer science (only courses numbered 0401 and above)
- Geology and planetary science
- History and philosophy of science (natural sciences-related course)
- Mathematics (only courses numbered 0220 and above)
- Neuroscience
- Physics
- Psychology
- Statistics (0200 or 1000, and courses numbered above 1000)

Pre-Medicine Option (39 credits)

This natural sciences concentration incorporates the course work needed for admission to most medical and dental programs. Completion of this concentration does not guarantee acceptance into graduate study. Students pursuing this option can take advantage of the resources of the University of Pittsburgh's Interprofessional Center for Health Careers (PIC Health Careers) Night sections of biology, chemistry, and physics courses are available, with seats reserved specifically for CGS students.

Effective for Spring 2022 applicants and beyond: *Students must have a 3.00 GPA to be admitted into the Pre-Medicine track in the Natural Sciences major.*

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
 - BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 (effective for Fall 2019: BIOSC 0057 FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1 or BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1)
 - BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
 - BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 or
 - BIOSC 1000 - BIOCHEMISTRY
 - CHEM 0110 - GENERAL CHEMISTRY 1
 - CHEM 0120 - GENERAL CHEMISTRY 2
 - CHEM 0310 - ORGANIC CHEMISTRY 1
 - CHEM 0320 - ORGANIC CHEMISTRY 2
 - CHEM 0345 - ORGANIC LABORATORY
 - MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS
 - PHYS 0110 - INTRODUCTION TO PHYSICS 1
 - PHYS 0111 - INTRODUCTION TO PHYSICS 2
 - PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS
- Additional recommended courses for premedicine option:
- *MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS (choose the course that you did not take as part of your requirements)
 - BIOSC 1850 - MICROBIOLOGY
 - MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
 - NROSCI 1000 - INTRO TO NEUROSCIENCE
 - NROSCI 1250 - HUMAN PHYSIOLOGY

Notes

- Requirements can vary from school to school. To ensure meeting eligibility criteria, one year of English (writing intensive) and one half year of Psychology and/or Sociology are also recommended. Consult the websites of the medical schools to which you plan to apply for their specific requirements.
- Please note also that students pursuing the Pre-Medicine track in Natural Sciences *cannot* be awarded a Chemistry minor in the Dietrich School of Arts & Sciences.

Pre-Physician Assistant Option (min. 40 credits)

The Pre-PA curriculum is designed for students who are interested in the Physician Assistant Studies Program at the University of Pittsburgh School of Health & Rehabilitation Sciences (SHRS). The Pre-PA option incorporates the prerequisite course work necessary for the application. Completion of the Pre-PA plan does not guarantee admission. For a full list of admission requirements, visit the School of Health and Rehabilitation Sciences PA program website.

Note: Requirements for other PA programs from schools other than the University of Pittsburgh may differ. Please consult their respective websites for specific admission requirements.

Effective for Spring 2022 applicants and beyond: *Students must have a 3.00 GPA to be admitted into the Pre-PA track in the Natural Sciences major.*

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 (effective Fall 2019: BIOSC 0057 FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1 or BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1)
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 or BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
or CHEM 0345 - ORGANIC LABORATORY
- NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1
- NUR 0002 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 1
- NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2
- NUR 0003 - NURSING ANATOMY AND PHYSIOLOGY LABORATORY 2
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY Upper-Level Elective Course or PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- STAT 0200 - BASIC APPLIED STATISTICS or STAT 1000 - APPLIED STATISTICAL METHODS
- Outside Major: Other Requirements
- REHSCI 1235 - MEDICAL TERMINOLOGY
- HRS 1006 - INTRO TO HUMAN NUTRITION

Notes

If you are seeking to apply to the University of Pittsburgh's Physician Assistant program, the school accepts: BIOSC 0041/0042 & BIOSC 1250/1255 or HDD 1011/1012 & HDD 1033 in place of NUR 0012/0002 & 0013/0003; NUR 0031/0032 in lieu of BIOSC 1850/1855, and NUR 0088 for the statistics requirement. You will also need a medical terminology course. See additional requirements outside the major.

Earth & Space Science Pre-Education Option (45 credits)

The natural sciences degree offers a 45-credit pre-education option in earth & space science, designed collaboratively with the School of Education. In this pre-ed option, you'll take a core special education course and a variety of geology, physics, astronomy, and math courses that will help you prepare for graduate education. This option is ideal for students interested in the Master of Arts in Teaching (MAT) in Science Education (subject area: Earth & Space Science) at Pitt. *Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.*

Note: The School of Education recommends at least a 3.0 cumulative undergraduate GPA for all of their teacher certificate programs. Please consult their Admissions page for program-specific requirements.

- ASTRON 0089 - STARS, GALAXIES AND THE COSMOS
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0060 - HISTORY OF THE EARTH
or GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 0800 - GEOLOGY
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- GEOL 0890 - OCEANOGRAPHY
or GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1

- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC
- Science Electives - Subject topics will vary

General Science Pre-Education Concentration (46 credits)

Created in partnership with the School of Education, our general science pre-education concentration includes the prerequisite coursework needed for admission into the Master of Arts in Teaching (MAT) in Science Education (subject area: General Science) at Pitt. In this pre-ed option, you will take 46 credits consisting of a core special education course and a variety of chemistry, biology, physics, astronomy, geology, and math courses that will help you prepare for science teacher certification or graduate education. *Completion of the prerequisites for the School of Education does not guarantee acceptance to the program.*

Note: The School of Education recommends at least a 3.0 cumulative undergraduate GPA for all of their teacher certificate programs. Please consult their Admissions page for program-specific requirements.

Notes

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in

our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ("W") courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)

- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Public Service, BA

The undergraduate major in public service is offered in partnership with the Pitt Graduate School of Public and International Affairs. It is designed to prepare students for a broad range of careers that are focused on the resolution of public problems or the delivery of public services. These careers range from those in the local government and community arena to the metropolitan region and state arena to national and international settings. Potential employers include local, state, and federal governments; nonprofit and nongovernmental organizations at the local, regional, national, and international level; private firms engaged in working with governments; and private corporations with an active public service culture.

The major serves students who are interested in public issues as concerned and interested citizens and prepares them for a wide range of graduate programs related to public policy and management.

Major Requirements

Students must complete a minimum of 120 credits for the Bachelor of Arts degree with a major in public service. Of this total, students must take:

- 33 credits (11 courses) in public service;
- one (1) course in statistics (STAT 0200 - BASIC APPLIED STATISTICS, STAT 0800 or STAT 1000); and
- six (6) credits (two courses) in a related field such as political science, economics, psychology, sociology, or another field approved by an academic advisor. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Core Courses (15 credits)

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
Or: PIA 0101 HOW PUBLIC POLICY WORKS: FOUNDATIONS OF PUBLIC POLICY
- PUBSRV 0040 - PUBLIC SERVICE TECHNOLOGIES
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV 1900 - INTERNSHIP SEMINAR

Concentration Areas (18 credits)

Choose one of the three concentration areas below:

Public Administration Concentration

- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION

- PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1120 - HUMAN RESOURCES MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1130 - PLANNING IN THE PUBLIC SECTOR
- PUBSRV - Electives (choose two additional public service courses)

Nonprofit Management Concentration

- PUBSRV 1200 - PRACTICES OF NON-PROFIT MANAGEMENT
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1220 - HUMAN RESOURCE MANAGEMENT OF NON-PROFIT ORGANIZATIONS
- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV - Electives (choose two additional public service courses)

Note

The following courses may substitute for each other in the event of course scheduling conflicts or unavailability: PUBSRV 1110 and PUBSRV 1210 | PUBSRV 1120 and PUBSRV 1220

Self-Designed Concentration

Courses that meet the special program needs of the student may be selected from the courses offered in public service or in a related area or department. A written plan for completing the self-designed concentration must be approved by the College of General Studies Academic Affairs Committee. The proposed plan of studies should be unique and not offered at Pitt in another facet such as another major, certificate or minor.

Public Service Electives

Public administration concentration students may use the 1200-numbered courses as electives; nonprofit management concentration students may use 1100-numbered courses. Courses designated (UHC) are offered in conjunction with the David C. Frederick Honors College.

- PIA 0201 - SKILLS FOR POLICY RESEARCH AND ANALYSIS
- PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE
- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
Or: PIA 1102 - CITY OF WHITE SUPREMACY: RACE, SPACE, AND POLICY IN AMERICAN CITIES
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS
- PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE
- PUBSRV 1340 - STRATEGIC PLANNING PUBLIC SECTOR
- PUBSRV 1390 - THEORIES OF LEADERSHIP
- PUBSRV 1425 - PRINCIPLES OF HOMELAND SECURITY
- PUBSRV 1430 - TRIAL ADVOCACY 1 (honors)
- PUBSRV 1435 - TRIAL ADVOCACY 2 (honors)
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- PUBSRV 1901 - INDEPENDENT STUDY
- PUBSRV 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR *PUBSRV 1910 may be used in place of PUBSRV 1900. Check with an academic advisor before registering*

Notes

Five-year accelerated program for Pitt undergraduates

High-achieving University of Pittsburgh juniors (and in some cases, first-term seniors) in the College of General Studies may apply early to the Graduate School of Public and International Affairs (GSPIA). If admitted, they may enroll at GSPIA in what normally would have been their senior year, allowing them to complete both a bachelor's and a master's degree in a total of five years. Special eligibility requirements apply. Pitt undergraduates interested in this program should contact GSPIA at 412-648-7640.

Please note:

This major requires that you complete an internship at a facility external to the University, and this facility may or will require a criminal background check, an Act 33/34 clearance, and perhaps a drug screen to determine whether you are qualified to participate in the internship. Additionally, in order to become licensed or employed, many states will inquire as to whether the applicant has been convicted of a misdemeanor, a felony, or a felonious or illegal act associated with alcohol and/or substance abuse.

Students interested in a minor, rather than a major, in public service should check with their academic advisor.

Requirements subject to change. Check with an academic advisor before registering.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially

revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)
- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Social Sciences, BA

The CGS Social Sciences major was phased out beginning Fall 2020 and is no longer accepting new students. Inactive students will be able to re-enroll in this major no later than Spring 2023. All students enrolled in the program must complete their degrees by Fall 2028.

Social sciences is a liberal arts major with a focus on courses from three social sciences departments. This major can be customized to meet your interests and personal or career goals. You will choose to concentrate in three areas from the list below and have the opportunity to take a variety of courses within those areas of study.

Also available is a pre-education option for those preparing for a teaching career.

Social Sciences Standard Major (36 credits)

Of the minimum total of 120 credits required for the Bachelor of Arts degree with a major in social sciences area, 36 credits (approximately 12 courses) must come in courses that satisfy the major requirements. To satisfy those requirements, students choose social sciences related courses from three of the following departments and programs.

- Africana studies (social sciences-related courses)
- Anthropology (social sciences-related courses)
- Economics
- Gender, Sexuality, and Women's Studies
- History
- Jewish Studies
- Legal Studies
- Political Science
- Psychology (social sciences-related courses)
- Religious Studies (social sciences-related courses)
- Sociology
- Urban Studies

Notes

Students must adhere to the following requirements as they take courses for the social sciences standard major:

- At least five courses must be taken from one department/program listed above and at least three courses from the other two departments/programs.
- At least one half of the major courses must be at the 1000-level.
- All courses selected for the social sciences area major must be approved by an academic advisor.

Pre-Education Option (36 credits)

The College of General Studies and the Pitt School of Education have collaborated on a concentration in the social sciences major that incorporates the prerequisite science course work needed for admission into the certificate program in Social Studies Education. This option may be used by students interested in the Master of Arts in Teaching (MAT) program and Professional Year (PY) Program offered in the School of Education. Completion of the prerequisites for the School of Education does not guarantee acceptance to its programs.

Students must complete a minimum of 120 credits (approximately 40 courses) for a Bachelor of Science degree with a major in social sciences. Of this total, students must take a minimum of 36 credits (approximately 12 courses) according to the specifications. At least 18-credit hours must be at the 1000-level. The remaining credits required for the degree are outlined in the General Education Requirements section on this page.

Area 1: History, Geography, Culture (15-18 credits)

Recommended courses: choose one per category.

U.S. History

- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1610 - UNITED STATES COLONIAL

- HIST 1611 - AMERICAN REVOLUTION 1763-1791
- HIST 1619 - UNITED STATES SINCE 1945

Western European History

- HIST 0100 - WESTERN CIVILIZATION 1
- HIST 0101 - WESTERN CIVILIZATION 2

World History (Non-Western)

- HIST 0700 - WORLD HISTORY

Ancient History

- CLASS 0020 - ROMAN CIVILIZATION
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 1775 - ORIGINS OF CHRISTIANITY
- HIST 1781 - ROMAN HISTORY
- HIST 1783 - GREEK HISTORY

Geography

- AFRCNA 0385 - CARIBBEAN HISTORY
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0501 - MODERN LATIN AMERICA
- HIST 1614 - CIVIL WAR HISTORY
- HIST 1164 - SMALL COUNTRIES AND THE EUROPEAN UNION

World Cultures

- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- HIST 0501 - MODERN LATIN AMERICA
- HIST 1423 - MODERN CHINA
- HIST 1433 - MODERN JAPAN
- HIST 1796 - HISTORY OF AFRICA SINCE 1800

Area 2: Civics (3 credits)

Recommended courses.

- HIST 1641 - MODERN AMERICAN POLITICS
- PS 0200 - AMERICAN POLITICS
- PS 1231 - POLITICAL PARTIES AND ELECTIONS
- PS 1234 - ELECTORAL BEHAVIORS AND DEMOCRATIC PROCESS
- PS 1252 - STATE GOVERNMENT
- PS 1378 - CHALLENGES TO DEMOCRACY AND ITS INSTITUTIONS

Area 3: Economics (3 credits)

Recommended courses.

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 0800 - INTRODUCTION TO ECONOMICS

Area 4: Sociology and Social Foundations (3 credits)

Recommended courses.

- EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY
- SOC 1107 - CULTURAL SOCIOLOGY

Area 5: Foundations of Special Education (3 credits)

Required course.

- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Upper Level Electives (6 credits)

Recommended courses.

- GSWS 1180 - POLITICS OF GENDER AND FOOD
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE
- LCJS 1300 - LAW AND POLITICS
- LEGLST 1320 - LAW AND ENVIRONMENT
- PS 1536 - HUMAN SECURITY
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- SOC 1119 - GLOBAL PERSPECTIVES ON POPULAR CULTURE
- SOC 1445 - SOCIETY AND ENVIRONMENT
- SOC 1448 - WORKING WOMEN

Notes

- All courses selected for the social studies pre-education track must be approved by an academic advisor.
- At least half of these courses must be upper-division (1000-level) courses.
- Students are also encouraged to participate in an internship during their degree program and may fulfill some CGS general education and major requirements by completing a study abroad program.

Requirements are subject to change. Check with an academic advisor before registering.

An internship program is available through the College of General Studies. Please see your advisor for additional information.

General Education Requirements

To earn a Bachelor of Arts or a Bachelor of Science degree in the College of General Studies, you must satisfactorily complete a minimum of 120 credits (approximately 40 courses), at least 30 credits of which must be in upper-division (1000-level) courses (or 24 credits if pursuing the Natural Sciences major). These 1000-level courses may come from any of the requirements for the degree listed below.

General Education Requirements (GERs) provide you with an opportunity to discover interests you never knew you had, all while earning credits toward graduation. And, no matter what your future holds, be it a career or grad school, GERs prepare you by emphasizing skills employers want (like critical thinking, problem solving, written and oral communication) and giving you the opportunity to become more aware of our increasingly diverse and interconnected world.

The College of General Studies provides a liberal arts and pre-professional education for undergraduate students that is grounded in scholarly excellence. Pitt offers you the knowledge, understanding, analytical tools, and communication skills you need to become perceptive, reflective, and intellectually self-conscious citizens within a diverse and rapidly changing world. GERs are at the core of our education.

Our **General Education Requirements changed for students entering as of Fall 2018 (2191) term**. See the CGS General Education Requirements for Fall 2018 and afterward here or visit the CGS General Education Requirements website.

Writing (9 credits)

Written communication is central to almost all disciplines and professions. Developing written proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment.

Introductory Composition Course (3 credits)

Students are required to take the college-level introductory composition course ENGCOMP 0200 Seminar in Composition (SC). Students are exempted from this course if they earned a 660 on the SAT Evidence-Based Reading and Writing Section and a 5 on the Advanced Placement Exam. Given the importance of establishing a sound foundation for a student's writing, all students are required to pass SC with a grade of C- or better by the time they have completed 24 credits in enrollment. (Students who do not have a 560 on the SAT or a 24 or above on the ACT might also be required to take the skill-development course ENGCOMP 0150 Workshop in Composition before enrolling in SC.)

Note for students transferring from the School of Engineering into CGS: successful completion of ENGR 0012 Intro to Engineering Computing may be used in place of ENGCOMP 0200 Seminar in Composition.

Two Writing Intensive Courses (6 credits if not overlapped with other General Education requirements)

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20 - 24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion. All students must complete two courses that are designated as 'W-Courses', or one W-Course and a second English composition course. Students should satisfy one of these requirements by taking a W-Course in their major if it is available. **Students may not transfer credits in to satisfy this requirement. W-courses can be overlapped with other General Education courses, except for Professional Communication.**

Math/Algebra (3 credits)

Mastering college-level algebra is required for all students. These skills are foundational for student success in other general education courses.

Students are exempt from having to take Algebra with a 620 SAT Math or 27 ACT Math. Students who do not meet these criteria must earn a C- or higher in MATH 0020, MATH 0025, MATH 0031, CS 0004, or CS 0007. Given the importance of establishing a sound foundation in mathematics, all students are required to satisfy the Algebra requirement by the time they have completed 30 credits in enrollment.

Quantitative and Formal Reasoning (3 credits)

All students are required to take and pass with a grade of C- or better at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic.

A C- or better is needed in a course that satisfies this requirement. Students who qualify for placement in an upper-level course in mathematics on a proficiency placement test are exempt.

Diversity (3 credits)

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study, if available. Diversity courses may also be courses that fulfill other General Education Requirements. (3 credits if not overlapped with another General Education course)

Language/Communication (6-10 credits)

All students are required to take a sequence of two courses that provide them with advanced study of a second language other than English, or the ability to develop their skills in oral and professional communication. Students choose one of the following options below:

Option 1: A Sequence of Two Courses in a Second Language (6-10 credits)

Students complete with a grade of C- or better two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

Option 2: A Sequence of Two Courses in Oral and Professional Communication (6 credits)

These classes advance the skills of the student to perform effectively in workplace environments or the public by communicating ideas and concepts and/or introduce students to theories that analyze and explain effective communication in these settings. Students must complete one of the following with a grade of C- or better: COMMRC 0520 or COMMRC 0500. Students select a second class from a list of approved courses.

Humanities and Arts, Social Sciences, and Natural Sciences (27 credits)

Each student is required to take nine courses in the humanities, social sciences, and natural sciences as distributed below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

One course in Literature (3 credits)

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

One course in the Arts (3 credits)

This course introduces students to modes of analysis appropriate to music, theater, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

One course in Creative Work (3 credits)

In this course, students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theater, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

One course in Philosophical Thinking or Ethics (3 credits)

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

One course in Social Sciences (3 credits)

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

One course in Historical Analysis (3 credits)

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

Three courses in the Natural Sciences (9 credits)

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

Global Awareness and Cultural Understanding (9 credits)

Each student must complete three courses as distributed below:

One course in Global Issues (3 credits)

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law or the economy.

One course in a Specific Geographic Region (3 credits)

This course will be an in depth study and analysis of a particular region or locality outside the United States.

One course in Cross-Cultural Awareness (3 credits)

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping of General Education Courses

- Courses taken for general education requirements can also be applied to major requirements, when applicable.
- Diversity courses are allowed to overlap with other general education requirements.
- Writing ('W') courses are allowed to overlap with other general education requirements except for the Professional Communication requirement.
- Students may overlap the second course in their language sequence, taken at the college level, with the Geographic Region requirement, except for American Sign Language. This does not apply to students who satisfy the Language requirement through high school study, a proficiency examination, or native proficiency.

Specialized Study (the Major) (30-36 credits)

The baccalaureate degree, in addition to providing certain skills and broad exposure to the major bodies of knowledge, also allows the opportunity to specialize in a particular field, providing depth of experience essential for vocational competence or further graduate study. An outline of each major is available on the CGS Web site, www.cgs.pitt.edu.

Students admitted to CGS can choose from the following majors. Many majors offer a combination of face-to-face and online courses.

- Administration of justice (this major is no longer accepting new students, effective Fall 2021)
- Dental hygiene (for licensed dental hygienists)
- Health services (BA and BS)
- Humanities (this major is no longer accepting new students, effective Fall 2020)

- Law, Criminal Justice, and Society
- Legal studies (this major is no longer accepting new students, effective Fall 2021)
- Liberal Studies
- Media and professional communications
- Natural sciences
- Public service
- Social sciences (this major is no longer accepting new students, effective Fall 2020)

Students who want a major in an arts and sciences field can begin in CGS and transfer to the Dietrich School of Arts and Sciences after completing 12 credits including the mathematics and seminar in composition requirements. Admission is determined by the Dietrich School.

Electives

Any credits not used specifically to satisfy the previous requirements are considered electives. Electives can be taken in a wide variety of subjects to complement, reinforce, or add further breadth to the chosen program of study or to help meet the requirements of a minor or certificate program.

Minor

Administration of Justice Minor

In Fall 2022, the Administration of Justice Minor was terminated. Students pursuing the Administration of Justice Minor will have until Summer 2028 to complete the program requirements. If you are not yet a minor but wish to pursue a similar course of study, then the new Law, Criminal Justice, and Society (LCJS) Minor is likely to be a good fit for you.

Current Pitt students interested in a CGS minor, rather than a major, in administration of justice should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor Requirements (15 credits)

Students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor. Courses used for a minor cannot overlap with courses used for a major, minor, or a certificate.

Important: Changes to ADMJ Courses

Beginning Spring 2022 (2224), Administration of Justice courses have been renumbered and retitled with LCJS as their subject code. These courses count the same as their former ADMJ or LEGLST equivalent for Administration of Justice majors and minors.

Required Courses

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE
Formerly: ADMJ 0500 Introduction to Administration of Justice
- LCJS 1200 - CRIMINAL LAW Formerly: ADMJ 1400 Introduction to Criminal Law
- LCJS Electives
See Administration of Justice minor page for current list of electives.

Law, Criminal Justice, and Society (LCJS) Minor

A 15-credit minor in Law, Criminal Justice, and Society (LCJS) provides students from around the University an opportunity to pursue a sustained course of interdisciplinary study focused on the intersection of law, criminal justice, and society. The LCJS minor is structured so that students can emphasize law-oriented courses or those more squarely focused on criminal justice. Whichever pathway an LCJS minor charts, they will complete a foundations course that situates law and criminal justice in a broader social and historical context.

Current Pitt students interested in a CGS minor in Law, Criminal Justice, & Society (LCJS) should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor Requirements

In order to complete the minor, you will take 15 LCJS credits (five courses), as outlined below.

- At least three courses must be from the University of Pittsburgh.
- A 2.0 average GPA is required.
- Courses used for a minor cannot overlap with courses used for a major, minor, or a certificate.
- To be eligible for the LCJS internship, you must have completed all 9 non-elective credits in the LCJS minor. Students may apply up to 3 credits of LCJS 1900 to the LCJS minor.

LCJS Foundations: (3 credits)

Students must complete one of the following courses:

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW

Theories of Crime / Criminal Law: (3 credits)

Students must complete one of the following courses:

- LCJS 1100 - CRIMINOLOGY
- LCJS 1110 - CRIMINOLOGICAL THEORY
- LCJS 1200 - CRIMINAL LAW
- LCJS 1210 - CRIMINAL PROCEDURE

Criminal Justice and Legal Institutions: (3 credits)

Students must complete one of the following courses:

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE
- LCJS 1410 - LAW ENFORCEMENT AND POLICING
- LCJS 1420 - CORRECTIONS
- LCJS 1430 - THE JUVENILE JUSTICE PROCESS
- LCJS 1580 - THE LEGAL SYSTEM

LCJS Electives: (6 credits)

Students must complete two other courses with the subject code LCJS.

Total Credits: 15

Legal Studies Minor

In Fall 2022, the Legal Studies Minor was terminated. Students pursuing the Legal Studies Minor will have until Summer 2028 to complete the program requirements. If you are not yet a minor but wish to pursue a similar course of study, then the new Law, Criminal Justice, and Society (LCJS) Minor is likely to be a good fit for you.

Current Pitt students interested in a CGS minor, rather than a major, in legal studies should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor requirements:

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor. Courses used for a minor cannot overlap with courses used for a major, minor, or a certificate.

Important: Changes to LEGLST Courses

Beginning Spring 2022 (2224), Legal Studies and Administration of Justice courses have been renumbered and retitled with LCJS as their subject code. These courses count the same as their former LEGLST or ADMJ equivalent for Legal Studies majors and minors.

Required Courses

- LCJS 1580 - THE LEGAL SYSTEM Formerly: LEGLST 0080 - Introduction to Legal Studies
LCJS Elective Courses

See the Legal Studies minor page for a list of approved electives.

Public Service Minor

Current Pitt students interested in a CGS minor, rather than a major, in public service should declare the minor by completing the CGS minor/certificate declaration form online. If you are a CGS student interested in adding this minor, please contact your CGS advisor.

Minor Requirements

For the minor, students must complete five courses (15 credits) with at least three courses from the University of Pittsburgh. A 2.0 average is required in the minor. Courses used for a minor cannot overlap with courses used for a major, minor, or a certificate.

Required courses:

- PUBSRV 0020 - INTRODUCTION TO PUBLIC SERVICE
- PUBSRV 0030 - PUBLIC POLICY PROCESS
Or: PIA 0101 HOW PUBLIC POLICY WORKS: FOUNDATIONS OF PUBLIC POLICY
- PUBSRV 0050 - ETHICS AND ACCOUNTABILITY
- PUBSRV Elective Courses
See the Public Service minor page for a list of approved electives.

Note:

Requirements are subject to change. Check with an academic advisor before registering.

CGS Course Satisfier List

Please see the CGS General Education Requirements for completion of the Bachelor's degree. You may consult with your academic advisor in preparation for graduation.

Students that are interested in pursuing a second degree must complete all CGS degree and major requirements. These may be completed by combining CGS courses with transfer credits from previous academic course work.

For the second degree, students must complete a minimum of 30 credits in CGS, including at least half of the credits required for the new major (15-18 credits depending on the major).

Current course offerings for the College of General Studies, the Dietrich School of Arts and Sciences, and the College of Business Administration are listed in one location online for easy reference. Please see the Course Description page for more information.

Within PeopleSoft's Class Search, you can identify College of General Studies course offerings at-a-glance by their section number.

Visit the link below for a comprehensive list of courses that satisfy College of General Studies requirements.

Comprehensive Course List (CGS)

- Skills: Oral Communication
- Skills: Writing

For information on how to register, please visit the enrollment page.

David C. Frederick Honors College

The David C. Frederick Honors College, through a diverse portfolio of formal and informal programs, cultivates and enhances interdisciplinary research and collaborations, supports student engagement, and offers personalized educational experiences locally and globally. All students are welcome to take advantage of the opportunities available through the David C. Frederick Honors College.

Contact Information

University of Pittsburgh
David C. Frederick Honors College
3600 Cathedral of Learning
Pittsburgh, PA 15260
412-624-6880
www.honorscollege.pitt.edu

Admission Requirements

Although David C. Frederick Honors College opportunities are open to all students, some may choose to be admitted into one of three programs in order to earn a formal credential from the David C. Frederick Honors College: the Bachelor of Philosophy (BPhil) Degree, the jointly-conferred Honors Degree, and the Honors Distinction.

Credentials

Students have the option to earn one of these three formal credentials from the David C. Frederick Honors College:

The Bachelor of Philosophy is a research-based degree requiring a rigorous curriculum and independent research under the guidance of a faculty mentor culminating in a thesis defense before a committee of faculty members, including an external examiner from another institution. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the David C. Frederick Honors College and their primary school/college of admission.

The Honors Degree consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the David C. Frederick Honors College and their primary school/college of admission.

The Honors Distinction consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study. The Honors Distinction offers a lighter credit load than the Honors Degree, which may be appealing to transfer students or those in highly structured, credit-intensive programs. Upon successful completion of the program, students receive a notation on their final transcript.

Special Opportunities

Politics and Philosophy Major

Politics and Philosophy, BA is an interdisciplinary major in the Kenneth P. Dietrich School of Arts and Sciences and is advised through the David C. Frederick Honors College. It provides students with training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances understanding of the moral and political complexities of public life and offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs, including law.

Research and Creative Fellowships

The David C. Frederick Honors College offers a range of fellowships available to students in any academic discipline. Students identify a Pitt faculty mentor and develop a project in collaboration with them. Many of the David C. Frederick Honors College fellowships involve regular meetings of the fellows in which they share their research with other students, creating an interdisciplinary learning environment.

National Scholarships

Scholar Mentors in the David C. Frederick Honors College work closely with students to identify scholarships relevant to their academic and personal goals and explore the steps to become competitive applicants for these awards. National scholarship advising can help students attain a broader perspective and refined understanding of their personal, academic, and professional goals; strengthen their writing skills through the creation and revision of personal statements and grant proposals; and develop the resourcefulness to identify opportunities to conduct meaningful research and/or incorporate service and international experiences into their educational plan.

Global and Experiential Opportunities

The David C. Frederick Honors College strives to instill a global perspective in students through engagement in scholarship as part of study abroad or study away programs. Students may choose to complete short- or long-term global honors programs, which includes a portfolio of abroadSELECT programs for highly motivated students.

Community Engagement Opportunities

Through community engagement, the David C. Frederick Honors College encourages students to use their academic talents to make lasting impacts in the community. Through research, internships, or programs such as our Scholar Communities, students investigate vital issues alongside more than 100 local, national, and international partners.

Honors Housing

Honors Housing is unique in that it connects highly motivated students from across schools and majors in communities that are shaped by their shared academic, cultural, and personal interests. The David C. Frederick Honors College offers honors housing for first-year students in Sutherland Hall and upperclass students in the Forbes Craig Apartments.

Major

Politics and Philosophy, BA

The Politics and Philosophy major, a major in the Kenneth P. Dietrich School of Arts and Sciences, advised through the David C. Frederick Honors College, provides students with interdisciplinary training in the conceptual, empirical, and normative foundations of various fields of public policy. It enhances students' understanding of the moral and political complexities of public life and it offers preparation in both theory and practice to students interested in pursuing careers in social and public affairs, including law.

By combining course work from different disciplines -- political science, philosophy, and economics -- the program's scope is broad, yet the structure of the curriculum also requires depth. The thematic nature of the major allows for flexibility in course selection. In collaboration with the major advisor, students design a cohesive program of study tailored to meet their individual post-graduate/career interests and needs.

The politics and philosophy major is a rigorous, but rewarding, program. Upon graduation, an academic career is certainly a possible pursuit; the major also provides excellent preparation for careers in law, government, community organizations, and social action groups.

The major is comprised of elements from the political science, philosophy, and economics departments and involves a minimum of 51 credits distributed as follows: political science - 21 credits; philosophy - 21 credits; economics - 9 credits. A capstone, which may have associated credits, is also required.

Required Courses

Political Science Courses

Students must complete seven courses in political science. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Philosophy Courses

Students must complete seven courses in philosophy. At least four of those courses must be upper level (numbered 1000 or above). One of the courses must be a W-course; the W-course may be either upper- or lower-level.

Co-Requisite Courses

Economics Courses

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON XXXX any course (no course in the 0800 series may count toward this requirement)

Capstone Requirement

In consultation with the major advisor, students complete one of the following requirements:

- complete the Bachelor of Philosophy thesis through the David C. Frederick Honors College;
- participate in a graduate-level seminar (with permission from the instructor); or
- complete a Directed Research Project, an Independent Study, or an Internship.

Other requirements and conditions

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major.

Satisfactory/No Credit grade option

There is no limit on the number of courses in the major that can be taken on an S/NC basis, but it is suggested that these courses be taken for a letter grade.

Writing (W) requirement

The W courses listed under the political science and philosophy requirements satisfy the W requirement for the major.

Bachelor of Philosophy

The Bachelor of Philosophy (BPhil) Degree is a research-based degree, requiring a rigorous curriculum and independent research under the guidance of a faculty mentor culminating in a thesis defense before a committee of faculty members, including an external examiner from another institution.

The BPhil Degree combines General Degree Requirements for an individually approved Program of Study with Special Degree Requirements for in-depth independent scholarship that culminates in a thesis. Through the BPhil, undergraduate students any time after their first year at Pitt can begin research and scholarly work toward a rigorous baccalaureate degree in a manner usually reserved for the graduate level (the Special Degree Requirements). Simultaneously, the BPhil degree includes an element of intellectual scope in the expectation that students have a challenging academic program in the course work for their majors, minors, and/or certificates (the General Degree Requirements).

General Degree Requirements

The General Degree Requirement is met through an approved Program of Study demonstrating that the student has exceeded the requirements for a standard undergraduate departmental degree. Existing curricular options may fulfill the Program of Study requirements, such as multiple majors or double-degree programs, or the approved Program of Study may be individualized, especially for students in highly structured programs. In general, it is expected that a student's curriculum will reflect the breadth and/or depth. Curricula that are built around an intellectual theme (those that reflect focus) are also acceptable. It is incumbent upon each candidate to demonstrate the scholarly merits of the proposed curriculum as it relates to their own work.

To meet the General Degree Requirement, BPhil Degree candidates must:

- Complete the degree requirements (e.g., major requirements) of their primary school/college of admission (Dietrich School of Arts and Sciences, Swanson School of Engineering, School of Nursing, College of Business Administration, School of Computing and Information, etc.)
- Complete a Program of Study approved by the David C. Frederick Honors College
- Maintain a 3.50 cumulative GPA

Special Degree Requirements

The Special Degree Requirement is met through the preparation and defense of a thesis. There will be an individualized examination conducted by an Examining Committee no later than during the candidate's last term at the University of Pittsburgh. One member of the Examining Committee must be from outside the University of Pittsburgh.

To meet the Special Degree Requirement, BPhil Degree candidates must:

- Select a thesis advisor from the faculty in their major department of study
- Submit a synopsis of the proposed research, the Thesis Prospectus (which has been accepted by the thesis advisor) to the David C. Frederick Honors College
- Be evaluated by the Examining Committee; this evaluation consists of a public presentation and discussion of the thesis or project, followed by a private oral examination conducted by the Examining Committee, similar to a master's thesis defense

Upon successful completion of the BPhil Degree program, students receive a degree/diploma jointly-conferred by the David C. Frederick Honors College and their primary school/college of admission.

Admissions Requirements

Applications for admission to BPhil Degree candidacy are accepted on a rolling basis. Students should apply for BPhil Degree candidacy as soon as they have identified a faculty member willing to serve as the thesis advisor. It is recommended, although not required, to apply for BPhil Degree candidacy prior to conducting the actual research for the thesis. The application requires students to provide a narrative of their Plan of Studies (General Degree Requirement) and Thesis Prospectus (Special Degree Requirement), along with biographical information/resume and Pitt transcript.

Total Credits

The UHC does not require students to complete additional credits for the BPhil Degree, although some departments such as Political Science, BPHIL and International and Area Studies, BPHIL may have additional requirements for BPhil Degree candidates in their programs.

Honors Degree

The Honors Degree program consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study.

The Honors Degree program requires 24 credits to be completed upon graduation. Of these 24 credits, a minimum of 18 credits of David C. Frederick Honors College approved academic course credits and a minimum of 6 experiential course credits are required. The 18 academic course credits may include courses with the David C. Frederick Honors College course attribute value (honors courses); courses with the Civic Learning course attribute value; graduate-level courses; courses which are used to fulfill the following (including courses which do not have the David C. Frederick Honors College attribute): Leadership and Ethics Certificate; Conceptual Foundations of Medicine Certificate; Engineering for Humanity Certificate; Engineering Science; Gender, Sexuality, and Women's Studies Minor; Global Health Certificate; Pitt Business Honors Program; Politics and

Philosophy, BA; Public Communication of Science and Technology Certificate; Undergraduate Certificate in Sustainability; and any additional course work beyond those used for the 6 credit experiential course work requirement. The 6 experiential credits may include courses with the Civic Learning + Engagement course attribute value, as well as academic research, independent study, study abroad, internships, or co-op programs, all of which require completed credits to appear on the transcript. In addition to the curricular requirements, students are required to complete the Honors Outside the Classroom Curriculum (Honors OCC) that provides non-credit enhanced experiences for honors students. A minimum cumulative GPA of 3.25 upon graduation is required for completion of the Honors Degree program. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the David C. Frederick Honors College and their primary school/college of admission. Students admitted to the Honors Degree program in their first year will be granted priority access to the honors living learning community within the residence halls. Students who remain in good academic standing in the Honors Degree program will also be granted priority registration throughout their time as undergraduate students (priority registration for students admitted to the Honors Degree program as a first-year student begins with spring term enrollment).

Admission Requirements

The admissions process includes criteria for three categories of students: first-year admits, external transfers, and internal (Pitt) transfers.

1. Admission for first-year students is conducted by Pitt Admissions and is based on evaluation of high school transcript, extra-curricular activities, and response to an essay prompt.
2. Admission for external transfer students is conducted by Pitt Admissions and is based on the evaluation of the completion of a minimum of two college semesters (24 credits) that meet the University of Pittsburgh criteria for transfer and review of an essay prompt.
3. Admission for internal transfer students (current Pitt students in all campuses) is conducted by the David C. Frederick Honors College and is based on an evaluation of a current Pitt transcript with minimum GPA of 3.50 after completion of two semesters (24 credits), review of an essay prompt, and one academic letter of recommendation from an instructor or academic advisor.

Total Credits: 24

Requirements for Students in the School of Nursing

- Minimum GPA: 3.25
- 18 credits of honors-approved course work
- 6 credits of experiential course work
- Completion of the Honors OCC

18 Credits of Honors-Approved Course Work

18 credits minimum from the following:

- NUR 0005 - HONORS FRESHMAN SEMINAR *
- Any course with the David C. Frederick Honors College course attribute value or Civic Learning course attribute value which also fulfills the Art, Music, Creative Expression, or Literature BSN Curriculum Requirement
- Any course with the David C. Frederick Honors College course attribute value or Civic Learning course attribute value which also fulfills the Anthropology/Culture Requirement: American or Foreign BSN Curriculum Requirement
- Any course with the David C. Frederick Honors College course attribute value or Civic Learning course attribute value which also fulfills the Electives BSN Curriculum Requirement (e.g., NUR 1142 - PROFESSIONAL ISSUES IN ADVANCED PRACTICE NURSING: NURSE ANESTHESIA)**
- Any course with the David C. Frederick Honors College course attribute value which also fulfills the Senior Special Topics BSN Curriculum Requirement (NUR 1142 - PROFESSIONAL ISSUES IN ADVANCED PRACTICE NURSING: NURSE ANESTHESIA, NUR 1143 - FOUNDATIONS OF PERSONALIZED HEALTH: TRANSLATION FROM BASIC RESEARCH TO CLINICAL PRACTICE , etc.)**
- Any course with the David C. Frederick Honors College course attribute value or Civic Learning course attribute value which also fulfills the Directed Elective BSN Curriculum Requirement**

* Required course for students admitted into the David C. Frederick Honors College concurrently with their admission to the University of Pittsburgh; not required for students admitted to David C. Frederick Honors College after or during their first semester at the University of Pittsburgh

** May also be fulfilled by any graduate-level course (e.g., NUR 2004 - PATHPHYLGY ACROSS LIFE SPAN , NUR 2010 - HEALTH PROMO/DISEASE PRVNTN , NUR 2011 - APPLIED STATISTICS FOR EBP , NUR 2061 - ORGANIZTNL & MANAGEMENT THEORY), any additional coursework beyond those used for the 6 credit experiential course work requirement, or courses part of the David C. Frederick Honors College approved programs (including courses which do not have the David C. Frederick Honors College attribute).

6 Credits of Experiential Course Work

6 credits minimum from the following:

REQUIRED COURSES (2-4 credits)

- NUR 1091 - NURSING HONORS CAPSTONE 1
- NUR 1092 - NURSING HONORS CAPSTONE 2

SELECT FROM AT LEAST ONE OF THESE OPTIONS (2-4 credits)

- Option One: Mentored Experience (NUR 1061 - INDEPENDENT STUDY)
- Option Two: Study Abroad Program (Any study abroad program approved via University of Pittsburgh Panther Program)
- Option Three: Clinical Practice-Oriented Courses (NUR 1121C - ADVANCED CLINICAL PROBLEM SOLVING CLINICAL ; NUR 1135 - TRANSITION INTO PROFESSIONAL NURSING PRACTICE CLINICAL)***

*** Clinical courses should be taken as co-requisites with NUR 1092 - NURSING HONORS CAPSTONE 2 as a venue for disseminating the capstone results; needs to be arranged with permission from course instructors.

Requirements for Students in the School of Social Work

- Minimum GPA: 3.25
- 18 credits of honors-approved course work, 9 credits of which must be from the BASW program. All BASW honors courses are required (SWRES 2023 - DIRECTED STUDY IN RESEARCH can be substituted for either SOCWRK 1079 - CHILD WELFARE SERVICES or SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK)
- 6 credits of experiential course work (SOCWRK 1025 - PRACTICUM 1 /SOCWRK 1027 - PRACTICUM 2 can be used for experiential course work)
- Completion of the Honors OCC

Social Work Course Sequence Options

This presents three ways in which students could complete the 9 credits of Honors-designated BASW classes.

Option 1:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
- SOCWRK 1079 - CHILD WELFARE SERVICES
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH

Option 2:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH
- SWRES 2023 - DIRECTED STUDY IN RESEARCH

Option 3:

- SOCWRK 1079 - CHILD WELFARE SERVICES
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH

- SWRES 2023 - DIRECTED STUDY IN RESEARCH

Additional

Students must complete an additional 9 credits of Honors-designated courses (3 courses). At least 6 credits (2 courses) of the 9 credits must satisfy social work co-requisites:

- Africana Studies (3 cr)
- Anthropology (3 cr)
- Economics (3 cr)
- English Composition (3 cr)
- Gender, Sexuality, and Women's Studies (any course with a GSWS class attribute) (3 cr)
- Human Biology (3 cr)
- Political Science (3 cr)
- Psychology (3 cr)
- Religion/Spirituality (any course with a Religious Studies class attribute) (3 cr)
- Sociology (3 cr)
- Statistics (3 cr)

A maximum of 3 credits (1 course) can be any other course with a David C. Frederick Honors College course attribute value.

Honors Distinction

The Honors Distinction consists of a structured program of curricular and co-curricular activities that provides an enhanced academic experience which includes opportunities for interdisciplinary study. The Honors Distinction offers a lighter credit load than the Honors Degree, which may be appealing to transfer students or those in highly structured, credit-intensive programs.

The Honors Distinction requires 12 credits to be completed upon graduation. Of these 12 credits, a minimum of 9 credits of David C. Frederick Honors College approved academic credits and a minimum of 3 experiential course are required. The 9 academic credits may include courses with the David C. Frederick Honors College course attribute value (honors courses); courses with the Civic Learning course attribute value; graduate-level courses; courses which are used to fulfill the following (including courses which do not have the David C. Frederick Honors College attribute): Leadership and Ethics Certificate; Conceptual Foundations of Medicine Certificate; Engineering for Humanity Certificate; Engineering Science; Gender, Sexuality, and Women's Studies Minor; Global Health Certificate; Pitt Business Honors Program; Politics and Philosophy, BA; Public Communication of Science and Technology Certificate; Undergraduate Certificate in Sustainability; and any additional course work beyond those used for the 3 credit experiential course work requirement. The 3 experiential credits may include courses with the Civic Learning + Engagement course attribute value, as well as academic research, independent study, study abroad, internships, or co-op programs, all of which require completed credits to appear on the transcript. If the course used to fulfill the experiential course work requirement did not have the High Impact Practices Course Value Attribute of Capstone Course, students must fulfill this requirement by completing an additional course with the High Impact Practices Course attribute value of Capstone Course. In addition to the curricular requirements, students are required to complete the Honors Outside the Classroom Curriculum that provides non-credit enhanced experiences for honors students. A minimum cumulative GPA of 3.00 upon graduation is required for completion of the Honors Distinction program. Upon successful completion of the program, students receive a notation on their final transcript.

Admission Requirements

Students with a cumulative GPA of at least 3.000 can declare the Honors Distinction through the Catalog of Opportunities.

Total Credits: 12

Global Distinction

The Global Distinction is a new Pitt credential that supports your growth in learning more about the world inside and outside the classroom.

By completing course work across disciplines and participating in global activities and experiences at home or abroad, you can earn official recognition for your work. The credential also brings milestone rewards and, upon completion, a personal Global Distinction URL for use on your résumé and networking sites.

The Global Distinction is a great way to demonstrate your cross-cultural exposure and awareness to potential employers. Follow the steps or check out the Flyer to learn how to enroll now.

Benefits of Earning the Global Distinction

- **Transcript annotation:** Your achievement noted on your academic transcript
- **Personalized digital transcript:** Digital catalog of your work with a unique URL for your résumé and networking sites and sharing with prospective employers and recruiters
- **Rewards and incentives:** Special prizes, networking invitations, and advance notice of or preferred consideration for travel grants or other funding opportunities for achieving competency milestones
- **Graduation honorable mention:** Special recognition during your school's and the University Center for International Studies' graduation ceremonies

Credential Requirements

To earn the Pitt Global Distinction, undergraduate students complete the following:

1	Enrollment Form
6	Credits of global course work (international/area/thematic studies courses)
24	Global events or activities
2	High-impact global experiences
	<p>Beginner (complete one):</p> <ul style="list-style-type: none"> • First-year seminar • Living Learning Community (Casa Cultural, Global Village) • Writing-intensive course <p>Advanced (complete one):</p> <ul style="list-style-type: none"> • Service/community-based learning • Study abroad • Undergraduate research project • Internship (at home or abroad) • Capstone course or project
1	Reflection (unless pursuing a capstone)

Enroll Now!

Enroll today to find out how many of your in-progress or completed courses and global activities and experiences qualify. MyPittGlobal on the mobile app Suitable will keep track of everything for you, including the special rewards and incentives you are eligible for along the way. You can start at any time.

1. Go to my.pitt.edu.
2. Click on the myPittGlobal icon.
3. Log in using your Pitt credentials.

4. Search: Distinction Enrollment.
5. Complete the online form.

Contact information for questions: globaldistinction@pitt.edu

Honors Distinction

The Honors distinction offers a lighter credit load than the Honors Joint-Degree program, so you can still earn Honors distinction as transfer student or if your major has strict requirements. The guidelines are rigorous, but flexible, so you can forge your own path.

Honors Distinction requirements:

- **Curricular:** 9 academic credits of UHC approved courses; credits within approved school-based honors programs can be applied with course attribute
- **Co-curricular:** 3 experiential credits (can include research, independent study, approved study abroad via Panther Programs' approved internship for credit; Approved Coop program)
- **Outside of the classroom:** Completion of the Pitt Honors OCC (non-credit).
- **Minimum GPA:** 3.0

Students can declare their intention to pursue the Honors Distinction by completing an online application.

Honors OCC

Build a diverse Honors experience, from scholarly to social

The Honors Outside the Classroom Curriculum (OCC) is a points-based program to help you broaden your experience at Pitt Honors.

Because Honors programs let you guide your own path, think of the OCC as a roadmap to help you shape it. You'll get points not only for your achievements, but also when you try new things, engage with the community, and apply yourself.

It's also incredibly flexible. There are 10 competencies, each with a breadth options to choose from - or you can even suggest your own.

Requirements

Completing the Honors OCC is required for both the Honors joint degree and Honors distinction.

To complete the Honors OCC, you must:

- Earn **1,200 total points**: at least 100 points in each of the 10 competencies, plus an additional 200 in the category of your choice. (Point values vary.)
- Remain active in the OCC every academic year to stay in good standing for your program.

To stay on track for graduation, you should hit a progress milestone in the app each academic year. The Honors OCC takes about 5-8 semesters to complete, so you should get started as soon as you're admitted to an Honors program. Once you've met the graduation requirements, you can (and should!) still continue to earn points for the leaderboards.

You can browse all the eligible activities, verify your points, and track your progress through the **Pitt OCC Suitable app** (the same app you use for the general Pitt OCC.)

10 competencies

Communication

Sharpen your communication by preparing scholarship application essays, presenting your research at conferences, engaging in interdisciplinary Honors fellowship communities, and more.

Career preparation

Prepare for your future by applying for research programs in your field, engaging in internships, attending networking events, and more.

Art appreciation

Learn to view the world through a more creative lens when you visit museums and Pittsburgh arts events, conduct your own creative research, contribute to Pitt Honors publications, showcase your own creative works, and more.

Global and cultural awareness

Gain a global perspective by pursuing study abroad, attending multicultural events, and more.

Initiative & drive

Take the reins on your academic experience by exploring and striving toward new opportunities.

Leadership

Track your growth as a leader when you take on training, roles, and responsibilities. Gain points for activities like attending seminars, being elected as a student representative, serving as an officer in a campus organization, becoming an Honors RA, and more.

Sense of self

Gain a better awareness of your own personal skills, abilities, values, and beliefs by meeting with Honors mentors and joining programs that foster your self-awareness.

Service to others

Use your talents to impact the world! Volunteer, serve as a mentor, conduct community-based research, join service leadership programs, complete public service internships, and more.

Wellness

Balance your emotional, mental, physical, and financial health with a variety of events and programs, from stress-relief workshops to financial coaching sessions.

Honors pride

Strengthen your commitment to the Honors community's values by joining us for social events, supporting our newer students, serving as an Honors ambassador, and more.

You will gain access to the Honors OCC in the Sutable app once you're admitted to either the Honors joint degree or Honors distinction program.

Sustainability Distinction

The primary goals of the Sustainability Distinction are to provide students with a mechanism to gain recognition and "credit" for their outside-the-classroom endeavors and broaden the number of undergraduate students participating in sustainability activities throughout campus.

Courses

Relevant courses will introduce students to the core principles of sustainability (social, economic and environmental) and provide them with basic competencies related to the broad topic of sustainability.

Sustainability Distinction course requirements:

- Six (6) academic credits including Current Issues in Sustainability (Course #1905)
- One (1) Sustainability-Focused Course as designated in Curriculum. If a student is unable to take the Current Issues course, then three (3) alternative Sustainability-Focused courses can be taken for nine (9) credits.

High-Impact Activities (Minimum of Three Activities)

These activities should enrich the student's academic pursuits and provide opportunities to apply knowledge and skills to pressing social and environmental challenges. Examples of such activities include:

- Leadership role in a Student Office of Sustainability affiliated organization (other student groups will be considered with approval by the committee)
- Long-term campus or community service and/or a Place-Based Engagement Project (at least a two-semester commitment)
- A sustainability-related internship, research project or co-op experience
- A sustainability-related study abroad or alternative break experience
- An innovation competition, experience or startup related to sustainability

Exploration (OCC Sustainability Badge)

These undertakings should broaden a student's personal development through outside-the-classroom (OCC) experiences aimed at expanding sustainability knowledge, skills and networks. The OCC Sustainability badge provides credit for the following types of activities (among others):

- Participation in a minimum of three (3) Green Team service opportunities
- Attendance at the Sustainability Showcase and Fair
- Attending the Student Office of Sustainability First Thursday Meet-up
- Participating in Clutter for a Cause or the Resident Student Association Panther Prowl food drive (benefiting the Pitt Pantry)
- Donating to the University of Thriftsburgh or attending a University of Thriftsburgh fix-it or maker event
- Completing the Pitt Green Resident Program
- Attendance at three (3) Student Office of Sustainability-sponsored events

Reflection (2,000-word essay)

Students should reflect upon and share how classes, activities, and experiences collectively contributed to their overall personal and professional development. Students should provide examples of how these experiences enabled them to apply academic knowledge and skills to important sustainability issues.

Enrollment Information

Students interested in completing the Sustainability Distinction will declare their intention to pursue by completing an online application form. The form will be available here soon. Students will be able to use the application system to self-track their progress. Some activities may require prior approval for credit. Students can apply for the distinction at any time; however, the deadline to submit the intention to pursue the distinction will be the end of the add/drop period of the semester prior to the semester in which they will graduate.

Graduate School of Public and International Affairs

- Contact Information
- Faculty
- Advising and Career Services
- Program and Course Offerings

The mission of the Graduate School of Public and International Affairs (GSPIA) is to prepare students to make substantive contributions to society through careers as managers, advisors, and policy analysts in government and nonprofit organizations in a multitude of geographic locations throughout the world. This mission is accomplished through dedication to quality teaching that builds skills and commitments to the core values, challenges, and rewards of public service. It is supported through basic and applied research on timely issues of public management; international, regional, and urban affairs; and policy making. The school and faculty are committed to making a difference in the world by drawing on diverse skills and knowledge to improve the performance of public and nonprofit organizations that contribute to free and just societies in the United States and abroad. To accomplish these ends, GSPIA teaches, conducts research, and performs public service in the following areas:

- The management and administration of public and nonprofit agencies
- The growth and sustainable development of urban metropolitan regions throughout the world
- The economic and social development of newly independent and developing states
- The emerging dynamics that are shaping today's international political economy
- Threats to and issues in international security

The mission of GSPIA stresses the importance of democratic responsibilities and personal integrity in the management of human affairs as well as the professional qualifications required for managing constructive change. Students and faculty alike are required to:

- Demonstrate the highest standards of ethical and professional conduct
- Use critical thinking and problem solving skills in addressing public policy issues
- Consider the international and intersectoral aspects of public affairs
- Develop partnerships with others both internal and external to the University of Pittsburgh

Advising and Career Services

Academic Advising: Each student is assigned a faculty advisor based on, whenever possible, the compatibility of student and faculty academic interests. Faculty advisors assure that students, through proper course selection, can make productive use of the resources of the school and the University during their period of residence. In addition, faculty advisors are responsible for counseling their advisees about career opportunities in the student's area of study; for counseling advisees who have been placed on probation; and for approving the advisee's school-wide required and elective courses, proposed thesis or dissertation topics, and supervised internships. Advisors and students monitor academic progress and identify areas where corrective action on the part of students may be required. It is essential, therefore, that students consult periodically with their advisors. Unless students subsequently request a change, faculty members originally assigned will continue as advisors throughout the students' program of study. If, however, a change in faculty advisor is requested, students must obtain the signed approval of the new advisors. Based on a student-focused approach, we provide students with a academic advisor who serves as the first point of contact for class registration, financial aid application and preparation for graduation. Additionally, academic advisors support students by providing information necessary to navigate the logistical challenges of graduate school and connect students to resources at the University of Pittsburgh.

Career Services: GSPIA places great emphasis on assisting students in determining the best and most appropriate positions available. In addition to faculty advisors, the school provides resources and guidance for students throughout their course of study as they devise strategies to identify professional opportunities. Among the many services offered through Career Services are individual career advising, internship and job search assistance, and a series of career-related workshops and special events. Extensive reference materials on jobs, fellowships, and internships are made available in a variety of ways, including GSPIA Career Launch, GSPIA's online career management system for students and alumni. Workshops cover such topics as resume preparation, job search strategies, negotiation skills, networking, and using technology in securing employment. Special

events include Foreign Service information sessions, mock interviews for the Presidential Management Fellowship Program, an internship fair, and networking events with alumni, foundations, and agency representatives on campus and in Washington, D.C.

Program and Course Offerings

Certificate

Nonprofit Management Certificate

The GSPIA certificate in Nonprofit Management will give students the skills and experience they need to translate knowledge into impact. The certificate program will enable students to connect their area of interest/study with meaningful impact in the nonprofit sector.

The certificate will expose students to the role and power of nonprofits in affecting meaningful social change. Students will study the features and practices of nonprofit organizations, how these organizations are managed and sustained, the strategies social entrepreneurs use to form and fund them, and ways they leverage volunteers' passions, interests, and talents to achieve their missions. Students will have the opportunity to learn core nonprofit management skills and engage with local nonprofit organizations connected to their field of study through service-learning projects and a capstone experience. The credential will offer a blend of lecture-based and experiential learning to meet students' needs and interests for more hands-on training and experience. The certificate will be a total of 18 credits.

Course Curriculum

The Nonprofit Academic Centers Council (NACC) Curricular Guidelines provide a model curriculum for degrees in nonprofit leadership, nonprofit organization management, nonprofit sector studies, and philanthropy. In discussing the distinctive characteristics of undergraduate nonprofit management education, NACC emphasizes:

- Community engagement as an essential element of undergraduate education.
- Application of pedagogical tools designed specifically for undergraduate population.
- The use of service-learning methods to build knowledge of the nonprofit and philanthropic sector and to foster new skills to promote the development of an engaged citizenry.
- Internships to build knowledge and skills while creating enhanced opportunities for future employment.

Additionally, it describes key curricular topics that are foundational to undergraduate training in nonprofit management:

Part 1:

1. Comparative perspectives civil society, voluntary action, and philanthropy
2. Ethics and values
3. Public policy, law, advocacy, and social change
4. Nonprofit governance and leadership
5. Community service and engagement

Part 2:

1. Leading and managing organizations
2. Nonprofit finance and fundraising
3. Financial management
4. Managing staff and volunteers
5. Nonprofit marketing
6. Assessment, evaluation, and decision-making methods

Drawing on curricular topics recommended by NACC, a GSPIA certificate in Nonprofit Management will address the following key competencies through curriculum and experiential learning. Students will be equipped with the knowledge and skills to:

- Recognize the scope and scale of the nonprofit sector and its influence on society

- Identify the theoretical basis for nonprofits, their organizational formats and incentive structures, and their legal and professional limits.
- Employ human resources and financial systems consistent with best practices among mission-driven organizations including volunteer management, fundraising, and fund-based financial management.
- Select and implement appropriate advocacy strategies to meet community and organization needs. Emphasis is to be placed on strategic and community-engaged advocacy practices.
- Compare models of social entrepreneurship, including idea generation, building support networks, business planning, initial funding, and organization launch

Required Courses - 15 Credits

The following are the required courses for the certificate. Students are recommended to take the interdisciplinary capstone after completing the other required courses.

- PIA XXXX - PROGRAM DESIGN AND EVALUATION
- PIA 0501 - FOUNDATIONS OF THE NONPROFIT SECTOR
- PIA XXXX - RESOURCE DEVELOPMENT: GRANT WRITING, FUNDRAISING, AND SOCIAL ENTREPRENEURSHIP
- PIA XXXX - INTERDISCIPLINARY CAPSTONE
- PIA XXXX - INTERNSHIP SEMINAR

Electives

Students will take one elective course (3 credits) to complete the minor. This represents a selection of potential electives. GSPIA faculty will develop and offer additional electives as the program grows.

- PIA XXXX - MONEY AND MISSION: FINANCE AND NONPROFITS
- PIA XXXX - DIVERSITY ISSUES IN PUBLIC SERVICE
- PIA XXXX - LEADERSHIP AND STRATEGY

Total Credits: 18

Minor

Public Policy Minor

The GSPIA Minor in Public Policy will give students the skills and experience they need to translate knowledge into impact. This credential will provide skills that will layer onto the students' primary degree/major allowing them to connect their area of interest/study with meaningful impact in the public, private, and nonprofit sectors.

Public policy processes and policy decisions affect every aspect of society -- from how we provide police services, progress in civil rights, the safety of our water and food supplies, and our efforts to explore space. Students will understand how leaders at various levels of government assess and address contemporary challenges.

Students in GSPIA's Public Policy minor will learn how public policy processes work, the roles of elected officials, analysts, agencies, and interest groups, and how federal, state, and local jurisdictions cooperate and compete to create policy outcomes. Skills development will focus on developing and using data, defining, and analyzing problems, identifying whether programs and policies work, and how to communicate to influence public policy processes. Students will have the opportunity to work on policies and community organizations of interest to their careers.

The program will leverage the existing faculty expertise in the Graduate School of Public and International Affairs of 29 faculty doing research, teaching, and service related to public policy. GSPIA is also host to 6 multi-disciplinary centers that conduct research and offer students experiential learning opportunities on a range of policy issues - from international security, human development, to gender equality and police accountability. According to the 2023 US News and World Report rankings, GSPIA ranked #1 among public universities (and # 8 overall) in the specialty rankings for international/global policy and #17 in urban policy (#27 overall).

Housed within GSPIA, the credential will offer a blend of lecture-based and experiential learning to meet students' need for more hands-on training and experience.

Course Curriculum

Students in the minor will engage with faculty in GSPIA across disciplines including political science, economics, and urban planning. A GSPIA Minor in Public Policy will address the following key competencies through curriculum and experiential learning. These competencies were identified through a series of meetings of core GSPIA faculty that teach in the graduate public and international affairs program. Upon completion of the minor, students will be equipped with the knowledge and skills to:

- Understand public service and the principles of ethical and effective service.
- Understand policy issues at multiple levels of government.
- Outline the roles of elected officials, administrators, nonprofit organizations, citizens, and business firms in making public policy decisions.
- Structure, interpret, and communicate data to inform the policy process, balanced by social values.
- Demonstrate an understanding of policy analysis and program evaluation practices.
- Recognize the role of intergovernmental relations between local, state and federal governments and the importance of cross-jurisdictional or regional efforts to solve complex problems.

Required Courses

The following are the required courses for the minor. Students are recommended to the interdisciplinary capstone after completing the other required courses.

- PIA 0101 - HOW PUBLIC POLICY WORKS: FOUNDATIONS OF PUBLIC POLICY
- PIA XXXX - IDEAS TO ACTION: INFLUENCING PUBLIC POLICY
- PIA XXXX - INTERDISCIPLINARY CAPSTONE
- PIA 0201 - SKILLS FOR POLICY RESEARCH AND ANALYSIS

Electives

Students will take one elective course (3 credits) to complete the minor. This represents a selection of initial electives. GSPIA faculty will develop and offer additional electives as the program grows.

- PIA 1102 - CITY OF WHITE SUPREMACY: RACE, SPACE, AND POLICY IN AMERICAN CITIES
- PIA XXXX - INTERNSHIP SEMINAR
- PS 1357 - THE POLITICS OF FOOD, LAND, AND SUSTAINABILITY
- PS 1516 - TRANSATLANTIC POLICY ANALYSIS

Total Credits: 15

Kenneth P. Dietrich School of Arts and Sciences

The Kenneth P. Dietrich School of Arts and Sciences is the oldest and largest academic unit within the University of Pittsburgh, with more than 11,000 students and over 1,000 faculty from around the world. The Dietrich School offers a competitive liberal arts education within the setting of a comprehensive research university and a dynamic urban setting.

The Dietrich School instructional programs provide a liberal arts curriculum designed to prepare students for the world of work, research, professional schools, and graduate programs. This education helps students cultivate the skills and knowledge that provide a foundation for lifelong learning, and educates students so that they can become perceptive, reflective, and intellectually self-conscious citizens of the world. The main elements of the Dietrich School general education are: an acquaintance with great works of art, literature, and philosophy; an understanding of social institutions and processes; a sense of history and familiarity with the richness and variety of human cultural achievements; an awareness of the main ideas of contemporary natural science and mathematics; and engagement with languages and cultures other than one's own.

Dietrich School Undergraduate Web site

Please visit www.asundergrad.pitt.edu for detailed information on:

- Dietrich School majors, minors, and certificates
- Dietrich School general education requirements
- Academic resources, services, and opportunities
- Additional policies and procedures for current Dietrich School students

Dietrich School Undergraduate Calendar

www.asundergrad.pitt.edu/academic-calendar

Admission through the Office of Admissions and Financial Aid

The following students are admitted to Dietrich School by the Office of Admissions and Financial Aid. Please visit <https://admissions.pitt.edu> for more information.

- First-year students (see Pittsburgh campus First-Year Student Admissions for general admissions information).
- Transfer students who have previously enrolled at a college or university other than the University of Pittsburgh. These include former University of Pittsburgh students who have since earned college credits at another institution and now wish to return to the Dietrich School.
- Continuing education students: Adults who wish to begin or continue to work toward an undergraduate degree by taking a full- or part-time course load should apply as new or transfer students through the Office of Admissions and Financial Aid.
- Students who have previously earned a bachelor's degree from an institution other than the University of Pittsburgh and now wish to earn a second undergraduate degree.
- International students should refer to admission guidelines on the Office of Admissions and Financial Aid Web site.

Transfer Students/Transfer Credits

Previous course work for transfer students is evaluated by the Dietrich School Office of Student Records with respect to general education requirements. Before initial registration, transfer students receive an Undergraduate Degree Requirement Evaluation indicating which requirements they have satisfied and which ones must be completed in order to complete their degree in the Dietrich School.

Courses from other colleges and universities are evaluated according to the following guidelines:

- Courses must be passed with a grade of C or better and must be earned at an institution accredited by the appropriate regional accrediting association. Courses that have reasonable counterparts at the University are eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- A maximum of 60 credits can be accepted from accredited community colleges and two-year junior colleges. A maximum of 90 credits can be accepted from accredited four-year institutions. All students must earn their final 30 credits toward a Dietrich School degree and at least half of the credits for their majors, minors, and/or certificates while enrolled as a Dietrich School student.
- The number of transfer credits granted for a given course cannot exceed the number awarded on the transcript of the original school or the number earned for the corresponding course in the Dietrich School. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- The Dietrich School accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation, but will not be calculated into the student's GPA at the University of Pittsburgh.
- Transfer credits do not apply towards University honors.

Please contact the Dietrich School Office of Student Records at 412-624-6480 for information about transfer credit evaluation. Please note: All transfer credits may be subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Admission through the Dietrich School of Arts and Sciences

The following students must apply directly to the Dietrich School for admission.

Transfers from Other University of Pittsburgh Schools at the Pittsburgh campus

To transfer to the Dietrich School from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to the Dietrich School. The Dietrich School will review the student records and send letters of acceptance to students who are eligible to transfer into the Dietrich School. To qualify, students must have a minimum overall GPA of 2.0 and have completed their basic skills requirements in composition and algebra according to Dietrich School guidelines. In addition, students enrolled in the College of General Studies (CGS) must earn at least 12 credits through CGS before applying for transfer to the Dietrich School.

Upon acceptance into the Dietrich School, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled Dietrich School skills and general education requirements. To graduate with a degree from the Dietrich School, students are required to earn their last 30 credits while enrolled in the Dietrich School and to earn at least half of the credits for their majors, minors, and certificates while enrolled in the Dietrich School.

Relocation from University of Pittsburgh Regional Campuses

1. For students seeking guaranteed relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 3.0.
2. For students seeking guaranteed relocation who have earned 30 or more credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 in all courses is required.
3. For students seeking relocation who have between 15 and 30 credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 is required in all courses, and the normal requirements of the Dietrich School of Arts and Sciences for external transfer students must be met. For these students, relocation is not guaranteed. Students must complete at least 15 credits at the regional campus to transfer to the Pittsburgh campus.

4. All students must complete the Algebra and Composition skills requirements before relocating from a regional campus.

Students Seeking a Second University of Pittsburgh Degree

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in the Dietrich School should apply directly to the Dietrich School. Applicants should note the following:

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree.
- Students must earn a minimum of 30 new credits. No coursework repeated from the first degree will count toward the second degree.
- At least half of the credits for the second major toward the second degree must be earned while enrolled in the Dietrich School.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

Students Seeking Reinstatement

The following students must apply for reinstatement through the Dietrich School of Arts and Sciences.

- Dietrich School students who have not enrolled for three consecutive terms (one calendar year);
- Dietrich School students who have completed their suspension periods and wish to continue their studies; and
- Students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to the Dietrich School.

Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or summer session. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to the Dietrich School. Students' academic standing upon reinstatement will continue to be that attained at the end of their last term in residence.

Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major at the time of their reinstatement, rather than those in place at the time of their last attendance.

Post-baccalaureate Students

Students who have completed an undergraduate degree and wish to take additional undergraduate courses on a non degree-seeking basis may apply directly to the College of General Studies.

Academic Integrity

As members of the University of Pittsburgh community, Dietrich School students are expected to meet their obligation to exhibit honesty and to respect the ethical standards of the University community and of their chosen field of study in carrying out academic assignments. Dietrich School students are therefore expected to familiarize themselves with the published rules and regulations governing academic integrity. For specific information, see the Academic Integrity Code.

The Dietrich School maintains an Academic Integrity Board, consisting of both faculty and students, for adjudication of grievances from faculty about student behavior and from students about faculty behavior.

Grading Policies

Letter Grade Option

The Dietrich School adheres to the following University letter grade system without exception.

A+		Superior
A	4.00	
A-	3.75	
B+	3.25	Meritorious
B	3.00	
B-	2.75	
C+	2.25	Adequate
C	2.00	
C-	1.75	
D	1.25	Minimal
D+	1.00	
D-	0.75	
F	0.0	Failure

S/NC Grade Option

The Dietrich School offers both a standard letter-grade option and the Satisfactory/No-Credit (S/NC) option for students enrolled in most Dietrich School courses. Under the S/NC option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (no credit) is given. Courses for which an S is earned are counted toward graduation but are not computed in the GPA. Courses for which an NC is earned are not counted toward graduation or the GPA, since the NC designates that no credit has been earned.

Students can select the S/NC grade option when enrolling for a course. After the end of the add/drop period, a student must complete a Grade Option/Audit Request form and submit it to the Office of Student Records by the Grade Option deadline noted each term on the Dietrich School undergraduate calendar.

Note: There are some formal limitations to a student's choice of grading systems; he or she should check with an academic advisor before deciding to take a course S/NC.

Audit (N Grade)

To audit a course, a student must register for and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the grade option change deadline noted each term on the Dietrich School undergraduate calendar. The instructor for the course must sign the Grade Option/Audit Request form before the form can be processed. Completed forms must be submitted to the Office of Student Records. Students who audit a course are given an N grade, which means that the course is counted neither towards graduation nor the GPA. A student typically chooses to audit a course for personal enrichment.

G Grades

At the discretion of an instructor, a G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken, or by an earlier deadline established by the instructor. After that year, the grade will automatically change to NG; an NG grade cannot be changed, and the credits will no longer appear as "in progress." The student will be required to re-register for the course if it is needed to fulfill requirements for graduation. The Dietrich School encourages students with G grades to work with their instructors to complete the requirements for the course as soon as possible.

Academic Honors

Outstanding students in the Dietrich School are recognized for their academic achievement in several ways.

Dean's List

After grades are posted for the fall and spring term, Dietrich School students whose academic performance indicate outstanding achievement are recognized on the Dean's List. To be placed on the Dean's List, a student must have earned at least 12 letter grade credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50 and no grade lower than a C.

University Honors

Those members of a Dietrich School graduating class who have attained an outstanding scholastic record and have completed at least **60 letter-graded credits** at the University of Pittsburgh are graduated with honors. All coursework completed at the University for a letter grade is calculated in the grade point average. University honors are awarded in the following levels of distinction according to grade point average at graduation:

- Summa Cum Laude: 3.75
- Magna Cum Laude: 3.50
- Cum Laude: 3.25

Departmental Honors

Many departments offer an honors major. Successful completion of the honors major, as well as normal graduation requirements, lead to the awarding of the bachelor's degree with departmental honors. For detailed information, contact the departmental advisor or visit the department's Web site.

Academic Standing

The Dietrich School is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. Students in the Dietrich School are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Academic Alert is a marker designed to notify students who show signs, early on and throughout their academic career, of jeopardizing successful progress toward the completion of their undergraduate degree. This may be due to their inability to maintain a satisfactory GPA and/or failing to fulfill the algebra or composition requirement within the first two terms of full-time enrollment. Students who receive two consecutive **Academic Alerts** will be placed on **Academic Probation**.

Students are placed on **Academic Probation** after earning a GPA between a 1.50 and a 1.99 over two consecutive terms or have one semester at or below a 1.49 cumulative GPA. Students may also be placed on Academic Probation if they fail to make progress toward their degree (e.g. failing to earn any academic credits).

Students currently on Academic Probation who earn a term GPA below a 2.00 or fail to make progress toward their degree will be subject to **Academic Suspension**. After being suspended, students are not eligible to re-enroll for one calendar year. Following suspension, students are required to apply for reinstatement at the Dietrich School Undergraduate Dean's Office. Students returning from academic suspension are reinstated on academic probation and are required to develop an academic success plan upon their return. These reinstated students' records are reviewed after each subsequent term of enrollment.

Students who have been reinstated from Academic Suspension must earn at least a 2.00 GPA for each term that they enroll until they have achieved a cumulative GPA of a 2.0 or above. If a student fails to earn a 2.00 term GPA, they are subject to **Academic Dismissal** from the University. Dismissed students are not eligible for reinstatement.

Probation and Eligibility for Financial Aid

The Office of Admissions and Financial Aid (OAFA) monitors financial aid eligibility. Students on probation should contact OAFA at 412-624-7488 for more information.

Credit Policies

The following section details the Dietrich School's rules regarding allowable credits and courses for students earning a degree in the Dietrich School.

Advanced Placement (AP) Credits

See the AP credit section of the Office of Admissions and Financial Aid Web site.

Summer Courses Taken Elsewhere

Dietrich School students in good academic standing (cumulative GPA of at least 2.00) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from the Dietrich School Office of Student Records. Students must submit a completed summer course approval form (available on the Student Records Web site), as well as the relevant course descriptions to the Office of Student Records. Students may not repeat any course taken at the University of Pittsburgh (passed or failed) at another institution. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere.

Credit by Examination

In rare circumstances, credit by examination may be offered. Contact the Office of Students Records (studentrecords@as.pitt.edu or 412-624-6480) with questions.

Departmental Credits

No more than 60 credits may be taken in one department, and normally no more than 40 in a single department are considered desirable in a well-balanced program.

Repeating a Course/Duplication of Course Content

If a student repeats a course, they must complete a course repeat form and submit it to the Office of Student Records. Please note the following.

- The original grade remains on the transcript, but is not counted in the calculation of the GPA.
- Any grade earned in the repeated course will be factored into the GPA, even if it is lower than the original grade.
- The repeated course does not increase the number of credits counted toward meeting degree requirements unless an F is replaced by a passing grade.
- W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the GPA. Incomplete (G) grades will not be identified as repeated courses until the course work is completed.
- No sequential course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade.
- No course can be repeated at any other institution.
- Students may repeat a course no more than two times.

Students may not earn duplicate credit for courses that substantially duplicate the content of courses taken previously. For example, duplicate credit cannot be earned for the following:

- Both a regular version of a course and an honors version of that course.
- Courses that are cross listed with a course the student has already taken.
- Courses taken under a newly assigned course number if already taken under an old course number.
- Certain specific courses that duplicate material.

Students with questions about repeating courses or duplicating course content should consult with their academic advisors.

English Language Institute Courses

LING 0007, LING 0008, and LING 0009 courses count toward the degree but are not counted toward a linguistics major.

Enrollment in Graduate Courses

Undergraduate Dietrich School students who demonstrate exemplary competencies and proficiencies may take advantage of the rich variety of graduate courses offered by the Dietrich School. Credits earned in graduate courses may count toward the degree. Students should consult with both their academic advisor and instructor of a course before registering.

Independent Study, Undergraduate Research, Internships, and Undergraduate Teaching

Dietrich School students may earn up to 24 credits of independent study, undergraduate research, internships, and undergraduate teaching as part of the 120 credits required for a degree. Ordinarily, no more than six credits may be earned in any term in a single undergraduate research experience or internship. Under certain conditions, students in good standing may register for a block of 15 credits of independent study. These credits are to be earned for work done within one academic term. A student may register for a 15-credit independent study term only once during his or her college career. This needs to be approved by an assistant dean prior to registration.

Learning Agreement forms for independent study, undergraduate research, and internships, as well as specific information about eligibility, procedures, and guidelines, are available from the academic department through which the activity will be conducted.

International Baccalaureate

The Dietrich School recognizes the International Baccalaureate (IB) Higher-Level Examinations and may grant advanced standing and/or credit for various fields for scores on the Higher-Level Examinations, which range from five to seven. Advanced standing is determined individually by subject according to departmental policy. Students should send the results of their IB examinations directly to the Office of Student Records. No credit will be given for Subsidiary-Level Examinations.

Lower-Level or Sequential Courses

Credit cannot be earned for courses taken after more advanced course work in the same field has been successfully passed with a C or higher. For example, credit cannot be earned for an algebra course taken after the successful completion of a calculus course.

Normal Credit Load

A normal credit load is 12 to 18 credits per academic term (e.g. fall and spring). Students should complete a minimum of 15 credits per term in order to graduate within four years.

Any term in excess of 18 credits requires the recommendation of the student's academic advisor and approval from an assistant dean. Call 412-624-6480 to make an appointment with an assistant dean. Students who enroll for more than 18 credits in a term will be charged additional tuition per credit.

Physical Education

Students are not required to take any courses in physical education (PEDC), but they may do so. Up to four credits of courses offered by the School of Education's Department of Health, Physical, and Recreation Education may be counted toward a Dietrich School degree.

Reserve Officer Training Corps (ROTC)

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC through cross registration at Carnegie Mellon University [CMU]) are not accepted toward a Dietrich School degree. The Dietrich School will grant up to four credits toward graduation for the following military science courses in lieu of physical education and recreation courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0011, MILS 0021, MILS 0022, MILS 1031, MILS 1032, MILS 1041, and MILS 1042. Any four credits of Navy ROTC courses from CMU will count in lieu of physical education and recreation courses.

Statute of Limitations

All of the credits required for a degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, this limitation may be waived. In such cases, the waiver is for a specific period during which the program must be completed.

Online Courses

Students may count a maximum of 24 credits of online coursework completed at Pitt toward their degree. First-year students may not take online courses in their first term. For students who begin in the summer or fall, they may not take online courses until the spring. For students who begin in the spring, they may not take online courses until the summer.

Adding and Dropping Courses

Generally, students enrolled in the Dietrich School are not required to have their academic advisor's approval before adding or dropping a course. However, Student Support Services (SSS) students and student athletes must see their academic advisor before processing an add/drop. Additionally, all first-year students are strongly urged to consult their academic advisor before adding or dropping a course.

Withdrawing from Courses

Withdrawing from one or more courses may impact a student's financial aid status. Withdrawal from a course must be done by the withdrawal deadline, which is posted in the Dietrich School undergraduate calendar and on the Office of the University Registrar's Web site.

Bachelor Degree Requirements

The following sections describe the general requirements for all majors offered by the Dietrich School.

Graduation

Students must apply for graduation by the posted deadline on the Dietrich School undergraduate calendar and/or the Office of Student Records Web site. Students must meet with their academic advisor to ensure all major requirements will be met during their final term at the University. Students must earn at least 120 degree credits with a minimum 2.00 GPA. In addition, students must achieve a 2.00 GPA both in the major and in the minor or certificate. Within the 120 credits, students must fulfill the Dietrich School's curriculum requirements, which include General Education Requirements and requirements for a major, minor, or certificate (see General Education Requirements, and Requirements for Major sections below). Furthermore, students must earn at least half of the credits for their major(s), minor(s), and certificates(s) and the final 30 credits toward the Dietrich School degree while enrolled as a Dietrich School student.

General Education Requirements

The Dietrich School of Arts and Sciences is committed to providing the best possible education for its undergraduate students. This education is best served through a clear and innovative curriculum that provides students with the knowledge, analytical skills, disciplinary understanding, intellectual curiosity, and creative opportunities that will allow them to engage and adapt in an increasingly diverse and rapidly changing world. Diversity and inclusion are part of the core mission of our school and the university and are key matters for our students and society. Of allied importance is the understanding of complex global issues and different cultures.

All students graduating from the Dietrich School must satisfy general education requirements detailed below. Students select from a range of approved courses to meet these requirements.

A. Writing

Written communication is central to almost all disciplines and professions. Developing writing proficiency is a lifelong process, and it is especially important that undergraduate education accelerates and directs that process toward the achievement of writing skills that will provide a base appropriate for professional or graduate education or for professional employment. The school requires that all students complete the following writing courses during their undergraduate career.

1. Composition

Students must complete the composition requirement, ENGCOMP 0200 Seminar in Composition or its equivalent, with a minimum grade of C- by the end of their first year of study. Part-time students should complete the requirement within their first 30 credits. Transfer students must complete this requirement within their first 15 credits.

Students may be required to complete ENGCOMP 0150 Workshop in Composition (or its equivalent) prior to enrolling in ENGCOMP 0200. Students may be exempt from the composition requirement with a score of 5 on the AP English: Language and Composition or AP English: Literature and Composition exam.

2. Two Writing-Intensive Courses

Writing intensive courses (W-Courses) are designed to teach writing within a discipline through writing assignments that are distributed across the entire term. In these courses, students will produce at least 20-24 pages of written work. A significant portion of this work should be substantially revised in response to instructor feedback and class discussion.

All students must complete two courses that are designated as W-Courses. Students must satisfy one element of this requirement within their major field of study. W-Courses may also be courses that fulfill other General Education Requirements.

B. Algebra and Quantitative and Formal Reasoning

1. Algebra

Students must complete the algebra requirement, MATH 0031 College Algebra or its equivalent, with a minimum grade of C- by the end of their first year of study. Part-time students should complete the requirement within their first 30 credits. Transfer students must complete this requirement within their first 15 credits. Students will be exempt from the algebra requirement with a 620 or above Math SAT score or a 27 or above Math ACT score, or with completion of a high school course in Algebra II, Pre-Calculus, or Calculus with a grade of B or higher.

2. Quantitative and Formal Reasoning

All students are required to take and pass with a minimum grade of C- at least one course in university-level mathematics (other than trigonometry) for which algebra is a prerequisite, or an approved course in statistics or mathematical or formal logic in a department of the Dietrich School of Arts and Sciences.

C. Language

A Sequence of Two Courses in a Second Language

All students are required to complete with a minimum grade of C- two terms of university-level study in a second language other than English. Exemptions will be granted to students who can demonstrate elementary proficiency in a second language through one of the following:

1. Having completed three years of high school study of a second language with a grade of B or better in each course;
2. Passing a special proficiency examination;
3. Transferring credits for two terms or more of approved university-level instruction in a second language with grades of C or better;
4. Having a native language other than English.

D. Diversity

Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of difference. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though not be limited to, such issues as race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity.

All students must complete one course that is designated as a Diversity course but may take this course within their major field of study. Diversity courses may also be courses that fulfill other General Education Requirements.

E. Division Requirements in the Humanities and Arts, Social Sciences, Natural Sciences

Each student is required to take nine courses in the humanities, social sciences, and natural sciences distributed as below. Such courses allow students to pursue their own interests while they explore diverse views of a broad range of human cultures, modes of thought, and bodies of knowledge. The courses that fulfill these requirements are truly courses in the disciplines that draw on the unique resources of a research university.

1. A Course in Literature

By studying a range of literary and other texts in this course, students will be introduced to the techniques and methods of textual analysis and will develop critical perspectives on a variety of forms of cultural expression.

2. A Course in the Arts

This course introduces students to modes of analysis appropriate to music, theatre, or the visual and plastic arts. It may take the form of a survey, the study of a genre or period, or may focus on a particular artist.

3. A Course in Creative Work

In this course students are expected to produce some form of creative work, and they will also be trained in the techniques and modes of its production. The course could be situated in theatre, studio arts, writing, visual arts (including photography, film), music, and dance; or it may be a course that engages in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation.

4. A Course in Philosophical Thinking or Ethics

This course will emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

5. A Social Science Course

A course that treats topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners.

6. A Course in Historical Analysis

In this course, students will develop skills and methods by which to understand significant cultural, social, economic, or political accounts of the past. The course may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms.

7. Three Courses in the Natural Sciences

These will be courses that introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline. The courses may be interdisciplinary, and no more than two courses may have the same primary departmental sponsor.

F. Global Awareness and Cultural Understanding

Each student must complete three courses in global awareness and cultural understanding distributed as below.

1. A Course in Global Issues

This course will examine significant issues that are global in scale. Courses could address, for example: globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law, or the economy.

2. A Course in a Specific Geographic Region

This course will be an in-depth study and analysis of a particular region or locality outside of the United States.

3. A Course in Cross-Cultural Awareness

This course, through cross-cultural perspective, will promote knowledge of and reflection upon the cultures of Asia, the Middle East, Africa, Latin America, the Caribbean, or the indigenous peoples of the world past and present. Students will develop an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe.

Overlapping Credit Within the Dietrich School

Up to eight credits may be overlapped between any two majors, two certificates, and/or a major and certificate. Up to eight credits may be overlapped between a major and minor and/or certificate and minor. Up to four credits may be overlapped between two minors.

Allowable credit overlap	Major	Certificate	Minor
Major	8 credits	8 credits	8 credits
Certificate	8 credits	8 credits	8 credits
Minor	8 credits	8 credits	4 credits

The academic advisement report (AAR) will not be able to catch excessive overlap; advisors and students will need to continue to monitor overlapping credits.

Requirements for the Major

All students are required to complete a major of their choice, in addition to general education requirements, in order to graduate from the Dietrich School. The Dietrich School offers over 55 majors in 30 departments. Some departments offer more than one major. Each department specifies the particular courses needed to fulfill its major(s).

Students must complete the major with a 2.00 GPA, and half of the credits earned for the major must be earned at the University of Pittsburgh main campus.

Students declare their major by filling out an Academic Plan Change Form. Students normally declare their major during their fourth term of full-time study.

Note: Transfer students receive an evaluation of their previous course work indicating the equivalent University of Pittsburgh courses for which transfer credits have been awarded. Equivalent Dietrich School courses will meet requirements for the major where appropriate. Students who believe that a previous course not equivalent to a Dietrich School course should meet a requirement for a major may petition the department to review that course.

Minors and Certificates

Minors and certificates are earned in addition to a major. Students must complete minors and certificates with a 2.00 GPA, and half of the credits earned for the minor or certificate must be earned at the University of Pittsburgh main campus. Students may overlap a courses to fulfill requirements between a major, a minor, and/or a certificate in the following manner. Students who complete an approved minor or certificate will have it listed on their transcript, provided that the minor or certificate is indicated on the application for graduation.

Special Academic Opportunities

Dietrich School students may choose to pursue a variety of academic programs leading to multiple majors, majors within more than one department, or majors that either prepare students for or offer advanced admission to graduate or professional programs at the University of Pittsburgh.

Double and Triple Majors

Students can declare a double or triple major, but will usually earn only one degree. If one major leads to the BA degree and another to the BS degree, students must decide when applying for graduation which degree they wish to receive.

Double Degrees

Dietrich School students may choose to simultaneously pursue more than one undergraduate degree, either within the Dietrich School (i.e., both a BA and a BS) or in another undergraduate school of the University. In general, earning two degrees requires a minimum of 150 credits and the completion of the curriculum requirements of both schools.

Combined Degree Options

These intensive programs give Dietrich School students the opportunity to complete their undergraduate degree while beginning their first year of a graduate or professional program. To qualify, students must:

- Complete 96 or more Dietrich School credits,
- Satisfy all of the general education requirements, and
- Be accepted into a graduate or professional school at the University of Pittsburgh.

Preparation for Professional Programs of Study

Students interested in spending their junior and senior years in the University of Pittsburgh's professional schools of Social Work, Health and Rehabilitation Sciences, or Pharmacy normally spend two years in the Dietrich School taking necessary prerequisite courses and electives in preparation for professional study. Although first-year students are accepted directly into the schools of Engineering, Nursing, Computing and Information, and the College of Business Administration (CBA), it is possible for students who begin in the Dietrich School to transfer into those schools after one or two years.

Preparation for Graduate Professional Studies

Although the Dietrich School does not offer specific majors in pre-law, pre-medicine, pre-dental medicine, or education, it is possible for students in the Dietrich School to complete all the necessary prerequisites for entry into these graduate professional schools while fulfilling their Dietrich School degree requirements.

Accelerated Law Admissions Program (ALAP)

The Accelerated Law Admissions Program (ALAP), open to any student enrolled in the Dietrich School, grants admission to the University of Pittsburgh's School of Law to those students who meet the ALAP's requirements. Students who enter the program complete their undergraduate major in three years, applying for admission to the School of Law during their junior year, and then go on to law school for another three years.

Students interested in the program are encouraged to declare a major early at the end of the first year in order to allow them to complete their undergraduate Dietrich School major(s) by the end of their third year. Also, interested students are encouraged to take summer classes during their second year in order to reduce the credits to be completed in their third year. The requirements for the ALAP are as follows:

- Students must complete 102 credits by the end of their junior year.
- Students must take three writing-designated courses (rather than two) beyond the freshman writing requirement.
- Students must take the Law School Admissions Test (LSAT) by the fall of their junior year. This would include the June, October, or December test.

Acceptance into the program is competitive, and only those students with above-average grades and competitive LSAT scores should apply.

Five-Year Program

- BS in statistics and an MA or MS in applied statistics: This program is intended to give outstanding students interested in statistics the opportunity to progress quickly toward their educational objectives. Contact the Department of Statistics for details.

Study Abroad

Dietrich School students are encouraged to add an international dimension to their undergraduate education through study abroad. Credit may be earned toward the Dietrich School degree through participation in one of several University of Pittsburgh programs or consortia-sponsored programs. Students may study in virtually any part of the world in these programs or others sponsored by most American or international institutions.

Visit the Global Experiences Web site at www.abroad.pitt.edu for more information.

Programs and Course Offerings

Certificate

Children's Literature Certificate

Books written for children are among the best-loved and best-remembered of all works of literature. They also provide some of the most important early learning experiences. In recent years, books written for children have attracted increasing interest from scholars and students as well as parents, educators, publishers, and journalists. What kinds of stories do we consider appropriate for children, and why? How have our opinions about this topic changed over time and across different cultures? And how is literacy changing, now that children are exposed not only to books, films, and television, but also to video games and the world wide web?

The interdisciplinary Certificate in Children's Literature offers undergraduates the opportunity to bring together studies across a broad range of subjects as they contemplate these and other questions pertaining to youth literature and culture. Founded in 1981, the program is designed to meet the individual student's interests and strengths and fulfills the Arts and Sciences requirement for a related area. The Children's Literature Certificate provides a useful background for many areas of professional work and study. Many of our students pursue careers in elementary, secondary, and special education, or in information science, child care, or social work. Others students have gone to graduate school in the humanities (English, History, Film Studies) or social sciences (Sociology, Psychology, Anthropology). Recent graduates of our new "Writing Youth Literature" course have gone to internships at Sesame Street Productions and the Harvey Klinger Literary Agency in New York City. For more information on the study of children's literature at the University, see www.childrenslit.pitt.edu.

Course Requirements

The certificate is a planned interdisciplinary sequence of at least 18 credits. The program director must also be consulted about the design of the student's individual course of study. The three required core courses for the certificate are listed below.

Students are encouraged to take all four of the below courses, since either ENGLIT 0562 or ENGLIT 0655 may be taken as a Category 1 elective. Of these two courses, the course not taken as an elective must be taken as a core course.

In addition to the three core courses, students should design their own course of study to complete the remaining credits, in consultation with the program director. Courses must be selected from an approved list of courses, available from the program director.

- ENGLIT 0560 - CHILDREN AND CULTURE

- ENGLIT 0562 - CHILDHOOD'S BOOKS or
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT *

Note:

* ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT is the capstone course for the Children's Literature program and must be taken last.

Other requirements

- A minimum GPA of 2.0 is required in each course that counts toward the certificate.
- There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

Nanoscience and Engineering Undergraduate Certificate

Advances in nanoscience and nanotechnology (the ability to predict, create, and design with nanoscale materials and systems) are expected to reveal new physical phenomena and to enable the creation of highly desirable products and devices, in addition to revolutionary changes in industrial practice. Strength in nanoscience and nanotechnology has been identified as the nation's future competitiveness and prosperity, and strategic plans have been developed to accelerate nanoscience research and development, encourage knowledge transfer to spur economic growth, and expand educational programs and workforce training - all in a socially and environmentally responsible and sustainable manner.

Nanoscience and nanotechnology also has had a large and rapidly growing local impact. The Pittsburgh region is home to a number of corporations, including many smaller start-up companies, with major nanotechnology components to their businesses. The continued success of companies such as PPG, Seagate, Bayer, Alcoa, Plextronics, Westinghouse, Bettis, and II-VI will depend on their ability to recruit local engineering talent with the required background in nanoscience and nanotechnology. The continued development of nanotechnology-based entrepreneurial start-ups will depend in large part on a vibrant pool of young engineers and scientists with appropriate educational experience in nanoscience and nanotechnology.

This joint certificate, housed in both the Swanson School of Engineering (SSOE) and the Dietrich School of Arts and Sciences (Dietrich School) enables BS students from both schools to complement their education by completing a fivecourse sequence. The certificate is designed to be combined with coursework in any SSOE degree-granting program, or with chemistry and physics in the Dietrich School.

The course requirements for this certificate follow.

Required courses

This course has prerequisites.

- ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1903 - DIRECTED RESEARCH

Elective courses

Select two courses from the following list.

- CHEM 1410 - PHYSICAL CHEMISTRY 1 or
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY
- CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY

- ECE 2295 - SPECIAL TOPICS: ELECTRONICS
- IE 1012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS or
- MEMS 1057 - MICRO/NANO MANUFACTURING
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1374 - SOLID STATE PHYSICS

Additional information

Non-Dietrich School course credit

Students may apply up to 18 credits of non-Dietrich School coursework to their undergraduate degrees.

Credit overlap

No more than six credits of coursework may overlap between the requirements for this certificate and a major in Physics and Astronomy or in Chemistry.

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

No course that counts toward this certificate may be taken on the S/NC basis.

For more information

Contact the departmental advisor for the Physics and Astronomy major, Russell Clark (RUC2@Pitt.edu).

Photonics Certificate

Photonics is one of the fastest growing high-tech industries in the world today. It includes optical communications (e.g., fiber optics, lasers, and infrared links), optical imaging (e.g., spy and weather satellites, night vision, holography, flat screen display, and CCD video cameras), optical data storage (e.g., CDs and CD-ROMs), optical detectors (e.g., supermarket scanners, medical optics, and nondestructive evaluation of materials), lasers (e.g., welding lasers, laser surgery, laser shows, and laser rangefinders), spectroscopy (e.g., chemical analysis and detection), and quantum optics (e.g., quantum cryptography, quantum computing, and single-photon detection).

Although the photonics industry is growing rapidly, photonics companies have a hard time finding qualified people because the interdisciplinary field crosses physics, physical chemistry, and electrical engineering. The photonics certificate program at the University of Pittsburgh will give this kind of cross-cutting experience and allow students to move directly into the photonics industry. The Certificate in Photonics will also serve as good preparation for graduate school in solid state physics, physical chemistry, or electrical engineering with optoelectronics emphasis.

Students in the certificate program will have opportunities for laboratory research with professors at the University of Pittsburgh and will also receive special job placement referrals.

Requirements

The certificate is designed to fit easily with a physics, chemistry, or electrical engineering major, but students with other majors can also earn the certificate.

To receive the certificate, students must have taken

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

One of the following pairs

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- or
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

One of the following pairs

- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
- or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- or
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1 and
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Required laboratory courses:

One of the following

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY and
- CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB

One of the following

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1 and
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB

In addition

The following courses are required for the certificate.

- PHYS 1361 - WAVE MOTION AND OPTICS
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- Junior Photonics Seminar (two semesters, each 1 credit) (cross listed as PHYS 0177, CHEM 1750 , or ECE 1248)
- Photonics Theory 1 (3 credits) (cross listed as PHYS 1363 , CHEM 1470 /CHEM 1472 , or ECE 1240 /1240)
- Photonics Theory 2 (3 credits) (cross listed as PHYS 1364 , CHEM 1470 /CHEM 1472 , or ECE 1240 /ECE 1241)
- Photonics Laboratory (1 credit) (PHYS 1365 , to be cross listed in EE and CHEM)

One of the following

- CHEM 1410 - PHYSICAL CHEMISTRY 1
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1 and
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2

Two of the following courses or sequences

- CHEM 1250 - INSTRUMENTAL ANALYSIS
- TELCOM 2222 - Photonic Communications

One of the following

- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- ECE 1259 - ELECTROMAGNETICS and
- ECE 1266 - APPLICATIONS OF FIELDS AND WAVES

Note:

For more information, see www.phyast.pitt.edu/~snoke/photonics.

Public and Professional Writing Certificate

Writing plays a crucial role in the lives of people after they leave college, as students go on to work, volunteer, attend professional schools, and advocate for themselves and others. The PPW certificate focuses on writing that serves professional goals and/or the public interest. We invite students from across the University to focus on writing as a way to develop the critical writing, learning, and thinking skills necessary to all sectors of American professional life-private, nonprofit, and government.

Students who know that they will write extensively as professionals in law, medicine, the sciences, social work, public policy, international relations, business, or other fields are good candidates for the PPW certificate, as are students who are interested in advocacy and activism. Students contemplating graduate work should also find the course of study leading to the PPW certificate useful. The courses will allow students to work on significant writing projects in a range of venues. Students who have finished the certificate should have a compelling portfolio of work that they can show to prospective employers.

The certificate requires 18 credits, described below.

Writing course

Select one of the following writing-intensive courses.

- ENGCOMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCOMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCOMP 0420 - WRITING FOR THE PUBLIC

Elective courses

Select at five courses from the following list. At least two courses must be at the 1000-level. The remaining courses may be at any level from the list.

- ENGCOMP 0510 - NARRATIVES OF THE WORKPLACE
- ENGCOMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0530 - WRITING FOR THE SCIENCES
- ENGCOMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
- ENGCOMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 0641 - WRITING FOR CHANGE
- ENGCOMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
- ENGCOMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCOMP 1102 - LANGUAGE OF MEDICINE
- ENGCOMP 1103 - PUBLIC RELATIONS WRITING
- ENGCOMP 1104 - CORPORATE STORYTELLING
- ENGCOMP 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
- ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCOMP 1151 - PROFESSIONAL EDITING IN CONTEXT
- ENGCOMP 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCOMP 1410 - ADVANCED RESEARCH/DOCUMENTARY WRITING
- ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
- ENGCOMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING
- ENGCOMP 1902 - INDEPENDENT STUDY PUBLIC PROFESSIONAL WRITING
- ENGCOMP 1903 - SERVICE-LEARNING SEMINAR IN PUBLIC AND PROFESSIONAL WRITING
- ENGCOMP 1910 - BRIDGE SEMINAR

Additional information

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

For more information

Visit the certificate's Web page at www.Composition.Pitt.edu/Undergraduate/Public-And-Professional-Writing for more details. Questions about the certificate can be addressed to the director, Jean Grace (JGrace@pitt.edu).

Undergraduate Certificate in Sustainability

Environmental and sustainability programs study coupled human-natural systems using interdisciplinary approaches and knowledge. Such programs work at the science-engineering, science-policy, and policy management interfaces and aim to prepare sustainability-oriented problem solvers through interdisciplinary research, scholarship, and practice. This certificate addresses the need for education and research to strengthen our understanding of the links between human behavior and natural processes by integrating the behavioral and social sciences, earth sciences, physical sciences, engineering, and information sciences.

Completion of the certificate in the Dietrich School requires 18 credits. The following requirements are for Dietrich School students who pursue this certificate. Be advised that Swanson School of Engineering students may have different requirements.

Required Courses

- ENGR 1905 - CURRENT ISSUES IN SUSTAINABILITY
- ENGR 1907 - SUSTAINABILITY CAPSTONE
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE

Elective Courses

Select three of the following courses. Only one course may be in the student's major department.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- BIOSC 0740 - YELLOWSTONE FIELD COURSE (UHC, off-campus in Wyoming)
- BIOSC 1160 - FOREST ECOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1220 - ECOLOGICAL FIELD STUDIES (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT (off-campus at Pymatuning Laboratory of Ecology)
- BIOSC 1610 - CONSERVATION BIOLOGY (off-campus at Pymatuning Laboratory of Ecology)
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- CS 0090 - SUSTAINABILITY AND COMPUTING
- ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
- ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
- ECON 1360 - ENVIRONMENTAL ECONOMICS
- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
- ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT
- ENGR 1060 - SOCIAL ENTREPRENEURSHIP- ENGINEERING FOR HUMANITY
- GEOL 0860 - ENVIRONMENTAL GEOLOGY
- GEOL 1051 - GROUNDWATER GEOLOGY
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1333 - SUSTAINABILITY
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1904 - DIRECTED READING
- GSWS 1450 - GENDER AND SUSTAINABILITY
- HIST 1019 - CITIES IN HISTORICAL PERSPECTIVE
- HIST 1695 - ENVIRONMENTAL HISTORY
- MEMS 1065 - THERMAL SYSTEMS DESIGN
- PIA 2231 - CONTEMPORARY US ENERGY POLICY
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS

- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SOC 1445 - SOCIETY AND ENVIRONMENT
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- URBNST 0114 - URBAN SUSTAINABILITY

Additional information and requirements

- A minimum GPA of 2.0 is required in each course that counts toward the certificate.
- No course that counts toward this certificate may be taken on the S/NC basis.

Joint Major

A&S/Business, BA

In Spring 2022 the A&S/Business, BA was terminated. Students who are currently pursuing the A&S/Business dual major will have until Fall 2027 to complete the program.

A&S/Business Dual Major

The A&S/business dual major is offered jointly by Dietrich School of Arts and Sciences and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any Dietrich School major. The Dietrich School major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all Dietrich School curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their Dietrich School advisors regarding the application process. For more information about the program, see <http://www.business.pitt.edu/cba/academics/>.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Note:

Competency in Microsoft Excel (spreadsheet software) is required.

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Note:

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis.

A&S/Business, BS

In Spring 2022 the A&S/Business, BS was terminated. Students who are currently pursuing the A&S/Business dual major will have until Fall 2027 to complete the program.

A&S/Business Dual Major

The A&S/business dual major is offered jointly by Dietrich School of Arts and Sciences and the College of Business Administration (CBA). To satisfy the requirements, students must combine the business major with any Dietrich School major. The Dietrich School major will be listed first on the transcript as the degree-determining major (BS or BA), and the business major will be listed second. Students will be required to fulfill all Dietrich School curriculum requirements. Students are admitted by a faculty committee that considers the cumulative GPA, specific courses taken and grades earned, SAT scores, and other relevant credentials. Students who have completed at least one full year of course work are eligible to apply to the program. Students interested in the program should seek assistance from their Dietrich School advisors regarding the application process. For more information about the program, see <http://www.business.pitt.edu/cba/academics/>.

Major Requirements

To graduate with an A&S/business dual major, students must complete the following:

Four dual major prerequisites:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- MATH 0120 - BUSINESS CALCULUS or
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Note:

Competency in Microsoft Excel (spreadsheet software) is required.

Twelve required business courses:

- BUSACC 0030 - FINANCIAL ACCOUNTING
- BUSACC 0040 - MANAGERIAL ACCOUNTING
- BUSQOM 0050 - DECISION ANALYTICS
- BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
- BUSECN 1010 - MANAGERIAL ECONOMICS
- BUSORG 1020 - ORGANIZATIONAL BEHAVIOR
- BUSFIN 1030 - INTRODUCTION TO FINANCE
- BUSMKT 1040 - INTRODUCTION TO MARKETING
- BUSHRM 1050 - HUMAN RESOURCES MANAGEMENT
- BUSQOM 1070 - OPERATIONS MANAGEMENT
- BUSSPP 1080 - STRATEGIC MANAGEMENT

Note:

All of the above listed courses must be completed with an average GPA of 2.00. All courses for the business major must be taken on a letter-grade basis.

Major

Interdisciplinary Studies, BA

The Interdisciplinary Studies major is an alternative to the traditional majors in the Dietrich School of Arts and Sciences. It provides a coherent course of study with the breadth and depth appropriate to a Dietrich School major, while offering a pathway to degree completion.

Interdisciplinary Studies Major

Regulations

1. Each Interdisciplinary Studies major should consist of at least 42 credits of work earned in courses from at least two Dietrich School departments. The major should aim for integrated and cumulative learning. To this end, each major must have the following characteristics:
 1. At least 21 credits must be earned from courses numbered 1000 or above;
 2. Courses must be arranged in at least two clusters or thematic groupings;
 3. Each cluster must contain a minimum of 15 credits;
 4. A writing (W) course approved by an assistant dean must be completed as part of the major.
2. Up to six credits of independent study, directed reading, directed research, undergraduate teaching, and internships may be counted toward the major.
3. A student wishing to pursue an Interdisciplinary Studies major must work with an assistant dean, who will serve as the student's academic advisor. The assistant dean's responsibilities include:
 1. Approving the student's Interdisciplinary Studies major proposal;
 2. Approving changes to the proposal;
 3. Providing academic advising to the student at least once per term.
4. The following additional requirements apply:
 1. Students are eligible to declare the Interdisciplinary Studies major after successful completion of 75 credits;
 2. A minimum 2.0 GPA must be maintained for all Interdisciplinary Studies coursework; Only grades of C- or above may be counted toward the major;
 3. Students may achieve honors in Interdisciplinary Studies by earning a minimum GPA of 3.5 in the courses for the major and a 3.5 cumulative GPA;

4. All regular Dietrich School degree requirements must be satisfied (e.g. minimum 120 credits, General Education Requirements, 2.0 overall GPA, at least half of the credits used to fulfill the major must be completed at the Pittsburgh campus).
5. Students may not double major when pursuing the Interdisciplinary Studies major.
6. Students wishing to earn a Bachelor of Science degree must complete 21 credits of upper-level science coursework (certified by the assistant dean) and MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS .

Procedures

1. A student wishing to declare an Interdisciplinary Studies major should meet with an assistant dean from the Office of the Associate Dean for Undergraduate Studies, 140 Thackeray Hall. Please call 412-624-6480 to make an appointment.
2. The student should draft a proposal to explain the proposed course of study. The proposal should include:
 1. Learning outcomes and a rationale for the course of study
 2. A list of courses used toward the major
 3. A discussion of the career options that may be pursued utilizing this combination of courses
3. The proposal must be approved by an assistant dean and submitted to the Associate Dean for Undergraduate Studies for final approval.

Interdisciplinary Studies, BS

The Interdisciplinary Studies major is an alternative to the traditional majors in the Dietrich School of Arts and Sciences. It provides a coherent course of study with the breadth and depth appropriate to a Dietrich School major, while offering a pathway to degree completion.

Interdisciplinary Studies Major

Regulations

1. Each Interdisciplinary Studies major should consist of at least 42 credits of work earned in courses from at least two Dietrich School departments. The major should aim for integrated and cumulative learning. To this end, each major must have the following characteristics:
 1. At least 21 credits must be earned from courses numbered 1000 or above;
 2. Courses must be arranged in at least two clusters or thematic groupings;
 3. Each cluster must contain a minimum of 15 credits;
 4. A writing (W) course approved by an assistant dean must be completed as part of the major.
2. Up to six credits of independent study, directed reading, directed research, undergraduate teaching, and internships may be counted toward the major.
3. A student wishing to pursue an Interdisciplinary Studies major must work with an assistant dean, who will serve as the student's academic advisor. The assistant dean's responsibilities include:
 1. Approving the student's Interdisciplinary Studies major proposal;
 2. Approving changes to the proposal;
 3. Providing academic advising to the student at least once per term.
4. The following additional requirements apply:
 1. Students are eligible to declare the Interdisciplinary Studies major after successful completion of 75 credits;
 2. A minimum 2.0 GPA must be maintained for all Interdisciplinary Studies coursework; Only grades of C- or above may be counted toward the major;
 3. Students may achieve honors in Interdisciplinary Studies by earning a minimum GPA of 3.5 in the courses for the major and a 3.5 cumulative GPA;
 4. All regular Dietrich School degree requirements must be satisfied (e.g. minimum 120 credits, General Education Requirements, 2.0 overall GPA, at least half of the credits used to fulfill the major must be completed at the Pittsburgh campus).
 5. Students may not double major when pursuing the Interdisciplinary Studies major.
 6. Students wishing to earn a Bachelor of Science degree must complete 21 credits of upper-level science coursework (certified by the assistant dean) and MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1 or STAT 1000 - APPLIED STATISTICAL METHODS .

Procedures

1. A student wishing to declare an Interdisciplinary Studies major should meet with an assistant dean from the Office of the Associate Dean for Undergraduate Studies, 140 Thackeray Hall. Please call 412-624-6480 to make an appointment.
2. The student should draft a proposal to explain the proposed course of study. The proposal should include:
 1. Learning outcomes and a rationale for the course of study
 2. A list of courses used toward the major
 3. A discussion of the career options that may be pursued utilizing this combination of courses
3. The proposal must be approved by an assistant dean and submitted to the Associate Dean for Undergraduate Studies for final approval.

International and Area Studies, BPHIL

The David C. Frederick Honors College and University Center for International Studies (UCIS) have created the Bachelor of Philosophy in International and Area Studies (BPhil IAS), a research-based undergraduate major that will help students meet the demands of today's world. The BPhil IAS degree is awarded jointly by the student's home school and the David C. Frederick Honors College and is the first undergraduate degree in international studies at Pitt.

The goal of the BPhil IAS degree is to enable students to think critically about their global world and to gain "global competence," which involves working effectively in different international settings, an awareness of the major currents of global change and the resulting issues raised, the capacity for effective communication across cultural and linguistic boundaries, and personal adaptability to diverse cultures.

Students seeking the BPhil IAS degree must have a minimum GPA of 3.50/4.00; complete an approved program of study involving coursework, second language, and study abroad; and write and publicly defend their research thesis before a faculty examining board that includes a visiting faculty member from outside the University. The BPhil IAS is not a freestanding major, as it requires the student to combine the BPhil IAS with a major in the student's home school of admission (A&S, CBA, Engineering, etc.); students must combine the BPhil IAS requirements with all curriculum requirements for a degree in their home school of admission.

Students seeking the BPhil in IAS must:

- have a minimum grade point average of 3.50/4.00; and
- complete eight approved courses (24 credits); and
- complete one methods course specific to their second major or to their BPhil thesis research topic; and
- complete one directed study course related to their BPhil thesis research topic; and
- complete three years of college-level language study or equivalent proficiency in a language relevant to their BPhil thesis research topic; and
- write and publicly defend their research thesis (the BPhil thesis) before a faculty examining board that includes a visiting faculty member from outside the University; and
- complete a second major in another academic discipline (note that only two courses from this major can overlap with the approved courses for the IAS major).

Students interested in the BPhil in IAS may complete one of the following tracks in UCIS: Asian Studies, European Union Studies, Global Studies, Latin American Studies, or Russian and East European Studies

International Studies, BA (Co-Major)

The International Studies co-major is available to all Dietrich School undergraduate students and is comprised of five choice categories: Introduction to the International; International State Actors, Globalization, and Critiques of Global Power; Non-State Actors and Transboundary Issues; Global Dialogues; and Practitioner Skills. Students who pursue the International Studies co-major will build knowledge and understanding of the following areas:

- cross-border differences, commonalities, actors, and agency
- state actors and sovereignty, power, and globalization
- non-state international actors, transboundary issues, and social movements
- how individual and collective voices express, connect with, and represent - or not - international issues
- tools, methods, and training in skills such as language training, policy/grant writing, data/data visualization

Students pursuing this co-major will be pursuing at least one additional, traditional major.

Introduction to the International

An initial introduction to cross-border differences, commonalities, actors, and agency. Choose one of the following courses; this list is a sample of available offerings.

- AFRCA 1021 - HISTORY OF THE AFRICAN DIASPORA
- AFRCA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION
- AFRCA 1704 - AFRICANA WORLD LITERATURE
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS
- FR 0090 - EURO CHIC: THE INVENTION OF FASHION
- FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT
- FR 0227 - THE FRENCH ATLANTIC
- GSWS 0510 - FEMINIST THEORY IN HISTORICAL PERSPECTIVE
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 1050 - WORLD ART: CONTACT AND CONFLICT
- HIST 0700 - WORLD HISTORY
- ITAL 0090 - EURO CHIC: THE INVENTION OF FASHION
- ITAL 1087 - FASCISM AND RESISTANCE
- PORT 1458 - CULTURES OF THE PORTUGUESE SPEAKING WORLD
- PS 0500 - INTERNATIONAL RELATIONS
- SLAV 0660 - SCI-FI: EAST AND WEST
- SPAN 0082 - LATIN AMERICA TODAY
- SPAN 1250 - HISPANIC CIVILIZATIONS

International State Actors, Globalization, and Critiques of Global Power

Exposure to the way that state actors and notions of sovereignty set certain expectations for power and realities of international action, and the way that globalization changes those notions and brings increased space for critique of them. Choose at least one of the following courses; this list is a sample of available offerings.

- AFRCA 0385 - CARIBBEAN HISTORY
- AFRCA 1030 - INTRODUCTION TO AFRICAN POLITICS
- AFRCA 1331 - AFRICAN LIBERATION MOVEMENTS
- ENGLIT 0618 - WAR
- FR 0070 - KINGS & QUEENS: FROM VIKINGS TO THE GUILLOTINE
- FR 0220 - LA FRANCE AUJOURD'HUI
- GER 1102 - GRÜEZE, SERVUS, HALLO: THE CONTEMPORARY GERMAN-SPEAKING WORLD
- GER 1104 - GERMANY UNDER THE SPELL OF AMERICA
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1204 - UNITY IN DIVERSITY: EU-IDENTITY AS FACT AND FICTION
- HAA 0105 - ART AND EMPIRE
- HAA 0520 - ART AND POLITICS IN MODERN LATIN AMERICA
- HIST 0187 - WORLD WAR II-EUROPE
- HIST 1046 - NATIONALISM
- HIST 1733 - RELIGIOUS DIVERSITY
- ITAL 0080 - RENAISSANCE ITALY: HUMANISM, POWER & THE ARTS
- ITAL 0081 - MADE IN ITALY:INGENUITY, SINGULARITY, STYLE
- ITAL 0113 - MODERN AND CONTEMPORARY CULTURE
- ITAL 0117 - ITALIES
- ITAL 1070 - LITERATURE AND POLITICS
- ITAL 1071 - THE ETERNAL CITY: ROME FROM ANTIQUITY TO TODAY
- ITAL 1079 - INTRO TO HOLOCAUST LITERATURE

- JS 1475 - RELIGIOUS DIVERSITY
- PS 1501 - THEORY OF INTERNATIONAL RELATIONS
- PS 1509 - CONFLICT AND WAR THEORY
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1537 - PEACEMAKING & PEACEKEEPING
- PS 1543 - GLOBALIZATION AND INTERNATIONAL POLITICS
- PS 1614 - THEORIES OF JUSTICE
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1475 - RELIGIOUS DIVERSITY
- SLAV 1225 - BEHIND BARS: CROSS CULTURAL REPRESENTATIONS OF PRISON IN THE 20TH CENTURY
- SOC 0317 - GLOBALIZATION
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH
- SOC 1415 - RELIGIOUS DIVERSITY
- SPAN 1427 - TRANSATLANTIC HISPANIC LITERATURE AND CULTURE
- SPAN 1441 - READING COLONIAL LATIN AMERICA
- SPAN 1455 - BORDER STUDIES
- SPAN 1470 - THE INCAS: ANDEAN INDIGENOUS PEOPLES AND SPANISH COLONIAL RULE

Non-State Actors and Transboundary Issues

Exposure to groups of non-state international actors, ranging from social movements to influencers, documentarians to authors, nonprofits to international organizations, and any other pathways of international power, including transboundary issues such as crime, pollution, refugees, and economic actions. Choose at least one of the following courses; this list is a sample of available offerings.

- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- ARC 1330 - GLOBAL PRESERVATION
- AFRCNA 0628 - AFRO-LATIN AMERICA
- AFRCNA 1012 - EARLY 20TH CENTURY BLACK SOCIAL MOVEMENT
- AFRCNA 1250 - BLACK EUROPE
- AFRCNA 1330 - SCIENCE AND TECHNOLOGY IN AFRICANA CONTEXT
- AFRCNA 1510 - HEALTH IN THE AFRICAN DIASPORA
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
- ENGFLM 0540 - WORLD FILM HISTORY
- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
- FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA
- FR 0016 - HISTORY OF FRENCH CINEMA
- FR 0017 - PARIS: URBANISM PAST AND PRESENT
- FR 0090 - EURO CHIC: THE INVENTION OF FASHION
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 1025 - THE IDEA OF FRANCE
- FR 1036 - GREEN FRANCE: SITUATED ECOLOGIES
- FR 1052 - SPECIAL TOPICS IN FRENCH CIVILIZATION
- FR 1053 - GLOBAL FRENCH
- FR 1059 - 20TH CENTURY FRENCH CIVILIZATION: SPECIAL TOPIC
- FR 1065 - GENDER, SEXUALITY, AND FRENCH THOUGHT
- FR 1070 - GENDER AND SEXUALITY IN 21ST CENTURY FRANCE
- FR 1090 - INTRODUCTION TO TRANSLATION STUDIES

- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM
- GER 1108 - GREEN GERMANY
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940

Global Dialogues

Understand the way that individual and collective voices express and connect with international studies issues, how can be manifested in a variety of ways, and ensure that future participants in the international domain learn early on that listening to voices from all spaces should inform their understandings of policy, life, and/or reality.

This area is one of two areas within the co-major where language training fills the requirement. Language courses beyond the first year of language sequence (e.g. third and fourth semester courses and higher) are places where students are connecting their language learning with the cultural frameworks in which those languages are practiced and dispersed. Students can also utilize Study Abroad, as a central way to understand global voices is to hear them directly by living among them, to meet this requirement.

Choose at least one of the following courses; this list is a sample of available offerings.

- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY

Practitioner Skills

The students should have some efficacy in learning the tools that participants in international affairs need to have, from writing to language to data skills. These can include policy-writing course, a grant writing course, a writing for the public course, a broader public policy process style course, but also linguistic training and familiarity with data and data visualization.

This area is the second of two areas within the co-major where language training fills the requirement. Language courses beyond the first year of language sequence (e.g. third and fourth semester courses and higher) are places where students are honing advanced ability in a language as an essential practitioner skill for international work. Language courses that are either at or beyond the "Intermediate High" level on the ACTFL scale may count towards the Practitioner Skills level.

Choose at least one of the following courses; this list is a sample of available offerings.

Total Credits: 21

Law, Criminal Justice, and Society, BA

Law, Criminal Justice, and Society

Are you considering law school or graduate study in the social sciences after Pitt? Are you interested in pursuing a career in one of the many criminal justice professions or advocacy organizations? The Law, Criminal Justice, and Society (LCJS) major examines the workings of the criminal justice system in the broader context of society and the legal system. A core curriculum fosters comprehension and critical analysis of the legal system, criminological theory, criminal justice institutions, criminal law, and social inequality. Students also will complete six credits of professional skills and a capstone course on ethics in criminal justice. The LCJS major equips students with the knowledge and skills they need to pursue advanced degrees in law and social science, and to succeed as professionals and advocates in the justice-oriented professions and organizations that serve American society's diverse and dynamic communities. This major is offered jointly between the Dietrich School and the College of General Studies.

Students completing this major will:

- examine the major institutions of the criminal justice system, and situate the workings of these institutions in a broader legal, social, and historical context;
- develop knowledge and legal reasoning skills in criminal law;
- examine the law's conflicting role in securing social order and security, on the one hand, and in creating and reinforcing social inequality on the other; and,
- develop basic professional knowledge and demonstrate ethical reasoning in preparation for being positive and successful contributors to law and justice-oriented career fields as professionals and/or public policy advocates.

This major requires 36 credits for completion, which are distributed as follows.

- Foundations - 6credits
- Core areas - 15 credits
- Electives - 6credits
- Professional skills - 6credits
- Capstone - 3credits

Except as noted, all courses are 3-credit courses.

Foundations

Both of the following courses are required.

- LCJS 0100 - INTRODUCTION TO LAW, CRIMINAL JUSTICE, & SOCIETY Formerly ADMJ 0100
- LCJS 0200 - RACE, CLASS, GENDER, & THE LAW Formerly LEGLST 0200

Core

Select courses according to the guidelines stated. Course selections must comprise a total of at least 15 credits.

Theories of Crime

Choose one of the following courses.

- LCJS 1100 - CRIMINOLOGY Formerly ADMJ 0600
- LCJS 1110 - CRIMINOLOGICAL THEORY Formerly ADMJ 1265

Criminal Law

Select one of the following courses.

- LCJS 1200 - CRIMINAL LAW Formerly ADMJ 1400 (cross-listed with LEGLST 1140)
- LCJS 1210 - CRIMINAL PROCEDURE Formerly ADMJ 1410 (cross-listed with LEGLST 1141)

Power, Inequality, and Social Change

Select two of the following courses.

- LCJS 1300 - LAW AND POLITICS Formerly LEGLST 1210 (cross-listed with PS 1213)
- LCJS 1310 - LAW AND DEVIANCE Formerly ADMJ 1220
- *Or* SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- LCJS 1320 - CIVIL RIGHTS LAW Formerly LEGLST 1340
- *Or* PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- LCJS 1330 - EMERGING ISSUES IN LEGAL AND SOCIAL POLICY Formerly LEGLST 1355
- LCJS 1340 - LAW AND SOCIAL CHANGE Formerly LEGLST 1155

- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE Formerly ADMJ 1242
- LCJS 1590 - SPECIAL TOPICS IN LAW AND CRIMINAL JUSTICE Formerly ADMJ 1450
- AFRCNA 1522 - SEX AND RACISM
- AFRCNA 1535 - DIMENSIONS OF RACISM
- AFRCNA 1537 - RACE AND THE CRIMINAL JUSTICE SYSTEM
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 1632 - THE HISTORY OF THE CIVIL RIGHTS MOVEMENT
- SOC 0432 - WEALTH AND POWER
- SOC 0434 - POLITICAL SOCIOLOGY
- URBNST 0112 - SOCIAL JUSTICE AND THE CITY

Criminal Justice Institutions

Select one of the following courses.

- LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE Formerly ADMJ 0500
- LCJS 1430 - THE JUVENILE JUSTICE PROCESS Formerly ADMJ 1225
- LCJS 1410 - LAW ENFORCEMENT AND POLICING Formerly ADMJ 1200
- LCJS 1420 - CORRECTIONS Formerly ADMJ 1300
- LCJS 1440 - CRIMINAL INVESTIGATION Formerly ADMJ 1100
- URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION

Elective courses

Select two courses from list A or one course from each list A and list B. Please keep in mind that course selections must comprise a total of at least 6 credits.

List A

- LCJS 1500 - CRIMINALISTICS Formerly ADMJ 1115
- LCJS 1501 - CRIMINALISTICS LAB Formerly ADMJ 1118
- LCJS 1510 - PSYCHOLOGY AND LAW Formerly LEGLST 1230
- LCJS 1520 - CYBERCRIME Formerly ADMJ 1234
- LCJS 1521 - CYBER SECURITY, LAW, AND MONEY LAUNDERING Formerly ADMJ 1238
- LCJS 1530 - ORGANIZED CRIME Formerly ADMJ 1235
- LCJS 1531 - INTERNATIONAL ORGANIZED CRIME Formerly ADMJ 1236
- LCJS 1540 - WHITE COLLAR CRIME Formerly ADMJ 1230
- LCJS 1560 - PROBATION AND PAROLE Formerly ADMJ 1350
- LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY Formerly ADMJ 1425 (cross-listed with PUBSRV 1425)
- LCJS 1571 - TERRORISM Formerly ADMJ 1245
- LCJS 1572 - INTRODUCTION POLICE MANAGEMENT Formerly ADMJ 1205
- LCJS 1580 - THE LEGAL SYSTEM Formerly LEGLST 0080
- LCJS 1581 - INTERNATIONAL LAW Formerly LEGLST 1327
- LCJS 1582 - PUBLIC LAW AND MORAL REASONING Formerly LEGLST 0020
- LCJS 1583 - SEX, LAW AND MARRIAGE Formerly LEGLST 1315
- LCJS 1584 - LEGAL ISSUES IN PUBLIC SERVICE Formerly LEGLST 1152
- LCJS 1586 - CONSUMER LAW Formerly LEGLST 1325
- LCJS 1599 - INDEPENDENT STUDY Formerly ADMJ 1901 and LEGLST 1901
- ADMJ 1210 - JUVENILE DELINQUENCY
- ADMJ 1495 COMPARATIVE JUSTICE STUDY ABROAD (UPitt Bradford)
- Any LCJS course not used to fulfill any other major requirement.

- Any Pitt Prison Education Project (PPEP) course; offerings will vary.

List B

- GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
- ENGLIT 0365 - IMAGINING SOCIAL JUSTICE
- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0663 - 20THC AFRICAN AMERICAN WOMEN'S HISTORY
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 1062 - HUMAN RIGHTS IN WORLD HISTORY
- HIST 1640 - AMERICA CHILDHOODS: RACE, GENDER, AND CITIZENSHIP, 1865-PRESENT

- PUBSRV 1305 - HEALTH, LAW AND ETHICS
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA
- SLAV 1225 - BEHIND BARS: CROSS CULTURAL REPRESENTATIONS OF PRISON IN THE 20TH CENTURY
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- Any non-LCJS course not used to fulfill any other major requirement.

Professional Skills

Select at least one course from each category. Course selections must comprise a total of at least 6 credits.

Research or Practical Skills

- ENGCOMP 0450 - RESEARCH WRITING
- LCJS 1610 - Data Analysis in Criminal Justice
- LCJS 1620 - INTRODUCTION TO LEGAL RESEARCH Formerly LEGLST 1410
- LCJS 1900 - PRESERVICE INTERNSHIP Formerly ADMJ 1900
- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE
- PSY 0036 - RESEARCH METHODS LECTURE
- SOC 0230 - SOCIAL RESEARCH METHODS
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS

Professional or Public-Oriented Writing

- ENGCOMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
- ENGCOMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 0521 - WRITING WITH DATA
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 0641 - WRITING FOR CHANGE
- ENGCOMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
- ENGCOMP 1400 - GRANT WRITING FOR NONPROFITS
- LCJS 1630 - WRITING IN THE CRIMINAL JUSTICE PROFESSIONS

Capstone

- LCJS 1700 - ETHICS IN CRIMINAL JUSTICE (CAPSTONE)

Writing course

Students must complete at least one W-course in the major. LCJS 1700 - ETHICS IN CRIMINAL JUSTICE (CAPSTONE) will fulfill this requirement.

Additional information

Grade Requirements

A minimum GPA of 2.0 in courses for the LCJS major is required for graduation.

Satisfactory/No Credit option

Students may apply up to six credits of coursework taken on an S/NC basis to the LCJS major. Student may apply up to nine credits if three of those credits are earned as part of a Study Abroad course that applies toward the major.

Transfer credits for Police Academy Certification

Students may receive up to 15 transfer credits for completion of Pennsylvania Municipal Police Academy Act 120 or state police cadet training. Certification course work is equivalent to the Core Area requirements for Criminal Law (3 credits) and Criminal Justice Institutions (3 credits); two major electives (6 credits); and LCJS 1600 Pre-Service internship, which fulfills the Research/Practical Skills Course (3 credits) requirement in the Professional Skills area.

Department of Africana Studies

Africana studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site at www.africanastudies.pitt.edu.

Certificate

Afro-Latin American and Afro-Latinx Studies Certificate

The academic requirements of the new program at the undergraduate level have three components: content courses, language study, and a digital project outcomes report. To initiate the certificate, students must complete a certificate registration form from the Department of Africana Studies. Elective courses must include at least 25% content on Afro-Latin America and/or US Afro-Latinxs to be eligible.

Afro-Latin American Studies and Afro-Latinx Studies Content Courses:

Five (15 credits) Afro-Latin American Studies and/or Afro-Latinx Studies Content Courses are required. The two core courses are:

1. AFRCA 0385 - CARIBBEAN HISTORY
2. AFRCA 1628 - AFRO-LATINOS IN THE UNITED STATES

The remaining three courses may be from Africana Studies or cross-listed with Africana Studies. No more than one non-Africana/cross-listed class may be included in the certificate. All certificate courses must have at least 25% Afro-Latin American and/or US Afro-Latinx content. A written request for the inclusion of a non-Africana course must include a rationale and plan to focus research/course activities on Afro-Latin America and/or US Afro-Latinx studies. Students must earn a C or better in classes counting towards the certificate. One relevant study abroad or study away (1-4 weeks), independent research course, or internship (summer or semester-long) may also count towards the certificate.

Core Courses

These courses are required for the certificate.

- AFRCA 0385 - CARIBBEAN HISTORY OR
- AFRCA 0628 - AFRO-LATIN AMERICA
- AFRCA 1628 - AFRO-LATINOS IN THE UNITED STATES
- Any upper-level AFRCA Course

Afro-American Introductory Courses

Students select two electives to complete the certificate. The course may be offered by the Department of Africana Studies, may be a course that is cross-listed to an AFRCA course, or may be chosen from the list of eligible electives offered by other departments.

Courses offered by other departments will focus on Afro-Latin American and/or Afro-Latinx Studies, making it distinct from existing program offered by Africana Studies.

Students must earn a C or better for classes counting toward the certificate. One relevant study abroad or study away, independent research, or internship may count toward the certificate.

- AFRCA 0385 - CARIBBEAN HISTORY
- AFRCA 0628 - AFRO-LATIN AMERICA
- AFRCA 1004 - AFRICANA WORLD LITERATURE
- AFRCA 1021 - HISTORY OF THE AFRICAN DIASPORA
- AFRCA 1026 - AFRICAN PRESENCE IN LATIN AMERICAN LIT/CULTURE
- AFRCA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRCA 1049 - CONTEMPORARY CARIBBEAN LITERATURE
- AFRCA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
- AFRCA 1425 - CARIBBEAN IDENTITIES
- AFRCA 1510 - HEALTH IN THE AFRICAN DIASPORA
- AFRCA 1628 - AFRO-LATINOS IN THE UNITED STATES
- AFRCA 1728 - TRANSNATIONAL ISSUES IN AFRO-LATIN AMERICAN & AFRO-LATINX STUDIES
- AFRCA 1900 - INTERNSHIP
- AFRCA 1901 - INDEPENDENT STUDY
- ANTH 1719 - ANTHROPOLOGY OF RACE AND SCIENCE
- ANTH 1728 - GENDER AND GLOBALIZATION
- ENGLIT 0573 - LITERATURE OF THE AMERICAS

- SPAN 1426 - LITERATURE OF THE SOUTHERN CONE COUNTRIES
- SPAN 1464 - NICHOLAS GUILLEN: RACE, WRITING, AND REVOLUTION

Total Credits: 15

Joint Major

Africana Studies - English, BA

The joint major offers an especially coherent experience in interdisciplinary learning by bringing together Africana Studies and English in two interrelated ways. Students get a rich and rigorous exposure to African and African Diaspora literature written in English through literature produced in the United States, Africa, Canada, Great Britain, and the Caribbean. Additionally, students examine some of the significant relationships between African and African Diaspora works and a range of English-language literary traditions.

The major is designed to expose students to important questions and traditions in literary interpretation and to offer them political, social, and cultural contexts for the literature they will be reading. Like most liberal arts majors, it helps students learn to think analytically and to make and assess arguments, skills that are important in many jobs and courses of graduate study. The major is also useful for prospective teachers who would be interested in developing and teaching curricula that include African Diaspora literature within other English-language traditions. Students who complete the joint major will have fulfilled most of the School of Education's undergraduate requirements for secondary education certification in English.

The Africana Studies-English joint major requires 45 credits distributed as follows: four core courses, four literature courses from the Department of Africana Studies, three literature courses from the Department of English, and four electives, one of which must be a history course in the Department of Africana Studies. No more than two upper-division courses can count toward the major before a student has completed the introductory courses, and three of the required courses in each department excluding the core courses must be taken before a student enrolls in the senior seminar.

Joint Major Requirements

Core courses

All of the following courses.

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- ENGLIT 0500 - INTRODUCTION TO CRITICAL READING
- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1910 - SENIOR SEMINAR

Africana Studies courses

Choose four of the following courses.

- AFRONA 0150 - AFRICAN AMERICAN LITERATURE
- AFRONA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRONA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRONA 1306 - WORLD LITERATURE IN ENGLISH
- AFRONA 1349 - CONTEMPORARY CARIBBEAN LITERATURE
- AFRONA 1704 - AFRICANA WORLD LITERATURE

English Literature courses

Choose three of the following courses.

- ENGLIT 1125 - MASTERPIECES OF RENAISSANCE LITERATURE
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1175 - 19TH CENTURY BRITISH LITERATURE
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1220 - CIVIL WAR TO WORLD WAR 1 IN AMERICAN LITERATURE
- ENGLIT 1325 - MODERNISM
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH

Elective courses

Students must choose four elective courses from offerings in the departments of Africana Studies and English. One of these electives must be a history course offered by the Department of Africana Studies. Students might also use electives to pursue more extensive work in particular areas of study, such as African, African-American, British, Caribbean, or U.S. literature.

In light of the interdisciplinary and international character of the joint major, it would be appropriate for students to petition to have a closely related course taught in a foreign language (for example, a course on Francophone-Caribbean literature in the Department of French and Italian Languages and Literatures) count as one of the electives toward the joint major.

Students interested in careers in education should pay particular attention to courses required by various School of Education certification programs.

Major

Africana Studies, BA

Africana Studies is the study, research, interpretation, and dissemination of knowledge concerning African American, African, and Caribbean affairs and culture. Using the tools of the social sciences and humanities, Africana Studies examines the structure, organization, problems, and perspectives of Blacks in Africa and the African Diaspora. Africana Studies also stresses analytical interpretations and policy prescriptions for social change in African American communities and in various African and Caribbean nations. The term Africana incorporates the three-tier interdisciplinary thrust of the department: African, African American, and Caribbean social sciences and humanities.

Africana Studies prepares social science majors for advanced graduate studies in international affairs, education, social work, social policy studies, and legal and professional training. In the humanities, preparation in the creative arts and literature gears students to practical development in such fields as communication, teaching, theater, and dance. Africana Studies occupies a central role in understanding modern American life and African and Caribbean linkages. As an interdisciplinary major, Africana Studies offers intellectual paradigms for the multicultural approach to historical, political, and economic reality. It is also critical and corrective of the inadequacies, omissions, and distortions of mainstream American education leading into the 21st century. Africana Studies is committed to producing liberally educated women and men with a lifetime dedication to working on African American, African, and Caribbean affairs. For more information on the major and the Department of Africana Studies, see the department's Web site.

Students are urged to meet with the departmental advisor no later than the beginning of the junior year to confirm a plan of study. The Africana studies major requires a total of 30 credits to complete.

Required courses

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0787 - BLACK CONSCIOUSNESS
- AFRCNA 1768 - AFRICANA SENIOR RESEARCH SEMINAR

Elective courses

Students will complete the remaining 18 credits for the major with elective courses, described as follows.

- A minimum of three courses (nine credits) will be taken in upper-level courses.
- Courses cross-listed with the Department of Africana Studies can be used as electives for the major.
- Courses from outside of the Department of Africana Studies that are not cross-listed will have to be approved by the Director of Undergraduate Studies before they can be used as electives for the major.

Lower-level electives

- AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
- AFRCNA 0150 - AFRICAN AMERICAN LITERATURE
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0311 - INTRODUCTION TO THE AFRICAN AMERICAN FAMILY
- AFRCNA 0313 - THE BLACK CHURCH
- AFRCNA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0352 - AFRICAN AMERICAN DANCE
- AFRCNA 0385 - CARIBBEAN HISTORY
- AFRCNA 0400 - COVID-19, RACISM AND PUBLIC HEALTH
- AFRCNA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE
- AFRCNA 0454 - MAN/WOMAN LITERATURE
- AFRCNA 0508 - SWAHILI LANGUAGE AND CULTURE IMMERSION
- AFRCNA 0517 - INTRODUCTION TO AFRICAN AMERICAN POETRY
- AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0628 - AFRO-LATIN AMERICA
- AFRCNA 0629 - AFRICAN AMERICAN HISTORY 1877
- AFRCNA 0630 - AFRICAN AMERICAN HISTORY SINCE 1865
- AFRCNA 0639 - HISTORY OF JAZZ
- AFRCNA 0805 - BLACK PERFORMANCE AESTHETICS

Upper-level electives

- AFRCNA 1012 - EARLY 20TH CENTURY BLACK SOCIAL MOVEMENT
- AFRCNA 1021 - HISTORY OF THE AFRICAN DIASPORA

- AFRONA 1024 - WEST AFRICAN CULTURES AND SOCIETY
- AFRONA 1026 - AFRICAN PRESENCE IN LATIN AMERICAN LIT/CULTURE
- AFRONA 1030 - INTRODUCTION TO AFRICAN POLITICS
- AFRONA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRONA 1083 - SPECIAL TOPICS: BLACK LIFE ONSCREEN - AFRICAN AMERICAN CINEMA
- AFRONA 1108 - AFRICAN AMERICAN FOLK CULTURE
- AFRONA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION
- AFRONA 1240 - AFRICAN LITERATURE AND SOCIETY
- AFRONA 1245 - STUDIO IN AFRICAN AMERICAN POETRY AND POETICS
- AFRONA 1250 - BLACK EUROPE
- AFRONA 1306 - WORLD LITERATURE IN ENGLISH
- AFRONA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
- AFRONA 1310 - CULTURES OF AFRICA
- AFRONA 1330 - SCIENCE AND TECHNOLOGY IN AFRICANA CONTEXT
- AFRONA 1331 - AFRICAN LIBERATION MOVEMENTS
- AFRONA 1334 - MUSIC IN AFRICA
- AFRONA 1335 - AFRICAN-AMERICAN MUSIC IN THE UNITED STATES
- AFRONA 1347 - FRANCOPHONE AFRICANA LITERATURE
- AFRONA 1349 - CONTEMPORARY CARIBBEAN LITERATURE
- AFRONA 1353 - COMPARATIVE DANCE EXPRESSION
- AFRONA 1397 - MUSIC AND RACE
- AFRONA 1402 - LEARNING PARADIGMS AFRICAN AMERICAN CHILD DEVELOPMENT
- AFRONA 1415 - RELIGION AND RACE
- AFRONA 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA
- AFRONA 1420 - POWER AND PERFORMANCE IN AFRICA: FROM HIP-LIFE TO SOUKOUSS
- AFRONA 1425 - CARIBBEAN IDENTITIES
- AFRONA 1450 - AFRICANA CULTURAL MEMORY
- AFRONA 1510 - HEALTH IN THE AFRICAN DIASPORA
- AFRONA 1522 - SEX AND RACISM
- AFRONA 1535 - DIMENSIONS OF RACISM
- AFRONA 1537 - RACE AND THE CRIMINAL JUSTICE SYSTEM
- AFRONA 1538 - HISTORY OF BLACK PITTSBURGH
- AFRONA 1555 - AFRO CARIBBEAN DANCE
- AFRONA 1616 - AFRICAN AMERICAN WOMEN WRITERS
- AFRONA 1628 - AFRO-LATINOS IN THE UNITED STATES
- AFRONA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS
- AFRONA 1656 - HISTORY OF AFRICA SINCE 1800
- AFRONA 1661 - POLITICAL ECONOMY OF AFRICA
- AFRONA 1704 - AFRICANA WORLD LITERATURE
- AFRONA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- AFRONA 1720 - WEST AFRICA IN THE ERA OF THE SLAVE TRADE
- AFRONA 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- AFRONA 1760 - AFRICANA THEORY & METHODOLOGY
- AFRONA 1900 - INTERNSHIP
- AFRONA 1901 - INDEPENDENT STUDY
- AFRONA 1902 - DIRECTED READING
- AFRONA 1903 - DIRECTED RESEARCH
- AFRONA 1904 - REBELS AND REVOLUTION

Cross-listed electives

- ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- ANTH 1778 - CULTURES OF AFRICA
- ANTH 1789 - AFRICAN AMERICAN FOLK CULTURE
- COMMRC 1115 - AFRICAN AMERICAN RHETORIC
- HIST 0502 - AFRO-LATIN AMERICA
- HIST 0521 - CARIBBEAN HISTORY
- HIST 0663 - 20THC AFRICAN AMERICAN WOMEN'S HISTORY
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865
- HIST 0795 - HISTORY OF AFRICA BEFORE 1800
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- HIST 1720 - WEST AFRICA IN THE ERA OF THE SLAVE TRADE
- HIST 1796 - HISTORY OF AFRICA SINCE 1800
- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.
- MUSIC 1340 - MUSIC IN AFRICA
- MUSIC 1397 - MUSIC AND RACE
- PS 1352 - INTRODUCTION TO AFRICAN POLITICS
- RELGST 1415 - RACE AND RELIGION IN AMERICA
- RELGST 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA
- SPAN 1707 - AFRICAN PRESENT LAT AMERN LIT/CULT

Additional information

Capstone

AFRCNA 1768 - AFRICANA SENIOR RESEARCH SEMINAR must be taken during the student's last academic year as an undergraduate.

Writing course

Africana Studies majors must complete AFRCNA 1768 - AFRICANA SENIOR RESEARCH SEMINAR.

Honors

In order to qualify for honors in the Africana Studies major, a student will have to achieve a 3.25 overall GPA and a 3.75 department GPA. The student seeking Honors will also be required to submit a faculty supervised research paper, portfolio, or report mentored by a department faculty member and approved by a committee of three faculty members, including the mentor.

Grades

A 2.0 grade point average in all Africana Studies courses is required for graduation.

Satisfactory/No Credit option

The department does not permit courses for the major to be taken on an S/NC basis.

Minor

Africana Studies Minor

The Africana Studies minor requires 15 credits. Students select one of the two tracks.

- African Culture and Society
- African-American and African Diaspora Culture and Society

Each track required the core course, two lower-level courses, and two upper-level courses in Africana Studies.

Students may choose their electives for the minor from the following list of courses in Africana Studies. Any courses cross-listed with the Department of Africana Studies can be used as electives for the minor. Any courses from outside of the Department of Africana Studies that are not cross-listed must be approved by the Director of Undergraduate Studies before they can be used as electives for the minor.

Core course

The following course is required for all tracks in the Africana Studies minor. After completing the core course, students pursuing the minor should select two lower-level courses and two upper-level courses described in their chosen track.

- AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES

African Culture and Society track

Lower-level electives

Select two of the following lower-level courses.

- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 0212 - WEST AFRICAN DANCE
- AFRCNA 0242 - AFRICANA URBAN WOMAN
- AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800
- AFRCNA 0508 - SWAHILI LANGUAGE AND CULTURE IMMERSION
- AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE
- AFRCNA 0524 - SWAHILI 2
- AFRCNA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY
- AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS
- AFRCNA 0787 - BLACK CONSCIOUSNESS
- AFRCNA 0805 - BLACK PERFORMANCE AESTHETICS

Upper-level electives

Select two of the following upper-level courses.

- AFRCNA 1021 - HISTORY OF THE AFRICAN DIASPORA
- AFRCNA 1024 - WEST AFRICAN CULTURES AND SOCIETY
- AFRCNA 1030 - INTRODUCTION TO AFRICAN POLITICS
- AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRCNA 1083 - SPECIAL TOPICS: BLACK LIFE ONSCREEN - AFRICAN AMERICAN CINEMA
- AFRCNA 1108 - AFRICAN AMERICAN FOLK CULTURE
- AFRCNA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION
- AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY

- AFRONA 1306 - WORLD LITERATURE IN ENGLISH
- AFRONA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
- AFRONA 1310 - CULTURES OF AFRICA
- AFRONA 1331 - AFRICAN LIBERATION MOVEMENTS
- AFRONA 1334 - MUSIC IN AFRICA
- AFRONA 1347 - FRANCOPHONE AFRICANA LITERATURE
- AFRONA 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA
- AFRONA 1420 - POWER AND PERFORMANCE IN AFRICA: FROM HIP-LIFE TO SOUKOUSS
- AFRONA 1510 - HEALTH IN THE AFRICAN DIASPORA
- AFRONA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS
- AFRONA 1656 - HISTORY OF AFRICA SINCE 1800
- AFRONA 1661 - POLITICAL ECONOMY OF AFRICA
- AFRONA 1704 - AFRICANA WORLD LITERATURE
- AFRONA 1720 - WEST AFRICA IN THE ERA OF THE SLAVE TRADE
- AFRONA 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- AFRONA 1900 - INTERNSHIP
- AFRONA 1901 - INDEPENDENT STUDY
- AFRONA 1902 - DIRECTED READING
- AFRONA 1903 - DIRECTED RESEARCH
- AFRONA 1904 - REBELS AND REVOLUTION

Cross-listed electives

Lower-level course

- HIST 0795 - HISTORY OF AFRICA BEFORE 1800

Upper-level courses

- ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- ANTH 1778 - CULTURES OF AFRICA
- ANTH 1789 - AFRICAN AMERICAN FOLK CULTURE
- HIST 1720 - WEST AFRICA IN THE ERA OF THE SLAVE TRADE
- HIST 1796 - HISTORY OF AFRICA SINCE 1800
- MUSIC 1340 - MUSIC IN AFRICA
- PS 1352 - INTRODUCTION TO AFRICAN POLITICS

African-American and African Diaspora Culture and Society track

Lower-level electives

Select two of the following lower-level courses.

- AFRONA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
- AFRONA 0150 - AFRICAN AMERICAN LITERATURE
- AFRONA 0212 - WEST AFRICAN DANCE
- AFRONA 0242 - AFRICANA URBAN WOMAN
- AFRONA 0311 - INTRODUCTION TO THE AFRICAN AMERICAN FAMILY
- AFRONA 0313 - THE BLACK CHURCH
- AFRONA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER
- AFRONA 0352 - AFRICAN AMERICAN DANCE
- AFRONA 0385 - CARIBBEAN HISTORY
- AFRONA 0400 - COVID-19, RACISM AND PUBLIC HEALTH

- AFRONA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE
- AFRONA 0454 - MAN/WOMAN LITERATURE
- AFRONA 0517 - INTRODUCTION TO AFRICAN AMERICAN POETRY
- AFRONA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY
- AFRONA 0628 - AFRO-LATIN AMERICA
- AFRONA 0629 - AFRICAN AMERICAN HISTORY 1877
- AFRONA 0630 - AFRICAN AMERICAN HISTORY SINCE 1865
- AFRONA 0639 - HISTORY OF JAZZ
- AFRONA 0787 - BLACK CONSCIOUSNESS
- AFRONA 0805 - BLACK PERFORMANCE AESTHETICS

Upper-level electives

Select two of the following upper-level courses.

- AFRONA 1012 - EARLY 20TH CENTURY BLACK SOCIAL MOVEMENT
- AFRONA 1021 - HISTORY OF THE AFRICAN DIASPORA
- AFRONA 1026 - AFRICAN PRESENCE IN LATIN AMERICAN LIT/CULTURE
- AFRONA 1039 - HISTORY OF CARIBBEAN SLAVERY
- AFRONA 1083 - SPECIAL TOPICS: BLACK LIFE ONSCREEN - AFRICAN AMERICAN CINEMA
- AFRONA 1108 - AFRICAN AMERICAN FOLK CULTURE
- AFRONA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION
- AFRONA 1245 - STUDIO IN AFRICAN AMERICAN POETRY AND POETICS
- AFRONA 1250 - BLACK EUROPE
- AFRONA 1306 - WORLD LITERATURE IN ENGLISH
- AFRONA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
- AFRONA 1330 - SCIENCE AND TECHNOLOGY IN AFRICANA CONTEXT
- AFRONA 1335 - AFRICAN-AMERICAN MUSIC IN THE UNITED STATES
- AFRONA 1347 - FRANCOPHONE AFRICANA LITERATURE
- AFRONA 1349 - CONTEMPORARY CARIBBEAN LITERATURE

Department of Anthropology

Anthropology is concerned with how humans and human societies evolve, with the differences and similarities among human cultures, and with the cultural and biological basis for human behavior. Anthropology integrates a wide range of perspectives on human behavior, culture, and society. Students become familiar with the basic concerns of four subgroups of anthropology:

- Archaeology offers courses covering many geographic regions (Latin America, North America, and China), techniques of analysis, and issues in prehistory. Museum collections, internships in cultural resource management, and a summer field school provide opportunities for student involvement in archaeological work.
- Physical anthropology offers classes on evolutionary theory; human genetics; osteoarchaeology; and human and nonhuman primate evolution, anatomy, morphology, and behavior.
- Cultural anthropology offers a wide variety of courses on cultural areas including the Pacific, Latin America, China, Japan, South Asia, Eastern Europe, and the United States. Classes provide cross-cultural studies of topics such as medical anthropology, food, social and political organization, gender roles, kinship, ethnicity and nationalism, folklore, religion, and conflict and violence.
- Anthropological linguistics offers courses on the nature of languages around the world, focusing on the relationship of language to other aspects of culture and society. Among the courses offered are Gypsy Language and Culture and Writing Systems of Ancient Mesoamerica.

For more information on the major and the Department of Anthropology, visit www.anthropology.pitt.edu.

Major

Anthropology, BA

Anthropology is concerned with how humans and human societies evolve culturally and biologically. Anthropology explores the differences and similarities among human cultures and the biocultural processes that influence human biological diversity. It integrates a wide range of perspectives on human behavior, culture, and society. Students will become familiar with the basic concerns of four sub-fields of anthropology: archaeology, biological anthropology, cultural anthropology, and anthropological linguistics.

The anthropology program offers archaeology courses covering many geographic regions (Latin America, Africa, Europe, North America, among others), techniques of analysis, and issues in prehistory.

Course offerings in biological anthropology focus on evolutionary theory, human biological diversity and adaptability, bioarchaeology, forensic anthropology, paleopathology, and human and nonhuman primate evolution.

Cultural anthropology is represented by a wide variety of courses on culture areas including the Pacific, Caribbean, Latin America, China, Japan, South Asia, Eastern Europe and the United States. Classes provide cross-cultural studies of topics such as medical anthropology, social and political organization, power and resistance, gender, food, folklore, religion, and multispecies relationships.

Linguistic anthropology courses examine language and other sign systems (semiotics) in context, focusing on the complex relationship between language, society, and culture. Courses include issues surrounding language and power, resistance, decolonization, identity, media and society, and migration. Topics also include poetics and storytelling and semiotic anthropology.

Opportunities for student field work and research are provided through museum collections, participation in independent studies with faculty and graduate students, internships with local organizations, and summer field school experiences.

Required courses for Anthropology major

The anthropology major requires the completion of 33 credits distributed as follows. Students must complete two of the three primary introductory courses in Anthropology (ANTH 0582, ANTH 0680, and ANTH 0780) with a grade of C or better prior to declaring this major.

Core courses

- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0680 - INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY

History of Anthropology course

- ANTH 1552 - A HISTORY OF ANTHROPOLOGICAL THOUGHT

One Writing Course in Anthropology

See Anthropology Undergraduate Canvas Page for full listing of Writing courses. Examples include:

- ANTH 1447 - LANGUAGE, CULTURE, AND SOCIETY
- ANTH 1530 - ORIGINS OF CITIES
- ANTH 1560 - POLITICS IN PREHISTORY
- ANTH 1747 - WRITING CULTURE
- ANTH 1750 - UNDERGRADUATE SEMINAR
- ANTH 1763 - FIELD METHODS

One Methods course; these are offered in each sub-discipline

See Anthropology Undergraduate Canvas Page for full listing of Methods courses. Examples include:

- ANTH 1505 - ENVIRONMENTAL ARCHAEOLOGY
- ANTH 1515 - LITHIC ANALYSIS
- ANTH 1534 - ARCHEOLOGICAL DATA ANALYSIS 1
- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- ANTH 1556 - ZOOARCHAEOLOGY
- ANTH 1602 - HUMAN SKELETAL ANALYSIS
- ANTH 1617 - PALEOPATHOLOGY
- ANTH 1709 - ACTIVIST ANTHROPOLOGY

- ANTH 1763 - FIELD METHODS

One Undergraduate Seminar course

ANTH 1750 or other Undergraduate Seminar. See Anthropology Undergraduate Canvas Page for full listing of Undergraduate Seminar courses.

Elective courses

Students are required to complete a minimum of five elective courses in ANTH courses; three of these must be at the 1000 level.

Other requirements

Grade requirements: A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No course that counts toward the major can be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W course in the major. The department strongly recommends a field school course for undergraduate majors.

Honors major requirements: Students with a minimum overall GPA of 3.50 and a minimum GPA of 3.80 in their Anthropology courses may graduate from the department with honors, pending the submission and acceptance of a completed project representing substantial student research. An honors project may be the expanded version of a paper from a current or previous course, or may result from independent research.

Undergraduate Anthropology Club: This organization offers workshops, hosts informal discussions, shows films, and organizes field trips for Anthropology majors and those interested in Anthropology.

Lambda Alpha: Students with a minimum overall GPA of 3.25 and a minimum GPA of 3.50 in their Anthropology courses may apply for membership in the Delta Chapter of the Lambda Alpha Anthropology National Honor Society.

Architectural Studies Program

Learning to think about architecture as both the product of a creative process and as an historical phenomenon are the principal goals of the University of Pittsburgh's bachelor programs in Architectural Studies (BA) and Architecture (BS). The programs endeavor to create a rigorous curriculum and a supportive learning environment, allowing students to build skills and knowledge while developing close working relationships with peers and faculty. Students will gain a broad understanding of the complexity of architecture as a profession and as an academic discipline and will be well-positioned by their senior year to apply to accredited, graduate programs in architecture or historic preservation at universities in the United States and Canada. Students considering careers in architecture and historic preservation are encouraged to declare either major by the end of their freshman year at Pitt.

The programs' curriculum draws primarily on courses offered in the Department of History of Art and Architecture and the Department of Studio Arts. Students are encouraged to explore related interests through course work in other departments, through off-campus study, and through a range of undergraduate teaching and research opportunities available through Pitt's David C. Frederick Honors College and the Dietrich School of Arts and Sciences.

As pre-professional courses of study, the programs offer students the opportunity to explore their professional interests while acquiring a liberal arts education. Such preparation instills an intellectual maturity and a breadth of cultural experience that serve students to their advantage during professional career training. Students should be aware that a degree in architectural studies or in architecture does not constitute professional or technical training.

For more information about the Architectural Studies Program, visit www.arch.pitt.edu.

Certificate

Civil Engineering and Architectural Studies Certificate

Note: This certificate is available only to Architecture (BS) and Architectural Studies (BA) majors.

A certificate in structural engineering for architectural studies majors is available under the auspices of the Swanson School of Engineering's Department of Civil and Environmental Engineering (CEE). It offers a technical, professional component to the major. The certificate consists of a minimum of 27 credits and includes courses in statics, mechanics of materials, structural analysis, computer methods, and structural design. Students must go to the Department of Civil and Environmental Engineering in 742 Benedum Hall to declare the Civil Engineering Certificate.

Prerequisite Courses

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS

- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED) or
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2 (Honors)

One of the following courses

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1

Required Courses

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0290 - DIFFERENTIAL EQUATIONS

- ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS or
- ENGR 0135 - STATICS & MECHC OF MATERIALS 1

- ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS or
- ENGR 0145 - STATICS & MECHC OF MATERIALS 2 (PREQ: ENGR 0131 or ENGR 0135)

- CEE 1105 - MATERIALS OF CONSTRUCTION (CREQ: ENGR 0141 or ENGR 0145)
- CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS (PREQ: ENGR 0141 or ENGR 0145)
- CEE 1335 - DESIGN OF STRUCTURES (PREQ: CEE 1330)

With the required courses complete, students are encouraged to deepen their Engineering Design experience.

The following courses have CEE 1335 as a prerequisite:

- CEE 2106 - NONCONVENTIONAL ENGINEERING MATERIALS
- CEE 2340 - CONCRETE STRUCTURES 2
- CEE 2341 - STEEL STRUCTURES 2
- CEE 2345 - DESIGN OF TIMBER STRUCTURES

Major

Architectural Studies, BA

Design Track

The Design track requires completion of 48 credits with an additional 9 credits in a Studio Arts concentration.

Requirements

The Design track requires completion of 48 credits with an additional 9 credits in a Studio Arts concentration.

Architectural Studies courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 0201 - FOUNDATIONS STUDIO 1 *
- ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
- ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1
- ARC 1202 - ARCHITECTURE DESIGN STUDIO 2
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2

Note

A grade of C or better is required in ARC 0201 to enroll in ARC 1201.

Physics course

- PHYS 0110 - INTRODUCTION TO PHYSICS 1

History of Art and Architecture courses

- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- Two additional HAA courses in architectural history

Required Studio Arts Concentration

- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 1430 - DRAWING STUDIO: PERSPECTIVE

Preservation Track

The Preservation track requires completion of 39 credits with an additional 12 credits in a proscribed related area in either the **History of Urban America** or **Public Service**.

History of Art and Architecture courses

The following courses as indicated.

One of the following courses.

- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Architectural Studies courses

All of the following courses.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
- ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP

Preservation courses

All of the following courses.

- ARC 1310 - PRESERVATION - TEXTS AND THEORY
- ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION

Architectural Studies Major other requirements and recommendations

- A GPA of at least 2.00 in all department courses is required for graduation with a major in Architectural Studies. A minimum GPA of 2.75 is required for an internship, and a minimum of 3.0 is required for those seeking a recommendation for graduate school. Students who plan to apply to graduate school should maintain a minimum GPA of 3.25.
- Only the experiential learning courses ARC 1990, HAA 1901, HAA 1904, HAA 1905, and HAA 1909 may be taken on an S/NC basis. None of these courses can be applied toward the architectural history requirement.
- Students must complete at least one writing-intensive course (W-course) in the major. Each track has a W-course in its requirements - ARC 1160 for the Design track, and ARC 1310 for the Preservation track.
- Students who plan to major in Architectural Studies should contact the departmental advisor as early in their college career as possible to discuss the recommended course sequence for each track, course availability, and entry into restricted classes.
- Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Architecture, BS

The Architectural Studies Program's website is an invaluable resource for detailed information about current activities and projects, the curriculum in each track, and resources for students seeking to pursue careers in architectural professions. Please visit www.arch.pitt.edu.

Required courses for the major

The Architecture major requires the completion of 74 credits, distributed as follows.

Architectural Studies courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY

- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP
- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1
- ARC 1202 - ARCHITECTURE DESIGN STUDIO 2
- ARC 1203 - DESIGN STUDIO 3
- ARC 1204 - DESIGN STUDIO 4

History of Art and Architecture courses

- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
 - Two Additional HAA Courses from the approved list of electives.

Approved elective courses

- ARC 0153 - MEDIEVAL ARCHITECTURE
- HAA 0460 - ART IN PUBLIC: INCLUSION , IDENTITY, AND ACTIVISM
- HAA 0900 - SPECIAL TOPICS-ARCHITECTURAL STUDIES
- ARC 1152 - ROMAN ARCHITECTURE
- HAA 1305 - EARLY RENAISSANCE ARCHITECTURE
- ARC 1156 - HIGH RENAISSANCE ARCHITECTURE
- ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT
- ARC 1161 - MODERNITY, MODERNISM AND HOUSING
- ARC 1118 - ARCHITECTURE SINCE 1945
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES
- ARC 0210 - SPECIAL TOPICS-ARCHITECTURE
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1330 - GLOBAL PRESERVATION

Proseminar courses

- ARC 0901 - ARCHITECTURAL STUDIES PROSEMINAR 1
- ARC 0902 - ARCHITECTURAL STUDIES PROSEMINAR

Studio Arts courses

- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1

Physics courses

Choose one of the following courses.

- PHYS 0110 - INTRODUCTION TO PHYSICS 1

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
 - CMU 48-116 Building Physics

Carnegie Mellon University courses in Building Science

Choose two of the following courses offered by Carnegie Mellon University.

- CMU 48-215 Materials & Assembly
- CMU 48-351 Human Factors
- CMU 48-324 Statics & Structures
- CMU 48-315 Environment 1

Note

Proficiency in calculus is required for students seeking a career in architecture. It is highly recommended that students successfully complete at least one semester of college-level calculus (MATH 0220) before they graduate.

Required Related Area

Every preservation track major must select either the History of Urban American or the Public Service Related area.

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major. A minimum GPA of 2.75 is required for the internship and a 3.00 for a recommendation to graduate school (although students wishing to apply to graduate school should maintain a minimum GPA of 3.25.)

Satisfactory/No Credit option

Only the experiential learning courses ARC 1990, HAA 1901, HAA 1904, HAA 1905 and HAA 1909 may be taken on an S/NC basis. None of these courses can be applied toward the architectural history course requirement.

Writing requirement

Students must complete at least one W-course in the major. Each track has a w-course in its requirements - ARC 1160 for the Design track and ARC 1310 for the Preservation track.

Advising

It is imperative that students who intend to pursue the architectural studies major contact the departmental advisor as soon as possible to discuss the recommended course sequence for each track, course availability and entry into restricted classes.

Minor

Architecture-Design Minor

The Architecture-Design minor consists of 18 credits, distributed as follows.

Requirements for the minor

The minor in Architecture - Design provides an option for students majoring in fields such as Civil Engineering, Environmental Studies, History, Studio Arts, Urban Studies and for whom course work in architectural design and history will provide additional breadth in their studies of the built environment. The minor requires that students complete 18 credits, 12 of which are studio-based design courses and six of which will provide historical and theoretical background for thinking about architecture and the built environment.

Foundational course in architecture

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Two courses in architectural design

Students must earn a letter grade of C or higher in ARC 0201 ARC 0201 - FOUNDATIONS STUDIO 1 to enroll in ARC 1201 ARC 1201 - ARCHITECTURE DESIGN STUDIO 1.

- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1201 - ARCHITECTURE DESIGN STUDIO 1

One course in architectural history

- ARC 0153 - MEDIEVAL ARCHITECTURE
- HAA 0460 - ART IN PUBLIC: INCLUSION , IDENTITY, AND ACTIVISM
- ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN
- HAA 0900 - SPECIAL TOPICS-ARCHITECTURAL STUDIES
- ARC 1152 - ROMAN ARCHITECTURE
- ARC 1154 - CONSTRUCTING THE GOTHIC
- HAA 1305 - EARLY RENAISSANCE ARCHITECTURE
- ARC 1156 - HIGH RENAISSANCE ARCHITECTURE
- ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT
- ARC 1161 - MODERNITY, MODERNISM AND HOUSING
- ARC 1118 - ARCHITECTURE SINCE 1945
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES
- ARC 0210 - SPECIAL TOPICS-ARCHITECTURE
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1330 - GLOBAL PRESERVATION

Two co-requisites

ARC 1911 ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1 may be waived for students who have taken a course in AutoCAD in high school or the equivalent course in the Department of Civil Engineering in the Swanson School of Engineering - CEE 0109 CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1.

SA 0130 SA 0130 - DRAWING STUDIO 1 may be waived for students who have taken art courses in high school.

- ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1
- SA 0130 - DRAWING STUDIO 1

Historic Preservation Minor

The minor in Historic Preservation is for students who are interested in a specialized focus on the preservation and documentation of historic architecture and the built environment.

Students pursuing the Historic Preservation minor must complete the following coursework, which comprises 18 credits.

Requirements for the minor

- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP
The internship must be conducted with an organization that pertains to the field of historic preservation and be approved by the director of the Architectural Studies program.

Three additional courses

Students pursuing this minor must complete three courses from the following list, for a total of at least nine credits.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ARC 1136 - EARLY AMERICAN ARCHITECTURE
- ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION
- ARC 0201 - FOUNDATIONS STUDIO 1
- ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO The Architectural Studies program strongly recommends that students choose this course as one of the three from the list.
- ARC 1310 - PRESERVATION - TEXTS AND THEORY
- ARC 1330 - GLOBAL PRESERVATION

Department of Biological Sciences

Biological Sciences

The biological sciences major is intended for the biology student who wishes to develop an individualized combination of courses at the advanced level. The student is free to plan a curriculum of great breadth or to choose an area of specialization not offered as a major by the department. Most of the undergraduates in our department choose the biological sciences major. This major is suitable for those planning a career in which general familiarity with biological topics is desirable, such as jobs in scientific journalism, biological and pharmaceutical supply industries, biological or medical research, scientific libraries and museums, or in any industry where the products or by-products have potential biological impact. Completing the biological sciences major fulfills the basic science requirements for admission to medical, dental, and other health professional schools and to graduate biology programs.

Bioinformatics

This major is closed for enrollment as of fall 2019. Students enrolled in the program prior to fall 2019 have the option to complete this major or to transfer to the Computational Biology major. Students who choose to complete the Bioinformatics major must do so by the end of summer 2023.

Bioinformatics is the theory, application and development of computing tools to solve problems and create hypotheses in all areas of biological sciences. Biology in the post-genome world has been and continues to be transformed from a largely laboratory-based science to one that integrates experimental and information science. Bioinformatics has contributed to advances in biology by providing tools that handle datasets too large and/or complex for manual analysis. Examples of some of these tools include assembly of DNA sequences of entire genomes, gene finding algorithms, microarray expression analysis, molecular system modeling, and biomarker discovery from mass spectra. Computational tools are central to the organization, analysis, and harvesting of biological data at the level of macromolecules, cells, and systems. Consequently, there is a growing need for trained professionals who understand the languages of biology and computer science. Biologists trained in more traditional programs may not have a working knowledge of statistics and algorithms, whereas computer scientists trained in more traditional programs may not have a working knowledge of the chemistry and biology required in the field.

Computational Biology

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce.

Ecology and Evolution

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones. The ecology and evolution major is a good choice for students interested in the fundamental questions of the evolutionary origins of organisms and how they survive, or don't survive, in their changing habitats. Within this major, students have the opportunity for in-depth study of the morphological and physiological adaptations of a variety of animals, plants, and microorganisms to a changing world; the ecological relationship of organisms from the individual to the global scale; and the mechanisms that drive evolutionary change.

Employment opportunities in the ecological sciences have increased greatly in recent years. There continues to be a demand for well-trained professionals at all levels (BS, MS, and PhD). Government environmental agencies, commercial consulting and testing firms, waste management industries, research laboratories, and natural history and science museums are just a few of the career opportunities. Graduate departments of ecology, evolution, environmental sciences, genetics, botany, public policy, and public health are actively seeking well-qualified students. The required chemistry, physics, and mathematics courses incorporate the requirements for admission to medical, dental, and other health professional schools. An ecology and evolution major could also serve as a springboard to a career in law.

Microbiology

Microbiology is the study of the biology of microscopic organisms: bacteria, viruses, algae, fungi, and protozoa. The methods used to study and manipulate these minute and mostly unicellular organisms differ from those used in most other biological investigations. Recombinant DNA technology uses microorganisms, particularly bacteria and viruses, to amplify DNA sequences and generate the encoded products. Moving genes from one microorganism to another permits application of microbial skills to solve medical and environmental problems. Many microorganisms are unique among living things in their ability to use gaseous nitrogen from the air or to degrade complex and resistant macromolecules in such materials as wood. By rearranging the genes that control these and other processes, scientists seek to engineer microorganisms that will process wastes, fertilize agricultural land, produce desirable biomolecules, and solve other problems inexpensively and safely.

Microbiologists pursue careers in many fields, including agricultural, environmental, food, and industrial microbiology; public health; resource management; basic research; education; and pharmaceuticals. Jobs in all these fields are available at the BS level as well as the MS and PhD levels. The microbiology major also incorporates the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in microbiology, molecular biology, biochemistry, and related disciplines.

Molecular Biology

Molecular biology emphasizes the study of molecules that make up an organism and the forces operating among these molecules. Increasingly, molecular biologists can also explore the genetic control of these molecules and thus define the developmental, cellular, and subcellular changes that occur during the dynamic processes of life. Virtually every question, whether in biochemistry, cell biology, developmental biology, or some other biological discipline, applies molecular biology, often as the prime approach, in its solution. Biochemical and molecular developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The molecular biology major, with its two tracks (biochemistry or cell and developmental biology) provides a strong background for many science careers. Both tracks incorporate the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in biochemistry, cell and molecular biology, and related disciplines. Positions for molecular biologists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

For more information on the Department of Biological Sciences and the majors it offers, see www.biology.pitt.edu.

Certificate

Life Sciences Research Certificate

In Summer 2023 the Life Sciences Research Certificate was terminated. Students who are currently enrolled will have until Summer 2023 to complete the necessary instruction.

The goals of this certificate program are to enable students to: understand and apply key concepts in designing and performing authentic experimental research; learn and practice good science communication, ethics and responsible conduct in research; develop research practices and critical thinking skills needed for a career in research; and compile evidence of rigorous training in research for applicants to jobs and graduate programs. Students must complete four terms of inquiry-based research in lab or field settings under faculty mentorship, overseen by Research Certificate Oversight Committee, two courses about research methods, three courses focusing on quantitative skills, one course in history and philosophy of science, and written and oral presentations of their research.

Application Requirements

Prerequisites

1. Introductory Biology. Completed **two** terms of introductory biology, with a grade of **C** [not C-] or above. Transfers or students with AP/IB credit may be exempt from part of this requirement.
2. Completed 2 credits of mentored research in a Certificate-approved faculty laboratory (one term; min. 140 hrs.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent) **and** have a letter of support from the faculty sponsor.
3. GPA. If students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor must comment in their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Bio 1: Choose one (each totals 4 cr.)

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 or
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
and
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
- BIOSC 0715 - UHC FOUNDATIONS OF BIOLOGY 1

Bio 2: Choose one (each totals 4 cr.)

- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2 or
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
and
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0716 - UHC FOUNDATIONS OF BIOLOGY 2

Requirements to Complete the Certificate

Mentored Research in Life Sciences

- Components of mentored research projects: Formulation of hypotheses, experimental design, data collection, data interpretation, drawing conclusions supported by the data. Presentation of research findings, understanding the pertinent scientific literature, developing new knowledge, and development of a path towards research independence.
- Research credit requirements: Three additional terms (each term; min. 140 hours.; BIOSC 1903/BIOSC 1904 or NROSCI 1901/NROSCI 1961 or equivalent.) of research for a total of at least 8 credits or credit equivalents. BIOSC 1903/BIOSC 1904 and NROSCI 1901 /NROSCI 1961 must be approved and credits awarded according to departmental procedures. The final 2 terms of research must be with the same faculty mentor. Research equivalents must be approved by the RCOC.
- Pre-planning and Reporting for each Term: Pre-planning and Reporting: In the last week of classes before the next term of research (see B above), students must submit a 1-2 page report and prospectus summarizing accomplishments and aims for the next term. RCOC determines whether the research can count towards the Certificate before the end of the add/drop period. Oversight: Reporting documents must be co-signed by the faculty sponsor (and co-sponsor if any).
- Choice of Research Faculty: Research-active faculty in the Departments of Biological Sciences or Neuroscience may sponsor students for research in their labs. Faculty sponsors in other A&S departments or other University of Pittsburgh schools must be approved by RCOC.
- Optional Off-campus Research Term: One term of off-campus research may be approved (e.g. summer fellowship or study abroad). Submit in advance a 1-page description to RCOC of the project and the research environment plus a letter from the research advisor confirming commitment to the ≥ 140 hours of research activity.

Quantitative Skills Courses - Statistics and Mathematics

Complete three courses from this list (9 credits).

- BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 0290 - DIFFERENTIAL EQUATIONS
- MATH 1380 - MATH BIOLOGY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1241 - APPLIED SAMPLING
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Graduate level options for the certificate:

- BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1

- BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING
- BIOST 2012 - BAYESIAN & EMPIRICAL BAYES STAT

History and Philosophy of Science Courses

Complete one course from this list (3 credits).

- HPS 0427 - MYTH AND SCIENCE
- HPS 0437 - DARWINISM AND ITS CRITICS
- HPS 0430 - GALILEO AND CREATION OF MODERN SCIENCE
- HPS 0515 - MAGIC, MEDICINE AND SCIENCE or
- HIST 0089 - MAGIC, MEDICINE AND SCIENCE
- HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING
- HPS 1620 - PHILOSOPHY OF BIOLOGY
- HPS 1625 - PHILOSOPHY OF MEDICINE
- HPS 1508 - CLASSICS IN HISTORY OF SCIENCE
- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE
- HPS 1670 - PHILOSOPHY OF NEUROSCIENCE
- HPS 1800 - SPEC TOPICS HIST & PHIL OF SCI

Research Methods Courses

- Complete two Research Methods courses, one in research communication and one in research mechanics. It is recommended that the research courses be in the student's major department.
- Be enrolled in the Certificate and performing research in a Certificate-approved lab during the same term as enrolled in these courses. Courses may be taken in any order. Substitution of other Research Methods courses must be pre-approved by RCOC.
- BIOSC 1906 - RESEARCH COMMUNICATION: COMMUNICATION IN LIFE SCIENCES RESEARCH
- BIOSC 1907 - RESEARCH DECONSTRUCTION: UNDER THE HOOD OF LIFE SCIENCES RESEARCH
- NROSCI 2014 - SPEAKING OF SCIENCE

Presenting Research

The student must present their research at two scientific meetings or symposia, at least one venue must be outside of major and research Departments. Ex.: Honors College Research Fair, Science20xx, Duquesne Summer Undergraduate Research Symposium, regional or national scientific meeting. Presentation and abstract must be designed and delivered by the student and approved by the research faculty advisor and RCOC. The research abstract and a copy of poster or talk must be submitted to RCOC.

Research paper

The student will submit a manuscript describing the research completed in the final research experience spanning at least two consecutive terms. This will be in the form of a research manuscript. The paper must be submitted to the faculty sponsor and the RCOC by the last week of classes before finals week. The paper must be approved by the faculty sponsor and RCOC. The same final research paper may be considered for satisfying both Departmental Honors and the Research Certificate, provided it fulfills other requirements of the Department.

Portfolio Documentation

Upon registration for the Certificate, students must start (and regularly update) their electronic Portfolio, documenting their progress towards Certificate completion. Each proposal, presentation, research report, and other Certificate-related materials must be collated in the Portfolio. The Portfolio allows students, faculty, and advisors to review progress towards the Certificate, and provides coherent documentation of research proficiency when applying for employment or graduate school admission.

GPA Requirements

The student must remain in good academic standing (minimum cumulative GPA 2.00); if students have a cumulative GPA of 2.75 or lower after completing the initial term of research, the faculty sponsor for that research must comment in writing their letter of support on whether the student is likely to meet the rigorous demands of the Certificate.

Advising

Majors in the Departments of Biological Sciences or Neuroscience will be advised through their departments. Students outside of these majors will be assigned an advisor within one of these majors.

Students conducting research with a faculty member who does not work in the Departments of Biological Sciences or Neuroscience must have their research faculty sponsor complete a Faculty Mentor Application unless they are a CNUP faculty member. Students must submit the faculty mentor application with their application for the certificate.

Joint Major

Computational Biology, BS

Computational Biology Requirements

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce. This major requires completion of 64 credits of coursework, detailed as follows.

Students may declare a major in Computational Biology after completing the following courses or their equivalents with a letter grade of C or higher.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS

Transfer students who have finished these requirements prior to admission to the University of Pittsburgh are asked to complete one term of course work, including at least one BIOSC course that counts toward the major, before declaring within the Dietrich School. Transfer students applying to the School of Computing and Information who have finished these requirements prior to admission to the University of Pittsburgh may be admitted directly into the major - note, transfer application requirements for SCI are outlined in the Catalog under "Admission Requirements and Procedures ."

Biological Sciences courses

All of the following courses are required for the major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
- BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
- BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 1000 - BIOCHEMISTRY

*Students may alternately choose BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION and BIOSC 1820 METABOLIC PATHWAYS AND REGULATION in lieu of BIOSC 1000. In this case, BIOSC 1820 becomes the elective course.

Computer Science courses

All of the following courses are required for the major.

- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE

Computational Biology courses

All of the following courses are required for the major.

- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1542 - COMPUTATIONAL GENOMICS or
- BIOSC 1544 - SIMULATION AND MODELING
- BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR

Capstone course

Students must choose one of the following capstone courses.

- BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Co-requisite Chemistry courses

All of the following courses are required for the major.

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

Co-requisite Mathematics and Statistics courses

Both of the following courses are required for the major.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS

Elective courses

Students must select one course from the following list.

- BIOSC 0351 - GENETICS LABORATORY
- BIOSC 0370 - ECOLOGY
- BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
- BIOSC 1130 - EVOLUTION
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
* This course must be taken in conjunction with BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 BIOCHEMISTRY.
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1940 - MOLECULAR BIOLOGY
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI
- CHEM 1830 - SYNTHETIC BIOLOGY
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS
- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- NROSCI 1000 - INTRO TO NEUROSCIENCE
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- STAT 1221 - APPLIED REGRESSION

Additional Requirements

Writing (W) requirement

Dietrich School students must complete at least one W-course in the major. BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR meets this requirement.

Grade requirements

All courses offered by the departments of Biological Sciences and Computer Science must be completed with a letter grade of C or better.

Co-Requisite courses

Students must complete co-requisite courses in the departments of Mathematics, Statistics, and Chemistry with an overall average of C or better, with the exceptions of CHEM 0110 GENERAL CHEMISTRY 1 and CHEM 0120 GENERAL CHEMISTRY 2. Students must earn letter grades of C or better in each of these classes.

Honors

A Dietrich School student may achieve honors in the Department of Biological Sciences by meeting these requirements:

1. Maintain a minimum GPA of 3.25;
2. Complete a faculty-supported research project; and
3. Complete an Honors Thesis. Details about the required thesis are available at www.biology.pitt.edu/undergraduate/advising-and-support/honors.

A School of Computing and Information student may achieve honors in the Department of Computer Science by meeting these requirements:

1. Maintain a minimum overall GPA of 3.25; and
2. Maintain a major GPA (CS and Biological Science courses) of 3.5; and
3. Complete an additional major elective course with a grade of A.

Satisfactory/No Credit option

One core course required for the major may be taken on an S/NC basis. Co-requisite courses may be taken on an S/NC basis subject to School limitations. Please check with your School for specific information on S/NC grades.

Restrictions

- All BIOSC courses at the 0800-level are designed for non-majors and therefore do not count toward the major.
- Independent study and independent research credits do not count toward the major. The Department of Biological Sciences encourages students to seek out these experiences in order to enhance their education.

Major

Biochemistry, BS

Biochemistry is the study of how molecules in organisms work and interact at a chemical and physical level. Biochemistry can be used to study the underpinnings of processes in a wide range of disciplines, including cell biology, developmental biology, and molecular biology. Biochemical and molecular developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The Biochemistry Major provides a strong background for many science careers, incorporating the requirements for admission to medical, dental, and other health professional schools and to graduate schools in biochemistry, cell and molecular biology, and related disciplines. Positions for biochemists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

Requirements for the Biochemistry Major are described below.

Biological Sciences courses

Majors must complete a minimum of 32 credits of Biological Sciences coursework as described below.

Required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
One of the following lab courses
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
One of the following lab courses
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS
The two-semester biochemistry sequence
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
or
- CHEM 1410 - PHYSICAL CHEMISTRY 1 and
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- BIOSC 1580 - BIOCHEMISTRY SEMINAR
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1940 - MOLECULAR BIOLOGY

Writing-intensive course

Choose one of the following courses.

- BIOSC 1581 - BIOCHEMISTRY SEMINAR WRITING PRACTICUM
- BIOSC 1831 - BIOCHEMISTRY LABORATORY WRITING PRACTICUM

Biochemistry elective courses

Choose two lecture courses and one lab course from the following lists.

Lecture courses

- BIOSC 1120 - BIOSTATISTICS
- BIOSC 1130 - EVOLUTION
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1275 - GENOMICS
- BIOSC 1280 - MICROBIAL GENETICS
- BIOSC 1455 - HUMAN ENDOCRINOLOGY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1730 - VIROLOGY
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1865 - MICROBIAL PHYSIOLOGY
- CHEM 1830 - SYNTHETIC BIOLOGY

Lab courses

- BIOSC 0351 - GENETICS LABORATORY
- BIOSC 0352 - INTRODUCTION TO MOLECULAR GENETICS LABORATORY
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1510 - CELL BIOLOGY LABORATORY
- BIOSC 1530 - DEVELOPMENTAL BIOLOGY LABORATORY
- BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY

Co-requisite courses

- CHEM 0110 - GENERAL CHEMISTRY 1
 - CHEM 0120 - GENERAL CHEMISTRY 2
 - CHEM 0310 - ORGANIC CHEMISTRY 1
 - CHEM 0320 - ORGANIC CHEMISTRY 2
 - CHEM 0345 - ORGANIC LABORATORY
 - MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
 - MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- Either the algebra-based physics courses or the calculus-based physics courses.
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
 - PHYS 0111 - INTRODUCTION TO PHYSICS 2
- or

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

David C. Frederick Honors College equivalent courses may be substituted for required or elective courses.

120 Credits

Bioinformatics, BS

In the Fall of 2019, the Bioinformatics, BS was inactive for students to enroll in. Students who were enrolled prior to the Fall 2019 term have the option to remain in the major or transfer to the Computational Biology major. Students who choose to complete the program under Bioinformatics must do so by Summer 2023 term.

Biological Sciences Requirements

Students in all five majors within the Department of Biological Sciences must follow general rules and fulfill certain general requirements in addition to those in their specific major:

- A total of 32 credits in biology must be taken (see specific course requirements for each major below). All biology courses taken for the major must be completed with a C or better. If a C- or lower is earned in a biology elective course that is not repeated, the course will be used in calculating the overall GPA in the major but will not be counted as part of the 32 credits required for the major.
- Co-requisite courses must be taken in chemistry, physics, and mathematics and/or statistics, as follows.
 - CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2, including the labs;
 - CHEM 0310 - ORGANIC CHEMISTRY 1 , CHEM 0320 - ORGANIC CHEMISTRY 2 , and CHEM 0345 - ORGANIC LABORATORY lectures and labs;
 - MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1;
 - Either MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or STAT 1000 - APPLIED STATISTICAL METHODS; and
 - Either the algebra-based physics courses PHYS 0110 - INTRODUCTION TO PHYSICS 1 and PHYS 0111 - INTRODUCTION TO PHYSICS 2, or the calculus-based physics courses PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED).
- A minimum GPA of 2.00 must be maintained in all biology courses and in the combined co-requisite courses. The Satisfactory/No Credit (S/NC) option may be used for only one biology course and for any of the co-requisite courses.
- Departmental writing (W) courses may be selected once the major is declared and count towards the 32 biology credits for the major.

- Opportunities for faculty-sponsored directed research and internship experiences are available and strongly encouraged. Academic credit awarded from the departmental W, directed research, and internship courses count as credit toward graduation, but not in determining the 32 biology credits required for the major. Students interested in departmental honors should contact department advisors for information.
- David C. Frederick Honors College equivalents for any of the above courses are accepted. Credit by examination is available only through appropriate AP scores for equivalents to BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1, BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1, BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2, and BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2 lectures and labs.

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Corequisite courses

Corequisite courses must be taken in chemistry, physics, and mathematics and/or statistics, including

- CHEM 0110 - GENERAL CHEMISTRY 1 which includes the lab
- CHEM 0120 - GENERAL CHEMISTRY 2 which includes the lab
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- STAT 1000 - APPLIED STATISTICAL METHODS
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Note:

Updated information about the department, major requirements, and course offerings is available on the department's Web site, www.biology.pitt.edu.

Requirements

The undergraduate bioinformatics degree program at the University of Pittsburgh is operated jointly by the departments of biological sciences (www.biology.pitt.edu) and computer science (www.cs.pitt.edu). This program offers training that builds a solid foundation in chemistry, biology, computer science, mathematics, and statistics. The training will enable students to communicate fluently with experts across these disciplines and to have the skills necessary to apply computing tools to address contemporary problems in biology and medicine. It will enhance the professional opportunities for undergraduates to pursue careers in pure or applied research in academia, government, pharmaceutical, medical, or biotechnology sectors.

Advising for Bioinformatics majors is housed in both the Department of Biology and the Department of Computer Science. For information, contact one of the advisors.

Core courses (42 credits)

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS

- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- CHEM 0310 - ORGANIC CHEMISTRY 1 *
- CHEM 0320 - ORGANIC CHEMISTRY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA **
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2

Note:

* CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2 are pre-requisites to taking CHEM 0310.

** Students without a background in programming will be encouraged to take CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING prior to taking CS 0401.

Upper Level Courses (22 credits)

- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH or
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN
- BIOSC 1901 - INDEPENDENT STUDY (total of four credits)* or
- CS 1950 - DIRECTED RESEARCH: CAPSTONE (total of four credits)*

Electives (12 credits)

Electives (12 credits) to be chosen from an approved list of courses in Statistics, Chemistry, Biological Sciences and/or Computer Science. With the approval of the Bioinformatics Program Committee, the student may take electives in other departments.

Note:

* Undergraduate Research is taken over multiple terms for variable credit. Four credits of undergraduate research are required for the major. Research can begin as early as the sophomore year and must be approved by Kirk Pruhs in the Department of Computer Science, or Paula Grabowski in the Department of Biological Sciences.

Capstone experience

BIOSC 1640 and CS 1640 satisfy the bioinformatics major capstone experience requirement. Capstone request must be made to Kirk Pruhs in the Department of Computer Science.

Additional requirements and restrictions

- Bioinformatics majors who have completed CS 0401 may not enroll in CS 0004 or CS 0007.
- BIOSC 1000 cannot be substituted for BIOSC 1810.
- CHEM 1810 can only be substituted for BIOSC 1810 if it is not possible for the student to schedule BIOSC 1810
- Students must complete at least one W-course in the major
- A grade of C or better is required in each of the core and upper level courses that are to count toward the major.

- This requirement also satisfies the Dietrich School requirement of a minimum GPA of 2.0 in major courses
- Elective courses for the major must be completed with a grade of C or better. If a C-or lower is earned in an elective course for the major and is not repeated, the course will be used to calculate the overall GPA but will not be counted toward the 32 credits required for the major.
- Students must earn a minimum GPA of 2.0 in the required chemistry and mathematics courses.
- No Bioinformatics major courses may be taken on an S/NC basis.

Honors major requirements

Honors in Bioinformatics is granted if, in addition to fulfilling all requirements for the major, the student:

- completes three semesters (3 x 2 credits) or the equivalent (summer counts as a semester equivalent) of undergraduate research together with a written honors thesis presented in the last semester of the senior year;
- maintains a GPA of 3.5 or above in all Bioinformatics major courses; and
- maintains an overall GPA of 3.25 or above.

Approved elective course list

Biological Sciences

- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1545 - THE MATHEMATICS OF BIOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1940 - MOLECULAR BIOLOGY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Computer Science

- CS 1510 - ALGORITHM DESIGN
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS
- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE
- CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Chemistry

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2

Statistics

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Biological Sciences, BS

The Biological Sciences major is intended for the biology student who wants to develop an individualized combination of courses at the advanced level. The student is free to plan a curriculum of great breadth or to choose an area of specialization not offered as a major by the department. Most of the undergraduates in our department choose the Biological Sciences major. This major is suitable for those planning a career in which general familiarity with biological topics is desirable, such as jobs in scientific journalism, biological and pharmaceutical supply industries, biological or medical research, scientific libraries and museums, or in any industry where the products or by-products have potential biological impact. Completing the Biological Sciences major fulfills the basic science requirements for admission to medical, dental, and other health professional schools and to graduate biology programs.

Requirements for the Biological Sciences major are described below.

Biology Course Requirements

Majors must complete a minimum of 32 credits of Biological Sciences coursework.

17 credits of required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
One of the following lab courses.
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1

- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
One of the following lab courses.
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS

- BIOSC 0370 - ECOLOGY or
- BIOSC 1130 - EVOLUTION

- BIOSC 1000 - BIOCHEMISTRY or both
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION

Writing Intensive course

Students must pass one writing-intensive (W) course in BIOSC. This course will count as a BIOSC elective as long as the student earned a letter grade of C or better. Students typically complete BIOSC 1010 - COMMUNICATING IN THE BIOLOGICAL SCIENCES.

Elective courses

Majors must complete a minimum of 15 credits of upper-division courses, which must include two lab courses or one lab and one field course. The BIOSC Writing course (above) can count as an elective. Students may begin to take elective courses when they have completed the appropriate prerequisite courses; for example, some upper-division courses have only BIOSC 0160 as a prerequisite whereas others have additional requirements.

If a student elects the combination of BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION as listed above, then BIOSC 1820 counts as an upper-level elective. Students may count only one physiology course toward the major.

Co-requisite courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Choose one of the following courses.

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS

Choose one of the following pairs of courses.

- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade Requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110 / PHYS 0174 has to be C or better to enroll in PHYS 0111 / PHYS 0175; MATH 0220 has to be C or better to enroll in MATH 0230.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

David C. Frederick Honors College equivalent courses may be substituted for required or elective courses.

Ecology and Evolution, BS

The field of ecology explores the interactive web of organisms and the environment. Studies in evolution consider the processes by which modern organisms have developed from ancestral ones. The Ecology and Evolution major is a good choice for students interested in the fundamental questions of the evolutionary origins of organisms and how they survive, or don't survive, in their changing habitats. Within this major, students have the opportunity for in-depth study of the morphological and physiological adaptations of a variety of animals, plants, and microorganisms to a changing world, the ecological relationships of organisms from the individual to the global scale, and the mechanisms that drive evolutionary change.

Employment opportunities in Ecology and Evolutionary Biology have increased greatly in recent years. There continues to be a demand for well-trained professionals at all levels (BS, MS, and PhD). Government environmental agencies, commercial consulting and testing firms, waste management industries, research laboratories, and natural history and science museums are just a few of the career opportunities. Graduate departments of ecology, evolution, environmental sciences, genetics, botany, education, law, public policy, and public health are actively seeking well-qualified students.

Requirements for the Ecology and Evolution major are described below.

Biological Sciences courses

Majors must complete 32 credits of Biological Sciences coursework as described below.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- One of the following lab courses

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
One of the following laboratory courses.
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS
or
- BIOSC 0370 - ECOLOGY
- BIOSC 0390 - ECOLOGY LABORATORY
- BIOSC 1120 - BIOSTATISTICS
- BIOSC 1130 - EVOLUTION
- BIOSC 1131 - EVOLUTION LABORATORY
- BIOSC 1550 - ECOLOGY AND EVOLUTION SEMINAR

Writing-intensive Course

Choose one of the following courses.

- BIOSC 0391 - ECOLOGY LABORATORY WRITING PRACTICUM
- BIOSC 1551 - ECOLOGY AND EVOLUTION SEMINAR WRITING PRACTICUM

Elective courses

Majors must complete nine credits of elective courses, including at least one field course, from the following lists.

Field course electives

Students must choose at least one field courses offered at the Pymatuning Laboratory of Ecology (PLE) (3 credits) or the Oakland campus (BIOSC 1221 - 1 credit) or an equivalent course approved by the Director of Undergraduate Studies. If the field course is less than 3 credits, additional credits must be added from the approved electives list to reach 9 credits total. PLE course offerings change annually; check the course schedule to see which courses are offered.

- BIOSC 1140 - BEHAVIORAL ECOLOGY
- BIOSC 1160 - FOREST ECOLOGY
- BIOSC 1170 - FRESHWATER ECOLOGY
- BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES
- BIOSC 1190 - AQUATIC ENTOMOLOGY
- BIOSC 1220 - ECOLOGICAL FIELD STUDIES
- BIOSC 1221 - URBAN ECOLOGICAL FIELD LAB
- BIOSC 1230 - ORNITHOLOGY
- BIOSC 1270 - ECOLOGY OF FISH
- BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT
- BIOSC 1330 - FIELD BOTANY
- BIOSC 1340 - FIELD ENTOMOLOGY
- BIOSC 1360 - ECOLOGY OF FUNGI
- BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
- BIOSC 1400 - DISEASE ECOLOGY
- BIOSC 1420 - WILDLIFE ECOLOGY AND MANAGEMENT
- BIOSC 1610 - CONSERVATION BIOLOGY

Lecture course electives

- ANTH 1601 - STRUCTURE AND FUNCTION
- ANTH 1603 - HUMAN ORIGINS
- ANTH 1605 - PRIMATE ANATOMY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1200 - VERTEBRATE MORPHOLOGY
- BIOSC 1275 - GENOMICS
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1350 - PLANT BIOLOGY
- BIOSC 1375 - TROPICAL BIOLOGY
- BIOSC 1435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS
- BIOSC 1440 - ANIMAL BEHAVIOR
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1850 - MICROBIOLOGY

Co-requisite courses

Students choose one track for co-requisite courses:

Track 1: Chemiphysical

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- Either the algebra-based physics courses or the calculus-based physics courses.
- Algebra-based courses:
 - PHYS 0110 - INTRODUCTION TO PHYSICS 1
 - PHYS 0111 - INTRODUCTION TO PHYSICS 2
- Physics-based courses:
 - PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
 - PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Track 2: Quantitative

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- STAT 1261 - PRINCIPLES OF DATA SCIENCE
- STAT 1301 - STATISTICAL PACKAGES

Track 3: Environmental

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0820 - NATURAL DISASTERS
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS

Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230; STAT 1000 has to be B- or better to enroll in STAT 1221.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

David C. Frederick Honors College equivalent courses may be substituted for required or elective courses.

Microbiology, BS

Microbiology is the study of microscopic organisms, including viruses, bacteria, archaea, fungi, and protists. Microorganisms are important for both the good that they do (nutrient cycling, production of antibiotics, bioremediation, food production) and the bad (food poisoning, infectious diseases, epidemics). Our program provides intensive training in modern microbiology, including cutting-edge research in genomics and genetic engineering.

Microbiologists pursue careers in many fields, including agricultural, environmental, food, and industrial microbiology; public health; resource management; basic research; education; and pharmaceuticals. Jobs in all of these fields are available at the BS level as well as the MS and PhD levels. The microbiology major also incorporates the requirements expected for admission to medical, dental, and other health professional schools, and to graduate schools in microbiology, molecular biology, biochemistry, and related disciplines.

Requirements for the Microbiology Major are described below.

Biological Sciences courses

Majors must complete a minimum of 32 credits of Biological Sciences coursework as described below.

Required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2

- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS
- BIOSC 1000 - BIOCHEMISTRY
- or
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION

- BIOSC 1280 - MICROBIAL GENETICS
- BIOSC 1570 - MICROBIOLOGY SEMINAR
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1860 - MICROBIOLOGY LABORATORY
- BIOSC 1865 - MICROBIAL PHYSIOLOGY

Writing-intensive course

Choose one of the following courses.

- BIOSC 1291 - EXPERIMENTAL GENETIC ENGINEERING WRITNG PRACTICUM
- BIOSC 1571 - MICROBIOLOGY SEMINAR WRITING PRACTICUM
- BIOSC 1741 - VIROLOGY LABORATORY WRITING PRACTICUM
- BIOSC 1861 - MICROBIOLOGY LABORATORY WRITING PRACTICUM

Microbiology elective courses

Choose six to seven credits of courses from the following lists. At least one of the selected courses must be a lab or field course.

Lecture courses

- BIOSC 0370 - ECOLOGY
- BIOSC 1120 - BIOSTATISTICS
- BIOSC 1130 - EVOLUTION
- BIOSC 1275 - GENOMICS
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1730 - VIROLOGY
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- This course must be taken in conjunction with BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION ; the pair of courses are taken in lieu of BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1940 - MOLECULAR BIOLOGY
- BIOSC 1999 - MEDICAL MICROBIOLOGY
- CHEM 1830 - SYNTHETIC BIOLOGY

Lab courses

- BIOSC 0352 - INTRODUCTION TO MOLECULAR GENETICS LABORATORY
- BIOSC 0390 - ECOLOGY LABORATORY
- BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1290 - EXPERIMENTAL GENETIC ENGINEERING LABORATORY

- BIOSC 1510 - CELL BIOLOGY LABORATORY
- BIOSC 1740 - VIROLOGY LABORATORY

Field courses

- BIOSC 1360 - ECOLOGY OF FUNGI
- BIOSC 1400 - DISEASE ECOLOGY

Co-requisite courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- or
- STAT 1000 - APPLIED STATISTICAL METHODS
- Either the algebra-based physics courses or the calculus-based physics courses
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
- or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

David C. Frederick Honors College equivalent courses may be substituted for required or elective courses.

Molecular Biology, BS

Molecular biology emphasizes the study of molecules that make up an organism, how they interact, and how they are controlled. With the development of the field of genomics, biologists also study one class of molecules (DNA) at the whole genome level. Molecular biology and genomics are applied within all biological disciplines, including biochemistry, cell biology, and developmental biology. Molecular biology and genomics developments have revolutionized biological research, fueling the explosive growth in the biotechnology industry and rapid increase of molecular medicine.

The Molecular Biology major provides a strong background for many science careers, incorporating the requirements expected for admission to medical, dental, and other health professional schools and to graduate schools in cell and molecular biology, biochemistry, and related disciplines. Positions for molecular biologists at the BS, MS, and PhD levels are available in the biotechnology industries as well as in universities, medical schools, hospitals, government laboratories, research institutes, and public health institutions.

Requirements for the Molecular Biology major are described below.

Biological Sciences courses

Majors must complete a minimum of 32 credits of Biological Sciences coursework as described below.

Required courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
One of the following lab courses
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
One of the following lab courses
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- BIOSC 0350 - GENETICS
- BIOSC 1000 - BIOCHEMISTRY
or
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION and
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1275 - GENOMICS
- BIOSC 1562 - MOLECULAR BIOLOGY SEMINAR
- BIOSC 1940 - MOLECULAR BIOLOGY
- BIOSC 1945 - ADVANCED MOLECULAR BIOLOGY
- BIOSC 1950 - MOLECULAR GENETICS LABORATORY

Writing-intensive course

Choose one of the following courses.

- BIOSC 1563 - MOLECULAR BIOLOGY AND GENOMICS SEMINAR WRITING PRACTICUM
- BIOSC 1951 - MOLECULAR GENETICS LABORATORY WRITING PRACTICUM

Molecular Biology and Genomics elective courses

Choose two lecture courses and one lab course from the following lists.

Lecture courses

- BIOSC 1120 - BIostatISTICS
- BIOSC 1130 - EVOLUTION
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1280 - MICROBIAL GENETICS
- BIOSC 1455 - HUMAN ENDOCRINOLOGY
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY

- BIOSC 1542 - COMPUTATIONAL GENOMICS
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
This course must be taken in conjunction with BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1850 - MICROBIOLOGY
- CHEM 1830 - SYNTHETIC BIOLOGY
- BIOSC 1730 - VIROLOGY

Lab courses

- BIOSC 0351 - GENETICS LABORATORY
- BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1510 - CELL BIOLOGY LABORATORY
- BIOSC 1530 - DEVELOPMENTAL BIOLOGY LABORATORY
- BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY

Co-requisite courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
Either the algebra-based physics courses or the calculus-based physics courses
- PHYS 0110 - INTRODUCTION TO PHYSICS 1 and
- PHYS 0111 - INTRODUCTION TO PHYSICS 2
or
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

Grade requirements

- Each required BIOSC course for the major must be completed with a grade of C or better.
- The elective courses for the major must also be completed with a grade of C or better.
- A minimum GPA of 2.0 in all departmental courses taken is required for graduation. If a C- or lower is earned in an elective course for the major but is not repeated, the course will be used to calculate the departmental GPA but will not be counted toward the 32 credits required for the major.
- Students must also earn a minimum GPA of 2.0 in the co-requisite courses. A passing grade of C- or lower in a co-requisite course can be accepted if balanced by a higher grade in another co-requisite course so that the co-requisite GPA is 2.0 or higher. Exceptions: CHEM 0110 and CHEM 0120 have to be C or better to declare the major; PHYS 0110/0174 has to be C or better to enroll in PHYS 0111/0175; MATH 0220 has to be C or better to enroll in MATH 0230.
- Only one BIOSC course may be taken on a Satisfactory/No Credit (S/NC) basis.

David C. Frederick Honors College equivalent courses may be substituted for required or elective courses.

Department of Chemistry

Chemistry, as a central science, is involved in natural processes occurring in living things, the earth, the oceans, and the atmosphere. The chemical industry provides materials to feed, clothe, and house mankind; drugs to combat disease; and processes to provide energy. Chemistry plays a role in high technology fields such as molecular biology, microelectronics, drug design, and ceramics.

The American Chemical Society (ACS)-certified chemistry degree includes core chemistry courses and electives. Special options are available for students with specific interests in combining chemistry with other subjects, such as bioscience, business, communication, computer science, education, and polymer science. These options allow students to take additional courses that provide an in-depth introduction to the subject of choice and are directly relevant to individual career goals.

The Bachelor of Science degree in chemistry prepares students for a career in business or industry or for advanced study in chemistry. Combined with core biology courses, the chemistry major is frequently selected as the preferred major for admission to the graduate health professions, including medical and dental school. In combination with an education option, the chemistry major prepares students for a certification program leading to a career in secondary science teaching. Chemists at all levels of training have a wide variety of industrial and corporate career opportunities in agricultural chemistry, food chemistry, environmental science, petrochemicals, pharmaceuticals, semiconductors and electronics, and fine chemicals, as well as in basic research. Many opportunities are available for chemistry majors with skills in business (sales, technical marketing, management), communications (technical writing, journalism), and computer science (programming, database management, information science). For more information on the ACS-certified degree and degree options as well as the Department of Chemistry, see www.chem.pitt.edu.

Major

Chemistry, BS

Major Requirements

The requirements for the ACS-certified major in chemistry are as follows.

Required Chemistry courses

- CHEM 0110 - GENERAL CHEMISTRY 1 and
- CHEM 0120 - GENERAL CHEMISTRY 2
- or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1 and
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB

- CHEM 0310 - ORGANIC CHEMISTRY 1 and
- CHEM 0320 - ORGANIC CHEMISTRY 2
- or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1 and
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CHEM 0345 - ORGANIC LABORATORY
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2

Other required Natural Science courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- CHEM 1000 - MATHEMATICS FOR CHEMISTRY or
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING

Electives

At least two credits must be completed in the following list of approved chemistry or science courses.

For American Chemical Society (ACS) certification, students must complete their electives in a biochemistry course - BIOSC 1000 - BIOCHEMISTRY or BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION.

Approved elective courses

- BIOSC 0350 - GENETICS
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
- BIOSC 1830 - BIOCHEMISTRY LABORATORY
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1940 - MOLECULAR BIOLOGY
- CHEM 1310 - SYNTHETIC ORGANIC CHEMISTRY
- CHEM 1380 - TECHNIQUES OF ORGANIC RESEARCH
- CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI
- CHEM 1600 - SYNTHESIS & CHARACTERIZATION OF POLYMERS
- CHEM 1605 - SYNTH & CHARACTERIZATION OF POLYMERS LAB
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- CHEM 1700 - UNDERGRADUATE RESEARCH SEMINAR
- CHEM 1710 - UNDERGRADUATE RESEARCH
- CHEM 1720 - UNDERGRAD TEACHING EXPERIENCE
- CHEM 1810 - CHEMICAL BIOLOGY
- Any CHEM course at the 2000-level or higher except CHEM 2700.
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- GEOL 1001 - MINERALOGY
- STAT 1000 - APPLIED STATISTICAL METHODS

GPA requirement

The chemistry major must earn a 2.00 GPA in all departmental courses. Chemistry majors may use the S/NC option in all required physics and mathematics courses and in CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2.

Satisfactory/No Credit option

CHEM 0110, CHEM 0120, and all required Mathematics and Physics courses can be taken on an S/NC basis.

Writing Intensive course

Students must complete at least one W-course in the major.

Notes

To graduate with departmental honors, the student must have an overall GPA of at least 3.00, have a GPA of at least 3.25 in required chemistry courses, earn 2 credits in CHEM 1710 - UNDERGRADUATE RESEARCH, and earn 1 credit in CHEM 1711 - UNDGR RESEARCH WRITING PRACTICUM.

The chemistry department offers options in bioscience, business, communications, photonics, education, and material science. Each chemistry option allows for a waiver of CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2, CHEM 1140 - ADVANCED INORGANIC LABORATORY, and the 2-credit science elective required for the ACS-certified degree. Specific information on the options program is available from the department.

Minor

Chemistry Minor

Requirements

Due to the integral role that chemistry plays in many other majors (including life sciences, physical sciences, and engineering), students wishing to receive formal recognition of their work in chemistry may choose to pursue the official minor as outlined below:

18-19 Credits

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- or
- CHEM 0760 - UHC GENERAL CHEMISTRY FOR ENGINEERS 1
- CHEM 0960 - GENERAL CHEM FOR ENGINEERS 1
- CHEM 0970 - GENERAL CHEM FOR ENGINEERS 2

Three of the following LECTURE courses:

- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1130 - INORGANIC CHEMISTRY
- CHEM 1250 - INSTRUMENTAL ANALYSIS
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2

- BIOSC 1000 - BIOCHEMISTRY or

- BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION

Two credits of the following LABORATORY courses:

- CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
- CHEM 0345 - ORGANIC LABORATORY
- CHEM 1140 - ADVANCED INORGANIC LABORATORY
- CHEM 1255 - INSTRUMENTAL ANALYSIS LAB
- CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
- CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2

Department of Classics

Classics is an interdisciplinary program devoted to the study of the ancient Greek and Roman civilizations. Students may focus on the classics language track or the classical civilization track. Besides the sequences in the Greek, Latin, and Sanskrit languages, the department offers courses in Greek and Roman literature (including comparative literature), mythology, linguistics, history, culture, and philosophy.

The classics language track requires study of texts in the original languages, while the classical civilization track makes use of these same texts in English translations. Both classics tracks qualify graduates for appropriate careers in teaching, but can also be used as preparation for nonclassical academic and professional disciplines such as business, law, and medicine. The study of classics provides a background for the study of Romance and other languages, assists in the proper use of English, and underlies any understanding of Western civilization. For more information on the major and the Department of Classics, see <http://www.classics.pitt.edu/>.

Major

Classics, BA

Classics is an interdisciplinary program devoted to the study of the ancient Greek and Roman civilizations. Students may focus on the classics language track or the classical civilization track. Besides the sequences in the Greek, Latin, and Sanskrit languages, the department offers courses in Greek and Roman archaeology, art, history, linguistics, literature (including comparative literature), mythology, philosophy, and social history.

The Classics Language track requires study of texts in the original languages while the Classics Civilization track makes use of these same texts in English translations. Both classics tracks qualify graduates for appropriate careers in teaching and library work but can also be used as preparation for non-classical academic and professional disciplines such as business, law, and medicine. The study of classics underlies any understanding of Western civilization. The field includes important literary and philosophical figures such as Homer, Plato, and Vergil. It also provides a background for the study of romance and other languages and assists in the proper use of English.

The Classics major requires the completion of a minimum of 30 credits in one of the following tracks, distributed as described.

Greek Language track

Required courses

All of the following courses are required.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE
- GREEK 1700 - GREEK PROSE COMPOSITION

Greek literature courses

Choose two of the following courses.

- GREEK 1300 - GREEK AUTHORS 1
- GREEK 1302 - GREEK AUTHORS 2
- GREEK 1420 - ADVANCED READINGS IN GREEK PHILOSOPHY
- GREEK 1902 - DIRECTED STUDY FOR UNDERGRADS

Latin languages courses

Choose two of the following courses.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Latin Language track

Required courses

All of the following courses are required.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Latin literature courses

Choose two of the following courses.

- LATIN 1300 - LATIN AUTHORS 1
- LATIN 1302 - LATIN AUTHORS 2
- LATIN 1400 - ADVANCED READINGS IN LATIN EPIC
- LATIN 1902 - DIRECTED STUDY FOR UNDERGRADS

Greek language courses

Choose two of the following courses.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Classical Civilization track

Required courses

- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0020 - ROMAN CIVILIZATION

Two of the following courses

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE
- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Courses in the area of concentration

Students must complete three CLASS courses in the area of concentration they have chosen. These courses should be selected in consultation with the major advisor.

Electives

Students must complete one elective course in three of the following areas.

- Ancient Archeology
- Art
- Culture
- History
- Language
- Literature
- Philosophy
- Science

Additional information

Grade requirements

A minimum GPA of 2.0 in courses that count toward the major is required for graduation.

Satisfactory/No Credit option

- Greek Language or Latin Language track: two courses that count toward the major can be taken on an S/NC basis.
- Civilization track: two courses that count toward the major can be taken on an S/NC basis.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course in the major.

Honors major requirements

To earn an honors major in Classics, the student must fulfill all requirements for the major, and:

1. attain a GPA of 3.50 or above in departmental courses by the end of their junior year; and
2. write an honors essay in conjunction with a senior level course deemed acceptable by the department.

Minor

Ancient Greek Minor

Students pursuing this minor must complete at least 15 credits of coursework as follows.

Language courses

Students must complete following courses.

- GREEK 0011 - BEGINNING ANCIENT GREEK 1
- GREEK 0021 - BEGINNING ANCIENT GREEK 2
- GREEK 0210 - INTERMEDIATE GREEK: PROSE
- GREEK 0220 - INTERMEDIATE GREEK: VERSE

Advanced course

After completing the intermediate course sequence, students must select one of the following courses.

- GREEK 1300 - GREEK AUTHORS 1
- GREEK 1301 - GREEK AUTHORS 1-WRITING PRACTICUM
- GREEK 1302 - GREEK AUTHORS 2
- GREEK 1303 - GREEK AUTHORS 2-WRITING PRACTICUM
- GREEK 1400 - ADVANCED READINGS IN GREEK EPIC
- GREEK 1402 - ADVANCED READINGS IN GREEK TRAGEDY
- GREEK 1416 - ADVANCED READINGS IN GREEK HISTORIANS
- GREEK 1418 - ADVANCED READINGS IN GREEK ORATORY
- GREEK 1420 - ADVANCED READINGS IN GREEK PHILOSOPHY
- GREEK 1700 - GREEK PROSE COMPOSITION

Classical Civilization Minor

Students must complete at least 15 credits of coursework as follows.

Survey course in Greek civilization or history

One of the following courses.

- CLASS 0010 - GREEK CIVILIZATION
- CLASS 1210 - GREEK HISTORY
- HIST 1783 - GREEK HISTORY

Survey course in Roman civilization or history

One of the following courses.

- CLASS 0020 - ROMAN CIVILIZATION
- CLASS 1220 - ROMAN HISTORY
- HIST 1781 - ROMAN HISTORY

Literary or textual course

Any Classics, Greek, or Latin course with a literary or textual basis.

Electives

Any two courses in Classics, Greek, or Latin.

Latin Minor

Students pursuing this minor must complete at least 15 credits of coursework as follows.

Language courses

Students must complete the following courses.

- LATIN 0011 - BEGINNING LATIN 1
- LATIN 0021 - BEGINNING LATIN 2
- LATIN 0210 - INTERMEDIATE LATIN: PROSE
- LATIN 0220 - INTERMEDIATE LATIN: VERSE

Advanced course

After completing the intermediate course sequence, students must select one of the following courses.

- LATIN 1300 - LATIN AUTHORS 1
- LATIN 1301 - LATIN AUTHORS 1: WRITING PRACTICUM
- LATIN 1302 - LATIN AUTHORS 2
- LATIN 1303 - LATIN AUTHORS 2: WRITING PRACTICUM
- LATIN 1400 - ADVANCED READINGS IN LATIN EPIC
- LATIN 1402 - ADV READINGS IN LATIN DRAMA
- LATIN 1406 - ADVANCED READINGS IN LATIN LYRIC
- LATIN 1410 - ADVANCED READINGS IN LATIN SATIRE
- LATIN 1412 - ADVANCED READINGS IN LATIN ELEGY
- LATIN 1416 - ADVANCED READINGS IN LATIN HISTORIANS
- LATIN 1418 - ADVANCED READINGS IN LATIN ORATORY
- LATIN 1420 - ADVANCED READINGS IN LATIN PHILOSOPHY
- LATIN 1422 - ADVANCED READINGS IN LATIN EPISTOLOGRAPHY
- LATIN 1430 - SPECIAL TOPICS IN LATIN LITERATURE
- LATIN 1700 - LATIN PROSE COMPOSITION

Mediterranean Art and Archaeology Minor

The minor in Mediterranean Art and Archaeology offers an attractive preparation for undergraduates who are interested in graduate and professional schools in Classics and Classical Studies, Mediterranean Archaeology, Art and Architectural History, Museum Studies, Cultural Heritage Management, and Antiquities Law. Additionally, it prepares them for careers in archaeological fieldwork, museums, international policymaking, and

nonprofit and non-governmental organizations engaged in the preservation and management of world historic sites. The Mediterranean Art and Archaeology minor requires 15 credits for completion, detailed as follows.

Core course

- CLASS 0600 - INTRODUCTION TO MEDITERRANEAN ARCHAEOLOGY

Civilization and History Courses

Students must choose at least one of the following courses.

- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0020 - ROMAN CIVILIZATION
- CLASS 1210 - GREEK HISTORY
- CLASS 1220 - ROMAN HISTORY

Art and Architecture courses

Students must choose at least two of the following courses.

- CLASS 0500 - ANCIENT ART or
- HAA 0150 - ANCIENT ART
- CLASS 1510 - GREEK ART or
- HAA 1110 - GREEK ART
- CLASS 1520 - ROMAN ART or
- HAA 1130 - ROMAN ART
- CLASS 1524 - ROMAN ARCHITECTURE or
- ARC 1152 - ROMAN ARCHITECTURE
- CLASS 1610 - GREEK ARCHAEOLOGY
- HAA 0105 - ART AND EMPIRE
- HAA 0965 - THE CITY OF ROME AND ITS ARCHITECTURE: FROM AENEAS TO ZAHA HADID

Elective courses

Students must choose at least one of the following courses.

- ANTH 0534 - PREHISTORIC FOUNDATIONS OF EUROPEAN CIVILIZATION
- ANTH 0538 - THE ARCHEOLOGIST LOOKS AT DEATH
- ANTH 0630 - FORENSIC ANTHROPOLOGY: AN INTRODUCTION
- ANTH 1535 - BASIC ARCHEOLOGICAL FIELD TRAINING
- ARC 1183 - DIGITAL ROMAN AFRICA: VISUALIZING ARCHITECTURE AND URBANISM IN ROMAN NORTH AFRICA
- CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD
- CLASS 0400 - ANCIENT EMPIRES
- CLASS 0618 - DEATH IN THE ANCIENT WORLD
- CLASS 0650 - ARCHAEOLOGY OF THE BODY
- CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD
- CLASS 1650 - WARFARE: ANCIENT MEDITERRANEAN

- CLASS 1900 - INTERSHIP IN CLASSICS
- HAA 0018 - DEATH IN THE ANCIENT WORLD
- HAA 0160 - ANCIENT EMPIRES
- HAA 0165 - GODS AND KINGS: ART IN ANCIENT MESOPOTAMIA
- HAA 1105 - JERUSALEM: HISTORY AND IMAGINATION
- HIST 1746 - ATHLETICS OF THE ANCIENT WORLD
- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1170 - ARCHAEOLOGY OF ISRAEL-PALESTINE

Department of Communication

The study of communication is one of the oldest but still most contemporary of disciplines. The field examines important questions about society, communication, and persuasion in a way that combines the best of the ancient liberal arts tradition with the critical attention to the newest media technologies. In courses such as persuasion, argument, interpersonal communication, political rhetoric, rhetoric of science, nonverbal communication, history of media, media criticism, and television and society, our faculty offer diverse views on the roles of communication, media, and rhetoric in our lives.

A degree in communication is not vocational in design, although many of the Department of Communication's graduates hold important positions in industry, education, the media, government, law, and various other professions. An understanding of communication as a human activity, as defined above, makes the department's graduates attractive candidates when seeking employment or obtaining admission to graduate programs. For more information on the major or the Department of Communication, see www.comm.pitt.edu.

Major

Communication, BA

Major Requirements

The Communication: Rhetoric and Communication major requires the completion of 33 credits, detailed as follows. Courses that count toward the major must be completed with a letter grade of C or better.

Required courses

Communications majors must take all three of the following courses. These courses meet prerequisites for upper-level courses.

- COMMRC 0300 - COMMUNICATION AND SOCIETY
- COMMRC 0310 - RHETORIC & SOCIETY
- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY

Two skills courses

Students must take two skills courses from the following list. One of the courses must be COMMRC 0520 - PUBLIC SPEAKING.

- COMMRC 0500 - ARGUMENT
- COMMRC 0510 - DEBATE
- COMMRC 0520 - PUBLIC SPEAKING (Required)
- COMMRC 0530 - INTERPERSONAL COMMUNICATION
- COMMRC 0540 - DISCUSSION
- COMMRC 0550 - SPEECH COMPOSITION
- COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION

Six upper-level courses

These courses focus on specific topics or contexts of communication. Students in these courses will conduct substantive research and do significant writing; therefore, the completion of the composition requirement is a prerequisite.

- COMMRC 1101 - EVIDENCE
- COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
- COMMRC 1103 - RHETORIC AND CULTURE
- COMMRC 1104 - POLITICAL COMMUNICATION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1106 - SMALL GROUP COMMUNICATION
- COMMRC 1109 - NONVERBAL COMMUNICATION
- COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION
- COMMRC 1111 - THEORIES OF PERSUASION
- COMMRC 1112 - THEORIES OF RHETORIC
- COMMRC 1114 - FREEDOM OF SPEECH AND PRESS
- COMMRC 1115 - AFRICAN AMERICAN RHETORIC
- COMMRC 1116 - RHETORIC OF THE AMERICAN COUNTERCULTURE
- COMMRC 1117 - PROPAGANDA AND MISINFORMATION IN THE 21ST CENTURY
- COMMRC 1119 - PRESIDENTIAL RHETORIC 2
- COMMRC 1120 - RHETORIC OF COLD WAR
- COMMRC 1121 - HISTORY OF MASS MEDIA
- COMMRC 1122 - MEDIA CRITICISM
- COMMRC 1123 - RHETORICAL CRITICISM
- COMMRC 1125 - MEDIA THEORY
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE
- COMMRC 1147 - THE RHETORIC OF SCIENCE
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
- COMMRC 1731 - SPECIAL TOPICS IN RHETORIC
- COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION
- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- CSD 1020 - NATURE OF LANGUAGE * This course is offered by the School of Health and Rehabilitation Science

Notes

The Department of Communication offers three special project courses, which are not required.

- COMMRC 1710 - SENIOR THESIS IN COMMUNICATION requires a GPA of 3.00 for enrollment and can be counted toward the major.
- COMMRC 1900 - COMMUNICATION INTERNSHIP requires a GPA of 2.75; this course cannot be counted toward the major.
- COMMRC 1901 - INDEPENDENT STUDY requires a GPA of 3.00; this course cannot be counted toward the major.

Students who plan to do graduate work in communication are advised to do additional work in a second language.

Department of East Asian Languages and Literatures

The Department of East Asian Languages and Literatures offers courses in the language, literature, film, linguistics, and culture of China, Japan, and Korea. An undergraduate major is available in either Chinese or Japanese. There is a multiyear sequence of courses in the modern standard languages of China, Japan, and Korea, plus a wide variety of offerings (ranging from introductory to specialized) designed to illuminate various facets of these

Asian civilizations. Students whose interests range broadly across the civilization of East Asia may alternatively develop an interdisciplinary studies major or take advantage of the Asian Studies Certificate program. The departmental curriculum is composed of three main categories:

- courses designed to develop competence in the four skills (speaking, listening, reading, writing) of the Chinese, Japanese, or Korean language, plus courses for advanced study in Chinese and Japanese;
- courses taught in English and focused on the mainstream of Chinese, Japanese, and Korean culture as reflected in literature, drama, and film; and
- courses for the advanced study of literature and linguistic analysis.

For more information on the Chinese and Japanese majors, courses in Korean language, or on the Department of East Asian Languages and Literatures, visit the Web site www.deall.pitt.edu/.

Major

Chinese, BA

Chinese and Japanese major requirements

Chinese or Japanese majors may take first-year language courses on an Satisfactory/No Credit (S/NC) basis. Second-year language courses must be taken on a letter grade basis. In the third and fourth years, majors have the option of taking two additional courses S/NC, one of which may be an advanced language course.

Course Requirements

The Chinese major requires 51 credits for completion.

Language

All of the following first, second, and third year language courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2
- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2
- CHIN 1009 - THIRD-YEAR CHINESE 1
- CHIN 1010 - THIRD-YEAR CHINESE 2

Advanced language courses

Choose one of the following advanced language courses.

- CHIN 1033 - SPECIAL TOPICS: ADVANCED CHINESE ACROSS GENRES
- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1050 - FOURTH YEAR CHINESE 1

Literature, linguistics, culture, and film

Choose one of the following traditional period courses

- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY

- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1090 - GREAT MINDS OF CHINA

Choose one of the following modern period courses

- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1088 - NEW CHINESE CINEMA

Choose two of the following courses

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD *
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE *
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY *
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM *
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN *
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN *
- CHIN 1086 - LOVE IN CHIN AND WESTERN LITERATURE
- CHIN 1088 - NEW CHINESE CINEMA *
- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1090 - GREAT MINDS OF CHINA *
- CHIN 1700 - TRANSLATION THEORY AND PRACTICE

Writing-intensive course

Students must complete the 1-credit CHIN 1908 - DIRECTED WRITING FOR MAJORS in conjunction with a course from the **Literature, linguistics, culture, and film** requirement. Eligible courses are indicated with an asterisk (*).

Senior Project

CHIN 1999 - SENIOR PROJECT should be completed in the student's final academic term.

Non-departmental course requirements

Choose two courses with at least 50% China-related content and offered by a department other than East Asian Languages and Literatures. A sample list of courses follows.

- ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
- HAA 0620 - ART OF CHINA
- HAA 1640 - 20TH CENTURY CHINESE ART
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0755 - RELIGION IN ASIA
- HIST 1422 - LATE IMPERIAL CHINA
- PS 1523 - EAST ASIA IN WORLD POLITICS
- RELGST 0505 - RELIGION IN ASIA

Japanese, BA

The Department of East Asian Languages and Literatures offers courses in the language, literature, film, linguistics, and culture of China and Japan; the department offers both a major and a minor in Japanese. A full sequence of courses in the modern standard language of Japan and a variety of offerings, ranging from introductory to specialized, illuminate various facets of Japanese civilization. Students whose interests range broadly across the civilization of East Asia may want to take advantage of the Asian Studies certificate program. The departmental curriculum for the Japanese major is composed of three main categories as follows.

- Courses designed to develop competence in the four skills of the Japanese language, plus courses for advanced study.
- Courses taught in English and focused on the mainstream of Japanese culture as reflected in literature, drama, and film.
- Courses for the advanced study of literature and linguistic analysis.

Requirements

The Japanese major requires completion of 54 credits and a minimum GPA of 2.0 in departmental courses. This program includes elements from four categories: courses designed to develop competence in the four skills of the Japanese language; courses taught in English and focused on the mainstream of Japanese culture as reflected in literature, drama, film, and linguistics; courses related to Japan offered in other departments of the Dietrich School; and a capstone experience for graduating seniors.

Language

- JPNSE 0003 - SECOND YEAR JAPANESE 1
- JPNSE 0004 - SECOND YEAR JAPANESE 2
- **Note:** JPNSE 1062 - INTENSIVE JAPANESE 2 may replace both JPNSE 0003 and JPNSE 0004
- JPNSE 1020 - THIRD YEAR JAPANESE 1
- JPNSE 1021 - THIRD YEAR JAPANESE 2

Advanced courses

- JPNSE 1040 - INTRODUCTION TO CLASSICAL JAPANESE 1
- JPNSE 1050 - FOURTH YEAR JAPANESE 1

Culture, Literature, and Linguistics

Complete the following course.

- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE

Choose one of the following courses.

- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE

Choose two of the following elective courses.

- JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS

- JPNSE 1065 - DETECTIVE AND MYSTERY FICTION IN JAPAN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Related Field

Complete three Japan-related courses offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

Two courses at least 50% Japan-related

Complete two Japan-related courses with at least 50% Japan-related content offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

- ANTH 1784 - JAPANESE SOCIETY
- FMST 1230 - GLOBAL ANIME
- HAA 0640 - ART OF JAPAN
- HAA 1652 - JAPAN: BUDDHIST ART & RITUAL
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- HIST 0430 - JAPAN AND THE WEST, 1600 - PRESENT
- HIST 1433 - MODERN JAPAN
- HIST 1434 - TEA, MONSTERS, MANGA, AND ANIME: A CULTURAL HISTORY OF JAPAN
- HIST 1477 - RELIGION IN JAPAN
- HIST 1741 - POPULAR RELIGION IN CHANGING JAPAN
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

One Japan-related course

Complete one Japan-related course offered by other departments (not EALL) in the Dietrich School of Arts and Sciences.

- ANTH 1734 - GENDER IN EAST ASIA
- ANTH 1784 - JAPANESE SOCIETY
- ENGFLM 1420 - TRANSNATIONAL EAST ASIAN CINEMAS
- FMST 1200 - INTRODUCTION TO EAST ASIAN CINEMA
- FMST 1225 - TRANSNATIONAL EAST ASIAN CINEMAS
- FMST 1230 - GLOBAL ANIME
- HAA 0020 - INTRODUCTION TO ASIAN ART
- HAA 0640 - ART OF JAPAN
- HAA 1652 - JAPAN: BUDDHIST ART & RITUAL
- HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0430 - JAPAN AND THE WEST, 1600 - PRESENT
- HIST 0475 - RELIGION AND CULTURE IN EAST ASIA
- HIST 0487 - WORLD WAR II IN ASIA
- HIST 0755 - RELIGION IN ASIA
- HIST 1433 - MODERN JAPAN

- HIST 1434 - TEA, MONSTERS, MANGA, AND ANIME: A CULTURAL HISTORY OF JAPAN
- HIST 1446 - EAST ASIAN POLITICAL ECONOMY, 1950-PRESENT
- HIST 1475 - EAST ASIAN BUDDHISM
- HIST 1477 - RELIGION IN JAPAN
- HIST 1741 - POPULAR RELIGION IN CHANGING JAPAN
- PS 1326 - EAST ASIAN POLITICAL ECONOMY 1950-PRESENT
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- RELGST 0505 - RELIGION IN ASIA
- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Capstone

- JPNSE 1999 - CAPSTONE PROJECT

Writing course

Japanese majors must complete JPNSE 1908 - DIRECTED WRITING FOR MAJORS in conjunction with one of the courses marked with an asterisk (*) in the culture, literature, and linguistics section.

Minor

Chinese Heritage Minor

The Chinese Minor Heritage option is for heritage learners and those whose oral and aural abilities exceed their reading and writing skills. Students who minor in Chinese under the Heritage option will complete CHIN 0005, a language course specifically for heritage students; one additional language course at the second year second semester level or higher; and two EALL courses in Chinese literature, linguistics, culture, or film.

Language Courses

Students must complete CHIN 0005 and one additional Chinese language course at the second year second semester level or higher.

CHIN 0005

- CHIN 0005 - CHINESE FOR HERITAGE SPEAKERS

One intermediate or advanced language course

- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2
- CHIN 1009 - THIRD-YEAR CHINESE 1
- CHIN 1010 - THIRD-YEAR CHINESE 2
- CHIN 1050 - FOURTH YEAR CHINESE 1

Courses in literature, linguistics, culture, or film

Students must take two courses from EALL in literature, linguistics, culture, or film.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM
- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1086 - LOVE IN CHIN AND WESTERN LITERATURE
- CHIN 1087 - INTRODUCTION TO CHINESE NARRATIVE
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1090 - GREAT MINDS OF CHINA
- CHIN 1700 - TRANSLATION THEORY AND PRACTICE

Chinese Minor

Students must choose one of the tracks - Chinese Language, Chinese Language and Culture, or Chinese Culture, and follow the requirements as described.

Chinese Language option

Chinese language courses

All of the following courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2
- CHIN 0003 - SECOND YEAR CHINESE 1
- CHIN 0004 - SECOND YEAR CHINESE 2

Chinese literature or culture course

Choose one course from the following list.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1090 - GREAT MINDS OF CHINA

Chinese Language and Culture option

Chinese language courses

All of the following courses are required.

- CHIN 0001 - FIRST YEAR CHINESE 1
- CHIN 0002 - FIRST YEAR CHINESE 2

Chinese literature course

Choose one of the following courses.

- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1090 - GREAT MINDS OF CHINA

Chinese culture courses

Choose two of the following courses.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA

Chinese Culture Option

Chinese culture courses

Choose four of the following courses.

- CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE
- CHIN 0081 - EAST ASIA IN THE WORLD
- CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
- CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE
- CHIN 1040 - LITERARY CHINESE 1 CLASSICAL
- CHIN 1041 - LITERARY CHINESE 2 CLASSICAL
- CHIN 1047 - CHINESE AND WESTERN POETRY
- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA

- CHIN 1089 - THE WORLD OF CHINA
- CHIN 1090 - GREAT MINDS OF CHINA

China-related courses

Choose two of the following China-related courses offered by other departments.

- ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
- HAA 0620 - ART OF CHINA
- HAA 1640 - 20TH CENTURY CHINESE ART
- HIST 0401 - MODERN EAST ASIAN CIVILIZATION
- HIST 0755 - RELIGION IN ASIA
- HIST 1422 - LATE IMPERIAL CHINA
- PS 1523 - EAST ASIA IN WORLD POLITICS
- Other course(s) with at least 50% China-related content, offered by a department other than East Asian Languages and Literatures.

Japanese Minor

Students must choose one of the tracks - Japanese Language, Japanese Language and Culture, or Japanese Culture, and follow the requirements as described.

Japanese Language option

This option requires completion of 23 credits, described as follows.

Japanese language courses

Choose either the four first- and second-year language courses or the two intensive language courses.

- JPNSE 0001 - FIRST YEAR JAPANESE 1 and
- JPNSE 0002 - FIRST YEAR JAPANESE 2
- or
- JPNSE 1061 - INTENSIVE JAPANESE 1
- JPNSE 0003 - SECOND YEAR JAPANESE 1 and
- JPNSE 0004 - SECOND YEAR JAPANESE 2
- or
- JPNSE 1062 - INTENSIVE JAPANESE 2

Japanese culture course

Students must take another JPNSE course, taught in English and listed as a culture, film, linguistics, literature, or theatre course.

Japanese Language and Culture option

This option requires completion of 19 credits, described as follows.

Japanese language course(s)

Choose either the two first-year language courses or the single, intensive language course.

- JPNSE 0001 - FIRST YEAR JAPANESE 1 and
- JPNSE 0002 - FIRST YEAR JAPANESE 2
- or
- JPNSE 1061 - INTENSIVE JAPANESE 1

Japanese culture courses

Choose three of the following courses.

- JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE AND THE WEST
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1065 - DETECTIVE AND MYSTERY FICTION IN JAPAN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Japanese Culture option

This option requires completion of 15 credits, described as follows.

Japanese culture courses

Choose five of the following courses.

- JPNSE 0007 - JAPANESE CULTURE AND CIVILIZATION
- JPNSE 0081 - EAST ASIA IN THE WORLD
- JPNSE 0083 - INTRODUCTION TO JAPANESE LITERATURE
- JPNSE 0085 - JAPANESE TALES OF THE SUPERNATURAL
- JPNSE 1023 - ASPECTS OF THE JAPANESE LANGUAGE
- JPNSE 1035 - PRAGMATICS OF JAPANESE
- JPNSE 1056 - JAPANESE LITERATURE AND THE WEST
- JPNSE 1057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA
- JPNSE 1058 - WESTERNS AND SAMURAI FILMS
- JPNSE 1065 - DETECTIVE AND MYSTERY FICTION IN JAPAN
- JPNSE 1070 - WORLD OF JAPAN
- JPNSE 1071 - THE WORLD OF JAPAN
- JPNSE 1080 - GHOSTS, MASKS AND ACTORS
- JPNSE 1081 - FORMS OF JAPANESE THEATRE
- JPNSE 1700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Korean Minor

Choose one of the following options to complete this minor.

Korean option

This option is intended for students who have little or no previous experience with the Korean language and requires 17 to 19 credits to complete.

Students must take:

- four Korean language courses from the Language course list, totaling 14 to 16 credits; and
- one additional course from the Culture, Film, Linguistics, or Literature course list.

Korean for Heritage Learners option

This option is designed for heritage learners and requires 12 to 14 credits to complete.

Students must take:

- two second-, third-, or fourth-year language courses from the Language course list, totaling six to eight credits; and
- two courses from the Culture, Film, Linguistics, or Literature course list.

Korean Minor - Language and Film, Linguistics, and Literature lists

Language courses

- KOREAN 0001 - FIRST YEAR KOREAN 1
- KOREAN 0002 - FIRST YEAR KOREAN 2
- KOREAN 0003 - SECOND YEAR KOREAN 1
- KOREAN 0004 - SECOND YEAR KOREAN 2
- KOREAN 0005 - THIRD YEAR KOREAN 1
- KOREAN 0006 - THIRD YEAR KOREAN 2
- KOREAN 1050 - FOURTH YEAR KOREAN 1
- KOREAN 1051 - FOURTH YEAR KOREAN 2

Culture, Film, Linguistics, and Literature courses

These courses are taught in English.

- KOREAN 0007 - INTRODUCTION TO KOREAN CULTURE AND CIVILIZATION
- KOREAN 0023 - KOREAN LANGUAGE: THEN AND NOW
- KOREAN 0070 - WORLD OF KOREA: PAST AND PRESENT
- KOREAN 0075 - INTRODUCTION TO KOREA THROUGH FILMS
- KOREAN 0084 - INTRODUCTION TO MODERN KOREAN LITERATURE
- KOREAN 1023 - ASPECTS OF THE KOREAN LANGUAGE
- KOREAN 1060 - LANGUAGE AND SOCIETY IN KOREA
- KOREAN 1080 - CONTEMPORARY KOREAN CULTURE

Additional information

Grade Requirements

A minimum GPA of 2.0 is required for the minor.

Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the Satisfactory/No Credit (S/NC) basis for this certificate.

Department of Economics

A major in economics can be designed to serve a variety of purposes in the general liberal arts and can provide a background for postgraduate study in a number of professional schools. In addition, economics is frequently taken as a dual major with business at the undergraduate level. Among the graduate-level options which can be pursued by economics majors are law, business, professional-level training in economics, public administration, professional health management, hospital administration, urban affairs, and transportation studies. Because the range of interests among economics majors is quite broad, students are encouraged to work out a plan of studies fitting their individual needs with a departmental advisor. For more information on the major, the minor, and the Department of Economics, see www.econ.pitt.edu.

Joint Major

Economics-Statistics, BS

The economics-statistics joint major is intended for students who are interested in economics and enjoy modeling and analyzing data. Although the number of such students is not large, there are usually a few each year who express an interest in pursuing both economics and statistics in a depth suitable for a major. More often than not, these students are prime candidates for graduate school, and want to keep their options open as to which field to enter later. Short of completing two bachelor's degrees, their only option now is to major in one subject and minor in the other. If they later decide to attend graduate school in their minor subject, they are likely to be less competitive for admission to the best departments than if they had majored in that subject.

A joint major provides a useful compromise to keep their options open. Additionally, a joint major in economics and statistics can be an excellent training ground for the more quantitative areas of business (such as forecasting, investment management, actuarial planning, and accounting), health management, and public health, without losing the breadth provided by a liberal arts program. Graduates of the joint major who are interested in these areas will have the requisite skills for further training or for immediate entrance into the job market. The curriculum for the joint major consists of eight economics courses and eight statistics courses, along with a statistics writing practicum and three mathematics courses, for a total of 62 credits.

Course Requirements

Economics courses

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One Economics elective course
- Two ECON 1000-level courses

Note

Courses in the ECON 0800 series do not count as ECON elective courses.

The Department of Economics recommends that students take the 1-credit ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS.

Statistics courses

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT
- Four elective STAT courses, chosen from the 1200 level or above: one of these electives must be from the 1600 level or above, excluding internships and directed study courses.

Note

Students who plan to study statistics at the graduate level are encouraged to take STAT 1631 - INTERMEDIATE PROBABILITY and STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL.

Mathematics courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

One of the following

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS

Note

Students are strongly encouraged to take a course in linear algebra, such as MATH 0280 - INTRO TO MATRICES & LINEAR ALG **or** MATH 1180 - LINEAR ALGEBRA 1 **or** MATH 1185 - HONORS LINEAR ALGEBRA

Additional Requirements

Grade requirements: A grade of C or better is required in each course that counts toward the major. A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No course required for the major may be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major. STAT 1223 fulfills this requirement.

Honors major requirements: Honors in the Economics-Statistics joint major is granted if the student maintains a GPA of 3.5 or above in all required courses and completes STAT 1631 - INTERMEDIATE PROBABILITY and STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL.

Major

Economics, BA

Economics Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

- A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
- A minimum grade of C is required in ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY, ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
- No ECON course that counts toward the major may be taken on an S/NC basis.
- Students must complete at least one writing-intensive (W) course in the major.
- Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
- Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School /business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
- ECON 0800 - INTRODUCTION TO ECONOMICS is designed for non-majors and therefore does not count toward the major.
- Internship credits do not count toward the major. Students are encouraged to do internships.
- Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
- Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
 - Maintenance of a GPA of 3.5 in all economics courses
 - Maintenance of an overall GPA of 3.5 or better
 - Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements

Students seeking a BA in economics must earn at least 27 credits in economics courses including the following:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- Two Economics elective courses*
- Two ECON 1000-level elective courses which require ECON 1100 or ECON 1110 as prerequisites
- One ECON 1000-level elective course
- ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

ECON 0800

* ECON 0800 does not count as an ECON elective course.

Students seeking the BA must also take the following corequisite courses

One of the following

- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2
- MATH 0120 - BUSINESS CALCULUS
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

One of the following

- STAT 0200 - BASIC APPLIED STATISTICS

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT *

Note:

* STAT 1000 or STAT 1100 is required for students pursuing the Economics/Business Dual major. Students pursuing this major are exempted from taking BUSECN 1010 since its equivalent is ECON 1100.

Economics, BS

Economics Major Requirements

Majors may earn either a Bachelor of Science or a Bachelor of Arts in economics. The general rules and requirements as they apply to both degrees are as follows:

- A minimum overall 2.00 GPA is required in all economics courses for graduation with an economics major.
- A minimum grade of C is required in ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY, ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY, ECON 1100 - INTERMEDIATE MICROECONOMICS, ECON 1110 - INTERMEDIATE MACROECONOMICS, MATH 0120 and MATH 0220.
- No ECON course that counts toward the major may be taken on an S/NC basis.
- Students must complete at least one writing-intensive (W) course in the major.
- Credit by exam is usually not accepted, but students should check with the departmental advisor about the possibility.
- Majors may choose to complete a double major. Frequently chosen double majors include economics with computer science, history, and philosophy. Less frequently chosen are the sciences (notably biology), which could lead to graduate-level options in public health fields. Interested students have the option of completing a joint major with the mathematics department that will prepare students for a quantitatively oriented job in industry or for entering graduate school in applied mathematics, statistics, economics, business, or a related field (see mathematics major). A structured program leading to a joint Dietrich School /business major is available for students interested in combining economics with business (see Nondepartmental Dietrich School Majors for details).
- ECON 0800 - INTRODUCTION TO ECONOMICS is designed for non-majors and therefore do not count toward the major.
- Internship credits do not count toward the major. Students are encouraged to do internships.
- Only three credits of ECON 1901 through ECON 1903 may be applied toward the credits required for the major.
- Honors in economics is granted if, in addition to fulfilling all requirements for the economics major, the student meets the following criteria:
 - Maintenance of a GPA of 3.5 in all economics courses
 - Maintenance of an overall GPA of 3.5 or better
 - Completion of at least 3 credits in the economics proseminar series (ECON 1700-ECON 1730)

Requirements

Students seeking a BS in economics must earn at least 24 credits in economics courses including the following:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- Two economics elective courses
- Two ECON 1000-level courses that require ECON 1100 or ECON 1110 or their equivalents as prerequisites
- ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

One of the following

- ECON 1150 - APPLIED ECONOMETRICS 1

Note:

*ECON 0800 does not count was an ECON elective course

Students seeking the BS must also take the following corequisite courses:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

One of the following Mathematics Courses

- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 OR
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS

One of the following Statistics courses

- STAT 1000 - APPLIED STATISTICAL METHODS OR
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Minor

Economics Minor

Requirements

The set of courses required for the minor in economics provides an introduction to the core theory in economics and explores some of the issues that economists study. The four core theory courses are taught each term, along with a broad range of applied economics courses. The required courses (totaling 15 credits) are as follows:

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS or
- ECON 1110 - INTERMEDIATE MACROECONOMICS or
- ECON 0150 - ECONOMIC DATA ANALYSIS
- Two additional ECON courses

Note:

Courses in the 0800 series do not count toward the 15 credits required for the minor in economics, and only 3 credits of ECON 1901 - ECON 1903, directed studies, may be applied toward minor requirements. Other than these restrictions, the two additional courses mentioned above may be any of the courses offered by the department.

Department of English

The Department of English at the University of Pittsburgh offers two different major programs, English literature and English writing. Both majors are responsive to many of the traditional goals of a liberal arts education: they seek to develop a broad critical and historical understanding of influential cultural traditions and to foster a range of reading and writing strategies as well as skills of critical analysis. The majors prepare students fairly directly for careers in teaching or writing. But the skills and knowledge the majors impart are useful in numerous business and professional

settings. For example, an English major is highly regarded as a pre-professional major for further training in law, medicine, or business. The director of academic affairs for the Association of American Medical Colleges has said (1986) that English majors have a higher rate of acceptance at medical schools than students who have majored in the biological and physical sciences.

Certificate

Health Humanities Certificate

The Certificate in Health Humanities is designed for students interested in examining the sociocultural context and historical foundations of medicine and healthcare. The certificate will focus students on understanding sociocultural and philosophical dimensions of health, disease, and disability; and train them in using diverse methods of the arts, humanities, and social sciences to explore questions animating medicine and healthcare. The certificate includes 3 required interdisciplinary courses (9 credits) and 3 electives (9 credits) which students will choose in consultation with the Certificate in Health Humanities Advisor from a curated pool of courses that address humane aspects of health and medicine.

Course Curriculum

Students must complete a total of 18 credits to fulfill the requirements of the Certificate in Health Humanities. There are three required core courses (three credits each); students can select three electives (3 credits each) to successfully complete the certificate.

Required Core Courses

The following three courses are required for the Certificate in Health Humanities.

Providing the cultural-historical and methodological foundations for the Certificate are two core courses:

- ENGLIT 0541 - LITERATURE AND MEDICINE
- SOC 0477 - MEDICAL SOCIOLOGY

Providing students an opportunity to integrate a range of interdisciplinary approaches within their own student projects is the Certificate's capstone course.

