MSPTH 5860 - IMMUNOLOGY

Minimum Credits: 0
Maximum Credits: 0
The immunology program in the division is oriented toward basic and clinical immunology genetics. These problems focus on the structure and function of the major histocompatibility complex and the genetic and immunological interactions that occur between the mother and the fetus. The student will learn some of the basic principles of transplantation immunobiology and how basic research in this area impinges on a variety of problems in clinical medicine. A minimum of 2 four-week blocks is required.
Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSPTH 5861 - BIOLOGY OF CANCER

Minimum Credits: 0
Maximum Credits: 0
This four or eight week course will stress the investigations relevant to clinical oncology. Subjects include carcinogen target cell interactions, analysis of tumor progression and regression, tumor metastasis, cell differentiation and therapeutic responses. Students will be exposed to various experimental techniques such as electron microscopy, tissue and cell cultures, animal models and selected biochemical studies.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSPTH 5862 - BIOCHEMISTRY PATHOLOGY

Minimum Credits: 0
Maximum Credits: 0
This four or eight week elective is to provide students with an experience studying the biochemical basis for both clinical and experimental disease. Students will have a brief rotation through selective areas of the clinical biochemistry laboratory and will then be assigned to work with a staff pathologist, providing review of laboratory data and consultation on unusual clinical problems.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

MSPTH 5863 - TUMOR IMMUNOLOGY

Minimum Credits: 0
Maximum Credits: 0
This elective is designed to provide exposure to basic and clinical aspects of tumor immunology. Students may elect to spend up to four weeks on this rotation. During this elective the student will have the opportunity to investigate various aspects of tumor immunology as it relates to pathophysiology of tumor invasion and metastasis. The student may also have the opportunity of rotating through clinical labs.
Academic Career: Medical School
Course Component: Clinical
MSPTH 5865 - HEAD, NECK AND ORAL PATHOLOGY

Minimum Credits: 0  
Maximum Credits: 0  
The student participates in slide sign-out in the morning and afternoon with the attending pathologists. The slide readings offer a focused review of head, neck and oral histology and histopathology as well as integrate the related case histories. The student also takes part in frozen section call for the operating room with the head and neck pathologist to learn evaluation of gross specimens and appropriate margins of resection. A portion of the rotation will also include participation in clinical consultations in the hospital or outpatient clinics, where experience will be gained in assessment and diagnosis of head and neck pathology. The student also plans a review of slides from the pathology case files to ensure a comprehensive review of head, neck and oral histopathology is obtained. The student attends relevant pathology conferences and ENT tumor board as time and schedule permit. The student will also construct an oral presentation on a pertinent head and neck pathology topic agreed upon between the attending and student.

Academic Career: Medical School  
Course Component: Directed Studies  
Grade Component: Grad LG/SU5  
Course Attributes: School of Medicine Year 4

MSPTH 5869 - INDEPENDENT STUDY IN PATHOLOGY

Minimum Credits: 0  
Maximum Credits: 0  
Opportunity for flexible independent study in anatomic, clinical or investigative pathology for a maximum of 3 months. Must be arranged and approved in advance.

Academic Career: Medical School  
Course Component: Independent Study  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

MSPTH 5900 - EXTRAMURAL PATHOLOGY

Minimum Credits: 0  
Maximum Credits: 0  
A clinical experience in pathology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

Pediatric Dentistry

PEDENT 2010 - GRADUATE PEDIATRIC DENTAL CLINIC 1

Minimum Credits: 1  
Maximum Credits: 1  
This clinic will provide training and experience in principles of preventive dentistry, cavity preparations and restorative procedures, interceptive orthodontic appliance fabrication, and treatment of the handicapped patient for newly enrolled advanced pediatric dentistry specialty residents.

Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad Letter Grade

PEDENT 2020 - GRADUATE PEDIATRIC DENTAL CLINIC 2
Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.
**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade

**PEDENT 2030 - GRADUATE PEDIATRIC DENTAL CLINIC 3**

Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients, patients with handicapping conditions, and patients requiring limited orthodontic therapy.
**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade

**PEDENT 2040 - GRADUATE PEDIATRIC DENTAL CLINIC 4**

Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.
**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade

**PEDENT 2050 - GRADUATE PEDIATRIC DENTAL CLINIC 5**

Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate, and orofacial abnormalities, patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.
**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade

**PEDENT 2060 - GRADUATE PEDIATRIC DENTAL CLINIC 6**

Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.
**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade

**PEDENT 2070 - GRADUATE PEDIATRIC DENTAL CLINIC 7**

Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment, and pediatric dental patients with
advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2110 - GRADUATE PEDIATRIC DENTAL SEMINAR 1

Minimum Credits: 1
Maximum Credits: 1
This course will provide an introduction to the specialty of pediatric dentistry. Material on preventive principles, restorative techniques, and dental materials will be provided. Seminars on physical and mental handicapping conditions will be given.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2120 - GRADUATE PEDIATRIC DENTAL SEMINAR 2

Minimum Credits: 1
Maximum Credits: 1
This course will provide an introduction to advanced pediatric dentistry. Various topics on pediatric dentistry are included for discussion. Diagnosis, case presentation and case review will be included in this seminar.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2130 - GRADUATE PEDIATRIC DENTAL SEMINAR 3

Minimum Credits: 1
Maximum Credits: 3
This course will provide material to the first year advanced pediatric dentistry specialty resident on pulp biology. Topics on pulp morphology, response and treatment are discussed. Diagnosis, case presentation and case review will be included in this course.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

PEDENT 2140 - GRADUATE PEDIATRIC DENTAL SEMINAR 4

Minimum Credits: 1
Maximum Credits: 1
This course will provide material to the first year advanced pediatric dentistry specialty resident on the diagnosis and treatment of traumatic injuries. The use of pharmacotherapeutic agents in the management of the pediatric dental patient will also be discussed in this course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2150 - GRADUATE PEDIATRIC DENTAL SEMINAR 5

Minimum Credits: 1
Maximum Credits: 1
This course will provide the second year advanced pediatric dentistry specialty resident material on the dental treatment of patients with cleft lip, cleft palate and/or other craniofacial abnormalities. Topics on genetics, epidemiology, pathogenesis, growth and development, speech, and syndromes will be included in this course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
PEDENT 2160 - GRADUATE PEDIATRIC DENTAL SEMINAR 6

Minimum Credits: 1
Maximum Credits: 3
This course will provide material to second year advanced pediatric dentistry specialty residents on the maintenance of the dental arch through the use of space maintaining appliances. Additional topics on systemic diseases, fluorides and general anesthesia are discussed.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

PEDENT 2170 - GRADUATE PEDIATRIC DENTAL SEMINAR 7

Minimum Credits: 1
Maximum Credits: 1
This course will provide material to the third year advanced pediatric dentistry specialty resident on pediatric dental practice management. Office design, practice finance and payment options are discussed in this course. Computer utilization and practice alternatives are also presented.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2230 - SPECIAL WORK

Minimum Credits: 1
Maximum Credits: 3
This course will provide the opportunity for the advanced specialty resident to pursue the independent study of a topic of interest in pediatric dentistry.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

PEDENT 5211 - PEDIATRIC DENTISTRY 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be presented with material specific to the specialty of pediatric dentistry. The goal of the course is to introduce the second year predoctoral student to foundational knowledge in pediatric dentistry and provide information on various topics concerning the pediatric dental patient, including: morphology and eruption of teeth; oral habits; evaluation of the developing occlusion; clinical management of arch length; physical growth and development; prenatal and infant oral health; caries disease prevention and management; adolescent oral health care dentistry; behavior guidance and modification; and advanced behavior management. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PEDENT 5242 - PEDIATRIC DENTISTRY 2 LAB

Minimum Credits: 1.5
Maximum Credits: 1.5
In this course, students will be introduced to current concepts of clinical pediatric dentistry. Students will be provided with opportunities to develop the skills, techniques, and motor coordination required for the care of the pediatric dental patient in a preclinical setting. Successful completion of this course is a pre-requisite for the student to engage in clinical care in the Department of Pediatric Dentistry. This course includes small group preclinical sessions and is taught in conjunction with didactic course, PEDENT 5253 Pediatric Dentistry 2.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

2545
**PEDENT 5253 - PEDIATRIC DENTISTRY 2**

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will learn concepts of development of occlusion, space maintainers and pediatric dental treatment planning. Students will also be presented with foundational knowledge in radiographic techniques, local anesthesia administration, pulp therapy, dental trauma and child abuse. These foundational concepts are all part of the requisite skills for a dental student to begin pediatric dental care. Some lecture content parallels the techniques taught concurrently in the preclinical course, PEDENT 5242 (Pediatric Dentistry 2 Lab).  
**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF

**PEDENT 5315 - PEDIATRIC DENTISTRY 3**

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will be presented material specific to the specialty of pediatric dentistry. The goal of the course is to enhance the foundational knowledge from the two previous didactic courses in pediatric dentistry (PEDENT 5211 and 5253) and to provide information on various topics concerning the pediatric dental patient including trauma to primary and permanent dentitions; oral medicine and oral-facial pathology; patients with special health care needs; and interdisciplinary case management, the theme of the third year curriculum. This course includes lectures and class discussions.  
**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF with +/- Values

**PEDENT 5379 - CLINICAL PEDIATRIC DENTISTRY 1**

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to provide clinical experiences in pediatric dentistry for predoctoral dental students. By the end of the course, students will be able to provide care to pediatric dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the pediatric patient.  
**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** ABCF

**PEDENT 5447 - CLINICAL PEDIATRIC DENTISTRY**

Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2**

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to provide clinical experiences in the area of pediatric dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to pediatric dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the pediatric patient.  
**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis
PEDENT 5801 - COMMUNITY OUTREACH EXPERIENCES WITH VULNERABLE POPULATIONS

Minimum Credits: 1
Maximum Credits: 1
This course will provide community outreach opportunities for students interested in gaining experiences working with vulnerable populations. Faculty from SDM and community center coordinators of the Pittsburgh area will communicate with the course director and present dates of potential volunteering options. Students, when available, will be teaching individuals of the community about the foundation and importance of oral health habits and increasing oral health literacy. This course will assist students in treating vulnerable patients by practicing effective communication and education on healthy oral habits.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

PEDENT 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 1
This course will provide the opportunity for the first professional dental student to pursue the independent study of a topic of interest in pediatric dentistry.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

PEDENT 5915 - ADVANCED PEDIATRIC DENTISTRY

Minimum Credits: 1
Maximum Credits: 1
The advanced pediatric dentistry elective is a clinical rotation in the graduate pediatric clinic where the student has the opportunity of treating advanced pediatric restorative and management cases. Treatment of children requiring advanced management techniques including, but not limited to, premedication, n20/02, and general anesthesia will be provided by the dental students under the direct supervision of attending faculty. Advanced treatment planning and restorative procedures will also be undertaken.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

Pediatrics

PEDS 5345 - PEDS CLERKSHIP REPEAT COURSE

Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's makeup of an unsatisfactory clerkship is required. This course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

PEDS 5351 - PEDIATRIC INPATIENT MEDICINE

Minimum Credits: 0
Maximum Credits: 0
A 4 week inpatient pediatric clerkship in which students will participate in all aspects of patient care and management. Expectations are to read both the current literature and the standard pediatric textbooks in order to understand childhood growth and development and important pediatric disease
processes. Attendance at conferences, lectures and rounds is expected. Students are part of the floor medical team and take call every 4 days. Each student will present a clinicopathologic conference (CPC). At the end of the rotation a 3 hour multiple choice exam is given.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 3

**PEDS 5352 - PEDIATRIC CLERKSHIP**

Minimum Credits: 0  
Maximum Credits: 0  
This 8-week clerkship exposes students to ambulatory and inpatient pediatrics. The 4-week inpatient experience is comprised of 3-weeks with an inpatient team and 1-week on a sub-specialty team. The 4-week ambulatory experience provides exposure to primary, acute, complex, adolescent, and newborn care and pediatric behavioral health. Students participate in all aspects of patient care and management, including performing histories and physical examinations; presenting patients in a family- and patient-centered manner; providing organized assessments and plans; and communicating in a professional manner with other members of the interprofessional staff, the clinical team, consultants, families, and patients. Students read the current literature and standard pediatric textbooks and complete on-line modules in order to understand childhood growth and development and major pediatric disease processes and therapies. In addition, students attend conferences, didactic sessions, and participate in rounding with the clinical team. Students also present an evidence-based case conference as part of their final grade.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**PEDS 5386 - INDIVIDUAL STUDY OR RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0  
The department of pediatrics will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 3

**PEDS 5401 - ADV PEDIATRIC IN-PATIENT (AI)**

Minimum Credits: 0  
Maximum Credits: 0  
Four week acting internship at children's hospital. Students have same responsibility as intern-total patient care including complete history, physical exam, assessment lab data, case formulation, communication with attending and referring physician, formulation of discharge plans, discharge summary. Performance of procedures including lumbar punctures, iv and intra-arterial punctures, bladder tap, bone marrow aspiration, performance and interpretation gram stain of CSF, blood smear for red cell, white cell platelet morphology. Interpret routine films and urinalysis.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

**PEDS 5406 - EXTRAMURAL ACTING INTERNSHIP**

Minimum Credits: 0  
Maximum Credits: 0  
Students will register for this course when participating in a pediatric acting internship at an institution outside of the University of Pittsburgh School of Medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4
PEDS 5410 - PRIMARY CARE PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
The general purpose of this elective is to provide students with component experiences of a primary care physician. To this end, the student will 1) examine newborn infants in a neonatal high-risk setting, counsel parents regarding well baby issues and help formulate plans for common newborn problems; 2) develop management plans for children who present for initial neonatal visits, acute illnesses and chronic problems; 3) enhance knowledge of common pediatric behavioral and developmental issues and diagnosis and follow-up of otitis media & 4) learn how to provide telephone advice.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5415 - NICU ACTING INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0
A 4-week neonatal intensive care unit acting internship at Magee-Womens Hospital NICU through the Division of Newborn Medicine, Department of Pediatrics. Students have the same clinical responsibilities as the pediatric interns, including spending time in our Triage unit and giving a presentation on a core Neonatology topic. The NICU team is made up of an attending neonatologist, neonatal-perinatal medicine fellows, an advanced practice provider (PA or NP), pediatric interns, neonatal nurses, and other specialized providers, including pharmacists, nutritionists and therapists. Students will assume a panel of up to 4 patients and be responsible for evaluation, performing procedures, formulating plans for these patients. Students will have the opportunity to perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis, and endotracheal intubation under the supervision of NICU staff. The NICU is covered at night and on weekends by an attending neonatologist, NICU fellow, senior resident and a team of neonatal nurse practitioners. Students will not be required to take night or weekend call. Students will attend radiology rounds and other educational talks. Up to one student per rotation can be accommodated to maximize the experience.

Academic Career: Medical School
Course Component: Clinical
Grade Component: S/U Basis

PEDS 5421 - ALLERGY AND IMMUNOLOGY

Minimum Credits: 0
Maximum Credits: 0
This four week elective offers an opportunity to participate in the clinical evaluation and management of ambulatory patients who present with a large variety of immunologically mediated diseases of either hypersensitivity or deficient immune response origin. Under supervision, students will carry out the initial evaluation and subsequent re-evaluation of patients with asthma, allergic rhinitis, urticaria, drug allergy, insert allergy, immunodeficiency syndromes, as well as a large variety of clinical immunology and/or collagen-vascular diseases.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5422 - VIRTUAL UNDERREPRESENTED IN MEDICINE

Minimum Credits: 0
Maximum Credits: 0
Logistics and Educational Methods: This first two weeks of elective will be delivered virtually via Zoom meetings. These events will include morning reports, small group discussions, patient management simulation, didactic lectures, interactive patient cases, and interviews with patients who have consented and volunteered their time. Additionally, there will be community discussions and engagement led by Dr. Noble Maseru, Professor of Public Health Practice and Director of Social Justice, Racial Equity and Faculty Engagement through the University of Pittsburgh Schools of Health Sciences. Evaluation: Grading will be P/F. Grading will be based on attendance at and participation in required sessions and completion of assignments. Students will also have opportunities for formative feedback and facilitated self-reflection. The second two weeks of this elective will be in person clinical rotation in a pediatric subspecialty clinic at Children's Hospital of Pittsburgh. The two weeks will include morning
reports, working directly with attending pediatric subspecialists in the areas of adolescent medicine, child advocacy, primary care, hematology & oncology and emergency medicine. Additionally, there will in person discussions and local field experiences with UPGSHS faculty Dr. Nobel Maseru. Students will have the opportunity to choose to participate in additional hours of community engagements leading to a certificate in Social Justice, supervised by Dr. Maseru. Grading will be based on attendance at and participation in required sessions and completion of assignments. Students will also have opportunities for formative feedback and facilitated self-reflection.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5425 - PEDIATRIC RHEUMATOLOGY**

Minimum Credits: 0
Maximum Credits: 0
The students will get outpatient and inpatient exposure in the field of pediatric rheumatology with a particular emphasis on outpatient clinics. There is in-depth one-on-one teaching through the pediatric rheumatology attending physicians. Students will generally work with one particular attending physician for a clinic section, but will be exposed to different attending physicians throughout the rotation. The student will be directly involved in patient care, assessment and decision-making. Participation in academic conferences and selected lectures is mandatory.

Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 4

**PEDS 5430 - PEDIATRIC CARDIOLOGY**

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital. Diagnosis and management of child with congenital and rheumatic heart disease. Interpret EKG, echocardiograms and chest roentgenograms. Observe cardiac catheterization lab, take pediatric cardiac history, attend cardiac catheterization and cardiac surgery conferences. Pursue basis of selection of patients for cardiac catheterization and cardiac surgery.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5440 - ENDCRNLGY, METBLSM & DIABETES**

Minimum Credits: 0
Maximum Credits: 0

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5450 - PEDIATRIC INFECTIOUS DISEASES**

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital of consult experience on infectious disease of hospitalized pediatric patients including rounds, lectures, conferences and seminars. Study antibiotic therapy, diagnosis and management of CNS, pulmonary and urinary tract infections. Evaluate gram-stained smear, urinecult results and antibiotic tests.

Academic Career: Medical School
Course Component: Clinical
PEDS 5455 - PEDIATRIC DERMATOLOGY

Minimum Credits: 0
Maximum Credits: 0
Medical students will be exposed to both common and rare skin disorders seen in both outpatient and inpatient settings. Objectives: 1) develop a familiarity with terminology used to describe primary and secondary skin lesions; 2) develop a familiarity with both the diagnosis and treatment of common skin disorders such as, acne and eczema, lesions, such as hemangiomas and nevi, as well as rare skin conditions such as Genodermatoses including ichthyoses and epidermolysis bullosa; 3) develop interviewing skills with pediatric patients and their families; 4) obtain experience in performing cutaneous physical exams in pediatric patients.

Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 4

PEDS 5460 - NEONATOLOGY

Minimum Credits: 0
Maximum Credits: 0
Four week elective at Magee Women's Hospital neonatal intensive care unit joining residents as acting intern. Experience in all areas of newborn care including recognition and treatment of critical infants. Perform exams, utilize basic lab procedures and x-ray, perform umbilical vessel catheterization, arterial and venous puncture, bladder tap, endotracheal intubation. Discuss dynamics of sick, premature and dying infants.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5465 - BREASTFEEDING ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
This elective will prepare future physicians, especially those pursuing careers in OB/GYN, family physicians, pediatrics and internal medicine, to support women to breastfeed. During this four week elective, students will see mother-infant dyads in the newborn follow-up clinic in primary care center, seeing patients with other providers of lactation services in the hospital and community setting and completing directed readings.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5470 - GENETICS

Minimum Credits: 0
Maximum Credits: 0
Four week clinic and laboratory elective at children's hospital. Diagnostic and genetic counseling of common and rare hereditary disorders, syndromes of congenital anomalies, evaluation of in-and-out patients. Lab experience in cytotechnology techniques including interpreting karyotypes.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5480 - NEPHROLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital. In- and outpatient rounds and consults, participation in hypertension and pathology conferences.
Understanding of urinalysis; evaluation of laboratory studies and radiology of renal disease, electrolyte disorders and pediatric hypertension.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5490 - HEMATOLOGY/ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital. Clinic exposure to pediatric hematology and oncology problems in outpatient chemotherapy unit and various inpatient services. Participate in hematology/oncology clinics and sickle cell clinics. Instruction in peripheral blood and marrow morphology. Participate in rounds and lectures and extensive reading.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5491 - NEONATOLOGY

Minimum Credits: 0
Maximum Credits: 0
The clinical elective in neonatology at Children's Hospital is designed to provide the student with an experience in neonatology that emphasizes the multidisciplinary care of the critically ill newborn. The CHP unit is the region's only level IIIC NICU, and offers the highest level of neonatal care, including surgical services and ECMO. As a referral center, the CHP NICU cares for a unique population of high-acuity, medically-complex infants with a wide variety of problems, including cardiorespiratory failure, infections, surgical issues, genetic disorders and congenital anomalies. Currently, the newborn medicine program only offers an elective in the Magee Women's Hospital NICU, which cares for a very different population of infants, with an emphasis on premature infants and infants with transient problems related to the neonatal transition. The elective rotation in the CHP NICU will offer students exposure to a one-of-a-kind patient population, a full-spectrum of neonatal medicine, and a level of multidisciplinary care not available anywhere else in the region. Students will join the CHP NICU team under the direct supervision of neonatology faculty. The NICU team is made up of attending neonatologists, neonatal-perinatal medicine fellows, neonatal nurse practitioners, pediatric residents, neonatal nurses, and specialized ancillary providers, including pharmacists, nutritionists and therapists. The student will be involved in all aspects of care, including initial assessment, stabilization, diagnostic evaluation and ongoing ICU management. The student will perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis and endotracheal intubation under the supervision of NICU staff. The student will gain experience in family-centered care. Students will be supervised directly by newborn medicine faculty, with one-on-one precepting throughout the rotation. Newborn medicine fellows and neonatal nurse practitioners will be available as teaching resources. The course director is available in the NICU should the student require additional support. Educational methods will include bedside teaching focused on the student's panel of patients, daily NICU rounds, demonstration of clinical skills and procedures, and didactic sessions (the newborn medicine program's seminars in neonatal medicine, core lecture series, and newborn grand rounds). Key references will be provided. Students may attend sessions of the AAP/AHA neonatal resuscitation program (scheduled bimonthly). The course director will provide an updated schedule of educational activities on the first day of the rotation. This 4 week inpatient rotation takes place in the neonatal intensive care unit at CHP. Students will assume the care of a panel of 2-4 NICU patients, selected according to their interests.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5500 - EMERGENCY PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital in emergency department. Experience in assessment and management of acute illnesses and injuries. Technical skills such as drawing blood, starting IVs, lumbar punctures. Interpret lab studies and x-rays in acute situations. Distinguish mildly acute from serious in emergency situations. Interaction skills with acutely ill and injured child.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5510 - PEDIATRIC GASTROENTEROLOGY**

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital involves supervised direct patient contact and formal didactic sessions including inpatient consults, outpatient clinics and assisting in all GI procedures. Eight week research elective provides opportunity to gain skills in clinical or basic investigation of bile acid metab, gastroesophageal reflux or GI immunology.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5520 - DEVELOPMENTAL PEDIATRICS**

Minimum Credits: 0
Maximum Credits: 0
Four week elective in child development unit. Focuses on normal child development and development and behavioral disabilities. Includes didactic sessions, reading, field experience and team assessments in outpatient clinic setting. Develop assessments of inpatients at children's hospital and in the ICU at Magee Women's Hospital.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5521 - TRIPLE BOARD PEDIATRICS**

Minimum Credits: 0
Maximum Credits: 0
This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at Children's Hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

**PEDS 5524 - CHILD ADVOCACY**

Minimum Credits: 0
Maximum Credits: 0
This elective will teach medical students how to recognize the signs and symptoms of children who may have been physically sexually abused and/or neglected and become familiar with the basic approach to the medical evaluation of each type of maltreatment.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5525 - CHILD ADVOCACY**
Minimum Credits: 0
Maximum Credits: 0
THE PHYSICAL AND SOCIAL ASPECTS OF CHILD SEXUAL AND PHYSICAL ABUSE WILL BE EXPLORED. THE STUDENT WILL HAVE THE OPPORTUNITY TO OBSERVE AND LEARN HOW TO EXAMINE A CHILD SUSPECTED OF BEING ABUSED AND HOW TO DOCUMENT FINDINGS. OBSERVATIONS ON HOW THE CHILD AND ITS FAMILY ARE INTERVIEWED WILL OCCUR. EXPERIENCES MAY INCLUDE JUVENILE AND CRIMINAL COURTS AS WELL AS FOSTER CARE AND HOMELESS SHELTER SITUATIONS.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5530 - POISON CENTER

Minimum Credits: 0
Maximum Credits: 0
4 week elective at poison center. Basic principles of managing cases of exposure to toxic materials. Under close supervision, manage poison case via the telephone. Exposure to principals of development and operation of a poison center. Includes rounds on toxicology patients at Children's Hospital. 8 week elective includes independent research.
Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5540 - PEDIATRIC PULMONOLOGY

Minimum Credits: 0
Maximum Credits: 0
4 week elective at Children's Hospital. Includes history taking, physical exam, choice of diagnostic procedures, perform pulmonary lab tests, reading chest radiographs. Inpatient, outpatient and ICU patients seen. Basic review of pulmonary physiology. Observe and participate in lab testing procedures, interpret results with staff. Observe and help in research projects and clinical investigation.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5550 - ADOLESCENT MEDICINE

Minimum Credits: 0
Maximum Credits: 0
4 week elective at children's hospital. Includes normal and abnormal adolescent development, reading and discussion. Learn exam skills and lab testing. Diagnosing sexually-related problems. Participate in psychosocial assessments of teens. Work in outpatient clinic and inpatient consults.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5560 - AMBULATORY PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
This four-week elective is designed to provide a primary care pediatric experience in a community setting. The hours and specific duties will be determined by each practice. The student is responsible for contacting and setting up the elective and then obtaining approval from the medical student program director in the department of pediatrics. Supervision and evaluation is provided by the primary care physicians in the practice.
Academic Career: Medical School
Course Component: Clinical
PEDS 5570 - ADOLESCNT AND YOUNG ADULT MEDICN

Minimum Credits: 0
Maximum Credits: 0
This four week elective encompasses a diverse offering in adolescent and young adult medicine. Its clinical content is based at an urban teaching hospital and its college health affiliates. Daily rounds, preceptorships and conferences are part of the rotation with supervision by mercy's full-time pediatric faculty.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5580 - SCHOOL HEALTH

Minimum Credits: 0
Maximum Credits: 0
This elective is designed to provide a unique school health experience utilizing urban and suburban schools including school based clinics for teaching sites. This specialized experience will include experience with health education, team meetings and school consultation.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of pediatrics to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.
Academic Career: Medical School
Course Component: Lecture
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PEDS 5710 - IMMUNIZATION, IMMUNE DEFICIENCY, AND INFLAMMATION IN KIDS

Minimum Credits: 0
Maximum Credits: 0
In this ILS, students will learn practical and cutting-edge clinical applications of basic science immunology topics including immunization development, primary immune deficiency and immune dysregulation conditions, and pathophysiologic manifestations of inflammation as it pertains to numerous pediatric disease states. This course will highlight ways in which an in-depth understanding of the immune system and mechanisms of inflammation enhances the practice of precision medicine, especially as it pertains to genetic testing and initiation of biologic and immunomodulatory therapies. Students may have some clinical experiences (i.e. time spent in Primary Immunodeficiency Clinic at UPMC Children's Hospital and with genetic counselors), however, most of the course time will be dedicated to small case-based group sessions in which students and facilitators will discuss the clinical applications of basic immunology topics.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5715 - GENETICS/GENOMICS IN PRIMARY CARE
In this ILS, students will learn about how genetics and genomics can be used to enhance precision medicine in primary care settings like pediatrics, medicine, and family practice. Students will return to the basic sciences of genetics, molecular biology, and pharmacology, discussing how to apply cutting edge insights from those disciplines to a variety of practice settings. This course will address newborn screening, how to take an effective family history, effective communication strategies around genetic conditions, care for individuals with genetic conditions, ethical issues around genetic testing, pharmacogenomics, and the use of registries. Students may have some clinical experiences (e.g., with genetics counselors), but most of the time will be spent in the classroom discussing the science and its application. An interprofessional component will include collaboration with pharmacy and other disciplines.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**PEDS 5720 - MOLECULAR MEDICINE (ILS)**

Minimum Credits: 0  
Maximum Credits: 0  
This course is designed to teach the fourth year medical student some basics of molecular biology and how molecular techniques are being employed to diagnose and treat disease. This course will focus on several single-gene diseases. Forensic use of DNA will also be featured. This course will have 3 lectures and 3 clinics per week and each student will be obliged to give a presentation on a topic selected.  
**Academic Career:** Medical School  
**Course Component:** Lecture  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PEDS 5750 - GET READY FOR RESIDENCY BOOT CAMP**

Minimum Credits: 0  
Maximum Credits: 0  
This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** S/U Basis

**PEDS 5845 - PEDIATRIC RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0  
4 week research elective available with individual pediatric faculty members at children's hospital.  
**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PEDS 5899 - INDEPENDENT STUDY PEDIATRIC**

Minimum Credits: 0  
Maximum Credits: 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.  
**Academic Career:** Medical School
PEDS 5900 - EXTRAMURAL PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in pediatrics may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Periodontics

PERIO 2110 - PERIODONTICS SPECIALTY CLINIC 7

Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2111 - PERIODONTAL LITERATURE REVIEW 1

Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2112 - SPECIAL TOPICS IN PERIODONTICS 1

Minimum Credits: 0
Maximum Credits: 0
This seminar will feature guest lecturers invited to present specific topics related to the practice of periodontics and periodontal therapy.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2114 - MINERALIZED TISSUE BIOLOGY

Minimum Credits: 1
Maximum Credits: 1
Understanding the present efforts to elucidate mechanisms for bone healing encompasses study of numerous growth factors and signaling molecules. The role of each factor will be described and related to potential therapeutic products. At the completion of the course the student will be familiar with bone biology; given the opportunity to demonstrate capacity for critical evaluation of a paper on tissue engineering and its foundation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
PERIO 2119 - PERIODONTICS SPECIALTY CLINIC 1

Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2120 - PERIODONTICS SPECIALTY CLINIC 8

Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2130 - PERIODONTICS SPECIALTY CLINIC 9

Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2140 - PERIODONTAL TREATMENT PLANNING 1

Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2141 - PERIODONTAL TREATMENT PLANNING 5

Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1

Minimum Credits: 0
Maximum Credits: 0
This course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science and practice of
PERIODONTICS. It will focus on correlating and comparing new information with established concepts.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2144 - PERIODONTICS ASPECTS OF DENTAL IMPLANTS**

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to present to the graduate resident the different implants systems, selection criteria of implant cases, and guided tissue regeneration as it applies to implantology. The management of failing implants will be also discussed.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2146 - PERIODONTAL RESEARCH 1**

Minimum Credits: 1  
Maximum Credits: 3  
The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**PERIO 2147 - IMPLANT PROSTHODONTICS SEMINAR 2**

Minimum Credits: 2  
Maximum Credits: 2  
This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2148 - PERIODONTAL RESEARCH 2**

Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2149 - PERIODONTICS SPECIALITY CLINIC 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course is the clinical practice of periodontics for the first year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2150 - PERIODONTICS SPECIALITY CLINIC 10**
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2151 - PERIODONTAL LITERATURE REVIEW 2**

Minimum Credits: 2  
Maximum Credits: 2  
Literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2160 - PERIODONTICS SPECIALTY CLINIC 11**

Minimum Credits: 1  
Maximum Credits: 1  
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2180 - PERIODONTAL LITERATURE REVIEW 7**

Minimum Credits: 2  
Maximum Credits: 2  
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2181 - PERIODONTAL LITERATURE REVIEW 8**

Minimum Credits: 2  
Maximum Credits: 2  
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2182 - PERIODONTICS LITERATURE REVIEW 9**

Minimum Credits: 2  
Maximum Credits: 2  
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

**Academic Career:** Graduate
PERIO 2190 - ADVANCED PERIODONTAL CONCEPTS

Minimum Credits: 2  
Maximum Credits: 2  
This advanced periodontal concepts course is designed to familiarize the graduate student with advanced concepts in the science and art of clinical periodontics through intensive study of textbooks and by means of clinical demonstrations.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PERIO 2199 - INTRODUCTION TO PERIODONTICS SPECIALTY CLINIC

Minimum Credits: 3  
Maximum Credits: 3  
This course allows the resident to select a special project.  
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad LG/SU3 Basis

PERIO 2210 - SPECIAL TOPICS IN PERIODONTICS 4

Minimum Credits: 1  
Maximum Credits: 1  
This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PERIO 2211 - PERIODONTAL LITERATURE REVIEW 3

Minimum Credits: 2  
Maximum Credits: 2  
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PERIO 2212 - SPECIAL TOPICS IN PERIODONTICS 2

Minimum Credits: 1  
Maximum Credits: 1  
This seminar will continue the guest lecture series related to specific topics in periodontics.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PERIO 2213 - HOSPITAL PERIODONTICS - 1

Minimum Credits: 1  
Maximum Credits: 1
This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA Residents in the periodontal care of VA patients.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2216 - PERIODONTAL RESEARCH 3**

Minimum Credits: 1  
Maximum Credits: 3  
The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**PERIO 2219 - PERIODONTICS SPECIALTY CLINIC 12**

Minimum Credits: 1  
Maximum Credits: 1  
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.  
**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2223 - PERIODONTICS JOURNAL CLUB - 3**

Minimum Credits: 1  
Maximum Credits: 1  
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2230 - SPECIAL TOPICS IN PERIODONTICS 3**

Minimum Credits: 1  
Maximum Credits: 1  
This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2240 - PERIODONTAL TREATMENT PLANNING 2**

Minimum Credits: 1  
Maximum Credits: 1  
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
PERIO 2241 - HOSPITAL PERIODONTICS 2

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA residents in the periodontal care of VA patients.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2242 - PERIODONTICS JOURNAL CLUB 2

Minimum Credits: 1
Maximum Credits: 1
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2244 - PERIODONTAL LITERATURE REVIEW 4

Minimum Credits: 2
Maximum Credits: 2
A literature review seminar designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2246 - PERIODONTAL RESEARCH 4

Minimum Credits: 1
Maximum Credits: 1
Continuation of ongoing research to finalize protocols and initiate pilot studies.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2247 - PERIODONTAL TREATMENT PLANNING 3

Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2249 - PERIODONTICS SPECIALTY CLINIC 4

Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for second year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planning and periodontal surgery.
PERIO 2250 - SPECIAL TOPICS IN PERIODONTICS 5

Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2251 - CONCEPTS OF MODERN SEDATION

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2252 - INTRAOPERATIVE MANAGEMENT OF COMORBIDITIES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2253 - PERIODONTICS TREATMENT PLANNING 4

Minimum Credits: 1
Maximum Credits: 1
This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2254 - PERIODONTICS JOURNAL CLUB 4

Minimum Credits: 1
Maximum Credits: 1
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2260 - SPECIAL TOPICS IN PERIODONTICS 6

Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The
presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan. 

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2280 - SPECIAL WORK

Minimum Credits: 1
Maximum Credits: 3
This course allows the resident to select a special project.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2289 - PERIODONTICS SPECIALTY CLINIC 3

Minimum Credits: 1
Maximum Credits: 1
Continuation of previous periodontics specialty clinic courses involving increasing complexity of case types and treatments.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 2313 - HOSPITAL PERIODONTICS 3

Minimum Credits: 1
Maximum Credits: 1
This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2314 - PERIODONTICS JOURNAL CLUB 5

Minimum Credits: 0
Maximum Credits: 0
Periodontics journal club 5 provides a continuing review of the recent dental and medical journals.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2315 - PERIODONTICS JOURNAL CLUB 6

Minimum Credits: 1
Maximum Credits: 1
Periodontics journal club 6 provides a continuing review of recent dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2316 - PERIODONTICS RESEARCH 5
Minimum Credits: 1
Maximum Credits: 1
Continuation of ongoing research to finalize and complete the data and start writing a thesis.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2317 - PERIODONTICS RESEARCH 6

Minimum Credits: 1
Maximum Credits: 1
Continuation of ongoing research to finalize the research project and complete writing a thesis.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2318 - PERIODONTICS SPECIALTY CLINIC 5

Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2319 - PERIODONTICS SPECIALTY CLINIC 6

Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants. The course involves increasing complexity of case types and treatments.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2320 - PERIODONTAL LITERATURE REVIEW 5

Minimum Credits: 2
Maximum Credits: 2
The periodontal literature review 5 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2321 - PERIODONTICS LITERATURE REVIEW 6

Minimum Credits: 2
Maximum Credits: 2
The literature review 6 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals. The review of the literature also includes basic science literature and its relation to treatment.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
PERIO 2322 - PERIODONTAL TREATMENT PLANNING 6

Minimum Credits: 1
Maximum Credits: 1
This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2341 - HOSPITAL PERIODONTICS 4

Minimum Credits: 1
Maximum Credits: 1
This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2411 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 1

Minimum Credits: 2
Maximum Credits: 2
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2412 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 2

Minimum Credits: 2
Maximum Credits: 2
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2413 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 3

Minimum Credits: 2
Maximum Credits: 2
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2414 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 4
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

**PERIO 2415 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 5**

Minimum Credits: 2  
Maximum Credits: 2  
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

**PERIO 2416 - CURRENT VIEWS IN PERIODONTAL BIOLOGY AND CLINICS 6**

Minimum Credits: 2  
Maximum Credits: 2  
Residents will perform literature search for current topics in periodontics. Several articles will be selected for each topic and the residents will critically evaluate the methodology and results of each. Discussion will center around the evaluation of new evidence and the application of the findings to the clinical practice of periodontics.

**PERIO 5141 - PERIODONTOLOGY 1**

Minimum Credits: 1  
Maximum Credits: 1  
The 21st century dentist will see a shifting paradigm toward a more significant, and possibly dominant, role of bioscience in our biomechanical profession. Periodontology 1 will review, and address the application of, relevant basic science principles utilized in the field of periodontology. It will then build upon those basic principles in helping to achieve diagnostic, therapeutic, and preventive skills in the management of periodontal diseases. A major emphasis will be placed on the effect of oral health/disease on the systemic health/disease of our patients. Finally, in light of current, ongoing, and expanding research in the area of oral/systemic relationships, emphasis will be placed on the combined and cooperative roles of both the dentist and physician in providing comprehensive healthcare to our patients. This course will prepare the student for Periodontology 2 and includes lectures and class discussions.

**PERIO 5143 - PERIODONTOLOGY 1 LAB**

Minimum Credits: 1  
Maximum Credits: 1  
In this course you will learn proper ergonomics for periodontal (perio) procedures, patient and clinician positioning, perio instrument identification, grasp(s) and with discipline specific periodontal instruments. It is expected by the end of this course you will be able to accurately perform a periodontal assessment in a simulation setting and demonstrate proper subgingival calculus detection using an 11/12 explorer.
PERIO 5149 - PERIODONTAL INSTRUMENTATION 1

Minimum Credits: 0.5
Maximum Credits: 0.5
This course is intended to introduce the dental student to the instrumentation utilized in the performance of periodontal procedures via lectures and simulation clinic exercises. Topics such as instrument grasp(s), operator positioning, and an introduction to the proper use of scalers will be covered.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

PERIO 5171 - PERIODONTAL INSTRUMENTATION 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be introduced to the instrumentation utilized in the performance of periodontal procedures via lectures and simulation clinic exercises. Topics such as instrument grasp(s), operator positioning, and an introduction to the proper use of scalers will be covered. This course will prepare students for Periodontal Instrumentation 2, where advanced techniques including scaling and root planing procedures will be addressed.

Academic Career: Graduate
Course Component: Practicum
Grade Component: ABCF

PERIO 5181 - PERIODONTOLOGY 2

Minimum Credits: 1
Maximum Credits: 1
In this course, students will build upon concepts learned in Periodontology 1 to develop foundational knowledge associated with the clinical aspects of periodontology. We begin by exploring various diseases and conditions affecting the periodontium. Students will then begin to understand periodontal defense mechanisms and how different etiologies and risk factors lead to development of periodontal disease. Students will learn the periodontal clinical examination parameters and how they relate to diagnosis, prognosis, treatment planning, and maintenance therapies. Emphasis is placed on both the basic and clinical science knowledge necessary in the diagnosis, treatment, and prevention of periodontal diseases relative to the student's introduction to the dental clinics. This course includes lectures, quizzes, and, exams.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PERIO 5183 - PERIODONTOLOGY 2 LAB

Minimum Credits: 1
Maximum Credits: 1
This course is a continuation of the Periodontology 1 Lab course and emphasizes instrumentation skills for periodontal assessment and treatment. This course includes small group instruction in a simulation lab.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

PERIO 5210 - PERIODONTAL INSTRUMENTATION 2

Minimum Credits: 1
Maximum Credits: 1
This course is a continuation of PERIO 5149, Periodontal Instrumentation 1. In this course, students will continue to develop skills in the proper use of instrumentation for the performance of scaling and root planing procedures. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered. Ultrasonic instrumentation techniques, Naber's probe, and EHR charting will also be introduced and practiced. This course includes lecture and small group simulation clinic exercises and graded evaluations.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF
PERIO 5212 - PERIODONTOLOGY 2

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will build upon concepts learned in Periodontology 1 to develop foundational knowledge associated with the clinical aspects of periodontology. We begin by exploring various diseases and conditions affecting the periodontium. Students will then begin to understand periodontal defense mechanisms and how different etiologies and risk factors lead to development of periodontal disease. Students will learn the periodontal clinical examination parameters and how they relate to diagnosis, prognosis, treatment planning, and maintenance therapies. Emphasis is placed on both the basic and clinical science knowledge necessary in the diagnosis, treatment, and prevention of periodontal diseases relative to the students introduction to the dental clinics. This course includes lectures, quizzes, and, exams.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

PERIO 5214 - PERIODONTOLOGY 3

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will take concepts learned in Periodontology 1 and 2 and apply them to clinical cases. Etiology and diagnosis of periodontal disease will be reviewed, and students will learn how to establish prognoses, treatment plan for initial and continuing supportive periodontal therapy. This course will prepare students to treat and manage clinical periodontal cases and will include lectures, presentations, and exams.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

PERIO 5241 - PERIODONTAL INSTRUMENTATION

Minimum Credits: 1  
Maximum Credits: 1  
This course follows Periodontology Lab 2. In this course, students will be instructed in the proper use of periodontal instruments and equipment for the performance of preventive prophylaxis, and scaling/root planing procedures. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered. Rubber-cup polishing and ultrasonic instrumentation techniques will also be introduced and practiced. This course includes independent study activities (accessed in Canvas course ) and requires the student to review the required material available prior to small group simulation clinic skill building and evaluation.  
Academic Career: Dental Medicine  
Course Component: Practicum  
Grade Component: Grad HSU Basis

PERIO 5243 - PERIODONTAL CLINIC

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Dental Medicine  
Course Component: Clinical  
Grade Component: Grad HSU Basis

PERIO 5346 - PERIODONTOLOGY 4

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will be introduced to the clinical, surgical, and interdisciplinary aspects of periodontal therapy along with supportive periodontal treatment.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF with +/- Values
PERIO 5379 - CLINICAL PERIODONTICS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of periodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with periodontal needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with periodontal needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

PERIO 5449 - CLINICAL PERIODONTICS 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of periodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with periodontal needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with periodontal needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

PERIO 5800 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

PERIO 5847 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

PERIO 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

PERIO 5910 - ADVANCED PERIODONTICS

Minimum Credits: 3
Maximum Credits: 3
Dental students will have the opportunity to become familiar with periodontal surgical concepts and techniques through study of the periodontal literature and through participation in mentor - resident and faculty supervised periodontal flap procedures.

**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

### Petroleum Engineering

**PETE 2004 - PRACTICUM**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2160 - PETROLEUM RESERVOIR ENGINEERING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the principles of reservoir engineering and material balance calculation in petroleum reservoirs. The topics include petroleum origin and oil occurrence and migration; oil, gas, and gas-condensate reservoirs; basic drilling of oil and gas wells; p-v-t behavior of natural gas; material balances in gas reservoirs; oil reservoirs under simultaneous dissolved gas drive, gas cap drive, and water drive; generalized material balance in petroleum reservoirs; basic equations for fluid flow in reservoirs, absolute, effective, and relative permeabilities; and a design project on reservoir calculations.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2201 - RECOVERY OF OIL BY WATERFLOODING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Theory of immiscible fluid displacement starting with frontal advance theory and applying it to waterflooding, fluid patterns, sweep efficiency, stratified reservoirs, etc. Relative permeability experiments are simulated.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**PETE 2204 - ENHANCED OIL RECOVERY PROCESSES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers different topics on enhance oil recovery processes (co2, thermal, miscible fluids and surfactants); coal-bed methane, enhanced methane recovery, and underground coal gasification; surface and in-situ heavy oil, tar sand and oil shale production; and co2 capture, sequestration and disposal. The fundamentals, thermodynamics, reaction kinetics and transport phenomena as well as the environmental issues and regulations related to these topics are also covered.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
Course Attributes: MCSI - Sustainability Related

PETE 2205 - PETROLEUM PRODUCTION ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and choke performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering (PENGR)

PETE 2206 - OIL RECOVERY TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This course cover various oil recovery techniques, including waterflooding and enhanced oil recovery (EOR) methods. Emphasis is placed on polymer flooding, steam flooding, and CO2 flooding as well as the environmental issues and regulations associated with these methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PETE 2207 - PETROLEUM AND NATURAL GAS PROCESSING

Minimum Credits: 3
Maximum Credits: 3
The course covers different topics on natural gas, petroleum and petrochemical processing. The topics include natural gas cleanup, methane reforming for h2 production, partial oxidation of ch4 for synthesis gas production, and chemicals from methanol; refinery feedstocks, crude distillation and refinery products, alkylation, hydrotreating, catalytic reforming and isomerization, catalytic cracking, resid, tar sands and oil shale processing; and methanol/other alcohols, ethylene, fertilizer, and plastic production plants.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

PETE 2208 - PETROLEUM DRILLING AND WELL COMPLETION DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course covers different topics related to drilling operations; directional drilling techniques; completion operations; and work-over operations. The drilling operations encompass drilling rig components, bit selection program, drilling fluid types, cementing program design and well control/safety. The directional drilling techniques include: well-path design/applications, downhole motor components, directional surveys, and logging while drilling. The well completion operations contain: formation evaluation tools, open-hole log interpretation, coring tools, flow testing, perforating, hydraulic fracturing and other stimulation techniques. The work-over operations comprise work-over rig components, cased hole log interpretation, plugs/packers/fishing tools, squeeze job design, casing integrity tests and stimulation evaluation. A special project on casing design is also included.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

PETE 2209 - HYDRAULIC FRACTURING MECHANICS AND APPLICATIONS
Minimum Credits: 3
Maximum Credits: 3
Course description: this class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PETE 2211 - RESERVOIR SIMULATION

Minimum Credits: 3
Maximum Credits: 3
This course introduces the students to the simulation process of fluid flow in petroleum reservoirs. Governing equations required to describe fluid flow in porous media are derived, numerical techniques for solving the equations are introduced. Students will learn how reservoir flow simulators can be used in assessment studies of hydrocarbon reservoirs.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

PETE 2212 - CO2 FOR ENHANCED OIL RECOVERY AND FRACKING

Minimum Credits: 3
Maximum Credits: 3
This course will cover the physical properties of CO2 that make it an attractive solvent for enhanced oil recovery (EOR), the natural and anthropogenic sources of CO2, the types of fields that are suitable for CO2 EOR, and the mechanisms responsible for CO2 increasing oil recovery. The current status of CO2 EOR in the United States will also be reviewed, along with its potential for future expansion. The foremost technical challenges of CO2 EOR, namely mobility control and conformance control, will be discussed along with a current research efforts. The course will conclude with a brief review of how CO2 has been used as a hydraulic fracturing, whether as a pure fluid, as the gaseous component of foams, or as an energizing component.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

PETE 2900 - GRADUATE FELLOWSHIPS AND PROPOSAL-WRITING WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This workshop will provide information and guidance to students interested in competing for external fellowships to support their graduate research, as well as instruction on proposal writing in general. The workshop will consist of structured class time and outside-the-class mentoring teams to work with students on the preparation of a fellowship application.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad SN Basis

PETE 2910 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 12
Individual study programs at M.S. Level.
Academic Career: Graduate
PETE 2980 - MS RESEARCH METHODOLOGY

Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

PETE 2982 - ISSUES IN RESEARCH AND TRAINING

Minimum Credits: 2
Maximum Credits: 2
This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PETE 2999 - M.S. THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Pharmacy

PHARM 2001 - PHARMACEUTICAL ANALYSIS

Minimum Credits: 4
Maximum Credits: 4
Current methods utilized in pharmaceutical research for the analysis and isolation of drugs and their metabolites. Theories of extraction, solvent partition and forms of chromatography (adsorption, partition, gas, liquid, counter current, ion exchange, gel-filtration and electrophoresis) are discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Pharmacy students only.

PHARM 2003 - PHARMACOEPIDEMIOLOGY

Minimum Credits: 2
Maximum Credits: 2
Introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.
PHARM 2005 - RESEARCH DISCUSSION COURSE

Minimum Credits: 2
Maximum Credits: 2
Course is designed for students enrolled in the non-thesis MS program. The focus of the course is enhancement of the students' understanding of scientific literature and research methodologies. It will also provide an opportunity for students to learn about and discuss research careers, challenges of clinical vs. Preclinical research, research ethics, and professional development.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 2010 - MASTER OF SCIENCE THESIS

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Pharmacy students only.

PHARM 2015 - COMPREHENSIVE EXAM: NON-THESIS MASTER OF SCIENCE

Minimum Credits: 1
Maximum Credits: 3
Students will be assigned several research papers to study and review independently. The research papers will serve as the base for an in-class comprehensive examination to assess the student's critical thinking skills, writing competence, and ability to synthesize and integrate knowledge acquired during the MS program.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 2510 - EXECUTIVE BOARDROOM

Minimum Credits: 1
Maximum Credits: 1
This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->PBM->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on the potential contribution(s) of this course to the student's education and/or career goals.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3000 - TOPICS IN NEUROSCIENCE

Minimum Credits: 1
Maximum Credits: 1
The objectives of the course are to strengthen the abilities of research-directed, pre- and postdoctoral students to understand and evaluate current research and to describe that research to others in a concise and meaningful way and to broaden students' understanding of fundamental workings of the central nervous system so as to increase their understanding and appreciation for the basic science which under lies and supports current research in the therapeutic treatment of behavioral and psychiatric disorders.

Academic Career: Graduate
PHARM 3002 - ADVANCED PHARMACOKINETICS

Minimum Credits: 4
Maximum Credits: 4
This course deals with fundamental aspects of pharmacokinetic concepts from model building, data analysis and parameter estimates after various routes of drug administration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

Minimum Credits: 1
Maximum Credits: 1
Students will rotate to present recently published scientific papers from reputable journals that are typically chosen by the students with the approval of the course coordinators. This course, structured as a journal club, will introduce topics including but not limited to drug development, drug delivery, biochemical and clinical pharmacology, toxicology, and molecular medicine. The course is intended primarily for first and second year graduate students enrolled in the pharmaceutical sciences program.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Pharmacy students only.

PHARM 3010 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Pharmacy students only.

PHARM 3011 - PRINCIPLES OF BIOCHEMISTRY

Minimum Credits: 1
Maximum Credits: 1
The Principles of Biochemistry course provides a basic underpinning of the biochemical and molecular biology principles that are critical to understand disease states and drug discovery, and mechanisms of action and disposition of pharmaceutical agents. The course provides basic insights into the chemical, physical, thermodynamic and genetic foundations of life. The course complements other required core courses taken: Pharmacology and Foundations of Pharmaceutical Sciences. In addition, the course provides the required background for other elective graduate courses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.
PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS

Minimum Credits: 4
Maximum Credits: 4
Topics include analgesics, antibiotics, antihistamines, autonomic drugs, CNS drugs, cardiovascular drugs, digestive pharmacology, drug abuse, drug laws, hypoglycemics, principles of drug action and reproductive pharmacology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 3032 - MEDICINAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
The course is designed for graduate students starting the second year of a Ph.D. program in chemistry and pharmacy. It teaches the basics of medicinal chemistry and will endow the students with the necessary skills to understand medicinal chemistry scientific literature and to make meaningful proposals of the design/synthesis of drug-like compounds. Topics include energetics of drug-protein interactions, introduction to different types of target classes, introduction to structure based design, including computational chemistry, as well as optimization of hit into leads compound. The course incorporates an extensive exercising part where students are asked to propose and (virtually) perform small target oriented drug discovery projects. Students are required to verbally present twice during this course. Additionally, students are tested twice in written.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course is structured as a journal club focused on translational investigations and is being offered jointly with the universities of Minnesota, North Carolina, and Pittsburgh for 1st and 2nd year graduate students from all three programs who will participate in discussions by live video teleconferencing. Articles emphasizing methods which allow for translation from preclinical to clinical investigation will be discussed in several different therapeutic areas with emphasis on pharmacometrics, genomics, biomarker validation, and drug discovery.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE
Course is designed to provide the recent developments in the field of drug delivery and regenerative therapies to graduate students. This course, structured as a journal club, will introduce different concepts in drug/gene delivery research through analyzing recent scientific literature. It will also expose students to novel regenerative therapies under development and their role in personalized medicine. If possible, we will also introduce some clinical examples where such regenerative therapies have been successfully used in patients. The course will use scientific research articles from high impact factor journals to introduce these concepts. The course is intended primarily for first/second year graduate students enrolled in the MS or Ph.D. program specifically in the pharmaceutics track. Postdoctoral researchers may participate with prior approval from the course coordinators.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

### PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1

Minimum Credits: 2  
Maximum Credits: 2  
Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

### PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2

Minimum Credits: 2  
Maximum Credits: 2  
Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

### PHARM 3040 - STATISTICAL METHODS

Minimum Credits: 3  
Maximum Credits: 3  
Course is designed to teach graduate students standard and advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze simple as well as complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, homework assignments, and exams. At the end of this course, students will have skills to construct and test statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

### PHARM 3042 - RESEARCH PRACTICUM

Minimum Credits: 1  
Maximum Credits: 12  
Course provides practical training in advanced research methodology and skills. Students will be engaged in active research with a faculty member or designate as approved by the student's doctoral committee or by the graduate program director. Students enrolled in the graduate program may register to earn 1-12 units per term until they have advanced to candidacy for the Ph.D. Degree.  
**Academic Career:** Graduate  
**Course Component:** Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3043 - TEACH ME TO TEACH YOU

Minimum Credits: 1
Maximum Credits: 1
Course is designed to introduce graduate students to the art and science of teaching. Course will essentially consist of a brief presentation by faculty on different aspects and approaches to teaching followed by a 30 minutes presentation of basic concepts related to individual research carried out by graduate students.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3045 - ADVANCED STATISTICAL METHODS

Minimum Credits: 3
Maximum Credits: 3
Course is designed to teach graduate students advanced statistical methods of data analysis. Where appropriate and consistent with the students’ educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, in homework assignments, and in exams. At the end of the course, students will have skills to construct and test complex statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Minimum Credits: 1
Maximum Credits: 1
Course is designed to provide an opportunity for the students to informally learn and discuss concepts and applications in the area of drug discovery, design and development.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 3049 - SCIENTIFIC WRITING SKILLS

Minimum Credits: 2
Maximum Credits: 2
Course is designed to provide the systematic approach of reading and writing a scientific paper to graduate students. Writing a review or a research paper in the peer reviewed journals is an integral part of the graduate curriculum. Course will introduce different components of a scientific paper, how to read and summarize a scientific paper, methodical approach towards writing a paper and managing references using endnote software.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3050 - RESEARCH PREPARATION

Minimum Credits: 1
Maximum Credits: 1
Course is designed to provide an opportunity for the students to learn applications, guidelines, regulations, and procedures necessary for safe, ethical, and accountable research. Required course for all non-thesis MS students. Elective for all others.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3051 - SOCIAL & BEHAVIORAL THEORIES IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course provides a comprehensive study of the major social/behavioral theories and models that are relevant to pharmaceutical outcomes and policy research (POPR). Students will critically evaluate and apply social and behavioral science theories from medical sociology, health psychology, engineering, health services research, and related fields to understand utilization of prescription and non-prescription medications, provider prescribing behavior, and patient medication-taking behavior. A focus is placed on helping students apply their knowledge of relevant theories/models to guide the investigation of pharmaceutical outcomes and policy research questions, including hypothesis generation, study design, methodology, and appropriate interpretation of results. Part 1 of the course will introduce and critically evaluate the predominant theories, models, and frameworks used in POPR. Part 2 will evaluate how these theories and models have been applied to address specific topics in POPR, drawing heavily on research studies that have been published in the peer-reviewed literature.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3052 - TOPICS AND METHODS IN PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
Topics and Methods in Pharmaceutical Outcomes and Policy Research is structured as a journal club and is designed to introduce recent developments in pharmaceutical outcomes and policy research, with a focus on observational study design and methodology. Students on the 2nd, 3rd or 4th year of graduate training will have the opportunity to discuss present scientific findings of their own.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3062 - ADVANCED METHODS IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Graduate level course designed to develop student understanding and skills related to research designs and analytic methods for conducting population-based studies drawn from large observational survey and claims databases.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3063 - GRADUATE RESEARCH ROTATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Special research projects are conducted under the supervision of a faculty member to acquaint the graduate student with advanced research techniques.