- ENGLIT 1015 - UNRULY BODIES

Elective Course Options

Students will choose two electives from a list of lower-level courses and one elective from a list of upper-level courses to form a thematically clustered, individually tailored course of study. Students may substitute upper-level courses in place of lower-level courses. Among the three electives, at least two will be drawn from the humanities and/or social sciences.

The following are examples of possible themes and applicable courses.

Suffering and the End of Life

- PHIL 0360 - INTRODUCTION TO BIOMEDICAL ETHICS
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS
- PSY 1230 - PSYCHOLOGY OF DEATH AND DYING

Sexuality and Health

- GSWS 0550 - SEX AND SEXUALITIES OR
- PSY 0184 - PSYCHOLOGY OF GENDER
- ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY

- GSW 1130 - GENDERED BODIES OR
- HIST 1026 - STATES AND SEX IN THE AMERICAS

Social Science Methods and Medicine

- STAT 0800 - STATISTICS IN THE MODERN WORLD
- ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY I
- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES

Diverse Perspectives on Meaning-Making in the Face of Mortality

- PHIL 0010 - CONCEPTS OF HUMAN NATURE
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS

Communicating Science and Medicine

- ENGLIT 0612 - LITERATURE AND SCIENCE
- NROSCI 1014 - SPEAKING OF SCIENCE
- ENGWR 1390 - READINGS IN CONTEMPORARY NON-FICTION

Representing the Body

- FMST 0790 - TECHNOLOGIES OF THE BODY OR
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY
- SA 0130 - DRAWING STUDIO I
- GSW 1170 - QUEER THEORY

Full List of Elective Options

Lists of lower- and upper-level electives, identified from among regularly offered courses of the Dietrich School, are provided below. Each semester, the Certificate in Health Humanities Advisor will review the DSAS course offerings and publish lists of lower- and upper-level electives relevant to the Certificate in Health Humanities.

Lower-Level Electives

- ANTH 0717 - MAGIC, WITCHCRAFT AND THE SUPERNATURAL BODY
- CLASS 0650 - ARCHAEOLOGY OF THE BODY
- ECON 0220 - INTRO TO HEALTH ECONOMICS
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY OR
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGLIT 0612 - LITERATURE AND SCIENCE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- FR 0088 - AILING BODIES: NARRATIVES OF HEALTH AND ILLNESS
- GSW 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- GSW 0500 - INTRODUCTION TO FEMINIST THEORY
- HAA 0018 - DEATH IN THE ANCIENT WORLD OR

- CLASS 0618 - DEATH IN THE ANCIENT WORLD
- HPS 0427 - MYTH AND SCIENCE
- HPS 0515 - MAGIC, MEDICINE AND SCIENCE
- HPS 0612 - MIND AND MEDICINE
- HPS 0613 - MORALITY AND MEDICINE
- NROSCI 0080 - BRAIN AND BEHAVIOR
- NROSCI 0081 - DRUGS AND BEHAVIOR
- PHIL 0360 - INTRODUCTION TO BIOMEDICAL ETHICS
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY
- SOC 0007 - SOCIAL PROBLEMS
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0444 - URBAN SOCIOLOGY
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0473 - SOCIOLOGY OF GLOBALIZATION AND HEALTH
- SOC 0477 - MEDICAL SOCIOLOGY
- STAT 0800 - STATISTICS IN THE MODERN WORLD

Upper-Level Electives

- AFRCNA 1510 - HEALTH IN THE AFRICAN DIASPORA
- AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES
- AFRCNA 1903 - DIRECTED RESEARCH
- ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1
- ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- ANTH 1793 - ASIAN MEDICAL SYSTEMS
- BIOETH 2001 - ETHICS AND AGING
- BIOETH 2658 - PHILOSOPHY OF MEDICINE
- BIOETH 2664 - BIOETHICS
- COMMRC 1101 - EVIDENCE
- COMMRC 1123 - RHETORICAL CRITICISM
- COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE
- ENGCMP 1102 - LANGUAGE OF MEDICINE
- ENGCMP 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
- ENGLIT 1180 - HUMANS, ANIMALS, MACHINES IN VICTORIAN LITERATURE
- ENGFLM 1671 - MAKING THE DOCUMENTARY
- ENGWRIT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWRIT 1390 - READINGS IN CONTEMPORARY NON-FICTION
- GSWS 1141 - SPECIAL TOPICS IN GENDER, SEXUALITY, AND WOMEN'S STUDIES
- HIST 1026 - STATES AND SEX IN THE AMERICAS
- HIST 1090 - HISTORY OF MEDICINE AND HEALTH CARE OR
- SOC 1488 - HISTORY MEDICINE AND HEALTH CARE
- HIST 1091 - GLOBAL HEALTH HISTORY: HISTORICAL PERSPECTIVE
- HIST 1197 - BLACK DEATH: PLAGUE AND HISTORY
- HIST 1425 - HISTORY OF MEDICINE IN CHINA
- HIST 1725 - DISEASE AND HEALTH IN MODERN AFRICA
- PHIL 1360 - BIOMEDICAL ETHICS
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- PSY 1205 - ABNORMAL PSYCHOLOGY
- PSY 1230 - PSYCHOLOGY OF DEATH AND DYING
- PSY 1357 - PSYCHOLOGY OF AGING
- PSY 1470 - COGNITION AND THE BRAIN

- PSY 1215 - HEALTH PSYCHOLOGY
- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD OR
- CLASS 1090 - TOPICS IN CLASSICAL CULTURE OR
- HIST 1714 - DEATH IN MEDITERRANEAN WORLD
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES OR
- HIST 1484 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS OR
- HPS 1623 - DEATH AND HEALTHCARE PROFESSIONS
- SOC 1324 - SOCIAL PROBLEMS AND MORAL CRUSADES
- SOC 1445 - SOCIETY AND ENVIRONMENT
- SOC 1450 - HEALTH AND ILLNESS
- SPAN 1323 - MEDICAL SPANISH

Grade Requirements

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

Students interested in the certificate should contact one of the advisors in the Department of English.

Public Communication of Science and Technology Certificate

Writing plays a crucial role in the lives of people after they leave college as they work, volunteer, attend professional schools, and advocate for themselves and others. The Public Communication of Science and Technology (PCST) Certificate is designed for science- and technology-oriented students in any major who understand the value of being able to communicate their research outside their own narrow field, who know that they will need to convince others to support their research, and who anticipate that they will need to communicate the implications of their research to the public. It will also serve students who want to pursue a career as a writer in science and technical fields.

Students will use the knowledge and abilities taught in this certificate in a variety of fields: to convey the significance of research to the public, grantors, institutions, and colleagues; to educate as part of the mission for public service institutions, such as museums and science centers; to craft messages to enhance patient education and care in medical contexts; to educate policy makers on the most effective solutions to problems; to communicate theory and studies in scientific and technological contexts; as editors and writers for journals that publish research findings; as journalists working science beats; and as artists working with themes, images, materials, and ideas from scientific research.

The certificate program requires 18 credits, described as follows.

Core Course

- ENGCOMP 0430 - PUBLIC COMMUNICATION OF SCIENCE AND TECHNOLOGY

Using Information Technology

Select one of the following courses.

- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN

- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION

Elective Courses for the Certificate

Select three of the following courses.

- ENGCOMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
- ENGCOMP 0412 - ENGINEERING COMMUNICATION IN A PROFESSIONAL CONTEXT
- ENGCOMP 0432 - WRITING FOR ENVIRONMENTAL ADVOCACY
- ENGCOMP 0450 - RESEARCH WRITING
- ENGCOMP 0521 - WRITING WITH DATA
- ENGCOMP 0530 - WRITING FOR THE SCIENCES
- ENGCOMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
- ENGCOMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCOMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCOMP 1102 - LANGUAGE OF MEDICINE
- ENGCOMP 1402 - GRANT WRITING FOR RESEARCH
- ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
- ENGCOMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGLIT 0541 - LITERATURE AND MEDICINE
- ENGLIT 0612 - LITERATURE AND SCIENCE
- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
- ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT
- GSWS 0400 - GENDER AND SCIENCE

Students who have declared a major in the Department of Geology and Environmental Science may use either or both of the following course as elective options.

- GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS
- GEOL 1315 - COMMUNICATION IN GEOSCIENCES/WRIT REQUIREMENT

Capstone Course

Select one of the following courses.

- ENGCOMP 1910 - BRIDGE SEMINAR
- ENGCOMP - PCST Capstone

Additional information

Grade Requirements

Students are expected to achieve a minimum grade of C, or a Satisfactory (S) grade if taken on a Satisfactory/No Credit (S/NC) grade option, in each course required for this certificate.

Satisfactory/No Credit Option

There is no limit to the number of courses that can be taken on the S/NC basis for this certificate.

For more information

Visit the certificate's Web page at www.WritingInstitute.Pitt.edu/PCST for more details. Questions about the certificate can be addressed to Amy Flick.

Joint Major

Digital Narrative and Interactive Design, BA/BS

Digital Narrative and Interactive Design

The Digital Narrative and Interactive Design major (DNID) harnesses the narrative, world-building, and media studies strengths of the English department and the coding, software development, and human computer interface strengths of the School of Computing and Information. It draws upon existing initiatives in game design at SCI and critical game studies, making, and media production within the English department. Students will learn how to build interactive narrative systems such as games, interactive literature, virtual reality environments and other interactive media experiences in a variety of fields. They will learn to creatively combine design with narrative, code with story. This uniquely positions majors in today's workforce: game and interactive media design is booming in nearly every field and sector. What these positions require, and what is currently in short supply, are individuals capable of both understanding the intricacies of narrative and implementing that knowledge in the form of computational media (coded interactive systems).

The DNID major is managed jointly by the Dietrich School of Arts and Sciences and the School of Computing and Information. This program offers training that builds a solid foundation in English (Writing, Composition, Film and Media Studies, and Literature), Computer Science, and Information Science.

Core and Upper Level Courses

Gateway course

Choose one of the following courses.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGCOMP 0425 - DIGITAL HUMANITY
- HAA 0425 - DIGITAL HUMANITY

Composition courses

Choose one of the following courses.

- ENGCOMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Programming Basics courses

Choose one of the following courses.

- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- INFSCI 0510 - DATA ANALYSIS

Intermediate Programming course

- CMPINF 0401 - INTERMEDIATE PROGRAMMING

Interaction and Narrative course

Choose one of the following courses. Students who take ENGLIT 0512 for their Gateway course may not use it to fulfill this requirement.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1002 - GAME, STORY, PLAY

Media Literacy course

Choose one of the following courses.

- ENGFLM 0355 - VISUAL LITERACY
- ENGFLM 0401 - IMAGES, ICONS, AND IDEAS
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENGFLM 1680 - ANIMATION STUDIES
- FMST 0100 - VISUAL LITERACY
- FMST 0505 - INTRODUCTION TO NEW MEDIA
- FMST 1510 - ANIMATION STUDIES

Data Literacy course

Choose one of the following courses.

- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS

Elective courses

Students must complete two elective courses from the **School of Computing and Information** and two elective courses from the **Dietrich School of Arts and Sciences**. Courses offering a depth of knowledge in pre-identified areas of interest are clustered together to provide a guide for students; Students are not required to follow nor declare a specific track.

Online Media track

School of Computing and Information courses

Choose two of the following courses.

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS

- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS
- INFSCI 1420 - USER-CENTERED DESIGN
- INFSCI 1550 - SPATIAL INFORMATION

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
 - ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
 - ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
 - ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION
 - ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
 - ENGFLM 0570 - INTRODUCTION TO NEW MEDIA * or
 - FMST 0505 - INTRODUCTION TO NEW MEDIA *
- * These courses may only be taken for the Online Media track if they were not used to meet the Media Literacy requirement.
- ENGFLM 0812 - MEDIA/ECOLOGY or
 - ENGLIT 0812 - MEDIA/ECOLOGY or
 - FMST 0762 - MEDIA/ECOLOGY
 - ENGLIT 1001 - INTERACTIVE LITERATURE
 - ENGLIT 1412 - SECRET PITTSBURGH
 - ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
 - ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
 - ENGWRT 1501 - TOPICS IN CREATIVE WRITING
 - GSWS 1210 - GENDER AND THE DIGITAL

Game Design track

School of Computing and Information courses

Choose two of the following courses.

- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1014 - GRAPHICS
- INFSCI 1450 - GAME DESIGN
- INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA or
- FMST 0505 - INTRODUCTION TO NEW MEDIA

- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 0812 - MEDIA/ECOLOGY or
- ENGLIT 0812 - MEDIA/ECOLOGY or
- FMST 0762 - MEDIA/ECOLOGY
- FMST 1412 - CINEMA AND VIDEO GAMES
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1002 - GAME, STORY, PLAY
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWR 0520 - INTRODUCTION TO FICTION WRITING
- ENGFLM 1760 - CINEMA AND VIDEO GAMES

Critical Making track

School of Computing and Information courses

Choose two of the following courses.

- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1567 - PROGRAMMING SYSTEM DESIGN ON A MOBILE ROBOT PLATFORM
- CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1059 - WEB PROGRAMMING

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 0712 - CRITICAL MAKING or
- ENGLIT 0712 - CRITICAL MAKING or
- ENGFLM 0712 - CRITICAL MAKING or
- FMST 0760 - CRITICAL MAKING
- ENGCOMP 1200 - ADVANCED TOPICS IN COMPOSITION
- ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 0590 - FILMMAKING: PRODUCTION AND CRITICISM or
- FMST 0710 - FILMMAKING: PRODUCTION AND CRITICISM
- ENGFLM 0812 - MEDIA/ECOLOGY or
- ENGLIT 0812 - MEDIA/ECOLOGY or
- FMST 0762 - MEDIA/ECOLOGY

- ENGLIT 0521 - SCAN CULTURE: SURVEILLANCE AND THE DIGITAL
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1501 - TOPICS IN CREATIVE WRITING

Capstone sequence

The Capstone sequence allows students to design and implement a signature project to complete the major. Students start with the design project (Project 1) and complete the sequence with the implementation project (Project 2) in consultation with their advisors. Students seeking Independent Study or Directed Study options for the capstone sequence should work with their advisors to ensure that the work done in these courses will complete the sequence.

Project 1

Choose one of the following courses.

- ENGCOMP 1910 - BRIDGE SEMINAR
- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1901 - INDEPENDENT STUDY (by special arrangement only)

Project 2

- CMPINF 1981 - PROJECT STUDIO
- CS 1902 - DIRECTED STUDY (by special arrangement only)
- INFSCI 1730 - INDEPENDENT STUDY (by special arrangement only)
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT

Additional Information

Writing (W) requirement

Dietrich School students must complete at least one W-course in the major. ENGCOMP 0610 fulfills this requirement.

Grade requirements

Students must maintain at least a 2.0 GPA in all courses that apply toward the major.

Satisfactory/No Credit option

There is no limit to the number of English (ENGCOMP, ENGFLM, ENGLIT, ENGWRT, FMST) courses that can be taken on the S/NC basis for this major. No School of Computing and Information courses (CMPINF, CS, INFSCI) courses may be taken on an S/NC basis.

Advising

Digital Narrative and Interactive Design is a joint undergraduate degree between the Dietrich School of Arts and Sciences and the School of Computing and Information. Students enrolled in each school are advised by advisors within that school.

Major

English Literature, BA

The English literature major is designed to develop a critical understanding of literary and cultural traditions in English that is at once informed, skeptical, and appreciative. Some of the distinctive features of the literature curriculum at the University of Pittsburgh are the recurrent concerns from the introductory to the most advanced undergraduate courses with the following: questions of how and why we read and write and participate in cultural activities; the contexts in which a range of literary texts and films are produced, understood, evaluated, and used; and the changing role of art and culture in the contemporary world. The major offers students opportunities to study canonical works of British and American literature from medieval times to the present; often, these texts will be studied in conjunction with historical or philosophical works, with other national literatures in English, and/or with films or works of popular culture. In many courses, students' own writing will be an important object of study.

Major Requirements

The English literature major requires the completion of 36 credits distributed as follows.

- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE I
- ENGLIT 0506 - LITERARY FIELD STUDIES

Two period courses chosen from a listing of approved courses

www.englishlit.pitt.edu/undergraduate/major-requirements

Advanced courses

- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1910 - SENIOR SEMINAR

Six elective courses

- At least four of these courses should fall within the designated area of concentration selected by the student. Students may apply for special approval with the director of the Literature program to count an elective not previously listed in a given area of concentration.
- At least three of these courses must be from the 1000-level or above.
- Students may take up to two courses from other programs in the Department of English (Composition, Film, Writing) designated within their area of concentration. Students may apply for special approval with the director of the Literature program to count an additional elective from another English program.
- At least one of these courses should also fulfill a breadth of study requirement. Students should ask instructors or advisors whether a particular course or section fulfills this requirement.
- Independent study, directed study, teaching assistantships, and internships may count toward any concentration depending upon the nature of the student's work.

Additional information and requirements

- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English majors automatically fulfill Dietrich School requirements for W courses.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.
- The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English departmental courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

English Writing, BA

The University of Pittsburgh's Writing Program is the oldest and one of the largest in the United States, offering tracks in fiction, poetry, nonfiction, and journalism. There is a wide variety of classes, and the maximum size is 22. The Writing Program has a full-time faculty of widely published writers, several visiting writers each year, and a number of part-time faculty who are senior reporters or editors at Pittsburgh newspapers and magazines. Graduates of the writing program include editors at major daily newspapers and publishing houses and winners of the Pulitzer Prize and other major awards.

Visit the Department of English Academic Programs page for more information on its majors.

Major Requirements

A minimum of 33 credits is required: 21 credits in English writing courses and 12 in English literature courses.

Majors must choose one of three tracks: fiction, nonfiction, or poetry. In most cases, students will take other writing courses as well. Each track consists of three levels of courses. The introductory courses (0500s) offer a broad introduction to the skills required of writers in a particular area and generally should be taken no later than the first term of the junior year. The intermediate courses (1000s for fiction, 1200s for poetry, 1300s for nonfiction) refine and develop those skills. The senior seminars (1700s) provide a capstone experience for the student writer. Students should check prerequisites carefully before registration.

English Writing prerequisite

Students must complete one of the following prerequisite courses before declaring the major.

- ENGCOMP 0200 - SEMINAR IN COMPOSITION
- ENGCOMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGCOMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCOMP 0207 - SEMINAR IN COMPOSITION: EDUCATION
- ENGCOMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING
- ENGCOMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING
- ENGCOMP 0212 - SEMINAR IN COMPOSITION: TOPICS IN DIVERSITY
- ENGCOMP 0213 - SEMINAR IN COMPOSITION: DISABILITY STUDIES
- FP 0003 - FIRST-YEAR SEMINAR
- FP 0006 - FIRST-YEAR SEMINAR

Fiction track

Writing courses

- ENGWRT 0520 - INTRODUCTION TO FICTION WRITING
- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION
- ENGWRT 1710 - SENIOR SEMINAR IN FICTION
- Three additional ENGWRT elective courses

Literature courses

- ENGLIT 0325 - THE SHORT STORY
- Two ENGLIT electives from the list below
- One additional ENGLIT elective at the 1000-level from the list below

Nonfiction track

Writing courses

- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWR 1390 - READINGS IN CONTEMPORARY NON-FICTION
- ENGWR 1750 - SENIOR SEMINAR IN NONFICTION
- Three additional ENGWR elective courses

Literature courses

- ENGLIT 0500-level or above elective
- ENGLIT 1000-level elective

Poetry track

Writing courses

- ENGWR 0530 - INTRODUCTION TO POETRY WRITING
- ENGWR 1210 - POETRY WORKSHOP
- ENGWR 1290 - READINGS IN CONTEMPORARY POETRY
- ENGWR 1730 - SENIOR SEMINAR IN POETRY
- Three additional ENGWR elective courses

Literature courses

- ENGLIT 0315 - READING POETRY
- Two ENGLIT electives from the list below
- One additional ENGLIT elective at the 1000-level from the list below

English Writing elective courses

Elective courses may be taken in another track if the student wishes.

English Literature approved courses

- ENGLIT 0500 - INTRODUCTION TO CRITICAL READING
- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1
- ENGLIT 0560 - CHILDREN AND CULTURE
- ENGLIT 0562 - CHILDHOOD'S BOOKS
- ENGLIT 0570 - AMERICAN LITERATURE
- ENGLIT 0573 - LITERATURE OF THE AMERICAS
- ENGLIT 0580 - INTRODUCTION TO SHAKESPEARE
- ENGLIT 0590 - FORMATIVE MASTERPIECES
- ENGLIT 0597 - BIBLE AS LITERATURE
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0616 - EXILES, NOMADS, AND MIGRANTS
- ENGLIT 0625 - DETECTIVE FICTION
- ENGLIT 0626 - SCIENCE FICTION
- ENGLIT 0628 - WORKING CLASS LITERATURE

- ENGLIT 0629 - THE WILD WEST
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0636 - THE GOTHIC IMAGINATION
- ENGLIT 0640 - ALLEGORY
- ENGLIT 0642 - COMEDY
- ENGLIT 0643 - SATIRE
- ENGLIT 0644 - MYTH AND FOLKTALE
- ENGLIT 0645 - FANTASY
- ENGLIT 0655 - REPRESENTING ADOLESCENCE
- ENGLIT 1020 - HISTORY OF LITERARY CRITICISM
- ENGLIT 1028 - LITERATURE AND PSYCHOANALYSIS
- ENGLIT 1100 - MEDIEVAL IMAGINATION
- ENGLIT 1115 - CHAUCER
- ENGLIT 1125 - MASTERPIECES OF RENAISSANCE LITERATURE
- ENGLIT 1135 - LITERATURE, MEDIA, AND SCIENCE IN THE AGE OF SHAKESPEARE
- ENGLIT 1126 - ADVANCED SHAKESPEARE
- ENGLIT 1127 - SHAKESPEARE ON FILM
- ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES
- ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION
- ENGLIT 1170 - ROMANTIC NATURE
- ENGLIT 1175 - 19TH CENTURY BRITISH LITERATURE
- ENGLIT 1180 - HUMANS, ANIMALS, MACHINES IN VICTORIAN LITERATURE
- ENGLIT 1181 - VICTORIAN NOVEL
- ENGLIT 1200 - AMERICAN LITERATURE TO 1860
- ENGLIT 1220 - CIVIL WAR TO WORLD WAR I IN AMERICAN LITERATURE
- ENGLIT 1272 - THE ROARING 20'S: FROM FARMERS TO FACTORY WORKERS, FROM FLAPPERS TO FINANCIERS
- ENGLIT 1325 - MODERNISM
- ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT
- ENGLIT 1380 - WORLD LITERATURE IN ENGLISH
- ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT
- ENGLIT 1704 - WOMEN NOVELISTS
- ENGLIT 1756 - BALLADS AND BLUES
- ENGLIT 1738 - IRISH LITERATURE

English Writing additional information and requirements

- A minimum grade of C or better (not C-) is required in a 0500-level writing course to advance to the first 1000-level course in that track. Students who earn less than a C in their first 1000-level course may not advance to other courses in that track. Moreover, students must earn a C or better (not C-) grade in their senior seminar or internship course.
- Students are encouraged to take additional writing and literature courses beyond the required minimum. Courses in film studies, women's studies, business, and technical writing are particularly useful for English writing majors.
- Completion of at least one composition course is required for enrollment in a writing program course.
- ENGWR 0400 - INTRODUCTION TO CREATIVE WRITING and ENGWR 0411 - INTRODUCTION TO CREATIVE NONFICTION are optional introductory courses and may be taken during the second year by students who have recently declared a major in writing, are seriously considering writing as a major, or are taking their first 0500-level course. ENGWR 0400 can only count as an elective towards the Writing degree if taken before ENGWR 0520 or ENGWR 0530. Likewise, ENGWR 0411 may be taken as an elective before ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW.
- There is no limit on the number of courses English majors may take on an S/NC basis, either inside or outside the department.
- English writing majors automatically fulfill Dietrich School requirements for W courses. Students pursuing a second major are required to complete an additional W course for that major.
- Students who contemplate graduate study in English should remember that many schools do require second language competence, sometimes in more than one language.

The English department confers honors on those graduates who maintain a 3.25 overall GPA with a GPA of 3.50 or better in English department courses. The GPA is based on all English department courses, not just those that fulfill major requirements.

Public and Professional Writing, BA

The Public and Professional Writing (PPW) major in the Department of English allows students to undertake rigorous intellectual work that will deepen their engagement with writing as a form of social action and professional exchange that has consequences in the world. Students in the major can expect to address critical questions in public and professional writing; learn how to use the forms and genres of particular professions or fields; learn how to compose effectively on behalf of an organization or campaign; learn how to create engaging documents and carry out inquiry projects for a particular audience; compose using appropriate modalities and technology; compose with awareness of textual forms and conventions; conduct responsible and ethical research; explore the history and politics of writing in specific contexts; engage with public debates over language, globalization, education, and writing; and compose as a creative and disciplined form of critical inquiry. PPW majors can expect to find jobs in the nonprofit sector, government, or the commercial sector.

Required courses for the major

The Public and Professional Writing BA requires the completion of 33 credits, distributed as follows.

Students may choose to follow clusters of courses that will lead to in-depth study in specific areas or for specific career paths: Writing to Support Scientific Research, Preparing for Law School, Writing for Nonprofits, Writing for Business, Teaching and Composition Studies, Advertising and PR Writing, Composing Digital Media, Editing and Publishing, Preparing for Graduate School, Public Engagement, and others. See the list of possible clusters that apply to this major.

Prerequisites

The Seminar in Composition requirement must be completed prior to enrollment in any ENGCOMP courses at or above the 0400-level. A Seminar in Composition course can be selected from the following list.

- ENGCOMP 0200 - SEMINAR IN COMPOSITION
- ENGCOMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGCOMP 0205 - SEMINAR IN COMPOSITION: FILM
- ENGCOMP 0207 - SEMINAR IN COMPOSITION: EDUCATION
- ENGCOMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING
- ENGCOMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING
- FP 0003 - FIRST-YEAR SEMINAR
- FP 0006 - FIRST-YEAR SEMINAR

Core courses

- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 0560 - WRITING ARGUMENTS
- ENGCOMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE
- ENGCOMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING or
- ENGCOMP 1901 - UTA IN TEACHING AND TUTORING WRITING *
- ENGCOMP 1910 - BRIDGE SEMINAR

Three 1000-level courses

Students must complete three ENGCOMP courses at the 1000-level or above.

Three elective courses

Students must complete three courses at the 0400-level or above.

Grade requirements:

A minimum grade of C or better is required in any 0400- or 0500-level ENGCOMP course to advance to the first 1000-level course.

Satisfactory/No Credit option:

There is no limit to the number of courses that may be taken on the S/NC basis for this major.

Writing (W) requirement:

Most ENGCOMP courses satisfy the W requirement. Students pursuing a second major are required to complete an additional W-course for the major in that department.

- ENGCOMP 1903 - SERVICE-LEARNING SEMINAR IN PUBLIC AND PROFESSIONAL WRITING
- ENGCOMP 1910 - BRIDGE SEMINAR

Minor

Creative Writing Minor

As one of the oldest writing programs in the United States, the Writing Program at the University of Pittsburgh has an excellent record of not only producing talented creative writers but also developing the writing skills of undergraduates who go on to work in a variety of professions, including journalism, education, law, and publishing. The minor in Creative Writing fulfills a need that is different from the Certificate in Professional Writing, with its particular focus on writing in business, non-profit, and legal environments, and the Writing Major, which requires a more substantial commitment of time and study.

Before declaring the minor in Creative Writing, students must complete an English Composition course (ENGCOMP 0200, ENGCOMP 0203, ENGCOMP 0205, ENGCOMP 0207, or ENGCOMP 0208) to develop the skills necessary for effectively reading and writing at the college level. Students must take ENGWRT 0400 - INTRODUCTION TO CREATIVE WRITING.

This minor requires students to complete 18 credits of coursework as follows.

One of the following groups of courses.

Fiction

- ENGWRT 0520 - INTRODUCTION TO FICTION WRITING
- ENGWRT 1010 - INTERMEDIATE FICTION
- ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION

Poetry

- ENGWR 0530 - INTRODUCTION TO POETRY WRITING
- ENGWR 1210 - POETRY WORKSHOP
- ENGWR 1290 - READINGS IN CONTEMPORARY POETRY

Nonfiction

- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWR 1390 - READINGS IN CONTEMPORARY NON-FICTION

Two of the following courses.

- ENGWR 0520 - INTRODUCTION TO FICTION WRITING
- ENGWR 0530 - INTRODUCTION TO POETRY WRITING
- ENGWR 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWR 1090 - MASTERING POINT OF VIEW
- ENGWR 1091 - AUTOBIOGRAPHY AND CREATIVE IMPULSE
- ENGWR 1092 - WRITER'S JOURNALS
- ENGWR 1293 - TOPICS IN POETRY
- ENGWR 1399 - TOPICS IN NON-FICTION: NEWSPAPER
- ENGWR 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA
- ENGWR 1650 - PLAYWRITING I

English Literature Minor

An undergraduate minor in English literature would help students in a variety of majors to represent significant expertise they have accrued in this field on their transcripts. The structure of the minor will also help direct students with a significant interest in English literature to sequences and sets of courses that are designed to develop their interest; they can take a mini-curriculum rather than just a smattering of electives. A minor in English literature is a desirable supplement to many degrees across the Dietrich School because it provides insights into cultural traditions and practices, develops students' abilities to write analytic arguments, and promotes critical thinking.

The minor consists of 18 credits and comprises the following courses.

- ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE I
- ENGLIT 0506 - LITERARY FIELD STUDIES
- Two elective courses at the 0500-level or above
- Two elective courses at the 1000-level or above
- ENGLIT 1900 - PROJECT SEMINAR is recommended but not required.

Film and Media Studies Program

While film studies is not a department, it is an interdisciplinary program and an administrative unit offering both a major and a minor in film studies. Film is one of the major cultural forms of the 20th century, and its study has become an important part of a modern humanities education. At the University of Pittsburgh, the Film and Media Studies Program provides a series of interdisciplinary courses concerning the history, aesthetics, theory, and production of cinema. The program provides courses in critical studies, film, photography, and video production. A major in Film and Media Studies helps students to understand and appreciate the cinematic medium and to be aware of its impact as a cultural and artistic force. It is also appropriate for students who wish to pursue careers in film teaching, film journalism, film museum curatorial work, film library and archival work, and film and television production. As part of the Film and Media Studies Program, internships are made available to students in many of these fields. In the past, students have done internships at the Carnegie Museum of Art, the Pittsburgh Film Office, Pittsburgh Filmmakers, and various television stations.

Various options are available to students interested in Film and Media Studies. For those students who wish to make film studies the primary focus of their undergraduate program, it is possible to pursue an interdisciplinary major in Film and Media Studies. For those students who wish to major in another area but desire a focus in film studies, a minor in Film and Media Studies is available. In addition, many students choose to take elective courses in film studies as part of their undergraduate curriculum.

For more information on the film studies major, see www.filmstudies.pitt.edu/.

Certificate

Television and Broadcast Arts Certificate

The Television and Broadcast Arts Certificate will allow students to professionalize and credential themselves in a visible way by developing broad competencies in broadcast along with an understanding of critical issues in broadcast/television. In addition, students may cluster their courses in a variety of ways to allow critical and practical development in specific areas, whether in front of, behind or in support of the camera.

Students will complete the course of study to attain competency in key broadcast areas as well as the application of critical concepts to their broadcast practices in the area in which they have self-selected to concentrate. Students will have an opportunity to display their work in the spring term and participate in professional workshops, including interactive sessions with industry professionals. These materials will constitute part of an online resumé or reel highlighting a students' experiences, skills, and interests while developing professional credentials.

The certificate program requires 18 credits, described as follows. At least nine of the credits must be taken at the 1000-level or above.

Required courses

All of the following courses are required for the certificate.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- ENGFLM 1752 - TELEVISION ANALYSIS or
- FMST 1508 - TELEVISION ANALYSIS
- FMST 1885 - BROADCASTING

Electives

Select three courses from the following list. No more than two elective courses may be from the same department.

- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION
- COMMRC 1105 - TELEVISION AND SOCIETY
- COMMRC 1121 - HISTORY OF MASS MEDIA
- COMMRC 1122 - MEDIA CRITICISM
- COMMRC 1126 - MEDIA AND CONSUMER CULTURE
- ENGCOMP 0420 - WRITING FOR THE PUBLIC
- ENGCOMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
- ENGFLM 0355 - VISUAL LITERACY /FMST 0100 - VISUAL LITERACY
OR
- ENGFLM 0401 - IMAGES, ICONS, AND IDEAS /FMST 0130 - IMAGES, ICONS, AND IDEAS
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY /FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 1683 - DOCUMENTARY FILM /FMST 1540 - DOCUMENTARY FILM
- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

- ENGWR 0710 - INTRO TO AUDIO STORYTELLING
- ENGWR 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- ENGWR 1360 - THE ART OF THE INTERVIEW
- ENGWR 1393 - SPORTS WRITING
- ENGWR 1490 - LISTENING TO NARRATIVE AUDIO
- ENGWR 1750 - SENIOR SEMINAR IN NONFICTION
- FMST 0800 - FILMMAKING 1: FUNDAMENTALS
- FMST 0835 - ELEMENTS OF AUDIO PRODUCTION
- FMST 1740 - MAKING THE DOCUMENTARY
- FMST 1855 - DIRECTING MOTION PICTURES
- FMST 1870 - ACTING FOR THE CAMERA
- FMST 1875 - SOUND FOR MOTION PICTURES
- FMST 1886 - BROADCASTING 2
- FMST 1890 - THE BUSINESS OF BROADCASTING
- FMST 1893 - HUMAN INTEREST STORIES FOR BROADCAST

Additional information

Grade Requirements

A minimum letter grade of C is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

There is no limit to the number of courses that may be taken on the S/NC basis for this certificate.

Major

Film and Media Studies, BA

The study of film and media is an important part of a contemporary humanities education. At the University of Pittsburgh, the Film and Media Studies Program offers interdisciplinary courses concerning the history, aesthetics, and theory of cinema and time-based media and courses in film and video production.

A major in film and media studies helps students to understand and appreciate the cinematic medium and to be aware of its impact as a cultural and artistic force. It is appropriate for those students who wish to pursue careers in film teaching, film exhibition, film journalism, film museum curatorial work, film library and archive work, and film and television production. As part of the Film and Media Studies Program, internships are available to students in many of these fields at locations including local television stations, Pitt Studios, Pittsburgh-based film festivals, casting agencies, and museums. Critical Studies and Film and Media Production tracks alike provide liberal arts educations with professional outcomes.

Critical Studies track requirements

Critical Studies courses

- ENGFLM 0530 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY
- ENGFLM 1920 - ADVANCED SEMINAR IN FILM STUDIES

Production course

Students must take one of the following production courses.

- FMST 0800 - FILMMAKING 1: FUNDAMENTALS
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- SA 0180 - PHOTO STUDIO 1

National Cinemas or Filmmakers courses

Two courses must be chosen from the above category as listed on the back of this sheet.

Themes/Genres/Theory courses

Two courses must be chosen from the above category as listed on the back of this sheet.

Elective courses

Four courses must be chosen from the three categories listed on the back of this sheet.

Important Course notes

No more than five production courses may be counted toward the major, although additional production courses can be taken as electives toward graduation.

One three-credit internship can be counted in the production category toward the major.

Production track requirements

Foundational course

- FMST 0800 - FILMMAKING 1: FUNDAMENTALS

Screenwriting course

- FMST 1860 - ELEMENTS OF SCREENWRITING

Production course

Select one of the following courses.

- FMST 0845 - FILMMAKING 2: SIGHT AND SOUND
- SA 1380 - DIGITAL STUDIO: VIDEO

Capstone course

- FMST 1921 - FILM AND MEDIA STUDIES PRODUCTION CAPSTONE

Technical elective course; choose two courses

- ENGWR 0560 - SCREENWRITING AND NARRATIVE / FMST 0700 - SCREENWRITING AND NARRATIVE
- FMST 0780 - INTRODUCTION TO AUDIO STORYTELLING
- FMST 0826 - POST-PRODUCTION
- FMST 0827 - ADVANCED EDITING
- FMST 0835 - ELEMENTS OF AUDIO PRODUCTION
- FMST 0850 - DIGITAL EFFECTS 1
- FMST 0855 - TOPICS IN PRODUCTION
- FMST 1197 - MOVING IMAGE EDITING
- FMST 1777 - DIGITAL STUDIO: ANIMATION or
- SA 1385 - DIGITAL STUDIO: ANIMATION
- FMST 1817 - LIGHTING FOR MOTION PICTURES
- FMST 1846 - FILMMAKING 3: STORY TO SCREEN
- FMST 1847 - CREW PRODUCTION PRACTICUM
- FMST 1852 - DIRECTING ACTORS
- FMST 1855 - DIRECTING MOTION PICTURES
- FMST 1862 - INTERMEDIATE SCREENWRITING
- FMST 1865 - WRITING THE ORIGINAL SERIES
- FMST 1875 - SOUND FOR MOTION PICTURES
- FMST 1880 - DIGITAL CINEMATOGRAPHY
- FMST 1886 - BROADCASTING 2
- FMST 1898 - TELEVISION NEWS PRACTICUM: PITT TO THE POINT
- FMST 1899 - THE FRONT BENCH

Topical elective courses; choose two courses

- ENGFLM 0585 - TECHNOLOGIES OF THE BODY / FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 0712 - CRITICAL MAKING / FMST 0760 - CRITICAL MAKING
- ENGFLM 1671 - MAKING THE DOCUMENTARY / FMST 1740 - MAKING THE DOCUMENTARY
- ENGFLM 1672 - VISITING FILMMAKER: PRODUCTION AND CRITICISM / FMST 1720 - VISITING FILMMAKER: PRODUCTION AND CRITICISM
- ENGFLM 1684 - MOCKUMENTARY: PRODUCTION AND CRITICISM / FMST 1715 - MOCKUMENTARY: PRODUCTION AND CRITICISM
- ENGFLM 1752 - TELEVISION ANALYSIS / FMST 1508 - TELEVISION ANALYSIS
- ENGFLM 1930 - INTERNSHIP IN FILM / FMST 1900 - INTERNSHIP IN FILM AND MEDIA STUDIES
- FMST 1750 - CREATIVE PRODUCTION WORKSHOP
- ENGWR 0560 - SCREENWRITING AND NARRATIVE / FMST 0700 - SCREENWRITING AND NARRATIVE
- FMST 0833 - PRODUCING: FILM, TELEVISION AND OTHER MEDIA
- FMST 1196 - DIGITAL MEDIA PRACTICE
- FMST 1546 - EXPERIMENTAL CINEMA
- FMST 1549 - INDUSTRIES AND FESTIVALS: FILM AND MEDIA
- FMST 1765 - VIRTUAL REALITY
- FMST 1781 - LISTENING TO NARRATIVE AUDIO
- FMST 1883 - EXPERIMENTAL CAMERA
- FMST 1885 - BROADCASTING
- FMST 1890 - THE BUSINESS OF BROADCASTING
- FMST 1893 - HUMAN INTEREST STORIES FOR BROADCAST

Critical Studies courses

One course from each of the following pairs of courses.

- ENGFLM 0530 - FILM ANALYSIS or
- FMST 0150 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY or
- FMST 0170 - WORLD FILM HISTORY

Two category courses

Students must take two courses from either the **National Cinemas or Film** or the **Themes, Genres, or Theory** category listed below.

National Cinemas or Film courses

- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA
- CHIN 1089 - THE WORLD OF CHINA
- ENGFLM 1190 - BRITISH FILM
- ENGFLM 1192 - IRISH FILM
- ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- ENGFLM 1290 - AMERICAN FILM 1
- ENGFLM 1291 - AMERICAN FILM 2
- ENGFLM 1390 - CONTEMPORARY FILM
- ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA
- ENGFLM 1420 - TRANSNATIONAL EAST ASIAN CINEMAS
- ENGFLM 1470 - FILM DIRECTORS
- ENGFLM 1471 - ORSON WELLES
- ENGFLM 1472 - HITCHCOCK'S FILMS
- ENGFLM 1473 - SPIKE LEE
- ENGFLM 1476 - THE FILMS OF STANLEY KUBRICK
- ENGFLM 1670 - GLOBAL ANIME
- FMST 0301 - HISTORY OF ITALIAN CINEMA
- FMST 0303 - ITALIAN CINEMA ICONS
- FMST 1331 - JEWS AND THE AMERICAN CINEMA
- HAA 1806 - AMERICAN INDEPENDENT FILM
- HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES

Additional Rules and Requirements

ENGFLM 0530 and ENGFLM 0540

The Film and Media Studies program recommends that students complete ENGFLM 0530 - FILM ANALYSIS and ENGFLM 0540 - WORLD FILM HISTORY or their equivalents prior to taking any 1000-level film courses.

Production courses

No more than five production courses may be counted toward the Critical Studies track in the major. Additional production courses may be taken to meet the minimum credit requirement for graduation.

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option

No more than three courses that count toward the major can be taken on an S/NC basis.

Internship

Only one 3-credit film internship can be counted toward the major.

Writing requirement

Students must complete at least one W-course in the major.

Minor

Film and Media Studies Minor

In the spring of 2018, the Film Studies minor was renamed to Film and Media Studies minor. Students who were enrolled prior to the Spring 2018 term have the option to stay Film Studies minor or change to the Film and Media Studies minor. They will have until the end of the Fall 2017 term to choose to complete the program under the current name. Students who choose to complete their program under the current name must do so by Summer 2020 term. There are no program requirement changes.

Required Courses

Two Critical Studies Courses

- ENGFLM 0530 - FILM ANALYSIS
- ENGFLM 0540 - WORLD FILM HISTORY

Four Elective Courses

Elective courses must be taken from at least two of the three categories:

- National Cinemas or Film
- Themes, Genres, or Theory
- Production

No more than two courses can be taken from the **Production** category.

National Cinemas or Film courses

- CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM
- CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN
- CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
- CHIN 1088 - NEW CHINESE CINEMA

Note:

Only one elective course for the minor can be taken on an S/NC basis. Half of the courses for the minor must be taken at Pitt. Students pursuing the minor must meet with the film studies advisors to check their progress. Courses taken at other schools must be approved.

Department of French and Italian

A major in French and/or Italian gives students at the University of Pittsburgh the opportunity to study a second language in detail and to acquire an education in a literary and cultural tradition central to the humanities. Studying French and/or Italian language and literature prepares students for graduate study in law and international affairs; advanced work in the humanities; and careers in business, governmental service, and teaching. The University is committed to international study, and students are encouraged to take advantage of the numerous opportunities to study abroad. Students can also combine a major in French and/or Italian with a second major in a field such as political science, history, biology, or economics. Students who choose to study the grammar, linguistics, rhetoric, literature, and film of Italy and/or the Francophone world will acquire an invaluable

technical resource and an in-depth knowledge of a diverse and foundational intellectual tradition. Students may also minor in French and/or Italian. For more information on the Department of French and Italian Languages and Literatures, see our Web site at www.frenchanditalian.pitt.edu.

Certificate

Medieval and Renaissance Studies Certificate

In spite of change through the centuries and variations of a regional and national character, the millennium preceding the deaths of Shakespeare and Cervantes in 1616 is marked by a coherence sufficient to justify considering it as a cultural entity, worthy of study for its humanistic qualities and for its importance in preparing the modern world. Some of the principal aims of the Medieval and Renaissance Studies Program are:

- to identify and explore aspects of medieval and Renaissance cultures that are an important part of our own cultural heritage;
- to promote an understanding of our medieval and Renaissance ancestors through the investigation of the ways they faced the issues of their day, asked questions of their institutions, and were conscious of themselves and the world around them;
- to help students understand historical relativity by showing them how different periods and individuals have understood the Middle Ages and Renaissance in very different ways; and
- to provide the basis for an open-minded attitude toward any culture that is different from our own.

In consultation with a program advisor (who may be a member of the Executive Committee, one of the departmental representatives, or another faculty member specializing in the area), the candidate will define an area of interest and organize a program of courses in relation to it. In designing a certificate program, students are urged to keep in mind the aims of the program as described above. For more information, see <http://www.medren.pitt.edu/>.

Requirements

The certificate requires 15 credits. At least nine credits will be earned in 1000-level courses.

- One of the five courses must be focused on the medieval period; see the list of qualifying courses at www.medren.pitt.edu/undergraduate-certificates/overview.php
- One of the five courses must be focused on the Renaissance period; see the list of qualifying courses at www.medren.pitt.edu/undergraduate-certificates/overview.php

The student must take at least two courses from each category. Courses should not be chosen at random but should follow a pattern of interrelated studies worked out with a Program Advisor from one of the cooperating Departments or with the Director of Medieval and Renaissance Studies. The categories are:

- language and literature, the visual arts, and music; and
- social, intellectual, economic, and ideological history (including philosophy, religious studies, the history of science and the study of institutions).

A strong recommendation, beyond these requirements, is that certificate candidates acquire a reading knowledge of a modern European language as early as possible. In addition, Latin is suggested for those who plan to do graduate work in the field.

Major

French, BA

A major in French gives students the opportunity to study in detail a foreign language and to acquire an education in a literary and cultural tradition central to the humanities. Studying French language and literature prepares students for graduate study in law and international affairs, advanced work in the humanities, and careers in business, government service, and teaching. Students are encouraged to take advantage of the numerous opportunities to study abroad. They can combine a major in French with a second major in a field such as political science, history, biology, or economics. Students who choose to study the grammar, linguistics, rhetoric, literature, and film of the Francophone world will acquire an invaluable technical resource and an in-depth knowledge of a diverse and foundational intellectual tradition.

Requirements

Majors in French must have completed two years of college work or the equivalent before beginning core courses. The French major consists of at least 31 credits above the intermediate level. Elementary French language courses (FR 0101 and FR 0102) do not count toward the major. Required credits follow.

- FR 0220 - LA FRANCE AUJOURD'HUI
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE
- FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE
- FR 0258 - ADVANCED FRENCH CONVERSATION

Note

Majors are expected to take one credit of FR 0258 - ADVANCED FRENCH CONVERSATION, but they may take two additional credits of the course as a nonmajor elective.

Additional requirements

In addition to the basic requirements, the following criteria must be met by French majors:

- Once the basic requirements are met, students will, in consultation with their advisor, design a program that corresponds to their needs, but they must take an additional 15 credits at the 1000 level. Twelve credits must be in courses taught in French. Intermediate language courses (FR 0003 and FR 0004) may be used to fulfill this requirement.
- French majors may take one course above 0004, in addition to 0058, on an S/NC option.
- Although study abroad is not a requirement for the major in French, students are strongly encouraged to consider participating in a study-abroad program in a French-speaking country during their undergraduate career.
- Students must complete at least one W course within the major.

The Dietrich School requires 12 credits in a related area to be chosen in consultation with the program advisor. This requirement can also be met by completing an official minor in another area.

French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Italian Studies, BA

French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Reading competency in at least one other language is recommended for students interested in graduate school.

- To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

The Italian Studies major promotes the cross-discipline exploration of a variety of areas relating to Italian and Italian American culture: language, literature, theatre, cinema, art and architecture, music, history, social and immigration history, politics and political theory. Students can combine a major in Italian Studies with a second major in a field such as political science, history, anthropology, history of art and architecture, music, English, business, linguistics or another foreign language.

After one term of college instruction in the Italian language (ITAL 0101 - ITALIAN LANGUAGE AND CULTURE 1 or equivalent as determined by placement testing), students may enroll in ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2 for credit toward the major.

This major requires 36 credits for completion. ITAL 0101 does not count toward the major.

Core courses

- ITAL 0081 - MADE IN ITALY:INGENUITY, SINGULARITY, STYLE
- ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2
- ITAL 0103 - ITALIAN LANGUAGE AND CULTURE 3
- ITAL 0115 - MULTIMEDIA ITALY

Note

Because ITAL 0081 is taught in English and has no prerequisites, the department recommends that students interested in majoring in Italian take this course as early in their studies as possible.

Additional Requirements

Students must complete five courses in addition to the core courses listed above. At least three of these additional courses must be at the 1000-level, and at least two of these courses must be offered by the Italian program. The remaining courses can be selected from a list of approved offerings in other departments, chosen in consultation with the major advisor. Italian Studies majors are encouraged to continue their study of the Italian language to the greatest extent possible.

At least one of the 1000-level courses must be a writing-intensive course taught in Italian. The following courses meet this requirement.

- ITAL 1032 - INTRODUCTION TO ITALIAN LINGUISTICS
- ITAL 1041 - ITALIAN THEATRICAL WORKSHOP
- ITAL 1065 - SONGS OF THE ITALIAN SELF: ITALIAN LYRIC POETRY
- ITAL 1080 - MASTERPIECES OF ITALIAN PROSE
- ITAL 1083 - MODERN ITALIAN LITERATURE

Capstone course

Students must complete a 1-credit capstone course. The details of the capstone experience should be determined in consultation with the major advisor.

Italian, BA

French and Italian Major Requirements

The following requirements apply to French, Italian, and Italian Studies majors:

- Students are required to maintain at least a 2.00 GPA in major courses.
- Reading competency in at least one other language is recommended for students interested in graduate school.
- To earn departmental honors, students must major in French, Italian, or Italian Studies; demonstrate superior performance in departmental courses; and be enrolled in 1000-level French/Italian courses no later than the first term of the junior year. Selection of honors candidates takes place only in the second term of the junior year. During the senior year, two appropriate sequential courses are chosen in consultation with the major advisor, and a research paper must be completed. The paper must be defended before a faculty committee. Honors will be determined by the quality of the paper and the defense, as well as the cumulative grades in all departmental courses counting toward the major.

Requirements

After one term of college instruction in the Italian language (ITAL 0101 - ITALIAN LANGUAGE AND CULTURE 1 or equivalent, as determined by placement test results), students may enroll in ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2 for credit toward the Italian major.

This major requires 36 credits for completion. ITAL 0101 does not count toward the major.

- ITAL 0081 - MADE IN ITALY:INGENUITY, SINGULARITY, STYLE
- ITAL 0102 - ITALIAN LANGUAGE AND CULTURE 2
- ITAL 0103 - ITALIAN LANGUAGE AND CULTURE 3
- ITAL 0115 - MULTIMEDIA ITALY

Note

Because ITAL 0081 is taught in English and has no prerequisites, the department recommends that students interested in majoring in Italian take this course as early in their studies as possible.

Additional Requirements

Students must complete five courses in addition to the core courses listed above. At least three of these additional courses must be at the 1000-level and be taught in Italian.

1. Courses in the ITAL 1030 to ITAL 1068 range are taught in Italian regularly.
 2. Some lower-level courses and upper-level courses in the ITAL 1070 to ITAL 1092 range are taught in English regularly.
 3. At least one of the 1000-level courses must be a writing-intensive course taught in Italian. The following courses meet this requirement.
- ITAL 1032 - INTRODUCTION TO ITALIAN LINGUISTICS
 - ITAL 1041 - ITALIAN THEATRICAL WORKSHOP
 - ITAL 1065 - SONGS OF THE ITALIAN SELF: ITALIAN LYRIC POETRY
 - ITAL 1080 - MASTERPIECES OF ITALIAN PROSE
 - ITAL 1083 - MODERN ITALIAN LITERATURE

Capstone course

Students must complete a 1-credit capstone course. The details of the capstone experience should be determined in consultation with the major advisor.

Minor

French Minor

Students pursuing this minor must choose either the French Language and Literature track or the French Studies track.

French and Italian minor requirements

The Department of French and Italian Languages and Literatures offers three tracks within its minor offerings: French Language and Literature; French Studies; and Italian. Students must apply for any official minor they will complete or have completed by the time they apply for graduation.

Students pursuing a minor offered by the Department of French and Italian Languages and Literatures may not take any courses on the Satisfactory/No Credit (S/NC) basis.

French Language and Literature track

Students can complete the French Language and Literature track by completing five courses chosen from the following list. Only one of the courses may be taught in English. Students whose programs will include two or more courses taught in English should follow the French Studies minor requirements.

In addition to the listed courses, students may also take courses on literary, cultural, or linguistic topics taught in French. These courses include FR 1001 through FR 1076.

- FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA
- FR 0016 - HISTORY OF FRENCH CINEMA
- FR 0080 - MODERN FRENCH NOVEL
- FR 0103 - INTERMEDIATE FRENCH 1
- FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT
- FR 0220 - LA FRANCE AUJOURD'HUI
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE
- FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE
- FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
- FR 1088 - SPECIAL TOPICS

French Studies track

Students can complete the French Studies track in the French minor with five courses chosen from the following list.

In addition to the listed courses, students may also take courses on literary, cultural, or linguistic topics taught in English or French. These courses include FR 1001 through FR 1090.

- FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA
- FR 0103 - INTERMEDIATE FRENCH 1
- FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT
- FR 0220 - LA FRANCE AUJOURD'HUI
- FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE
- FR 0227 - THE FRENCH ATLANTIC
- FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE

Italian Minor

Students may take any combination of five Italian (ITAL) courses to complete this minor. Each course must be at least three credits and must be taught on the Pittsburgh campus or through a Pitt in Italy program. Students minoring in Italian are encouraged to study the target language to the greatest extent allowed by their majors.

French and Italian minor requirements

The Department of French and Italian Languages and Literatures offers three tracks within its minor offerings: French Language and Literature; French Studies; and Italian. Students must apply for any official minor they will complete or have completed by the time they apply for graduation.

Students pursuing a minor offered by the Department of French and Italian Languages and Literatures may not take any courses on the Satisfactory/No Credit (S/NC) basis.

Gender, Sexuality, and Women's Studies Program

The Gender, Sexuality, and Women's Studies program at the University of Pittsburgh is an interdisciplinary academic program that is committed to promoting feminist and LGBTQIA activism, pedagogy, and scholarship that engage with the larger local, national, and global communities. Program offerings provide opportunities for students and faculty to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

Bachelor Degree in Gender, Sexuality, and Women's Studies

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines.

Certificate in Gender, Sexuality, and Women's Studies

Students who pursue this certificate are those who plan careers in medicine, the creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gswws.pitt.edu.

Certificate

Gender, Sexuality, and Women's Studies Certificate (Suspended)

This program is no longer active and accepting student applications, effective Fall 2016. Students currently enrolled in the certificate will either transfer to the new minor or complete the certificate by the end of Spring 2023.

The Gender, Sexuality, and Women's Studies program is an interdisciplinary academic program focusing on gender, sexuality, and women. Gender, Sexuality, and Women's Studies (GSWS) courses and cross-listed courses in various departments across the university provide opportunities for all students to broaden their understandings of the changing role of gender in the United States and globally. Students who want to explore the intersection of gender with race, class, ethnicity, nation, religion, ability, age, sex and sexuality will find courses of interest, as will students who want to know more about the role of women in history, in literature and the arts, in media and science. Students who plan careers in medicine, the

creative arts, social work, education, counseling, law, therapy, academia, and business find that this program's courses enhance their professional activities. Still others report that the confidence and insight that they acquire in such courses enriches their lives regardless of their particular career goals. For more information, please visit the Gender, Sexuality, and Women's Studies Program in 401 Cathedral of Learning or online at www.gsws.pitt.edu.

Requirements

Please consult the Gender, Sexuality and Women's Studies Undergraduate Advisor to plan your program of study.

A minimum of 18-credits, completed with an overall GPA of 2.00 is required, as follows:

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- One of the following, though students are encouraged to take both courses
- GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES
- Three elective courses from at least two different academic departments. GSWS may count as one of these programs. Courses must be approved for GSWS credit; consult the Course Descriptions Web site, www.courses.as.pitt.edu, for current listings
- At least one 1000-level course with a GSWS subject; a cross-listed course **will not** fulfill this requirement.

Major

Gender, Sexuality, and Women's Studies, BA

Major Requirements

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines. This major requires 30 credits, distributed as follows.

Core courses

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES

Two elective courses

choose one from each of the following groups

Group A

- GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
- GSWS 0210 - WIRED WOMEN
- GSWS 0220 - CONTEMPORARY ISSUES AND ARGUMENTS

Group B

- AFRCNA 0454 - MAN/WOMAN LITERATURE

- ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY
- ENGCOMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- GSWS 1140 - SPECIAL TOPICS
- Pitt in China, Pitt in London, etc.
- GSWS 1900 - INTERNSHIP (junior or senior only)
- PSY 0184 - PSYCHOLOGY OF GENDER
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- Any course officially cross-listed with GSWS (check course offerings each semester for options)

Four upper-level courses

choose two from each group

Group A

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1450 - GENDER AND SUSTAINABILITY

Group B

- LCJS 1550 - GENDER, RACE, CLASS AND CRIMINAL JUSTICE
- AFRICA 1309 - WOMEN OF AFRICAN AND AFRICAN DIASPORA
- ANTH 1738 - GENDER PERSPECTIVES IN ANTHROPOLOGY
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1160 - VISUAL RHETORIC
- ENGFLM 1703 - GENDER AND FILM
- ENGLIT 1704 - WOMEN NOVELISTS
- FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
- HIST 1560 - WOMEN IN LATIN AMERICAN HISTORY
- LCJS 1583 - SEX, LAW AND MARRIAGE
- MUSIC 1398 - WOMEN & MUSIC CROSS-CULTL PERSP
- PS 1622 - "OUTSIDER POLITICS" : ANARCHIST, PUNK, QUEER, AND FEMINIST THEORY
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- SOC 1413 - MARRIAGE
- SOC 1448 - WORKING WOMEN
- Any 1000-level course officially cross-listed with GSWS (check course offerings each semester for options)

Capstone

- GSWS 1910 - CAPSTONE

Grade requirements

A minimum GPA of 2.0 is required in those courses that count toward the major. Students must also have a minimum GPA of 2.0 in all GSWS courses. Students may have no more than six credits overlap with another major or certificate.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course with the GSWS subject designation. Check the Course Descriptions Web site (www.courses.as.pitt.edu) each term for writing-intensive course options.

Minor

Gender, Sexuality, and Women's Studies Minor

The Gender, Sexuality, and Women's Studies program at the University of Pittsburgh is committed to promoting feminist and LGBTQIA activism, pedagogy, and scholarship that engage with the larger local, national, and global communities. Program offerings provide opportunities for students to explore the historical development, cultural variations, and changing representations of gender and sexuality as they organize identities, interactions, and institutions and intersect in complex ways with sex, race, class, ethnicity, ability, age, religion, and nation.

The goals of this major are: to educate undergraduate students in the analysis and understanding of gender as a knowledge base and critical lens through which to read critically; to write and conduct research in disciplinary and interdisciplinary contexts; to begin to connect academic work with broader community interests; and to prepare students for graduate school and professional lives. The interdisciplinary nature of this major makes it ideal for students who wish to add breadth and depth to their studies in other disciplines.

Core courses

- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- GSWS 0500 - INTRODUCTION TO FEMINIST THEORY
- GSWS 0550 - SEX AND SEXUALITIES

Two elective courses from the following list

- AFRCNA 0454 - MAN/WOMAN LITERATURE
- ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY
- COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
- COMMRC 1160 - VISUAL RHETORIC
- ENGCMF 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES
- ENGFLM 1703 - GENDER AND FILM
- ENGLIT 0610 - WOMEN AND LITERATURE
- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 1704 - WOMEN NOVELISTS
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE
- GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
- GSWS 0220 - CONTEMPORARY ISSUES AND ARGUMENTS
- GSWS 0300 - SPECIAL TOPICS
- GSWS 1140 - SPECIAL TOPICS *
- GSWS 1900 - INTERNSHIP
- MUSIC 1398 - WOMEN & MUSIC CROSS-CULTL PERSP
- PS 1622 - "OUTSIDER POLITICS" : ANARCHIST, PUNK, QUEER, AND FEMINIST THEORY
- PSY 0184 - PSYCHOLOGY OF GENDER
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY

- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1413 - MARRIAGE
- SOC 1448 - WORKING WOMEN

* This course cannot count toward both the elective and upper-level course requirement.

One upper-level course from the following list

- GSWS 1140 - SPECIAL TOPICS *
- GSWS 1150 - TRANSNATIONAL FEMINISMS
- GSWS 1170 - QUEER THEORY
- GSWS 1180 - POLITICS OF GENDER AND FOOD
- GSWS 1190 - MASCULINITIES
- GSWS 1210 - GENDER AND THE DIGITAL
- GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM
- GSWS 1450 - GENDER AND SUSTAINABILITY
- GSWS 1910 - CAPSTONE

Note:

Students must apply for any official minor they will complete or have completed at the time they apply for graduation. They should declare their minor as soon as possible with the Office of the Associate Dean for Undergraduate Studies, Dietrich School of Arts and Sciences, 140 Thackeray Hall.

LGBTQ and Critical Sexuality Studies Minor

The minor in LGBTQ and Critical Sexuality Studies builds students' knowledge of theory and an understanding of sexuality and its history, tracing the movement of sexual regulation through different domains (religious, legal, medical, social, and political). This minor requires 18 credits of coursework for completion, detailed as follows.

Core courses

Both of the following courses are required for the major.

- GSWS 0230 - INTRODUCTION TO LGBTQ STUDIES
- GSWS 0550 - SEX AND SEXUALITIES

Upper level courses

Students must choose one of the following courses. They may take the remaining two as electives, with the additional elective credits chosen from the elective course list.

- GSWS 1140 - SPECIAL TOPICS
- GSWS 1170 - QUEER THEORY
- GSWS 1280 - TRANSNATIONAL SEXUAL POLITICS

Elective courses

Students must choose three of the following courses.

- ANTH 0768 - ANTHROPOLOGY OF GENDER AND SEXUALITY
- COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE

- ENGLIT 0630 - SEXUALITY AND REPRESENTATION
- ENGLIT 0670 - QUEER AND TRANSGENDER LITERATURE
- FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE
- GSWS 0600 - GLOBAL LGBTQ LITERATURE
- GSWS 1610 - QUEER AND FEMINIST MEDIA ART
- GSWS 1910 - CAPSTONE
- GSWS 1140 - SPECIAL TOPICS
- GSWS 1170 - QUEER THEORY
- GSWS 1280 - TRANSNATIONAL SEXUAL POLITICS
- HIST 1026 - STATES AND SEX IN THE AMERICAS
- HIST 1692 - LGBTQ IN THE USA, 1900-PRESENT
- MUSIC 1396 - MUSIC IN SOCIETY
- PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
- RELGST 1405 - RELIGION AND SEXUALITY
- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 1416 - SEX GENDER SEXUALITY AND THE BRAIN SCIENCES
- SPAN 1423 - SEXUAL DIVERSITY IN LATIN AMERICAN LITERATURE AND CULTURE

Department of Geology and Environmental Science

The Department of Geology and Planetary Science studies the Earth and how it works. The earth is a fascinating natural system that supports many interactions between the solid earth, oceans, atmosphere, life, and various solar system objects. The primary goal of our geology and environmental geology majors (both BS programs) is a scientific understanding of these natural systems and their significant and sometimes surprising variations over geologic time. In addition, these students often seek a solid scientific grounding in earth resources and environmental problems. Our popular environmental studies major (a BA program) focuses on the economic, political, and legal issues that conspire to either cause or prevent the solution of environmental problems. Our programs are popular with people who love nature, who want to understand how the earth works, and who want to understand the many dimensions of modern environmental issues. For more information on our programs, please visit www.geology.pitt.edu.

Certificate

Geographic Information Systems Certificate

The Geology and Planetary Science Department offers a Certificate in Geographic Information Systems (GIS). GIS is a computer-based system that accommodates virtually any type of information about features that are referenced by geographical location. For example, a GIS database may include both location and attribute data, providing a spatial visualization capability for analyzing descriptive characteristics about geographical features, both natural and manmade. One of the most important benefits of GIS analysis is the ability to spatially interrelate multiple types of information stemming from a range of sources. Such computational manipulation of geographic data has become increasingly important in many areas of science, government, and industry. Students who demonstrate experience with computers in general, and GIS/image processing in particular, are at a distinct advantage when looking for jobs in geology, environmental science, city and regional planning, and engineering. This certificate is designed to provide students with the knowledge and skills needed for immediate success in GIS-related jobs.

Requirements

The program is open to any University of Pittsburgh student, including post-baccalaureate students (professionals seeking to expand their job-related computer skills). Approximately four terms (two academic years) will be required to complete this certificate program. It is therefore suggested that undergraduates begin no later than their junior year. A grade of C or better is required in all courses for successful completion of the certificate. GIS topics covered include the nature of geographic data, map projections, raster images, the basic elements of a GIS database, sources of data, and training in the Arc/Info software package. Students also have the option of focusing on remote sensing theory and applications. Remote sensing (RS) topics include image analysis and processing; field validation of satellite and airborne datasets; GPS training; and the use of software packages such as ENVI, Erdas Imagine, ERMapper, and Trimble's Pathfinder Office.

Required core courses

- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS or
- GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1460 - INTRODUCTION TO REMOTE SENSING

Note

Two elective courses may be chosen that have special relevance to the student's major or employment goals. Appropriate courses will be available from many different departments. Courses not on the following list may be selected contingent on approval by the certificate advisor.

Suggested elective courses

- GEOL 0820 - NATURAL DISASTERS
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM
- GEOL 1960 - FIELD CAMP
- GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES
- GEOL 2640 Advanced Geohazards and Risk Management
- BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS

Independent Study

Students should work with faculty in their primary area of interest to define and develop the capstone project. It must use GIS and/or RS as a major tool and result in a published report, map, or media that describes the results of the research.

- GEOL 1901 - INDEPENDENT STUDY

Additional information and requirements

- A minimum grade of C is required in each course required for this certificate.
- No course that counts toward the certificate can be taken on an S/NC basis unless the student receives special permission from the certificate advisor.

Major

Environmental Science, BS

Environmental science is a multidisciplinary field that focuses on documenting the impacts that people have on our environment, on reducing the harmful effects of these impacts, and on restoring aspects of the environment to benefit both nature and people. Our program focuses on air, water, and the Earth's solid surface, and it includes an emphasis on their interactions with life.

The environmental science degree is a multidisciplinary program that combines physics, chemistry, math, biology, and geology to give you the skills and know-how needed to understand environmental impacts. Careers range from the assessment, remediation, and protection of air and water resources to the restoration of disturbed landscapes to helping to ensure that major industries comply with environmental regulations. In addition, the environmental science program provides fine intellectual training in the tradition of a liberal arts education, which means that you will be exceptionally well-qualified to compete for the diverse jobs on offer at Pitt's career fairs.

The Environmental Science major requires completion of at least 63 credits, as follows.

Core courses required for the major

Core courses

The following two courses should be taken in the same academic term.

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0840 - ENVIRONMENTAL SCIENCE

All of the following courses

- GEOL 1015 - GEOLOGY COLLOQUIUM
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS
- GEOL 1641 - ECOSYSTEM ECOLOGY

One of the following Geochemistry courses

- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1516 - ENVIRONMENTAL GEOCHEMISTRY WITH LAB

One of the following Water/Hydrology courses

- GEOL 1050 - SURFACE WATER HYDROLOGY
- GEOL 1051 - GROUNDWATER GEOLOGY

One of the following Geomorphology courses

- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1062 - GEOMORPHOLOGY: DYNAMIC EVOLUTION OF EARTH'S SURFACE

One of the following capstone courses

- GEOL 1900 - INTERNSHIP
- GEOL 1903 - UNDERGRADUATE RESEARCH
- GEOL 1910 - UNDERGRADUATE THESIS
- GEOL 1960 - FIELD CAMP

Co-requirements for the major

All of the following courses

- CHEM 0110 - GENERAL CHEMISTRY 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Three of the following courses

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
And one of these associated lab courses:
- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
And one of these associated lab courses:
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- STAT 1000 - APPLIED STATISTICAL METHODS

Geology electives

Students must complete nine credits of GEOL at the 1000 level or above. A list of eligible courses follows. Courses indicated by an asterisk (*) are recommended for Environmental Science majors.

- GEOL 0060 - HISTORY OF THE EARTH *
- GEOL 1001 - MINERALOGY *
- GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY
- GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 1045 - STATISTICS FOR EARTH SCIENCE
- GEOL 1050 - SURFACE WATER HYDROLOGY *
- GEOL 1051 - GROUNDWATER GEOLOGY *
- GEOL 1052 - PALEOCLIMATOLOGY *
- GEOL 1055 - ENVIRONMENTAL ETHICS
- GEOL 1100 - STRUCTURAL GEOLOGY
- GEOL 1240 - VERTEBRATE PALEONTOLOGY *
- GEOL 1310 Communication in the Geosciences (W)
- GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
- GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS
- GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)
- GEOL 1333 - SUSTAINABILITY
- GEOL 1336 - ENVIRONMENTAL ISSUES: AIR QUALITY (W)
- GEOL 1338 - ENVIRONMENTAL ISSUES: WATER QUALITY (W)
- GEOL 1340 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES (W)
- GEOL 1342 - ENVIRONMENTAL ISSUES
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM *
- GEOL 1460 - INTRODUCTION TO REMOTE SENSING *
- GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMISTRY *
- GEOL 1701 - GEOLOGY OF THE PLANETS
- GEOL 1900 - INTERNSHIP
- GEOL 1901 - INDEPENDENT STUDY
- GEOL 1903 - UNDERGRADUATE RESEARCH
- GEOL 1XXX Other upper-level class in GEOL, approved by the major advisor

- GEOL 2XXX Graduate level GEOL class, instructor permission required

Geology additional requirements

Grades: Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science

Satisfactory/No Credit: No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

Writing requirement: Students must complete at least one writing-intensive (W) course in the major.

Environmental Studies, BA

Rapid growth in human population and development has led to complex environmental problems on local and global scales. The way in which we address these issues will have a profound effect on our society and planet in the coming century. Enlightened solutions require a strong component of scientific knowledge and an awareness of the relevant societal issues. A major in environmental studies will equip students with an understanding of earth systems and the environment, including the role of geologic processes on human activity and the impact of humans on the biosphere, atmosphere, hydrosphere, and global climate. Courses in the natural and social sciences supplement a traditional liberal arts curriculum to provide a comprehensive, interdisciplinary background in the scientific, economic, political, and social aspects of human interaction with the environment.

The environmental studies major provides a strong background for students who seek careers in fields such as resource development and management, environmental policy and regulation, risk assessment, land use planning, public policy, and education. Potential employers include local, state, or federal government organizations; consulting firms; or companies that are affected by environmental issues or regulations. Graduates of the Environmental Studies Program can also pursue postgraduate study in fields such as business, law, medicine, public policy, education, international relations, urban and regional planning, environmental management, and public health.

Major Requirements

The major consists of core courses, co-requirements, and electives. The core courses provide a fundamental understanding of environmental processes, issues, and policy and culminate in an environmental science field course and an interdisciplinary capstone course on science and public policy. The co-requirements provide the necessary background for advanced study. Majors are encouraged to undertake an independent research project, internship, or senior thesis.

Core Geology courses

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0840 - ENVIRONMENTAL SCIENCE
- GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE
- GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS (writing course)
- GEOL 1333 - SUSTAINABILITY
- GEOL 1445 - GIS, GPS, AND COMPUTER METHODS

Legal Studies course

One of the following courses.

- GEOL 1312 - ENVIRONMENTAL LAW AND POLICY
- LEGLST 1320 - LAW AND ENVIRONMENT

One of the following Economics courses

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY

- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 0800 - INTRODUCTION TO ECONOMICS

One of the following Reasoning courses

- HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING
or
EOH 2180 Introduction to Risk Sciences **and** EOH 2181 Risk Assessment Practicum

One of the following Public Policy courses

- GEOL 1055 - ENVIRONMENTAL ETHICS
- GEOL 1056 - UHC ENVIRONMENTAL ETHICS, SCIENCE AND PUBLIC POLICY

Environmental field coursework

At least two credits in the following courses.

- GEOL 1930 - YELLOWSTONE FIELD CLASS
- GEOL 1950 - WYOMING FIELD STUDIES IN ECOLOGY AND PALEONTOLOGY
- BIOSC 1140 - BEHAVIORAL ECOLOGY
- BIOSC 1170 - FRESHWATER ECOLOGY
- BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES
- BIOSC 1190 - AQUATIC ENTOMOLOGY
- BIOSC 1230 - ORNITHOLOGY
- BIOSC 1330 - FIELD BOTANY
- BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION
- BIOSC 1400 - DISEASE ECOLOGY
- BIOSC 1420 - WILDLIFE ECOLOGY AND MANAGEMENT
- BIOSC 1610 - CONSERVATION BIOLOGY

Field course note

This requirement can be satisfied by taking any BIOSC course offered at the Pymatuning Ecology Laboratory or an approved environmental science field course offered through an outside institution. In either case, the substituted course must have a credit value of not less than two credits.

Environmental Internship course

- GEOL 1900 - INTERNSHIP

Co-requirements

- CHEM 0110 - GENERAL CHEMISTRY 1

One of the following Mathematics courses

- MATH 0125 - CALCULUS FOR BUSINESS 1 and
- MATH 0126 - CALCULUS FOR BUSINESS 2
- MATH 0120 - BUSINESS CALCULUS

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PUBSRV 1110 - FINANCIAL MANAGEMENT IN THE PUBLIC SECTOR
- PUBSRV 1210 - FINANCIAL MANAGEMENT OF NON-PROFIT ORGANIZATIONS

One of the following Statistics courses

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Twelve credits of electives in Social Science and Humanities

Students must complete 12 credits in social science and/or humanities courses from the following lists.

Anthropology courses

- ANTH 0582 - INTRODUCTION TO ARCHEOLOGY
- ANTH 0601 - PHYSICAL ANTHROPOLOGY: OVERVIEW
- ANTH 0680 - INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
- ANTH 0681 - INTRODUCTION TO HUMAN EVOLUTION
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- ANTH 1524 - CHINESE ARCHAEOLOGY
- ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY
- ANTH 1541 - CULTURAL RESOURCE MANAGEMENT
- ANTH 1762 - HUMAN ECOLOGY
- ANTH 1763 - FIELD METHODS

Communication courses

- COMMRC 1149 - ENVIRONMENTAL RHETORIC

Economics courses

- ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
- ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS
- ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
- ECON 1360 - ENVIRONMENTAL ECONOMICS

English Literature courses

- ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE
- ENGLIT 0812 - MEDIA/ECOLOGY
- ENGLIT 1005 - LITERATURE AND THE ENVIRONMENT

History courses

- HIST 0700 - WORLD HISTORY
- HIST 1668 - HISTORY OF PITTSBURGH
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- HIST 1695 - ENVIRONMENTAL HISTORY

History and Philosophy of Science courses

- HPS 0608 - PHILOSOPHY AND SCIENCE
- HPS 0610 - CAUSAL REASONING
- HPS 0620 - SCIENCE AND RELIGION
- HPS 0621 - PROBLEM SOLVING: HOW SCIENCE WORKS
- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE

History of Art and Architecture courses

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Political Science courses

- PS 1232 - POLITICAL ATTITUDE & PUBLIC OPINION
- PS 1235 - MEDIA AND POLITICS
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1374 - POLITICS OF GLOBAL INEQUALITY
- PS 1538 - THE POLITICS OF OIL AND NATURAL RESOURCES
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- PS 1543 - GLOBALIZATION AND INTERNATIONAL POLITICS

Religious Studies courses

- RELGST 1518 - RELIGION AND ECOLOGY
- RELGST 1519 - RELIGION, NATURE AND ENVIRONMENT
- RELGST 0770 - SCIENCE AND RELIGION

Sociology courses

- SOC 0230 - SOCIAL RESEARCH METHODS
- SOC 0312 - SCIENCE IN SOCIETY
- SOC 1440 - EXPERIENCING GLOBALIZATION
- SOC 1445 - SOCIETY AND ENVIRONMENT

Urban Studies courses

- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0130 - APPLIED GIS
- URBNST 0050 - INTRODUCTION TO URBAN RESEARCH
- URBNST 0114 - URBAN SUSTAINABILITY
- URBNST 0360 - INTERNATIONAL URBANISM SEMINAR

Business Administration courses

- BUSENV 1701 - ETHICAL LEADERSHIP FUNDAMENTALS
- BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT

Public and International Affairs courses

- PIA 2115 - ENVIRONMENTAL ECONOMICS
- PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY
- PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT
- PIA 2388 - INTERNATIONAL LAW AND POLICY
- PIA 2502 - GLOBAL ENVIRONMENTAL POLICY
- PIA 2510 - ECONOMICS OF DEVELOPMENT
- PIA 2520 - FOOD SECURITY: AGRICULTURE & RURAL DEVELOPMENT
- PIA 2522 - GLOBAL ENERGY
- PIA 2715 - GIS FOR PUBLIC POLICY

Public Service courses

- PUBSRV 1230 - FUNDRAISING FOR NON-PROFIT ORGANIZATIONS
- PUBSRV 1300 - LEGAL ISSUES IN PUBLIC SERVICE
- PUBSRV 1310 - DIVERSITY ISSUES IN PUBLIC SERVICE
- PUBSRV 1320 - GEOGRAPHIC INFORMATION SYSTEMS IN THE PUBLIC SERVICE
- PUBSRV 1455 - LAW, ETHICS AND PUBLIC POLICY IN THE MASS MEDIA

Twelve credits of electives in the Natural Sciences and Engineering

Students must complete 12 credits in natural science and/or engineering courses from the following lists.

Students are encouraged to take BIOSC 0150 and BIOSC 0160 because they are prerequisites for the Pymatuning field courses. Students are further encouraged to take the GEOL 1300-level electives.

Biological Sciences courses

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1 or
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0350 - GENETICS
- BIOSC 0370 - ECOLOGY
- BIOSC 0390 - ECOLOGY LABORATORY

Chemistry courses

- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY

Computer Science courses

- CS 0090 - SUSTAINABILITY AND COMPUTING
- CS 0134 - WEB SITE DESIGN AND DEVELOPMENT
- CS 0334 - INTERMEDIATE WEB SITE DESIGN AND DEVELOPMENT

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY

Geology and Environmental Science courses

The Department of Geology and Environmental Science strongly encourages students to take listed GEOL courses in the 1300 series and GEOL 1641.

- GEOL 0060 - HISTORY OF THE EARTH
- GEOL 1001 - MINERALOGY
- GEOL 1015 - GEOLOGY COLLOQUIUM
- GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 1051 - GROUNDWATER GEOLOGY
- GEOL 1052 - PALEOCLIMATOLOGY
- GEOL 1060 - GEOMORPHOLOGY
- GEOL 1100 - STRUCTURAL GEOLOGY
- GEOL 1330 - SUSTAINABILITY FLASH LAB
- GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)
- GEOL 1332 - ENVIRONMENTAL ADVOCACY AND ACTION
- GEOL 1335 - ENVIRONMENTAL ISSUES: AIR QUALITY
- GEOL 1336 - ENVIRONMENTAL ISSUES: AIR QUALITY (W)
- GEOL 1337 - ENVIRONMENTAL ISSUES: WATER QUALITY
- GEOL 1338 - ENVIRONMENTAL ISSUES: WATER QUALITY (W)
- GEOL 1339 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES
- GEOL 1340 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES (W)
- GEOL 1341 - ENVIRONMENTAL ISSUES: PARKS AND FORESTS
- GEOL 1342 - ENVIRONMENTAL ISSUES
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM
- GEOL 1460 - INTRODUCTION TO REMOTE SENSING
- GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMISTRY
- GEOL 1515 - ENVIRONMENTAL GEOCHEMISTRY
- GEOL 1641 - ECOSYSTEM ECOLOGY
- GEOL 1701 - GEOLOGY OF THE PLANETS

Physics courses

- PHYS 0087 - PHYSICS AND SOCIETY
- PHYS 0089 - PHYSICS AND SCIENCE FICTION
- PHYS 0091 - CONCEPTUAL PHYSICS
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Civil and Environmental Engineering courses

- CEE 1210 - ENGR AND SUSTAINABLE DEVELOPMENT
- CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
- CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
- CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT

Other requirements

Grade requirements: A minimum GPA of 2.0 is required in those courses that count toward the major. All core courses, co-requirements, and electives must be passed with a grade of C- or better.

Satisfactory/No Credit option: There is no limit on the number of courses in the major that can be taken on an S/NC basis.

Writing (W) requirement: GEOL 1313 satisfies this requirement for Environmental Studies majors.

Geology, BS

The Geology major requires completion of 67 credits of coursework, distributed as follows.

Major Course Requirements

One of the following

- GEOL 0800 - GEOLOGY
- GEOL 0820 - NATURAL DISASTERS
- GEOL 0860 - ENVIRONMENTAL GEOLOGY

All of the following courses

- GEOL 0055 - GEOLOGY LABORATORY
- GEOL 0060 - HISTORY OF THE EARTH
- GEOL 1001 - MINERALOGY
- GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY
- GEOL 1015 - GEOLOGY COLLOQUIUM
- GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY
- GEOL 1100 - STRUCTURAL GEOLOGY
- GEOL 1960 - FIELD CAMP

Geology elective courses

Students must complete three courses (nine credits) of GEOL courses at the 1000 level or above.

Corequirements

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

One of the following

- GEOL 1045 - STATISTICS FOR EARTH SCIENCE
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

- STAT 1000 - APPLIED STATISTICAL METHODS

Geology additional requirements

Grades: Students must maintain a minimum GPA of 2.0 in departmental courses to graduate with a BS degree in Environmental Science

Satisfactory/No Credit: No GEOL course that counts toward the major can be taken on an S/NC basis. No more than two of the non-geological science courses that count toward the major may be taken on an S/NC basis.

Writing requirement: Students must complete at least one writing-intensive (W) course in the major.

Department of German

The study of second language and culture is a cornerstone of education in today's international world. It teaches intercultural competence by increasing students' understanding of their own backgrounds and their sensitivity for other traditions and values. Knowledge of a second language and culture brings obvious competitive advantages in careers with an international dimension. As a liberal arts discipline, the study of language improves analytic-conceptual and communication skills necessary for all professional careers. Enhanced with appropriate additional course work, a major in German serves as a foundation for professional training in such subjects as business, law, politics, and medicine, as well as the media and communication industry. Students with a BA in German compete well in nontechnical fields for jobs requiring a bachelor's degree. For more information on the major, the minor, the certificate, and the Department of Germanic Languages and Literatures, see www.german.pitt.edu.

Certificate

German Language Certificate

The German Language certificate demonstrates proficiency in German above the level of the German minor. It prepares students for international careers, internationally recognized proficiency exams (Zertifikat Deutsch als -Fremdsprache and Zertifikat Deutsch für den Beruf), and internship programs in German-speaking countries.

The certificate offers two tracks - one in the liberal arts and one for professional purposes. In both tracks, students must earn 18 credits in German beyond GER 0002 - ELEMENTARY GERMAN 2. Nine credits may be transferred from study abroad programs in German-speaking countries to count toward the 18 total credits.

The courses that apply to the certificate should be taken in sequence as listed.

German for the Liberal Arts

Students in this track should take the following courses in the order indicated below.

- GER 0004 - INTERMEDIATE GERMAN 2 with a minimum grade of B- before taking any course in the GER 1000-level experience

Two 1000-level courses

Students pursuing this track will take two 1000-level courses in the Department of German. Students may take GER 1001 - GERMAN WRITING or GER 1003 - PROFESSIONAL GERMAN as one of these courses, but they may not take both courses to count toward the certificate.

One 1100-level course

Students pursuing this track will take any 1100-level course in the Department of German.

One 1200- to 1400-level course

Students pursuing this track will take one course at the 1200-level to 1400-level in the Department of German.

German for Professional Purposes

Required courses

- GER 0004 - INTERMEDIATE GERMAN 2
- GER 1003 - PROFESSIONAL GERMAN
- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM

Two 1000-level or 1100-level courses

Students pursuing this track must complete two additional courses at the 1000-level or 1100-level in the Department of German. GER 1001, GER 1003, GER 1004, and GER 1103 do not fulfill this requirement.

German Certificate note

Nine credits may be transferred from study abroad programs in German-speaking countries in accordance with the credit transfer policy of the University of Pittsburgh. These credits have to be pre-approved by the director of undergraduate studies.

A minimum GPA of 2.0 is required in each course that counts toward the certificate. No course that counts toward the certificate can be taken on an S/NC basis unless the student received special permission from the Director of Undergraduate Studies.

For more information, visit www.german.pitt.edu/undergraduate/certificate.php

Major

German, BA

The German Language and Cultural Studies, BA program was approved to be renamed in Summer 2023 to German, BA.

The German Major helps students achieve defined levels of proficiency in German language and culture and provides them with the traditional hallmarks of a humanistic education (analytical and critical thinking skills, self-reflection, openness to other cultures, communication skills, etc.) as well as the skills necessary to compete in today's global world.

Requirements

The German major requires completion of 33 credits (11 courses) distributed as follows. If necessary to fulfill credit requirements, higher-level language courses can be substituted for intermediate-level language courses.

Required Intermediate German language courses

Intermediate German two-course sequence (6 credits)

- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2

Required writing-intensive course

Students must complete one of the following writing-intensive courses (3 credits)

- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN

1000-level course

Students must complete one course at the 1000-level, meaning between GER 1000 and GER 1099 (other than the writing course). (3 credits)

- GER 1000 - READING LITERARY TEXTS
- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM
- GER 1005 - GERMAN MEDIA FROM TV TO YOUTUBE
- GER 1051 - INTRODUCTION TO LITERARY ANALYSIS

1100-level course

Students must complete one course at the 1100-level, meaning between GER 1100 and GER 1199. (3 credits)

- GER 1101 - GERMAN MEDIA 2
- GER 1102 - GRÜEZI, SERVUS, HALLO: THE CONTEMPORARY GERMAN-SPEAKING WORLD
- GER 1104 - GERMANY UNDER THE SPELL OF AMERICA
- GER 1105 - LITERARY ANALYSIS
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1108 - GREEN GERMANY

1200- to 1400-level course

Students must complete one seminar in German at the 1200- to 1400-level, meaning between GER 1200 and GER 1499. (3 credits)

- GER 1204 - UNITY IN DIVERSITY: EU-IDENTITY AS FACT AND FICTION
- GER 1220 - LITERATURE AND CULTURE 1750-1830
- GER 1228 - LITERATURE AND CULTURE 1830-1890
- GER 1234 - LITERATURE AND CULTURE 1890-1918
- GER 1252 - CURRENT LITERATURE AND CULTURE
- GER 1324 - SPECIAL TOPICS IN GERMAN PROSE
- GER 1350 - GERMAN DRAMA
- GER 1380 - TOPICS IN GERMAN CINEMA
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
- GER 1410 - KAFKA AND THE MODERN WORLD
- GER 1490 - SPECIAL TOPICS

Additional course on the 1100-1499 level

Students must complete one additional course at the GER 1100 - GER 1499 level (3 credits)

- GER 1101 - GERMAN MEDIA 2
- GER 1102 - GRÜEZI, SERVUS, HALLO: THE CONTEMPORARY GERMAN-SPEAKING WORLD
- GER 1104 - GERMANY UNDER THE SPELL OF AMERICA

- GER 1105 - LITERARY ANALYSIS
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1108 - GREEN GERMANY
- GER 1204 - UNITY IN DIVERSITY: EU-IDENTITY AS FACT AND FICTION
- GER 1220 - LITERATURE AND CULTURE 1750-1830
- GER 1228 - LITERATURE AND CULTURE 1830-1890
- GER 1234 - LITERATURE AND CULTURE 1890-1918
- GER 1252 - CURRENT LITERATURE AND CULTURE
- GER 1324 - SPECIAL TOPICS IN GERMAN PROSE
- GER 1350 - GERMAN DRAMA
- GER 1380 - TOPICS IN GERMAN CINEMA
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
- GER 1410 - KAFKA AND THE MODERN WORLD
- GER 1490 - SPECIAL TOPICS

3 German Culture Courses in German or English

Students must complete three culture courses at the 1100-1599-level, taught in German or English. [These may include up to two courses with at least 30% German content in other departments.] (9 credits)

- GER 1101 - GERMAN MEDIA 2
- GER 1102 - GRÜEZI, SERVUS, HALLO: THE CONTEMPORARY GERMAN-SPEAKING WORLD
- GER 1104 - GERMANY UNDER THE SPELL OF AMERICA
- GER 1105 - LITERARY ANALYSIS
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1108 - GREEN GERMANY
- GER 1204 - UNITY IN DIVERSITY: EU-IDENTITY AS FACT AND FICTION
- GER 1220 - LITERATURE AND CULTURE 1750-1830
- GER 1228 - LITERATURE AND CULTURE 1830-1890
- GER 1234 - LITERATURE AND CULTURE 1890-1918
- GER 1252 - CURRENT LITERATURE AND CULTURE
- GER 1324 - SPECIAL TOPICS IN GERMAN PROSE
- GER 1350 - GERMAN DRAMA
- GER 1380 - TOPICS IN GERMAN CINEMA
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
- GER 1410 - KAFKA AND THE MODERN WORLD
- GER 1490 - SPECIAL TOPICS
- GER 1500 - GERMANIC MYTHS, LEGENDS AND SAGAS
- GER 1502 - INDO-EUROPEAN FOLKTALES
- GER 1504 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY
- GER 1506 - THEORIES & PRACTICES OF WORK IN GLOBAL PERSPECTIVE
- GER 1510 - KAFKA AND THE MODERN WORLD
- GER 1512 - GERMAN LITERATURE AND EUROPEAN PHILOSOPHY: GOETHE'S FAUST
- GER 1518 - BERTOLT BRECHT
- GER 1522 - GERMANY TODAY
- GER 1524 - GERMAN CONTRIBUTIONS WORLD LITERATURE
- GER 1526 - DRAMA OF IDEAS
- GER 1528 - VIENNA
- GER 1529 - BERLIN: A DIVIDED CITY

- GER 1530 - SEX, ROBOTS, REVOLUTION: CULTURE OF THE WEIMAR REPUBLIC
- GER 1535 - OUTSIDERS IN GERMAN LITERATURE
- GER 1540 - NIETZSCHE AND THE NIETZSCHEANS
- GER 1542 - MARX AND MARXISM
- GER 1544 - FREUD AND FREUDIANS
- GER 1545 - NAZI CULTURE
- GER 1546 - HOLOCAUST LITERATURE AND FILM
- GER 1548 - NEW GERMAN CINEMA
- GER 1590 - SPECIAL TOPICS IN TRANSLATION

Capstone course

Students should take the capstone seminar in the fall term of their senior year.

- GER 1399 - SENIOR CAPSTONE SEMINAR

Additional requirements

Grade requirements: A 2.00 GPA is required in is required in each course that counts toward the major.

Satisfactory/No Credit option: No course that counts toward the major can be taken on an S/NC basis unless the student receives special permission from the major advisor.

Writing requirement: GER 1001 - GERMAN WRITING and GER 1003 GER 1003 - PROFESSIONAL GERMAN fulfill the requirement for a writing course in the major.

Honors requirements: To earn departmental honors in German, students must demonstrate superior performance in departmental courses by:

- earning an average GPA of at least 3.5 in their major courses;
- demonstrating a high level of proficiency in speaking and writing German; and
- completing a three-credit senior honors project (in addition to the credits required for the major), which has been accepted by the departmental faculty. Senior honrs projects may include:
 - a semester-long, independent research project, as an extension of the senior thesis written during the capstone seminar;
 - taking an exam on a comprehensive reading list derived by the student in consultation with the faculty; or
 - enrolling in a graduate seminar and completing a graduate paper.

Students are encouraged to study and reside in a German-speaking country as a component of the German major. Numerous possibilities exist for such study, and financial aid is often available.

Total Major Credits: 33

Interdisciplinary German Studies, BA

The Interdisciplinary German Studies, BA program was approved for termination in Summer 2023. Students enrolled in the program will have until Fall 2025 to complete program requirements.

The study of foreign language and culture is a cornerstone of education in today's world. It teaches intercultural competence by increasing students' understanding of their own background and their sensitivity for other traditions and values. Knowledge of foreign language and culture brings obvious competitive advantages in careers with an international dimension. As a liberal arts discipline, it improves analytic-conceptual and communication skills necessary for professional careers. Enhanced with appropriate course work, a major in German serves as a foundation for

professional training in such subjects as business, law, politics, and medicine, as well as the media and communication industry. Students with a bachelor's degree in German will compete well in non-technical fields for jobs requiring an undergraduate degree.

Required language courses

Students must take a minimum of four language courses and finish Intermediate German 2 as described. Equivalency of other courses will be determined by the department.

- GER 0101 - BEGINNING GERMAN 1
- GER 0102 - BEGINNING GERMAN 2

And one of the following groups of language courses.

- GER 0103 - BEGINNING GERMAN 3
- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2

- GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1
- GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2

Required writing-intensive course

Select one of the following writing-intensive courses.

- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN

1000-level course

Students must complete one course at the 1000-level in the Department of German.

Literary analysis course

- GER 1105 - LITERARY ANALYSIS

1100- to 1400-level courses

Students must complete three courses at the 1100- to 1400-level in the Department of German.

1500-level courses

Students must complete four courses at the 1500-level in the Department of German. Courses with significant German Studies content offered by other departments may also satisfy this requirement. Check with the undergraduate advisor for information on non-departmental courses that qualify.

Capstone course

- GER 1990 - SENIOR THESIS

Other requirements

Grade requirements: A minimum GPA of 2.0 is required in each course that counts toward the major.

Satisfactory/No Credit option: No course that counts toward the major can be taken on an S/NC basis unless the student receives special permission from the major advisor.

Writing (W) requirement: Students must complete at least one W-course in the major. GER 1001 and GER 1003 fulfill this requirement.

Honors major requirements: To earn departmental honors in German, students must demonstrate superior performance in departmental courses by:

- earning at least a 3.5 GPA average in their major courses;
- demonstrating a high level of proficiency in speaking and writing German; and
- completing a three-credit senior honors project (in addition to 31 credits of the major) that has been accepted by the departmental faculty. Senior honors projects may include:
 - a semester-long, independent research project, as an extension of the senior thesis written during the capstone project; or
 - taking an exam on a comprehensive reading list derived by the student in consultation with the faculty; or
 - enrolling in a graduate seminar and completing a graduate paper.

Minor

German Minor

The German minor requires 15 credits of coursework to complete. Students interested in the minor may tailor their course selection according to their interest in German language, literature, and film studies, but must complete at least two 3-credit courses taught in German.

Required Courses

Students pursuing this minor will take two courses that instruct them in the vocabulary and proper use of the German language. These courses will be taught in German.

Additionally, students will take three courses that focus on German language and culture. Courses in this group may be taught in German or in English.

- GER 0101 - BEGINNING GERMAN 1
- GER 0102 - BEGINNING GERMAN 2
- GER 0103 - BEGINNING GERMAN 3
- GER 0201 - INTERMEDIATE GERMAN 1
- GER 0202 - INTERMEDIATE GERMAN 2
- GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1
- GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2
- GER 0205 - CONVERSATION 1
- GER 0206 - CONVERSATION 2
- GER 1000 - READING LITERARY TEXTS
- GER 1001 - GERMAN WRITING
- GER 1003 - PROFESSIONAL GERMAN
- GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM
- GER 1005 - GERMAN MEDIA FROM TV TO YOUTUBE
- GER 1051 - INTRODUCTION TO LITERARY ANALYSIS
- GER 1101 - GERMAN MEDIA 2
- GER 1102 - GRÜEZI, SERVUS, HALLO: THE CONTEMPORARY GERMAN-SPEAKING WORLD
- GER 1103 - ADVANCED GERMAN 2: CREDIT LABORATORY
- GER 1104 - GERMANY UNDER THE SPELL OF AMERICA
- GER 1105 - LITERARY ANALYSIS
- GER 1106 - GERMAN CULTURAL HISTORY
- GER 1108 - GREEN GERMANY
- GER 1204 - UNITY IN DIVERSITY: EU-IDENTITY AS FACT AND FICTION

- GER 1220 - LITERATURE AND CULTURE 1750-1830
- GER 1234 - LITERATURE AND CULTURE 1890-1918
- GER 1252 - CURRENT LITERATURE AND CULTURE
- GER 1324 - SPECIAL TOPICS IN GERMAN PROSE
- GER 1350 - GERMAN DRAMA
- GER 1390 - MINORITIES IN POST-WAR GERMANY
- GER 1399 - SENIOR CAPSTONE SEMINAR
- GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
- GER 1410 - KAFKA AND THE MODERN WORLD
- GER 1500 - GERMANIC MYTHS, LEGENDS AND SAGAS
- GER 1502 - INDO-EUROPEAN FOLKTALES
- GER 1503 - INDO-EUROPEAN FOLKTALES WRITING PRACTICUM
- GER 1504 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY
- GER 1510 - KAFKA AND THE MODERN WORLD
- GER 1512 - GERMAN LITERATURE AND EUROPEAN PHILOSOPHY: GOETHE'S FAUST
- GER 1518 - BERTOLT BRECHT
- GER 1522 - GERMANY TODAY
- GER 1524 - GERMAN CONTRIBUTIONS WORLD LITERATURE
- GER 1526 - DRAMA OF IDEAS
- GER 1528 - VIENNA
- GER 1529 - BERLIN: A DIVIDED CITY
- GER 1530 - SEX, ROBOTS, REVOLUTION: CULTURE OF THE WEIMAR REPUBLIC
- GER 1531 - ELEMENTARY GERMAN 1 FOR MASTER OF BUSINESS ADMINISTRATION STUDENTS
- GER 1535 - OUTSIDERS IN GERMAN LITERATURE
- GER 1540 - NIETZSCHE AND THE NIETZSCHEANS
- GER 1542 - MARX AND MARXISM
- GER 1544 - FREUD AND FREUDIANS
- GER 1545 - NAZI CULTURE
- GER 1546 - HOLOCAUST LITERATURE AND FILM
- GER 1548 - NEW GERMAN CINEMA
- GER 1550 - COMPUTATIONAL METHODS IN HUMANITIES
- GER 1590 - SPECIAL TOPICS IN TRANSLATION
- GER 1901 - INDEPENDENT STUDY
- GER 1902 - DIRECTED STUDY
- GER 1903 - GERMAN LANGUAGE TRAILER
- GER 1905 - GERMAN INTERNSHIP 1
- GER 1906 - GERMAN INTERNSHIP 2

Department of Hispanic Languages and Literatures

The study of a second language, literature, and culture like Spanish traditionally has been one of the central components of an undergraduate education in the humanities. Today there is an added practical dimension to this. With economic and cultural globalization, our links as a nation with Spain and Latin America, including Brazil, have become much closer. At the same time, Spanish is not only a second language for us; it has become much like French in Canada, a de facto second language in the United States, which now has a Spanish-speaking population of more than 30 million. As a result, there is a growing demand for persons trained in Spanish (and also Portuguese) in many fields, especially education, where there is a shortage of new teachers of Spanish language and culture.

The undergraduate **major in Spanish** at the University of Pittsburgh offers a balanced combination of courses designed to strengthen oral and written language skills, and courses that introduce students to the study of Spanish and Latin American literatures and cultures. Majors also have the opportunity to enroll in the **minor in Portuguese Language and Luso-Brazilian cultures**, thereby opening channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. Students with a more general interest in Latin American languages and cultures can choose to minor in Hispanic Languages and Literatures.

In all cases, we encourage students to include at least a semester of study abroad in a Spanish- or Portuguese-speaking country and we offer study-abroad programs. Students interested in going on to graduate school should strongly consider the honors major; those who want to teach Spanish can obtain teacher certification through the School of Education. The department also offers courses taught in English for non-majors interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures. Students can also take advantage of the **non-curricular** activities organized by the department, which include conversation clubs and films series.

Departmental Honors requirements

Especially for students interested in graduate work, the department offers honors in the major, which requires:

- a 3.5 average in departmental courses and 3.0 overall
- a senior thesis of 25-30 pages, written under the supervision of a faculty member close to the field of the thesis
- at least a semester of study abroad is strongly recommended but not required

Students should declare their intention to pursue the honors major no later than at the beginning of their senior year. The thesis will be evaluated by the advisor and two other faculty members in the department. Students may take an independent study with their supervisor that will fulfill the requirement of one upper level course. For further information, consult with the director of undergraduate studies

Teacher Certification

Students who plan to teach Spanish after completing the major should consult with their advisor or the director of undergraduate studies in the department, as well as with the advisors for Pennsylvania Teaching Certification and Masters of Arts in Teaching Programs in the School of Education (Maggie Sikors, mjs 169@pitt.edu, 5504 Posvar Hall, 412-648-7413).

Study Abroad Options for Majors in the Hispanic Languages and Literatures Department

Students are strongly encouraged to add an international dimension to their undergraduate education through studying abroad. By participating in a study abroad program, students earn credits toward their degree. The department offer four programs that are matched directly with major and minor requirements. Information on some of the programs follow.

Study abroad is strongly encouraged. The department offers four programs that are matched directly with major and minor requirements. Information on some of the programs follows.

- Study abroad in Alcalá de Henares, Spain (30 minutes from Madrid) runs every odd-numbered year; for more information, send an e-mail to alcala@pitt.edu.
- Study abroad in Santiago de Chile runs every even-numbered years; for more information, send an e-mail to chile@pitt.edu.
- Study abroad in Porto Alegre, Brazil runs every year; for more information, send an e-mail to brazilsa@pitt.edu.
- Study abroad in Havana, Cuba runs every year; for more information, contact the Study Abroad Office (www.abroad.pitt.edu) via e-mail abroad@pitt.edu or by phone at 412-648-7419.

Major

Spanish, BA

The undergraduate program in Hispanic Languages and Literatures at the University of Pittsburgh is designed to be flexible and diverse in order to meet the needs of students with varying interests and career goals. The major offers a balanced combination of courses designed to strengthen oral and written Spanish language skills and courses that introduce students to the study of Spanish and Latin American literatures and cultures. Majors also have the opportunity to enroll in the minor in Portuguese Language and Luso-Brazilian Culture, thereby opening channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. Students with an interest in Latin American languages and cultures can chose to minor in Spanish. In all cases, we encourage students to include at least one semester of study abroad in a Spanish- or Portuguese-speaking country. Students interested in going to graduate school should consider the honors major; those who

want to teach Spanish can obtain a teacher certification through the School of Education. The department offers courses taught in English for non-majors interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures. Finally, students can take advantage of the non-curricular activities organized by the department, which include conversation clubs and films series.

Major requirements

Prerequisites

Before declaring the major, students must complete four Spanish language courses in order to gain the indispensable skills to effectively read, write and discuss in a second language. Students with any previous knowledge of Spanish must take a placement test. Please note that *a grade of B+ or higher in SPAN 0104 is required to declare the major*. The Spanish major requires students to complete 38 credits of coursework as detailed below.

Required Courses

Basic Level

- SPAN 0120 - CONVERSATION
- Either SPAN 0125 - GRAMMAR AND COMPOSITION or
- SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS
- Either PORT 0101 - ELEMENTARY PORTUGUESE 1 or
- PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS 1

Mid Level

All of the following courses are required. SPAN 1055 meets the writing requirement. PORT 0101 cannot be used to meet requirements for the Spanish major and the Portuguese and Luso-Brazilian minor.

- Either SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1 or
- SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
- SPAN 1250 - HISPANIC CIVILIZATIONS
- Either SPAN 1260 - OVERVIEW OF SPANISH LITERATURE or
- SPAN 1280 - OVERVIEW OF LATIN AMERICAN LIT
- SPAN 1300-level course
- One additional SPAN course at the 1200-level or 1300-level

Upper Level

- SPAN 1806 - CAPSTONE SEMINAR

Three electives

Students must complete three upper-level elective courses from the 1400, 1600, and/or 1700 series. These courses address topics such as colonial literatures and cultures; the Latin American novel; U.S.-Latino literature and film; the African presence in Hispanic literature and culture; Queer Mexico; the Incas.

PORT 0102 - ELEMENTARY PORTUGUESE 2 may be used to meet this requirement only if the student is pursuing the Portuguese and Luso-Brazilian minor.

Additional information and requirements

- **W requirement:** Spanish majors must complete one writing-intensive (W) course in the major. The following courses satisfy this requirement.
 - SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1
 - SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
- **Grade requirements:** Students must maintain an average GPA of 2.0 or above in all department courses. No courses with a grade of C- or lower will count toward the major.
- **Satisfactory/No-Credit option:** Majors may take one required course on an S/NC basis.
- **Language of instruction:** Spanish majors can take up to one course offered by the department that is taught in English. In order to have it count toward minor requirements, written assignments must be submitted in Spanish.
- **Study Abroad:** At least one term of study abroad is recommended.
- **Credits in residence:** To complete the Spanish major, students are required to take at least half of the credits required for the major while in residence in the Dietrich School.
- **Placement into language courses:** For the Spanish placement test, please contact the Spanish Language Coordinator, Dolores Lima, dlima@pitt.edu. For the Portuguese placement test, please contact the Portuguese Language Coordinator, Ana Paula Carvalho, apcst11@pitt.edu.
- **Credit by examination:** Students may receive credit by examination for some Spanish language courses. Similar credits may be earned in Portuguese.

Double majors, dual degrees and CLAS certificates

Students who have declared an additional major or pursue a dual degree need to take only three of the four upper-level courses. The same rule applies to students taking the CLAS Field Trip to Latin America. Only one course reduction applies if a student meets more than one of these criteria.

Minor

Hispanic Language and Culture Minor

The Hispanic Language and Culture minor will prepare students for graduate studies, professional studies, and work, it will prepare students to take Hispanic linguistics and advanced cultural and social courses that apply to the region. It requires fewer literary courses than the traditional Spanish minor while helping students to sharpen their communication skills and cultural understanding.

This minor requires 18 credits for completion. At least half of the credits for the minor, including no fewer than one upper-level course, must be taken on the Pittsburgh campus.

Core courses

- SPAN 0120 - CONVERSATION
- Either SPAN 0125 - GRAMMAR AND COMPOSITION or
- SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS
- SPAN 1250 - HISPANIC CIVILIZATIONS
- SPAN 1312 - OVERVIEW OF SPANISH LINGUISTICS

Upper-level required course

One course from the following list.

- SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
- Any 1300-level SPAN course

Upper level elective course

Students must complete one additional upper-level course from the 1400-, 1600-, or 1700-series. The department prefers that students choose courses identified as having a focus on culture or cultural studies rather than a literary emphasis.

Additional requirements and information

Language of Instruction

Students pursuing the Hispanic Language and Culture minor can take up to one course offered by the department that is taught in English. In order to have it count toward minor requirements, however, written assignments must be submitted in Spanish.

Credits in Residence

To complete the Hispanic Language and Culture minor, students are required to take in residence at the University of Pittsburgh a minimum of nine credits of the 18 required for the minor. One upper level elective must be included in these nine credits.

Grade Requirements

Students must maintain an average grade of C or higher in all department courses. No course with a grade below C will count toward minor requirements.

Satisfactory/No Credit Grade Option

No course that counts toward this minor may be taken on the Satisfactory/No Credit (S/NC) grade basis.

Portuguese and Luso-Brazilian Culture Minor

Students interested in studying the Portuguese language and the cultures of Brazil and other Portuguese-speaking countries can enroll in the minor in Portuguese Language and Luso-Brazilian cultures. This course of study opens channels of communication with millions of people around the world, including Brazil, Latin America's largest and most heavily populated country. The department encourages students to include at least one semester of study abroad in a Portuguese-speaking country. The department offers courses taught in English for students interested in Hispanic, Latin American, Luso-Brazilian, or U.S. Latino cultures.

Students must complete at least 15 credits of coursework, described as follows, to complete the minor.

Required courses

- Either PORT 0101 - ELEMENTARY PORTUGUESE 1 or
- PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS 1
- PORT 0102 - ELEMENTARY PORTUGUESE 2
- PORT 0103 - INTERMEDIATE PORTUGUESE 3
- PORT 0104 - INTERMEDIATE PORTUGUESE 4
- PORT 0120 - CONVERSATION
- PORT 0125 - GRAMMAR AND COMPOSITION
- PORT 1052 - LUSO-BRAZILIAN LITERATURE
- PORT 1053 - LUSO-BRAZILIAN TOPICS
- PORT 1061 - SURVEY OF BRAZILIAN LITERATURE
- PORT 1458 - CULTURES OF THE PORTUGUESE SPEAKING WORLD

Additional Requirements

Declaring the minor

Students must apply for any official minor they will complete or have completed at the time they apply for graduation. Students must complete at least half of the credits toward these minors while enrolled in the Dietrich School of Arts and Sciences at the University of Pittsburgh.

Grade requirements

Students must maintain a minimum GPA of 2.0 or higher in departmental courses. No course with a grade below C will count toward the major requirements.

Placement

If a student places out of a required course for the minor, the student will need to take the equivalent number of credits in additional mid- or upper-level Spanish courses in order to meet minimum credit requirements.

Additional Information

Study Abroad

The department offers programs in Buenos Aires, Argentina; Alcalá de Henares, Spain; Havana, Cuba; and Lisbon, Portugal. For more information please visit the Study Abroad Office website at <http://www.abroad.pitt.edu/> or by phone 412-624-7413.

Spanish writing center

This center provides free, individual help to students enrolled in language, grammar and literature courses. Students may also stop by to practice their conversational skills. The Spanish Writing Center, located in CL 1302-B, is staffed by TAs and/or TFs from the department. The center will be open from September to May; schedules are announced at the beginning of each fall and spring term.

Spanish and Portuguese clubs

These two clubs will offer activities throughout the academic year. Check the department's Web site for details about Mesas de conversación, Movie Nights, and Brazil Nuts events.

Spanish Minor

Before declaring the Spanish minor, students must complete four Spanish language courses in order to gain indispensable skills to effectively read, write, and discuss in a foreign language. Students with previous Spanish experience are encouraged to take a placement exam. Students must earn a grade of B+ or higher in SPAN 0004 to declare this minor.

Prerequisite courses

- SPAN 0004 - INTERMEDIATE SPANISH 4

Required courses

- SPAN 0120 - CONVERSATION
 - Either SPAN 0125 - GRAMMAR AND COMPOSITION or
 - SPAN 0126 - SPANISH ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS
 - SPAN 1250 - HISPANIC CIVILIZATIONS
- And one of the following courses.
- SPAN 1055 - INTRODUCTION HISPANIC LITERATURE 1
 - SPAN 1056 - READING, WRITING, & HEALTH IN SPANISH
 - SPAN 1260 - OVERVIEW OF SPANISH LITERATURE
 - SPAN 1280 - OVERVIEW OF LATIN AMERICAN LIT

Two of the following courses

- Any SPAN 1400-level course
- Any SPAN 1600-level course
- Any SPAN 1700-level course

Department of History

Historians use methods, techniques, and ideas from a wide range of humanistic and social scientific fields to teach students how materials from many fields are integrated to describe or explain a particular historical time period or topic. History is an open-ended discipline, and the department

welcomes students, as well as ideas and techniques, from other subjects. History also gives a student many options for a future career. Many history majors have become lawyers, journalists, civil servants, and business executives. The future of a history major is not limited to college or school teaching, although these are also available career choices. Expanding opportunities are to be found in public and private agencies, in businesses, archives, historical societies, museums, and government offices. History courses may help students to develop a balanced program that will further their career and intellectual goals. Courses in economics and history could lead to an understanding of economic development and aid a business or civil service career; a combination of language, literature, and history would give a student background that could lead to a career in foreign service or teaching; a mixture of communication and writing with history might prepare one for a career in journalism. In short, students in practically any field can investigate questions that are intellectually exciting and personally helpful by taking history courses related to their programs and ambitions. For more information on the major, the minor, or the Department of History, visit <http://www.history.pitt.edu/>.

Certificate

Sport Studies Certificate

The Sport Studies Certificate offers Pitt students the opportunity to engage, learn, and think critically about sport as part of the human experience from multidisciplinary approaches. Students will learn how sport shapes economies, politics, world history, health, science and social life. In a city that often tells its story to the world through sport, and at a university that has been center stage in the nation's sporting history, many students seek to forge careers in sport. This certificate will enhance their understanding of sport-its evolution, complexities, and potential-so that their eyes are wide open if sport is part of their future. Some students will work on the business side of sport or in its collegiate, scholastic, and amateur infrastructure, or as lawyers, journalists, producers, physical therapists, medical clinicians, athletic department staff, and researchers. Others will enter the burgeoning arena of sport for development and peace or take this knowledge back to their communities. Still more are fascinated by sport and study its history, literature, economics, kinesiology, and the like for the sake of that knowledge. This certificate will better prepare students for working in a sport-related field, help them stand out in seeking such employment, and deepen their understanding of something that matters to them.

The certificate program requires at least 18 credits, described as follows.

Gateway Course

Select one course from the following list. These courses offer an expansive, multi-disciplinary overview of sport.

- ANTH 0710 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY
- HIST 1082 - WOMEN, GENDER AND SPORT
- HIST 1083 - HISTORY OF SPORTS

Foundational Course

Select one course from the following list.

- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 1645 - AMERICAN ECONOMIC HISTORY
- HIST 1661 - GENDER AND SEXUALITY IN THE US SINCE 1865
- HIST 1685 - U.S. POPULAR CULTURE
- SOC 0005 - SOCIETIES
- SOC 0460 - RACE AND ETHNICITY

Elective Sport-Related Courses

Select four courses from the following list. After one Gateway course is taken, other Gateway courses can be taken to meet the Elective requirement. After the Foundational course is taken, other Foundational courses may not be counted toward the elective requirement.

Gateway courses are indicated by an asterisk (*).

- AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS
- ANTH 0711 - THE INTRODUCTION TO THE ANTHROPOLOGY OF SPORT *
- ANTH 1744 - ANTHROPOLOGY OF THE OLYMPICS
- ANTH 1746 - THE OLYMPICS & IDENTITY - RACE, GENDER, ETHNICITY & THE NATION STATE
- CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD or
- HIST 1746 - ATHLETICS OF THE ANCIENT WORLD
- ECON 0460 - SPORTS ECONOMICS
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGWRIT 1393 - SPORTS WRITING
- FMST 1885 - BROADCASTING
- GSWS 0200 - SEX, RACE, AND POPULAR CULTURE
- GSWS 1130 - GENDERED BODIES
- HIST 1082 - WOMEN, GENDER AND SPORT *
- HIST 1083 - HISTORY OF SPORTS *
- HIST 1095 - SPORT AND GLOBAL CAPITALISM
- PHIL 1319 - ETHICS AND SPORT
- PS 1220 - SPORTS AND AMERICAN POLITICS
- RELGST 1428 - RELIGION AND SPORTS
- SOC 0465 - SOCIOLOGY OF SPORTS

Additional information

Internship credit

One three-credit internship may take the place of one elective course, pending approval by certificate oversight committee.

Grade Requirements

A minimum GPA of 2.0 is required for all courses that count toward the certificate.

Satisfactory/No Credit Option

Any number of courses that count toward this certificate may be taken on the S/NC basis.

For more information

If you have questions about the certificate or would like more information, email SportStudies@Pitt.edu.

Major

History, BA

We are all products of history. Imagine waking up one morning without any memory. How would you function in society? Even more importantly, how would society function if everyone's memory vanished? Students of history recover and analyze the past, preserving memory and learning from it. In doing so, they gain an appreciation of how crucial historical perspective is to being a well-informed, engaged citizen of both the United States and the world -- because historical literacy also entails the ability to understand people different from ourselves, an essential skill as all corners of the globe become increasingly connected.

Customary professional opportunities for History majors include teaching and law, and many History majors have gone on to graduate school in History and other fields. But the future for those who have studied the past can be almost anything. History majors succeed in many fields because they learn analytical and critical thinking skills and become adept in both oral and written communication. Careers of recent graduates bear this out. Our majors have gone on to jobs in business management, finance, tourism, government, medicine, and non-profits as well as taking advantage of opportunities in public history, archival work, historical societies, and museums.

Major Requirements

The History major requires completion of 36 credits, 18 of which must be at the 1000-level, distributed as follows.

Pre-1800 history course

Complete one course in pre-1800 history. A partial list of eligible courses follows.

- HIST 0089 - MAGIC, MEDICINE AND SCIENCE
- HIST 0100 - WESTERN CIVILIZATION I
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0751 - ANCIENT WORLDS
- HIST 0755 - RELIGION IN ASIA
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- HIST 0788 - WOMEN AND MEN IN ANCIENT MEDITERRANEAN SOCIETY
- HIST 0795 - HISTORY OF AFRICA BEFORE 1800
- HIST 1110 - MEDIEVAL HISTORY 1
- HIST 1111 - MEDIEVAL HISTORY 2
- HIST 1115 - THE WEST AND THE WORLD
- HIST 1121 - TUDOR ENGLAND
- HIST 1190 - MEDIEVAL GOVERNMENT AND SOCIETY
- HIST 1191 - ENGLISH ORIGINS OF AMERICAN LAW
- HIST 1420 - ANCIENT CHINA
- HIST 1422 - LATE IMPERIAL CHINA
- HIST 1475 - EAST ASIAN BUDDHISM
- HIST 1476 - RELIGION AND HEALING IN CHINA
- HIST 1477 - RELIGION IN JAPAN
- HIST 1610 - UNITED STATES COLONIAL
- HIST 1611 - AMERICAN REVOLUTION 1763-1791
- HIST 1740 - BUDDHIST MEDITATIVE TRADITIONS
- HIST 1757 - RELIGION IN INDIA
- HIST 1765 - ISRAEL IN THE BIBLICAL AGE
- HIST 1775 - ORIGINS OF CHRISTIANITY
- HIST 1776 - VARIETIES OF EARLY CHRISTIANITY
- HIST 1781 - ROMAN HISTORY
- HIST 1783 - GREEK HISTORY

U.S. History survey course

Choose one of the following courses.

- HIST 0600 - UNITED STATES TO 1877
- HIST 0601 - UNITED STATES 1865-PRESENT
- HIST 0670 - AFRICAN AMERICAN HISTORY TO 1877
- HIST 0671 - AFRICAN AMERICAN HISTORY SINCE 1865

Global Understanding

Complete one course each in four of the following six categories.

- Africa
- Asia
- Europe
- Latin America
- Middle East
- World/Comparative

Concentration

Three additional courses are to be selected by the student with the help of a faculty member or the undergraduate advisor to form a chronological, geographic, or thematic concentration, which should normally be decided upon by the junior year.

Skills

Each student must take the following sequence of two courses.

HIST 1001 - INTRODUCTORY SEMINAR

HIST 1000 - CAPSTONE SEMINAR

HIST 1001 must be taken before enrolling in HIST 1000.

- HIST 1001 - INTRODUCTORY SEMINAR
- HIST 1000 - CAPSTONE SEMINAR

Elective History course

Complete any course offered by the Department of History.

Notes

The following rules and requirements apply for history majors.

- Students must earn at least a 2.00 overall GPA in history courses.
- Majors may take a total of nine credits for the major on an S/NC basis. HIST 1000 - CAPSTONE SEMINAR or HIST 1001 - INTRODUCTORY SEMINAR may not be taken S/NC.
- History majors are strongly encouraged to add an international dimension to their undergraduate education by studying abroad.
- Students interested in graduate study in history should be aware that all graduate departments of history require proficiency in at least one second language and that many require competence in two languages for a PhD.
- The honors program consists of the regular major plus six extra credits. Honors students must take the following courses.
 - Honors in history consists of fulfilling all requirements for the major, plus an additional six credits for a total of 42 credits.
 - HIST 1902 - WRITING: HISTORY HONORS SEMINAR (instead of HIST 1000; this course is offered only in the fall term)

- HIST 1901 - INDEPENDENT STUDY
- HIST 1903 - HONORS THESIS/MAJORS; students in this course write a paper of 25 to 50 pages

Students may apply for the honors program in their sophomore year and upon completion of at least 12 credits in history. To apply, students must have a minimum 3.5 GPA in history courses, an overall GPA of at least 3.35, and submit a writing sample for approval by the Undergraduate Committee. The minimum letter grade requirement for honors students is B.

Internships for History Credit

History majors may do an internship for 3 credits (HIST 1900) in a local museum in either the fall or spring semesters. Contact the history academic advisor for information.

Study Abroad

Each year the department offers a scholarship for study abroad. Applications for the A. J. Schneider Award are due by February each year. Contact the history undergraduate advisor for more information.

Minor

History Minor

We are all products of history. Imagine waking up one morning without any memory. How would you function in society? Even more importantly, how would society function if everyone's memory vanished? Students of history recover and analyze the past, preserving memory and learning from it. In doing so, they gain an appreciation of how crucial historical perspective is to being a well-informed, engaged citizen of both the United States and the world -- because historical literacy also entails the ability to understand people different from ourselves, an essential skill as all corners of the globe become increasingly connected.

Customary professional opportunities for History majors include teaching and law, and many History majors have gone on to graduate school in History and other fields. But the future for those who have studied the past can be almost anything. History majors succeed in many fields because they learn analytical and critical thinking skills and become adept in both oral and written communication. Careers of recent graduates bear this out. Our majors have gone on to jobs in business management, finance, tourism, government, medicine, and non-profits as well as taking advantage of opportunities in public history, archival work, historical societies, and museums.

Minor Requirements

The History major requires completion of 36 credits, 18 of which must be at the 1000-level, distributed as follows.

Pre-1800 history course

Complete one course in pre-1800 history. A partial list of eligible courses follows.

- HIST 0089 - MAGIC, MEDICINE AND SCIENCE
- HIST 0100 - WESTERN CIVILIZATION I
- HIST 0400 - EAST ASIAN CIVILIZATION TO 1800
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0751 - ANCIENT WORLDS
- HIST 0755 - RELIGION IN ASIA
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION

Department of History of Art and Architecture

Art, like science or language, is an intrinsically human way of organizing our experience of the world. Because it appeals to a fundamental sense of order, art can speak to us with immediacy even without knowledge of the purposes for which it was created and the particular principles or order adhered to by the artists of a given culture. Still deeper understanding may follow, however, from an awareness of these purposes and principles, and courses in art history are concerned with the study of art and architecture as cultural documents of the values and ideals of various cultures. Art history offers an opportunity to consider objects and environments that have been created in response to some of humanity's loftiest and most basic aims. The requirement that these visual expressions be analyzed and evaluated in the medium of words makes art history a rewarding area of humanistic study. The major in the history of art and architecture offered by the HAA department helps prepare individuals for careers calling for

skills in writing, where description and analysis play important roles, as well as for careers more immediately related to art, such as those of critic, teacher, librarian, art administrator, or museum or gallery staff member.

The architectural studies major, also administered by the HAA department, offers a curriculum devoted to the study of human-made environments. The major components include history of architecture, studio arts, and a core curriculum that includes a survey of the history of architecture, the history of architecture theory, a professional internship, and a portfolio. The degree is suitable for a wide variety of careers and professions including the design and construction of the built environment, such as landscape architecture, interior design, restoration, historic preservation, real estate development, and contracting. These interests can be categorized in two groups:

- The preprofessional studies category prepares students for graduate professional training in any of the environmental design fields (architecture, interior design, landscape design, urban planning, and preservation). Students are able to explore a professional interest while acquiring a liberal arts education.
- The nonprofessional studies category is for students not interested in becoming professional architects. This program offers a rigorous curriculum that assists students in exploring their interest in environmental arts and criticism and provides an understanding of the environment's integral relationship with society and culture.

Students of both categories should be fully aware that this degree in architectural studies does not in itself constitute professional or technical training. Students seeking recommendations to graduate professional programs in architecture must complete a number of natural science courses in addition to those focused on architecture and design. Proficiency in calculus is required for students seeking a career in architecture. The department strongly recommends that students successfully complete at least one term of college level calculus (MATH 0220 or equivalent) before graduation.

For more information on these majors and the History of Art Architecture department, see www.haa.pitt.edu.

Architectural Studies Major

This major offers students two options - the Design track and the Preservation Track.

Certificate

Digital Studies and Methods Certificate

The DSAM undergraduate certificate is designed to guide students through the process of gaining their own, deeply engaged, understanding of the ways in which digital technologies affect their lives on a daily basis. It also offers an approach to learning how to take these tools up--mindfully and intentionally--into the students' broader academic and career-focused practices. This certificate requires completion of 18 credits.

Gateway courses

Gateway courses comprise three to six credits toward this certificate. Three credits are applied if taken in a single course; six credits are applied if the courses are paired in an Academic Community.

The following two courses are included in the (De)Coding Representation Academic Community and comprise six credits toward the certificate.

- SA 0110 - VISUAL THINKING
- CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- ENGCOMP 0425 - DIGITAL HUMANITY
- HAA 0425 - DIGITAL HUMANITY
- SA 0170 - DIGITAL STUDIO: CREATIVE CODING

Elective courses

Students will complete nine to 12 credits in elective courses selected from the following list. Courses from the Gateway list may also be applied as electives if not used for the Gateway requirement.

- ARC 1183 - DIGITAL ROMAN AFRICA: VISUALIZING ARCHITECTURE AND URBANISM IN ROMAN NORTH AFRICA
- CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS
- INFSCI 1044 - HUMAN FACTORS IN SYSTEM DESIGN
- INFSCI 1052 - USER CENTERED DESIGN
- INFSCI 1060 - GAME DESIGN
- ENGCOMP 0425 - DIGITAL HUMANITY
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 0712 - CRITICAL MAKING
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENGFLM 0712 - CRITICAL MAKING
- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 1002 - GAME, STORY, PLAY
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWRT 0710 - INTRO TO AUDIO STORYTELLING
- ENGWRT 1451 - MULTIMEDIA ESSAY
- HAA 0425 - DIGITAL HUMANITY
- MUSIC 1441 - ELECTRONIC AND COMPUTER MUSIC 1
- MUSIC 1442 - ELECTRONIC MUSIC STUDIO
- MUSIC 1443 - PROGRAMMING ENVIRONMENTS IN MUSIC - AN INTRODUCTION TO MAX/MSP
- MUSIC 1450 - MUSIC PRODUCTION AND RECORDING
- SA 0110 - VISUAL THINKING
- SA 0170 - DIGITAL STUDIO: CREATIVE CODING
- SA 1270 - DIGITAL STUDIO: IMAGING
- THEA 1231 - STAGE LIGHTING 2
- THEA 1391 - SPECIAL TOPICS: THEATRE DESIGN

Springboard course

Students will complete three credits in an interdisciplinary springboard course.

Major

History of Art and Architecture, BA

The HAA major requires the completion of 29 credits. An intensive major option that requires 38 credits also exists; this option is highly recommended for students whose only major is HAA and/or who seek to embark on arts-related careers.

Core Courses

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0101 - FOUNDATIONS OF ART HISTORY
- HAA 0102 - PROSEMINAR FOR UNDERGRADUATE MAJORS
Students must take this 1-credit course twice. Those who are pursuing a second major should consult with the departmental advisor if completing this course twice might impede their academic progress.

One of the following courses

- HAA 1010 - APPROACHES TO ART HISTORY
- ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY

Nine additional courses, as follows

Beyond the core curriculum, students must take an additional six courses according to the following requirements. Student pursuing the intensive track must take an additional nine courses according to the following requirements.

Breadth Requirements

Students must take at least one class from each of the following areas.

- Ancient art across the globe
- Asian art
- European art before 1750
- Modern or Contemporary art

Additionally, students must complete at least two courses at the 1000-level that address Comparative or World art. Students pursuing the intensive option should take four courses at the 1000-level in these categories.

Studio Arts

Students may elect to take one of the following courses toward completion of their HAA major.

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - PHOTO STUDIO 1

Honors requirements

Honors in the history of art and architecture is granted if the student satisfies all requirements for the intensive major, and:

- maintains a GPA of 3.5 or above in HAA courses;
- maintains an overall GPA of 3.25 or above;
- completes HAA 1950 - SENIOR THESIS with a minimum grade of A-, and;
- completes HAA 1951 - HONORS RESEARCH SEMINAR.

HAA 1950 can be applied toward the 1000-level requirement for the major.

Other requirements

Grade requirements: A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option: No course required for the major can be taken on an S/NC basis except HAA 1901, HAA 1903, HAA 1904, HAA 1905, and HAA 1909. These experiential learning courses **do not** count toward the 1000-level requirements.

Writing (W) requirement: Students must complete at least one W-course in the major. HAA 1010 is the W course for the HAA major.

Museum Studies, BA

Students in the Museum Studies program study the collection, preservation, archiving, and exhibition of historic objects, documents, and specimens from material culture, considering not only how museums and historic sites generate knowledge but also how they might partner with diverse

communities in the future to enrich our understanding of what it means to be human and how we occupy the world, and thus foster inclusivity and equity.

A major in Museum Studies helps students gain an informed understanding of institutional histories and contexts, critical and theoretical approaches and ethical considerations. In addition by incorporating hands-on, active, and collaborative learning and internship-based experiences, the program is oriented toward professional development and practice. Finally the capstone experience is designed to provide students with the agency to determine what role they wish to play in their professional future. Students in the program develop an annual exhibition, receive close mentoring from faculty and peer cohorts, participate in collaborative research, and have the opportunity to either design their own extensive independent project or engage in a substantive project with a local museum, collection, archive, or historic site.

The Museum Studies major is ideal for students who wish to pursue careers in museums or other cultural institutions, libraries, historic sites, state and federal heritage sites, non-profit organizations, or community-based programs. A minor option is also available and requires 15 to 16 credits of coursework for completion.

The Museum Studies major requires the completion of 30 credits, distributed as follows.

Foundational Courses

All of the following courses are required.

- HAA 0010 - INTRODUCTION TO WORLD ART
- HAA 0101 - FOUNDATIONS OF ART HISTORY
- HAA 0125 - MUSEUMS: SOCIETY AND INCLUSION?

Skill Development

Students take two 1-credit workshops that are designed to interweave with the content-based curriculum that is the primary focus of the breadth courses.

Advanced Courses

Students will choose one course from the Museum History list and one course from the Museum Practice list.

Museum History

- HAA 1025 - HISTORY AND ETHICS OF COLLECTING
- HAA 1026 - EXHIBITIONS: FROM WORLD'S FAIRS TO GLOBAL BIENNIALS
- HAA 1027 - HERITAGE SITES
- HAA 1030 - SPECIAL TOPICS- MUSEUM HISTORIES
- HAA XXXX - THE GLOBAL POLITICS OF DISPLAY (under development)

Museum Practice

- HAA 1019 - CURATORIAL DEVELOPMENT
- HAA 1021 - INSIDE THE MUSEUM
- HAA 1022 - EXHIBITION PRESENTATION
- HAA 1031 - SPECIAL TOPICS: MUSEUM PRACTICES
- HAA 1905 - MUSEUMS STUDIES INTERNSHIP *

This course has a pre- or co-requisite of HAA 0106 - MUSEUM STUDIES INTERNSHIP PREP WORKSHOP, which adds one credit to the major for students who pursue the internship option.

Capstone

Students will have the opportunity to complete an intensive independent project in lieu of participating in an internship experience.

Additional Information

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option

No course required for the major can be taken on an S/NC basis except HAA 1901, HAA 1903, HAA 1904, HAA 1905, and HAA 1909. These experiential learning courses do not count toward the 1000-level requirements.

Writing requirement

Students must complete at least one W-course in the major. HAA 1010 is the W course for the HAA major.

Honors major requirements

Honors in museum studies is granted if the student satisfies all requirements for the intensive major, and:

- maintains a GPA of 3.5 or above in required courses;
- maintains an overall GPA of 3.25 or above;
- completes HAA 1950 - SENIOR THESIS with a minimum grade of A-, and;
- Completes HAA 1951 - HONORS RESEARCH SEMINAR.
- HAA 1950 can be applied toward the 1000-level requirement for the major.

Minor

Museum Studies Minor

This minor is grounded in the department's historic strengths - to offer students a critically informed understanding of how cultural artifacts have been, are, and can be collected and curated. At its core, the goal of the Museum Studies Minor is to introduce students to the approaches, history, and theories of museum and collection practices.

Students pursuing the Museum Studies minor must complete the following coursework, which comprises 15 credits.

Two Foundation Courses

- HAA 0125 - MUSEUMS: SOCIETY AND INCLUSION?
- Any 'Art and its Publics' Course

Two Core Courses

Museum Histories

Select one of the following courses.

- HAA 1025 - HISTORY AND ETHICS OF COLLECTING
- HAA 1026 - EXHIBITIONS: FROM WORLD'S FAIRS TO GLOBAL BIENNIALS
- HAA 1027 - HERITAGE SITES
- HAA 1030 - SPECIAL TOPICS- MUSEUM HISTORIES

Museum Practices

Select one of the following courses.

- HAA 1019 - CURATORIAL DEVELOPMENT
- HAA 1021 - INSIDE THE MUSEUM
- HAA 1022 - EXHIBITION PRESENTATION
- HAA 1031 - SPECIAL TOPICS: MUSEUM PRACTICES
- HAA 1905 - MUSEUMS STUDIES INTERNSHIP *

Note

* HAA 1905 has a prerequisite of HAA 0106 - MUSEUM STUDIES INTERNSHIP PREP WORKSHOP, which will add one additional credit to the minor for students who pursue the internship option. The Academic Curator of the Department of History of Art and Architecture will work with Museum Studies minors to place them into appropriate internship positions.

Elective Course

Students take one additional course from the 'Art and Its Publics' list, a course from the 'Competency Course' list, or any of the above courses not previously applied to the minor.

Department of History and Philosophy of Science

Certificate

Conceptual Foundations of Medicine Certificate

This certificate requires completion of at least 18 credits. Students enrolled in the program are expected to achieve at least a letter grade of C in each required course. Those interested in pursuing this certificate must apply to the program as early as possible. Applications are available on the certificate's Web page, www.hps.pitt.edu/undergraduate/certificate.php.

Core courses

- HPS 0612 - MIND AND MEDICINE
- HPS 0613 - MORALITY AND MEDICINE

Biological Sciences courses

A two-term, college level course sequence in biology, such as BIOSC 0150 BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 and BIOSC 0160 BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 are required for this certificate.

Additional coursework

Two additional approved courses in two different departments dealing with social and conceptual issues in the biomedical sciences are required for this certificate. A list of such approved courses is available in the Department of History of Philosophy and Science prior to each term. Courses are approved on a term-by-term basis.

Other requirements

Grade Requirements: Students are expected to achieve a minimum grade of C in each course required for this certificate. A minimum overall GPA of 2.25 is required in courses required for this certificate.

Satisfactory/No Credit Option: No course that fulfills a requirement for this certificate may be taken on an S/NC basis.

Major

History and Philosophy of Science, BA

The study of the history and philosophy of science affords a broad appreciation of science, its nature and fundamentals, its origins and its place in modern politics, culture, and society. In the history of science, traditional historical methods are used to develop an understanding of how the sciences originated, how they were practiced, how they developed, and how they are related to their intellectual and social contexts. In philosophy of science, the sciences themselves are brought under philosophical scrutiny. We investigate the nature of science in general; what distinguishes scientific activity; how theories explain; how they are confirmed; whether they should be read literally; and the moral dilemmas raised by the sciences. We also investigate the fundamental content of individual sciences, and how it bears on the ancient philosophical questions: what is the nature of space, time, and matter; what is life; and what is thought. History and philosophy of science is distinctive in integrating history, philosophy, and science, with investigations in each that are often closely interwoven.

The Department of History and Philosophy of Science (HPS) at Pitt is a world leader in its field. Historians and philosophers of science worldwide come to Pitt for study and research. The undergraduate courses reflect the conviction that science and technology pervade every aspect of our lives, and have played a central role in cultural, religious, and philosophical development of our society.

A major in HPS is an excellent choice for students who wish to combine course work in the sciences with work in more humanistically inclined disciplines. Because HPS majors are expected to complete 15 hours of science credits, a double major in HPS and one of the sciences is especially attractive.

Required courses for the History and Philosophy of Science major

This major requires the completion of 12 courses distributed as follows.

One of the following Logic courses

- HPS 0611 - PRINCIPLES OF SCIENTIFIC REASONING
- PHIL 0500 - INTRODUCTION TO LOGIC

Both of the following

- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE *
 - HPS 1702 - JR/SR SEMINAR FOR HPS MAJORS
- * The Logic requirement must be completed before taking HPS 1653.

HPS electives

Students must complete four HPS elective courses, one of which must be at the 1000-level. At least one course must be a history of science course.

Natural and/or Social Science electives

Students are required to complete at least four courses in the natural sciences, social sciences, or a combination of both. Majors must pursue at least one science course at an advanced (non-introductory) level. Students are strongly encouraged to choose these courses in consultation with the major advisor.

Grade requirements

A minimum GPA of 2.0 in courses that count toward the major is required for graduation.

Satisfactory/No Credit option

No course that counts toward the major can be taken on an S/NC basis.

Writing (W) requirement

Students must complete HPS 1703 - WRITING WORKSHOP FOR HPS MAJORS for HPS Majors in conjunction with HPS 1702 - JR/SR SEMINAR FOR HPS MAJORS.

Declaring the major

Before students officially declare the History and Philosophy of Science major, they must have completed two HPS courses with a grade of B- or better and have permission from the major advisor.

Jewish Studies Program

The Jewish Studies Program, an interdisciplinary program in the School of Arts and Sciences, offers courses and academic programs devoted to the exploration of Jewish history, culture, religion, thought, and literary and artistic expression. Faculty is drawn from the departments of Religious Studies, Anthropology, English, French and Italian Languages and Literatures, German, History, and Political Science.

Certificate

Jewish Studies Certificate

The Jewish Studies Certificate is open to all students interested in the Hebrew language and the history and culture of the Jewish people and their contributions to Western civilization. In the historical courses, emphasis is on the interaction of the Jewish people with their neighbors, as well as the development of distinctive cultural and religious values. Information is also available on opportunities for intensive study in Israel. The Jewish Studies certificate offers undergraduates the opportunity to supplement work in their chosen majors with an interdisciplinary course of study.

Requirements

The certificate requires 16 to 20 credits, dependent upon initial Hebrew language placement. The credits are distributed as follows.

Required Hebrew courses

Students must complete at least one course (three credits) in Hebrew language at Hebrew 2 or above. JS 0013 - ELEMENTARY HEBREW 1 does not count toward the certificate, but it is a requirement for enrolling in JS 0014 - ELEMENTARY HEBREW 2.

- JS 0014 - ELEMENTARY HEBREW 2
- JS 0025 - INTERMEDIATE HEBREW 3
- JS 0026 - INTERMEDIATE HEBREW 4

Jewish Studies courses

Students must complete at least three Jewish Studies courses. One of these courses can be a Hebrew language course. A non-JS course that has significant Jewish Studies content can count for one of the three courses with approved from the Director of Undergraduate Studies.

Capstone course

At least one course (three credits) in a capstone project, additional advanced coursework, or experiential learning through one of the following courses.

- JS 1900 - INTERNSHIP
- JS 1903 - DIRECTED RESEARCH-UNDERGRADUATE
- JS 1904 - UNDERGRADUATE RESEARCH ASSISTANTSHIP
- JS 1905 - UNDERGRADUATE TEACHING ASSISTANT
- Advanced work in Hebrew in JS 0037 - ADVANCED HEBREW 5 or beyond.
- Submission of a capstone research paper on a Jewish Studies topic written for a major or another certificate.

Portfolio Essay and Independent Study

One credit of JS 1901 - INDEPENDENT STUDY taken in the final semester of work for certificate (can be concurrent with capstone) in which student develops reflective essay and portfolio of work in Jewish Studies under direction of certificate advisor.

- JS 1901 - INDEPENDENT STUDY

Grade Requirements

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

No courses that count toward the certificate may be taken on the Satisfactory/No Credit (S/NC) basis except for JS 1900, JS 1904, and JS 1905.

Other Requirements and Restrictions

At least nine credits must be taken at Pitt. Placement in Hebrew to count toward the certificate is based on a written test and an oral interview.

Department of Linguistics

Linguistics is concerned with the study of language as a core property of human cognition and interaction. It is a broad field that straddles the humanities, social sciences, and natural sciences. Major areas of study in linguistics include the following fields:

- Applied linguistics: second-language learning theory, literacy, bilingual education
- Computational linguistics: natural language generation, knowledge representation and artificial intelligence, recognition of systems
- Theoretical linguistics: development of psychologically plausible models of language sound systems, word structure, sentence and discourse structure, meaning
- Historical and comparative linguistics: study of language history, both language change and relationships among languages
- Descriptive-anthropological linguistics: documentation and analysis of languages, especially little-known languages through field work
- Psycholinguistics: research on such topics as sentence processing, problems in reading, how children acquire their first language (childhood language acquisition)
- Sociolinguistics: study of language use and socially controlled variation in form, conversation and narrative discourse, social trends reflected in language use, political aspects of language use

Careers in linguistics include teaching English as a second language and other languages including American Sign Language; computational linguistic research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

Many, but certainly not all, people come to linguistics through a love of languages. However, love of languages itself is not sufficient to ensure success and happiness as a linguistics major. The student must also enjoy analytical thought, as linguists employ analytical tools in the study of human languages. Students considering a major in linguistics should take the introductory linguistics course (LING 1950 - INTRODUCTION TO LINGUISTICS) at their earliest opportunity to help gauge if the major is right for them. The linguistics major gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. In addition, the major's language requirement is designed to make sure students acquire a perspective on linguistic structures besides those of their native language and at least some exposure to one language that is structurally very unlike English. For more information on the major or the Department of Linguistics, see www.linguistics.pitt.edu.

Certificate

American Sign Language Certificate

The Department of Linguistics offers an undergraduate Certificate in American Sign Language (ASL). This certificate program should lead students to: a high degree of proficiency in ASL; an understanding of the structure of ASL as a visual/gestural language; and an understanding of important issues in deaf culture and education.

This certificate program could conveniently accompany various undergraduate majors including, but not limited to, linguistics, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the University of Pittsburgh School of Education. The program draws on the academic strengths and resources of the Department of Linguistics in the Faculty of Arts and Sciences and the Department of Instruction and Learning in the School of Education.

Currently, there is a limit of 20 students per academic year who can enroll in the ASL certificate program. For this reason, each applicant will be required to go through an evaluation process. Applications are accepted early during the spring term of each academic year, and students will be notified of their acceptance or non-acceptance into the program before registering for fall classes. Please contact the Less-Commonly-Taught Languages Center, CL G-47, for application packets or more information (lctl@pitt.edu, 412-624-5512).

Requirements

Prerequisites

Students must pass the prerequisite courses with a letter grade of B or higher.

- ASL 0101 - AMERICAN SIGN LANGUAGE 1
- ASL 0102 - AMERICAN SIGN LANGUAGE 2

Required courses (18 credits)

Category 1

- ASL 0103 - AMERICAN SIGN LANGUAGE 3
- ASL 0104 - AMERICAN SIGN LANGUAGE 4

Category 2

- ASL 1615 - DEAF CULTURE

Category 3

Students must complete one of the following courses.

- LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1020 - NATURE OF LANGUAGE

Category 4

Students must complete one of the following courses.

- ASL 1705 - STRUCTURE OF SIGN LANGUAGES
- ASL 1715 - STRUCTURE OF ASL AND ENGLISH

Category 5

Students must complete one of the following courses.

- ASL 1635 - ANALYSES OF ASL LITERATURE
- ASL 1725 - SOCIOLINGUISTICS OF SIGN LANGUAGE
- ASL 1800 - INTRODUCTION TO ASL-ENGLISH INTERPRETING
- ASL 1909 - TOPICS IN SIGN LANGUAGE STUDIES

Other requirements

Grade Requirements: A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option: There is no limit to the number of courses that can be taken on the S/NC basis for this certificate. The two prerequisite courses must be taken for a letter grade.

Arabic Language and Linguistics Certificate

The Department of Linguistics offers an undergraduate certificate in Arabic Language and Linguistics. This certificate program should lead students to:

- an intermediate to advanced proficiency in Modern Standard Arabic (formal Arabic) and at least one Arabic dialect;
- an understanding of the linguistic structure of Arabic;
- an understanding of important issues in Arabic literature and culture; and
- exposure to authentic Arabic reading and listening materials, and discussion of general topics of interest in the Arab world in Arabic.

The certificate program could conveniently accompany several undergraduate majors including, but not limited to, linguistics, political science, communication science, and various undergraduate disciplines that serve as the basis for graduate-level degrees and certificates in the schools of education, law, and others.

Students who are interested in the Arabic Language and Linguistics Certificate can apply for the program after they complete the prerequisites for the certificate which is the completion of two semesters of the language with an average B grade or higher. However, students could also apply for the certificate any time before their graduation if they complete the requirements by then. Contact the Arabic coordinator, Amani Attia (ama66@pitt.edu) for advice on course planning, and to submit the application packet, which consists of three forms to be filled out by candidates. This certificate requires 32-34 credits for completion.

Prerequisite dialect courses

Students must complete two semesters of Modern Standard Arabic in one dialect - Egyptian or Levantine, with a letter grade of B or higher to declare the certificate. In addition to the prerequisite courses, the certificate requires 22-23 credits of course work as described.

Choose one of the following pairs of courses.

Egyptian

- ARABIC 0101 - MODERN STANDARD ARABIC 1/EGYPTIAN 1
- ARABIC 0102 - MODERN STANDARD ARABIC 2/EGYPTIAN 2

Levantine

- ARABIC 0121 - MODERN STANDARD ARABIC 1/LEVANTINE 1
- ARABIC 0122 - MODERN STANDARD ARABIC 2/LEVANTINE 2

Required Courses:

Two additional courses in the same dialect

In some cases, students could change from one dialect track to the other, based on study abroad needs, schedule conflicts, or other factors. The student must show a certain level of proficiency in the target dialect. Contact Arabic coordinator (ama66@pitt.edu) for advice on this issue.

Egyptian

- ARABIC 0103 - MODERN STANDARD ARABIC 3/EGYPTIAN 3
- ARABIC 0104 - MODERN STANDARD ARABIC 4/EGYPTIAN 4

Levantine

- ARABIC 0123 - MODERN STANDARD ARABIC 3/LEVANTINE 3
- ARABIC 0124 - MODERN STANDARD ARABIC 4/LEVANTINE 4

Introductory linguistics courses

- ARABIC 1705 - INTRODUCTION TO ARABIC LINGUISTICS
- LING 1000 - INTRODUCTION TO LINGUISTICS

Arabic culture course

Students must complete one of the following courses.

- ARABIC 1615 - ARABIC LIFE AND THOUGHT
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE

Arabic related elective

Students must complete one of the following courses. Dialect courses must follow previous coursework.

- ARABIC 0105 - MODERN STANDARD ARABIC 5/EGYPTIAN 5
- ARABIC 0106 - MODERN STANDARD ARABIC 6/EGYPTIAN 6
- ARABIC 0125 - MODERN STANDARD ARABIC 5/LEVANTINE 5
- ARABIC 0126 - MODERN STANDARD ARABIC 6/LEVANTINE 6
- ARABIC 1615 - ARABIC LIFE AND THOUGHT
- ARABIC 1635 - INTRODUCTION TO MODERN ARABIC LITERATURE
- ARABIC 1909 - SPECIAL TOPICS IN ARABIC
- ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION or
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- PS 1351 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST

Major

Linguistics, BA

The Department of Linguistics is known internationally for its strength in the areas of second language acquisition, applied linguistics, TESOL, and American Indian languages. Like many linguistics programs in the United States, the department is centrally concerned with core areas of linguistic theory. It also emphasizes the importance of the applied and descriptive endeavors. The areas of expertise of the faculty are theoretical and descriptive linguistics, Hispanic linguistics, sociolinguistics, psycholinguistics, and second language acquisition. The department prides itself on its collegial atmosphere and close cooperation between faculty and students.

A major in linguistics gives students a solid foundation in the central areas of linguistic theory and analysis. The structure of human language (its sounds, word structures, and syntax) is the focus of the linguistics courses required for the major. Additionally, the major's language requirement ensures that students acquire a perspective on linguistic structures outside of their native language, and that they receive some exposure to at least one language that is structurally unlike English. Students considering a major in linguistics should take LING 1000 - INTRODUCTION TO LINGUISTICS at their earliest opportunity to gauge if the major is right for them.

In addition to formal instruction provided by the department, students are encouraged to take courses in related departments such as anthropology and psychology. Students who wish to combine their work in linguistics with training in a specific cultural area may simultaneously earn a certificate in Asian, Latin American, Russian and East European, West European, or European Union Studies through the University Center for International Studies (UCIS). The department is also home to the English Language Institute, the Robert Henderson Language Media Center, and the Less-Commonly-Taught Languages Center.

Careers in linguistics include teaching English as a second language and teaching other languages including American Sign Language; computational linguistics research in industry and public agencies; field research on endangered languages and cultures; research and teaching at the university level; careers in publishing and advertising; speech pathology and rehabilitation; translation and interpreting; law; and governmental consulting on language policies. Most careers in linguistics require graduate training.

The major in Linguistics requires 30 credits of coursework, distributed as follows.

Core courses

Complete all of the following courses.

- LING 1000 - INTRODUCTION TO LINGUISTICS
- LING 1578 - PHONETICS AND PHONEMICS or LING 1878 - ACCELERATED PHONETICS AND PHONEMICS
- LING 1579 - PHONOLOGY or LING 1879 - ACCELERATED PHONOLOGY
- LING 1773 - MORPHOLOGY or LING 1873 - ACCELERATED MORPHOLOGY
- LING 1777 - SYNTACTIC THEORY or LING 1877 - ACCELERATED SYNTACTIC THEORY

Language, Linguistics, or Semantics

Complete one of the following courses.

- LING 1267 - ASPECTS OF SOCIOLINGUISTICS
- LING 1330 - INTRODUCTION TO COMPUTATIONAL LINGUISTICS
- LING 1580 - LANGUAGE AND THE MIND
- LING 1682 - INTRODUCTION TO SEMANTIC THEORY
- LING 1738 - LINGUISTIC STRUCTURES OF ENGLISH
- LING 1860 - INTRO TO HISTORICAL LINGUISTICS

Methods

Complete one of the following courses.

- LING 1269 - LINGUISTIC VARIATION AND CHANGE
- LING 1340 - DATA SCIENCE FOR LINGUISTS
- LING 1441 - FIELD METHODS IN LINGUISTICS
- LING 1810 - STATISTICS FOR RESEARCH IN LINGUISTICS
- LING 1820 - LINGUISTICS IN THE LAB
- LING 1844 - RESEARCH METHODS

Capstone course

Complete one of the following courses.

- LING 1900 - LINGUISTICS CONSULTING/INTERNSHIP: CONNECTING LINGUISTICS TO THE COMMUNITY AND INDUSTRY
- LING 1903 - DIRECTED RESEARCH
- LING 1930 - APPLICATIONS OF LINGUISTICS

Elective courses

Students are required to complete two LING 1000-level elective courses.

Language courses

Students are required to complete one semester of language study that is not Romance (including Latin), Germanic, Balto-Slavic, or Greek. This requirement is in addition to the two terms of language study required of students who are not exempt from the second language requirement for the Dietrich School of Arts and Sciences.

Other requirements and conditions

Grade requirements: A minimum GPA of 2.0 in departmental courses and LING 1000 is required for graduation.

Satisfactory/No Credit option: No more than two LING courses that count toward the major can be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major.

Minor

Hindi Minor

This minor requires 17 credits of coursework to complete.

Language courses

- HINDI 0101 - HINDI 1
- HINDI 0102 - HINDI 2
- HINDI 0103 - HINDI 3
- HINDI 0104 - HINDI 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Hindi or South Asia may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- HINDI 0105 Hindi 5
- HINDI 0106 Hindi 6
- HINDI 1909 - SPECIAL TOPICS IN HINDI
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ANTH 0730 - HIMALAYAN GEOGRAPHY
- ANTH 1764 - CULTURES AND SOCIETIES OF INDIA
- ANTH 1801 - HIMALAYAN BIODIVERSITY
- ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA
- HIST 0755 - RELIGION IN ASIA
- HIST 1707 - GENDER IN GLOBAL HISTORY
- HIST 1757 - RELIGION IN INDIA
- HIST 1758 - HINDU MYTHOLOGY
- RELGST 0505 - RELIGION IN ASIA
- RELGST 1500 - RELIGION IN INDIA
- RELGST 1510 - HINDU MYTHOLOGY

Hungarian Minor

The Hungarian minor requires 17 credits for completion, described as follows.

Students taking Hungarian learn to speak, listen, read and write in the language, just as students in other language courses do. In addition, students of Hungarian stand out as individuals with a rare skill, which may put them at an advantage for future job opportunities. Students pursuing this minor may also be interested in the Russian and Eastern Europe or the European Union Studies certificates offered by the University Center for International Studies.

Required courses

Students must complete the following language courses.

Elective course

Students must complete one of the following courses. Optionally, a student may seek approval from the Less-Commonly-Taught Languages Center to substitute a course in another department that has at least a 25% on Hungary or Hungarian culture.

- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ENGLIT 0380 - SLOVAK TRANSATLANTIC CULTURES
- ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- HIST 0200 - BETWEEN KAFKA AND HITLER: HOW CENTRAL EUROPE SHAPED THE MODERN WORLD
- HIST 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES
- MUSIC 1360 - ROMANI / GYPSY MUSIC
- PS 1521 - EASTERN EUROPE IN WORLD POLITICS
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLLED
- SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES

Irish Minor

This minor requires 17 credits of coursework to complete.

Language courses

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Irish or Ireland may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- IRISH 0105 - IRISH (GAELIGE) 5
- IRISH 0106 - IRISH (GAELIGE) 6
- IRISH 1615 - IRISH CULTURE AND TRADITIONS
- IRISH 1909 - SPECIAL TOPICS IN IRISH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ENGFLM 1192 - IRISH FILM
- ENGLIT 0815 - IRISH LITERATURE
- HIST 0150 - HISTORY OF MODERN IRELAND
- HIST 1016 - THE IRISH IN AMERICA
- HIST 1124 - NORTHERN IRELAND: THE TROUBLES - 1969-1994

Linguistics Minor

An undergraduate minor in linguistics would be particularly useful for students majoring in English, foreign languages, philosophy, anthropology, psychology, sociology, communications, speech science, neuroscience, computer science, and information science, as well as for students with an interest in teaching English as a second language, going to law school, or otherwise choosing a profession in which language plays a crucial part.

Academic Requirements

The minor consists of 15 credits and comprises the following courses:

- LING 1000 - INTRODUCTION TO LINGUISTICS
 - LING 1578 - PHONETICS AND PHONEMICS
 - LING 1777 - SYNTACTIC THEORY
 - Two electives, chosen from the linguistics courses at the 1000 level (e.g. Syntax, Phonetics, Phonology, Morphology, Historical Linguistics, Aspects of Sociolinguistics, Introduction to Applied Linguistics, and more)
- Please note that courses that already counted toward other certificates (ASL, Arabic) or minors may not double count. For example, if you took LING 1520 Introduction to Arabic Linguistics for your Arabic certificate, it cannot be applied toward your Ling Minor.

Modern Greek Minor

This minor requires 17 credits of coursework to complete.

Language courses

- GREEKM 0101 - GREEK (MODERN) 1
- GREEKM 0102 - GREEK (MODERN) 2
- GREEKM 0103 - GREEK (MODERN) 3
- GREEKM 0104 - GREEK (MODERN) 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Modern Greek, Greece, or Cyprus may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- GREEKM 0105 - GREEK (MODERN) 5
- GREEKM 0106 - GREEK (MODERN) 6
- GREEKM 1615 - THE GREEKS: JOURNEY THROUGH CULTURE
- GREEKM 1909 - SPECIAL TOPICS IN MODERN GREEK
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- CLASS 0010 - GREEK CIVILIZATION
- CLASS 0030 - MYTHOLOGY IN THE ANCIENT WORLD
- CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD
- CLASS 1130 - CLASSICAL MYTHOLOGY AND LITERATURE
- CLASS 1210 - GREEK HISTORY
- CLASS 1510 - GREEK ART
- CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD
- ECON 1680 - ECONOMICS OF THE EUROPEAN UNION
- HAA 1110 - GREEK ART
- HIST 1164 - SMALL COUNTRIES AND THE EUROPEAN UNION
- HIST 1783 - GREEK HISTORY
- RELGST 0083 - MYTHOLOGY IN THE ANCIENT WORLD
- RELGST 1135 - ORTHODOX CHRISTIANITY

Persian/Farsi Minor

This minor requires 17 credits of coursework to complete.

Language courses

- PERS 0101 - PERSIAN (FARSI) 1
- PERS 0102 - PERSIAN (FARSI) 2
- PERS 0103 - PERSIAN (FARSI) 3
- PERS 0104 - PERSIAN (FARSI) 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Persian, Farsi, or Iran may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- PERS 0105 - PERSIAN (FARSI) 5
- PERS 0106 - PERSIAN (FARSI) 6
- PERS 0107 - PERSIAN (FARSI) 7
- PERS 0108 - PERSIAN (FARSI) 8
- PERS 1905 - UNDERGRADUATE TEACHING ASSISTANT IN PERSIAN (FARSI)
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0752 - EMPIRES OF THE STEPPE: EURASIA FROM THE MONGOLS TO THE SOVIET UNION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION

Quechua Minor

This minor requires 17 credits of coursework to complete.

Language courses

- QUECH 0101 - QUECHUA 1
- QUECH 0102 - QUECHUA 2
- QUECH 0103 - QUECHUA 3
- QUECH 0104 - QUECHUA 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Quechua or the Andes may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- QUECH 0105 Quechua 5
- QUECH 0106 Quechua 6
- QUECH 1909 - SPECIAL TOPICS IN QUECHUA
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY
- ANTH 1543 - ANCIENT STATES IN THE NEW WORLD
- HIST 0500 - COLONIAL LATIN AMERICA
- HIST 0501 - MODERN LATIN AMERICA
- HIST 1511 - VIOLENCE & MEMORY IN LATIN AMERICA

Swahili Minor

This minor requires 17 credits of coursework to complete.

Language courses

- SWAHIL 0102 - SWAHILI 2
- SWAHIL 0103 - SWAHILI 3
- SWAHIL 0104 - SWAHILI 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Swahili or East Africa may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- SWAHIL 0105 - SWAHILI 5
- SWAHIL 0106 - SWAHILI 6
- SWAHIL 0107 - SWAHILI 7
- SWAHIL 0108 - SWAHILI 8
- SWAHIL 0111 - INTRODUCTION TO SWAHILI LANGUAGE ABROAD
- SWAHIL 1615 Swahili Coastal Culture: Gateway to Africa
- SWAHIL 1909 - SPECIAL TOPICS IN SWAHILI
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- AFRCNA 0127 - INTRODUCTION TO AFRICA
- AFRCNA 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA
- HIST 1727 East African History 1500-Present

Swedish Minor

This minor requires 17 credits of coursework to complete.

Language courses

- SWE 0101 - SWEDISH 1
- SWE 0102 - SWEDISH 2
- SWE 0103 - SWEDISH 3
- SWE 0104 - SWEDISH 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Swedish or Sweden may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- SWE 0105 - SWEDISH 5
- SWE 0106 - SWEDISH 6
- SWE 1615 - SWEDEN - FROM VIKINGS TO NOW
- SWE 1909 - SPECIAL TOPICS IN SWEDISH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0139 - VIKING AGE SCANDINAVIA

- HIST 0201 - THE BALTIC SEA: FROM THE VIKINGS TO POST-SOVIET RE-UNION

Turkish Minor

This minor requires 17 credits of coursework to complete.

Language courses

- TURKSH 0101 - TURKISH 1
- TURKSH 0102 - TURKISH 2
- TURKSH 0103 - TURKISH 3
- TURKSH 0104 - TURKISH 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Turkish or Turkey may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- TURKSH 0105 - TURKISH 5
- TURKSH 0106 - TURKISH 6
- TURKSH 0107 - TURKISH 7
- TURKSH 0108 - TURKISH 8
- TURKSH 1615 - TURKISH CULTURE AND SOCIETY
- TURKSH 1909 - SPECIAL TOPICS IN TURKISH
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0752 - EMPIRES OF THE STEPPE: EURASIA FROM THE MONGOLS TO THE SOVIET UNION
- HIST 0756 - INTRODUCTION TO ISLAMIC CIVILIZATION
- HIST 1175 - XENOPHOBIA IN MODERN EUROPE
- HIST 1753 - THE OTTOMAN EMPIRE (1300-1923)
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- PS 1348 - XENOPHOBIA IN MODERN EUROPE

Vietnamese Minor

This minor requires 17 credits of coursework to complete.

Language courses

- VIET 0101 - VIETNAMESE 1
- VIET 0102 - VIETNAMESE 2
- VIET 0103 - VIETNAMESE 3
- VIET 0104 - VIETNAMESE 4

Electives

Choose one course from the following list. Other courses that focus at least 25% effort on Vietnamese or Vietnam may fulfill this requirement with approval from the Less-Commonly-Taught Languages Center.

- VIET 0105 Vietnamese 5
- VIET 0106 Vietnamese 6
- VIET 1909 - SPECIAL TOPICS IN VIETNAMESE
- LING 1263 - CROSS-CULTURAL COMMUNICATION
- LING 1951 - LANGUAGES OF THE WORLD
- HIST 0403 - HISTORY OF MODERN SOUTHEAST ASIA: COLONIAL ERA TO PRESENT

Department of Mathematics

The Department of Mathematics offers course work leading to a Bachelor of Science degree in mathematics as well as various courses for non-majors. Students concentrating in mathematics may pursue majors in mathematics, applied mathematics, actuarial mathematics, or mathematical biology, or they may pursue a joint major in mathematics and economics. Each of the department's majors has its own philosophy and its own formal requirements, so students should consult with a major advisor. For more information on these majors and the Department of Mathematics, see www.mathematics.pitt.edu.

Joint Major

Mathematics - Economics, BS

This major was designed for students who may be interested in the quantitative aspects of economic analysis and mathematics. Graduates will be well prepared to pursue a career in business or industry (such as forecasting, analysis, or research). However, many students completing this degree will choose to enter graduate school in economics, business, applied mathematics, or a related field. The curriculum for the joint major consists of nine economics courses, including the core theory courses and some quantitative field courses, seven mathematics courses, and two courses in statistics.

Required courses for the Mathematics - Economics joint major

The mathematics - economics joint major requires the completion of 59 credits, or as few as 52 with UHC (University Honors Course) options, distributed as follows.

Mathematics courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
Note: Qualified students may substitute MATH 0235 Honors 1-Variable Calculus (UHC) for MATH 0220 and MATH 0230
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS
Note: Qualified students may substitute MATH 0450 Introduction to Analysis (UHC) for MATH 0413 and MATH 0420
- MATH 0500 - PROFESSIONAL DEVELOPMENT or ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 or MATH 1275 Honors Ordinary Differential Equations 1

One of the following

One of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Statistics courses

Both of the following courses

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Economics courses

- ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
- ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS
- ECON 1150 - APPLIED ECONOMETRICS 1
- ECON 1200 - GAME THEORY
- One ECON non-0800 series elective course
- Two ECON 1000-level courses that require either ECON 1100 or ECON 1110 as a prerequisite

Recommended courses

Students are encouraged to take at least one field course in mathematics from the following list.

- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1700 - INTRODUCTION TO TOPOLOGY
- or
- STAT 1221 - APPLIED REGRESSION
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICS

Honors major requirements

To qualify for departmental honors in the mathematics and economics joint major, students must meet the following requirements:

- Completes all required economics courses taking ECON 1180 Mathematical Economics and a pro-seminar (ECON 1700 - 1730) for the two ECON 1000-level electives; and
- Maintains a minimum GPA of 3.0 in the mathematics courses, a GPA of 3.5 in the economics courses, and an overall GPA of 3.5.
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0450 - INTRODUCTION TO ANALYSIS
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 1530 - ADVANCED CALCULUS 1
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Major

Actuarial Mathematics, BS

Students wishing to pursue a major in Actuarial Mathematics must complete both MATH 0220 and MATH 0230 or their equivalents with a letter grade of C or better before declaring actuarial mathematics as their major. Students will be required to take 63 credits, of which 46 will be in Mathematics and Statistics. Specific requirements are:

Prerequisites

Complete both of the following courses.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

Basic Calculus

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Analysis

Choose one of the following courses.

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0450 - INTRODUCTION TO ANALYSIS

Linear algebra

Choose one of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Differential Equations

Choose one of the following courses.

- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Actuarial Mathematics

Complete all of the following courses.

- MATH 0470 - ACTUARIAL MATHEMATICS 1
- MATH 1119 - APPLIED PROBABILITY FOR ACTUARIAL MATHEMATICS
- MATH 1121 - ACTUARIAL MATHEMATICS 2
- MATH 1122 - ACTUARIAL MATHEMATICS 3
- MATH 1123 - ACTUARIAL MATHEMATICS 4
- MATH 1124 - ACTUARIAL MATHEMATICS 5
- MATH 1126 - PREDICTIVE ANALYTICS 1

Numerical Methods

Choose one of the following courses.

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1127 - PREDICTIVE ANALYTICS 2

Applied Mathematics

Choose two of the following courses.

- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS

Economics

- ECON 1100 - INTERMEDIATE MICROECONOMICS
- ECON 1110 - INTERMEDIATE MACROECONOMICS

Computer Programming

Choose one of the following courses.

- CS 0004 - INTRODUCTION TO COMPUTER PROGRAMMING-BASIC
- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- STAT 1301 - STATISTICAL PACKAGES
- BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS
- ENGR 0012 - INTRO TO ENGINEERING COMPUTING

Statistics

- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Analysis course

Choose one of the following courses.

- ECON 1150 - APPLIED ECONOMETRICS 1
- STAT 1221 - APPLIED REGRESSION

Time Sequence course

Choose one of the following courses.

- STAT 1321 - APPLIED TIME SERIES
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Finance

Choose one of the following courses.

- BUSFIN 1311 - CORPORATE FINANCE
- ECON 1440 - ECONOMICS OF CORPORATION FINANCE

Additional Requirements

Declaring the major

Before declaring this major, students must complete MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2 or MATH 0235 - HONORS 1 - VARIABLE CALCULUS , or their equivalents, with a letter grade of C or better. Additionally, Students must complete MATH 0470 - ACTUARIAL MATHEMATICS 1 with a letter grade of B or better to declare this major.

Grade requirements

A letter grade of C or higher is necessary in all courses required for the major.

Satisfactory/No Credit option

Only MATH 0500 may be taken on the Satisfactory/No Credit (S/NC) basis. All other courses must be taken on a letter grade basis.

Writing (W) requirement

Students must complete at least one writing-intensive course (W-course) in the major.

Applied Mathematics, BS

Mathematics has been described as the Queen of the Sciences. Mathematics is the language of quantitative information and structure. Quantitative information is acquired, classified and processed according to mathematical models of physical phenomena with mathematical tools. There is a wide range of applications even of the most pure of mathematical disciplines. Cryptography is based on algebra, signal processing is based on Fourier analysis, and important applications have arisen from topology to physics. Our department offers unique research opportunities for undergraduates in mathematical biology, scientific computing, and finance mathematics as well as algebra, geometry, and analysis.

The Department of Mathematics offers an ample selection of courses leading to a Bachelor of Science degree in mathematics, applied mathematics, and actuarial mathematics as well as various courses for non-majors. We also offer the possibility of joint majors in mathematics-economics and data science (see separate sheets for joint majors). Each of the department's majors has its own philosophy and its own formal requirements. For additional information, visit the Department of Mathematics Web site.

Calculus

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
 - MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
 - MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- Note: Qualified students may substitute MATH 0235 Honors 1-Variable Calculus (UHC) for MATH 0220 and MATH 0230

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Introductory theoretical course

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS

Note: Qualified students may substitute MATH 0450 Introduction to Analysis (UHC) for MATH 0413 and MATH 0420

Upper-level required courses

- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 or
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

One of the following numerical math courses

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- MATH 1127 - PREDICTIVE ANALYTICS 2

One of the following applied analysis courses

- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- MATH 1570 - INTRODUCTION TO FOURIER ANALYSIS

One of the following differential equations courses or an additional Numerical Math or Applied Analysis course:

- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1

One of the following courses

- MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Physics courses

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

One Computer Science course

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

One Statistics course

- MATH 1119 - APPLIED PROBABILITY FOR ACTUARIAL MATHEMATICS
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT
- STAT 1151 - INTRODUCTION TO PROBABILITY

Recommended courses

- Students interested in graduate study are strongly advised to take MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2. These two courses may be substituted for the Applied Analysis and the Differential Equations courses, respectively.
- Students interested in pursuing secondary education certification should take the following courses in addition to the courses required for the major.
 - MATH 1290 MATH 1290 - TOPICS IN GEOMETRY
 - These courses are required for secondary education certification in Pennsylvania and by the School of Education for admission to the MAT program in Mathematics Secondary Education.
- A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
- Students must complete at least one writing-intensive course (W-course) in the major.
- No course that counts toward the major may be taken on the S/NC basis.
- Eligible courses are list on the right side of this sheet and should be chosen in consultation with the major advisor.
- Students must complete minimum of 12 credits of related coursework within the major; subjects include chemistry, computer science, economics, physics, statistics, and certain areas of engineering. These courses should be chosen in consultation with the major advisor.
- Honors in Applied Mathematics is granted if the student:
 - Completes all requirements for the major
 - Completes the following courses with a letter grade of B or higher:
 - MATH 1470 MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
 - MATH 1530 MATH 1530 - ADVANCED CALCULUS 1
 - MATH 1540 MATH 1540 - ADVANCED CALCULUS 2
 - A 2000-level course in lieu of a 1000-level elective
 - Completes an honors thesis under the direction of a member of the Department of Mathematics faculty, or completes a 2000-level course in lieu of the honors thesis.
- The statistics requirement is waived for students seeking honors in Applied Mathematics.

Required courses for Applied Mathematics major

The Applied Mathematics major requires the completion of 38 credits in mathematics, or as few as 31 with UHC (University Honors Course) options, plus 8 in Physics, at least 3 in Statistics, and 3 in Computer Science. They are distributed as follows.

Mathematical Biology, BS

Mathematics has assumed a significant role in the study of biological systems, in the development of biotechnology, and in advances in medicine. The construction and analysis of mathematical models of biological systems allows for the precise formulation of theoretical ideas, the testing of assumptions that may not be easily accessible experimentally, and the generation of novel predictions that can guide future research. The University of Pittsburgh is known for its excellence in biomedical research, and the Department of Mathematics at Pitt includes prominent faculty with strong records of teaching and research in mathematical biology.

The major in Mathematical Biology will help students develop an expertise in thinking mathematically about biological systems. Students will acquire fundamental skills in mathematical analysis and simulation, specialized experience in mathematical modeling in biology and neuroscience, and knowledge of particular areas of biology. These tools will prepare students to participate in undergraduate research and to go on to use quantitative methods in biotechnology, medicine, and other fields.

Required courses for the Mathematical Biology major

The Mathematical Biology major will require the completion of 44 credits in mathematics, or as few as 37 with UHC (University Honors Course) options, plus 12 in Biology or Neuroscience and 3 in Mathematics or Statistics .

Three Calculus courses (12 credits)

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
 - MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- Note: Qualified students may substitute MATH 0235 Honors 1-Variable Calculus (UHC) for MATH 0220 and MATH 0230
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Two Introductory theoretical courses (7 credits)

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
 - MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS
- Qualified students may substitute MATH 0450 - INTRODUCTION TO ANALYSIS for MATH 0413 and MATH 0420.

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Two upper-level required courses (6 credits)

Choose one of the following courses.

- MATH 1180 - LINEAR ALGEBRA 1
- or
- MATH 1185 - HONORS LINEAR ALGEBRA
 - MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1
- or
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Two mathematical biology courses (6 credits)

- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY

Two numerical mathematics courses (6 credits)

- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA

Two applied analysis courses from the following list (6 credits)

- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS

Introductory biology courses

Both of the following courses are required.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

Biology or Neuroscience courses

Choose two of the following courses. At least one of the chosen courses must be at the 1000 level.

- BIOSC 0350 - GENETICS
- BIOSC 0370 - ECOLOGY
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1070 - HUMAN PHYSIOLOGY-UHC or
- BIOSC 1250 - HUMAN PHYSIOLOGY
- BIOSC 1130 - EVOLUTION
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1470 - BIOPHYSICAL CHEMISTRY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY
- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE
- NROSCI 1011 - FUNCTIONAL NEUROANATOMY
- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION
- NROSCI 1034 - NEURAL BASIS OF COGNITION

Probability or Statistics course

Choose one of the following courses.

- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Other Requirements and Recommendations

Students pursuing the Mathematical Biology major are encouraged to take CHEM 0110 - GENERAL CHEMISTRY 1 and CHEM 0120 - GENERAL CHEMISTRY 2, as these courses will satisfy the Dietrich School of Arts and Sciences breadth requirement in natural science and will expand their biology and neuroscience course options. Several of the BIOSC courses that fulfill requirements for this major have prerequisites, but some do not have prerequisites. PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED) also carry a high degree of relevance for Mathematical Biology majors.

- Mathematical Biology students who plan to continue in graduate studies are advised to take advanced calculus, MATH 1530 - ADVANCED CALCULUS 1 and MATH 1540 - ADVANCED CALCULUS 2. MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE and MATH 1380 - MATH BIOLOGY introduce students to techniques for independent research; students in these courses are encouraged to pursue research opportunities in Mathematical Biology that are available locally and nationally.
- A grade of C or higher is necessary in all courses required for the major. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on the S/NC basis.
- Students must complete at least one writing-intensive course (W-course) in the major. Either MATH 0413 or MATH 0450 will satisfy this requirement.
- Students seeking honors in Mathematical Biology will earn departmental honors if they meet the following requirements.
 - Fulfill all requirements for the major.
 - Complete the following courses with a letter grade of A- or better.
 - MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
 - MATH 1380 - MATH BIOLOGY
 - Complete the following courses with a letter grade of B or higher.
 - MATH 1530 - ADVANCED CALCULUS 1
 - One 2000-level mathematics course in lieu of an upper level elective
 - Complete one of the following conditions.
 - An honors thesis under the direction of a faculty member in the Department of Mathematics; for students seeking a BPhil from the David C. Frederick Honors College, this requirement could be satisfied by the Honors College thesis
 - A 2000-level mathematics course with a letter grade of B or higher, in addition to the course use for the third item, above.
 - Although not required, the department strongly recommends that honors degree candidates take the intermediate honors courses MATH 1185 and MATH 0450 during their freshman or sophomore year.

Mathematics, BS

Mathematics has been described as the queen of the sciences. Mathematics is the language of quantitative information and structure. Quantitative information is acquired, classified, and processed according to mathematical models of physical phenomena with mathematical tools. There is a wide range of applications even of the most pure of mathematical disciplines. Cryptography is based on algebra, signal processing is based on Fourier analysis, and important applications from topology to physics exist as well. In our department, we offer unique research opportunities for undergraduates in mathematical biology, scientific computing, and financial mathematics as well as algebra, geometry, and analysis.

The Department of Mathematics offers bachelor degree programs in mathematics, applied mathematics, actuarial mathematics, and mathematical biology. We also offer a joint major in mathematics-economics and data science. Each of the department's majors has its own philosophy and its own formal requirements. For additional information, visit the Department of Mathematics Web site.

Required courses for the Mathematics major

The mathematics major requires the completion of 41 credits in mathematics or as few as 34 with UHC (University Honors Course) options, plus 4 in Physics and 3 in Computer Science. They are distributed as follows.

Calculus courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
Note: Qualified students may substitute MATH 0235 Honors 1-Variable Calculus (UHC) for MATH 0220 and MATH 0230
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Introductory theoretical courses

- MATH 0413 - INTRO THEORETICAL MATHEMATICS
- MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS
Note: Qualified students may substitute MATH 0450 Introduction to Analysis (UHC) for MATH 0413 and MATH 0420
- MATH 0430 - INTRO ABSTRACT ALGEBRAIC SYSTEMS

Professional Development

- MATH 0500 - PROFESSIONAL DEVELOPMENT

Upper-level required courses

Required course

- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 or MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1 (UHC)

One of the following courses

- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

One of the following courses

- MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1310 - GRAPH THEORY

Upper-level elective courses

Three of the following courses

- MATH 1020 - APPLIED ELEMENTARY NUMBER THEORY
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1050 - COMBINATORIAL MATHEMATICS
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS

- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- MATH 1230 - THE BIG IDEAS OF MATHEMATICS
- MATH 1250 - ABSTRACT ALGEBRA
- MATH 1280 - ORDINARY DIFFERENTIAL EQUATIONS 2
- MATH 1290 - TOPICS IN GEOMETRY
- MATH 1310 - GRAPH THEORY
- MATH 1350 - INTRODUCTION TO DIFFERENTIAL GEOMETRY
- MATH 1360 - MODELING IN APPLIED MATH 1
- MATH 1370 - INTRODUCTION TO COMPUTATIONAL NEUROSCIENCE
- MATH 1380 - MATH BIOLOGY
- MATH 1410 - INTRODUCTION FOUNDATIONS OF MATHEMATICS
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- MATH 1530 - ADVANCED CALCULUS 1
- MATH 1540 - ADVANCED CALCULUS 2
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- MATH 1570 - INTRODUCTION TO FOURIER ANALYSIS
- MATH 1700 - INTRODUCTION TO TOPOLOGY
- MATH 1800 - ADVANCED TOPICS IN MATHEMATICS
- MATH 2XXX, 3XXX 3-credit graduate level course
- STAT 1631 - INTERMEDIATE PROBABILITY or MATH 1126 - PREDICTIVE ANALYTICS 1
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Physics course

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)

Programming course

Choose one

- CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING
- CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON
- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Other Requirements and Recommendations

- Majors must complete 40 credits (see below for curriculum details on each major) with a grade of C or higher in each course for the major and at least a 2.00 GPA overall in mathematics courses. The S/NC grade option is not permitted.
- MATH 0413 - INTRO THEORETICAL MATHEMATICS meets the departmental W requirement.
- Credit by examination is usually available only through the placement testing offered for incoming students.
- Students considering graduate work in mathematics should be aware that many programs require a reading knowledge of one or two second languages from among French, German, and Russian.
- To graduate with honors in mathematics or applied mathematics, students must meet the following requirements in addition to the other requirements for the major.
 - Completion of all mathematics requirements

- Completion of each of the following courses with a grade of B or better:
 - MATH 1250 - ABSTRACT ALGEBRA
 - MATH 1530 - ADVANCED CALCULUS 1
 - MATH 1540 - ADVANCED CALCULUS 2
 - A graduate level mathematics course
- Completion of an honors thesis under the direction of a member of the mathematics faculty or completion of a second graduate level mathematics course in lieu of the honors thesis
- Students interested in graduate study in mathematics are advised to take MATH 1530 and MATH 1540. Those interested in pursuing secondary education certification in mathematics.

The statistics requirement is waived for mathematics majors graduating with honors. Although not required, it is recommended that honors candidates take the intermediate honors courses MATH 0450 - INTRODUCTION TO ANALYSIS and MATH 1185 - HONORS LINEAR ALGEBRA during their freshman and sophomore years.

Minor

Mathematics Minor

Prerequisites

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Lower-level Mathematics courses

Students must complete at least three courses (nine credits) of coursework at or above MATH 0250 - MATRIX THEORY & DIFFERENTIAL EQUATIONS .

Upper-level Mathematics courses

Students must complete at least two courses (six credits) of MATH courses at the 1000-level.

Additional information and requirements

- Students may not count MATH 0400 - FINITE MATHEMATICS toward the minor.
- Students may not count both MATH 0280 - INTRO TO MATRICES & LINEAR ALG and MATH 1180 - LINEAR ALGEBRA 1 toward the minor.
- Students may not count both MATH 0290 - DIFFERENTIAL EQUATIONS and MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 toward the minor.
- A letter grade of C or higher is required in each course for completion of this minor.
- Students may not take any course for the minor on the S/NC basis.

Department of Music

The Department of Music makes music through composition, improvisation, and performance and explores music's meaning in the structure of individual works, the relations between them, and their place in the cultures that produce them. One of the most exciting things about music is that it brings together different types of thought and action. The most sensory and practical things and the most theoretical and abstract ones cannot be separated in the musician's world. Thus, music enjoys a special place in the endeavor to understand ourselves. The program for majors is designed to introduce students to all the above ideas and activities, and students throughout the University are invited to join in any of them. In support of this multifaceted program, the department has assembled a diverse faculty, including experts in composition, performance, theory, history, jazz, and ethnomusicology and is committed to the principle of conducting its activities within an atmosphere that encourages communication and cooperation

within that diversity. The department also welcomes double majors from all colleges within the University. For more information on the major, the minor, and the Department of Music, see <http://www.music.pitt.edu/>.

Note: *Students considering declaring a music major or minor should take the Music Theory Placement test, available at the Dietrich School of Arts and Sciences Advising Center. A sufficient score will exempt them from the required MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC class. This exam takes about 60 minutes to complete.*

Major

Music, BA

*****On July 10th, 2023 the following Music, BA program description information was updated in the published catalog. In an effort to provide accurate information the update was made on July 10th, 2023.*****

The Department of Music offers an innovative undergraduate program that confers a bachelor's degree and a minor in music. The Department's dynamic faculty offers strong support for undergraduate research and creative expression. Undergraduates also engage with the Department's renowned graduate programs and are encouraged to actively participate in all aspects of the Department's research and performance culture.

Undergraduates choose a course of study from among five tracks: Composition, Global & Popular Music, Jazz, Music & Cultural History, and Performance. The tracks offer students a broad foundation in music scholarship while tailoring specific elements of music study to the student's individual talents and interests.

To declare this major, students must complete MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC with a letter grade of B- or better or achieve a sufficient score on the Music placement exam to receive credit for this course.

Prerequisite theory course

(Must be completed prior to declaring the Music Major)

MUSIC 0100 - Fundamentals of Western Music - 3 credits

- Students must earn a letter grade of B- or better in this course in order to declare a Music Major or Minor
- Students may elect to take the Music Theory placement exam in lieu of enrolling in MUSIC 0100. A passing grade of 85% is required in order for the placement exam to meet this requirement.

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

BA Requirements

Required courses for all tracks

The following courses are required for all tracks in the Music major. Additional requirements specific to each track are listed later in the program description.

- MUSIC 0222 - HISTORY OF WESTERN MUSIC TO 1750
- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750 (for Global and Popular Music Track Only)
- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2
- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
- MUSIC 1903 - SPECIAL TOPICS-DIRECTED RESEARCH
- MUSIC 1904 - SENIOR SEMINAR

- Three Music performance courses, at 1 credit each. MUSIC performance courses include private lessons (0500-level) and/or ensembles (600-level). One semester of participation in a World Music Ensemble must be included.

Choose one of the following courses

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Composition Track (42 credits)

This track is intended for students interested primarily in creating music of any genre, acoustic or electroacoustic. A solid background in music history, music theory (including tonal harmony and 20th-21st century techniques) and musicianship is essential for composers, as is competence on an instrument or voice. Students will have the opportunity to hear their music read or performed by guest performers and ensembles as well as groups such as the University Orchestra. Students will develop their individual musical voices through close mentorship by faculty and will create a final portfolio of their compositional work.

Theory courses

All of the following courses are required for the Composition track.

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4
- One MUSIC elective from the 1200, 1300 or 1400 level

Composition courses

Choose two of the following composition courses.

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMENTATION & ORCHESTRATION
- MUSIC 1442 - ELECTRONIC MUSIC STUDIO
- MUSIC 1443: PROGRAMMING ENVIRONMENTS MUSIC MAX/M SP
- MUSIC 1444: ELECTRONIC BEATS & SONGWRITING
- MUSIC 1450: MUSIC PRODUCTION AND RECORDING

Jazz Track (42 credits)

The Jazz Track provides opportunities for each student to develop their individual interests and strengths in jazz performance, composition, and scholarship. Core courses in jazz, ethnomusicology and popular music, as well as Western music history, theory, and musicianship, complement courses in composition, arranging, and improvisation. Jazz is a spontaneous performance art and an ideal collaborative vehicle for exploration across musical genres. The Jazz Track reflects this exploratory ideal by emphasizing innovation and creativity in both performance and scholarship.

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Required Jazz focused courses

All of the following courses are required for the Jazz track.

- MUSIC 1450 - MUSIC PRODUCTION AND RECORDING
- MUSIC 1741 - JAZZ IMPROVISATION 1
- MUSIC 1742 - JAZZ IMPROVISATION 2
- Six MUSIC performance courses, at 1 credit each, to include at least one term of participation in MUSIC 0640 - JAZZ ENSEMBLE or MUSIC 0673 - SMALL JAZZ ENSEMBLES

Choose one of the following courses

- MUSIC 1731 - JAZZ COMPOSITION AND ARRANGING 1
- MUSIC 1732 - JAZZ COMPOSITION AND ARRANGING 2

Global and Popular Music Track (42 credits)

The Global and Popular Music track offers theoretical and methodological training in the study of global and popular music and engages students with cutting-edge ethnographic research. Analyzing global and popular musics within a broader context of postcolonial, technological, and transnational development, the track engages the ever-changing balance between traditional and modern ideas of music in systems of learning, performance techniques, and ways of writing and recording much.

- MUSIC 0415 - THEORY 2
- ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY
- One upper-level popular music course
- Three upper-level ethno music courses
- One elective MUSIC course at 1200- to 1400 - level

Music and Cultural History Track (42 credits)

The Music & Cultural History track provides students with a background in the history, culture, and practice of music in the Western imagination. From Mozart's Symphony No. 21 to K-pop band 2NE1, this concentration emphasizes diversity and depth of experience in historical developments and styles, giving students a wide-ranging liberal arts education grounded in Western history, critical thinking, and music literacy. Students will be challenged to develop rigorous writing and aural skills that prepare them to become critics and curators of music in Western culture.

Music History courses

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- Two MUSIC courses at the 1200-level
- Two MUSIC courses at the 1200- to 1400-level

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

Performance Track

This track is intended for students who want to explore and improve their skills as performers in a wide range of genres. It provides a solid background in skills-based musicianship, music theory, history, and the study of other traditions, which are part of the fabric of current music-making in the 21st century. This curriculum also provides a concentration on traditional applied study of an instrument and valuable experiences in concert settings with master teachers and coaches.

All of the following courses

- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0415 - THEORY 2
- MUSIC 0417 - THEORY 3
- MUSIC 0419 - THEORY 4

Choose one of the following courses

Of these two courses, students must take the one that was not taken as a core course.

- MUSIC 0711 - HISTORY OF JAZZ
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.

One composition course

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMENTATION & ORCHESTRATION
- MUSIC 1442 - ELECTRONIC MUSIC STUDIO
- MUSIC 1443: PROGRAMMING ENVIRONMENTS MUSIC MAX/M SP
- MUSIC 1444: ELECTRONIC BEATS & SONGWRITING
- MUSIC 1450 MUSIC PRODUCTION AND RECORDING

Six performance courses

Six MUSIC performance courses, at 1 credit each

One of the following composition courses

- MUSIC 1421 - COMPOSITION 1
- MUSIC 1422 - COMPOSITION 2
- MUSIC 1431 - INSTRUMENTATION & ORCHESTRATION
- MUSIC 1441 - ELECTRONIC AND COMPUTER MUSIC 1
- MUSIC 1442 - ELECTRONIC MUSIC STUDIO

Other requirements

- Students may test out of MUSIC 0100 MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC by passing the Music Theory placement exam, which is administered online. A passing grade of 85% is required in order to meet this requirement.
- A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major can be taken on an S/NC basis.
- Students must complete at least one W-course in the major.

- All students interested in taking private lessons must reach out to the Department of Music Academic Administrator or directly to the course instructor for more information. Music majors have first priority in scheduling private lessons, which cost an additional \$445 per term.
- To graduate with departmental honors, a student must earn a minimum 3.25 GPA overall, a minimum 3.50 GPA in the music courses with no grade lower than a B+.

Minor

Music Minor

The Music Minor is intended for students who are interested in supplementing their prior experiences in music. The curriculum includes core courses shared with all tracks of the Music Major, which provide structured study of skills-based musicianship, music theory, history, the study of other traditions, and performance studies. Required courses, totaling 20 credits, are as follows.

Prerequisite course

(Must be completed prior to declaring the Music minor)

MUSIC 0100 - Fundamentals of Western Music - 3 credits

- Students must earn a letter grade of B- or better in this course in order to declare a Music Major or Minor
- Students may elect to take the Music Theory placement exam in lieu of enrolling in MUSIC 0100. A passing grade of 85% is required in order for the placement exam to meet this requirement.

- MUSIC 0100 - FUNDAMENTALS OF WESTERN MUSIC

Required courses (20 credits)

- MUSIC 0222 - HISTORY OF WESTERN MUSIC TO 1750
or
- MUSIC 0224 - HISTORY OF WEST MUSIC SINCE 1750
- MUSIC 0411 - THEORY 1
- MUSIC 0412 - MUSICIANSHIP 1
- MUSIC 0416 - MUSICIANSHIP 2
- MUSIC 0711 - HISTORY OF JAZZ
or
- MUSIC 1326 - AFRICAN-AMERICAN MUSIC IN U.S.
- MUSIC 1310 - GLOBAL AND POPULAR MUSIC
One course from the 1200- to 1400-level
Three performance courses, at 1 credit each

Note

NB: Performance courses are either private lessons (0500-level) and/or ensembles (0600-level) and must include at least one world music ensemble, selected from the following:

- MUSIC 0660: African Drumming Ensemble
- MUSIC 0661: Pitt AfroPop Ensemble
- MUSIC 0690: University Gamelan
- MUSIC 0616: Bluegrass Ensemble _____

- 3 MUSIC ____: One Elective course from 1200, 1300, 1400 or 1700 level

Department of Neuroscience

Neuroscience is the study of the biology and function of the central nervous system, with a special focus on the brain. The field has emerged during the past two decades as part of the explosive growth of research and interest in the neural sciences. An autonomous major in neuroscience was developed at the University of Pittsburgh in 1983, and it is among the largest undergraduate programs in neuroscience in the country, with nearly 300 students as majors.

The Bachelor of Science degree in neuroscience prepares students for the following:

- Advanced study in health-related fields, such as medicine, dentistry, pharmacy, public health, physical therapy, physician assistant, and exercise physiology;
- Graduate training in neuroscience and related fields in the biological sciences, and for a future career in a university, research institute, pharmaceutical company, or hospital;
- Research assistant positions in pharmaceutical, hospital, and university settings; and
- Public and private high school teaching following the completion of the teacher certification program in the School of Education.

The neuroscience major is designed to provide a broad and challenging sequence of courses in biological sciences, chemistry, mathematics, and physics, in addition to introductory and advanced courses in neuroscience. Students also may receive credit for original research projects they conduct in collaboration with faculty members. The relatively small size of the upper-level courses, the excellence of teaching, and the opportunity for research have been found to be especially attractive features of the major. A minor in neuroscience is also available. For more information on the major, the minor, and the Department of Neuroscience, see www.neuroscience.pitt.edu.

Major

Neuroscience, BS

Major requirements

Neuroscience majors must complete a minimum of 59 credits, detailed as follows.

Required courses

- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE
- NROSCI 1011 - FUNCTIONAL NEUROANATOMY or
- NROSCI 1013 - FUNCTIONAL NEUROANATOMY (UHC)
- NROSCI 1012 - NEUROPHYSIOLOGY
- NROSCI 1017 - SYNAPTIC TRANSMISSION
- NROSCI 1049 - RESEARCH TOPICS IN NEUROSCIENCE

Advanced elective courses

Choose two courses from the following list.

- NROSCI 1014 - SPEAKING OF SCIENCE
- NROSCI 1028 - SIGNALING PATHWAYS IN SYNAPTIC PLASTICITY
- NROSCI 1030 - PSYCHTRC DISORDERS AND BRAIN FUNCTION
- NROSCI 1032 - FUNCTIONAL ORGANIZATION OF THE HUMAN NERVOUS SYSTEM

- NROSCI 1033 - NEURAL BASIS OF VISION
- NROSCI 1034 - NEURAL BASIS OF COGNITION
- NROSCI 1036 - NEUROBIOLOGY OF AGING
- NROSCI 1038 - RESEARCH IN BEHAVIORAL NEUROSCIENCE
- NROSCI 1039 - PROCESSING IN NEURAL CIRCUITS
- NROSCI 1040 - BIOLOGICAL BASIS OF LEARNING AND MEMORY
- NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE
- NROSCI 1042 - NEUROCHEMICAL BASIS OF BEHAVIOR
- NROSCI 1043 - NEURAL PLASTICITY
- NROSCI 1112 - FUNCTIONAL NEUROANATOMY HONORS PRACTICUM
- NROSCI 1200 - NEUROPHARMACOLOGY OF ADDICTION

Writing-intensive course

Choose one of the following writing-intensive courses.

- NROSCI 1800 - NEUROSCIENCE/WRITING PRACTICUM
- NROSCI 1801 - NEUROSCIENCE/WRITING PRACTICUM
- NROSCI 1962 - THESIS RESEARCH/WRITING

Capstone course

Choose one of the following courses.

- NROSCI 1027 - NEUROSCIENCE PROSEMINAR
- NROSCI 1901 - INDEPENDENT STUDY
- NROSCI 1962 - THESIS RESEARCH/WRITING

Note

Course descriptions and current syllabi can be found by clicking on the Teaching Faculty link on the right of the Neuroscience Undergraduate home page at www.neuroscience.pitt.edu/programs/undergraduate.

Co-requisite courses

It is recommended that students complete introductory biology, chemistry, and physics courses during freshman and sophomore years. Premed students should also take PHYS 0212 - INTRODUCTION TO LABORATORY PHYSICS or PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING and a statistics course to meet medical school requirements.

Students must complete BIOSC 0150, BIOSC 0160, CHEM 0110, and CHEM 0120 with a letter grade of C or better to declare the major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 1000 - BIOCHEMISTRY
- BIOSC 1250 - HUMAN PHYSIOLOGY or
- NROSCI 1250 - HUMAN PHYSIOLOGY
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2

- CHEM 0345 - ORGANIC LABORATORY
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PHYS 0111 - INTRODUCTION TO PHYSICS 2

Required laboratory courses

Choose one course from each of the following two groups.

- BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2

Grade requirements for the major

- Students majoring in neuroscience must take all required courses for a letter grade.
- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE must be passed with a B- or better. Grades in the remaining core courses and two advanced electives are averaged. All of these courses must be passed, and the average GPA must be 2.00 or better.
- In the co-requisites, a passing grade below C may be accepted only if it is balanced with higher grades, so that the total GPA in co-requisite courses is 2.0 or better. This requirement applies collectively to corequisite courses taught in the Department of Neuroscience (e.g., NROSCI 1070 - HUMAN PHYSIOLOGY-UHC) and those taught in other departments.
- Majors must have a grade of B- in NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE as a prerequisite to taking any other departmental core or advanced elective courses.
- The co-requisite courses in biology and chemistry satisfy the related area requirement for this major.

Department Honors and Undergraduate Research

- To qualify for departmental honors, students need to maintain a minimum overall GPA of 3.25 as well as a GPA of 3.25 in the neuroscience major. In addition, students must complete a substantial amount of experimental neuroscience research on an approved research project and give a public presentation of the work. The full faculty of the department approves departmental honors after consideration of all eligible students.
- The Department of Neuroscience encourages interested undergraduate majors to gain research experience within an active neuroscience laboratory. The department is a world-class research department committed to high quality research and sharing the excitement of scientific exploration with trainees. Majors are encouraged to take advantage of the opportunity to do meaningful neuroscience research while still undergraduates. It is not unusual for majors to report their research at scientific meetings and to be published. While research experience itself has strong benefits, it is also useful for interacting more closely with professors and enhancing preparation for graduate or medical school. Most undergraduates who enroll in research for credit are interested in completing an independent project that results in an undergraduate thesis.

Minor

Neuroscience Minor

Minor Requirements

A minimum of 14 credits is required for a neuroscience minor. The minor includes the following:

- NROSCI 1000 - INTRO TO NEUROSCIENCE or NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE with a grade of C or better
- Three core courses:
 - NROSCI 1011 - FUNCTIONAL NEUROANATOMY
 - NROSCI 1012 - NEUROPHYSIOLOGY
 - NROSCI 1017 - SYNAPTIC TRANSMISSION
- As an alternative to the three core courses, students may take two of the core courses and at least one advanced elective from the following list.
 - NROSCI 1030 - PSYCHTRC DISORDERS AND BRAIN FUNCTION
 - NROSCI 1032 - FUNCTIONAL ORGANIZATION OF THE HUMAN NERVOUS SYSTEM
 - NROSCI 1034 - NEURAL BASIS OF COGNITION
 - NROSCI 1035 - CONTROL OF MOVEMENT
 - NROSCI 1036 - NEUROBIOLOGY OF AGING
 - NROSCI 1040 - BIOLOGICAL BASIS OF LEARNING AND MEMORY
 - NROSCI 1041 - DEVELOPMENTAL NEUROSCIENCE
 - NROSCI 1042 - NEUROCHEMICAL BASIS OF BEHAVIOR

Department of Philosophy

The University of Pittsburgh has one of the best philosophy departments in the country, one with a long tradition of fine teaching. A major in philosophy provides excellent preparation for such professions as law, medicine, and business. The conceptual sophistication imparted by training in philosophy is invaluable in virtually any field of learning or any serious profession. For example, students who are majoring in biology, psychology, history, or computer science would do well to pick up a second major in philosophy, something the Department of Philosophy encourages by offering a standard major track along with its more time-consuming intensive major track. A minor in philosophy is also available. While the department encourages students to major in philosophy, either alone or as a second major, only rarely does it encourage students to pursue philosophy in graduate school as preparation for a scholarly career. Students who do especially well in either the standard or intensive major program are graduated with honors in philosophy. Because of the national reputation of the philosophy department, a major in philosophy or honors in philosophy should materially help University of Pittsburgh graduates get into good graduate schools or professional schools. For more information on the program and the Department of Philosophy, see www.philosophy.pitt.edu.

Major

Philosophy, BA

Students pursuing the Philosophy major should choose either the Standard track or the Intensive track. The requirements for each of these tracks is described below.

Standard track

Required courses

Select one course from each of the four following groups. At least one of these four courses must be taken at the 1000-level.

Ancient Philosophy

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY
- PHIL 0202 - HISTORY ANCIENT PHILOSOPHY/WRITING PRACTICUM
- PHIL 1020 - PLATO
- PHIL 1040 - ARISTOTLE
- PHIL 1070 - TOPICS IN ANCIENT PHILOSOPHY

Modern Philosophy

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY
- PHIL 0212 - HISTORY OF MODERN PHILOSOPHY/WRITING PRACTICUM
- PHIL 1110 - RATIONALISM
- PHIL 1140 - EMPIRICISM
- PHIL 1170 - KANT

Ethics

- PHIL 0300 - INTRODUCTION TO ETHICS
- PHIL 0302 - INTRODUCTION TO ETHICS/WRITING PRACTICUM
- PHIL 0320 - SOCIAL PHILOSOPHY
- PHIL 0322 - SOCIAL PHILOSOPHY/WRITING PRACTICUM
- PHIL 0330 - POLITICAL PHILOSOPHY
- PHIL 0332 - POLITICAL PHILOSOPHY/WRITING PRACTICUM
- PHIL 0380 - WOMEN AND PHILOSOPHY
- Any PHIL course at the 1300-level

Logic

- PHIL 0500 - INTRODUCTION TO LOGIC
- PHIL 1500 - SYMBOLIC LOGIC

Elective courses

Select four 1000-level electives beyond any chosen in the previous groups.

Intensive track

Philosophy courses

Select one course from each of the following three groups. At least one of these three courses must be taken at the 1000-level.

Ancient Philosophy

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY
- PHIL 0202 - HISTORY ANCIENT PHILOSOPHY/WRITING PRACTICUM
- PHIL 1020 - PLATO
- PHIL 1040 - ARISTOTLE
- PHIL 1070 - TOPICS IN ANCIENT PHILOSOPHY

Modern Philosophy

- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY
- PHIL 0212 - HISTORY OF MODERN PHILOSOPHY/WRITING PRACTICUM
- PHIL 1110 - RATIONALISM
- PHIL 1140 - EMPIRICISM
- PHIL 1170 - KANT

Logic

- PHIL 0500 - INTRODUCTION TO LOGIC
- PHIL 1500 - SYMBOLIC LOGIC

Elective courses

Group 1

Select five 1000-level courses from the following list. Courses taken to fulfill the Philosophy course requirement cannot be counted toward this elective course requirement.

- History of Philosophy: PHIL 1020 - PLATO through PHIL 1183 - MARX
- Value Theory: PHIL 1300 - ETHICAL THEORY through PHIL 1390 - PHILOSOPHY OF LAW
- Metaphysics and Epistemology: PHIL 1420 - PHILOSOPHY OF LANGUAGE through PHIL 1490 - TOPICS IN SYSTEMATIC PHILOSOPHY
- Logic and Philosophy of Science: PHIL 1500 - SYMBOLIC LOGIC through PHIL 1690 - TOPICS IN PHILOSOPHY OF SCIENCE
- Any 1000-level PHIL course except PHIL 1904 or PHIL 1941

Group 2

Select four courses from the following list. Courses taken to fulfill the Philosophy course requirement cannot be counted toward this elective course requirement.

- PHIL 1940 - HONORS THESIS/MAJORS
- PHIL 1941 - HONORS THESIS 2/MAJORS
- Any PHIL course not taken to fulfill a previous requirement

Other requirements

Other requirements for the intensive Philosophy major:

- **Grade requirements:** Students must earn at least a C in each course that is to count toward the major.
- **Writing (W) requirement:** Students must complete at least one W-course in the major.
- **Satisfactory/No Credit option:** There is no limit to the number of courses that can be taken on an S/NC basis.
- **Honors major requirements:** Students who complete the standard major, intensive major, or joint major will graduate with honors in philosophy if they have earned a grade of A- or better in at least six 1000-level PHIL courses, exclusive of PHIL 1902 and PHIL 1903.
- **Joint majors with philosophy:** Joint majors are not double majors but are multidisciplinary majors offered by two or more departments. The Department of Philosophy offers a joint major in Politics and Philosophy with the Department of Political Science, which is administered by the Department of Political Science. Consult the Department of Political Science for additional information.

Minor

Philosophy Minor

Minor Requirements

The philosophy minor requires six 3-credit courses (18 credits total) to be distributed as follows:

- PHIL 0500 - INTRODUCTION TO LOGIC or
- One 1500 level course (Logic group)

- PHIL 0200 - HISTORY OF ANCIENT PHILOSOPHY or
- PHIL 1020 - PLATO
- PHIL 0210 - HISTORY OF MODERN PHILOSOPHY or
- PHIL 1110 - RATIONALISM or
- PHIL 1140 - EMPIRICISM
- Any course in the 1300s Value Theory, Social and Political Philosophy
- Two additional 1000-level courses must be completed.

Any course in moral, social, or political philosophy

PHIL 0300 - INTRODUCTION TO ETHICS is preferred, but any of the following is acceptable:

- PHIL 0320 - SOCIAL PHILOSOPHY
- PHIL 0330 - POLITICAL PHILOSOPHY
- PHIL 0350 - PHILOSOPHY AND PUBLIC ISSUES
- PHIL 0360 - INTRODUCTION TO BIOMEDICAL ETHICS

Note:

At least one of the above four courses (numbers one-four) must be taken at the 1000 level.

Department of Physics and Astronomy

The Department of Physics and Astronomy offers three major degree options: a BS in physics, a BS in physics and astronomy, and a BA in astronomy. The BS degrees are intended for students who wish to prepare for graduate school in a scientific or technical discipline or who are interested in professional careers in which a background in physics or astronomy is appropriate. The BA degree are designed primarily for students who wish to develop a general scientific background appropriate for many careers including health-related professions or MBA programs. The Certificate in Photonics may be added by students in the bachelor of science physics program.

Students planning to pursue a degree within the department are urged to consult a departmental advisor at any time during the freshman year and should obtain a copy of the department's brochure for undergraduates in 100 Allen Hall.

*The department offers the physics minor, best suited for students from other schools. The department wishes to emphasize that its 0080s courses, in both physics and astronomy, use little mathematics and are especially designed for liberal arts students.

Certificate

Quantum Computing and Quantum Information Certificate

Program Requirements

The BS joint Quantum Computing and Quantum Information Certificate (QCQIC) program will consist of a 15 credit requirement (not including any pre-requisites) that must be combined with a BS degree in any discipline in DSAS, SSOE and SCI.

Five Courses

1 Foundations of Quantum Computing and Quantum Information, the only course required of all students.

2-3 Elective courses that have at least 50% quantum related content in them selected from an approved list (at least 6 credits but up to 9 credits, see below, could include individual research or capstone courses with PQI faculty members under the courses listed for individual research or capstone courses in various departments and credits for these courses may be spread over multiple terms)

3-6 credits of other non-quantum electives from an approved list (see below); The undergraduate joint Quantum Computing and Quantum Information Certificate (QCQIC) program targets the following competency gaps:

- Fundamental understanding of the basics of quantum computing and quantum information
- Knowledge of processes used to create useful applications of the fundamental quantum principles in quantum computing, quantum communication and quantum sensing
- Quantum science and technology as an interdisciplinary science and engineering enterprise the quantum behavior of materials, systems, and devices

Required Course

- PHYS 1470 - FOUNDATIONS OF QUANTUM COMPUTING AND QUANTUM INFORMATION

Quantum Related Electives

- HPS 1612 - PHIL OF 20TH CENTURY PHYSICS
- CHEM 1410 - PHYSICAL CHEMISTRY 1 OR
- CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY
- PHYS 0330 - PHYSICS AND QUANTUM COMPUTING SEMINAR
- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- ECE 1272 - SIMULATION AND DESIGN OF SILICON PHOTONICS
- MEMS 1058 - ELECTROMAGNETIC PROPERTIES OF MATERIALS
- ENGR 1066 - INTRODUCTION TO SOLAR CELLS AND NANOTECHNOLOGY
- CS 1613 - QUANTUM COMPUTATION
- CHEM 1710 - UNDERGRADUATE RESEARCH
- PHYS 1903 - DIRECTED RESEARCH
- ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT
- CS 1950 - DIRECTED RESEARCH: CAPSTONE
- CS 1951 - DIRECTED RESEARCH
- INFSCI 1710 - DIRECTED RESEARCH

Quantum Adjacent Electives

- HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE
- CHEM 1000 - MATHEMATICS FOR CHEMISTRY
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- ENGCMP 0530 - WRITING FOR THE SCIENCES
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1361 - WAVE MOTION AND OPTICS

- ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
- ECE 0301 - ECE PROBLEM SOLVING WITH C++
- ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
- IE 1081 - OPERATIONS RESEARCH
- IE 1082 - PROBLSTC METH IN OPERATNS RES
- ENGR 1453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES
- INFSCI 1630 - COMMUNICATION NETWORKS
- INFSCI 1640 - WIRELESS NETWORKS
- INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- INFSCI 1600 - SECURITY AND PRIVACY
- INFSCI 0610 - NETWORKS AND INFORMATION
- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1510 - ALGORITHM DESIGN
- CS 1656 - INTRODUCTION TO DATA SCIENCE
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- CS 1678 - INTRODUCTION TO DEEP LEARNING

Additional elective courses for the QCQIC will be added to the program as they are developed and become available in the DSAS, SSOE and SCI (new courses must be approved by the Advisory Committee). Some courses that apply towards the certificate also count as electives in the degree tracks of Chemistry and Physics and Astronomy but no more than 9 credits can be earned through those courses.

Total Credits: 15

Joint Major

Physics and Quantum Computing, BS

Given the robust academic efforts to build quantum machines, as well as the growing industrial efforts in quantum information (Google, IBM, Microsoft, Amazon, Northrup Grumman, Intel, Honeywell, plus numerous smaller companies and startups) there is a real need for students who are trained to live with one foot on either side of the present divide. Put another way, we can build systems with one to a few elements, and we know important problems we could solve with a quantum computer containing thousands or millions of qubits, but how do we get from one to the other? It is clear that students who can address this issue will find good opportunities to apply their skills in both academia and industry.

The Physics and Quantum Computing, BS major will train the students who will bridge this gap as they flesh out a nascent quantum computing industry. For the student who wishes to pursue graduate school (which is currently the level at which most industrial labs are hiring) where hybrid programs do not currently exist, the major is designed with an optional CS or physics 'Focus' add-on of three top-level classes to fill in classes required for entry into the respective graduate programs.

At a more practical level, for those students who seek gainful employment with only their undergraduate degrees, the mixing of physics' focus on investigation and problem solving with true fluency in computer science will provide a very strong toolbox for their future endeavors. Compared to a traditional physics major, our graduates would have computer skills to make them a less training-intensive hire; compared to a traditional CS major our graduates would have facility with physics concepts and problem solving techniques, both classical and quantum.

As currently designed the major requires 73 credits. The optional CS or Physics 'Focus' would boost the credit total to 82.

Program Requirements

Mathematics (18 credits)

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG OR MATH 1180 OR MATH 1185
- MATH 0290 - DIFFERENTIAL EQUATIONS OR MATH 1270

Introductory Physics Courses (9 credits)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
 - PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
OR
 - PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1
 - PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2
- AND
- PHYS 0330 - PHYSICS AND QUANTUM COMPUTING SEMINAR

Introductory and Intermediate Computer Science (13 credits)

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Intermediate and Advanced Physics Courses (16 credits)

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Advanced Computer Science (9 credits)

- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1613 - QUANTUM COMPUTATION

Physics Laboratory Courses (at least 5 credits)

Five credits must be chosen from the following:

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING OR PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- PHYS 1415 - QUANTUM PHYSICS AT THE NANOSCALE

Capstone Research or Project or Internship (3 credits)

All majors must complete a capstone experience prior to graduation. It is the intention that this mirror the format of the CS capstone project (physics lacks an equivalent, though directed research is common among physics undergraduates). The requirement can be satisfied by one semester of directed research with a physics or CS faculty member, or a CS Capstone Project (CS 1980, CS 1981). Alternately, students may instead undertake an internship (for CS this requires registration in CS 1900). There are growing opportunities for QC-specific undergraduate fellowships that may be of interest to majors, see for example: <https://www.ibm.com/quantumcomputing/internship/> and the various programs linked there.

OPTIONAL Focus in Computer Science or Physics (9 credits)

This group of courses is designed to prepare interested students for graduate studies in CS or Physics, and can also allow for the addition of specialized special topic or elective courses to the major given adequate enrollment and departmental resources. Currently the courses for the focus options are:

- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
 - PHYS 1372 - ELECTROMAGNETIC THEORY
 - PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS
- OR
- Three CS courses (9 cr. total) at 1500 level or above.

Total Credits: 73 or 82

Major

Astronomy, BA

The University of Pittsburgh's internationally recognized Department of Physics and Astronomy has been an important leader at the frontier of science and, with 500 PhD alumni, has launched many distinguished careers. Now, at the onset of the 21st Century, the department is maintaining its traditions of excellence and innovation while leading the field in breakthroughs that promise an ever-deeper understanding of the universe. From sub-nuclear particles to the unimaginably large, from the birth of the universe to the edge of technology - and at the intersection of quantum and classical physics - our faculty and students explore the fundamental laws of nature. Students may expect to pursue research that influences many fields, including biology, mathematics, medicine, chemistry, engineering, and computer science.

The BA in astronomy requires the completion of 39 credits in physics and astronomy and six credits in communication and history and philosophy of science, distributed as follows.

Introductory Physics courses

Select one of the following pairs of courses.

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Introductory Astronomy course

The following course is required.

- ASTRON 0113 - INTRODUCTION TO ASTROPHYSICS

Intermediate and Advanced Physics courses

All of the following courses are required.

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1331 - MECHANICS

Laboratory courses

Both of the following courses are required.

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Intermediate and Advanced Astronomy courses

Select at least two courses from the following list, for a total of at least six credits.

- ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - THE SOLAR SYSTEM AND EXTRASOLAR PLANETS

Mathematics courses

All of the following courses are required.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

Science electives

Select at least two of the following courses, for a total of at least six credits.

- Some courses on this list have pre-requisites. Be sure to check the course enrollment requirements.
- If GEOL 1701 - GEOLOGY OF THE PLANETS is used to meet the Science Elective requirement, it cannot also be used to meet the Intermediate and Advanced Astronomy requirement.
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2

- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
- PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

History and Philosophy of Science or science policy and management courses

Select at least one of the following courses, for a total of at least three credits.

- PHYS 0087 - PHYSICS AND SOCIETY
- BUSERV 1915 - INTRODUCTION TO MANAGEMENT
- PUBSRV 1315 - MANAGING PROJECTS AND CONTRACTS
- Any course in the Department of History and Philosophy of Science

Writing and Communication courses

Select at least one of the following courses, for a total of at least three credits.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMF 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMF 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMF 1400 - GRANT WRITING FOR NONPROFITS
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- LING 1000 - INTRODUCTION TO LINGUISTICS

Science Communication concentration

This concentration replaces the three-credit writing or communication course with a three-credit writing course and 12 credits of communication courses. Students pursuing this concentration may replace the six credits of science electives with the communication course requirements.

Required writing course

The following course is the required writing-intensive (W) course for this concentration in the major.

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION

Communication courses

Select at least four of the following courses, for a total of at least 12 credits.

- COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
- COMMRC 0520 - PUBLIC SPEAKING
- COMMRC 1105 - TELEVISION AND SOCIETY
- ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION
- ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW
- LING 1000 - INTRODUCTION TO LINGUISTICS

Science Breadth concentration

This concentration provides broader exposure to other sciences in comparison to the standard Astronomy BA, while going into greater depth in physics and astronomy than a more generic Natural Sciences major. With proper selection of courses, this concentration provides the necessary requirements to apply for admission to medical school while roughly matching the credit requirements of the Astronomy BA.

Reduced Physics requirement

The following course is the required Physics course for this concentration in the major. It may also be used to fulfill a requirement in the Physics minor.

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Reduced writing requirement

The three-credit writing or communication requirement is waived for students pursuing this concentration.

Added science requirements

Select two of the three following groups of courses, for a total of at least 16 credits.

- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
- And one of the following pairs of courses
- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- or
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- and

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- GEOL 0890 - OCEANOGRAPHY

Added science electives

Select one of the three following groups, for a total of at least six credits.

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1
- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2
- CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1
- CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Two advanced courses in Biological Sciences (BIOSC), Bioengineering (BIOENG), Chemistry (CHEM), Computer Science (CS), or Geology (GEOL).

Additional information

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation.

Satisfactory/No Credit option

No PHYS or ASTRON courses beyond the introductory level may be taken on an S/NC basis.

Writing (W) requirement

Students must complete at least one writing-intensive (W) course in the major.

Honors major requirements

Honors in astronomy is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in the major, a cumulative GPA of 3.0 or higher, completes ASTRON 1903 or PHYS 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, the undergraduate poster fair hosted by the David C. Frederick Honors College).

Physics and Astronomy, BS

Physics and Astronomy Major Requirements

The BS in physics and astronomy requires the completion of 50 credits in physics and astronomy distributed as follows.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Introductory Astronomy course

- ASTRON 0113 - INTRODUCTION TO ASTROPHYSICS

Intermediate and advanced Physics courses

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least seven credits

Required courses

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Additional courses

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY

Intermediate and advanced Astronomy courses

- ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- ASTRON 1122 - THE SOLAR SYSTEM AND EXTRASOLAR PLANETS *

Note:

* GEOL 1701 - GEOLOGY OF THE PLANETS may be substituted for this course.

Science elective

Choose at least three credits *

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- GEOL 1410 - EXPLORATION GEOPHYSICS
- GEOL 1701 - GEOLOGY OF THE PLANETS **
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS
- PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Note:

* Some of these courses have prerequisites

** If this course is taken as a science elective, it cannot be used to satisfy the requirement for the nine credits of intermediate and advanced courses.

Prerequisite Mathematics courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

Honors major requirements

Honors in physics and astronomy is granted if in addition to fulfilling all requirements for the major, the student meets the following requirements.

- Maintains a GPA of 3.2 or higher in the major

- Maintains a cumulative GPA of 3.0 or higher
- Completes ASTRON 1903 - DIRECTED RESEARCH or PHYS 1903 - DIRECTED RESEARCH
- Submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by the David C. Frederick Honors College).

Education concentration

This concentration removed nine credits from the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional education related courses

- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Physics courses removed

- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Required laboratory courses

Choose at least eight credits

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 1361 - WAVE MOTION AND OPTICS
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Required selection of science electives

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Graduate School Preparation concentration

This concentration adds six credits to the standard Physics and Astronomy major requirements if one of the courses listed below is taken as a science elective.

Additional intermediate and advanced Physics courses

- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS

Physics, BS

Physics Major Requirements

- A minimum GPA of 2.0 in departmental courses is required for graduation. Honors majors must attain a minimum GPA of 3.2 in physics courses, a cumulative GPA of 3.09 or higher, completes PHYS 1903 Directed Research, submits a paper detailing the research within the department and presents the research in a public forum (i.e. at the University's Science Symposium or the Undergraduate Poster Fair hosted by UHC).
- No PHYS courses beyond the introductory level may be taken on an S/NC basis.
- Students must complete at least one W-course in the major; students should consult with their department advisor about this requirement.

Physics major, BS

The physics major requires the completion of 47 credits in physics distributed as follows.

Note:

While not required, the introductory level honors courses, PHYS 0475, PHYS 0476, and PHYS 0520 are appropriate particularly for students seeking degrees in physics.

Introductory Physics courses:

(select one group)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED) and
- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)

- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1 and
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Intermediate and advanced Physics courses

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 1310 - UNDERGRADUATE SEMINAR
- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Laboratory courses

Choose at least 10 credits

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING or
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- ASTRON 1263 - TECHNIQUES OF ASTRONOMY

Science electives

Choose at least nine credits from groups A and B. At least three credits must come from a course in group B.

Group A

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
- BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1

- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

- CHEM 0320 - ORGANIC CHEMISTRY 2 or
- CHEM 0740 - UHC ORGANIC CHEMISTRY 2

- CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Group B

- ASTRON 1120 - STARS; STELLAR STRUCTURE AND EVOLUTION
- ASTRON 1121 - GALAXIES AND COSMOLOGY
- CHEM 1410 - PHYSICAL CHEMISTRY 1
- CHEM 1420 - PHYSICAL CHEMISTRY 2
- CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
- ECE 1232 - INTRO LASERS & OPTCL ELECTNC
- ECE 1247 - SEMICONDUCTOR DEVICE THEORY
- GEOL 1410 - EXPLORATION GEOPHYSICS
- MATH 1470 - PARTIAL DIFFERENTIAL EQUATIONS 1
- MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
- MATH 1560 - COMPLEX VARIABLES & APPLICATIONS
- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1376 - INTRODUCTION TO BIOLOGICAL PHYSICS
- PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Prerequisite Mathematics courses

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1 or
- MATH 1185 - HONORS LINEAR ALGEBRA
- MATH 0290 - DIFFERENTIAL EQUATIONS or
- MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1 or
- MATH 1275 - HONORS ORDINARY DIFFERENTIAL EQUATIONS 1

Departmental honors requirements

Honors in physics is granted if in addition to fulfilling all requirements for the major, the student maintains a GPA of 3.2 or higher in courses required for the major, maintains a cumulative GPA of 3.0 or higher, completes MATH 1903 Directed Research, submits a paper detailing the research within the department, and presents the research in a public forum (i.e. at the University's Science Symposium, or the Undergraduate Poster Fair hosted by UHC).

Education concentration

This concentration removes up to 10 credits of physic courses from the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional education-related courses

- PSYED 1001 - INTRO EDUCATIONAL PSYCHOLOGY
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC

Courses that emphasize the broader impact of science

Select at least three credits.

- PHYS 0087 - PHYSICS AND SOCIETY
Any course offered by the Department of History and Philosophy of Science

Required Science electives

Select one of the pairs from Group A, and take the indicated course in Group B.

Group A

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0720 - UHC GENERAL CHEMISTRY 2

Group B

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2

Physics courses removed

The following physics courses are not required for this concentration.

- PHYS 1321 - COMPUTATIONAL METHODS IN PHYSICS

- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Graduate School Preparation concentration

This concentration adds at least six credits of Physics courses to the standard Physics major requirements. This concentration requires seven credits of lab courses instead of the standard 10 credits.

Additional intermediate and advanced Physics courses

- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
- PHYS 1372 - ELECTROMAGNETIC THEORY
- PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS

Minor

Physics Minor

First level Physics course

Select one of the following courses.

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1

Second level Physics course

Select one of the following courses.

- PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
- PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2

Physics lab course

Select one of the following courses.

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
- PHYS 0520 - MODERN PHYSICS MEASUREMENTS

Principles of Physics course

Select one of the following courses.

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS

Additional Physics course

Select one of the following courses.

- PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
- PHYS 1374 - SOLID STATE PHYSICS
- PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
- PHYS 1376 - INTRODUCTION TO BIOLOGICAL PHYSICS
- PHYS 1378 - INTRODUCTION TO NUCLEAR AND PARTICLE PHYSICS

Department of Political Science

A major in political science is designed to help students understand the complexity of political developments in the United States and throughout the world. The major also provides students with a broad education that will help them to prepare for a wide variety of careers in various levels of government service, law, education, journalism, business, and the nonprofit sector. Those interested in government service careers may wish to complement their study of political science with courses in public service offered through the College of General Studies and the Graduate School of Public and International Affairs.

The political science department offers many courses that meet the international/foreign cultures requirements of the core curriculum of the Dietrich School of Arts and Sciences, as well as requirements for the wide range of certificate programs sponsored by the University Center for International Studies (African Studies, Asian Studies, European Union Studies, Global Studies, Latin American Studies, Russian and East European Studies, West European Studies, Global Service Center).

Joint Major

Computational Social Science, BS

Computational Social Science

The Computational Social Science (CSS) major educates students to build, compute, and improve theoretically-informed models of social processes, bridging domain and technical expertise. This major will prepare students to understand, engage with, and innovatively solve evolving, complex multi-scale challenges such as climate change, transnational political violence, cybersecurity and privacy, social polarization, and inequality, among others. This major will enhance the student's strength in both social science theory, broadly construed, as well as computing, informatics, and networked systems. Students will gain an understanding of modern computational tools and resources and social, political, and economic concepts from core social science classes.

Eligibility for the Major

Students may declare a major in Computational Social Science after completing the following course with a letter grade of C or higher.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Additionally, students are encouraged to be enrolled in or have completed INFSCI 0702 / PS 0702 with a grade of "C" or better when declaring the major.

Computational Social Science Major Requirements

The major will comprise of the following requirements for a total of 52-53 credits. All courses should be completed with a grade of "C" or better.

Pre-Requisite Mathematics Class

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Foundations of Computational Social Science

The foundational courses introduce students to enduring puzzles in social science research, emerging themes of computational social science, and the approaches that social scientists and information & network scientists use to solve problems. This section consists of eight required courses that will provide foundations of subject matter knowledge and the basic computational tools that are relevant to social scientific theories and empirics.

One Introduction to CSS Class

- PS 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE
OR
- INFSCI 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE

One Introduction to Social Science Class

Choose one class from this list:

- PS 0200 - AMERICAN POLITICS
- PS 0500 - INTERNATIONAL RELATIONS
- PS 0300 - COMPARATIVE POLITICS

Four Classes Introducing Computational Approaches and Basic Tools

Two required courses:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING *
- INFSCI 0510 - DATA ANALYSIS

And then, select two of the following courses:

- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0610 - NETWORKS AND INFORMATION
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS

* Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Python, C++, or Java programs would be sufficient. It is also possible to take one of CS 0010, CS 0011, or CS 0012 as preparation. Preparatory classes of this nature do not count toward the student's major requirements.

One Social Science Research Design Class

- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE

One Modeling Social Interactions and Motivations Class

Select one of the following courses.

- PS 1250 - GAMES, POLITICS, AND STRATEGY
- PS 1514 - POLITICAL STRATEGY INTERNATIONAL RELATIONS

Ethics and Computational Social Science

This section of the major will expose students to critical debates on the ethics of governance, computing, and technological change. Issues covered will include tradeoffs between privacy/security and censorship/freedom, as well as topics related to surveillance, propaganda, cyber-security, and regulation. The goal is to expose students to both the moral and social consequences of technology at a conceptual level, and the specific technical implementations that cause potential social problems (e.g., packet-sniffing) and could potentially expand the space for solutions (e.g., differential privacy).

Select two courses from the following:

- CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES
- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- INFSCI 1600 - SECURITY AND PRIVACY
- PS 1693 - POLITICAL THEORY & THE FUTURE-ANALYSIS
- INFSCI 1049 - INTRODUCTION TO INFORMATION SECURITY
- PS 1675 - POLITICS OF HUMAN RIGHTS

Intermediate Techniques Applied to Social Science Content

The third set of requirements will empower students to use computational tools to explore enduring social science puzzles and theories at scale. These paths are not meant to be formal areas of concentration, but options to gain competence in more focused areas. For example, some students might be interested in applying data mining techniques to problems in campaigns in American politics. Other students might want to focus on cyber-security and international relations. The computational techniques, domains, and analytics course sets are organized to broaden interest in the major. Together, these courses allow our students to have an evolved understanding of how computing and digital tools can be used in government, businesses, and NGOs.

Two Computational Skills Classes

These classes specifically focus on relevant computational skills, including data mining, the web, visualizations, social computing, and advanced security and privacy. Other upper-level INFSCI courses (1100+) may be used with approval of the advisor.

Select two of the following courses to satisfy this subset:

- INFSCI 1440 - SOCIAL COMPUTING
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1550 - SPATIAL INFORMATION
- INFSCI 1570 - NETWORK AND WEB DATA TECHNOLOGIES
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY

Two Domain Specialization Classes

Students will delve deeper into their domain specialization with two classes. One class should pair with the theme chosen for the student's Introductory Social Science Class (under Foundations of CSS). Students then choose another substantive class that can be outside the previous theme. Select two domain specializations classes from the themes below. Although only a few classes are listed for each theme, more are options available to students. Students should refer to the major's academic advisement (degree progress) report for a complete list of course options.

American Politics: A subset of courses within the 1200-range are approved domain specialization courses to pair with **PS 0200**.

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1203 - JUDICIAL POLITICS
- PS 1204 - WOMEN IN POLITICS
- PS 1211 - LEGISLATIVE PROCESS
- PS 1213 - LAW AND POLITICS
- PS 1232 - POLITICAL ATTITUDE & PUBLIC OPINION

Comparative Politics: A subset of courses offered within the 1300-range are approved domain specialization courses to pair with **PS 0300**.

- PS 1302 - POLITICAL DEVELOPMENT

- PS 1303 - EACE MOVEMENTS AND PEACE EDUCATION
- PS 1311 - WESTERN EUROPEAN GOVERNMENT AND POLITICS
- PS 1316 - ASIAN POLITICS
- PS 1317 - POLITICS OF THE EUROPEAN UNION
- PS 1322 - LATIN AMERICAN POLITICAL DEVELOPMENT
- PS 1327 - POLITICS OF REVOLUTION

International Relations: A subset of courses offered within the 1500-range are approved domain specialization courses to pair with **PS 0500**.

- PS 1501 - THEORY OF INTERNATIONAL RELATIONS
- PS 1502 - INTERNATIONAL LAW AND PROBLEMS OF WORLD ORDER
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1504 - NATIONALISM
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1512 - THE POLITICS OF MIGRATION
- PS 1513 - FOREIGN POLICIES--CHANGING WORLD

One Integrated Analytics Content Class

The final section in this requirement will marry a deep analytical component, such as predictive analytics, causal inference, game theory, data visualization, and other topics with complicated social problems such as inequality, trade, climate change, political violence, or polarization. The class will focus on integrating computational tools into the measurement of core social science concepts, including democracy, human rights, happiness, and peace. There will be a focus on using text and images as data.

Select one of the following courses:

- PS 1291 - WOMEN IN POLITICS - ANALYSIS
- PS 1292 - RACE, GENDER, AND POLITICS - ANALYSIS
- PS 1293 - LEGISLATIVE PROCESS - ANALYSIS
- PS 1294 - POLITICAL ATTITUDE - ANALYSIS
- PS 1295 - POLITICAL PSYCHOLOGY - ANALYSIS
- PS 1299 - ANALYSIS OF AMERICAN POLITICS
- PS 1391 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE - ANALYSIS
- PS 1392 - EUROPEAN POLITICS-ANALYSIS IN COMPARATIVE POLITICS
- PS 1395 - LATIN AMERICAN POLITICS-ANALYSIS
- PS 1399 - ANALYSIS OF COMPARATIVE POLITICS
- PS 1591 - ANALYSIS OF CIVIL WARS
- PS 1592 - POLITICS OF GLOBAL ECONOMIC RELATIONS - ANALYSIS
- PS 1599 - ANALYSIS OF INTERNATIONAL RELATIONS
- PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA

Application Development Capstone

The major culminates in the production of a research project that uses computational tools to create either a) an online, interactive data visualization, b) a replicable research report that uses unstructured data or c) a module/library. In all cases, the project will engage with or help to resolve an important social problem. This project can be created through independent or directed research, or in one of the classes listed below. All students will present their projects as digital posters to faculty, alumni, and potential employers from around the Pittsburgh area at an end-of-the-year event.

Select one of the following courses:

- INFSCI 1700 - DATA-DRIVEN COMMUNICATION
- INFSCI 1710 - DIRECTED RESEARCH

- INFSCI 1720 - INTERNSHIP
- INFSCI 1730 - INDEPENDENT STUDY
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- PS 1782 - APPLICATION IN COMPUTATIONAL SOCIAL SCIENCE
- PS 1900 - INTERNSHIP
- PS 1901 - INDEPENDENT STUDY
- PS 1903 - DIRECTED RESEARCH

Additional information

Grade requirements

All courses for the major must be taken as the letter grade option and completed with a C or better.

Approved courses

If a course is approved for multiple requirements, it cannot satisfy more than one.

Satisfactory/No Credit option

No course that counts toward the major can be taken on an S/NC basis without the approval of the advisor.

Writing requirement

Students enrolled in the Dietrich School of Arts and Sciences must complete at least one writing-intensive (W) course in the major. Students in the School of Computing and Information must comply with GER rules.

Double majoring

There will be specific provisions for double majors on the A&S side, but it is expected that students can double major this with another social science major or any major in SCI.

Declaration

Students can declare the major in the Spring of their first year. Students are required to complete MATH 0220 prior to declaring and are strongly encouraged to be enrolled in PS 0702 during or before their declaration term.

Honors

To earn honors designation within the major upon graduation, a 3.7 GPA is required across all major classes and a 3.5 Cumulative GPA overall.

Major

Political Science, BA

Political Science Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

Core Courses

Students take all five of the core courses, which provide first and second year students with a survey of each of these fields and with the methods employed in the contemporary study of politics.

- PS 0200 American Political Process: An introduction to the institutions and political processes in the United States. The course surveys the presidency, Congress, and the judicial system as well as political behavior, public opinion, political attitudes, and the party system.
- PS 0300 Comparative Politics: An introduction to political systems outside the United States. The course surveys a variety of theoretical approaches to the comparison of political systems and an examination of the political processes, institutions, and current political developments in a variety of political systems in all of the major regions of the world.
- PS 0500 World Politics: An introduction to the study of foreign policy, covering the international political environment in which nation-states and other actors operate, as well as the specific policies adopted by particular states.
- PS 0600 Political Theory and Analysis: An introduction to the history of Western political ideas, including the thought of Plato, Aristotle, Machiavelli, Locke, Mill, and Marx.
- PS 0700 Research Methods in Political Science: An introduction to the methods used in political science research, covering the logic of social scientific inquiry, the basics of research design, and the quantitative and qualitative methods that are commonly used by political scientists to investigate important questions about the political world.

Field Courses

At the 1000 level, students must take a total of six courses (18 credits), distributed across a major field (three courses), a minor field (two courses) and one course in an elective field. In the major field, one of the courses must be a capstone seminar.

In each of the four substantive undergraduate fields of political science, a wide variety of advanced (1000-level) courses is offered on a regular basis. Some courses are offered annually, while others are offered less frequently. For details on course offerings and content, see the Undergraduate Course Descriptions.

American Politics

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1203 - JUDICIAL POLITICS
- PS 1204 - WOMEN IN POLITICS
- PS 1211 - LEGISLATIVE PROCESS
- PS 1212 - AMERICAN PRESIDENCY
- PS 1213 - LAW AND POLITICS
- PS 1230 - INTEREST GROUP POLITICS
- PS 1231 - POLITICAL PARTIES AND ELECTIONS
- PS 1233 - POLITICAL PSYCHOLOGY
- PS 1234 - ELECTORAL BEHAVIORS AND DEMOCRATIC PROCESS
- PS 1235 - MEDIA AND POLITICS
- PS 1240 - THE POLITICS OF DIVERSITY
- PS 1250 - GAMES, POLITICS, AND STRATEGY

- PS 1252 - STATE GOVERNMENT
- PS 1261 - AMERICAN PUBLIC POLICY
- PS 1275 - RELIGION AND AMERICAN POLITICS
- PS 1281 - CAPSTONE SEMINAR IN AMERICAN POLITICS

Comparative Politics

- PS 1302 - POLITICAL DEVELOPMENT
- PS 1311 - WESTERN EUROPEAN GOVERNMENT AND POLITICS
- PS 1317 - POLITICS OF THE EUROPEAN UNION
- PS 1321 - LATIN AMERICAN POLITICS
- PS 1324 - US-LATIN AMERICAN RELATIONS
- PS 1328 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE
- PS 1330 - EUROPEAN UNION SEMINAR
- PS 1332 - GOVERNMENT AND POLITICS IN CONTEMPORARY CHINA
- PS 1333 - GOVERNMENT AND POLITICS OF JAPAN
- PS 1336 - BUSINESS AND POLITICAL ECONOMY IN MODERN CHINA
- PS 1341 - GOVERNMENT AND POLITICS USSR/RUSSIAN FEDERATION
- PS 1348 - XENOPHOBIA IN MODERN EUROPE
- PS 1351 - GOVERNMENT AND POLITICS OF THE MIDDLE EAST
- PS 1352 - INTRODUCTION TO AFRICAN POLITICS
- PS 1357 - THE POLITICS OF FOOD, LAND, AND SUSTAINABILITY
- PS 1361 - COMPARATIVE POLITICAL PARTY SYSTEMS
- PS 1381 - CAPSTONE SEMINAR IN COMPARATIVE POLITICS

International Relations

- PS 1501 - THEORY OF INTERNATIONAL RELATIONS
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1504 - NATIONALISM
- PS 1509 - CONFLICT AND WAR THEORY
- PS 1510 - COLDWAR:SOVIET UNION AND WEST 1917-91
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1536 - HUMAN SECURITY
- PS 1537 - PEACEMAKING & PEACEKEEPING
- PS 1538 - THE POLITICS OF OIL AND NATURAL RESOURCES
- PS 1542 - GLOBAL ENVIRONMENTAL POLITICS
- PS 1543 - GLOBALIZATION AND INTERNATIONAL POLITICS
- PS 1581 - CAPSTONE SEMINAR IN INTERNATIONAL RELATIONS

Political Theory and Analysis

- PS 1601 - ANCIENT AND MEDIEVAL POLITICAL THOUGHT
- PS 1602 - STATES OF NATURE: EARLY MODERN POLITICAL THOUGHT IN CONTEXT
- PS 1603 - MODERN AND CONTEMPORARY POLITICAL THOUGHT
- PS 1607 - AMERICAN POLITICAL THOUGHT
- PS 1612 - MARXISM
- PS 1614 - THEORIES OF JUSTICE
- PS 1619 - DEMOCRATIC THEORY
- PS 1622 - "OUTSIDER POLITICS" : ANARCHIST, PUNK, QUEER, AND FEMINIST THEORY

- PS 1675 - POLITICS OF HUMAN RIGHTS
- PS 1681 - CAPSTONE SEMINAR IN POLITICAL THEORY

Additional Offerings

- PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA
- PS 1900 - INTERNSHIP
- PS 1901 - INDEPENDENT STUDY
- PS 1902 - DIRECTED READING
- PS 1903 - DIRECTED RESEARCH
- PS 1910 - INSTITUTE OF POLITICS INTERNSHIP/SEMINAR

Capstone seminar

The University of Pittsburgh requires students to complete one writing-intensive course in their major. The Capstone Seminar, which is taken in the major field, fulfills the university-wide requirement of an intensive writing course (W-course) in the major and allows students to undertake advanced work under the direction of faculty in a smaller seminar setting.

Departmental honors requirements

Departmental honors are conferred upon students who maintain an overall GPA of 3.5 and achieve a GPA of 3.7 or better in political science.

Grade requirements

A minimum GPA of 2.0 in departmental courses is required for graduation. In addition, a student must earn a grade of at least C- for a course to satisfy a PS requirement.

Satisfactory/No Credit option

No course to be counted toward the major can be taken on an S/NC basis.

Political Science, BPHIL

Political Science Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

Political Science BS and BPhil

Outstanding and motivated students seeking an even more challenging academic experience, especially those who are considering graduate school, should consult with an advisor about the option of a BS or BPhil in Political Science. The BS degree requires the departmental minor field to be Methods and Models in Political Science (PS 1702 and PS 1710), as well as 12 credits of additional coursework in cognate fields and an original paper of high quality. The BPhil degree, which is offered through the David C. Frederick Honors College (FHC), requires a plan of cognate

fieldwork and a thesis approved by the department and FHC. For more information on the BPhil, see <https://www.frederickhonors.pitt.edu/research/bachelor-philosophy-bphil-degree>.

Second Language

None required beyond the requirements of Arts and Sciences. Study of a second language is highly recommended for students with an interest in politics outside of the United States and for all those considering graduate work in comparative politics or a career in government agencies concerned with international affairs.

Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Political Science, BS

Political Science Major Requirements

The major requires the completion of 33 credits.

The political science department offers a large number of courses in four substantive fields: American Politics, Comparative Politics, International Relations, and Political Theory. Core courses provide a survey of each field and with the methods employed in the contemporary study of politics. The field courses, at 1000-level, provide students with advanced coursework in each of these areas of specialization. The combination of core and field courses provides students with a comprehensive overview of political science as a discipline while permitting students to concentrate in a particular field or fields.

Political Science BS and BPhil

Outstanding and motivated students seeking an even more challenging academic experience, especially those who are considering graduate school, should consult with an advisor about the option of a BS or BPhil in Political Science. The BS degree requires the departmental minor field to be Methods and Models in Political Science (PS 1702 and PS 1710), as well as 12 credits of additional coursework in cognate fields and an original paper of high quality. The BPhil degree, which is offered through the David C. Frederick Honors College (FHC), requires a plan of cognate fieldwork and a thesis approved by the department and FHC. For more information on the BPhil, see <https://www.frederickhonors.pitt.edu/research/bachelor-philosophy-bphil-degree>.

Second Language

None required beyond the requirements of Arts and Sciences. Study of a second language is highly recommended for students with an interest in politics outside of the United States and for all those considering graduate work in comparative politics or a career in government agencies concerned with international affairs.

Statistics

Not required for majors, but highly recommended for all those interested in graduate education in political science, business, or public policy.

Independent Study

Students who have completed the field course may explore a particular subject in greater depth in a tutorial with the appropriate faculty member. Permission of the instructor is required.

Minor

Political Science Minor

A minor in political science is composed of one core course and four field courses in one of the four fields of political science.

Internships

A wide range of internships related to the study of politics at the local, national, and international levels are available in both the public and private sectors in Pittsburgh, Washington D.C., and other major cities. Students must work closely with a faculty advisor to assure full academic credit.

Study Abroad

Majors in political science receive full academic credit for participation in all study abroad programs. The University of Pittsburgh is a participant in a wide range of programs of international study.

Honors Society

Students who have achieved a GPA of 3.0 in political science are encouraged to join Pi Sigma Alpha, the national honors society in political science. This society sponsors many extracurricular activities linked to the study of politics.

Advising

Questions about courses, departmental requirements, and extracurricular opportunities should be addressed to the undergraduate advisors.

Department of Psychology

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit www.psychology.pitt.edu

Psychology majors can participate in one of two major options:

Major

Psychology, BS

The psychology major is part of the liberal arts program in the Dietrich School. As such, it provides students with the skills needed to succeed in a job and in graduate school, to think critically and communicate effectively about human behavior and related topics. The Department of Psychology also functions from the perspective that psychology is a natural science. The emphasis it places on research is evident in the foundation courses required to declare the psychology major (e.g., statistics, research methods), as well as in the focus on the scientific methods throughout the content of all other psychology courses. To complement their arts and sciences training, the department also encourages students to participate in directed

research and/or supervised field placement opportunities. For more information on the psychology department and its programs, please visit the Department of Psychology Web site.

Psychology majors participate in one of two major options: General major in Psychology, and Honors in Psychology. Students who declare the Psychology major are automatically enrolled in the general major track. This track provides students with a broad background in psychology and a firm understanding of the scientific method. The majority of students remain in this track.

In addition to Dietrich School skills and General Education Requirements, psychology majors must complete 33 to 34 credits in psychology, four credits in statistics, and nine to 10 credits of co-requirements as described below. The honors track offers students a challenging and unique opportunity: to conduct their own, independent research study under the guidance of a faculty member. Additional course and GPA requirements apply. Students interested in pursuing the honors track should speak with an advisor in the Psychology Advising Office.

The following requirements apply to students who declare the Psychology major in spring 2020 term or later. Students who declared the major before spring 2020 should consult with the Psychology Advising Office.

One course in Statistics

The required course in statistics should be taken as early as possible; the contents of the course is relevant to many required psychology courses. The statistics course must be taken before a student can enroll in PSY 0036 - RESEARCH METHODS LECTURE and PSY 0037 - RESEARCH METHODS LAB.

Choose one of the following courses.

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Foundation courses

Three courses are required to declare the major; students must earn a C or better in all three foundation courses if they wish to graduate with a psychology major.

- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- PSY 0036 - RESEARCH METHODS LECTURE
- PSY 0037 - RESEARCH METHODS LAB

Core courses

Choose four courses from the following list.

- PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
- PSY 0205 - PSYCHOPATHOLOGY
- PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
- PSY 0422 - COGNITIVE PSYCHOLOGY
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY or
- NROSCI 1000 - INTRO TO NEUROSCIENCE

Upper level

Choose two 1000-level courses, not to include the following courses

- PSY 1900 - SUPERVISED FIELD PLACEMENT
- PSY 1902 - DIRECTED INDIVIDUAL READING
- PSY 1903 - DIRECTED INDIVIDUAL RESEARCH S/NC
- PSY 1950 - PSYCHOLOGY SENIOR SEMINAR
- PSY 1970 - UNDERGRADUATE TEACHING ASSISTANT EXPERIENCE
- PSY 1973 - HONORS DIRECTED RESEARCH
- PSY 1975 - HONORS THESIS/MAJORS

Electives

Choose a course from any of the following levels.