**Academic Career:** Graduate  
**Course Component:** Practicum
PHARM 3067 - CLINICAL PHARMACY ENVIRONMENTS

Minimum Credits: 2
Maximum Credits: 2
The successful completion of clinical research is dependent upon an understanding of how healthcare is delivered in the environment where it is conducted. A significant number of clinical studies involve drugs and/or the acquisition of drug concentrations. This course is designed for students who do not have clinical pharmacy experience within the U.S. Healthcare system. The goal is to improve these students' abilities to design clinical/translational research studies by introducing fundamental concepts of how pharmaceutical care is delivered in a U.S. Academic health system. To meet this objective, students will gain an appreciation of how pharmaceutical care is delivered through didactic lectures and guided exposures to multiple clinical pharmacy environments with experienced clinical pharmacists. During each field observation, students will be expected to identify the application of pharmacy and therapeutics interventions. Students will also learn how clinical data is generated and stored to deliver daily patient care and how databases may be used for research purposes. Additionally, students are expected to gain an appreciation for the privacy regulations that are associated with accessing protected health information (phi) for research and their implications for designing and conducting clinical/translational research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3068 - COMPUTATIONAL SYSTEMS PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will teach the fundamentals of computational systems pharmacology (CSP) modeling and their applications to study drug actions and rational development of new drugs through network analysis. Theoretical concepts pertaining to computational systems pharmacology, such as drug target identification and computer aided drug design (CADD), will be taught. The course also includes hands-on training with the mainstream network analysis and CADD software, such as Symbiology of Matlab, Tetrad, drug discovery package of Schrodinger. This is a mandatory course to be taken for the PSP program.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3069 - PHARMACOMETRICS

Minimum Credits: 3
Maximum Credits: 3
This course will provide training in the fundamentals of pharmacometrics & systems pharmacology (PSP) modeling and their applications to study drug actions through multiscale modeling and simulations [mechanism-driven] and data analysis [data-driven]. Theoretical concepts pertaining to PSP, such as population pharmacokinetics/pharmacodynamics (pop PK/PD) modelling both from mechanistic and statistical points of view, physiologically-based pharmacokinetics (PBPK) data analysis, will be taught. The course covers the advanced pharmacokinetics/pharmacodynamics (PK/PD) topics, such as drug-drug interactions, disease progression, as well as multi-scaling PK/PD modeling of drug actions for selected diseases, including cancers, type 2 diabetes, etc. The course also offers hands-on training on using mainstream population PK/PD and PBPK modeling and simulation software. This is a mandatory course to be taken for the PSP program.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3070 - GENOMICS & CANCER THERAPEUTICS

Minimum Credits: 1
Maximum Credits: 1
This course, structured as a journal club, is designed to provide an opportunity for students to informally learn and discuss concepts and applications in the area of genomics and cancer therapeutics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3071 - FOUNDATIONS OF PHARMACEUTICAL SCIENCES**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  

The discovery, development, and evaluation of new medications and dosage forms, is a cornerstone of pharmaceutical sciences research. This course provides an overview of the drug development process, from preclinical discovery through clinical testing and evaluation. The course begins with a discussion of natural products, small molecule development, physicochemical properties of drugs, computational approaches to lead generation and drug design, target identification, and high throughput screening methods for identifying active compounds. This is followed by an overview of screening methods for identifying the best drug candidates, and then how drug candidates are formulated to overcome barriers to effective drug delivery. The next segment of the course focuses on clinical evaluation of drug safety and efficacy. This includes how animal models are used in transitioning from preclinical to clinical drug development, followed by discussions of how biomarkers are used in drug development, human equivalent dosing, the different phases of clinical trial design, and how PK/PD modeling and simulation can be used to model and predict clinical efficacy. The final segment of the course focuses on methods for evaluating the impact of medications on patient disease populations.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3072 - TOPICS IN PHARMACOKINETICS/PHARMACODYNAMICS JOURNAL CLUB**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

Course involves a discussion of current topics of interest in pharmacokinetics and pharmacodynamics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3073 - APPLIED MULTIVARIATE STATISTICAL ANALYSIS IN PHARMACEUTICAL SCIENCES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is designed to teach graduate students multivariate statistical methods. Where appropriate and consistent with the students' educational background, theoretical foundations for multivariate statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply multivariate statistical methods appropriate for analyzing complex data sets and statistical problems presented during class sessions, in homework assignments, and in an exam. At the end of this course, they will have skills to construct and test and analyze complex statistical models. Furthermore, they will be able to understand multivariate statistical methods used in research articles and critique the methods selected. The major topics covered in this course will be (1) matrix and vector algebra, (2) measures of central tendency, dispersion, and association, (3) graphical display of multivariate data, (4) multivariate normal distribution, (5) inference for means, (6) multivariate regression, (9) multivariate analysis of variance, (10) canonical correlation coefficient, (11) repeated measures analysis, (12) principal component analysis, (13) factor analysis, (14) cluster analysis, (15) discriminant analysis, classification and pattern recognition. Students will be required to apply statistical software packages, such as STATA, SPSS, SAS, R or other appropriate programs.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3074 - INTRODUCTION TO REGULATORY ASPECTS OF DRUG DEVELOPMENT**
Minimum Credits: 1  
Maximum Credits: 1

This course is designed to orient graduate students and students of PharmD program with foundational knowledge on regulatory aspects of drug development process including drug and biologic products. This course will introduce students with various regulatory agencies worldwide with emphasis on regulations by the US Food and Drug Administration (FDA). It will introduce types of applications in drug approval process including Investigational New Drug application (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA), and Biologic Licensing Application (BLA). The course will provide overview of various requirements for approval of a drug product such as Preclinical toxicology, Chemistry, Manufacturing and Controls (CMC), clinical data required to establish safety and effectiveness (Phase 1 to Phase 3 trials) and post-marketing regulations. Through this introductory course, graduate students of School of Pharmacy will gain basic knowledge about regulatory pathways for drug and biologic products. The students can then use the acquired knowledge in their research projects (if applicable) or take additional courses in regulatory affairs. This course will also expose the students to various career opportunities in regulatory affairs.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

---

**PHARM 3075 - TOPICS IN PHARMACOGENOMICS AND PRECISION MEDICINE**

Minimum Credits: 1  
Maximum Credits: 1

This course is a journal club for students interested in the application of pharmacogenomics and precision medicine. The course will cover specific topics related to pharmacogenomics implementation, genotype-phenotype discovery, informatics, data science, and implementation science as they relate to pharmacogenomics and precision medicine.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

---

**PHARM 3076 - FOUNDATIONS OF PRECLINICAL DRUG DEVELOPMENT AND DELIVERY**

Minimum Credits: 2.5  
Maximum Credits: 2.5

The discovery, development, and evaluation of new medications and dosage forms, is a cornerstone of pharmaceutical sciences research. This course provides an overview of initial stages of the drug development process, including principles of preclinical drug discovery and development as well as factors that contribute to the formulation and delivery of medications. The course begins with a discussion of natural products, and quickly moves into small molecule development, physicochemical properties of drugs, computational approaches to lead generation and drug design, target identification, and high throughput screening methods for identifying active compounds. This is followed by an overview of screening methods for identifying the best drug candidates, including metabolic and toxicology screening, transporter screening, and methods for identifying drug-drug/drug-gene interactions. The last portion of the course focuses on how drug candidates are then formulated to overcome barriers to effective drug delivery. Emphasis is placed on understanding the drug development process and methods that are used to identify, develop, and formulate drug candidates for preclinical testing.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PHARM 3011; PROG: School of Pharmacy

---

**PHARM 3077 - FOUNDATIONS OF CLINICAL DRUG DEVELOPMENT AND ASSESSMENT**

Minimum Credits: 1.5  
Maximum Credits: 1.5

The development and testing of medications for clinical safety and effectiveness is an essential component of the drug development process. This course provides an overview of the principles and methods used to evaluate the safety and efficacy of medications in individuals and in patient disease populations. The course begins with a brief discussion of how animal models are used in transitioning from preclinical to clinical drug development. This is followed by discussions of how biomarkers are used in drug development, human equivalent dosing, the different phases of clinical trial design, and a discussion of how PK/PD modeling and simulation can be used to model and predict clinical efficacy. The next part of the course focuses on methods for evaluating the impact of medications on patient disease populations. Topics include causal inference and study design, data sources and collection methods, phase 4 trials, the use of big data including pharmacogenomics data in clinical research, and methods for adverse effect detection and reporting. Emphasis is placed on understanding the processes and methods that are used to evaluate medication safety and effectiveness.
PHARM 3078 - MEDICATION PHARMACOLOGY: A PHARMACOLOGIC FRAMEWORK FOR UNDERSTANDING DRUG ACTION

Minimum Credits: 2
Maximum Credits: 2
This course is intended for pharmacoanalytics graduate students without previous pharmacology courses. The course provides a pharmacologic framework for understanding drug action. Students will gain an understanding of general mechanisms of action for drugs, what happens to the drug after ingestion, sources of variability in drug response and the research needed to show a drug is safe and effective. Students will gain insight into the many disciplines and skills that contribute to development of new medications by examining and evaluating content from new drug applications, post-marketing evaluations and marketing materials of currently marketed drug products.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3300 - CONCEPTS IN PHARMACOECONOMIC AND OUTCOME EVALUATIONS IN HEALTH AND MEDICINE

Minimum Credits: 1
Maximum Credits: 1
This course serves as a competency-based application of advanced concepts in economic and outcomes evaluation in health and medicine. The theories and necessity of health economic evaluations will be reinforced with examples from real-world scenarios and emphasize hands-on advanced modeling activities. Topics include Markov modeling, sensitivity analyses to address model uncertainty, budget impact analysis, and health state utility assessment. Knowledge of data manipulation in Excel is preferred prior to course enrollment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3301 - SECONDARY DATABASE APPLICATIONS

Minimum Credits: 1
Maximum Credits: 1
This course serves as an introduction to commercially and publicly available databases including administrative datasets, clinical datasets, spontaneous reporting datasets and datasets for national representative surveys used for large-scale data analyses. Students will understand how to accrue commercially and publicly databases. Students will explore the advantages and disadvantages to various databases. Students will develop skills in using tools to assist with management and analysis of secondary databases. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); secondary data sources, methods and tools are preferred prior to course enrollment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3302 - CONDUCTING RESEARCH WITH LARGE BIOMEDICAL DATABASES

Minimum Credits: 1
Maximum Credits: 1
This course serves as an introduction to core data science methods for querying large-scale datasets, primarily focusing on relational databases. The course is entirely online via short videos and web-based homework assignments. Students will develop skills understanding data found in clinical information systems, biomedical data standards and terminologies, and strategies for managing and storing biomedical data. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); basic statistics course and introductory to programming experience are preferred prior to course enrollment.

Academic Career: Graduate
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 3303 - TOPICS AND METHODS FOR SECONDARY DATABASE EVALUATIONS**

Minimum Credits: 1  
Maximum Credits: 1  
Topics and Methods for Secondary Database Evaluations is structured as a journal club and is designed to discuss pragmatic research with large secondary databases, with a focus on observational study design, analytics and methods. Students will have the opportunity to discuss, critique and present published literature.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

**PHARM 3304 - RESEARCH METHODS FOR PHARMACEUTICAL PRACTICE AND POLICY**

MinimumCredits: 1.5  
Maximum Credits: 1.5  
This course serves as competency-based application of research methods for pharmaceutical practice and policy. This course will address the conceptualization and operationalization of research, study design considerations, and secondary data analysis. Students will also learn how to operationalize data metrics for medications and outcomes using large databases. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); basic statistics course and introductory to programming experience are preferred prior to course enrollment.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 3306 - INTRODUCTION TO THE UNITED STATES HEALTHCARE SYSTEM AND PHARMACEUTICALS**

Minimum Credits: 1  
Maximum Credits: 1  
This is a competency-based course designed to introduce students to the US Healthcare System and pharmaceutical policy. This course will cover the organization, financing, and principal stakeholders of the US healthcare system. Additionally, this course will examine central concepts related to pharmaceutical policy; including, pharmaceutical pricing, spending, and use within the healthcare system. Students will also learn concepts in healthcare policy, pharmacoeconomics, and value-based healthcare.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 3308 - DATA PRIVACY AND SECURITY**

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to introduce students to policies and regulations regarding privacy and security for using clinical and sensitive data for clinical research. Students will learn about de-identification methods, encryption standards and network security. The students will be required to write and evaluate data security and sharing plans as well as organizational policies.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**PHARM 3310 - SECONDARY DATA SOURCES, METHODS AND TOOLS**
Minimum Credits: 1  
Maximum Credits: 1  
This course will give the student an understanding of how to develop and use a software infrastructure to support projects using secondary data. Students will learn methods for selecting appropriate software tools for a project and gain exposure to software tools to support natural language processing, machine learning and neural networks. The course will include discussions of real-world examples of successful projects using various infrastructures.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

PHARM 3312 - COMMUNICATING DATA

Minimum Credits: 1  
Maximum Credits: 1  
This course will offer a survey of methods for communicating the results of data analyses in healthcare. Best practices for different modes of presenting (oral and written) data will be introduced and applied. As data visualization has grown in importance, students will learn which figures and plots are most effective in specific cases. These methods will be reviewed, applied to various scenarios, and assessed in this course. Knowledge of data manipulation in some platform (STATA, SAS, Python, R, Tableau); descriptive statistics course and project data or familiarity with utilizing open data sets are preferred prior to course enrollment.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Pharmacy students only.

PHARM 4999 - FULL TIME STATUS

Minimum Credits: 0  
Maximum Credits: 0  
Designed to accommodate summer billing for pharmacy students.  
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: No Grade Required  
Course Requirements: School of Pharmacy students only.

PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS

Minimum Credits: 3  
Maximum Credits: 3  
First of six semester sequence of courses that support the students’ development of competence in four major areas- clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS

Minimum Credits: 3.5  
Maximum Credits: 3.5  
The second of six courses that support the students’ development of competence in clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.
PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS

Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR

Minimum Credits: 1
Maximum Credits: 1
A continuation of experiential education from term 1. Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5114 - ANATOMY AND PHYSIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
First part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 5115 - ANATOMY AND PHYSIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
Second part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 5118 - PRINCIPLES OF DRUG ACTION

Minimum Credits: 4
Maximum Credits: 4
To enable students to apply principles of drug-receptor interactions, conceptualize principles of medicinal chemistry with regard to drug design and development, understand the relationship between drug action and chemical structure, understand the relationship between dosage forms and oral bioavailability, understand basic pharmacokinetic and pharmacodynamic concepts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5119 - DRUG DEVELOPMENT 1

Minimum Credits: 4
Maximum Credits: 4
Course examines sources of drugs and the process of drug development and the drug approval process. Since drug metabolites may play an important role in the activity or toxicity of a drug, early phases of the approval process require extensive metabolism studies. Course also covers the biochemistry of drug metabolism and chemical pathways of metabolism.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5120 - THE EMERGING PROFESSIONAL

Minimum Credits: 1
Maximum Credits: 1
The emerging professional is designed to stimulate the development of professional attitudes and behaviors and an understanding of the opportunities within the pharmacy profession. Professionalism, ethics, management of self, and the profession of pharmacy are themes of the course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5121 - CASE CONFERENCE SERIES 2

Minimum Credits: 1
Maximum Credits: 1
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5122 - CASE CONFERENCE SERIES 1

Minimum Credits: 1
Maximum Credits: 1
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.
PHARM 5124 - BIOCHEMISTRY 1: FUNDAMENTALS

Minimum Credits: 3
Maximum Credits: 3
First of two course sequence that describes structure, properties, biological functions, kinetics, and metabolic fate of macromolecules including protein and carbohydrates that are essential to life and apply knowledge to the molecular basis of selected diseases and medication use.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5125 - BIOCHEMISTRY 2: DNA, PHARMACOGENOMICS & BIOTECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
Course builds on principles introduced in Biochemistry 1. Second of two course sequence that describes structure and function of macromolecules such as lipids and nucleic acids while focusing on DNA, gene regulation, pharmacogenomics and applications to pharmacotherapy and biotechnology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 5133 - PROFESSIONAL AND CAREER DEVELOPMENT 1

Minimum Credits: 0.5
Maximum Credits: 0.5
This course, part of a longitudinal sequence, provides a thoughtful, sequential progression of themes of self-development, career development and professional development, incorporating skills for success and documentation of outcome-focused progress.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE

Minimum Credits: 3
Maximum Credits: 3
The third of a six course sequence that supports students' development of competence in four major areas: clinical skills, social science in pharmacy, managing as a professional pharmacist, and professional inquiry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION

Minimum Credits: 3
Maximum Credits: 3
The fourth of a six-course sequence that supports students' development of competence in four major areas: clinical skills, psychosocial dimensions of practice, managing as a professional pharmacist, and professional inquiry.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS

Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT-IMMERSION IN PRACTICE

Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE

Minimum Credits: 3.5
Maximum Credits: 3.5
Provides a comprehensive evaluation of the pathophysiology and treatment of cardiovascular disease. The pharmacology and therapeutic use of cardiovascular drugs is presented in relation to the management of hypertension, coronary artery disease, heart failure, arrhythmia, thromboembolic disorders, and acute myocardial infarction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE

Minimum Credits: 4
Maximum Credits: 4
Course provides students with a fundamental understanding of the mathematical relationships that are available to quantify the rate and extent of drug absorption, distribution, metabolism and excretion.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY

Minimum Credits: 4
Maximum Credits: 4
Course provides students with a fundamental understanding of the physical-chemical properties of various drug dosage forms. Students will compound several different dosage forms in the laboratory portion of the course.
PHARM 5220 - CASE CONFERENCE SERIES 3

Minimum Credits: 1  
Maximum Credits: 1  
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis within this course series include but are not limited to patient assessment, development of pharmaceutical care plans, verbal and written communicating to patients and providers, and retrieval and critical evaluation of quality health care information with application to individual patient care settings. Patient case activities will be planned to reinforce the knowledge and skills introduced in concurrent courses within the semester, as well as reinforcing previously-learned scientific and patient care principles, skills and knowledge from preceding semesters. During the fall P2 year, each session will use skill building exercises in the context of concurrent courses listed above.

PHARM 5222 - FUNDAMENTALS OF IMMUNOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to provide students with fundamental knowledge of the immune system and integrate elements of basic and applied immunology with pharmacy practice. Principles in immunology will be reviewed, including mechanisms of inflammation and actions of antibodies, complement, and cytokines. The course will also introduce selected immune-based disorders and principles of immunization.

PHARM 5223 - GASTROENTEROLOGY/NUTRITION

Minimum Credits: 2  
Maximum Credits: 2  
Students demonstrate and apply concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected gastrointestinal diseases and states of nutritional deficiency. Students develop the ability to design, monitor, and refine safe and cost effective treatment plans and provide appropriate information to patients, caregivers, and health professionals.

PHARM 5225 - ADVANCED PHARMACEUTICAL CARE 1

Minimum Credits: 1  
Maximum Credits: 1  
Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in 'capstone' experiences to manage pharmaceutical care problems in ambulatory and acute care settings.
PHARM 5227 - CASE CONFERENCE SERIES 4

Minimum Credits: 1
Maximum Credits: 1
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5229 - FUNDAMENTALS OF NEPHROLOGY/PULMONOLOGY

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide students with opportunities to apply knowledge of physiology, pathophysiology, pharmacology and therapeutics in provision of pharmaceutical care for patients with selected renal and pulmonary disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and quality of life. Expanding on current knowledge and acquiring new knowledge of disease states and therapies, students will be challenged through team-based learning, using a series of TBL sessions focused in selected aspects of pharmaceutical care to patients with renal and pulmonary diseases. The course will integrate with prior learning (i.e. cardiology, anatomy and physiology) and concurrent learning (case conferences, infectious diseases).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5231 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1: COMMUNITY-BASED

Minimum Credits: 3
Maximum Credits: 3
The first in a 2-course sequence which uses an integrated approach to the assessment and management of common community-based infectious diseases. Using large group instruction, case-based practica and other instructional methods, students have the opportunity to acquire scientific knowledge and develop patient care decision-making and plan development skills relevant for a pharmacy practitioner in community practice. Elements of microbiology, immunology, chemistry, pharmacology and therapeutics will be interwoven throughout the course to provide students with structured and organized learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5233 - PROFESSIONAL AND CAREER DEVELOPMENT 2

Minimum Credits: 0.5
Maximum Credits: 0.5
This course, part of a longitudinal sequence, provides a thoughtful, sequential progression of themes of self-development, career development and professional development, incorporating skills for success and documentation of outcome-focused progress.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
Minimum Credits: 2
Maximum Credits: 2
Provides the knowledge, skills and attitudes necessary to practice pharmacy. Will focus on clinical skills, psychosocial dimensions of practice, pharmacy management and professional inquiry. Topics include principles of pharmacoeconomics, pharmacoeconomic decision making, quality improvement and total quality management, and population-based decision making. Individual and group presentations, case analyses and projects will be used to incorporate pharmacoeconomic principles into therapeutic decision-making and enhance the communication skills of students.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING

Minimum Credits: 1
Maximum Credits: 1
Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT

Minimum Credits: 1
Maximum Credits: 1
Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5314 - IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2
Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry, and therapeutics in the evaluation and treatment of selected diseases of the immune system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and provide appropriate information to patients, caregivers and health professionals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5315 - ONCOLOGY/HEMATOLOGY

Minimum Credits: 2
Maximum Credits: 2
Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of various types of cancer and diseases of the blood. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.
Academic Career: Graduate
Course Component: Lecture
PHARM 5316 - PULMONOLOGY/RHEUMATOLOGY

Minimum Credits: 2
Maximum Credits: 2
Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected pulmonary and rheumatic diseases. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5318 - ENDOCRINOLOGY

Minimum Credits: 3
Maximum Credits: 3
Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected disorders of the endocrine system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5319 - NEUROLOGY/PSYCHIATRY

Minimum Credits: 4
Maximum Credits: 4
Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected neurological and psychiatric disorders. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5320 - POPULATION HEALTH AND MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
The course focuses on the United States health system and its connection to the pharmacist, principles of management and business for the pharmacist, and public health pharmacy. Core concepts addressed will include: health disparities, program development and evaluation, health literacy, health behavior change, access to essential medicines, health care reform, payment structures, business planning, personal and professional management, human resources, advocacy, emergency preparedness, safety nets, cultural competency, and global health.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5321 - CRITICAL CARE AND ADVANCED NEPHROLOGY

Minimum Credits: 2
Maximum Credits: 2
Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in “capstone” experiences to manage pharmaceutical care problems in ambulatory, acute care, and critical care settings.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5322 - PHARMACY LAW**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is focused on pharmacy law, with a focus on general concepts of constitutional law and an overview of the legal process in the United States. Students will learn by analyzing statutes, regulations, and case law examples. The areas covered will include laws and regulations relevant to pharmacy practice, civil liability including malpractice, and some business-related legal material.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5323 - CASE CONFERENCE SERIES 6**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5324 - CASE CONFERENCE SERIES 5**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis within this course series include but are not limited to patient assessment, development of pharmaceutical care plans, verbal and written communicating to patients and providers, and retrieval and critical evaluation of quality health care information with application to individual patient care settings. Patient case activities will be planned so as to reinforce the foundational knowledge and skills introduced in concurrent courses within the semester, as well as reinforcing previously-learned scientific and patient care principles, skills and knowledge from preceding semesters. During the fall P3 year, each Case Conference session will use skill building exercises in the context of concurrent courses. Additionally, two comprehensive Capstone Cases will challenge students to demonstrate the desired comprehensive skills in patient care through patient assessment, care plan development, ability to communicate with patients and providers, and provide quality patient care recommendations with evidence-based justifications.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5326 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2: HEALTH-SYSTEMS-BASED**
The second in a 2 course sequence which uses an integrated approach to the assessment and management of health system-based infectious diseases. Using large group instruction, case-based practica and other instructional methods, students have the opportunity to acquire scientific knowledge and develop patient care decision-making and plan development skills relevant for a pharmacy practitioner in health systems practice. Elements of microbiology, immunology, chemistry, pharmacology and therapeutics will be interwoven throughout the course to provide students with structured and organized learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5328 - ADVANCED THERAPEUTICS: IMMUNOLOGY

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to reinforce previously-learned fundamental immunology concepts through application to immune-mediated disease states. Elements of immunology, medicinal chemistry, pharmacology, and therapeutics are illustrated, reinforced, and applied through case-oriented discussion sessions and assignments designed to enhance skills in problem-solving, patient assessment, drug selection, and monitoring.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5333 - PROFESSIONAL AND CAREER DEVELOPMENT 3

Minimum Credits: 0.5
Maximum Credits: 0.5
This course, part of a longitudinal sequence, provides a thoughtful, sequential progression of themes of self-development, career development and professional development, incorporating skills for success and documentation of outcome-focused progress.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

PHARM 5400 - PHARMD SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students learn communication and organizational skills necessary to present professional seminars.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.
PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6

Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate
PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7

Minimum Credits: 5  
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad HSU Basis  
Course Requirements: School of Pharmacy students only.

PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Minimum Credits: 5  
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad HSU Basis  
Course Requirements: School of Pharmacy students only.

PHARM 5409 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 9

Minimum Credits: 5  
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad HSU Basis  
Course Requirements: School of Pharmacy students only.

PHARM 5410 - ADVANCED PHARMACY PRACTICE EXPERIENCE 1 - INTERNATIONAL

Minimum Credits: 5  
Maximum Credits: 5
Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.
Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad HSU Basis  
Course Requirements: School of Pharmacy students only.

PHARM 5411 - ADVANCED PHARMACY PRACTICE EXPERIENCE 2 - INTERNATIONAL

Minimum Credits: 5  
Maximum Credits: 5
Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad HSU Basis
**Course Requirements:** School of Pharmacy students only.

**PHARM 5412 - ADVANCED PHARMACY PRACTICE EXPERIENCE 3 - INTERNATIONAL**

- **Minimum Credits:** 5
- **Maximum Credits:** 5

**PHARM 5413 - ADVANCED PHARMACY PRACTICE EXPERIENCE 4 - INTERNATIONAL**

- **Minimum Credits:** 5
- **Maximum Credits:** 5

**PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS**

- **Minimum Credits:** 1
- **Maximum Credits:** 6

A sequence of courses that address issues related to providing pharmaceutical care to underserved populations. Topic areas that will be addressed include: psychosocial factors impacting health, political and economic influences on health care access, community advocacy and resources, patient assessment, clinical problem solving skills, pharmacotherapy management, and patient education. Students will have opportunities for interdisciplinary care and educational sessions.

**Academic Career:** Graduate
**Course Component:** Practicum
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Pharmacy students only.

**PHARM 5805 - COMMUNITY PHARMACY MANAGEMENT**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Discussion of the principles and procedures of management involved in community pharmacy practice.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Pharmacy students only.

**PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE**
Minimum Credits: 2
Maximum Credits: 2
Provides students with opportunities to acquire the knowledge and skills necessary to provide pharmaceutical care to pediatric patients of all ages.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5812 - HEALTHCARE INNOVATIONS 1

Minimum Credits: 1.5
Maximum Credits: 1.5
Students will be able to effectively participate in a healthcare innovation application team as either a leader or participant that results in the application of an evidence-based healthcare innovation, which leads to improved patient care. Students will be able to develop detailed and effective strategic frameworks from which they can outline and track their progress in implementing a healthcare innovation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION

Minimum Credits: 3
Maximum Credits: 3
Course is designed to allow students to apply clinical knowledge, skills and attitudes gained in previous courses to care for patients with advanced cardiovascular diseases and those that are critically ill. Students will expand on the concepts gained throughout the pharmacotherapy of cardiovascular disease course. Course utilizes simulation based learning to enhance clinical decision-making processes. A major component of the course is self-study requiring an adult learning approach to education. The adult learning concept will require students to be responsible for and highly interactive in achieving the objectives of the course. This learning environment will foster clinical decision making and reinforce concepts learned throughout the school's curriculum. Also, it will provide an excellent source for objective assessment of student knowledge and performance.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION

Minimum Credits: 3
Maximum Credits: 3
This course for third professional year pharmacy students will introduce and discuss important topics in global health, focusing specifically on care of the underserved in a global context. Topics discussed will include health policy and economics, determinants of health, essential medicines, community-oriented primary care, structural violence, malnutrition and tropical medicine. In addition to readings and weekly discussion groups, students will have the opportunity to gain valuable practice-based skills by working in underserved clinics in Pittsburgh.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to understand the fundamental concepts in managed care pharmacy and the relation to the healthcare system. This course supports the school's mission by enabling students to better navigate and understand the healthcare system from the perspective of different stakeholders to help optimize pharmaceutical care.
Academic Career: Graduate
PHARM 5818 - MEDICAL PARASITOLOGY

Minimum Credits: 1
Maximum Credits: 1
Course offers a concise presentation of the protozoan and helminthic parasites of medical importance, with an emphasis on parasitic morphology and life cycle, disease transmission, pathogenesis, prophylaxis, therapy and epidemiology.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)

Minimum Credits: 3
Maximum Credits: 3
Course is designed especially for students interested in advancing and leading change in community pharmacy practice. The objective is to mentor and support students in effective and meaningful community pharmacy-based patient care research. Students will engage in a combination of on-line lecture content and small group; weekly discussions throughout the summer months. Students will initiate and complete a research project in the community. The purpose of the project is to: 1. Familiarize students with the key components in carrying out a valid research project from conceptualization to final report (abstract; meeting presentation). 2. Develop research problem solving skills through working group discussions and by working research problem solving skills through working group discussions and by working closely with project mentor. 3. Enhance verbal and written communication skills through formal and informal presentations and scientific writing. 4. Contribute to the diversity of the students' expertise through meeting and discussing with experts in community practice and research nationally.
Academic Career: Graduate
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5820 - PHARMACY INNOVATION 1

Minimum Credits: 1
Maximum Credits: 1
The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5821 - PHARMACY INNOVATION 2

Minimum Credits: 1
Maximum Credits: 1
The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.
Academic Career: Graduate
Course Component: Seminar
PHARM 5822 - RESEARCH FUNDAMENTALS

Minimum Credits: 2
Maximum Credits: 2
Course is designed to provide students with a comprehensive survey of research. The topics covered encompass specific topics related to research. Course content includes an introduction to: hypothesis generation, writing the introduction, design of study, report on a technique and various additional topics related to research. The overall goal of the course will be practical applied discussion of the steps involved in the process of generating new knowledge through research. Students completing this course will gain the design, conduct and report their research in the form of a poster and/or podium presentation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5825 - HEALTHCARE INNOVATIONS 2

Minimum Credits: 2
Maximum Credits: 2
Course is to provide the students who have successfully completed Healthcare Innovations 1 the opportunity to apply what they have learned by observing successful and unsuccessful innovation applications within the VA health system in Pittsburgh and using the innovation model master in Part 1 of this two-part course to provide evaluative insight as to why the innovations observed may have succeeded or failed to succeed. As part of this course, the students will also learn about the veterans engineering resource center (VERC) program at the VA and how it guides the development and implementation of innovations that aim to improve healthcare quality and outcomes for participating veterans.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5826 - ADVANCED PEDIATRIC PHARMACEUTICAL CARE

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to extend knowledge and skills in intensive and/or advanced pediatric specialties, building on previously developed fundamental knowledge of pediatric physiology, pathophysiology, pharmacology and therapeutics, so as to advance pharmaceutical care for infants and children with selected disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and quality of life.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)

Minimum Credits: 2
Maximum Credits: 2
The primary purpose of the course is to adequately prepare learners to execute an outcomes research-based project during the P4 curriculum. As a required component of the pharmacotherapy scholars program, this course will enable P3 students in the spring semester to design a study, submit the required institutional review board documents, and strengthen their data analysis skills.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 5831 - HEALTHCARE FOR LGBTQIA COMMUNITY

Minimum Credits: 2
Maximum Credits: 2
This course will prepare the student to assess and guide comprehensive medical treatment for LGBTQIA individuals. Students will learn about cultural competency and inclusive language, screening and diagnosis, gender affirmation, primary and preventative care, and advocacy.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
Course Attributes: Gender, Sexuality & Women's St

PHARM 5832 - LITERATURE AND FILM TO UNDERSTAND PATIENT-PRACTITIONER EXPERIENCES

Minimum Credits: 1
Maximum Credits: 1
This course is open to students from across the health sciences and will be directed by an interprofessional faculty team. This course emphasizes the importance of understanding the universal human aspects of health and disease to further develop empathetic and holistic skills among health professional students. The importance of interprofessional collaboration as a mechanism to improve patient outcomes will be explored. Students and faculty will read and/or view selected works that focus on the human condition that may impact the physical and/or psychological health of the patient, families, communities, and care providers - and their interaction with the health care system. Guided discussion that helps students to reflect on the humanistic aspects of health care will be conducted.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5834 - PYTHON FOR DATA MANAGEMENT AND ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to programming, data processing, and data analytics using Python for highly motivated students with little or no prior experience in programming. The course will focus on learning the Python programming language in the context of working with data, planning and organizing programs, commonly-used algorithms, data management, data cleaning, and basic data mining.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5835 - REINVENTING THE INCUMBENT: DESIGNING AN INTRAPRENEURSHIP STRATEGY

Minimum Credits: 1
Maximum Credits: 1
The goal of this course series is to introduce didactic and experiential elements of entrepreneurship for pharmacy students. This course offers students the foundations required to successfully understand, create, and execute entrepreneurial ideas in pharmacy. This includes learning from success in other fields, understanding the components that comprise pharmacy, and identifying current opportunities in pharmacy. Concepts of business models, funding, consumer behavior in healthcare and landscape reviews of technology in healthcare will be reviewed in this course. Career focuses for students would benefit in learning about starting a new company to disrupt incumbents, starting and managing new projects within an existing corporation, and new Management within the field of innovation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5836 - SIDE PROJECT: BUILDING VALUE WITH YOUR SPARE TIME
Minimum Credits: 1
Maximum Credits: 1
The goal of this course series is to introduce didactic and experiential elements of entrepreneurship for pharmacy students. This course offers students the foundations required to successfully understand, create, and execute entrepreneurial ideas in pharmacy. This includes learning from success in other fields, understanding the components that comprise pharmacy, and identifying current opportunities in pharmacy. Concepts of start-up methodology, management/leadership, and company culture will be reviewed in this course. Career focuses for students would benefit in learning about starting a new company to disrupt incumbents, starting and managing new projects within an existing corporation, and new Management within the field of innovation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

**PHARM 5837 - INTRO TO PSYCHOPHARMACOLOGY & PSYCHIATRIC DISORDERS: AN INTERPROFESSIONAL APPROACH**

Minimum Credits: 3
Maximum Credits: 3
This course will serve as an introduction to psychopharmacology and the management of common psychiatric disorders including substance use disorders. This course is designed to familiarize students with the fundamentals of pharmacological as well as non-pharmacological treatment from a historical, sociological and practice perspective. This course aims to increase mental health literacy and enhance practitioner competency while elucidating the roles of healthcare providers within an interprofessional team framework. This is an introductory course. No prerequisites are required.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

**PHARM 5838 - IMPROVISATION FOR CLINICIANS**

Minimum Credits: 1
Maximum Credits: 1
Principles of improvisation are surprisingly applicable in clinical settings. The central tenant of improv is acceptance. Using the core philosophy of "Yes, and", improvisers learn to listen, accept, and empathize. Clinicians must also use these same skills to communicate with their patients and empathize with them. Improvisers use teamwork and spontaneity to build scenes. Clinicians must collaborate learn to calmly handle unexpected scenarios. Improvisers use techniques and exercises to hone these skills, which, for clinicians, can lead to better patient interactions, collaboration, presentation skills, and even lower stress. We will learn about the principles of improv, exercises used to develop skills, and how improv training has been applied in clinical settings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

**PHARM 5839 - COMPREHENSIVE DIABETES MANAGEMENT**

Minimum Credits: 2
Maximum Credits: 2
This internet-based course provides students with a multidisciplinary foundation in the principles of diabetes management. Students will develop their knowledge and ability to assess, manage, educate and monitor patients with diabetes. Pathophysiology, monitoring, complications, and treatment including pharmacotherapy, medical nutrition therapy, and exercise therapy will be explored.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

**PHARM 5840 - PALLIATIVE CARE PHARMACOTHERAPY**
This semester long elective course is designed to provide the student with an advanced understanding of palliative and hospice care principles, the pharmacotherapeutic management of pain and non-pain symptoms occurring in patients with advanced illness, and the process of deprescribing. This elective will expand on the concepts gained throughout the first and the second professional years. The purpose of this course is to prepare the student to develop rational, patient-centered, and goal directed drug therapy and monitoring plans for patients with life-limiting illnesses throughout the life continuum. The goal of this elective experience is for the students to develop the attitudes, knowledge and skills necessary to participate in effective and compassionate palliative care.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5842 - PHARMACY IN THE WORLD OF TOMORROW**

Minimum Credits: 1  
Maximum Credits: 1  
This class would be a means of educating students on what to expect in the coming years, the health impacts of climate change, and how they can be greater global citizens moving forward. The structure of the class would be split into two parts. The first half of the class would act as a kind of journal club to give the students the space and opportunity to learn about the socio-political and systemic impact of rising global temperature. The second half of the class will be focused more on discussing what can be done and how pharmacy could look in the future. Topics will range from climate apartheid, disaster preparedness, and the crumbling of infrastructure.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5843 - INTERNSHIP FOR ADVANCING PRACTICE**

Minimum Credits: 0.5  
Maximum Credits: 0.5  
Students enrolled in this course will have the opportunity to reflect on the relationship of their outside-the-classroom pharmacy-related internship with their development of PITT Pharmacy curricular outcomes and on their pursuit of a career in pharmacy.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

**PHARM 5844 - QUEERNESS AND HEALTHCARE**

Minimum Credits: 1  
Maximum Credits: 1  
This course will prepare the student to assess and guide comprehensive medical treatment for queer individuals. This includes gender affirmation, healthcare considerations for queer-specific risk factors, and general primary care not associated with gender and sex. Core concepts to be addressed include cultural competency and inclusive language, screening and diagnosis, gender affirming hormone therapy, gender affirming surgeries, psychotherapy, primary and preventative care, and empathy with the queer experience.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PHARM 5851 - SPECIAL TOPICS 1**

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or
other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 5852 - SPECIAL TOPICS 2**

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 5853 - SPECIAL TOPICS 3**

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

**PHARM 5854 - SPECIAL TOPICS 4**

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

### PHARM 5856 - SPECIAL TOPICS 6

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

### PHARM 5857 - SPECIAL TOPICS 7

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

### PHARM 5858 - SPECIAL TOPICS 8

Minimum Credits: 1  
Maximum Credits: 3  
Special Topics elective courses promote student opportunities to personalize education by engaging in mentored experiences in a particular area of pharmaceutical science, pharmacy practice, or pharmacy education through individual or small group work under the direction of a faculty member. Special Topics activities may take the form of immersion in a laboratory, a defined literature review, research with science or patient care focus or other longitudinal experience, activity, or course co-designed by a student and a faculty mentor. Special Topics may be designed as either 1-credit (3 hours/week), 2-credits (6 hours/week) or 3-credits (9 hours/week), depending on the nature of the experience, expected commitment of the student, and stated outcomes of the course.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.
PHARM 5910 - US HEALTHCARE SYSTEM

Minimum Credits: 2
Maximum Credits: 2
The aim of this course is to provide students with an overview of the U.S. Health care delivery system. This course covers the structure of health care delivery systems and delivery of health care services including personnel and facilities; organization, financing, and quality assessment with special attention to medication distribution and management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5911 - HEALTHCARE SALES AND MARKETING

Minimum Credits: 2
Maximum Credits: 2
This course educates students on contemporary healthcare sales and marketing as it directly applies to pharmacy. Sales concepts to be covered include understanding management prospects, developing your sales value proposition, finding management and penetrating the no-talk zone, generating leads: marketing to management, generating leads, cold calling management, meeting the prospect for the first time, presenting to prospects’ the executive briefing, preparing a management proposal that works, negotiating with management, selling to targeted key or major accounts, managing your sales cycle and forecasting, managing sales objections; using storytelling as a business sales tool; managing your competition, following up after the sale, and making a difference with business ethics. Health care marketing is undergoing dramatic reinvention and change because of emerging trends, reform uncertainties, the emergence of social marketing and a renewed focus on quality, outcome and prevention. Executives are demanding higher impact and bigger returns from marketing investments and marketing professionals are more closely aligning their efforts with strategic objectives, customer experience and the integration of communications across multiple platforms and channels. This course offers effective approaches to proactive health care marketing with specific action steps, strategies, techniques and tactics to move markets and increase visibility, awareness, understanding, market share and profitability.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundational introduction to pharmaceutical/health care leadership and ethics. An analysis of dominant methods in leadership theories and healthcare ethics will be discussed and analyzed from historical, systematic, and religious perspectives. Ethical dilemmas of leadership, the foundation and context of moral choice, the moral implication of decision-making within healthcare organization and the impact on employees, morale, personal integrity, and the patients. Practical issues are engaged to illustrate effective leadership and ethical frameworks for sound decision making. Students will be able to understand and analyze health care leadership and ethics theory and methods as well as major applied topics; critically relate health care leadership and ethics with multi-disciplinary fields in health care as a diverse and national enterprise; integrate academic learning with experiential learning in clinical/organizational experiences; and demonstrate knowledge, skills, competencies and character traits to provide ethical leadership.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM

Minimum Credits: 2
Maximum Credits: 2
Following the healthcare dollar: this interactive offering will engage students in a structured understanding of the business side of medicines in the health care industry and other related fields. For instance, students will study different leadership styles and corporate cultures in an organization, follow health spending longitudinally and vertically on medicines from consumer to product and service, discover how market conditions affect
operations and profitability and learn about the executive's career development path. Entrepreneurship in healthcare: students will engage in a structured understanding of the business side of medicines in the health care industry and other related fields. This course delves into entrepreneurship in medicines and health. The fundamentals of entrepreneurship medicines and health will be discussed and students will study and contrast the primary entrepreneurship styles including characteristics of those who succeed through discovery, adaptation, and fortitude. Entrepreneurship and intrapreneurship models will be utilized. Students will contrast methods of innovation and supporting business cultures. The impact of market conditions will be analyzed in terms of how they affect success of such endeavors and learn about the executive's career development path. Many past students have used the learning and networking opportunities from this course to shape and propel their careers.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

**PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS**

**Minimum Credits:** 1.5

**Maximum Credits:** 1.5

This course will give students an understanding of managing change through the lens of complexity theory using the principles of implementation science. They will understand the levers important in change and how to assess an organization for readiness to change. Students will be able to effectively participate in a health care innovation application team as either a leader or participant that results in the application of an evidence-based health care innovation, which leads to improved patient care. They will be able to develop detailed and effective strategic frameworks from which they can outline and track the progress in implementing a health care innovation.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

**PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA**

**Minimum Credits:** 1.5

**Maximum Credits:** 1.5

The overall objective of this course in Predictive Analytics in Pharmacy is to familiarize students with sources of big data, large data analytic techniques, and their wide-applicability in guiding decisions in the areas of patient care, drug research & development, healthcare policy, and cost effectiveness. For the most common techniques, the objective is to acquire sufficient mastery through hands-on analyses of real world data so that students are prepared to apply these techniques in future career positions. For other, more advanced techniques, the objective will be to develop a familiarity about how these methods are used and what questions they can answer.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

**PHARM 5924 - HEALTH SYSTEM PHARMACY MANAGEMENT 1**

**Minimum Credits:** 3

**Maximum Credits:** 3

This is the first of two courses designed to provide focused learning in health system pharmacy management/leadership. Students will develop a basic understanding of organizational culture and how it affects personnel and performance, human resource management including hiring, training, assessment and development, and compensation strategies. The course will also address corporate pharmacy management functions; multi-site management and control; relevant accreditation standards (JCAHO, CMS, etc.)

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

**PHARM 5925 - HEALTH SYSTEM PHARMACY MANAGEMENT 2**
This is the second of two courses designed to provide focused learning in health system pharmacy management/leadership. The first course prepares students to plan and manage pharmacy operations in a hospital pharmacy. This course will address health system pharmacy organization quality standards; patient satisfaction; industry specific financial analysis (financial and managerial statements, cash flow, return on investment); health system reimbursement structure, contracting, purchasing and inventory management (supply chain), and finally the impact of health system informatics systems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

### PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1

This is the first of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. Students will develop a basic understanding of organizational culture and how it affects personnel and performance. The course will cover the basics of human resource management including hiring, training, assessment and development as well as compensation strategies. The course will also cover corporate pharmacy functions as well as multi-site management and control. Students will use the "Pharmacy Management " Essentials for All Practice Settings" textbook, readings from publications, videos, and case studies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

### PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2

This is the second of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. The first course prepares students to plan and manage pharmacy operations in a community pharmacy. Students will learn to develop a business model and to establish key production and quality metrics. Students will gain an understanding of financial analysis including how to construct and interpret operating statements, key financial measures, cash flow, and return on investment. Special emphasis will be given to understanding various reimbursement models and contracts for services in addition to prescription fulfillment. Students will learn to manage purchasing and inventory. Students will use the "Pharmacy Management - Essentials for All Practice Settings" textbook, readings from publications, videos, and case studies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

### PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1

This course offers students the first part of a focused learning in specialty pharmacy. The course will address specialty drug and clinical management; specialty pharmacy patient management (intake & outcomes); as well as address relevant accreditation standards (URAC, etc.).

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Pharmacy Business Admin (PHARMBA-MS) Students Only

### PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2
Minimum Credits: 3
Maximum Credits: 3
This course offers students the second part of a focused learning in specialty pharmacy. The course will address specialty pharmacy organizational quality standards; specialty pharmacy customer service, communications, and disclosure standards; industry specific financial analysis (financial and managerial statements & indices); specialty pharmacy operations; specialty pharmacy contracting, purchasing and inventory management (supply chain), and finally specialty pharmacy informatics management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5930 - PHARMACY BENEFITS MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3
This is the first of two courses designed to provide focused learning in the practice of managed care pharmacy. Students will develop a basic understanding of how managed care pharmacy impacts the healthcare system. The course will focus on managed care, pharmacy benefit managers, prescription drug benefit, formulary management, impact of specialty pharmacy, and overall plan design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Pharmacy Business Admin (PHARMBA-MS) Students Only

PHARM 5931 - PHARMACY BENEFITS MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of two courses designed to provide focused learning in the practice of managed care pharmacy. This course will build on the framework from Pharmacy Benefits Management I, allowing students to confidently engage health and benefits decision makers as an informed advisor. Students will be exposed to various guest speakers, helping to broaden their scope of understanding as it relates to industry dynamics. Additionally, students will be expected to demonstrate their comprehensive knowledge through a plan design and contract exercise.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

Philosophy

PHIL 2010 - GREEK PHILOSOPHICAL TEXTS

Minimum Credits: 3
Maximum Credits: 3
This is a seminar primarily intended for CPAS students to help them gain expertise in reading philosophy in Greek.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2041 - STUDIES IN ARISTOTLE

Minimum Credits: 3
Maximum Credits: 3
Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2050 - TOPICS IN HISTORY OF PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
Study of selected texts and topics in the history of philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2070 - ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2071 - STUDIES IN ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
Study of selected topics and texts in ancient philosophy (readings in Greek). Course may be repeated for credit if the material is different.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2075 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

PHIL 2079 - FROM PHILO TO PHILOPONUS: AN INTRODUCTION TO THE HISTORY OF PHILOSOPHY IN LATE ANTIQUITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2120 - SPINOZA

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Spinoza, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
PHIL 2130 - LEIBNIZ

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Leibniz, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Medieval & Renaissance Studies, West European Studies

PHIL 2160 - HUME

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Hume, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2170 - KANT

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Kant. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

PHIL 2171 - KANTIAN ETHICS

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in Kantian ethics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

PHIL 2175 - STUDIES IN KANT

Minimum Credits: 3
Maximum Credits: 3
Study of Kantian texts and topics. Course may be repeated for credit if the material covered is different.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2180 - HEGEL
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Hegel, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

PHIL 2183 - MARX

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Marx, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2200 - FREGE

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Frege, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2210 - WITTGENSTEIN

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Wittgenstein. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

PHIL 2300 - ETHICS (CORE)

Minimum Credits: 3
Maximum Credits: 3
This is an advanced introduction to the foundations of ethics. We begin with basic topics from Kant about the nature of morality and the task for moral philosophy, reading defenders and critics of Kant's approach. This will serve as a point of entry into contemporary discussions about the ground of normative reasons for action, and the nature of moral and other forms of normativity. In this way we will work through leading positions in meta-ethics: varieties of constructivism, realism, and naturalism. We will end with an exploration of Plato's question about whether it is good for the just person to be just. There will not be a required text for this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosphy (PHD)

PHIL 2305 - TOPICS IN ETHICS
A study of selected topics in ethics. Course may be repeated for credit if material is different.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2310 - MORAL THEORY

This is an intermediate to advanced graduate seminar in moral theory, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2316 - ETHICS AND PUBLIC LIFE

This course will aid students in making and evaluating normative arguments and analyzing normative concepts as relevant to the formulation and administration of public policy. It will also present and discuss a number of substantive issues of ethical responsibility, rights and justice that are relevant to government officials, both in the U.S. and other countries.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2330 - POLITICAL PHILOSOPHY

This is an intermediate to advanced graduate seminar in political philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2335 - TOPICS CONTEMPORARY PHILOSOPHY

This is an intermediate to advanced graduate seminar on various topics in contemporary philosophy. The subject matter will change.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2385 - RATIONALITY

This is an intermediate to advanced graduate seminar in philosophical issues related to rationality, taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of this course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2390 - PHILOSOPHY OF LAW

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of law, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2400 - METAPHYSICS-EPISTEMOLOGY (CORE)

Minimum Credits: 3
Maximum Credits: 3
This is an introductory to intermediate level graduate seminar in metaphysics and epistemology, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy (PHD)

PHIL 2410 - PHILOSOPHY OF WILFRID SELLARS

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Wilfrid Sellers, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2420 - PHILOSOPHY OF LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of language, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies

PHIL 2421 - TOPICS IN PHILOSOPHY OF LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in various topics in the philosophy of language taken by students in the doctoral program. The exact content of this course varies from one occasion to another.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2440 - PHILOSOPHY OF MIND
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of mind, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2445 - PHILOSOPHY OF ACTION

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of action taken almost exclusively by students in the doctoral program.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2460 - EPISTEMOLOGY

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in epistemology, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2465 - DECISION THEORY

Minimum Credits: 3
Maximum Credits: 3
A graduate seminar on topics in decision theory

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2480 - METAPHYSICS

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in metaphysics. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2485 - PERSONAL IDENTITY

Minimum Credits: 3
Maximum Credits: 3
This is an advanced seminar on issues in personal identity.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2499 - SYMBOLIC LOGIC
Minimum Credits: 3
Maximum Credits: 3
This graduate course develops skills in formal and informal reasoning in predicate-quantifier logic, and covers formal semantics for sentential logic, informal semantics for predicate-quantifier logic, and elementary syntactic metatheory.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2500 - ADVANCED LOGIC (CORE)

Minimum Credits: 3
Maximum Credits: 3
This is the first term of an introductory graduate course in mathematical logic. Topics are completeness of propositional logic and quantification theory and elementary set theory.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy or History and Philosophy of Science (PHD)

PHIL 2505 - TOPICS IN PHILOSOPHICAL LOGIC

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in various topics in philosophical logic, taken almost exclusively by students in the doctoral program. The exact content of this course varies from one occasion to another.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2533 - DESCARTES

Minimum Credits: 3
Maximum Credits: 3
An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Medieval & Renaissance Studies, West European Studies

PHIL 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2580 - PHILOSOPHY OF MATHEMATICS

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
PHIL 2585 - TOPICS IN PHILOSOPHY OF MATH

Minimum Credits: 3  
Maximum Credits: 3  
This is an intermediate to advanced graduate seminar on topics in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2600 - PHILOSOPHY OF SCIENCE CORE SEM

Minimum Credits: 3  
Maximum Credits: 3  
This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Philosophy (PHD) or History and Philosophy of Science (PHD)

PHIL 2610 - SPECIAL TOPICS IN THE HISTORY OF THE PHILOSOPHY OF SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2625 - RECENT TOPICS IN PHIL OF SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2627 - PHILOSOPHY OF QUANTUM MECHANICS

Minimum Credits: 3  
Maximum Credits: 3  
This course will review the Hilbert space formalism of quantum mechanics, consider interpretations of that formalism, (for instance, hidden variable theories, relative state formulations, stochastic reduction schemes), and the difficulties empirical, logical, and conceptual- to which interpretations are prone.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis
PHIL 2628 - PHILOSOPHY OF PHYSICS

Minimum Credits: 3  
Maximum Credits: 3  
This seminar investigates philosophical issues in the foundations of fundamental theories of physics.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2633 - PHILOSOPHY OF COGNITIVE SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PHIL 2653 - REALISM

Minimum Credits: 3  
Maximum Credits: 3  
What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truth? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2662 - CAUSALITY

Minimum Credits: 3  
Maximum Credits: 3  
Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2663 - MODELS AND MODELING IN SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PHIL 2687 - THE EPISTEMOLOGY OF EXPERIMENTAL PRACTICES

Minimum Credits: 3  
Maximum Credits: 3  
Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and inferences involved in reasoning about experimental results.  
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2690 - THEORIES OF CONFIRMATION

Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on the topic of induction and confirmation, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2695 - PRAGMATISM

Minimum Credits: 3
Maximum Credits: 3
The course focuses on key pragmatic texts from C. S. Pearce to the present. But it will also give some consideration to the historical background of pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings, especially in semantics, epistemology, and philosophy of science, that bear on currently controverted issues.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2801 - TOPICS IN PHILOSOPHY

Minimum Credits: 1
Maximum Credits: 1
A seminar for the discussion of recent work in philosophy. Topics will vary from term to term and the course may be taken multiple times.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

PHIL 2900 - TEACHING PHILOSOPHY

Minimum Credits: 1
Maximum Credits: 1
A practicum approach to train tas an tfs wherein faculty and senior graduate students train the more junior tas on how to teach philosophy. This course has been approved as an alternative to FACDEV 2200 for philosophy graduate students.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Philosophy (PHD)

PHIL 2902 - PRE-MA DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PHIL 2950 - DISSERTATION SEMINAR
The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working on dissertation projects a community of others in the same boat. It provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated but not yet defended a prospectus examples of other students who have successfully negotiated the transition.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Philosophy (PHD)

**PHIL 2990 - INDEPENDENT STUDY**

- Minimum Credits: 1  
- Maximum Credits: 9  
This is a course through which students can receive graduate degree credit in philosophy for work that they undertake largely or entirely on their own, with little or no faculty supervision.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**PHIL 2999 - PROSPECTUS RESEARCH**

- Minimum Credits: 3  
- Maximum Credits: 3  
Each doctoral student in philosophy, when he or she is ready to begin working on the doctoral dissertation in earnest, must submit to a prospective dissertation committee a document, called a "prospectus", outlining the proposed dissertation topic, the envisioned treatment of that topic, and a rough plan for how to proceed. This course is a special directed study course for preparing that document.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**PHIL 3000 - RESEARCH AND DISSERTATION PHD**

- Minimum Credits: 1  
- Maximum Credits: 9  
This course gives academic credit for research toward and writing of the doctoral dissertation.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**PHIL 3902 - POST-MA DIRECTED STUDY**

- Minimum Credits: 1  
- Maximum Credits: 9  
This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**Physical Medicine and Rehab**
PMDREH 5410 - REHABILITATION SUB-INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0
During this four-week elective for fourth year medical students, participants will function at an intern-level the student will be given intern-level responsibilities to manage inpatient rehabilitation patients. Student will be teamed with one attending and one or more PM&R residents and will be responsible for caring for their own patients, which includes rounding, writing notes, admitting and discharging patients, staffing team conferences with therapists, nurses, and other health care providers, and communicating with families under supervision of the team. Students will also be able to participate in therapy sessions and will gain exposure to prescription of orthoses. The student will be assigned to one team for the entire month to gain experience in the longitudinal care of rehab patients. Teaching will be bedside as well as small didactic sessions at the discretion of the attending. There is no exam and students will be evaluated on their participation and meeting the course objectives.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5450 - REHABILITATION MEDICAL CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will demonstrate to the student the basic problems of patients and basic concepts of care for patients, referred to the division of rehab medicine. The student will be taught physical diagnostic techniques applicable to the disorders of musculoskeletal and neural systems. Students are expected to evaluate inpatients and develop a treatment plan under the supervision of division physicians. Common patient problems include hemiplegia, back pain, cervical spondylosis, arthritis and amputations. Electrodiagnostic studies will also be demonstrated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5460 - PED PHYSCL MED/REHAB-INPATIENT

Minimum Credits: 0
Maximum Credits: 0
In this four-week elective the student will function in the capacity of an intern and care for hospitalized children with rehabilitation needs. Diagnosis will include cerebral palsy, myelomeningocele and other neuromuscular disorders. Skills in the physical and medical management of pediatric disability and an awareness of the other medical disciplines involved in the care of these children would be stressed.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5461 - PED PHYSCL MED/REHAB-OUTPATIENT

Minimum Credits: 0
Maximum Credits: 0
In this four-week elective the student will be involved in clinical evaluations of pediatric patients with multiple neuromuscular problems. This would include the differential diagnosis and physical exam as well as emphasis on electro diagnosis. In addition, some fundamentals of bracing and prosthesis prescriptions will be covered.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5465 - DISABILITIES CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
Students will participate in the medical care of patients in a variety of inpatient clinical settings and in both adult and pediatric outpatient settings. Teams consist of physiatrists, pediatricians, nurse practitioners, physical therapists, occupational therapists, and social workers. The student's role will include serving as liaison to the medical center, assisting in the daily care of individuals with disabilities, providing clients and staff with education about specific medical topics and advocating for the program and its clients within the medical center.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5810 - PM&R RESEARCH

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student to gain valuable experience in cutting edge research in physical medicine and rehabilitation (PM&R). The student will be precepted by faculty affiliated with the department of PM&R by meeting the following objectives: identify different sources of research funding; become familiar with effectively formulating grant proposals and budgets; learn to identify obstacles to performing productive research in an academic setting; assist in formulating effective research methodology; publication of an abstract.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5899 - INDEPENDENT STUDY IN PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PMDREH 5900 - EXTRAMURAL PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in Physical Medicine & Rehabilitation may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Physical Therapy

PT 2025 - PHYSIOLOGY OF EXERCISE

Minimum Credits: 2
Maximum Credits: 2
Structures and function of muscle, principles of neuromuscular recruitment for physical work, excitation-contraction coupling, contractile biochemistry, including sources of fuel for muscular work, and shifts in energy demands and fuel sources with physical activity under conditions of steady state, fasting, exercise and stress will also be covered. Examples of the impact of structural and physiological change with growth, aging disease, drugs, and performance enhancing substances are reviewed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2026 - CARDIOPULMONARY PT 1

Minimum Credits: 2
Maximum Credits: 2
Students gain a basic understanding of structure and function of cardiovascular and pulmonary systems, cardiorespiratory fitness and pulmonary physiology in both healthy and diseased state. Principles of physical training for persons with and without cardiopulmonary dysfunction are addressed through lecture, demonstrations, and student participation in monitoring and interpreting signs and symptoms of physical work in healthy and disease states. Interactions of skeletal muscle and the cardiovascular and respiratory systems are discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2027 - CARDIOPULMONARY PT 2

Minimum Credits: 2
Maximum Credits: 2
Evidence-based study of the application of physiological and clinical sciences to the physical therapy management of individuals with cardio-pulmonary system dysfunction. Learning experiences include weekly literature review and directed professional discussions with colleagues (class mates, instructor and lecturers), and a case-based approach to applying knowledge and decision-making to examination, evaluation, prognosis, and intervention in cardiopulmonary pt.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2028 - HEALTH AND WELLNESS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2029 - KINESIOLOGY AND INTRO TO

Minimum Credits: 3
Maximum Credits: 3
Introduction to the principles of the causes and treatment of musculoskeletal movement dysfunction. Basic principles of biomechanics and
kinesiology of the musculoskeletal system with applications to the treatment of musculoskeletal dysfunction are also included. This material will be presented in lecture format and will be supplemented by direct laboratory experience.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2030 - ANATOMY

Minimum Credits: 6
Maximum Credits: 6
An overview of the musculoskeletal causes of movement dysfunction concentrating on the upper extremities. Basic principles of musculoskeletal evaluation, biomechanics, kinesiology and treatment are included. In depth study of the musculoskeletal and peripheral nervous system of the human body also included. Directed laboratory experience using prospected cadavers, skeletal material, models and audio-visual tapes. The adaptation of this knowledge and skills to diverse populations in a variety of practice populations emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2035 - CLINICAL BIOMECHANICS

Minimum Credits: 3
Maximum Credits: 3
Student will be introduced to quantitative methods for biomechanical analysis of gait and other human movement. Equipment and methods to be studied include automated motion analysis, videography, force platform, and kinesiological electromyography. The student will do a project involving the biomechanical analysis of movement using this equipment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2036 - CLINICAL BIOMECHANICS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2040 - SURVEY OF HUMAN DISEASE 1

Minimum Credits: 2
Maximum Credits: 2
A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2045 - SURVEY OF HUMAN DISEASE 2
An introduction to human diseases that affect the respiratory, hepatic, renal, and gastrointestinal systems. Environmental and psychogenic causes of diseases are also studied.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physical Therapy (DPT)

### PT 2050 - ADVANCED MANUAL THERAPY

Minimum Credits: 2  
Maximum Credits: 2  
This 2-credit elective course will introduce students to a variety of manual therapy techniques that are used to treat musculoskeletal conditions in the clinical practice of physical therapy. The course will include a combination of lecture and hands-on lab. The techniques will span the spectrum from soft tissue procedures such as transverse friction massage and manual trigger point therapy to mobilization procedures for the spine and extremity joints. Participants should have a basic working knowledge of the manual therapy procedures taught within the musculoskeletal tract.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PT 2052 - PEDIATRIC PHYSICAL THERAPY

Minimum Credits: 3  
Maximum Credits: 3  
Lecture and laboratory activities focusing on the preparation of the student for a pediatric clinical affiliation and a possible career in physical therapy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Physical Therapy (DPT)

### PT 2055 - GROWTH AND DEVELOPMENT 1

Minimum Credits: 2  
Maximum Credits: 2  
Major emphasis is on the evaluation and treatment of children. General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physical Therapy (DPT)

### PT 2056 - GROWTH AND DEVELOPMENT 2

Minimum Credits: 2  
Maximum Credits: 2  
A continuation of PT 2055.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physical Therapy (DPT)

### PT 2059 - GERIATRICS
Minimum Credits: 2
Maximum Credits: 2
Course provides information and sources of information to enable students to appreciate changes in physical function (including physical, cognitive and social aspects) of the older adult and consider the potential impact the changes may have on health status and assessment and treatment in pt. An overview of systemic, behavioral and cognitive changes that typically occur with advanced age and the impact of the changes on physical function are also discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2060 - NEUROSCIENCE

Minimum Credits: 4
Maximum Credits: 4
Considers gross and cellular organization of central nervous system and its relationship to peripheral somatic and visceral systems; the physiological properties of neurons, their associated structures; and the problem mechanisms for reception, transmission, and integration of information at spinal, supraspinal and cortical levels. Concepts of normal sensory-motor integration, to include influence of neural centers on motor activity and postural control, and clinical manifestations of dysfunctions of major neural elements will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2061 - NEUROMUSCULAR PT 1

Minimum Credits: 3
Maximum Credits: 3
First of a three part series of courses which introduce the student to basic neurological rehabilitation principles. Course intended to provide the student with knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information presented regarding motor behavior, motor control as it relates to normal/abnormal movement and function. Case studies and problem solving format will be used throughout this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2071 - RESEARCH METHODS IN PT

Minimum Credits: 2
Maximum Credits: 2
Purpose of this course is to instruct students in the basic principles of research in physical therapy. Topics to be covered include research methodology and study design, hypothesis testing, and principles of data collection and outcome assessment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2079 - MANAGEMENT OF THE MEDICALLY COMPLEX PATIENT

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)
PT 2084 - SPECIAL TOPICS IN OSTEOARTHRITIS

Minimum Credits: 1
Maximum Credits: 2
The purpose of this course is to explore the literature on a variety of current issues related to osteoarthritis and the care of individuals with osteoarthritis.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2085 - ADVANCED THERAPEUTIC EXERCISE IN PT PRACTICE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2086 - ADVANCED THERAPEUTIC EXERCISE IN PT PRACTICE

Minimum Credits: 1
Maximum Credits: 1
This intermediate level course is designed to expand on the basic understanding of therapeutic exercise selection and application. Students will learn the clinical reasoning behind the selection of exercises to address specific musculoskeletal impairments. There will be an emphasis on the lab component of the course in order to emphasize and practice the proper techniques to ensure quality. There will be a specific focus on justification of exercise, exercise technique and modification, potential compensations, and dosing of exercise from the acute phase of injury to return to sport/function testing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2088 - SPECIAL TOPICS IN PT

Minimum Credits: 1
Maximum Credits: 1
This course will be divided into 2 separate and distinct modules. The purpose is to provide students with a fundamental understanding of 2 major areas that impact their future practice as physical therapists. The first module covers the clinical innovations and translation of emerging science(s) in the field of rehabilitation. In this portion students will be introduced to an understanding of the role of work being done in regenerative medicine and its impact on rehabilitation of musculoskeletal and neurological conditions. The second module covers the broad topic of psychologically informed physical therapy practice. Students will become familiar with cognitive behavioral therapy approaches as well as motivational interviewing techniques with the goal of enhancing their awareness of psychosocial factors that influence the patient outcomes. The content will also include information and training on the SBIRT model, designed to identify individuals across a continuum of substance abuse. The course will be delivered in a seminar based format with the expectation of students being engaged and interactive during the discussions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2089 - CLINICAL EDUCATION SEMINAR

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PT 2092 - CLINICAL EDUCATION 2**

- **Minimum Credits:** 1  
- **Maximum Credits:** 8  
Fourteen-week clinical education experiences conducted under the supervision of qualified physical therapists in a variety of practice settings to provide a wide range of professional learning opportunities in the provision of care and in teaching and where possible, opportunities to participate in the administration of services, quality assurance, clinical research activities, and supervision of physical therapist assistants and other supportive personnel.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PT 2099 - INDEPENDENT STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PT 2102 - PHARMACOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course covers the principles of drug action for drugs related to: central nervous, respiratory, gastrointestinal, renal/cardiovascular, and endocrine systems. The mechanism of action and use of antibiotics will also be covered.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physical Therapy (DPT or PTTRNS-DPT)

**PT 2103 - RADIOLOGY-PHYSICAL THERAPISTS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will introduce the radiologic concepts with an emphasis on musculoskeletal and neurological imaging related to PT practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PT 2107 - EVIDENCE BASED PRACTICE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course examines best practice patterns in clinical care and emphasizes basic concepts related to research such as reliability, internal and external validity, and study design. Critical appraisal of studies related to various PT interventions will be reviewed.