- PSY 0100-level
- PSY 0300-level
- PSY 0400-level
- PSY 0500-level
- PSY 1000-level

The elective course cannot include any course used to fulfill a core requirement, any 1000-level requirement, or lab methods requirement.

Experiential learning courses - PSY 1900, PSY 1902, and PSY 1903 may be used to fulfill this requirement. PSY 1950, PSY 1970, PSY 1973 , and PSY 1975 may not be used to fulfill this requirement.

Laboratory

Choose one of the following courses.

- PSY 0405 - LEARNING AND MOTIVATION
- PSY 0423 - COGNITIVE PSYCHOLOGY LAB
- PSY 1059 - TOPICS IN ADVANCED LABORATORY METHODS
- PSY 1112 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY LAB
- PSY 1213 - PSYCHOPATHOLOGY ADVANCED LAB
- PSY 1305 - DEVELOPMENTAL PSYCHOLOGY LAB
- PSY 1471 - HUMAN BRAIN CONNECTIVITY LAB: BASIC RESEARCH AND CLINICAL APPLICATIONS
- PSY 1975 - HONORS THESIS/MAJORS

Co-requirements

The Department of Psychology requires that students further develop their scientific skills through certain approved courses in math, biological sciences, and social sciences. A list of these approved courses is available in the Psychology Advising Office. The co-requirements may be used to fulfill Dietrich School General Education Requirements, where appropriate, or can be taken as separate courses.

Psychology majors must also follow these rules and requirements:

- Students who wish to declare a major in psychology must first complete PSY 0010 and the statistics course with a letter grade of C or better. After completing these courses, students must be enrolled in PSY 0036 and PSY 0037.
- New majors must complete an online orientation prior to scheduling an appointment with their assigned psychology advisors. Students will receive an e-mail with instructions and dates approximately the fourth week of each fall and spring term.
- Psychology majors must maintain at least a 2.0 GPA in their departmental courses.
- All psychology and statistics courses used to fulfill requirements for the major must be taken for a letter grade.
- Majors must take one of the writing-intensive courses (W-courses) offered within the department. PSY 0037 is offered every term and is a W-course. Other W-courses offered in the department are PSY 1112 and PSY 1305.

Department of Religious Studies

Religion is one of the creative expressions of the human spirit. As such, it has shaped and, in turn, been shaped by virtually all historical traditions as well as by many other forms of human activity such as the arts, literature, political thinking, and social behavior. Therefore, the academic study of religion should be carried out through diverse scholarly methodologies, and it should treat experiences in a variety of cultural contexts in different periods. Students who wish to understand the manner in which religion, in its broadest terms, has contributed to the shaping of the human experience are encouraged to pursue a course of study that will expand their methodological skills as well as give them a firm command of a particular cultural or historical context. Courses in the study of religion tend to emphasize the human search for meaning and value in history; the manner in which particular religious traditions, practices, thoughts, and orientations have evolved over time; and the degree to which religious views have interacted creatively with other systems of thought and other meaningful expressions of human activity. In addition to courses in the Department of Religious Studies, other departments, such as anthropology, classics, history, philosophy, and sociology, offer related courses. For more information on the Department of Religious Studies and its programs, visit www.religiousstudies.pitt.edu.

Major

Religious Studies, BA

Major Requirements

Students pursuing a major in Religious Studies are required to complete 30 credits, detailed as follows.

Introductory courses

- RELGST 0105 - RELIGIONS OF THE WEST
- RELGST 0505 - RELIGION IN ASIA

Survey course

Select one of the following courses.

- RELGST 0405 - WITCHES TO WALDEN POND
- RELGST 0415 - RELIGION IN MODERN AMERICA
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0715 - PHILOSOPHY OF RELIGION
- RELGST 1120 - ORIGINS OF CHRISTIANITY
- RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
- RELGST 1135 - ORTHODOX CHRISTIANITY
- RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
- RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
- RELGST 1250 - JEWS AND JUDAISM IN THE MODERN WORLD
- RELGST 1500 - RELIGION IN INDIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1560 - RELIGION AND HEALING IN CHINA
- RELGST 1570 - RELIGION IN JAPAN

Thematic courses

Select three courses in one thematic cluster listed below.

Religion, Medicine, and the Body

- RELGST 1143 - DEATH IN THE NAME OF GOD

- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
- RELGST 1405 - RELIGION AND SEXUALITY
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS

Spirituality and Rationality

- RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
- RELGST 1145 - GRECO-ROMAN RELIGIONS
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
- RELGST 1610 - MYTH, SYMBOL AND RITUAL
- RELGST 0760 - RELIGION AND RATIONALITY
- RELGST 1762 - THE GUIDE OF THE PERPLEXED

Religion, Culture, and Creative Expression

- RELGST 0435 - RELIGION, FILM AND LITERATURE
- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 1148 - RELIGIONS OF ANCIENT EGYPT
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1425 - POPULAR RELIGION IN AMERICA
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1510 - HINDU MYTHOLOGY
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Religion, Identity, and Global Problems

- RELGST 1240 - JEWS AND THE CITY
- RELGST 1241 - GENDER AND JEWISH HISTORY
- RELGST 1252 - HOLOCAUST HISTORY AND MEMORY
- RELGST 1372 - CATHOLICISM IN THE NEW WORLD
- RELGST 1438 - RELIGION AND POLITICS
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1518 - RELIGION AND ECOLOGY
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1620 - WOMEN IN RELIGION
- RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS
- RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT
- RELGST 1680 - HISTORY AND MEMORY IN THE JEWISH TRADITION
- RELGST 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM

Elective courses

Students must take three elective course. One of these courses must be a 1000-level RELGST course of their choice. The other two courses may include an internship, an undergraduate teaching assistantship, or a directed study course. Students must complete a minimum of nine credits in elective courses.

Capstone course

The capstone seminar has a prerequisite of any six RELGST courses.

- RELGST 1903 - DIRECTED RESEARCH-UNDERGRADUATE

Distribution courses

Students must take at least one course from each of the following groups. The same course may not fulfill more than one distribution requirement.

Religion in Asia

- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 1500 - RELIGION IN INDIA
- RELGST 1510 - HINDU MYTHOLOGY
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1560 - RELIGION AND HEALING IN CHINA
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Ancient or Classical Religion in the Middle East and/or Europe

- RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1120 - ORIGINS OF CHRISTIANITY
- RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
- RELGST 1135 - ORTHODOX CHRISTIANITY
- RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
- RELGST 1143 - DEATH IN THE NAME OF GOD
- RELGST 1145 - GRECO-ROMAN RELIGIONS
- RELGST 1148 - RELIGIONS OF ANCIENT EGYPT
- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
- RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS
- RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT
- RELGST 1645 - THE HISTORICAL JESUS
- RELGST 1680 - HISTORY AND MEMORY IN THE JEWISH TRADITION
- RELGST 1762 - THE GUIDE OF THE PERPLEXED

Modern or Contemporary Religion in the Middle East, Europe, or the Americas

- RELGST 0405 - WITCHES TO WALDEN POND
- RELGST 0415 - RELIGION IN MODERN AMERICA
- RELGST 0435 - RELIGION, FILM AND LITERATURE
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0715 - PHILOSOPHY OF RELIGION
- RELGST 1240 - JEWS AND THE CITY
- RELGST 1241 - GENDER AND JEWISH HISTORY
- RELGST 1250 - JEWS AND JUDAISM IN THE MODERN WORLD
- RELGST 1252 - HOLOCAUST HISTORY AND MEMORY
- RELGST 1256 - MODERN ISRAEL AND PALESTINE
- RELGST 1372 - CATHOLICISM IN THE NEW WORLD
- RELGST 1405 - RELIGION AND SEXUALITY
- RELGST 1415 - RACE AND RELIGION IN AMERICA
- RELGST 1425 - POPULAR RELIGION IN AMERICA
- RELGST 1438 - RELIGION AND POLITICS
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1518 - RELIGION AND ECOLOGY
- RELGST 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS
- RELGST 0760 - RELIGION AND RATIONALITY

Other requirements

Grade requirements: All courses counted toward the major must be taken for a letter grade and completed with a C grade or above. At least five courses and the capstone seminar must be completed on the Oakland campus. Students transferring from other colleges or universities need to consult with the director of undergraduate studies about transferring courses and credits to be applied to the major.

Satisfactory/No Credit option: No more than six credits that count toward the major can be taken on an S/NC basis.

Writing (W) requirement: The capstone seminar fulfills the W-course requirement for this major.

Honors major requirements: Department honors require a GPA of 3.25 or higher in the major and a B+ or above in the capstone seminar.

Minor

Religious Studies Minor

Students pursuing a minor in Religious Studies are required to take complete 15 credits of coursework as follows.

Introductory courses

Students must take two courses from the following list.

- RELGST 0090 - MYTH IN THE ANCIENT NEAR EAST
- RELGST 0105 - RELIGIONS OF THE WEST
- RELGST 0405 - WITCHES TO WALDEN POND
- RELGST 0415 - RELIGION IN MODERN AMERICA
- RELGST 0435 - RELIGION, FILM AND LITERATURE
- RELGST 0455 - INTRODUCTION TO ISLAMIC CIVILIZATION
- RELGST 0505 - RELIGION IN ASIA

- RELGST 0525 - RELIGION AND CULTURE IN EAST ASIA
- RELGST 0715 - PHILOSOPHY OF RELIGION

Religion in the East

Students must take one course from the following list.

- RELGST 1500 - RELIGION IN INDIA
- RELGST 1510 - HINDU MYTHOLOGY
- RELGST 1520 - BUDDHISM ALONG THE SILK ROAD
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1550 - EAST ASIAN BUDDHISM
- RELGST 1552 - BUDDHIST MEDITATIVE TRADITIONS
- RELGST 1554 - DEATH AND BEYOND IN BUDDHIST CULTURES
- RELGST 1558 - BUDDHISM AND PSYCHOLOGY
- RELGST 1560 - RELIGION AND HEALING IN CHINA
- RELGST 1570 - RELIGION IN JAPAN
- RELGST 1572 - POPULAR RELIGION IN CHANGING JAPAN

Religion in the West

Students must take one of the following courses.

- RELGST 1100 - ISRAEL IN THE BIBLICAL AGE
- RELGST 1120 - ORIGINS OF CHRISTIANITY
- RELGST 1130 - VARIETIES OF EARLY CHRISTIANITY
- RELGST 1135 - ORTHODOX CHRISTIANITY
- RELGST 1142 - THE CONSTRUCTION OF EVIL IN WESTERN RELIGIOUS TRADITIONS
- RELGST 1143 - DEATH IN THE NAME OF GOD
- RELGST 1145 - GRECO-ROMAN RELIGIONS
- RELGST 1151 - DEATH IN THE MEDITERRANEAN WORLD
- RELGST 1160 - JERUSALEM: HISTORY AND IMAGINATION
- RELGST 1210 - JEWS AND JUDAISM IN THE ANCIENT WORLD
- RELGST 1220 - JEWS AND JUDAISM IN THE MEDIEVAL WORLD
- RELGST 1240 - JEWS AND THE CITY
- RELGST 1241 - GENDER AND JEWISH HISTORY
- RELGST 1250 - JEWS AND JUDAISM IN THE MODERN WORLD
- RELGST 1252 - HOLOCAUST HISTORY AND MEMORY
- RELGST 1372 - CATHOLICISM IN THE NEW WORLD
- RELGST 1405 - RELIGION AND SEXUALITY
- RELGST 1425 - POPULAR RELIGION IN AMERICA
- RELGST 1438 - RELIGION AND POLITICS
- RELGST 1450 - ISLAM, LAW, AND POLITICS
- RELGST 1452 - HYMNS & HIPHOP: SOUNDS OF ISLAM
- RELGST 1540 - SAINTS EAST AND WEST
- RELGST 1545 - MYSTICISM IN ASIA
- RELGST 1610 - MYTH, SYMBOL AND RITUAL
- RELGST 1642 - CHRISTIAN-MUSLIM RELATIONS
- RELGST 1644 - CHRISTIAN MUSLIMS JEWS IN THE MIDDLE AGES: CONNECTION & CONFLICT
- RELGST 1645 - THE HISTORICAL JESUS

- RELGST 1681 - INVENTING ISRAEL: ZIONISM, ANTI-ZIONISM, AND POST-ZIONISM
- RELGST 1725 - DEATH AND HEALTHCARE PROFESSIONS
- RELGST 0760 - RELIGION AND RATIONALITY

Upper level elective

Students must take one RELGST course at the 1000-level.

Department of Slavic Languages and Literatures

The Department of Slavic Languages and Literatures offers majors in Russian and Slavic Studies. These majors provide students with the opportunity to study the languages, literatures, and cultures of Russia and of the Slavic-speaking Eastern European countries, including Poland, Ukraine, Slovakia, Serbia, and Croatia.

Students in the Department of Slavic Languages and Literature include those whose primary interest is languages and/or literature, those who wish to enhance their career opportunities in a special way, those who have an interest in the politics and culture of Russia and the Slavic speaking Eastern European countries, and those who have a desire to explore their ethnic heritage. Many majors continue their studies in graduate or professional school and then go on to careers in business, government, teaching, law, medicine, social work, other health-related professions as well as the CIA, FBI and various NGOs and public policy institutions. Knowledge of a Slavic language has been valuable in working in local Western Pennsylvania institutions, politics, business, health-related professions, and the media because of the large population of those ethnicities in this region. Students are advised to begin language study early in order to gain as complete a command of the language as possible. For more information on the Department of Slavic Languages and Literatures and its programs, see www.slavic.pitt.edu.

During the fall and spring terms, the department offers language courses in Russian, Polish, Slovak and Ukrainian, with Serbian and Croatian available through the Language Acquisition Institute. Any student with prior experience in Russian or Ukrainian (including heritage speakers and those who studied a language in high school or abroad) are required to consult with the instructor before being admitted to any language courses in the department. Placement tests are offered to test suitability.

Summer term intensive courses in Russian, Polish, Slovak, Serbian, Croatian, Bulgarian, Macedonian, Ukrainian as well as Romanian and Hungarian are offered through the Slavic Department's Summer Language Institute [SLI]. Summer language courses are intensive and cover an entire year of study. First through fourth year level courses may be offered. These courses afford students the opportunity to make rapid progress through the language in order to qualify for advanced courses and for various study abroad opportunities. Summer study in the SLI now offers the opportunity to study for the first half of the course in Pittsburgh and the second part in the target country, with excursions to major cities and monuments. Scholarships are available for the SLI programs.

Deserving of special mention is the department's program in Slovak language, literature and culture-the only such program in the United States, and one that additionally offers the opportunity for several students each year to study abroad in Slovakia.

Major

Russian, BA

Major Requirements

The Russian major requires at least 33 distributed as follows.

Prerequisite courses

These courses do not count toward the 33 credits required for the major.

- RUSS 0101 - ELEMENTARY RUSSIAN 1
- RUSS 0102 - ELEMENTARY RUSSIAN 2
- RUSS 0103 - INTERMEDIATE RUSSIAN 1

- RUSS 0104 - INTERMEDIATE RUSSIAN 2

Language courses

- RUSS 0400 - ADVANCED RUSSIAN 1
- RUSS 0410 - ADVANCED RUSSIAN 2
- RUSS 1420 - FOURTH-YEAR RUSSIAN 1
- RUSS 1430 - FOURTH-YEAR RUSSIAN 2

Literature and culture courses

- RUSS 0800 - ADULTERY, MURDER, OMNISCIENCE: INTRODUCTION TO 19TH C RUSSIAN LITERATURE
- RUSS 0810 - UTOPIA, SOCIALISM, DISSENT: INTRODUCTION TO MODERN RUSSIAN LITERATURE
- RUSS 0850 - APPROPRIATING THE PAST: THE EARLY HISTORY AND CULTURES OF THE EASTERN SLAVS, 988-1825
- RUSS 0860 - MODERN RUSSIAN CULTURE
- One 1000-level Russian elective course

Note:

Additional courses at the 1000 level in Russian literature are strongly recommended. Prospective majors are encouraged to take RUSS 0800 - ADULTERY, MURDER, OMNISCIENCE: INTRODUCTION TO 19TH C RUSSIAN LITERATURE and RUSS 0810 - UTOPIA, SOCIALISM, DISSENT: INTRODUCTION TO MODERN RUSSIAN LITERATURE as early as possible as an introduction to Russian literature.

The following rules and requirements apply to Russian majors.

- Advanced placement assessment and credit by examination may be arranged through consent of the instructor and the department chair.
- RUSS 0800 - ADULTERY, MURDER, OMNISCIENCE: INTRODUCTION TO 19TH C RUSSIAN LITERATURE and RUSS 0810 - UTOPIA, SOCIALISM, DISSENT: INTRODUCTION TO MODERN RUSSIAN LITERATURE are offered regularly as W courses and will satisfy the departmental W-course requirement.
- A grade of C or better is required in each course that counts toward the major. A grade of B- or better in language courses is required to advance to the next level. A minimum GPA of 2.0 in departmental courses is required for graduation.
- No course that counts toward the major may be taken on an S/NC basis.

Honors in the major

Honors in Russian is granted if, in addition to fulfilling all requirements for the major, the student meets the following conditions.

- Maintain a GPA of 3.75 or higher in RUSS courses.
- Maintain an overall GPA of 3.25 or higher.
- Complete at least one additional RUSS 1000-level course.
- Complete a 20-page paper involving Russian primary-source research and a two-page summary in Russian, under the supervision of an appointed faculty committee.
- Consulted with the undergraduate advisor in their junior year.

Study abroad

Students are encouraged to participate in an approved study-abroad program for a semester or the summer term. The department will adjust the course requirements in individual cases to accommodate this participation without delaying the student's graduation. Majors often apply for Nationality Rooms Program Scholarships for summer study abroad. The Summer Language Institute (SLI) offers generous scholarships as well. The following represents a partial list of study abroad opportunities available to students.

- **Summer study in Moscow:** The Department of Slavic Languages and Literatures currently sponsors a ten-credit summer-study program as part of the SLI in Pittsburgh (5 weeks) and Moscow (5 weeks) at the Moscow State University. Students may study first through fourth year Russian, covering one full year language study in ten weeks. Similar programs exist for study in Poland and Bulgaria. The Slavic department can be reached at 412-624-5096 or via e-mail at slavic@pitt.edu.
- **The University of Pittsburgh** is affiliated with a number of organizations holding both summer and semester, or year-long study in Russia. The Study Abroad Office, located in 802 William Pitt Union, can be reached at 412-647-7413.
- **The Center for Russian, East European, and Eurasian Studies (REEES)** regularly organizes summer study abroad programs in languages and social sciences in locations from the Czech Republic to Slovakia. REEES makes scholarships available for many of these programs. Trevor Erlacher, the REES undergraduate advisor, can be reached at 412-648-7403 or TFE3@Pitt.edu.
- **The Nationality Rooms Program** offers a wide variety of competitive scholarships for summer study abroad in many parts of the world, including Central and Eastern Europe. Applications are due in January. The NRP, located in 1209 CL, can be reached at 412-624-6510.

For more information, see www.slavic.pitt.edu.

Minor

Bosnian, Croatian, Montenegrin, and Serbian Minor

Students may complete this 15-credit minor during the regular academic year or through summer study of the Bosnia-Croatian-Serbian language. *SLAV 1850 may not be used to fulfill a requirement for more than one academic program.*

Option 1: Academic year

- BCMS 0030 - INTERMEDIATE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 3
- BCMS 0040 - INTERMEDIATE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 4
- BCMS 0400 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 5
- BCMS 0410 - ADVANCED BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN 6
- SLAV 1850 - UNDERSTANDING THE BALKANS: INTRODUCTION TO BALKAN CULTURE AND LITERATURE

Option 2: Summer study

Choose one course from each of the following pairs:

- BCMS 0220 - INTERMEDIATE INTENSIVE SERBIAN
- BCMS 0223 - INTERMEDIATE INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN PITT-MONTENGRO
- BCMS 0230 - ADVANCED INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN
- BCMS 0231 - ADVANCED INTENSIVE BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN PITT-MONTENEGRO

Polish Minor

Students may complete this 15-credit minor during the regular academic year or through summer study of the Bosnia-Croatian-Serbian language. *SLAV 1865 may not be used to fulfill a requirement for more than one academic program.*

Option 1: Academic year

- POLISH 0030 - INTERMEDIATE POLISH 3
- POLISH 0040 - INTERMEDIATE POLISH 4
- POLISH 0400 - ADVANCED POLISH THROUGH FILM
- POLISH 0410 - ADVANCED POLISH 2

- POLISH 0325 - THE SHORT STORY or
- POLISH 0870 - CONTEMPORARY POLISH CINEMA:LITERATURE ON FILM or
- POLISH 1260 - SURVEY OF POLISH LITERATURE AND CULTURE
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED

Option 2: Summer study

Choose one course from each of the following pairs:

- POLISH 0220 - INTENSIVE INTERMEDIATE POLISH
- POLISH 0221 - INTERMEDIATE INTENSIVE POLISH PITT/POLAND
- POLISH 0230 - ADVANCED INTENSIVE POLISH
- POLISH 0233 - ADVANCED POLISH IN POLAND

Slovak Studies Minor

Slovak Studies minor

An undergraduate minor in Slovak studies motivates students to continue with their language and culture studies in a meaningful way. This program would be particularly useful for students majoring in anthropology, political science, and history, many of whom focus their work on Slovakia or Central Europe and see Slovak language and culture as a gateway to the study of the area. Several of the graduates with considerable work in Slovak at Pitt have been offered jobs at the Pentagon, international nonprofit and nongovernmental organizations (NGOs), Radio Free Europe, and the U.S. Department of State.

Students who are interested in the minor may tailor their course selections according to the focus of their interest in the Slovak language or in Slovak culture.

Culture option

The Slovak Culture option requires 15 credits of coursework, distributed as follows.

Required courses

Both of the following courses are required for the Culture option.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2

Elective courses

Select three of the following courses.

- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0380 - SLOVAK TRANSATLANTIC CULTURES
- SLOVAK 0890 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM
- SLAV 1865 - THE YEAR COMMUNISM CRUMBLED

Language option

The Slovak Language option requires 15 credits of coursework in the Slovak language, distributed as follows.

Slovak language courses

All of the following courses are required.

- SLOVAK 0010 - ELEMENTARY SLOVAK 1
- SLOVAK 0020 - ELEMENTARY SLOVAK 2
- SLOVAK 0030 - INTERMEDIATE SLOVAK 3
- SLOVAK 0040 - INTERMEDIATE SLOVAK 4
- SLOVAK 0400 - ADVANCED SLOVAK 5

Department of Sociology

This is an exciting time of dramatic social change, both nationally and internationally. Global processes are integrating the world and creating the "global village." At the same time, old hostilities based on ethnic solidarity are re-emerging and tearing the social fabric of various parts of the world. The U.S. economy is undergoing structural change, which, in turn, is altering the occupational structure; the United States is becoming more multicultural, and the meanings of "community" are shifting. In these changes there are huge benefits for some and heavy costs for others. "Social problems" (e.g., health care availability, poverty, crime, or threats to the environment) are not marginal to societies but integral to them.

Sociologists try to understand these phenomena. For some, this means informing public policy; for others, the social world is simply one of the most interesting things to study. Sociologists study social organization. For some, this means examining societies-how they are structured, how they work, and how they change. Other sociologists study how small social groups work and how they change. This includes the social networks that people form as part of their social life. Issues of race, class, and gender affect the opportunities and constraints faced by different groups in society. Sociologists study how people belong to families, groups, and organizations-how people develop identities and how their social organizations become real. Sociologists also focus on broad patterns of social organization socialization, education, welfare, health care, etc. In short, the social world is endlessly fascinating.

For more information on the sociology major, the sociology minor, and the Department of Sociology, see www.sociology.pitt.edu.

Major

Sociology, BA

Major Requirements

A total of 27 credits in sociology and four credits in statistics, distributed as follows, are required for completion of the major.

Introductory course

Choose one of the following courses.

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Theory and Research courses

Complete both of the following courses.

- SOC 0230 - SOCIAL RESEARCH METHODS

- SOC 0150 - SOCIAL THEORY

Statistics course

Choose one of the following courses.

- STAT 0200 - BASIC APPLIED STATISTICS
- STAT 1000 - APPLIED STATISTICAL METHODS

Research Practicum

Students must complete the introductory, theory and research, and statistics courses before enrolling in the required research practicum.

- SOC 1500 - CAPSTONE RESEARCH PRACTICUM FOR MAJORS

Elective courses

Students are required to complete a minimum of 15 elective credits in SOC, six of which must be at the 1000 level. Internships and directed research do not count toward the six 1000-level elective credits.

Additional information

Grade requirements: A minimum GPA of 2.0 or higher in departmental courses is required for graduation.

Satisfactory/No Credit option: No more than six credits in SOC can be taken on an S/NC basis. After declaring the major, SOC 0150 and SOC 0230 may not be taken on an S/NC basis.

Writing (W) requirement: Students must complete at least one W-course in the major.

Honors major requirement: Honors in sociology is granted if in addition to fulfilling all requirements for the major, the student:

- maintained a GPA of 3.5 or above in SOC courses;
- maintained an overall GPA of 3.25 or above;
- completed SOC 0150 and SOC 0230 prior to completing a three-credit SOC 1002 honors seminar; and
- completed a three-credit SOC honors thesis, written under the direction of a faculty mentor.

The honors seminar, which is offered every fall term, and the honors thesis, which is offered every spring term, may replace six of the 15 required elective credits. Students pursuing the honors major are required to complete the same number of credits that are required for the standard major. For additional details, students are encouraged to consult with the undergraduate advisor.

Thematic cluster certificate: For sociology majors wishing to pursue specific themes within the discipline, the Department of Sociology currently offers five thematic clusters. Upon graduation, students who have completed three approved courses in one of these clusters will be awarded a certificate of achievement by the Department of Sociology.

- Global and Area Studies
- Social Movements / Inequality
- Race, Gender, and Sexuality
- The Helping Professions
- Health, Environment, and Technology

Internships: The Department of Sociology at the University of Pittsburgh is strongly committed to the career development of its students and sponsors a wide variety of strategic internships. Numerous local internship opportunities exist, involving childhood counseling and education, hospitals and healthcare, psychological and substance abuse counseling, criminal justice, business, law, and politics.

Courses for special programs

The Department of Sociology offers courses that are particularly suitable for the following special programs.

Pre-Law

- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0472 - INTRODUCTION TO CRIMINOLOGY
- SOC 0474 - SOCIETY AND THE LAW

Pre-Social Work

- SOC 0424 - SMALL GROUPS
- SOC 0438 - SOCIOLOGY OF THE FAMILY
- SOC 0460 - RACE AND ETHNICITY
- SOC 0471 - DEVIANCE AND SOCIAL CONTROL
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1413 - MARRIAGE
- SOC 1450 - HEALTH AND ILLNESS

Pre-Medical

- SOC 0312 - SCIENCE IN SOCIETY
- SOC 0475 - SOCIOLOGY OF AGING
- SOC 0477 - MEDICAL SOCIOLOGY
- SOC 1370 - GENDER AND HEALTH WORLDWIDE
- SOC 1450 - HEALTH AND ILLNESS
- SOC 1467 - TOPICS MENTAL HEALTH AND ILLNESS
- SOC 1488 - HISTORY MEDICINE AND HEALTH CARE

Gender, Sexuality, and Women's Studies

- SOC 0436 - SOCIAL ASPECTS OF SEXUALITY
- SOC 0446 - SOCIOLOGY OF GENDER
- SOC 1333 - COMPARATIVE PERSPECTIVES ON WOMEN
- SOC 1365 - RACE, CLASS, AND GENDER
- SOC 1448 - WORKING WOMEN

Minor

Sociology Minor

Minor Requirements

A minor in sociology requires the following distribution of courses for a total of 15 credits:

- SOC 0150 - SOCIAL THEORY
- SOC 0230 - SOCIAL RESEARCH METHODS
- An elective in sociology
- One elective upper-level sociology course (1000-2000)

One of the Following Courses

- SOC 0002 - SOCIOLOGY OF EVERYDAY LIFE
- SOC 0005 - SOCIETIES
- SOC 0010 - INTRODUCTION TO SOCIOLOGY

Department of Statistics

The field of statistics is concerned with ways of understanding variability in measurements. It is the science and art of making informed decisions in the face of uncertainty. Statistical reasoning is fundamental to research in many scientific fields. For example, probabilistic models of learning are used in education and psychology, and time series and regression models guide research in engineering, chemistry, economics, biology, and medicine. Recent high-profile court cases have shown the importance of the use of probability and statistics in law, especially in the fields of forensic medicine and DNA fingerprinting. Statisticians have also been instrumental in developing methods by which observations are obtained in many disciplines. Examples include randomized clinical trials in medicine and complex sampling surveys in social and political science. Probability and statistics are basic to the actuarial sciences. When lists are compiled of the most important scientific theories and discoveries of the last century, a substantial number of these developments are seen to be inherently statistical in nature.

The Department of Statistics offers course work leading to a Bachelor of Science degree in statistics, a minor in applied statistics, and a combined five-year bachelor and master's degree in statistics. The department also offers a wide array of introductory service courses for general undergraduate audiences that deal with statistical methods in applications (and which require only high school mathematics). A joint major in economics and statistics is also available. Interested students should consult the requirements listed under Economics. Students considering majoring in statistics should consult with a department advisor early in their studies, preferably during their freshman year. For more information on the major, other programs, and the Department of Statistics, visit www.stat.pitt.edu.

Joint Major

Statistics, BS/MA

Requirements for a Combined Five-Year Bachelor's and Master's Degree in Statistics

Admission to the program requires the approval of both the undergraduate and graduate directors. The minimum requirements for admission are:

1. Two letters of recommendation,
2. minimum high school GPA of 3.25 or top 10 percent of class, and
3. an SAT score of at least 1270 with a math score of at least 650.

Requirements for a Combined BS and MA in Statistics

1. Introductory Mathematics Courses:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1

2.

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT where STAT 1223 is a W (writing) course

3. Three Introductory Applied Statistics Courses from the Following List:

- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS

- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1241 - APPLIED SAMPLING
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1291 - TOPICS APPLIED STATISTICS 1
- STAT 1292 - TOPICS IN APPLIED STATISTICS 2
- STAT 1293 - TOPICS IN APPLIED STATISTICS 3
- STAT 1294 - TOPICS IN APPLIED STATISTICS 4

4. One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

5.

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

6.

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

7.

- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 2132 - APPLIED STATISTICAL METHODS 2

8.

- STAT 2381 - SUPERVISED STATISTICAL CONSULTING

9. Electives in Statistics:

Three additional courses, at least two of which must be graduate-level courses. STAT 2711 and 2712 are excluded, and courses at the 3000 level must be approved by the student's advisor

10.

One graduate-level course from outside of the department, chosen in consultation with the graduate advisor

11.

Master's pass on Preliminary Examination

Requirements for a Combined BS and MS in Statistics

Requirements one through 11 as above, except that requirement nine is reduced to one undergraduate or graduate course. In addition, the student must write and successfully defend a master's thesis.

- Grade requirement: Students in the program must earn at least a B grade in each required course as well as maintain a 3.25 GPA.

Typical Schedule

First Year:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT

Second Year:

- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- STAT 1200-level course
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- STAT 1200-level course

Third Year:

- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1200-level course
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS
- STAT 1300-level course

Fourth Year:

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 2131 - APPLIED STATISTICAL METHODS 1
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL
- STAT 2000-level course
- STAT 2132 - APPLIED STATISTICAL METHODS 2

Fifth Year:

- Take Comprehensive Exam
- STAT 2381 - SUPERVISED STATISTICAL CONSULTING
- Two STAT electives or master's thesis
- One outside graduate-level course

Comparison of Programs

Separately, the Bachelor of Science in statistics requires 50 credits, and the Master of science in applied statistics requires 33 credits, of which 21 must be graduate level. The combined program requires 69 credits, of which 18 must be graduate level.

Major

Data Science, BS

Data Science

The rapidly expanding collection of massive amounts of data is leading to transformations across broad segments of industry, science, and society. These changes have sparked great demand for individuals with skills in managing and analyzing complex data sets. Such skills are interdisciplinary, involving ideas typically associated with computing, information processing, mathematics, and statistics as well as the development of new methodologies spanning these fields. The undergraduate Data Science major establishes a framework to train University of Pittsburgh students to participate fully in this data revolution.

This major will allow students to gain skill sets that span key areas of statistics, computer science and mathematics, with foundational training providing literacy in four areas (data, algorithmic, mathematical, and statistical) that every student needs to master data science; the development of expertise that connects theory to the solution of real-world problems; and specialization towards more specific career focuses. Completing this major will prepare students to work as a data science professional or to pursue graduate study in a direction involving data in a significant way.

Program Requirements

The Data Science major requires the completion of 61 credits distributed as follows.

Foundational Courses

All of the following courses are required, except as noted.

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1

- MATH 0480 - APPLIED DISCRETE MATHEMATICS or
- CS 0441 - DISCRETE STRUCTURES FOR CS

- STAT 1060 - DATA SCIENCE FOUNDATIONS or
- CMPINF 1061 - FOUNDATIONS OF DATA SCIENCE

- STAT 1151 - INTRODUCTION TO PROBABILITY or
- STAT 1631 - INTERMEDIATE PROBABILITY

- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS or
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Expertise Courses

All of the following courses are required, except as noted.

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE

- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- STAT 1261 - PRINCIPLES OF DATA SCIENCE
- STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE or
- CS 1675 - INTRODUCTION TO MACHINE LEARNING

Specialization

Students will have the opportunity to pursue an area of specialization through the selection of elective courses in one of the targeted directions - Data Analytics, Modeling, Computer Systems, or Data in Context. Students should select three courses from the same category for optimum focus. However, students may choose courses from across the categories to suit their interests.

Data Analytics

Students pursuing a data analytics specialization will enhance their ability to make sound inferences and decisions using the science and art of learning from data: specifically, the design, collection, analysis, and interpretation of data in an uncertain world, and the communication of findings.

- CS 1671 - HUMAN LANGUAGE TECHNOLOGIES
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1231 - APPLIED EXPERIMENTAL DESIGN
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Modeling

Students pursuing a modeling specialization will enhance their ability to develop and harness theoretical tools to characterize structure within data and to represent and analyze processes that may underlie this structure.

- CS 1538 - INTRODUCTION TO SIMULATION
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1310 - GRAPH THEORY
- MATH 1360 - MODELING IN APPLIED MATH I
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Computer Systems

Students pursuing this specialization will gain depth of knowledge in the development, deployment, and analysis of the complex computer and information systems necessary for tackling large-scale data science problems

- CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS or
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS
- CS 1635 - INTERFACE DESIGN METHODOLOGY or
- INFSCI 2415 - INFORMATION VISUALIZATION
- CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS
- CS 2450 - PARALLEL COMPUTING
- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS

Data Science in Context

Students pursuing this specialization will gain depth of knowledge in both the technical and organizational aspects of the management, curation, description, preservation, and application of digital datasets of varying sizes in specific business, professional, or scientific contexts. We expect the collection of courses within the specialization to expand as more domain-specific data science courses begin to be offered across campus.

- LIS 2407 - METADATA
- LIS 2676 - RESEARCH DATA MANAGEMENT
- LIS 2679 - TECHNOLOGIES FOR DATA PRESERVATION AND DATA FORENSICS

Capstone

Select a capstone course, relevant to the chosen specialization, from the following list.

- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT
- STAT 1961 - STATISTICAL DATA SCIENCE IN ACTION
- Any faculty-guided research project, subject to approval by the Data Science program director(s).

Grade Requirements

Students must earn at least a C grade in each course required for the major.

Writing requirement

The writing requirement for Dietrich School students will be fulfilled by enrollment in the writing-intensive course CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY.

Statistics, BS

Requirements for a BS in Statistics

The statistics major requires a minimum of 50 credits, including the following required courses:

Required Course

- STAT 1000 - APPLIED STATISTICAL METHODS *

Note:

* With approval of the major advisor, students may substitute STAT 1000 under the following conditions.

- Complete STAT 0200 with a grade of B- or better; or
- Receive advanced placement for STAT 0200; or
- Complete STAT 1100 if the student is a Statistics-Business dual major.

All of the Following Courses

- STAT 1221 - APPLIED REGRESSION
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT
- STAT 1151 - INTRODUCTION TO PROBABILITY
- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Two of the Following Introductory Applied Statistics Courses

- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1251 - STATISTICAL QUALITY CONTROL
- STAT 1241 - APPLIED SAMPLING
- STAT 1251 - STATISTICAL QUALITY CONTROL

One Intermediate Applied Statistics Course from the Following List:

- STAT 1301 - STATISTICAL PACKAGES
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Both of the Following Courses

- STAT 1631 - INTERMEDIATE PROBABILITY
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

One Statistics Course from the Following List

- STAT 1651 - INTRODUCTION TO BAYESIAN STATISTICS
- STAT 1661 - LINEAR REGRESSION
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Mathematics Courses:

Choose one group.

Group 1

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

Group 2

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0235 - HONORS 1 - VARIABLE CALCULUS
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

One of the Following Courses

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- MATH 1180 - LINEAR ALGEBRA 1
- MATH 1185 - HONORS LINEAR ALGEBRA

Elective Courses

Because professional statisticians collaborate with other scientists, students are encouraged to take elective courses from the behavioral, natural, physical, and social sciences.

Additional Requirements

- **Grade requirements:** Students must earn at least a C grade in each course required for the major.
- **Satisfactory/No Credit:** Students may not take required courses on the S/NC option.
- **Writing requirement:** Courses in technical writing and public speaking are recommended.
- **Graduate study recommendations:** Students planning to continue their studies in a graduate program are strongly encouraged to take MATH 0413 - INTRO THEORETICAL MATHEMATICS, MATH 0420 - INTRO THEORY 1-VARIABLE CALCULUS, MATH 1180 - LINEAR ALGEBRA 1, and as many additional mathematics courses in advanced calculus, numerical analysis, and computer sciences as possible.
- **Departmental honors:** In order to qualify for departmental honors at graduation, students must:
 - have a GPA of at least 3.50 in all mathematics and statistics courses taken;
 - have a GPA of at least 3.70 in all 1000-level courses taken within the department; and
 - complete all other requirements for the statistics major.

Minor

Applied Statistics Minor

Requirements for a Minor in Applied Statistics

Professionals in many fields use statistical procedures regularly. Decisions based on numerical information or data, if the data are collected and analyzed properly, are typically better decisions. The minor in applied statistics was designed to give students additional statistical tools and a better understanding of statistical reasoning.

The minor in applied statistics requires 16 credits, consisting of the following courses

- STAT 1000 - APPLIED STATISTICAL METHODS
- STAT 1221 - APPLIED REGRESSION
- Three additional STAT courses at the 1200-level or higher

Note

- Acceptable substitutes for STAT 1000 - APPLIED STATISTICAL METHODS include STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT, ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1, and STAT 0200 - BASIC APPLIED STATISTICS.
- STAT 1223 - APPLIED REGRESSION WRITING COMPONENT does not count toward the minor.

Department of Studio Arts

The practice of art is among the oldest and most fundamental forms of human expression. The Department of Studio Arts provides the opportunity for students to explore the visual arts through foundation courses and through upper-level courses in painting, sculpture, drawing, printmaking, and graphic design. Studio activities are designed to intensify students' visual perception of the formal and expressive means of art, to develop understanding of a variety of technical processes, and to encourage insight into the significance of making art today. Course offerings of the department address the following goals:

- Provide a degree program for art majors who desire a liberal education and want to prepare for graduate art school or pursue a career in an art-related field;
- Provide a related area in studio arts for majors in other departments by taking the four foundation courses or by completing 12 credits in a specified studio area;
- Facilitate development of art-making skills and concepts through the foundation courses for all undergraduate students, while satisfying the Dietrich School creative expression requirement; and
- Provide a 15-credit minor in studio arts.

The Department of Studio Arts sponsors an annual student exhibition and a biannual faculty exhibition in the University of Pittsburgh Art Gallery. The University's Frick Fine Arts Library is one of the finest available. Also in close proximity is The Carnegie, with its museum and library providing access for research and study. For more information on the major, the minor, and the Department of Studio Arts, see <http://www.studioarts.pitt.edu/>.

Major

Studio Arts, BA

Major Requirements

The studio arts major requires the completion of 52 credits - 46 credits in studio arts, and six credits in art history, distributed as described.

Foundation Courses

- SA 0110 - VISUAL THINKING
- SA 0120 - PAINTING STUDIO 1
- SA 0130 - DRAWING STUDIO 1
- SA 0140 - SCULPTURE STUDIO 1
- SA 0180 - PHOTO STUDIO 1

Upper-Level Required Courses

- SA 1220 - PAINTING STUDIO 2
- SA 1230 - DRAWING STUDIO 2
- SA 1240 - SCULPTURE STUDIO 2
- SA 1260 - PRINT STUDIO: INTAGLIO
- SA 1270 - DIGITAL STUDIO: IMAGING
- SA 1370 - PREPARATION AND PRACTICE IN THE VISUAL ARTS
- SA 1600 - SENIOR SEMINAR

- SA 1604 - SENIOR EXHIBITION

Upper-Level Elective Courses

Students must take three courses from the following list, for a total of nine credits.

Directed study, internships, and undergraduate teaching assistantships are by permission only. Students must have completed at least 30 credits in Studio Arts courses. Students may apply up to three credits of internship or undergraduate teaching assistantship toward their major requirements.

- SA 1320 - PAINTING STUDIO: PROJECTS
- SA 1330 - DRAWING STUDIO: PROJECTS
- SA 1340 - SCULPTURE STUDIO: PROJECTS
- SA 1345 - SCULPTURE STUDIO: INSTALLATION
- SA 1365 - PRINT STUDIO: SCREENPRINT
- SA 1380 - DIGITAL STUDIO: VIDEO
- SA 1430 - DRAWING STUDIO: PERSPECTIVE
- SA 1450 - PAINTING STUDIO: FIGURE
- SA 1504 - DIRECTED STUDY: STUDIO
- SA 1900 - INTERNSHIP
- SA 1904 - UNDERGRADUATE TEACHING ASSISTANTSHIP
- HONORS 1542 - HONORS FIELD STUDIES IN WYOMING - STUDIO ARTS

History of Art and Architecture Required Courses

- HAA 0010 - INTRODUCTION TO WORLD ART

History of Art and Architecture Additional Courses

Students must take one of the two following HAA courses.

- HAA 0030 - INTRODUCTION TO MODERN ART
- HAA 0090 - INTRODUCTION TO CONTEMPORARY ART

Writing course requirement

Students must complete SA 1370 - PREPARATION AND PRACTICE IN THE VISUAL ARTS to satisfy this requirement.

Additional Requirements

- **Grade requirement:** Students must attain at least a 2.00 GPA in the major.
- **Satisfactory/No Credit option:** No department course that counts toward the major may be taken on the S/NC basis. Credit by exam is generally not available.
- **Departmental honors:** Students who earn a 3.50 GPA in the major and an overall 3.25 GPA receive departmental honors.
- **Senior art exhibition:** Seniors are expected to exhibit their work in the Annual Student Exhibition at the University of Pittsburgh Art Gallery.
- **Additional opportunities**
 - In addition to required courses, focus in a particular medium is possible through directed study. Internships are also available in art-related fields.
 - Majors may take special workshops and courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission. The department recommends that a student take no more than two studio arts courses in one term.

Courses for Non-Studio Arts Majors

All level-one core courses are open to non-art majors. Non-art majors may take level-two courses but must complete the prerequisites for the specific courses. Non majors may take special workshops and advanced courses when offered, but only if they have fulfilled the prerequisites, or by departmental permission.

Minor

Studio Arts Minor

Core requirements

The following requirements and restrictions apply to both options in the Studio Arts minor.

- All courses that count toward the minor must be taken for a letter grade.
- Only six of the 15 credits required for the minor may be transfer credits.
- The number of upper-level course sections offered per term is limited, as is the frequency of 1300-level and 1400-level courses. Course enrollment is based on availability as well as the completion of prerequisites.
- The Department of Studio Arts recommends that students complete SA 0110 - VISUAL THINKING and SA 0130 - DRAWING STUDIO 1 before enrolling in SA 0120 - PAINTING STUDIO 1 .
- Any Studio Arts course (except for SA 1604 - SENIOR EXHIBITION, SA 1600 - SENIOR SEMINAR and SA 1370 - PREPARATION AND PRACTICE IN THE VISUAL ARTS) can be used for minor credits.

Option 1

This option requires completion of 15 credits of coursework. Students must complete any five Studio Arts courses.

Option 2

This option requires completion of 15 credits of coursework. Students must complete any four Studio Arts courses, and a History of Art and Architecture course on any topic and at any level.

Total Credits: 15

Department of Theatre Arts

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these.

While the department is not a professional school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university.

The department recommends that students declare this major as early as possible. For more information, please contact the Director of Undergraduate Studies, Don Mangone at dmangone@pitt.edu.

Major

Theatre Arts, BA

The Department of Theatre Arts offers training in both the practical and academic aspects of theatre. Undergraduates may specialize in acting, directing, design and technical theatre, theatre history and criticism, or any combination of these areas. While the department is not a professional

school, the presence of strong graduate programs creates the atmosphere of professional training. Instead of the protected environment of a conservatory, undergraduate theatre training at Pitt takes place within the context of the liberal-arts experience at a large, urban university. The department recommends that students declare this major as early as possible. For more information, please contact the department's Director of Undergraduate Studies.

This major requires 42 credits of course work as follows.

Introductory course

- THEA 0810 - INTRODUCTION TO DRAMATIC ART

Performance courses

Choose three of the following courses.

- THEA 0804 - THEATRE AND COLLABORATION
- THEA 0830 - INTRODUCTION TO PERFORMANCE
- THEA 1100 - VOICE AND MOVEMENT 1
- THEA 1101 - VOICE AND MOVEMENT 2
- THEA 1102 - ACTING 1
- THEA 1103 - ACTING 2
- THEA 1104 - ACTING 3
- THEA 1110 - DIRECTING 1
- THEA 1111 - DIRECTING 2
- THEA 1229 - STAGE MANAGEMENT 1
- THEA 1338 - MUSICAL THEATRE PERFORMANCE
- THEA 1392 - SPECIAL TOPICS IN PERFORMANCE

Design/Technical courses

- THEA 0842 - INTRODUCTION TO STAGECRAFT
- THEA 0880 - THEATRICAL PRODUCTION
Students will take this course three times: once as Construction; and twice as Run Crew.
- THEA 1240 - COSTUME PRODUCTION AND TECHNOLOGY

Choose one of the following courses

- THEA 0840 - INTRODUCTION TO THEATRE DESIGN
- THEA 1230 - STAGE LIGHTING 1
- THEA 1235 - SCENE DESIGN 1
- THEA 1246 - COSTUME DESIGN 1

Playwriting, History, and Criticism

Choose two of the following courses

- THEA 1341 - WORLD THEATRE: 500 BC - 1640
- THEA 1342 - WORLD THEATRE: 1640 - 1890
- THEA 1343 - WORLD THEATRE: 1890-Present

The following writing-intensive course is required.

- THEA 1903 - SEMINAR IN THEATRE ARTS

Choose one elective from the Playwriting, History, and Criticism category

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0825 - CONTEMPORARY GLOBAL STAGES
- THEA 1341 - WORLD THEATRE: 500 BC - 1640
- THEA 1342 - WORLD THEATRE: 1640 - 1890
- THEA 1343 - WORLD THEATRE: 1890-Present
- THEA 1365 - PLAYWRITING 1 (writing-intensive)
- THEA 1366 - PLAYWRITING 2 (writing-intensive)
- THEA 1390 - NEW PLAY PRACTICUM

Elective course

Students must take one course selected from offerings in Performance, Design / Tech, or Playwriting / History / Criticism. Directed study (THEA 1480 - THEA 1485) and independent study (THEA 1900) courses cannot be used to satisfy this requirement.

Additional Requirements

- **Declaring the major:** Students are encouraged to declare this major early and register with the departmental advisor.
- **Grade requirement:** A minimum cumulative average of a C (2.0) or better in all departmental courses and any individual class required of the major must be at least a C- (1.75) or better.
- **Satisfactory/No Credit option:** Students must check with the program advisor to determine the appropriateness of using the Satisfactory/No Credit (S/NC) grade option in departmental courses. No more than two courses in the major may be taken on an S/NC basis.

For more information on the major and the Department of Theatre Arts, visit their Web site.

Minor

Theatre Arts Minor

Minor Requirements

Required Courses for the Minor

- THEA 0880 - THEATRICAL PRODUCTION : Run Crew

Choose two of the following courses

These courses cannot count for both the required course and the nine credits of theatre electives.

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0804 - THEATRE AND COLLABORATION

- THEA 0810 - INTRODUCTION TO DRAMATIC ART

Choose three courses from any remaining theatre courses listed.

- THEA 0505 - ENJOY PERFORMANCES
- THEA 0804 - THEATRE AND COLLABORATION
- THEA 0810 - INTRODUCTION TO DRAMATIC ART
- THEA 0825 - CONTEMPORARY GLOBAL STAGES
- THEA 0830 - INTRODUCTION TO PERFORMANCE
- THEA 0840 - INTRODUCTION TO THEATRE DESIGN
- THEA 0842 - INTRODUCTION TO STAGECRAFT
- THEA 0880 - THEATRICAL PRODUCTION
- THEA 1100 - VOICE AND MOVEMENT 1
- THEA 1101 - VOICE AND MOVEMENT 2
- THEA 1102 - ACTING 1
- THEA 1103 - ACTING 2
- THEA 1104 - ACTING 3
- THEA 1110 - DIRECTING 1
- THEA 1111 - DIRECTING 2
- THEA 1227 - SCENE PAINTING
- THEA 1229 - STAGE MANAGEMENT 1
- THEA 1230 - STAGE LIGHTING 1
- THEA 1235 - SCENE DESIGN 1
- THEA 1240 - COSTUME PRODUCTION AND TECHNOLOGY
- THEA 1245 - STAGE MAKEUP
- THEA 1246 - COSTUME DESIGN 1
- THEA 1338 - MUSICAL THEATRE PERFORMANCE
- THEA 1341 - WORLD THEATRE: 500 BC - 1640
- THEA 1342 - WORLD THEATRE: 1640 - 1890
- THEA 1343 - WORLD THEATRE: 1890-Present
- THEA 1365 - PLAYWRITING 1
- THEA 1366 - PLAYWRITING 2
- THEA 1390 - NEW PLAY PRACTICUM
- THEA 1391 - SPECIAL TOPICS: THEATRE DESIGN
- THEA 1392 - SPECIAL TOPICS IN PERFORMANCE
- THEA 1480 - DIRECTED PROJECT SCENERY/PROPS
- THEA 1481 - DIRECTED PROJECT COSTUME/MAKEUP
- THEA 1482 - DIRECTED PROJECT LIGHTING/SOUND
- THEA 1483 - DIRECTED PROJECT DIRECTING/PERF
- THEA 1484 - DIRECTED PROJECT BUSINESS MGT
- THEA 1485 - DIRECTED PROJECT STAGE MANAGEMENT
- THEA 1500 - MODERN ACTING
- THEA 1501 - SHAKESPEARE ACTING
- THEA 1903 - SEMINAR IN THEATRE ARTS

Urban Studies Program

While urban studies is not a department, it is an administrative unit offering a major in urban studies for students who have an interest in unraveling the complexities of the urban world. The major is interdisciplinary, meaning that students learn about cities as historical, social, cultural, economic, and political phenomena. The major is "real world" in the sense that students apply what they learn to the world beyond the classroom. Finally, the major is career oriented in that, after graduation, students attempt to find roles for themselves in the urban environment. To accomplish all of these

goals, the urban studies curriculum integrates "knowing" with "doing." The major combines courses offered by the program with courses offered through other social science departments. For more information, see www.urbanstudies.pitt.edu.

Distinction

Civic Learning Distinction

The primary goals of the Civic Learning Distinction are to provide students with a mechanism to gain recognition and credit for their outside-the-classroom work and to broaden the number of Pitt undergraduate students participating in civic learning and community engagement activities on and beyond campus.

Courses

Relevant courses will introduce students to the core principles of civic learning and engagement, and provide them with the skills needed for ethical, impactful, and engaged work. Students need to complete 3 courses for the distinction.

Civic Learning Distinction course requirements:

- Six (6) academic credits from Civic Learning courses. 1) Introduction to Urban Studies (URBNST 0010); 2) any other Civic Learning course.
- Three (3) academic credits from a Civic Learning + Engagement course.

High-Impact Activities (Minimum of Three Activities)

These activities should enrich the student's academic pursuits and provide opportunities to apply their knowledge and skills to pressing civic challenges. Please confirm your High Impact Activities with the PittServes Civic and Community Advising Program Manager. Each of the three activities must come from a different category. Activity categories include:

- Completion of the OCC Civic and Social Engagement goal area.
- Leadership role in a student organization that reflects a civic learning outcome (other community groups will be considered with approval by the Manager of Advising).
- A civic-learning related internship or fellowship.
- A civic-learning research project or other significant research experience (i.e. B.Phil).
- A civic-learning related study abroad or alternative break experience.
- Participation in the Civic Learning-Living Community.

Reflection Essay

Students should reflect on and share how the above courses and activities collectively contributed to their overall personal and professional development in a 1,500-to-2,000-word reflective essay. Students should provide examples of how these experiences enabled them to apply academic knowledge and skills to important issues that affect the civic life of a community.

Tracking

Students interested in completing the Civic Learning Distinction will complete an online application form. Student progress will be tracked through an e-Portfolio that students design to showcase their Civic Learning work. A committee including the PittServes Civic and Community Advising Program Manager and Urban Studies faculty will review and approve completed e-Portfolios once per semester.

Major

Urban Planning & Geographic Analysis, BS

The **BS in Urban Planning and Geographic Analysis**, offered through the University of Pittsburgh's Urban Studies Program but drawing on the existing courses and faculty expertise of Dietrich School and College of General Studies programs, provides an interdisciplinary curriculum with key connections to a wide range of disciplines. The major offers students the opportunity to study the theoretical and technical foundations of urban planning and geographical analysis and is designed for students seeking credentials and specialization in urban planning, or who wish to use geographical analysis as part of their future careers. The degree is designed to provide an educational pathway that is distinct from the **BA in Urban Studies**, yet there are sufficient complementarities for a student wishing to double-major in both degrees. The structure of the UPGA degree is designed to prepare students for graduate study in planning or geography, or for careers directly after graduation that rely on baccalaureate-level training in the conceptual and methodological foundations of these fields.

The structure of the UPGA degree is designed to prepare students for further graduate study in planning or geography with degree requirements that follow the guidelines set for undergraduate planning degrees by the Planning Accreditation Board. There is no intention to pursue accreditation for the new major since the strength of the proposed degree is the unification of planning and geographical analysis tools within the same degree. The new degree follows PAB curriculum and instruction guideline to ensure that our graduates are well-positioned for entry into graduate schools of planning.

The curriculum provides for a course of study that trains students in essential concepts and skills in several areas:

1. General Knowledge in Urban Planning & Geographic Analysis
 1. Purpose & History of Urban Planning & Geographic Analysis
 2. Human Settlements & History of Planning
 3. Understanding The Future
 4. Global Dimensions of Planning
 5. Key Issues: Sustainability, Housing Affordability, & Social Equity
2. Skills in Urban Planning & Geographic Analysis
 1. Research
 2. Written, Oral, & Graphic Communication
 3. Quantitative & Qualitative Methods
 4. Principles of Public Administration & Planning
 5. Data Visualization
 6. Raster & Vector Geographic Information Science
3. Values and Ethics
 1. Professional Ethics and Responsibility
 2. Equity, Diversity, and Social Justice
 3. Governance and Participation
 4. Sustainability and Environmental Quality
 5. Growth and Development
 6. Health and Built Environment

[1] See Planning Accreditation Standards and Criteria, accessed at <https://www.planningaccreditationboard.org/index.php?id=30>

Core Sequence (15 credits)

15 credits (5 courses) that introduce students to the practice of urban planning and geographic analysis through interdisciplinary perspectives.

- ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT
- PUBSRV 1130 - PLANNING IN THE PUBLIC SECTOR
- URBNST 0030 - INTRODUCTION TO GIS
- URBNST 0114 - URBAN SUSTAINABILITY
- URBNST 0300 - REMAKING CITIES THROUGH POLICY AND PRACTICE

Conceptual Approaches to Planning & Geographic Analysis (12 credits)

12 credits from this sequence must include at least 1 Urban Studies (URBNST) class from this list, and at least 2 classes from different departments. These courses emphasize the conceptual approaches to planning and geographic analysis. A B- average across these courses must be obtained before enrolling in the Urban Planning and Geographic Analysis (URBNST 1000) capstone.

- ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM
- ENGCMP 0565 - WRITING PLACES
- HIST 1135 - BERLIN: HISTORY OF A EUROPEAN METROPOLIS
- HIST 1157 - HISTORY OF MAPS AND SPATIAL REPRESENTATION
- HIST 1669 - HISTORY OF BLACK PITTSBURGH
- PS 1252 - STATE GOVERNMENT
- PS 1261 - AMERICAN PUBLIC POLICY
- URBNST 0010 - INTRODUCTION TO URBAN STUDIES
- URBNST 0112 - SOCIAL JUSTICE AND THE CITY
- URBNST 0320 - RENT, BUY OR SQUAT: HOUSING AND PROPERTY IN US CITIES

Methodological Approaches to Planning & Geographic Analysis (9 credits)

9 credits from this sequence must include at least 1 Urban Studies (URBNST) class from this list, and at least 2 classes from different departments. These courses emphasize the methodological approaches to planning and geographic analysis.

- ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION
- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS
- PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA
- PUBSRV 0030 - PUBLIC POLICY PROCESS
- PUBSRV 1100 - PRACTICES IN PUBLIC ADMINISTRATION
- STAT 1000 - APPLIED STATISTICAL METHODS
- URBNST 0130 - APPLIED GIS
- URBNST 0160 - DATA VISUALIZATION
- URBNST 0340 - URBAN MOBILITY AND TRANSPORTATION ANALYSIS

Capstone Project (3 credits)

The senior capstone may only be taken after completing the Core, Conceptual, & Methodological sequences of the major. This writing-intensive capstone experience involves a community-engaged project that draws upon the students' knowledge of urban planning and geographic analysis.

- URBNST 1000

Total Credits: 120

Urban Studies, BA

The Urban Studies Program offers a major for students who have an interest in unraveling the complexities of the urban world. The major is interdisciplinary, meaning that students learn about cities as historical, social, cultural, economic, and political phenomena. The major is real world, meaning that students take this learning with them and apply it to the world beyond the classroom. Finally, the major is career-oriented, meaning that students attempt to find a role for themselves in the urban environment. To accomplish all of these goals, the Urban Studies Program has designed a curriculum which integrates knowing with doing. The urban studies major combines courses offered by the program itself with courses offered through other social science departments. Students are encouraged to take URBNST 0010 Introduction to Urban Studies as early as possible, ideally in the fall or spring of the freshman year, and to develop a broad background in the social sciences among lower-level social science courses.

The Urban Studies major requires the completion of 36 credits distributed as follows.

Major Requirements

Core courses

All of the following courses; these courses should be completed early in the student's academic program

- URBNST 0010 Introduction to Urban Studies
- URBNST 0030 Introduction to GIS
- URBNST 0050 Introduction to Urban Research
- URBNST 0070 Urban Social Theory

Intermediate Electives

Students must take at least four courses according to the following guidelines.

Urban Studies courses

At least two of the following Urban Studies courses.

- URBNST 0100 World Urban Patterns
- URBNST 0108 Urban Economic Geography
- URBNST 0112 Social Justice and the City
- URBNST 0114 Urban Sustainability
- URBNST 0120 Urban Geography
- URBNST 0130 Applied GIS
- URBNST 0140 Crime and Punishment
- URBNST 0150 GIS & Community Data
- URBNST 0160 Data Visualization

Other electives

At least one of the following courses

- URBNST 0200 Internship
- URBNST 0400 'Global City' Study Abroad Courses
- URBNST 0413 Sustainable Cities 1
- URBNST 0415 Sustainable Cities 2
- URBNST 0600 Independent Research
- URBNST 0810 Field Analysis of Global Urbanism
- URBNST 0820 Advanced International Field Placement
- ARC 0110 Approaches to the Built Environment
- COMMRC 1103 Rhetoric and Culture
- ECON 0230 Introduction to Public Economics
- ENGLIT 0628 Working Class Literature
- FR 0017 Paris: Urbanism Past and Present
- HIST 1019 Cities in Historical Perspective
- PUBSRV 0030 Public Policy Process
- SOC 0444 Urban Sociology

Advanced Electives

Advanced elective courses

Students must take three courses according to the following guidelines.

Urban Studies courses

Advanced Urban Studies courses; choose two courses

- URBNST 0300 Remaking Cities
- URBNST 0320 US Housing & Property
- URBNST 0340 Urban Ethnography
- URBNST 0360 International Urbanism
- URBNST 0380 Field Research Seminar
- URBNST 0710 Urban Culture: Special Topics
- URBNST 0750 Urban Methods: Special Topics
- URBNST 0770 Urban Theory: Special Topics

Other electives

Advanced courses from another discipline; choose one course.

- ANTH 1530 Origins of Cities
- ARC 0300 Intro to Historic Preservation
- ARC 1180 World Cities
- ARC 1181 Pittsburgh Arch. & Urbanism
- HIST 1135 Berlin: History of a European Metropolis
- JS 1160 Jerusalem: History and Imagination
- PS 1251 Urban Government and Politics
- PUBSRV 1100 Practices in Public Administration
- SOC 1286 Race and the City
- SOCWRK 1000 Introduction to Social Work
- SOC 1476 Urban Policy and Planning

Capstone course

- URBNST 0900 Urban Studies Research Seminar

Additional Requirements

Grade requirements: A minimum GPA of 2.0 in departmental and concentration courses is required for graduation.

Satisfactory/No Credit option: There is no limit to the number of courses in the major that can be taken on an S/NC basis.

Writing requirement: Students must complete one W-course in the major. URBNST 0900 Urban Studies Research Seminar fulfills this requirement.

Study abroad: It would be desirable for students to add an international dimension to their undergraduate education through their participation in a study abroad program.

Urban Students Association: The Urban Students Association (U.S.A.) is an official student organization formed by students in the Urban Studies Program. Through U.S.A., students have been actively involved in issues related to the major throughout the Pittsburgh region. U.S.A. has invited guest speakers to appear on campus, organized field trips, and participated in numerous community projects.

Admission through the Office of Admissions and Financial Aid

The following students are admitted to Dietrich School by the Office of Admissions and Financial Aid. Please visit <https://admissions.pitt.edu> for more information.

- First-year students (see Pittsburgh campus First-Year Student Admissions for general admissions information).
- Transfer students who have previously enrolled at a college or university other than the University of Pittsburgh. These include former University of Pittsburgh students who have since earned college credits at another institution and now wish to return to the Dietrich School.
- Continuing education students: Adults who wish to begin or continue to work toward an undergraduate degree by taking a full- or part-time course load should apply as new or transfer students through the Office of Admissions and Financial Aid.
- Students who have previously earned a bachelor's degree from an institution other than the University of Pittsburgh and now wish to earn a second undergraduate degree.
- International students should refer to admission guidelines on the Office of Admissions and Financial Aid Web site.

Audit (N Grade)

To audit a course, a student must register for and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the grade option change deadline noted each term on the Dietrich School undergraduate calendar. The instructor for the course must sign the Grade Option/Audit Request form before the form can be processed. Completed forms must be submitted to the Office of Student Records. Students who audit a course are given an N grade, which means that the course is counted neither towards graduation nor the GPA. A student typically chooses to audit a course for personal enrichment.

G Grades

At the discretion of an instructor, a G grade may be awarded when students who have been attending a course and making regular progress are prevented from completing the course due to extenuating personal circumstances. Students who are assigned a G grade are required to complete course requirements no later than one year after the term or session in which the course was taken, or by an earlier deadline established by the instructor. After that year, the grade will automatically change to NG; an NG grade cannot be changed, and the credits will no longer appear as "in progress." The student will be required to re-register for the course if it is needed to fulfill requirements for graduation. The Dietrich School encourages students with G grades to work with their instructors to complete the requirements for the course as soon as possible.

Normal Credit Load

A normal credit load is 12 to 18 credits per academic term (e.g. fall and spring). Students should complete a minimum of 15 credits per term in order to graduate within four years.

Any term in excess of 18 credits requires the recommendation of the student's academic advisor and approval from an assistant dean. Call 412-624-6480 to make an appointment with an assistant dean. Students who enroll for more than 18 credits in a term will be charged additional tuition per credit.

Relocation from University of Pittsburgh Regional Campuses

1. For students seeking guaranteed relocation who have earned credits only from one of the regional campuses, the normal requirement is for completion of 45 credits at the specific regional campus, with a minimum GPA of 3.0.
2. For students seeking guaranteed relocation who have earned 30 or more credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 in all courses is required.
3. For students seeking relocation who have between 15 and 30 credits at the specific regional campus and a total of 45 credits overall, a minimum GPA of 3.0 is required in all courses, and the normal requirements of the Dietrich School of Arts and Sciences for external transfer students must be met. For these students, relocation is not guaranteed. Students must complete at least 15 credits at the regional campus to transfer to the Pittsburgh campus.
4. All students must complete the Algebra and Composition skills requirements before relocating from a regional campus.

Repeating a Course/Duplication of Course Content

If a student repeats a course, they must complete a course repeat form and submit it to the Office of Student Records. Please note the following.

- The original grade remains on the transcript, but is not counted in the calculation of the GPA.
- Any grade earned in the repeated course will be factored into the GPA, even if it is lower than the original grade.
- The repeated course does not increase the number of credits counted toward meeting degree requirements unless an F is replaced by a passing grade.
- W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the GPA. Incomplete (G) grades will not be identified as repeated courses until the course work is completed.
- No sequential course may be repeated for credit after a higher numbered course in that sequence has been passed with a C or higher grade.
- No course can be repeated at any other institution.
- Students may repeat a course no more than two times.

Students may not earn duplicate credit for courses that substantially duplicate the content of courses taken previously. For example, duplicate credit cannot be earned for the following:

- Both a regular version of a course and an honors version of that course.
- Courses that are cross listed with a course the student has already taken.
- Courses taken under a newly assigned course number if already taken under an old course number.
- Certain specific courses that duplicate material.

Students with questions about repeating courses or duplicating course content should consult with their academic advisors.

Students Seeking a Second University of Pittsburgh Degree

Students who have earned a bachelor's degree in any University of Pittsburgh school or campus and wish to earn a second undergraduate degree in the Dietrich School should apply directly to the Dietrich School. Applicants should note the following:

- Course work for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate course work from the first degree will apply to the second degree.
- Students must earn a minimum of 30 new credits. No coursework repeated from the first degree will count toward the second degree.
- At least half of the credits for the second major toward the second degree must be earned while enrolled in the Dietrich School.
- The cumulative GPA and credit total will be based on all credits from the first degree and all new course work taken that applies to the second degree.

Students Seeking Reinstatement

The following students must apply for reinstatement through the Dietrich School of Arts and Sciences.

- Dietrich School students who have not enrolled for three consecutive terms (one calendar year);
- Dietrich School students who have completed their suspension periods and wish to continue their studies; and
- Students who last attended another school at the Pittsburgh campus but have not enrolled in classes for three consecutive terms (one calendar year), have not attended another institution, and wish to be admitted to the Dietrich School.

Students who are returning after completing their suspension period will be reinstated on probation.

The deadline for reinstatement is August 15 for the fall term, December 15 for the spring term, and one week before the beginning of classes in the summer term or summer session. Students who last attended another University of Pittsburgh school on the Pittsburgh campus or who attended a regional campus must meet the admissions requirements for transfer to the Dietrich School. Students' academic standing upon reinstatement will continue to be that attained at the end of their last term in residence.

Students who are reinstated for a particular term but do not enroll for that term must apply for reinstatement again if they wish to attend for a later term. Students who have been away from the University for two or more years will be subject to the requirements of the school and of their major at the time of their reinstatement, rather than those in place at the time of their last attendance.

Study Abroad

Dietrich School students are encouraged to add an international dimension to their undergraduate education through study abroad. Credit may be earned toward the Dietrich School degree through participation in one of several University of Pittsburgh programs or consortia-sponsored programs. Students may study in virtually any part of the world in these programs or others sponsored by most American or international institutions.

Visit the Study Abroad Web site at www.abroad.pitt.edu for more information.

Summer Courses Taken Elsewhere

Dietrich School students in good academic standing (cumulative GPA of at least 2.00) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from the Dietrich School Office of Student Records. Students must submit a completed summer course approval form (available on the Student Records Web site), as well as the relevant course descriptions to the Office of Student Records. Students may not repeat any course taken at the University of Pittsburgh (passed or failed) at another institution. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere.

Note that students who have earned 90 credits or more must meet with an assistant dean for approval to take summer courses elsewhere.

Transfer Students/Transfer Credits

Previous course work for transfer students is evaluated by the Dietrich School Office of Student Records with respect to general education requirements. Before initial registration, transfer students receive an Undergraduate Degree Requirement Evaluation indicating which requirements they have satisfied and which ones must be completed in order to complete their degree in the Dietrich School.

Courses from other colleges and universities are evaluated according to the following guidelines:

- Courses must be passed with a grade of C or better and must be earned at an institution accredited by the appropriate regional accrediting association. Courses that have reasonable counterparts at the University are eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- A maximum of 60 credits can be accepted from accredited community colleges and two-year junior colleges. A maximum of 90 credits can be accepted from accredited four-year institutions. All students must earn their final 30 credits toward a Dietrich School degree and at least half of the credits for their majors, minors, and/or certificates while enrolled as a Dietrich School student.
- The number of transfer credits granted for a given course cannot exceed the number awarded on the transcript of the original school or the number earned for the corresponding course in the Dietrich School. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- The Dietrich School accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation, but will not be calculated into the student's GPA at the University of Pittsburgh.
- Transfer credits do not apply towards University honors.

Please contact the Dietrich School Office of Student Records at 412-624-6480 for information about transfer credit evaluation. Please note: All transfer credits may be subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Transfers from Other University of Pittsburgh Schools at the Pittsburgh campus

To transfer to the Dietrich School from another school at the Pittsburgh campus, students should request that the other Pittsburgh campus school send their records to the Dietrich School. The Dietrich School will review the student records and send letters of acceptance to students who are eligible to transfer into the Dietrich School. To qualify, students must have a minimum overall GPA of 2.0 and have completed their basic skills requirements in composition and algebra according to Dietrich School guidelines. In addition, students enrolled in the College of General Studies (CGS) must earn at least 12 credits through CGS before applying for transfer to the Dietrich School.

Upon acceptance into the Dietrich School, students will receive evaluations of their previous course work, acknowledging the courses that have fulfilled Dietrich School skills and general education requirements. To graduate with a degree from the Dietrich School, students are required to earn their last 30 credits while enrolled in the Dietrich School and to earn at least half of the credits for their majors, minors, and certificates while enrolled in the Dietrich School.

Dietrich School of Arts and Sciences Faculty

Last Name	First Name	Rank	Department	Highest Degree	Conferring Institution
Brooks	Robin	Assistant Professor	Africana Studies	PhD	Florida, University of

School of Computing and Information

- Admission Requirements and Deadlines
- Academic Regulations and Standards
- Academic Integrity
- Academic Honors
- Academic Standing
- Bachelor's Degree Requirements
- Graduation
- Special Academic Programs/Opportunities
- School of Computing and Information Faculty
- Programs and Course Offerings

The University of Pittsburgh's School of Computing and Information (SCI) opened on July 1, 2017, building upon the traditions of excellence embodied by the Department of Computer Science and School of Information Sciences. SCI aims to position the University as a leader in preparing students for this increasingly-interconnected world by providing students with excellent disciplinary foundations and training to support our mission to make the world a better place through polymathic education and the science of interacting systems. Our degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. We foresee a future with increased opportunities to expose our students to a multidisciplinary approach to knowledge creation, information management, and computing; expanded experiential learning opportunities; and extended career networks.

SCI represents the confluence of computing and information along with diverse academic disciplines, serving as a valuable resource to researchers, students, and organizations across the University and around the world. SCI is a new school for a new era of research and learning, one in which the power of information and computing will accelerate knowledge discovery and creativity.

Regulations and Appeals

The School-level regulations set forth in the following document apply to students who were admitted to the University of Pittsburgh during the 2023-24 Academic Year. Students admitted prior to this academic year should refer to the Archived Catalogs for the regulations governing their undergraduate studies.

Undergraduate students may opt into a newer set of School-level policies and degree requirements and newer major-level requirements. Note that, students electing into a new set of requirements may only opt into School and major requirements of the same year. In order to elect into new requirements, the student must meet with their advisor to discuss the process. The decision to opt into newer requirements is final and may not be reverted.

Students who believe that a decision about their academic program has been made on the basis of incomplete or incorrect information may appeal the decision. Appeals regarding School of Computing and Information policies can be prepared and submitted by following the guidelines listed on SCI's Student Appeals webpage. Appeals regarding Department/Program policies should be directed to the appropriate Department/Program.

Contact Information

Mailing address for the Office of the Dean and other SCI administrative offices:

*University of Pittsburgh
School of Computing and Information
Office of the Dean
135 North Bellefield Avenue
Pittsburgh, PA 15260*

Detailed contact information for all departments, offices, and staff can be found on the SCI "Contact Us" web page.

Admission Requirements and Deadlines

SCI is a four-year undergraduate school, admitting its first-year students through the Office of Admissions and Financial Aid (OAFA) website. Applicants interested in beginning their studies at SCI as a first-year, non-transfer student should refer to the OAFA website for application prep checklists, access to the application, deadlines, etc.

To be considered for admission, transfer* or a second Pitt bachelor's degree, applicants must:

- Complete at least 24 credits with a GPA of at least
 - 2.75 (Pittsburgh campus) or
 - 3.00 (Regional campuses, second Pitt bachelor's, and external transfers)
- Finish the equivalent of the First-year SCI Curriculum with grades of "C" or better in each course. The first-year SCI curriculum must minimally include the SCI quantitative mathematics and statistics requirements, programming, and introductory composition. Completion of the "Big Ideas in Computing and Information" course (CMPINF 0010) is strongly recommended for Pittsburgh campus internal transfer applicants.

Refer to the SCI Undergraduate Admissions webpage for courses offered at the University of Pittsburgh that satisfy each component of the first-year curriculum. External courses will be considered with regard to their similarity to our locally-approved courses.

- Sample courses of study within SCI can be found within the catalog pages for individual majors offered within the school.

Please note that these GPA requirements are for consideration only. Individual undergraduate programs reserve the right to close admission to a major once capacity has been reached. Preference will be given to students ready to declare a major (major eligibility requirements).

*Pittsburgh and regional campus (i.e., internal) transfer applicants should note that the criteria listed above apply only to students admitted to the University of Pittsburgh in Fall 2019 or later. Internal transfer applicants admitted prior to Fall 2019 must be admissible directly to a major (major eligibility requirements) and meet the admissions criteria outlined in the Catalog published in their University admit term in order to be considered for admission to SCI (see the Archived Catalogs).

To determine the category of applicant you fall under and to find the related application procedures, please refer to the Applicant Types and Related Policies section of the SCI Catalog.

Application Deadlines

Applications must be received by SCI by the deadlines listed on the School's Undergraduate Admissions webpage. Applications received after the deadlines will not be reviewed.

Review Timeline and Admissions Notifications

Applications for internal transfer are reviewed by an admissions committee during specific review periods. Where applicants have completed the minimum required credits and have earned a grade in each of the first-year SCI courses by the admissions deadlines, decisions are made prior to the enrollment period for the upcoming admit term in order to accommodate advising and enrollment in SCI. Note, for the fall term, the early deadline is reserved for applicants who completed all required credits and courses before March. Meeting the early deadline for the fall will result in students receiving an admissions decision prior to the fall term enrollment period; the final deadline and admissions review period take place during the fall open enrollment period. The fall term final deadline accommodates applicants who are completing required credits and courses in the spring term.

Applicants' grades must be posted for the courses required for admission in order for the application to be considered complete.

Incomplete applications, where grades are not posted for admissions pre-requisite classes by the stated final deadline, in-progress courses, and other courses lacking grades as they appear in the application materials, will be sent application rejection notices during the standard notification timeframe.

Applicants should receive a decision email one to two weeks after the published review period on the Undergraduate Admissions webpage. Applicants should monitor their email, including spam/quarantined messages, regularly during the notification periods mentioned above.

All applications for external transfer (second-degree, non-Pitt; first-degree transfer; and readmission), including the associated evaluation of coursework taken at other colleges and universities, will be reviewed by SCI Academic Records in conjunction with departmental faculty and the Office of Admissions and Financial Aid. Decisions are made in accordance with the timelines noted on SCI's Undergraduate Admissions webpage and notifications will be sent by the Office of Admissions and Financial Aid. Students will later receive an evaluation of transfer credits and a welcome email from the School.

Admitted students **must accept their offer of admission via the Pitt PSMobile application** by the last day of the add/drop period of their admissions term. Admission to SCI is term-specific. If admitted students do not accept their offer by the deadline for their admit term, they must reapply and are not guaranteed admission at a later date. Additionally, admitted students are not able to enroll as a student in SCI prior to their admit term.

Applicant Types and Related Policies

The following types of applicants must adhere to the stated admission criteria but should also be aware of policies and procedures specific to their situation.

Admission of Students from Other Countries

Applicants are required to submit original (or certified) official secondary school records; literal translations of your records if they are not in English; and an official credential evaluation of all international documents (transcripts, marksheets, certificates, examination results, etc.) from an approved evaluator. See details on the OAFA webpage for International Transcript Evaluation. The application process should be started 9 to 12 months in advance of the intended enrollment date.

An applicant whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and submit official test results.

For more information on international student applications, including TOEFL requirements and exceptions, refer to OAFA's international student admissions webpage.

Second Bachelor's Degree

First degree earned at Pitt

Students who have already earned an undergraduate degree at the University of Pittsburgh with a minimum GPA of 2.75 and who are returning to complete a second degree in a major offered through SCI will be considered for admission.

Students who fall into this category should apply directly to the School of Computing and Information. Applicants should note the following:

- Coursework for the second degree will continue to be recorded on the original University of Pittsburgh undergraduate transcript.
- All appropriate coursework from the first degree will apply to the second degree.
- The cumulative GPA and credit total will be based on all credits from the first degree and any new coursework completed that applies to the second degree. Courses repeated from the student's first Pitt degree will not be removed from the student's cumulative GPA or credits.
- Students must earn a minimum of 30 new credits. At least half of the major credits must be earned at the University of Pittsburgh.

First degree earned at another institution

Students who completed a degree at another institution submit a Transfer Application and supporting materials to the Office of Admissions and Financial Aid.

Post-baccalaureate and Guest Students

Students who have completed an undergraduate degree and wish to take additional undergraduate courses on a non-degree-seeking basis (post-baccalaureate) or students who are students enrolled in an undergraduate degree program at another university who plan to take courses for credit at the University of Pittsburgh with the intention of transferring those courses back to their home institution (guest students) should apply directly to the College of General Studies (CGS). Eligibility and application instructions are available on the CGS website.

Non-degree-seeking status at CGS is not encouraged for students interested in later applying for an internal transfer to SCI. Instead, these students should apply directly to SCI as first-year students through the OAFA website.

Pittsburgh and Regional Campus (Internal) Transfer

Students in Pitt's undergraduate schools or regional campuses at the University should initiate the process of transferring into SCI by submitting an Undergraduate Academic Program / Plan Add / Change form to their current campus's Records Office or other administrative centers. Students currently on inactive status in the school of last registration must first be reinstated in that school before the transfer process can be completed.

Note: All credits and previously approved exemptions to academic requirements will be re-evaluated by SCI. In some instances, this may mean that not all transfer credits or previously approved exemptions or waivers will be accepted or applied toward a student's SCI career. All credits will be subject to the transfer credit policies listed in this Catalog.

First-degree Transfer from External Institutions

Students at other institutions who wish to apply for admission as transfer students to the School of Computing and Information should submit a Transfer Application and supporting materials to the Office of Admissions and Financial Aid.

Readmission

Students who previously attended the University of Pittsburgh before attending another institution and who wish to return to the University are considered transfer students and must reapply following the guidelines for transfer students. Such students should submit a Transfer Application and supporting materials to the University's Office of Admissions and Financial Aid.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Readmission and Reinstatement section of the SCI Catalog page.

Reinstatement

Students who have left the School of Computing and Information for one calendar year or more (whether of their own volition or as a result of a suspension), who did not complete work at another institution, and who wish to continue their studies must apply for reinstatement.

For more details regarding the different definitions and regulations for readmitted and reinstated students, see the Readmission and Reinstatement section of the SCI Catalog.

Evaluation of Transfer Credits

Previous coursework for transfer students is evaluated by SCI Academic Records with respect to general education requirements. As well, SCI Academic Records liaises with Departments and Programs to ascertain transfer credit for major-specific course requirements. Before initial registration, all students who have accepted their offer of admission will have access to an Academic Advisement Report that illustrates the requirements that they have satisfied, and which requirements remain to be satisfied in order to complete their degree.

After receiving SCI evaluation of transfer credits, a student may petition for a re-evaluation of courses within the first two terms after matriculation into the School. A student must submit all petitions to transfer or substitute courses taken prior to enrollment at the same time. SCI Academic Records will confer with faculty to evaluate the merit of these petitions.

Transfer credits are subject to the following conditions:

- Courses that have a reasonable counterpart in the curricula of the various Schools/Departments of the University of Pittsburgh are eligible for transfer. Courses must be passed with a satisfactory grade (minimum of C or equivalent). Courses taken on a satisfactory/no credit (or similar nomenclature) grading system will only be transferred if the passing grade is equivalent to a C or better. Transfer course grades are recorded as T grades and are not used in computing a student's GPA, determining probationary status, or determining eligibility for graduation honors. Transfer credits must be in compliance with the University's Academic Regulations and may not be a repetition of any course previously taken (passed or failed) at the University of Pittsburgh.
- An official transcript of all courses taken at other institutions must be submitted at the time of application, whether or not it is intended that such courses be counted toward the degree. All students who are requesting transfer credit for approved summer or special session coursework, they must submit an official transcript as soon as the course grade is available. No transfer credits will be posted to a University of Pittsburgh transcript without an official transcript from the originating institution.
- No more than 90 credits may be transferred from a four-year institution, and no more than 60 credits may be transferred from a two-year institution with a combined total of no more than 90 transfer credits posted to a student's transcript. No transfer credits will be transferred to a student's record during or after the term in which they exceed a total of 90 earned credits.
- The number of credits granted for a course cannot exceed the number on the transcript from the institution where they were earned nor exceed the number to be earned in the corresponding course at the University of Pittsburgh. Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits). Converted credits are rounded down to the nearest half.
- If a course is repeated for which advanced standing credit (AP test credit or other) has been granted, the advanced standing credit is canceled. This is monitored once per academic year and it is the student's responsibility to discuss course repeats- including those equivalent to advanced standing credit- with their advisor.
- Current students may also transfer in summer or special session credits from another institution with documented approval from SCI's Office of the Dean. These credits must follow the aforementioned regulations.

Transfer Guides / Articulation Agreements

The School of Computing and Information utilizes the transfer guides and articulation agreements published by the Office of Admissions and Office of the Provost when evaluating transfer credits. Students considering a transfer to the School should consult with the Pitt Transfer Tool and other resources on OAFA's Transfer Student webpage.

Advanced Standing

In addition to the aforementioned transfer credit options, the School of Computing and Information may accept the following forms of advanced standing, referred to as "test credits."

Advanced Placement (AP) Credits

See the AP credit section of the Office of Admissions and Financial Aid Web site.

International Baccalaureate (IB) Higher-Level Examinations

See the IB Examination section of the Office of Admissions and Financial Aid Web site.

College Level Examination Program (CLEP) Testing

SCI does not accept CLEP general examination credits.

Academic Regulations and Standards

University Registration Policies

Policies on full-time/part-time status, adding and dropping courses, cross-registration, grading systems, etc. are governed by the University at large. Students should refer to the Academic Regulations for general information and contact SCI Academic Records for more details on applying these policies in practice.

Highlighted are frequent topics of inquiry: Registration Status and Process, Withdrawing and Resigning, Grading Options and Calculations

Grading Policies

University Grading and Records

More information regarding grades--definitions of, grade change, and viewing grade reports--can be found in the Academic Regulations.

Satisfactory/No-Credit Grade Option Policy

The School of Computing and Information uses both the University's letter grade and Satisfactory/No-Credit (S/NC) grade options (formerly the S/N option; see Grading and Records for more information). In addition to the general University rules governing those grading systems, there are a few formal limitations to the student's freedom of choice regarding grading systems. The student should check with their academic advisor before deciding to take a course S/NC.

Note, students choose a grading option (letter grade or S/NC) during enrollment from those listed within the University's Student enrollment system. If no election is made, the grading option will default to Letter Grade except in cases where a class is not offered for Letter Grade. Any decision to change the grading option after a class has been added to the student's enrollment must be submitted to SCI Academic Records no later than four weeks after the start of the term. This decision may not be changed, nor may a grade of one kind received for a course be changed to a grade of the other kind (e.g., from an S/NC grade to a letter grade). Procedural details and links to forms are available on SCI Student Resources site, within the Enrollment Resources section.

Students enrolled in the School of Computing and Information may take at most 30 credits of coursework using the Satisfactory/No-Credit (S/NC) system. Aside from this overall limitation on the number of S/NC credits, individual degree programs may place additional requirements upon the use of this grading option within the degree program.

Evaluation of a student's ability and achievement in a course is not eliminated by the Satisfactory/No-Credit (S/NC) system. Recitations, tests, and papers may all be required and assessed by instructors who will convey to the student their judgments of the worth of the student's work. Because the publicly recorded evaluation is minimal, students should use the instructor's comments in the most helpful way possible: as a guide to their own future course of study and for assessment of their own potential.

Since it is difficult to evaluate transcripts containing very few letter grades, students seriously considering transferring to the School of Computing and Information or considering graduate study should keep this in mind. The student may wish to ask instructors from whom they have taken courses on the Satisfactory/No-Credit (S/NC) system to write letters of recommendation for them immediately at the end of the course.

Credit and Enrollment Policies

Residency Requirement

All students must earn a minimum of 30 new credits in residency at the School of Computing and Information, including at least 15 credits within the major program. At least half of the major program credits must be earned at the University of Pittsburgh.

Normal Full-Time Credit Load

A normal full-time credit load ranges from 12 to 18 credits per term, with a minimum of 24 credits in an academic year. Any term credit load in excess of 18 credits requires the approval of the Director of Advising and approval of the Office of the Dean. Students must initiate a petition for a credit overload with their advisor. A credit overload will result in additional tuition charges.

Summer or Special Session Coursework

Students in good academic standing may attend a summer or special session at another accredited institution in order to supplement their program. Students must provide a transfer credit request form, course description, and syllabus to initiate a review of potential or completed external courses.

All summer or special session coursework must comply with the transfer credit evaluation guidelines noted under the [Evaluation of Transfer Credits](#) section of this Catalog. Transfer credit requests submitted after the completion of an external course are not guaranteed approval or transfer. For this reason, students should discuss potential studies at external institutions with their advisor and submit the Transfer Credit Request form PRIOR to enrolling in external courses.

Procedural details and links to forms are available on SCI Student Resources site, within the Enrollment Resources section.

Sequential Courses

Credit cannot be earned for courses taken after more advanced coursework in the same field has been successfully passed with a C or higher. For example, credit cannot be earned for an algebra course taken after the successful completion of a calculus course.

ELI classes

LING 0007, LING 0008, and LING 0009 courses may be counted towards the 120 credits required for the degree.

Physical Education

Students are not required to take any courses in physical education (PEDC) but may elect to do so. Up to four credits of courses offered by the School of Education's Department of Health, Physical, and Recreation Education may be counted toward a degree earned in SCI.

ROTC

Credits earned in aerospace science (Air Force ROTC), military science (Army ROTC), or naval science (Navy ROTC through cross-registration at Carnegie Mellon University [CMU]) are not accepted toward a degree earned in SCI. In lieu of physical education and recreation courses, the School will grant up to four credits toward graduation for the following military science courses: AFROTC 0001, AFROTC 0002, AFROTC 0003, and AFROTC 0004; MILS 0012 and MILS 0022; Navy ROTC courses from CMU.

Independent Study, Undergraduate Research, and Internships

SCI students may earn up to 24 credits of independent study, undergraduate research, and internships as part of the 120 credits required for a degree. Ordinarily, no more than six credits may be earned in any term in a single undergraduate research experience or internship. Under certain conditions, students in good standing may register for a block of 15 credits of independent study. These credits are to be earned for work done within one academic term. A student may register for a 15-credit independent study term only once during their college career. This needs to be approved by the Dean prior to registration.

Learning Agreement forms for independent study and undergraduate research are available from the Academic Department through which the activity will be conducted. Internship application packets are available through SCI Student Services.

Eligibility, procedures, and guidelines are governed by the Academic Department, therefore inquiries should be sent to the student's advisor.

Directed Research: The student pursues a defined research project on campus under the guidance of a faculty member.

Independent Study: Involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off-campus with less immediate direction by the sponsoring faculty member.

Internships: A supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant School or Department. Participation in the cooperative program falls under this category.

Cooperative Programs: To provide an opportunity to apply classroom knowledge within a real-world context, SCI students may participate in the cooperative program run out of the Swanson School of Engineering (SSOE). The Cooperative Education Office within SSOE has established arrangements with industry partners that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. The experience normally starts in the sophomore or junior year. A student may complete a maximum of four rotations, totaling four credits toward their degree.

Any student registering for directed research, independent study, internship for credit, or coop must receive consent. Students should speak to their advisor as other restrictions may apply.

Global Experience Credit Policies

SCI students may pursue as many experiences as allowed by the Global Experiences Office. However, the maximum total of credits that may be applied to an undergraduate degree is bound by SCI's limit S/NC credits. Any credits earned during study abroad programs with the satisfactory/no credit (S/NC) grading option or appearing on the Pitt transcript as such will calculate into the S/NC credit limits listed above.

Completion of any global experience fulfills the "Global Awareness and Cross-Cultural Understanding" requirement within the Polymathic Context section of the general education requirements. This is in addition to fulfillment of other requirements (general education or major) as pre-approved by the student's advisor, Department, and/or the Dean's Office.

Before students undertake a global experience, they must coordinate with and apply to a program through the Global Experiences Office. If admitted, students are required to engage in additional conversations with their SCI Academic Advisor and SCI Academic Records in order to complete the course approval, enrollment, and credit transcription processes.

Procedural details and links to forms are available on SCI Student Resources site, within the Enrollment Resources section.

Graduate Classes

Undergraduates with sufficient preparation are encouraged to take advantage of the rich variety of graduate courses offered by the Departments and Schools within the University. Students enrolled in the School of Computing and Information may use credits in graduate courses toward their undergraduate degree. These may not be counted as credits toward a graduate degree except for students admitted into a BS/MS degree program. To enroll in a graduate course, students must obtain the written consent of the instructor of the course, have a 3.00 cumulative GPA, and have the approval of the Director of the Undergraduate Program. See the University's allowable credits and course limitations regulations for details.

Course Repeat Policy

Required courses for a major must be repeated or replaced by a comparable course if a grade does not meet the Program's minimum requirements (see [Department page](#) for specifics). If the minimum acceptable grade is not earned after meeting the course repeat limit, the student may have to select a different major within SCI or transfer out of SCI.

Course repetitions are subject to the University's defined limitations:

- A sequenced course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.

- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G) are not identified as repeated courses until the coursework is completed.
- Students are only permitted to repeat each course a maximum of twice.

SCI Academic Records automatically submits the Registrar's Course Repeat Form for students who have repeated the exact same course (i.e., repeating INFSCI 0017). However, any student who is replacing a course with a comparable one (i.e., replacing INFSCI 0017 with CMPINF 0401), must submit a Course Repeat Form to their advisor PRIOR to enrollment. The advisor will review course repeat policies with the student and submit the form to Records on behalf of the student at the end of the term. This form is available on SCI's Student Resources > School Forms webpage.

In all cases, it is the responsibility of the student to ensure their repeat course grades have been updated with the "Repeated - Excluded from GPA" flag on their academic record and that all credits have been calculated correctly. Students should discuss repeat courses with their advisor at the beginning and end of the term of repeated enrollment.

Statute of Limitations

The School's statute of limitations requires that all of the credits required for the Bachelor of Science degree, whether earned in residence or transferred from another institution, must have been earned within 12 years prior to the date on which the degree is awarded. However, when given evidence that the previous courses still provide adequate preparation for courses yet to be taken and still represent a reasonable part of the total academic program, with the support of their advisor, students may appeal to the Dean's Office to waive this limitation. In such cases, the waiver is for a specific period during which the program must be completed.

Readmission and Reinstatement

A student record without enrollment for three consecutive terms becomes inactive. Students in inactive status must apply for readmission or reinstatement. By University definitions, readmitted students previously attended the University of Pittsburgh and then enrolled at another external institution. Reinstated students previously attended the University of Pittsburgh and left for one or more calendar years, not attending external institutions in the meantime. These terms are attached to specific application processes and graduation requirements.

Readmitted students follow the School and degree graduation requirements and rules based on their term of readmission. Their statute of limitations is reset to their term of readmission and their transfer credits, advanced standing, and previously authorized exemptions will be reevaluated at the point of readmission. Students may apply for readmission by submitting the transfer application available on the Office of Admissions and Financial Aid website.

Reinstated students follow the School and degree requirements and rules based on their original term of entry to the School. Their statute of limitations is calculated against their original term of entry to the University and their transfer credits, advanced standing, and previously authorized exemptions will be accepted as previously approved at the point of reinstatement. Students interested in reinstatement should submit the Reinstatement application available on SCI's "Take the Next Step" webpage.

NOTE: Students whose break in enrollment extends two years or more from the close of their last term of enrollment to the start of their reinstatement term will be subject to the requirements of the School and of their major and/or certificate Programs at the time of their reinstatement, rather than those in place at the time of their last attendance.

A note on advising appointments and on returning from a break in continuous enrollment: Since registration advising meetings are usually held from the seventh to the twelfth week of the preceding term, applications for reinstatement should be received within that period so that the advisor may assist in planning the program and in registering the student. Similarly, students who are returning from inactive status should keep this timeline in mind for setting up an appointment with their advisor.

Regardless of the conditions surrounding a student's leave -an intentional leave of absence, suspension, or an extended lapse in enrollment requiring reinstatement- when a student returns, they return in the standing attached to their record (good, warning, or probation) at the term of their departure.

Any courses that a student takes at another institution during a period of suspension shall not be granted credit by the School after the student has been reinstated.

Academic Advising

Academic Advising in SCI supports the SCI Mission by facilitating deep, integrative learning; supporting students through their decision-making; and developing holistic, cohesive educational plans.

SCI assigns newly matriculated students an academic advisor with whom they will work until graduation. The academic advising relationship is integral to students' intellectual, personal, and professional growth. Academic advisors will help students to make informed educational choices regarding course selection as well as co-curricular and experiential education opportunities. In addition to their assigned academic advisor, students will have the opportunity to work with faculty mentors who can provide consultation regarding discipline-specific matters.

Advisor/Advisee Expectations

In SCI, we envision academic advising as a relationship with shared responsibilities.

Advisor Responsibilities:

- Be available for one-on-one in-person, web conference, and phone meetings.
- Provide accurate information about SCI academic requirements, policies, and procedures.
- Be knowledgeable about campus resources and will make appropriate referrals when necessary.
- Help students to make informed educational decisions regarding courses, co-curricular activities, experiential education, and community engagement.
- Help students to understand their unique interests and values.
- Help students to understand the purposes of higher education, the missions of the University and SCI, and the way they inform and influence the curriculum.
- Help students to develop polymathic sensibilities.
- Help students to think about why they are in college, what they want to learn, what problems they want to solve, and how to use their time at Pitt to figure these things out and make progress toward them.

Student Responsibilities:

- Schedule at least one appointment with your advisor each semester.
- Prepare for your appointment by reviewing your Academic Advisement Report and other supplementary educational planning documents.
- Be prepared to discuss your strengths, interests, skills, and values, as well as what you are learning in your classes and co-curricular experiences.
- Be prepared to discuss which courses you want to take, why you want to take them, and what you expect to learn from them.
- Read your emails.
- Take ownership of your education.

- Assume final responsibility for the selection of courses, degree progress, and educational planning.
- Learn about the requirements for the degree as well as relevant policies and procedures. Follow through on the plan designed with your advisor and keep them apprised of any barriers you encounter.

Tracking Your Degree Progress (AAR)

In order for students to verify that they are making progress toward graduation, they should regularly review their academic advisement report (AAR). This report is used by the School to certify a student's graduation eligibility and by students to track their progress toward degree attainment. The AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment. It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

Where questions regarding course substitutions or waivers of requirements are concerned, the student should contact their academic advisor.

Requirement exceptions must be pre-approved by the Program Director for major requirements; General Education Requirements exceptions are pre-approved by the Dean's Office via SCI Academic Records. Exceptions are approved only in extenuating circumstances, and students should consult with their advisor for guidance on exceptions that are appropriate to request. Approval of an exception will be noted on the student's AAR.

Maintenance of a student's AAR is the responsibility of the student and will expedite the graduation certification process. As well, the AAR provides detailed course options for fulfilling all requirements for the degree. When using the AAR online, students have quick access to schedule details for approved courses and links to enrollment.

It is recommended that students continually monitor their AAR and utilize this tool frequently for enrollment and advisement purposes.

Informational videos and documents related to the AAR can be found on the Registrar's Student Training website.

Other University Regulations

The University has a number of official policies affecting students. For a summary of these policies and links to complete and current text on all University policies, students should thoroughly review the information provided under Academic Regulations.

Highlighted are frequent topics of inquiry: Student Rights and Responsibilities, Family Educational Rights and Privacy Act (FERPA), Harassment Policies, Student Service Indicators Policy

Academic Integrity

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards - including provisions of due process - have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.

Academic Honors

Dean's List

Each term, a list is compiled of students whose academic record in the preceding term indicates outstanding academic achievement. To be placed on the School's Dean's List, a student must have earned at least 12 letter grade credits (not including courses taken on the Satisfactory/No-Credit option) with a term GPA of at least 3.50. As well, no grade earned during the term in review may be lower than a C. Both full-time and part-time students are eligible for placement on the Dean's list. For part-time students, grades from the current and preceding two terms (which must total at least 12 letter

grade credits) are used to determine eligibility for the Dean's list. If a grade is changed after the Dean's list is generated for the term, it is the student's responsibility to contact SCI Academic Records for an individualized reevaluation of eligibility.

Honors

Undergraduate students may be graduated with University Honors. Criteria for University Honors are posted under the University's Academic Regulations.

Program honors may be awarded at the point of graduation. Students should refer to their Department or Program's information page within the SCI catalog.

Academic Standing

The School is committed to the success of its students and has guidelines in place to connect students with the appropriate resources at the earliest sign of academic difficulty. Students' academic standing is maintained and monitored each term by the Dean's office. A student's academic standing is comprised of three factors: term GPA, cumulative GPA, and progress toward a degree. In order to be in good academic standing, students in the School of Computing and Information are expected to maintain a cumulative GPA and term GPA of 2.00 or above for each term of enrollment. In addition, full-time students are expected to successfully complete a minimum of 12 credits during each term of enrollment. Part-time students are expected to successfully complete a minimum of 3 credits during each term of enrollment.

Students are placed in the **Academic Warning** status if they earn a term GPA below 2.00 or a cumulative GPA between 2.00 and 2.125.

Students are placed in the **Academic Probation** status after their cumulative GPA falls below 2.00. Students may also be placed on Academic Probation if they fail to make progress toward their degree, as determined by University standards and/or Department or Program requirements. More information regarding progress standards can be found on OAF's Satisfactory Academic Progress webpage.

Students currently on Academic Probation who earn a term GPA below 2.00 or fail to make progress toward their degree will be subject to **Academic Suspension**. After being suspended, students are not eligible to re-enroll for one calendar year. Students on Academic Probation or Suspension are not eligible to earn credits at another institution toward a School of Computing and Information degree. Following suspension, students are required to apply for reinstatement (see details below).

Students who have been reinstated from Academic Suspension must earn a GPA of at least 2.00 for each term that they enroll until they have achieved a cumulative GPA of 2.00 or above. If a student fails to earn a 2.00 term GPA, they are subject to **Academic Dismissal**. Dismissal is a final action. Dismissed students are not eligible for reinstatement or readmission in the School of Computing and Information.

Students who are not on academic probation or academic suspension are considered to be in good academic standing. Students will be notified by email if they are no longer in good academic standing.

Bachelor's Degree Requirements

Graduation requirements differ among degrees. However, all degrees require a minimum of 120 passing credits with a minimum 2.00 overall GPA, completion of the School's Foundation Courses, General Education Requirements, Major Requirements, Secondary Field of Study, and a Capstone Experience. Furthermore, students must earn at least half of the credits for their major(s), minor(s), and certificates(s) and the final 30 credits toward the School of Computing and Information degree while enrolled at the University of Pittsburgh. School of Computing and Information residency requirements also apply.

General Education Requirements

All students are required to complete general education requirements (GER). These courses are meant to provide foundational skills and breadth of knowledge, aiming to provide students with broad exposure outside of their core discipline of study while encouraging a focus on the application of techniques from the classroom to meaningful problems.

Full lists of specific courses that meet the following requirements, referred to as "approved courses" or "course lists," are determined by faculty review and are available to students through the Academic Advisement Report and/or the "Plan by my requirements" tool found in the enrollment

system. Additionally, students may use the enrollment systems to "Search by requirements" or filter by class attributes to refine the approved course list for a requirement to those that are being offered in a term. Informational videos and documents related to the AAR and other advisement and enrollment resources can be found on the Registrar's Student Training website.

GER courses cannot overlap within the general education categories (First-Year, Skills, Polymathic Contexts) except where specified. If a course is approved for both a GER and a major requirement, it may satisfy both.

Note: Transfer students receive an evaluation of their previous coursework indicating the equivalent University of Pittsburgh courses for which transfer credits have been awarded. Courses will meet requirements for the major where deemed appropriate by the Department. Students who believe that they have an exceptional case for petitioning for a course to meet either a general education or a major requirement should speak with their advisor to submit a petition.

Foundation Courses

Students must complete a gateway course ("Big Ideas in Computing" - CMPINF 0010 or CMPINF 0011) that provides an understanding of the connections between computing and information and other disciplines; the commonalities among and differences between the problems, tools, and methodologies of various computing and information and other disciplines; and basic technical skills that will serve them as they advance through any computationally-oriented degree program. The "Big Ideas" courses focus on ideas and insights that cross-cut computing and information disciplines, as well as underlie problems in other disciplines. Students learn about the complex interconnections between the natural, social, and engineered systems that we interact with every day, and explore how computing and information can be used to model, understand, and reason about the complex problems occurring within this space.

Students must also complete a required seminar (CMPINF 0001 or CMPINF 0002) that provides an introduction to SCI and the University of Pittsburgh. This course addresses a range of issues including academic mechanics (e.g., advising, registration, university structure, financial aid, academic and professional communication), academic support services and opportunities (e.g., tutoring centers, study abroad, internships and co-ops, undergraduate research), student support services (e.g., career services, counseling center, student health services), and other student opportunities (e.g., Pitt FYE, campus recreation, PittArts Cheap Seats, etc.).

Skills Courses

Skills requirements help ensure that all students attain appropriate levels of competence in writing, communication, and quantitative and formal reasoning. Students may be placed in or exempted from skills requirements based upon certain achievement test scores, University of Pittsburgh placement test scores, or coursework completed at other colleges and universities. Skills requirements are outlined below. All skills courses must be completed with a grade of C or higher.

Expression (3 courses): Communication in its various forms is central to all disciplines and professions. The approved courses will assist students in developing the skills to express thoughts and ideas as appropriate for professional or graduate education or for professional employment.

- Introductory Composition
- Technical, Business, or Research Writing
- Communications

Quantitative (2 courses): Quantitative skills are the bedrock of success in the computing and information fields. Approved courses will provide an introduction to university-level mathematics and statistics.

- One course in university-level mathematics covering topics in calculus, linear algebra, or theoretical mathematics
- An approved course in statistics

Polymathic Context

SCI degree programs address the holistic spectrum of computing and information, from producers to users and from science-oriented exploration to human-centric applications. The following requirements facilitate the development of a multidisciplinary approach to knowledge creation,

information management, and computing by immersing students in a variety of intellectual contexts that are crucial to understanding problems at the confluence of natural, social, and engineered systems to which computing and information skills can be brought to bear.

Scientific Context (3 courses): These courses introduce students to scientific principles and concepts rather than offering a simple codification of facts in a discipline or a history of a discipline.

- 2 approved sequenced courses in one discipline
- 1 course in a second discipline OR a third course in the sequenced discipline

Ethical and Policy Context (1 course): It is crucial for students engaging in computing-and information-related studies to develop an awareness of the interplay between technology, computing, ethics, and societal implications. Approved courses emphasize close and critical reading of theories about knowledge, reality, humanity, and values. Courses could focus on human nature; scientific reasoning; theories of cognition and consciousness; human/social rights; competing systems of belief; morality; concepts of freedom; theories of justice; social obligations/constraints; or ethics, including applied or professional ethics.

At least one course from each of the following three categories (5 courses total)

- **Global Awareness and Cross-Cultural Understanding:** Approved courses examine significant issues that are global in scale. Possible topics include globalization; the global and cultural impact of climate change/sustainability; the effects of and resistances to colonialism; or worldwide issues related to health, gender, ethnicity, race, technology, labor, law, or the economy. Other approved courses will focus on an understanding of cultures, traditions, and societies that differ substantially from those that prevail in North America and Europe. A study abroad experience also satisfies the Global Awareness and Cross-Cultural Understanding requirement.
- **Social and Behavioral Sciences:** Approved courses treat topics considered of significant importance in the social or behavioral sciences (including social psychology). Courses will introduce students to the subject matter and methodology of a particular discipline and will involve them in the modes of investigation, analysis, and judgment characteristically applied by practitioners. Other approved courses focus on significant cultural, social, economic, or political accounts of the past. The courses may focus on pivotal moments of change, or important transitions over longer periods of time. Courses could explore developments in science, technology, literature, or art, and the ideas around them, or examine critical historical shifts by analyzing various data or cultural forms
- **Humanistic Context:** Generally covering courses focusing on literature, the arts, and creative work. This requirement exposes students to courses that introduce the techniques and methods of textual analysis and develop critical perspectives on a variety of forms of cultural expression. Additionally, courses may cover modes of analysis appropriate to music, theatre, or the visual and plastic arts. Finally, some approved courses will result in the production of some form of creative work, training students in the techniques and modes of its production. These courses could be situated in theater, studio arts, writing, visual arts (including photography and film), music, and dance. They may also engage in innovative or original work in relation to written, oral, or visual material, new media, social media, and other contemporary forms of communication and representation

Diversity (1 course): Diversity courses focus centrally and intensively on issues of diversity, and do so in a manner that promotes understanding of differences. They provide students with analytical skills with which to understand structural inequities and the knowledge to be able to participate more effectively in our increasingly diverse and multicultural society. The courses may address, though are not limited to, such issues as race, gender, ethnicity, sexuality, religious difference, ability difference, and/or economic disparity.

Diversity courses may also be courses that fulfill other General Education or Major Requirements.

Total: 14 courses

Secondary Field of Study

To emphasize the intersections that computing and information have with other disciplines, students will be required to achieve some depth of study within another discipline. This requirement may be satisfied via several mechanisms:

- Completion of a major jointly offered by SCI and another School on campus
- Completion of a minor or second major
- Completion of an approved certificate program

- Completion of an approved 15-credit related area (curated with and approved by the student's advisor)

Requirements for the Major

See the Program Offerings pages for the major requirements.

Capstone Experience

To provide an opportunity to apply classroom knowledge within a real-world context, all SCI students will complete a capstone experience as part of earning their degree. The mechanisms for satisfying the capstone requirement will be determined and defined by the faculty of the individual degree programs.

Degree programs allow this requirement to be satisfied in a number of ways, including:

- Approved internship or co-op experiences
- Directed research sponsored by a faculty member
- Capstone-designated project courses

The capstone typically requires 2-3 credits to complete.

Declaring a Major, Minor, or Secondary Field of Study

Major Declaration

SCI students may declare a major in the term following the successful completion of all major eligibility requirements (see the relevant Program Offering page). Students must officially declare their major and are strongly encouraged to declare at the earliest possible point in their career.

The Major Declaration form is active each term during the window of two weeks before the term begins through the close of the add/drop period. Students should refer to the Academic Calendar for specific add/drop dates. Students who miss the deadline to declare for the upcoming term will be able to declare for the following term. As a general guide, the declaration for each term is as follows:

- **Fall term:** Mid-August to Early September
- **Spring term:** Early to Mid-January
- **Summer (12-week) term:** Early to Mid-May

Procedural details and links to forms are available on SCI Student Resources site, within the Enrollment Resources section.

Minor Declaration

Students declaring, swapping, or deleting a minor offered by SCI must submit the Undergraduate Minor Declaration/Change form. The form is active throughout the academic year and processed within one to two weeks. Students are strongly encouraged to declare as soon as they have selected a minor and to maintain an accurate record of their minor throughout their career.

Secondary Field of Study Declaration

SCI students fulfilling the Secondary Field of Study requirement with a curated combination of related courses (15-credit related area) must discuss this with their Academic Advisor before submitting the Secondary Field of Study Declaration form. Students should submit the form after they have successfully completed their Secondary Field of Study. If it is the student's term of graduation, they must submit the form as soon as they have applied for graduation.

Students who are completing a second bachelor's degree, a joint degree program, a second major, a minor outside of SCI (e.g., history, studio arts), or a certificate program do not need to submit the Secondary Field of Study Declaration form.

Transferring Out

Transferring out of SCI to another Pitt School (or campus) requires an application to and acceptance from the other school. Students who wish to transfer out of SCI to another School at the University must submit SCI's Academic Program (Transfer Out/Dual Degree) Change form *by the deadline set by the destination school*.

Note: All transfer credits and authorized exemptions or waivers are subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Graduation

Student Status During Term of Graduation

Students must be in active status during their term of graduation. This means they must have enrolled in a minimum of one credit within the three terms previous to graduation. They must also be in good academic standing.

Application

Graduation is not an automatic process. All students must apply to graduate and should begin this process early. Generally, students should see to the items below and allow themselves adequate time to adjust their course enrollment before their anticipated graduation term.

- **One term before** their anticipated graduation term, before the add/drop period ends: Students must verify the accuracy of their declared majors, minors, specializations, and/or certificates. They should make necessary updates prior to the launch of a graduation application (see Declaration section above).
- Before the start of their anticipated graduation term: Students should communicate with their advisor to review their degree progress and determine potential graduation roadblocks.
- During their anticipated graduation term: Students should complete the Office of the Provost's exit survey.

Students must submit the application for graduation by the University's deadline. Procedural details, deadlines, and links to forms are available on SCI's Student Resources site under the Graduation Process and Expectations section.

Graduation Ceremonies

Although degrees are conferred at commencement for all graduation periods, the official audit (certification) of degree completion occurs several weeks after the ceremony. Neither walking in the Commencement Ceremony nor being named in the Commencement Program is an official indication of graduation. Similarly, reading a student's name at SCI's Recognition Ceremony does not indicate that the student has met graduation requirements.

Students will be contacted by the School *several weeks* after the ceremonies regarding their final graduation certification status. See the Post-Term Processing section for more details on the official certification of graduation.

University Commencement

Candidates for graduation are encouraged to appear in person at the University Commencement Ceremony, usually held the Sunday after the spring term ends.

University Commencement details, receipt of regalia, honors cord distribution, and other ceremony-related items are managed outside of SCI. Please review the University Commencement webpage for details and frequently asked questions.

School Ceremony

The School of Computing and Information hosts an event to recognize its graduating students and awardees at the end of each term. The ceremony includes a speech to graduates, an address from Program Representatives, and a reading of individual graduate names.

Event details, travel tips, and information regarding tickets are hosted on SCI's Recognition Ceremony webpage.

Post-Term Processing

After the term closes, staff and faculty across campus begin the final steps for conferring degrees - graduation certification and updating or creating documentation.

Certification

Graduation certification is the process run by advisors and staff to ensure students have met all graduation requirements. This process is finalized after grades are posted for the term in question. Students who are concerned about their graduation eligibility should first review their academic advisement report (AAR) and then meet with their academic advisor.

Documentation (transcripts, diplomas, etc.)

Official documentation of graduation is managed by the University Registrar's Office. Inquiries regarding transcripts, diplomas, and related address changes should be directed to that office's Graduation/Diplomas service area.

All diplomas are mailed to students approximately six to eight weeks after the official certification date for each graduation period. Questions regarding diploma mailing should be directed to the Office of the University Registrar.

Special Academic Programs/Opportunities

Multiple Majors Within SCI

Students can declare multiple majors within SCI but will earn only one degree. Students wishing to declare multiple majors within SCI should see the Declaration section above.

Dual & Inter-Unit Degrees

Students in the School of Computing and Information may choose to simultaneously pursue more than one undergraduate degree within the University. Earning two degrees requires a minimum of 150 credits and completion of the curriculum requirements of both schools.

Students wishing to apply for a dual degree should confer with their academic advisor. When ready to apply for a dual degree, SCI students must submit the Academic Program Change (Transfer Out/Dual Degree) form *by the deadline set by the new school*.

Procedural details and links to forms for transferring out or applying for a dual degree are available on SCI Student Resources site, within the Enrollment Resources section.

Students currently enrolled elsewhere at Pitt must follow the Internal Transfer admissions requirements, deadlines, and procedures section of this Catalog.

College of Business Administration (CBA) and School of Computing and Information (SCI) Inter-Unit Degree Option

Students interested in pursuing degrees from both CBA and SCI must currently be enrolled in either School to submit an application. They may not apply to both schools concurrently. Students beginning their program of study at the University in an academic unit other than CBA or SCI and who have an interest in pursuing the CBA/SCI inter-unit degree must first seek admission to either CBA or SCI. To do this, the student (in consultation with their academic advisor) completes an "Undergraduate Academic Program Add/Change" form indicating transfer from their current school to either CBA or SCI.

Once enrolled in either CBA or SCI, students can apply for admission to the second school by completing their School's dual degree form.

For students to make timely progress toward graduation, they must be admitted into the inter-unit degree program no later than the term in which they will earn 75 credits. Students are encouraged to apply as soon as they have met the admissions requirements for the second school. Students must be aware of application deadlines for each school and plan accordingly.

Students entering CBA or SCI later in their academic careers should consult with their academic advisors, and possibly consider pursuing a single Bachelor's degree in one School with a Master's degree from the other. The best combination of degrees will vary depending on the student's academic interests and career goals.

Students offered admission to the inter-unit degree must accept this offer through Pitt PSMobile. After accepting the offer and the appropriate changes are made to the student's record, the student will be billed the average tuition rate of the two Schools. Students will also be billed all fees applicable to each School. Students should refer all tuition and fee inquiries to the Student Payment Center.

Bachelors of Philosophy

Only a few colleges in the nation offer a prestigious Bachelor of Philosophy (BPhil), which is a model borrowed from Oxford and Cambridge in the UK. The BPhil is a higher distinction that replaces the standard BS degree. The BPhil can be earned in any major and is jointly awarded by the University of Pittsburgh Honors College and the School of Computing and Information.

Completion of a BPhil is a rigorous process that requires a research component and a final thesis beyond that of the student's regular course of study. For details regarding the requirements, process, and personalized mentoring for the BPhil degree, visit the David C. Frederick Honors College BPhil website.

BS/MS or Accelerated Programs

Some degree programs offer an accelerated BS/MS course of study that begins during a student's last two semesters of undergraduate enrollment. Applications are accepted through SCI's online application portal. A student admitted into a BS/MS program begins their graduate courses during their final year of undergraduate studies. They are not officially flagged as a graduate student for enrollment or financial aid purposes until after their undergraduate degree is conferred. See individual program offerings for further details.

SCI and the University Community

SCI encourages students to build a network of peers with similar academic interests from across the University. To facilitate this personal, academic, and professional growth, SCI participates in an Academic Community, hosted by the Dietrich School of Arts and Sciences, and the Living Learning Communities managed through Student Affairs.

Academic Communities (AC) require a commitment of three classes which will be completed in the student's first term with other students of the same AC. The classes focus on a specific area of study representing the theme of the AC. It's an unmatched opportunity to meet like-minded students right away and to explore interests and possible majors with others who share similar passions.

Living Learning Communities (LLCs) are specialized living environments that connect students to inside and outside-the-classroom experiences. Each LLC is unique, but all are centered on a distinctive theme or academic interest area. Students who choose to live in an LLC have a direct connection to their classroom experience, access to intentional events and programs, and dedicated staff members who work to make the community a success. Some LLCs require students to register for specific classes, class sections, or outside-of-the-classroom activities. Please refer to the Student Affairs' LLC webpage for additional requirements and details.

Global Experiences

Students are encouraged to add an international dimension to their undergraduate education through engagement with programs available through the Global Experience Office. Credits may be earned toward the School's degrees through participation in one of several University of Pittsburgh programs or consortia-sponsored programs.

Please refer to the Global Experience Credit Policy section for further regulations pertaining to credits earned in these programs. For details regarding current opportunities and incorporating study abroad experiences into the SCI curriculum, students should visit the Global Experience Office's website.

MSIS Guarantee for Pitt and Regional Campuses

Students who have earned a Bachelor of Science in Information Science (BSIS) on Pitt's Oakland campus are guaranteed admission to the Master of Science in Information Science (MSIS) if they meet the following criteria:

- A separate application is not necessary for consideration. When students submit an application for admission with OAFA, they should select indicate "Information Science" from the Guaranteed Admission Program drop-down box. Only students admitted as first-year students can be considered for the guarantee.
- Achieve a minimum SAT score of 700 (Math) or a minimum score of 30 on the Math section of the ACT.
- Complete the BSIS program and enroll in the MSIS program within five calendar years of being awarded the Information Science guarantee by the Office of Admissions and Financial Aid.
- Maintain a 3.25 QPA while in the BSIS program with no grade (throughout your college career) lower than a C.

Test-optional applicants are eligible for this guarantee.

School of Computing and Information Faculty

School of Computing and Information Faculty

Programs and Course Offerings

Joint Major

Computational Biology, BS

Computational Biology Requirements

Computational biology is a growing field of study in the life sciences. This major, which is administered by the Department of Biological Sciences in the Dietrich School and the Department of Computer Science in the School of Computing and Information, trains students in the computer programming, laboratory techniques, and other skills they will need to succeed in graduate school and in the workforce. This major requires completion of 64 credits of coursework, detailed as follows.

Students may declare a major in Computational Biology after completing the following courses or their equivalents with a letter grade of C or higher.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

- CHEM 0110 - GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS

Transfer students who have finished these requirements prior to admission to the University of Pittsburgh are asked to complete one term of course work, including at least one BIOSC course that counts toward the major, before declaring within the Dietrich School. Transfer students applying to the School of Computing and Information who have finished these requirements prior to admission to the University of Pittsburgh may be admitted directly into the major - note, transfer application requirements for SCI are outlined in the Catalog under "Admission Requirements and Procedures ."

Biological Sciences courses

All of the following courses are required for the major.

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1 or
 - BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1
 - BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2 or
 - BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2
 - BIOSC 0350 - GENETICS
 - BIOSC 1000 - BIOCHEMISTRY
- *Students may alternately choose BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION and BIOSC 1820 METABOLIC PATHWAYS AND REGULATION in lieu of BIOSC 1000. In this case, BIOSC 1820 becomes the elective course.

Computer Science courses

All of the following courses are required for the major.

- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE

Computational Biology courses

All of the following courses are required for the major.

- BIOSC 1540 - COMPUTATIONAL BIOLOGY
- BIOSC 1542 - COMPUTATIONAL GENOMICS or
- BIOSC 1544 - SIMULATION AND MODELING
- BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR

Capstone course

Students must choose one of the following capstone courses.

- BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH
- CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Co-requisite Chemistry courses

All of the following courses are required for the major.

- CHEM 0110 - GENERAL CHEMISTRY 1 or
- CHEM 0710 - UHC GENERAL CHEMISTRY 1
- CHEM 0120 - GENERAL CHEMISTRY 2 or
- CHEM 0720 - UHC GENERAL CHEMISTRY 2
- CHEM 0310 - ORGANIC CHEMISTRY 1 or
- CHEM 0730 - UHC ORGANIC CHEMISTRY 1

Co-requisite Mathematics and Statistics courses

Both of the following courses are required for the major.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- STAT 1000 - APPLIED STATISTICAL METHODS

Elective courses

Students must select one course from the following list.

- BIOSC 0351 - GENETICS LABORATORY
- BIOSC 0370 - ECOLOGY
- BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB
- BIOSC 1130 - EVOLUTION
- BIOSC 1285 - GENOMICS LABORATORY
- BIOSC 1320 - POPULATION BIOLOGY
- BIOSC 1500 - CELL BIOLOGY
- BIOSC 1520 - DEVELOPMENTAL BIOLOGY
- BIOSC 1760 - IMMUNOLOGY
- BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION
 - * This course must be taken in conjunction with BIOSC 1810 MACROMOLECULAR STRUCTURE AND FUNCTION; the pair of courses are taken in lieu of BIOSC 1000 BIOCHEMISTRY.
- BIOSC 1850 - MICROBIOLOGY
- BIOSC 1940 - MOLECULAR BIOLOGY
- CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
- CHEM 0320 - ORGANIC CHEMISTRY 2
- CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI
- CHEM 1830 - SYNTHETIC BIOLOGY
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS
- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1675 - INTRODUCTION TO MACHINE LEARNING
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG
- NROSCI 1000 - INTRO TO NEUROSCIENCE
- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
- STAT 1221 - APPLIED REGRESSION

Additional Requirements

Writing (W) requirement

Dietrich School students must complete at least one W-course in the major. BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR meets this requirement.

Grade requirements

All courses offered by the departments of Biological Sciences and Computer Science must be completed with a letter grade of C or better.

Co-Requisite courses

Students must complete co-requisite courses in the departments of Mathematics, Statistics, and Chemistry with an overall average of C or better, with the exceptions of CHEM 0110 GENERAL CHEMISTRY 1 and CHEM 0120 GENERAL CHEMISTRY 2. Students must earn letter grades of C or better in each of these classes.

Honors

A Dietrich School student may achieve honors in the Department of Biological Sciences by meeting these requirements:

1. Maintain a minimum GPA of 3.25;
2. Complete a faculty-supported research project; and
3. Complete an Honors Thesis. Details about the required thesis are available at www.biology.pitt.edu/undergraduate/advising-and-support/honors.

A School of Computing and Information student may achieve honors in the Department of Computer Science by meeting these requirements:

1. Maintain a minimum overall GPA of 3.25; and
2. Maintain a major GPA (CS and Biological Science courses) of 3.5; and
3. Complete an additional major elective course with a grade of A.

Satisfactory/No Credit option

One core course required for the major may be taken on an S/NC basis. Co-requisite courses may be taken on an S/NC basis subject to School limitations. Please check with your School for specific information on S/NC grades.

Restrictions

- All BIOSC courses at the 0800-level are designed for non-majors and therefore do not count toward the major.
- Independent study and independent research credits do not count toward the major. The Department of Biological Sciences encourages students to seek out these experiences in order to enhance their education.

Computational Social Science, BS

Computational Social Science

The Computational Social Science (CSS) major educates students to build, compute, and improve theoretically-informed models of social processes, bridging domain and technical expertise. This major will prepare students to understand, engage with, and innovatively solve evolving, complex multi-scale challenges such as climate change, transnational political violence, cybersecurity and privacy, social polarization, and inequality, among others. This major will enhance the student's strength in both social science theory, broadly construed, as well as computing, informatics, and networked systems. Students will gain an understanding of modern computational tools and resources and social, political, and economic concepts from core social science classes.

Eligibility for the Major

Students may declare a major in Computational Social Science after completing the following course with a letter grade of C or higher.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Additionally, students are encouraged to be enrolled in or have completed INFSCI 0702 / PS 0702 with a grade of "C" or better when declaring the major.

Computational Social Science Major Requirements

The major will comprise of the following requirements for a total of 52-53 credits. All courses should be completed with a grade of "C" or better.

Pre-Requisite Mathematics Class

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I

Foundations of Computational Social Science

The foundational courses introduce students to enduring puzzles in social science research, emerging themes of computational social science, and the approaches that social scientists and information & network scientists use to solve problems. This section consists of eight required courses that will provide foundations of subject matter knowledge and the basic computational tools that are relevant to social scientific theories and empirics.

One Introduction to CSS Class

- PS 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE
OR
- INFSCI 0702 - INTRODUCTION TO COMPUTATIONAL SOCIAL SCIENCE

One Introduction to Social Science Class

Choose one class from this list:

- PS 0200 - AMERICAN POLITICS
- PS 0500 - INTERNATIONAL RELATIONS
- PS 0300 - COMPARATIVE POLITICS

Four Classes Introducing Computational Approaches and Basic Tools

Two required courses:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING *
- INFSCI 0510 - DATA ANALYSIS

And then, select two of the following courses:

- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0610 - NETWORKS AND INFORMATION
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS

* Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Python, C++, or Java programs would be sufficient. It is also possible to take one of CS 0010, CS 0011, or CS 0012 as preparation. Preparatory classes of this nature do not count toward the student's major requirements.

One Social Science Research Design Class

- PS 0700 - RESEARCH METHODS IN POLITICAL SCIENCE

One Modeling Social Interactions and Motivations Class

Select one of the following courses.

- PS 1250 - GAMES, POLITICS, AND STRATEGY
- PS 1514 - POLITICAL STRATEGY INTERNATIONAL RELATIONS

Ethics and Computational Social Science

This section of the major will expose students to critical debates on the ethics of governance, computing, and technological change. Issues covered will include tradeoffs between privacy/security and censorship/freedom, as well as topics related to surveillance, propaganda, cyber-security, and regulation. The goal is to expose students to both the moral and social consequences of technology at a conceptual level, and the specific technical implementations that cause potential social problems (e.g., packet-sniffing) and could potentially expand the space for solutions (e.g., differential privacy).

Select two courses from the following:

- CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES
- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- INFSCI 1600 - SECURITY AND PRIVACY
- PS 1693 - POLITICAL THEORY & THE FUTURE-ANALYSIS
- INFSCI 1049 - INTRODUCTION TO INFORMATION SECURITY
- PS 1675 - POLITICS OF HUMAN RIGHTS

Intermediate Techniques Applied to Social Science Content

The third set of requirements will empower students to use computational tools to explore enduring social science puzzles and theories at scale. These paths are not meant to be formal areas of concentration, but options to gain competence in more focused areas. For example, some students might be interested in applying data mining techniques to problems in campaigns in American politics. Other students might want to focus on cyber-security and international relations. The computational techniques, domains, and analytics course sets are organized to broaden interest in the major. Together, these courses allow our students to have an evolved understanding of how computing and digital tools can be used in government, businesses, and NGOs.

Two Computational Skills Classes

These classes specifically focus on relevant computational skills, including data mining, the web, visualizations, social computing, and advanced security and privacy. Other upper-level INFSCI courses (1100+) may be used with approval of the advisor.

Select two of the following courses to satisfy this subset:

- INFSCI 1440 - SOCIAL COMPUTING
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1550 - SPATIAL INFORMATION
- INFSCI 1570 - NETWORK AND WEB DATA TECHNOLOGIES
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY

Two Domain Specialization Classes

Students will delve deeper into their domain specialization with two classes. One class should pair with the theme chosen for the student's Introductory Social Science Class (under Foundations of CSS). Students then choose another substantive class that can be outside the previous theme. Select two domain specializations classes from the themes below. Although only a few classes are listed for each theme, more are options available to students. Students should refer to the major's academic advisement (degree progress) report for a complete list of course options.

American Politics: A subset of courses within the 1200-range are approved domain specialization courses to pair with **PS 0200**.

- PS 1201 - CONSTITUTION AND CIVIL LIBERTIES
- PS 1202 - AMERICAN CONSTITUTIONAL LAW
- PS 1203 - JUDICIAL POLITICS
- PS 1204 - WOMEN IN POLITICS
- PS 1211 - LEGISLATIVE PROCESS

- PS 1213 - LAW AND POLITICS
- PS 1232 - POLITICAL ATTITUDE & PUBLIC OPINION

Comparative Politics: A subset of courses offered within the 1300-range are approved domain specialization courses to pair with **PS 0300**.

- PS 1302 - POLITICAL DEVELOPMENT
- PS 1303 - PACIFIST MOVEMENTS AND PEACE EDUCATION
- PS 1311 - WESTERN EUROPEAN GOVERNMENT AND POLITICS
- PS 1316 - ASIAN POLITICS
- PS 1317 - POLITICS OF THE EUROPEAN UNION
- PS 1322 - LATIN AMERICAN POLITICAL DEVELOPMENT
- PS 1327 - POLITICS OF REVOLUTION

International Relations: A subset of courses offered within the 1500-range are approved domain specialization courses to pair with **PS 0500**.

- PS 1501 - THEORY OF INTERNATIONAL RELATIONS
- PS 1502 - INTERNATIONAL LAW AND PROBLEMS OF WORLD ORDER
- PS 1503 - INTERNATIONAL ORGANIZATION
- PS 1504 - NATIONALISM
- PS 1511 - AMERICAN FOREIGN POLICY
- PS 1512 - THE POLITICS OF MIGRATION
- PS 1513 - FOREIGN POLICIES--CHANGING WORLD

One Integrated Analytics Content Class

The final section in this requirement will marry a deep analytical component, such as predictive analytics, causal inference, game theory, data visualization, and other topics with complicated social problems such as inequality, trade, climate change, political violence, or polarization. The class will focus on integrating computational tools into the measurement of core social science concepts, including democracy, human rights, happiness, and peace. There will be a focus on using text and images as data.

Select one of the following courses:

- PS 1291 - WOMEN IN POLITICS - ANALYSIS
- PS 1292 - RACE, GENDER, AND POLITICS - ANALYSIS
- PS 1293 - LEGISLATIVE PROCESS - ANALYSIS
- PS 1294 - POLITICAL ATTITUDE - ANALYSIS
- PS 1295 - POLITICAL PSYCHOLOGY - ANALYSIS
- PS 1299 - ANALYSIS OF AMERICAN POLITICS
- PS 1391 - AUTHORITARIAN STATECRAFT AND THE ARTS OF RESISTANCE - ANALYSIS
- PS 1392 - EUROPEAN POLITICS-ANALYSIS IN COMPARATIVE POLITICS
- PS 1395 - LATIN AMERICAN POLITICS-ANALYSIS
- PS 1399 - ANALYSIS OF COMPARATIVE POLITICS
- PS 1591 - ANALYSIS OF CIVIL WARS
- PS 1592 - POLITICS OF GLOBAL ECONOMIC RELATIONS - ANALYSIS
- PS 1599 - ANALYSIS OF INTERNATIONAL RELATIONS
- PS 1702 - VISUALIZING AND UNDERSTANDING SOCIAL DATA

Application Development Capstone

The major culminates in the production of a research project that uses computational tools to create either a) an online, interactive data visualization, b) a replicable research report that uses unstructured data or c) a module/library. In all cases, the project will engage with or help to resolve an important social problem. This project can be created through independent or directed research, or in one of the classes listed below. All students will present their projects as digital posters to faculty, alumni, and potential employers from around the Pittsburgh area at an end-of-the-year event.

Select one of the following courses:

- INFSCI 1700 - DATA-DRIVEN COMMUNICATION
- INFSCI 1710 - DIRECTED RESEARCH
- INFSCI 1720 - INTERNSHIP
- INFSCI 1730 - INDEPENDENT STUDY
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- PS 1782 - APPLICATION IN COMPUTATIONAL SOCIAL SCIENCE
- PS 1900 - INTERNSHIP
- PS 1901 - INDEPENDENT STUDY
- PS 1903 - DIRECTED RESEARCH

Additional information

Grade requirements

All courses for the major must be taken as the letter grade option and completed with a C or better.

Approved courses

If a course is approved for multiple requirements, it cannot satisfy more than one.

Satisfactory/No Credit option

No course that counts toward the major can be taken on an S/NC basis without the approval of the advisor.

Writing requirement

Students enrolled in the Dietrich School of Arts and Sciences must complete at least one writing-intensive (W) course in the major. Students in the School of Computing and Information must comply with GER rules.

Double majoring

There will be specific provisions for double majors on the A&S side, but it is expected that students can double major this with another social science major or any major in SCI.

Declaration

Students can declare the major in the Spring of their first year. Students are required to complete MATH 0220 prior to declaring and are strongly encouraged to be enrolled in PS 0702 during or before their declaration term.

Honors

To earn honors designation within the major upon graduation, a 3.7 GPA is required across all major classes and a 3.5 Cumulative GPA overall.

Data Science, BS

Data Science

The rapidly expanding collection of massive amounts of data is leading to transformations across broad segments of industry, science, and society. These changes have sparked great demand for individuals with skills in managing and analyzing complex data sets. Such skills are interdisciplinary, involving ideas typically associated with computing, information processing, mathematics, and statistics as well as the development of new methodologies spanning these fields. The undergraduate Data Science major establishes a framework to train University of Pittsburgh students to participate fully in this data revolution.

This major will allow students to gain skill sets that span key areas of statistics, computer science and mathematics, with foundational training providing literacy in four areas (data, algorithmic, mathematical, and statistical) that every student needs to master data science; the development of expertise that connects theory to the solution of real-world problems; and specialization towards more specific career focuses. Completing this major will prepare students to work as a data science professional or to pursue graduate study in a direction involving data in a significant way.

Program Requirements

The Data Science major requires the completion of 61 credits distributed as follows.

Foundational Courses

All of the following courses are required, except as noted.

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

- MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
- MATH 1180 - LINEAR ALGEBRA 1

- MATH 0480 - APPLIED DISCRETE MATHEMATICS or
- CS 0441 - DISCRETE STRUCTURES FOR CS

- STAT 1060 - DATA SCIENCE FOUNDATIONS or
- CMPINF 1061 - FOUNDATIONS OF DATA SCIENCE

- STAT 1151 - INTRODUCTION TO PROBABILITY or
- STAT 1631 - INTERMEDIATE PROBABILITY

- STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS or
- STAT 1632 - INTERMEDIATE MATHEMATICAL STATISTICAL

Expertise Courses

All of the following courses are required, except as noted.

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1656 - INTRODUCTION TO DATA SCIENCE

- MATH 1101 - AN INTRODUCTION TO OPTIMIZATION
- STAT 1261 - PRINCIPLES OF DATA SCIENCE
- STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE or
- CS 1675 - INTRODUCTION TO MACHINE LEARNING

Specialization

Students will have the opportunity to pursue an area of specialization through the selection of elective courses in one of the targeted directions - Data Analytics, Modeling, Computer Systems, or Data in Context. Students should select three courses from the same category for optimum focus. However, students may choose courses from across the categories to suit their interests.

Data Analytics

Students pursuing a data analytics specialization will enhance their ability to make sound inferences and decisions using the science and art of learning from data: specifically, the design, collection, analysis, and interpretation of data in an uncertain world, and the communication of findings.

- CS 1671 - HUMAN LANGUAGE TECHNOLOGIES
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 1068 - GEOSPATIAL INFORMATION SYSTEMS (GIS)
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- STAT 1201 - APPLIED NONPARAMETRIC STATISTICS
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1231 - APPLIED EXPERIMENTAL DESIGN
- STAT 1311 - APPLIED MULTIVARIATE ANALYSIS
- STAT 1321 - APPLIED TIME SERIES

Modeling

Students pursuing a modeling specialization will enhance their ability to develop and harness theoretical tools to characterize structure within data and to represent and analyze processes that may underlie this structure.

- CS 1538 - INTRODUCTION TO SIMULATION
- MATH 1025 - INTRODUCTION TO MATHEMATICAL CRYPTOGRAPHY
- MATH 1070 - NUMERICAL MATHEMATICAL ANALYSIS
- MATH 1080 - NUMERICAL MATH: LINEAR ALGEBRA
- MATH 1310 - GRAPH THEORY
- MATH 1360 - MODELING IN APPLIED MATH I
- MATH 1510 - MATHEMATICAL THEORY OF PROBABILITY
- STAT 1211 - APPLIED CATEGORICAL DATA ANALYSIS
- STAT 1321 - APPLIED TIME SERIES
- STAT 1731 - STOCHASTIC PROCESSES
- STAT 1741 - APPLIED PROBABILITY THEORY

Computer Systems

Students pursuing this specialization will gain depth of knowledge in the development, deployment, and analysis of the complex computer and information systems necessary for tackling large-scale data science problems

- CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

- CS 1550 - INTRODUCTION TO OPERATING SYSTEMS
- CS 1555 - DATABASE MANAGEMENT SYSTEMS or
- INFSCI 1022 - DATABASE MANAGEMENT SYSTEMS
- CS 1635 - INTERFACE DESIGN METHODOLOGY or
- INFSCI 2415 - INFORMATION VISUALIZATION
- CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS
- CS 2450 - PARALLEL COMPUTING
- INFSCI 2125 - NETWORK SCIENCE & ANALYSIS

Data Science in Context

Students pursuing this specialization will gain depth of knowledge in both the technical and organizational aspects of the management, curation, description, preservation, and application of digital datasets of varying sizes in specific business, professional, or scientific contexts. We expect the collection of courses within the specialization to expand as more domain-specific data science courses begin to be offered across campus.

- LIS 2407 - METADATA
- LIS 2676 - RESEARCH DATA MANAGEMENT
- LIS 2679 - TECHNOLOGIES FOR DATA PRESERVATION AND DATA FORENSICS

Capstone

Select a capstone course, relevant to the chosen specialization, from the following list.

- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
- MATH 1103 - MATHEMATICAL PROBLEMS IN BUSINESS, INDUSTRY, AND GOVERNMENT
- STAT 1961 - STATISTICAL DATA SCIENCE IN ACTION
- Any faculty-guided research project, subject to approval by the Data Science program director(s).

Grade Requirements

Students must earn at least a C grade in each course required for the major.

Writing requirement

The writing requirement for Dietrich School students will be fulfilled by enrollment in the writing-intensive course CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY.

Digital Narrative and Interactive Design, BA/BS

The Digital Narrative and Interactive Design major (DNID) harnesses the narrative, world-building, and media studies strengths of the English department and the coding, software development, and human computer interface strengths of the School of Computing and Information. It draws upon existing initiatives in game design at SCI and critical game studies, making, and media production within the English department. Students will learn how to build interactive narrative systems such as games, interactive literature, virtual reality environments and other interactive media experiences in a variety of fields. They will learn to creatively combine design with narrative, code with story. This uniquely positions majors in today's workforce: game and interactive media design is booming in nearly every field and sector. What these positions require, and what is currently in short supply, are individuals capable of both understanding the intricacies of narrative and implementing that knowledge in the form of computational media (coded interactive systems).

The DNID major is managed jointly by the Dietrich School of Arts and Sciences and the School of Computing and Information. This program offers training that builds a solid foundation in English (Writing, Composition, Film and Media Studies, and Literature), Computer Science, and Information Science.

Core and Upper Level Courses

Gateway course

Choose one of the following courses.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGCOMP 0425 - DIGITAL HUMANITY
- HAA 0425 - DIGITAL HUMANITY

Composition courses

Choose one of the following courses.

- ENGCOMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN
- CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Programming Basics courses

Choose one of the following courses.

- CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS
- CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS
- CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES
- INFSCI 0510 - DATA ANALYSIS

Intermediate Programming course

- CMPINF 0401 - INTERMEDIATE PROGRAMMING

Interaction and Narrative course

Choose one of the following courses. Students who take ENGLIT 0512 for their Gateway course may not use it to fulfill this requirement.

- ENGLIT 0512 - NARRATIVE AND TECHNOLOGY
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1002 - GAME, STORY, PLAY

Media Literacy course

Choose one of the following courses.

- ENGFLM 0355 - VISUAL LITERACY
- ENGFLM 0401 - IMAGES, ICONS, AND IDEAS
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA
- ENGFLM 1680 - ANIMATION STUDIES
- FMST 0100 - VISUAL LITERACY
- FMST 0505 - INTRODUCTION TO NEW MEDIA
- FMST 1510 - ANIMATION STUDIES

Data Literacy course

Choose one of the following courses.

- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS

Elective courses

Students must complete two elective courses from the **School of Computing and Information** and two elective courses from the **Dietrich School of Arts and Sciences**. Courses offering a depth of knowledge in pre-identified areas of interest are clustered together to provide a guide for students; Students are not required to follow nor declare a specific track.

Online Media track

School of Computing and Information courses

Choose two of the following courses.

- CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY
- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS
- INFSCI 1420 - USER-CENTERED DESIGN
- INFSCI 1550 - SPATIAL INFORMATION

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCOMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCOMP 0610 - COMPOSING DIGITAL MEDIA
- ENGCOMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA

- ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION
 - ENGCOMP 1430 - USABILITY TESTING IN TECHNICAL WRITING
 - ENGFLM 0570 - INTRODUCTION TO NEW MEDIA * or
 - FMST 0505 - INTRODUCTION TO NEW MEDIA *
- * These courses may only be taken for the Online Media track if they were not used to meet the Media Literacy requirement.
- ENGFLM 0812 - MEDIA/ECOLOGY or
 - ENGLIT 0812 - MEDIA/ECOLOGY or
 - FMST 0762 - MEDIA/ECOLOGY
 - ENGLIT 1001 - INTERACTIVE LITERATURE
 - ENGLIT 1412 - SECRET PITTSBURGH
 - ENGWRIT 0710 - INTRO TO AUDIO STORYTELLING
 - ENGWRIT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE
 - ENGWRIT 1501 - TOPICS IN CREATIVE WRITING
 - GSWS 1210 - GENDER AND THE DIGITAL

Game Design track

School of Computing and Information courses

Choose two of the following courses.

- CS 1566 - INTRODUCTION COMPUTER GRAPHICS
- CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION
- CS 1674 - INTRODUCTION TO COMPUTER VISION
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1014 - GRAPHICS
- INFSCI 1450 - GAME DESIGN
- INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCOMP 1130 - PROJECTS IN DIGITAL COMPOSITION
- ENGFLM 0570 - INTRODUCTION TO NEW MEDIA or
- FMST 0505 - INTRODUCTION TO NEW MEDIA
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 0812 - MEDIA/ECOLOGY or
- ENGLIT 0812 - MEDIA/ECOLOGY or
- FMST 0762 - MEDIA/ECOLOGY
- FMST 1412 - CINEMA AND VIDEO GAMES
- ENGLIT 0702 - INTRODUCTION TO GAME STUDIES
- ENGLIT 1001 - INTERACTIVE LITERATURE
- ENGLIT 1002 - GAME, STORY, PLAY

- ENGLIT 1355 - VIRTUAL REALITY
- ENGWR 0520 - INTRODUCTION TO FICTION WRITING
- ENGFLM 1760 - CINEMA AND VIDEO GAMES

Critical Making track

School of Computing and Information courses

Choose two of the following courses.

- CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS
- CS 1567 - PROGRAMMING SYSTEM DESIGN ON A MOBILE ROBOT PLATFORM
- CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 1059 - WEB PROGRAMMING

Dietrich School of Arts and Sciences courses

Choose two of the following courses.

- ENGCM 0520 - INTEGRATING WRITING AND DESIGN
- ENGCM 0610 - COMPOSING DIGITAL MEDIA
- ENGCM 0712 - CRITICAL MAKING or
- ENGLIT 0712 - CRITICAL MAKING or
- ENGFLM 0712 - CRITICAL MAKING or
- FMST 0760 - CRITICAL MAKING
- ENGCM 1200 - ADVANCED TOPICS IN COMPOSITION
- ENGCM 1430 - USABILITY TESTING IN TECHNICAL WRITING
- ENGFLM 0585 - TECHNOLOGIES OF THE BODY or
- FMST 0790 - TECHNOLOGIES OF THE BODY
- ENGFLM 0590 - FILMMAKING: PRODUCTION AND CRITICISM or
- FMST 0710 - FILMMAKING: PRODUCTION AND CRITICISM
- ENGFLM 0812 - MEDIA/ECOLOGY or
- ENGLIT 0812 - MEDIA/ECOLOGY or
- FMST 0762 - MEDIA/ECOLOGY
- ENGLIT 0521 - SCAN CULTURE: SURVEILLANCE AND THE DIGITAL
- ENGLIT 1355 - VIRTUAL REALITY
- ENGWR 0710 - INTRO TO AUDIO STORYTELLING
- ENGWR 1501 - TOPICS IN CREATIVE WRITING

Capstone sequence

The Capstone sequence allows students to design and implement a signature project to complete the major. Students start with the design project (Project 1) and complete the sequence with the implementation project (Project 2) in consultation with their advisors. Students seeking Independent Study or Directed Study options for the capstone sequence should work with their advisors to ensure that the work done in these courses will complete the sequence.

Project 1

Choose one of the following courses.

- ENGCMP 1910 - BRIDGE SEMINAR
- ENGLIT 1900 - PROJECT SEMINAR
- ENGLIT 1901 - INDEPENDENT STUDY (by special arrangement only)

Project 2

- CMPINF 1981 - PROJECT STUDIO
- CS 1902 - DIRECTED STUDY (by special arrangement only)
- INFSCI 1730 - INDEPENDENT STUDY (by special arrangement only)
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT

Additional Information

Writing (W) requirement

Dietrich School students must complete at least one W-course in the major. ENGCMP 0610 fulfills this requirement.

Grade requirements

Students must maintain at least a 2.0 GPA in all courses that apply toward the major.

Satisfactory/No Credit option

There is no limit to the number of English (ENGCOMP, ENGFLM, ENGLIT, ENGWRT, FMST) courses that can be taken on the S/NC basis for this major. No School of Computing and Information courses (CMPINF, CS, INFSCI) courses may be taken on an S/NC basis.

Advising

Digital Narrative and Interactive Design is a joint undergraduate degree between the Dietrich School of Arts and Sciences and the School of Computing and Information. Students enrolled in each school are advised by advisors within that school.

Physics and Quantum Computing, BS

Given the robust academic efforts to build quantum machines, as well as the growing industrial efforts in quantum information (Google, IBM, Microsoft, Amazon, Northrup Grumman, Intel, Honeywell, plus numerous smaller companies and startups) there is a real need for students who are trained to live with one foot on either side of the present divide. Put another way, we can build systems with one to a few elements, and we know important problems we could solve with a quantum computer containing thousands or millions of qubits, but how do we get from one to the other? It is clear that students who can address this issue will find good opportunities to apply their skills in both academia and industry.

The Physics and Quantum Computing, BS major will train the students who will bridge this gap as they flesh out a nascent quantum computing industry. For the student who wishes to pursue graduate school (which is currently the level at which most industrial labs are hiring) where hybrid programs do not currently exist, the major is designed with an optional CS or physics 'Focus' add-on of three top-level classes to fill in classes required for entry into the respective graduate programs.

At a more practical level, for those students who seek gainful employment with only their undergraduate degrees, the mixing of physics' focus on investigation and problem solving with true fluency in computer science will provide a very strong toolbox for their future endeavors. Compared to a

traditional physics major, our graduates would have computer skills to make them a less training-intensive hire; compared to a traditional CS major our graduates would have facility with physics concepts and problem solving techniques, both classical and quantum.

As currently designed the major requires 73 credits. The optional CS or Physics 'Focus' would boost the credit total to 82.

Program Requirements

Mathematics (18 credits)

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2
- MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG OR MATH 1180 OR MATH 1185
- MATH 0290 - DIFFERENTIAL EQUATIONS OR MATH 1270

Introductory Physics Courses (9 credits)

- PHYS 0174 - BASIC PHYSICS, SCIENCE AND ENGINEERING 1 (INTEGRATED)
 - PHYS 0175 - BASIC PHYSICS, SCIENCE AND ENGINEERING 2 (INTEGRATED)
OR
 - PHYS 0475 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 1
 - PHYS 0476 - INTRODUCTION TO PHYSICS, SCIENCE AND ENGINEERING 2
- AND
- PHYS 0330 - PHYSICS AND QUANTUM COMPUTING SEMINAR

Introductory and Intermediate Computer Science (13 credits)

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Intermediate and Advanced Physics Courses (16 credits)

- PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
- PHYS 1331 - MECHANICS
- PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
- PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
- PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1

Advanced Computer Science (9 credits)

- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
- CS 1613 - QUANTUM COMPUTATION

Physics Laboratory Courses (at least 5 credits)

Five credits must be chosen from the following:

- PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING OR PHYS 0520 - MODERN PHYSICS MEASUREMENTS
- PHYS 0525 - ANALOG AND DIGITAL ELECTRONICS
- PHYS 1361 - WAVE MOTION AND OPTICS
- PHYS 1426 - MODERN PHYSICS LABORATORY
- PHYS 1415 - QUANTUM PHYSICS AT THE NANOSCALE

Capstone Research or Project or Internship (3 credits)

All majors must complete a capstone experience prior to graduation. It is the intention that this mirror the format of the CS capstone project (physics lacks an equivalent, though directed research is common among physics undergraduates). The requirement can be satisfied by one semester of directed research with a physics or CS faculty member, or a CS Capstone Project (CS 1980, CS 1981). Alternately, students may instead undertake an internship (for CS this requires registration in CS 1900). There are growing opportunities for QC-specific undergraduate fellowships that may be of interest to majors, see for example: <https://www.ibm.com/quantumcomputing/internship/> and the various programs linked there.

OPTIONAL Focus in Computer Science or Physics (9 credits)

This group of courses is designed to prepare interested students for graduate studies in CS or Physics, and can also allow for the addition of specialized special topic or elective courses to the major given adequate enrollment and departmental resources. Currently the courses for the focus options are:

- PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
 - PHYS 1372 - ELECTROMAGNETIC THEORY
 - PHYS 1373 - MATHEMATICAL METHODS IN PHYSICS
- OR
- Three CS courses (9 cr. total) at 1500 level or above.

Total Credits: 73 or 82

Department of Computer Science

The Department of Computer Science is part of the School of Computing and Information. It offers a Bachelor of Science in Computer Science degree, a Computer Science minor, and a Bachelor + Master of Science in Computer Science. See programs below for more information.

Major

Computer Science, BS

Note: The requirements outlined in this section represent minimum degree satisfaction. Please consult the School of Computing and Information's Student Resources site for detailed policies, procedures, forms, and advising resources.

The new requirements are in effect for students admitted in Fall 2023 or later. Students who entered the program earlier than Fall 2023 will be permitted to opt to use the new requirements by making a formal request to the Department.

The department-level rules set forth in the following document apply to students who declared their CS major during or after the 2023-24 Academic Year.

Eligibility for Major

To be considered for admission to the CS undergraduate program, students must complete the following CS core courses with a grade of C or better in each course:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING *
- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

*Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Python, C++, or Java programs would be sufficient. It is also possible to take one of the department's service courses, such as CS 0007, as preparation. Preparatory classes of this nature do not count toward the student's major requirements.

Grade Policies for CS Majors

Satisfactory/No-Credit (S/NC) Grade Options

Students should check with their academic advisors before deciding to take a course S/NC (formerly the S/N option). Beyond the School's Regulations for students enrolling in courses with the S/NC grade option, the Department of Computer Science imposes the following rules:

- All computer science courses for the major (core and upper-level courses) must be taken for a letter grade.
- Required mathematics courses may be taken with the S/NC option.

Before deciding on the grading system for a course, students should be sure that their decision will not adversely affect their plans for a major. They must discuss this decision with their advisor PRIOR to enrolling and selecting the S/NC grade option.

Individual Course Grades

All computer science courses for the major (core and upper-level courses) must be completed with a C grade or better to count for the CS major. ANY course taken to satisfy a major requirement, including MATH courses required by the major, for which only a C- grade or lower is received, must be repeated. If a grade of C- or lower is earned in a prerequisite course, the course must be repeated before the higher-level course may be taken.

Departmental Honors

Students may graduate with honors if they have also:

- Completed an additional upper-level elective CS course
- Have a CS GPA of at least 3.5
- Have an overall GPA of at least 3.25

Major Requirements

The computer science major requires a total of 54 credits distributed across computer science courses, mathematics co-requisite courses, and a capstone experience. Details provided below.

Core Courses

Students must satisfactorily complete the following eight core courses:

3-Course Sequence on programming, data structures, and algorithms.

- CMPINF 0401 - INTERMEDIATE PROGRAMMING *
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2

2-Course Sequence on systems.

- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

2-Course Sequence on discrete math and theory.

- CS 0441 - DISCRETE STRUCTURES FOR CS
- CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
1 Course on probability and statistics with computer science applications.
- CS 1503 - MATHEMATICAL FOUNDATIONS OF MACHINE LEARNING **

*Students should have some programming experience (usually acquired in high school) before taking CMPINF 0401. Any high school course that includes the writing of several Pascal, C++, or Java programs would be sufficient. It is also possible to take one of the department's service courses, such as CS 0007, as preparation. Preparatory classes of this nature do not count toward the student's major requirements.

**Students pursuing CS and a second major in in Data Science, Physics and Quantum Computing, and Computational Biology have options regarding the probability and statistics course. These students should discuss this requirement with their academic advisor.

Upper-Level Elective Courses

In addition, students must complete 18 credits or six courses of upper-level electives (numbered 1500 or higher).

Internships, directed studies, capstone courses and co-op courses may not be used to satisfy this requirement (see Capstone Experience section for details).

Required Mathematics Courses

A minimum of seven credits in mathematics must be completed as follows:

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG

Note: Students should complete their required mathematics courses early since there are pre- or co-requisites for other courses in the curriculum. Typically, MATH 0220 would be completed in the freshman year. Students may elect to take MATH 1180 - LINEAR ALGEBRA 1 as an alternative to MATH 0280.

Capstone Experience

All Computer Science majors must complete a capstone experience prior to graduation. This experience may be satisfied in several ways including:

- Completion of an approved 3-credit academic internship
- Completion of an approved 3-credit directed research project
- Completion of a capstone designated course
- Completion of at least 2 rotations of an approved co-op
Students are allowed to complete more than one capstone experience but a capstone course may NOT be used in place of a CS Upper-Level Elective course.
Course catalog numbers for capstone options are:
 - CS 1900 - INTERNSHIP
 - CS 1906 - COMPUTER SCIENCE COOPERATIVE PROGRAM
 - CS 1950 - DIRECTED RESEARCH: CAPSTONE
 - CS 1980 - TEAM PROJECT DESIGN AND IMPLEMENTATION

Sample Plan of Study

Below is a sample plan for students in the Computer Science Major in the School of Computing and Information. Note that there are many paths through the Computer Science major and any student's path may differ from the one shown. Generally, our advisors will help each student to customize their career plan.

Prior to admission, this plan assumes that a student has:

- Completed an introductory programming course
- Satisfied the ENGCOMP 0200 enrollment requirement with an SAT score equivalent to "Workshop in Composition (ENGCOMP 0150)"
- A sufficient mathematics background to satisfy the enrollment requirement for MATH 0220 through either an SAT score or ALEKS placement results.

	FALL	SPRING
YEAR 1	CMPINF 0401 (4 cr) MATH 0220 (4 cr) CMPINF 0001 (1 cr) CMPINF 0010 (4 cr) ENGCOMP 0200 (3 cr) TOTAL: 16 credits	CS 0445 (3 cr) MATH 0280 (3 cr) CS 0441 (3 cr) GER (3 cr) GER (3 cr) TOTAL: 15 credits
YEAR 2	CS 1503 (4 cr) CS 0447 (3 cr) GER (3 cr) Elective (3 cr) Elective (3 cr) TOTAL: 16 credits	CS 0449 (3 cr) CS 1501 (3 cr) GER (3 cr) GER (3 cr) Elective (3 cr) TOTAL: 15 credits
YEAR 3	CS 1502 (3 cr) CS UL 1 (3 cr) GER (3 cr) GER (3 cr) Elective (3 cr) TOTAL: 15 credits	CS UL 2 (3 cr) CS UL 3 (3 cr) GER (3 cr) GER (3 cr) Elective (3 cr) TOTAL: 15 credits
YEAR 4	CS UL 4 (3 cr) CS UL 5 (3 cr) Capstone (3 cr) GER (3 cr) Elective (3 cr) TOTAL: 15 credits	CS UL 6 (3 cr) CS UL 7 or Elective (3 cr) GER (3 cr) Elective (3 cr) Elective (3 cr) TOTAL: 15 credits

Note 1: GER = General Education Requirement, UL = Upper-level

Note 2: Electives may be used for the SCI requirement of a secondary field of study (ex: minor, certificate, etc.).

Note 3: One course must satisfy the Diversity Requirement.

Total Major Credits: 54

Computer Science, BS/MS

In order to complete both degrees in five years, the student must be very well-prepared as an incoming freshman, ready to take our core CS courses. They must plan from the outset to follow a tightly packed, challenging, three-year course schedule, plus satisfy all the conditions (see below) before the end of the junior year in order to be certified for early admission to our MS program.

The course requirements for the BS+MS program will total 138 credits. They are based on the currently existing requirements for each program separately.

Required Progress in Undergraduate Studies

A computer science major must have achieved the following in (approximately) three years of study toward the BS degree at Pitt:

- Completion of 96 credits of coursework
- At least 37 CS credits required for the BS degree
- 11 to 12 credits in Math/Stat required for the BS degree
- The particular CS courses (22 credits) and the particular Math/Stat courses (18 credits) that are specified as prerequisites for admissions to the MS program
- All General Education requirements specified by SCI
- All of the above with a QPA of at least 3.3, both overall and in computer science.

Early Entry into the MS Program

If a student meets the conditions, a computer science faculty committee will certify that fact and admit them to the MS program.

- Admission will be formalized using a minimal procedure based on the completion of relevant parts of the regular graduate application form and a special checklist form identifying all above-specified requirements, including those in general education.
- Upon certification of a student's admissibility, the following offices will be notified: CS Graduate Programs, SCI, and the Registrar.
- The student will have approximately one year of study remaining to complete 24 credits toward the BS degree and to get started with selected graduate-level courses.
- One year will remain for study dedicated to the MS degree program.

Degree Requirements

- One of the required courses for the MS degree, either CS 1510 or CS 1511, should be taken among the 96 credits of undergraduate coursework, thereby leaving only 27 credits necessary for the project-based MS degree;
- Only one course may be counted towards both CS-BS and CS-MS degrees. The course must be either CS 1510 or CS 1511;
- All cross-listed courses, such as CS 1510 and CS 2012, may be counted only once;
- As a senior, the student can register for up to three graduate courses (nine credits) in some pattern distributed over the two terms of an academic year;
- For the project-based MS degree, the balance of 18 credits of required courses (as described in the MS degree requirement) must then be taken during the fall and spring terms of the fifth year of study;
- For the thesis-based MS degree, the balance of 15 credits of required courses (as described in the MS degree requirement), and 6 credits of CS 2000 must then be taken during the fall and spring terms of the fifth year of study;
- The summer term between the fourth and fifth years can be used by the self-supporting student to get a head start on the three-credit MS project. Use of the summer is only an option, not a requirement.

Summary of Course Requirements and Prerequisites

- Core CS courses (16 credits): CS 0401, CS 0441, CS 0445, CS 0447, CS 0449
- Upper-level required courses (9 credits): CS 1501, CS 1502, CS 1550
- Upper-level electives courses (15 credits): At least five additional 1000-level courses
- Required Math/Stats courses (11-12 credits): MATH 0220, MATH 0230, and one of the following: STAT 1000, STAT 1100, STAT 1151

Prior to graduation, all CS majors must satisfy the Capstone Experience requirement.

MS Program Requirement

Course Requirements

The MS degree requires 30 credits of formal course work. The 30 credits include a total of 24 credits plus an MS thesis, CS 2000; or 27 credits plus an MS project, CS 2910.

The 30 credits must include one course from each of the following **foundation areas**:

Theory and Algorithms

- CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS or
- CS 2110 - THEORY OF COMPUTATION or
- CS 1510 - ALGORITHM DESIGN (must be taken among undergraduate work) or
- CS 1511 - THEORY OF COMPUTATION (must be taken among undergraduate work)

Architecture and Compilers

- CS 2410 - COMPUTER ARCHITECTURE or
- CS 2210 - COMPILER DESIGN

Operating Systems and Networks

- CS 2510 - COMPUTER OPERATING SYSTEMS or
- CS 2520 - WIDE AREA NETWORKS

Artificial Intelligence and Database Systems

- CS 2710 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE or
- CS 2550 - PRINCIPLES OF DATABASE SYSTEMS

In addition to the 12 credits needed to satisfy the foundation area courses, a student has to complete additional coursework based on one of the two following options:

- Thesis Option: six credits for the MS thesis + at least 12 additional credits of graduate Department of Computer Science courses.
- Project Option: three credits for the MS project + at least 15 additional credits of graduate Department of Computer Science courses.

General Requirements

- All courses except the project or thesis must be taken for a letter grade.
- The student must receive a grade of B or better in each of the Foundation Area courses, a grade of B- or better for all other courses, and must maintain an overall average of B or better
- The additional coursework cannot include independent or directed study courses (CS 2900, CS 3000), MS thesis (CS 2000) or project (CS 2910), graduate internship (CS 2900), cooperative (CS 2905), or research courses (CS 2001, CS 2002, CS 2003, and CS 3900).
- Two CS 20XX courses are allowed as additional coursework, the remaining additional courses must be 21XX or higher.
- One course may be taken outside the department if approved by GPEC. The outside course will reduce by one the number of allowed CS 20XX courses.

Minor

Computer Science Minor

A 16 credit minor in computer science is available. The minor is essentially 5 of the 6 courses that are considered the "core" of the CS major. This is a rigorous minor. This minor is not intended for casual students interested in computer literacy.

The requirements for the CS minor are:

- CMPINF 0401 - INTERMEDIATE PROGRAMMING*
- CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
- CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE
- CS 1501 - ALGORITHMS & DATA STRUCTURES 2
- and one of the two courses: CS 0441 - DISCRETE STRUCTURES FOR CS, CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE**.

*CMPINF 0401 requires programming experience as a prerequisite. A student without any programming background would be advised to take the 3 credit course CS 0007 as preparation for CMPINF 0401.

**The typical minor consists of CMPINF 0401, CS 0441, CS 0445, CS 0447 and CS 1501, is a prerequisite for CS 1501. However, students with very strong math backgrounds (ex: Math majors) may be able to waive the CS 0441 prerequisite for CS 1501 and thus take CS 0449 rather than CS 0441.

Department of Informatics and Networked Systems

The Department of Informatics and Networked Systems is part of the School of Computing and Information at the University of Pittsburgh. The Department's academic programs, research, and innovation are at the confluence of Data/Information, Networks, and Human Behavior, anchored by both a systems focus and people focus.

Mission

To innovate in education and research at the junction of **information, networks, and human behavior** towards discovery and modeling of new social and technical phenomena.

Vision

To empower humans and society through modeling and designing systems that are accountable, resilient, trustworthy, sustainable and ethical, and through synthesizing and advancing fundamental science in **information, networks, and human behavior**.

Academic Programs

The Department offers a number of rigorous and innovative undergraduate majors:

- Bachelor of Science in Information Science
- Bachelor of Science in Computational Social Science

The Department collaborates with the Department of Computer Science and the Dietrich School of Arts & Science's Department of Mathematics and Statistics to offer the following major:

- Bachelor of Science in Data Science

The Department collaborates with the Dietrich School of Arts & Sciences' Department of English to offer the following major:

- Bachelor of Science in Digital Narrative and Interactive Design

In addition, the Department offers an Accelerated BS/MS program. This accelerated option is available to students who are enrolled in one of the undergraduate degree programs at the School of Computing and Information and who seek to earn the Masters of Science in Information Science.

For more information, please visit our Department's Web site at: www.dins.pitt.edu

Our Department can be contacted at:

Informatics and Networked Systems

Room 717, IS Building

135 N. Bellfield Avenue

Pittsburgh, PA 15260

412-624-9473

dins-info@pitt.edu

Major

Information Science, BS

The department-level rules set forth in the following document apply to students who are admitted to the University during the **2023-24 Academic Year**. Students who admitted prior to this academic year should refer to the Archived Catalogs for departmental-level rules and major requirements. Students who admitted to the University PRIOR to the 2017-2018 Academic Year will find the department-level rules and major requirements to which they are bound by going to the Archived Catalogs for the School of Information Sciences.

Note: The requirements outlined in this section represent minimum degree satisfaction. Please consult the School of Computing and Information's Current Students Web site for detailed policies, procedures, forms, and advising resources.

We are in a connected world where humans, software applications and data are all linked through intricate networks. Everyday objects like cars, doorbells and coffee machines, specialized equipment for healthcare and even infrastructure like roads, are smart and communicate data. These data become useful to humans and society when they are securely associated with other data, objects, individuals, groups and organizations to make decisions through computation to solve problems.

The Information Science major (BSIS) in the Department of Informatics and Networked Systems has been built to provide:

- A strong **foundation** in the science of how data, human-centered systems and networks work together to solve problems
- A broad **understanding** of systems analysis, data management, network design and security, and how they are integrated and work together to make effective decisions
- **Coursework** that addresses cutting-edge subjects such as user experience, datamining, computer forensics, cloud computing, 5G wireless and information visualization
- **Research** projects with faculty, student peers, and local non-profits
- Career **agility** - every industry needs information science expertise, so you'll find successful career opportunities in healthcare, manufacturing, communications, finance, education, technology, and entertainment.

Eligibility for Major

Students can declare the IS major after they have completed CMPINF 0401, INFSCI 0310, and two other courses (from INFSCI 0410, 0510 and 0610) with a grade of C or better in each class.

In addition, students need to have at least a 2.0 overall GPA and be in good academic standing.

Students must declare the major by the School's deadlines.

- CMPINF 0401 - INTERMEDIATE PROGRAMMING
 - INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- And any two of:
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
 - INFSCI 0510 - DATA ANALYSIS
 - INFSCI 0610 - NETWORKS AND INFORMATION

Grade Policies for Information Science Majors

Satisfactory/No-Credit (S/NC) grade options for IS majors

The student should check with his or her academic advisor before deciding to take a course S/NC (formerly the S/N option). Beyond the School's Regulations for students enrolling in courses with the S/NC grade option, the Department of Informatics and Networked Systems (DINS) does not accept S grades for courses required for the completion of the Information Science major except for the Cooperative Program and Internship courses. Students should be sure, before deciding on the grading system for a course, that their decision will not have an adverse effect on their plans for a major. They must discuss this decision with their advisor PRIOR to enrolling and selecting the S/NC grade option.

Individual Course Grades & GPA Requirement

Students must achieve a 2.0 GPA for each of the classes counted toward the Information Science major, therefore earning a C or better for each course counted towards graduation in the Information Science major. As such, all courses completed for the major (Quantitative Math and Stats, Core, Upper-Level Electives, and Capstone) must be repeated or replaced by a comparable course if a grade of C- or lower is received. If a grade of C- or lower is earned in a prerequisite course, the course must be repeated before the higher-level course may be taken. If a grade of C- or lower is earned in any course taken to satisfy a major requirement, the course must be repeated or replaced. Additional coursework must be successfully completed, meeting the minimum requirements to earn credit. Course repetitions are subject to the School's Course Repeat Policy found in the Credit and Enrollment Policy section of the SCI Catalog

Departmental Honors

Students may graduate with honors if they have also:

- Completed a sixth upper-level elective IS course (numbered above 1100). The student may not use an independent study or internship to count as this additional upper-level course.
- Have an IS GPA of at least 3.5
- Have an overall GPA of at least 3.25

Major Requirements

Beginning in Fall 2020, students declaring an IS major will be required to complete:

- One approved programming course
- Seven core courses
- Five upper-level electives
- Two approved mathematics courses (see below)
- One approved statistics course (see below)
- One capstone class

Programming Course

- CMPINF 0401 - INTERMEDIATE PROGRAMMING

Core Courses

- INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0510 - DATA ANALYSIS
- INFSCI 0610 - NETWORKS AND INFORMATION
- INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS
- INFSCI 1600 - SECURITY AND PRIVACY

Upper-level Electives

- INFSCI 1420 - USER-CENTERED DESIGN
- INFSCI 1430 - USER EXPERIENCE ENGINEERING
- INFSCI 1440 - SOCIAL COMPUTING
- INFSCI 1450 - GAME DESIGN
- INFSCI 1460 - IT PROJECT MANAGEMENT
- INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING
- INFSCI 1540 - DATA ENGINEERING
- INFSCI 1550 - SPATIAL INFORMATION
- INFSCI 1560 - INFORMATION STORAGE AND RETRIEVAL
- INFSCI 1570 - NETWORK AND WEB DATA TECHNOLOGIES
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY
- INFSCI 1630 - COMMUNICATION NETWORKS
- INFSCI 1640 - WIRELESS NETWORKS
- INFSCI 1650 - MULTIMEDIA COMMUNICATIONS
- INFSCI 1660 - COMPUTER NETWORKING LABORATORY
- INFSCI 1670 - SECURITY MANAGEMENT AND COMPUTER FORENSICS
- INFSCI 1690 - CLOUD COMPUTING

Required Mathematics and Statistics Courses

Students must complete the following quantitative and statistical skills classes. One class from each section will overlap with the School's General Education Requirements.

- MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS I
- MATH 0280 - INTRO TO MATRICES & LINEAR ALG OR MATH 1180 - LINEAR ALGEBRA I OR MATH 1185 - HONORS LINEAR ALGEBRA
- STAT 1000 - APPLIED STATISTICAL METHODS OR STAT 1100 - STATISTICS AND PROBABILITY FOR BUSINESS MANAGEMENT

Capstone

Students in the BS in Information Science major are required to successfully complete a capstone experience, learning how to apply what they learned in the classroom to real-world situations. Students can choose from among a selection of experiential learning opportunities including team-based project classes, independent study courses supervised by research faculty in the School, and internships/co-ops with regional or national industries and organizations. The capstone requirement means that students will gain valuable experience that is aligned with their interests and career goals. Students in the IS major are permitted to take up to two INFSCI 1700+ courses: one will count towards the capstone requirement and one will count towards the upper-level elective requirement.

- INFSCI 1082 - INFORMATION SCIENCE COOPERATIVE PROGRAM
(2 rotations and completion of a paper required)
- INFSCI 1700 - DATA-DRIVEN COMMUNICATION
(3 credits)
- INFSCI 1710 - DIRECTED RESEARCH
(3 credits required)
- INFSCI 1720 - INTERNSHIP
(3 credits required)
- INFSCI 1730 - INDEPENDENT STUDY
(3 credits required)
- INFSCI 1740 - TEAM-BASED CAPSTONE PROJECT
(3 credits required)

Sample Plan of Study

	Fall	Spring
Year 1	CMPINF 0001 CMPINF 0010 CMPINF 0401 ENGCOMP 0200 MATH 0220 TOTAL: 16 credits	INFSCI 0310 INFSCI 0410 STATS 1000 or 1100 GER Elective TOTAL: 16 credits

	TOTAL: 15 credits	TOTAL: 13 credits

Minimum credits are represented, this may vary depending on student's course selection.

Minor

Information Science Minor

In every profession, actions are taken, and decisions are made, using information, systems, and/or networks. Companies collect data to determine future product lines, banks and financial institutions depend upon complicated and real-time systems to move money, while all governments depend on the secure and efficient transmission of data across regional and international networks. Whether you plan to work in healthcare, manufacturing, finance, education, politics, or sales, having skills in system design, network management, and data analysis will make you more marketable to employers. How to do this while still following your undergraduate degree plans? Select the Minor in Information Science. While mastering your chosen discipline, you can gain a strong foundation in understanding information, analyzing/transmitting/securing information in context, and using information in decision-making.

The Department of Informatics and Networked Systems is home to one of the oldest Information Science majors in the United States. Our degree and research programs are at the confluence of information, networks, and human cognition, perception, and behavior.

Now, our 15-credit Minor allows University of Pittsburgh students from any degree program to add technical expertise to their professional capabilities. In the Information Science Minor, students take one required programming course and a select combination of electives to design a program of study that best suits their potential career goals. Students can choose a series of courses that are of interest to them, or courses that will provide more in-depth study on a specific topic by following one of the optional pathways described below.

The Minor in Information Science will comprise five (5) classes including one required course and a minimum of four INFSCI classes. Only INFSCI courses numbered 0100 and greater can be used in the minor. Internship, capstone courses (courses in INFSCI 17XX) and co-ops cannot be used for the minor.

Several optional pathways are suggested below. Please note some classes have prerequisites.

Required Programming Course

Students are required to complete an intermediate course in programming. Only ONE of these two courses will count toward the minor.

- INFSCI 0201 - INTERMEDIATE PROGRAMMING WITH PYTHON
- CMPINF 0401 - INTERMEDIATE PROGRAMMING

If students have equivalent skills in programming (Java, Python), they may substitute a different INFSCI course in place of INFSCI 201 or CMPINF 0401. Course substitutions require departmental approval.

Minor Electives

In addition to the required programming course, students will select four INFSCI courses numbered 0100 or greater. The paths outlined below are examples of courses that can be clustered together to achieve a specific educational or professional goal. The paths are optional.

The most general path comprises the core components of Information Science - Human Centered Systems, Data Analysis, and Networks and Information.

Suggested classes include:

- INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0510 - DATA ANALYSIS
- INFSCI 0610 - NETWORKS AND INFORMATION

Pathway Electives

As noted above, the optional paths outlined below are examples of courses that can be clustered together to achieve a specific educational goal. It is not required to follow a specific pathway.

How to Declare the Minor in Information Science

Students declare the Minor by completing the Undergraduate Minor Declaration/Change Form.

It is recommended that students declare the Minor by the end of the term in which they will earn 90 credits, to ensure enough time to enroll in appropriate and/or desired courses. Students are welcome to declare the Minor in Information Science prior to that time.

User Experience Pathway

The User Experience pathway prepares students with the skills and capabilities to design and develop technology solutions that address problems and improve the user experience. Guided by the design thinking process, students tackle problems by assessing the needs and goals of users and other stakeholders; learn how to develop quality solutions through ideation, prototyping, and testing; and strengthen their communication skills in order to work across a variety of stakeholders and users.

Suggested classes include:

- INFSCI 0410 - HUMAN-CENTERED SYSTEMS
- INFSCI 0510 - DATA ANALYSIS
- INFSCI 1400 - ANALYSIS OF INFORMATION SYSTEMS
- INFSCI 1430 - USER EXPERIENCE ENGINEERING
- INFSCI 1450 - GAME DESIGN
- INFSCI 1460 - IT PROJECT MANAGEMENT

Data Analytics Pathway

A rigorous Python programming grounding (INFSCI 0201) is recommended for the Data Analytics pathway. This pathway creates the competencies to (i) scrape, munge, explore data from different sources including the web, (ii) work with database management systems, including relational, graph, and document databases (iii) build models of data in Python/R ranging such as linear and logistic regression, support vector machines, Bayesian inference and time series (iv) do Monte-Carlo and discrete event simulations in Python and (v) examine and visualize network data using Python/R. Visualize different types of data and create interactive visualizations using Python, R (ggplot), or D3.js.

Suggested classes include:

- INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- INFSCI 0510 - DATA ANALYSIS
- INFSCI 0530 - DECISION-MAKING IN SPORTS
- INFSCI 1500 - DATABASE MANAGEMENT CONCEPTS AND APPLICATIONS
- INFSCI 1520 - INFORMATION VISUALIZATION
- INFSCI 1530 - DATA MINING

Cybersecurity Pathway

In the Cybersecurity pathway, students learn fundamental Information Science techniques such as mathematical and agent-based modeling facilitating the establishment of cybersecurity through an understanding of networks (in particular the Internet), and foundational/practical concepts in network and information system security.

Suggested classes include:

- INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
- INFSCI 0610 - NETWORKS AND INFORMATION
- INFSCI 1049 - INTRODUCTION TO INFORMATION SECURITY
- INFSCI 1600 - SECURITY AND PRIVACY
- INFSCI 1620 - ADVANCED SECURITY AND PRIVACY
- INFSCI 1630 - COMMUNICATION NETWORKS
- INFSCI 1640 - WIRELESS NETWORKS

Policies for the IS Minor

Students who have completed courses equivalent or similar to those listed in the options above will not be able to double-count the courses with other majors, minors, or certificates. These students must substitute them with a different INFSCI course.

For example, a student who has completed CS 1555: Database Management Systems would replace INFSCI 1500: Database Management Concepts and Applications with a different data-oriented INFSCI course.

Total Credits: 15

Grand-parenting and the new School of Computing and Information

Computer Science (CS) undergraduate majors who matriculated into the University of Pittsburgh PRIOR to Fall 2017 received a communication allowing a choice to either remain in the School of Arts & Sciences or transfer to the new School of Computing and Information for completion of their CS degree.

- If a student chose to remain in the School of Arts & Sciences, they should refer to the Arts & Sciences catalog for the regulations, policies, and requirements for their degree.
- If a student applied to transfer to the School of Computing and Information, they should refer to the new school's catalog for the regulations, policies, and requirements for their degree.

Note: If a student took no action in response to the grand-parenting e-mail, they will remain in the School of Arts & Sciences by default.

For any students matriculated into the University of Pittsburgh PRIOR to Fall 2017 who have not yet declared a CS major, the student will choose to either declare their Computer Science major in the School of Arts & Sciences or apply to the School of Computing and Information.

Any student matriculating into the University of Pittsburgh AFTER Fall 2017, must apply to the School of Computing and Information in order to pursue an undergraduate degree in either Computer Science or Information Science and should refer to this School's catalog for information.

If you have additional questions or concerns, please contact the School's Office of Student Services at SCIug@pitt.edu.

School of Computing and Information Faculty

Name	Title	Department	Highest Degree	Awarding Institution
Daniel Ahn	Teaching Assistant Professor	Computer Science	PhD	University of Illinois at Urbana-Champaign

Malihe Alikhani	Assistant Professor	Computer Science	PhD	Rutgers University
Amy Babay	Assistant Professor	Informatics and Networked Systems	PhD	Johns Hopkins University
Dmitriy Babichenko	Clinical Associate Professor	Informatics and Networked Systems	PhD	University of Pittsburgh
Mary K. Biagini	Associate Professor. Department Chair	Information Culture and Data Stewardship	PhD	University of Pittsburgh
Jacob Biehl	Associate Professor	Computer Science; Information Culture and Data Stewardship	PhD	University of Illinois at Urbana-Champaign
Peter Brusilovsky	Professor	Informatics and Networked Systems	PhD	Moscow State University
Matthew Burton	Lecturer	Information Culture and Data Stewardship	PhD	University of Michigan

Erin Walker	Associate Professor	Computer Science	PhD	Carnegie Mellon University
Martin Weiss	Professor	Informatics and Networked Systems	PhD	Carnegie Mellon University
Lingfei Wu	Assistant Professor	Informatics and Networked Systems/Information Culture and Data Stewardship	PhD	City University of Hong Kong
Joseph Yurko	Teaching Assistant Professor	School of Computing and Information	PhD	Massachusetts Institute of Technology
Vladimir Zadorozhny	Associate Professor	Informatics and Networked Systems	PhD	Russian Academy of Sciences, Moscow
Youtao Zhang	Associate Professor	Computer Science	PhD	University of Arizona

School of Dental Medicine

The University of Pittsburgh Dental Hygiene Program provides a comprehensive education in both the basic sciences and clinical dental hygiene over the course of a two-year (six consecutive terms) Associate of Science Degree in Dental Hygiene. The University of Pittsburgh Dental Hygiene Program differs from other programs by providing a broader range of experiences in specialty clinics within the School of Dental Medicine, as well as clinical rotations at the University of Pittsburgh Medical Center. The major areas of focus are teaching, research, patient treatment, and community service. Dental hygiene services are rendered to a varied patient population, including pediatric, geriatric, physically and mentally challenged, and immunocompromised individuals. In addition to clinical practice, graduates are prepared for careers in areas such as education, research, and dental public health.

Students who complete the Dental Hygiene Program Associate of Science Degree in Dental Hygiene have the option of completing a Bachelor of Science degree offered through the College of General Studies. The degree completion option includes three areas of study focusing on a student's specific career goals. These areas include dental hygiene education, research, and health management. Graduates can work as licensed dental hygienists while completing their requirements for the bachelor's degree. Classes are tailored to the student's interests and can be arranged around work schedules. The program provides a firm foundation for those desiring to pursue graduate studies. (See the College of General Studies listing for more information on the Bachelor of Science degree completion option.)

Contact Information

University of Pittsburgh
School of Dental Medicine
Director, Dental Hygiene Program
B-82 Salk Hall Pittsburgh, PA 15261-1937

<http://dental.pitt.edu/students/dental-hygiene-program>

Admission Requirements and Deadlines: Associate of Science Degree in Dental Hygiene

(See Dental Hygiene Program listing under the Application for Admission section at the front of this bulletin for requirements and deadlines.)

Academic Standards: Professional/Ethical Conduct Statement for Students

Students will be evaluated on all aspects of professional behavior and ethical conduct. The evaluation will encompass criteria such as the student's interpersonal interaction with faculty, supervisors, staff, patients, and peers, as well as how the student completes all clinical and didactic assignments within scheduled deadlines and in keeping with both the quality and standards established by the Dental Hygiene Program, School of Dental Medicine faculty, and the University of Pittsburgh faculty. Additionally, student compliance with all established policies and procedures will be evaluated when considering student promotion and board eligibility.

Grading

Each dental hygiene course instructor will clearly state his/her policy regarding grades and evaluation at the beginning of the course. A course syllabus will be distributed to all students at the first class meeting. All required courses are graded according to the University's letter grade system (see Grading and Records section of this bulletin). Elective courses beyond the required number may be taken with the permission of the program director. Student advising begins with the faculty responsible for the course. It is the student's responsibility to seek assistance from the faculty in any course in which the student has a grade lower than a C.

Bachelor of Science Degree Completion Program

Students who complete this program also have the option and are encouraged to complete a Bachelor of Science in dental hygiene as offered by the College of General Studies (see College of General Studies listing for information on BS degree completion option and additional dental hygiene courses which must be taken for the BS).

School of Dental Medicine/Dental Hygiene Program Faculty

Full-Time Faculty

Elizabeth Ban, *Instructor*, RDH, BS, University of Pittsburgh

Victoria Folino Gallo, *Instructor*, RDH, MBA, Waynesburg University

Candice Kieffer, *Instructor*, RDH, MS, University of California

Faith Mahan, *Instructor*, RDH, MS, University of Pittsburgh

Adrien Roberts, *Instructor*, RDH, MS, West Liberty University

Jennifer Stodick, *Instructor*, RDH, BS, University of Pittsburgh

Kelly Wagner, *Assistant Professor, Director, Dental Hygiene Program*, RDH, MS, University of Maryland

Part-Time Faculty

Antonia Ambrosino, *Instructor*, RDH, BS, University of Pittsburgh

Gayle L. Ball, *Assistant Professor*, RDH, MA, Antioch University

Susan Ban, *Clinical Instructor*, RDH, BS, University of Pittsburgh

Victoria Green, *Instructor*, RDH, MEd, University of Pittsburgh

Program and Course Offerings

Dental Hygiene Program

Major

Associate of Science Degree in Dental Hygiene

Associate of Science Degree in Dental Hygiene Requirements

For a complete list of the required courses, please refer to the program curriculum. Upon successful completion of the course requirements, the student is eligible to take the Dental Hygiene National Board and the Commission on Dental Competency Assessment Examinations and apply for state licensure.

Program Curriculum

First Term

- DENHYG 1110 - BIOLOGICAL SCIENCES 1
- DENHYG 1112 - INTRODUCTION TO DENTAL HYGIENE
- DENHYG 1113 - INTRODUCTION TO DENTISTRY
- DENHYG 1114 - DENTAL ANATOMY
- DENHYG 1116 - DENTAL HYGIENE PRECLINIC
- DENHYG 1117 - CHEMISTRY, BIOCHEMISTRY AND NUTRITION

Credits: 17

Second Term

- DENHYG 1241 - PRINCIPLES OF MICROBIOLOGY
- NUR 0032 - MICROBIOLOGY LABORATORY
- DENHYG 1242 - BIOLOGICAL SCIENCES 2
- DENHYG 1245 - DENTAL HYGIENE RADIOLOGY 1
- DENHYG 1247 - DENTAL HYGIENE SEMINAR 1
- DENHYG 1248 - DENTAL MATERIALS
- DENHYG 1249 - DENTAL HYGIENE CLINIC 1

Credits: 14

Third Term

- DENHYG 1370 - INTRODUCTION TO CLINICAL PERIODONTICS
- DENHYG 1373 - BIOLOGICAL SCIENCES 3
- DENHYG 1375 - ANESTHESIA FOR DENTAL HYGIENIST
- DENHYG 1376 - DENTAL HYGIENE RADIOLOGY 2
- DENHYG 1377 - DENTAL HYGIENE SEMINAR 2
- DENHYG 1379 - DENTAL HYGIENE CLINIC 2

Credits: 16

Fourth Term

- DENHYG 1411 - DENTAL PHARMACOLOGY
- DENHYG 1412 - PUBLIC HEALTH DENTISTRY
- DENHYG 1417 - DENTAL HYGIENE SEMINAR 3
- DENHYG 1419 - DENTAL HYGIENE CLINIC 3
- DENHYG 1420 - ETHICS HEALTH CARE PROFESSIONAL
- DENHYG 1421 - SPECIAL NEEDS DENTISTRY
- DENHYG 1422 - HEALTH PROMOTIONS THROUGH THE LIFE SPAN

Credits: 17

Fifth Term

- DENHYG 1544 - INTRODUCTION TO RESEARCH ANALYSIS

- DENHYG 1545 - DENTAL HEALTH EDUCATION, METHODS AND PRACTICUM
- DENHYG 1547 - DENTAL HYGIENE SEMINAR 4
- DENHYG 1549 - DENTAL HYGIENE CLINIC 4

Credits: 13

Sixth Term

- DENHYG 1689 - ADVANCED CLINICAL DENTAL HYGIENE PRACTICE
- ADVANCED DENTAL HYGIENE PRACTICUM - 0 Cr. (Taken within DENHYG 1689)

Credits: 2

Total: 79

School of Education

Mission/Vision

The following statement is the Mission/Vision of the School Education, which was adopted in January 2019. It encapsulates what we do, what we believe, and who we continually seek to become as members of the School community.

We ignite learning. We strive for well-being for all. We teach. We commit to student, family, and community success. We commit to educational equity. We advocate. We work for justice. We cultivate relationships. We forge engaged partnerships. We collaborate. We learn with and from communities. We innovate and agitate. We pursue and produce knowledge. We research. We disrupt and transform inequitable educational structures. We approach learning as intertwined with health, wellness, and human development. We address how national, global, social, and technological change impacts learning. We shape practice and policy. We teach with and for dignity. We think. We dream. We lead with integrity. We are the School of Education at the University of Pittsburgh.

General Information

The School of Education (www.education.pitt.edu) is organized into four academic departments:

- Department of Educational Foundations, Organization, and Policy
- Department of Health and Human Development
- Department of Teaching, Learning, and Leading

Undergraduate degree programs are offered in the Department of Health and Human Development (HHD) and the Department of Teaching, Learning, and Leading (TLL). HHD offers the baccalaureate programs in exercise science and applied developmental psychology. TLL will offer the baccalaureate program in Teacher Education, starting in fall 2023.

Admissions

The School of Education does not admit students to its undergraduate programs at the freshman level. Therefore, students must first be admitted to another school at the University of Pittsburgh or to another institution.

If an applicant to a School of Education undergraduate program is currently a University of Pittsburgh student, the applicant should contact the dean's office of the school to which the applicant has been admitted and request an Undergraduate Academic Program Change form. After completion of this form, all records will be transferred to the School of Education, Office of Admissions and Enrollment Services, 5900 Wesley W. Posvar Hall, for review.

If an applicant to a School of Education undergraduate program is transferring from another institution, the applicant should contact the Office of Admissions and Financial Aid, Alumni Hall, for a Transfer Application. (See Transfer Student Admissions section of this catalog for more information.)

To be admitted into a Minor program in the School of Education a student must do the following:

- Be enrolled in an undergraduate program at the University of Pittsburgh.
- Complete a School of Education Admissions Application for the selected academic minor.

Advising

Each student admitted to an undergraduate program in the School of Education is assigned a faculty advisor.

Dean's List

Early each term, students whose grades in the previous grading period indicate outstanding achievement are recognized in the Dean's List.

Full-time students (those enrolled in 12 or more credits) who earned 12 credits in the preceding term (not including courses taken on the Satisfactory/Audit option) with a term GPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students (those enrolled in fewer than 12 credits) who have earned 12 credits in the SOE in previous terms (not including courses taken on the Satisfactory/Audit option) with a QPA of at least 3.50 and no grade lower than a C are placed on the Dean's List.

Part-time students are evaluated for Dean's List recognition by determining if 12 credits of letter-graded coursework have been completed since the last Dean's List recognition. If 12 credits have been completed, the GPA for the terms in which the last 12 credits were completed will be used to assess the Dean's List eligibility.

Degree Requirements

The undergraduate degree in the School of Education requires the satisfactory completion of a minimum of 120 credits of approved undergraduate study. Undergraduate degrees are conferred only on those students who have completed all courses required for the degree with a GPA of at least 2.50.

Students in the School of Education must complete at least 60 credits in courses offered at the University of Pittsburgh. Students who begin their study at the regional campuses must apply to relocate to the Pittsburgh campus for at least the last 60 credits.

Transfer Credits

With approval of faculty advisor and the Dean's designated administrator, the School of Education recommends transfer credits that meet University policy. The University will grant credit earned at other institutions based on course equivalencies, including expected learning outcomes, with those of the University curriculum and standards. In the School of Education, the maximum number of credits that can be transferred to the Bachelor Science degree is 60 credits. At the undergraduate level, no grade below C- may be transferred. Credits are only transferrable if they meet specific degree requirements. Current School of Education undergraduate students who wish to enroll at another institution with the intention of transferring credits to the University of Pittsburgh must receive prior approval from their advisor. See general Undergraduate Academic Regulations for more information.

Probation and Dismissal

All students enrolled in undergraduate programs in the School of Education are required to maintain a grade point average (GPA) of at least 2.50. The cumulative GPA is based on all course work taken after enrollment at the University of Pittsburgh. A student is automatically placed on academic probation when the cumulative GPA, exclusive of transfer credits, falls below 2.50.

Only letter grades with GPA values will be used to compute and determine academic probation status. While on probation students are limited to registering only for courses in which a letter grade is given. To continue on probation status, a student must achieve a minimum of a 3.00 GPA in 9 credits or more. A student can only be placed on academic probation status once during their program of study. Students placed on academic probation status will receive notification in the form of an email from the School of Education, and they will be recommended to seek guidance from their academic advisor.

Ordinarily, students are required to terminate study after two terms on probation if there is no improvement in the quality of their work. A student placed on academic probation status more than once is also required to terminate study. A student who does not meet the GPA or credit requirements will be dismissed from the School of Education, unless serious extenuating circumstances exist. The request for continuation must include a recommendation made by the Department Chair (or designated faculty member) and the academic advisor, with the recommendation approved by the Dean of the school.

Teacher Education Certification Programs

[S/NC grade Policy](#)

The School of Education offers both a standard letter-grade option and the Satisfactory/No-Credit (S/NC) option for students enrolled in most School of Education courses. Under the S/NC option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (no credit) is given. Courses for which an S is earned are counted toward graduation but are not computed in the GPA. Courses for which an NC is earned are not counted toward graduation or the GPA, since the NC designates that no credit has been earned.

Students can select the S/NC grade option when enrolling for a course. After the end of the add/drop period, a student must complete a Grade Option/Audit Request form and submit it to the Office of Student Records by the Grade Option deadline noted each term on the Dietrich School undergraduate calendar.

Note: There are some formal limitations to a student's choice of grading systems; students should check with an academic advisor before deciding to take a course S/NC. **No more than 2 required courses in the Teacher Education Major can be designated S/NC.**

[GPA requirement Policy](#)

All students enrolled in the teacher education major are required to maintain a grade point average (GPA) of at least 3.0. A student is automatically placed on academic probation if the cumulative GPA, exclusive of transfer credits, falls below 3.0. No student on academic probation is permitted to participate in student teaching, a teaching internship, or an advanced teaching practicum. You must earn a minimum of a C in all teacher education major coursework. Although the credits allowed for acceptable work completed elsewhere by transfer count toward the total number of credits required for teacher education study, the grades earned in such courses are not included in GPA computations.

Major

Teacher Education, BS

The proposed undergraduate (UG) teacher education major and certification program will offer UG students six Areas of Concentration (ARCOs), each aligned with a certification option in Pennsylvania: Secondary (Grades 7-12) English, Math, Science, or Social Studies and PreK-12 World Heritage Languages (45-credits for major), and PreK-12 Special Education (48-credits for major). Students will follow the general education requirements as outlined by The Dietrich School of Arts and Sciences. (<https://www.asundergrad.pitt.edu/academic-experience/general-education-requirements>)

Prerequisite Requirements

- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC
- TLL 1581 - CRITICAL HISTORIES OF EDUCATION
- TLL 1582 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING I

Additionally, you should take one course in human development. You can choose from the following options:

- HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 1003 - DEVELOPMENT: MIDDLE CHILDHOOD THROUGH ADOLESCENCE

Secondary Math Concentration

Secondary Social Studies Concentration

Secondary Science Concentration

Secondary Foreign Language Concentration

Secondary English Education Concentration

PreK-12 Special Education Concentration

Minor

Secondary Education Minor

To help undergraduate students explore the field of education and prepare for graduate work in education, the School of Education offers a flexible 15-credit Secondary Teacher Education minor. These courses allow students who plan to enter a graduate program in Secondary Teacher

Education to make progress on the prerequisite education courses required for those programs and to earn an additional credential on their official transcripts.

Completion of the teacher education minor does not guarantee admission into the School of Education graduate programs; nor does it fulfill all necessary prerequisites.

Interested students can apply by completing and submitting the online form for admission. Students can apply for the minor anytime during their undergraduate tenure.

Requirements

The Secondary Education Minor requires 15 undergraduate credits.

Required courses:

- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC (requires in-school observations)
- TLL 1704 - CURRENT ISSUES IN SECONDARY EDUCATION
- TLL 1000 - INTRODUCTION TO TEACHING

The remaining two courses may be selected from among approved electives, including:

- TLL 1257 - TEACHING ENGLISH LANGUAGE LEARNERS (not recommended for future MAT degree students)
- TLL 1505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 1701 - EARLY FIELD EXPERIENCE-SECONDARY (requires in-school observations)
- EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION
- EDUC 1011 - CULTURALLY RESPONSIVE PEDAGOGY

- HHD 1001 - INTRO EDUCATIONAL PSYCHOLOGY
OR
- HHD 1003 - DEVELOPMENT: MIDDLE CHILDHOOD THROUGH ADOLESCENCE

Disciplinary Education Elective (e.g. MATH 1231 MATH EDUCATION INTERNSHIP 1 , offered in conjunction with MATH 1230 THE BIG IDEAS OF MATHEMATICS)

Department of Health and Human Development

The Department of Health and Human Development (HHD) blends applied developmental science and evidence-based practices with health promotion, wellness, and exercise physiology to address 21st century problems in diverse regional, national, and global *real-world* contexts. We promote the health and development of all children, youth, and adults. We also assess, prescribe, teach, and supervise programs that focus on improving health-fitness and clinical outcomes, human performance, and healthy lifestyle behaviors. We collaborate with community partners in education, healthcare, wellness, and human service settings to provide health promotion and developmental supports.

Major

Applied Developmental Psychology, BS

The undergraduate major in Applied Developmental Psychology (ADP) develops the skills and knowledge needed for professional work in child and youth care, education and other related human service fields. ADP also prepares students for graduate school in such fields as education, psychology, and social work. Coursework includes developmental theory and research covering birth through early adulthood, professional issues, family dynamics, cultural distinctions, disabilities, psychopathology, curriculum and activity planning, practice skills, and supervision.

The undergraduate major in Applied Developmental Psychology (ADP) includes three distinct areas of concentration that lead to a BS degree:

- ADP Traditional
- ADP CASE (Combined Accelerated Studies in Education)

ADP

The undergraduate major in Applied Developmental Psychology (ADP) emphasizes developing the skills necessary for implementing and evaluating effective programs for children, youth, and families. Course work includes the study of professional issues, program design and evaluation, counseling skills, and qualitative research methods. The program allows for a focus on Child Life hospital work, group care, family support and intervention, administration, play intervention and therapy. Successful completion of the program leads to the Bachelor of Science degree.

The ADP Bachelor of Science program is listed as an academic program to prepare Child Life Specialists by the Child Life Council.

The curriculum is organized into four terms of upper-division (junior and senior year) study. Applications for admission should be submitted during the sophomore year.

- HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 1016 - DEVELOPMENT CURRICULUM AND ACTIVITIES
- HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY
- HHD 1007 - METHODS OF EVIDENCE-BASED PRACTICE
- HHD 1089 - SPECIAL TOPICS
- HHD 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY
- HHD 1024 - FAMILY DYNAMICS
- HHD 1028 - DEVELOPMENTAL PRACTICE SEMINAR 1
- HHD 1029 - DEVELOPMENTAL PRACTICE SEMINAR 2
- HHD 1036 - DEVELOPMNTL MEANING CULTL DISTN
- HHD 1041 - CHILD & YOUTH WORK PRACTICE 1
- HHD 1043 - CHILD/YOUTH PRACTICE 2
- HHD 1050 - SUPRVSN ADM CHLD YOUTH WRK SETNG

ADP- CASE Teacher Certification Program

The undergraduate major in Applied Developmental Psychology (ADP) also includes preliminary work in teacher certification. This program emphasizes developing the skills necessary for becoming a highly effective teacher of young children in grades PK-4 General Education and PK-21 Special Education. Course work includes the study of professional issues, program design and evaluation, teaching methodology and best practices in using culturally and linguistically relevant pedagogy. Successful completion of the program leads to the Bachelor of Science degree. CASE students

then continue into the graduate year to complete coursework and student teaching that leads to the PK-4 Early Childhood and the PK-21 Special Education teaching certification in Pennsylvania.

The curriculum is organized into four terms of upper-division (junior and senior year) undergraduate study. Three additional terms of graduate study allows students to finish with two degrees and two teacher certifications in five years. Applications for admission should be submitted during the sophomore year.

- HHD 1004 - ATTENTIONAL TEACHING PRACTICES
- HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 1016 - DEVELOPMENT CURRICULUM AND ACTIVITIES
- HHD 1036 - DEVELOPMNTL MEANING CULTL DISTN
- HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY
- HHD 1050 - SUPRVSN ADM CHLD YOUTH WRK SETNG
- HHD 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD
- TLL 1562 - ASSESSMENT: YOUNG CHILDREN WITH DISABILITIES
- TLL 1907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES
- IL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC
- TLL 1563 - INCLUSION PRE-K
- TLL 1047 - INTEGRATED CURRICULUM PRE-K - 4
- TLL 1270 - INTEGRTG ART & MUSIC ELEM CLSSRM
- TLL 1042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD
- TLL 1433 - MATH METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 1434 - SCIENCE METHODS FOR PREK- GRADE 4 STUDENTS
- TLL 1850 - LIFE SKILLS PRACTICUM
- TLL 1800 - PRE-STUDENT TEACHING PRE-K
- TLL 1208 - READING/WRITING METHODS 1: PRE-KINDERGARTEN - GRADE 1
- TLL 1209 - READING/WRITING METHODS 2: GRADES 2-4
- TLL 1852 - LIFE SKILLS PRACTICUM SEMINAR
- TLL 1049 - SEMINAR RELATED TO PRE-STUDENT TEACHING PRE-K
- TLL 1268 - SOCIAL STUDIES METHODS PRE-K - 4
- TLL 1045 - YOUNG ENGLISH LANGUAGE LEARNERS
- HHD 1491 - TEACHING HEALTH AND WELLNESS IN ELEMENTARY SCHOOLS
- TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES

Applied Developmental Psychology/Combined Studies in Early Childhood and Special Education (CASE), BS/MEd

The CASE teacher preparation program in the University of Pittsburgh School of Education is a 4+1 accelerated program. Undergraduate students earn a B.S. in Applied Developmental Psychology and the M.Ed. in Early Childhood and Special Education. Students are also prepared to take Pennsylvania Department of Education tests for state certification in PK-4 General Education and PK-12 Special Education.

The B.S. in Applied Developmental Psychology prepares students to teach using developmentally appropriate practices and humanizing pedagogies that respect the individualized learning of all students. The program emphasizes the promotion of positive outcomes in human development for children, youth and families, while at the same time developing strategies for teaching children in Grades PK-12. The M.Ed. in Early Childhood and Special Education completes students' studies in content area and special education teaching strategies and practices.

Students complete a community engagement project in their junior year, then enter into two practicum and two full-time student teaching experiences prior to the end of the graduate year. Field experiences build the foundation of preparation for students in various classroom settings.

Prerequisites

Language and Literacy (12 credits)	<ul style="list-style-type: none"> English Composition (3) Linguistics 1000 or CSD 1020 (3) English Writing 1551 or 1552 (3) Literature Course (3)
Math and Quantitative and Formal Reasoning (7 credits)	<ul style="list-style-type: none"> College Math (3-4 credits) Statistics (3-4 credits)
Natural Sciences (6 credits)	<ul style="list-style-type: none"> 6 credits from A&S General Ed Requirements
Social Sciences (6 credits)	<ul style="list-style-type: none"> History (3) Social Science course (3)
Psychology (3 credits)	<ul style="list-style-type: none"> Psychology 0010
Philosophy (3 credits)	<ul style="list-style-type: none"> Any course except Logic 0500
HAA (3 credits)	<ul style="list-style-type: none"> Any course
Arts and Sciences Electives (12 credits)	<ul style="list-style-type: none"> Any courses
Education Courses (9 credits)	<ul style="list-style-type: none"> IL 1041 EFOP 1001 Additional Education Course
Total Prerequisite Credits	61 credits in freshman/sophomore years

Semester 5 - Junior Year Fall Term

- HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD
- HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY
- HHD 1036 - DEVELOPMNTL MEANING CULTL DISTN
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC
- TLL 1907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES
- TLL 1042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

Semester 6 - Junior Year Spring Term

- HHD 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD
- HHD 1016 - DEVELOPMENT CURRICULUM AND ACTIVITIES
- HHD 1491 - TEACHING HEALTH AND WELLNESS IN ELEMENTARY SCHOOLS
- TLL 1270 - INTEGRTG ART & MUSIC ELEM CLSSRM
- TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES
- TLL 1047 - INTEGRATED CURRICULUM PRE-K - 4

Semester 7 - Senior Year Fall Term

- TLL 1800 - PRE-STUDENT TEACHING PRE-K
- TLL 1049 - SEMINAR RELATED TO PRE-STUDENT TEACHING PRE-K
- HHD 1004 - ATTENTIONAL TEACHING PRACTICES
- TLL 1208 - READING/WRITING METHODS 1: PRE-KINDERGARTEN - GRADE 1
- TLL 1045 - YOUNG ENGLISH LANGUAGE LEARNERS
- TLL 1268 - SOCIAL STUDIES METHODS PRE-K - 4

Semester 8 - Senior Year Spring Term

- TLL 1850 - LIFE SKILLS PRACTICUM
- TLL 1852 - LIFE SKILLS PRACTICUM SEMINAR
- TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS
- TLL 1433 - MATH METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 1209 - READING/WRITING METHODS 2: GRADES 2-4
- HHD 1050 - SUPRVSN ADM CHLD YOUTH WRK SETNG

Graduate Courses (40 credits)

Summer Session

- TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT
- TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES
- EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Fall Term

- TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED
- TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION
- TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS
- TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE
- TLL 2513 - INSTRNL METH-HIGH INCDNC DISABS

Spring Term

- TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES
- TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION
- TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB
- TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Exercise Science, BS

The Bachelor of Science (BS) program in Exercise Science offers students rigorous training in the application of exercise science for prevention and treatment of chronic diseases and conditions, human performance, and health and well-being. This also prepares students for graduate training or additional training in areas of allied health (e.g., physical therapy, occupational therapy, physician assistant, or other allied health opportunities). The B.S. in Exercise Science is focused on training students to prepare for health-fitness and clinical careers related to exercise science. Specifically, this degree program prepares students for careers in 1) health, fitness, or performance benefits of exercise and physical activity; 2) Health-related careers related to exercise (cardiac rehabilitation, pulmonary rehabilitation, etc; 3) Admission to physical therapist, occupational therapist, physician assistant, or other health-related career programs; 4) Admission to graduate training in exercise science, exercise physiology, public health, or a related field.

General Education Requirements (50-52 Credits)

Communication Skills (9 credits)

- ENGCOMP 0200 - SEMINAR IN COMPOSITION
- Public Speaking - 3 credits

- Composition Elective ("W" course) - 3 credits

Quantitative Reasoning (6-7 credits)

- MATH 0031 - ALGEBRA
- Statistics - 3-4 credits

Humanities (9 credits)

- Literature, 3 credits
- Music or Art, 3 credits
- Philosophy/Philosophy of Science, 3 credits

History, Social Science & Public Policy (9 credits)

- History, 3 credits
- Social Sciences, 3 credits
- Public Policy, 3 credits

Introductory Sciences (17-18 credits)

- BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
- BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
OR
- BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1
- CHEM 0110 - GENERAL CHEMISTRY 1
Plus CHEM Lab
- PHYS 0110 - INTRODUCTION TO PHYSICS 1
- PSY 0010 - INTRODUCTION TO PSYCHOLOGY
- ELECTIVE (second course in subjects above) - 3-4

Exercise Science Requirements (70-73 credits)

Biophysical Foundations (19 credits)

- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1044 - BIOMECHANICS
- HHD 1485 - NUTRITION AND HEALTH
- HHD 1487 - CHRONIC DISEASE AND OBESITY

Behavioral & Sociocultural Foundations (3 credits)

- HHD 1486 - BEHAVIOR CHANGE STRATEGIES

Research Methods & Practicum (3-5 credits)

- HHD 1031 - RESEARCH IN SPORTS SCIENCE
- HHD 1045 - DIRECTED RESEARCH PRACTICUM

Health & Wellness Foundations (7 credits)

- HHD 0474 - LIFETIME ACTIVITIES 1
- HHD 0475 - LIFETIME ACTIVITIES 2
- HHD 1489 - CONSIDERATIONS FOR HEALTH AND FITNESS PROGRAMMING

Natural Sciences (14-16 credits)

- BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
- BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2
OR
- BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2
- CHEM 0120 - GENERAL CHEMISTRY 2
 - Additional Science Electives (e.g. BIO, CHEM, PHYS, PSY, NEURO, NUTR), 6-9 credits

Exercise Science Foundations (22-23 credits)

- HHD 1035 - EXERCISE SCIENCE SEMINAR 2
- HHD 1169 - HEALTH FITNESS PRACTICUM 1
- HHD 1170 - HEALTH FITNESS PRACTICUM 2
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION
- HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS
- HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING
- HHD 1996 - CLINICAL INTERNSHIP

Instructor Courses (2 credits)

Required for Applied Focus students only

- HHD 0497 - WATER SAFETY INSTRUCTOR
- PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC
- PEDC 0243 - AMER RED CROSS FIRST/CPR INSTRC

Minor

Applied Fitness Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary

documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

APPLIED FITNESS REQUIRED COURSES (13 credits)

- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION

APPLIED FITNESS MINOR FOUNDATION COURSES (1 CREDIT) Select 1 of the following:

- HHD 0474 - LIFETIME ACTIVITIES 1
- HHD 0475 - LIFETIME ACTIVITIES 2

APPLIED FITNESS MINOR INSTRUCTOR COURSES (2 CREDITS) Select 2 of the following:

- HHD 1173 - AEROBICS INSTRUCTOR

APPLIED FITNESS MINOR PRACTICUM COURSE (1 CREDIT)

- HHD 1169 - HEALTH FITNESS PRACTICUM 1

Aquatics Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

AQUATICS REQUIRED COURSES (15 CREDITS)

- HHD 0497 - WATER SAFETY INSTRUCTOR
- HHD 1211 - ATHLETIC INJURY PREVENTION
- HHD 1212 - ATHLETIC INJURY PREVENTION LABORATORY
- HHD 1241 - TEACHING EXPERIENCE 1
- HHD 1242 - TEACHING EXPERIENCE 2

- HHD 1300 - NUTRITION IN EXERCISE AND SPORT
- PEDC 0133 - LIFE GUARDING 1
- PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC
- PEDC 0246 - POOL OPERATIONS/EVENT MANAGEMENT

Additional Aquatic Courses (3 CREDITS) Select 3 of the following:

- PEDC 0001 - BEGINNING SWIMMING
- PEDC 0002 - INTERMEDIATE SWIMMING
- PEDC 0026 - AQUATIC CONDITIONING
- PEDC 0158 - WEIGHT TRAINING - BEGINNER
- PEDC 0193 - PERSONAL FITNESS
- PEDC 0194 - SPORTS CONDITIONING
- PEDC 0211 - WATER FITNESS

Dance Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

DANCE COURSES

- HHD 0060 - INTRODUCTION TO DANCE
- HHD 0473 - DANCE PEDAGOGY
- HHD 1241 - TEACHING EXPERIENCE 1
- HHD 1242 - TEACHING EXPERIENCE 2
- HHD 0033 - BALLET 1
- HHD 0041 - JAZZ 1
- HHD 0031 - MODERN DANCE 1
- HHD 0044 - DANCE PRODUCTION
- HHD 0040 - CHOREOGRAPHY
- HHD 0244 - DANCE PRODUCTION 2

Additional Dance Courses (Choose 3.0 credits from the following 4 courses)

- HHD 0032 - MODERN DANCE 2
- HHD 0034 - BALLET 2
- HHD 0042 - JAZZ 2

Exercise Science Minor

Requirements

Students may minor in applied fitness, aquatics, dance, and exercise science. A minimum of 18 credits is required for each minor, with the exception of the applied fitness minor, for which a minimum of 17 credits is required. Upon completion of all requirements the minor will appear on the final transcript as an awarded Academic Minor. The student is responsible for working closely with their Minor Advisor to ensure that the necessary documentation is provided to allow for this to appear on the final transcript.

Graduates of the exercise science and wellness specializations and any minor programs do not qualify for public school teacher physical education certification.

EXERCISE SCIENCE MINOR REQUIRED COURSES (13 CREDITS)

- HHD 1011 - APPLIED HUMAN ANATOMY
- HHD 1012 - APPLIED HUMAN ANATOMY LAB
- HHD 1033 - HUMAN PHYSIOLOGY
- HHD 1042 - PHYSIOLOGY OF EXERCISE
- HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION

EXERCISE SCIENCE MINOR ELECTIVE COURSES (5-6 CREDITS) Choose from the following courses:

- HHD 1044 - BIOMECHANICS
- HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING
- HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS
- HHD 1487 - CHRONIC DISEASE AND OBESITY

Swanson School of Engineering

The Swanson School of Engineering's undergraduate programs prepare students for entrance into a diverse spectrum of careers, providing both a strong, fundamental engineering education and a thorough understanding of the broader aspects of society. Students have an opportunity to participate in the highly successful Cooperative Engineering Education Program, an increasing number of global opportunities, joint programs with the David C. Frederick Honors College, and a number of certificate programs. Students also have the option of earning a minor or a dual degree from various Dietrich School of Arts and Sciences programs. Minors may also be earned from the other Swanson School of Engineering undergraduate degree programs, as well as some programs in the School of Computing and Information. The curricula provide sufficient flexibility to allow graduates to pursue careers in industry, government, or education, including programs in medicine, law, and business.

Full-time Bachelor of Science in Engineering degree programs are offered on the Pittsburgh campus in the following engineering disciplines: bioengineering, chemical, civil, computer, electrical, engineering science, environmental, industrial, materials science, and mechanical. Special interdisciplinary programs can be structured based upon individual student interest and ability through the engineering science program. The Cooperative Engineering Education Program, in which students alternate terms of relevant work experience with course work, is available for students in all undergraduate engineering majors. Approximately 40% of the graduating seniors complete at least three co-op rotations. There are also certificate programs in engineering data analytics; engineering for humanity; engineering simulation in design; health systems engineering; innovation, product design and entrepreneurship; international engineering studies; nanoscience and engineering; nuclear engineering; supply chain management; and sustainability.

Application Procedures

The Swanson School of Engineering works closely with the University of Pittsburgh's Office of Admissions and Financial Aid (OFA). Ultimately, all admissions, financial aid and scholarship decisions take place through OFA following the procedures detailed below:

First Year Engineering Applicants

All admissions to the Swanson School of Engineering are determined by the University's Office of Admissions and Financial Aid. (Please see Pittsburgh Campus First-Year Admissions section of this bulletin for details.) Approximately 650-700 first-year students enter the Swanson School of Engineering each fall term.

Transfer Students from Other Colleges and Universities

The Swanson School of Engineering admits transfer students from within the University system, and from other U.S. and international programs. Transfer applicants are evaluated according to their academic record as well as space available in the program of choice. An applicant for transfer to the Swanson School of Engineering from another college or university should apply through the Office of Admissions.

Contact the Office of First Year Recruitment at 412-624-9825, ssoetransfer@pitt.edu or see the transfer engineering student Web site for more information on transfer procedures.

A transfer applicant from a four-year college should have a cumulative grade point average (GPA) of at least a 3.0 (for courses that satisfy Swanson School of Engineering's first year requirements) on a 4.0 scale to be considered for admissions. Applicants from a two-year college should have a minimum GPA of a 3.25 on a 4.0 scale. Students interested in the Bioengineering program from any institution (two-year or four-year) need a minimum of 3.5 GPA. Students must also have completed two semesters of Calculus, Calculus-based Physics and Chemistry for consideration. In general transfer students will only be accepted for the upcoming Fall Term except for special cases of well-prepared applicants.

All transfer applicants are required to provide high school academic records. Advanced standing credits will be granted for college course work at another accredited institution depending on grades received and on the relevance of the courses to the applicant's proposed program in the Swanson School of Engineering. Only courses in which the applicant received at least a C (2.0 on a 4.0 scale) will be considered for transfer and then only if the courses are applicable to their degree program.

Transfer Students from another University of Pittsburgh Oakland Campus School

Students from any of the University's other schools are eligible for transfer if they meet the Swanson School of Engineering's requirements. Students must submit an Academic Program Change Form through their current advising or academic records center for transfer consideration.

An applicant for transfer from an Oakland campus school must have a minimum 3.000 cumulative GPA (3.500 for Bioengineering) and must have completed no fewer than 7 of the 8 First Year Engineering courses (MATH 0220 and 0230 - Analytic Geometry and Calculus 1 and 2; PHYS 0174 and 0175 - Physics for Science and Engineering 1 and 2; CHEM 0110 and 0120 - General Chemistry 1 and 2; and ENGR 0015 and 0016 Introduction to Engineering Analysis and Introduction to Engineering Computing) with a grade of "C" or better to be considered for admission. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each degree program will be considered. For additional information, see the transfer engineering student Web site.

The GPA for students transferring into the Swanson School of Engineering from another school or campus within the University will be recalculated in accordance with the Swanson School of Engineering's policy.

Regional Campus Students

Request forms for relocation from the Bradford, Greensburg, Johnstown, or Titusville campuses are available at each regional campus. Pre-engineering students who have a grade point average of 3.0 or higher (with the exception of bioengineering, which requires a 3.5 GPA) in the required first year engineering curricula are eligible to relocate pending departmental approval. Completion of all transfer minimum requirements does not guarantee transfer, as space limitations within each major will be considered. Students from the Bradford campus in Chemical, Civil, Computer, Electrical and Mechanical must complete the first-two years of their degree program before applying to transfer to the Oakland campus.

Consistent with our admissions deadlines with the Office of Admissions, we will not be able to consider Regional Campus transfer students for the Spring semester if required engineering curricula course grades are in process during the applicant's Fall term. Exceptions to this rule must be approved in advance by the Associate Dean for Academic Affairs.

Advanced Standing / Transfer Credit for Courses Taken Outside the University

Students transferring into the Swanson School of Engineering from other college-level programs will have their academic records officially reviewed for advanced-standing credit only after they have been admitted and pay their tuition deposit. This determination will be made by the responsible academic department or program in accord with Swanson School of Engineering's policy and criteria established by ABET, the engineering accrediting agency. Advanced standing for engineering or engineering science courses will be considered only if the student completed the course and earned a grade of C or better. Courses that are taken on a pass/fail system that includes a D grade as passing will not be approved for advanced standing. Advanced standing for mathematics, science, humanities, and social sciences courses will be awarded to the extent that such courses match specific University of Pittsburgh, Dietrich School of Arts and Sciences courses as required by the Swanson School of Engineering. In particular, humanities and social sciences courses must correspond to those on the Swanson School of Engineering's approved list of humanities and social sciences electives. Contact the Swanson School of Engineering for information on these approved electives.

Additional transfer credit policies are as follows:

Advanced standing for engineering or engineering science courses will be considered only if the student completed the course and earned a grade of C or better. Courses that are taken on a pass/fail system that includes a D grade as passing will not be approved for advanced standing.

All courses that have equivalent counterparts at Pitt in terms of content and credits in the Swanson School of Engineering curriculum are eligible for transfer.

No transfer credits can be part of the final 25% of credits required for a degree. These credits must be earned in residence. In interpreting this regulation, credits earned on regional campuses are considered as transferable.

Transfer credits need to be earned within 12 years of the date when the Swanson School of Engineering degree requirements will be completed. In accordance with University policy, re-evaluation of credits will be done by the admitting school, when necessary, according to applicable University policy and procedure. The policy applies to all previous credits earned, no matter if they were earned at the University of Pittsburgh or another institution.

No more than 60 credits may be transferred from a two-year college. No more than 90 credits may be transferred from a four-year college. If a course for which advanced standing credit has been granted is repeated, the advanced standing credit is canceled, even if a grade of W is earned.

Coursework earned in approved foreign study programs will be awarded on a Satisfactory/No Credit (S/NC) basis, assuming a grade of C or better has been earned.

One credit taken at a quarter system school is equal to two-thirds a credit at the University of Pittsburgh. This may affect the ability of a course to transfer.

Engineering courses must be completed at an ABET certified institution with the exception of approved study abroad courses.

The Swanson School of Engineering does not accept CLEP credit for course credits.

Writing Designated courses ("W" Courses) may not be transferred in from another institution.

Credits for students transferring from a college that has an articulation agreement with the Swanson School of Engineering, a community college having an articulation agreement with the Swanson School of Engineering, or a pre-engineering program at a University of Pittsburgh regional campus will be accepted in accord with those agreements and University policy.

If a student participates in the University of Pittsburgh College in High School Program, grades earned in Pitt CHS courses appear on the official University of Pittsburgh transcript and are part of the student's academic record. The grade(s) will be included in the calculation of the student's grade point average at the University. CHS courses are only eligible to be repeated at the University if the original grade was below C and no more than one year has passed since the original course was taken, per the Swanson School of Engineering Course Repeat policy. Exceptions may be made only with the approval of the Associate Dean for Academic Affairs.

Students enrolled in the Swanson School of Engineering may take courses at other universities to satisfy graduation requirements only if the student has the courses approved in advance by the Transfer Student Services Office in coordination with their academic advisor or department. Students must earn a grade of C or higher for the course to be accepted for transfer credit. Students must arrange for their transcript to be sent to the Swanson School of Engineering.

Students may also earn advanced standing credit by taking Advanced Placement or International Baccalaureate classes in their high schools. Students who have their AP or IB scores sent to the University of Pittsburgh will have those scores evaluated by an academic advisor, who will determine their transferability. For more information on the IB, see the IB Score Information. For more information on the AP, see the AP Score Information.

Foundational courses in the First-Year Engineering program are taken in sequence. Transfer credit may be used for foundational courses (e.g. Math, Chemistry, and/or Physics). If a student chooses to repeat a course at Pitt for which he/she has transfer credit, then transfer credit for subsequent courses in the same sequence is forfeited. Please note that this applies to equivalent courses (e.g. CHEM 0110 and 0120/CHEM 0960 and 0970 are equivalent courses. If a student with transfer credit for Chemistry chooses to take CHEM 0960 at Pitt, they may not then use transfer credit for CHEM 0120). Additionally, if a student with transfer credit repeats a class at the University and earns less than the minimum required grade to move forward in the course sequence, he/she may not retroactively use transfer credit to earn credit for that course.

Summer/Special Session Courses Taken Elsewhere

Swanson School students in good academic standing (cumulative GPA of at least 2.000) may attend a summer or special session of another accredited institution in order to supplement their program, provided they receive prior approval from the Swanson School of Engineering. Swanson School students may not be enrolled for classes at the University of Pittsburgh and another institution concurrently. Students must submit the name of the institution, the course number, and the relevant course descriptions to their advisor. Courses may not be a repeat of any course taken before (passed or failed) unless an exception is made by the undergraduate coordinator. A maximum of two courses (no more than 8 credits) may be taken in a single period of enrollment elsewhere.

Students who wish to take "winter term" (e.g. "wintermester", "January-term") courses at another institution must obtain the approval of the Associate Dean through their Academic Advisor/Undergraduate Coordinator. Math, science, and engineering courses will not be approved winter term courses. The winter term in question may not overlap with Pitt's fall or spring term.

Interdepartmental Transfers

A Swanson School of Engineering student whose academic record satisfies the minimum requirements for continued registration may apply for transfer from one engineering department or program to another. To initiate a program change, the student must complete a Program Change form, available at the Swanson School of Engineering Office of Student Records. It is the prerogative of the department or program to which the student desires to transfer to approve or reject a program change request, based on academic performance and/or space limitations/availability.

Reinstatement

An engineering student in good academic standing who has not attended the University of Pittsburgh for three consecutive terms and has attended no other institution in the intervening period will be considered for reinstatement after making application to the department chair or program director. If the student has attended another institution and completed more than 12 credits, the student must reapply through the University's Office of Admissions and Financial Aid in accordance with the procedure for transfer applicants from other colleges or universities.

A student who has withdrawn while on academic probation may be reinstated only by action of the appropriate faculty committee, typically based upon substantial evidence of a positive change in the student's attitude toward academic work. The student must initiate the request for reinstatement with the appropriate department chair or program director/head.

Grading Policies

The following section details the Swanson School of Engineering's regulations regarding some of the grades that may appear on a student's transcript. (For a complete discussion of all grades and grading options, see the Grading and Records section of this bulletin.)

G Grade (Incomplete)

An instructor may give the G grade when a student is unable to complete the work of a course during the term because of extenuating personal circumstances. When given a "G" grade, both the student and instructor complete the Swanson School G Grade Form to define the work that needs

to be completed (e.g. a final examination paper) and the date by which it will be completed (no later than one year after the term or session in which the course was taken). Upon completion of the course work, the instructor of the course will complete a Grade Change Authorization form and send it to the University Registrar via PeopleSoft for processing. A student should not request or be given a "G" grade if, in actuality, the student will need to repeat the course. Once the deadline has passed, the "G" grade will automatically change to "NG" and will no longer appear as "in progress" on a student record. The "NG" grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Students may not move forward in a course sequence until a G grade in a previous class in the same sequences has been changed to a letter grade, indicating that all work has been completed and the previous course requirements have been satisfied. Students who register for subsequent classes in a course sequence anticipating completion of the previous course are responsible to drop such classes if a G grade is assigned. Students may only enroll in the next class after outstanding work is completed.

S/NC Option

With the exception of undergraduate seminar courses, which are only offered satisfactory/no-credit (S/NC), the S/NC option cannot be used for any course that is used to meet graduation requirements. All other Swanson School of Engineering courses are only offered on a letter grade basis. This restriction includes humanities/social science electives and other open/science/engineering electives. First-Year Students may not elect to take courses under the S/NC option. Upper-class engineering students may elect to take non-engineering courses that will not be used to meet graduation requirements as S/NC. Because S/NC courses are not considered in the calculation of the grade point average, the option is appropriate for students wishing to explore disciplines they might not otherwise pursue because of potential negative impact on the grade point average.

A student who wishes to take a course under the S/NC option should first consult his/her advisor to assure that the S/NC option is permissible. A student must register for and complete at least one course for a letter grade to be eligible for an S/NC option course in any term. To register for more than one S/NC option course per term, and a maximum of two, a student must register for 12 or more credits for letter grades.

Calculation of the Grade Point Average

Each credit carried for a letter grade is awarded quality points as noted under the Grading and Records section of this bulletin. A student's term grade point average (term GPA) is the total quality points earned for the term divided by the total credits assigned letter grades. The cumulative grade point average (cumulative GPA) is determined by dividing the total number of quality points by the total number of credits assigned letter grades. Only credits and quality points for courses taken at the University of Pittsburgh and that count toward the requirement for the BSE degree are used in the calculation of the GPA.

Repeating Courses

A Swanson School of Engineering student may wish to repeat a course or may be required to repeat a course to fulfill degree requirements.

A student may only repeat a course twice.

A student's third attempt must be approved by the undergraduate coordinator.

A student who fails to successfully complete a required course after three attempts will be dismissed from the Swanson School of Engineering even if the student's GPA is 2.000 or higher.

No sequence course may be repeated for credit after a more advanced course in that sequence has been passed with a C or higher grade.

Course repeats must be completed at the University of Pittsburgh.

A grade replacement may be possible in some situations; refer to the Grade Replacement section below for more details.

Grade Replacement for Repeated Courses

A grade replacement and GPA recalculation occurs for a Swanson School of Engineering student who repeats a course in which they have earned below a C and repeats the course within one year of the original registration.

No course may be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at the University of Pittsburgh.

The original course and grade remain on the transcript and/or the academic record; however, the grade and credits originally earned are not counted in the calculation of the QPA (prior to Fall term 2005) or the GPA. All grades earned when repeating a course will be posted and recalculated into the academic transcript, even if the student earns a lower grade than the prior attempt.

The repeated course does not increase the number of credits counted toward meeting the degree requirements unless an F is replaced by a passing grade.

W, R, N, or NC grades reported for the repeated course will not be identified as a course repeat, thus the original grade earned will continue to be counted in the QPA (prior to Fall term 2005) or GPA. Incomplete (G or I) grades will not be identified as repeated courses until the course work is completed.

A sequence course cannot have the grade replaced if a succeeding course in that sequence has been taken (e.g., MATH 0220, 0230, and 0240 Analytic Geometry and Calculus 1, 2, and 3; PHYS 0174 and 0175 Basic Physics for Science and Engineering 1 and 2).

Course number and title must match for the grade replacement to occur unless an exception has been made by the Associate Dean for Academic Affairs. Exceptions should be discussed with your advisor or undergraduate coordinator.

The same course repeat and grade replacement rules will apply to transfer students from other schools within the University of Pittsburgh and the regional campuses.

Academic Standing

Every engineering student's academic record is reviewed at the end of each term to certify whether or not the student is in good academic standing. Students will be notified by email if they are no longer in good academic standing and are on probation, school probation, suspension, or dismissal.

Good Standing

To be considered in good academic standing, a student's cumulative grade point average (GPA) must be at least 2.000, AND the student must be making satisfactory progress toward earning an engineering degree. More information on Satisfactory Academic Progress standards can be found at <https://oafa.pitt.edu/financialaid/satisfactory-academic-progress/>.

Term Warning

A student who earns a term GPA less than 2.000 but has a cumulative GPA greater than or equal to 2.000 will receive a warning letter from the Swanson School of Engineering. Academic Warning indicates that the student is potentially subject to probation, suspension, or dismissal if academic performance does not improve. The student is still considered to be in good academic standing. A student may only receive one term warning before the possibility of more serious action. (See Academic Probation and Swanson School Probation, below.)

Academic Probation

A student with cumulative GPA below 2.000 is not in good academic standing and will be placed on Academic Probation. A student on probation may be subject to suspension or dismissal if their cumulative GPA remains below a 2.000 for two consecutive terms (with the exception of first year students, see Dismissal below).

Swanson School of Engineering Probation (School Probation)

Engineering students will be placed on School Probation if:

The student meets two consecutive semesters at full time status where their Term GPA is less than 2.000, but their Cumulative GPA is still greater than or equal to 2.000 (see Term Warning, above), or,

The student fails a course for the second time.

Participation in activities such as the Co-op Program or International Programs is at the discretion of the Associate Dean for Academic Affairs for students on School Probation.

Suspension and Dismissal

A student on probation may be subject to suspension or dismissal if their cumulative GPA remains below a 2.000 for two consecutive terms. The standard for first year engineering students is 1.75; see below. Suspension from the Swanson School of Engineering is a one-year action. Dismissal from the Swanson School of Engineering is a permanent action.

The following are additional points related to Suspension and Dismissal:

Students in the First Year Engineering Program who enter in the fall term may be suspended or dismissed from the Swanson School of Engineering if they do not attain a cumulative GPA of 1.750 or greater by the end of the spring term. First term engineering courses should be completed by the end of the first year. Typical first term engineering courses are MATH 0220, PHYS 0174, CHEM 0960, AND ENGR 0011 or their equivalents.

First year engineering students with cumulative GPAs between 1.750 and 1.999 by the end of their first academic year who fail to obtain a cumulative GPA of 2.000 by the end of their third term are subject to suspension or dismissal. A similar timeline will apply to students who begin the First Year Engineering Program in the spring term.

After being suspended, students are not eligible to re-enroll for one calendar year, after which they are required to apply for reinstatement through the Swanson School of Engineering Office of Student Records. Students returning from academic suspension are reinstated on academic probation and their academic performance will be reviewed after each subsequent term. You can take up to twelve credits elsewhere during your suspension, but they will not be transferrable to the Swanson School.

Students may only repeat a course twice. (See Repeating Courses, above). Any student who fails to successfully complete a required course after three attempts will be dismissed from the Swanson School even if his or her cumulative GPA is 2.000 or higher.

Students dismissed from the Swanson School of Engineering who wish to enroll at another school/ college at the University of Pittsburgh are subject to the admission requirements for that school.

Honors Lists

At the end of each term, the academic records of all undergraduate degree students in the Swanson School of Engineering are reviewed to determine eligibility for the Term Honor List and the Dean's Honor List. Students who qualify for both honor lists will appear only on the Dean's Honor List.

Term Honor List

To be eligible for the Term Honor List, a student must

- Earn a GPA of at least 3.250,
- Complete a minimum of 15 credits of academic work for letter grades at the University of Pittsburgh, and
- Complete a minimum of 6 credits of work for letter grades in the term of eligibility.

Dean's Honor List

To be eligible for the Dean's Honor List, a student must

- Earn cumulative and term GPA's of 3.250 or higher,
- Complete a minimum of 30 credits of academic work for letter grades at the University of Pittsburgh, and
- Complete a minimum of 6 credits of work for letter grades in the term of eligibility.

Late Withdrawal Policy

Between the end of the University's stated add/drop period (approximately the third week of the fall and spring terms) until the last day of the monitored withdrawal period (approximately the ninth week of the academic term for fall and spring terms), a student may withdraw from any Swanson School of Engineering course for any reason. The academic dean or designate will approve the course withdrawal (the instructor's approval is not required).

After the end of the monitored withdrawal period, students will only be withdrawn from courses with the permission of the Associate Dean for Academic Affairs. Withdrawals will be approved only for documented exceptional reasons including medical or personal incidents that preclude the student from continuing with and/or completing their studies; in those cases the student must withdraw from all courses. Withdrawals from a specific course outside the Swanson School of Engineering must be arranged through the dean's office of the unit offering the course. Note that a withdrawal cannot be processed after grades have posted and students should seek withdrawals prior to final exams or the deadline set forth by that school. Late withdrawals may be subject to additional school-specific guidelines.

Credits

In the Swanson School of Engineering, a credit or credit hour is one of the following:

- One hour of lecture or recitation a week, requiring two hours of outside preparation
- Two hours of laboratory a week, requiring one hour of outside preparation
- Three hours of laboratory a week, requiring no outside preparation

Registration

Each student registers for future terms with the assistance of their academic advisor during registration periods specified by the Office of the University Registrar. A student who has registered for a course but has failed to satisfy the prerequisites for that course prior to the beginning of the term may not be permitted to continue attending class and must withdraw from the course if requested to do so. First Year engineering students register for the fall term during the summer advising sessions. All entering students are required to take the ALEKS Math placement exam before registering for their first Math class at the University of Pittsburgh, regardless of advanced standing credit (AP, IB, transfer credit) or prior ALEKS experience. ALEKS results will only be used to place students into their first math course at the University and cannot be used to skip subsequent math courses.

Maximum Credit Registration

All full-time undergraduate engineering students are expected to register for a normal full term of academic courses (i.e., at least 12 credits). No student shall be allowed to register for more than 18 credits without specific written permission from their academic advisor and approval by the Associate Dean for Academic Affairs. Such permission is given only after a review of the student's academic record in order to verify that an overload is academically justifiable. All credits above 18 for undergraduates will be billed over and above the full-time tuition rate at the prevailing per-credit tuition charge.

Statute of Limitations

All required academic work for the Bachelor of Science in Engineering degree, including courses for which advanced-standing credit has been granted, must be completed within 12 consecutive calendar years. Under unusual circumstances, a student may, with the approval of the department or program chair, request a waiver of this policy. This policy means that part-time students must progress toward the degree at a minimum rate of 12 credits per calendar year.

Graduation Requirements

In order to graduate with a BSE, a student must have satisfactorily completed all degree requirements and earned the total number of credits required by the department or program in which the student is enrolled. The student must also have obtained a minimum GPA of 2.000 for (a) all required courses completed at the University of Pittsburgh and (b) all program courses.

The work of the senior year (a minimum of 24 credits) should be completed while in residence at the Swanson School of Engineering. Exceptions will be granted for students to take a limited number of credits needed to complete their degree, or through participation in an approved study abroad program. Such requests must be approved in advance by the appropriate undergraduate coordinator, chair or Associate Dean for Academic Affairs.

(See the Graduation section of this catalog for further information on graduation requirements and procedures.)

Academic Integrity and Code of Conduct

The integrity of the academic process requires fair and impartial evaluation on the part of faculty and honest academic conduct on the part of students. Students are expected to conduct themselves with a high level of responsibility in the fulfillment of their course of study and their conduct in and out of the classroom. Violations of the Academic Integrity Policy can impact a student's grade or status with the University as some serious or

subsequent violations could lead to suspension or dismissal. Academic Integrity violations can also affect a student's eligibility for scholarships and holding leadership positions in student organizations. A lack of response by the student will result in a blank grade given in the course until the matter is resolved. Further, a student may not drop or withdraw from a course with a pending academic integrity allegation or resolution. A hold will be placed on the student's account until the AI allegation is resolved or the monitored withdrawal period has ended. It is the corresponding responsibility of faculty to make clear to students those standards by which they will be evaluated and the resources permissible for use by students during their course of study. The educational process is perceived as a joint faculty-student enterprise that will involve professional judgment by faculty and may involve, without penalty, reasoned exception by students to the data or views offered by faculty. Consistent with these considerations (and without limiting their scope and application in their entirety to the academic programs of the University), faculty and students are directed to observe established University of Pittsburgh and Swanson School of Engineering guidelines on academic integrity and the University Code of Conduct. The Swanson School of Engineering and the University of Pittsburgh Guidelines on Academic Integrity are available to faculty and students at: <https://www.engineering.pitt.edu/Academic-Integrity-Guidelines/>. The University's student Code of Conduct is available at: https://www.studentaffairs.pitt.edu/wp-content/uploads/2017/08/Code-of-Conduct_10-1-2020.pdf.

Assessment

As part of the Swanson School of Engineering's commitment to student learning and academic achievement, effective teaching, and continuous improvement of our programs, we regularly conduct outcomes assessment activities. To obtain periodic measurements of student perceptions and intellectual growth, students will be expected to participate in surveys, focus groups, interviews, and related activities. While individual input is collected, the data resulting from these assessments will be published only in aggregate form.

Advising

First Year Engineering Student Advising:

All students are assigned an advisor and are expected to meet with their advisor prior to registration. The First Year Engineering Program's professional staff serves as first year advisors. Throughout the first year, students are encouraged to meet with their advisor if they need to register for classes, withdraw from classes, add and/or drop classes, seek out resources, find out about their academic progress, discuss problems they are having in a course, or get help deciding on a program. First-Year Students are also assigned an Engineering Peer Leader, who co-facilitates ENGR 0081 - First-Year Engineering Seminar with a professional staff advisor. First-Year Engineering students admitted to the Honors College will be assigned both an SSOE Academic Advisor and an Honors College Advisor.

Continuing Undeclared Engineering Students will be advised by staff in the First Year Engineering Program (in collaboration with the Engineering programs) until they are department-ready. Students are considered Continuing Undeclared Engineering Students if they meet any of the following criteria:

- have yet to successfully complete more than one First-Year Engineering course
- have a cumulative GPA below 2.000
- have a grade of C- or lower in MATH 0230 (Calculus 2)
- have yet to successfully complete a critical class for their intended major, as follows:
 - Chemical Engineering: CHEM 0970 or CHEM 0120
 - Electrical and Computer Engineering: PHYS 0175

Students are expected to make progress toward completion of First-Year Engineering Program requirements within the first year of enrollment. Students who are unable to declare their major due to incomplete First-Year Program Requirements at the end of the first year have one additional year to complete these requirements and may be limited or restricted from taking departmental classes until first-year requirements are finished. Students should consult with their academic advisor on the most efficient academic path toward First-Year Program completion. Review of a student's academic progress will be made if first-year requirements are not completed by the end of the second year of enrollment. Not completing first-year requirements in the first year may delay time to degree.

Transfer Student Advising:

Incoming transfer students are directly admitted into their upper-level engineering program and will have a declared major, unless otherwise noted on their admission letter. For academic advisement, transfer students will be assigned an engineering faculty advisor by their department, which will be found in the student's PeopleSoft Student Service Center. Undergraduate Coordinators/Directors and the Office of Transfer Student Services are also available as support resources during their academic career.

Upperclassmen Engineering Advising:

Undergraduate engineering students who have declared their major and entered an engineering department are assigned a faculty advisor upon entering their department. Undergraduate Coordinators/Directors are also available as faculty resources to undergraduate engineering students in their major. Students may consult their PeopleSoft Student Service Center to see the name of their Academic Advisor.

General Degree Requirements

The degree requirements are established by the individual departments and programs. Depending on the program, between 126 to 135 credits may be required for the individual degree. Each program's requirements include the common first year, a mathematics sequence, and six approved humanities and social science electives (including the W-course requirement). The specific degree requirements are found in the program descriptions below in this catalog.

Humanities and Social Science Requirement

An important part of the undergraduate engineering student's education is the humanities and social science component. All Swanson School of Engineering undergraduates must complete at least six humanities and social science elective courses from the school's approved list of Dietrich School of Arts and Sciences (A&S) courses, while meeting the school and ABET requirements for breadth and depth. To meet the depth requirement, a student must complete two or more courses in the same area, only one of which can be below the 0200-level (see list) from the Dietrich School. The depth requirement can also be satisfied by taking two or more courses with a related theme, e.g., courses that focus on a geographic region, historic period, or ideological perspective. For the breadth requirement, the courses must include approved offerings from at least three different humanities and social science departments from the Dietrich School of Arts and Sciences. Students may use one study abroad course that might not otherwise be counted toward satisfying this requirement, at the discretion of their undergraduate coordinator.

No more than two of the required six elective courses can be satisfied via high school Advanced Placement, International Baccalaureate, and/or GCE-A-Level credits.

Students must also complete one Writing Intensive W-designated course; i.e., a course that has a substantial writing component that has been so designated by the Dietrich School of Arts and Sciences (A&S). Depending on the course, it may also count as one of the humanities/social science electives. The Associate Dean for Academic Affairs maintains a list of approved humanities and social science electives. Students are not permitted to use College of General Studies courses.

Additional information about the Humanities and Social Sciences electives can be found here: [Approved Humanities/Social Science Electives and Requirements](#).

Writing-Designated Course (W Course) Requirement

Engineering students must demonstrate an ability to communicate effectively. This includes both written and oral communication and the ability to make professional presentations. Upon admission, some students demonstrating writing deficiencies may be required to take at least one linguistics and/or english composition course during their first year that will not count toward the Swanson School of Engineering graduation requirements.

While most students take their W course as part of their humanities/social science requirements, students may also satisfy the W requirement by taking a math, science, or elective course with a writing component. In addition, each engineering program has substantial communications components throughout the curriculum. Some programs require a specific course in communications. It is important to refer to each program's graduation requirements to identify requisite communication courses.

For students planning on a dual degree from the Swanson School of Engineering and a Dietrich School major, the University of Pittsburgh Composition Program has agreed that the Dietrich School of Arts and Sciences composition requirement is satisfied by ENGCOMP 0210.

Writing intensive courses may not be transferred in from another institution.

Online Courses

Undergraduate engineering students who have completed 24 or more credits in residency at the University of Pittsburgh may take online courses (either at Pitt or outside the University of Pittsburgh for transfer credit), subject to the following conditions:

Student must present a valid reason for taking the course online.

If a transfer course, the course must be from a two- or four-year college or university that is accredited by Middle States Association of Colleges and Schools (or equivalent if outside the region).

Any engineering or engineering science course must be from an ABET-accredited program.

Humanities or social science courses must be from the arts and sciences unit of the institution and not from a continuing education or general studies unit.

The course(s) must be first approved by the student's undergraduate coordinator.

Major and Degree Options

The following majors (described in the Program Descriptions section) within the Swanson School of Engineering offers the Bachelor of Science in Engineering:

Bioengineering (administered through the Department of Bioengineering)

Chemical Engineering (administered through the Department of Chemical and Petroleum Engineering)

Civil Engineering (administered through the Department of Civil and Environmental Engineering)

Computer Engineering (administered through the Department of Electrical and Computer Engineering)

Electrical Engineering (administered through the Department of Electrical and Computer Engineering)

Engineering Science (administered through the Department of Mechanical Engineering and Materials Science)

Environmental Engineering (administered through the Department of Civil and Environmental Engineering)

Industrial Engineering (administered through the Department of Industrial Engineering)

Materials Science and Engineering (administered through the Department of Mechanical Engineering and Materials Science)

Mechanical Engineering (administered through the Department of Mechanical Engineering and Materials Science)

Minors in Engineering

The Swanson School of Engineering offers a number of minors to its students who wish to expand their field of knowledge in engineering.