**Academic Career:** Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2108 - EVIDENCE IN PRACTICE 1

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2109 - EVIDENCE IN PRACTICE 2

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2110 - EVIDENCE IN PRACTICE 3

Minimum Credits: 2
Maximum Credits: 2
This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2111 - DIFFERENTIAL DIAGNOSIS IN PT

Minimum Credits: 3
Maximum Credits: 3
This course will cover basic concepts of physical examination of the patient with neuro-musculoskeletal dysfunction. Fundamental examination skills and knowledge will be covered, including issues related to screening, review of systems, history, physical examination and clinical decision making.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2127 - FALLS AND BALANCE DYSFUNCTION: PT MANAGEMENT AND INTERVENTION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2141 - CLINICAL EDUCATION 1
PT 2142 - CLINICAL EDUCATION 2

Minimum Credits: 1
Maximum Credits: 8
This will be the second full time 6-week clinical education experience completed under the supervision of a qualified physical therapist. Following Clinical Education II, students will have completed an inpatient and an outpatient experience. Students will continue to develop their professional behaviors in the clinical setting as well as develop patient management skills and clinical reasoning. Students are expected to function as an integral part of the interprofessional healthcare team at their assigned facility. By the end of the experience, students will be expected to manage the patient with a familiar diagnosis in their setting independently while demonstrating appropriate professional behaviors.

PT 2143 - CLINICAL EDUCATION 3

Minimum Credits: 1
Maximum Credits: 8
Continuation of Clinical Education 2

PT 2144 - CLINICAL EDUCATION 4

Minimum Credits: 1
Maximum Credits: 8
Continuation of Clinical Education 3

PT 2145 - CLINICAL EDUCATION 5

Minimum Credits: 1
Maximum Credits: 8
Completion of clinical education

PT 2158 - CUR EVIDENCE INTEGUMENTARY PRA

Minimum Credits: 2
Maximum Credits: 2
Theoretical frameworks underlying the examination, evaluation and treatment of patients with integumentary impairments will be discussed. The use of evidence-based clinical decision making will be emphasized in this course.

Academic Career: Graduate
PT 2172 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2173 - ADVANCED CLINICAL PRACTICE: THE UPPER QUARTER

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT or PTTRNS-DPT)

PT 2180 - CUR EVIDENCE MUSCULSK PRACT 3

Minimum Credits: 3
Maximum Credits: 3
Theoretical frameworks underlying the examination, evaluation and treatment of patients with musculoskeletal impairments of the C-T spine will be discussed. The use of evidence-based clinical decision making will be emphasized in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2181 - CUR EVIDENCE MUSCULSK PRACT 4

Minimum Credits: 3
Maximum Credits: 3
Theoretical frameworks underlying the examination, evaluation and treatment of patients with musculoskeletal impairments of the UE will be discussed. The use of evidence based clinical decision making will be emphasized in this course.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2195 - EVIDENCE BASED PRACTICE 5

Minimum Credits: 1
Maximum Credits: 1
continuation of EBP series
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

PT 2196 - EVIDENCE BASED PRACTICE 6
Minimum Credits: 1
Maximum Credits: 1
continuation of EBP series
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

PT 2201 - CARDIOPULMONARY PHYSICAL THERAPY 1

Minimum Credits: 4
Maximum Credits: 4
In this course students will focus on examining the pathophysiology and management of individuals with cardiovascular and pulmonary disease with emphasis on the physiologic systems that support to the performance of aerobic exercise and human movement. Specific attention will be given to the implications of cardiovascular and pulmonary disease on physical therapy practice, and how to consider these implications when applying the principles of exercise prescription to healthy individuals and people with comorbid chronic diseases. This course will also include an overview EKG rhythm interpretation, cardiovascular and pulmonary diagnostic testing, lab value analysis, case analyses of cardiovascular and pulmonary assessment data, and instruction in vital sign assessment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2229 - KINESIOLOGY

Minimum Credits: 4
Maximum Credits: 4
An introduction to the foundations of biomechanics, musculoskeletal tissue mechanics, and therapeutic exercise that will provide the basic principles underlying the analysis of normal and pathological human movement with applications to the musculoskeletal system. This material will be presented in lecture format and will be supplemented by direct laboratory experience.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2231 - MUSCULOSKELETAL PT 1

Minimum Credits: 6
Maximum Credits: 6
This course is the first of the Musculoskeletal series. PT 2031 is an overview of the musculoskeletal causes and treatments of movement dysfunction related to the lower extremity. Lecture and laboratory sessions are used to develop competency in the knowledge of pathomechanics of musculoskeletal injuries, prevention, screening, patient evaluation, treatment planning and implementation. This course emphasizes the adaptation of this knowledge and skills into evidence based clinical decision making and assessment of treatment outcome for patients with lower extremity musculoskeletal dysfunction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2232 - MUSCULOSKELETAL PATIENT 2

Minimum Credits: 5
Maximum Credits: 5
This is the second of the Musculoskeletal series. PT 2232 is an overview of the musculoskeletal causes and treatments of movement dysfunction related to the upper extremity and spine. Lecture and laboratory sessions are used to develop competency in the knowledge of pathomechanics of musculoskeletal injuries, prevention, screening, patient evaluation, treatment planning and implementation. This course emphasizes the adaptation of this knowledge and skills into evidence based clinical decision making and assessment of treatment outcome for patients with musculoskeletal dysfunction in the upper extremity and spine.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2233 - MUSCULOSKELETAL PT 3

Minimum Credits: 4
Maximum Credits: 4
This is the final course of the Musculoskeletal series. PT 2233 is an advanced seminar in evaluative techniques, application and progression of therapeutic intervention. Lecture and laboratory sessions will consist of advanced seminars by the University of Pittsburgh Faculty. Specific topics related to task and movement analysis, advance spine and women's health concepts, pain and biopsychosocial influence, soft tissue and myofascial techniques. The final section of this course will be dedicated to ergonomics and its influence on musculoskeletal injuries. In this section, students will be introduced to human factors in industry, workplace design, evaluation of work demands, biomechanical analyses of work, work hardening and return to work principles. Being the culmination of the Musculoskeletal series, competency will be assessed with written exams, and a comprehensive musculoskeletal oral practical examination. Upon completion of PT 2233, students will be able to demonstrate knowledge of, and be able to implement the most current clinical practice guidelines in musculoskeletal physical therapy practice as it pertains to the Spine, Upper Extremity and Lower Extremity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2241 - PATIENT MANAGEMENT 1

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to physical therapy assessment and intervention using a model of patient/client management as described in the Guide to Physical Therapist Practice. Using this model, common foundational skills of physical therapist practice will be addressed, from preparing for patient/client interaction, to examination and treatment skills. Topics include history and interview skills, body mechanics, and positioning of the patient/client. Students will develop skills in mobility training and activity progression using transfer techniques, gait training and basic manual wheelchair prescription. An overarching theme is the concept that empathy for the patient experience, combined with excellent clinical skills, creates expertise in caregiving, an essential quality in the physical therapy profession. At the completion of this course, students will have a solid framework for patient/client management that can be used across a variety of practice settings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2242 - PATIENT MANAGEMENT 2

Minimum Credits: 3
Maximum Credits: 3
This course provides instruction in physical therapy interventions used to help alleviate movement dysfunction and pain in a variety of patient populations. Content includes: upper and lower extremity orthotic and prosthetic intervention, pathological processes and physical therapy management for patients with amputations cancer, wounds, burns, and arthritis, and intervention for issues in Women's Health.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2243 - PATIENT MANAGEMENT 3

Minimum Credits: 2
Maximum Credits: 2
This course is the last in the Patient Management series. There are two major units: Amputations and Prosthetics and Management of Chronic Disease. Topics which emphasize the role of the physical therapist in successful recovery and long-term management include diabetes management, cancer rehabilitation, arthritis, and autoimmune disorders. Students will continue to practice examination, evaluation and treatment planning skills learned in Patient Management 1 and 2, while considering the self-management needs of patients and clients with these conditions. Using standardized patients, students will also participate in a formative assessment of their ability to guide patients in self-management skills.
PT 2255 - GROWTH & DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate. Emphasis on systems-based growth and development and impact through the lifespan.

PT 2261 - NEUROMUSCULAR PT 1

Minimum Credits: 4
Maximum Credits: 4
This is the first of a three-part series of courses which introduce the student to basic neurological rehabilitation principles. This course is intended to provide the student with the knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information will be presented regarding motor behavior and motor control as it relates to normal and abnormal movement and function. Case studies and a problem-solving format will be used throughout this course.

PT 2262 - NEUROMUSCULAR PT 2

Minimum Credits: 4
Maximum Credits: 4
This course is a continuation of PT 2261 and is an overview of adult neurological diseases. The symptoms/prognosis, typical functional limitations, and evaluation/intervention will be discussed. This course requires synthesis of previous knowledge in order to effectively manage the client's movement dysfunction.

PT 2263 - NEUROMUSCULAR PT 3

Minimum Credits: 2
Maximum Credits: 2
This course is a continuation of PT 2261 and PT 2262. This course combines the theoretical knowledge of neuromuscular dysfunction previously learned with treatment application. The causes of dysfunction, assumptions of treatment approaches, and management of patients with neuromuscular dysfunction are emphasized. This course also covers the assessment and management of patients with disorders of balance and postural control. The course requires synthesis of previous knowledge in order to effectively manage the client's movement dysfunction.

PT 2281 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 1
This course is the first in a series of three (3) that examines the professional practice of physical therapy. The content focuses on professionalism, code of ethics, regulatory agencies governing practice, standards of conduct and practice act(s). In addition, it provides an introduction to documentation, the health care industry, payers, and the continuum of care and how they relate to the physical therapy profession. The course series presents management principles for effective and efficient patient care services by providing knowledge of health care systems, organizational structures and functions, and personnel management policies in the environments of practice. Standards of practice including legal, licensure, accreditation, fiscal, ethical, documentation, reimbursement and regulatory, and information management technologies are considered. Entry level students are prepared for writing resumes, job interviews, job searches and for continuing their professional development after graduation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PT 2282 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is the second in a series of three (3) that examines the environment and conduct of the professional practice of physical therapy. The primary focus will be upon leadership and management principles, styles and primary functions essential to practice management. In addition, we explore professional development and career preparation. Finally, we will explore effective teamwork dynamics, communication and conflict management strategies and styles. Learning experiences consist of readings, lectures, and discussions as well as three practical applications: case study using The Guide, resume and cover letter preparation, and a leadership development plan.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PT 2283 - PROFESSIONAL DEVELOPMENT & LEADERSHIP 3

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course is the third in a series of three (3) that examines the environment and conduct of the professional practice of physical therapy. We will be exploring the healthcare continuum in which we as physical therapists practice. We will be examining the rules, regulations, laws, payer requirements, accrediting agencies' quality and safety standards, corporate compliance programs, leadership and management principles, and the "business" of rehabilitation. We will apply and integrate the concepts learned into real-life group projects and written examinations.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PT 2291 - EVIDENCE BASED PRACTICE 1

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Course will introduce research methods and statistics and a critical appraisal framework necessary to interpret and critique clinical research related to PT interventions. Course will integrate classroom lecture and small-group article discussion to help students learn how research evidence impacts the practice of PT. Emphasis of course will be interpreting research evidence on PT interventions to inform clinical practice.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PT 2292 - EVIDENCE BASED PRACTICE 2

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This is the second course in the Evidence Based Practice Series and emphasizes the interpretation and appraisal of research evidence as it relates to
diagnosis and prognosis in PT practice. The course will introduce research methodology and statistics necessary to interpret and critique clinical research related to PT diagnosis and prognostic issues. Students will read, interpret and critique a variety of peer-reviewed articles related to PT diagnosis and prognosis issues and will be able to discuss and describe their application to clinical practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2293 - EVIDENCE BASED PRACTICE 3

Minimum Credits: 2
Maximum Credits: 2
This course will focus on aspects of evidence-based practice related to quality and process improvement and its relationship to the process of care and outcomes management. There will be a focus on translating and implementing contemporary approaches to quality improvement into the clinical environment. Students will be able to develop mechanisms to gauge (1) compliance; (2) adherence to standards of care and (3) outcome assessment as the basis for clinical performance assessment. Furthermore, students will be able to describe and apply essential quality improvement principals to improve the process and outcomes of physical therapy practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2294 - EVIDENCE BASED PRACTICE 4

Minimum Credits: 1
Maximum Credits: 1
This course is a continuation of the evidence-based practice series that will run concurrent with the student's terminal clinical education experience. In this course, the student will utilize the Manuals of Operations and Procedures and databases developed in EBP 3 to collect process of care and clinical outcomes data for patients managed by the student during the first half of his/her clinical education experience. Data collection will begin within two weeks after the start of the clinical education experience and continue for the remaining 13 weeks of the term (or until the end of the first half of the terminal clinical education experience).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

PT 2555 - BIOMECHANICS OF BALANCE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs or School of Medicine or Swanson School of Engineering; LEVEL: Graduate

PT 2556 - INTERFACING ENGINEERING TECHNOLOGY AND REHABILITATION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the student to the emerging trends in rehabilitation technologies. Students and faculty will participate in active discussion regarding research directions currently taking place to further develop applied rehabilitation technologies as well as discuss methods to modify and measure responses in clinical situations using these technologies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2922 - TEACHING INTERNSHIP
Physical Therapy Master of Science

PTMS 2001 - ADVANCED NEUROSCIENCE

Minimum Credits: 4
Maximum Credits: 4
This course will provide the student with an in-depth study of neuroanatomical structures and functions. Brain anatomy, function, and interrelationships especially as they relate to movement dysfunction will be reviewed. The clinician will have an opportunity to "revisit" how anatomy and movement are interrelated.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2002 - MOTOR LEARNING AND CONTROL OF MOVEMENT/HEALTH PROMOTION

Minimum Credits: 3
Maximum Credits: 3
Principles of motor learning and motor control will be discussed as they relate to persons with disability. Models of disability will be shared with ideas of how to incorporate some of the principles of motor learning/control into interventions. Health promotion and fitness for persons with neuromuscular disorders will be emphasized.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2003 - ADVANCED CLINICAL PRACTICE: THE LOWER QUARTER

Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the lumbopelvic spine and the lower extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2004 - PRINCIPLES OF EVIDENCE-BASED PHYSICAL THERAPY PRACTICE

Minimum Credits: 2
Maximum Credits: 2
This course will focus on all aspects of clinical investigation, including developing and populating a clinical data base for the purposes of quality improvement, clinical description and clinical research. Interviewing skills, diagnosis, management, outcome and keeping up to date will be covered in depth with a particular focus on evidence-based practice.
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2005 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LOWER EXTREMITY

Minimum Credits: 3  
Maximum Credits: 3  
Course content will include evaluation and treatment of musculoskeletal conditions involving the foot, ankle, and knee. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2006 - FALLS AND BALANCE DYSFUNCTION: PHYSICAL THERAPY MANAGEMENT AND INTERVENTION

Minimum Credits: 3  
Maximum Credits: 3  
This course will provide students with the knowledge and skills to provide advanced assessment and management of persons with balance and vestibular disorders, including those at risk for falls. Students will discuss and practice using assessment tools. Lecture, laboratory practice, case studies, and discussion will be included. This course is offered on 4-5 weekends throughout the semester.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PTMS 2007 - ANALYSIS OF NEUROMUSCULAR SIGNS AND SYMPTOMS IN CLINICAL DECISION MAKING

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the analysis of the process and knowledge necessary for identifying the neuromuscular tissue or system representing the origin of disorders in patients. Signs and symptoms from history and physical examination will be the focus with appropriate ancillary testing necessary to confirm hypotheses regarding neuromusculoskeletal pathology. The intent is for clinicians to be able to differentiate clusters of signs and symptoms and to make appropriate clinical decisions regarding same.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PTMS 2008 - CONCEPTS AND PRINCIPLES RELATED TO SENSORY MOTOR CONTROL 1

Minimum Credits: 3  
Maximum Credits: 3  
Topical areas of the neurological sciences will be presented including introductory neuropathology, neuro-diagnostic techniques, and clinical manifestations of certain diseases of the nervous system. Topics will include: reflexes; the pain experience and pain management; somatosensory changes in peripheral and central nervous system diseases; motor dysfunction associated with peripheral and central nervous system diseases; articular neurology; sensorimotor learning principles.
PTMS 2009 - ADVANCED MUSCULOSKELETAL CLINICAL PRACTICE: THE UPPER QUARTER

Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the cervicothoracic spine and the upper extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2010 - PHYSICAL THERAPY SPECIAL TOPICS SEMINAR

Minimum Credits: 2
Maximum Credits: 2
This course is designed to foster discussion of current physical therapy clinical issues, such as prospective payment for medical rehabilitation, healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PTMS 2011 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS LUMBOPELVIC SPINE

Minimum Credits: 3
Maximum Credits: 3
Course content will include evaluation and treatment of the musculoskeletal conditions involving the lumbopelvic complex including the hip joint utilizing advanced orthopedic physical therapy skills. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2012 - SEMINAR IN NEUROLOGIC PHYSICAL THERAPY

Minimum Credits: 2
Maximum Credits: 2
A series of papers will be presented with interactive discussion related to novel interventions. Students will be responsible for reviewing the paper and presenting the case to the class. Each student will "teach" the class once and lead the discussion. Topic areas will be assigned by the instructor.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)
Minimum Credits: 2
Maximum Credits: 2
A series of papers will be presented with interactive discussion related to novel interventions. Students will be responsible for reviewing the paper and presenting the case to the class. PTMS 2013 - EVIDENCE BASED MEDICAL AND PHYSICAL THERAPY INTERVENTIONS FOR PERSONS WITH NEUROMUSCULAR DISEASE

Minimum Credits: 3
Maximum Credits: 3
This course will focus on an evidence based comparison of newer vs. Older ‘techniques’ used in the field of neurologic rehabilitation. Students will be asked to explore the evidence basis that supports or refutes use of these various approaches and techniques currently in use. Newer approaches to neurological rehabilitation will also be discussed-these include: constraint induced movement therapy, virtual reality, robotics, and deweighting. Lab and clinic visits will be incorporated into this course so that students will be able to see some of the techniques ‘in action’.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2014 - CASE STUDIES OF PERSONS WITH NEUROMUSCULAR DISORDERS

Minimum Credits: 3
Maximum Credits: 3
A series of cases will be presented with interactive discussion related to interventions that have been shown to demonstrate evidence and efficacy to address the person's functional limitations and impairments. Students will be responsible for preparing for the case prior to each session and will bring 'evidence' to support ideas for intervention. Innovative physical therapy and medical interventions will be discussed. Lecture and interactive discussion are the teaching methods of choice. Advanced clinicians will participate in the course to bring 'real life' cases to the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2015 - CLINICAL ROUNDS AND CASE PRESENTATION

Minimum Credits: 1
Maximum Credits: 1
Weekly rounds will be presented by various speakers/clinicians/researchers in both the fall and spring terms. These presentations will consist of case presentations, relevant clinical and/or research updates pertaining to the clinical practice of physical therapy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2015 - CLINICAL PRACTICE SEMINAR

Minimum Credits: 2
Maximum Credits: 2
This course will cover basic concepts of physical examination of the patient with neuromusculoskeletal dysfunction. Fundamental examination skills and knowledge will be covered, including issues related to screening, review of systems, history, physical examination and clinical decision making. An introduction to radiology and diagnostic imaging will be provided. Concepts related to pain and the inflammatory process, boney healing and remodeling, and how these concepts impact clinical practice will also be covered.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

PTMS 2017 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR UPPER EXTREMITY

Minimum Credits: 3
Maximum Credits: 3
This course will include evaluation and treatment of the musculoskeletal conditions involving the shoulder, elbow, wrist and hand. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will
include lecture, laboratory, and clinical experiences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**PTMS 2018 - EVIDENCE BASED PRACTICE: CLINICAL CONSIDERATIONS FOR THE CERVICAL AND THORACIC REGIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will include evaluation and treatment of musculoskeletal conditions involving the cervical spine, the temporoamandibular joint, the thoracic spine and rib cage. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills into the plan of care for the patient. Classes will consist of lecture, laboratory, and clinical experiences.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**Physician Assistant Studies**

**PAS 2101 - INTRODUCTION TO THE PHYSICIAN ASSISTANT PROFESSION**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the PA role in health care delivery, competencies integral to the PA profession; political and legal factors that affect PA practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

**PAS 2102 - HUMAN ANATOMY**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course with a lab studies the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention. The lectures are designed to provide guidance or explain difficult or conceptual material. The major learning experience occurs in the laboratory with cadaveric dissection.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

**PAS 2103 - MEDICAL PHYSIOLOGY**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is an introduction to the physiology and microanatomy of the human body, and as such its major objectives are to give students an appreciation of both the normal functioning and the structure of tissues and organs. In accomplishing this goal, it is desirable for students to correlate lecture information pertaining to cell and organ system physiology with laboratory exposure to the histology and ultra structure of human tissues and
PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE

Minimum Credits: 1
Maximum Credits: 1
This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic knowledge and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician assistant students must be familiar with the most common clinical genetic diseases, as well as the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, pa students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed lifelong learners.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2105 - HEALTH POLICY

Minimum Credits: 2
Maximum Credits: 2
This course introduces the student to how the health care system works. The focus is on basic principles of health policy, system failures. Topics include reimbursement, access to health care, workforce, quality assurance, long-term health care. In addition, topics will include public policy, funding issues, healthcare disparities, managed care and the medically underserved. The course will conclude with an opportunity to review and discuss moral and ethical issues in healthcare from the perspective of a physician assistant.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE

Minimum Credits: 1
Maximum Credits: 1
This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course will stress the knowledge and skills necessary for locating, interpreting, evaluating and applying quality medical research to clinical practice and professional development; the ability to appropriately critique medical literature; and the basic comprehension needed for participation in research and the development of research and grant proposals. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2107 - PATIENT EDUCATION AND COUNSELING

Minimum Credits: 2
Maximum Credits: 2
This course is a practical approach to understanding how patients present, learn and change based on the research on theories, models and techniques of: personality and learning styles; how to assess patient knowledge, attitude and readiness to change; and the effects of literacy, health literacy,
individual coping mechanisms, ecological barriers and culture on patient comprehension and adherence. The use of validated interpersonal skills improves the clinician/patient relationship, demonstrates respect for the patient's well-being and individuality, thereby reducing medical errors and lawsuits, and increasing patient adherence. Self-reflection on the student's own barriers, biases, stereotypes, culture and assumptions is required. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2108 - INTRODUCTION TO CLINICAL MEDICINE WITH LAB**

Minimum Credits: 3
Maximum Credits: 3
This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. Students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Presented by clinicians from various specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. Students will also learn the head to toe physical examination. The laboratory component of this course will focus on patient interviewing, patient communication, and case-based learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PAS 2109 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY**

Minimum Credits: 4
Maximum Credits: 4
This course integrates the specific characteristics and mechanisms of normal and abnormal functioning of tissues and organs of the human body organized in a systems-based approach. This includes principles of cell and organ physiology, and the disruption of normal homeostatic mechanisms that progresses beyond the compensatory capabilities of the human body.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1**

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the basic interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications. Students will learn the clinical significance of the physical examination, the components of the complete physical exam and will be able to perform these examination techniques. Topics in this course will include: a general overview of history taking and physical examination; clinical reasoning; documentation; interviewing skills; the general survey; skin; the head and neck; the lungs;and the abdomen.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2202 - CLINICAL MEDICINE 1**

Minimum Credits: 3
Maximum Credits: 3
This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course
progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes infectious diseases, dermatology, disorders of the head, eyes, ears nose and throat, cardiopulmonary disorders, and endocrinopathies. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include methods of wound care and closure, burns, hyper/hypothermia, assessment of pulmonary function, arterial blood gases, ENT procedures, bioterrorism, radiology. The laboratory component of this course will allow the student to practice the skills and procedures common to PA practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2204 - PHARMACOLOGY 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents a study of drugs and their interactions with and within living tissue to build the foundation of safe and effective prescribing. This course introduces the student to general drug classifications and pharmacological principles including mechanism of action, indications, dosing, pharmacodynamics, and therapeutic parameters, and patient education about commonly prescribed drugs. Topic areas covered include endocrinology, dermatology, pulmonology, gastroenterology, ears/eyes/nose/throat, inpatient infectious disease, and immunology. Each of these topics will be explored through lecture, class discussions, patient cases, and prescription writing exercises.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2205 - PATHOPHYSIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the biological basis of common clinical disease states. Pathophysiology is treated as a disruption of normal homeostatic mechanisms that progresses beyond the normal compensatory capabilities of the human body.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2**
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications as they pertain to the specific organ systems presented. The students will learn the clinical significance of the physical examination, the components of the physical exam and will be able to perform these examination techniques for the material introduced in this course. Topics in this course will include: a general overview of history taking and physical examination as it pertains to course content; clinical reasoning; documentation; interviewing skills; and the cardiovascular, female/male genitalia, musculoskeletal, neurological, and psychiatric systems; and assessment of the pregnant patient.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2302 - CLINICAL MEDICINE 2

Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of Clinical Medicine I and is an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes disorders of the GI system, obstetrics and gynecology, nephrology, disorders of the urinary tract, musculoskeletal diseases, neurology, behavioral medicine, and hematology/oncology. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include GI procedures, NG tube placement, intravenous placement, central line monitoring, bladder catheterization, musculoskeletal procedures, immobilization, joint injection, lumbar puncture, electrocardiography, transfusion medicine. The laboratory component of this course will allow the student to practice the skills and procedures common to pa practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2304 - PHARMACOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course continues the study of drugs and their interactions with and within living tissue to build the foundation of safe and effective prescribing. This course reinforces general drug classifications and pharmacological principles including mechanism of action, indications, dosing, pharmacodynamics, and therapeutic parameters, and patient education about commonly prescribed drugs. Topic areas covered include cardiology, genitourinary, musculoskeletal, rheumatology, neurology, and psychology. Each of these topics will be explored through lecture, class discussions, patient cases, and prescription writing exercises.

Academic Career: Graduate
PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN

Minimum Credits: 2
Maximum Credits: 2
This course introduces the physician assistant student to diseases, exam findings and diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using a variety of teaching techniques including both traditional lectures as well as cooperative and collaborative group work. Case studies will be presented to reinforce course content and form the discussion in class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2306 - FUNDAMENTALS OF SURGERY

Minimum Credits: 1
Maximum Credits: 1
A series of lectures introduces fundamental principles of peri-operative medicine, procedure oriented patient evaluations, preoperative assessment, prevention of post-operative complications, surgical instrumentation, operative techniques, anesthesia, pre- and post-operative management of patients, post-operative complications, co-morbid states, and documentation. The history of the physician assistant in surgery, including surgical reimbursement issues will be discussed. Selected topics will include the most commonly performed surgical procedures as well as issues relevant to various surgical sub-specialties.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2401 - INTRODUCTION TO THE PA PROFESSION

Minimum Credits: 1
Maximum Credits: 1
This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the PA role in health care delivery, competencies integral to the PA profession; political and legal factors that affect PA practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed. Each of these topics will be explored lectures, class discussions and written assignment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2402 - HUMAN ANATOMY AND LAB

Minimum Credits: 4
Maximum Credits: 4
This 4-credit course uses small group discussion and dissection to study the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2403 - HEALTH POLICY

Minimum Credits: 2
Maximum Credits: 2
This course introduces the student to how the health care system works. The focus is on basic principles of health policy, the health care system and system failures. Topics include reimbursement, access to health care, quality assurance, public health, health care disparities. The course also includes a discussion of ethical principles as they relate to the practicing medical professional. Students will have the opportunity to research and present topics related to the course as well as discuss current health policy topics in a group setting.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2404 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE

Minimum Credits: 1
Maximum Credits: 1
This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course provides the knowledge and skills necessary for locating, interpreting, critiquing and applying medical research to clinical practice and professional development. This course will highlight methods for identifying quality medical literature, with a focus on the strengths and limitations of various study designs and statistical analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2405 - INTRODUCTION TO CLINICAL MEDICINE

Minimum Credits: 3
Maximum Credits: 3
This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. Students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Measures to assist in disease prevention and mitigate healthcare disparities will also be discussed. The course combines asynchronous content with interactive case-based live sessions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2406 - MEDICAL PHYSIOLOGY AND PATHOPHYSIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course integrates the specific characteristics and mechanisms of normal and abnormal functioning of tissues and organs of the human body organized in a systems-based approach. This includes principles of cell and organ physiology, and the disruption of normal homeostatic mechanisms that progresses beyond the compensatory capabilities of the human body.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2407 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE
The understanding of genetic and molecular medicine as it applies to clinical practice is the focus of this course. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of, precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician Assistant students must be familiar with the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, PA students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed life-long learners.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

---

**PAS 2408 - PATIENT EDUCATION AND COUNSELING**

Minimum Credits: 2

Maximum Credits: 2

The successful Physician Assistant prides herself/himself on being able to communicate effectively with patients. This course will begin to cultivate the crucial skills of patient communication and health counseling. Students will be exposed to theory regarding patient adherence, health literacy and communication methods for various population groups as well as education on specific topics they will encounter as they navigate patient-clinician relationships in the future.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

---

**PAS 2409 - HISTORY TAKING AND PHYSICAL EXAMINATION 1 AND LAB**

Minimum Credits: 3

Maximum Credits: 3

This course section introduces the student to the basic interviewing, physical exam, and documentation skills necessary to complete an appropriate subjective and objective assessment of a patient. Topics will be arranged by systems and will parallel the systems covered in other concurrent coursework. Systems covered in this course include head, eyes, ears, nose and throat (HEENT), dermatologic, abdominal, and pulmonary. This course will also briefly cover billing and coding as it relates to documentation. This course contributes key knowledge and skills that will enable students to achieve competency in patient-centered practice knowledge and health literacy and communication.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

---

**PAS 2410 - CLINICAL MEDICINE 1 AND LAB**

Minimum Credits: 3

Maximum Credits: 3

This course will include a series of lectures on fundamental principles of disease, diagnosis, intervention and management. The course promotes a working knowledge base for correlating the relationship between signs and symptoms of disease, the etiology of disease, diagnostic work up and the medical rationale for selected management regimes. The lab portion of the course will be largely case based and focus on clinical decision making.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)
PAS 2411 - DIAGNOSTIC & THERAPEUTIC PROCEDURES IN MEDICINE 1 AND LAB

Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of diagnostic and therapeutic procedures I and provides ongoing knowledge of clinical/diagnostic and therapeutic skills that are commonly performed in patient care. Students will be introduced to the basic diagnostic and therapeutic procedures that they may perform while in clinical practice. Each student is given the opportunity to practice certain basic clinical procedures in the laboratory setting, using universal precautions, prior to performing the procedure on the actual patient. Students will become familiar with the indications, contraindications, complications, and interpretations associated with the various clinical procedures that they will perform.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2412 - PHARMACOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
This course involves the study of pharmacology therapeutics and designed to provide the students the knowledge necessary to make clinical decisions regarding pharmaceuticals in their practice. This course will include the study of the effects of drugs on the body and their ability to modify disease states. The focus will be on determining the appropriate drug therapy using all available patient information.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2401 and PAS 2402 and PAS 2403 and PAS 2404 and PAS 2405 and PAS 2406 (Minimum Grade 'C' for All Listed Courses)

PAS 2413 - HISTORY TAKING AND PHYSICAL EXAMINATION 2 AND LAB

Minimum Credits: 3
Maximum Credits: 3
This course section builds off H&P I to provide the student with the basic interviewing, physical exam, and documentation skills necessary to complete an appropriate subjective and objective assessment of a patient. Topics will be arranged by systems and will parallel the systems covered in other concurrent coursework. Systems covered in this course include cardiovascular, musculoskeletal genitourinary, breast and axillae, and the gravid female patient. This course will also briefly cover billing and coding as it relates to documentation. This course contributes key knowledge and skills that will enable students to achieve competency in patient-centered practice knowledge and health literacy and communication.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C'' for All Listed Courses)

PAS 2414 - CLINICAL MEDICINE 2 AND LAB

Minimum Credits: 3
Maximum Credits: 3
This course will include a series of lectures on fundamental principles of disease, diagnosis, intervention and management. The course promotes a working knowledge base for correlating the relationship between signs and symptoms of disease, the etiology of disease, diagnostic work up and the medical rationale for selected management regimes. The lab portion of the course will be largely case based and focus on clinical decision making.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C" for All Listed Courses)
PAS 2415 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2 AND LAB

Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of diagnostic and therapeutic procedures I and provides ongoing knowledge of clinical/diagnostic and therapeutic skills that are commonly performed in patient care. Students will be introduced to the basic diagnostic and therapeutic procedures that they may perform while in clinical practice. Each student is given the opportunity to practice certain basic clinical procedures in the laboratory setting, using universal precautions, prior to performing the procedure on the actual patient. Students will become familiar with the indications, contraindications, complications, and interpretations associated with the various clinical procedures that they will perform.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C" for All Listed Courses)

PAS 2416 - PHARMACOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This course involves the study of pharmacology therapeutics and designed to provide the students the knowledge necessary to make clinical decisions regarding pharmaceuticals in their practice. This course will include the study of the effects of drugs on the body and their ability to modify disease states. The focus will be on determining the appropriate drug therapy using all available patient information.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C" for All Listed Courses)

PAS 2417 - HEALTH ISSUES ACROSS THE LIFESPAN

Minimum Credits: 2
Maximum Credits: 2
The well-trained physician assistant is able to competently treat patients of all ages based upon a clear understanding of health issues and diseases as they exist within the context of the patient's lifespan. This course introduces the physician assistant student to disease processes, exam findings, diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using various teaching techniques including traditional lecture, class discussion and completion of electronic curriculum modules.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C" for All Listed Courses)

PAS 2418 - FUNDAMENTALS OF SURGERY

Minimum Credits: 1
Maximum Credits: 1
This course introduces students to the fundamental principles of perioperative medicine, including how to care for the surgical patient, operative equipment and techniques, anesthesia, common postoperative complications and methods for prevention, and documentation. Selected topics will include the most performed surgical procedures as well as issues relevant to various surgical subspecialties.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2407 and PAS 2408 and PAS 2409 and PAS 2410 and PAS 2411 and PAS 2412 (Minimum Grade 'C" for All Listed Courses)

PAS 2421 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1
Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2422 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2423 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2424 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults,
and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

**Academic Career:** Graduate

**Course Component:** Clinical

**Grade Component:** Grad HSU Basis

**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PAS 2425 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5

**Minimum Credits:** 4  
**Maximum Credits:** 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

**Academic Career:** Graduate

**Course Component:** Clinical

**Grade Component:** Grad HSU Basis

**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PAS 2426 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

**Minimum Credits:** 4  
**Maximum Credits:** 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

**Academic Career:** Graduate

**Course Component:** Clinical

**Grade Component:** Grad HSU Basis

**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### PAS 2427 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7

**Minimum Credits:** 4  
**Maximum Credits:** 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

**Academic Career:** Graduate

**Course Component:** Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PAS 2428 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8**

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Hybrid Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PAS 2429 - TRANSITION TO PROFESSIONAL PRACTICE**

Minimum Credits: 5
Maximum Credits: 5
This course combines instruction on practical issues as they relate to the practicing PA, especially new graduates, with evaluation instruments that measure if and verify that the learner has met the learning outcomes of the program and has the knowledge, interpersonal skills, clinical and technical skills, professional behaviors, clinical reasoning and problem-solving abilities required for PA practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PAS 2701 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 1**

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

**PAS 2702 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 2**

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning
outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2703 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 3

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2704 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 4

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2705 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 5

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate

2658
PAS 2706 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 6

Minimum Credits: 4  
Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2707 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 7

Minimum Credits: 4  
Maximum Credits: 4

This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2709 - CLINICAL ROTATION 9

Minimum Credits: 4  
Maximum Credits: 4

This course is required clinical rotation for physician assistant (PA) students which focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, and d) operating room. In this course, the student is actively engaged in meeting the PA Studies Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes for: a) family medicine, b) emergency medicine, c) internal medicine, d) surgery, e) pediatrics, f) women's health including prenatal and gynecologic care, and g) behavioral and mental health care.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2712 - SUMMATIVE EVALUATION

Minimum Credits: 1  
Maximum Credits: 1
The summative evaluation is designed to assure that each student has met ARC-PA and the program's defined cognitive and clinical skills performance objectives prior to graduation. In addition to assessing the student's proficiency by individual competencies we will be assessing student performance through the interaction of the program specific competencies. The summative evaluation includes measurement of the dimensions of cognition, technical skill, integration, rapport, behavior and attitude. The evaluation is comprised of an objective examination of medical knowledge, procedural skill through clinical skills evaluation, and objectively structured clinical examinations to evaluate interactions between the student and patient (history taking, physical examination and clinical reasoning) assessment of critical thinking and professional behavior. Students are required to pass this course in order to graduate from the program.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2713 - SUPERVISED CLINICAL PRACTICE EXPERIENCE 8

Minimum Credits: 4
Maximum Credits: 4
This course is a required rotation for PA students. It focuses on the role of the PA in one or more of the following settings: a) emergency department, b) inpatient, c) outpatient, d) operating room, e) other. In this course, the student is actively engaged in meeting the PA Studies Residential Program's learning outcomes. The instructional faculty for this course includes one or more preceptors who enable students to meet program-defined learning outcomes: a) for preventive, emergent, acute, and chronic patient encounters; b) across the life span, to include infants, children, adolescents, adults, and the elderly; c) for prenatal, obstetrical, and gynecologic health; d) for conditions requiring surgical management, including pre-operative, intra-operative, and post-operative care; e) for behavioral and mental health conditions; f) for the following medical disciplines: family medicine, emergency medicine, internal medicine, surgery, pediatrics, prenatal/obstetrical/gynecologic care, and behavioral and mental health care; and/or g) for a personalized, elective experience that incorporates the above or other learning outcomes designed for the specific rotation.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 2714 - TRANSITION TO PROFESSIONAL PRACTICE

Minimum Credits: 5
Maximum Credits: 5
This course combines instruction on practical issues as they relate to the practicing PA, especially new graduates, with evaluation instruments that measure if and verify that the learner has met the learning outcomes of the program and has the knowledge, interpersonal skills, clinical and technical skills, professional behaviors, clinical reasoning and problem-solving abilities required for PA practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PAS 3001 - CORE CONCEPTS OF SCHOLARLY PRACTICE

Minimum Credits: 4
Maximum Credits: 4
This course provides the theoretical foundations for the emerging scholar-practitioner to conceptualize the doctoral capstone project. The course provides an understanding of becoming a scholar-practitioner and the tools to identify, frame, and consider ways to thoughtfully engage in systematic inquiry focused on important problems of practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PAS 3002 - EXAMINING SUPPORTING EVIDENCE

Minimum Credits: 4
Maximum Credits: 4
At the center of practitioner scholarly inquiry is the ability to use data to understand the effects of innovations that seek to improve problems found in practice. This course will prepare learners to engage the literature to help frame their area of inquiry. Learners will use primary and other professionally appropriate sources to support the implementation of quality improvement projects.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PAS 3003 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 1**

- **Minimum Credits:** 6  
- **Maximum Credits:** 6  

Learners will acquire and demonstrate leadership skills as they apply classroom-based concepts in the clinical, academic, or administrative setting with an emphasis on exploring areas for enhanced implementation strategies or improvement and organizational analysis.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PAS 3004 - PERSONALIZED ELECTIVE**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  

This course gives learners the option for an academic, administrative, or digital health focus. Learners will broaden their understanding of program concepts through a combination of didactic instruction and experiential learning. This course will give learners the opportunity to apply knowledge and build professional networks.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PAS 3005 - SCHOLARLY PRACTICE CAPSTONE PHASE 1**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  

Learners will design and initiate a project to implement evidence-based knowledge in partnership with stakeholders and an academic mentor to improve health care practice. This phase of the capstone project includes project development and approval, stakeholder engagement, faculty guidance and feedback, and project implementation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**PAS 3006 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 2**

- **Minimum Credits:** 6  
- **Maximum Credits:** 6  

Learners will acquire and demonstrate leadership skills as they apply classroom-based concepts in the clinical, academic, or administrative setting with an emphasis on enhancing the focus of their personalized elective.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad Letter Grade

**PAS 3007 - SCHOLARLY PRACTICE CAPSTONE PHASE 2**
Learners will complete and analyze the results of their project implementation to demonstrate the synthesis of integrated learnings. This phase of the capstone project includes the delivery of findings through both an oral presentation to and collegial discussion with an audience of academic peers, faculty and/or professional colleagues, as well as a written defense.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**PAS 3008 - DEVELOPING THE PA LEADER: INTERNSHIP EXPERIENCE 3**

Learners will acquire and demonstrate leadership skills as they apply classroom-based concepts in the clinical, academic, or administrative setting that emphasizes reflection on the implementation of change processes and their iterations.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**Physics**

**PHYS 2000 - RESEARCH AND THESIS MS DEGREE**

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**PHYS 2101 - SPECIAL TOPICS**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**PHYS 2341 - THERMODYNAMICS AND STATISTICAL MECHANICS**

Minimum Credits: 3
Maximum Credits: 3
The properties of matter as described by thermodynamics, in which atomic structure is irrelevant, and by statistical mechanics, which is based on the atomic point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PHYS 2370 - INTRODUCTION TO QUANTUM MECHANICS 1**

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to quantum mechanics for first-year graduate students who have not taken such a course.
Academic Career: Graduate
PHYS 2371 - INTRODUCTION TO QUANTUM MECHANICS 2

Minimum Credits: 3
Maximum Credits: 3
Physics 2371 will be a continuation of the material covered in Physics 2370 with special emphasis on applications of quantum mechanics. Topics to be covered are: multi-particle systems, time-independent perturbation theory and its application to the fine-structure and hyperfine structure of atoms, time-dependent perturbation theory and its application to the absorption and emission of light, and other approximation methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2372 - ELECTROMAGNETIC THEORY

Minimum Credits: 3
Maximum Credits: 3
Advanced topics, including boundary-value problems and radiation theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2373 - MATHEMATICAL METHODS IN PHYSICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2513 - DYNAMICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The Lagrangian and Hamiltonian formulations of classical mechanics will be emphasized. Some of the topics that will be treated are conservation theorem, small oscillations, rigid-body motion, canonical transformation, and an introduction to the theory of chaotic motions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2541 - THERMODYNAMICS AND STATISTICAL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
This is the first term of a 2-term course with emphasis on statistical mechanics. Discussion of microcanonical, canonical, and grand canonical ensembles, the passage to quantum mechanics, and the use of density matrix. The Gibbs approach to the second law. Fermi-Dirac and Bose-Einstein statistics, in both weak and strong degeneracy approximations. Transport phenomena including the fluctuation dissipation theorem and the master equation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 2555 - ADVANCED CLASSICAL ELECTRICITY AND MAGNETISM
Minimum Credits: 4  
Maximum Credits: 4  
This is the first term of a two-term study of Maxwellian electromagnetism. Both the physical concepts involved and the mathematical formulation of the theory will be explored. The theory will be applied to a variety of physical systems.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**PHYS 2565 - NON-RELATIVISTIC QUANTUM MECHANICS 1**

Minimum Credits: 3  
Maximum Credits: 3  
This is the first term of a two-term course. Subjects covered include the general principles of wave mechanics and matrix mechanics, Dirac notation, the solution of bound state problems, especially the central force problem.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**PHYS 2566 - NON-RELATIVISTIC QUANTUM MECHANICS 2**

Minimum Credits: 3  
Maximum Credits: 3  
The second term of this course applies the previously developed abstract form of quantum mechanics to more complicated systems. Angular momentum and permutation symmetries are discussed. Approximation methods for multiparticle and scattering problems are developed. Finally the theory of electromagnetic radiation by atoms is presented.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**PHYS 2900 - GRADUATE INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 1  
This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment.  
Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad SN Basis

**PHYS 2903 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**PHYS 2990 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SNC Basis

**PHYS 2997 - TEACHING OF PHYSICS**
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PHYS 2998 - TEACHING OF PHYSICS-PRACTICUM**

Minimum Credits: 1
Maximum Credits: 2
This course is required of all graduate students fulfilling the department teaching requirement. This requirement involves full responsibility for teaching undergraduate recitations or labs, and in some cases for advanced graduate students, a course in physics and astronomy during one term.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

**PHYS 2999 - PHYSICS AND ASTRONOMY COLLOQUIUM**

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad SN Basis

**PHYS 3000 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**PHYS 3101 - SPECIAL TOPICS**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**PHYS 3102 - SPECIAL TOPICS**

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

**PHYS 3274 - COMPUTATIONAL METHODS**

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PHYS 3542 - ADVANCED STATISTICAL PHYSICS

Minimum Credits: 3  
Maximum Credits: 3

Statistical physics typically deals with the thermal properties of systems with large numbers of interacting dynamical variables, i.e., with many degrees of freedom, and the special techniques used to determine those properties. As such, the ideas, methodologies and results from the study of statistical physics inform virtually all fields of physics, from condensed matter and solid state to astrophysics and cosmology. This course is aimed at a wide audience of primarily second year (and more senior) graduate students with interests in experimental or theoretical physics and astrophysics/cosmology. The aim is to provide a broad perspective of the concepts and techniques of statistical physics, which, as noted, cut across many areas of active research. Depending on the composition of the class, an attempt will be made to include some examples from different disciplines. Topics to be covered (depending somewhat on the background and interests of individuals in the class) include: a review of ideal quantum gases (Sommerfeld model of a metal; Bose-Einstein condensation; magnetism in Fermi systems (landau levels, hall effect); white dwarf stars); fluctuations and response; phase transitions and critical phenomena (experimental survey; criticality = a new state of matter?); Phenomenology (mean field theories, landau theory, classification); order parameters, scaling, fluctuations, response, universality, broken symmetry; renormalization group overview as a mechanism; interacting systems (brief introduction to second quantization; weakly interacting bose gas (broken symmetry, excitation spectrum, superfluidity); bcs as a mean field theory; nonequilibrium, stochastic processes (brownian motion and diffusion; fluctuation/dissipation; markov processes, master equation; boltzmann equation and fluid mechanics).

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3704 - STATISTICS AND DATA SCIENCE

Minimum Credits: 3  
Maximum Credits: 3

This class will expose students to the basics of astronomical data analysis, with an emphasis on statistical techniques and the development of practical programming skills. Topics may include the nature of random and systematic errors, fitting and likelihood techniques, hypothesis testing, astronomical instrumentation and data reduction, and the use of large survey data sets.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3707 - INTRODUCTION TO MANY-BODY PHYSICS

Minimum Credits: 3  
Maximum Credits: 3

It is difficult to find a current topic in physics that doesn't deal with many interacting degrees of freedom. The universe of such problems is conveniently divided into ones in which quantum descriptions are essential and others in which a classical description will suffice. Despite this seeming division, the ideas and concepts cross over; an example is the idea of a field description. Very similar effective field theories describe a superconductor at low temperatures, a quantum system, and a classical system like a quantity of liquid argon coexisting with its vapor. Concepts, for example, of broken symmetry and gauge invariance are portable. Many of the same general concepts and techniques carry over from one subfield to another; a number of examples can be cited and will be mentioned at appropriate points during the course. This is a one-term nuts-and-bolts introduction to the quantum physics of interacting, many-particle systems. The course includes second quantization, many body physics and a brief introduction to relativistic quantum mechanics. The approach will generally be intuitive and hands-on. The course typically will begin with second quantization for fermionic and bosonic systems, with examples typically involving electrons, phonons and photons, arising from the quantization of the electromagnetic field. Applications will typically include (i) the interacting electron gas and plasmons (ii) the interaction of the radiation field and matter, (iii) electron phonon interaction, dressed electrons and the polaron problem. There will typically be some discussion of condensation phenomena and superfluidity (typically Bogoliubov theory, broken symmetry and goldstone bosons); superconductivity (pairing, BCS and Landau-Ginzburg theories). There will generally be some exposure to greens functions and Feynman diagrams. In addition the course will include a brief introduction to relativistic quantum mechanics and the Dirac equation. Throughout there will be discussion of applications of the techniques and concepts in various subfields of physics.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3715 - SOLID STATE PHYSICS
Minimum Credits: 3
Maximum Credits: 3
This is a one-term course on the ideas of solid-state physics, emphasizing the special ways one must think about crystalline materials. This is a mature subject, but continuously, over more than seven decades, new ideas and phenomena have emerged. In one term we can only consider the basic ideas along with a few recent developments to enable students working in solid state physics, condensed matter, nanoscience and related fields to approach the voluminous literature and enhance their own research efforts, and also to allow other students to have an appreciation for an extremely large part of current research activity in physics. Roughly speaking, there will be three parts to the course: some variation on emphasis can be expected depending on the instructor and on the interests of the class. (I) phonons: crystal lattices; diffraction and scattering; reciprocal lattice; lattice vibrations, quantization; thermal properties. (II) electrons: free electron model; density of states; thermal properties; Bloch’s theorem, electron states and energy bands; semiconductor statistics; quasi-classical electron dynamics; Boltzmann equation and transport. (III) additional topics: electron-electron and electron-phonon interactions; hall effect; landau levels; superconductivity; electromagnetic response.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3716 - ADVANCED SOLID STATE PHYSICS

Minimum Credits: 3
Maximum Credits: 3
This is a second, graduate level solid state course. The topics could be adjustable given the cross section of the department and topical developments in the field. Depending on the makeup of the department, the scope (and title) could be broadened. Topics suitable for this course include: a brief exposure to ‘practical’ group theory (1-2 weeks maximum); optics and spectroscopy relevant to the solid state (including linear and non-linear response and complex dielectric constant); coherence and correlation (including the density matrix, Bloch equations, optics); introduction to NMR (e.g. Two-level system, rotating reference frame, characteristic times); superconductivity ii (e.g. Type ii, magnetic effects) beyond the Ginsburgh-Landau theory (done in statistical physics ii); magnetism ii (more advanced topics: using model and phase transitions done in statistical physics ii, spin waves and landau levels in solid state physics i); transport theory ii (i.e. Beyond the basic Boltzmann equation examples in solid state physics i).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3717 - PARTICLE PHYSICS

Minimum Credits: 3
Maximum Credits: 3
This is the first term of a two term sequence exposing the student to basic methods and recent developments in high energy physics. Particle physics involves completely relativistic phenomena and requires the generalization of non-relativistic quantum concepts to the relativistic regime in order to develop the phenomenological and calculational methods suitable for relativistic processes in which the number and type of particles can change. The student will be taken out of the realm of the Schroedinger equation and into relativistic quantum fields. The first term is suitable as a one semester course for students not specializing in high energy physics. The course examines experimental and phenomenological foundations of particle physics. The known particles and fundamental interactions are examined. Modern experimental techniques of particle physics are discussed (including basic properties of particle interactions with matter). General features of electromagnetic, weak, and strong interactions, and their associated symmetries, are explored.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3718 - ADVANCED PARTICLE PHYSICS

Minimum Credits: 3
Maximum Credits: 3
This is the conclusion of the 2-term sequence PHYS 3717/3718. This course covers the standard model in detail and includes: the phenomenology of weak interactions; group theory and the quark model; the parton model for deep inelastic scattering and other high energy processes; an introduction to gauge theories of electroweak and strong interactions. Various topics of current interest in particle physics beyond the standard model will also be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PHYS 3725 - GENERAL RELATIVITY 1

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover the basic conceptual foundations of general relativity, calculational techniques, and current observational probes. Topics include the equivalence principle, geodesic deviation, tidal forces, the description of gravitation as spacetime curvature, and Einstein's equations. These ideas will be applied to current observations, including post-Newtonian parameters and solar system probes, the Schwarzschild metric and black holes, gravitational wave generation and detection, gravitational lensing, and gravitational explanations for dark energy phenomenology.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3726 - GENERAL RELATIVITY 2

Minimum Credits: 3  
Maximum Credits: 3  
This is the second term of a two-term survey of general relativity. Subjects to be treated during the year include conservation laws, equations of motion, gravitational radiation, gravitation collapse, and cosmology.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3730 - INTRODUCTION TO BIOPHYSICS

Minimum Credits: 3  
Maximum Credits: 3  
The post genomic age presents many new challenges and opportunities to physicists. This course will prepare the students to face those challenges and to work in this exciting multidisciplinary area of science. In this course we will review useful physical ideas and techniques that have contributed significantly to the recent development in biophysical research. This includes the use of statistical approaches for understanding gene regulation and signal transduction in biological and chemical networks; nonlinear dynamics for understanding biological pattern formation, ecology, and population dynamics; hydrodynamics for understanding cell motility and taxis; and information theory for signal processing in neuronal networks. The study of biophysics thus requires a broad range of physics knowledge and techniques. The course will also introduce basic concepts in biology that range from molecular to cellular biology. Topics to be covered include: introduction to biology; microscopy techniques; basics of cell biology; genetics (the genetic code, gene replication, gene expression, genetic networks); molecular biology techniques; energy in biological systems and the statistical view of biological dynamics; entropy and free energy in biology; two-state models in biology and neurobiology.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3765 - FIELD THEORY 1

Minimum Credits: 3  
Maximum Credits: 3  
The first semester of a graduate course in quantum field theory. The assumed prerequisites are a basic graduate course in quantum mechanics, and familiarity with the rudiments of special relativity. The course develops the perturbative approach to relativistic field theory. It begins with a study of the Lorentz group and the method of second quantization. Scalar and spin-1/2 field theories are discussed, including an elementary introduction to renormalization (at the one-loop level). The theory of interacting electrons and photons (qed) is constructed, with applications to a number of physical processes. In more detail, the topics covered will be: Lorentz and poincare groups; free scalar field theory; free spin-1/2 field theory; field quantization; symmetries and conservation laws; interacting scalar field theories, Yukawa theory; perturbation theory and Fynman rules; elementary renormalization theory; quantum electrodynamics.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PHYS 3766 - FIELD THEORY 2
This is the second semester of a graduate course in quantum field theory. It builds on the material covered in phys 3765 (field theory 1). The course further develops the techniques of relativistic quantum field theory, covering the path integral approach to field theory, additional topics in quantum electrodynamics, symmetry breaking, non-abelian gauge theories, and the standard model. In more detail, the topics covered will be: green's functions, asymptotic scattering theory, and the lsz formalism; functional integration and the path integral; quantization of abelian (qed) and non-abelian (yang-mills) fields; the renomalization group; spontaneous symmetry breaking of global and local symmetries; the standard model.