Engineering students may also pursue a minor from a Dietrich School of Arts and Sciences program (see A&S section of this bulletin for details on the minors offered within A&S). Engineering students are not permitted to minor in the same field in which they are majoring. Students from outside the Swanson School of Engineering may pursue one of these minors with the permission of the administering program. Any student interested in a minor should consult with the given department to determine the eligibility and completion requirements for each minor. The minors offered by the school are as follows:

Bioengineering

Chemical Engineering

Civil Engineering

Computer Engineering

Electrical Engineering

Engineering Science

Environmental Engineering

Industrial Engineering

Materials Science and Engineering

Mechanical Engineering

Petroleum Engineering

Polymer Engineering

Certificate Programs

Swanson School of Engineering undergraduate students are encouraged to enrich their educational experience by electing to take one of the certificate programs currently offered by Arts and Sciences, the University Center for International Studies (UCIS), or the Swanson School of Engineering. These certificate programs may be used by the engineering student to partially fulfill the humanities/social sciences requirement,

thereby allowing specialization in an area of interest while pursuing an engineering degree. The requirements for each certificate vary, and students should contact the appropriate certificate program director.

The Swanson School of Engineering offers a number certificates at the undergraduate level:

- Engineering Data Analytics
- Engineering for Humanity
- Engineering Simulation in Design
- Health Systems Engineering
- Innovation, Product Design, and Entrepreneurship
- International Engineering Studies
- Nuclear Engineering
- Supply Chain Management
- Sustainability

In addition to certificates offered by the Swanson School of Engineering, additional certificates are available from or in conjunction with other schools within the University, such as the following:

- Nanoscience and Engineering Undergraduate Certificate

Special Academic Opportunities/Programs

The Swanson School of Engineering offers numerous special academic opportunities as detailed in the following pages:

Reserve Officers Training Corps (ROTC)

Academic programs within the Swanson School of Engineering may give credit to students enrolled in Reserve Officers Training Corps (ROTC). This credit may be given in one of the following ways.

- Upon commissioning, some departments will award one technical elective for the student's entire ROTC coursework and training; or
- Some programs may review the specific courses and course objectives for individual ROTC courses to see if the individual course or courses may be counted toward program requirements.

- Select ROTC courses rooted in the humanities and social sciences are on the SSOE list of approved electives

Students enrolled in the ROTC program should meet with the undergraduate coordinator for review of how the ROTC program and courses may be counted for a specific major. Students are encouraged to participate in ROTC if this is of interest to them. With this in mind, the Swanson School of Engineering is lenient with those in the Navy program who must travel to Carnegie Mellon University for coursework and typically are permitted to take over 18 credits per term to satisfy the ROTC requirements.

Arts and Sciences-Engineering Dual Degree Program

The Dietrich School of Arts and Sciences (A&S) and the Swanson School of Engineering have developed an undergraduate dual degree program that permits a student to combine a major in arts and sciences with a program in engineering and then receive degrees from both A&S and the Swanson School of Engineering. A student can apply for admission into this program through either A&S or the Swanson School of Engineering and must be admitted into both schools.

While the form of the program is dependent upon the individual student's interests, the first year curriculum is typically the standard engineering program. During the next three years the student may complete the specific requirements for his or her engineering degree while fulfilling certain A&S major and general education requirements. Typically, the fifth year is then used to complete the A&S requirements. Students must complete a minimum of 90 A&S credits, including all A&S skills and general education requirements and an A&S major (but not a related area). Students must also complete all the degree requirements of their chosen engineering program, usually consisting of 70 or more Swanson School of Engineering credits. Each program should be developed with an advisor in the Dietrich School of Arts and Sciences and an advisor in the Swanson School of Engineering and tailored to the student's special interests. Students in this program have combined engineering with neuroscience, philosophy, economics, music, language, and a number of other programs.

Students must satisfy both schools' normal progress requirements and criteria for academic standing as long as they remain in the joint degree program. Students also must apply for graduation from both schools. A&S students earn either a BA or BS degree, depending upon the A&S program

of study. The student's GPA for graduation from A&S is calculated based solely upon the credits earned for the A&S degree. For further information, students may contact one of the following: the First Year Engineering Program Office, 152 Benedum Hall; an engineering departmental undergraduate coordinator; the A&S Office, 140 Thackeray Hall; the A&S Advising Center, 252 Thackeray Hall; or the David C. Frederick Honors College engineering advisor, 3600 Cathedral of Learning.

David C. Frederick Honors College Opportunities

Students admitted to the David C. Frederick Honors College (Pitt Honors) and students interested in participating in honors courses have the opportunity to participate in several unique programs. Students admitted to Pitt Honors may elect to pursue the Bachelor of Philosophy degree or the Honors Joint degree in addition to their engineering Bachelor of Science degree. Students who have not been admitted to Pitt Honors prior to the first year may apply for degree candidacy in the David C. Frederick Honors College (FHC) after completing their first year at Pitt. Students admitted to the Honors College will be assigned an Academic Advisor in the Swanson School and another in the Honors College. Swanson students admitted to the David C. Frederick Honors College are given earlier enrollment appointments than non-Honors College engineering students with the same academic level. However, Swanson students, including those admitted to the Honors College, may be restricted from taking a course in a particular term if space is needed to accommodate other students completing graduation requirements.

Students interested in taking honors courses but who do not wish to pursue the honors degree options may instead choose to challenge themselves in and out of the classroom by electing to pursue Honors Distinction, which involves both honors coursework and participation in the Honors Outside the Classroom Curriculum (OCC). Students interested in the Honors College should contact the Honors College: 3500 Cathedral of Learning, University of Pittsburgh, Pittsburgh, PA 15260, or call 412-624-6880. (See the David C. Frederick Honors College section of this bulletin.)

Architecture Design Minor (Offered by History of Art and Architecture in the Dietrich School of Arts and Sciences)

Those working in many aspects of Civil Engineering, particularly in structural engineering and other building sciences, work intimately with architects. The Minor in Architecture - Design provides an opportunity for students to obtain experience and understanding of various aspects of the architecture profession. Students engage in two studio courses (ARC 0201 and ARC 1201), ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT, and at least one additional ARC or HAA elective. The requirements of the Minor are used to partially satisfy SSOE humanities requirements and ARC 1201 satisfies one 3 credit CEE elective requirement. Due to the nature of the Architecture - Design Minor, students must generally begin in their first or sophomore years. This Minor is administered through the History of Art and Architecture Department (HAA). For more information visit Department of History of Art and Architecture. However, SSOE students wishing to pursue this Minor are advised to contact Dr. Kent Harries in CEE before applying. Dr. Harries is located in 218B Benedum Hall, email: kharries@pitt.edu.

Cooperative Engineering Education Program

The school's Cooperative Engineering Education Program enhances the student engineer's educational experience through a series of challenging, highly relevant "real world" work sessions. This is accomplished by integrating rotations of school and employment terms that enables the cooperative education student to complement his or her formal classroom training with additional technical knowledge, hands-on experience, and financial remuneration. The co-op graduate possesses the maturity and assurance of a more seasoned employee and the ability to incorporate academic knowledge and theory into practice. During co-op sessions, students earn competitive salaries, which also makes the program financially rewarding.

Through the assistance of the Swanson School of Engineering's Cooperative Education program, formal arrangements are established with industry that permit students to participate in four-month or six-month rotations alternating work experience with coursework. At the University of Pittsburgh, these rotations begin primarily during their sophomore year, with the additional alternating rotations, or second six-month rotation happening Junior/Senior year. Students working longer at an employer can experience increased job duties as the knowledge and skills of the student engineer progress. The positions can be local, national, or international. This practical work experience has also been found to increase academic motivation and classroom performance.

Students can work three alternating rotations, or two six-month rotations. Alternating rotations can start summer, fall, or spring terms. Six-month rotations can run a Spring/Summer (January-June) or a Summer/Fall (July-December). Students can opt to stay with the same employer, or switch to a different company or industry for their remaining rotations. Co-op students become aware of business practice and etiquette and possess a mature, responsible attitude. Thus, upon graduation, students who have successfully completed the co-op program are able to handle more challenging initial assignments with confidence and assurance. A high percentage of co-op students also obtain and accept full-time offers from their co-op employers.

Sample Co-op schedules can be found here and are available through the Co-op Program Office and faculty Co-op advisors in the Engineering departments as well.

Keep in mind that students while on co-op rotations are unable to simultaneously hold employment positions as student workers or federal work study positions during that timeframe. Students earn transcript certification and a total of 3 credits towards departmental graduation requirements upon satisfactory completion of the program requirements. The Co-op program offers resume preparation, interviewing skills, workshops, and job fairs in order to facilitate appropriate placements for students.

SSOE Global Experiences and Engagement

As the world around us grows ever more connected, it is evident that engineering students must be prepared to engage in an increasingly globalized world, and, upon graduation, to compete in an international job market. Accordingly, the Swanson School of Engineering has placed a strong emphasis on the development of exciting and academically enriching global programs for its students.

All students in SSOE are encouraged to add a global dimension to their education by pursuing one or more international programs as part of their academic study. At present, SSOE students may elect to participate in study, research, co-op, internship, or service learning abroad. Most of these opportunities are offered on a for-credit basis, and many can be used to satisfy major, minor, technical elective, or other degree requirements. Foreign language study is helpful, but not required, as many courses are on offer in English. Depending on their academic and personal interests, students may elect to participate in dozens of individual international programs. Some of these may last for only a week or two, either during spring break or over the summer term. Others may involve a commitment of a semester or even an entire academic year abroad. Depending on the type of study abroad global program, there may be a minimum GPA requirement.

The Swanson Signature Global Programs are short term opportunities that focus on a relevant engineering topic in detail over the course two to five weeks. Recently, Swanson Signature programs have occurred in Brazil, Germany, Guam, Italy, South Africa, and Uruguay, studying such diverse topics as renewable energy and sustainability, island nation risk, and global supply networks. Plus3 is another innovative short term program designed for first-year SSOE students, and which has taken place in locations such as Brazil, China, Costa Rica, Germany, Italy, South Korea, and Vietnam. Students who wish to invest in longer term study may decide to participate in an exchange program. This affords them the opportunity to study engineering, social sciences or humanities at a foreign college or university for one or two consecutive academic terms, and for little more than the cost of a regular term in Pittsburgh. Finally, scholarships and other funding opportunities are also available, and financial aid administered by the University of Pittsburgh may apply.

There is an International Engineering Studies Certificate as well as a Global Distinction offered to University of Pittsburgh students that formally recognizes broad and meaningful engagement in global learning. The Swanson School of Engineering encourages its students to explore the requirements to obtain these complements to their degree program.

Current and prospective SSOE students and their parents are welcome to contact the Office of Global Experiences and Engagement for more information:

University of Pittsburgh
Swanson School of Engineering
Office of Global Experiences and Engagement

Articulation Agreements

The Swanson School of Engineering has developed combined liberal arts/engineering articulation agreements with a number of accredited liberal arts colleges. In these programs, students first complete a three-year structured course of study at the liberal arts college, including that college's general education requirements, specific introductory courses required for the engineering program of interest, and other courses necessary for acceptance into a Swanson School of Engineering program. With the recommendation of the faculty advisor at the liberal arts college, the student applies for transfer to the University of Pittsburgh, Swanson School of Engineering, spending the final two or more years in an engineering program.

Swanson School of Engineering-Diversity Initiatives

The Engineering Office of Diversity exists to create and sustain learning and working environments where differences and similarities are valued and respected, and all scholars, especially underrepresented scholars, are included and empowered to excel in engineering education. The office provides diversity education to the community, undergraduate scholars, graduate scholars, staff and faculty. The office also provides continuous academic and community support services through its undergraduate and graduate scholar programming.

Diversity Programs

The Swanson School of Engineering undergraduate diversity program develops and implements activities that promote and support the academic excellence of high achieving undergraduate scholars from groups historically underrepresented in science, technology, engineering and mathematics (STEM) fields. These initiatives provide a continuous pipeline for scholars to prepare for, enter and graduate from the University of Pittsburgh as STEM majors.

Pitt EXCEL Program

The Pitt EXCEL Program is a comprehensive undergraduate diversity program committed to the recruitment, retention, development, and graduation of historically underrepresented engineering scholars. Pitt EXCEL scholars strive to advance in the areas of scholarship, professionalism, graduate endeavors, and community engagement. In addition, Pitt EXCEL scholars have access to academic counseling, peer mentoring for first year and upperclassmen scholars, year specific seminars, tutoring resources, engineering research, graduate school preparation and professional development workshops. Lastly, first year Pitt EXCEL scholars are eligible to participate in our two-week intensive study skills, math and science summer bridge program.

The vision of the Pitt EXCEL Program:

1. Achieve 100% placement in each Pitt EXCEL scholar's desired engineering field of pursuit, inclusive of graduate school, industry, and medical school.
2. Establishing lifelong connections with fellow undergraduate scholars, staff, faculty, alumni, and industry relations.
3. Producing the highest achieving scholars that rank in the top 20% in all engineering disciplines within the Swanson School of Engineering.

PITT STRIVE Program

The University of Pittsburgh Swanson School of Engineering PITT STRIVE Program (formerly known as the AGEP-TDAE). STRIVE stands for **S**uccess, **T**ransition, **R**epresentation, **I**nnovation, **V**ision, and **E**ducation. Thanks to a grant from the National Science Foundation, the University of Pittsburgh Swanson School of Engineering and its Office of Diversity (EOD) have established the PITT STRIVE Program to improve the transitions of Underrepresented Minorities (URM), who are US citizens, into doctoral engineering programs at the University of Pittsburgh and to ensure their successful completion by employing evidence-based strategies for student and faculty engagement and fostering an inclusive academic climate for URM doctoral students.

Scholarship Eligibility

PITT STRIVE Scholars will be recruited from members of underrepresented minority group (Black/African American, American Indian, Hispanic/Latino, Alaska Native, and Native Hawaiian or Pacific Islander) meeting US citizenship or permanent residency requirements with an undergraduate GPA of 3.3/4.0.

Other SSOE Diversity Initiatives:

Diversity Professional Development Workshops

During Fall and Spring semesters, the Engineering Office of Diversity and PITT STRIVE program organize a series of workshops that allow the campus community to meet the leading experts in diversity-related issues and initiatives. The Engineering Office of Diversity and PITT STRIVE program also organize seminars and workshops dedicated to such nationally recognized celebrations as Hispanic Heritage Month, Black History Month, and Women's History Month, etc.

For additional information, please contact:

Office of Retention

Swanson School of Engineering (SSoE) is committed to the success of our students, which is why we have created the Office of Retention. We take a proactive approach in supporting our students.

The Academic and Career Enhancement (ACE) program is focused on the retention and graduation of SSoE students. When SSoE students experience an academic set-back, they will be invited by the Director of Retention to have the opportunity to participate in ACE.

Eligible sophomores, juniors and seniors who have had an academic set-back such as:

Academic probation
Academic warning
Repeating a course(s)
are strongly encouraged to participate in the ACE program.

Swanson School of Engineering Faculty

School of Engineering Faculty

Program and Course Offerings

Students enter one of the specific engineering major programs below at the sophomore level after successfully completing the First-Year Student Engineering Program.

Degree Programs in BS in Engineering

Bioengineering
Chemical Engineering
Civil Engineering
Computer Engineering
Electrical Engineering
Engineering Science
Environmental Engineering
Industrial Engineering
Materials Science and Engineering
Mechanical Engineering

Certificate Programs

Engineering Data Analytics
Engineering for Humanity Certificate
Engineering Simulation in Design Certificate
Health Systems Engineering Certificate
Innovation, Product Design, and Entrepreneurship Certificate
International Engineering Studies Certificate
Nuclear Engineering Certificate
Supply Chain Management Certificate
Sustainability Certificate

Joint Certificate

Nanoscience and Engineering Undergraduate Certificate

Advances in nanoscience and nanotechnology (the ability to predict, create, and design with nanoscale materials and systems) are expected to reveal new physical phenomena and to enable the creation of highly desirable products and devices, in addition to revolutionary changes in industrial practice. Strength in nanoscience and nanotechnology has been identified as the nation's future competitiveness and prosperity, and strategic plans have been developed to accelerate nanoscience research and development, encourage knowledge transfer to spur economic growth, and expand educational programs and workforce training - all in a socially and environmentally responsible and sustainable manner.

Nanoscience and nanotechnology also has had a large and rapidly growing local impact. The Pittsburgh region is home to a number of corporations, including many smaller start-up companies, with major nanotechnology components to their businesses. The continued success of companies such as PPG, Seagate, Bayer, Alcoa, Plextronics, Westinghouse, Bettis, and II-VI will depend on their ability to recruit local engineering talent with the required background in nanoscience and nanotechnology. The continued development of nanotechnology-based entrepreneurial start-ups will depend in large part on a vibrant pool of young engineers and scientists with appropriate educational experience in nanoscience and nanotechnology.

This joint certificate, housed in both the Swanson School of Engineering (SSOE) and the Dietrich School of Arts and Sciences (Dietrich School) enables BS students from both schools to complement their education by completing a five-course sequence. The certificate is designed to be combined with coursework in any SSOE degree-granting program, or with chemistry and physics in the Dietrich School.

The course requirements for this certificate follow.

Required courses

This course has prerequisites.

ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
PHYS 1903 - DIRECTED RESEARCH

Elective courses

Select two courses from the following list.

CHEM 1410 - PHYSICAL CHEMISTRY 1 or
CHEM 1420 - PHYSICAL CHEMISTRY 2
CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY
CHEM 1600 - SYNTHESIS & CHARACTERIZATION OF POLYMERS
CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ECE 2295 - SPECIAL TOPICS: ELECTRONICS
IE 1012 - MANUFACTURE OF STRUCTURAL NANOMATERIALS or
MEMS 1057 - MICRO/NANO MANUFACTURING
PHYS 0520 - MODERN PHYSICS MEASUREMENTS
PHYS 1361 - WAVE MOTION AND OPTICS
PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
PHYS 1374 - SOLID STATE PHYSICS

Additional information

Non-Dietrich School course credit

Students may apply up to 18 credits of non-Dietrich School coursework to their undergraduate degrees.

Credit overlap

No more than six credits of coursework may overlap between the requirements for this certificate and a major in Physics and Astronomy or in Chemistry.

Grade Requirements

A minimum GPA of 2.0 is required in each course that counts toward the certificate.

Satisfactory/No Credit Option

No course that counts toward this certificate may be taken on the S/NC basis.

For more information

Contact the departmental advisor for the Physics and Astronomy major, Russell Clark (RUC2@Pitt.edu).

Quantum Computing and Quantum Information Certificate

Program Requirements

The BS joint Quantum Computing and Quantum Information Certificate (QCQIC) program will consist of a 15 credit requirement (not including any pre-requisites) that must be combined with a BS degree in any discipline in DSAS, SSOE and SCI.

Five Courses

1 Foundations of Quantum Computing and Quantum Information, the only course required of all students.

2-3 Elective courses that have at least 50% quantum related content in them selected from an approved list (at least 6 credits but up to 9 credits, see below, could include individual research or capstone courses with PQI faculty members under the courses listed for individual research or capstone courses in various departments and credits for these courses may be spread over multiple terms)

3-6 credits of other non-quantum electives from an approved list (see below); The undergraduate joint Quantum Computing and Quantum Information Certificate (QCQIC) program targets the following competency gaps:

Fundamental understanding of the basics of quantum computing and quantum information

Knowledge of processes used to create useful applications of the fundamental quantum principles in quantum computing, quantum communication and quantum sensing

Quantum science and technology as an interdisciplinary science and engineering enterprise the quantum behavior of materials, systems, and devices

Required Course

PHYS 1470 - FOUNDATIONS OF QUANTUM COMPUTING AND QUANTUM INFORMATION

Quantum Related Electives

HPS 1612 - PHIL OF 20TH CENTURY PHYSICS

CHEM 1410 - PHYSICAL CHEMISTRY 1 OR

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY

CHEM 1620 - ATOMS, MOLECULES AND MATERIALS
 CHEM 2120 - DESCRIPTIVE INORGANIC AND ORGANOMETALLIC CHEMISTRY
 PHYS 0330 - PHYSICS AND QUANTUM COMPUTING SEMINAR
 PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
 PHYS 0520 - MODERN PHYSICS MEASUREMENTS
 PHYS 1370 - INTRODUCTION TO QUANTUM MECHANICS 1
 PHYS 1371 - INTRODUCTION TO QUANTUM MECHANICS 2
 PHYS 1374 - SOLID STATE PHYSICS
 ECE 1232 - INTRO LASERS & OPTCL ELECTNC
 ECE 1247 - SEMICONDUCTOR DEVICE THEORY
 ECE 1272 - SIMULATION AND DESIGN OF SILICON PHOTONICS
 MEMS 1058 - ELECTROMAGNETIC PROPERTIES OF MATERIALS
 ENGR 1066 - INTRODUCTION TO SOLAR CELLS AND NANOTECHNOLOGY
 CS 1613 - QUANTUM COMPUTATION
 CHEM 1710 - UNDERGRADUATE RESEARCH
 PHYS 1903 - DIRECTED RESEARCH
 ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT
 CS 1950 - DIRECTED RESEARCH: CAPSTONE
 CS 1951 - DIRECTED RESEARCH
 INFSCI 1710 - DIRECTED RESEARCH

Quantum Adjacent Electives

HPS 1653 - INTRO TO PHILOSOPHY OF SCIENCE
 CHEM 1000 - MATHEMATICS FOR CHEMISTRY
 CHEM 1420 - PHYSICAL CHEMISTRY 2
 ENGCOMP 0530 - WRITING FOR THE SCIENCES
 PHYS 1341 - THERMODYNAMICS AND STATISTICAL MECHANICS
 PHYS 1351 - INTERMEDIATE ELECTRICITY AND MAGNETISM
 PHYS 1361 - WAVE MOTION AND OPTICS
 ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
 ECE 0301 - ECE PROBLEM SOLVING WITH C++
 ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
 IE 1081 - OPERATIONS RESEARCH
 IE 1082 - PROBLSTC METH IN OPERATNS RES
 ENGR 1453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION
 INFSCI 1520 - INFORMATION VISUALIZATION
 INFSCI 1530 - DATA MINING
 INFSCI 1470 - IMMERSIVE MEDIA TECHNOLOGIES
 INFSCI 1630 - COMMUNICATION NETWORKS
 INFSCI 1640 - WIRELESS NETWORKS
 INFSCI 0310 - COMPUTATION IN INFORMATION SCIENCE
 INFSCI 1600 - SECURITY AND PRIVACY
 INFSCI 0610 - NETWORKS AND INFORMATION
 CMPINF 0401 - INTERMEDIATE PROGRAMMING
 CS 0441 - DISCRETE STRUCTURES FOR CS
 CS 0445 - ALGORITHMS AND DATA STRUCTURES 1
 CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
 CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE
 CS 1510 - ALGORITHM DESIGN
 CS 1656 - INTRODUCTION TO DATA SCIENCE
 CS 1675 - INTRODUCTION TO MACHINE LEARNING
 CS 1678 - INTRODUCTION TO DEEP LEARNING

Additional elective courses for the QCQIC will be added to the program as they are developed and become available in the DSAS, SSOE and SCI (new courses must be approved by the Advisory Committee). Some courses that apply towards the certificate also count as electives in the degree tracks of Chemistry and Physics and Astronomy but no more than 9 credits can be earned through those courses.

Total Credits: 15

Department of Bioengineering

Bioengineering is an ABET-accredited undergraduate degree program that combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences.

Research Areas

Undergraduates are required to participate in research with a faculty mentor. In addition to our primary faculty, our strong connections with the Schools of Medicine, Dental Medicine, and Health and Rehabilitation Sciences provide multiple opportunities for students to engage in research in such areas as:

Cellular Engineering

Biomaterials

Tissue Engineering

Movement and Balance

Biotribology

Artificial Organs

Biorheology

Radio Frequency Imaging

Neural Engineering

Clinical Engineering

Our unique laboratory, clinical, and research experiences beyond the classroom are opportunities that few, if any, universities can match.

What Can you Do with a Bioengineering Degree

Graduates of our Bioengineering Program are prepared to obtain employment in industry (about 55%), seek further graduate education (M.S./Ph.D., about 25%), and pursue a career as a health science practitioner (M.D./D.O./P.A./M.P.H., about 20%). Those going to industry have many roles, such as: design of instruments and devices used in healthcare; development of diagnostic tools; assess technology for regulatory compliance with FDA requirements; training clinicians in the use of biomedical technology; research new approaches to providing healthcare; prepare and document procedures and reports; and make recommendation to senior management. Advanced graduate education training can lead to more responsible roles in industry or academic positions in teaching, research, and development. Medical practitioners draw upon skills developed as a bioengineer to help diagnose medical problems and identify new approaches to medical technology.

Curriculum and Electives

The Bioengineering Program undergraduate curriculum requires 29 courses that provide a broad background in mathematics, physics, chemistry, biology, and bioengineering, plus 13 electives. Five of the electives are drawn from a large selection in the Humanities and Social Sciences. The remaining eight electives are selected to meet requirements of one of four tracks (Bioimaging and Signals, Biomechanics, Cellular Engineering, Medical Product Engineering) that provide in depth experience in an area of the student's choice. The curriculum is designed to provide the breadth

and depth required for ABET accreditation and to be a competitive engineer in the global marketplace. The curriculum has also been designed to allow students interested in "pre-med" to satisfy medical school requirements within the requirements of any track.

Cooperative Education and International Experience

The Department of Bioengineering encourages all students to enhance the value of their degree through participation in the Cooperative Education (co-op) and International Studies programs offered by the Swanson School of Engineering. Co-op provides students with semester rotations between college and full-time work assignments with corporate partners that relate directly to bioengineering. An international experience offers a global perspective and cross-cultural awareness of engineering practice that enhances post-graduate opportunities.

Major

Bioengineering

Bioengineering

The undergraduate program in Bioengineering combines education in engineering and biological sciences, forming a unique experience to prepare students for today's technical challenges in medicine and biology. Our focus is on developing engineers who can apply an analytic approach to solving problems in living systems. Thus, we provide students with a comprehensive education in both engineering and the life sciences. Students enrolled in the program will be prepared for continued graduate studies or a career in a bioengineering-related industry. The program also provides a solid undergraduate education for further studies in a school of medicine. The Bioengineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Bioengineering, Biomedical and Similarly Named Engineering Programs Program Criteria.

In keeping with the two-fold mission of the Department of Bioengineering to

provide a high quality engineering education to both undergraduate and graduate students; and
be a leader in research in specific areas encompassed by Bioengineering,

the Bioengineering undergraduate curriculum objective is to prepare students to achieve their post-baccalaureate goal of:

an industrial career in bioengineering or related field;
graduate school (MS and PhD programs related to bioengineering); or
professional school (Medical, Dental, Health Related, Business, and Law).

To achieve the objective, students are:

provided both a broad knowledge of the technical and social principles of bioengineering as well as a focused education in one track area within
bioengineering, and
prepared through educational experiences beyond the classroom that deepen their understanding of the technical and non-technical issues in
bioengineering, process and design.

Bioengineering Undergraduate Curriculum

Sophomore Year

Third Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
MATH 0290 - DIFFERENTIAL EQUATIONS
Track Elective

Credits: 17

Fourth Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1
BIOENG 1630 - BIOMECHANICS 1-MECHANICAL PRINCIPLES BIOLOGICAL SYSTEMS
BIOENG 1000 - STATISTICS FOR BIOENGINEERING

Credits: 16

Junior Year

Fifth Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1002 - INTRAMURAL INTERNSHIP
BIOENG 1220 - BIOTRANSPORT PHENOMENA
BIOENG 1320 - BIOLOGICAL SIGNALS AND SYSTEMS
BIOSC 1250 - HUMAN PHYSIOLOGY
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING

Credits: 18

Sixth Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1150 - BIOENG METHODS AND APPLICATIONS
Biosignals Application or Track Elective
Imaging Elective or Track Elective
Track Elective
Humanities/Social Science Elective

Credits: 16

Senior Year

Seventh Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1160 - BIOENGINEERING DESIGN 1
Biosignals Application or Track Elective
Imaging Elective or Track Elective
Advanced Engineering/Science/Technical Elective
Humanities/Social Science Elective

Credits: 15

Eighth Term

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR
BIOENG 1161 - BIOENGINEERING DESIGN 2
Biosignals Application or Track Elective
Imaging Elective or Track Elective
Advanced Engineering/Science/Technical Elective
Humanities/Social Science Elective

Credits: 15

Minor

Bioengineering Minor

Undergraduates in other departments can obtain a Minor in Bioengineering by satisfactorily completing (grade of C or better) one BioE seminar and five courses for a total of 16 credits (effective Fall 2022, 15 credits for Swanson School of Engineering students). Students interested in a Bioengineering Minor are required to submit a completed BioE Minor Checklist to the Bioengineering Undergraduate Administrator for course approvals prior to enrolling in BIOENG courses in order to ensure that the requirements for the minor are fulfilled. Approval to use substitute courses to meet minor requirements must be obtained in advance from the Bioengineering Undergraduate Program Director.

Requirements for the Bioengineering Minor are:

Bioengineering Seminar - 0 Credits

BIOENG 1086 - BIOENGINEERING SEM FOR MINORS (Register for and attend a minimum of 6 seminar presentations)

Basic Life Science Course - 3 Credits

Acceptable course options include (others may be used with permission)

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2
BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2
BIOSC 1000 - BIOCHEMISTRY
BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION
CHEM 1810 - CHEMICAL BIOLOGY
CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS
BIOSC 1250 - HUMAN PHYSIOLOGY

Course in Statistics - 4 Credits

Note: Students who have a major in the Swanson School of Engineering seeking a minor should take ENGR 0021 while students who do not have a major in the Swanson School of Engineering should take STAT 1000.

ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS
(SSoE Students)
STAT 1000 - APPLIED STATISTICAL METHODS
(non-SSoE Students)

Three BIOENG Elective Courses - 9 Credits

Note: Students must meet prerequisites (or equivalent) to enroll in BIOENG courses.

BIOENG 1002 - INTRAMURAL INTERNSHIP
 BIOENG 1005 - RADIOFREQUENCY MEDICAL DEVICES
 BIOENG 1024 - MEDICAL PRODUCT DESIGN
 BIOENG 1050 - ARTIFICIAL ORGANS
 BIOENG 1051 - ARTIFICIAL ORGANS 2
 BIOENG 1052 - ARTIFICIAL ORGANS 3
 BIOENG 1150 - BIOENG METHODS AND APPLICATIONS
 BIOENG 1160 - BIOENGINEERING DESIGN 1
 BIOENG 1161 - BIOENGINEERING DESIGN 2
 BIOENG 1210 - BIOENGINEERING THERMODYNAMICS
 BIOENG 1218 - EMERGING BIOMEDICAL TECHNOLOGIES
 BIOENG 1220 - BIOTRANSPORT PHENOMENA
 BIOENG 1255 - DYNAMIC SYSTEMS: PHYSIOLOGICAL PERSPECTIVE
 BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1
 BIOENG 1320 - BIOLOGICAL SIGNALS AND SYSTEMS
 BIOENG 1330 - BIOMEDICAL IMAGING
 BIOENG 1340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS
 BIOENG 1351 - BIOSIGNAL ACQUISITION AND ANALYSIS
 BIOENG 1355 - MEDICAL PRODUCT REGULATION AND REIMBURSEMENT
 BIOENG 1370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN
 BIOENG 1383 - BIOMEDICAL OPTICAL MICROSCOPY
 BIOENG 1533 - CONTROLLED DRUG DELIVERY
 BIOENG 1580 - BIOMEDICAL APPLICATION FOR SIGNAL PROCESSING
 BIOENG 1586 - QUANTITATIVE SYSTEMS NEUROSCIENCE
 BIOENG 1615 - INTRODUCTION TO NEURAL ENGINEERING
 BIOENG 1620 - INTRODUCTION TO TISSUE ENGINEERING
 BIOENG 1630 - BIOMECHANICS 1-MECHANICAL PRINCIPLES BIOLOGICAL SYSTEMS
 BIOENG 1631 - BIOMECHANICS 2: INTRODUCTION TO BIODYNAMICS AND BIOSOLID MECHANICS
 BIOENG 1632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
 BIOENG 1633 - BIOMECHANICS 4 - BIOMECHANICS OF ORGANS, TISSUES, AND CELLS
 BIOENG 1680 - BIOMEDICAL APPLICATIONS OF CONTROL
 BIOENG 1810 - BIOMATERIALS AND BIOCOMPATIBILITY

Additional Information

Note: BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1 and BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2 are considered Basic Life Science Courses. Neither can be used to satisfy a BIOENG elective course requirement.

Note: BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING is a humanities/social science course that is restricted to Department of Bioengineering students only. The course cannot be used to satisfy a BIOENG elective course requirement.

Note: BIOENG 1095 - SPECIAL PROJECTS cannot be used to satisfy a BIOENG elective course requirement

Department of Chemical and Petroleum Engineering

Chemical engineering is concerned with processes in which matter and energy undergo change. Despite the historically-inspired name, the material/energy transformations studies by chemical engineers include not only chemical, but also physical and biological changes. The range of concerns, therefore, is so broad that the chemical engineering graduate is prepared for a variety of interesting and challenging employment opportunities. The chemical engineer with his/her strong background in chemical, physical, and biological sciences is found in management, design, operations, and research. The chemical engineer is employed in almost all industries including food, polymers, chemicals, pharmaceuticals, petroleum, medical, materials, and electronics. Since solutions to energy, environmental, medical, and food problems (to name but a few) must surely involve material and/or energy transformations, there will be continued demands for chemical engineers in the future. The chemical engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>

The major objectives of the chemical engineering program are that

Graduates will gain employment in professional careers (often in positions of technical expertise in chemical engineering, but also including professions such as medicine, law, business, finance, non-profit organizations, government, education, etc.) and/or enroll in graduate studies.

Graduates will be committed to lifelong learning throughout their careers.

Graduates will assume positions of leadership.

Graduates will recognize the importance of utilizing their knowledge, skills, and initiative for the benefit of society and demonstrate that understanding through their interactions within their community, in government, or in society as a whole.

The chemical engineering faculty have strong interests in transport phenomena, process dynamics, biotechnology, biomedical application, nanotechnology, kinetics, catalysis, thermodynamics, polymers, and energy supply and conversion. Petroleum engineering faculty interests are in fluid displacement in porous media and enhanced oil recovery and reservoir modeling. Courses and research opportunities are available in all of these areas for undergraduate students of demonstrated ability. For more information on these programs, please visit <http://www.engineering.pitt.edu/chemical>

Major

Chemical Engineering

The following areas of concentration are available for Chemical Engineering students:

Petroleum Concentration

Polymers Concentration

Chemical Engineering Undergraduate Curriculum

Undergraduate chemical engineering courses cover thermodynamics; mass and energy balances; energy, mass, and momentum transfer; unit operations; process dynamics and control; process design; plant and product design; professional practice; and chemical reaction engineering. A cumulative QPA of 2.0 must be achieved in all CHE courses for the student to earn a degree in Chemical Engineering and a minimum grade of C- in CHE 0100, CHE 0200, CHE 0300 and CHE 0400.

In addition, the curriculum provides a sequence of technical electives that makes possible specialization in some of the most important areas in today's society. Among these are the biochemical, petroleum, and polymers areas of concentration. Students may select any combination of technical electives. The appropriate selection of electives, however, can lead to a minor or area of concentration. (See Minors in Engineering.)

The Chemical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Chemical, Biochemical, Biomolecular and Similarly Named Engineering Programs Program Criteria.

Requirements

Third Term

CHEM 0310 - ORGANIC CHEMISTRY 1

ChE Composition Requirement - 3 credits

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3

CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR

CHE 0101 - FOUNDATIONS OF CHE LABORATORY

CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 17

Fourth Term

CHEM 0320 - ORGANIC CHEMISTRY 2

MATH 0290 - DIFFERENTIAL EQUATIONS or

CHE 1290 - DIFFERENTIAL EQUATIONS IN CHEMICAL ENGINEERING or

MATH 1270 - ORDINARY DIFFERENTIAL EQUATIONS 1

CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS

CHE 0201 - CHE THERMODYNAMICS LABORATORY

CHE 0214 - INTRODUCTION TO CHEMICAL PRODUCT DESIGN

CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fifth Term

ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS

Humanities/Social Science - 3 Credits

CHE 0300 - TRANSPORT PHENOMENA

CHE 0301 - TRANSPORT PHENOMENA LABORATORY

CHE 0314 - TAKING PRODUCTS TO MARKET: THE NEXT STEP IN CHEMICAL PRODUCT DESIGN

CHE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY

CHE 0400 - REACTIVE PROCESS ENGINEERING

CHE 0401 - REACTIVE PROCESS ENGINEERING LABORATORY

Humanities/Social Science - 3 Credits

CHE 1085 - DEPARTMENTAL SEMINAR

Engineering Elective - 3 Credits

Suggestions:

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES

ENGR 0135 - STATICS & MECHANICS OF MATERIALS 1

ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING

ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS

ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S

Credits: 15

Seventh Term

CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING

CHE 0501 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING LABORATORY

Humanities/Social Science - 3 Credits

CHEM 1810 - CHEMICAL BIOLOGY or
CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS or
BIOSC 1000 - BIOCHEMISTRY

CHE 1085 - DEPARTMENTAL SEMINAR

Advanced Science - 3 Credits

Suggestions:

CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY
CHEM 1130 - INORGANIC CHEMISTRY
CHEM 1600 - SYNTHESIS & CHARACTERIZATION OF POLYMERS
BIOSC 1500 - CELL BIOLOGY
BIOSC 1940 - MOLECULAR BIOLOGY

Advanced Labs - Total of 2 Credits

Suggestions:

CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1
CHEM 1605 - SYNTHESIS & CHARACTERIZATION OF POLYMERS LAB
CHEM 0345 - ORGANIC LABORATORY (This is a 2 credit course)

Credits: 17

Eighth Term

CHE 0613 - SYSTEM ENGINEERING 2: PROCESS DESIGN
CHE 0602 - CHEMICAL ENGINEERING SAFETY AND ETHICS
ChE or PETE Elective - 3 Credits
Humanities/Social Science - 3 Credits
Professional Elective - 3 Credits

Credits: 16

Total Credits Required: 131

Minor

Chemical Engineering Minor

This minor is available to all students (except Chemical Engineering undergraduates). A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Chemical Engineering. The student must receive a passing grade (C- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites include General Chemistry 1 and 2 and MATH 0220 and MATH 0230.

Requirements

For students outside the Swanson School of Engineering, or for Engineering majors that are not required to take a Thermodynamics and Transport Phenomena course in their major, the following three courses and their recitations and labs are required (a total of 21 credits):

CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR
CHE 0101 - FOUNDATIONS OF CHE LABORATORY
CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS
CHE 0201 - CHE THERMODYNAMICS LABORATORY
CHE 0300 - TRANSPORT PHENOMENA
CHE 0301 - TRANSPORT PHENOMENA LABORATORY

For students with the Swanson School of Engineering whose major does require that they take both a Thermodynamics and Transport Phenomena course (i.e., BioE and ME majors), the following two courses and their recitations and labs are required (a total of 13 credits).

CHE 0100
CHE 0101
CHE 0400
CHE 0401

Note, both the Transport Phenomena and Thermodynamics courses must be completed prior to enrolling in CHE 0400.

Petroleum Engineering Minor

This minor is available to all undergraduate engineers.

The successful completion of four PETE courses is required for the minor. A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Petroleum Engineering. The student must receive a passing grade (D- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites: MATH 0290 or CHE 1290 or equivalent and CHE 0100 or approval of PETE program director.

Requirements:

Choose four courses from the following list:

PETE 1160 - PETROLEUM RESERVOIR ENGINEERING
PETE 1201 - RECOVERY OF OIL BY WATERFLOODING
PETE 1204 - ENHANCED OIL RECOVERY PROCESSES
PETE 1205 - PETROLEUM PRODUCTION ENGINEERING
PETE 1207 - PETROLEUM AND NATURAL GAS PROCESSING
PETE 1208 - PETROLEUM DRILLING AND WELL COMPLETION
PETE 1097 - SPECIAL PROJECTS
PETE 1209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS (Cross-listed as CEE 1809)

** PETE 1097 projects can be conducted with a professor doing petroleum engineering related studies (Baled, Enick, Morsi) and may be replaced by two additional 3 credit PETE courses or a combination of PETE 1097 and a single 3 credit PETE course.

Polymer Engineering Minor

This minor is available to all undergraduate engineering students. The successful completion of six of the following courses is required for the minor. A cumulative QPA of 2.0 must be achieved for these courses in order for the student to be awarded the Minor in Polymer Engineering. The student must receive a passing grade (D- or higher) in all courses to receive the minor. These courses would have to be completed or taken over and passed prior to the student receiving the minor. Prerequisites include General Chemistry 1 and 2, and MATH 0220 and 0230.

Core Courses

CHE 1754 - PRINCIPLES OF POLYMER ENGINEERING
CHEM 1600 - SYNTHESIS & CHARACTERIZATION OF POLYMERS with lab
CHEM 1605 - SYNTHESIS & CHARACTERIZATION OF POLYMERS LAB

Required Chemistry Courses

Two Research Projects with Polymer Content (For a Total of 6 Credits)

CHE 1097 - SPECIAL PROJECT
CHEM 1710 - UNDERGRADUATE RESEARCH

Students can take CHE 1097 or CHEM 1710 or a combination of both, totaling 6 credits.

Department of Civil and Environmental Engineering

The University of Pittsburgh is proud of its history and tradition in civil and environmental engineering education, reinforced by a faculty who are dedicated to their students. The curriculum prepares students to tackle today's most eminent engineering, environmental and societal challenges.

The department offers a Bachelor of Science in Engineering degree that may be obtained by majoring in civil engineering or environmental engineering. The civil engineering major has been continuously accredited by ABET since its inception in 1936. The environmental engineering major was established in 2015 in response to strong demand from students, industry and government agencies and has been accredited by ABET since the Fall of 2017. The Department also offers minors in civil engineering and environmental engineering to students majoring in other disciplines.

Civil and environmental engineers are concerned with safeguarding life, health, and property while promoting the general welfare of society. They are the designers of the public and private works that affect large segments of the population. However, because problems of expanding population and increasing human needs that confront our civilization, the responsibility of civil and environmental engineers extends beyond mere physical structures into the social, political, and economic welfare of the United States and other countries. In brief, the work of the civil and environmental engineer has a significant impact on the quality of life in all areas of modern society.

Major

Civil Engineering

The following areas of concentration are available for Civil Engineering students:

Construction Management

Environmental Engineering

Geotechnical Engineering

Structural Engineering

Transportation Engineering

Water Resources Engineering

The civil engineer may focus in environmental control and in the development or redevelopment of a geographic area through overall planning, as well as in the design, construction, and operation of structures and facilities for public and private use. Included in the broad field of civil engineering are the following: buildings, bridges, and industrial installations; soil mechanics and foundations; transportation, including highways, traffic, airports, and harbors; hydraulic engineering, including irrigation; water resources, including power plants and dams; water supply; waste disposal; air pollution; hazardous and solid wastes; and environmental sanitation. Modern-day requirements have necessitated involvement in the medical and dental fields, oceanography, polar exploration, energy resources, and the space effort.

The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal needs and ways of meeting those needs. Thus, graduates are prepared to begin work in any of the several branches of civil engineering or to continue their education at the graduate level.

The Civil Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Civil and Similarly Named Engineering Programs Program Criteria.

Civil Engineering Undergraduate Curriculum

Third Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
Science Elective - 3 Credits
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS
ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS
CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1
CEE 1105 - MATERIALS OF CONSTRUCTION
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fifth Term

CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS
CEE 1402 - FLUID MECHANICS
CEE 1811 - PRINCIPLES OF SOIL MECHANICS
Social Science Elective - 3 Credits
CEE 1703 - TRANSPORTATION ENGINEERING
CEE 1085 - DEPARTMENTAL SEMINAR
CEE 1101 - DYNAMICS AND STABILITY

Credits: 18

Sixth Term

CEE 1200 - CONSTRUCTION MANAGEMENT

CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or
CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or
CEE 1618 - DESIGN FOR THE ENVIRONMENT

CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
Social Science Elective - 3 Credits

CEE Design Elective #1 - 3 Credits*
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

CEE-Design Elective #2 - 3 Credits*
CEE Elective - 3 Credits*
CEE Elective - 3 Credits*
Engineering Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

Humanities/Social Science Elective - 3 Credits

CEE 1233 - CONSTRUCTION DESIGN PROJECT or
CEE 1333 - STRUCTURAL DESIGN PROJECT or
CEE 1433 - WATER RESOURCES DESIGN PROJECT or
CEE 1533 - ENVRL ENGR DESIGN PROJECT or
CEE 1733 - TRANSPORTATION DESIGN PROJECT or
CEE 1833 - GEOTECHNICAL DESIGN PROJECT

CEE-Elective - 3 Credits**
CEE-Elective - 3 Credits**
CEE-Elective - 3 Credits**
CEE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Note:

*Design Electives are: (CEE 1335), (CEE 1410 or CEE 1401), (CEE 1505, CEE 1513 or CEE 1515), (CEE 1714, CEE 1715, CEE 1717, CEE 1718, CEE 1821, or CEE 2814), (CEE 1700 or CEE 1730). One course from two of the five groups is required.

**Any non-required CEE undergraduate courses, 2000 level CEE graduate courses, and any ENGR course offered by the CEE Department are suitable for CEE Electives.

Minimum Grade Requirements

ENGR 0131, ENGR 0141, CEE 1330, CEE 1402, CEE 1503, CEE 1811, and all design electives must be passed with a grade of "C" or higher.

Environmental Engineering

Environmental engineers are concerned with safeguarding life, health, and the environment while promoting society's general welfare. They are the designers of the public and private works that affect all segments of the population. The responsibility of the environmental engineer extends beyond mere physical structures into the social, political, and economic welfare of this and other countries. In brief, the work of the environmental engineer has a significant impact on the quality of life in all areas of modern society.

Environmental engineers deal in environmental control and in the development or redevelopment of a geographic area through overall planning, as well as in the design, construction, and operation of structures and facilities for public and private use (infrastructure). The field includes water supply systems, waste disposal, air and water pollution, and environmental remediation. The environmental engineering program at the University of Pittsburgh awarded the first B.S. degree in 2017.

The program begins with studies in the humanities, social sciences, physical sciences, and mathematics, and proceeds to the fundamental aspects of environmental engineering. The curriculum focuses on the electives available for designing individualized programs suited to the student's career goals. Emphasis is placed on societal and environmental needs as well as ways of meeting those needs. Thus, the graduate is prepared to begin work in any of the several branches of environmental engineering or to continue his or her education at the graduate level.

The Environmental Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Environmental Engineering and Similarly Named Engineering Programs Program Criteria.

Environmental Engineering Undergraduate Curriculum

The environmental engineering major is designed for the students who enter the program at the end of their freshman year. Qualified transfer students (3.000 GPA) are accepted subject to space available. In addition, summer programs are available primarily to assist students who are not taking the structured curriculum on schedule or students participating in the cooperative study program. Students are expected to complete all prerequisite courses before advancing to the next term.

Third Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
Earth Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS

CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING or
CHEM 0310 - ORGANIC CHEMISTRY 1

ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS

CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1 or
MATH 0280 - INTRO TO MATRICES & LINEAR ALG or
GEOL 1006 - ENVIRONMENTAL MODELING

CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Fifth Term

BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
CEE 1402 - FLUID MECHANICS
CEE 1811 - PRINCIPLES OF SOIL MECHANICS

CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT
Social Science Elective - 3 credits
Social Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 18

Sixth Term

CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING

CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS or
CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT or
CEE 1618 - DESIGN FOR THE ENVIRONMENT

CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
CEE 1523 - ENVIRONMENTAL ENGINEERING LAB
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Seventh Term

CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN or
CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
Environmental Program Elective - 3 credits
Environmental Program Elective - 3 credits
Humanities/Social Science Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Eighth Term

Humanities/Social Science Elective - 3 credits
CEE 1533 - ENVRL ENGR DESIGN PROJECT
Environmental Program Elective - 3 credits

CEE 1401 - OPEN CHANNEL HYDRAULICS or
CEE 1410 - HYDROLOGIC ANALYSIS AND DESIGN

Environmental Program Elective - 3 credits
CEE 1085 - DEPARTMENTAL SEMINAR

Total Credits: 15

Minimum Grade Requirements

ENGR 0131 and ENGR 0141 must be passed with a grade of "C" or higher.
CEE 1503, CEE 1504, CEE 1505/CEE 1515 , CEE 1513, CEE 1520, CEE 1522 and CEE 1523 must be passed with a grade of "C" or higher.

Minor

Architecture-Design Minor

The Architecture-Design minor consists of 18 credits, distributed as follows.

Requirements for the minor

The minor in Architecture - Design provides an option for students majoring in fields such as Civil Engineering, Environmental Studies, History, Studio Arts, Urban Studies and for whom course work in architectural design and history will provide additional breadth in their studies of the built environment. The minor requires that students complete 18 credits, 12 of which are studio-based design courses and six of which will provide historical and theoretical background for thinking about architecture and the built environment.

Foundational course in architecture

ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Two courses in architectural design

Students must earn a letter grade of C or higher in ARC 0201 ARC 0201 - FOUNDATIONS STUDIO 1 to enroll in ARC 1201 ARC 1201 - ARCHITECTURE DESIGN STUDIO 1.

ARC 0201 - FOUNDATIONS STUDIO 1

ARC 1201 - ARCHITECTURE DESIGN STUDIO 1

One course in architectural history

ARC 0153 - MEDIEVAL ARCHITECTURE

HAA 0460 - ART IN PUBLIC: INCLUSION, IDENTITY, AND ACTIVISM

ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN

HAA 0900 - SPECIAL TOPICS-ARCHITECTURAL STUDIES

ARC 1152 - ROMAN ARCHITECTURE

ARC 1154 - CONSTRUCTING THE GOTHIC

HAA 1305 - EARLY RENAISSANCE ARCHITECTURE

ARC 1156 - HIGH RENAISSANCE ARCHITECTURE

ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT

ARC 1161 - MODERNITY, MODERNISM AND HOUSING

ARC 1118 - ARCHITECTURE SINCE 1945

ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM

ARC 1136 - EARLY AMERICAN ARCHITECTURE

ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

HAA 1630 - CHINA: VILLAGE & URBAN ARCHITECTURAL SPACE

HAA 1656 - JAPAN: ARCHITECTURE AS PERFORMATIVE SPACE

ARC 1191 - ARCHITECTURE AND THE CITY IN CENTRAL EUROPE: 19TH AND 20TH CENTURIES

ARC 0210 - SPECIAL TOPICS-ARCHITECTURE

ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION

ARC 1330 - GLOBAL PRESERVATION

Two co-requisites

ARC 1911 ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1 may be waived for students who have taken a course in AutoCAD in high school or the equivalent course in the Department of Civil Engineering in the Swanson School of Engineering - CEE 0109 CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1.

SA 0130 SA 0130 - DRAWING STUDIO 1 may be waived for students who have taken art courses in high school.

ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1

SA 0130 - DRAWING STUDIO 1

Civil Engineering Minor

The Department of Civil and Environmental Engineering offers a Minor in Civil Engineering to B.S. degree students in other engineering or science departments of the University of Pittsburgh. The applicant must have completed the Swanson School of Engineering common Freshman year courses or their equivalent, plus the following courses which are prerequisites for Civil and Environmental Engineering (CEE) courses, each with a grade of "C" or better.

Prerequisites:

MATH 0240 and MATH 0290

ENGR 0131 or ENGR 0135

ENGR 0141 or ENGR 0145

Students from other engineering departments must be in good standing. Students from outside the Swanson School of Engineering must have an overall QPA of 2.5 or greater.

The Minor requires the completion of a minimum of 18 credits of course work in civil engineering.

Course Requirements

Three out of the following introductory courses.

CEE 1200 - CONSTRUCTION MANAGEMENT

CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS

CEE 1402 - FLUID MECHANICS

CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG

CEE 1703 - TRANSPORTATION ENGINEERING

CEE 1811 - PRINCIPLES OF SOIL MECHANICS

Three Electives from the Following Six Categories Related to the Introductory Courses, Must be Taken from the List Below

Construction Management (prerequisite CEE 1200):

CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT

CEE 2201 - CONSTRUCTION COST ENGINEERING

CEE 2202 - CONSTRUCTION SCHEDULING

CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT

CEE 2205 - CONSTRUCT FINANCE & COST CONTROL

CEE 2206 - CONSTRUCT & COST OF ELEC SUPPLY

CEE 2207 - CONSTRUCT & COST OF MECHL SYSTEMS

Structural Engineering (prerequisite CEE 1330):

CEE 1335 - DESIGN OF STRUCTURES

CEE 1340 - CONCRETE STRUCTURES 1

CEE 1341 - DESIGN OF STEEL STRUCTURES

CEE 1370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Water Resources Engineering (prerequisite CEE 1402):

CEE 1410 - HYDROLOGIC ANALYSIS AND DESIGN
CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
CEE 1401 - OPEN CHANNEL HYDRAULICS

Environmental Engineering (prerequisite CEE 1503):

CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING
CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES
CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING
CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
CEE 1523 - ENVIRONMENTAL ENGINEERING LAB
CEE 2500 - ENVRNMNTL ENGRG MICROBIOL
CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY
CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Transportation Engineering (prerequisite CEE 1703):

CEE 1700 - TRAFFIC MANAGEMENT AND OPERATIONS
CEE 1710 - TRAFFIC CONTROL SYSTEMS
CEE 1711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES
CEE 1714 - PAVEMENT DESIGN AND ANALYSIS
CEE 1715 - PAVEMENT MAINTENANCE AND REHAB
CEE 1717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE
CEE 1718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS
CEE 1720 - URBAN TRANSPORTATION PLANNING
CEE 1725 - PUBLIC TRANSPORTATION SYSTEMS
CEE 1730 - HIGHWAY ENGINEERING

Geotechnical Engineering (prerequisite CEE 1811):

CEE 1800 - ENGINEERING GEOLOGY
CEE 1821 - FOUNDATION ENGINEERING
CEE 2801 - ADVANCED SOIL MECHANICS
CEE 2802 - GEOTECHNICAL ANALYSIS
CEE 2814 - SLOPES & EARTH RETAINING STRUCT

Notes:

Environmental Engineering Majors seeking the minor may NOT use CEE 1402, 1503 or 1811 courses to satisfy the requirements.
Environmental Engineering Majors seeking the minor may NOT use CEE 1203, 14XX, 15XX, 24XX and 25XX courses to satisfy the requirements.

Application:

Early application is advised so that the applicant can be assigned to an advisor in the Department of Civil and Environmental Engineering.

To apply, obtain and submit the completed application form with a copy of your academic record to: ceeunder@pitt.edu; Telephone: 412-624-9870; 742 Benedum Hall.

Environmental Engineering Minor

The Department of Civil and Environmental Engineering offers a Minor in Environmental Engineering to B.S. degree students in other engineering or science departments within the University of Pittsburgh. The minor requires the completion of a minimum of 15 credits of course work in the environmental area. This minor is not available to Civil Engineering Majors in the Department.

The completion of the Environmental Engineering Minor will provide the student with a significant career advantage. Engineers and scientists from diverse backgrounds are needed in the control and management of our environment

Course Requirements

(Any deviation or substitution must be approved by the CEE Undergraduate Coordinator):

CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING
CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG
CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES

Two of the following courses:

CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING
CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN
CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN
CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING
CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING
CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS
CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT
CEE 1618 - DESIGN FOR THE ENVIRONMENT
CEE 1996 - SPECIAL PROJECTS

Application:

It is strongly suggested that interested undergraduates contact an environmental engineering faculty member for guidance once they decide they may be interested in the environmental minor. All students should obtain and submit a completed, formal application form with a copy of their academic record to: ceeunder@pitt.edu; Telephone: 412-624-9870; 742 Benedum Hall.

Department of Electrical and Computer Engineering

Computer Engineering

Computer engineers are active in and in demand for all phases of technology research, design and development, testing, manufacturing, sales, and management of computer technologies. In addition, many successful leaders in other professions, such as law, medicine, and business, pursue an undergraduate education in computer engineering as preparation for later professional study. Thus the undergraduate curriculum provides preparation in both mathematics and physical sciences, coupled with coverage of all aspects of computing, software, hardware, design, and application. The program's flexible elective structure offers the student considerable opportunity for professional specialization, area specialization within the computing discipline, or interdisciplinary broadening. The computer engineering program is accredited by the Engineering Accreditation Commission of ABET: <http://www.abet.org>. For more information about the program, contact coeundergrad@pitt.edu or see <https://www.engineering.pitt.edu/coeundergraduate>.

Electrical Engineering

The electrical engineering program equips its graduates with solid theoretical and practical foundations in power systems, electromagnetics, semiconductor devices, electronic circuit design, signal processing, and control theory. Students build on these foundations through specialization in advanced and contemporary electrical engineering topics and opportunities to apply and expand their skill set through design projects, research, and

cooperative education. The electrical engineering program is accredited by the Engineering Accreditation Commission of ABET: <http://www.abet.org>. For more information about the program, contact eeundergrad@pitt.edu or see <https://www.engineering.pitt.edu/eeundergraduate>.

Major

Computer Engineering

For students who enrolled prior to Fall 2019, please refer to the Archived Catalogs, and select the academic year in which you began to view your program requirements.

The following areas of concentration are available for Computer Engineering students:

Autonomous Systems

Communications Engineering

Electric Power

Integrated Circuits

Nanotechnology

Computer Engineering Undergraduate Curriculum

The overall objective of the computer engineering (CoE) program is to prepare individuals to be successful and lead lives of impact in whatever path they choose to pursue in the 21st century global economy. This includes those who move into practice within the computer engineering discipline either through employment in industry or government, entrepreneurship, those who move on to advanced computer study and research in graduate school, or those that move into other professions such as law, business, or management.

Building upon the Swanson School of Engineering freshmen program, a common and comprehensive year of study is delivered to sophomore computer engineering (CoE) and electrical engineering (EE) students. The sophomore year features four tracks, including two-course sequences in analog hardware, digital hardware, software, and applied math. These eight courses prepare students to continue as juniors in their specific program (CoE or EE) with foundational strength.

During the CoE junior year, students complete six core courses unique to CoE (computer architecture, advanced digital design, embedded systems, computer networks, information security, systems and project engineering) and a core course common to both programs (junior design fundamentals). Broad flexibility is provided in the senior year, including four ECE electives, three technical electives, and one general elective, providing many dozens of options.

The CoE program is designed to build on foundational engineering strength developed during the freshman year, extend with broad ECE fundamentals in the sophomore year, further extend and deepen with CoE fundamentals in the junior year, and then diversify for career exploration and specialization in the senior year. Our graduates will be among the best prepared computer engineers in the nation for impactful careers and post-graduate studies in one of the most exciting and thriving professions of STEM.

The Computer Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs Program Criteria.

Third Term

ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
ECE 0301 - ECE PROBLEM SOLVING WITH C++
ECE 0401 - ECE ANALYTICAL METHODS
Professional Skills Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fourth Term

ECE 0102 - MICROELECTRONIC CIRCUITS
ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
ECE 0302 - DATA STRUCTURES AND ALGORITHMS
ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fifth Term

MATH 0480 - APPLIED DISCRETE MATHEMATICS
COE CORE Course
COE CORE Course
COE CORE Course
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

COE CORE Course
COE CORE Course
COE CORE Course
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR
ECE 1895 - JUNIOR DESIGN FUNDAMENTALS

Credits: 16

Seventh Term

ECE Elective - 3 credits
ECE Elective - 3 credits
ECE Elective - 3 credits
Technical Elective - 3 credits
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

ECE Elective - 3 credits
Technical Elective - 3 credits
Technical Elective - 3 credits
Open Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR
ECE 1896 - SENIOR DESIGN PROJECT *

Credits: 15

Note:

*Students may take ENGR 1050 - PRODUCT REALIZATION to fulfill the Senior Design Project requirement with approval from the Undergraduate Coordinator.

COE CORE Courses

ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE (Fall/Spring)
ECE 1140 - SYSTEMS AND PROJECT ENGINEERING (Fall/Spring/Summer)
ECE 1150 - COMPUTER NETWORKS (Fall/Spring)
ECE 1155 - INFORMATION SECURITY (Spring/Summer)
ECE 1175 - EMBEDDED SYSTEMS DESIGN (Fall/Spring)
ECE 1195 - ADVANCED DIGITAL DESIGN (Fall/Spring)

Electives

ECE Electives

Students must complete at least four ECE Elective courses from the following list:

ECE 1115 - HIGH PERFORMANCE COMPUTING
ECE 1120 - HARDWARE DESIGN METHODOLOGIES 1
ECE 1145 - SOFTWARE CONSTRUCTION AND EVOLUTION
ECE 1147 - ALGORITHMS FOR BIG DATA
ECE 1148 - ALGORITHMIC THINKING
ECE 1165 - DEPENDABLE COMPUTER ARCHITURE
ECE 1166 - PARALLEL COMPUTER ARCHITECTURE
ECE 1170 - SPECIAL TOPICS: ADVANCED APPLICATIONS IN ECE 1
ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS
ECE 1188 - CYBER-PHYSICAL SYSTEMS
ECE 1192 - INTRODUCTION TO VLSI DESIGN
ECE 1193 - ADVANCED VLSI DESIGN
ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB
ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS
ECE 1232 - INTRO LASERS & OPTCL ELECTNC
ECE 1238 - DIGITAL ELECTRONICS
ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY
ECE 1259 - ELECTROMAGNETICS
ECE 1266 - APPLICATIONS OF FIELDS AND WAVES

ECE 1270 - SPECIAL TOPICS ADVANCED APPLICATIONS IN ECE 2
 ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT
 ECE 1390 - INTRO TO IMAGE PROCESSING
 ECE 1395 - INTRODUCTION TO MACHINE LEARNING
 ECE 1472 - ANALOG COMMUNICATION SYSTEMS
 ECE 1473 - DIGITAL COMMUNICATION SYSTEMS
 ECE 1560 - DIGITAL SIGNAL PROCESSING
 ECE 1562 - DIGITAL AND ANALOG FILTERS
 ECE 1570 - SPECIAL TOPICS: ADVANCED APPLICATIONS IN ECE 3
 ECE 1673 - LINEAR CONTROL SYSTEMS
 ECE 1674 - MECHATRONIC SYSTEMS
 ECE 1675 - ROBOTIC CONTROL
 ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING
 ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS
 ECE 1750 - POWER ELECTRONICS CONVERSION THEORY
 ECE 1770 - SPECIAL TOPICS:ADVANCED APPLICATIONS IN ECE 4
 ECE 1771 - ELECTRIC MACHINERY
 ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL
 ECE 1774 - ADVANCED POWER SYSTEMS ANALYSIS
 ECE 1775 - POWER QUALITY
 ECE 1776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES
 ECE 1890 - ECE PROTOTYPING FUNDAMENTALS
 ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT
 ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT
 ECE 1898 - ENGINEERING PROJECT
 all 2000/3000 level ECE graduate courses

Humanities/Social Science Electives

Students must complete at least four Humanities/Social Science Elective courses from a list of Approved Electives as part of the Computer Engineering curriculum. (Note: students will complete a total of six Humanities/Social Science Elective courses, but two are completed as part of the First-Year Program curriculum, and four are completed as part of the Computer Engineering curriculum.)

Open Electives

Students must complete at least one Open Elective course. Any course that is not of a similar nature to, or lower level than, a required or previously taken course can be used to fulfill this requirement. Three credits of Physical Education, or three credits of Band, ROTC, or Chorus may also be used as an Open Elective. Three credits of Co-op may also be used to fulfill the Open Elective.

Professional Skills Electives

Students must complete at least one Professional Skills Elective course from the following list:

BUS 0600 - CONSULTING FIELD PROJECT
 BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
 BUSENV 1706 - MARKET MANIPULATIONS: CRISES, BUBBLES, ROBBER BARONS AND CORPORATE SAINTS
 BUSENV 1755 - SERVICE LEARNING IN ORGANIZATIONS
 BUSENV 1757 - RACE AND BUSINESS ETHICS
 BUSENV 1760 - BUSINESS LAW
 BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT
 BUSENV 1780 - CORPORATE GOVERNANCE
 BUSENV 1785 - SOCIAL ENTREPRENEURSHIP
 BUSENV 1795 - BUSINESS AND POLITICS
 BUSBIS 1625 - ELECTRONIC COMMERCE
 BUSBIS 1630 - PROJECT MANAGEMENT
 BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
 BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
 BUSBIS 1655 - DESIGN THINKING
 BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
 BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
 BUSBIS 1670 - DATA WAREHOUSING
 BUSECN 1010 - MANAGERIAL ECONOMICS
 BUSECN 1508 - INTERNATIONAL ECONOMICS FOR MANAGERS
 BUSMKT 1040 - INTRODUCTION TO MARKETING
 BUSMKT 1411 - MARKETING RESEARCH
 BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
 BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
 BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
 BUSMKT 1435 - SERVICES MARKETING
 BUSMKT 1441 - CONSUMER BEHAVIOR
 BUSMKT 1451 - RETAIL MANAGEMENT
 BUSMKT 1481 - BRAND MANAGEMENT
 BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
 BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT
 BUSSCM 1750 - REVENUE MANAGEMENT
 BUSSCM 1766 - PROJECTS IN SUPPLY CHAIN MANAGEMENT
 BUSSCM 1780 - SIX SIGMA
 BUSSCM 1825 - MARITIME SUPPLY CHAIN
 BUSSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
 BUSSPP 1080 - STRATEGIC MANAGEMENT
 BUSSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE

 ENGCM 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
 ENGCM 1400 - GRANT WRITING FOR NONPROFITS
 ENGCM 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
 ENGCM 1420 - WRITING PROPOSALS FOR BUSINESS
 ENGCM 1510 - WRITING WITH STYLE
 ENGR 1097 - INTERNATIONAL SPECIAL PROJECT

Note:

In addition to the list above, there are other options that can count toward a professional skills elective slot, including:

Cooperative Education (Co-op) opportunities

ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT and ECE 1898 - ENGINEERING PROJECT - Directed research advised by faculty can be counted if there is a requirement of writing a paper (or a paper-like report) and presenting the work done to a research group or in a poster session or conference.

ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT

Engineering (ENGR) Study Abroad courses

Technical Electives

Students must complete at least three Technical Elective courses from the ECE Department's list of approved Technical Electives. Technical Electives can be any ECE elective or any other School of Engineering course, which has not been used to fulfill another requirement or does not substantially duplicate other required course material. Most science and math courses that can be taken by students majoring in those departments can be used as Technical Electives.

Electrical Engineering

For students who enrolled prior to Fall 2019, please refer to the Archived Catalogs, and select the academic year in which you began to view your program requirements.

The following areas of concentration are available for Electrical Engineering students:

Electronics (Circuits and Devices)

Autonomous Systems

Communications Engineering

Communications and Signal Processing

Digital Systems

Electric Power

Integrated Circuits

Nanotechnology

Electrical Engineering Undergraduate Curriculum

The overall objective of the electrical engineering (EE) program is to prepare individuals to be successful and lead lives of impact in whatever path they choose to pursue in the 21st century global economy. This includes those who move into practice within the electrical engineering discipline either through employment in industry or government, entrepreneurship, those who move on to advanced computer study and research in graduate school, or those that move into other professions such as law, business, or management.

Building upon the Swanson School of Engineering freshmen program, a common and comprehensive year of study is delivered to sophomore computer engineering (CoE) and electrical engineering (EE) students. The sophomore year features four tracks, including two-course sequences in analog hardware, digital hardware, software, and applied math. These eight courses prepare students to continue as juniors in their specific program (CoE or EE) with foundational strength.

During the EE junior year, students complete six core courses unique to EE (electric power, electromagnetics, linear control systems, digital signal processing, semiconductor devices and advanced analog design) and a core course common to both programs (junior design fundamentals). Broad flexibility is provided in the senior year, including four ECE electives, three technical electives, and one general elective, providing many dozens of options.

The EE program is designed to build on foundational engineering strength developed during the freshman year, extend with broad ECE fundamentals in the sophomore year, further extend and deepen with EE fundamentals in the junior year, and then diversify for career exploration and specialization in the senior year. Our graduates will be among the best prepared electrical engineers in the nation for impactful careers and post-graduate studies in one of the most exciting and thriving professions of STEM.

The Electrical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs Program Criteria.

Third Term

ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
ECE 0301 - ECE PROBLEM SOLVING WITH C++
ECE 0401 - ECE ANALYTICAL METHODS
Professional Skills Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fourth Term

ECE 0102 - MICROELECTRONIC CIRCUITS
ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
ECE 0302 - DATA STRUCTURES AND ALGORITHMS
ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 17

Fifth Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
EE CORE Course
EE CORE Course
EE CORE Course
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 16

Sixth Term

EE CORE Course
EE CORE Course
EE CORE Course
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR
ECE 1895 - JUNIOR DESIGN FUNDAMENTALS

Credits: 16

Seventh Term

ECE Elective - 3 credits
ECE Elective - 3 credits
ECE Elective - 3 credits

Technical Elective - 3 credits
Humanities/Social Science Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

ECE Elective - 3 credits
Technical Elective - 3 credits
Technical Elective - 3 credits
Open Elective - 3 credits
ECE 1885 - DEPARTMENTAL SEMINAR
ECE 1896 - SENIOR DESIGN PROJECT *

Credits: 15

Note:

*Students may take ENGR 1050 - PRODUCT REALIZATION to fulfill the Senior Design Project requirement with approval from the Undergraduate Coordinator.

EE CORE Courses

ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB (Fall/Spring)
ECE 1247 - SEMICONDUCTOR DEVICE THEORY (Fall/Spring)
ECE 1259 - ELECTROMAGNETICS (Spring/Summer)
ECE 1560 - DIGITAL SIGNAL PROCESSING (Fall/Spring)
ECE 1673 - LINEAR CONTROL SYSTEMS (Spring/Summer)
ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING (Fall/Spring)

Electives

ECE Electives

Students must complete at least four ECE Elective courses from the following list:

ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE
ECE 1115 - HIGH PERFORMANCE COMPUTING
ECE 1120 - HARDWARE DESIGN METHODOLOGIES 1
ECE 1140 - SYSTEMS AND PROJECT ENGINEERING
ECE 1145 - SOFTWARE CONSTRUCTION AND EVOLUTION
ECE 1147 - ALGORITHMS FOR BIG DATA
ECE 1148 - ALGORITHMIC THINKING
ECE 1150 - COMPUTER NETWORKS
ECE 1155 - INFORMATION SECURITY
ECE 1165 - DEPENDABLE COMPUTER ARCHITECTURE
ECE 1166 - PARALLEL COMPUTER ARCHITECTURE
ECE 1170 - SPECIAL TOPICS: ADVANCED APPLICATIONS IN ECE 1
ECE 1175 - EMBEDDED SYSTEMS DESIGN
ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS
ECE 1188 - CYBER-PHYSICAL SYSTEMS
ECE 1192 - INTRODUCTION TO VLSI DESIGN
ECE 1193 - ADVANCED VLSI DESIGN

ECE 1195 - ADVANCED DIGITAL DESIGN
 ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS
 ECE 1232 - INTRO LASERS & OPTCL ELECTNC
 ECE 1238 - DIGITAL ELECTRONICS
 ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING
 ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY
 ECE 1266 - APPLICATIONS OF FIELDS AND WAVES
 ECE 1270 - SPECIAL TOPICS ADVANCED APPLICATIONS IN ECE 2
 ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT
 ECE 1390 - INTRO TO IMAGE PROCESSING
 ECE 1395 - INTRODUCTION TO MACHINE LEARNING
 ECE 1472 - ANALOG COMMUNICATION SYSTEMS
 ECE 1473 - DIGITAL COMMUNICATION SYSTEMS
 ECE 1562 - DIGITAL AND ANALOG FILTERS
 ECE 1570 - SPECIAL TOPICS: ADVANCED APPLICATIONS IN ECE 3
 ECE 1674 - MECHATRONIC SYSTEMS
 ECE 1675 - ROBOTIC CONTROL
 ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS
 ECE 1750 - POWER ELECTRONICS CONVERSION THEORY
 ECE 1770 - SPECIAL TOPICS:ADVANCED APPLICATIONS IN ECE 4
 ECE 1771 - ELECTRIC MACHINERY
 ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL
 ECE 1774 - ADVANCED POWER SYSTEMS ANALYSIS
 ECE 1775 - POWER QUALITY
 ECE 1776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES
 ECE 1890 - ECE PROTOTYPING FUNDAMENTALS
 ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT
 ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT
 ECE 1898 - ENGINEERING PROJECT
 all 2000/3000 level ECE graduate courses

Humanities/Social Science Electives

Students must complete at least four Humanities/Social Science Elective courses from a list of Approved Electives as part of the Computer Engineering curriculum. (Note: students will complete a total of six Humanities/Social Science Elective courses, but two are completed as part of the First-Year Program curriculum, and four are completed as part of the Computer Engineering curriculum.)

Open Electives

Students must complete at least one Open Elective course. Any course that is not of a similar nature to, or lower level than, a required or previously taken course can be used to fulfill this requirement. Three credits of Physical Education, or three credits of Band, ROTC, or Chorus may also be used as an Open Elective. Three credits of Co-op may also be used to fulfill the Open Elective.

Professional Skills Electives

Students must complete at least one Professional Skills Elective course from the following list:

BUS 0600 - CONSULTING FIELD PROJECT
 BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT
 BUSENV 1706 - MARKET MANIPULATIONS: CRISES, BUBBLES, ROBBER BARONS AND CORPORATE SAINTS
 BUSENV 1755 - SERVICE LEARNING IN ORGANIZATIONS
 BUSENV 1757 - RACE AND BUSINESS ETHICS
 BUSENV 1760 - BUSINESS LAW
 BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT
 BUSENV 1780 - CORPORATE GOVERNANCE
 BUSENV 1785 - SOCIAL ENTREPRENEURSHIP

BUSENV 1795 - BUSINESS AND POLITICS
BUSBIS 1625 - ELECTRONIC COMMERCE
BUSBIS 1630 - PROJECT MANAGEMENT
BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS
BUSBIS 1645 - INFORMATION SYSTEMS ETHICS
BUSBIS 1650 - IS CONSULTANCY PRACTICES SOLUTION DEVELOPMENT
BUSBIS 1655 - DESIGN THINKING
BUSBIS 1660 - DISRUPTIVE TECHNOLOGIES
BUSBIS 1665 - IMPROVING THE USER EXPERIENCE
BUSBIS 1670 - DATA WAREHOUSING
BUSECN 1010 - MANAGERIAL ECONOMICS
BUSECN 1508 - INTERNATIONAL ECONOMICS FOR MANAGERS
BUSMKT 1040 - INTRODUCTION TO MARKETING
BUSMKT 1411 - MARKETING RESEARCH
BUSMKT 1427 - PUBLIC RELATIONS MANAGEMENT
BUSMKT 1428 - DIGITAL AND SOCIAL MEDIA MARKETING
BUSMKT 1431 - PRODUCT DEVELOPMENT AND MANAGEMENT
BUSMKT 1435 - SERVICES MARKETING
BUSMKT 1441 - CONSUMER BEHAVIOR
BUSMKT 1451 - RETAIL MANAGEMENT
BUSMKT 1481 - BRAND MANAGEMENT
BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS
BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT
BUSSCM 1750 - REVENUE MANAGEMENT
BUSSCM 1766 - PROJECTS IN SUPPLY CHAIN MANAGEMENT
BUSSCM 1780 - SIX SIGMA
BUSSCM 1825 - MARITIME SUPPLY CHAIN
BUSPP 0020 - MANAGING COMPLEX ENVIRONMENTS
BUSPP 1080 - STRATEGIC MANAGEMENT
BUSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE
BUSPP 1750 - COMMERCIALIZING NEW TECHNOLOGY
COMMRC 0300 - COMMUNICATION AND SOCIETY
COMMRC 0310 - RHETORIC & SOCIETY
COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
COMMRC 0500 - ARGUMENT
COMMRC 0510 - DEBATE
COMMRC 0520 - PUBLIC SPEAKING
COMMRC 0530 - INTERPERSONAL COMMUNICATION
COMMRC 0540 - DISCUSSION
COMMRC 0550 - SPEECH COMPOSITION
COMMRC 1102 - ORGANIZATIONAL COMMUNICATION
COMMRC 1103 - RHETORIC AND CULTURE
COMMRC 1104 - POLITICAL COMMUNICATION
COMMRC 1106 - SMALL GROUP COMMUNICATION
COMMRC 1109 - NONVERBAL COMMUNICATION
COMMRC 1111 - THEORIES OF PERSUASION
COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
COMMRC 1161 - COMMUNICATION ETHICS
COMMRC 1170 - CROSS CULTURAL COMMUNICATION
COMMRC 1520 - ADVANCED PUBLIC SPEAKING
ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
ECON 0220 - INTRO TO HEALTH ECONOMICS
ECON 0230 - INTRODUCTION TO PUBLIC ECONOMICS
ECON 0280 - MONEY AND BANKING
ECON 0410 - ECONOMICS OF DIVERSITY
ECON 0430 - WOMEN IN THE LABOR MARKET
ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS

ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
 ECON 0630 - EAST ASIA'S DYNAMIC ECONOMIES
 ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
 ECON 0800 - INTRODUCTION TO ECONOMICS
 ECON 1110 - INTERMEDIATE MACROECONOMICS
 ECON 1230 - PUBLIC ECONOMICS
 ECON 1260 - EXPERIMENTAL ECONOMICS
 ECON 1280 - MONETARY THEORY AND POLICY
 ECON 1290 - MONETARY POLICIES AND FINANCIAL MARKETS
 ECON 1360 - ENVIRONMENTAL ECONOMICS
 ECON 1420 - LABOR ECONOMICS
 ECON 1440 - ECONOMICS OF CORPORATION FINANCE
 ECON 1470 - MARKET STRUCTURE AND COMPETITION

 ECON 1500 - INTERNATIONAL TRADE
 ECON 1510 - INTERNATIONAL FINANCE
 ECON 1540 - ECONOMIC GROWTH: INNOVATION & POLICY
 ECON 1580 - ECON GROWTH PBLC HLTH DEMOGRAPHY
 ECON 1610 - LATIN AMERICA ECON DEVELOPMENT
 ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
 ECON 1680 - ECONOMICS OF THE EUROPEAN UNION
 ECON 1701 - GREEN INFRASTRUCTURE IMPLEMENTATION: A CASE STUDY OF THE PITTSBURGH REGION
 ENGCM 0400 - WRITTEN PROFESSIONAL COMMUNICATION
 ENGCM 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY
 ENGCM 0420 - WRITING FOR THE PUBLIC
 ENGCM 0440 - CRITICAL WRITING
 ENGCM 0450 - RESEARCH WRITING
 ENGCM 0510 - NARRATIVES OF THE WORKPLACE
 ENGCM 0520 - INTEGRATING WRITING AND DESIGN
 ENGCM 0521 - WRITING WITH DATA
 ENGCM 0530 - WRITING FOR THE SCIENCES
 ENGCM 0560 - WRITING ARGUMENTS
 ENGCM 0600 - INTRODUCTION TO TECHNICAL WRITING
 ENGCM 0610 - COMPOSING DIGITAL MEDIA
 ENGCM 0641 - WRITING FOR CHANGE
 ENGCM 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY
 ENGCM 1100 - LANGUAGE OF BUSINESS AND INDUSTRY
 ENGCM 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
 ENGCM 1104 - CORPORATE STORYTELLING
 ENGCM 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS
 ENGCM 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
 ENGCM 1250 - ADVANCED TOPICS PUBLIC/PROFESSIONAL WRITING
 ENGCM 1400 - GRANT WRITING FOR NONPROFITS
 ENGCM 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT
 ENGCM 1420 - WRITING PROPOSALS FOR BUSINESS
 ENGCM 1510 - WRITING WITH STYLE
 ENGR 1097 - INTERNATIONAL SPECIAL PROJECT

Note:

In addition to the list above, there are other options that can count toward a professional skills elective slot, including:

Cooperative Education (Co-op) opportunities

ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT and ECE 1898 - ENGINEERING PROJECT - Directed research advised by faculty can be counted if there is a requirement of writing a paper (or paper-like report) and presenting the work done to a research group or in a poster session or conference.

ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT

Engineering (ENGR) Study Abroad courses

Technical Electives

Students must complete at least three Technical Elective courses from the ECE Department's list of approved Technical Electives. Technical Electives can be any ECE elective or any other School of Engineering course, which has not been used to fulfill another requirement or does not substantially duplicate other required course material. Most science and math courses that can be taken by students majoring in those departments can be used as Technical Electives.

Minor

Computer Engineering Minor

The Computer Engineering (CoE) minor provides students with a strong foundation in the design of computing hardware and software systems. The minor consists of three introductory courses and two advanced courses offered by the Department of Electrical and Computer Engineering. The minor program's required core includes foundational courses on digital electronics, embedded processors, computer programming, data structures and algorithms, and accompanying laboratory experiences. After completing the required core, students can satisfy the remaining CoE minor requirements by choosing two advanced Computer Engineering curriculum courses. Students who complete the CoE minor will be prepared to create exciting new technologies requiring fundamental computer hardware and software knowledge.

All students interested in declaring a minor in computer engineering should do so on their application for graduation. Students who wish to pursue a minor in computer engineering should contact the Program Coordinator for additional information.

Computer Engineering Fundamentals

Completing three, sophomore-level courses is required of all CoE minors (ECE 0201, ECE 0202, and ECE 0301). After completing these courses, students will have a solid foundation in computer hardware design and the development of software applications.

ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS
ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING
ECE 0301 - ECE PROBLEM SOLVING WITH C++
Elective
Elective

Advanced Computer Engineering Topics

Students must complete their choice of two, advanced ECE courses from the Computer Engineering curriculum. After completing these courses, students will have a depth of knowledge in one or more areas in Computer Engineering.

ECE 0302 - DATA STRUCTURES AND ALGORITHMS
ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE
ECE 1140 - SYSTEMS AND PROJECT ENGINEERING
ECE 1150 - COMPUTER NETWORKS
ECE 1155 - INFORMATION SECURITY
ECE 1175 - EMBEDDED SYSTEMS DESIGN
ECE 1195 - ADVANCED DIGITAL DESIGN

Note:

Students cannot apply more than one course from their major toward a CoE minor.

Electrical Engineering Minor

The Department of Electrical and Computer Engineering offers an electrical engineering (EE) minor for engineering students who are not majoring in electrical or computer engineering. The minor will be of interest to undergraduate engineering students who wish to develop expertise in areas such

as electronics, instrumentation, control, signal processing, or digital devices. Requirements for engineering physics are slightly different than those for other students because of the extensive overlap between the two programs.

All students interested in declaring a minor in electrical engineering should do so on their application for graduation. Students who wish to pursue a minor in electrical engineering should contact the Program Coordinator for additional information.

Required Courses

Completing three sophomore-level courses is required of all electrical engineering minors.

ECE 0101 - LINEAR CIRCUITS AND SYSTEMS

ECE 0102 - MICROELECTRONIC CIRCUITS

ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY *

Elective

Elective

(*MATH 0280 and MATH 0290 can satisfy the ECE 0401 prerequisite requirement.)

Electives

Students must complete their choice of two, advanced ECE courses from the Electrical Engineering curriculum. After completing these courses, students will have a depth of knowledge in one or more areas in Electrical Engineering.

ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS

ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB

ECE 1247 - SEMICONDUCTOR DEVICE THEORY

ECE 1259 - ELECTROMAGNETICS

ECE 1560 - DIGITAL SIGNAL PROCESSING

ECE 1673 - LINEAR CONTROL SYSTEMS

ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING

Note:

Students cannot apply more than one course from their major toward an electrical engineering minor.

Department of Industrial Engineering

Industrial Engineering (IE) is all about choices. It is the engineering discipline that offers the most wide-ranging array of opportunities in terms of employment, and it is distinguished by its flexibility. While other engineering disciplines tend to apply skills to specific areas, industrial engineers may be found working everywhere from traditional manufacturing companies to airlines, distribution companies to financial institutions, hospitals to consulting companies, high-tech corporations to luxury retailers. Engineers are educated to design and build things, but IEs are educated to design and improve the productivity and quality of integrated systems of people, material, computers, information, equipment, and other resources. IEs draw upon the specialized knowledge and skills in the mathematical, physical and social sciences together with the principles, methods and modeling tools of engineering analysis to make improvements in business processes. In addition to making significant contributions to corporate profitability, they also make the workplace a more productive and streamlined environment. The Department of Industrial Engineering meets the challenge of the growing complexity of modern industry through an intensive educational program that includes a required international component. Building upon a solid foundation in the basic sciences, engineering, and computers, the curriculum provides the student with a capability for systems analysis and design that crosses traditional disciplinary lines and an awareness of and concern for the demands of today's dynamic social systems. The industrial engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Certificate

Engineering Data Analytics Certificate

The Engineering Data Analytics undergraduate certificate that will prepare future Swanson School of Engineering students to take on the challenge of advancing and innovating engineering applications using the systematic acquisition, management, and analysis of data. In recent years, advances in computing, communication, and data have given rise to data analytics and digital transformation. These new fields are transforming manufacturing, communication, monitoring, and the production of new engineering applications in what has been referred to as Industry 4.0. Data analytics and digital transformation are disrupting industrial practices by the ease of acquiring data in a wide range of applications, combined with advances in distributed and high-performance computing. As a result, data analytics has been identified as the next frontier for innovation, competition, and productivity.

This certificate will require the completion of 15 credits distributed in five different domains across three different levels. An explanation of the levels and domains is provided.

1. Foundations. The foundation courses provide students with programming capabilities and think about data in a statistics framework. Programming courses will focus on Python or R. Students complete two courses that cover two separate domains to complete the foundations. The first domain is Data Science Programming, and the second domain is Inferential Statistics.

2. Expertise. Students will develop skills in the description and analysis of data sources of variability and critical relationships, the development of algorithms and data handling skills to extract and interpret information from complex data sets, and the visualization and communication of results. To complete the expertise level, students complete two courses covering two domains. The first domain is Exploratory Data Analysis, and the second domain is Modeling and Prediction.

3. Specialization. Students will work on a real-world problem with the complications of messy data, ambiguity, and lack of clear structure. This experience should include working with others with diverse skill sets and communicating with non-specialists. This requirement may be satisfied with a capstone project or a faculty-guided research project. Before taking the capstone or research course, students will meet with their respective undergraduate program director and certificate director (housed in Industrial Engineering) to verify the nature of the project can serve as the specialization course for the certificate. Students can work with instructors to tailor their discipline-specific capstone project to include a significant data analytics component (programming in R or python and some data analysis) to satisfy this requirement. Further, if the project is a capstone, the student will confirm with their program coordinator that the capstone may double for both the certificate and their senior capstone.

From these three levels, students will:

- Gain an understanding and ability to apply engineering data analytics across these three levels,
- Obtain practical, real-world experience from the specialization level, and
- Upon graduation, gain employment or pursue a graduate degree in data analytics.

We anticipate new and applicable courses may be added and approved in the future. Further, as approved by the certificate director, students may take certain Carnegie Mellon University classes through cross-registration to satisfy the certificate requirements. Lastly, students are required to take at least nine credits beyond the courses required for their major.

Foundations - Data Science Programming (Select 1)

The foundation courses provide students with programming capabilities and think about data in a statistics framework. Programming courses will focus on Python or R. Students complete two courses that cover two separate domains to complete the foundations. This set of classes covers Data Science Programming.

- CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1
- CS 1501 - ALGORITHMS AND DATA STRUCTURES 2
- ECE 1148 - ALGORITHMIC THINKING
- IE 0015 - INTRODUCTION TO DATA ANALYTICS
- STAT 1060 - DATA SCIENCE FOUNDATIONS (course number changed from STAT 1061 to 1060 in May 2023)

Foundations - Inferential Statistics (Select 1)

The foundation courses provide students with programming capabilities and think about data in a statistics framework. Programming courses will focus on Python or R. Students complete two courses that cover two separate domains to complete the foundations. This is the second domain, Inferential Statistics.

- BIOENG 1000 - STATISTICS FOR BIOENGINEERING
- ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
- ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS

IE 1071 - STATISTICAL TESTING AND REGRESSION
STAT 1000 - APPLIED STATISTICAL METHODS
STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS
STAT 1361 - STATISTICAL LEARNING AND DATA SCIENCE

Expertise - Exploratory Applied Data Science (Select 1)

Students will develop skills in the description and analysis of data sources of variability and critical relationships, the development of algorithms and data handling skills to extract and interpret information from complex data sets, and the visualization and communication of results. These courses cover the area of Exploratory Applied Data Science.

CEE 1323 - PRACTICAL DATA SCIENCE AND MACHINE LEARNING
CS 1675 - INTRODUCTION TO MACHINE LEARNING
ECE 1147 - ALGORITHMS FOR BIG DATA
ECE 1395 - INTRODUCTION TO MACHINE LEARNING
ENGR 1451 - EXPLORATORY DATA SCIENCE
INFSCI 0510 - DATA ANALYSIS
MEMS 1300 - LINEAR ALGEBRA FOR MACHINE LEARNING

Expertise - Modeling and Prediction (Select 1)

Students will develop skills in the description and analysis of data sources of variability and critical relationships, the development of algorithms and data handling skills to extract and interpret information from complex data sets, and the visualization and communication of results. To complete the expertise level, students complete two courses covering two domains. The courses listed below encompass the domain of Modeling and Prediction.

CEE 1370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING
ENGR 1453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION
IE 1062 - DATA ANALYTICS FUNDAMENTALS
IE 1072 - DESIGN OF EXPERIMENTS & QUALITY ASSURANCE
IE 1171 - DATA FOR SOCIAL GOOD
IE 1187 - OPTIMIZATION FOR MACHINE LEARNING
INFSCI 1530 - DATA MINING
MEMS 1069 - DATA-DRIVEN MODELING FOR ENGINEERS
MEMS 1120 - APPLIED ENGINEERING SIMULATION IN DESIGN

Specialization - Engineering Data Analytics Project

Students work on a real-world problem with the complications of messy data, ambiguity, and lack of clear structure. This experience includes (where possible) working with others with diverse skill sets and communicating with non-specialists. This requirement may be satisfied with a capstone project, semester-long project, or a faculty-guided research project.

Before taking the capstone or research course, students will meet with their respective undergraduate program director and certificate director (housed in Industrial Engineering) to verify the nature of the project can serve as the specialization course for the certificate. Further, if the project is a capstone, the student will confirm with their program coordinator that the capstone may double for both the certificate and their senior capstone.

A student may take ENGR 2451 or ENGR 2453 as the Engineering Data Analytics Project Specialization if they have not taken ENGR 1451 or ENGR 1453.

If a student chooses to complete their Specialization project via a Semester-Long Project-Based Class, it must be approved by the certificate director.

ENGR 1099 - SPECIAL PROJECT
ENGR 2451 - EXPLORATORY DATA SCIENCE
ENGR 2453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION
IE 2064 - DATA SCIENCE

Total Credits: 15

Health Systems Engineering Certificate

The Health Systems Engineering (HSE) certificate provides engineering students with the opportunity to apply industrial engineering principles and tools to improve healthcare systems. The HSE program has been designed to let students better understand the dynamics, structure and functions of healthcare organizations.

To complete the certificate, students must satisfy the following requirements:

Complete six (6) credits of the required HSE courses - listed below as IE 1106 and IE 1108.

Complete nine (9) additional approved credits from electives in the healthcare field. These can be from Industrial Engineering, the College of Business Administration, or the health-related professions. Approved courses are listed below. With approval of the undergraduate coordinator, other elective courses can be chosen from areas relevant to the student's objectives such as health-related professions or information sciences.

Complete their Senior Design Project course in a healthcare-related organization.

Acquire approved work experience with a healthcare organization through internships or the Cooperative Education (Co-op) program. Three of the nine (9) elective credits can be earned by completing the Co-op program within a healthcare organization.

HSE Required Courses

IE 1106 - OPERATIONS IMPROVEMENT IN HEALTHCARE

IE 1108 - HEALTH SYSTEMS ENGINEERING: QUANTITATIVE ANALYTICS

Senior Design Project (focused on healthcare)

Approved Elective Courses for HSE

IE 1014 - DATA BASE DESIGN

IE 1102 - LEAN SIX SIGMA I (GREEN BELT)

IE 1103 - LEAN SIX SIGMA II (BLACK BELT)

IE 1122 - FUNDAMENTALS OF SYSTEMS ENGINEERING

IE 1123 - PROJECT MANAGEMENT FOR ENGINEERS

IE 1185 - STOCHASTIC MODELING AND DATA ANALYTICS IN HEALTHCARE OPERATIONS MANAGEMENT

IE 1202 - INTRODUCTION TO MEDICAL PRODUCT DEVELOPMENT

Supply Chain Management Certificate

The Certificate in Supply Chain Management (CSCM) provides undergraduate engineering students with the opportunity to understand important concepts in supply chain management and develop technical and managerial skills which are highly valued in today's corporate environment. The program also offers an international travel experience for students to gain hands-on exposure to global supply chain organizations.

Supply chain management encompasses not only the design and planning of supply chain activities, but also the execution, control and monitoring that help companies build a competitive infrastructure and create net value. The supply chain covers all areas, not just manufacturing and services, but also includes suppliers, retailers, warehouses, logistics and customer service; all functional areas involved in receiving and filling a customer's order with a repeatable and satisfying experience. This certificate requires 15 credits to complete.

For engineering students (business students should see the requirements listed on the CBA website), the Certificate in Supply Chain Management requires students to take the following five courses:

Program Requirements

IE 1080 - SUPPLY CHAIN ANALYSIS - 3 Credits (BUSQOM 1070 is for business students only)

BUSSCM 1730 - MANAGING GLOBAL SUPPLY CHAINS - 3 Credits

CBA Supply Chain Elective Course - 3 Credits - Choose one of the following:

BUSSCM 1740 - PURCHASING & SUPPLY MANAGEMENT

BUSSCM 1750 - REVENUE MANAGEMENT

Industrial Engineering Elective Course - 3 Credits - Choose one of the following:

IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING (Note that since Industrial Engineering (IE) students are required to take IE 1055, they must take one of the other courses from this list. Prerequisites can be waived for non-IE engineering students on a case-by-case basis.)

IE 1045 - TRANSPORTATION PLANNING METHOD: OR APPLICATIONS

IE 1102 - LEAN SIX SIGMA I (GREEN BELT)

IE 1203 - WAREHOUSE OPERATIONS

IE 1204 - APPLIED SUPPLY CHAIN ANALYTICS

Global Supply Chain Project Elective Course - 3 Credits - Choose one of the following:

BUSPP 1740 - GLOBAL STRATEGY AND COMPETITIVE ADVANTAGE (does not require travel)

ENGR 1228 - EXCHANGE URUGUAY-UNIVERSITY OF MONTEVIDEO

ENGR 1450 - ENGINEERING- THE GERMAN WAY

ENGR 1600 - INTERNATIONAL TECHNOLOGY: INNOVATION AND LEADERSHIP

ENGR 1625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA

Other international project courses may also be considered

In addition, the student must obtain a grade of C or better in each course counted toward the Certificate and a minimum QPA of 2.25 (C+ average) across all courses in the Certificate.

Major

Industrial Engineering

The areas of concentration available for Industrial Engineering students are as follows:

Customized Research

Data Analytics

Engineering Management

Health Systems Engineering

Operations Research & Computer Modeling

Product Development & Manufacturing Systems

Information on all areas of concentration can be found [here](#).

Undergraduate Curriculum

The objectives of our undergraduate program are for our graduates to be:

Successful, ethical professionals, who adapt to and drive innovations in technology and our global society in their desired career path;

Lifelong learners and pursuers of advanced knowledge;

Inclusive leaders who create value for their profession and/or community by utilizing their industrial engineering skills.

The IE faculty has committed itself to the broad, multidisciplinary approach needed to solve problems in today's organizations. In addition to core courses in industrial engineering, you will be exposed to the humanities and social sciences with a global focus and have the opportunity to select five technical electives. These technical electives may be chosen from specialized and advanced offerings of the industrial engineering department. In consultation with your advisor, these electives may also be selected from other programs in the University such as other engineering departments, the sciences, mathematics, economics, business, computer science, or information science.

Recognizing that engineering is an increasingly global profession, the undergraduate program is also committed to providing its graduates with the skills they need to compete on an international basis. Such skills will enable Pitt IE graduates to not only have a distinct employment advantage, but will also provide them with a cross-cultural awareness that will enhance their leadership abilities. This commitment is emphasized through an international requirement for all of our undergraduates for which students are expected to complete an international experience, or, in some cases select an integrated set of humanities and social sciences courses with a global focus. The final term of our undergraduate program includes a capstone senior design course in which you, working in small teams with other students, will complete a semester long project in a corporate setting. These projects are sponsored by local industry through our Sponsor An Industrial Engineering Team (SAINT) program, jointly supervised by an individual from the company and an IE faculty member.

The Industrial Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Industrial Engineering and Similarly Named Engineering Programs Program Criteria.

For more information on the industrial engineering program, contact ugradie@pitt.edu or www.engineering.pitt.edu/industrial.

Third Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
IE 1054 - PRODUCTIVITY ANALYSIS
IE 1070 - PROBABILITY, RANDOM VARIABLES, AND DISTRIBUTIONS
ENGR Elective
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

MATH 0280 - INTRO TO MATRICES & LINEAR ALG
IE 0015 - INTRODUCTION TO DATA ANALYTICS
IE 1052 - MANUFACTURING PROCESSES AND ANALYSIS
IE 1071 - STATISTICAL TESTING AND REGRESSION
Humanities or Social Science Elective 3
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Fifth Term

MATH 0290 - DIFFERENTIAL EQUATIONS or
MATH 0413 - INTRO THEORETICAL MATHEMATICS
IE 1051 - ENGINEERING PRODUCT DESIGN
IE 1061 - HUMAN FACTORS ENGINEERING
IE 1072 - DESIGN OF EXPERIMENTS & QUALITY ASSURANCE
IE 1081 - OPERATIONS RESEARCH
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Sixth Term

IE 1035 - ENGINEERING MANAGEMENT
IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING
IE 1082 - PROBLSTC METH IN OPERATNS RES
IE 1083 - SIMULATION MODELING
ENGR Elective
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Seventh Term

IE 1080 - SUPPLY CHAIN ANALYSIS

Technical Elective 1
Technical Elective 2
Technical Elective 3
Humanities/Social Science Elective 4
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 15

Eighth Term

IE 1090 - SENIOR PROJECTS
Humanities/Social Science Elective 5
Humanities/Social Science Elective 6
Technical Elective 4
Technical Elective 5
IE 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Total Credits: 126

Minor

Industrial Engineering Minor

A minor in Industrial Engineering can be earned by completing three required courses and two elective courses.

Required Courses

IE 1054 - PRODUCTIVITY ANALYSIS
IE 1081 - OPERATIONS RESEARCH
ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1 or ENGR 0021 - PROBABILITY AND STATISTICS FOR ENGINEERS

Elective Courses

Choose any 2 of the following courses:

IE 1035 - ENGINEERING MANAGEMENT
IE 1040 - ENGINEERING ECONOMIC ANALYSIS
IE 1051 - ENGINEERING PRODUCT DESIGN
IE 1052 - MANUFACTURING PROCESSES AND ANALYSIS
IE 1055 - FACILITY LAYOUT AND MATERIAL HANDLING
IE 1061 - HUMAN FACTORS ENGINEERING
IE 1080 - SUPPLY CHAIN ANALYSIS
IE 1082 - PROBLSTC METH IN OPERATNS RES
IE 1083 - SIMULATION MODELING

Additional Information

The student must earn a GPA of at least 2.0 in the five courses used to complete the requirements for the minor.

Department of Mechanical Engineering and Materials Science and Engineering

Materials Science and Engineering

Materials limitations often impede technological and social progress. The materials engineer applies special knowledge of the structure, behavior, and properties of materials to solve these engineering problems. The engineer may be concerned with developing and improving processes for producing metals and alloys or ceramics; developing new alloys or improving existing alloys; and/or achieving better use of alloys and other materials. New materials must be designed for a variety of functions, including structural, aesthetic, electrical, or magnetic and operating environments. Materials may come in forms so minute that the work is done under a microscope or in forms so large that special handling cranes are required.

Research efforts in the department involve work on the development of new high-strength steels, corrosion and oxidation, structural and electronic ceramics, smart materials, high-temperature materials, plastic deformation, phase transformations, and strengthening mechanisms. A number of graduate students are engaged in thesis research on these topics, and undergraduates are encouraged to work on related senior projects. The materials science and engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. For more information on the program, contact undrmems@engr.pitt.edu or see <http://www.engineering.pitt.edu/Departments/MEMS/>.

Mechanical Engineering

Mechanical engineering is concerned with both energy use and the design of machines and systems in such sectors as transportation, manufacturing, materials handling, power generation, and environmental control. Mechanical engineers are involved in design, development, research, management, and related activities in these fields. The breadth and diversity of the profession requires an undergraduate curriculum that provides a sound foundation in the basic sciences, computational skills including use of computers, and the fundamentals of engineering and engineering design. This curriculum provides a base for future professional growth and is also an excellent background for those who wish to pursue careers in other professions including management, law, or medicine. The mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. For more information on the program, contact undrmems@engr.pitt.edu or see <http://www.engineering.pitt.edu/Departments/MEMS/>.

Engineering Science

Engineering Science combines a study of an engineering discipline with the study of a basic science. This provides the educational background for the study of multi-disciplinary problems. Engineering Science is divided into four curricula: Engineering Physics, Nano-Physics/Materials Science, Nano-Chemistry/Bioengineering and Engineering Mechanics. Each curricula track prepares graduates to address complex problems at the intersections between fields. A degree in Engineering Science includes a comprehensive foundation in engineering and design, mathematics, and a fundamental science. In addition, the program has flexibility built in that allows students the agency to determine where they would like to develop the depth required to excel professionally. Engineering Science graduates are involved in design, development, research, and management, and are often leaders in their field. The Engineering Science program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. For more information on the program, contact undrmems@engr.pitt.edu or see <http://www.engineering.pitt.edu/Departments/MEMS/>.

Certificate

Engineering Simulation in Design Certificate

Computational simulation has become an indispensable engineering tool across a broad spectrum of industries and fields of study. Simulation-based approaches provide engineers with the opportunity to extend the boundaries of traditional engineering design processes. However, understanding the role of simulation within the context of an engineering system or process is essential to the successful application of these tools.

The certificate program in Engineering Simulation in Design fosters a simulation-based problem solving approach and encourages students to identify opportunities to enhance engineering analysis and design through simulation. The program adopts a mindset that is a synthesis of computational and traditional approaches. Students will leverage practical simulation skills to explore and study interdisciplinary concepts.

The certificate is designed for undergraduate students and requires 15 credits to complete made up of the following areas:

Core Skills (6 credits)

Students will choose at least two:

MEMS 1028 - MECHANICAL DESIGN I
MEMS 1052 - HEAT AND MASS TRANSFER
MEMS 1047 - FINITE ELEMENT ANALYSIS
MEMS 1071 - APPLIED FLUID MECHANICS
MEMS 1014 - DYNAMIC SYSTEMS

Simulation Skills (3 credits)

Students are required to take:

MEMS 1120 - APPLIED ENGINEERING SIMULATION IN DESIGN

Integrated Skills (3 credits)

Students will choose at least one:

MEMS 1065 - THERMAL SYSTEMS DESIGN
MEMS 1043 - SENIOR DESIGN PROJECT
ENGR 1050 - PRODUCT REALIZATION

Each of the above courses is project based and offers the potential for student exposure to analysis and design of an integrated system. Students enrolled in the Engineering Simulation in Design certificate program must include a simulation component to their adopted project. The program coordinator will evaluate and approve projects.

Practical Skills (3 credit total)

Certificate candidates must enroll in the simulation workshop for three terms. The 1-credit workshop will be offered every term and will meet once per week. The workshop will provide a support forum for students engaged in simulation problems across the certificate program courses.

MEMS 1121 - APPLIED ENGINEERING SIMULATION IN DESIGN (workshop)

Additional Information

For additional information about the certificate, please contact the following:

David Schmidt

412-624-9755

509 Benedum Hall

david.schmidt@pitt.edu

Nuclear Engineering Certificate

The undergraduate certificate in Nuclear Engineering is a five-course sequence, consisting of three nuclear engineering courses and two discipline-specific courses related to nuclear engineering from the various engineering departments. Any undergraduate engineering students in the Swanson School of Engineering can earn the certificate in conjunction with an undergraduate engineering degree. Qualified students in the Dietrich School of Arts and Sciences can pursue the certificate with approval from the Nuclear Engineering program director.

After earning the certificate, students should be able to do the following: apply the concepts of nuclear and reactor physics, reactor kinetics, radiation protection, fuel depletion, and heat transfer to engineering problems; apply engineering skills, knowledge, and expertise to nuclear energy problems; for light water reactors, support engineering projects for the design of the reactor core and the reactor coolant system; assess important social and technical issues related to nuclear science and technology; describe and explain the nuclear fuel cycle from mining to disposal including reprocessing and waste management.

Interested students should visit <http://www.engineering.pitt.edu/nuclear/> or contact either the Director or Associate/Academic Director of the Nuclear Engineering program; currently, these posts are occupied by Dr. Heng Ban (heng.ban@pitt.edu) and Dr. Tom Congedo (tvc9@pitt.edu), respectively.

Requirements

Fifteen (15) credits are required to complete the certificate. A minimum 2.5 GPA is required for students to participate in the certificate. Students must obtain a GPA of at least 2.5 for the courses taken. All undergraduate certificate students are required to complete three (3) courses from the list below as well as two (2) department specific courses:

ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING
ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS
ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

Plus two (2) Degree Specific Courses

Students should select two (2) courses from the list below that are appropriate to their degree of study.

Bioengineering

IE 1061 - HUMAN FACTORS ENGINEERING
BIOENG 1810 - BIOMATERIALS AND BIOCOMPATIBILITY

Chemical Engineering

CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS
CHE 0300 - TRANSPORT PHENOMENA
CHE 0400 - REACTIVE PROCESS ENGINEERING
CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING

Civil Engineering

CEE 1340 - CONCRETE STRUCTURES 1
CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT
CEE 2340 - CONCRETE STRUCTURES 2
CEE 2343 - PRESTRESSED CONCRETE

Electrical and Computer Engineering

ECE 1150 - COMPUTER NETWORKS
ECE 1673 - LINEAR CONTROL SYSTEMS

Engineering Science

MEMS 1047 - FINITE ELEMENT ANALYSIS
MEMS 1052 - HEAT AND MASS TRANSFER
MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
MEMS 1071 - APPLIED FLUID MECHANICS

Industrial Engineering

IE 1122 - FUNDAMENTALS OF SYSTEMS ENGINEERING
IE 1301 - INTRODUCTION TO SAFETY ENGINEERING
IE 1302 - ENGINEERING FOR PROCESS SAFETY

Mechanical Engineering and Materials Science

MEMS 1030 - MATERIAL SELECTION
MEMS 1033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING
MEMS 1045 - AUTOMATIC CONTROLS
MEMS 1047 - FINITE ELEMENT ANALYSIS
MEMS 1052 - HEAT AND MASS TRANSFER
MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
MEMS 1065 - THERMAL SYSTEMS DESIGN
MEMS 1070 - MECHANICAL BEHAVIOR OF MATERIALS
MEMS 1071 - APPLIED FLUID MECHANICS

Non-engineering Math and Science Majors

Non-engineering math and science majors (e.g., Math, Chemistry, Physics) must complete the three (3) core Nuclear Engineering courses, provide the Director of the Nuclear Engineering a proposal for two additional courses in the student's major and obtain the Director's signed approval. The one-page proposal must include the following:

- two (2) courses from the student's major

- the catalog description of the two (2) courses

- a short statement on how these two (2) courses complement the three (3) core nuclear courses and/or apply to nuclear engineering.

This proposal will be signed by the Director or Associate Director of the Nuclear Engineering program and kept on record by the MEMS Department.

Major

Engineering Science

The following areas of concentration are available for Engineering Science students:

The Engineering Science Program is designed for students who have a strong interest in science and mathematics as well as a desire to acquire the skills and perspective of engineering. The Engineering Science Program offers flexible curricula in several interdisciplinary areas of concentration. The program is built on sequences of courses from multiple science and engineering programs. All areas of concentration combine in-depth exposure to both science and engineering and include the opportunity for both a team capstone, as well as an individual project experience. The overall goal of the program is to develop each student's ability to think analytically across disciplines and develop a knowledge base well suited to tackle future technical challenges that will require a thorough understanding of a discipline in the physical sciences and/or mathematics combined with engineering. Interested students are encouraged to pursue the Engineering Science degree jointly with the David C. Frederick Honors College (FHC) by completing the requirements for Engineering Science and satisfying the special degree requirements of the UHC. The academic requirements for the UHC joint degree and distinction pathways are waived for Engineering Science students as the department allows students to cross boundaries and work in an inherently interdisciplinary way, which is directly reflective of the goals of the UHC. The Engineering Science program is ideal

preparation for graduate school in a wide range of disciplines, for rewarding careers in industry, and is an excellent background for those who wish to pursue careers in other professions, such as management, law, education, or medicine.

NOTE: The Engineering Physics curriculum (which had been available as a separate Engineering Physics Program until 2010) is now an area of concentration within Engineering Science.

The program objectives for Engineering Science are to produce engineers who build successful, diverse careers based on:

- an understanding of the physical/life sciences, engineering analysis and design, and interdisciplinary problem solving;
- a commitment to ongoing professional development as exemplified by, for example, graduate study, training, conference participation, and certification;
- advancement and leadership in professional and/or community life.

The Engineering Science Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Engineering, General Engineering, Engineering Physics, Engineering Science, and Similarly Named Engineering Programs Program Criteria.

For more information on the program, contact undrmems@pitt.edu or see

http://www.engineering.pitt.edu/Departments/MEMS/_Content/Undergraduate/Engineering-Science/Engineering-Science-Page-Overview.

Engineering Science Undergraduate Curriculum

The Engineering Science Program currently offers the following areas of concentration:

- Engineering Physics Concentration*
- Nanotechnology Concentration Physics/Materials Emphasis*
- Nanotechnology Concentration Chemistry/Bioengineering Emphasis*
- Engineering Mechanics Concentration*

Materials Science and Engineering

The following areas of concentration are available for Materials Science and Engineering students:

Ferrous Physical Metallurgy Concentration

Materials Science and Engineering Undergraduate Curriculum

The undergraduate program is designed to give the student a basic understanding of the structure and properties of materials, the principles underlying the processing of materials, and the concepts of engineering design and problem solving. Both theory and practice are emphasized. Laboratory experiences are integrated into the curriculum, and a variety of professional and engineering science electives are available. When desirable, specialized programs can be arranged for the students with well-defined interests and goals. Students are prepared to accept positions in production, research, and management, in both the basic materials and advanced or high-tech materials industries. This versatile education is a strong preparation for graduate work in metallurgy and materials and other related fields.

The major objectives of the program are to:

- Demonstrate successful application of materials science and engineering knowledge and skills for societal benefit through industry, public sector, or private practice.
- Pursue life-long learning through advanced professional degrees, graduate studies in mechanical engineering, professional training, or engineering certification.
- Demonstrate continuous professional and intellectual growth as leaders in their engineering profession and/or community.
- Demonstrate the ability to collaborate in an intra-disciplinary and cross-disciplinary manner to identify issues and opportunities, and create solutions likely exceeding individual capabilities alone.

The Materials Science and Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Materials, Metallurgical, Ceramics, and Similarly Named Engineering Programs Program Criteria.

Third Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
MEMS 0023 - INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0145 - STATICS & MECHC OF MATERIALS 2
MEMS 0031 - ELECTRICAL CIRCUITS
MEMS 0040 - MATERIALS AND MANUFACTURING
MEMS 0048 - THERMODYNAMICS OF MATERIALS
Communication Skills Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 18

Fifth Term

MEMS 1010 - EXPERIMENTAL METHODS IN MATERIALS SCIENCE AND ENGINEERING
MEMS 1052 - HEAT AND MASS TRANSFER
MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION
MEMS 1058 - ELECTROMAGNETIC PROPERTIES OF MATERIALS
MEMS 1059 - PHASE EQUILIBRIA IN MULTI-COMPONENT MATERIALS
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 15

Sixth Term

MEMS 1011 - STRUCTURE AND PROPERTIES LAB
MEMS 1028 - MECHANICAL DESIGN I
MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION
MEMS 1070 - MECHANICAL BEHAVIOR OF MATERIALS
MSE Technical Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 15

Seventh Term

MEMS 1030 - MATERIAL SELECTION
MEMS 1079 - SENIOR MATERIALS RESEARCH PROJECT
MSE Technical Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 15

Eighth Term

MEMS 1043 - SENIOR DESIGN PROJECT
MSE Technical Elective - 3 Credits
Engineering Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits
Humanities/Social Science Elective - 3 Credits
MEMS 1085 - DEPARTMENTAL SEMINAR
MEMS 1086 - MSE SEMINAR

Credits: 15

Mechanical Engineering

The following areas of concentration are available for Mechanical Engineering students:

Ferrous Physical Metallurgy Concentration

Mechanical Engineering Undergraduate Curriculum

In the first two years, the mechanical engineering curriculum concentrates on the fundamentals of sciences, mathematics, and engineering. The last two years provide increased depth in the engineering sciences, including fluid mechanics, heat transfer, and systems analysis and also provide exposure to engineering applications, such as mechanical measurements, manufacturing, mechanical design, and thermal systems. Sufficient technical electives are allowed to permit each student to explore areas of special interest.

Course work in the social sciences and humanities is included for the enhancement of the student's awareness of the importance of social, political, and economic problems in the practice of engineering. Where appropriate, the upper-level courses introduce consideration of human values, social benefits, and constraints to prepare future practicing engineers to be responsive to such concerns.

The major objectives of the program are to:

- Demonstrate successful application of materials science and engineering knowledge and skills for societal benefit through industry, public sector, or private practice.
- Pursue life-long learning through advanced professional degrees, graduate studies in mechanical engineering, professional training, or engineering certification.
- Demonstrate continuous professional and intellectual growth as leaders in their engineering profession and/or community.
- Demonstrate the ability to collaborate in an intra-disciplinary and cross-disciplinary manner to identify issues and opportunities, and create solutions likely exceeding individual capabilities alone.

The Mechanical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Mechanical and Similarly Named Engineering Programs Program Criteria.

Third Term

MATH 0240 - ANALYTIC GEOMETRY AND CALCULUS 3
MATH 0280 - INTRO TO MATRICES & LINEAR ALG
ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 16

Fourth Term

MATH 0290 - DIFFERENTIAL EQUATIONS
ENGR 0145 - STATICS & MECHC OF MATERIALS 2
MEMS 0031 - ELECTRICAL CIRCUITS
MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
Humanities/Social Science Elective - 3 Credits
MEMS 1015 - RIGID-BODY DYNAMICS
MEMS 1085 - DEPARTMENTAL SEMINAR

Credits: 18

Fifth Term

Credits: 15

Minor

Engineering Science Minor

The Engineering Science minor provides students in engineering or the sciences to broaden their education in various areas. The four minor options align with the four tracks in the Engineering Science major and allow students to choose topical areas and courses they are most interested in.

Engineering Mechanics includes Mechanical Engineering, Materials Science and Engineering, and Physics courses.

Engineering Physics focuses on higher-level physics courses, Electrical and Computer Engineering, and Materials Science and Engineering.

Nanotechnology Chemistry and Bioengineering features the Nanotechnology courses, biology, bioengineering electives, and upper-level chemistry courses.

Nanotechnology Physics and Materials Science track also includes Nanotechnology courses focusing on upper-level Physics and Materials Science courses.

Each track includes multiple program electives that allow students to customize their degree further and provide a unique experience not found in a traditional engineering minor.

Engineering Mechanics

Minor selection aligned with the engineering mechanics track of the engineering science major.

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
ENGR 0135 - STATICS & MECHC OF MATERIALS 1
MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1015 - RIGID-BODY DYNAMICS
MATH 1550 - VECTOR ANALYSIS AND APPLICATIONS
PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
PHYS 1000+ - UPPER LEVEL PHYSICS ELECTIVE 1
PHYS 1000+ - UPPER LEVEL PHYSICS ELECTIVE 2

Engineering Physics

Minor aligned with the engineering physics track within the engineering science curriculum.

ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY
ECE 1247 - SEMICONDUCTOR DEVICE THEORY
ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION
PHYS 0219 - BASIC LABORATORY PHYSICS SCIENCE AND ENGINEERING
PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
ECE 0101 - LINEAR CIRCUITS AND SYSTEMS

Nanotechnology - Chemistry/Bioengineering Emphasis

Minor aligned with the nanotechnology - chemistry / bioengineering major track.

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1
BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1
BIOENG TBD - CORE BIOENGINEERING ELECTIVE
CHEM 0310 - ORGANIC CHEMISTRY 1
CHEM 1410 - PHYSICAL CHEMISTRY 1
ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING
MEMS 1057 - MICRO/NANO MANUFACTURING
BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1
ECE 0101 - LINEAR CIRCUITS AND SYSTEMS
BIOENG TBD - CORE BIOENGINEERING ELECTIVE #2

Nanotechnology - Physics/Materials Emphasis

Minor aligned with the nanotechnology - physics / materials emphasis major track of the engineering science program.

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES
MEMS 0048 - THERMODYNAMICS OF MATERIALS
MEMS 1057 - MICRO/NANO MANUFACTURING
PHYS 0477 - INTRODUCTION TO THERMAL PHYSICS, RELATIVITY AND QUANTUM MECHANICS
PHYS 0481 - PRINCIPLES OF MODERN PHYSICS 2
PHYS 1375 - FOUNDATIONS OF NANOSCIENCE
ECE 0101 - LINEAR CIRCUITS AND SYSTEMS

Total Credits: 25

Materials Science and Engineering Minor

Requirements

Undergraduate engineering students may earn a Minor in Materials Science Engineering by completing five courses.

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES or MEMS 0023 - INTRODUCTION TO MATERIALS SCIENCE AND ENGINEERING
MEMS 0040 - MATERIALS AND MANUFACTURING
MEMS 1053 - STRUCTURE OF CRYSTALS AND DIFFRACTION
MEMS 1059 - PHASE EQUILIBRIA IN MULTI-COMPONENT MATERIALS
MEMS 1063 - PHASE TRANSFORMATION AND MICROSTRUCTURE EVOLUTION

Mechanical Engineering Minor

Undergraduate engineering students can earn a Minor in Mechanical Engineering by completing two required courses and three elective courses in one of four focused option areas.

Required Courses

MEMS 0024 - INTRODUCTION TO MECHANICAL ENGINEERING DESIGN
MEMS 1028 - MECHANICAL DESIGN I

Focus Options/Elective Courses

Thermal-Fluids Option

MEMS 0051 - INTRODUCTION TO THERMODYNAMICS
MEMS 0071 - INTRODUCTION TO FLUID MECHANICS
and either
MEMS 1051 - APPLIED THERMODYNAMICS or
MEMS 1071 - APPLIED FLUID MECHANICS

Dynamic Systems Option

MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1015 - RIGID-BODY DYNAMICS
MEMS 1045 - AUTOMATIC CONTROLS

Mechanical Design Option

MEMS 1029 - MECHANICAL DESIGN II
MEMS 1033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING
MEMS 1047 - FINITE ELEMENT ANALYSIS

Mechanical Measurements Options

MEMS 1014 - DYNAMIC SYSTEMS
MEMS 1041 - MECHANICAL MEASUREMENTS 1
MEMS 1042 - MECHANICAL MEASUREMENTS 2

Additional Information

Depending upon concentration, Bioengineering students have several different possibilities to earn a Mechanical Engineering minor.

Bioimaging & Signals concentration students : none of the courses in any option can be used as a concentration elective. Two courses can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement. Two, and possibly three, courses are extra and on your own.

Biomechanics concentration students : MEMS 0024 and MEMS 1028 are concentration electives.

Thermal-Fluids Option

BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 1071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Dynamics Systems Option

BIOENG 1255 is a required course for BioE majors. MEMS 1015 is a concentration elective. MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Design Option

BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Measurements Option

BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

CE concentration students : all options can use two of the courses to satisfy the Bioengineering 2- course, 6-credit advanced engineering/science elective requirement. At least one other course is extra and on your own.

MPE concentration students : MEMS 0024 and MEMS 1028 are concentration electives.

Thermal-Fluids Option

BIOENG 1210 is a required course for BioE majors. MEMS 1071 is a concentration elective. MEMS 0071 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science requirement.

Dynamics Systems Option

BIOENG 1255 is a required course for BioE majors. MEMS 1015 and MEMS 1045 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Design Option

BIOENG 1161 is a required course for BioE majors. MEMS 1033 and MEMS 1047 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Mechanical Measurements Option

BIOENG 1255 is a required course for majors. MEMS 1041 and MEMS 1042 can be used to satisfy the Bioengineering 2-course, 6-credit advanced engineering/science elective requirement.

Approved Humanities/Social Science Electives and Requirements

Humanities and Social Science Elective Guidelines and Requirements

Undergraduate Requirements

All Swanson School of Engineering undergraduates must complete at least six humanities and social science elective courses from the School's list of approved courses in order to satisfy Swanson School of Engineering and ABET accreditation requirements for breadth and depth. In order to meet these standards, all Engineering undergraduate students must fulfill the following requirements when choosing their six elective classes:

Depth Requirement

- Students must complete two or more courses from one of the approved departments or programs in the Dietrich School of Arts and Sciences.
- A student may also satisfy the Depth Requirement by completing two or more courses with a related theme, e.g. courses that focus on a geographic region, historic period, or ideological perspective.
- Only one course below the 0200 level may be used to satisfy the depth requirement, except in the departments of Psychology, Linguistics, and languages.
- Some transfer and AP courses may transfer to the Swanson School under Catalog Number 0000 (e.g. ENGLIT 0000). Multiple courses in the same Subject with Catalog Number 0000 may count toward students' elective requirements, but may not together satisfy the depth requirement.

Breadth Requirement

- Students must select courses from at least three different Dietrich School of Arts and Sciences humanities and social science departments.
- Students must select courses from both the humanities and social science departments.

Departmental Requirements

- It is important to note that some of the Engineering majors have additional guidelines for selecting the six humanities and social science elective requirements. Students are responsible for checking with their departments for any supplemental requirements.

Notes and Restrictions on Selecting Electives

- No more than two of the required six elective courses can be satisfied via high school Advanced Placement or International Baccalaureate credits.
- Language classes may not be taken in the student's native language, unless placement is deemed appropriate by the language department in question.

- Independent Study courses, Study Abroad courses, Directed Study, and Research courses will not satisfy humanities/social science elective requirements unless they have been pre-approved by your department's Undergraduate Coordinator and the Associate Dean for Academics. In the listing below, they are listed as not approved, as are any additional independent study, study abroad, directed study, or research courses. See your department's Undergraduate Coordinator if these courses interest you.
- All humanities/social science elective courses must be taken for 3 or more credits. Courses that are offered for fewer than 3 credits may NOT be combined to count as an elective.
- Courses that are cross-listed with other departments may be taken under either course number (i.e. ANTH 1524 is equivalent to HAA 1650) and may be used to satisfy the depth requirement in either department.
- All Swanson School of Engineering students must also complete at least one "W"-designated course in which the "W" indicates that a course has a substantial writing component as approved by the Dietrich School of Arts and Sciences. Students should refer to Peoplesoft each term to determine whether a course is being offered as a "W"-designated course. In the Class Search screen, select "High Impact Practices" in the Course Attribute field, and then "Writing Intensive Course" in the Course Attribute Value field. Every Dietrich School department offers "W"-designated courses, which may or may not satisfy Swanson School of Engineering humanities or social science requirements.

Approved Course Listing

- Only an officially listed School of Arts and Sciences course may be used to fulfill a humanities and social science requirement. Approved departments may be found below. Courses from the College of General Studies (including External Studies courses), the College of Business Administration, or the School of Information Sciences cannot be used to fulfill the humanities and social science requirements.
- These courses may be used to satisfy a free or open elective requirement, though students should always discuss these courses with an Academic Advisor before selecting and registering for such a course.

AFRICANA STUDIES (AFRCNA) - SOCIAL SCIENCE

All three-credit courses in AFRCNA below 1760 are approved, including AFRCNA 0000.

AIR FORCE ROTC (AFROTC) - SOCIAL SCIENCE

The following AFROTC courses are approved (must be taken for a letter grade):

AFROTC 1014 - LEADING AND COMMUNICATIONS 2

AFROTC 1015 - NATIONAL SECURITY AFFAIRS/PREPARATION FOR ACTIVE DUTY

AFROTC 1016 - NATIONAL SECURITY FORCES

AMERICAN SIGN LANGUAGE (ASL) - HUMANITIES

All three- or four-credit courses in ASL below 1900 are approved, including ASL 0000.

ANTHROPOLOGY (ANTH) - SOCIAL SCIENCE

ANTH courses below 0450 are not approved.

ANTH 1164, 1497, 1498, 1499, 1516, 1520, 1534, 1537, 1602, 1605, 1609, 1613, 1617, 1627, 1712, 1750 are not approved.

Other three-credit courses in ANTH between 0450 and 1899 are approved, as is ANTH 0000.

ARABIC (ARABIC) - HUMANITIES

All three-, four-, or five-credit courses in ARABIC below 1900 are approved, including ARABIC 0000.

ARCHITECTURAL STUDIES (ARC) - HUMANITIES

All three-credit courses in ARC between 0110-0300, 1118-1191, 1310, and 1330 are approved, as well as ARC 0201, 1201, and 1202.

ARTS AND SCIENCES (ARTSC) - SOCIAL SCIENCE

The following are approved courses:

ARTSC 0150 - INTRODUCTION TO GLOBAL STUDIES

ARTSC 1501 - SEMINAR: LATIN AMERICA

BOSNIAN/CROATIAN/MONTENEGRIN/SERBIAN (BCMS) - HUMANITIES

BCMS 0212, 0213, 0223, 0231, and 0233 are not approved.

All other three-, four-, or five-credit courses in BCMS below 1900 are approved, including BCMS 0000.

CHINESE (CHIN) - Humanities

All three-, four-, or five-credit courses in CHIN below 1900 are approved, including CHIN 0000.

CLASSICS (CLASS) - HUMANITIES

All three credit courses in CLASS below 1900 are approved, including CLASS 0000.

COMMUNICATION (COMMRC) - SOCIAL SCIENCE

The following COMMRC Courses and COMMRC 0000 are approved:

COMMRC 0300 - COMMUNICATION AND SOCIETY
COMMRC 0310 - RHETORIC & SOCIETY
COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
COMMRC 0500 - ARGUMENT
COMMRC 0530 - INTERPERSONAL COMMUNICATION
COMMRC 0540 - DISCUSSION
COMMRC 1103 - RHETORIC AND CULTURE
COMMRC 1104 - POLITICAL COMMUNICATION
COMMRC 1105 - TELEVISION AND SOCIETY
COMMRC 1106 - SMALL GROUP COMMUNICATION
COMMRC 1111 - THEORIES OF PERSUASION
COMMRC 1122 - MEDIA CRITICISM
COMMRC 1123 - RHETORICAL CRITICISM
COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
COMMRC 1160 - VISUAL RHETORIC
COMMRC 1161 - COMMUNICATION ETHICS
COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
COMMRC 1731 - SPECIAL TOPICS IN RHETORIC
COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION

ECONOMICS (ECON) - SOCIAL SCIENCE

The following ECON Courses and ECON 0000 are approved:

ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
ECON 0120 - INTRODUCTORY ECONOMIC THEORY
ECON 0140 - INTRODUCTION TO POLITICAL ECONOMY
ECON 0160 - INTRODUCTION TO ECONOMETRICS (W sections only)
ECON 0200 - GAME THEORY PRINCIPLES
ECON 0220 - INTRO TO HEALTH ECONOMICS
ECON 0230 - INTRODUCTION TO PUBLIC ECONOMICS
ECON 0280 - MONEY AND BANKING
ECON 0330 - URBAN ECONOMICS
ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
ECON 0400 - LABOR AND THE ECONOMY
ECON 0430 - WOMEN IN THE LABOR MARKET
ECON 0450 - ECON OF TECHNOLOGICAL CHANGE
ECON 0460 - SPORTS ECONOMICS
ECON 0470 - INDUSTRIAL ORGANIZATION I
ECON 0480 Consumer Economics
ECON 0490 - TRANSPORTATION ECONOMICS
ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS
ECON 0520 - COMPARATIVE ECONOMIC SYSTEMS
ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
ECON 0630 - EAST ASIA'S DYNAMIC ECONOMIES
ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
ECON 0700 Economics of Information Sci. (UHC)
ECON 0800 - INTRODUCTION TO ECONOMICS
ECON 0810 - CONSUMER ECONOMICS
ECON 0820 - REGULATED INDUSTRIES
ECON 1010 - AMERICAN ECONOMIC HISTORY (HIST 1645)
ECON 1030 - INTELLCL FOUNDTNS OF CAPITALISM (HIST 1145)
ECON 1050 - SOCIALISM VERSUS CAPITALISM (HIST 1045)
ECON 1070 - HISTORY OF ECONOMIC THOUGHT 1
ECON 1080 - HISTORY OF ECONOMIC THOUGHT 2
ECON 1100 - INTERMEDIATE MICROECONOMICS
ECON 1110 - INTERMEDIATE MACROECONOMICS
ECON 1200 - GAME THEORY

ECON 1210 - MICROECONOMICS
 ECON 1230 - PUBLIC ECONOMICS
 ECON 1260 - EXPERIMENTAL ECONOMICS
 ECON 1280 - MONETARY THEORY AND POLICY
 ECON 1300 - INTRODUCTION TO REGIONAL ECONOMICS
 ECON 1320 - URBAN ECONOMICS
 ECON 1390 - WORK, SELF AND SOCIETY
 ECON 1400 Theory of Labor Unions
 ECON 1410 - COLLECTIVE BARGAINING
 ECON 1420 - LABOR ECONOMICS
 ECON 1440 - ECONOMICS OF CORPORATION FINANCE
 ECON 1470 - MARKET STRUCTURE AND COMPETITION
 ECON 1480 - ECONOMICS OF INNOVATION
 ECON 1500 - INTERNATIONAL TRADE
 ECON 1530 - INTERMEDIATE DEVELOPMENT ECONOMICS
 ECON 1580 - ECON GROWTH PBLC HLTH DEMOGRAPHY
 ECON 1590 - PEOPLE RESOURCES USSR/E EUROPE
 ECON 1610 - LATIN AMERICA ECON DEVELOPMENT
 ECON 1620 - ECON DEVELOPMENT SOCIALIST CUBA
 ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA
 ECON 1640 - JAPANESE ECONOMIC GROWTH
 ECON 1670 - FORMER SOCIALIST ECON & TRANSTN
 ECON 1700 - CAPSTONE SEMINAR IN MICROECONOMICS
 ECON 1710 - CAPSTONE SEMINAR IN INTERNATIONAL ECONOMICS
 ECON 1720 - CAPSTONE SEMINAR IN MACROECONOMICS
 ECON 1905 - SPECIAL TOPICS
 ECON 1960 - POLITICS AND ECONOMICS OF PUBLIC POLICY

ENGLISH COMPOSITION (ENGCOMP) - HUMANITIES

All three-credit courses in ENGCOMP between 0400 and 1899 are approved, as are ENGCOMP 0000 and 0210. Note that no course may be used as both a humanities/social science elective and as a communication elective in the engineering departments that require one. These requirements must be fulfilled through separate courses.

ENGLISH LITERATURE/ENGLISH FILM (ENGLIT/ENGFLM) - HUMANITIES

All three-credit courses in ENGLIT between 0300 and 1899 are approved, as is ENGLIT 0000.
 All three-credit courses in ENGFLM below 1900 are approved, including ENGLIT/ENGFLM 0000.

ENGLISH WRITING (ENGWRT) - HUMANITIES

ENGWRT 0053 is not approved.
 All other three-credit courses in in ENGWRT below 1700 are approved, including ENGWRT 0000.

FILM STUDIES (FMST) - HUMANITIES

All three-credit courses in FMST below 1900 are approved, as is FMST 0000.

FRENCH (FR) - HUMANITIES

FR 0197, 0452, 1494, 1497, 1498 are not approved.
 All other three-, four-, or five-credit courses in FR below 1900 are approved, as is FR 0000.

GENDER, SEXUALITY, AND WOMEN'S STUDIES (GSWS) - INTERDISCIPLINARY

All three-credit courses in GSWS between 0100 and 1899 are approved, as are GSWS 0000 and 0030.

GEOGRAPHY (GEOG) - SOCIAL SCIENCE

The following GEOG courses and GEOG 0000 are approved:

0210 Physical Geography
 0810 Earth and People

GERMAN (GER) - HUMANITIES

GER 0031, 0197, 1104, 1204, 1399, 1531, and 1550 are not approved.
 All other three-, four-, or five-credit courses in GER below 1900 are approved, as is GER 0000.

GREEK (GREEK) and MODERN GREEK (GREEKM) - HUMANITIES

All three-, four-, or five- credit courses in GREEK and GREEKM below 1800 are approved, including GREEK 0000.

HINDI (HINDI) - HUMANITIES

All three-, four-, or five-credit courses in HINDI below 1900 are approved, including HINDI 0000.

HISTORY (HIST) - SOCIAL SCIENCE

HIST 1000, 1001, 1030, 1449, 1494, 1497, 1498, 1499, and 1745 are not approved.

All other three-credit courses in HIST below 1800 are approved, including HIST 0000.

HISTORY OF ART AND ARCHITECTURE (HAA) - HUMANITIES

All three-credit courses in HAA below 1900 are approved, as are HAA 0000 and HAA 1913.

HISTORY AND PHILOSOPHY OF SCIENCE (HPS) - HUMANITIES

All three-credit courses in HPS below 1700 are approved, including HPS 0000.

HONORS (HON) - INTERDISCIPLINARY

The following HON courses are approved:

HONORS 1110 - COMPARATIVE STUDIES-LEADERSHIP

HONORS 1160 - DISCOURSES IN HUMAN KNOWLEDGE

HUNGARIAN (HUN) - HUMANITIES

All three-, four-, or five-credit courses in HUN below 1900 are approved, including HUN 0000.

IRISH (IRISH) - HUMANITIES

All three-, four-, or five-credit courses in IRISH below 1900 are approved, including IRISH 0000.

ITALIAN (ITAL) - HUMANITIES

All three-, four-, or five-credit courses in ITAL below 1900 are approved, including ITAL 0000.

JAPANESE (JPNSE) - HUMANITIES

JPNSE 1494 is not approved.

All other three-, four-, or five-credit courses in JPNSE below 1902 are approved, including JPNSE 0000.

JEWISH STUDIES (JS) - INTERDISCIPLINARY

All three-, four-, or five-credit courses in JS below 1900 are approved, including JS 0000.

KOREAN (KOR) - HUMANITIES

All three-, four-, or five-credit courses in KOR below 1900 are approved, including KOR 0000

LATIN (LATIN) - HUMANITIES

All three-, four-, or five-credit courses in LATIN below 1800 are approved, including LATIN 0000.

LESS COMMONLY TAUGHT LANGUAGES (LCTL) - HUMANITIES

All three-, four-, or five-credit courses in LCTL below 1900 are approved, including LCTL 0000.

LINGUISTICS (LING) - HUMANITIES

LING 1330, 1340, and 1441 are not approved.

All other three-, four-, or five-credit courses in LING between 0080 and 1799 are approved, including LING 0000.

MEDIEVAL AND RENAISSANCE STUDIES (MRST) - HUMANITIES

All three-credit courses in MRST below 1900 are approved, including MRST 0000.

MUSIC (MUSIC) - HUMANITIES

Music voice and/or instrument lessons may count as a humanities/social science elective if they are taken for three credits in a given semester. One- or two-credit MUSIC courses may not be combined to count as a humanities/social science elective.

MUSIC 1401, 1494, and 1497 are not approved.

All other three-credit courses in MUSIC below 1900 are approved, including MUSIC 0000.

NAVAL SCIENCE (CMNAVS) - SOCIAL SCIENCE

The following CMNAVS courses are approved:

CMNAVS 32-310 - EVOLUTION OF WARFARE
CMNAVS 32-402 - LEADERSHIP AND ETHICS
CMNAVS 32-410 - AMPHIBIOUS WARFARE / OPERATIONS AND THE FUNDAMENTALS OF MANEUVER WARFARE

PERSIAN/FARSI (PERS) - HUMANITIES

All three-, four-, or five-credit PERS classes below 1900 are approved, including PERS 0000.

PHILOSOPHY (PHIL) - HUMANITIES

PHIL 0500, 1494, and 1497 are not approved.

All other three-credit courses in PHIL below 1900 are approved, including PHIL 0000.

PITT SPECIAL COURSES (PITT) - SOCIAL SCIENCE

The following PITT courses are approved:

PITT 0130 - WELLNESS AND RESILIENCE

POLISH (POLISH) - HUMANITIES

All three-, four-, or five-credit courses in POLISH below 1900 are approved, including POLISH 0000.

POLITICAL SCIENCE (PS) - SOCIAL SCIENCE

PS 0700, 1000, 1449, 1494, 1497, 1498, 1499, 1700, 1702, 1800, and 1820 are not approved.

All other three-credit courses in PS between 0200 and 1899 are approved, as well as PS 0000.

PORTUGUESE (PORT) - HUMANITIES

All three-, four-, or five-credit courses in PORT below 1900 are approved, including PORT 0000.

PSYCHOLOGY (PSY) - SOCIAL SCIENCE

The following PSY courses and PSY 0000 are approved:

PSY 0010 - INTRODUCTION TO PSYCHOLOGY

PSY 0015 Introduction to Psychology as Natural Science (cannot also take 0010)

PSY 0035 - RESEARCH METHODS

PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY

PSY 0160 - PSYCHOLOGY OF PERSONALITY

PSY 0182 - LAW AND SOCIAL PSYCHOLOGY

PSY 0184 - PSYCHOLOGY OF GENDER

PSY 0205 - PSYCHOPATHOLOGY

PSY 0310 - DEVELOPMENTAL PSYCHOLOGY

PSY 0405 - LEARNING AND MOTIVATION

PSY 0422 - COGNITIVE PSYCHOLOGY

PSY 0680 - INTRODUCTION INDUSTRIAL/ORGANIZATIONAL

PSY 1050 - TOPICS IN PSYCHOLOGY

PSY 1051 - TOPICS IN SOCIAL PSYCHOLOGY

PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY

PSY 1112 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY LAB

PSY 1140 - SOCIAL MOTIVATION

PSY 1155 - PSYCHOLOGY OF SMALL GROUPS

PSY 1205 - ABNORMAL PSYCHOLOGY

PSY 1215 - HEALTH PSYCHOLOGY

PSY 1305 - DEVELOPMENTAL PSYCHOLOGY LAB

PSY 1312 - CHILD DEVELOPMENT & SOCIAL POLCY

PSY 1315 - DEVELOPMENTAL PSYCH: INFANCY

PSY 1330 - DEVELOPMENTAL PSYCHOLOGY: COGNITIVE DEVELOPMENT

PSY 1357 - PSYCHOLOGY OF AGING

PSY 1470 - COGNITION AND THE BRAIN

PSY 1630 - PERSONNEL PSYCHOLOGY

PSY 1635 - ORGANIZATIONAL PSYCHOLOGY

QUECHUA/KICHWA (QUECH) - HUMANITIES

All three-, four-, and five-credit courses in QUECH below 1900 are approved, including QUECH 0000.

RELIGIOUS STUDIES (RELGST) - HUMANITIES

All three-credit courses in RELGST below 1780 are approved, including RELGST 0000.

RUSSIAN (RUSS) - HUMANITIES

RUSS 0211, 0216, 0221, 0226, 0231, 0236, 0241, and 0246 are not approved.

All other three-, four-, or five-credit courses in RUSS below 1900 are approved, including RUSS 0000.

SERBO-CROATIAN (SERCRO) - HUMANITIES

SERCRO 0212, 0213, 0223, 0231, and 0233 are not approved.

All other three-, four-, or five-credit courses in SERCRO below 1900 are approved, including SERCRO 0000.

SLAVIC (SLAV) - HUMANITIES

SLAV 0222, 0223, 0224, 0225, 0232, 1050, 1710, and 1720 are not approved.

All other three-, four-, or five-credit courses in SLAV below 1900 are approved, including SLAV 0000.

SLOVAK (SLOVAK) - HUMANITIES

SLOVAK 0211, 0212, 0221, 0222, and 0232 are not approved.

All other three-, four-, or five-credit courses in SLOVAK below 1900 are approved, including SLOVAK 0000.

SOCIOLOGY (SOC) - SOCIAL SCIENCE

SOC 0197, 0230, 0300, 0710, 0715, 0720, 0725, 0726, 0735, 0750, 1114, 1277, 1416, 1455, 1494, 1497, 1498, 1499, 1500, 1515, and 1700 are not approved.

All other three-credit courses in SOC below 1800 are approved, including SOC 0000.

SPANISH (SPAN) - HUMANITIES

SPAN 0197, 1494 and 1497 are not approved.

All other three-, four-, or five-credit courses in SPAN below 1900 are approved, including SPAN 0000.

STUDIO ARTS (SA) - HUMANITIES

All three-credit courses in SA below 1500 are approved, including SA 0000.

SWAHILI (SWAHIL) - HUMANITIES

SWAHIL 0111 is not approved.

All other three-, four-, or five-credit courses in SWAHIL below 1900 are approved, including SWAHIL 0000.

SWEDISH (SWE) - HUMANITIES

All three-, four-, or five-credit courses in SWE below 1900 are approved, including SWE 0000.

THEATER ARTS (THEA) - HUMANITIES

THEA 1480, 1481, 1482, 1483, 1484, 1485, 1486, 1487, 1494, 1497, 1498, 1499, and 1733 are not approved.

All other three-credit courses in THEA between 0800 and 1899, as well as THEA 0000 and THEA 0505 are approved.

TURKISH (TURKISH) - HUMANITIES

All three-, four-, or five-credit courses in TURKISH below 1900 are approved, including TURKISH 0000.

UKRAINIAN (UKRAIN) - HUMANITIES

All three-, four-, or five-credit courses in UKRAIN below 1900 are approved, including UKRAIN 0000.

URBAN STUDIES (URBNST) - SOCIAL SCIENCE

The following URNST courses and URBNST 0000 are approved:

URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION

URBNST 0408 - GLOBAL CITY - FLORENCE

URBNST 0410 - GLOBAL CITY - LONDON

URBNST 1613 - SUSTAINABLE CITIES 1: THEORIES AND CONCEPTS

URBNST 0114 - URBAN SUSTAINABILITY

URBNST 1615 - SUSTAINABLE CITIES 2: FIELD RESEARCH

VIETNAMESE (VIET) - HUMANITIES

All three-, four-, or five-credit courses in VIET below 1900 are approved, including VIET 0000.

School of Engineering Faculty

MAI ABDELHAKIM, Assistant Professor, Electrical and Computer Engineering, PhD, Michigan State University

STEVEN D. ABRAMOWITCH, Professor and William Kepler Whiteford Faculty Fellow, Bioengineering, PhD, University of Pittsburgh

MURAT AKCAKAYA, Assistant Professor, Electrical and Computer Engineering, PhD, Washington University

DAVID ANDERSON, Assistant Professor, Electrical and Computer Engineering, PhD, University of Rochester

HESSAM BABAEI, Associate Professor, Mechanical Engineering and Materials Science, PhD, Louisiana State University

ANNA C. BALAZS, Distinguished Professor and John A. Swanson Chair, Chemical and Petroleum Engineering, PhD, Massachusetts Institute of Technology

HSEEN BALED, Assistant Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

HENG BAN, R.K. Mellon Professor in Energy, Mechanical Engineering and Materials Science, PhD, University of Kentucky

IPSITA BANERJEE, Professor, Chemical and Petroleum Engineering, PhD, Rutgers University

MASOUD BARATI, Assistant Professor, Electrical and Computer Engineering, PhD, Illinois Institute of Technology

MATTHEW BARRY, Assistant Professor, Mechanical Engineering and Materials Science, PhD, University of Pittsburgh

AARON P. BATISTA, Associate Professor, Bioengineering, PhD, California Institute of Technology

CARLA APARECIDA BAUMEL, Associate Professor, Civil and Environmental Engineering, PhD, Northwestern University

TARYN BAYLES, Vice Chair for Education and Professor, Chemical and Petroleum Engineering, PhD, University of Pittsburgh

ERIC J. BECKMAN, George M. and Eva M. Bevier Chair Professor, Chemical and Petroleum Engineering, PhD, University of Massachusetts

MOSTAFA BEDEWY, Associate Professor, Industrial Engineering, PhD, University of Michigan

KURT E. BESHORNER, Associate Professor, Bioengineering, PhD, University of Pittsburgh

MARY BESTERFIELD-SACRE, Senior Associate Dean for Academic Affairs and Nickolas A. DeCecco Professor, Industrial Engineering, PhD, University of Pittsburgh

BOPAYA BIDANDA, Chair and Ernest E. Roth Professor, Industrial Engineering, PhD, Pennsylvania State University

HODA BIDKHORI, Assistant Professor, Industrial Engineering, PhD, Massachusetts Institute of Technology

MELISSA M. BILEC, Professor and Roberta Luxbacher Faculty Fellow, Civil and Environmental Engineering, PhD, University of Pittsburgh

HARVEY S. BOROVETZ, Distinguished Professor, Bioengineering, PhD, Carnegie Mellon University

IONNIS BOURMPAKIS, Assistant Professor and Bicentennial Faculty Fellow, Chemical and Petroleum Engineering, PhD, University of Crete

BRYAN N. BROWN, Assistant Professor, Bioengineering, PhD, University of Pittsburgh

DANIEL D. BUDNY, Associate Professor, Civil and Environmental Engineering; Director, Freshman Engineering Program, PhD, Michigan State University

ANDREW P. BUNGER, Associate Professor and R.K. Mellon Faculty Fellow, Civil and Environmental Engineering, Chemical and Petroleum Engineering, PhD, University of Minnesota

School of Health and Rehabilitation Sciences

Established in 1969 as a health sciences school of the University of Pittsburgh, SHRS stands on its solid reputation as an international leader in rehabilitation and disabilities education, research and community service, improving the lives and independence of all people with a focus on people at risk for or having chronic conditions or disabilities and those who have traditionally been underserved and underrepresented.

Our Vision

To be a catalyst for a world free of barriers and disparities that allows all people, regardless of health, to have opportunities to participate in life to the fullest; to be accomplished through education, research, and service.

Our Mission

To advance health, rehabilitation and reintegration service delivery through teaching, research and professional service.

We advance our Mission and pursue our Vision by:

- Providing an unparalleled environment for education and training
- Supporting an inter-professional approach to research to address challenges of people with acute and chronic conditions and disabilities
- Collaborating with local, national and international partners to address and improve integration of rehabilitation services in health care delivery systems, community engagement and models of care

Our Values

- **Advocacy** - for those less fortunate or with limited access seeking greater independence
- **Excellence** - in all endeavors and facets of our work
- **Inclusion** - in student enrollment and faculty and staff composition with a major focus on inclusion of people with disabilities
- **Innovation** - in teaching and educational curricula, research, technology, and product development
- **Integrity** - through uncompromising adherence to ethical principles, truthfulness, dignity and respect in all that we do
- **Service** - to all, including the disabilities community, in regard to rehabilitation and health services with a commitment to social responsibility

Philosophy of Undergraduate Education

SHRS faculty base their teaching upon contemporary best practices, scientific research, clinical service, and participation in their respective professional associations. Faculty research and service typically occurs through multi-disciplinary collaboration in diverse health care and research environments. Consequently, both entry-level and advanced students are exposed to state-of-the-science curricula, which are continually reviewed from the perspective of new investigational findings, technological developments, changing public policy and accepted clinical and management practice.

Our students are educated and trained to question the basis of current practice, and to challenge prevailing models and assumptions. The entry-level curricula reflect the importance of effective team participation in an inter-disciplinary and rapidly changing environment. Emphasis is given to the student's development of analytical problem-solving and human relations skills required for effective clinical and supervisory practice. The student is confronted with the transition between a professional commitment to providing high quality care and service, while recognizing the effects of competitive pressures and cost constraints upon the health care organization.

The primary objective of our entry-level professional programs is to educate knowledgeable, skilled, and ethically responsible practitioners, committed to their respective professions and to the high standards of health care and rehabilitation services.

The primary objective of our pre-professional programs is to provide students with an excellent preparation for entry-level professional health care educational programs offered at the graduate level, either at the University of Pittsburgh or elsewhere.

Upper-Division Programs and Certificates

SHRS is an upper-division school at the University of Pittsburgh which means students are required to have a minimum of approximately 60 college credits before entering our undergraduate entry programs. Each program has prerequisite courses that students typically take during their first and sophomore years while simultaneously earning general education credits. Students then apply to an SHRS programs during sophomore year, roughly after completing 45 credits. Students may be in the process of completing all required credits and admission requirements when applying to SHRS.

Undergraduate Programs

- Communication Science (BA)
- Emergency Medicine (BS)
- Health Informatics (BS)
- Nutrition Science (BS)
- Rehabilitation Science (BS)

Accelerated Programs

- Athletic Training, Accelerated BS-MS
- Dietitian Nutritionist, Accelerated BS-MS

Certificate programs offered through the undergraduate program in Rehabilitation Science:

- Assistive Technology in Rehabilitation
- Pathokinesiology in Rehabilitation
- Psycho-Social Issues in Rehabilitation and Personal Care

Admission

SHRS is committed to fostering a diverse and inclusive academic environment to create a more equitable health care system by welcoming applicants of all abilities/disabilities, religions, marital statuses, familial statuses, sexes, ages, sexual orientations, veteran statuses, national origins, all ethnic and racial backgrounds, genetic information, and gender identities and expressions.

Each upper-division undergraduate and accelerated program at SHRS has specific admission requirements. Please visit the SHRS Program and Course Offerings section of this catalog for detailed information.

Application Procedures

Students enrolled at the University of Pittsburgh (all campuses) apply to SHRS undergraduate and accelerated programs by completing an internal upper-level application.

Transfer students must apply to the University of Pittsburgh through the Pitt Admissions Office and also submit the internal upper-level application. Please visit <https://www.shrs.pitt.edu/admissions/undergraduate-application-process> for more information.

Admission Status

Full status is granted to those who have met all admission criteria and have been admitted either as full-time or part-time students for study toward the baccalaureate degree. Students enrolled in accelerated programs must maintain a 3.000 minimum GPA to progress from the undergraduate to graduate portion of their program.

Conditional status is granted to those who are in the process of completing prerequisite courses. These students must complete all requirements successfully prior to matriculation. At the discretion of the Department Chair, students may be admitted to an SHRS undergraduate program with a maximum of two courses of prerequisite work remaining to be taken in their designated program. Any outstanding prerequisite work taken while enrolled in an SHRS undergraduate program must be completed by the end of the fall term of the senior year.

Non-Degree status is granted to those who enroll at SHRS to take courses for credit without reference to a degree.

Admission to most SHRS undergraduate programs is on a competitive basis as class sizes are limited. Students are strongly encouraged to complete as many prerequisites as possible prior to applying and to apply by the application deadlines published by the individual departments. Applications will be evaluated, and qualified applicants will be admitted until classes are filled.

Deferral of Admission

Requests to defer admission must be submitted by the student, in writing, BEFORE the start of the first term. If approved, the student must pay the tuition deposit (if required) which will be held by Student Financials and applied to their account, if enrolled. If they do not enroll, the deposit is forfeited.

Request for Readmission

In each of the circumstances below, the student will be discontinued from PeopleSoft and must initiate readmission to rejoin the program by contacting their program director. If the program director approves the request for readmission, they must complete the New Readmission Form, found on the SHRS Student Life website, in the Forms tab, and send to SHRS Admissions for processing.

- If a student begins their 1st term and then drops all courses BEFORE the add/drop deadline.
- If a student begins their 1st term and then requests to withdraw from all classes AFTER the add/drop deadline and before 60% of the term has passed, the student would need to go through the Student Appeals office Tuition Adjustments | Student Payment Center and their tuition will be prorated based on the last day of attendance.
- In extenuating circumstances, at the discretion of the Department Chair and the Associate Dean, a student could request a late drop of the enrollment after the add/drop deadline which would remove the courses from their transcript and their bill.

Financial Information

Tuition and Fee Rates

Tuition and fee rates are available on the Financial Information page, in the University Catalog. The tuition chart is online at Undergraduate Tuition & Mandatory Fees.

Full-time students

Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students, and are assessed the current undergraduate "flat" tuition rate for their academic center.

Undergraduate students registered for fewer than 12 credits are considered part-time, and are billed on a per-credit basis.

Students will be charged per credit for each credit exceeding the maximum full-time credit limit.

Summer Term: All students are billed on a per-credit basis.

Residency/Reduced Tuition

Students who reside in the Commonwealth of Pennsylvania may be eligible for reduced tuition through state appropriations.

Eligibility is determined by criteria outlined in the University of Pittsburgh Guidelines for Determining Eligibility for Reduced Tuition Rates, available online at <http://payments.pitt.edu/pa-tuition-rate-eligibility/>

Additional Fees

Lab Fees: Lab courses may incur an additional fee to cover laboratory expenses. These fees will be charged to the student directly and will appear on the invoice generated by Student Accounts in addition to tuition and other fees each semester.

Financial Obligation of Students

The University of Pittsburgh has the right to withhold services if a student defaults on any financial obligation until repayment arrangements have been made that are satisfactory to the office or department to which the debt is owed.

Scholarships, Grants and Financial Aid

If you are interested in applying for loans, scholarships, grants, or work study, you should call, write or visit the University of Pittsburgh, Office of Admissions and Financial Aid, Alumni Hall, Pittsburgh, PA 15260, 412-624-PITT, <https://oafa.pitt.edu/> See also the SHRS website financial information page.

SHRS Scholarships and Awards

General information on scholarship and awards can be found at: SHRS Financial Information Page on our website. Contact individual departments for information on scholarships and awards specific to your area of study.

SHRS Academic Regulations

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. *SHRS Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures.*

In addition to the University-wide regulations and standards detailed in the section on General Academic Regulations, each student in SHRS is expected to be familiar with these school-specific regulations and academic Standards:

- It is the student's responsibility to review her/his academic standing, to identify undergraduate program requirements and prerequisites for intended undergraduate program(s) and to monitor their completion.
- All required and prerequisite coursework must be taken for a grade, when letter grade option is available.
- Students must receive a C- or better in each required course and SHRS elective course to earn credit.
- Students must earn a grade of C- or higher in any course intended to count towards their SHRS major and as written in the SHRS Plan of Study. This includes general education requirements, pre-requisites, and elective courses that are part of the degree requirements.

- Any student who does not earn a C- or better in any coursework should consult with their academic advisor.
- All Pitt grades will still appear on the transcript and be calculated into the GPA unless the student repeats the course. However, credits from courses in which student has earned unacceptable grades will not be counted toward graduation.
- Students who receive a grade below a C- in a required course must repeat that course and attain a grade of C- or better.
- Students will not be permitted to register for a course until they attain a C- or better in its prerequisite.
- Failure to receive an acceptable grade after the second repeat of a required course may result in the student being dismissed from the program and SHRS.

SHRS General Education Requirements

SHRS students must complete the general education requirements before graduating. Our General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

CATEGORY	MINIMUM SHRS REQUIREMENTS
1. WRITING/COMMUNICATION	<p>3 courses</p> <ul style="list-style-type: none"> • 1 SEMINAR IN COMPOSITION* course. <i>Students may be exempt from the composition requirement with a 660 or above Evidence-Based Reading and Writing SAT score or an ACT English score of 27 and a 5 on the AP English: Language and Composition or AP English: Literature and Composition.</i> • 1 Writing Intensive** course - ENGCOMP 0400, 0530, 0535 recommended • 1 Oral Communication course - COMMRC 0520 preferred; 0310, 0500, 0510, 0530 acceptable
B. ALGEBRA & QUANTITATIVE AND FORMAL REASONING	<p>2 courses</p> <ul style="list-style-type: none"> • 1 ALGEBRA* course. <i>Students may be exempt from the algebra requirement with a 620 or above Math SAT or a 27 and above Math ACT.</i> • 1 Statistics course - STAT 0200 or 1000
C. DIVERSITY	<ul style="list-style-type: none"> • 1 DIVERSITY* course.
D. HUMANITIES AND ARTS, SOCIAL SCIENCES, NATURAL SCIENCES	<p>3 courses</p> <ul style="list-style-type: none"> • 1 LITERATURE*, THE ARTS*, CREATIVE WORK* or PHILOSOPHICAL THINKING AND ETHICS* course. <i>Consider courses in bioethics and those with a disability or health & medicine focus.</i> • 1 SOCIAL SCIENCES* course. • 1 NATURAL SCIENCES* course. <i>Check with program to verify if a lab is required.</i>
E. GLOBAL AWARENESS AND CULTURAL UNDERSTANDING	<ul style="list-style-type: none"> • 1 CROSS-CULTURAL AWARENESS*, GLOBAL ISSUES*, HISTORICAL ANALYSIS*, or SPECIFIC GEOGRAPHIC REGION* course. <i>Study Abroad may be accepted. Consider courses with a disability or health & medicine focus.</i>
<p>*See requirement lists in the Dietrich School of Arts and Sciences General Education Course Catalog.</p> <p>**<u>Search in</u> PeopleSoft Mobile, <u>Class Search</u>, for High Impact Practices - Writing Intensive Course.</p>	

Allowable Credits

Students enter the upper-division undergraduate and accelerated programs at SHRS with approximately 60 credits and are required to take all courses required by their program at SHRS. Up to 30 additional credits of undergraduate coursework completed at a four-year academic institution may be granted up to pending approval of the Program Director. The Program Director must:

- review and approve these additional credits,
- indicate additional classes/credits on the student's Plan of Study, and
- submit to the Director of Student Services, Registrar, a request to accept additional credits.
- all required academic work for a degree in SHRS, including courses for which advanced- standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline.

Exception: Paramedics and active-duty military students with equivalent licensure enter the Emergency Medicine (BS) program with 90 credits.

Some SHRS programs may allow students to earn particular course credits by successful completion of the following:

Advanced Placement (AP) and International Baccalaureate (IB) Credits

See <https://oafa.pitt.edu/apply/ap-ib-credit/> for credits and course equivalencies currently granted by the University of Pittsburgh for Advanced Placement and International Baccalaureate examinations.

College Level Examination Program (CLEP)

SHRS does NOT accept CLEP general examination credits.

Credit by Course Examination

The following regulations govern this procedure:

- The individual department shall determine specific courses open to examination.
- A student may not earn credit by examination if s/he has previously taken the course.
- Student may obtain the form, Credit by Course Examination, from the Office of Student Services. Enrolled students must apply for examination during the term preceding the term in which the course is scheduled. Newly admitted students may apply and take the examination early in the term in which the course is taught.
- The Credit by Course Examination form and a check or money order for the appropriate fee must be processed in the Cashier's Office, G-7 Thackeray Hall, for validation prior to taking the examination. Upon passing the examination, the department will submit the Credit by Course Examination form to Student Services. Students will receive advanced standing credit for the course, which may be applied towards graduation. If a student fails the exam, neither a failing grade nor credits will be posted on the transcript. An exemption examination may be taken only once per course. The faculty of each Department will determine the number of courses that can be exempted by students enrolled in that academic program.

Online Courses

The acceptance of online coursework is at the discretion of the department to which the student is applying. All online coursework must be taken at a regionally accredited institution.

Educational Experiences in the Armed Services Credits

SHRS will evaluate credits earned as part of Educational Experiences in the Armed Services

Reserve Officer Training Corps (ROTC)

SHRS will grant up to four credits toward graduation for the following courses in lieu of or in combination with PEDC (Physical Education) courses: AFROTC 0001, 0002, 0003, and 0004; MILS 0011, 0012, 0021, and 0022.

Also, upper-level ROTC courses may be used as electives in meeting SHRS degree requirements. These courses include AFROTC 1013, 1014, 1015, and 1016 (all 3-credit courses); MILS 1031, 1032, 1041, and 1042 (all 1-credit courses).

Transfer Credit Policy

- At the time of application coursework completed outside the University of Pittsburgh is evaluated by the to determine if it meets the University and SHRS policy required for transfer.
- A maximum of 60 credits can be transferred from a two-year degree program: and a maximum of 90 from a four-year college/university.
- Courses must be passed with a grade of C or better and must be earned at an appropriately accredited institution. Courses must have reasonable equivalents at the University of Pittsburgh to be eligible for transfer. When requested, students are responsible for supplying descriptions for courses taken elsewhere.
- The number of credits granted for a given course cannot exceed the number awarded for the course on the transcript of the school where the course was taken, or the number earned for the corresponding course at the University of Pittsburgh.
- Credits earned on the quarter system will be converted into semester credits. A quarter credit is equal to two-thirds of a semester credit (e.g., five quarter-system credits equal three semester credits, and three quarter-system credits equal two semester credits).
- SHRS accepts credits, but not grades, for transfer. Consequently, any courses that are accepted for transfer will be used as credit toward graduation but will not be calculated into the student's GPA at the University of Pittsburgh.
- Contact admissions@shrs.pitt.edu for information about transfer credit evaluation.
- Please note: All transfer credits are subject to re-evaluation when a student transfers from one school to another within the University of Pittsburgh.

Transfer Students Credit Evaluation

Upon application, transfer students will receive a formal credit evaluation. Following admission, transfer students will receive formal notification from SHRS indicating which requirements have been satisfied and if any prerequisite coursework or credits are outstanding.

Current SHRS Students taking courses off campus for transfer credit

Current SHRS students in good academic standing (cumulative GPA of at least 2.00), including students admitted to SHRS who need to complete prerequisites prior to starting their program, may attend another accredited institution in order to complete their degree requirements, provided they receive prior approval from the SHRS Dean's office. Students will be required to fill out an approval form and provide appropriate course descriptions. Students will not receive credit for courses taken without advance approval. SHRS students may not enroll in courses outside the University of Pittsburgh in the semester they are graduating from SHRS.

Advising

Academic and faculty advisors for SHRS undergraduate students are assigned by the Program Directors. Students are notified of the name of their advisor by their Department.

Change of Advisor

If either the student or his or her assigned advisor prefers, the student can choose another advisor. The student must obtain a *Change of Academic Advisor form*, located on the SHRS website under forms, complete the form and secure the required signatures, and return the form to the Office of Student Services. As a general rule, students who have more than 50% of the credits required for graduation should not initiate change of advisor procedures.

More information on Advisor roles and responsibilities can be found in the SHRS Undergraduate Handbook

Plan of Study

Every student in SHRS must have a Plan of Study on file with their department. Any revisions to the Plan of Study must be approved by the academic/faculty advisor or Department Chair.

To be certified for graduation, students must have successfully completed all courses outlined in their final Plan of Study as well as any other requirements for the degree. A final Plan of Study will be submitted to Student Services, by the department administrator in the graduating term.

Dual Degree Option

- Students may pursue dual degrees within SHRS or between SHRS and another school at the University. SHRS follows the University policy concerning dual degrees.
- The student must complete 150 credits accepted by the University.
- The student must complete all requirements necessary to complete each degree.
- The student must receive both degrees simultaneously.
- The student must be admitted and enrolled in SHRS as his/her primary academic center for half the terms necessary to complete both degrees, typically this is 4-5 semesters.
- Students must contact SHRS Admissions Office to be admitted prior to the midpoint of their studies.

David C. Frederick Honors College

Students enrolled in SHRS programs are eligible for membership in the David C. Frederick Honors College and to participate in earning Honors College recognition. For more information and to learn more about the various levels of engagement, go to the following links for Honors Outside the Classroom Curriculum (OCC) Honors OCC, Honors Distinction, Honors Distinction, and Honors Joint Degree.

Independent Study

The independent study allows the student to pursue independent academic work for credit. The independent study must be supervised by an SHRS approved faculty member. To register for an independent study, the student must:

- identify and develop an independent study project with independent study supervisor to include objectives for the independent study, methods to be used to meet those objectives, and measurable assessment methods for determining degree to which objectives were met. The independent study must have an academic focus, and the academic rigor of the objectives and assessment methods will determine the number of credits to be earned.
- complete the *Independent Study form* (Found on the SHRS website)
- have *Independent Study form* approved and signed by the IS supervisor, academic/faculty advisor, and Associate Dean of Undergraduate Studies
- copy *Independent Study form* as necessary
- submit an *Independent Study form*, *Enrollment form*, and have advisor send Student Services an approval email to receive a permission number
- enroll online for the independent study course

Clinical Education and Directed Practice

- all clinical education sites must have current contracts with the University of Pittsburgh
- each program's clinical education coordinator will assign students to their clinical education site
- student must use an *Enrollment Form* to register for appropriate clinical education and submit other forms as directed by clinical education coordinator and listed below

- student must provide proof of HIPAA certification with registration
- student must provide proof of Blood Borne Pathogen certification with registration
- student is required to carry personal health insurance
- student must provide proof of having undergone a physical exam and blood work as well as proof of vaccinations.
- list of exam and vaccination requirements and required form will be provided by the clinical education coordinator

Some SHRS programs require that students complete clinical education at facilities internal or external to the University and may require completion of: 1) Pennsylvania Department of Human Services Child Abuse History Clearance; 2) Pennsylvania State Police Criminal Record Check; 3) FBI Criminal Record Check to determine whether the student is qualified to participate in clinical education. If these are deemed to be required and the student has not already done so, he/she should immediately start the process of obtaining these three clearances and background checks.

The Commonwealth of Pennsylvania has posted information on how to obtain these clearances and background checks here:
<http://www.dhs.state.pa.us/findaform/childabusehistoryclearanceforms/S001087>.

Additional requirements may also include a drug screen, CPR training, attending orientation sessions, compliance with dress code, and personal transportation. Each program's clinical education coordinator will advise students of additional program or site-specific requirements and instructions on how to submit required documentation to verify completion of all requirements.

Students may be required to travel a distance or to relocate outside the city for their clinical education assignments. All expenses for transportation, housing, food, etc. are the responsibility of the student. Any student who misses clinical education time for any reason must meet with his/her clinical education coordinator to discuss any needed make-up time. See individual program for specific details regarding clinical education.

Health Insurance Portability and Accountability Act (HIPAA)

All SHRS students participating in clinical education or field experience must complete HIPAA certification training prior to beginning at the clinical/field site. No clinical contact in a "covered entity" will be allowed before certification is completed. (Student should see individual department information regarding additional HIPAA certification requirements.)

Procedure for completing HIPAA certification: Go to <http://cme.hs.pitt.edu>. Look for UPMC HIPAA Security Awareness Training for Physicians (formerly RPF Module 15) and HIPAA Physicians Privacy Awareness Training by UPMC (formerly RPF Module 8). Complete the UPMC HIPAA Security Awareness Training for Physicians and HIPAA Physicians Privacy Awareness Training by UPMC. Complete the quizzes. Print certificates, complete all information, sign them, and turn them in to your department.

Blood Borne Pathogen Training and Certification

All SHRS students who will be going into a clinical setting must complete Blood Borne Pathogen (BBP) training and certification annually. This certification must be completed prior to the beginning of the term in which the clinical setting will begin. No clinical placement will be allowed before certification is completed.

Procedure for completing online BBP training and certification: Go to <http://cme.hs.pitt.edu>. Look for Blood Borne Pathogen Training (formerly RPF Module 9). Complete Blood Borne Pathogens Training. Complete the quiz. Print certificate, complete all information, sign it, and turn it in to your department.

Enrollment Status

A student must be registered **for at least one credit in a twelve (12) month period** from the time of admission until the degree is granted **in order to maintain active status**. Those students who fail to observe this rule will be placed on inactive status and will have to seek formal readmission in order to continue in the program. If active status is not maintained, the student is not permitted to use University facilities or receive counseling or active supervision by a faculty member, advisor, or committee.

Undergraduate students cannot enroll for more than (18) units without the dean's approval. Only an advisor or the University Registrar's Office can enroll you after you receive approval for the additional unit(s).

Undergraduate students registered for 12 to 18 credits in the Fall and Spring Terms are regarded as full-time students.

Students cannot enroll in courses that meet at the same time.

More Information on the enrollment process can be found in the SHRS Undergraduate Handbook.

Enrollment in Graduate Courses

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.

Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. The student must obtain written permission from the school of proposed graduate study that the courses may count when and if the student is admitted into the graduate degree program. This privilege should not be granted if the proposed total program exceeds a normal full-time load. Although these credits will appear on the undergraduate transcript, they will not count toward fulfilling undergraduate degree requirements. They will be posted as advanced standing credits on the graduate transcript.

Extended Drop Period

Under special circumstances, undergraduate students may be eligible to drop a course in the third week of the fall or spring semester. Students must meet all of the following criteria to drop a course during the extended drop period:

Students must meet all of the following criteria to drop a course during the extended drop period (Only Fall & Spring term):

- Must be an Undergraduate student and the course you are dropping must be an Undergraduate course.
- Students must remain in full-time status after dropping the course(s).
- Students must review the proposed drop with their academic advisor.

If the student's advisor finds that the student is eligible, the advisor must provide permission to drop via email to the SHRS Student Services Coordinator. **Students do not have access to drop classes during the extended period.**

- The email request must include all student and course information. (student's name, PeopleSoft ID number, subject, number, section, credits) to process the drop(s).

Monitored Withdrawal

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring.

Because summer sessions vary in length, students should check the University's Academic Calendar for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and assistantships or fellowships.

The form must be signed by the instructor of the course and be returned to the SHRS Director of Student Services, the SHRS Registrar, within the first nine weeks of the fall or spring term.

Late Withdrawal procedure

Procedure for an Appeal for Late Withdrawal

After the Monitored Withdrawal deadline has passed, students may appeal to withdraw from a course by submitting an Appeal for Late Withdrawal. The form can be found on the SHRS Student Life website, in the Forms tab.

All appeals for late withdrawal must be for non-academic reasons, i.e. medical or family emergencies. If you are trying to withdraw without extenuating circumstances, your appeal will be denied.

- Appeals must be submitted to the Dean's Office of the school offering the course, regardless of the student's home school.
- Appeals for Late Withdrawal from SHRS courses should be submitted to the Registrar, Kellie Beach.

The appeal requires information on the class, including class number, catalog/course number, subject, and course title. This information can be found in your Student Center/PeopleSoft.

The signature of the instructor, or an email from the instructor indicating the date of last attendance, grade earned, and acknowledgment of your withdrawal, is required. You must print and attach copies of the emails.

Attach a typed statement explaining the extenuating circumstances which you feel merit consideration of withdrawal beyond the deadline. Please provide relevant documentation, such as certification from a doctor, hospital receipts, an obituary, etc.

- Please address the documentation and the letter to SHRS, Associate Dean for Undergraduate Studies, Dr. Kevin Conley.
- Please include your PeopleSoft ID and your University of Pittsburgh e-mail address on each submitted document.
- Please sign and date each document.

You will be notified of the Associate Dean's decision via your student email account.

Appeals for late withdrawal must be submitted before the end of the 13th week of the semester. After the 13th week, students can only appeal to withdraw from the entire semester.

If your request is approved and you accept the grade of "W" there is no tuition adjustment for withdrawing from the course.

Repetition of Courses

Consult your dean's office for the proper procedure of repeating a class and for information on how this will affect your grades and the calculation of your Grade Point Average (GPA). When you repeat a class, you must officially enroll and pay for the class again. University policy prohibits any student from attending a class without being officially enrolled for that class. A repeated course has a notation appearing underneath the previous course taken designating that it is excluded from the GPA. The original course and grade will always remain on your record/transcript.

Students are only permitted to repeat a course twice.

NOTE: Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. Withdrawal (W), Repeat (R), and Audit/Non-Credit (N) grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA.
- Incomplete grades (G and I) are not identified as repeated courses until the coursework is completed.
- Students seeking to repeat other non-SHRS (prerequisites, electives, etc.) courses will be permitted to do so at the discretion of the program director.

Statute of Limitations on Allowable Coursework

All required academic work for a degree in SHRS, including courses for which advanced- standing credit has been granted, must be completed within ten (10) consecutive calendar years. Departments have the discretion to lessen this number for specific coursework deemed integral to the course of study in a particular discipline.

Resigning from the University for a Specific Term

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point of the term or session has passed, students who wish to terminate their registration may process a withdrawal from all classes only with the permission of their academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of the Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Please visit the Student Payment center resignation page on the University of Pittsburgh website for more information.

Leave of Absence

Under special conditions, a leave of absence is available for students who are enrolled in the second term or later of their program.

- To request a LOA, the student, along with their advisor, must complete the SHRS **Request for Leave of Absence - Undergraduate Program** form, which can be found on the SHRS Student Life website, in the Forms tab. This form must be submitted to Student Services for approval.
- The length and rationale for the leave of absence must be approved by the Associate Dean. If approved, the time of the leave shall not count against the total time allowed for the degree (statute of Limitations) being sought by the student.
- If a student requests a leave for up to 1 year, and they are auto discontinued from PeopleSoft due to 3 consecutive terms of no enrollment, they will automatically be readmitted by the Admissions office to return.
- If the reason for the leave is medical in nature, a formal note from a Doctor must be included with the request.

Reinstatement is not guaranteed. Students who have been dismissed from SHRS for academic reasons or who have not enrolled at SHRS for three consecutive terms must request reinstatement by contacting their program director.

Grading Policy

All SHRS undergraduate programs adhere to the University's grading system and grading policies for graduate students. Please refer to the Office of the University Registrar on Grades or the University Catalog on Grading and Records.

Course Grading

The method of evaluation and grading is the prerogative of the course instructor and is based on the course objectives and expectations. SHRS faculty have the option of issuing "+" or "-" grades. SHRS faculty also have the option of assigning letter grades or HSU evaluations, as printed in the course catalog and determined at student's enrollment. Students will be apprised of the evaluation procedure by the instructor at the beginning of each course. It is the student's responsibility to request clarification of any evaluation or grading policy.

SHRS (G) Grade Policy

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken.

Once the deadline has passed, the G grade will be changed automatically to a (NG) - No Grade. The NG grade will remain on the record and the student will be required to re-register for the course if it is needed to fulfill requirements for graduation.

Action required by the student and faculty member for a "G" grade:

- The student, instructor and advisor are to fill out a Completion Agreement of G Grade Credits Form (the form and the SHRS G grade Policy and instructions can be found on the SHRS website)

- A copy of this agreement will need to be submitted to Student Services, no later than the end of the add/drop period for the following term. If the following term is the summer term, then the add/drop deadline date is that of the whole summer term.

Satisfactory/No Credit (S/NC) grading option

Prerequisite and required courses must be taken for a letter grade when available, and a student must earn a C- or better (C for transfer credits). Students planning to apply to SHRS are strongly encouraged to consult their advisor whenever considering the S/NC grading option to make certain the course is not required for the degree being sought in SHRS.

Dean's List for SHRS

The SHRS Dean's List is compiled upon completion of each fall and spring term. The criteria used to determine eligibility for the Dean's List is as follows:

- full-time student status for the term
- minimum GPA of 3.500 for the term
- minimum cumulative GPA of 3.000 (total Pitt)

Academic Probation and Dismissal Policy

Students who have completed at least 12 credits and whose cumulative GPA falls below 2.000 will be placed on academic probation and will receive written notification of this status. At this point it is the student's responsibility to meet with his or her advisor.

To be removed from academic probation, the student will need to achieve a cumulative GPA of 2.000 within his or her next two terms of study. Failure to do so may subject the student to recommendation for immediate dismissal from the program by the Department Chair, in collaboration with the Associate Dean of Undergraduate Studies.

Students who fail to demonstrate progress toward meeting graduation requirements in a timely manner may be placed on academic probation or recommended for dismissal from the program by the Department Chair in collaboration with that Associate Dean of Undergraduate Studies. SHRS reserves the right to terminate a student at any time for academic or other reasons.

Dismissal from the program is at the discretion of the SHRS Dean. Notwithstanding the foregoing, in the event it is not mathematically possible for a student to remediate their cumulative program GPA within their next two terms of study the student may be immediately dismissed.

A student may appeal their dismissal with the University of Pittsburgh Provost office.

Graduation Requirements

Graduation Requirements for a bachelor's degree from the School of Health and Rehabilitation Sciences are as follows:

- satisfactory completion of a minimum of 120 approved credits (including advanced standing)
- minimum of 30 SHRS credits taken once admitted and enrolled in SHRS department or program
- minimum cumulative GPA 2.000
- the GPA will be calculated as a composite of all courses taken at the University of Pittsburgh and counting toward completion of the degree
- completion of all requirements for the program in which student has enrolled
- no outstanding D, F, or G grades in a required course
- updated and approved Plan of Study on file in Student Services
- student must be considered an "active student" at time of graduation; s/he must have been registered for at least one credit at the University of Pittsburgh within the last three terms or sessions

- students may **not** enroll in courses outside the University of Pittsburgh in the semester they are graduating
- An **application for graduation** must be filed in the SHRS Office of Student Services, based on the deadlines determined for that term. Email notification of these deadlines will be sent to students in the prior term.

A student with outstanding financial obligations to the University is not eligible to receive the diploma, official academic transcripts, or any certification of completion of the academic program.

Graduation with Honors

A baccalaureate degree student attaining an outstanding scholastic record will be graduated with University honors if a minimum of 60 letter-graded credits have been earned at the University of Pittsburgh. The GPA used for the awarding of honors at graduation will be calculated as a composite of courses taken at the University of Pittsburgh and counting toward completion of the degree. The following recognition of academic standing with honors applies:

- | | |
|-------------------|---------------|
| • Cum Laude | 3.250 - 3.499 |
| • Magna Cum Laude | 3.500 - 3.749 |
| • Summa Cum Laude | 3.750 - 4.000 |

SHRS Student Organizations

The School of Health and Rehabilitation Sciences has student organizations for undergraduate students. Visit <http://www.shrs.pitt.edu/studentgroups/> for more information.

Ombudsperson

The Ombudsperson assists students with resolving conflicts and issues that arise in the course of their education and training that they believe have not or cannot be addressed within their academic department. The Ombudsperson can help mediate conflicts and provides information about institutional policies related to the student's issues, including the University's grievance procedures. The Ombudsperson directs students to further resources on campus as appropriate. The Ombudsperson in the School of Health and Rehabilitation Sciences (SHRS) will be a neutral contact person (Non-faculty) for students with whom they can engage in informal discussions.

The Ombudsperson for SHRS is Kellie Beach, Director of Student Services, and Registrar. She can be reached at kbeach@pitt.edu to make an appointment. More information on the role of the Ombudsperson for SHRS can be found on the SHRS website under the Orientation page.

School of Health and Rehabilitation Sciences Faculty

SHRS Faculty

Program and Course Offerings

Department of Sports Medicine and Nutrition

In Pitt's Department of Sports Medicine and Nutrition (SMN), there's a vision for the future. It's a place where scientists, using contemporary, state-of-the-art practices have the potential to extend the careers of elite athletes and weekend warriors, where human performance optimization translates to injury prevention and military operational success, where exercise and diet help to prevent and manage disease and nutrition information impacts the well-being of the community and informs public policy.

It's a place where innovative and multidisciplinary research makes an immediate connection to real-world practices. Proof lies in the Department's growing number of regional, national and international partners as well as the quantity and quality of funding from prestigious organizations such as the National Institutes of Health, U.S. Department of Defense, NASA and others.

Through the use of technology and collaborative science, the Department of Sports Medicine and Nutrition is improving the quality of life and resiliency of people from all walks of life and abilities today, and championing health and wellness for life.

The department aims to meet these objectives by:

- developing cognitive skills, psychomotor mastery and affective values in students through the delivery of a proven formula of sound classroom education, combined with invaluable clinical education experiences, for the promotion of competent entry-level clinicians and enhancing the health and well-being of individuals and diverse populations
- becoming thoughtful leaders by advancing the state of the science through evidenced-based practice, rigorous curricula, interdisciplinary collaboration and innovative technology
- mitigating injury and disease and optimize human performance by conducting innovative, multidisciplinary basic and applied research and contributing to the scientific community in order to enhance clinical decisions and education

Accelerated

Athletic Training, Accelerated BS-MS

The athletic training degree program earned initial accreditation in 1997 and continuing accreditation in 2004 and 2012 through the Commission on Accreditation of Athletic Training Education (CAATE). Prior to this, the curriculum had been National Athletic Trainers' Association approved since 1978. The athletic training curriculum is defined by the current Board of Certification, Inc. Role Delineation Study/Practice Analysis, which consists of five performance domains to include: (1) Risk Reduction, Wellness, and Health Literacy; (2) Assessment, Evaluation, and Diagnosis; (3) Critical Incident Management; (4) Therapeutic Intervention; (5) Healthcare Administration and Professional Responsibility. The curriculum is structured to provide both academic and clinical instruction. The academic curriculum includes such courses as anatomy, kinesiology, human and exercise physiology, injury evaluation, medical and pharmacological principles, administrative aspects, among others. The course work provides a foundation for hands-on clinical experiences provided in the clinical education setting. The students' clinical requirements include direct patient care with athletes and physically active patients and evaluation of skills by preceptors who supervise each student's clinical experience. Students rotate through four on-campus athletic training facilities and several off-site affiliated settings during the clinical education component acquiring valuable skills under the direct supervision of certified athletic training staff, team physicians and other allied health professionals. Upon successful completion of the program, students are eligible to sit for the BOC, Inc. certification examination. Successful completion of this exam affords the candidate a variety of employment opportunities including athletic training positions at the high school, college, or university level; sports medicine and rehabilitation clinics; professional athletic teams; performing arts; the military; industrial settings; and more. Additionally, many students pursue graduate education opportunities in a number of sports medicine-related professions.

For more information, please contact:

Amy E. Aggelou, PhD, LAT, ATC
Program Director, Athletic Training
School of Health and Rehabilitation Sciences
Department of Sports Medicine and Nutrition
6075 Forbes Tower

E-mail: aaggelou@pitt.edu

Admission Requirements

SHRS's General Education Requirements are included in our upper-level program prerequisites and curriculum requirements; therefore, changes will be reflected in prerequisites and curriculum requirements.

Prerequisite Courses

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2023:

Basic Athletic Training, ATHLTR 1811	<i>Transfer credit not accepted</i>
Basic Athletic Training Lab, ATHLTR 1812	<i>Transfer credit not accepted</i>
Seminar in Composition*	1 course
Writing Intensive	1 course (<i>ENGCOMP 0400 recommended</i>)
Oral Communication	1 course (COMMRC 0520 preferred; COMMRC 0500, <i>COMMRC 0510, COMMRC 0530 acceptable</i>)
College Algebra	1 course (MATH 0031 or higher math required. <i>Exemption accepted</i>)
Statistics	1 course (STAT 0200 or STAT 1000 required)
Foundations of Biology 1	BIOSC 0150
Foundations of Biology 1 Lab	BIOSC 0050, BIOSC 0057 or BIOSC 0058
General Chemistry 1 and Lab	CHEM 0110
Introduction to Physics	PHYS 0110
Introduction to Psychology	PSY 0010
Developmental Psychology (PSY 0310) or other upper level Psychology	3 credits
Cross-Cultural Awareness*, Global Issues* or Specific Geographic Region*	1 course
Diversity*	1 course
Social Sciences*	1 course

* See the Dietrich School of Arts and Sciences General Education Course Catalog.

Additional Requirements

- Required credits for admission: 60 (Applications may be submitted while prerequisite coursework is in progress).
- Grades of C- or better (C for transfer) in all prerequisite coursework with the exception of ATHLTR 1811 and ATHLTR1812, where a grade of B or better must be earned.
- EMT certification through course for credit or other qualified course leading to EMT credential. Verification of completion of EMT certification must be provided to the program director.
- Minimum cumulative GPA of 2.8 (based on 4.0).
- Submit admissions application including technical standards for admission document.
- Personal interview with athletic training faculty (as needed).

The Athletic Training Program at the University of Pittsburgh is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills, and competencies of an entry-level athletic

trainer, as well as meet the expectations of the program's accrediting agency (Commission on Accreditation of Athletic Training Education [CAATE]).

The following abilities and expectations must be met by all students admitted to the Athletic Training Program. Candidates for selection to the Athletic Training Program must demonstrate:

- The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm.
- Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients.
- The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice.
- The ability to record the physical examination results and a treatment plan clearly and accurately.
- The capacity to maintain composure and continue to function well during periods of high stress.
- The perseverance, diligence, and commitment to complete the athletic training program as outlined and sequenced.
- Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations.
- Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Application Procedures

Application Deadline: March 1

Pitt Students (including regional campuses)

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Transfer Student Information

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Athletic Training as their intended field of study. International transfer students [click here](#). Transfer students must also provide application materials directly to SHRS.

All admission criteria applies to transfer students in the same way as students enrolled at the Pittsburgh campus. Students with prior athletic training experience seeking to transfer to the University of Pittsburgh for admission to the Athletic Training Program must complete the same prerequisite requirements as all other candidates including the Basic Athletic Training (ATHLTR 1811) and Basic Athletic Training Lab (ATHLTR 1812) courses and all observation hours. If admitted to the program, all students must complete University of Pittsburgh core athletic training courses. In some instances, credit may be given for other coursework taken at another institution and will be evaluated on an individual case basis. International transfer students [click here](#).

Curriculum

Coursework for the professional BS-MS in Athletic Training program is divided into two phases: Pre-Professional Phase and the Professional Phase. Students applying for the Accelerated BS-MS in Athletic Training program will complete prerequisite coursework during the first two years of their undergraduate degree. At the conclusion of their sophomore year, students will apply to the Accelerated BS-MS in Athletic Training program. Upon successful application and acceptance into the program, students will complete one year (two semesters) of pre-professional curriculum. During their last two years, students will complete the professional (graduate) curriculum.

Pre-professional Phase

During the pre-professional phase students complete prerequisite and general education courses along with specific Athletic Training-related prerequisites.

First Semester (Fall)

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1235 - MEDICAL TERMINOLOGY
- HRS 1006 - INTRO TO HUMAN NUTRITION
- ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1
- ATHLTR 1816 - MEDICAL ETHICS

16 Credits

Second Semester (Spring)

- REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1215 - EXERCISE PHYSIOLOGY
- REHSCI 1216 - EXERCISE PHYSIOLOGY LAB
- ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2
- ATHLTR 1833 - STRENGTH AND CONDITIONING

15 Credits

Professional Phase

The following courses are to be completed in four semesters and are graduate-level curriculum.

First Semester (Fall)

- ATHLTR 2801 - CLINICAL PRACTICUM 1
- ATHLTR 2805 - INJURY/EVAL 1 - LOWER EXTREMITY
- ATHLTR 2807 - THERAPEUTIC INTERVENTIONS 1
- ATHLTR 2809 - FUNCTIONAL HUMAN ANATOMY
- ATHLTR 2810 - EVIDENCE BASED PRACTICE IN ATHLETIC TRAINING

15 Credits

Second Semester (Spring)

- ATHLTR 2802 - CLINICAL PRACTICUM 2
- ATHLTR 2806 - INJURY/EVAL 2 - UPPER EXTREMITY
- ATHLTR 2808 - THERAPEUTIC INTERVENTIONS 2
- ATHLTR 2813 - GENERAL MEDICAL AND PHARMACOLOGICAL CONDITIONS

15 Credits

Third Semester (Fall)

- ATHLTR 2803 - CLINICAL PRACTICUM 3
- ATHLTR 2811 - GRADUATE RESEARCH 1
- ATHLTR 2814 - ADVANCED CLINICAL PROCEDURES
- ATHLTR 2815 - CURRENT CONCEPTS IN SPORTS MEDICINE

- ATHLTR 2816 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

15 credits

Fourth Semester (Spring)

- ATHLTR 2804 - CLINICAL PRACTICUM 4 - CLINICALLY IMMERSIVE SEMESTER
- ATHLTR 2812 - GRADUATE RESEARCH 2
- ATHLTR 2817 - LEADERSHIP AND PROFESSIONAL DEVELOPMENT
- ATHLTR 2818 - BOARD OF CERTIFICATION (BOC) PREPARATION
- ATHLTR Elective, 3 credits

15 Credits

Dietitian Nutritionist Program, Accelerated BS-MS

Students who choose to pursue Pitt's Dietitian Nutritionist Program degree are ahead of the game! In 2024, all Registered Dietitian/Nutritionists (RDNs) entering the field will be required to have a masters level degree to enter the profession. The program is a competency-based educational program that integrates experiential learning with didactic coursework to enable students to demonstrate the higher level of competence that will be needed for future practice as a RDN.

Interested students will apply in the Spring Term of each year to begin the accelerated program as juniors.

For more information, please contact:

Trisha A. Cousins, EdD, RDN, LDN, CLC
 Program Director, Dietitian Nutritionist Program
 6037 Forbes Tower
 412-383-6532
 E-mail: tcousins@pitt.edu

About

The Dietitian Nutritionist Program, housed within the Department of Sports Medicine and Nutrition, is an accelerated BS/MS graduate degree program accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) as a Future Education Model Graduate Degree Program (FG). The competency-based educational program that integrates experiential learning with didactic coursework affording graduates a strong foundation in medical nutrition therapy, public health nutrition and food service. Students may apply for a specialty rotation option that provides an immersive experience in a specialty practice area.

This accelerated program offers points of entry for:

- qualified undergraduates
- post-baccalaureate candidates
- graduates of Didactic Programs in Dietetics (DPD)

Undergraduate students will earn both Bachelor of Science and Master of Science degrees. Preparation for a career in dietetics as an RDN requires the following:

- completion of an ACEND accredited degree-granting program
- completion of an ACEND accredited supervised experiential learning meeting all required competencies*
- successful performance on the national Registration Examination for Dietitians**

No matter your professional goals in the Dietetics profession, this program offers an entry-level advanced degree option to provide a competitive edge for today's health care environment. Upon successful completion of the master's program graduates are eligible to take the national registration examination for Dietitians. Graduates passing the registration exam are eligible for licensure in Pennsylvania by the Board of Nursing. For licensing information please visit Instructions for Licensed Dietitian-Nutritionist (LDN) Applicants.

*This program provides supervised experiential learning required to become an RDN. The supervised experiential learning sites are randomly assigned and public transportation is not available to all sites. All students should anticipate the necessity of having access to their own transportation for Year 2 and Year 3 of the program. Please review the experiential learning information.

******The credentialing exam requirements are set by the Commission on Dietetic Registration (CDR).

For more information on becoming an RDN, visit www.eatright.org.

Program Requirements

Admission

There are three ways to enter the Dietitian Nutritionist Program. As an undergraduate, a post-baccalaureate, or as a graduate of a DPD. The application deadline for all entry points is March 1. Application review begins in January. Admission is for the fall term only. Applications can be submitted when course requirements are in progress.

Entry Point for Undergraduate Students to the Accelerated MS Program

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus, courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- General Chemistry 1 with lab, CHEM 0110
- General Chemistry 2 with lab, CHEM 0120
- Foundations of Biology 1, BIOSC 0150
- Foundations of Biology 2, BIOSC 0160
- Biology Lab, BIOSC 0057 or BIOSC 0058
- Organic Chemistry, CHEM 0350, or CHEM 0310 and CHEM 0320
- Biochemistry, BIOSC 1000*
- Introduction to Microbiology, BIOSC 1850
- College Algebra, MATH 0031 or higher math required. Exemption accepted.
- Statistics, STAT 0200 or STAT 1000
- Seminar in Composition, ENGCM 0200 or equivalent
- English Writing, any "W" or upper-level writing course
- Oral Communication, COMMRC 0520 preferred; COMMRC 0500, COMMRC 0510, and COMMRC 0530 are also accepted.
- Business, any Business or Economics course
- Social Science, any
- Psychology, PSY 0010
- Introduction to Nutrition, HRS 1006 or NUTR 1006*
- Introduction to Dietetics, NUTR 1600+
- Food and Culture, NUTR 1612+

*These courses need to have been completed within the past five years.

+These courses can be taken in the first year of the Dietitian Nutritionist Program.

Additional Requirements

- Minimum cumulative and prerequisite GPA of 3.0 (based on 4.0)
- Personal interview with nutrition faculty
- 61-63 credits are required to begin the program

Application Requirements

- Complete the application for admission. Please visit the SHRS website to access information about applying;
- A personal essay addressing the following:
 - What you have done to learn about the field of nutrition and dietetics (both the science and supervised experiential learning) in preparation for our dietitian nutritionist program (maximum word count: 200 words); and,
 - An accelerated nutrition and dietetics program is challenging and the application process will be very competitive. Please explain what academic and personal skills you have developed since starting college that will allow you to be successful in this professional degree program. What do you feel are the critical skills, practices, and attitudes that you must continue to work on as you proceed further in your academic studies? (max. word count: 500 words)

- Resume demonstrating evidence of adequate exposure to the field of dietetics and an appreciation of the breadth, depth, and scope of practice. This can be accomplished through either volunteer or paid work experience in a nutrition and dietetics related settings; there is no minimum number of hours required;
- Transcripts from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.

SHRS General Education Requirements are included in our upper-level program prerequisites and curriculum requirements.

Essential Standards

This information is provided to inform applicants of the non-academic technical performance and expectation standards required to complete the program successfully. Applicants should review the essential program standards to ensure that they are able to meet and maintain the standards program. The University fosters a culture of inclusiveness and is committed to providing an accessible environment for its faculty, staff and students. Please note, the Dietitian Nutritionist Program is committed to non-discrimination, including on the basis of disability. Individuals with disabilities are encouraged to apply and reasonable accommodations will be provided as appropriate. The following link provides detailed information on Essential Program Standards.

Please note that this program requires students to complete portions of their education (e.g., supervised experiential learning experiences) at facilities external to the University to meet requirements for graduation. Many of these external facilities require screening measures such as, but not limited to, criminal background check, child abuse clearance, health appraisal, fingerprint-based background check and/or drug test prior to placement at the facility. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, a conviction of a misdemeanor, felony, or felonious or illegal act abuse may prevent the student from becoming credentialed and/or licensed to practice in the field.

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, disability, or status as a disabled veteran or a veteran of the Vietnam era. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. For information on University equal opportunity and affirmative action programs and complaint/grievance procedures, contact the Office of Affirmative Action, 901 William Pitt Union, University of Pittsburgh, Pittsburgh, PA 15260, 412-648-7860/412-648-7860.

The Dietitian Nutritionist Program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) the accrediting agency for the Academy of Nutrition and Dietetics (A.N.D.), (ACEND@eatright.org), phone (1-800-877-1600 or 1-800-877-1600 x5400), or mail (120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995).

Program Mission, Goals and Objectives

The mission of the Dietitian Nutritionist Program is the development of graduates with the competence and advanced skills to practice effectively as entry-level RDNs to enhance the health and wellbeing of individuals and diverse populations. In addition, the vision is to lead among dietetics programs in advancing knowledge, skills, and evidence-based practice of RDNs.

The program goals are:

1. Development of graduates with the competence and advanced skills to practice effectively as entry-level Registered Dietitian Nutritionists (RDN).
2. To prepare entry-level graduates with advanced knowledge and skills that contribute to the evidence-informed practice of RDNs.

Program outcomes are available upon request.

Curriculum

Students entering as a junior will complete the program 156 credits.

First Year

Fall Term

- NUTR 1000 - INTRODUCTION TO RESEARCH

- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM
- NUTR 1622 - LIFE CYCLE NUTRITION
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1600 - INTRODUCTION TO DIETETICS (If not taken previously) Credits / Units: 16-18

Spring Term

- NUTR 1605 - PRINCIPLES OF NUTRITION EDUCATION
- NUTR 1604 - FOOD SERVICE MANAGEMENT WITH LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING OR NUTR 1612 - FOOD AND CULTURE (If not taken previously)
- NUTR 1610 - FOOD APPLICATION
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1625 - NUTRITION THERAPY

*Students must maintain a 3.0 minimum GPA to matriculate from Year 1 to Year 2 of the program.

Second Year

Didactic Program in Dietetics (DPD) graduates will enter the Dietitian Nutritionist Program here.

Fall Term

- HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN
- HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
- HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION
- HRS 2635 - PROFESSIONAL DEVELOPMENT
- Elective, 3 credits - Advisor approved

Spring Term

- HRS 2612 - ADVANCED MEDICAL NUTRITION THERAPY 2
- HRS 2625 - NUTRITION COUNSELING METHODS
- HRS 2646 - FUNCTIONAL NUTRITION
- HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS
- Elective, 3 credits - Advisor approved

Undergraduate students will receive a BS in Nutrition Science after successful completion of the Year 2.

Third Year

Fall Term

- HRS 2675 - PRACTICUM IN DIETETICS 1
- HRS 2676 - EXPERIENTIAL PRACTICE 1
- HRS 2658 - CAPSTONE PROJECT

Credits / Units: 15

Spring Term

- HRS 2659 - PRACTICUM IN DIETETICS 2
- HRS 2672 - EXPERIENTIAL PRACTICE 2
- HRS 2652 - EXPERIENTIAL PRACTICE 3
- HRS 2674 - CAPSTONE PROJECT

Credits / Units: 15

Major

Nutrition Science, BS

Nutrition Science is the study of how food and nutrients affect health. The program's focus on nutrition, health and disease, and the biological sciences makes the Nutrition Science program an ideal undergraduate degree for students who are planning to pursue health-related graduate programs such as medicine, physician assistant studies, dental medicine, physical therapy, sports science, occupational therapy, or public health. The program also provides a solid foundation for career opportunities in the food industry, nutrition science research, and nutrition policy.

This program does not meet the eligibility requirements for Registered Dietitian/Nutritionists (RDNs). For students desiring to become a Registered Dietitian/Nutritionist (RDN) please refer to the Dietitian Nutritionist program.

For more information, please contact:

Lori Cherok, PhD, RDN, LDN
Interim Program Director, Nutrition Science
School of Health and Rehabilitation Sciences
Department of Sports Medicine and Nutrition
6076 Forbes Tower
412-383-6566
E-mail: lcherok@pitt.edu

Admission Requirements:

SHRS has updated our General Education requirements. SHRS's General Education Requirements are included in our program prerequisites and curriculum requirements.

- A minimum cumulative GPA of 2.5 (based on 4.0)
- A minimum grade of C- in all courses designated as prerequisites taken at the University of Pittsburgh. A minimum grade of C or better is required for courses taken elsewhere.

Admission to the Nutrition Science program requires successful completion of a minimum of 60 credits including all prerequisite courses below.

Prerequisite Courses

Foundations of Biology 1	BIOSC 0150, 3 credits
Foundations of Biology 2	BIOSC 0160, 3 credits
Biology Lab	BIOSC 0057 or BIOSC 0058, 1 credit
General Chemistry 1 with Lab	CHEM 0110, 4 credits
General Chemistry 2 with Lab	CHEM 0120, 4 credits
Organic Chemistry 1*	CHEM 0310, 3 credits

Organic Chemistry 2*	CHEM 0320, 3 credits
Introduction to Human Nutrition	NUTR 1006 or HRS 1006, 3 credits
English Composition**	ENGCOMP 0200, 3 credits
Oral Communication**	COMMRC 0520 preferred; COMMRC 0500, COMMRC 0510 and COMMRC 0530 are also accepted, 3 credits
Algebra or Higher Math**	MATH 0031 or higher, 3 credits
Statistics**	STAT 0200 or STAT 1000, 4 credits
Literature/Arts/Creative Work/Philosophical Thinking**	1 course from the categories listed
Social Sciences**	1 course, see DSAS Catalog

*CHEM 0350: Principles of Organic Chemistry, taught at the University of Pittsburgh Main Campus, may be taken in place of Organic Chemistry 1 and 2; however, students should first investigate organic chemistry requirements of graduate programs specific to their professional goals.

**SHRS General Education Requirement

The following SHRS General Education Requirements can be taken within the program:

- Writing Intensive course, 3 credits - ENGCOMP 0400, ENGCOMP 0450, ENGCOMP 0530, or ENGCOMP 0535 are recommended
- Diversity, 1 course - NUTR 1612 - FOOD AND CULTURE, *taken within the Nutrition Science program, will meet this requirement*
- Global Awareness and Cultural Understanding, 1 course - NUTR 1612 - FOOD AND CULTURE, *taken within the Nutrition Science program, will meet this requirement*

Note: Students who complete all program prerequisites and curriculum courses will meet the SHRS General Education requirements.

Application Procedures:

The deadline for submission of an application for admission consideration is March 1st annually.

Pitt Students (including regional campuses)

SHRS is moving to a new application platform. Please visit the SHRS website to access information about applying to enter our programs.

Transfer Student Information:

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Nutrition Science as their intended field of study. International transfer students click [here](#). Transfer student must also provide application materials directly to SHRS.

All applicants must:

- Submit a personal essay discussing why you are interested in the Nutrition Science program, your professional goals including how and when you became interested in that field, as well as any work or volunteer experience you have that will demonstrate your awareness of the field. Also include other areas of interest, extra-curricular activities and leadership experiences.
- Resumes are strongly recommended.
- Transcript from all institutions attended. Pitt students do not have to provide transcripts they have already submitted to Pitt.

- Application may be submitted while course requirements are in progress.

Please note that admission is competitive. Meeting the minimum admission criteria does not guarantee admission.

Curriculum:

The BS degree in Nutrition Science requires the completion of a minimum of 120 credits which includes 60 credits prior to admission and 60 credits of required courses taken within the program. The usual time required to complete the program after admission to the junior year is two years. The program curriculum is as follows:

Junior Year - Fall Term

- BIOSC 1000 - BIOCHEMISTRY
- REHSCI 1205 - HUMAN PHYSIOLOGY
- NUTR 1000 - INTRODUCTION TO RESEARCH
- NUTR 1602 - NUTRITION ASSESSMENT
- NUTR 1620 - NUTRIENT METABOLISM

Credits: 16

Junior Year - Spring Term

- NUTR 1610 - FOOD APPLICATION
- REHSCI 1235 - MEDICAL TERMINOLOGY
- or
- NUTR 1613 - FOOD APPLICATION LAB
- NUTR 1614 - NUTRITION CRITICAL THINKING
- NUTR 1625 - NUTRITION THERAPY
- ELECTIVES, 3 credits

Credits: 14

Senior Year - Fall Term

- BIOSC 0350 - GENETICS
- BIOSC 1850 - MICROBIOLOGY
- NUTR 1622 - LIFE CYCLE NUTRITION
- NUTR 1626 - PUBLIC HEALTH NUTRITION
- ELECTIVES, 3 credits

Credits: 15

Senior Year - Spring Term

- NUTR 1612 - FOOD AND CULTURE
- REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
- Writing Intensive Course, 3 credits - ENGCOMP 0400, ENGCOMP 0450, ENGCOMP 0530, or ENGCOMP 0535 are recommended.
- ELECTIVES, 5 credits

Credits: 15

Total Program Credits: 60

Total Degree Credits: 120

Department of Communication Science and Disorders (CSD)

The Department of Communication Science and Disorders offers an undergraduate major in Communication Science. The degree program focuses on the anatomical, physiological, and psychological foundations of communication, as well as the basic structure of language and the process of speech and language development. The degree program is designed to develop critical thinking skills including the ability to evaluate scientific information. Additionally, students are exposed to evidence-based practices, introductory research and clinical methods, discussions surrounding issues of equity, justice and inclusion, and the importance of interprofessional collaboration. With a bachelor's degree in Communication Science, graduates will have a collection of transferable skills that can be applied to a graduate program or taken directly into the workplace.

This major is particularly appropriate for students considering graduate study and a career in Speech-Language Pathology [SLP] or Audiology [AuD]. (A graduate degree is required for clinical practice in both professions.) Speech-Language Pathology and Audiology are among the most attractive and diverse healthcare and educational professions available. Projections from the U.S. Bureau of Labor and Statistics indicate job growth in both Speech-Language Pathology and Audiology. The future of the job market is healthy due to increasing public awareness of the need for early diagnosis and intervention for communication disorders. Other factors impacting employment include increased awareness of the educational, social, and vocational benefits of programs for communication disorders and an aging population. The need for speech, language, and hearing scientists is also great; there are many research and academic opportunities for those interested in research including careers in higher education.

The degree program in Communication Science is also excellent preparation for professional or graduate programs in education-related fields (i.e., education of the deaf and hard of hearing, early-childhood, special education) or health-related professions (i.e., rehabilitation counseling, occupational therapy, physical therapy). The necessary prerequisites for these programs can be taken while completing the Communication Science degree.

Interested students should contact the Director of Undergraduate Education in Communication Science Professor Ali Lewandowski at ael89@pitt.edu.

Admission Requirements

Students are eligible for admission to the Communication Science degree program after successful completion of 60 credits*. [Note: Applications will be reviewed when approximately 45 credits are completed and 15 credits are in progress.] For admission, an application with all transcripts from universities/colleges attended and responses to question prompts is required. Resumes are strongly suggested. A letter of recommendation is NOT required. A minimum grade point average (GPA) of 2.75 is required.

Prior to applying, students are encouraged to contact the Director of Undergraduate Education in Communication Science, Professor Ali Lewandowski at ael89@pitt.edu. (Specialized advising is available to students at the first-year and/or sophomore year level.) Students should complete the Prerequisites prior to admission. They should also focus on completing much of the Additional Requirement Coursework prior to admission. [Note: Some of these courses may be completed while enrolled in the program.]

**Students who will have completed a minimum of 54 credits may be eligible.*

University of Pittsburgh Guaranteed Admissions Program

An entering first-year student may qualify for a guarantee into the graduate programs in Audiology or Speech-Language Pathology. For consideration for the Guaranteed Admissions Program, indicate an intended field of study as Pre- Communication Science on your application when applying as a first-year student (at regional campuses, choose corresponding codes).

At the time of application to the graduate program, guaranteed students must have a cumulative GPA of 3.6 or better and a GPA of 3.75 in the core communication science major courses. A full application must be submitted on time.

Early Decision for Graduate Programs

Students pursuing an undergraduate degree in Communication Science from the University of Pittsburgh are eligible to apply Early Decision to either the graduate program in Audiology or Speech-Language Pathology. Information about the application process and applicant qualifications are available in the CSD Advising Office and from the Communication Science Program Director.

Major

Communication Science, BA

The Department of Communication Science and Disorders offers an undergraduate major in Communication Science. The degree program focuses on the anatomical, physiological, and psychological foundations of communication, as well as the basic structure of language and the process of speech and language development. The degree program is designed to develop critical thinking skills, including the ability to evaluate scientific information. Additionally, students are exposed to evidence-based practices, introductory research and clinical methods, discussions surrounding issues of equity, justice and inclusion, and the importance of interprofessional collaboration. With a bachelor's degree in Communication Science, graduates will have a collection of transferable skills that can be applied to a graduate program or taken directly into the workplace.

Interested students should contact the Director of Undergraduate Education in Communication Science Professor Ali Lewandowski at ael89@pitt.edu.

Admission Requirements

Requirements for students who entered the University of Pittsburgh as first-year students in or prior to Fall 2022 applying for Fall 2023 or Fall 2024 admission:

Applicants must complete the Prerequisite courses and 6 credits of coursework from the Additional Requirements listed below.

Requirements for students entering the University of Pittsburgh in Fall 2022 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-level programs offered at SHRS in Fall 2024:

Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted; with the exception of AP/IB credits and/or exemptions awarded by the University of Pittsburgh. Courses listed below are offered at the Pittsburgh Campus; courses taken at the regional Pitt campuses or external institutions must be evaluated as equivalent to satisfy these requirements.

- Seminar in Composition*, 1 course
- Writing Intensive, 1 course: ENGCOMP 0400, 0450, 0530 or 0535
- Oral Communication, 1 course: COMMRC 0520 preferred; 0310, 0500, 0510, 0530 acceptable.

- College Math, 1 course: MATH 0031 or higher math required. Exemption not accepted **
- Statistics, 1 course: STAT 0200 or STAT 1000 required
- Introduction to Psychology, PSY 0010
- Biological Science, 1 course: Human Biology (BIOSC 0150, 0805, 0815) or any Human Anatomy & Physiology course
- Physical Science, 1 course: Physics (PHYS 0091 or PHYS 0110) OR Chemistry (CHEM 0110 or higher)
- Other Course Requirements (to be met before graduation)
 - Social Science* OR Quantitative and Formal Reasoning*, 1 course
 - Diversity*, 1 course.
 - Philosophical Thinking or Ethics*, 1 course
 - Literature*, 1 ENGLIT course
 - Lifespan/Human Development, 1 course: HHD 0005, REHSCI 1245, or PSY 0310
 - Cognitive/Neurological Foundations, 1 course: PSY 0405, 0410, 0422, 0505, 0510; or NROSCI 0080, 0081, 1000
 - Cross-Cultural Awareness*, Global Issues*, or Specific Geographic Region*, 1 course from any of these three categories. May also be satisfied through Study Abroad.

*See the DSAS Catalog

**At least 6 semester hour credits in college level mathematics are required to obtain certification through the Pennsylvania Department of Education (i.e., any school-based professional in Pennsylvania).

Additional Requirements

- Complete the application for admission. Please visit the SHRS website to access information about applying.
- Minimum cumulative GPA of 2.75 (based on 4.0) is required for admission. Students with a lower GPA may be admitted provisionally. 60 credits are required to begin the program. (students with a minimum of 54 credits may be eligible)
- Application Deadline: March 15th. Application review begins in January. If spots are available after the deadline applications will be considered on a rolling basis until the class is full. Applications may be submitted while prerequisite coursework is in progress.

The application includes the following elements:

- Responses to question prompts
- Resume
- Applicants enrolled at the University of Pittsburgh are not required to submit a letter of recommendation
- Transcripts from all institutions attended; Pitt students do not need to provide transcripts if they have already been submitted to the University of Pittsburgh

University of Pittsburgh First-Year Guarantee

An entering first-year student may qualify for a guarantee into the graduate programs in Audiology or Speech-Language Pathology. For consideration for the Guaranteed Admissions Program, indicate intended field of study as "Communication Science" on your application when applying as a first-year student (at regional campuses, choose corresponding codes).

At the time of application to the graduate program, guaranteed students must have a cumulative GPA of 3.6 or better and a GPA of 3.75 in the core communication science major courses. A full application must be submitted on time.

Early Decision for Graduate Programs

Students pursuing an undergraduate degree in Communication Science from the University of Pittsburgh are eligible to apply Early Decision to either the graduate program in Audiology or Speech-Language Pathology. Early Decision applications should only be submitted when the University of Pittsburgh graduate program is a student's top choice, AND the student does not intend to apply to any other graduate programs. Information about the application process and applicant qualifications are available from the Communication Science Program Director or the Academic Advisor of the Communication Science Program.

Communication Science Curriculum

SHRS requires a minimum of 120 credits for graduation.

First-years and sophomores who are interested in the major should contact the Communication Science advisor, Dave Bodnar at dab308@pitt.edu for specialized advising about the major.

Core Curriculum Requirements (47 credits)

Most of the core courses in Communication Science degree program are taken after admission at the junior year level. Four of the core courses are available at the first-year and sophomore year level or can be completed as part of the Communication Science degree program at the junior year level. Several core courses have prerequisites resulting in a sequence of courses. The course sequence is represented in the example Plan of Study. Interested students should be aware that the core courses or sequence of courses may change.

Core Courses Available to First Year and Sophomore Students

The following courses are available to students at the first-year and sophomore year level including students not formally in the Communication Science major.

Open to students of all levels:

- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY

Open to sophomores and higher:

- CSD 1020 - NATURE OF LANGUAGE OR LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY
- CSD 1020 - NATURE OF LANGUAGE OR LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Plan of Study

This plan of study identifies the sequence of core courses offered in the Communication Science degree program. A course schedule for each semester may also include any remaining Prerequisites Requirements or Additional Requirements, minor or certificate courses, or other elective courses. Students are required to have an individual advising appointment with the Communication Science Academic Advisor every semester prior to registering for classes for the upcoming term.

Junior Fall

If not already completed -

- CSD 1020 - NATURE OF LANGUAGE
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1111 - AURAL REHABILITATION You must have completed CSD 1232 with a C- or better to enroll in this course.

Core Courses Fall Junior Year

- CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH
- CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH
- CSD 1233 - INTRODUCTION TO RESEARCH

If not already completed -

- CSD 1020 - NATURE OF LANGUAGE or LING 1000 - INTRODUCTION TO LINGUISTICS
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- If CSD 1232 Intro to Audiology already taken:
- CSD 1111 - AURAL REHABILITATION

Core Courses Fall Junior Year

- CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH
- CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH
- CSD 1233 - INTRODUCTION TO RESEARCH

Junior Spring

If not already completed -

- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY
- CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Core Courses Spring Junior Year

- CSD 1021 - LANGUAGE DEVELOPMENT
- CSD 1026 - SPEECH SCIENCE You must complete CSD 1023 with a C- or better to enroll in this course.
- CSD 1030 - LAB IN SPEECH SCIENCE
If not already completed -
- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY
- CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Core Courses Spring Junior Year

- CSD 1021 - LANGUAGE DEVELOPMENT
- CSD 1026 - SPEECH SCIENCE
- CSD 1030 - LAB IN SPEECH SCIENCE

Senior Fall

If not already completed -

- CSD 1111 - AURAL REHABILITATION You must complete CSD 1232 with a C- or better to enroll in this course.

Core Courses Fall Senior Year

- CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING
- CSD 1029 - LAB IN ANAT/PHYSIOLOGY OF HEARING
- CSD 1022 - TRANSCRIPTION PHONETICS

Core Courses Fall Senior Year

(required if not yet taken)

- CSD 1111 - AURAL REHABILITATION
- CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING
- CSD 1029 - LAB IN ANAT/PHYSIOLOGY OF HEARING
- CSD 1022 - TRANSCRIPTION PHONETICS

Optional Course

- CSD 1031 - GUIDED CLINICAL OBSERVATION

Senior Spring

Core Courses Spring Senior Year

- CSD 1025 - HEARING SCIENCE You must complete CSD 1024 with a C- or better to enroll in this course.
- CSD 1028 - LAB IN HEARING SCIENCE
- CSD 1235 - CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
- CSD 1234 - WRITING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
- CSD 1237 - INTRO TO NEUROSCIENCE OF COMMUNICATION

Optional Course

- CSD 1031 - GUIDED CLINICAL OBSERVATION
Core Courses Spring Senior Year
- CSD 1025 - HEARING SCIENCE
- CSD 1028 - LAB IN HEARING SCIENCE
- CSD 1235 - CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
- CSD 1234 - WRITTING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS
- CSD 1237 - INTRO TO NEUROSCIENCE OF COMMUNICATION
- **Optional Course**
- CSD 1031 - GUIDED CLINICAL OBSERVATION

Related Area / Minors and Certificates / Directed or Independent Studies

No additional related area is required for this undergraduate degree.

Many students are able to complete certificate programs or minors in addition to the major requirements in *Communication Science*. In recent years, students have attained certificates in Conceptual Foundations of Medicine, Latin American studies, American Sign Language, and Children's Literature and minors in Education, Neuroscience, Linguistics, Social Work and Sociology, among others. These are only a few of the many certificate programs and minors available at the University of Pittsburgh.

In some locations, employment within an educational setting requires additional courses for certification. Students considering work in educational settings should consider enrolling in education courses (i.e., IL 1257 - TEACHING ENGLISH LANGUAGE LEARNERS) as electives. Students can consult with the CSD Advising Office for more information.

Students should consult with Dave Bodnar (dab308@pitt.edu) or the Director of the Communication Science Program, Professor Ali Lewandowski (ael89@pitt.edu) about the possibility of pursuing a directed or independent study with a member of the faculty, as a formal approval process is required. Opportunities are also available for students at all levels to volunteer in a research lab with a Communication Science and Disorders faculty member.

Courses

- CSD 1020 - NATURE OF LANGUAGE
- CSD 1021 - LANGUAGE DEVELOPMENT
- CSD 1022 - TRANSCRIPTION PHONETICS
- CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH
- CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING
- CSD 1025 - HEARING SCIENCE
- CSD 1026 - SPEECH SCIENCE
- CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH
- CSD 1028 - LAB IN HEARING SCIENCE
- CSD 1029 - LAB IN ANAT/PHYSIOLOGY OF HEARING
- CSD 1030 - LAB IN SPEECH SCIENCE
- CSD 1101 - INTRO TO CLINICAL PROCESSES
- CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY
- CSD 1232 - INTRODUCTION TO AUDIOLOGY
- CSD 1233 - INTRODUCTION TO RESEARCH
- CSD 1234 - WRITTING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS

Total Credits: 92

Department of Community Health Services and Rehabilitation Science

Certificate

Assistive Technology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Assistive Technology in Rehabilitation Certificate provides a focused area of study for students interested in careers providing technology to individuals with disabilities. It will prepare students for graduate programs such as prosthetics and orthotics or rehabilitation technology. It will also provide the course work and some of the clinical hours needed to satisfy the requirements for the RESNA (Rehabilitation Engineering and Assistive Technology Society of North America) Assistive Technology Supplier certification.

Requirements

Course requirements are as follows:

- REHSCI 1200 - HUMAN ANATOMY and
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY *
- Or other approved Human Physiology course(s), 4 credits
- HRS 1787 - INTRODUCTION TO ORTHOTICS AND PROSTHETICS
- RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
- RT 1102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- REHSCI 1210 - NEUROSCIENCE or
- NROSCI 0080 - BRAIN AND BEHAVIOR or
- NROSCI 0083 - UHC BRAIN AND BEHAVIOR or
- NROSCI 1000 - INTRO TO NEUROSCIENCE or
- NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE or
- PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS and
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
- REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
- HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY / PUBHLT 0330 or
- HRS 1515 - REHABILITATION PSYCHOLOGY or
- PSY 0515 - REHABILITATION PSYCHOLOGY or
- TLL 1580 - FOUNDATIONS OF SPECIAL EDUC or
- TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES or
- HHD 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY
- TLL 1505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
- TLL 1509 - APPLIED BEHAVIOR ANALYSIS AND POSITIVE BEHAVIOR SUPPORT
- REHSCI 1296 - ASSISTIVE TECHNOLOGY IN REHABILITATION FIELD EXPERIENCE or
- RT 1207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN
- and
- REHSCI 1296 ASSISTIVE TECHNOLOGY IN REHABILITATION FIELD EXPERIENCE (2 credits)

Total Certificate Credits: 32-33

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.

Pathokinesiology in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Pathokinesiology in Rehabilitation Certificate provides the student with an excellent background in the sciences related to normal and pathological motion. It complements coursework offered in graduate programs such as physical therapy, occupational therapy, physician assistant studies, exercise science, kinesiology, and sports medicine. With minimal additional coursework (nutrition and fitness instruction), it also prepares students to take examinations for certification as a personal trainer or fitness expert, such as the Certified Strength and Conditioning Specialist (CSCS®) offered by the National Strength and Conditioning Association.

Requirements

Course requirements are as follows:

- REHSCI 1200 - HUMAN ANATOMY and
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1205 - HUMAN PHYSIOLOGY *
- *Or other approved Human Physiology courses(s), 4 credits
- REHSCI 1210 - NEUROSCIENCE
- REHSCI 1215 - EXERCISE PHYSIOLOGY and
- REHSCI 1216 - EXERCISE PHYSIOLOGY LAB
- REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS and
- REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB
- REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
- REHSCI 1285 - INTRO TO EVIDENCED-BASED REHAB

Total Certificate Credits: 25

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.

Psycho-Social Issues in Rehabilitation Certificate

Undergraduate Rehabilitation Science Certificates

The Undergraduate Program in Rehabilitation Science offers undergraduate certificates for students planning to continue their education in rehabilitation science programs or those seeking a concentration of courses in a particular rehabilitation science area. These certificates are designed to best prepare students for rehabilitation-related graduate programs; however, the certificates are not a requirement for application.

Completion of the Psycho-Social Issues in Rehabilitation Certificate provides the student with a background in the psychological and social issues involved in disability, rehabilitation, and personal care. It helps prepare students for graduate programs in areas such as occupational therapy, physician assistant studies, rehabilitation counseling, accelerated or direct entry nursing programs, or disability studies.

Requirements

Course requirements are as follows:

- REHSCI 1200 - HUMAN ANATOMY and
 - REHSCI 1201 - HUMAN ANATOMY LAB
 - REHSCI 1205 - HUMAN PHYSIOLOGY *
- *Or other approved Human Physiology course(s), 4 credits
- REHSCI 1210 - NEUROSCIENCE or
 - NROSCI 0080 - BRAIN AND BEHAVIOR or
 - NROSCI 0083 - UHC BRAIN AND BEHAVIOR or
 - NROSCI 1000 - INTRO TO NEUROSCIENCE or
 - NROSCI 1003 - UHC INTRODUCTION TO NEUROSCIENCE or
 - PSY 0505 - INTRODUCTION TO BIOPSYCHOLOGY
 - REHSCI 1230 - REHABILITATION ETHICS
 - REHSCI 1250 - PATHOPHYSIOLOGY/HUMAN DISEASE
 - REHSCI 1275 - INTRO TO OCCUPATION SCIENCE
 - RT 1101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS
 - REHSCI 1290 - PRACTICAL ISSUES IN DISABILITY or
 - HRS 1515 - REHABILITATION PSYCHOLOGY or
 - PSY 0515 - REHABILITATION PSYCHOLOGY or
 - HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY /PUBHLT 0330
 - TLL 1580 - FOUNDATIONS OF SPECIAL EDUC or
 - TLL 1560 - EARLY EDUCATION OF YOUNG CHILDREN WITH DISABILITIES or
 - HHD 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY
 - TLL 1505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS
 - TLL 1509 - APPLIED BEHAVIOR ANALYSIS AND POSITIVE BEHAVIOR SUPPORT

Total Certificate Credits: 26-27

*Beginning Fall 2022, REHSCI 1205 & 1206, or other approved course(s), will be required.

Major

Emergency Medicine, BS

The Bachelor of Science in Emergency Medicine Program (EM) is an upper-division program housed in the School of Health and Rehabilitation Sciences. The program is designed to provide the essential advanced clinical and leadership skills necessary for positions in the out-of-hospital profession. Additionally, this program is ideal for students interested in attending medical school, physician assistant programs, nursing school, or other graduate education in the health professions.

Students enter the EM Program after earning 60 prerequisite and general education credits and are afforded the opportunity to develop clinical skills during the junior year at facilities external to the University. These clinical and field sites require a criminal background check, child abuse clearance, and FBI fingerprint clearance (Act 33/34/73), physical examination, immunization verification, and a drug screen to verify eligibility to participate in clinical education. The cost of these requirements, as well as required classroom and clinical uniforms, are not included as part of the program fee, tuition, or other school/program-sponsored charges. A non-refundable program fee of \$1,500, covering the fall and spring terms of the junior year, will appear on the fall tuition invoice. Student tuition rates for the School of Health and Rehabilitation Sciences can be found at [Financial Information | University of Pittsburgh School of Health and Rehabilitation Sciences](#). Students are required to maintain health insurance throughout the entire clinical year and it is strongly recommended for the senior year. Following successful completion of the junior year, students are eligible to take the National Registry of EMTs Paramedic examination (NREMT) to become certified paramedics.

Currently certified paramedics or US SOCOM Advanced Tactical Paramedics may enter the EM program as Emergency Medicine Degree Completion students (Senior Transfers), provided they have earned 51 prerequisite and general education credits. These students must complete 30 core credits within the University of Pittsburgh School of Health and Rehabilitation Sciences to earn an undergraduate degree. EM Degree Completion is offered in two formats: traditional in-person or asynchronous online.

For more information, please contact the program at 412-647-4547.

Admission Requirements

Students must complete prerequisite courses and general education requirements before graduating. Our general education requirements are included in our upper-level program prerequisites and curriculum requirements.

Prerequisite Courses

- Writing/Communication - 3 courses
 - 1 Composition course - Seminar in Composition*
 - 1 Writing-intensive course - ENGCOMP 400/450/ 530/535 recommended*
 - 1 Oral Communication course^
- Algebra & Quantitative Reasoning - 2 courses
 - 1 Algebra course
 - 1 Statistics course - STAT 0200/1000 required
- Diversity - 1 course
 - 1 Diversity course
- Humanities and Arts, Social Sciences, Natural Sciences - 3 courses
 - 1 Course from any of these categories (Literature/Arts/Creative Work/Philosophical Thinking)
 - 1 Social Sciences course
 - 1 Natural Sciences course
- Global Awareness and Cultural Understanding - 1 course
 - 1 Course from any of these categories (Global Issues/Specific Geographic Region/Cross-Cultural Awareness) - See [DSAS Catalog](#)
- EM 1102 - EMT Basic+

^ Accepted Oral Communications Courses: COMMRC 0520 preferred; 0500, 0510, 0530 acceptable

* Accepted Written Communication Courses: ENGCOMP 0200 or higher or any intensive writing (W) course.

+ Verification of current Pennsylvania or National Registry EMT certification must be provided. If a non-credit course was taken for this certification, 4 credits may be granted through credit-by-course examination. Junior-year students without Pennsylvania EMT certification will be required to apply for and receive reciprocity from the Pennsylvania Department of Health.

Other Admission Criteria:

All students must have a minimum cumulative GPA of 2.5 (based on 4.0)

- A minimum grade of C- or better is required for EM prerequisite courses and a grade of D or better for additional coursework taken at Pitt.
- A minimum grade of C or better is required for all transfer credits (courses taken outside of Pitt).

Required credits for admission for Juniors: 60 (Applications may be submitted while prerequisite coursework is in progress.)

For Emergency Medicine Degree Completion students (Senior Transfers), proof of current paramedic certification or US SOCOM Advanced Tactical Paramedic must be provided to receive the advanced standing of 39 credits (this includes four credits of EMT). The awarding of 39 advanced standing credits limits the transfer of college credits to no more than 51 credits (including the required prerequisites and general education courses). College classes taken as requirements for obtaining paramedic certification may not be utilized toward the 51 credits.

Application Procedures:

Applications are due March 15 and interviews will begin in January for all applicants. Applications received after the deadline will be reviewed based on available space. All applicants are encouraged to apply early, as admission is competitive and limited seats are available.

- Complete the application for admission

- Submit a one- to two-page personal essay discussing how you became interested in the field, any work or volunteer experience you have that demonstrates your awareness of the field, and your long-term professional goals. Also include other areas of interest, extracurricular activities, and leadership experiences;
- Submit one letter of recommendation: college instructor or supervisor preferred;
- Transcripts from all colleges/universities attended are required prior to review. Pitt students do NOT need to supply their Pitt transcript. However, if you have earned college credit from any other schools, we will require those transcripts. If you are a student in the Dietrich School of Arts and Sciences, we should have access to the transcripts for any non-Pitt coursework that already appears on your Pitt transcript as Transfer Credit. If you have non-Pitt coursework that does not already appear on your Pitt transcript, you must send us an official transcript. Otherwise, we will contact you if any transcripts are required;
- Have a personal interview with the Emergency Medicine faculty.

Apply online at: [Apply | University of Pittsburgh School of Health and Rehabilitation Sciences](#)

Selection Criteria/Process:

Admissions decisions are based on an assessment of the applicant's overall academic record and application, the letter of recommendation, personal statement and interview.

Applications are reviewed by the Admissions Committee. Applicants who meet the program minimum requirements are granted an interview. Upon completion of the interviews, the admissions committee meets to review the data on all interviewed applicants and admission decisions (admitted, waitlisted, or rejected) are made. The Director of Admissions notifies the selected applicants.

Applications may be submitted while course requirements are in progress.

Meeting the minimum admission criteria does not guarantee admission to the program.

Recognizing that students will be entering the program with varying levels of education and experience, students are admitted into the program at the appropriate level based on the student's career and academic experiences. Current certified paramedics will be awarded 39 credits of advanced standing.

EM Degree Completion student (Senior Transfers) applications are accepted on a rolling basis. The EM Program is a Fall admit program only.

Emergency Medicine Program

The EM Program junior year curricula consists of required courses that are offered only once during the academic year. Any deviation from completing the courses in the planned sequence will result in the delay of progressing through the curriculum and the year of graduation.

SHRS requires a minimum of 120 credits to graduate, 30 of which must be completed through the School. During the senior year, six (6) credits are required for each term. Elective credits must be approved by your advisor and the Program.

Fall Term - Junior Year

The EM Program junior year curricula consists of required courses which are offered only once during the academic year. Any deviation from completing the courses in the planned sequence will result in the delay of progressing through the curriculum and the year of graduation.

- EM 1111 - FOUNDATIONS OF EMERGENCY CARE
- EM 1112 - PATHOPHYSIOLOGY
- EM 1114 - MEDICATION ADMINISTRATION LAB (LAB)
- EM 1115 - INTRODUCTION TO PHYSICAL ASSESSMENT
- EM 1116 - PHYSICAL EXAM LAB
- EM 1122 - CARDIOLOGY AND RESPIRATORY
- EM 1131 - CLINICAL 1

Spring Term - Junior Year

- EM 1113 - PHARMACOLOGY

- EM 1117 - EMS OPERATIONS
- EM 1123 - CARDIOLOGY LAB
- EM 1124 - ADULT MEDICAL EMERGENCIES
- EM 1125 - OB/GYN, NEWBORN, AND PEDIATRIC CARE
- EM 1126 - ASSESSMENT-BASED MANAGEMENT LAB (LAB)
- EM 1132 - CLINICAL 2

Fall Term - Senior Year

- EM 1155 - LEGAL ISSUES IN HEALTH CARE
 - EM 1166 - SENIOR INTERNSHIP
 - EM 1170 - CRITICAL CARE MEDICINE 1
- SENIOR YEAR ELECTIVES - 6 credits

Spring Term - Senior Year

- EM 1160 - PROFESSIONAL ISSUES
 - EM 1171 - CRITICAL CARE MEDICINE 2
- SENIOR YEAR ELECTIVES - 6 credits

EM Degree Completion (Senior Transfers)

Applicants who have completed the 51 college credits including prerequisite and general education courses and are currently certified as paramedics (by a state EMS agency or the National Registry of EMTs or US SOCOM Advanced Tactical Paramedics), may be awarded advanced standing and admitted into the Program as an Emergency Medicine Degree Completion student (Senior Transfer). During the senior year, these students will be required to complete 30 core credits within the School of Health and Rehabilitation Sciences to be eligible for graduation. These students have the option of attending in a traditional in-person format or an online asynchronous format.

EM Degree Completion: In-Person Format

Fall Term

- EM 1155 - LEGAL ISSUES IN HEALTH CARE
 - EM 1166 - SENIOR INTERNSHIP
 - EM 1170 - CRITICAL CARE MEDICINE 1
- SENIOR YEAR ELECTIVES - 9 credits*

Spring Term

- EM 1160 - PROFESSIONAL ISSUES
 - EM 1171 - CRITICAL CARE MEDICINE 2
- SENIOR YEAR ELECTIVES - 9 credits*

In-Person Format - Elective Courses

Electives outside of the EM program shall be reviewed by your advisor and approved by the Program.

- EM 1135 - CRITICAL CARE CLINICAL EXPERIENCE I
- EM 1152 - ISSUES IN HEALTH CARE

- EM 1153 - ISSUES IN HEALTH CARE EDUCATION
- EM 1154 - HEALTH CARE RESEARCH
- EM 1158 - FINANCE AND ACCOUNTING FOR HEALTH CARE
- EM 1164 - EMS SPECIAL RESPONSE SITUATIONS
- EM 1168 - LEADERSHIP IN HEALTH CARE
- EM 1177 - SENIOR SEMINAR
- EM 1180 - HEALTH CARE MANAGEMENT
- EM 1185 - BEYOND THE BODY - WEB
- EM 1186 - CERTIFIED AMBULANCE CODER - WEB
- EM 1187 - ORGANIZATIONAL THEORY - WEB
- EM 1199 - INDEPENDENT STUDY
- EM 1250 - INTRODUCTION TO COMMUNITY HEALTH
- EM 1251 - MOBILE INTEGRATED HEALTH CARE
- EM 1260 - COGNITIVE PSYCHOLOGY OF DECISION MAKING - WEB
- NUR 0012 - HUMAN ANATOMY AND PHYSIOLOGY 1 with Lab NUR 0002 Credits / Units: 4 *
- NUR 0013 - HUMAN ANATOMY AND PHYSIOLOGY 2 with Lab NUR 0003 Credits / Units: 4 *
- REHSCI 1200 - HUMAN ANATOMY with Lab REHSCI 1201 Credits / Units: 4
- REHSCI 1205 - HUMAN PHYSIOLOGY with Lab Credits / Units: 4

*Nursing Anatomy and Physiology courses are not available to Senior Transfer Student

EM Degree Completion: Online Format

Fall Term

- EM 1172 - ISSUES IN HEALTH CARE - WEB
- EM 1173 - ISSUES IN HEALTH CARE EDUCATION - WEB
- EM 1174 - HEALTH CARE RESEARCH - WEB
- EM 1175 - LEGAL ISSUES IN HEALTH CARE - WEB
- EM 1183 - FINANCE AND ACCOUNTING FOR HEALTH CARE - WEB
- EM 1185 - BEYOND THE BODY - WEB

- EM 1179 - HEALTH CARE MANAGEMENT - WEB
- EM 1181 - PROFESSIONAL ISSUES - WEB
- EM 1182 - CRITICAL CARE MANAGEMENT - WEB
- EM 1184 - SENIOR SEMINAR - WEB
- EM 1271 - MOBILE INTEGRATED HEALTH CARE - WEB

Rehabilitation Science, BS

The Bachelor of Science Program in Rehabilitation Science (BSRS) offers a dynamic curriculum designed to prepare students for graduate education in occupational therapy, physical therapy, physician assistant studies, medicine, prosthetics and orthotics, rehabilitation counseling and assistive technology, and other health care professions. The program has core curriculum requirements designed with enough flexibility to permit students to pursue a personalized education to achieve their educational goals. Students are encouraged to explore other areas of academic inquiry through elective courses, minors and certificates throughout the University and abroad; to participate in clinical experiences; to involve themselves in undergraduate research; and to develop their leadership skills through participation in student organizations and community service.

Faculty who teach in the BSRS program constitute a strong interdisciplinary group of individuals from the School of Health and Rehabilitation Sciences including representation from the departments of Emergency Medicine, Occupational Therapy, Physical Therapy, Physician Assistant Studies, and Rehabilitation Science and Technology. In addition, instructors from other Schools of the Health Sciences teach within the program along with community leaders, clinicians and researchers with experience in selected areas.

Contact Information:

Natalie Belin
Program Administrator
Undergraduate Program in Rehabilitation Science
Suite 6065, Forbes Tower
412-624-3112
undergradrehabsience@shrs.pitt.edu

Admission Requirements

Students are eligible for admission to the Rehabilitation Science Program after successful completion of approximately 60 college credits including the following prerequisite courses, other admission criteria and an application.

- Minimum cumulative GPA of 2.75 (based on 4.0).
- Prerequisite science and math GPA of 2.5 (based on 4.0).
 - *The science and math GPA is calculated using scores from any course taken in the departments of Biology, Chemistry, Physics, and Math including higher level classes. Repeated classes are averaged.*
- 60 credits are required to begin the program.
- Prerequisites must be completed for a letter grade, minimum grade of C- (C for transfer) unless otherwise noted.
- Applications may be submitted while prerequisite coursework is in progress.

Meeting the minimum admission criteria does not guarantee admission.

General Education Requirements/Prerequisites

Requirements for students entering the University of Pittsburgh in Fall 2021 as first-year students, and students currently enrolled at the University of Pittsburgh and external transfer students entering the upper-division programs offered at SHRS in Fall 2023:

- General Biology (BIOSC 0150 or BIOSC 0715) and Lab (BIOSC 0050 or BIOSC 0057 or BIOSC 0058) - 4 Credits
- General Chemistry and Lab (CHEM 0110 or CHEM 0710) - 4 Credits
- Physics 1 (PHYS 0110 or PHYS 0174 or PHYS 0475) - 3-4 Credits
- Mathematics (MATH 0031 or higher) - 3 Credits. Students exempt from Algebra requirement with a 620 or above Math SAT or a 27 or above Math ACT
Students exempt from algebra requirement with a 620 or above Math SAT or a 27 and above Math ACT
- Statistics (STAT 0200, STAT 1000, or higher) - 3-4 Credits
- Introduction to Psychology (PSY 0010) - 3 Credits
- Human Development - 3 Credits. REHSCI 1245 preferred; PSY 0310 accepted
REHSCI 1245 - HUMAN DEVELOPMENT preferred; PSY 0310 - DEVELOPMENTAL PSYCHOLOGY accepted
- English Composition (Minimum ENGCOMP 0200 or equivalent) - 3 Credits
- Intensive Writing (W) - 3 Credits. Choose one course with *Course Attribute* "High Impact Practices" and *Course Attribute Value* "Writing Intense Course." ENGCOMP 0440 recommended or ENGCOMP 0540
- Oral Communication - 3 Credits. COMMRC 0520 ; COMMRC 0500 , COMMRC 0510 , COMMRC 0530 accepted
- Diversity course - 3 Credits. Choose one course with *Course Attribute* "DSAS General Education Requirement" and *Course Attribute Value* "Diversity."
- Humanities course - 3 Credits. Choose one course with *Course Attribute* "DSAS General Education Requirement" and *Course Attribute Value* "Literature" or "Creative Work" or "Philosophical Thinking or Ethics" or "The Arts." Consider a course in bioethics or one with a disability or health/medicine focus.

- Social Science course - 3 Credits. Choose one course with *Course Attribute* "DSAS General Education Requirement" and *Course Attribute Value* "Social Science." Consider a course with a disability or health/ medicine focus.
- Global Awareness and Cultural Understanding - 3 Credits. Choose one course with *Course Attribute* "DSAS General Education Requirement" and *Course Attribute Value* "Cross-Cultural Awareness" or "Geographic Region" or "Global Issues." ANTH 0780 Cultural Anthropology recommended.

Total Required Prerequisite Credits: 43-46

Students planning to apply to graduate programs in health sciences are encouraged to complete most of the prerequisite courses for those programs (e.g., Physics 2, Biology 2, Chemistry 2, etc.) prior to admission to the Undergraduate Rehabilitation Science Program. Anatomy and Physiology (prerequisites for many professional health science programs) are included in the Rehabilitation Science curriculum.

Application Procedures

Please visit the SHRS website to access information about applying to the program.

Required for admission:

- A completed application
- A personal statement (see website for prompt) School of Health and Rehabilitation Sciences | University of Pittsburgh | University of Pittsburgh School of Health and Rehabilitation Sciences
- Resume (see website for prompt) School of Health and Rehabilitation Sciences | University of Pittsburgh | University of Pittsburgh School of Health and Rehabilitation Sciences
- Transcripts from all colleges/universities attended.
- A minimum cumulative GPA of 2.75 and a minimum math and science prerequisite GPA 2.5 is required (3.0 or higher GPAs are typical for admission).

Please note that admission to the Rehabilitation Science program is competitive. Meeting the minimum admission criteria does not guarantee admission.

Transfer Student Information:

Transfer students must apply to the University of Pittsburgh by completing the Office of Admission and Financial Aid's Transfer Application and selecting Rehabilitation Science as their intended field of study. International transfer students click [here](#).

Rehabilitation Science Curriculum

While enrolled in the Rehabilitation Science program, students must complete the core courses, at least one course from each of the core areas and a minimum of 30 credits from SHRS, inclusive of course requirements. Students must complete 120 cumulative credits to graduate with the BS in Rehabilitation Science degree.

- *The 30 required SHRS credits include courses from the following departments: ATHLTR, CSD, EM, HIM, HRS, NUTR, and REHSCI.*

[Online Course Policy:](#)

Once a student has matriculated into the BSRS Program, up to 6 online credits will be accepted from either the University of Pittsburgh or another four-year institution. An additional one credit may be accepted for an online medical terminology course. No online courses will be accepted from a two-year institution, other than medical terminology.

Students are expected to review their plan of study with the BSRS Academic Advisor before registering for any online course.

Additional online credits may be accepted if taken prior to matriculation into the BSRS Program.

[Policy on Taking Courses at Another Institution:](#)

Current BSRS students in good academic standing (cumulative GPA of at least 2.00), including students admitted to BSRS who need to complete prerequisites prior to starting their program, may attend another accredited institution to complete their prerequisites, provided they receive prior approval from the Academic Advisor and SHRS Dean's office. Students who have completed 60 or more credits may not take program-required courses or electives at two-year institutions. However, up to six credits of graduate school prerequisites may be taken at a two-year institution and be applied to the BSRS degree.

Students seeking to take and transfer credits from another institution are required to fill out the SHRS form, *Request to Take Courses at Another College or University* and submit it along with appropriate course descriptions to their academic advisor. Students will not receive credit for courses taken without advance approval. BSRS students may not enroll in courses outside the University of Pittsburgh in the semester in which they are graduating.

Core Course Requirements

- REHSCI 1200 - HUMAN ANATOMY
- REHSCI 1201 - HUMAN ANATOMY LAB
- REHSCI 1225 - INTRO TO REHABILITATION SCIENCE
- REHSCI 1235 - MEDICAL TERMINOLOGY
- REHSCI 1240 - ISSUES IN HEALTH CARE
- REHSCI 1265 - PHARMACOLOGY IN REHABILITATION
- REHSCI 1280 - PSYCH AND SOCIOLOGY OF DISABILITY

Core Areas

Human Physiology (4 credits):

Students must complete one of the following:

- REHSCI 1205 - HUMAN PHYSIOLOGY
- REHSCI 1206 - HUMAN PHYSIOLOGY LAB
- BIOSC 1070 - HUMAN PHYSIOLOGY-UHC
- BIOSC 1250 - HUMAN PHYSIOLOGY or
- NROSCI 1250 - HUMAN PHYSIOLOGY and
- BIOSC 1255 - PHYSIOLOGY LABORATORY
- Note: This class is reserved for Bio majors. RS students will be able to register only if there are seats available after Bio students have enrolled.
- NROSCI 1070 - HUMAN PHYSIOLOGY-UHC
- Another approved course

Neuroscience:

Students must take one of the following:

- REHSCI 1210 - NEUROSCIENCE