Plastic Surgery

PLSSURG 5450 - PLASTIC RECONSTRUCTIVE SURGERY

Minimum Credits: 0
Maximum Credits: 0
Four-week elective. Student participates in clinical care of patient on plastic surgical service, in acute management of facial and hand injuries in ER or OR. Also involved in pre- and post-operative care. Act as assistant in elective plastic surgery operations in wide variety of conditions. Instruction given in biology of wound healing and fundamental techniques of plastic surgery. Emphasis on scope and interaction of plastic surgery with other specialties and various methods of reconstruction available for various deformities.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5883 - SURGICAL RESEARCH

Minimum Credits: 0
Maximum Credits: 0
Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PLSSURG 5899 - INDEPENDENT STUDY PLASTIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

PLSSURG 5901 - EXTRAMURAL PLASTIC SURGERY
A clinical experience in plastic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

## Political Science

### PS 2000 - THE PROFESSION OF POLITICAL SCIENCE

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is a professionalization seminar in which first-year graduate students meet weekly with various faculty members to discuss various issues surrounding political science as a profession. Topics will include writing a dissertation, the publication process, teaching, work-life balance, and other issues.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

### PS 2010 - FOUNDATIONS OF QUANTITATIVE METHODS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

### PS 2020 - EMPIRICAL METHODS OF RESEARCH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques common in political research.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

### PS 2030 - POLITICAL RESEARCH AND ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course aims to provide the student with (1) the ability to read, interpret, and criticize virtually any piece of political science research using quantitative methods and (2) the ability to design and carry out original research applying quantitative methods to relevant data.  
**Academic Career:** Graduate
PS 2040 - CORE POLITICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
This seminar in political thought forms one of the core requirements of the graduate program in political science. Its aim is to introduce graduate students to the traditional concerns of the subfield of political theory and to explore the relevance of this subject matter even to political scientists who do not choose to specialize in it.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2060 - QUALITATIVE RESEARCH: DESIGN AND METHODS

Minimum Credits: 3
Maximum Credits: 3
This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PS 2116 - COMPARATIVE PUBLIC ADMINISTRATION

Minimum Credits: 3
Maximum Credits: 3
The public bureaucracy is a political institution and must be understood as a key factor in the policymaking process. At the same time it is a formal structure charged with the legal implementation of policy. These two competing understandings of administration will be examined from a variety of theoretical and analytical perspectives. The principal geographical focus will be on Europe, but there will also be discussions of administration in other areas.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2118 - GENDER AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate
PS 2200 - AMERICAN GOVERNMENT AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2201 - SEPARATION OF POWERS

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the relationships among the branches in a separation of powers system, particularly the interplay between the legislature and the president. Most specifically, the course will consider the implications of a separation of powers system on representation: can a system specifically created to check the government's ability to act meet the demands for representation of a diverse constituency? How should we think about representation in a separation of powers system? The course will focus on the US political system, but will have implications for the comparative study of these systems.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2204 - WOMEN & POLITICS

Minimum Credits: 3
Maximum Credits: 3
Women have participated in politics as citizens, voters, activists, and elites. However, the extent to which women can and do serve in these roles varies substantially within the U.S. and cross-nationally. This course will examine core works and current developments in the field of women in politics from both a behavioral and institutional approach. We will discuss the role of women in social movements, public opinion, voting behavior, electoral politics, legislative studies, and public policy. While this is a substantive course, there will be a strong focus on the methodical approaches used to study women in politics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2205 - POLITICS, GROUPS AND IDENTITIES

Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of social identities and how they influence politics. First, we will discuss what is a group and the theoretical underpinnings of social identity. We will discuss how social identities work, whether they are socially constructed, if identity is optional, and how social identities intersect with one another. We will cover identities such as race, ethnicity, gender, class, religion, and national identity, and how these shape political behavior. While much of this course will focus on the American context, we will also discuss how these themes apply to comparative politics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PS 2210 - MINORITY POLITICAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
Course description: This course is designed to introduce students to the state of the discipline on the behavior of racial-ethnic minority groups in the United States. We will cover several theories that are relevant to minority political behaviors including modes of political participation, means of involvement, and bases for political engagement. Underlying these aspects of political behavior are concepts of group membership, identification and consciousness, political incorporation, integration, assimilation, and marginalization. Our discussion and analyses will be both in terms of the manifestations of individual and collective behavior, incorporation and acculturation/assimilation, as well as the contributing factors in the political system. In addition to race and ethnicity, attention will be given to other intersecting "social" categories (i.e. religion, gender, citizenship status, etc.).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PS 2211 - AMERICAN LEGISLATIVE PROCESS

Minimum Credits: 3
Maximum Credits: 3
Focus is on the journal literature of the last decade involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2212 - US EXECUTIVE BRANCH POLITICS

Minimum Credits: 3
Maximum Credits: 3
This Ph.D. seminar course examines both the theoretical and empirical literature on the U.S. Executive branch. The focus of this course is strictly centered on the study of political institutions and organizations' political behavior related topics (e.g. presidential popularity; presidential elections; presidential nominations) will be covered in other courses. Although the primary focus of this course will be at the U.S. federal level, some attention will be given to the U.S. subnational level (i.e. American states). The course is broken down into three sections. The first section provides an overview of interdisciplinary research on institutions and organizations from both economics and sociological theoretical traditions. The second section of this course focuses on the internal functioning of the executive branch, including, but not limited to, president-agency relations. The final section focuses on analyzing executive branch actors' external relations with other institutional actors (i.e. legislative, judiciary, organized interests) within a separation of powers constitutional framework. The aim of the final section is to integrate insights from both institutional and organizational perspectives.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2213 - JUDICIAL PROCESS

Minimum Credits: 3
Maximum Credits: 3
This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2221 - ECONOMIC INEQUALITY AND AMERICAN DEMOCRACY
PS 2230 - POLITICAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2233 - POLITICAL ECONOMY OF THE INTERNATIONAL FINANCIAL SYSTEM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

This course examines the relevance of psychological theories of information processing and attitude change for the study of mass political behavior, with particular emphasis on American political behavior. Theoretical perspectives examined include cognitive heuristics, schema theory, attribution, stereotyping, and others. Study of such cognitive perspectives is intended to facilitate assessment of the political aptitude of the mass public.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2235 - AMERICAN ELECTORAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the America micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2301 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Global Studies
PS 2307 - ETHNIC POLITICS AND CONFLICT IN COMPARATIVE PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2308 - AFRICAN DEVELOPMENT SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The violence, hunger and poverty of Africa, and the economic potential, energy and mineral resources, that are often described in our newspapers, (on the bottom right-hand corner of the third section of your daily newspaper right after the sports briefs) do not exist in a vacuum. They are the products of historical and social forces that go back a number of centuries and also reflect current day world divisions about race, religion, gender and culture. In this highly individualized course we will look at the origins of these forces, the reason for sub-national violence and their consequences as they affect the African continent. Of particular importance is the question: is there a "new" Africa in terms of governance, conflict, institutional development and economic and social change? Are patterns of change national, regional or continental? The purpose of this course is to destroy myths and understand causality. It is to get course participants, in a small seminar environment, to start thinking and talking about the causes of poverty, political conflict, development and underdevelopment and to stimulate an interest in a part of the world which is very far away from and very different from the United States. It is an ambitious course in that it will require participants to have the ability to read and digest (as well as think about) a large amount of material in a short period of time. Every effort has been made to recommend material that is clearly and interestingly written. However, there will be many concepts and terms that are not immediately familiar to you. If so, write them down and ask about them during class. In tackling the reading, take your time with it, re-read and ask questions of your colleagues and of the course instructor. This course will be a mixture of lecture, presentation and discussion. Hopefully it will be structured and informal at the same time. Feel free to interject comments and raise questions at any point during the class. Generally, the first hour of class will be devoted to an informal lecture on the topic of the week. Following the break we will spend the remainder of the class discussing the reading for that week or listening to individual comments on a piece of reading. This format assumes that all class participants will have completed their reading in advance of the week's class.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2312 - COMPARATIVE PARTIES AND ELECTIONS

Minimum Credits: 3
Maximum Credits: 3
In this seminar, graduate students will be introduced to a wide variety of readings in the history of Western Europe.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2313 - COMPARATIVE POLITICAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
PS 2320 - HUMAN SECURITY

Minimum Credits: 3
Maximum Credits: 3
Because of Civil Wars in several parts of the world, especially in sub-Saharan Africa, the international organizations have reshaped their development agenda by emphasizing the importance of security and peace as preconditions for development. This approach has been explicitly mentioned among the aims of the United Nations by Secretary General Kofi-Annan in his roadmap for the implementation of the U.N. Millennium summit. In parallel, the concept of human security has been promoted by several Western governments, N.G.O.S and independent commissions in order to take into account the need to address not only state security needs but also human individuals’ vulnerability in crisis situations. Aid policies have taken into account these evolutions, though the concept of human security itself has been discussed in a controversial way. The European union is progressively integrating it into its security agenda and has started 'securitizing' its development agenda and African policy, including instruments like the Cotonou convention with African, Caribbean and pacific states. The course explores the reasons for the merging of security and development policies in the European union and its member states and the emergence of a European human security agenda, within the wider context of the united nations, world bank and OECD. The focus will be European policies towards crisis areas in Africa and Asia potential case to be discussed are: regulations about antipersonnel landmines, small arms and light weapons, conflict timber and conflict diamonds; policies of conditionality and sanctions; assistance to transitional justice; peace building, security governance, security sector reform in fragile states.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Global Studies, Russian & East European Studies, West European Studies

PS 2321 - LATIN AMERICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
The course is a readings seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topic of "regime transition" in Latin America.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Latin American Studies

PS 2323 - EXPERIMENTAL RESEARCH IN POLITICAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and qualtrics. The second part of the course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2326 - AUTOCRACY AND DEMOCRACY

Minimum Credits: 3
Maximum Credits: 3
This course surveys important questions driving past and current research in the fields of regimes, regime change, and authoritarian governance.
Students will be able to identify important research questions based on existing scholarship and execute sound research designs.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2328 - EUROPEAN POLITICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will address many of the key areas related to study of modern Europe, including: institutions, political parties and party competition, populism, democratic backsliding, European integration, and immigration.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2330 - IDENTITY POLITICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover topics on Identity Politics.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2351 - GENDER & DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Gender, Sexuality & Women's St

**PS 2370 - RESEARCH TOPICS ON THE POLITICAL ECONOMY OF DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This is a PH.D level course that explores the causes and effects of poverty, under-provision of public goods, bad governance, and conflict in low-income countries. We will look at the role of institutions, historical legacies, state capacity, regime type, corruption and clientelism, natural resources, ethnic divisions, and international aid in explaining under-development. While this is primarily a substantive course, it will also expose students to cutting-edge methods at the forefront of research on the political economy of development, including experimental and quasi-experimental methods.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2379 - ECONOMICS OF DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Focuses on development theories; classical, neo-classical, Marxian, dualistic (economic and non-economic) as well as models of agricultural development and administration, productivity enhancement, saving and investment and the foreign sector. Students are expected to apply development models to current problems, analyze and construct policy approaches to issues of current importance in less developed countries.

**PS 2381 - SEMINAR POLITICAL INSTITUTIONS**

Minimum Credits: 3  
Maximum Credits: 3  
The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)  
**Course Attributes:** Global Studies

**PS 2385 - COMPARATIVE LEGISLATURES**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and eastern Europe, Latin America, Asia, and other parts of the world.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (PHD or MA)  
**Course Attributes:** Global Studies

**PS 2387 - POLITICS OF WATER**

Minimum Credits: 3  
Maximum Credits: 3  
Given the need to highlight the contributions political science offers to our study of the Anthropocene, this interdisciplinary course investigates the role of water in the political development of contemporary Central Eurasia. As a landlocked world region, Central Eurasia provides a compelling case for the study of the political, social, and technological innovations that has yielded sites of ecological disaster and environmental frontiers of opportunity. This course guides students through the key stages of Soviet political change and its impact on the issues of Central Eurasian water culture: the collapse of tsarist governance and the withdrawal of its engineerspecialists, ending its "civilizing mission"; the arrival of US experts whose modern irrigation methods inadvertently contributed to environmental degradation and economic dependence; the "shock" construction sites of the Stalin era; the misguided dam-building projects of the late Soviet period; and finally the issues relating to the international cooperation to manage the river basins connecting Kyrgyzstan, Tajikistan, Uzbekistan, Turkmenistan, and Kazakhstan. Primarily, this course is a political science course, providing students with analytical frameworks to consider the institutions of power and how they are utilized concerning water management, whether for development purposes or national security. Yet this course also presents students with an interdisciplinary understanding of water politics by integrating skills from engineering sciences. This provides the opportunity for students to better understand the technological innovations that have exacerbated poor water management and also provided solutions to mitigate the ramifications of human activity. Through course assignments and a research project, students are not only introduced to a critical world region, but also familiarized with major crises of water management in the United States and beyond. Thus, at the course's conclusion, students are prepared to critically think about solutions to water management across environmental science, political science, and engineering.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** MCSI - Sustainability Related
PS 2401 - BEHAVIOR THEORY & EXPERIMENTS

Minimum Credits: 3
Maximum Credits: 3
This is a doctoral course that surveys theoretical models and corresponding experimental methods relevant to the study of political behavior. Topics will include voting, accountability, information processing, risk and social preferences, trust, cooperation, and leadership, drawing from rational choice, cognitive psychology, and behavioral economics. Class sessions will include seminar discussions, lectures, and workshops. Familiarity with formal models is helpful, but not required, we will review the basics as needed for the class.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies, West European Studies

PS 2501 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3
Maximum Credits: 3
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Global Studies

PS 2502 - INTERNATIONAL ORGANIZATION

Minimum Credits: 3
Maximum Credits: 3
This course examines the contemporary structures of governance within international policies as they are found at national, regional and international level, and the challenges and stresses to which such structures are vulnerable. It also considers major traditions and theorizing about sources of conflict, order and integration in international politics and reviews current evaluations of major international organizations.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Global Studies, West European Studies

PS 2503 - TOPICS IN INT'L DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
Topics in international development will explore specific current issues in international development.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Asian Studies

PS 2515 - DOMESTIC POLITICS AND INTERNATIONAL CONFLICT IN THE INFORMATION AGE

Minimum Credits: 3
Maximum Credits: 3
This class will explore the interaction between domestic and international conflict. While these domains have traditionally been treated separately, the processes of domestic mobilization for international initiatives (including minds, money, material and martyrs) and maintaining resilience to the
domestic consequence of international interaction (including analog and cyber cooperation and conflict) are increasingly important in today's
globalized and digitally connected world. We will read both canonical research as well as more recent works that attempt to integrate contemporary
changes in technology and cyber-capabilities into our understanding of the connections between these nested spheres of politics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**PS 2518 - SECURITY & INTELLIGENCE STUDIES**

Minimum Credits: 3
Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war 'and especially since 9/11' are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment 'past and present' and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)
Course Attributes: Asian Studies, Global Studies, Russian & East European Studies

**PS 2522 - CHOOSING NUCLEAR WEAPONS**

Minimum Credits: 3
Maximum Credits: 3

Why do some states choose to develop nuclear weapons and others do not? Have the reasons for nuclear weapons acquisition changed over time? Are more states likely to acquire nuclear weapons in the future? Once they have nuclear weapons, how do states choose their strategies for using them to advance foreign and security policy objectives? Why do states choose to give up nuclear weapons? Is a world without nuclear weapons possible? Is a world without nuclear weapons desirable? The answers to these questions are crucial to ensuring stability, peace, and security in the international realm. Problematically, they are also fundamentally contested by academics, policymakers, military officers, and the general public. This course will provide students with the tools to understand, partake in, and shape these debates about nuclear weapons. It will provide students with a foundational understanding of what nuclear weapons are and how they work. Then, drawing on both academic scholarship and primary source material like declassified documents, it will introduce students to: the myriad decisions confronting policymakers considering the acquisition, use, and elimination of nuclear weapons; how such decisions are made; and how such decisions can be improved. Academic scholarship from the disciplines of political science, history, public administration, and psychology will be used to develop theoretical frameworks and analytical toolkits necessary to think critically about elements of the nuclear weapons lifecycle. Primary sources and declassified documents concerning not only the United States' experience with nuclear weapons, but also that of countries like the USSR, China, the United Kingdom, France, Israel, South Africa, India, and Pakistan will be used to test and refine those frameworks and toolkits.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**PS 2534 - CIVIL WARS**

Minimum Credits: 3
Maximum Credits: 3

This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational
asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2540 - INTERNATIONAL POLITICAL ECONOMY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2543 - POLITICAL ECONOMY OF GROWTH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate course is devoted to the study of international and comparative political economy in developing and emerging countries. These countries tend to face very different sets of constraints than their wealthier counterparts. The aim of this course is to analyze the determinants of welfare in poorer countries. Its main focus is to study the political economy of income and examine how domestic and international incentives shape crucial economic policies (e.g. trade, monetary, or education policies). In the last part of the semester, we broaden our horizon to examine other important components of welfare, such as environmental quality. This course is resolutely focused on the macro level and limited to developing countries.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Asian Studies, Global Studies, Latin American Studies  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2563 - PEACEMAKING AND PEACEKEEPING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course, we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international peace and focus on terrorism, refugees, and weak states as destabilizing factors.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2607 - DEMOCRATIC THRY & DEMOCRATIZATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3)
to apply this knowledge in solving some puzzle or problem by comparing cases, assessing claims, developing arguments, etc.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)  
**Course Attributes:** Global Studies

**PS 2675 - HUMAN RIGHTS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2701 - ADVANCED METHODOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course aims to provide students with an overview of statistical methods appropriate for the analysis of longitudinal data, or data collected on multiple units (individuals, states, dyads, countries) at more than one point in time. The course will focus on models for the analysis of 'panel data,' which (by convention) is used to describe data with relatively large number of units and relatively few time points. We will cover different approaches to the analysis of panel data, including structural equation models, fixed and random effects models, dynamic econometric models, and longitudinal hierarchical growth ("multi-level") models.  

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2702 - ADVANCED METHODS: CAUSAL INFERENCE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts central to causal inference but there is also a heavy emphasis on helping students develop their capacity for research design.  

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2703 - FORMAL POLITICAL THEORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.  

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2704 - FORMAL POLITICAL THEORY 2**
Minimum Credits: 3
Maximum Credits: 3
This is the second course in the department's graduate formal theory sequence. We will survey game theoretic models in political science with two goals in mind: (1) students will become critical and competent consumers of formal theory and (2) they will be prepared to begin using formal theory in their research. Topics include bargaining, coalition formation, lobbying delegation, reputation, and signaling. We will also discuss the connection between formal models and empirical tests (both observational and experimental) as well as survey alternatives to rational choice (behavioral and experimental) as well as survey alternatives to rational choice (behavioral, computational, and evolutionary models). Students must be familiar with basic game theoretic concepts and analysis (at the level of PS 2701).

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2705 - SCIENTIFIC COMPUTATION FOR SOCIAL SCIENTISTS

Minimum Credits: 3
Maximum Credits: 3
This course covers scientific computation for social scientists.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2707 - MEASUREMENT IN SOCIAL SCIENCE

Minimum Credits: 3
Maximum Credits: 3
A key part of social scientific research is measurement, i.e. creating independent or dependent variables from raw data to capture substantive concepts. This course provides an applied overview of a variety of popular techniques in social science and machine learning to perform measurement on large and complex datasets. It will cover a variety of "unsupervised" methods (e.g. dimensionality reduction, ideal point estimation, and latent variable methods) that are used to create interpretable and low-dimensional summaries of complex data. It will also cover "supervised measurement", i.e. using a small collection of training data to create measures that can be extrapolated reliably. Specific focus will be paid to methods used in cutting-edge social science including multilevel regression with post-stratification (MRP) and machine learning techniques including random forests, sparse methods, and ensembles. A key goal of this course is to give students the skills to use these methods in their own research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2720 - BAYESIAN STATISTICS

Minimum Credits: 3
Maximum Credits: 3
This is a course on the theory and methodology of applying Bayesian computation and inference in social science research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2730 - ADVANCED METHODOLOGY: MAXIMUM LIKELIHOOD ESTIMATION

Minimum Credits: 3
Maximum Credits: 3
This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
PS 2740 - TIME SERIES ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
This is a course in advanced methodology in political science. The class will focus on topics related to time series.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2751 - ADVANCED METHODOLOGY: TEXT AS DATA

Minimum Credits: 3  
Maximum Credits: 3  
The amount of social science relevant information stored in text presses against the boundaries of human comprehension. From corpora of international and national speeches and documents, through repositories of human rights reports, news archives and blog posts, to streaming social media feeds, a font of knowledge awaits those that have the creativity and ability to model and learn from text as data. This class is a lower case, but more than cursory, introduction to the use of natural language processing, machine learning and Bayesian inference frameworks and tools to accelerate innovations in key social science research. The workload is significant but should not give anyone a stroke. We will cover lexical methods such as dictionary-based sentiment analysis, topic modeling and more general supervised learning techniques, as well as research designs that leverage syntactic information. Theoretical lectures will be punctuated with hands-on coding assignments. The point of the class is to increase student's confidence in utilizing text in their applied work.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PS 2900 - COMPREHENSIVE EXAM PREPARATION

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2902 - DIRECTED READING

Minimum Credits: 1  
Maximum Credits: 6  
Individual reading programs are provided in those areas in which no course or seminar is scheduled during an academic year of three trimesters. They also may be taken by those students who have elected the courses and seminars dealing with a particular subject matter and who wish to do additional work in these areas.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2903 - DIRECTED RESEARCH

Minimum Credits: 3  
Maximum Credits: 3  
This course allows a student to develop a research topic and a plan of analysis over the course of a term.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PhD)
PS 2904 - DISSERTATION OVERVIEW PREP

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2905 - TEACHING AND RESEARCH IN POLITICAL SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2906 - QUALIFYING PAPER PREPARATION

Minimum Credits: 1
Maximum Credits: 4
This course evaluates the academic progress of graduate students on their MA qualifying papers under the supervision of faculty advisor.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
This course is for students who are preparing for comprehensive examinations or who are undertaking other forms of study not requiring the direct supervision of a faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Political Science (MA or PhD)

PS 2991 - INDEPENDENT STUDY RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course is for students who are preparing for their research paper and comprehensive examinations or who are undertaking other forms of study not requiring the direct supervision of a faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PhD)

PS 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 12
This course is for students who have passed their dissertation overview and are currently working on their Ph.D. dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Prosthetics and Orthotics

PO 2101 - FUNCTIONAL ANATOMY AND KINESIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is the study of the structure and function of the human body, with special emphasis on the musculoskeletal and peripheral nervous systems. Cadavers and anatomical models will be utilized. Palpation of anatomical landmarks, actions of individual muscles and muscle groups, and normal joint motions will be studied using the students' own surface anatomy. The concepts of measuring muscle strength and length, measurement of joint range of motion, and identification of postural or structural deviations will be introduced. The roles of muscles and types of muscle contraction during movement and exercise will be discussed. The basics of normal gait will be studied, and some common pathological gaits will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2102 - PATHOLOGY IN ORTHOTICS AND PROSTHETICS

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a general overview of the pre-disposing factors and direct causes of disease, as well as their effects on the human body. It will also include a systemic approach to the basic disease processes, in terms of etiology, symptomatology, general pathological changes, diagnostic procedures, and types of treatment. Universal precautions to be used in patient care will also be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2103 - INTRODUCTION TO MATERIALS, EQUIPMENT, AND FABRICATION

Minimum Credits: 2
Maximum Credits: 2
This course will introduce the student to the concepts of general material properties, the common materials used in orthotics and prosthetics, and the specific properties of these materials. The student will be introduced to equipment and fabrication techniques as well as safety precautions for handling and using materials and equipment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2104 - REHABILITATION BIOMECHANICS FOR THE HEALTH CARE PROFESSIONS

Minimum Credits: 3
Maximum Credits: 3
This course is a basic introduction to biomechanics of human motion for individuals in the health and rehabilitation fields. It is designed for individuals with a non-technical background, but a basic knowledge of mathematics, physics, and kinesiology is expected and will be utilized. Topics covered include statics, dynamics, anthropometry, motion analysis, electromyography, and soft-tissue biomechanics. Applications to rehabilitation will be emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Rehabilitation Sci & Tech (Health and Rehabilitation Scs-MS)

PO 2105 - PROFESSIONAL ISSUES IN PROSTHETICS AND ORTHOTICS

Minimum Credits: 1
Maximum Credits: 1
Issues and organizations relevant to the practice of orthotics and prosthetics will be presented and discussed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2106 - PATIENT MANAGEMENT IN ORTHOTICS AND PROSTHETICS

Minimum Credits: 1
Maximum Credits: 1
Study of new concepts, devices, and manufacturing techniques in orthotics and prosthetics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2201 - ORTHOTICS 1

Minimum Credits: 5
Maximum Credits: 5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2202 - PROSTHETICS 1

Minimum Credits: 5
Maximum Credits: 5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2203 - CAPSTONE FOR PROSTHETICS AND ORTHOTICS

Minimum Credits: 1
Maximum Credits: 1
The capstone for P&O course is completed as part of the research requirement for the MSPO program. This course is taken in two different semesters as students work to formulate ideas and further conceptualize that idea into a cohesive research project under the guidance of faculty. The capstone is then presented to peers and faculty prior to graduation.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
PO 2204 - INTRODUCTION TO EVIDENCE - BASED PRACTICE IN ORTHOTICS AND PROSTHETICS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

PO 2301 - ORTHOTICS 2

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2302 - PROSTHETICS 2

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2303 - SPINAL ORTHOTICS

Minimum Credits: 3
Maximum Credits: 3
Topics to be covered include: conditions and symptoms indicating treatment with spinal orthotics; evidence for effectiveness of treatment; patient evaluation for prescription and design of spinal orthoses; fabrication of spinal orthoses, including techniques for taking measurements and impressions; filling, evaluation of effectiveness, and modification of spinal orthoses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs

PO 2401 - ORTHOTICS 3

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2402 - PROSTHETICS 3

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
PO 2403 - ISSUES IN THE HEALTH SYSTEM

Minimum Credits: 2
Maximum Credits: 2
This course will present current and predicted future issues faced by America in the maintenance of the good health of its citizens. Options for resolution of the issues will be identified and pros and cons investigated and discussed both from the standpoint of the lay public and from that of the health professional. The course is required for all advanced degrees, and the enrollment will be composed of students from all professions represented in SHRS.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2501 - MASTER OF PROSTHETICS AND ORTHOTICS CLINICAL INTERNSHIP

Minimum Credits: 8
Maximum Credits: 8
This course is reserved for second year MSPO students needing to earn their clinical internship hours prior to graduation.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Health and Rehabilitation Sciences students only.

PO 2502 - SCHOLARLY PAPER

Minimum Credits: 2
Maximum Credits: 2
A research oriented paper based on work the student has done in his or her area of study. Students will be encouraged to submit honors papers for publication or presentation at a national or state professional meeting. The adviser and an appropriate faculty reader will supervise the student's work on the scholarly paper.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PO 2503 - PRACTICE MANAGEMENT IN PROSTHETICS AND ORTHOTICS

Minimum Credits: 2
Maximum Credits: 2
This course will provide knowledge of all the facets of running or managing the business end of an orthotics and prosthetics department or company.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

Prosthodontics

PROSTH 2020 - GRADUT REMOVABLE PROSTHODONTICS

Minimum Credits: 2
Maximum Credits: 2
This course examines in detail the mechanics of RPD function and its application to design. Complex RPD situations and their relationship to a
complicated occlusion, with or without fixed partial dentures, is explored.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PROSTH 2030 - GRADUATE FIXED PROSTHODONTICS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course exposes the student to concepts of tooth preparation and their relationship to total rehabilitation of the patient. Emphasis is placed on diagnostic preparation, dental materials knowledge, esthetics and the total relationship to occlusion. Modification of design for integration with RPD, is stressed. Laboratory skills are emphasized.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PROSTH 2040 - DENTAL MATERIAL PROSTHODONTICS 1**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents an introduction to biomaterials. Application of biomaterials in removable and fixed prosthodontics will be emphasized.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PROSTH 2050 - DENTAL MATERIAL PROSTHODONTICS 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Demonstrations of different clinical applications of BIO materials, as well as laboratory fabrication of appliances for active cases currently being treated in the prosthodontic department will be presented.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PROSTH 2110 - ADVANCED MAXILLOFACIAL PROSTHODONTICS 1**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course exposes the graduate resident to the principles of radiation oncology and the management of the cancer patient. Emphasis is placed on the oral biological changes that occur with treatment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PROSTH 2117 - IMPLANT PROSTHODONTICS SEM 1**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is a didactic course designed to review all aspects of implant dentistry at the in depth level. Diagnostic and treatment planning procedures, selection of implants to include biomechanical and biomaterials considerations, surgical procedures for implant placement, prosthodontic procedures to include provisional and definitive implant restorations, and maintenance procedures will be presented and illustrated.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
PROSTH 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Minimum Credits: 2
Maximum Credits: 2
This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2150 - PROSTHODONTICS SEMINAR 1

Minimum Credits: 2
Maximum Credits: 2
This course is an introductory review of basic prosthodontic principles and their application to advanced prosthodontic procedures. Thorough understanding of this course is essential to comprehensive treatment planning.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2160 - PROSTHODONTICS SEMINAR 2

Minimum Credits: 1
Maximum Credits: 1
This course is a description of the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2170 - PROSTHODONTICS SEMINAR 3

Minimum Credits: 2
Maximum Credits: 2
This course discusses the special considerations given to the geriatric and the handicapped prosthodontic patient. Maxillofacial patients and those undergoing immune suppression and cancer therapy are discussed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2180 - PROSTHODONTICS SEMINAR 4

Minimum Credits: 2
Maximum Credits: 2
This course is the final in a series that entails the review of advanced graduate procedures, including TMJ and implantology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2181 - PROSTHODONTIC SEMINAR 6

Minimum Credits: 2
Maximum Credits: 2
This course is another part of a series that entails the review of advanced graduate procedures, including TMJ and implantology.
Academic Career: Graduate
PROSTH 2182 - PROSTHODONTICS SEMINAR 5

Minimum Credits: 1
Maximum Credits: 1
Continuation course for the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

PROSTH 2200 - OCCLUSION

Minimum Credits: 1
Maximum Credits: 1
This is an introductory course in physiologic, gnathologic and denture occlusion. The basic principles and techniques are covered.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2201 - OCCLUSION SEMINAR 1

Minimum Credits: 1
Maximum Credits: 1
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2202 - OCCLUSION SEMINAR 2

Minimum Credits: 1
Maximum Credits: 1
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

PROSTH 2203 - OCCLUSION SEMINAR 3

Minimum Credits: 1
Maximum Credits: 1
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

**PROSTH 2204 - OCCLUSION SEMINAR 4**

Minimum Credits: 1  
Maximum Credits: 1  
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

**PROSTH 2205 - OCCLUSION SEMINAR 5**

Minimum Credits: 1  
Maximum Credits: 1  
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

**PROSTH 2206 - OCCLUSION SEMINAR 6**

Minimum Credits: 1  
Maximum Credits: 1  
The Graduate Occlusion Seminar is intended for Graduate Prosthodontic Residents in the School of Dental Medicine. This ongoing seminar offers higher learning in all aspects of occlusion related to the human dentition. The seminar incorporates a review of pertinent articles, a review of relevant textbook chapters, case presentations, clinical demonstrations, and open discussion regarding the details of occlusion as it relates to the field of Prosthodontics. The Resident's knowledge of Occlusion is expected to increase dramatically as they proceed through these seminars.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad HSU Basis

**PROSTH 2210 - SPECIAL PROSTHODONTICS CLINIC**

Minimum Credits: 1  
Maximum Credits: 9  
This course provides the resident with experience providing special clinical care of multi-disciplinary cases involving dental and medical treatment under direct faculty supervision.

Academic Career: Graduate  
Course Component: Clinical  
Grade Component: Grad Letter Grade

**PROSTH 2211 - COMPREHNSV TREATMENT PLANNING 1**

Minimum Credits: 2  
Maximum Credits: 2  
This is a multidisciplinary course in comprehensive/diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: Graduate
PROSTH 2230 - TEMPOROMANDIBULAR JOINT DYSFNTCN

Minimum Credits: 1
Maximum Credits: 1
This course exposes the student to the etiology, diagnosis, and treatment of TMJ and myofascial pain dysfunction syndromes. Radiology and drug therapy are reviewed. Various treatment modalities involving electronic instrumentation and splint therapies are reviewed.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

PROSTH 2240 - LITERATURE REVIEW 1

Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas: bone resorption, articulators, face-bow, hinge axis, and immediate dentures.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2250 - LITERATURE REVIEW 2

Minimum Credits: 1
Maximum Credits: 1
This course covers classic and current literature review in the following areas: color, splinting, porcelain, crown preparation, impression materials, dies and pontics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2260 - LITERATURE REVIEW 3

Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2270 - LITERATURE REVIEW 4

Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas: maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2272 - LITERATURE REVIEW 6
Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas. Maxillofacial prosthodontics, removable partial dentures, complete
dentures, diagnosis and treatment planning of the partially edentulous mouth.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PROSTH 2273 - LITERATURE REVIEW 5

Minimum Credits: 1
Maximum Credits: 1
Continuation course that covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation,
temporomandibular joint dysfunction, and occlusal equilibration.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2305 - CEREC BASIC TRAINING

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

PROSTH 2400 - REMOVABLE PARTIAL DENTURES

Minimum Credits: 1
Maximum Credits: 1
A seminar/case based course where advanced students (prosthodontic residents) will gain experience in surveying and designing a variety of clinical
removable partial dentures. The majority of cases will involve clinical cases which will include the various Kennedy classes and modification while
some simulated models may be used. The assessment of partial edentulism encompasses everything from the loss of a single tooth to the loss of all
teeth but one. All disciplines of dentistry may be involved. The integration of all considerations is where the specialty of prosthodontics has the most
to offer a patient. The management of the many variables in partially edentulous conditions is the essence of specialty-level prosthodontic therapy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 2510 - ADVANCED PROSTHODONTIC CLINIC 1

Minimum Credits: 9
Maximum Credits: 9
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation.
Knowledge of porcelain and its handling qualities are stressed.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2520 - ADVANCED PROSTHODONTIC CLINIC 2

Minimum Credits: 9
Maximum Credits: 9
Emphasis is placed on the clinical, laboratory, and technical skills necessary to treat the partially edentulous patient using a removable appliance.
Coordination with fixed appliances is mandatory.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2530 - ADVANCED PROSTHODONTIC CLINIC 3

Minimum Credits: 13.5
Maximum Credits: 13.5
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2540 - ADVANCED PROSTHODONTIC CLINIC 4

Minimum Credits: 13.5
Maximum Credits: 13.5
This course emphasizes the total treatment of the geriatric patient. Considerations are given to prosthodontic rehabilitation with implants, orthognathic treatment planning and the difficult prosthodontic patient.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2550 - ADVANCED PROSTHODONTIC CLINIC 5

Minimum Credits: 13.5
Maximum Credits: 13.5
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2560 - ADVANCED PROSTHODONTIC CLINIC 6

Minimum Credits: 13.5
Maximum Credits: 13.5
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2570 - ADVANCED PROSTHODONTIC CLINIC 7

Minimum Credits: 13.5
Maximum Credits: 13.5
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2580 - ADVANCED PROSTHODONTIC CLINIC 8
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

**Academic Career:** Graduate

**Course Component:** Clinical

**Grade Component:** Grad Letter Grade

**PROSTH 2590 - ADV PROSTHODONTIC CLINIC 9**

Minimum Credits: 9
Maximum Credits: 9

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

**Academic Career:** Dental Medicine

**Course Component:** Clinical

**Grade Component:** Grad Letter Grade

**PROSTH 5001 - DIRECTED STUDY IN DENTAL MATERIALS**

Minimum Credits: 2
Maximum Credits: 2

A customized course of study in dental materials for students who transfer to the School of Dental Medicine.

**Academic Career:** Dental Medicine

**Course Component:** Directed Studies

**Grade Component:** Grad HSU Basis

**PROSTH 5002 - DIRECTED STUDY IN DENTAL OCCLUSION**

Minimum Credits: 1
Maximum Credits: 1

A customized course of study in dental occlusion for students who transfer to the School of Dental Medicine.

**Academic Career:** Dental Medicine

**Course Component:** Directed Studies

**Grade Component:** Grad HSU Basis

**PROSTH 5142 - DENTAL MATERIALS**

Minimum Credits: 2
Maximum Credits: 2

In this course you will learn proper ergonomics for periodontal (perio) procedures, patient and clinician positioning, perio instrument identification, grasp(s) and with discipline specific periodontal instruments. It is expected by the end of this course you will be able to accurately perform a periodontal assessment in a simulation setting and demonstrate proper subgingival calculus detection using an 11/12 explorer.

**Academic Career:** Dental Medicine

**Course Component:** Lecture

**Grade Component:** ABCF

**PROSTH 5171 - PRINCIPLES OF DENTAL OCCLUSION**

Minimum Credits: 3
Maximum Credits: 3

This course is clinically-oriented and employs preclinical laboratory exercises to teach the students the basic principles of occlusion. The importance of the relationship between the temporomandibular joint, occlusion and incisal guidance is emphasized. The students use semi-adjustable - class III - articulators and face bows. Students will learn how to perform an anatomic diagnostic mounting, occlusal analysis, diagnostic equilibration, bite splint fabrication, and functional occlusal waxing.

**Academic Career:** Dental Medicine
PROSTH 5211 - FIXED PARTIAL DENTURES 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students will develop an understanding of the process involved in successfully treating a patient indicated for the placement of crowns. Topics include: 1) the preliminary work up, including diagnostic waxing on prepared casts; 2) template fabrication for provisionalization; and 3) the sequencing involved in the development of the art and skill of proper tooth preparation for single crowns, including a full cast crown preparation (FCC), a porcelain fused to metal crown (PFM), and an all ceramic crown (ACC). Provisionalization of the crown preparations will be discussed. Students will develop an understanding of the principles of final impression making for a fixed partial denture (FPD), pouring and pindexing of the impression casts, face-bow transfer registration, jaw relation records and mounting of the case on a semi-adjustable articulator. In the accompanying lab course, PROSTH 5215, students will have an opportunity to develop and practice skills in a small group laboratory setting. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5213 - COMPLETE DENTURES 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students will develop an understanding of the process involved in successfully treating a patient indicated for the placement of crowns. Topics include: 1) the preliminary work up, including diagnostic waxing on prepared casts; 2) template fabrication for provisionalization; and 3) the sequencing involved in the development of the art and skill of proper tooth preparation for single crowns, including a full cast crown preparation (FCC), a porcelain fused to metal crown (PFM), and an all ceramic crown (ACC). Provisionalization of the crown preparations will be discussed. Students will develop an understanding of the principles of final impression making for a fixed partial denture (FPD), pouring and pindexing of the impression casts, face-bow transfer registration, jaw relation records and mounting of the case on a semi-adjustable articulator. In the accompanying lab course, PROSTH 5215, students will have an opportunity to develop and practice skills in a small group laboratory setting. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB

Minimum Credits: 3
Maximum Credits: 3
In this course, students will apply concepts learned in PROSTH 5211 and will develop the skills necessary to treat a fixed prosthodontic patient. An emphasis will be placed on the preliminary work up as well as the art of proper tooth preparation for single crowns. Students will complete crown preparations for a full cast crown (FCC), porcelain fused to metal crown (PFM), and all ceramic crowns (ACC). Provisionalization of the crown preps will also be required. Students will also develop skills in making final impressions for a fixed partial denture (FPD) and in the laboratory techniques required to produce acceptable results. Laboratory procedures such as pouring and pindexing of casts, facebow transfer registration, jaw relation records, and mounting of the case on a semi-adjustable articulator will be accomplished by the student. This course includes small group laboratory sessions.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: ABCF

PROSTH 5217 - COMPLETE DENTURES 1 LAB

Minimum Credits: 1.5
Maximum Credits: 1.5
In this course, students will be prepared for the complex task of complete denture fabrication for the edentulous patient. Students will apply concepts learned in the didactic course (PROSTH 5213) in order to fabricate complete dentures in a simulated clinical environment. The student will also
participate in the fabrication of complete dentures in the continuing education clinic for a selected patient. This course includes small group laboratory sessions.

**Academic Career:** Dental Medicine  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**PROSTH 5241 - REMOVABLE PARTIAL DENTURES**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
In this course, students will be prepared for the complex task of understanding, diagnosing, and treating partially edentulous patients. Upon completion of this course, and the accompanying laboratory course, the student will be able to recognize, manage, and/or restore partial edentulism to proper form, function, and esthetics with a removable prosthesis. This course includes lectures and class discussions.

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF

**PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY**

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
In this course, students will be prepared for the complex task of understanding, diagnosing, and treating partially edentulous patients. Upon completion of this course, and the accompanying didactic course, the student will be able to recognize, manage, and/or restore partial edentulism to proper form, function, and esthetics with a removable prosthesis. This course includes small group lab sessions.

**Academic Career:** Dental Medicine  
**Course Component:** Practicum  
**Grade Component:** ABCF

**PROSTH 5251 - FIXED PARTIAL DENTURES 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
In this course, students will prepare for the complex task of performing indirect prosthodontic procedures on a clinical level. Students will learn the process of fabricating a 3-unit fixed partial denture including treatment planning, laboratory prescriptions, pontic and framework designs, diagnostic waxing techniques, soldering principles, indirect inlay and onlay preparations, dental cements, and retraction cord techniques for making impressions. Students will have an opportunity to apply principles learned in this course in the accompanying laboratory course, PROSTH 5256 (Fixed Partial Dentures 2 Lab).

**Academic Career:** Dental Medicine  
**Course Component:** Lecture  
**Grade Component:** ABCF

**PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of this course is to prepare the student for the complex task of performing indirect restorative procedures on a clinical level. Students will apply theoretical concepts learned in PROSTH 5251 (Fixed Partial Dentures 2) in order to prepare multiple abutment teeth and fabricate 3 or 4 or 6 - unit provisional restorations. Preparation of adjacent teeth with a splinted provisional. Students will also have exposure to the preparation and provisionalization of typodont teeth for survey crowns and indirect metal and tooth colored onlays. Composite or acrylic provisional material will be utilized . This course includes small group laboratory sessions.

**Academic Career:** Dental Medicine  
**Course Component:** Practicum  
**Grade Component:** ABCF

**PROSTH 5271 - DIGITAL DENTISTRY 1**
Minimum Credits: 1
Maximum Credits: 1
In this course, students will be introduced to CAD/CAM (CEREC) technology and will be properly trained in its use. This course blends theoretical foundations with practical applications. Students will learn how to prepare teeth for all-ceramic, CEREC crowns and will make digital impressions using the CEREC 4.24 machines. Students will also learn how to design and edit these crowns prior to milling them. Proper block selection and finishing/inserting these final restorations will also be addressed. This course includes lecture and small group laboratory/simulation sessions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5273 - FIXED PARTIAL DENTURES 3

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be prepared for the complex task of fabricating post and cores on anterior and posterior endodontically treated teeth. Students will learn the procedures involved for the placement of retraction cord into the sulcus of a patient prior to impression making. Students will also be exposed to contemporary provisional materials and CAD/CAM technology. This course includes lectures and class discussion. An opportunity to apply principles learned in this course will be provided in the accompanying lab course, PROSTH 5276 (Fixed Partial Dentures 3 Laboratory).
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5276 - FIXED PARTIAL DENTURES 3 LABORATORY

Minimum Credits: 3
Maximum Credits: 3
The goal of this fixed prosthodontic course is to prepare the student for the complex task of fabricating post and cores on endodontically treated teeth. Students will have an opportunity to apply concepts learned in PROSTH 5273 (Fixed Partial Dentures 3) in a small group laboratory setting. Students will prepare porcelain veneers on anterior teeth, practice the procedures involved in the placement of retraction cord into the sulcus of a patient, and evaluate a completed fixed partial denture case to prepare for insertion. A practical exam on single crowns and provisionals will also be included.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

PROSTH 5282 - COMPLETE DENTURES 2

Minimum Credits: 1
Maximum Credits: 1
In this course, students will learn the basic principles for the classification system of edentulism as well as dental procedures related to topics such as denture repair; relines or rebases to current removable appliances; interim or transitional appliances; overdentures; and immediate dentures. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5311 - IMPLANTOLOGY 1

Minimum Credits: 1.5
Maximum Credits: 1.5
In this course, students will be introduced to implantology as a progressive field that requires a comprehensive knowledge of dentistry. This course prepares students for introductory level treatment of implant dentistry, including examination of implant-bone interface, preoperative patient evaluation, use of cone beam CT scanning to image bone, construct surgical guides and virtually treatment plan cases. Other topics covered include: treatment planning involving surgical techniques and prosthetic therapies; surgical instrumentation and procedures for effective implant placement; temporization of the patient during the implant therapy; and implant impression making techniques. This course also serves as preparation for Implantology 2, where the student will begin with the reconstructive phase of implantology. This course includes lectures and class discussions.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5346 - IMPLANTOLOGY 2

Minimum Credits: 1.5
Maximum Credits: 1.5
The success of any implant treatment is determined by proper prosthodontic diagnosis, treatment planning, successful execution of prosthodontic implant techniques and post-delivery maintenance. In this course, students will focus on the techniques indicated for successful prosthodontic restoration of dental implants. The foundational knowledge presented in Implantology I will be used to prepare the student for proper treatment planning and prosthodontic care of all edentulous patients desiring dental implant reconstruction. Advanced procedures will also be presented to familiarize the student with treatment modalities that are available for specialty care. Post insertion therapies as well as implant practice management considerations will also be discussed. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5347 - CURRENT TRENDS IN DIGITAL DENTISTRY

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

PROSTH 5348 - DIGITAL DENTISTRY 2

Minimum Credits: 1
Maximum Credits: 1
This course will serve as a continuation of Digital Dentistry 1 and will complete the student's introduction to CAD/CAM technology. In this course, students will learn:* How to prepare teeth for a 3-unit fixed partial denture and a porcelain crown restoration over an implant.* How to make digital impressions using the CEREC Bluecam machines.* How to design and edit these restorations prior to milling them.* Proper block selection and how to finish and insert these final restorations. This course includes small group rotations in the CEREC lab and simulation clinic.

Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

PROSTH 5367 - CLINICAL REMOVABLE PROSTHODONTICS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with removable prosthodontic needs.

Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

PROSTH 5369 - CLINICAL FIXED PROSTHODONTICS 1

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of fixed prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed prosthodontic needs at the
level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with fixed prosthodontic needs.

**Academic Career:** Dental Medicine  
**Course Component:** Clinical  
**Grade Component:** ABCF

**PROSTH 5375 - CLINICAL PROSTHODONTICS 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to provide clinical experiences in the area of fixed and removable prosthodontics for predoctoral dental students. Students will provide care to dental patients with fixed and removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with fixed and removable prosthodontic needs. During this third-year course, students will start to fulfill their clinical prosthodontics requirements in the Prosthodontic Module of the Comprehensive Care Clinics. Any unmet clinical requirements will need to be completed during the fourth-year Clinical Prosthodontics 2 course (PROSTH 5448). Competence in clinical prosthodontics will be formally assessed in the fourth-year course Clinical Prosthodontics 2 (PROSTH 5448).

**PROSTH 5377 - SIMULATED PATIENT TREATMENT**

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  
In a simulated treatment setting, students will focus on the preparation of a single-unit porcelain crown and a three-unit porcelain-fused-to-metal fixed partial denture (FPD), utilizing several preparation designs and restorative materials. The student will complete a 3-unit fixed bridge clinical simulation competency examination by the end of this course.

**PROSTH 5448 - CLINICAL PROSTHODONTICS 2**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
This course is designed to provide clinical experiences in the areas of fixed and removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed and removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase 2 skills in caring for the patient with fixed and removable prosthodontic needs.

**PROSTH 5449 - CLINICAL REMOVABLE PROSTHODONTICS 2**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The comprehensive and clinical treatment of a selected and assigned number of partially and completely edentulous patients. Treatment cases include complete dentures, immediate and transitional dentures, overlay dentures, removable partial dentures, temporary partial dentures, and the repair, reline and rebase of indicated dentures.

**PROSTH 5459 - CLINICAL FIXED PROSTHODONTICS 2**
Minimum Credits: 2
Maximum Credits: 2
This course will provide patient care in a clinical setting under direct faculty supervision. Treatment procedures will include anterior and posterior fixed partial dentures.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

PROSTH 5469 - CLINICAL IMPLANT DENTISTRY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide clinical experiences in the areas of fixed and removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed and removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase their skills in caring for the patient with fixed and removable prosthodontic needs.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

PROSTH 5810 - DIGITAL DENTISTRY SELECTIVE

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad HSU Basis

PROSTH 5910 - ADVANCED PROSTHODONTIC TREATMENT PLANNING

Minimum Credits: 1
Maximum Credits: 1
This course is structured to develop the student's ability to plan and implement treatment for patients with complex prosthodontic problems, including but not limited to fixed, implant, and removable prosthodontics, geriatric prosthodontics, TMJ problems, re-establishment of vertical dimension, surgical prosthodontics and other prosthodontic procedures.
Academic Career: Dental Medicine
Course Component: Seminar
Grade Component: Grad HSU Basis

PROSTH 5915 - DENTAL IMPLANT SELECTIVE

Minimum Credits: 1
Maximum Credits: 1
A hands-on approach is offered for the surgical and restorative phases of implant dentistry. Students will surgically place implants and assist with cases. Each student will restore one Prosthetic case. Advanced seminars will be given on implant dentistry.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

PROSTH 5916 - COMPLETE DENTURE FABRICATION - VA

Minimum Credits: 1
Maximum Credits: 1
This externship permits the fourth year dental student working one-on-one with a hospital staff dentist to complete one full denture in a hospital setting on medically compromised geriatric patients. In addition the student will understand the operation of a dental clinic within a hospital setting.
Academic Career: Dental Medicine
Psychiatry

PSYC 5345 - CLINICAL NEUROSCIENCE REPEAT

Minimum Credits: 0
Maximum Credits: 0
This course is registered when the clinical neuroscience clerkship is failed and all or part of it must be repeated. If less than the full clerkship is taken, the transcript should reflect the specific number of weeks repeated.
Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Attributes: School of Medicine Year 3

PSYC 5365 - CLINICAL NEUROSCIENCES

Minimum Credits: 0
Maximum Credits: 0
The neurosciences clerkship integrates psychiatry and neurology. NSURG, neuropath and neurorad experiences are also provided. The block is five weeks psych and three weeks neurology. Clinical teaching includes INPT and OPT settings. Field trips, NSURG or neuropath brain cutting, emergency room, and one aa meeting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.
Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5
Course Attributes: School of Medicine Year 3

PSYC 5366 - PSYCHIATRY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
The psychiatry clerkship is five weeks of clinical psychiatry. Focus in on common psychiatric conditions: presentation, diagnosis, treatment and prognosis. Clinical teaching includes INPT and emergency room settings. Field trips, and one aa meeting are required. Didactic teaching on two afternoons include interactive lectures, case conferences and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

PSYC 5410 - ACTING INTERNSHIP IN ADULT PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0
Students may participate in a number of acting internships available in Psychiatry. The student will be assigned to an inpatient unit at Western Psychiatric Institute and Clinic. This experience will enhance your skills in dealing with diagnostic and management of psychiatric patients. Inpatient units available for acting internships include: Geriatrics, Schizophrenia, Dual Diagnosis (drug and alcohol), General Adult, and Eating Disorders.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5411 - CHILD/ADOLESCENT PSYCHIATRY ACTING INTERNSHIP
Students may participate in an elective in Child and Adolescent Psychiatry available through Western Psychiatric Institute and Clinic's Child and Adolescent Inpatient Service. The student will be a member of a multidisciplinary team consisting of attending psychiatrist, social worker, teacher and nursing staff. The student will manage assigned patients directly under the guidance of attending physician. Acting interns will interact with families and the patient's outpatient treatment team to gain collateral information, updates case progress, and provides psycho education.

**Academic Career:** Medical School

**Course Component:** Clinical

**Grade Component:** H/HS/S/LS/U

**Course Attributes:** School of Medicine Year 4

**PSYC 5412 - TRIPLE BOARD ACTING INTERNSHIP**

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at children's hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

**Academic Career:** Medical School

**Course Component:** Clinical

**Grade Component:** H/HS/S/LS/U

**Course Attributes:** School of Medicine Year 4

**PSYC 5415 - INTRODUCTION TO CLINICAL PSYCHIATRY**

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is for those students interested in getting experience in clinical psychiatry outside of the core clinical neurosciences clerkship. Students will develop basic skills in the interviewing and assessment, diagnosis and management of psychiatric patients in the inpatient units. Course objectives include: conduct comprehensive psychiatric interview and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and management treatment; plan and implement a biopsychosocial treatment plan for patients with psychiatric illnesses; and utilize the resources and skills of related mental health professionals.

**Academic Career:** Medical School

**Course Component:** Clinical

**Grade Component:** H/HS/S/LS/U

**Course Attributes:** School of Medicine Year 4

**PSYC 5420 - PSYCHIATRIC EMERGENCY SERVICES**

Minimum Credits: 0

Maximum Credits: 0

Twenty-four hour psychiatric assessment center and emergency room where students may participate for one to 3 months in the assessment, diagnosis and disposition planning of patients. Students also participate in a comprehensive course covering diagnostic interviewing, lethal assessment and specific methods for interviewing efficiently under time constraints. This course consists of didactic presentations, role playing, interviewing of patients in class and a bibliography of required and suggested readings.

**Academic Career:** Medical School

**Course Component:** Clinical

**Grade Component:** H/HS/S/LS/U

**Course Attributes:** School of Medicine Year 4

**PSYC 5422 - TELEPSYCHIATRY**

Minimum Credits: 0

Maximum Credits: 0
Telepsychiatry visits across the region, independent reading, and a QI project.

**Academic Career:** Medical School
**Course Component:** Clinical
**Grade Component:** H/HS/S/LS/U

**PSYC 5425 - MANAGEMENT OF PSYCHIATRIC ILLNESSES**

Minimum Credits: 0
Maximum Credits: 0
Four week elective designed to allow students to learn in a service-learning model. Students will participate at non hospital sites interacting with social workers, nurse practitioners, primary care physicians, and psychiatrists. Primary goal of this elective is to learn to identify and manage psychiatric illness in the primary care setting.
**Academic Career:** Medical School
**Course Component:** Clinical
**Grade Component:** H/HS/S/LS/U
**Course Attributes:** School of Medicine Year 4

**PSYC 5430 - PEDIATRIC PSYCHIATRY**

Minimum Credits: 0
Maximum Credits: 0
Assessment of children and families referred to behavioral science program, children's hospital and consult liaison. Help consult in abuse and neglect problems at hospitals and special settings. Acquainted with community resources. Skills in behavioral syndromes assessment principles of consultation and liaison activity.
**Academic Career:** Medical School
**Course Component:** Clinical
**Grade Component:** H/HS/S/LS/U
**Course Attributes:** School of Medicine Year 4

**PSYC 5441 - OUTPATIENT ADOLESCENT PSYCHIATRY**

Minimum Credits: 0
Maximum Credits: 0
Four week elective in which the student will observe and participate in complete evaluations of children, adolescents, and their families. Expected to rotate in a general clinic and through some of the specialty child psychiatry clinics as well. There will be an opportunity to observe group therapy sessions. Teaching will be in individual, group and conference settings.
**Academic Career:** Medical School
**Course Component:** Clinical
**Grade Component:** H/HS/S/LS/U
**Course Attributes:** School of Medicine Year 4

**PSYC 5442 - ADV OUTPATIENT CHILD & ADOLSCNT**

Minimum Credits: 0
Maximum Credits: 0
Four/eight week for those individuals who are considering a career in behavioral pediatrics, or general or child psychiatry. Active role demanded of student. Those interested will serve as a co-clinician with shared and supervised responsibility for assessment and treatment of children and adolescents. Literature-intensive, assigned texts and articles. Students will learn clinical skills as part of a multi-disciplinary approach to outpatient treatment, working with other mental health professionals. Student will spend time in general clinic and varied specialty clinics.
**Academic Career:** Medical School
**Course Component:** Clinical
**Grade Component:** H/HS/S/LS/U
**Course Attributes:** School of Medicine Year 4

**PSYC 5443 - SEX ABUSE OF CHILDREN & ADOLSCNT**
Minimum Credits: 0
Maximum Credits: 0
Four week elective, clinical and research aspects of child sexual abuse will be examined from a variety of perspectives. Discussions with instructors and selected readings. Clinical aspects of child sexual abuse including how to identify and gather information from children, methods of reporting abuse to the proper authorities. Legal and child protective aspects. Psychiatric and physical problems will be addressed.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5448 - INTRODUCTION TO GERIATRIC PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0
This course will provide an introduction to psychiatric care of the geriatric patient. Experiences will include new assessments, interviewing, psychotherapy and pharmacotherapy, collaboration with geriatricians and other related issues. Experiences will be in both inpatient units and in-home visits. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and manage treatment; plan and implement biopsychosocial treatment plan for patients with elders with psychiatric illnesses; utilize the resources and skills of related mental health professionals, learning how to collaborate with other providers and agencies; understand how family and community contents affect mental health of the elderly; summarize the assessment and treatment of a patient with dementia; employ a cognitive screening evaluation to assess and follow patients with cognitive impairment and state the limitations of these instruments; summarize the special considerations in prescribing psychotropic medications of the elderly, especially toxicity risks; appreciate the role of loss in the etiology of psychiatric disorders in the elderly.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5450 - GERIATIC PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0
Four/eight week elective provides the students the opportunity of being involved in all aspects of care of elderly inpatients and outpatients. Involvement in individual, couple, family and group programs. Function as members of the multi-disciplinary team. Assume increasing responsibility for individual patients as their rotations proceed. Attend a weekly case conference. Supervised by a resident and faculty member of the team to which they are assigned.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5455 - EMERGENCY PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0
Student will learn clinical interviewing, the mental status examination, basic psychiatric diagnosis, basics of evaluation of suicidal and homicidal potential, emergency therapeutics, and basic aspects of psychiatry and the law.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5458 - PSYCHIATRIC ASSESSMENT

Minimum Credits: 0
Maximum Credits: 0
This elective experience will develop skills at psychiatric interviewing as well as assessment of new patients. Forty (40%) percent time will be spent in the psychiatric emergency room doing evaluations with faculty and resident preceptors, 40% rotating at other sites (child, adult, geriatric) doing assessments of new ambulatory patients, plus a full day of didactics and supervision. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, and formulate working diagnosis using the DSM-IV multi axial system; elicit, describe and record the key components of a mental status examination; make a clear and concise psychiatric case presentation; learn different approaches to assessment across the lifespan; understand the indications and procedures for involuntary mental health commitment; develop a collaborative, multi-disciplinary and biopsychosocial approach to patient care; demonstrate empathy, facilitative approaches and sensitivity to diversity.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5459 - NEUROSCIENCE AT THE BEDSIDE: EXPLORING PERSONALIZED MEDICINE IN PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0

Personlized medicine is the new catchphrase for the role of cutting edge translational science on routine clinical care. Can we use an imaging result to predict treatment response? How will a person's genetic make-up inform choice of medication? How does awareness of risk affect management? In psychiatry, personalized medicine remains somewhat of a 'holy grail' elusive but hotly pursued by neuroscientists and clinicians. In this elective experience, students will get a taste of that pursuit through a mixture of scientific and clinical activities that will be individualized by students in particular areas ranging from neuroimaging, pharmacotherapy, genomics, ethics and service research. Students will investigate a particular area of interest through a literature review and specific directed experiences, presenting a capstone project to a scientific audience at the end. Overall supervision will be conducted by the course director.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5460 - CONSULTATION & LIAISON PSYCH

Minimum Credits: 0
Maximum Credits: 0

Four/eight week elective focuses on psychiatric problems in medical and surgical patients. Under the supervision of full-time faculty and chief resident. Respond to requests for psychiatric evaluation of patients on inpatient units. Conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patient's family in the clinical problem, makes treatment recommendations and provides appropriate follow-up during the patient's hospital stay. Multi-disciplinary team integrates the biological with psychosocial perspective to achieve view.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5462 - PSYCHIATRY AND FAMILY MEDICINE COMBINED ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

The four-week elective focuses on psychiatric and general medical problems in a variety of patients and settings. The rotation incorporates many aspects of the UPMC Psychiatry-Family Medicine combined residency program and is shaped to give students a sense of what life will be like as a combined resident/attending. It introduces students to many of the faculty, residents, and clinical sites involved in the combined Psychiatry/Family Medicine residency at UPMC. Sites include the family health centers associated with UPMC McKeesport and St. Margaret Family Medicine Residency Programs, outpatient psychiatry mood/psychosis clinics, and the family medicine inpatient service at UPMC Western Psychiatric Hospital. The student will conduct family medicine and psychiatry clinical evaluations, including obtaining a history and performing physical exams, and make treatment recommendations. They will also participate in integrated care including in-person and chart consultations. The student will participate in family medicine and psychiatry resident didactics and present their own journal club topic at the end of the rotation.

Academic Career: Medical School
Course Component: Clinical
PSYC 5465 - COMMUNITY PSYCHIATRY

Minimum Credits: 0  
Maximum Credits: 0

This four-week elective intends to teach students how to care for seriously and persistently mentally ill adults and adolescents who are in community-based psychiatric treatment programs. Students will precept with team psychiatrists, get exposure to group and individual therapy, and follow one or two patients for continuing care over the month. Home visits and other community outreach will be an integral part, along with collaboration with a variety of team members and other providers. Students will be involved in case management, treatment teams, and systems liaising (e.g., Assisting patients leave state hospitals and return to the community). The course objectives are: to build basic skills in psychiatric interviewing, assessment, and patient management; to learn how to work with "challenging" clients, situations, and systems; to plan and implement biopsychosocial treatment plans for patients with psychiatric illnesses; to utilize the resources and skills of related mental health professionals, working collaboratively with multiple disciplines and agencies; to understand how continuity of care can be achieved and how it can help improve patient outcomes; and to learn how the funding of mental health care affects service delivery and patient outcomes.

Academic Career: Medical School  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

PSYC 5468 - INTEGRATED CARE ACROSS THE LIFESPAN

Minimum Credits: 0  
Maximum Credits: 0

This elective will provide medical students with clinical experiences at the interface of psychiatric and medical care, focusing on different models of integrating ambulatory behavioral services with primary and specialty medical care. Students will work with interdisciplinary teams that help improve access to care, often at the level of the medical home.

Academic Career: Medical School  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

PSYC 5471 - MAYVIEW STATE HOSPITAL

Minimum Credits: 0  
Maximum Credits: 0

Eight week elective at Mayview State Hospital. Become aware of the social and community programs of the chronic mentally ill and participate in the supervised group therapy experience. Participate in ongoing research at Mayview depending on the student's ability and interest. Interview and assessment techniques for psychiatric inpatients. Prescription practice for psychotropic medications. Treatment of non-responsive schizophrenic patient. Drug metabolism, conduct a neurological evaluation of psychotic and depressed individuals.

Academic Career: Medical School  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 4

PSYC 5481 - ADDICTIONS TREATMENT PROGRAM

Minimum Credits: 0  
Maximum Credits: 0

Four/eight week placement providing the opportunity of being included in all aspects of care both in and outpatient, for chemical dependency. Participation and involvement in all medical-psychological aspects; detoxification and rehabilitation, individual, family and group counseling; evaluation/assessment, treatment planning; working with adult, adolescent, elderly and pregnant patients in various modalities. Function as an integral part of the clinical multi-disciplinary team. Recognize how to avoid prescribing inappropriately for chemically-dependent patients.

Academic Career: Medical School  
Course Component: Clinical
PSYC 5482 - DUAL DIAGNOSIS: MENTAL AND SUBSTANCE ABUSE

Minimum Credits: 0
Maximum Credits: 0
Experience treatment of patients with both mental illness problems and substance abuse problems at the Western psychiatric institute and clinic. Full member of interdisciplinary treatment team as primary therapist for two patients. Some time will be spent at off-site locations within the community.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5483 - ADDICTION MEDICINE AND DUAL DIAGNOSIS

Minimum Credits: 0
Maximum Credits: 0
This elective will provide the student with experiences in addition medicine and psychiatry, with a special focus on patients with dual diagnosis of substance use and other psychiatric disorders. Various rotation sites will be available including outpatient and inpatient detoxification services, treatment of opiate dependence (including methadone and buprenorphine maintenance programs), individual and group dual diagnosis treatment, and specialized perinatal addiction treatment for pregnant women and women with young children. Optional rotation sites in the HIV clinic and center for liver disease may also be available (depending on availability), as patients with addiction frequently engage in risky behaviors such as needle-sharing or unprotected sex that can lead to transmissible diseases such as HIV and hepatitis. Patients with psychiatry and substance use disorders often have a history of trauma, and thus the student will have ample opportunity to learn how to diagnose post-traumatic stress disorder (PTSD) and deliver trauma-informed care. Evidence-based treatments for addiction will be demonstrated with a special focus on motivational interviewing (MI), a collaborative, patient-centered technique for facilitating behavioral change. Supervision will be provided by medical directors of the various sites. The student participating in this elective will have the opportunity to: 1) assess patients in need of detoxification and provide appropriate treatment; 2) manage opiate dependence utilizing opioid-replacement therapies; 3) perform assessments and intakes on new patients referred for dual diagnosis treatment; 4) observe and interview patients during individual pharmacotherapy management sessions; 5) participate in individual and group dual diagnosis sessions; 6) interact with and provide education to family members when possible; 7) observe and assist with current substance abuse research within the department.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5485 - ADULT INTENSIVE OUTPATIENT PROGRAM

Minimum Credits: 0
Maximum Credits: 0
Elective introduces student to acutely ill psychiatric patients. Partial serves as a step-down for hospitalized patients with a mix of mood and psychotic disorders, frequently with significant comorbidities. Treatment occurs in group, individual and family sessions by multidisciplinary treatment team. Student participates in variety of clinical experiences: running group psychotherapy sessions; carrying small case load of individual patients for individual psychotherapy and pharmacotherapy; conduct family sessions; perform assessments and intakes on new patients; participate in treatment team meetings.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5500 - NEUROBEHAVIORAL PSYCHIATRY

Minimum Credits: 0
Maximum Credits: 0
Four week elective to learn different diagnosis of neuropsychiatric disorders in developmentally disabled population; neurology principles and treatment pertaining to developmental disabilities; behavioral neurology principles and treatment pertaining to developmental disabilities; to work on
a treatment team and learn inpatient case formulation and therapeutic management skills. John Merck multiple disabilities program for children/adolescents/adults and their families in and outpatient clinic and community liaison program. Reasons for admission is acute psychiatric symptomatology.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5510 - SLEEP AND ITS DISORDERS**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Eight week elective to provide a basic knowledge of sleep, regulation of a relationship of sleep stages to other physiobiological process; to develop basic skills and apply them to comprehensive assessment of patients with complaints of disturbed sleep. Assist in the evaluation of patients with disorders. Participate in history taking and in the administration of structured interview to patients and their bed partners. Learn principles and procedures of polysomnography and will participate in the processes of data interpretation, treatment recommendation and formulate a treatment plan.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5520 - BIOLOGICAL RHYTHMS**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Eight week elective in understanding more the interrelationships between the sleep-wake cycle and the circadian rhythms of core body temperature and different neuroendocrine axes; to participate in the evaluation of subjects and patients including history taking and recruitment. Provide as opportunity to learn about polysomnography and clinical neuroendocrinology including hormone assay procedures; participate in data collection and subsequent analysis. Material will be provided; expected to critically review relevant literature. Design a research study.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5531 - WOMEN'S BEHAVIORAL HEALTH**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective will focus on Women's Mental Health across the life cycle. The elective will explore multiple influences that shape women's health and well being, including hormonal, environmental, and social influences, as well as role changes throughout the life cycle. A special focus will be placed on the perinatal period, a challenging time in a woman's life. Women with psychiatric and addiction issues require counseling in regards to the safest way to maintain their own mental health and the health of their fetus. This includes discussions on whether to take a medication during pregnancy and its associated safety profile during pregnancy and while breastfeeding. Several psychiatric disorders can occur in the post-partum period, from post-partum depression to post-partum psychosis. Each bears its own challenges with the impact it has on the mother, her infant, and family. Mental health during midlife and the menopausal transition will also be discussed. Mood and anxiety disorders common during the menopausal transition, a time of pronounced reproductive hormone changes, menopausal symptoms (e.g. hot flashes, sleep disturbance, urogenital symptoms), and role transitions that can impact mental health during this time. Medical students will attend a general outpatient perinatal psychiatry clinic, outpatient perinatal addictions clinic, and spend time on the consult and liaison service at Magee Women's Hospital. Students will have the chance to learn more about current research in Women's Mental Health by meeting with faculty involved in this field of study.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5650 - INDIVIDUALIZED CLINICAL COURSE**
PSYC 5750 - GET READY FOR RESIDENCY BOOT CAMP

This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

Academic Career: Medical School
Course Component: Clinical
Grade Component: S/U Basis

PSYC 5890 - CHILD & ADOLESCENT MOOD AND ANXIETY DISORDERS

The Child and Adolescent Bipolar Spectrum Services (CABS) and Services for Teens at Risk (STAR) offer a four-week elective that provides outpatient experience with problems related to depression, anxiety, and bipolar disorder in children and adolescents. Students participating in this elective will learn to: 1) understand the manifestations of affective disorder in childhood and adolescence; 2) conduct structured assessments for childhood psychiatric disorders; and 3) understand several different research methodologies used in this population, including pharmacological treatment studies. Students interested in this elective area are asked to contact the Director of Medical Student Education at least two months prior to the start date to discuss their interests and develop a set of activities that will enable them to achieve their goals.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5892 - PSYCHOPHYSIOLOGY

Eight week elective provides an introduction to basic noninvasive electrophysiobiological techniques and psychophysiological responses used to study autonomic nervous system responsivity to psychological influences on physiology and pathophysiology will be taught and basic research. Readings will supplement lab work. Students will successfully collect at least one type of electrophysiobiological data; effectively critique a published article in psychophysiology; design a feasible psychophysiological experiment.

Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

PSYC 5893 - NEUROPHARMACOLOGY

Four week elective on various central neurotransmitter systems will be described and their possible role processes will be analyzed in relation to
pharmacological effects. Catecholamines, serotonin, GABA, acetylcholine and receptors will be discussed and existing experimental evidence regarding their role. Independently conduct a thorough library search; effectively critique and evaluate published research papers and write a comprehensive document based on a critical literature review.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### PSYC 5894 - PSYCHOPHARMACOLOGY OF MOOD DISORDERS

Minimum Credits: 0  
Maximum Credits: 0  
Eight week elective that offers the opportunity to conduct lab studies of cell membrane function in patients with mood disorders. Blood components are used to study ion transport phenomena and other aspects of membrane function, and membrane structural components such as phospholipids. Orientation is to ward off the biological foundations of major mood disorders, and the mechanisms underlying the therapeutic actions of psychopharmacological agents; to design an experiment that employs basic lab methods to investigate clinical phenomena; to analyze and interpret data from experiments.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### PSYC 5895 - PSYCHIATRY RESEARCH

Minimum Credits: 0  
Maximum Credits: 0  
This course provides students an opportunity to pursue independent research in a chosen area of interest within the field of psychiatry. Students are encouraged to design their independent study electives around their individual interests. Examples of research areas include but are not limited to: Epidemiology of major psychiatric disorders, Outpatient management of cognitive disorders, Outpatient behavioral treatment of anxiety disorders, Behavioral techniques in the management of general medical disease, and Outpatient substance abuse disorders and their management. Dr. Perez is available to assist you in designing your elective.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### PSYC 5896 - LAW AND PSYCHIATRY

Minimum Credits: 0  
Maximum Credits: 0  
Four week elective to conceptualize issues and perform law medicine consultations in general areas of mental health law, medical ethics and professional responsibility with specific projects on patient's rights, informed consent, medical experimentation, legal guidelines effecting patient care and other areas of medicine where legal, social and ethical issues predominate. An experience as a jail psychiatrist providing psychiatric examination, as an advocate for patient's rights in a state hospital or as a consultant to lawyers at neighborhood legal service could be arranged.

**Academic Career:** Medical School  
**Course Component:** Internship  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### PSYC 5897 - BEHAVIORAL MEDICINE

Minimum Credits: 0  
Maximum Credits: 0  
Four week elective aimed at familiarizing the student with theory and practical applications within the programs of one or two of participating faculty members. Techniques include behavioral assessment, nutritional intervention for diabetes and obesity, and interventions for enhancing coping with chronic disease or pain such as relaxation and biofeedback therapy. Develop an assessment and treatment plan for a representative case; conduct a
behavioral treatment session of a selected case; critically evaluate the clinical behavioral medicine literature.

**Academic Career:** Medical School  
**Course Component:** Internship  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5898 - INTRO TO CLINICAL PSYC RESEARCH**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Eight week elective exposure to clinical research projects. Variety of research projects available. Each student will be assigned a faculty mentor or mentors based on his/her particular interests. Current projects involve clinical, biochemical, neuropsychological, neuroanatomic and electrophysiology studies in schizophrenia. Experiences range from "bench-top" lab assays to patient interviewing techniques; data collection, basic computer skills and basic lab skills; basic knowledge of current psychiatric nomenclature and diagnostic instruments.

**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5899 - INDEPENDENT STUDY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week elective wherein the students are welcome to do an independent study or the possibilities of other studies besides the following ones: anorexia nervosa and bulimia nervosa; epidemiology of major psychiatric disorders; outpatient management of cognitive disorders; outpatient behavioral treatment of neurotic disorders; behavioral techniques in the management of general medicine disease; genetic factors in major psychiatric disorders; outpatient drug and alcohol valid disorders and their management.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**PSYC 5901 - EXTRAMURAL PSYCHIATRY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A clinical experience in psychiatry may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**PSYC 5903 - INDEPENDENT STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course is intended for the nonmedical graduate student. It provides the opportunity to participate in ongoing clinical or laboratory research under the direction of a departmental faculty preceptor. The student, in collaboration with the faculty member, will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and time table for completing the experience.

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

**Psychology**
PSY 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1
Maximum Credits: 9
Students who are planning, conducting or completing the master's thesis may register for this course.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the lifespan.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PSY 2005 - STAT ANAL 1/ADV STATS-UG

Minimum Credits: 3
Maximum Credits: 3
This course is the first of a two course sequence to provide the knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Students will learn techniques to conduct a variety of statistical tests; the appropriate interpretation of results will be emphasized. Topics include data management and visualization, hypothesis testing (including power, effect sizes, and confidence intervals), simple and multiple regression, moderation, and mediation. Students will use R software for statistical computations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2010 - STATISTICAL ANALYSIS 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course sequence to provide knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Topics covered include one-way and factorial analysis of variance, analysis of covariance, repeated measures and mixed model analysis of variance, mixed model analysis of covariance, outlier detection, and transformations. Students will continue to use SAS for statistical computing.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2035 - MIXED EFFECTS MODELS

Minimum Credits: 3
Maximum Credits: 3
This course covers the conceptual basis of mixed-effects and hierarchical linear models and their implementation in the R environment for statistical computing, with a particular focus on analyzing psychological or linguistic data. Course topics will include fixed and random effects, model comparison, contrast coding, binomial and Gaussian models, longitudinal data, and dealing with missing data. We'll also discuss the basics of statistical programming in R and other software packages no previous R or programming experience required!

Academic Career: Graduate
PSY 2090 - STRUCTURAL EQUATION MODELING

Minimum Credits: 3
Maximum Credits: 3
This course aims to provide a strong foundation in the principles of modern structural equation modeling (SEM), with an emphasis on the applied use of these techniques. The goal is to provide students with a strong set of fundamentals that will allow them to flexibly apply SEM to sophisticatedly answer diverse questions in a wide variety of data. Core topics covered will include conceptual introduction to latent variable models, fundamentals of covariance structure models (e.g., data requirements, identification, etc.), measurement models and confirmatory factor analysis, path analysis, full SEM, multiple group analysis, measurement invariance, and the basics of longitudinal models (e.g., cross-lagged panel designs, growth curve models). Introductions to advanced topics will be offered time permitting (e.g., SEM with categorical data, advanced growth curve modeling, mediation with bootstrapped errors, exploratory structure equation modeling). Examples will draw from the behavioral sciences, mostly psychology. Student evaluation will be based on take-home exercises, quizzes, and a final project. Students are encouraged to work with their advisors to identify suitable data for analysis in their final projects, with a goal of producing a publication ready product at the end of the term. The primary statistical package used in this course will likely be Mplus.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSY 2005 and 2010

PSY 2110 - TOPICS IN SOCIAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Course focuses on a single topic within social psychology, such as group formation and development, victimization, social comparison, or the self. Choice of topic varies from one instructor to another.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2111 - FOUNDATIONS OF SOCIAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to provide graduate students with an overview of theory and research in social psychology. Topics covered include social cognition, social perception, the self, attitudes and attitude change, close relationships, prosocial behavior, aggression, group processes and performance, and stereotyping, prejudice, and discrimination. A seminar format is used, in which students are expected to read and comment on papers, participate actively in class discussions, and write a final paper.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2130 - INTERPERSONAL RELATIONS

Minimum Credits: 3
Maximum Credits: 3
Survey of theories and empirical research from social psychology and personality relevant to the study of close interpersonal relationships. Topics covered include empathy, altruism, affiliation, aggression, sexuality, and interpersonal power.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2155 - PSYCHOLOGY OF SMALL GROUPS
The goal of this course is to provide students with a critical overview of theory and research on intragroup processes. Topics include: group composition and diversity; group structure (e.g., status, power); conflict (e.g., negotiation, justice); conformity and deviance; decision making; creativity and innovation; productivity and team effectiveness; leadership; prejudice and discrimination; social identity; responses to stigmatization; intergroup interaction; and techniques for improving intergroup relations. The course is useful for students in various areas of psychology as well as such disciplines as organizational behavior, sociology, and decision sciences.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**PSY 2200 - CLINICAL PSYCH RESEARCH METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
Graduate level examination of major research methods used in clinical psychology.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**PSY 2205 - PSYCHOPATHOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Provides a critical background in research strategies, phenomena, empirical research, & models of adult psychopathology. Emphasis on etiological & pathological research, with both psychological & biological findings to be discussed. Concentration will be on the major psychopathologies with clinical onset in adulthood, including schizophrenia, affective disorders, anxiety, addictions, & eating disorders. Conceptual & methodological issues that cross diagnostic categories will be stressed. Treatment approaches and differential diagnosis will be covered but not emphasized.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**PSY 2210 - CLINICAL PROGRAM RESEARCH SEMINAR**

Minimum Credits: 1  
Maximum Credits: 1  
This monthly graduate seminar series serves as an introduction to ongoing research relevant to the field of clinical psychology through research presentations by students and faculty from the clinical psychology program, department of psychology, and other departments.

**Academic Career:** Graduate

**Course Component:** Colloquium

**Grade Component:** Grad SN Basis

**PSY 2211 - READINGS ON DIVERSITY TOPICS IN CLINICAL PSYCHOLOGY**

Minimum Credits: 1  
Maximum Credits: 1  
Readings on diversity topics in clinical psychology.

**Academic Career:** Graduate

**Course Component:** Independent Study

**Grade Component:** Grad SN Basis

**PSY 2220 - CLINIC PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 6  
This graduate course involves supervised experience in interviewing, assessment and psychotherapy within the clinical psychology center. This
PSY 2225 - NON-CLINICAL EXTERNSHIP PRACTICUM

Minimum Credits: 1  
Maximum Credits: 6  
This graduate course provides the student with supervised experience in a community organization. The placement and number of credits must be approved by the student's program faculty. This course is open only to graduate students in psychology.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Psychology (PHD)

PSY 2230 - CLINICAL COGNITIVE ASSESSMENT

Minimum Credits: 3  
Maximum Credits: 3  
This graduate course focuses on the intellectual assessment of adults and children. Following a discussion of the history of theories of intelligence, the major instruments for assessing intellectual functioning will be reviewed, with a focus on the Wechsler Scales. Students will administer, score, and interpret several measures. The communication of assessment results will be emphasized. A brief introduction to the assessment of brain diseases and learning disability will also be provided.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Psychology (PHD)

PSY 2235 - CLIN PSYCHOPATHOLOGY ASSESSMENT

Minimum Credits: 3  
Maximum Credits: 3  
This graduate course covers psychometric theory and major methods for assessing psychopathology with an emphasis on objective tests such as the MMPI-2 and structured interviews. Both theoretical and practical issues of administration and interpretation are addressed. Open only to graduate students in the clinical psychology program.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Psychology (PHD)

PSY 2245 - DEVELOPMENTAL PSYCHOPATHOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This graduate course reviews models of social development and considers several theoretical issues with implications for both normal social development and for the emergence of psychopathology. Social experiences that are seen as crucial for normal development or which may set the stage for later problems are discussed. Both theoretical formulations and empirical findings are critically reviewed with an emphasis on attachment, peer relationships and family relationships.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PSY 2250 - PSYCHLGCL TRMNT: SYSTEMS & PRIN
Minimum Credits: 2
Maximum Credits: 2
This graduate course covers the history and systems of psychotherapy, with a particular focus on psychotherapy process and outcome research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2251 - PSYCHLGCL TRMNT: COGNTV & BEHVRL

Minimum Credits: 2
Maximum Credits: 2
This graduate course covers the history and theoretical foundations of cognitive and behavioral therapies as well as evidence on their effectiveness for a range of psychopathology in adulthood. Students will be exposed to basic principles of operant conditioning, behavioral analysis, counter-conditioning, strategies and case material will be introduced, but the class will focus on critical evaluation of treatment research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2252 - PSYCHLGCL TRMNT: BEHVRL MEDICINE

Minimum Credits: 2
Maximum Credits: 2
This graduate course examines history and current status of psychological therapies designed for health risk prevention and management of physical disease. Areas emphasized are risk factor modification, secondary prevention/rehabilitation, coping with medical illness and procedures, and community/public health interventions. Critical evaluation of research on these topics will be stressed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2253 - PSYCHLGCL TRMNT:FAMILIES & CHILD

Minimum Credits: 2
Maximum Credits: 2
This graduate course provides an overview of family systems theory and family interventions with children. The history and conceptual underpinnings of family systems approaches will be introduced along with a background in normal family development. Specific orientations, including structural, functional/behavioral, and strategic approaches will also be presented.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2280 - ETHICS AND PROFESSIONAL ISSUES 1

Minimum Credits: 1
Maximum Credits: 1
This course introduces first-year clinical students to some of the core issues in professional psychology, including an overview of ethics and diversity issues and some orientation to the clinic and the team process. The largest part of the course will be devoted to the development of fundamental clinical skills.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2281 - ETHICS AND PROFESSIONAL ISSUES 2

Minimum Credits: 1
Maximum Credits: 1
This course provides information for first-year clinical students regarding core issues in professional psychology, including a series of lectures on
psychopharmacology, followed by a summary of process research in psychotherapy. There will be additional presentations in the areas of ethics, diversity, and several empirically supported treatment models. This course will be offered annually in the summer term.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2282 - ETHICS AND PROFESSIONAL ISSUES 3

Minimum Credits: 1
Maximum Credits: 1
This course addresses a number of topics of relevance for second-year clinical students, including ethics and diversity, as well as information regarding specific empirically supported treatment models and more general therapy techniques, such as relaxation skills training and emotional self-regulation. This course will be offered each year in the fall term.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2301 - DEVELOPMENTAL RESEARCH METHODS

Minimum Credits: 3
Maximum Credits: 3
This course will provide a graduate level examination of major research methods used in developmental psychology from early childhood through adolescence.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

PSY 2305 - DEVELOPMENTAL PROGRAM RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This seminar accompanies graduate training in developmental psychology. It consists of research presentations, discussions of the literature, and professional development in the field of developmental psychology. Presentations are made by graduate students and faculty of the developmental psychology program as well as outside speakers.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

PSY 2310 - FOUNDS: DEVELM PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
A survey of theories and current research problems in developmental psychology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2315 - DVLPMTL PSYCH: INFANCY

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the development of basic cognitive processes such as sensation, perception, memory, and thought during the first 18 months of life.
Academic Career: Graduate
PSY 2325 - DVLPMTL PSY: SOCIAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course covers the central theory and research concerning social and emotional development. Topics covered include: interpersonal relations with peers and family; aggression and pro-social behavior; sex-role development and moral development.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2330 - DEVELM PSYCH: COGNITV DEVELP

Minimum Credits: 3
Maximum Credits: 3
This course examines children's cognitive development in areas such as perception, language, memory and learning skills. Several theoretical perspectives, including Piagetian theory and the information-processing approach are discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2376 - TOPICS SEM IN DEVELM PSYCHOLOGY

Minimum Credits: 2
Maximum Credits: 3
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in developmental psychology.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2402 - COGNITIVE PROGRAM RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This series of presentations serves as an introduction to ongoing research relevant to the field of cognitive psychology. Presentations are made by graduate students and faculty of the cognitive psychology program, the department of psychology, and other departments.
Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad SN Basis

PSY 2410 - FOUNDATIONS OF COGNITIVE PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area, in other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PSY 2470 - HUMAN COGNITION: SKILL ACQUISITION

Minimum Credits: 3
Maximum Credits: 3
A course in the human cognition graduate core sequence dealing with the learning of cognitive skills, such as technical job skills and professional problem solving skills. Emphasis is on the acquisition of facility, the nature of effective practice, and the representation of knowledge that contributes to skilled performance.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2471 - MAPPING HUMAN BRAIN CONNECTIVITY TECHNOLOGY BASIC RESEARCH AND CLINICAL APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
This course covers use of a novel Pittsburgh developed High Definition Fiber Tracking (HDT) technology providing human brain connectivity with unprecedented fidelity. The technology maps a million streamlines (0.1mm diameters sets of axons) per person providing 93 miles of tracts within the head involving 40 tracts connecting 170 brain areas. We can follow tracts from source to destination mapping projection fields with high accuracy. The fibers can be visualized and quantified providing circuit diagrams of cortical networks. These techniques will advance the study of brain systems, disorders, development, neuropathology, and neurosurgery. Students will perform projects individually or in groups analyzing collected data or developing new analysis or biomedical methods. Students can do projects that are cognitive neuroscience studies of a brain system or technical development of new methods. Sample projects might include mapping a sensory system, developmental assessment or automated brain segmentation and circuit tracing and detection of clinical anomalies (e.g., TBI breaks, tumors). Technical projects might involve better fiber reconstruction, tracking, tract segmentation or developing new visualization or statistical projects. Students must have some statistics and research experience/course work and consent of the instructor.

Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

PSY 2475 - BEHAVIORAL NEUROSCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course will explore the links between behavior (normal and abnormal) and the brain. Cognitive and affective processes will be emphasized. Throughout the course, students will be exposed to research involving humans and animals at a variety of levels: e.g., Analysis of behavior, neuroimaging studies of whole brain activity, recordings from single brain cells, examinations of brain chemistry, and manipulations and study of genetic information. No prior knowledge of biology or neuroscience is required. The format of the course will include both lectures and discussions of scientific papers. The lectures will introduce basic facts and methods of cognitive, systems, cellular, and molecular neuroscience, and they will provide overviews of topics in cognitive and affective neuroscience, considering both normal and clinically-impaired behavior and brain function. The readings will provide an opportunity to consider different methods in the context of the primary literature, permit selected topics to be explored in greater depth, and provide a foundation for self-exploration and evaluation of cognitive and affective neuroscience literatures.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2476 - TOPICS SEMINAR IN COGNITIVE PSYCHOLOGY

Minimum Credits: 1
Maximum Credits: 4
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in cognitive psychology.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

PSY 2477 - DESIGN OF EDUCATIONAL SYSTEMS
Students will work in teams to enact an innovative educational design process with real projects and real clients. The educational systems being (re)designed may include a museum exhibit, a high school robotics unit, a college lab course, or a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.

**PSY 2502 - HEALTH FUNDAMENTALS**

Minimum Credits: 3  
Maximum Credits: 3  
This is a 3-credit proseminar intended for graduate trainees in biological and health psychology. Key conceptual and methodological issues in several major areas of concentration will be presented and discussed in a seminar format, in the context of current research. Requirements include active class discussion, brief presentations, and several papers involving summary and critique of current issues in each area of concentration. Areas of concentration will include cardiovascular behavioral medicine, psychoneuroimmunology and behavioral oncology, addictions and health behavior, and health cognition.

**PSY 2505 - HEALTH PROGRAM RESEARCH SEMINAR**

Minimum Credits: 1  
Maximum Credits: 1  
Review of current research and topics in biopsychology.

**PSY 2520 - PSYCHONEUROIMMUNOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
The course provides a general background in the new interdisciplinary area of research dealing with effects of physical and psychological stress on the ability of the immune system to withstand illness and disease. Emphasis is on experimental studies which demonstrate ways in which environmental factors alter immunocompetence of animals and humans and on neural and endocrine factors that may mediate such effects. The possible significance of nervous system immune system interactions for development of disease states such as cancer is discussed.

**PSY 2560 - HUMAN CARDIOVSLR PSYCHPHYSLGY**

Minimum Credits: 3  
Maximum Credits: 3  
Cardiovascular psychophysiology examines the influence of psychological processes on cardiovascular function. The course examines evidence supporting three perspectives on psychological processes related to cardiovascular function; a stress-arousal perspective, an information processing perspective and a metabolic need perspective.
PSY 2575 - TOPICS IN PSYCHOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in psychology.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PSY 2576 - TOPICS SEMINAR IN HEALTH PSYCH

Minimum Credits: 2  
Maximum Credits: 3  
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in biopsychology.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

PSY 2945 - PSYCHOLINGUISTICS

Minimum Credits: 3  
Maximum Credits: 3  
This course is a general introduction to psycholinguistics, which will look at processes of language understanding, language production, and language acquisition. Throughout the course, we will consider the relationship between theoretical linguistic concepts and constructs, and psycholinguistic data. We will also touch on related areas, such as processes of reading, language and the brain, and language and thought.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PSY 2970 - TEACHING OF PSYCHOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This course is required of all graduate students fulfilling the departmental teaching requirement. This requirement involves full responsibility for teaching an undergraduate course in psychology during one term.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Psychology (PHD)

PSY 2975 - TEACHING PRACTICUM

Minimum Credits: 1  
Maximum Credits: 1  
Supervised practicum experience in the Teaching of Psychology  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad SN Basis

PSY 2990 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 9  
Independent research project developed under the supervision of a faculty advisor.  
Academic Career: Graduate
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Psychology (PHD)

**PSY 3000 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1  
Maximum Credits: 9  
Students who are planning, conducting or completing the Ph.D. dissertation may register for this course.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Psychology (PHD)

**PSY 3205 - SEMINAR IN BEHAVIOR GENETICS**

Minimum Credits: 3  
Maximum Credits: 3  
This is a survey of recent topics in the field of experimental psychopathology.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3226 - AFFECTIVE SCIENCE**

Minimum Credits: 3  
Maximum Credits: 3  
Topics include contemporary issues in emotion research with an emphasis on emotion expression, developmental perspectives, communication, pathology and methods.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 3245 - SEMINAR IN ADDICTION**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will examine research literature on alcohol use and abuse. A guiding principle in this course is that alcoholism is a heterogeneous disorder that is multiply determined. Both genetic and environmental factors contribute to its etiology. A second point of emphasis in this course is that understanding drinking and alcoholism is advanced through the study of basic psychological processes. Although the course will focus on alcohol, some of the material will be drawn from, or relevant to, other substances of abuse. The field of alcohol research is vast and this course will focus on aspects of particular psychological relevance, with an emphasis on human research. Seminar topics will range from acute effects of alcohol in social drinkers to issues related to prevention and treatment of alcoholism. Although the course will include clinical topics, it will not be a clinical "how to" course, and students from both within and outside the clinical area are encouraged to enroll.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3290 - RESEARCH CHILD PSYCHOPATHOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar focuses on major research problems in the field of child psychopathology. Issues of classification, differential diagnosis, course, and outcome of disorder are addressed. Particular disorders are used to illustrate the issues, trends and methodological problems which characterize current research in child psychopathology. These include attention deficit disorder, conduct disorder, childhood depression and anxiety disorders.  
**Academic Career:** Graduate
**PSY 3902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Specific research topics carried out under the direction of a particular member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies

**Public & Int'l Affairs**

**PIA 2003 - SEMINAR IN RESEARCH DESIGN AND METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term "mixed method."

Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS**

Minimum Credits: 3  
Maximum Credits: 3  
PIA Administration of Public Affairs introduces students to techniques of management, drawing on insights from domestic, comparative, and global public management. The course covers a number of areas, including the functions and organization of government at multiple levels, including the regulatory and policy-making environment; core issues of public administration and management; the interface between government and citizens and governance partnerships in the public, private and nonprofit realms; the "four pillars" of governance - accountability, participation and social capital, transparency, and the rule of law; strategic management in the public sector; and "soft" skills associated with leadership.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2021 - INTERNATIONAL AFFAIRS**
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in the field of International Affairs (IA). It is designed to give students knowledge of the major theoretical approaches and issues in international politics. The course introduces students to basic concepts and schools of thought in IA and examines major institutions and processes through which foreign policies are made and implemented. A major objective is to relate theories and models to major national and international policy debates through the close examination of case studies. Reference will be made throughout to contemporary developments. The interlocking objectives of this course are: 1) to provide a grounding in the nature and characteristics of International Affairs; 2) to develop a broad understanding of the outstanding features of today's world and how it differs from other periods; and 3) to learn the key concepts for categorizing and analyzing the dynamics of international politics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: African Studies, Global Studies, West European Studies

PIA 2022 - QUANTITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
Introduction to quantitative methods is a foundation course that provides an overview of statistical methods and hands-on applications to managerial decision-making in the public sector. Understanding statistical analysis and being able to work with data are important competencies of professionals in public policy and administration. Course topics include program evaluation, data collection and measurement in public policy and administration, descriptive statistics, hypothesis testing, processes for selecting statistical tests and assessment of statistical assumptions, measures of association and other bivariate statistics, index variable construction, regression analysis, and an overview of selected other statistical and quantitative methods applied to problems of public administration. Students get hands-on experience through the use of a statistical analysis tool. Recognizing the social, political, and economic context of data collection, analysis, and reporting practices in the public sector, this course also discusses the ethics of data analysis and information technology policy and management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to provide an introduction to econometrics for policy analysts. The focus of the class will be on applied data analysis to practical problems. We will discuss some basics of econometric theory to support your understanding of the applications of these techniques. In the first part of the semester, we will introduce regression analysis and the assumptions underlying it. In the later part of the semester, we will see extensions of this basic idea: time series and panel regression, regression with a limited dependent variable, instrumental variables regression, and experiments. After this class you should be able to: 1. Understand basic empirical research in the social sciences. 2. Understand the theory behind basic econometric techniques. 3. Perform basic empirical analysis on social and political behavior.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS

Minimum Credits: 3
Maximum Credits: 3
Macroeconomics Macroeconomics, as the name implies, is the study of aggregate economic phenomena such as national income and product, inflation, employment, economic growth, and the associated fluctuations in these variables. At its center is the analysis of the fiscal and monetary policies used to achieve the macroeconomic goals of stability and growth. Students will gain understanding of the causes of economic recessions and the policy tools available to stimulate recovery and mitigate the economic and financial costs of these downturns.

Academic Career: Graduate
Course Component: Lecture
**PIA 2025 - MICROECONOMICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Microeconomics is the study of the production, allocation and distribution of economic resources and output. It focuses on markets and analyzes how producers, consumers and policies interact to determine the market's prices and quantities. The course begins with the analysis of supply and demand and market clearing under competitive conditions. It will also cover market failure such as externalities and monopoly and analyze the associated policy interventions such as price floors, ceilings, quantitative restrictions, and market-based policies, namely, taxes and subsidies. The course also covers the analysis of labor markets, natural resources, and international trade. The key objective of the course is to apply microeconomic principles to the analysis of policy objectives.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate School of Public and International Affairs

**PIA 2027 - MACROECONOMICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course applies tools from PIA 2024 economic of public affairs course (or equivalent) to examine current economy-wide challenges. These topics include economic development, environment, energy, health, international trade, and recent financial crisis.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate School of Public and International Affairs

**PIA 2028 - PUBLIC POLICY ANALYSIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
How can we improve the ability of society to choose between alternative policies? This course provides a framework to assess alternative policies on the dimensions of efficiency, equity, and political feasibility. The comparative institutional framework requires an interdisciplinary perspective which draws on economics, political science, and political economy. Throughout the course, we will consider how insights from these disciplines provide insight into the choices confronting policymakers seeking to bring society closer to their conception of the good life. The course is organized into three parts: an introduction to policy analysis; a framework for comparative markets and governments; and applications of the framework. One of the main goals of the course, besides mastering the material (as evidenced by an in-class midterm), is a series of papers applying these concepts as well as an original research paper conducting a policy analysis.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PIA 2001 or 2008 or PIA 2022 or PIA 2024; PROG: Graduate School of Public and International Affairs

**PIA 2032 - ADVANCED QUANTITATIVE METHODS: CAUSAL INERENCE FOR POLICY ANALYSIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
What are the true impacts of a policy? Does the policy in question achieve its desired goals? Even with good data, this question is often difficult to answer, as policies are rarely introduced in isolation. This means that patterns in data may reflect the impacts of policies, but may also reflect the influences of various confounding factors. Through lectures, discussions, and hands-on data projects, this course will introduce students to quantitative methods aimed at identifying the causal impacts of policies. Methods introduced will include: difference-in-differences, regression discontinuity, and instrumental variables. By reading and discussing academic research papers, we will see that these methods can be applied to a wide variety of settings. Topics of these applications may include: the relationship between government spending and charitable giving, taxation,
education policy, the impacts of the characteristics of politicians on policy outcomes, crime, among others. Students should have some pre-existing
familiarity with regression analysis and experience in working with data in a statistical analysis package like Stata.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PIA 2023 or 3000

PIA 2038 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course,
we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes
falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding
as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international
peace and focus on terrorism, refugees, and weak states as destabilizing factors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2039 - ADVANCED METHODS: TEXT AS DATA

Minimum Credits: 1.5
Maximum Credits: 1.5
This is a course in advanced methodology in political science. The class will focus on topics related to measurement.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2041 - POLICY ANALYSIS FOR CYBERSECURITY AND INTELLIGENCE STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course provides a multidisciplinary framework for analyzing cybersecurity and intelligence policies developed after the Intelligence Reform and
Terrorism Prevention Act of 2004. Methods of policy analysis include expert forecasting and prediction markets, benefit-cost and benefit-risk
analysis, performance monitoring and evaluation, problem diagnosis with structured analytic techniques, and the development of transparent policy
arguments. Case studies are used to exemplify the interplay of policy analysis and the politics of policymaking in the pursuit of efficiency, equity,
political feasibility, and ethics. The course is organized into three parts: I. A Framework for Policy Analysis; II. Methods for Policy Analysis; and III.
Methods for Communicating and Using Policy Information. Case materials in cybersecurity policy and intelligence analysis will be used throughout
the class. Requirements include two 5-page policy memos, an in-house midterm exam, and a take-home final. This course satisfies the GSPIA core
requirement in public policy analysis.

PIA 2101 - MANAGING EMERGENCIES AND DISASTERS
Minimum Credits: 3  
Maximum Credits: 3  
This course provides a broad overview and practical exercise of frameworks and principles of emergency management in the United States and global contexts. The course builds on these frameworks to consider how communities understand and plan for risk; adapt plans and make decisions in response to actual emergencies and disasters; engage effectively in short and long-term recovery; and consider resilience and mitigation as they build back.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR  
Minimum Credits: 3  
Maximum Credits: 3  
This course, designed for students in all GSPIA Masters programs and for PhD students, links the fields of human resources management, organizational behavior, and leadership with hands-on exercises and cases to provide a basic understanding of the skills needed for successful supervision and management of people in public and non-profit organizations. Skills covered include effective hiring, motivation, and direct supervision of staff; evaluation and reward systems; effective communication in a multicultural or international environment; labor management relations; and participative approaches to management.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2104 - FINANCIAL MANAGEMENT  
Minimum Credits: 3  
Maximum Credits: 3  
Financial management plays a central, if not strategic and controlling role in public administration. It is the one element that can, and does, most easily shape and condition administrative behavior patterns. It involves the allocation and management of scarce resources. This course introduces the students to the basic financial management concepts and practices in the public and non-profit sectors. The purpose of the course is to familiarize potential administrators with the elements of financial management and how these various elements are (or can be) used to help accomplish organizational goals and objectives. The ability to read and understand basic financial statements used in the public and nonprofit sectors will be emphasized. One does not need to be an accountant to take this course. The course will focus on understanding the financial world of governments, how they are financed; the major expenditure elements; how to read and understand the major financial documents and financial statements. Several classes will focus on the non-profit sector. A significant amount of time will be spent reviewing the major taxes used to finance governments as well as understanding the significant tax policy issues surrounding the use of these taxes. Major items impacting upon the financial conditions of governments including the funding of public pension systems; capital budgeting; and debt management will also be reviewed.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2108 - MATCHING MONEY WITH MISSION  
Minimum Credits: 3  
Maximum Credits: 3  
This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grant-making experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grant-making skills; connect applied learning in grant-making to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grant-making; incorporate knowledge gained from practitioners and course work into personal philanthropic
practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs though an enhanced understanding of the Pittsburgh nonprofit sector.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2111 - REGULATION HEALTH, SAFETY AND ENVIRONMENTAL RISKS

The objective of this course is to improve skills in analyzing government efforts to control health and safety risks. The class is designed to illuminate the public policy issues raised by government efforts to manage risks. Economic, legal, ethical and political perspectives are brought to bear on the choices that policymakers have to make.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies

PIA 2115 - ENVIRONMENTAL ECONOMICS

From global climate change to how much you pay for water and sewer service, many public issues intersect with the environment or natural resources. This course uses an economic lense to understand a range of environmental and natural resource issues facing policy makers. Through readings, class discussions, and assignments the course should help you build policy-related skills, including analyzing complex problems, communicating clearly, and drawing insights from data.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies, Russian & East European Studies

PIA 2117 - PROGRAM EVALUATION

This course gives students knowledge, skills, and experience to define and measure program and policy impacts on clients/consumers, meet accountability requirements of funders, and design and revise programs to address the changing needs of stakeholders. Through in-class exercises, case studies and written assignments, students will be able to apply their new knowledge and skills to real life evaluation designs, implementations, and reporting. In addition, students will be asked to develop a plan to evaluate a public program of their choice including proposed methods of data collection and analysis.

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2122 - MANAGING AND FINANCING URBAN SERVICES

Minimum Credits: 3  
Maximum Credits: 3  
This course examines issues related to the public economy of local government taxation and spending. The problems facing central cities and metropolitan areas are highlighted using the Pittsburgh and Allegheny County region as context. The course is designed to maximize the student's participation while making the learning environment as "real world" as possible. To accomplish those goals students select either a city to develop a financial plan, a particular coping strategy to deal with fiscal stress, or an analysis of a nationally recognized best practice for the budget process. Students learn how to finance public services, infrastructure, and economic development (a model is discussed early in the course).  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2124 - COMPARATIVE METROPOLITAN GOVERNANCE

Minimum Credits: 3  
Maximum Credits: 3  
This course is about the governing of metropolitan regions in the United States. The concepts of metropolitan region is relatively new. Faced with rapid growth of suburbs, the creation of satellite cities, new modes of transportation, an academic roundtable of regional planning proposed that a "new political or administrative entity" at the metropolitan level needed to be created that was different from the precinct, ward, municipality, county, or state. The year was 1926. Seventy-one years later, Anthony Downs lamented, "as congress shifts many federal powers to lower levels of government it is missing a unique opportunity to resolve a fundamental flaw in America's government structure; the absence of any authority at the metropolitan regional level. Metropolitan regions have become the most important functional units of economic and social life in almost all modern societies" (downs, 1997). The road to the metropolitan region takes us through the land of local government. Local governments are the building blocks of the metropolitan regions. The American system of governing and government is best understood as a territorial based distribution of power and responsibility. It is steeped in both law and popular culture. Over 40 years ago, Arthur Maas (1959) defined the structure of local government in the United States as an "areal" division of power wherein the territorial bounded local governments were by culture and practice, an integral part of the system of organizing the divided power between the federal, state, and local governments. With this background, we will compare and contrast governance strategies that have been or are being considered in regions throughout North America. These strategies will be analyzed through lectures, discussions, innovation presentations, brief policy memos and the use of formal debates between teams of students organized early in the semester.

Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: Global Studies

PIA 2125 - CITY AND REGION THEORY AND PRACTICE

Minimum Credits: 3  
Maximum Credits: 3  
This course is about the current challenges faced in cities and regions, nearby and around the world - and how those challenges might be met. The majority of the world's citizens live in cities, and therefore one cannot talk about human progress without thinking about progress in cities. As "mega-regions" consolidate, small cities grow rapidly, and older industrial cities shrink, the managerial, policy, and planning capacities of governments come under increasing stress. How can cities meet these challenges? To facilitate understanding of these dynamics and issues, this course is divided into two parts. The first part provides a general background necessary for the second part. We define the general concepts of "city" and "region," and we talk about measurement issues involved in understanding what is happening to them. We also learn about the policy and planning process involved in addressing any issue in a city or region. The second part focuses on the challenges cities and regions face, and how to solve them. Solving them implies having a theory about what causes them, so this part will begin with a discussion of what urban scholars define as an ideal city and region. It will then move on to cover specific urban policies such as transit oriented development, the use of eminent domain for urban projects, community development, etc. Emphasis will be placed on understanding the practical issues of implementing urban and regional policies, and learning about actual experiences with such policies in particular places.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

Course Attributes: Global Studies, MCSI - Sustainability Related

PIA 2126 - STATE GOVERNMENT POLICY AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
The course will review the decision process in state government. It will provide an overview and an insider analysis of the diverse strategies used by political officials, lobbyists, community activists, media and local governments to produce policy outcomes to their liking. The course is a seminar that will review and analyze theory; provide practical knowledge through case studies and presentations by elected officials, lobbyists, media, and citizen groups.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2129 - LAW AND CIVIL SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to acquaint students with the maintenance or creation of civil society in conditions of political instability prompted by such things as security threats, disasters, or political upheaval. In particular, the course will explore the rule of law and the protection of rights and liberties as a bulwark of civil society and consider the requirements for their continued preservation. Upon completing this course students should be able to critically assess the concept of civil society and its requisite components from a historical, philosophical, and legal perspective and understand the role of rights, liberties, political processes, organizations, institutions, and norms to preserve civil society even in periods of conflict. The course is divided into (1) historical and theoretical foundations of civil society; (2) management of political, economic, and natural disasters and rights and liberties; (3) analysis of public policy solutions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2131 - LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provides students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior; and plan for their own leadership development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
This course examines the financial practices and processes required to promote economic and environmental sustainability (both public and private comparisons). Emphasis is put on how the economic component husbands the wise use of resources to effectively achieve specific organizational successes, promoting societal or external long-term prosperity, enhancing the opportunity for living things in the environment. On the environmental and social sides stress is put on respecting things and people both in particular organizational and external community. Next focus is put on financial indicators (both early warning and long term) that have been developed and applied to predict potential financial problems before they arise. Attention is focused on financial indicators (the financial monitoring trend system-ftms) that have been developed to promote stable and sustainable financial management.
Academic Career: Graduate

Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: MCSI - Sustainability Related

**PIA 2145 - BENEFIT COST ANALYSIS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended to give the students a grounding in the concepts and tools of benefit-cost effectiveness analysis. In determining whether or not to undertake a program or project, which of several possible projects should be undertaken, or how to evaluate an ongoing or completed project, benefit-cost analysis is a widely used method. The advantages or and limitations of benefit-cost analysis will be covered in order to give a perspective on public vs. private considerations.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2156 - LAW, POLICY & THE INTERNET**

Minimum Credits: 3  
Maximum Credits: 3  
Information technology and the information that it generates has increasingly become part of our daily lives shaping our practices, discourses, and institutions in fundamental ways. Personal information is used by consumers, professionals, and organizations to a variety of ends and in a number of different settings. The growing reliance on personal information not only challenges long standing demarcations between public and private institution in terms of responsibilities, obligations, and limits, but also calls for a reconsideration of how to ensure the protection of long standing civil liberties and civil rights. This course will consider the impact of emerging technologies within existing constitutional, statutory, and international guidelines and will then explore a range of policy solutions for managing the use of personal information in our public and private sectors.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Natural resource management is complex, and emerges from frameworks of governance - the rules that govern ownership in society and the political and administrative institutions that have responsibility for management of natural resources. The course will examine resource ownership and management by government, private owners, and communal property actors. Institutional frameworks reflect nature of the resource being managed, the characteristics of the community seeking to manage the resource, and historical socio-economic factors. Geographically, the course will take a global view, with regional illustrations. The course will look at the theoretical approach referred to as "managing the commons." Institutionally, the course will examine government entities, international organizations, communities, non-governmental organizations, and trade associations. Substantively, the course will look at land, soil, and forests; water and rivers; oceans, fisheries, and coastlines; energy and mineral resources; and ecosystem services, and species protection.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: MCSI - Sustainability Related

**PIA 2170 - MANAGEMENT NON-PROFIT ORGANIZATIONS**

Minimum Credits: 3  
Maximum Credits: 3
Nonprofit organizations and nongovernmental organizations are a part of what is generally referred to as civil society. While this course is primarily an introduction to leadership, management and policymaking in nonprofit organizations, it will, however, briefly, cover nongovernmental organizations. In the main, the readings, assignments, and course materials are designed to enhance your understanding of the nonprofit sector in the U.S. and to build conceptual and practical skills needed to perform effectively in positions of significant management responsibility in nonprofit organizations/nongovernmental organizations. Students who have substantial experience in the nonprofit/nongovernmental sector will relate the course materials to their own experiences and perspectives. But students who have no prior managerial experience (or limited experience) will also find the course to be valuable and instructive.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2180 - COMPARATIVE PUBLIC ADMINISTRATION**

Minimum Credits: 3  
Maximum Credits: 3  
Emergencies and disasters create an extraordinarily difficult set of challenges for public managers. In disaster, public managers are legally responsible for the protection of life, property and continuity of operations in their respective communities. Yet, they are suddenly confronted with situations they may have never seen before. How do they assess the situation? How do they formulate a strategy of action to bring the situation under control? What information do citizens need to protect their own lives and property? How do managers of nonprofit and private organizations make informed decisions under the urgent stress of disaster, when lives and property are at risk? As the world's population increases, the incidence of disasters, both natural and man-made, also increases as people move into vulnerable coastal regions and amass in megacities. This course will examine the conditions that confront public, private, and nonprofit managers in communities exposed to risk from natural, technological, and deliberate disasters. It will review the current organizational plans for assessing risk, and examine the requirements for enabling communities to reduce their exposure to risk.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2185 - STRATEGIC MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course deals primarily with the concept of organizational strategy - how organizations position themselves to succeed in an ever changing environment. Secondly, it deals with managerial strategy - how leaders and managers in organizations make important decisions under conditions of uncertainty. Strategic management consists of a set of tools to help organizations thrive in dynamic and (sometimes) competitive environments. The essence of strategic management is the ability to leverage the organization's strengths and 'comparative advantages' to respond to emerging opportunities and challenges in its external environment. In government and nonprofit organizations, the practice of strategic management is complicated by the need to work effectively within the political system and to collaborate with other agencies for the delivery of goods and services. Purely competitive strategies must be tempered by a broader view of what is in the best interests of society at-large, not just the organization's self-interests. This course will help you to understand and apply the concepts and methods of strategic management in public and nonprofit organizations. Strategic planning is one of the many tools of strategic management. Strategic planning is a step-by-step process, usually undertaken every 3-5 years, to help an organization develop its strategy for the future. The strategic plan might, for example, highlight opportunities for the organization to grow by offering its services in new locations, add new services to its portfolio, alter its mission statement, or even merge with another organization. Alternatively, a strategic plan might identify ways for the organization to reduce its size, cut programs and staff, or even go out of business in an orderly way.

**PIA 2187 - INEQUALITY, POVERTY AND PUBLIC POLICY**

Minimum Credits: 3  
Maximum Credits: 3  
Inequality of income and wealth has increased substantially in the United States in recent decades. This course will examine the dimensions of those
changes, their causes and the costs and benefits of different possible remedies. In addition, it will explore the linkages between these financial measures and changes in social inequality and social behavior and in the worldviews of citizens. Finally, it will investigate political changes linked to these changes in society.

Academic Career: Graduate

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on sub-national, local economic development. This course will encompass theory, policy, process and practice in state and local economic development. Our focus will be largely in the North American urban context over the post-World War II period, with international comparisons. We will also use examples from Pittsburgh in furthering our understanding of local economic development practice. We will find that in the U.S. Context, there are different interpretations and meanings to economic development, both in theory and practice. These certainly differ at the international scale, as well. Specific topics include: equity issues in economic development, economic cluster analysis, tax increment financing, brownfields revitalization, retail, and regional governance. The purpose of the course is to provide the student with knowledge of the approaches to economic development in theory and practice, techniques and methods of analysis, and debates ongoing in the field. Students will select one economic development policy or case to analyze in depth over the course of the term.

Course Attributes: Global Studies

PIA 2202 - BEHAVIORAL ECONOMICS AND GAME THEORY

Minimum Credits: 3
Maximum Credits: 3
In this class you will sharpen and systematize your understanding of incentives and psychological motivation, identify and model strategic issues in real world cases in public and international affair, and communicate your analysis in a compelling and concise manner.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2204 - GRANT WRITING AND FUNDRAISING

Minimum Credits: 3
Maximum Credits: 3
Grant writing and fundraising are critical skills for people working in the nonprofit sector. "Grants" are funds donated by an organization such as a foundation; donations from individuals are obtained through a variety of other fundraising strategies. This course aims to provide an introduction to grant writing and fundraising for nonprofit organizations (NPOs/NGOs). No matter what type of position you have, as a program coordinator, executive director, corporate/community liaison, or a development officer, all nonprofit and public sector professionals need to be familiar with how nonprofit organizations obtain funding. Moreover, the writing, planning, analysis, and collaboration skills required for grants and fundraising are applicable and useful in every profession. You will learn how to research a variety of funding sources, write a grant proposal, and develop fundraising materials based on the needs, services, and constituents of a nonprofit organization. You will select one NPO/NGO to serve as the basis of a grant proposal and then work with a group to develop a fundraising plan for another "client" organization. More details and instructions about selecting a nonprofit organization to work with will be given in class. The course first focuses on grants, mainly from private (foundation and corporate) sources, and how to write a standard grant proposal that could be submitted or adapted to a variety of prospective funders including public/government funding programs. The course will then explore fundraising strategies for individual donors, including appeal letters, planned giving, event planning, the use of social media, and other tools.

Grade Component: Grad Letter Grade

PIA 2210 - RACE, GENDER, LAW AND POLICY

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the definition, protection and conflicts of identity, gender, sexuality, race, religion, and ethnic, in law and policy in the United States. The course considers the historical and philosophical justifications that have been used to broaden the definition and protection of identity and engages in an analysis of how these efforts continue today. From desegregation of the past to race conscious admissions of today, the way we define and remedy racial discrimination involves complicated considerations of our legal definition of equality and the institutionalization of policy in the public and private sectors with Constitutional limits in mind. Similarly, policy guarantees against gender discrimination and the broadening of LBGTQIA+ rights once relied on biological justifications, but now claims of gender fluidity alter the kinds of legal and policy protections we are able to seek. The landscape of expanding legal and policy accommodation of emerging forms of identity also includes a consideration of conflicts and intersectionalities with other existing protections for identity. Religious exercise and practice, for example, can clash with those seeking accommodation of LBGTQIA+ rights, while law and policy struggles to strike a balance. This course will engage legal analysis, case based examples and structured student debates on emerging policy issues involving identity and its place in American society today.
Academic Career: Graduate

Grade Component: Grad Letter Grade

PIA 2213 - URBAN CULTURAL REGENERATION AFTER CRISIS: DOING INTERNATIONAL COMPARATIVE RESEARCH

Minimum Credits: 3
Maximum Credits: 3
The Issue: This course centers on three post-industrial cities: Pittsburgh, PA; Newcastle-Gateshead, UK; and Saint Etienne, France, to evaluate how their cultural regeneration strategies have adapted post-COVID. Many former industrial cities in Europe and North America relied on the arts and culture sector as a main driver of post-industrial regeneration and revitalization. These cities were remade through economic development strategies focused on culture and creativity, with arts and cultural redevelopment strategies, projects, and programs. The pandemic disrupted the arts sector's standard operating practices, causing devastating job losses, canceled programming, altered consumption practices, and requiring emergency relief packages. These disruptions were compounded by public health guidelines and the uncertainty around a rebound in pre-pandemic support for arts and culture. Governments - at all levels - responded in many ways to keep arts and artists in recovery, but these extraordinary circumstances brought into question the resilience of arts and culture as drivers for cultural regeneration in post-industrial cities and drivers for whom. Class background and work: This course provides practical experience in comparative international research and is well-suited to students interested in urban economic development and the cultural and creative industries. The coursework builds on the pre-pandemic research of GSPIA students to create a longitudinal perspective on the sectoral impacts of the COVID pandemic. While there are different methodologies for international comparative research, the class will employ a mixed methods strategy of qualitative research supported by quantitative public data: Review and update scholarly and policy work on cultural regeneration and review previous GSPIA work on the three cities; Formulate research questions based on impacts of COVID on the sector; Design site visit itineraries based on key cultural regeneration examples in each city; Develop research instruments and conduct international field work; and Complete analysis and interpret findings. Ability to travel to UK and France, Spring break, March 2023 is an essential prerequisite for this course (assuming no travel restrictions). This work is supported by the Jean Monnet Network Grant (TransAtlantic Perspectives on Energy and Cities), University Center for International Studies. The grant covers airfare, ground transportation, and accommodation travel expenses for students.

Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2216 - ECONOMICS OF SOCIAL POLICY
This course will use the tools of economics, and draw on empirical research from economics, to explore issues around racial, ethnic, and gender disparities in the United States. We will consider questions such as: Why are there persistent gaps in labor market outcomes across groups? Why are there persistent differences across groups in educational attainment and opportunities? What drives the dramatic underrepresentation of minority groups and women in government, and to what extent does this impact the distribution of government spending? For each of these issues, we will consider the impact of policy on reducing, or in some cases exacerbating, these disparities.

**Grade Component:** Grad LG/SNC Basis

**PIA 2222 - THE ECONOMICS OF INTERNATIONAL SECURITY**

Minimum Credits: 3

Maximum Credits: 3

States have many tools of statecraft available for use in pursuing their national interests in the international system. While military options are often examined and reported on, economic statecraft is far more commonly employed. This course investigates the use of trade flows, the movement of capital, foreign aid, and economic development to pursue international objectives. It examines the use of such tools by great powers, including the United States, Russia, and China. It also explores how the adverse consequences of punitive economic statecraft and poor economic development can help foster civil war. Case studies encompassing the actions of great powers and civil wars in the Middle East are used to ground the theory of economic statecraft in practice and highlight contemporary uses and challenges in the use of such tools in the international arena.

**PIA 2223 - CITY OF WHITE SUPREMACY**

Minimum Credits: 3

Maximum Credits: 3

The title of this course is meant to signal the objective of scrutinizing how systems of white supremacy have shaped the American city and how the American city functions in ways that reproduce and reinforce white supremacy. As George Lipsitz (2007: 12) tells us, "The lived experience of race has a spatial dimension, and the lived experience of space has a racial dimension." The first section of the course will focus on frameworks for understanding white supremacy generally, and as it relates to urban development specifically. The second section considers specific domains of urban policy and planning using white supremacy as the analytic framework. We will examine how white supremacy has been expressed across a range of urban development issue areas, including housing, transportation, the urban environment, education, criminal justice, and urban design, and how policies and planning practice have maintained or disrupted systems of white supremacy.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**PIA 2224 - REPARATIONS: POLICY, THEORY AND HISTORY**

Minimum Credits: 3

Maximum Credits: 3

Against the backdrop of racialized mass incarceration, policing, and state surveillance, a chasmic racial wealth gap, racially disparate health outcomes, environmental racism, flagrant seizures of indigenous land, and a growing skepticism of liberal and corporate multiculturalism, a revitalized reparations movement has remerged, challenging the intergenerational effects of white supremacy. However, demands for reparations, whether at the federal or municipal levels, remain encircled by technical, theoretical, and ideological debates. What is the moral basis for reparations?
Does the history of racial exploitation, broadly conceived, explain present-day racial inequality? Who should pay for reparations and what group(s) should receive them? And, fundamentally, what actually constitutes “reparation?” In this course, we turn to these questions and more.

PIA 2227 - ADVANCED METHODS OF POLICY RESEARCH ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course in advanced methods of policy analysis focuses on four types of methods: structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; problem structuring techniques used to solve ill-structured or ‘wicked’ problems in areas of technology assessment, development planning, intelligence analysis, and economics; forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the Security and Intelligence Studies (SIS) program and professional analysts, researchers, and trainers in the Intelligence Community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

PIA 2230 - MASS POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the political behavior of citizens in modern Western democracies, especially the United States. Since much of this behavior is institutionalized through elections, we will spend much of our time examining electoral behavior and participation. We will also deal with public opinion, political reasoning, and information processing, and mass-elite communication.

PIA 2231 - CONTEMPORARY US ENERGY POLICY

Minimum Credits: 3
Maximum Credits: 3
PIA 2231 -- Contemporary US Energy Policy Course Description: This class examines the energy policy choices facing local, state, and federal policymakers. The choices involve myriad issues, including, but not limited to: how and when to regulate energy markets, such as for environmental reasons; ensuring electricity is delivered safely and reliably; allocating research and development resources; and growing concerns about environmental (in)justice. This class will connect realistic policy outcomes to theoretical ideals underlying energy policy, including supply and demand, benefit-cost analysis, monetizing non-market goods, taxes and subsidies, discounting, and equity. Students should expect to build practical, intellectual, and interdisciplinary skills applicable to making energy policy decisions, particularly decisions that impact the environment.

PIA 2234 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
GSPIA's social entrepreneurship class will be taught within the context of nonprofit management and practice, with an emphasis on purpose-driven leadership and skill development. The course will address the impacts of social entrepreneurship in multiple settings and how impact is measured and
evaluated. Students will discuss and analyze the goals of "doing good" for social good in the nonprofit realm linking philanthropy, government, and volunteerism through innovative partnerships and financial ties. The instructor will make use of case study materials and connections to GSPIA's Johnson Institute for Responsible Leadership.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PIA 2250 - WORKING WITH PUBLIC INTEREST TECHNOLOGIES AND CIVIC DATA

Minimum Credits: 3
Maximum Credits: 3
This class is designed to equip students passionate about social justice issues to work with public interest technologies and civic data using a curriculum co-developed by four Pitt centers: Center for Analytical Approaches for Social Innovation (CAASI), Western Pennsylvania Regional Data Center (WPRDC), the Office of Diversity, Equity and Inclusion (DEI), and the University Honors College (UHC). The goal is to discern the opportunities and challenges that can come from working with technology and civic data, prepare students to understand and account for community dynamics, develop socially-responsible research and data practices, and implement projects that hold benefits for both community partners and students. This is not a quantitative course and no programming experience is expected.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2301 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to international political economy, an interdisciplinary field related to international politics and international economics. This course introduces students to important actors and institutions that shape the global economic system. Central issues in international political economy include policy-making on the topics of trade, money, foreign investment, development, migration, and the environment. Major questions include: 1. What are the main economic and political forces that shape the international economy? 2. What domestic and external strategies have states adopted in order to develop their economies and to benefit from exchanges with other countries (while minimizing their vulnerability)? 3. Why and when do states seek to cooperate with each other in the management of the international economy? How successful have their efforts been? (4) What are the major challenges currently facing policy-makers in the management of the international economy? To answer these questions, students will identify key political and economic actors (governments, firms, workers, interest groups, international organizations) and examine interactions within and between states. Drawing on both historical and contemporary events, the course focuses heavily on globalization's opportunities and challenges by examining the complexities of governing in an interdependent world.

PIA 2302 - INTERNATIONAL FINANCIAL POLICY

Minimum Credits: 3
Maximum Credits: 3
International Financial Policy The course focuses on the international financial system and its significance for policymaking. Topics include: the balance of payments, foreign exchange markets, fixed and flexible exchange rates, purchasing power parity, and alternative monetary regimes. The course is designed to give students a command of the basic theoretical tools used in analyzing international financial issues and the ability to apply this theory to the real world. Students will write a term paper and make a presentation on a current or historical international financial issue.

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Asian Studies, Global Studies, Russian & East European Studies, West European Studies

PIA 2303 - SECURITY AND INTELLIGENCE STUDIES
Minimum Credits: 3
Maximum Credits: 3
Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war and especially since 9/11 are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment past and present and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

PIA 2305 - FOREIGN POLICY AND DIPLOMACY

Minimum Credits: 3
Maximum Credits: 3
This course examines how the United States government makes foreign policy and conducts its diplomatic relations with foreign governments and international organizations. It is designed for students who want to pursue a career in foreign affairs. It's main focus will be the state department and embassies, but it will also look at the role of the president and the national security council, the pentagon and other government agencies, congress, the media and think tanks. Key concerns will be the interagency process and the interaction of Washington with overseas missions. The course will acquaint students with how the state department and embassies are organized and function. It will discuss how recent secretaries of state have used the department's machinery, and it will introduce students to key diplomatic activities: working with allies, dealing with Russia, negotiating treaties, conducting shuttle diplomacy. Students will be introduced to the relevant functions of foreign service officers. There is a strong emphasis on drafting: press guidance, briefing memos, reporting cables, etc. Students will also assume the role of 'desk officer' and manage an issue of their choice throughout the course. Normally there will be a field trip to Washington to meet people working at state, on the hill, at think tanks and in foreign embassies. At the conclusion of the course, students will participate in a crisis management exercise that they design and execute. The goal is to develop the professional drafting, reporting, briefing and policymaking skills required to function effectively in Washington's foreign affairs community.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2306 - COMPETING PERSPECTIVES ON GLOBAL ENERGY: FROM WESTERN PA TO EASTERN EUROPE

Minimum Credits: 3
Maximum Credits: 3
This course provides professional school students in the fields of business, law, engineering, public policy and other areas with a first-hand experience of the global impact of contemporary developments in the natural gas and other energy sectors. Participants will first witness the effect that Marcellus shale has had in Western PA and then see how these developments are impacting the US's foreign policy and trade practices. After this, students will be familiarized with a very different side of the global natural gas and energy equation by travelling to Moscow, where they will see the Kremlin's view of global and regional gas and energy markets. The course ends with an exploration of the role that transit states like Bulgaria play in global energy markets and efforts by these players to use their territory and energy alternatives to bargain with larger states at both ends of energy pipelines. Throughout this exploration, students will be exposed to a variety of stakeholders and a gain an understanding of energy's impact on domestic and international politics, economies, societies and the environment.

Academic Career: Graduate
Course Component: Seminar
PIA 2307 - HUMAN SECURITY

Minimum Credits: 3
Maximum Credits: 3
A human security approach puts individual well-being and empowerment at the center of analysis, displacing the traditional focus on state security, in order to produce different priorities, new political synergies, and better domestic and global policies. This course introduces the core principles, critical debates, and emerging approaches to achieving human security in a diverse and conflicted world. Students engage with a challenging interdisciplinary field encompassing international development, security, and human rights. We examine the main approaches to "human security" and investigate substantive policy agendas on a range of global issues, addressing the classic trifecta of threats: want, fear, and indignity. Focusing especially on vulnerable populations, we explore human security approaches to political and interpersonal violence, poverty, environmental and health threats, and identity-based threats such as racism and sexism. We pay special attention to the roles of non-governmental actors alongside states and international actors. Students learn to utilize multi-sectoral and interdisciplinary thinking in order to articulate people-centered policy agendas and solutions.

Course Attributes: MCSI - Sustainability Related

PIA 2308 - COVERT ACTION IN WORLD POLITICS

Minimum Credits: 3
Maximum Credits: 3
What is covert action? How does it differ from other hidden tools of statecraft? What are the common drivers of covert action across time and space? What are some of the major successes and failures of covert action over the past 70 years and what can these episodes teach us about secret operations in the 21st century? How has the proliferation of new technologies impacted the ways in which states think about and use covert action today? At present, there exists a mismatch between the relatively high frequency with which states turn to covert action to achieve foreign policy objectives and popular understanding of the subject, which is oftentimes limited and sometimes sensationalist. In this course, we will take a deep dive into the secret world of covert action, exploring the many faces of, and dispelling the many myths surrounding, this unique tool of statecraft. In order to accomplish these goals, we will examine the theoretical, historical, and contemporary research on covert action.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2310 - MARKETS AND STATES

Minimum Credits: 3
Maximum Credits: 3
Markets and States considers how governance explains why some countries are rich and others are poor. In the context of this course, "governance" refers to the formal and informal rules that liberate and constrain individuals and groups in their efforts to improve their economic situation. The course begins by considering the economic foundations of prosperity, including the role of competitive markets, private property rights, and foreign aid in the process of economic development. It then considers the role of the state in economic development, with emphasis on analysis of the political factors that create incentives for governments to do what is in society's best interests. Its empirical focus is on developing countries, but will also consider some examples of the political economy of development in the U.S., including when the U.S. was a developing country. The course will also focus on evaluation of development policies, including understanding the logic of randomized impact evaluations and other methods used to analyze the causal impact of public policies seeking to improve prospects for economic development. The course is relevant for students in international development, public administration, and international affairs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Course Attributes: Global Studies, Russian & East European Studies, West European Studies
PIA 2311 - ADVANCED INTELLIGENCE ANALYTICAL TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
This course is intended for students who have already gained skill in writing intelligence analytical pieces from Introduction to American Intelligence, Terrorism as an Intelligence Problem, or Intelligence Perspectives on the Cold War Era. We will review some of the basic literature on intelligence analysis, study some of the more-advanced analytical writing techniques, and then will put them into practice in writing and orally briefing analyses on topics of current intelligence interest. During the course, each student will develop and research a topic -- chosen in consultation with the instructor -- of interest to the student and drawing on the student's own knowledge and expertise. The instructor and other students in the course will act as policymakers to critique the analyses for their insights and value to the policymaking process. Each student will produce a medium-length analytical product suitable for use as a professional writing sample of value in their career search.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2319 - INTERNATIONAL TRADE

Minimum Credits: 3
Maximum Credits: 3
International trade is important and controversial. All countries participate in international trade. Yet all countries restrict trade. In all countries there are people and groups who favor freer trade and there are others who oppose it. This course will introduce the student to the key issues and controversies in the study of international trade. We will examine economic explanations and analyses of why countries trade. What are the key determinants of trade - factor endowments, resources or skills? We will also analyze the benefits and costs from trade and how these are distributed within a country. Throughout we will adopt a policy perspective and will rigorously examine some elements of trade policy such as tariffs, quotas, subsidies, export taxes, and, the economics of free trade arrangements. We will look at the controversial issue of international trade and the balance of payments. Time permitting; we will analyze the effects of trade and international factor mobility on economic growth and development. We will broaden and deepen our knowledge of the specific subjects and improve our skills in applying the analytical tools that economists have developed to help understand these complex phenomena.

Course Attributes: Asian Studies, Global Studies, Russian & East European Studies, West European Studies

PIA 2323 - INTELLIGENCE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course will empower students with a deeper understanding of the myriad ways U.S. intelligence analysts support policy makers. Students will have hands-on experience drafting written assessments in the style and format used by the intelligence community, including for the President's Daily Brief and in longer intelligence assessments such as National Intelligence Estimates (NIE). Students will also hone their oral briefing skills through in-class exercises. Examples for written and oral exercises will be drawn from the range of experience real-world intelligence analysts face, including providing strategic assessments of political and economic developments in support of U.S. bilateral and multilateral relations, analysis of terrorist groups and other non-state actors, and military analysts' support to the war fighter. Class readings will focus on understanding the delicate balance between intelligence analysis and foreign policy making, and what happens when policy makers disagree with analytic assessments or when intelligence analysts fail to provide timely and accurate information to policy makers.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2327 - TERRORISM AND COUNTER TERRORISM

Minimum Credits: 3
Maximum Credits: 3
This course will deepen our understanding of the post-9/11 security environment by examining contemporary terrorist groups and the history from which they spring. We will address a number of questions, including, what is terrorism and how has the terrorist threat changed over time? What are the data that we use to understand terrorist behavior and the patterns of terrorism? What motivates terrorists to engage in political violence against non-combatants? At what point does violent militancy cross over into terrorism? Does terrorism ever succeed, and, if so, under what circumstances? How does terrorism end? While much of our focus will be on so-called 'Islamist terrorism,' we will also explore other types of terrorism, including secular and sacred groups active in the United States, Western Europe, and elsewhere. Time permitting, we will also consider a number of other topics, including 'cyber-terrorism,' deradicalization, and state terrorism. As befitting the complex nature of terrorism, we will draw on numerous academic disciplines in studying these topics, including political science, sociology, psychology, history, anthropology, and economics.

Academic Career: Graduate

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: African Studies

PIA 2328 - ETHICS AND NATIONAL SECURITY

Minimum Credits: 3
Maximum Credits: 3
This graduate seminar focuses on the ethical quandaries confronting principals who make decisions on national security policy. Students practice articulating foreign policy arguments, paying attention to the political, ethical, and social scientific aspects of those arguments. Issues covered include just war, humanitarian intervention, counterintelligence, counterterrorism, immigration, economic sanctions, foreign aid, and distributive justice.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2329 - INTELLIGENCE & FOREIGN POLICY

Minimum Credits: 3
Maximum Credits: 3
As societies have become more reliant on information technologies, so they have become more vulnerable to disruption through attacks on information systems. This course examines the national information infrastructure, highlights its vulnerabilities to both criminal exploitation and attacks by terrorists or hostile nations, and look at what can be done to enhance security in this area.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2335 - APPROACHES TO CONFLICT RESOLUTION

Minimum Credits: 3
Maximum Credits: 3
The resolution of disputes at national and international levels requires creative approaches to conflict resolution. Resolving disputes through successful negotiation has become a valued skill and could even be considered a "fine art." Of course, some disputes cannot be completely resolved, especially those which have evolved into violent conflict. In these cases, successful negotiation can lead to a more peaceful and productive situation which could eventually evolve into a permanent settlement. This course first examines the nature of conflicts: how they begin and can sometimes lead to violence or even war. We then analyze the role of negotiation and its potential for mediation to defuse disputes. This course covers both the theory and the practical application of conflict resolution using case studies and role playing. The course objective is to provide students with both the theory of conflict resolution as well as the skills involved in successful negotiation. In relation to the negotiation process, the course focuses on the following questions: when is negotiation feasible and desirable as an approach to conflict resolution? What format (bilateral/multilateral) and procedure is appropriate for a given negotiation? What are the main issues in setting up a negotiation? How can negotiation "formulas" be devised and evaluated?
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2340 - SPACE AND NATIONAL SECURITY

Minimum Credits: 3  
Maximum Credits: 3  
This course examines how space-based services provide critical support to military and intelligence operations and contribute to national security more broadly. The course is designed to investigate several interrelated themes, weaving together relevant aspects of technology, strategy, and policy. The material is approached from both functional and historical perspectives, exploring the basics of military and intelligence space operations and ending with an examination of the space-related technical, strategic, and political challenges facing the nation today and in the foreseeable future. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. Upon completion of this course students should be able to understand and evaluate policy proposals for national security space and intelligence systems, strategies, and operations. Students should be able to perform competent policy analyses, develop well-reasoned positions, and communicate those positions in concise, persuasive professional papers. The course is taught in three phases. Phase 1 focuses on the fundamentals of satellite operations. Here students explore, at a non-engineering level, the basic principles of orbit and learn what kind of military and intelligence missions are flown in space, at what orbit each mission is flown, and why. Phase 2 surveys key developments in space operations and national policy in the cold war. Students examine how military satellite programs developed during that period and what missions they came to support. Phase 3 examines America's dependence on space today, surveys emerging threats to the nation's space infrastructure, and considers the implications of these developments for U.S. National security policy. Students weigh the pros and cons of such controversial programs and concepts as ballistic missile defense, anti-satellite weapons, space control, and orbital weapons designed to attack targets on earth.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on how the U.S. intelligence community collects and analyzes information to support U.S. national security and foreign policy objectives. Students will examine the historical foundations of the intelligence community and consider how the role of intelligence has changed over time, particularly after the attacks of September 11, 2001. Students will also consider the legal, moral, and ethical factors that influence the roles and conduct of the U.S. intelligence community. Finally, this course will take a closer look at selected current intelligence topics, such as Russia, China, terrorism, weapons of mass destruction, and cyber security.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PIA 2348 - HOW TO MAKE WAR

Minimum Credits: 3  
Maximum Credits: 3  
Wars are relatively common events in the international arena, and political communities fight them for myriad reasons. The outcomes of wars have profound consequences for the course of historical events, political outcomes, and the lives and well-being of millions, including those who did not fight. But what happens in between the decision to go to war and the end of fighting? HOW do belligerents fight wars? This course will introduce students to how wars are actually fought on land. Students will learn about the translation of national political objectives into military strategy and campaign plans; the raising, training, and equipping of forces; the different types of combat arms available for use and their limitations; the role of naval, air, cyber, and space forces in land warfare; the principles of command; the crucial role of logistics; and the unquantifiable, but often decisive, human element of warfighting. These topics and issues will be introduced and considered using specialist texts, military and official documents, battle histories, and the critical examination of contemporary conflicts. Students will have opportunities to apply the insights they gain through in-class simulations (wargames), net assessments, and mock briefings. States' abilities to fight shape their decisions about whether or not to go to war. Additionally, the ways that states fight have profound implications for the consequences of war, with attritional and maneuver systems of force employment having very different impacts on both combatants and non-combatants in warzones. Accordingly, at the end of this course, students will not only have a clear understanding of how wars are fought, but also be better prepared to understand, partake in, and shape debates about the use of force in the international arena.

Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2350 - THE POLITICS OF INTERNATIONAL TRADE

Minimum Credits: 3
Maximum Credits: 3
This redesigned class will cover the political economy of trade, broadly defined to include global production and the activity of multinational firms. As the examples of Brexit and the protectionist policies and rhetoric of the Trump administration remind us, openness to the international economy is a political choice. Indeed, all governments face a dilemma: how to balance the demands of economic actors (workers, industries, firms) who demand protection from global competition, while guarding the benefits of globalization - jobs created, gains to consumers, growth-inducing innovation - from protectionist (i.e. anti-globalization) rhetoric and policies (e.g. trade barriers). We will examine how governments in developed and developing countries can manage this dilemma through trade policy, social welfare policy, industrial policy, and development strategy. To understand how this dilemma shapes the politics of trade within and between countries, we will first cover major economic theories of trade, foreign investment and global production (i.e. offshoring). These theories tell us which economic actors are the winners and losers from trade. Second, we will examine the political process that shapes trade policy at the domestic level. Finally, we will cover the international politics of trade, including free trade agreements and the WTO. The class will also help students develop their policy analysis skills. One requirement will be a short data-driven research project. Class time will be devoted to spending time on data collection, data preparation, and analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2352 - STRATEGY AND POLICY

Minimum Credits: 3
Maximum Credits: 3
This course examines the nexus of military strategy and national policy, exploring the development and use of military power for political ends. In short, it is about how states make war. The course is designed to investigate several interrelated themes. First is the role of military theory as a foundation for doctrine and strategy. The second explores the relationship of military strategy to national objectives and political decision-making. The context in which the foregoing issues are examined is provided in the third theme: the social, technical, and intellectual evolution of warfare from the early nineteenth century to the present. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. The course is taught in five phases; the first is foundational and the four that follow are historically oriented. The course phases are: (1) basic concepts and theory; (2) the 19th century through the first World War; (3) the interwar period through the Second World War; (4) the Cold War; and (5) the post-cold war era and beyond. Phase 1 lays a theoretical foundation that students apply in analyzing historical developments presented in each of the four subsequent phases. Additional theories are introduced in phases 2 through 5 in context of the technological and intellectual developments that inspired them. In each of those phases, students also explore the evolving nature of civil-military relations and the impacts of social, intellectual, and technological developments on military strategy and national policy. At the end of the course, students are invited to synthesize their knowledge of military theory, strategy, and policy to assess the strengths and weaknesses of current U.S. Strategic thought and discuss prospects for more effective strategies and policies in the future.

Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2353 - CREATIVE APPROACHES TO INTELLIGENCE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Modern diplomatic thought is a survey course in diplomatic history. While emphasis is on the history of the Western world (U.S.-Europe), their relations with Asia, Africa, and their developing countries are also covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2355 - WWII, THE COLD WAR, AND THEIR IMPACT ON DEVELOPING NATIONS
Minimum Credits: 3  
Maximum Credits: 3  
This is a policy-relevant history course that examines the international relations of the 20th century, as well as the lasting legacy of the cold war today. After discussing the causes, conduct, and consequences of World War II, students study the rise of the Soviet Union and iron curtain, postwar trusteeships, and the process of decolonization by which large swaths of Africa and Asia obtained their independence. Class lectures cover just war theory, the geopolitics of war, the rise of NATO, and the major cold war conflicts in Cuba, Afghanistan, Iran, and Vietnam. Using historical case studies, students learn important practical skills useful for a career in diplomacy, international negotiation, or statecraft, as seen through the eyes of master practitioners.

Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: Asian Studies, Russian & East European Studies

PIA 2358 - POLITICAL ECONOMY OF THE INTERNATIONAL FINANCIAL SYSTEM

Minimum Credits: 3  
Maximum Credits: 3  
Why do states select the economic financial policies that they do, and with what effects? This elective course introduces students to the interplay of politics and economics within international financial system. Topics include the trilemma (fixed exchange rates, free capital movement, and independent monetary policy), and how reputation and perception ' distinct from policy choices ' have real effects in areas as diverse as credit ratings, sovereign debt, and political risk. We will analyze large, rising powers within the international financial system, and explore the strength of financial and monetary policy special interests. Group presentations throughout the semester will address current events, touching upon each of the BRICS countries Brazil, Russia, India and China . Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policymakers who are non-experts in the specific topic under consideration.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: Asian Studies, Global Studies

PIA 2359 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.  
Course Attributes: African Studies

PIA 2360 - CYBER SECURITY POLICY
Minimum Credits: 3
Maximum Credits: 3
In our increasingly interconnected world, nearly everyone is reliant upon information technology as they go about their daily lives. This reliance on technology and people's related desire for immediate access to information, provides an opportunity for various actors to advance their personal goals, whether it be for political purposes, financial or other criminal endeavors, or as a platform to advance their social causes. As such, the need for solutions to this ever-growing problem goes beyond just technical solutions. In the course, students will learn how to approach cyber security from a policy and planning perspective. Students will be introduced to various threats and learn how to develop 'plans' at the operational and strategic level to mitigate them. Students will be introduced to various governmental policies, strategies and directives from both the US and non-US perspective that have been crafted to address the cyber threat. Finally, students will learn about the various governmental and non-governmental organizations that are working to deal with the daily challenges of cyber warfare.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2362 - LEADERS & U.S. FOREIGN POLICY DECISION-MAKING

Minimum Credits: 3
Maximum Credits: 3
How do U.S. presidents make foreign policy decisions? The class will review the constraints, dilemmas, risks, and opportunities that American presidents face during international crises and wars. It will expose students to alternative explanations for how states make foreign policy, with an emphasis on the decision-making process. We will critically analyze the decision-making process that led to the undertaking of major and historical decisions in the U.S. history and will conduct simulations of potential crisis scenarios. The course will examine rationalist and psychological theories of decision-making, as well as how other characteristics of leaders can create patterns of decision-making in foreign policy. A key part of this course is the role of advisors and intelligence officials in assisting policymakers. Students will take on the role of members of the federal agencies with seats on the U.S. National Security Council in a roleplaying exercise on how to advise the President in an international crisis. As part of this simulation exercise, students will collaborate on policy options, propose them in a group setting, and draft a debriefing memo on the policy ultimately chosen to address the crisis. Students will also write and present a leadership analysis on current international leaders to assist students in understanding the parties across the negotiating table in policy issues involving the United States.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2363 - INTERNATIONAL HISTORY

Minimum Credits: 3
Maximum Credits: 3
Policymakers, scholars, analysts, journalists, average citizens, and others frequently talk about the "lessons of history" and what they mean for understanding, interpreting, and reacting to contemporary events in the international arena. Yet, history as we know it is the synthesized, and often stylized, reporting of certain people and certain events that some investigators have deemed worthy of study. Accordingly, the lessons we seek to learn from history are consequently often hidden, obscured, or mangled beyond recognition. Despite its imperfections, the received historical record is the only guide we, and policymakers, have to understanding the present and thinking seriously about the future. Accordingly, history must be studied, considered, and used with care. This course prepares students to embark on each of these tasks in several ways. First, students will become acquainted with the key events, trends, and developments in international history since the beginning of the twentieth century. Second, students will think seriously about the contingency of historical events and consider not only the lessons of decisions made (along with their consequences), but also those of many of the unrealized histories of the twentieth century. Third, students will explore the connections between events and developments of the past and contemporary debates, problems, and issues. Finally, students will, by reporting on their work in multiple formats, develop their capacity to use and present history in an effective, policy-relevant manner.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: African Studies, Asian Studies, Global Studies, Russian & East European Studies, West European Studies

PIA 2365 - TRANSNATIONAL SECURITY & ILLICIT FINANCE
Illicit networks that operate transnationally use a variety of methods for raising and moving money and exploit vast global capital flows to evade detection. Their financial activities contribute to instability, corruption, and conflict in countries and regions where they operate and threaten the integrity of the international financial system. Multilateral institutions over decades have developed international standards to guide the development of national and regulatory frameworks for addressing money laundering and financial crime, and states have expanded the use of economic tools to target and disrupt illicit financial operations. These efforts, which rely on private sector compliance, have increased administrative requirements and costs for financial institutions and governments alike, but gauging their effectiveness is challenging. This course examines the characteristics of the financial operations of several categories of illicit networks and the threat such operations pose to human, national, regional, and international security. We will consider the strengths and limitations of current policy tools for countering illicit financial activity and implications for the private sector.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Asian Studies, Russian & East European Studies, West European Studies

PIA 2366 - INTERNATIONAL ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This course examines multilateral diplomacy and international cooperation, paying special attention to the role that institutions play in shaping the modern world. Students learn practical skills relevant to a career in a multilateral setting, as well as information about the history of major institutions and some important political science theories on the nature of cooperation. The class is divided into three parts: part 1 examines the role institutions play in international politics and covers the various theoretical debates surrounding their efficacy. Part 2 covers the history, structure, and function of major international organizations like the United Nations, NATO, the European Union, African Union, Organization of American States, and others. Part 3 examines some managerial techniques important to working in a multilateral setting, and is designed to give students concrete skills that will be important in a career in multilateral diplomacy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Global Studies, West European Studies

PIA 2370 - TERRORISM AS AN INTELLIGENCE PROBLEM

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the important and topical issue of international terrorism and how the U.S. intelligence community responds to demands from U.S. policymakers and allies to detect terrorist threats, to collect intelligence on terrorist groups, and to analyze and assess their intentions, plans and capabilities. Rather than examining international terrorism from a theoretical point of view, we will look at the tactical and strategic issues of most concern to the U.S. intelligence community. As part of the students' professional development, the instructor also will teach the students to write brief intelligence analytical-style memoranda, a skill that will be useful in any professional career.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2372 - POLITICAL ECONOMY OF EAST ASIA IN COMPARATIVE PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
This course is a graduate seminar designed to explore the content, process, and consequences of China's institutional reforms from a comparative perspective. Through a detailed examination of the literature on property rights, markets, and the role of the state in economic development, it is hoped that broader comparative insights may emerge about reform in China that distinguishes it from the experience of regimes in Eastern Europe, the former Soviet Union and developing and developed nations worldwide. The overarching question is what explains the course of China's institutional change. Specific questions include the following: Who were the key political actors involved? What was the role of the central state and its agents? What incentives motivated their particular responses to the reforms? What role did changes in property rights play in the success of
China's reforms? Why were some reforms easier to implement than others? Who were the winners and losers in the different reforms? What major new problems have emerged as a consequence of piecemeal reform? How have those been handled?

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2374 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3
Maximum Credits: 3
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical questions areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2379 - INTRODUCTION TO CYBER CRIMES

Minimum Credits: 3
Maximum Credits: 3
Traditionally, crime has taken place in the physical world. Since the dawn of the internet, criminal activities on the web have been continually increasing. Crime is no longer restricted to a town, city, state or even country because internet crime transcends all different types of jurisdictions. In this course, students will learn the types of crimes that occur online, as well as receiving an overview of how these crimes are conducted. Since this course focuses on computing technologies, students will be given the basic necessities needed to understand the technologies they will be utilizing throughout this course, as well as future courses. Students will learn safe computing practices and how to gather the necessary data to help track down criminals on the web. Topics covered will include introduction to various technology topics, distributed denial of service attacks, ecommerce fraud, counterfeiting, 0-day exploits, discussion on various cyber criminals and nation state threats, etc. Lastly, students will learn about the different organizations, both public and private, and the various policies and laws that are intended to counter the increase in cybercrime.

Academic Career: Graduate
Course Component: Lecture

PIA 2380 - HUMAN TRAFFICKING

Minimum Credits: 3
Maximum Credits: 3
According to some estimates, there are at least 10 times as many girls now trafficked into brothels annually as African slaves were transported to the New World in the peak years of the trans-Atlantic slave trade. More children, women and men are held in slavery right now than over the course of the entire trans-Atlantic slave trade. Human trafficking is the third largest international criminal industry in the world after illegal drug and arms trafficking, and it is the fastest growing. This course examines the domestic and international dynamics of human trafficking from a variety of disciplinary and practitioner perspectives. Assignments allow students to practice evaluating anti-trafficking policy on both scientific and ethical grounds and making persuasive arguments on the basis of that analysis. Prerequisite: None.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2387 - NATO AND ALLIANCE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the organization and operation of history's most successful alliance, the North Atlantic treaty organization, as a key forum for international cooperation. In today's world nations are working together more intensely than ever and on a wider range of challenges. Thus, students who want to work in any branch of government are likely to find themselves working with their counterparts in other countries, particularly if they work in military and security related areas. Moreover, even if they are working in non-military fields, they may find themselves working alongside NATO-led forces, where an understanding of how the alliance works would also help. Throughout the course, students will follow and analyze current developments at NATO, and they will also be introduced to its history since 1949. Special attention will be paid to NATO's crisis management missions in Bosnia, Kosovo and Afghanistan, as well as to NATO's relations with partners, including Russia, and with other international organizations, including the European Union and the UN. There will also be an emphasis on negotiations among allies at NATO. Normally the course will include a field trip to Washington to meet people working on NATO issues today. At the conclusion of the course, students will also participate in a NATO crisis management exercise that they design and execute. The goal of the course is to develop the knowledge and skills necessary to function effectively in a key international organization.

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Russian & East European Studies, West European Studies

PIA 2388 - SOVEREIGNTY, GLOBALIZATION & INTERNATIONAL LAW

Minimum Credits: 3
Maximum Credits: 3
This course begins with an exploration of the history and sources of international law. We then survey the legal process and the application of international law to explore laws governing relations among states, and its expansion to non-state actors (e.g., the private individual, international organizations, NGOs, and multinational corporations). Students will learn about how and why international law is created and develop an understanding of the mechanisms and institutions of its enforcement. The enforcement of international law, its successes and difficulties, will require students to learn about, inter alia, the nature of international disputes, the subjects of international law, and the forums in which disputes are settled. Throughout the course, we will consider the emerging challenges faced in an international law paradigm including, organized violence, global markets, cultural coherency and conflict, identity and citizenship, technological evolution, and environmental regulation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD

Minimum Credits: 3
Maximum Credits: 3
This class will focus on how criminals conduct business in the online world. It will introduce students to various topics such as carding, transnational cybercrime, and web mobs. The class will explore specific communication channels and money transfer systems that are utilized by online criminals. Students will be exposed to criminal methodologies that have become popular in the cyber world. Students will also have the chance to analyze a criminal target and will present intelligence findings at a mock briefing as part of the final project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Russian & East European Studies

PIA 2394 - ISSUES IN GLOBAL ECONOMIC AND FINANCIAL SECURITY (DC SEMESTER)

Minimum Credits: 3
Maximum Credits: 3
This course will discuss trends in global economic and financial security and ways to enhance it. The focus will be on ways to ensure global monetary and financial stability, including through appropriate regulation to reduce the incidence of financial crises and asset price bubbles. Other critical issues, including food and energy security and the role of finance in promoting development, will also be discussed. Although this is a policy course, students should expect to learn a good deal of economics and finance in the process of learning about these issues. These will be important intellectual tools as the future policy discussions on economic security and development will likely continue to focus more and more on finance and thus require more knowledge of finance than in the past. This course will be less narrowly technical, more policy and political economy oriented, but
nonetheless appropriate for students concentrating in global markets, development, finance and trade.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Grad Sch of Pub & Int'l Affrs  
**Course Attributes:** African Studies

### PIA 2397 - INTERNATIONAL ECONOMIC NEGOTIATIONS (DC SEMESTER)

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course looks at a variety of different types of negotiations concerning economic issues, including multilateral trade and investment negotiations, bi- and pluri-lateral trade negotiations, and negotiations aimed at the settlement of specific disputes. We will discuss the influence of domestic politics, and the role of international organizations and non-governmental stakeholders such as NGOs, labor, multinational corporations, and domestic interest groups. The course is particularly useful for those considering careers in international trade, business, markets and finance.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Grad Sch of Pub & Int'l Affrs  
**Course Attributes:** African Studies

### PIA 2399 - INTERNATIONAL ECONOMIC ORGANIZATIONS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This elective course examines international organizations, with emphasis on institutions that govern countries' international economic policies and that affect international economic flows. We will study the Bretton woods institutions (the GATT/WTO, the IMF, the world bank) in-depth, along with regional economic arrangements (the EU), the OECD, the foreign aid regime (DAC), the system of bilateral investment treaties (BITS), international financial regulatory bodies (such as the BCBS, the FSB, and the FSF), and OPEC. Students will learn about international economic dilemmas that arise within an anarchic international system, and arrangements among countries to mitigate and govern such issues. Students will study how power and political processes work within and outside of international institutional arrangements. At the end of the course, students will be able to analyze the role of international economic organizations as both amalgamations of states that hold varying preferences, and as autonomous actors, within the international system within current events. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policymakers who are non-experts in the specific topic under consideration.

### PIA 2400 - INTERNATIONAL ORDER AND GRAND STRATEGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Course description to follow**

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PIA 2403 - JUDICIAL PROCESS

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

### PIA 2410 - AMERICAN LEGISLATIVE PROCESS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will focus is on the journal literature of the last decade- involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Graduate School of Public and International Affairs students only.

### PIA 2412 - ANALYZING CRITICAL INTERNATIONAL SECURITY CHALLENGES

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course consists of three 15-hour weekend workshops 'meeting Friday 6-9pm, Saturday 9am-5pm (1-hour lunch break), and Sunday 9am-1pm'each of which explores a critically important international security topic in the news today. The topics planned for 2015 include: the pros and cons of nuclear abolition; assessing the need for missile defenses; and analyzing China's military capabilities. Using films, lectures, discussion and debate, and group simulations, these workshops will expose students to the key factors shaping each security challenge. The objective is to promote balanced and critical thinking in assessing threats and evaluating choices facing security and intelligence practitioners. In addition to a reading list of articles and monographs' all downloadable or available via the university's digital library' and two books (both provided courtesy of the instructor), the syllabus also provides students with a bibliography of books, journal articles, and major monographs for those wishing to pursue more advanced study. Grades will be determined on the basis of classroom participation and three take-home essays.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PIA 2419 - CYBERCRIME

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

### PIA 2424 - POLITICS, DEVELOPMENT AND CONFLICT IN THE MIDDLE EAST

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

### PIA 2429 - THE WAR ON DRUGS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

The War on Drugs examines the history of drug control policy in the United States and the internationalization of drug prohibition. Topics include:
the history of drug control policy in the US and internationally; the nature of drug abuse and addiction and current drug use patterns, the different components of drug control policy, including crop eradication, drug interdiction, leadership decapitation, law enforcement, and drug treatment and prevention; the structure of the drug trade in the Andes, Mexico, Afghanistan, and the US; and alternatives to drug prohibition, including legalization and harm reduction. The course highlights similarities and differences between the war on drugs and the war on terror with an eye towards understanding how our experience with the first can better inform our response to the second.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2430 - ETHNIC POLITICS

Minimum Credits: 3
Maximum Credits: 3
What is ethnicity and why is it such a powerful basis of politics? This seminar focuses on the role that ethnicity plays in four core areas of politics: mobilization, democratization, redistribution, and violence. We will read and discuss academic scholarship paired with contemporary policy-oriented work, with wide geographic coverage, on issues such as immigration policy, employment discrimination, ethnic favoritism in public goods provision, political campaigns, riots, and genocide. Students will then have the opportunity to develop and test their own argument related to ethnic politics in a final paper developed and critiqued through the semester that answers a question related to ethnic politics. Prerequisite: None.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2431 - THE NEW SOCIOECONOMIC LATIN AMERICA AND CARIBBEAN-CHINA RELATIONSHIP: THEORY AND EVIDENCE

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to understand general and detailed topics in the current Latin American and Caribbean (LAC) and China socioeconomic relationship since the 1990s and particularly in the fields of trade, financing, foreign direct investments (FDI) and infrastructure projects. The first section of the course will begin with a group of sessions on conceptual debates in development theory, data sources for trade, FDI, and infrastructure projects, as well as a structure to analyze the LAC-China relationship in the 21st century. The second section of the course will examine details of the LAC-China relationship in terms of proposed strategies and analysis in each of the four mentioned items (trade, financing, FDI and infrastructure projects), as well as analysis of existing literature in LAC and China. The third section of the course will present case studies of the LAC-China relationship in specific countries and/or of specific topics in one of the suggested 4 topics and/or of specific value-added chains; students will participate with presentations in this section of the course. The final session will also present main results, challenges, and policy suggestions for the current and future LAC-China relationship, both from a bilateral and regional perspective.

PIA 2432 - ADVANCED SEMINAR: IN SECURITY AND INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PIA 2434 - CIVIL-MILITARY RELATIONS

Minimum Credits: 3
Maximum Credits: 3
This course explores the relationship between militaries and the polities they serve. Militaries are crucial governmental institutions in the modern world, serving as the guardians of sovereignty and safety. However, militaries also possess the tools and capability to threaten the very people and polities they are meant to protect. Striking the proper balance between military capability and civilian control of the armed forces is therefore an essential task for all political communities. The difficulty of doing so underscores the importance of knowing what the necessary delicate balance
looks like as well as what factors make success and failure in such ventures more or less likely. In exploring this essential topic of good governance, we will examine the historical roots of civil-military relations, military takeovers of and defections from civilian governance institutions, and the theory and practice of civil-military relations in modern democratic societies (particularly the United States). Particular topics to be considered include coups d'état, military disobedience, civil-military relations in wartime, the "civil-military gap," and the role of servicemembers in the political life of the community. Throughout the course, we will ask and explore three specific questions: What is the dividing line between civilian and military spheres of activity? How much influence should civilians have on activities within the military sphere? How much influence should the military have in the civilian sphere? And we will grapple with the implications of the fact that there are few, if any, clear answers to these questions.

Course Component: Seminar
Grade Component: Grad Letter Grade

PIA 2449 - HUMANITARIAN INTERVENTION

Minimum Credits: 3
Maximum Credits: 3
Humanitarian intervention is the set of responses by international actors who assist people when they are deprived by a natural disaster or political conflict of the basic necessities of security, shelter, food, water, and medical care. Such crises typically occur in countries with weak governing institutions, involve large-scale population displacement, and attract a diverse range of international organizations and states. This course introduces the international humanitarian aid system; reviews ethical, legal, political, and pragmatic challenges; and, through a series of case studies, investigates the processes and outcomes of humanitarian assistance efforts by non-governmental organizations, inter-governmental organizations and governments. The class concentrates on politically induced crises and the controversial role of military actors in the humanitarian realm.

PIA 2456 - COMPARATIVE POLITICAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2460 - LATIN AMERICA SOCIAL & PUBLIC POLICY

Minimum Credits: 3
Maximum Credits: 3
This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, glonacal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).

Grade Component: Grad Letter Grade

PIA 2462 - DIPLOMACY: THEORY AND PRACTICE

Minimum Credits: 3
Maximum Credits: 3
PIA 2463 - ORDER AND VIOLENCE: EVALUATING POLICY, ENHANCING GOVERNANCE

Minimum Credits: 3
Maximum Credits: 3
Establishing and maintaining political order in the state is essential for governance. This course first examines various threats to political order around the world and how they manifest in different forms of violence, including organized crime, gang violence, insurgency, genocide, terrorism, and riots. Armed with theory of causes of disorder and knowledge of specific cases, we review policy designed to address those types of disorder and evaluate effectiveness of those policies. Students will practice writing in short, analytical, policy-oriented memos, and how to evaluate policy using different kinds of evidence.

PIA 2464 - MONEY LAUNDERING

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will introduce students to the main mechanisms and modalities of money laundering as well as to anti-money-laundering efforts and why their effectiveness is limited. Different money laundering methods will be explored and some consideration given to new technologies and how they might be exploited. The course will also examine money laundering case studies.

PIA 2465 - FINANCIAL DIMENSIONS OF TERRORISM

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will examine the financial dimensions of terrorism with particular emphasis on terrorist acquisition of resources and funds through criminal activities. Attention will be given to a variety of organizations and how they raise, move and spend money. The efforts by governments to combat terrorist financing will also be considered with a particular focus on why governments and the international community have had only modest levels of success.

PIA 2466 - DATA ANALYSIS VISUALIZATION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2467 - INTRODUCTION TO AMERICAN INTELLIGENCE

Minimum Credits: 3
Maximum Credits: 3
This course will focus on how the U.S. intelligence community collects and analyzes information to support U.S. national security and foreign policy objectives. Students will examine the historical foundations of the intelligence community and consider how the role of intelligence has changed over time, particularly after the attacks of September 11, 2001. Students will also consider the legal, moral, and ethical factors that influence the roles and
conduct of the U.S. intelligence community. Finally, this course will take a closer look at selected current intelligence topics, such as Russia, China, terrorism, weapons of mass destruction, and cyber security.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2468 - CHOOSING NUCLEAR WEAPONS

Minimum Credits: 3
Maximum Credits: 3
Why do some states choose to develop nuclear weapons and others do not? Have the reasons for nuclear weapons acquisition changed over time? Are more states likely to acquire nuclear weapons in the future? Once they have nuclear weapons, how do states choose their strategies for using them to advance foreign and security policy objectives? Why do states choose to give up nuclear weapons? Is a world without nuclear weapons possible? Is a world without nuclear weapons desirable? The answers to these questions are crucial to ensuring stability, peace, and security in the international realm. Problematically, they are also fundamentally contested by academics, policymakers, military officers, and the general public. This course will provide students with the tools to understand, partake in, and shape these debates about nuclear weapons. It will provide students with a foundational understanding of what nuclear weapons are and how they work. Then, drawing on both academic scholarship and primary source material like declassified documents, it will introduce students to: the myriad decisions confronting policymakers considering the acquisition, use, and elimination of nuclear weapons; how such decisions are made; and how such decisions can be improved. Academic scholarship from the disciplines of political science, history, public administration, and psychology will be used to develop theoretical frameworks and analytical toolkits necessary to think critically about elements of the nuclear weapons lifecycle. Primary sources and declassified documents concerning not only the United States' experience with nuclear weapons, but also that of countries like the USSR, China, the United Kingdom, France, Israel, South Africa, India, and Pakistan will be used to test and refine those frameworks and toolkits.

Academic Career: Graduate

PIA 2469 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
GSPIA's social entrepreneurship class will be taught within the context of nonprofit management and practice, with an emphasis on purpose-driven leadership and skill development. The course will address the impacts of social entrepreneurship in multiple settings and how impact is measured and evaluated. Students will discuss and analyze the goals of "doing good" for social good in the nonprofit realm linking philanthropy, government, and volunteerism through innovative partnerships and financial ties. The instructor will make use of case study materials and connections to GSPIA's Johnson Institute for Responsible Leadership.

Academic Career: Graduate

Grade Component: Grad Letter Grade

PIA 2470 - U.S. FOREIGN POLICY AND LAW REGULATING THE USE OF FORCE

Minimum Credits: 3
Maximum Credits: 3
This seminar examines the role of both domestic and international law in regulating the use of force as a part of U.S. foreign policy. It focuses on the use of covert action by the CIA as an example of a use of force that is regulated both by domestic and international law. The first portion of the course examines the history of the CIA and its use of covert action. It also examines theoretically and empirically why covert activity is an attractive choice for policymakers and the effect of covert action on relations between states. The course then shifts to discuss domestic regulation of the use of force, focusing on Congress's role in the domestic regulation of the CIA's activities. The course will feature an in depth analysis of primary documents related to U.S. intervention in the Angolan Civil War of the mid-1970s. Lastly, the course examines the role of international law in regulating the use of force abroad. The course examines the laws of war and how international law applies to covert action. Modern extensions of covert activity are also considered, such as the use of private military contractors and drone targeting.

Grade Component: Grad Letter Grade
PIA 2471 - ESPIONAGE SURVEILLANCE & SECRET INFORMATION IN INTERNATIONAL AFFAIRS

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the importance of secret information in the conduct of international affairs. Students will first learn about the ways in which states share information, protect secret intelligence, and deceive each other, both in war and peacetime. The course will also delve into how surveillance and espionage are practiced among states and on domestic populations. This includes discussion of the international legal framework for espionage; the development of intelligence sharing between allies (such as Five Eyes); the authority and limits of U.S. domestic and foreign surveillance (such as the role of the Foreign Intelligence Surveillance Act and the Foreign Intelligence Surveillance Court); as well as more recent uses of cyber capabilities to spread misinformation.

Academic Career: Graduate
Course Component: Lecture

PIA 2473 - STRATEGIES OF GLOBAL INQUIRY

Minimum Credits: 3
Maximum Credits: 3
Global Studies is an expansive and dynamic interdisciplinary field that explores current and past transnational processes, such as migrations, human rights, ethnonationalism and imperialism, economic and institutional globalization, and transnational social movements. Within the academy, it is a meeting place or community of inquiry for scholars interested in topics that spill beyond temporal, political, disciplinary, ecological, geographical, and cultural boundaries. This seminar will hone graduate students' abilities to analyze issues and events through global and transnational research frameworks that incorporate various disciplinary perspectives, and to investigate linkages between global processes, social justice, and human well-being. The course is designed to complement each student's own disciplinary background and interests, and to foster preparedness for collaborative and inter-disciplinary global work. It will stimulate student abilities to think critically about a broad range of theoretical and methodological issues involved in global research, including ethics, the co-production of the global and local, the nature of "global" research questions, and research designs from different disciplinary perspectives. In addition to providing a framework for global thinking and learning, the seminar also intends to create a "community of junior global studies scholars" and thus places strong emphasis on attending regularly, participating actively, and presenting critical analyses in a scholarly manner. This is the core seminar for students in the Global Studies graduate certificate program (UCIS).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2474 - CONTEMPORARY CHINA AND INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3
Maximum Credits: 3
This course examines China's role in international economics and politics. It will introduce students to the domestic institutions and actors in China, and then discuss the impact of China's outward economic activity (in terms of trade, investment, finance, and foreign aid) on foreign policy and international politics. Finally, it explores China's role in international institutions and global governance. Students will deepen their understanding of the evolving role of China in the international order and the political implications of a rising China, as well as develop their analytical skills on policy analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2475 - FAILURES FIASCOS AND DISASTERS

Minimum Credits: 3
Maximum Credits: 3
The history of United States (and other countries) security policies during the twentieth century and the early part of the twenty first century, is replete with intelligence failures and foreign policy fiascos. An enormous intelligence apparatus and decision makers who are often regarded as "the best and the brightest" have been prone to errors of commission and omission that have resulted in strategic surprises, disastrous wars, botched military interventions, and inadequate or ineffective responses to challenges and threats. In addition, there are also what can broadly be termed industrial and technological disasters. Although some of these can be traced to poor regulation, it appears that certain kinds of organizational pathologies have also been at work. There is a rich literature on disasters that facilitates interesting comparisons with failures in intelligence and
foreign policymaking. Accordingly, this course will give students an opportunity to examine failures in intelligence, foreign policy, and technology/industry. Students will provide cases studies in each of these three areas and then seek to identify possible commonalities across the three domains. Cases include the Fall of the Shah, the Bay of Pigs, Vietnam, Somalia, and Iraq as well as the Challenger Disaster, Bhopal, and Boeing's 737 Max.

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### PIA 2476 - NONVIOLENT RESISTANCE MOVEMENTS

**Minimum Credits:** 3

**Maximum Credits:** 3

In this course, students will learn about civil resistance movements, which are efforts to challenge certain entities using nonviolent collective action. Nonviolent resistance movements have recently gained popularity as a form of political resistance, particularly in the aftermath of the Jasmine Revolution in Tunisia. In contrast to the usual focus on political violence in conflict literature, nonviolent resistance has emerged as the primary means of challenging authority. We will examine the various theories and explanations for why and how these movements work, as well as the responses of states to them. Additionally, we will delve into the political, economic, and social factors that contribute to the emergence of these movements and the outcomes they produce. The course will also provide an opportunity for students to engage with marginalized voices in discussions on global politics and to develop their critical thinking and analytical skills by taking intellectual positions, defending them with evidence, and participating in peer review. Through the perspectives of policymakers, activists, and scholars, students will explore the significance of civil resistance for various stakeholders, including policymakers, civil groups, activists, and international cooperation.

### PIA 2477 - ECONOMIC STATECRAFT INTERNATIONAL SECURITY

**Minimum Credits:** 3

**Maximum Credits:** 3

The central role of economic statecraft in contemporary international politics reflects the importance of economic elements of power in an interdependent world as well as the state's evolving relationship with the commercial sector. The course examines the practice of economic statecraft in coercive national and intergovernmental approaches for addressing security threats and challenges, the utility of economic and financial tools for achieving policy goals, and the complexity of designing effective strategies that mitigate adverse consequences. Case studies compare the nature, strengths, and limitations of economic statecraft in great powers' foreign policies and explore regional organizations' use of economic instruments to enforce norms and standards.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a survey of development policies, issues, institutions, and resources for professionals working in development. Lectures, discussions, and presentations in class focus on analysis of development policies, and on new and significant policy issues, skills, methodologies, and resources. The course helps students develop the ability to analyze development issues from several perspectives, understand the breadth of international development as a field of professional service and academic study, and clarify their priorities for acquiring skills in preparation for that service. Students completing the course will be able to grasp the history of approaches and experiences with development, identify and critically analyze major institutions involved, assess political and institutional environments of development, employ some key social science and administrative tools, and recognize and understand principles of other significant skills and emerging methodologies in development practice. The course is organized in three parts: 1) dynamics of development and social change; 2) development management: who's in charge; And 3) contemporary issues and skills. Throughout the course we will introduce, discuss, and return to case studies that illuminate key issues and themes: the global HIV/AIDS pandemic, microfinance programs in development, the chad-cameroon oil pipeline project, water system privatization, and the global and local food prices and production.

PIA 2502 - ENVIRONMENTAL POLICY: US AND GLOBAL

Minimum Credits: 3
Maximum Credits: 3
The 1992 Rio Declaration on environment and development states that ‘to achieve sustainable development, environmental protection shall constitute an integral part of the development process.’ We discuss the linkages between development and the environment, and the role of women, indigenous peoples, and the poor in achieving equitable development and environmental protection. Using tools from economics and policy analysis, we explore the conceptualization of environmental problems (market or government failure); various policy instruments to rectify environmental problems (regulations, voluntary programs, taxes, tradable permits, payments for environmental services and international treaties such as the Basel Convention, the Montreal Protocol, and the Kyoto Protocol), and the link between trade and the environment. Students’ case presentations illustrate the challenges of environmental management in developing countries and the roles of civil society, NGOs, corporations, and international institutions such as the world bank, world trade organization, and united nations environmental program. Over the course of the semester, students are responsible for several policy memos and PowerPoint presentations.

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Global Studies, MCSI - Sustainability Related

PIA 2503 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: African Studies

PIA 2506 - SEX AND HUMAN SECURITY

Minimum Credits: 3
Maximum Credits: 3
What effects do power relations between men and women, and between different gender and sexual orientations, have on human security? What is the connection between global gender inequality and experiences of security, development, and human rights as the three founding fields of human security? How does taking sex into account shift national and global policies, priorities, and human security outcomes? How well are international and national institutions doing in addressing connections between sex/gender and human security, and what remains to be done? The human security field has made such questions a priority by addressing neglected issues such as rape as a strategy of war, domestic violence as an obstacle to development, and gender/sexuality as a human right. More generally, it aims to address all human security issues comprehensively by including attention to gender. In this course, we focus on neglected gender issues and learn how to apply tools of gender analysis to our human security work more broadly. This means we examine human security using gender as a category of analysis, and that we address gender gaps in traditional approaches to issues at the intersection of security, development, and rights. We begin by studying the merits of different gender analysis approaches relevant to human security issues. Through a gender lens we then critically examine the causes and implications of human security issues such as: violence that systematically targets a sex or gender as a particular group; rape as a strategy of war and a foil to peace keeping; inequality and domestic violence in non-conflict contexts. We also examine gender aspects of human security threats such as child soldiering, modern slavery, and
environmental disasters. We critically assess institutional and policy responses and learn to develop more effective gender-aware human security responses.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

### PIA 2507 - HUMAN RIGHTS AND SOCIAL CHANGE

**Minimum Credits:** 3  
**Maximum Credits:** 3  

Human rights are powerful and important tools in governmental, intergovernmental, and non-governmental work across a range of fields -- from international development, to politics and public administration, to security and justice. This course provides students with analytical and policy skills in human rights, using an interdisciplinary approach which engages human rights in law/policy, politics and society, philosophy and ethics. It provides students with essential understanding of international human rights laws as tools of individual empowerment, and as evolving social norms shaped by individuals seeking to create fairer societies. We learn to interpret international human rights laws and underlying principles, to grapple with debates and controversies in diverse contexts and cases, and to apply theories of how international human rights create social change in domestic settings worldwide. Questions driving this course include: How can international human rights law (IHRL) help to solve chronic domestic policy problems? What specifically are states' obligations under IHRL? What are the obligations and roles of nonstate actors? What are some common myths and misunderstandings about human rights? Why do some countries comply with human rights while others do not? How can obstacles to implementation be overcome in specific settings? In particular, how do NGOs and other non-state actors participate in human rights change? How do nonstate and transnational actors utilize human rights to promote justice and to combat harmful state and societal actions? What are some processes and strategies of human rights change? We use case studies to illustrate and give depth to a wide range of intersectional human rights issues, such as health, harmful social practices, education, poverty, hunger, policing and justice. We focus in particular on discriminated groups such as children, the poor, women, indigenous, racial, ethnic, and LGBTQIA+ groups.

### PIA 2508 - NGO ADVOCACY & INTERNATIONAL COALITIONS

**Minimum Credits:** 3  
**Maximum Credits:** 3  

NGOs play powerful advocacy roles at national, regional, and global levels to help solve wide-ranging human rights and international development problems. As influential critics, idea entrepreneurs, and forces of social change, advocacy NGOs have expert skills sets which they use to expose problems, uplift marginalized voices, shape policies, politics, and social norms, and mobilize implementation. To “scale up” or maximize effect while ensuring advocacy is rooted in local realities, NGOs often collaborate through coalitions involving local, regional, or international partners, and tap into broader civil society networks and social movements. To avoid risks and generate long-lasting positive outcomes, their analysis, strategic planning, and practical skills must be rooted in core concepts and values such as ethical and inclusive advocacy, empowerment, and "transformative solidarity" - that is, "standing in solidarity with people, taking their agency as a starting point, rather than acting for people" (Jackson 2020). Students in this course engage with these foundational NGO advocacy concepts, approaches, and skills. We learn to assess the benefits and risks of advocacy in different contexts, and to examine how NGO advocacy campaigns relate to diverse stakeholders, build alliances, handle sensitive issues, and convey powerful messages. We learn what responsible and ethical advocacy, and their opposites, look like over the life cycle of campaigns. We become adept at analyzing NGO advocacy strategies in a variety of campaigns and contexts. And we learn to apply the advocacy strategy framework, analytical tools, and practical advocacy skills perfected by experienced NGOs/INGOs and practitioners, by participating in a term-long simulation in which students work collaboratively as NGO representatives to develop a professional and innovative NGO coalition campaign proposal on a topic of importance.

**Course Requirements:** Graduate School of Public and International Affairs students only.

### PIA 2509 - PROJECT MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3
Translating classroom theory into innovative field-based practice remains a project manager's most difficult challenge. The purpose of this course is to provide students with practical strategies and tools that can be used in the design and implementation of successful development projects. The course will be a highly interactive exploration of field-based development strategies and real-world projects that suffered lethal and catastrophic setbacks yet ultimately achieved solid and sustainable outcomes as a result of their innovative design. Students will be introduced to the basics of the project cycle, given specific management tools for project design and, working in groups, asked to develop project initiatives addressing a problem in a developing country of their choice.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**PIA 2510 - ECONOMICS OF DEVELOPMENT**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course has three key objectives. The first is to provide students with an appreciation for the problems and constraints that poor or Less Developed Countries (LDCs) face. The second is to provide theoretical frameworks which facilitate analysis of these problems and generation of relevant policy implications. The third is to provide country and problem specific contexts within which students can apply the knowledge they acquire during the course. To accomplish these objectives, the course will employ a combination of lectures, case studies, exercises, and class discussion.

**PIA 2513 - RELIGION AND INTERNATIONAL DEVELOPMENT**

**Minimum Credits:** 3

**Maximum Credits:** 3

Religious ideas, beliefs, and institutions are influential almost everywhere development practitioners work. This course engages students actively in understanding the roles of religion and culture in economic, social, and political change; the varieties of religious institutions and movements in poor societies; and the significance of religion in several key policy areas. The approach draws on sociology, economics, political science, and anthropology to understand the practical implications of religion for development work. Students completing the course will be able to use and critically assess major approaches to the study of religion and social change, recognize key doctrinal and institutional features of major world religions, incorporate religious institutions and thought into an analysis of civil society, assess the roles of religious actors in conflict situations, evaluate options and strategies for working with faith-based organizations, and apply diverse ethical perspectives to major development policy issues. The course is organized into three parts: (1) an introduction to religion, culture, and development; (2) a comparative survey of major issues and case studies including each of the major "world religions" and key issues such as gender, inclusion and exclusion, human rights, religion and social movements, and faith-based organizations; and (3) religion and the policy and practice of development, including conflict, HIV/aids, and topics determined by the class.

**PIA 2519 - COMPARATIVE GOVERNANCE**
This is a graduate-level course in comparative governing institutions. It is a course that focuses on the political incentives and constraints faced by policymakers as they seek to develop and implement public policy. Our goal in this class is to understand the institutional environment in which politicians and policymakers operate. The most important objective will be to develop the ability of policy practitioners to understand the nature and transformations taking place in political institutions around the world as they seek to improve them. This course is part of a two-course sequence that is strongly recommended for students (both MA and PhD students) in the Governance and International Public Management concentration.

**Course Attributes:** Global Studies
PIA 2527 - FINANCIAL MANAGEMENT FOR NGOS AND NON-PROFITS

Minimum Credits: 3
Maximum Credits: 3
This skills course covers various accounting methods in both private sector organizations as well as Nongovernmental Organizations (NGOs). Upon completing this course students should be able to read and understand annual reports of profit and nonprofit organizations, analyze the published financial statements within the reports to ascertain the well-being of the organization, and to make managerial decisions based upon the results of this analysis. This course is divided into (1) understanding basics of accounting for all organizations; (2) measurements and analysis of financial statements using accounting tools such as common-size statements, liquidity and profitability analysis, debt vs. equity; and (3) budgeting and cost-benefit analysis using contribution margin.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course will attempt to define this balance by looking at issues of local government, governance and civil society in Latin America, the Caribbean, Eastern Europe, Asia and Africa. It focuses on the dynamics of governance with primary attention being the grass roots base of democracy and their relationship to institutionalized state structures. Focus is on the nexus between theories of governance and the practical implications of that theory on political behavior. The basic source of our understanding about governance, will be the reading. It is lengthy and various. The categories under which reading is assigned are somewhat arbitrary and as we go along the re-examination of earlier readings will be essential when we get further into the course. Because of the length of each week's reading assignment, it is essential that students keep up with the reading from week to week. Failure to do so will result in academic "overload" as the course draws to an end. The course will be a mixture of in-class discussions and lectures. The lectures, it should be noted, are not intended to summarize the reading but rather give the independent views of the instructor. All students in the class should read the core readings. Each student should also read from at least one of the three topic lists. There will be four assignments for the successful completion of the course.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2529 - POLITICAL ECONOMY ANALYSIS FOR GLOBAL AFFAIRS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to tools of applied Political Economy Analysis. Many government agencies around the world require such analysis before considering policy change or adopting new strategies. As a result of this course, students will have a framework to situate policy interventions within the context of the political and economic processes in a society including the incentives, relationships, distribution, and contests of power between groups and individuals. Such analysis supports more politically feasible and thus, more effective policy strategies by setting more realistic expectations of what can be achieved, over what time frame, with consideration of risk. Institutions matter for development, but Political Economy Analysis tells us how they matter and shows us what needs to be done in order to overcome obstacles to change. By helping to identify these incentives, this course provides a more grounded, informed approach to policy design. This structured analytical approach helps policymakers examine political, economic, and social forces that influence policy outcomes around the world.

PIA 2530 - GENDER EQUALITY AND THE UNITED NATIONS

Minimum Credits: 1.5
Maximum Credits: 1.5
In this year-long transdisciplinary course, students will collaborate directly with the United Nations Development Programme (UNDP) and other partner institutions on policy-relevant research on gender inequality in public institutions worldwide. Students will develop their skills in data collection, analysis, and reporting. Students' research will feed into an ongoing Pitt-UNDP collaboration and support gender equality as part of the United Nations 2030 Agenda for Sustainable Development. Students will have professional opportunities to interact with policymakers and practitioners at international and national levels, and are expected to present their research at the UN Secretariat in New York City during the spring semester. This course operates in conjunction with an internship program that places select students as junior researchers in partner institutions during the summer following the course.

### PIA 2531 - HUMAN RIGHTS, THE SDGS AND DEVELOPMENT

**Minimum Credits:** 3

**Maximum Credits:** 3

This course explores how human rights principles and practices are reshaping development practice, and how this is reflected in the Sustainable Development Goals (SDGs). We will analyze how the SDGs are affecting governments' development policies, how NGOs and social movements are engaging with the goals, and critically analyze the value and impact of global goal-setting. We will introduce skills and methods that practitioners are using to implement and monitor SDG targets and indicators and human rights principles; communication strategies used in promoting the SDGs; and the prospects of the goals in the context of the Covid-19 pandemic and the current trend toward authoritarian populist governments. Students will focus on an issue area or geographic region of interest to them, and develop expertise in an area such as women's land rights, the decent work agenda, income inequality, universal health coverage, or sexual and reproductive health rights.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### PIA 2532 - GLOBAL ENERGY POLICY

**Minimum Credits:** 3

**Maximum Credits:** 3

This course addresses global energy issues. First, we examine energy sources globally including oil, gas, nuclear, hydro, biofuels, solar and wind. Specifically, we explore methods to estimate the benefits and costs/risks (economic, environmental, health, political) from various energy sources. We discuss how market forces, market failures, lobbying, and government policies influence the gaps between private and social costs of energy. Second, we examine incentive policies for the adoption of renewable energy (e.g. carbon pricing, cap & trade, renewable portfolio standards, pull-push innovation policies), barriers to their adoption (infrastructure, storage, and intermittency), and overall benefits from restructuring towards a greener economy. Third, we address incentive policies to increase energy efficiency (e.g. fuel economy standards, rebates, lead certification). Fourth, we examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide. Fifth, we examine the geopolitics of energy sources (e.g. US, EU/Russia, China/Africa, Central Asia & Middle East). We discuss the growing recognition that investment in energy efficiency and renewable energy can mitigate national security concerns stemming from fossil fuel dependency.

**Academic Career:** Graduate

**Course Component:** Lecture

### PIA 2543 - POLITICS OF DEVELOPING COUNTRIES: DOMESTIC & INTERNATIONAL

**Minimum Credits:** 3

**Maximum Credits:** 3

This course is an introduction to competing conceptions and theories of development in the post-WWII period. Using various lenses (post-colonialism, liberalism feminism) and perspectives (international and domestic), we will explore the socio-economic and political issues that developing nations face and the various positions taken by global actors. We will critically evaluate dominant concepts, measures, and theories of development of three major regions: the Middle East and North Africa, Sub-Saharan Africa and Southeast Asia. We will examine the domestic policies and political institutions underlying the policy process, and the role played by groups with diverse policy interests. Additionally, we will explore the central features and limitations of existing international and regional political and economic structures intended to enhance political and economic development.

**Academic Career:** Graduate
PIA 2544 - CENTRAL EURASIA: POLITICAL ECONOMY AND GEOPOLITICS

Minimum Credits: 3
Maximum Credits: 3
The Political Economy of Central Eurasia provides an overview of the pressing security, geopolitical, and development issues in one of the most important regions in the world. This course will cover histories as well as key developments in the five Central Asian Republics (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan), Afghanistan, Iran, and Western China (Xinjiang). It will also focus on global strategy in Central Eurasia analyzing foreign policy objectives of countries such as the US, China, and Russia. This class will prepare students to analyze and address key foreign policy challenges in this strategically vital region.

Academic Career: Graduate
Course Component: Lecture

PIA 2550 - ECON MEETS CS: MECHANISM DESIGN AND APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Mechanism design is "reverse game theory": instead of starting with a game and solving for the outcome, we start from a desired outcome (for example, social welfare maximization) and design an institution / mechanism that would accomplish it. While this branch of economics has much policy relevance, the methods of analysis are fairly abstract and results are restricted to certain environments. Computer science approaches, such as measures of complexity, methods of computing approximations and the use of simulations, provide a necessary bridge between mechanism design in theory and its implementation in practice. As examples of applications we will discuss Matching and Market Design, which is one of the most practical fields in Economics, with real world applications in school choice, organ exchange, doctor-hospital match, among many others.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2551 - GENDER AND DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course seeks to critically examine how development processes affect women, men and gender relations. By doing so it aims to contribute to an ongoing policy discussion on the meaning and operationalization of diverse, inclusive, and equitable development. The course begins with theoretical approaches to gender and development, development economics, feminist critiques, and their methodological implications for mainstreaming gender into development practice. In the second half, the course studies how gender relations are impacted by social change in the form of positive or negative development. In this policy applied section, the discussions focus on a set of policy issues including reproductive health, migration, climate change, ITCs, work, citizenship and leadership. The overarching goal in both sections is to encourage students to review and debate what we already know and what we still don't know about policies designed to close gender gaps globally. The course concludes with a discussion in the form of a mini-conference on the progress record of the United Nation's 2030 Agenda for Sustainable Development

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Gender, Sexuality & Women's St, Global Studies

PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course examines the management of organizations working in international development and humanitarian assistance with a focus on NGO management. This course has three key objectives. The first is to introduce students to the work and environment faced by development organizations. The second is to provide theoretical and practical frameworks for the analysis of management challenges and generation of relevant recommendations. Big questions we investigate include: why are NGOs fundamental for development? How can NGOs improve their accountability

2768
and effectiveness? How to best approach a complex decision problem? What are the key opportunities and dangers in organizational "partnerships" between governments and NGOs, northern and southern organizations, etc.? How can NGOs leverage community participation? The third objective is to help students develop transferable management skills, which will help them get a job in international development. Assignments emphasize primary research and focus on building critical writing, analytical, and presentation skills that demonstrate a broad understanding of the key management challenges facing development organizations.

### PIA 2553 - GLOBAL HEALTH POLICY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the millennium development goals prioritize investment in health for human welfare. We examine underlying economic problems and proposed policy solutions to address major diseases health issues such as AIDS, TB, malaria, diarrhea, and respiratory illnesses. We examine challenges in addressing children's and women's health issues, including child labor and trafficking. We study World Trade Organization (WTO) provisions that assist or impede poor countries' access to drugs. We study WTO cases on health protection (e.g., US-EU beef hormone debate). We discuss the costs and benefits of genetically modified organisms in our food supply. Students' case presentations examine cases of successful global health interventions (e.g., Small pox eradication, arresting AIDS in Thailand) and new challenges (SARS, avian flu, health-related impacts of climate change), as well as the roles of the world bank, the world health organization, corporations, NGOs, and civil society in improving public health in developing countries.

### PIA 2567 - TECHNICAL ASSISTANCE AND PROGRAM DESIGN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Instructor Permission is required. Field based learning and cultural emersion are vital to gaining the skills necessary to have successful careers in international development and human security. With this in mind, the African Studies Program, the School of Education and the Law School are collaborating to expand the University of Pittsburgh field-based activities programs into a full-fledged learning research seminar which will now be available for all of East Africa and in other parts of Africa, Asia and Central and South America for students who are interested. Over several phases, taking place in Pittsburgh and overseas, students will familiarize themselves with relevant literature, design a project for a research activity, an evaluation, or an organizational development opportunity in relation to the proposed project, and finally compile a policy/research paper on the project as part of a post-travel independent study. Students will work with organizations dealing with issues of gender violence, homeless and other vulnerable youth, social entrepreneurialism and income generation, as well as other topics developed by students. This course will not only increase the experiential learning profile of the university and its students but will be a continuing mechanism for increasing the partnerships and network between Pitt academic centers and alumni and development organizations in East Africa and other parts of the world. Graduate and upper-level undergraduate students (by invitation) will participate in a Pittsburgh infield-based learning research seminar for their overseas work in the summer of 2019. Their research project will be due on August 31. Students can register for the course either in the Spring semester or the Fall semester of 2019. The instructor will work independently with each person individually to develop their program. There will be three phases to the course/activity (depending on whether course credit is sought).

### PIA 2574 - AFRICAN DEVELOPMENT SEMINAR

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores development issues in Sub-Saharan Africa. It facilitates multidimensional considerations of these issues and examines the very meaning of "development" as a concept for Africa. Historical and contemporary paths of development in Africa are examined. Important analytical
focuses of the course include the roles of both internal and external factors influencing development policy and management. This includes African regional organizations, nation states, and traditional societies; external factors such as, international regimes; as well as European, North American, Middle Eastern, and Asian state participants in African development activities. Students completing this course are expected to have: a better background for understanding Africa, African peoples and civilizations; knowledge of the social and cultural issues affecting development in Africa; alternative frames of reference for interpreting information about Africa; appreciation of various challenges facing Africa; and the capacity to develop and defend a well-designed policy position on an African development issue. The course is divided into: part 1 (the underdevelopment of Africa: scale and sources); part 2 (the non-development of Africa, 1960-present); part 3 (contemporary approaches to African development); part 4 (emerging challenges and opportunities for African development); and part 5 (African policy debates: where do we go from here?)

PIA 2582 - LATIN AMERICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course is a reading seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topics of 'regime transition' in Latin America.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.
Course Attributes: Latin American Studies

PIA 2584 - POLITICAL ECONOMY OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3
In this class students will continue (from "economics of education") to develop techniques for economic analysis. The subject is placed in a broader intellectual and political context. Particular attention is given to critique of neoclassical economic analysis, to alternative frameworks for economic analysis, including class-conflict and institutional approaches, and the applications of economic analysis in the educational policy process.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2585 - U.S. FOREIGN ASSISTANCE AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
Why does the U.S. provide foreign assistance? How much does it cost? What does the U.S. spend foreign assistance on? What is the impact of U.S. assistance in countries around the world? This course will explore these questions and cover the way the federal budget process is supposed to work and the way it actually does work, with a specific focus on the U.S. foreign assistance budget implemented by the U.S. Department of State and U.S. Agency for International Development. The course will also examine the decision making process for allocating foreign assistance, including its impact on benefiting countries; its influence on sectoral objectives (such as democracy or global health); and its effect on U.S. policy. Through country and sector case studies, students will gain practical expertise in analyzing country and sectoral contexts and making recommendations on foreign assistance to senior leaders.

#### PIA 2602 - EVOLVING GLOBAL SECURITY LANDSCAPE (DC SEMESTER)

**Minimum Credits:** 3  
**Maximum Credits:** 3  
U.S. National security strategy and policy face great challenges in the 21st century. Political, military, legal, and economic factors will affect both strategy and policy. This course will assess those factors and their effects on possible solutions to those challenges. The course approaches national security from both military and government-wide perspectives and addresses the executive branch, the congressional, and the global environments. The professor will emphasize a practitioner's approach to issues and will use lectures, readings and original source documents, class discussions, and guest speakers from the national security community. Students will deliver short written papers, mostly in the form of one-page memos, and will undertake group assignments leading to oral class presentations. The primary focus is on contemporary issues and events, but the instructive value of history is also prominent throughout the course. For students who wish to take this course, prior knowledge of or study in national security is strongly recommended but not required. This course will help students with foreign policy and security studies concentrations prepare for the evolution and challenges of coming years.

#### PIA 2603 - DEVELOPMENT IN AFRICA: CHALLENGES, CONSTRAINTS AND STRATEGIES (DC SEMESTER)

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A half-century after most African nations gained their independence, the continent continues to be a disproportionate generator of conflict and instability. Simultaneously its global importance grows, due to external preoccupations with energy security, anti-terrorism efforts, emigration, and disease. Despite these complex dynamics, the international community's engagement with Africa continues to be largely focused on crisis management and humanitarian assistance. This course will explore the underlying reasons: historic, political, economic and cultural -- for Africa's chronic weakness and dependency, as well as the West's often myopic response to these pressing problems. It will take a close look at some of the most destructive developments in the post-colonial period, including state collapse, genocide, and HIV/AIDS. We will then seek to better understand the manifestations of crisis in Africa and how to more effectively tailor our responses. To that end, we will delve into the world of humanitarianism, from its traditional charitable manifestations to more recent trends such as humanitarian intervention, r2p, and reconciliation.

**Academic Career:** Graduate  
**Course Component:** Lecture
PIA 2604 - GEOPOLITICS OF SOUTH ASIA (DC SEMESTER)

Minimum Credits: 3
Maximum Credits: 3
This course will look at the region against the historical backdrop of its relations with the world. But the major focus will be on the dramatic developments within South Asia during and since the 90's and the region's evolving relations with the US, China, Russia, Japan, Iran the middle East and central Asia. Especially how the US is helping India in realizing its aspirations for a big power status, and a factor of stability in the region, and Pakistan in its salvation from chronic weakness by building its capacity to reform itself. Pakistan, both as a partner and potential target, in the war against religious extremism and terrorism, has become a major foreign policy challenge for the us and is likely to occupy an important place in the national security and foreign interests of America for some time. The course will look at these threats and challenges specially the US war against extremism, more particularly the Taliban and Al Qaeda, being fought with the help of two critical allies, Pakistan and Afghanistan.

PIA 2607 - STATE CRAFT AND SMART POWER IN THE DIGITAL ERA (DC SEMESTER)

Minimum Credits: 3
Maximum Credits: 3
This course examines new approaches to the practice of statecraft in an era of rapid global change. Globalization, including accelerating digital communication, is upsetting traditional international order and institutions, and changing the pace and intensity of decision making. Nation-state governments, while still the primary actors, must adjust to new sub-national, regional and transitional forces and players in a far more complex global arena. As digital communication brings publics into politics and policy far more than ever before, this course helps participants better understand and prepare for these and other current challenges for smart power. Features guided classroom discussion, presentations by officials and outside experts, and in-class exercises such as a resource allocation/strategic planning session (somewhat akin to one of the major elements of the PMF and FSO oral exams) as well as policy simulations. The course's emphasis on policy, institutional and professional concerns, will be particularly relevant to those seeking employment in public service, NGOs, public policy think tanks and consulting firms.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Grad Sch of Pub & Int'l Affrs

PIA 2609 - GLOBAL SUSTAINABILITY & DEVELOPMENT: POLICY IMPACT AT THE NATIONAL LEVEL

Minimum Credits: 3
Maximum Credits: 3
This course offers an overview of the concept of sustainability and its application in economic, environmental, social and development spheres from the perspective of policy practitioners. It examines the issue through the perspective of three planetary ecosystems - water, land and air - and explores associated public policy issues - urbanization, globalization, depletion of ocean resources, land-based sources of marine pollution, deforestation, climate change and national security. Drawing on a policy thinking tool developed for this class, the seminar will assess the evolution of international legal frameworks and related concepts since 1970 and apply the tool to identifying and analyzing current and future policy options at the local, state, national and global level. This course provides business and finance, economic development, national security as well as environmental majors a command of key concepts, analytic tools, and professional literacy for addressing sustainability issues across a range of disciplines.

This course will provide a deep dive into the origins of information statecraft and explore case studies to provide a detailed understanding of the scope, sophistication, and significance of the geopolitics of information. Building on key theoretical models, including markets for loyalties, networks, and game theory, this course will provide an analytic framework for understanding the range of information statecraft activities, as well as the key variables likely to influence the success or failure of a public diplomacy campaign or program. Monitoring and evaluation techniques and best practices will also be covered, as well as the foundations of digital analytics and metrics. Classes will feature occasional guest speakers from the State Department, the Department of Defense, and the NGO community. At the end of the course, students will be subject matter experts on public diplomacy and global media strategy, the information statecraft toolkit, and the significance of these tools and tactics in international affairs.

PIA 2623 - RUSSIA AND POST-SOVIET POLITICS

Minimum Credits: 3
Maximum Credits: 3
Russia and Post-Soviet Politics. A survey of the major issues in contemporary politics in the post-Soviet region in general, and Russia in particular. The seminar will briefly examine the pre-Soviet and Soviet period, but the primary focus of the course is on developments since 1991. Topics to be examined include the Soviet collapse and transition, the nature of Putinism as a political and economic system, broader patterns of reform in the post-Soviet space, and Russian foreign and security policy, including US-Russian relations. We will meet with multiple guests from the DC area community of Russia scholars and practitioners. We also will watch two documentary films, one on social change and the transition from communism in Russia and one on Putin's motivations for interference in the US 2016 elections.

PIA 2624 - FROM FRAGILITY TO RESILIENCE: NEW APPROACHES TO GLOBAL DEV DC SEMESTER

Minimum Credits: 3
Maximum Credits: 3
While some countries move up the development ladder on the way to greater economic growth and stability, others struggle with cyclical fragility and the negative repercussions that come with it. The path from fragility to resilience is rarely linear, requiring a mix of security, stabilization, humanitarian aid, and development assistance. This course will examine the non-kinetic tools deployed in fragile states, examining their utility and effectiveness in specific country and regional cases.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2625 - STRATEGIC FORESIGHT IN INTERNATIONAL RELATIONS DC SEMESTER

Minimum Credits: 3
Maximum Credits: 3
This course will provide graduate students with a structured approach to thinking about the future of the international environment. It is a foundation in qualitative foresight methodologies with direct application to national or organizational strategic planning. It also provides a tour du horizon of the global trends shaping the world 10-20 years into the future and beyond. Through real-world case studies and classroom exercises, the course exposes students to the practical application of foresight methodologies to policymaking and resource decision-making. These methodologies are routinely used by strategic planners in leading global intelligence organizations, national security ministries, multinational corporations, and non-governmental organizations. Strategic foresight is an under-appreciated "hard" international relations skillset, particularly useful in navigating the profound global transitions underway that affect risk and competitiveness for countries, companies, and individuals.
Academic Career: Graduate
PIA 2627 - EMERGING CHALLENGE OF DISRUPTIVE TECHNOLOGIES (WASHINGTON, DC)

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine how disruptive technology may impact a nation's approach toward its use of diplomacy, information, military, and economic power to advance national objectives. Students will investigate key concepts and impediments to the adoption of technology by organizations and individuals, make educated predictions regarding the role technology could play in competition in the international arena, and assess ethical factors involved in the use of technology, both old and new.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PIA 2628 - RISING ATHENS DEFENSE DIPLOMACY AND DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course uses the deity Athena (the goddess of wisdom, war, and strategy) as a heuristic in order to critically engage the structure and substance of U.S. national security policy. Particularly after 9/11, U.S. national security and foreign policy has been dominated by the Department of Defense. Arguably Ares, the god of war and tactics, has been ascendant. Yet the U.S. has not been winning wars and it remains underprepared to use non-military instruments to achieve strategic success. The ancient Greeks knew that militarism without strategy was a losing proposition, which is why Athena - the multifaceted female god of art, war, empathy, protection, architecture and many other things besides - was the deity for victory. Over the duration of the class, students will explore national security policy through the lenses of gender, creativity, storytelling, strategic empathy, and interagency structures in order to tease out how the U.S. might build better national security strategies and policies.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PIA 2629 - DISINFORMATION AND INFLUENCE IN THE DIGITAL AGE (DC SEMESTER)

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore how global actors have weaponized false or misleading information to shape public perceptions, achieve strategic geopolitical goals, make money, and pollute the information environment. Students will study the new tools being used by state and non-state actors and examine the reach/effectiveness of disinformation campaigns in shaping public dialogue. This course will further explore how the practice of disinformation has changed in the information age, how both state and non-state actors weaponize technology, social networks, and other tools for dissemination, and what makes human beings and societies vulnerable to information operations. In addition to covering state-sponsored information operations, this course will also dive into financially motivated operations, the role of the media and state media, and the inadvertent spread of viral false information, differentiating between different types of campaigns. Additionally, students will have the opportunity to study how to detect these campaigns using open-source investigative techniques and discuss the difficulties of attribution particular to the information operations space. Finally, this course will explore regulatory, diplomatic, technological, and societal mitigations and interventions aimed at protecting the information environment, assessing their effectiveness.

Academic Career: Graduate  
Course Component: Lecture

PIA 2630 - 21ST CENTURY STRATEGY (WASHINGTON DC)

Minimum Credits: 3  
Maximum Credits: 3  
The art of war and grand strategy is often invoked yet rarely understood, resulting in catastrophe. Too often policy makers, members of congress, academics, think tankers, journalists, pundits and even flag officers discuss strategy but remain ignorant of the concept. Consequently, strategy is frequently confused with tactics, bureaucracy, academic theory and other things - all to ruinous effect - as evidenced in Vietnam, Iraq and Afghanistan. You will learn universal strategies for the strong, the weak and most things in between. We will examine the ideas of Sun Tzu,
Kautilya, Jomini, Clausewitz, Mao, T.E. Lawrence, Galula and other scholar-practitioners. Case studies include the Peloponnesian War, American Revolution, 2006 Lebanon War and African warlords. The course will teach you how to think strategically and builds on what senior U.S. military officers learn at war colleges, taught by a professor at such an institution. However, we will probe much deeper than what is usually taught at war colleges and civilian institutions so that you are equipped to fight and win 21st century wars.

**PIA 2634 - SPEECH WRITING & EFFECTIVE COMMUNICATING FOR POLICY PRACTITIONERS (DC SEMESTER)**

**Minimum Credits:** 3  
**Maximum Credits:** 3

How do you write a great speech that has impact in the international arena or helps move the policy agenda forward? From research to rhetoric, Speechwriting and Effective Communicating for Policy Practitioners” will address that question and explore a range of techniques that speechwriters use to create memorable messages for the international stage. This course will be taught fully online in Fall 2021 by Dr. Jamie Shea, former Deputy Assistant Secretary General for Emerging Security Challenges as well as the former NATO spokesperson. During the course you will study historic and contemporary speeches tied to significant international issues as well as learn how to craft and critique the language of international affairs. There will be regular writing assignments as well as, reading, listening assignments, and discussion, as well as guest lectures from seasoned practitioners. In the end you will understand how foreign policy ideas are communicated and perhaps find a speechwriting voice of your own. Dr. Shea will teach the course live from Brussels, BE.

**PIA 2635 - CONFLICT IN SUB-SAHARAN AFRICA: CAUSES AND CURES (DC SEMESTER)**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course will be an overview of security issues from African and global perspectives. The course will begin with a historical look at colonial powers in Africa, the dynamics of the Cold War and how it shaped the wars of decolonization and the establishment of African liberation movements. The course will then address the fate of the post-colonial states and the emergence of US security assistance after the end of the Cold War as well as the emergence of transnational threats in the region.

**Academic Career:** Graduate  
**Course Component:** Lecture

**PIA 2636 - CONFLICT AND MIGRATION (DC SEMESTER)**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course will explore the juncture of migration and conflict. Using a case-study approach the course will delve into several recent conflicts that have had migration emergencies significant enough to have international impact. These will include the recent and persistent conflict in Syria, the end of conflict in Afghanistan, the migration challenge in Central America, and migration in the Sahel toward Europe. This course will also look at the migration challenges from a U.S. perspective and provide students an opportunity consider the laws, history, and reasons behind U.S. immigration policy. The course will be telescopic, focusing first on older migrations while quickly turning to more recent and even current events.

**PIA 2638 - TRANSATLANTIC RELATIONS IN A MULTI-POLAR WORLD (WASHINGTON DC)**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The Transatlantic Relationship, formally embodied in the North Atlantic Treaty Organization (NATO), has been a cornerstone of international security since the end of the Second World War. NATO helped to ensure that a war between the Soviet Union and the United States did not occur. It helped to pacify post-World War II Europe, to reduce fear amongst European states and to enable European integration and the eventual development of the European Union. Several non-democratic allies transitioned into liberal democracies, arguably due in part to their NATO membership. Following the end of the Cold War and dissolution of the Soviet Union NATO facilitated the transition to democracy in eastern Europe. The alliance was, and seemingly remains, the main forum for Europe, Canada and the United States to discuss the most pressing global security concerns. But animosity during the administration of George W. Bush, apathy during the Presidency of Barrack Obama and downright hostility from the Trump White House has left NATO shaken and weak. Europeans, meanwhile, failed to invest in NATO following the end of the Cold War and are increasingly torn between NATO and the EU's European Security and Defense Policy (ESDP). This seminar explores the historic foundations of NATO and dissects current issues such as the challenge from Putin's Russia, rising illiberalism in Europe, populism in the US and EU, migration pressures, defense industrial issues, terrorism and the role of China in Europe and the wider world. The course finishes by exploring possible future developments of what has been known as the "most successful alliance in history" in an emergent era of multipolarity.

**PIA 2640 - HUMANITARIAN ACTION: CHALLENGES, RESPONSES, RESULTS (WASHINGTON DC)**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will address major humanitarian challenges worldwide from the late 20th and early 21st centuries. This will include disasters caused by nature and man: conflicts and major economic stress. Challenges for women, children, refugees, displaced people. Involvement of government, UN agencies, NGO's, militaries, donors, press, and others. Students will consider, through discussion and case study review, the interplay between humanitarian ideals and practice, the varieties of humanitarian disasters, and consider the roles played by actors (donor capitals, NGOs, the international community, etc.) as well as preparedness and self-help planning by nations.

PIA 2644 - FORESIGHT, INSIGHT, AND THE FICTION OF NATIONAL SECURITY (DC SEMESTER)

Minimum Credits: 3  
Maximum Credits: 3  
While old paradigms seem to be failing us in war and peace, the creative management of national security challenges are more important than ever. We require new approaches - not reading the same, old texts, or using the same, old methodologies and theories. It is primarily for this reason - the need for imaginative, strategic leaders - that this class uses fiction as the launching point for discussion. As the 9/11 Commission noted in their report, "The most important failure was one of imagination." Students in this course will use fiction as a springboard will hone several key student skills including creativity, the ability to better empathize with complex situations and potential opponents, understanding unfamiliar or strange cultures in order to consider unseen challenges and potential solutions and, grappling with ambiguity, contradictions, complexity, and ambivalence - entertaining for fiction but critical when considering the real world. Perhaps most importantly, students will hone their ability to ask the right questions - a prerequisite to finding least bad options, which is increasingly their job as they move into higher leadership positions. Finally, students will emerge from this course changed readers - better able to deconstruct (and reconstruct) text, think critically about what is read, and know when, and when not to, apply these frameworks.

PIA 2684 - CONGRESS AND THE MAKING OF U.S. FOREIGN POLICY - DC SEMESTER

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine the role that the United States Congress plays in the making of U.S. foreign policy whether as partners or adversaries with the White House and other Executive Branch agencies. Using historical and current case studies, this course will examine the sources and conduct as well as the actual process of making foreign policy to include addressing the political and bureaucratic dynamics shaping those decisions. Students
will examine direct and indirect ways by which Congress impacts U.S. foreign policy action including the appointments clause, the approval of treaties, the authorization, and appropriations processes as well as through oversight and investigations. Students will examine current tensions and frictions between the branches and how that impacts the way the U.S. addresses contemporary challenges. The course will include short lectures, extensive seminar discussion, and will involve significant interaction with guest speakers who have experience addressing the issues raised during the course.

PIA 2705 - NEIGHBORHOOD AND COMMUNITY DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
The concept of neighborhoods in cities has had many meanings and understandings over time. The neighborhood can be interpreted as a spatial, social, political, racial, ethnic, cultural or economic unit. How have urban neighborhoods changed? What has been the impact of local, state and federal policies on neighborhoods over time? What role has and does community development play in neighborhood development? How and why did some urban neighborhoods decline in the 20th century? How have urban neighborhoods revitalized? What are current impacts of the COVID19 pandemic and how are they affecting local planning? This course focuses on neighborhoods and community development largely in the North American urban context over the post-World War II period, with international comparisons. For cultural studies students, we include a dedicated focus on placemaking as a means for revitalization across city neighborhoods and international comparisons of cultural regeneration strategies, particularly in the COVID and post-COVID era. We use many examples from the Pittsburgh region, providing a wonderful source of cases for helping to advance your understanding of neighborhood and community development. The course will introduce students to the dynamics of neighborhood change, with an emphasis on equity issues explicit and implicit in cities and urban development, neighborhood data analysis and tools for analyzing neighborhood development and change, history of urban development, and policies and plans that have helped to shape and transform urban neighborhoods.

PIA 2713 - CAMPAIGNS FOR POLICY CHANGE

Minimum Credits: 1.5
Maximum Credits: 1.5
How do you turn anger into action? Protest into progress? Interest into influence? For starters, having history, morality, well-attended marches, or even facts on your side - though helpful - is never enough. Successful campaigns and their leaders have specific strategies and tools to move the
Strategies and campaign components are drawn from the instructor's work on national and international policy and political campaigns, as well as interactions with some of the biggest campaigns and best policy campaign professionals in the world. The instructor's campaign experience includes appearing on Fox News, speaking on NPR, testifying before the U.S. Congress, organizing rallies in D.C. and New York City, writing or appearing in: the Wall Street Journal, Associated Press, ABC News, New York Times, Bloomberg, USA Today, The Hill, San Francisco Chronicle, Huffington Post, and having blogs re-printed in many state and local newspapers. Reports authored and campaigns led by the instructor have been cited in several books and a feature length documentary. The lectures, class participation and assignments will cover primary elements of a campaign -- from organizing your advisors to fund raising to being a spokesperson in the media. The instructor will provide the process and outcomes of effective strategy development. Each course component will use actual or real-time examples of how to (and how not to) execute the resulting tactics effectively. There's tough work and enormous satisfaction that comes when you stop talking about a problem and actually want to solve it. This course will challenge - and at times entertain - students willing to quickly apply what they learn to defend policy positions and to create the plans and elements of real campaigns. The urgency and need for skilled, smart and strategic advocates to fight for the public interest and protect our democracy has never been greater.

PIA 2715 - GIS FOR PUBLIC POLICY

Minimum Credits: 3
Maximum Credits: 3
A geographic information system (GIS) is a powerful tool for the public sector and used in a variety of disciplines. GIS builds on existing methods while offering new dimensions. This course provides students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and demonstrates its uses in the public sectors. Students utilize ArcGIS to analyze and display spatial and demographic data. The construction of policy is then predicated on analysis. Skills learned in core courses can be brought to this course and built upon. Students have the flexibility to focus on their particular area of interest within the public sector through project work. The course is taught via lecture and hands-on experience using the ArcGIS software.

PIA 2742 - HUMANITARIAN CRISIS

Minimum Credits: 3
Maximum Credits: 3
This course examines more than a dozen major humanitarian crises from around the world during the past 25 years. It analyzes key cross-cutting themes and how response and recovery efforts have been managed, while giving additional attention to reducing disaster risks. Through readings, class discussions and negotiation exercises we will consider the performance and respective roles of primary actors such as united nations agencies, Non-governmental Organizations (NGO's), international organizations, military forces and the official authorities of affected countries. The course has a strong experiential emphasis as reflected by visiting speakers with first-hand field experience, and contact with disaster management graduate students and practitioners in other countries. Students will participate in three simulated negotiations by agencies working in Haiti, Darfur, and Pakistan. They will also work together in comparative research teams, engaging with selected overseas partners, and prepare a joint presentation. Two short papers also will be assigned. Broader themes will include the role of leadership, ethical dilemmas, state-NGO-military relations, policy advocacy by NGOs, the growth of local and national capabilities, the evolution of the international system of humanitarian response, and programmatic ideals such as 'do no harm' and 'disaster risk reduction'. By the end of the course, participants will acquire a deeper understanding of political, military, and humanitarian responses to major humanitarian crises, as well as current initiatives that seek to reduce people's exposure to...
future threats. This fifteen week course is designed for graduate students interested in working in humanitarian or international crisis activities, whether on behalf of host governments, institutional donors, civilian international or local agencies, military forces, or the media.

PIA 2743 - URBAN AND LOCAL POLICY MAKING IN THE UNITED STATES

Minimum Credits: 3
Maximum Credits: 3
This course examines policy through the lens of urban and local problems and policy issues, including gentrification, race, development, and resource allocation. Local and municipal policies have developed as cities have grown and cleavages between urban and rural have deepened. We will examine the origin and evolution of local politics and policy, trace the development of local governmental institutions, coalitions, and development. Concepts such as the debates and discussions of public servants' and institutional policymaking with respect to public values for public services, place making, etc. Students will be equipped with an understanding of the cultural, constitutional, institutional, organizational, and ethical context of public administration through experiential and collaborative learning. As a graduate course, this class is designed to familiarize students with the literature in subnational political systems, including federalism, and the variety of theoretical and methodological approaches on the topic. The course will be rooted primarily in the political science and policy and public administration literatures, but will include political science, sociology, geography, and interdisciplinary works in urban studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2801 - FOUNDATIONS OF QUANTITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2802 - EMPIRICAL METHODS OF RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques common in political research.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2810 - ADVANCED METHODS CAUSAL INference

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts central to causal inference but there is also a heavy emphasis on helping students develop their capacity for research design.
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2811 - AMERICAN ELECTORAL BEHAVIOR

Minimum Credits: 3  
Maximum Credits: 3  
This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the America micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2812 - COMPARATIVE PARTIES AND ELECTIONS

Minimum Credits: 3  
Maximum Credits: 3  
In this seminar, graduate students will be introduced to a wide variety of readings in the history of Western Europe.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2813 - SEMINAR POLITICAL INSTITUTIONS

Minimum Credits: 3  
Maximum Credits: 3  
The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2814 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3  
Maximum Credits: 3  
This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2815 - WOMEN & POLITICS

Minimum Credits: 3  
Maximum Credits: 3  
Women have participated in politics as citizens, voters, activists, and elites. However, the extent to which women can and do serve in these roles varies substantially within the U.S. and cross-nationally. This course will examine core works and current developments in the field of women in politics from both a behavioral and institutional approach. We will discuss the role of women in social movements, public opinion, voting behavior, electoral politics, legislative studies, and public policy. While this is a substantive course, there will be a strong focus on the methodical approaches
used to study women in politics.

**PIA 2816 - RESEARCH TOPICS ON THE POLITICAL ECONOMY OF DEVELOPMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a PH.D level course that explores the causes and effects of poverty, under-provision of public goods, bad governance, and conflict in low-income countries. We will look at the role of institutions, historical legacies, state capacity, regime type, corruption and clientelism, natural resources, ethnic divisions, and international aid in explaining under-development. While this is primarily a substantive course, it will also expose students to cutting-edge methods at the forefront of research on the political economy of development, including experimental and quasi-experimental methods.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PIA 2817 - PEACEMAKING AND PEACEKEEPING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course offers case studies of multilateral peacekeeping and peacemaking efforts in relation to regional and ethnic conflicts, such as those in Bosnia, Kosovo, Rwanda and Somalia. It looks at the underlying rationale for intervention in such conflicts and the problems and dilemmas that arise.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PIA 2818 - DOMESTIC POLITICS AND INTERNATIONAL CONFLICT IN THE INFORMATION AGE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and Eastern Europe, Latin America, Asia, and other parts of the world.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PIA 2819 - FORMAL POLITICAL THEORY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PIA 2821 - COMPARATIVE POLITICAL BEHAVIOR**

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### PIA 2822 - SEPARATION OF POWERS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will focus on the relationships among the branches in a separation of powers system, particularly the interplay between the legislature and the president. Most specifically, the course will consider the implications of a separation of powers system on representation: can a system specifically created to check the government's ability to act meet the demands for representation of a diverse constituency? How should we think about representation in a separation of powers system? The course will focus on the US political system, but will have implications for the comparative study of these systems.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### PIA 2823 - TOPICS IN COMPARATIVE POLITICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate course is devoted to the study of international and comparative political economy in developing and emerging countries. These countries tend to face very different sets of constraints than their wealthier counterparts. The aim of this course is to analyze the determinants of welfare in poorer countries. Its main focus is to study the political economy of income and examine how domestic and international incentives shape crucial economic policies (e.g. trade, monetary, or education policies). In the last part of the semester, we broaden our horizon to examine other important components of welfare, such as environmental quality. This course is resolutely focused on the macro level and limited to developing countries.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### PIA 2824 - THEORY OF INTERNATIONAL RELATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### PIA 2825 - CIVIL WARS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of
these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.

PIA 2826 - BAYESIAN STATISTICS

Minimum Credits: 3
Maximum Credits: 3
This is a course in advanced methodology in political science. The class will focus on topics related to matrix algebra.

PIA 2827 - FORMAL POLITICAL THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This is the second course in the department's graduate formal theory sequence. We will survey game theoretic models in political science with two goals in mind: (1) students will become critical and competent consumers of formal theory and (2) they will be prepared to begin using formal theory in their research. Topics include bargaining, coalition formation, lobbying delegation, reputation, and signaling. We will also discuss the connection between formal models and empirical tests (both observational and experimental) as well as survey alternatives to rational choice (behavioral and experimental) as well as survey alternatives to rational choice (behavioral, computational, and evolutionary models). Students must be familiar with basic game theoretic concepts and analysis (at the level of PS 2701).

PIA 2828 - AUTOCRACY & DEMOCRACY

Minimum Credits: 3
Maximum Credits: 3
This course surveys important questions driving past and current research in the fields of regimes, regime change, and authoritarian governance. Students will be able to identify important research questions based on existing scholarship and execute sound research designs.

PIA 2829 - BEHAVIOR THEORY & EXPERIMENTS

Minimum Credits: 3
Maximum Credits: 3
This is a doctoral course that surveys theoretical models and corresponding experimental methods relevant to the study of political behavior. Topics will include voting, accountability, information processing, risk and social preferences, trust, cooperation, and leadership, drawing from rational choice, cognitive psychology, and behavioral economics. Class sessions will include seminar discussions, lectures, and workshops. Familiarity with formal models is helpful, but not required, we will review the basics as needed for the class.

PIA 2830 - POLITICAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also
discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

PIA 2831 - TIME SERIES ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This is a course in advanced methodology in political science. The class will focus on topics related to time series.

PIA 2832 - ADVANCED METHODOLOGY TEXT AS DATA

Minimum Credits: 3
Maximum Credits: 3
Advanced Methodology Text as Data

PIA 2833 - AMERICAN GOVERNMENT AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

PIA 2834 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytic frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytic tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state and to making policy.

PIA 2835 - ADVANCED METHODOLOGY: MAXIMUM LIKELIHOOD ESTIMATION

Minimum Credits: 3
Maximum Credits: 3
This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.
PIA 2836 - EXPERIMENTAL RESEARCH IN POLITICAL BEHAVIOR

Minimum Credits: 3  
Maximum Credits: 3  
This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and qualtrics. The second part of the course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2837 - MEASUREMENT IN SOCIAL SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
A key part of social scientific research is measurement, i.e. creating independent or dependent variables from raw data to capture substantive concepts. This course provides an applied overview of a variety of popular techniques in social science and machine learning to perform measurement on large and complex datasets. It will cover a variety of "unsupervised" methods (e.g. dimensionality reduction, ideal point estimation, and latent variable methods) that are used to create interpretable and low-dimensional summaries of complex data. It will also cover "supervised measurement", i.e. using a small collection of training data to create measures that can be extrapolated reliably. Specific focus will be paid to methods used in cutting-edge social science including multilevel regression with post-stratification (MRP) and machine learning techniques including random forests, sparse methods, and ensembles. A key goal of this course is to give students the skills to use these methods in their own research.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2840 - LATIN AMERICAN POLITICS

Minimum Credits: 3  
Maximum Credits: 3  
The course is a readings seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topic of "regime transition" in Latin America.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PIA 2841 - POLITICAL PSYCHOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models travel to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate
PIA 2842 - THEORY OF INTERNATIONAL RELATIONS

Minimum Credits: 3
Maximum Credits: 3
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2843 - POLITICAL RESEARCH & ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course aims to provide the student with (1) the ability to read, interpret, and criticize virtually any piece of political science research using quantitative methods and (2) the ability to design and carry out original research applying quantitative methods to relevant data.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PIA 2844 - EUROPEAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course will address many of the key areas related to study of modern Europe, including: institutions, political parties and party competition, populism, democratic backsliding, European integration, and immigration.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2845 - POLITICS, GROUPS AND IDENTITIES

Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of social identities and how they influence politics. First, we will discuss what is a group and the theoretical underpinnings of social identity. We will discuss how social identities work, whether they are socially constructed, if identity is optional, and how social identities intersect with one another. We will cover identities such as race, ethnicity, gender, class, religion, and national identity, and how these shape political behavior. While much of this course will focus on the American context, we will also discuss how these themes apply to comparative politics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2846 - SCIENTIFIC COMPUTATION FOR SOCIAL SCIENTISTS

Minimum Credits: 3
Maximum Credits: 3
This course covers scientific computation for social scientists.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PIA 2847 - POLITICAL ECONOMY AND GROWTH

Minimum Credits: 3  
Maximum Credits: 3

This graduate course is devoted to the study of international and comparative political economy in developing and emerging countries. These countries tend to face very different sets of constraints than their wealthier counterparts. The aim of this course is to analyze the determinants of welfare in poorer countries. Its main focus is to study the political economy of income and examine how domestic and international incentives shape crucial economic policies (e.g. trade, monetary, or education policies). In the last part of the semester, we broaden our horizon to examine other important components of welfare, such as environmental quality. This course is resolutely focused on the macro level and limited to developing countries.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PIA 2896 - MPPM POLICY SEMINAR

Minimum Credits: 3  
Maximum Credits: 3

This is the final required course for students in the executive degree program. Students prepare individual reports in policy analysis format on topics of their choice, approved by the instructor. Methods of policy analysis will be re viewed, and students will give an oral presentation as well as a final written paper.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3000 - INTERMEDIATE QUANTITATIVE METHODS

Minimum Credits: 3  
Maximum Credits: 3

This course introduces students to the fundamental techniques of regression analysis, focusing on the linear regression model. Emphasis is on applied econometrics, with the goals of the course being to enable students to interpret empirical results in social science work they read and to use statistical software to employ these techniques successfully in their own work.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS

Minimum Credits: 3  
Maximum Credits: 3

This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term 'mixed method.'
PIA 3005 - FIELD SEMINAR IN PUBLIC ADMINISTRATION

Minimum Credits: 3
Maximum Credits: 3
This is the doctoral field course in public administration. This course reviews major developments in the field of public administration, beginning with its historical origins and then focusing on its current research frontiers. The purpose of the course is to prepare students to teach and conduct research in the field of public administration. To that end, students will be expected to turn in weekly reviews of the readings (3 to 4 pages each week) and a research paper of sufficient quality for submission to an academic journal. The format of the course will involve some lecturing (for about an hour) followed by discussion (for about an hour). Students are expected to read thoroughly before the seminar and to come prepared to critically discuss the readings. This course is open to doctoral students in any field. Master's students with sufficient background, as judged by the instructor, may enroll with the permission of the instructor.

PIA 3012 - COMPARATIVE GOVERNANCE

Minimum Credits: 3
Maximum Credits: 3

PIA 3013 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.

PIA 3019 - FIELD SEMINAR IN INTERNATIONAL AFFAIRS

Minimum Credits: 3
Maximum Credits: 3
This course will introduce GSPIA Ph.D. students to the various approaches to the study of international affairs as well as a few broad areas of inquiry in the field. It covers 'great books' in the study of international affairs, concentrating each week on a classic or important new work. This approach will provide a stable platform from which international affairs students may delve deeper into the literature while apprising non-international affairs students of the general structure and large debates in the field. Given the vastness of the field, there are many topics that we will not be able to cover. However, familiarity with the arguments covered is essential for navigating and making sense of the sprawling literature. By the end of the semester, students will possess the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on the topics we do and do not cover.

PIA 3020 - ADVANCED SEMINAR: EVIDENCE AND INFERENCE IN POLITICAL SCIENCE AND PUBLIC POLICY

Minimum Credits: 3
Maximum Credits: 3
This seminar examines methodological disputes in the policy sciences. We will use a structural model of argument based in large part on the work of Stephen Toulmin, the English-born philosopher and applied philosopher of science who spent the latter part of his career working with well-known international relations and public policy specialists at the University of Southern California. Much of Toulmin's structural model of argument was built into the computer program we will use this term. The program is called rationale and it was developed by a Pitt philosophy of science Ph.D., Tim Van Gelder, who also gained significant expertise in computer science. He is at the Melbourne University in Australia. We will use rationale to study the methodology of the policy sciences. By using the structural model of argument to study methodology we will expand the range of research methods available to us as policy-oriented social scientists. Hopefully, this will protect us from the dogma that there is one set of 'approved' methods and from the despair that comes from believing that 'anything goes.' In addition, it will alert us to the dangers of winding up in one or another methodological cul-de-sac in which orthodoxy reigns.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3026 - PHD PROFESSIONAL DEVELOPMENT WORKSHOP

Minimum Credits: 1
Maximum Credits: 1
This one-credit course is meant for GSPIA PhD students in the semester they enter the program, or as soon as possible thereafter. The course will feature guest lectures from GSPIA faculty members on issues pertinent to professional development in a doctoral program. Topics will include, but are not limited to, journal submission, dissertation preparation, seeking and applying for grants, etc.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

PIA 3050 - PHD RESEARCH DESIGN, PROCESS, & PRESENTATION WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
This course will aim to provide students with structure to start pushing forward research, especially the proposal and initial work on the second-year paper. This course is to be taken once students have a clear idea of their research topic and have taken doctoral-level methodological courses, but are in the process of developing/refining specific questions. The course will help students frame their research question, conduct productive literature reviews aimed at highlighting the contributions of their research, and establish a research plan. In addition, with the aim of preparing students to present their work, a major focus of the course will be regular writing and presentations as students build up their research idea, with peer and instructor feedback.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3096 - COMPREHENSIVE EXAMINATION PREPARATION

Minimum Credits: 1
Maximum Credits: 9
This course is an independent reading course for Ph.D. students who are actively preparing for their comprehensive exams. The student will work under the supervision of a faculty advisor. The advisor and student agree on bibliographies in advance, and the student is encouraged to discuss the readings on a regular basis with his or her advisor and other division faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 3097 - INDEPENDENT STUDY PHD

Minimum Credits: 1  
Maximum Credits: 6  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad HSU Basis  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3098 - DOCTORAL TEACHING PRACTICUM

Minimum Credits: 1  
Maximum Credits: 3  
In an increasingly competitive academic job market, teaching experience can be a decisive factor in doctoral students' ability to secure an academic job after graduation. This practicum provides an opportunity for doctoral students to develop teaching skills by creating and delivering a course to members of the community. The practicum will begin with pedagogical and teaching policy training. Under the supervision of the course instructor, doctoral students will then be responsible for all elements of teaching a course in one of GSPIA's doctoral fields (creating a syllabus, delivering lectures, leading class discussions, creating and evaluating course work). After every class delivery, doctoral students will have a rare and invaluable opportunity to receive instant feedback on their performance. At the end of the practicum, students will put together a teaching portfolio which includes a statement of teaching philosophy, the teaching materials developed during the practicum, student feedback and a reflection upon the feedback received.  
Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad HSU Basis  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3099 - DISSERTATION PHD

Minimum Credits: 1  
Maximum Credits: 6  
Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad HSU Basis  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3121 - POLICY THEORY

Minimum Credits: 3  
Maximum Credits: 3  
This course is broadly concerned with political science research on policy processes, including democratic theory, multiple streams, and punctuated equilibrium, among others. It will focus on these major theories of the policy process, explore major theories of policy change and examine important empirical contributions to the policy field. The course will examine micro-foundations of policy dynamics through models of individual to organizational decision-making, and explore policy agendas, formation of public policies, and the factors influencing change to agendas and policies over time. It will emphasize process approaches of policy change rather than substantive issues, although substance will be addressed in much of the extant literature. This course focuses primarily on American politics but will include select works on comparative policy process perspectives.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PIA 3303 - ADVANCED SEMINAR: IN SECURITY AND INTELLIGENCE

Minimum Credits: 3  
Maximum Credits: 3  
This field seminar is designed to guide graduate students through the large and complex security studies literature. It is intended primarily to help prepare GSPIA Ph.D. students for the foreign and security policy comprehensive exam, but other students are welcome. Students in this seminar will master the foundations of the academic literature on questions like theories of international relations, the balance of power and its effects, causes of
war and peace, coercion, foreign policy decision making, nuclear and conventional warfighting, security institutions, terrorism, violent non-state actors, military and humanitarian intervention, the future of power, and intelligence studies. Due to the vast nature of the security and intelligence studies fields and the limited timeframe of a single semester, we will not be able to cover many of the topics and debates in the literature. By the end of the semester, however, students will have the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on security and intelligence topics we do not cover.

**Academic Career:** Graduate  
**Course Component:** Seminar

**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### Public Health

### PUBHLT 2002 - ESSAY-MMPH

- **Minimum Credits:** 1  
- **Maximum Credits:** 2  
The essay is designed to provide the student with an opportunity to integrate the major components of the public health learning experience.
**PUBHLT 2011 - ESSENTIALS OF PUBLIC HEALTH**

Minimum Credits: 3  
Maximum Credits: 3  
The course provides GSPH students enrolled in MS degree programs with an introduction and overview of the scope and history of public health, as well as core concepts in public health not covered in the core epidemiology and biostatistics courses.

**PUBHLT 2012 - MMPH PUBLIC HEALTH ESSAY**

Minimum Credits: 1  
Maximum Credits: 1  
This course will support MPH students who are writing the public health essay. No more than two credits of the essay classes may count toward the MMPH degree. This course counts as one credit toward the public health essay allowance.

**PUBHLT 2015 - PUBLIC HEALTH BIOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This core course will provide an introduction to the biological foundations of many systems that are important in public health. The major determinants of human disease will be considered from an integrated ecological perspective that brings together molecular and population-based approaches to the study of infectious disease (with particular focus on HIV/AIDS, polio, emerging infections, and disease outbreaks following natural disasters) and genetically-determined diseases including "simple" genetic diseases such as cystic fibrosis and "complex" diseases such as hypertension. The host response to infection will be considered, as will the disorders that result from defects in this system, including allergy and asthma. Current developments in genomic science will be covered, including the ethical, legal and social implications of the increased capability to detect and predict disease outcome in individuals and populations. On completion of this course, students will have an understanding of the biological bases of many conditions that are important to public health, and that they will encounter as public health students and practitioners.

**PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES**

Minimum Credits: 2  
Maximum Credits: 2  
Students will review the historical development of lesbian, gay, bisexual and transgender health focus area. The impact of stigma and disparity on the health of populations will be explored. An overview, by systems, of conditions of greater prevalence among lesbian, gay, bisexual and/or transgender populations will be presented and discussed. Students will develop a greater understanding of the health disparities among lesbian, gay, bisexual and transgender populations and develop critical thinking skills regarding the impact of marginalization on the health and wellbeing of subpopulations, using lesbian, gay, bisexual and transgender populations as a model. Course will include lectures and active participation in class discussions. This course will serve as the introductory overview course for the lesbian, gay, bisexual and transgender health and wellness certificate program.
PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES

Minimum Credits: 1
Maximum Credits: 15
Properly qualified students may undertake advance study under the guidance of a faculty member.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: MultidisMPH or CommBasedPrticipRes&Prac or EnvrhlthRiskAssmnt or EvalPHPromo&HlthEducProg or GblHlth or LGBTHlth&Wllnss or MinrtyHlth&HlthDisparits or PHGentcs or PH Preparednss & Disaster Resp or Peace Corps or Peace Corps Master's Intl

PUBHLT 2020 - ADVANCED TOPICS IN LESBIAN, GAY, BISEXUAL, AND TRANSGENDER RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course will provide a critical overview of current cutting edge research topics in the field of lesbian, gay, bisexual and transgender (LGBT) health. Students will be expected to review the existing literature on these topics, summarize the strengths and weaknesses of individual papers, and then design a study or set of studies that would be expected to add to the evidence base on a given health topic.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PUBHLT 2018; PLAN: Epidemiology (PHD) and Graduate Sch of Public Health (CERT-4)

PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to socialize our students to the broader profession of public health through engaging them in substantive programs on a wide range of topics that reflect the breadth of public health. This course will enable them to interact with researchers and practitioners from other settings and universities around the world. The course will help to build their capacity to work in interdisciplinary teams to address challenging and complex public health problems. This course requires that all GSPH students (with the exceptions noted below) participate in GSPH sponsored lectures, symposiums, and other events, outside of the classroom, during the first fall and spring terms for which they are enrolled and in residence in Pittsburgh. Two terms are required for graduation. Joint degree students, certificate only students and non-degree students are exempt from this requirement.

Academic Career: Graduate
Course Component: Colloquium
Grade Component: Grad SN Basis

PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

Minimum Credits: 2
Maximum Credits: 2
This course is designed for students who plan to work in global health and is required for students enrolled in the GSPH global health certificate and peace corps master's international tracks. The course focuses on public health in low- and middle-income countries and also covers issues related to globalization. The course will provide students with the theoretical knowledge and practical skills needed to 1) identify, collect and interpret health and economic data, 2) produce a report on public health priorities at the country level, and 3) propose a course of action (including activities, partners, and measureable indicators) for a priority health issue.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN:Global Health (AC or CR4); or SUBPLAN: Peace Corps (PCORPS-TR)
PUBHLT 2026 - GLOBAL HEALTH PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The practicum provides an opportunity for certificate students to integrate and apply knowledge in global health through a structured, supervised field experience. Learning objectives, assignments, and site are based on the learning needs and career goals of the student and determined in consultation with the certificate director.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

PUBHLT 2027 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

Minimum Credits: 2
Maximum Credits: 2
This course is a capstone experience for students in the global health certificate. It is designed to give students the opportunity to apply what they have learned in their training to the challenge of real-world problem-solving in collaboration with individuals and organizations in the developing world. Students will form two teams, and each team will collaborate with experts from a developing country on a significant health issue in that country. The final product will be a policy paper analyzing the problem and proposing relevant, timely and actionable interventions. This course is different from typical courses that follow a prescribed syllabus. It is a hands-on experience, and for the most part the activities and content of each week will be determined as the course goes along, as students, working in their groups, pursue the background research, consultation, and brainstorming necessary to produce their policy papers. Accordingly there is a great emphasis on independent work (in teams), self-motivation, and active learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PUBHLT 2025; PLAN: Global Health (CR4)

PUBHLT 2028 - PEACE CORPS MASTERS INTERNATIONAL INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0
This course is restricted to students in the school of public health peace corps masters international track and is to be used by students during the peace corps field experience portion of the PCMI program.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: SUBPLAN: Peace Corps (PCORPS-TR or PC-TR) or Peace Corps Master's Intl (PCMI-TR)

PUBHLT 2029 - MMPH PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
This course is designed to build and expand upon the experience of the individual student in the MMPH program. The practicum will blend the students existing clinical and/or professional work with additional practical experience with a major public health focus.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to topics in research ethics and the responsible conduct of research particularly pertinent to basic and non-clinical, population-based research employing a variety of methods. Students will learn key concepts and methods of ethical reasoning and requirements of human subjects' protection and nonhuman animal research, and will analyze historical and contemporary examples of research
misconduct, as well as ethical concerns arising in their own work. Using lecture and small group discussion of assigned readings and participants' research, the course will develop students' skills requisite to design and conduct ethical research, avoid research misconduct, and ethically negotiate the tasks and milestones of academic education and careers (e.g. issues of mentorship and publication). Students will be evaluated (by letter grade) on the basis of the quality of their discussion contributions and quiz/exam responses.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PUBHLT 2031 - TECHNIQUES FOR PROFESSIONAL WRITING**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course offers practical experience in a variety of writing styles encountered by professionals. The focus is on communication with general professional and lay audiences rather than on scientific or academic writing. You will learn to recognize communication issues and challenges, understand how they may be addressed in writing, and improve your ability to write effectively within your profession. This course is intended for students who are native and/or confident English writers.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PUBHLT 2032 - HEALTHCARE IN SUB-SAHARAN AFRICA**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

This course provides an in-depth look at health services and healthcare systems in Sub-Saharan Africa. Students will explore the WHO health systems building blocks consisting of leadership/governance, health care financing, health workforce, medical products, information technology and service delivery. Students will also examine health systems databases to assess performance and to better understand the challenges to attain high quality care at low cost, enhanced patient experience and improved outcomes. A variety of teaching modalities will be employed throughout the course including lecture, news headlines, case studies, class discussion, audio-visuals and student presentations. Guest speakers will be invited to share experience and expertise on various topics. A research paper with in-depth exploration of one of the six building blocks in a specific sub-Saharan country is required in addition to a global health case competition group presentation. Course enrollment is capped at 20. This course is a graduate-level course that is open to undergraduates.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PUBHLT 2033 - FOUNDATIONS IN PUBLIC HEALTH**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This one-credit course is required during the first term for incoming MPH students and is aimed at introducing students to core foundational concepts of public health and providing them with an overview of notable PITT Public Health and Pittsburgh based successes. The course was designed so that students can learn on their own and at their own pace. Course content is divided into seven on-line modules containing brief video lectures and case example segments and organized in a recommended (though not required) sequencing. Students will be allowed seven weeks to progress through the content and assessments. The course will commence with a mandatory meeting at the beginning of the term. A resource list of relevant PITT Public Health courses will be included in each module in order to encourage additional exploration of the topics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: All Public Health MPH plans

**PUBHLT 2034 - PUBLIC HEALTH COMMUNICATIONS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

This course provides hands-on training in the principles and practice of effective communication. The emphasis is on the types of communication
used by public health professionals. Students will briefly cover fundamental principles of communication theory, learn to critically analyze examples of communication, and then have the opportunity to practice applying those principles to a wide variety of different types of communication, including health promotion, routine business communication, and scientific communication. Multiple media types will be discussed, including print, web, and video.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: All Public Health MPH plans

PUBHLT 2035 - APPLICATIONS IN PUBLIC HEALTH

Minimum Credits: 2
Maximum Credits: 2
This is the final course in the public health core curriculum. Students will apply a problem solving methodology to analyze current public health issues. Working in interdisciplinary groups in the classroom, students will develop and assess interventions to address specific problems.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041) and PUBHLT 2015 and PUBHLT 2022 and BCHS 2509 and EOH 2013 and HPM 2001 and PUBHLT 2033 and PUBHLT 2034; PROG: School of Public Health

PUBHLT 2036 - FRED: AGENT BASED MODELING FOR SOCIAL DETERMINANTS OF HEALTH

Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to agent-based models (ABMs) as a technique for understanding how the dynamics of social, biological, and other complex systems arise from the characteristics and behaviors of the agents making up these systems. Students will learn using the "FRED" (Framework for Reconstructing Epidemiological Dynamics) software platform developed at Pitt Public Health. Examples will emphasize the applications of FRED in public health, including infectious disease transmission and control measures; health behaviors such as vaccine refusal and drug and tobacco use. Emphasis will be on modeling the effects of the Social Determinants of Health. While this course is intended primarily for students in public health, graduate students in other disciplines, including social sciences, engineering or computer science, are welcome to enroll.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PUBHLT 2037 - DEVELOPING A GLOBAL HEALTH CASE STUDY FOR COMPETITION

Minimum Credits: 1
Maximum Credits: 1
In this course, students will complete secondary research to select and develop a Global Health case study about a global public health problem in a specific country context. The course will run weekly during the first half of the semester (7 sessions). Tasks and assignments will include, identifying an appropriate case and completing a robust literature review to develop a background/introduction to the health issue and the country profile, which will include relevant historical, demographic, political, economic and culture background. A multidisciplinary team of students will develop a problem statement, a call for strategies addressing the problem, and a judging rubric for proposed solutions. The final product will include a glossary of terms and a bibliography. By developing cases, students will gain valuable Global Health skills, background knowledge and perspective. Cases developed in this course will be suitable for use in future campus-wide learning activities for the Pitt Global Health Case Competition.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PUBHLT 2173 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

Minimum Credits: 3
Maximum Credits: 3
This course is a capstone experience for students in the Global Health Certificate. Students will apply what they have learned in prior Global Health
training by undertaking real-world problem solving in collaboration with individuals and organizations working in Global Health. Students will work in teams to develop interventions, systems and solutions for resource-poor settings. The course is primarily project-based, where students' projects will focus on a unique and specific challenge identified by a partner in a low-resource setting. This course will run concurrently with BIOENG 2173 Medical Design for Low Resource Environments, and students from both courses will work together on teams to complete assignments and to develop final projects.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PUBHLT 2500 - INTEGRATIVE SEMINAR IN HEALTH EQUITY

**Minimum Credits:** 1  
**Maximum Credits:** 1  

The goal of this course is to use knowledge about health disparities to achieve health equity. The seminar builds upon knowledge and experience gained from previous Health Equity Certificate core and elective courses. The seminar will provide students with an opportunity to assess health equity and disparities in depth and establish strategies to resolve these inequities/disparities. Additionally, we will discuss sources of knowledge and contemporary approaches to improve the health of populations and well-being employing health equity research applications. The student will tackle the disparity(ies)/inequality(ies) through data retrieval, literature review, and contact with community, not for profit, private or government agencies that address the disparity/disparities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BCHS 2554, BCHS 2524, or BCHS 2526

### PUBHLT 2501 - HEALTH EQUITY RESEARCH: METHODS AND INTERVENTIONS

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### Public Works & Engr Admin

#### PWEA 2996 - SPEC INVSTGTN FOR MPW STUDENTS

**Minimum Credits:** 1  
**Maximum Credits:** 6  

A special project course in which students may broaden their knowledge by studying approved topics or problems in public works engineering or administration under the guidance of a faculty member.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

#### PWEA 2997 - RESEARCH, M.P.W.
Quantitative Methods - Operations Mgt

BQOM 2060 - INDEPENDENT STUDY QUANTITATIVE METHODS

Minimum Credits: 1
Maximum Credits: 6
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2061 - INDEPENDENT STUDY OPERATIONS MGMT

Minimum Credits: 1
Maximum Credits: 6

Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2139 - LEAN SIX SIGMA THEORY & PRACTICE

Minimum Credits: 3
Maximum Credits: 3
Lean Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Lean Six Sigma utilizes a five-phase problem solving methodology known by the acronym DMAIC, around which the course is organized. To integrate theory and practice, students will form teams and work under the mentorship of a Lean Six Sigma Black Belt on a client field project. The flow of the lecture topics will mirror the DMAIC methodology; providing just-in-time knowledge. Lectures will focus first on providing a high-level overview which frames the topic followed by deep dives into a small number of the most critical subject areas and tools within the higher-level topic. Where appropriate, class sessions will also include hands-on labs that allow the students to immediately apply the learning. Student with a final letter grade of "B" or better will be awarded a Lean Six Sigma Green Belt Certificate.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BQOM 2401

BQOM 2140 - SIX SIGMA THEORY & PRACTICE IN HEALTHCARE
Minimum Credits: 1.5
Maximum Credits: 1.5
In managing Healthcare today, many organizations have turned to Six Sigma for a disciplined, data-driven approach to improving the safety and efficacy of processes while simultaneously reducing costs. Faculty will guide students through the theory of Six Sigma, and its five-phase process improvement methodology known by the acronym DMAIC: 1. Define the problems (opportunities), the goals, and the deliverables to the customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate the data to make sure it is credible and set the baseline. 3. Analyze the data to narrow the causal factors to the vital few. Determine the root cause(s) of defects. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. This experience-based learning course incorporates in-class labs, based on a fictitious company named Precision Delivery Incorporated (PDI), that allow teams of students to immediately put the theory of Six Sigma into practice. Further, students will develop critical thinking skills as they analyze and evaluate real-world Healthcare Six Sigma Projects.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

BQOM 2141 - SIX SIGMA THEORY & PRACTICE FUNDAMENTALS

Minimum Credits: 1.5
Maximum Credits: 1.5
In managing business today, many organizations have turned to Six Sigma for a disciplined, data-driven approach to improving the safety and efficacy of processes while simultaneously reducing costs. Faculty will guide students through the theory of Six Sigma, and its five-phase process improvement methodology known by the acronym DMAIC: 1. Define the problems (opportunities), the goals, and the deliverables to the customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate the data to make sure it is credible and set the baseline. 3. Analyze the data to narrow the causal factors to the vital few. Determine the root cause(s) of defects. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. BQOM 2401 - STATISTICAL ANALYSIS: UNCERT

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. The emphasis is on the use of real data for modeling and solving problems in the areas of marketing, finance, human resources and operations management. Topics covered include: data analysis and modeling, estimation, confidence intervals, hypothesis testing, simple and multiple regression, analysis and design of experiments and statistical quality control.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2421 - DECISION TECH IN MFG & OPS MGT

Minimum Credits: 1.5
Maximum Credits: 1.5
This course provides a foundation in the use of decision technologies for solving complex management problems in a variety of functional areas.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES
Minimum Credits: 3  
Maximum Credits: 3  
This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major components of SAP ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP ERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the SAP certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems SAP business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: Katz Grad School of Business students only.

BQOM 2504 - FRUGAL ENGINEERING & VALUE ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the principles of frugal design of products and processes. Foundational skills in Value Engineering/Analysis including tools such as Functional Analysis will be detailed. Additionally, topics such as Customer Needs Identification, Quality Engineering, Operational Excellence and Lean Process Engineering will be integrated into developing frugal product and process designs. With this course, students will have taken the first step towards certification as Value Methodology Associates (VMA) offered by the SAVE International.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS

Minimum Credits: 2  
Maximum Credits: 2  
Increasingly, due to shortening product life cycles and capital-intensive capacity decisions, companies are being forced to place greater emphasis on managing constrained, but perishable inventory and capacity. In this course, we study quantity and pricing strategies to improve profitability. The main goals of this course are to provide the insights and tools that will enable students to: (1) be able to identify pricing and revenue opportunities; (2) understand the critical differences among different types of opportunity and the approaches needed to address them; (3) understand key concepts including the impact of constrained capacity, opportunity costs, customer response, demand uncertainty, and market segmentation; and (4) be able to formulate and solve pricing and revenue optimization decisions as constrained optimization problems at the level necessary to estimate potential benefits. The focus of the course will be on imparting a broad understanding and grasp of basic techniques rather than the technical nuances of a particular algorithm.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or BQOM 2411); PROG: Joseph M. Katz Grad Sch Bus

BQOM 2512 - ADVANCED DECISION TECHNOLOGY

Minimum Credits: 2  
Maximum Credits: 2  
While contemporary decision technologies are increasingly important in today's competitive environment for dealing with complex problems, they can also yield wrong or misleading solutions. The course will consider current applications of these technologies in these areas and students will analyze a variety of cases in these areas using commercial software packages. Emphasis in the course will be given to the potential and limitations in using decision technologies and to alternative approaches to dealing with complex problems.  
Academic Career: Graduate  
Course Component: Lecture
BQOM 2521 - DECISION MAKING COMPLEX ENVIRONMENT

Minimum Credits: 1.5
Maximum Credits: 1.5
Examines in detail the thought processes of the decision maker when faced with social, personal, business or contemporary political problems. Through the analytic hierarchy process, decision makers use a framework to organize thoughts in a consistent way and to compare elements and criteria which weigh most heavily in arriving at the best alternative among given options.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or 2411); PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BQOM 2523 - PROCESS ENGINEERING

Minimum Credits: 2
Maximum Credits: 2
This course studies the design and engineering of the business processes - the way businesses organize "work" in service as well as manufacturing operations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

BQOM 2524 - PRODUCTION MANAGEMENT & PROCESS IMPROVEMENT

Minimum Credits: 2
Maximum Credits: 2
This course is concerned with the continuous improvement principles involved in the production of goods and services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2523; PROG: Katz Graduate School of Business

BQOM 2531 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
A continuation of distribution networks (BQOM 2530).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2523; PROG: Katz Graduate School of Business

BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course will consider multi-facility supply and demand network management from all three perspectives: operational, tactical and strategic. We will emphasize the creation and maintenance of value in the supply network, an activity critical to the survival of all organizations. Value creation can be accomplished by increasing revenue (e.g., by improving delivery and logistics flexibility, and enhancing customer experience and responsiveness) and/or by decreasing cost (e.g., by eliminating unnecessary activities, and efficiently managing others). Topics covered will include supply chain strategy, integration, and coordination; supply chain finance; network design and logistics optimization; inter-organizational partnerships for effective inventory control; demand-driven sales and operations planning; quick response through product and supply chain design
for improved customer experience; strategic outsourcing and contracting; supply chain risk management; new technologies for supply chains 4.0; and sustainability. Using real-life case studies and software packages, we will examine these intricacies of supply and demand network management, learning about the underlying tools, methodologies and decision support systems.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

---

**BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT**

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5

The course provides a special emphasis on the development and management of strategic sourcing relationships and promotes an understanding of the strategic role of supply management in effective supply/demand/value chain operations. Purchasing and supply management play an essential role in the ability of the firm to operate efficiently and be competitive in the contemporary global business environment. Included in these processes are activities involved in identifying potential suppliers, creating relationships with selected suppliers, obtaining the needed materials in the most efficient quantities at the highest quality levels, and developing strategies designed to ensure an uninterrupted flow of goods and materials. The objective of this course is to make students aware of the demands placed upon purchasing professionals, and to understand the impact of purchasing on the competitive success and profitability of the firm. They must also have an understanding of legal and ethical considerations which affect purchasing decision-making.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

---

**BQOM 2535 - HEALTHCARE OPERATIONS AND SUPPLY CHAIN MANAGEMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course allows students to engage in experiential learning through a project course that specializes in a topic that may touch one or several of these areas: supply chain management, value chain management, supplier diversity and global sourcing.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**BQOM 2537 - FORECASTING**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

This course will cover traditional forecasting methodologies along with an overview of the state-of-the-art of forecasting with methodologies ranging from judgmental to statistical knowledge sources.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BQOM 2401; PROG: Katz Graduate School of Business

---

**BQOM 2544 - PROCESS MANAGEMENT AND CONTINUOUS IMPROVEMENT**

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5

This course is intended to study the interactions that govern the efficiency of the process, process of converting raw material in the most efficient way- products and services - resulting in a "satisfied" customer. The course first will focus on the study of process fundamentals. We will then illustrate complementary and contradictory relationships among the non-financial measures of process performance, thereby suggesting ground rules for value based process architecture. We will examine some of these interactions, and discuss general principles and concepts managers need to know to understand the impact of their decisions on the organization as a whole. We will present 'what if' scenarios to facilitate the continuous improvement in the business enterprise.
BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS

Minimum Credits: 1.5
Maximum Credits: 1.5
This course gives students a perspective on what is project management and how different project management techniques are used in practice. Time/Quality/Cost trade-offs are considered in addition to discussing how to manage renewable resources and level resource. Most of the course materials are presented in the context of practical business situations from a variety of fields such as corporate finance, investment management, manufacturing/production, distribution/logistics, purchasing, and human resources. Students master commercial software such as Microsoft Project and Excel add-ins, and through applications learn how to facilitate project management using these packages.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2549 - STRATEGIC COST ANALYSIS

Minimum Credits: 2
Maximum Credits: 2
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2411 or 2421; PROG: Joseph M. Katz Grad Sch Bus

BQOM 2557 - MULTIVARIATE DATA ANALYSIS 1

Minimum Credits: 1.5
Maximum Credits: 1.5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2558 - MULTIVARIATE DATA ANALYSIS 2

Minimum Credits: 1.5
Maximum Credits: 1.5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BQOM 2559 - APPLIED SIMULATION AND OPTIMIZATION

Minimum Credits: 1.5
Maximum Credits: 1.5
The purpose of this course is to enhance the problem-solving skills of Pitt Business students to the level necessary for them to deal with complex decision problems using optimization and simulation. It is an introduction to predictive analytics which can be roughly divided into two approaches: pattern recognition and simulation. In this course we focus on simulation, where you start by using human knowledge of cause and effect to create a model of the system in which the problem operates. You then connect the data you have available with that model to obtain a future projection. Simulation, integrates signals missing in the data and has relatively low data acquisition and processing costs while giving highly reliable predictions.
BQOM 2578 - DATA MINING

Minimum Credits: 3
Maximum Credits: 3
Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides you with experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminant analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. The course is methods oriented, as opposed to being methodology oriented, so you will learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

BQOM 2580 - BUSINESS ANALYTICS: STRATEGIC ESSENTIALS

Minimum Credits: 1.5
Maximum Credits: 1.5
Business Analytics: Strategic Essentials explores the growing use of Advanced Analytics ("AA"; predictive/prescriptive analytics) as a critical element for business strategy development and managerial priorities. Students will develop a fundamental understanding of how AA is being used to drive strategic change, market leadership, and functional priorities. Students will: Understand why AA is viewed as a strategic imperative for organizations, Establish a framework to apply AA to various levels of strategic and functional priorities, Develop an overall fluency in matters that directly impact the success of AA implementations The course uses a mixture of lectures, readings, case discussions, and written case analyses. The focus is helping students build an overall framework that will assist in achieving target returns on investment related to AA-driven initiatives that students will lead in their careers.

BQOM 2585 - RESOLVING CONFLICTS WITH THE ANALYTIC HIERARCHY PROCESS

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will study the evolution of conflicts, theories used in the study of conflicts, and our approach to conflict resolution based on the Analytic Hierarchy Process (AHP). The main objective of the course is to learn how to use relative measurement to study conflicts, develop hierarchies of
benefits, costs, perceived benefits and perceived costs and compute gain-loss ratios for pairs of tradeoffs used to construct a fair and equitable agreement. The course consists of seven sessions. The first six sessions provide the background for the last session in which the Conflict Resolution (CR) process based on the AHP is applied. This course will be coordinated with a Global Issue Workshop (GIW) course to be designed around the conflict studied in this class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**BQOM 2585 - RESOLVING CONFLICTS WITH THE ANALYTIC HIERARCHY PROCESS**

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will study the evolution of conflicts, theories used in the study of conflicts, and our approach to conflict resolution based on the Analytic Hierarchy Process (AHP). The main objective of the course is to learn how to use relative measurement to study conflicts, develop hierarchies of benefits, costs, perceived benefits and perceived costs and compute gain-loss ratios for pairs of tradeoffs used to construct a fair and equitable agreement. The course consists of seven sessions. The first six sessions provide the background for the last session in which the Conflict Resolution (CR) process based on the AHP is applied. This course will be coordinated with a Global Issue Workshop (GIW) course to be designed around the conflict studied in this class.

Academic Career: Graduate
Course Component: Lecture

**BQOM 2700 - SUPPLY/VALUE CHAIN MANAGEMENT PROJECT**

Minimum Credits: 2
Maximum Credits: 2
This project course is an opportunity for students to apply their management skills and develop their understanding of the challenges of supply/value chain management. In this course a select group of students will work closely with a faculty member to create a specific deliverable that meets the needs of a client organization. This course allows students to engage in experiential learning through a project course that specializes in a topic that may touch one or several of these areas: supply chain management, value chain management, supplier diversity and global sourcing.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

**BQOM 2801 - STATSTCL ANAL: UNCERT**

Minimum Credits: 3
Maximum Credits: 3
Provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. The emphasis is on the use of real data for modeling and solving problems in the areas of marketing, finance, human resources and operations management. Topics covered include data analysis and modeling, simple and multiple regression (estimation, testing and prediction), analysis and design of experiments, nonparametric statistics and statistical quality control.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BQOM 2811 - DCSN TECHNLGY IN MFG & OPERATNS**

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundation in the use of decision technologies for solving complex management problems in a variety of functional areas. Emphasis is given to the utilization of optimization and simulation. Particular attention is devoted to problems in manufacturing and operations management.

Academic Career: Graduate
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 2821 - HEALTH INSURANCE AND RISK MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides a broad overview of the organization, financing, and delivery of health care via health insurance. The course is organized as follows. In the first module, we will examine the history of the development of health insurance and health care delivery systems in the 20th century; including health insurance markets and the public and private providers of health insurance in the United States. In the second module, we will examine reimbursement for medical care, including incentive structures and risk adjustment. In the third module, we will assess efforts currently underway in the U.S. with respect to improving access to and quality of health care while reducing costs. In the fourth module, the class will focus on major challenges facing the U.S. health care system with case studies of high healthcare prices and social determinants of health as key challenges. This course focuses mainly on the U.S. system, with health systems in other comparable countries briefly discussed for comparison. Students are evaluated based on discussion form participation, 2 individual problem sets, one group problem set, and a take-home final exam/assignment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: EMBA Healthcare- Business Administration

**BQOM 2904 - PROBLEM SOLVING AND CREATIVITY**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
The focus of this course is on creativity and associated design thinking techniques. We will examine the role of creativity in the innovation process, and explore the benefits of knowledge diversity. We will explore how to draw insight from different knowledge domains to identify important questions whose answers can be a source of value, and to develop novel approaches to problem solving. In addition to practical exercises to understand the tools and techniques that foster value-added creativity and innovation, we will discuss recent research from a number of academic domains. Among others, we will explore the role of leadership and team work in the creative endeavor, as well as the fundamental elements of design thinking. Since the course includes several experiential components, it is not feasible to take this course without committing to attending all classes.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 3010 - INDEP STUDY OPERATIONS RESEARCH**

Minimum Credits: 1  
Maximum Credits: 9  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

**BQOM 3020 - SIMULATION**

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to give an up-to-date treatment of the important aspects of simulation methodology. The topics covered include: modeling and generating stochastic inputs, output data analysis, variance reduction techniques, experimental design and model validation. Application of the simulation techniques in manufacturing, finance, marketing and other functional areas will be explored. An overview of the simulation languages including arena will be given.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.
BQOM 3023 - DATA MINING SEMINAR

Minimum Credits: 3  
Maximum Credits: 3  
This course is a primarily methodological and secondarily computational treatment of data mining topics of recent, current, and developing interest in the management science literature. Three subsets of the literature will be covered in depth: (1) data mining papers that have appeared in the KGSB a-journal list; (2) ensemble methods; and (3) optimization-based approaches to data mining. Grading in the course will be based on presentations and a term project. Familiarity with data mining topics and tools at least to the level of BQOM 2578 or equivalent or permission.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

BQOM 3099 - READINGS IN OPERATIONS RESEARCH

Minimum Credits: 1  
Maximum Credits: 9  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: Katz Grad School of Business students only.

Radiology

RAD 5330 - IMAGING CLERKSHIP (3 WEEKS)

Minimum Credits: 0  
Maximum Credits: 0  
Three-week course designed to increase experience in radiology and imaging. Will be accomplished by lectures, seminars and student case presentations. All lectures are at a senior medical student level emphasizing clinical applicability. By course end students are expected to understand basic uses and limitations of anatomic and physiologic imaging modalities in diag. rad., nuc. med., and MRI. Students will be expected to acquire basic understanding of common radiographic studies and understand indications and limitations of different imaging methods used in evaluating common clinical problems.

Academic Career: Medical School  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 3

RAD 5384 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0  
Maximum Credits: 0  
Students undertaking this elective may join ongoing basic research projects in the laboratory or, with permission, initiate their own projects. Students will be expected to participate in all aspects of their segment of the ongoing research; experimental design, data collection, data analysis and reporting.

Academic Career: Medical School  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U  
Course Attributes: School of Medicine Year 3

RAD 5421 - DIAGNOSTIC RADIOLOGY

Minimum Credits: 0  
Maximum Credits: 0  
A four-week elective in diagnostic radiology offered to those who wish to gain additional exposure to the field. Students may choose a broad based curriculum which will expose the individual to all areas of radiology or may choose to do a focused radiology elective in angio/interventional
radiology, ultrasound, or neuroradiology.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**RAD 5422 - ADVANCED RADIOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week intensive elective course in advanced diagnostic radiology for fourth year medical students. The course will include didactic lectures and demonstrations that will be presented by members of the radiology faculty. Students will also gain clinical exposure to radiology in some of the following assignments: thoracic imaging/musculoskeletal imaging/pediatric radiology/abdominal imaging/nuclear medicine/women's imaging/neuroradiology. Students will also have access to the radiology learning lab, teaching files, and other educational materials for individual study. Participants are required to present a comprehensive clinical case with an emphasis on the radiology features pertinent to their case presentation. The case should be of a patient the student encountered in prior clinical rotations. A written examination will be required at the end of the elective.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**RAD 5425 - VASCULAR/INTERVENTION RADIOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week clinical elective. Service covers all aspects of angiographic and interventional procedures below the neck. Diagnostic procedures and common interventional procedures are performed. The medical student will scrub into interventional cases with radiology staff, fellows and residents, attend daily case review sessions, and perform clinical rounds on patients being followed by the interventional radiology service.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**RAD 5430 - NUCLEAR MEDICINE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Nuclear medicine involves the formulation and use of radioactive substances used as tracers of metabolic processes. They may be used in vitro or in vivo in patients for therapy or for diagnosis where radioactivity is quantified and displayed by various instruments. Students are brought into the service for hands-on demos of the various procedures exemplified by clinical material. The principle routine clinical studies include functional imaging of brain, heart, bones, kidneys, liver, thyroid, adrenal and various neoplasms by means of monoclonal antibodies.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**RAD 5435 - CLINICAL RADIOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week elective designed to increase understanding of diagnostic radiology. Students will be assigned to one-week rotations in four different areas: thoracic imaging, musculoskeletal imaging, pediatric radiology, abdominal imaging, nuclear medicine, women's imaging, and neuroradiology.

**Academic Career:** Medical School  
**Course Component:** Clinical
RAD 5440 - INDEPENDENT STUDY IN RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0
Elective (4 weeks) is available to senior students with a particular interest in a subspecialty area of radiology. Student will design an intensive, independent study elective with a staff radiologist in the interest area. A written proposal is required to be submitted to the director of undergraduate medical education in radiology outlining the goals and objectives of the elective which has been approved by the faculty advisor. The prospectus is required a minimum of one month in advance of beginning project for credit.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5620 - CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
This four week elective offers the student instruction and experience in clinical radiation oncology and an intro to radiotherapy physics at the joint radiation oncology center. Facilities will be at the university medical center, Magee Women's Hospital and Shadyside Hospital. The student will spend time with faculty members in consult, exam, treatment and follow-up of the particular subgroups of malignant disease managed by the individual physician. Student will attend department conference, treatment planning sessions, operative radioactive isotope insertion, etc.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5630 - INTRODUCTION TO CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
This four-week clinical elective offers the student instruction and experience in clinical radiation oncology and an introduction to radiobiology and radiation therapy physics in the Department of Radiation Oncology. The student will spend time with faculty members in consultation, examination, treatment, management and follow-up of the particular subgroups of malignant disease managed by the individual physician. The student will attend departmental conferences, treatment planning sessions, radiosurgery planning and treatment, operative radioactive isotope insertions, etc. The student will be introduced to the physics aspects of radiation therapy. The elective is planned so that each student will have the opportunity to obtain an overall view of the field of radiation oncology.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5651 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5826 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
Students undertaking this four week elective may join ongoing basic research projects in the lab or with permission, initiate their own related projects. This lab is involved in evaluating the role of biologic response modifiers on hematopoietic recovery after treatment of tumors in mice. In addition, we are inserting genes into hematopoietic stem cells that contain them. Objectives are experimental design, cell collection and counting, sizing and culture and DNA isolation. Involvement expected in ongoing research, experimental design, data collection, analysis and report.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5827 - EXPERIMENTAL DIAGNOSTIC RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0
This 4 week elective is designed for the student interested in a career in radiology and who wishes to pursue a research project. The student needs to find a radiology faculty member who is willing to collaborate in a research project. These research projects can vary according to the combined interest of the student and the faculty preceptor. The student and faculty preceptor need to submit a written research proposal before this elective can be approved.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5840 - RADIATION ONCOLOGY RESEARCH

Minimum Credits: 0
Maximum Credits: 0
This elective provides research project opportunities in radiation oncology to interested and motivated students. Project areas include clinical studies, prospective or retrospective clinical studies, creating a database, evaluating outcomes of solid tumors. The objective is to teach the basic approach to research in the specialty.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

RAD 5841 - RESEARCH IN RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4
RAD 5842 - VIRTUAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
Students will spend time learning more about the field, its technical basis and sub-disciplines through prerecorded lectures. The student will then participate in the virtual clinical work-up of patients in preparation for radiation therapy as well as in the treatment and follow up of those already treated patients. Students will rotate with individual attendings and residents through their clinic virtually seeing and assessing patients. Students will spend time learning to contour on several cases that will be reviewed and discussed with radiation oncology residents and attendings. A small research project or discussion on a subset of radiation oncology will be completed during the fourth week with the course closing via a mini-presentation and final exam. All elements can be conducted remotely through online platform. For students who have already rotated in person or virtual, this course can provide additional depth and can be customized.
Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U

RAD 5899 - INDEPENDENT STUDY IN RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

RAD 5900 - EXTRAMURAL RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in radiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5901 - EXTRAMURAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in radiation oncology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Rehabilitation Science

REHSCI 1000 - PRINCIPLES OF RESEARCH METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: (STAT 0200 or 1000 or 1020 or 1131) or (PSY 0201 or 0270); MIN GRADE: ‘C-’ for listed courses; PLAN: Rehabilitation Science (BS, BSH, BPH)

**REHSCI 1200 - HUMAN ANATOMY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy with particular reference to the musculoskeletal, nervous, cardiovascular and respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: [(BIOSC 0150 or 0170 or 0716) or (BIOL 0110) or BIOENG 1070] and [(BIOSC 0050 or 0057 or 0058 or 0070 or 0715) or (BIOENG 1070) or (BIOL 0101 or 0111)] or BIOSC 0190; MIN GRADE: ‘C-’; PLAN: REHSCI or AT (BS, BSH, BPH); CREQ: REHSCI 1201

**REHSCI 1201 - HUMAN ANATOMY LAB**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course uses lecture and laboratory experiences to teach the anatomical structures of the human body. Content focuses on gross human anatomy with particular reference to the musculoskeletal, nervous, cardiovascular and respiratory systems. Emphasis has been laid on application of knowledge of human anatomy in diagnostics of commonly encountered diseases/injuries. Students are encouraged to use their knowledge of anatomical structures learned in class to create such clinical scenarios as a part of learning.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Lab  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: REHSCI 1200

**REHSCI 1205 - HUMAN PHYSIOLOGY**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This basic human physiology course covers general physiological processes, muscles, blood and lymph, body fluids, renal function, respiration, metabolism, and the nervous, gastrointestinal, cardiovascular and endocrine systems. Problem-based formats will be introduced with particular reference to those problems seen in clinical settings.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: [(BIOSC 0150 or 0170 or 0715) or (BIOL 0110) or (BIOENG 1070)] and [(BIOSC 0050 or 0057 or 0058 or 0070)] or (BIOENG 1070) or (BIOL 0101 or 0111)]; MIN GRADE: ‘C-’ for listed courses. PLAN: REHSCI (BS, BPH) or AT (BS, BS-H, BPH)

**REHSCI 1215 - EXERCISE PHYSIOLOGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculoskeletal, in individuals with disabilities.  
**Academic Career:** Undergraduate
REHSCI 1216 - EXERCISE PHYSIOLOGY LAB

Minimum Credits: 1  
Maximum Credits: 1  
Required lab component for REHSCI 1215 Exercise Physiology: This course focuses on the effects of exercise in preventing and treating disability, in optimizing the rehabilitation process, and in maintaining the health of those with disabilities. The course emphasizes the effects of exercise on the various body systems, including the cardiovascular, neuromuscular, and musculoskeletal, in individuals with disabilities.  
Academic Career: Undergraduate

REHSCI 1220 - KINESIOLOGY AND BIOMECHANICS

Minimum Credits: 2  
Maximum Credits: 2  
Course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.  
Academic Career: Undergraduate

REHSCI 1221 - KINESIOLOGY AND BIOMECHANICS LAB

Minimum Credits: 1  
Maximum Credits: 1  
Required lab component for rehsci 1220 kinesiology and biomechanics: course will cover the functional anatomy and biomechanics of the major joints of the human body and the application of mechanics to describe and analyze normal and pathological human movement. Students will be analyzing muscle function and joint motions involved in an exercise or functional activity, palpating muscle groups and bony landmarks, testing the strength of a muscle group, and demonstrating exercises to stretch or strengthen various muscles.  
Academic Career: Undergraduate

REHSCI 1235 - MEDICAL TERMINOLOGY

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to introduce students to the fundamentals of medical terminology. It includes word structure of basic medical and surgical terms and procedures, body parts and organs, body systems, selected medical specialties, and commonly used medical abbreviations and symbols. This course is a self-directed learning course, using a programmed text, with online quizzes (through Blackboard) and a final exam administered in a classroom.  
Academic Career: Undergraduate
REHSCI 1265 - PHARMACOLOGY IN REHABILITATION

Minimum Credits: 3
Maximum Credits: 3
This course serves as a foundation to general pharmacology, and begins with lectures on the general principles affecting drug response: drug absorption, distribution, metabolism and excretion. The major drug categories will then be discussed, with an emphasis on drug classification, mechanism of action, side effects (especially those that are predictable), and significant drug interactions. At the completion of this course, the student will be able to recognize and describe the action of prototype drugs in each major drug category, compare and contrast their action with other drugs in each category, and explain the role of those drugs in the mitigation, treatment, cure or prevention of disease in humans.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: REHSCI 1205 or (BIOSC 1250 or 1070) or NROSCI 1250 or (NUR 0013 and 0003); MIN GRADE "C-" for all listed courses; PLAN: Rehabilitation Science (BS, BSH, BPH) or Athletic Training (BS, BSH, BPH)

Rehabilitation Technology

RT 2101 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the fundamental principles and practices related to multiple areas of assistive technology. This includes: wheelchair seating and mobility, adaptive sports and recreation, augmentative communication, environmental control and home automation, computer and Smartphone access, cognitive aids, low vision and hearing loss devices, adaptive driving, vehicle modifications, transportation safety, environmental accessibility as well as prosthetics and orthotics. In addition, common terminology, disability etiquette, ethics, and the service delivery process are discussed throughout. The course also includes various hands-on labs to further learn the applications of various assistive technologies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2102 - FUNDAMENTALS OF REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 4
Maximum Credits: 4
This course is the first course in a two-course sequence on Rehabilitation Engineering Design. RT 1102/2102 is in the Fall, and 1207/2207 is in the Spring. RT 1102/2102 covers the fundamentals of product design and development with a particular emphasis on assistive and rehabilitative technologies. The goal of this course is for students to learn both the design process and the tools necessary to develop high-quality designs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2103 - INDIVIDUAL & SOCIAL EXPERIENCE OF DISABILITY

Minimum Credits: 3
Maximum Credits: 3
This course investigates psychological and sociological issues of impairment regarding views of disability not as solely located within the individual, but instead as the outcome of interaction between the individual with the impairment and society. Course focuses on the experience of being disabled and includes interactions with a wide variety of disciplinary perspectives on individual, social and cultural experience of disability, gaining familiarity with key debates in these fields. Foundations of stigmatization and discrimination towards people with disabilities and their pervasiveness and effect throughout all domains of life will be examined.
RT 2104 - FUNCTIONAL & MEDICAL ASPECTS OF DISABILITY RELATED TO ASSISTIVE TECHNOLOGY

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a general overview of the pre-disposing factors and direct causes of disease, as well as their effects on the human body. It will also include a systemic approach to the basic disease process in terms of etiology, symptomatology, general pathological changes, diagnostic procedures. Students will examine major chronic illnesses, diseases, and disabilities in order to obtain a practical understanding of the implications of these conditions on all areas of functioning and participation to prepare for clinical rehabilitation technology applications. Case scenarios will be utilized to enhance student learning and interaction with individuals with varying types of disabilities. Students will prepare a paper and present on a specific disease or disability focusing on both the pathophysiology and the functional considerations that may be affected by use of rehabilitation and assistive technology. This course will also cover a basic introduction to medical terminology and universal precautions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2105 - INTRODUCTION TO EVIDENCE-BASED PRACTICE & RESEARCH METHODOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to all elements of designing a research project from developing a researchable question to ethical issues. Lectures focus on basics of different research designs and key concepts of evidence-based practice. Through hands-on class exercises and journal club activities, students will gain ability to interpret and critique literature and become critical consumers of research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2206 - REHABILITATION & ASSISTIVE TECHNOLOGY PRACTICES

Minimum Credits: 3
Maximum Credits: 3
Develop the clinical skills needed to apply assistive technology and rehabilitation engineering solutions to help individuals with disabilities achieve their goals in the area of productivity, education, employment, communication, and environmental access. Students will match knowledge of assistive technology products gained in RT 2101 to the needs of real life "model clients". Taught using a service delivery model for assessing the individual, the context, the technology-user interface and an interdisciplinary team approach.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: RT 2101 to be the pre-req for RT 2206 - Rehabilitation and Assistive Technology Practices

RT 2207 - CLIENT CENTERED REHABILITATION & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is the second course in a two-course sequence on Rehabilitation Engineering Design. HRS 1102/2102 is in the Fall, and 1207/2207 is in the Spring. This course is a project-based design course in which students use design methods and tools learned in 1102/2102, follow an iterative design and testing process with clients and experts, and develop assistive technology device prototypes for their clients.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2208 - ETHICAL ISSUES IN HEALTHCARE

Minimum Credits: 3
Maximum Credits: 3
This course examines a variety of complex ethical issues which confront health-care practitioners and researchers as they work with clients and colleagues within the health-care system and society. By analyzing actual cases, health-care workers are enabled to make informed choices when faced with these issues.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2209 - CLINICAL APPLICATIONS OF SEATING AND MOBILITY

Minimum Credits: 3
Maximum Credits: 3
Course for students to develop knowledge and skill in the process and strategies to find and acquire assistive technology devices and services for people with disabilities as well as understand the underlying policies that govern funding. Course focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, strategies for preparing letters of necessity and advocacy efforts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2210 - ASSISTIVE TECHNOLOGY FUNDING, POLICY, & MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course is focused on the components necessary for people with disabilities to access Assistive Technology and Assistive Technology Services. Students will be able to apply experience from previous coursework and experience with AT devices from a context of policy (legislative and non-legislative), funding, and organizational management that surrounds services. Content will focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, and advocacy efforts. Examples of systems change activities and current topics will also be reviewed and discussed. Advocacy and procedures for due process and policy change will also be reviewed for situations when funding sources and policies are limited. The management portion will focus on the essential components of a service delivery program or business model that includes strategic planning, human resource/organizational behavior, policies and procedures, accreditation, budgets, quality improvement, business planning and resource management.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2311 - CLINICAL INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

RT 2312 - SCHOLARLY PAPER
A research oriented paper based on work the student has done in his or her area of study. Students will be encouraged to submit honors papers for publication or presentation at a national or state professional meeting. The adviser and an appropriate faculty reader will supervise the student's work on the scholarly paper.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2413 - GRADUATE RESEARCH PROPOSAL**

Minimum Credits: 1  
Maximum Credits: 6  
Graduate student writes thesis proposal, receives committee approval and institutional review board (IRB) approval for thesis study.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2414 - GRADUATE RESEARCH**

Minimum Credits: 1  
Maximum Credits: 6  
An original in-depth investigative study of a selected area of professional interest. A research report suitable in format and content for publication is required.  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2415 - SOFT TISSUE BIOMECHANICS**

Minimum Credits: 2  
Maximum Credits: 2  
Soft tissue responses to external mechanical loading are of interest in the prevention and treatment of pressure-related tissue injuries. These injuries include ulcers occurring on the plantar surface of diabetic feet, wounds at the inter face between a PROSTHeses and a residual limb and pressure ulcers over the bony prominences of immobile individuals with neuromuscular impairments.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2416 - WHEELCHAIR BIOMECHANICS**

Minimum Credits: 2  
Maximum Credits: 2  
Discuss all areas of wheelchair biomechanics including stability of wheelchairs and propulsion biomechanics. Students will use kinetic and kinematic analysis to determine the forces and moments occurring in upper extremity joints during the propulsive stroke. Clinical correlates to the biomechanical studies will be presented.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2417 - PRESSURE INJURY SCIENCE**
Pressure injury science is a journal club style course covering historical and contemporary research on intrinsic and extrinsic factors leading to pressure injury development, effectiveness of interventions for prevention, risk assessment tools, techniques used to evaluate and study tissue integrity related pressure injury development and the evidence for the three primary theories of pressure injury etiology.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2719 - FUNCTIONAL AND MEDICAL ASPECTS OF DISABILITY**

Minimum Credits: 2  
Maximum Credits: 2  
NOTE: Only register for the 2-credit course if you are a new student in Fall 2020, taking the 35-credit MRT program. This course is designed to prepare professionals to become skillful interpreters and users of medical information and terminology. Students examine major chronic illnesses and disabilities in order to obtain a practical and theoretical understanding of the implications of these conditions on all areas of functioning and participation, including interpersonal relationships, sexuality, education, employment, and independent living.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2922 - TEACHING INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 6  
Supervised experience in a health-related educational program permitting the student to develop and present instructional materials, to experiment with innovative methods of instruction, and to evaluate the effectiveness of the presentations.  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**RT 2999 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 6  
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**Restorative Dentistry**

**RESTD 2113 - CLINICAL OMF RADIOLOGY CONFERENCE 3**

Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis
RESTD 2116 - CLINICAL OMF RADIOLOGY CONFERENCE 6

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY

Minimum Credits: 2
Maximum Credits: 2
In this course, students will develop a practical understanding of tooth anatomy, structure, function, and related terminology; the relevance of these anatomic features to the practice of clinical dentistry will be emphasized. This course includes lectures and class discussions. The accompanying laboratory course, RESTD 5115, provides an opportunity for hands-on experiences in a preclinical setting.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF

RESTD 5115 - DENTAL ANATOMY AND MORPHOLOGY LAB

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be presented with the anatomy of the primary and permanent teeth on a practical level, focusing particularly on the size, shape, contours, and anatomic features of the individual permanent teeth, and teaches the student how to visualize and reproduce the contours clinically. The primary goal of this course is for the student to be able to identify the primary and permanent teeth, and to be able to visualize the size, shape, contours, and anatomic features of the individual permanent teeth both radiographically and in person. A secondary goal is to develop and practice manual dexterity skills that are essential to later courses and in the profession of dentistry. This course includes small group lab sessions.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad Letter Grade

RESTD 5118 - DENTAL ANATOMY AND MORPHOLOGY LAB

Minimum Credits: 2
Maximum Credits: 2
In this course, students will be presented with the anatomy of the primary and permanent teeth on a practical level, focusing particularly on the size, shape, contours, and anatomic features of the individual permanent teeth, and teaches the student how to visualize and reproduce the contours clinically. The primary goal of this course is for the student to be able to identify the primary and permanent teeth, and to be able to visualize the size, shape, contours, and anatomic features of the individual permanent teeth. A secondary goal is to develop and practice manual dexterity skills that are essential to later courses and in the profession of dentistry. This course includes small group lab sessions.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

RESTD 5143 - PRINCIPLES OF OPERATIVE DENTISTRY 1

Minimum Credits: 2
Maximum Credits: 2
This amalgam restorations course considers the terminology, principles and procedures of the following basic concepts in clinical operative dentistry: 1. Moisture control and soft tissue management of the operating field, 2. Rotary and hand instrumentation, 3. Dental caries, 4. Cavity preparation and restoration of all teeth using amalgam alloy, 5. Pulpal protection - varnished, liners and bases, 6. Occlusion, and 7. Dental biomaterials amalgam.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: ABCF with +/- Values
RESTD 5147 - PRINCIPLES OF OPERATIVE DENTISTRY 1 LABORATORY

Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course provides the opportunity to develop psychomotor skills in the following operative procedures: 1. Rubber dam isolation, 2. Instrumentation, 3. Dental caries detection, 4. Preparation of various amalgam cavity preparations, 5. Placement of pulpal protection, 6. Restoration and various cavity preparations with amalgam, and 7. Occlusal adjustments.  
Academic Career: Dental Medicine  
Course Component: Practicum  
Grade Component: ABCF with +/- Values

RESTD 5172 - PRINCIPLES OF OPERATIVE DENTISTRY 2

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will be prepared with the operative dentistry knowledge and techniques to successfully restore the dentition utilizing composite resin materials. Additionally, the student will learn adjunctive esthetic information and alternative treatment modalities. This course will provide the foundational knowledge to allow the student to understand and apply the basic principles of preparation design, adhesion, and finishing of composite restorations in the pre-clinic environment. This course includes lectures and class discussions.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

RESTD 5176 - PRINCIPLES OF OPERATIVE DENTISTRY 2 LAB

Minimum Credits: 1.5  
Maximum Credits: 1.5  
This pre-clinical lab course is given in conjunction with the lecture course for composite resin restorations, RESTD 5172 Principles of Operative Dentistry 2. In this course, students will acquire the psychomotor and instructional skills in treating Class I, II, III, IV, V lesions using bonded composite restorative materials. Students will also learn to restore cuspal fractures and place sealants using bonded resin materials. The student will learn how to properly evaluate their finished restorations for form, function and esthetics.  
Academic Career: Dental Medicine  
Course Component: Practicum  
Grade Component: ABCF

RESTD 5244 - GERIATRICS

Minimum Credits: 1  
Maximum Credits: 1  
Students will be introduced to the concepts of geriatrics and the multidisciplinary approach to the treatment of the geriatric patient in traditional and non-traditional settings. Guest lecturers will be invited to provide information germane to their specific fields.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

RESTD 5281 - PRINCIPLES OF OPERATIVE DENTISTRY 3

Minimum Credits: 1  
Maximum Credits: 1  
In this course, students will continue to develop their skills in operative dentistry by reviewing the amalgam and composite preparations and restorations, which were taught in the first year curriculum, and completing them on assigned typodont teeth. This course is primarily a pre-clinical lab course. Students will continue to develop psychomotor skills to properly prepare and restore teeth using both amalgam and composite restorative materials.  
Academic Career: Dental Medicine  
Course Component: Practicum  
Grade Component: Grad HSU Basis
RESTD 5282 - OPERATIVE TECHNIQUES REVIEW

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Dental Medicine  
Course Component: Practicum  
Grade Component: Grad HSU Basis

RESTD 5342 - PRACTICE ADMINISTRATION

Minimum Credits: 1  
Maximum Credits: 1  
This course introduces students to the management concepts required in dental practice. Material is presented on managing the following areas of dental practice: personnel, insurance, equipment purchasing, legal responsibilities, accounting, computer usage, record keeping and other crucial areas. Although focusing primarily on private dental practice, alternative practice options are discussed, including HMOS, hospitals and publically funded dental services.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

RESTD 5371 - PRACTICE MANAGEMENT

Minimum Credits: 1  
Maximum Credits: 1  
RESTD 5371 is a continuation of the RESTD 5342 Practice Administration course. The student will be exposed to technology used in a dental office, insurance plans and options for participation, marketing, and acquiring knowledge of how a dental practice functions. Students will apply the philosophies of practice management and understand different models of health care to a level of competence.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: ABCF

RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY

Minimum Credits: 1  
Maximum Credits: 1  
According to a report published in the Journal of Health Affairs, consumer spending in dentistry, which was $60 billion in 2002, surpassed $84 billion in 2005, and government actuaries predict annual increases of 6.3 to 6.9% in expenditures to reach $146.9 billion by 2014. It is now estimated that nearly 70% of the total consumer spending in dentistry is spent on esthetic dentistry. New concepts in esthetic dentistry involve more than merely providing porcelain veneers, they encompass a broad approach to the total esthetic needs of patients. "Esthetic Restorative Dentistry" builds on the sound principals of restorative dentistry presented through the student's first three years. This course introduces the student to the basic knowledge, materials, armamentarium, and clinical procedures that constitute the modalities of esthetic restorative dentistry. Students will understand how in combination each modality builds the foundation for interdisciplinary patient management. Students graduating from dental school in 2014 and beyond must have the opportunity to learn and explore the special methods of esthetic restorative dentistry as today's esthetic dentistry is supported by new developments, innovative techniques, and a wealth of new scientific data.  
Academic Career: Dental Medicine  
Course Component: Lecture  
Grade Component: Grad HSU Basis

RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 1

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to provide clinical experiences in the area of restorative dentistry for predental dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in restorative dentistry for dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in restorative dentistry.  
Academic Career: Dental Medicine
RESTD 5449 - CLINICAL RESTORATIVE DENTISTRY 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide clinical experiences in the area of restorative dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in restorative dentistry for dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in restorative dentistry.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: ABCF

RESTD 5870 - ORAL APPLIANCES COMMONLY USED IN THE GENERAL DENTISTRY PRACTICE

Minimum Credits: 1
Maximum Credits: 1
To empower students to recommend, fabricate (or oversee fabrication), deliver, and follow-up with patients for several Oral Appliances that are common in daily General Dentistry Practice. Students will fabricate hard/soft nightguard and whitening trays. Fluoride trays, athletic mouth guards, snoring and sleep apnea appliances will also be discussed.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad HSU Basis

RESTD 5900 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in restorative dentistry.
Academic Career: Dental Medicine
Course Component: Independent Study
Grade Component: Grad HSU Basis

RESTD 5924 - ADVANCED COMPOSITE TECHNIQUES

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

RESTD 5941 - ADVANCED ENDODONTICS

Minimum Credits: 3
Maximum Credits: 3
This course includes lectures, seminars and clinical practice. The lectures include advanced techniques in instrumentation and obturation of endodontic treatment of complex cases. Endodontic surgery techniques are reviewed.
Academic Career: DMED
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

Russian
RUSS 2104 - DEVELOPING ENHANCED RUSSIAN READING PROFICIENCY 1

Minimum Credits: 3  
Maximum Credits: 3  
Through guided intensive reading of authentic primary and secondary texts in Russian culture, enrolled graduate students will further develop their ability to read such texts comfortably and use them effectively in their academic and professional careers.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

RUSS 2105 - DEVELOPING ENHANCED RUSSIAN READING PROFICIENCY 2

Minimum Credits: 3  
Maximum Credits: 3  
Through guided intensive reading of authentic primary and secondary texts in Russian culture, enrolled graduate students will further develop their ability to read such texts comfortably and use them effectively in their academic and professional careers. This is the second course in the sequence.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

RUSS 2110 - INTRODUCTION TO THE STUDY OF LITERATURE 1

Minimum Credits: 3  
Maximum Credits: 3  
Open to all graduate students of literature. A certain emphasis will be placed on Russian literary history, criticism and theory but all readings will be available in Russian and English. Includes a variety of approaches to literature analyzed both in terms of historical perspective and underlying perceptions of human nature, and in terms of their methodological and theoretical contributions to the systematic study of literature.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Russian & East European Studies

RUSS 2111 - FOURTH-YEAR RUSSIAN 1

Minimum Credits: 3  
Maximum Credits: 3  
The course provides an extensive practice in oral communication at the advanced level. It includes discussions of readings on topics of general sociocultural interest, analysis of interviews with native speakers, and discussions of audio- and video-recordings. Home essays, oral presentations, and mock interviews are designed to emphasize students' management of the Russian discourse.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

RUSS 2112 - FOURTH-YEAR RUSSIAN 2

Minimum Credits: 3  
Maximum Credits: 3  
This proficiency-based and culture-based course provides extensive practice in oral and written communication at the advanced level for the students at the mid and high intermediate levels and higher. It is organized around a topic on the personal, community, national, or international interest that students will explore via readings, listening, and viewing activities. Students will improve their fluency and accuracy in conversational activities designed to strengthen their command of informal and formal Russian incorporating the presentational, interpersonal, and interpretive modes of communication. Students will also analyze and respond to culturally-relevant texts (both written and spoken) through the essay format, presentations, and/or digital projects.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
RUSS 2113 - BAKHTINIAN CRITICISM

Minimum Credits: 3  
Maximum Credits: 3  
Aimed at graduate students with an interest in literature. Literary criticism and theory, communication, and philosophy, this course introduces them not only to Bakhtin's major works on language and the novel, but also to contemporary Bakhtinian readings of well-known Russian works of fiction.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

RUSS 2210 - STRUCTURE OF RUSSIAN

Minimum Credits: 3  
Maximum Credits: 3  
Required of Russian teaching assistants, this course approaches Russian inflectional and derivational morphology from two points of view simultaneously: how to describe it linguistically, and how to describe it to an English speaking elementary learner of Russian. Finer points of Russian sound and word structure are examined. The concepts of basic linguistic analysis are elaborated on the example of Russian material. This course is preparatory for the departmental comprehensive examination section on descriptive Russian linguistics.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Russian & East European Studies

RUSS 2230 - HISTORICAL GRAMMAR

Minimum Credits: 3  
Maximum Credits: 3  
This course traces the history of Russian grammatical structure from its state in common Slavic to the present day, concentrating particularly on the development of the verbal and nominal inflectional systems, and on the phonological system. To the extent possible, the course traces dialectical differences among the East Slavic languages, and among the major dialects of Russian.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

RUSS 2300 - PUSHKIN

Minimum Credits: 3  
Maximum Credits: 3  
This course studies the biography and all major works of the greatest Russian author (1799-1837). This graduate seminar is conducted in Russian.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

RUSS 2306 - DOSTOEVSKY

Minimum Credits: 3  
Maximum Credits: 3  
This is a graduate course conducted in Russian which covers the life and major works of Fyodor Dostoevsky.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

RUSS 2307 - ANTON CHEKHOV & WORLD LITERATURE
Minimum Credits: 3
Maximum Credits: 3
The course surveys Anton Chekhov's career as a playwright, short story writer, and a medical doctor in a rigorously articulated literary, critical, and historical context. While contemplating Russian, Western, and global mythologies about the "Chekhovian" trend in literary production, the course places Chekhov's works in conversation with a range of literary and critical texts to investigate world literature as a comparative angle and a conceptual paradigm as well as to think about the aims and methods of humanistic knowledge making in the 21st century. Each time the course is offered a unique set of additional readings is drawn from a wide range of authors, including such writers as Samuel Beckett, David Bezmozgis, William Boyd, Raymond Carver, Fyodor Dostoevsky, Inua Ellams, William Faulkner, Mavis Gallant, Maksim Gorkii, Henrik Ibsen, Nikolai Leskov, Yiyun Li, Audre Lorde, Guy de Maupassant, Alice Munro, R. K. Narayan, Joyce Carol Oates, Lyudmila Petrushevskaya, Vladimir Sorokin, Lev Tolstoi, Reza de Wet, Eudora Welty, Oscar Wilde, Tennessee Williams, and Virginia Woolf, among others.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

RUSS 2310 - NABOKOV

Minimum Credits: 3
Maximum Credits: 3
A survey of the major writings of Vladimir Nabokov, including novels and short stories from both the Russian and American periods. Discussion topics will include: the semiotics of life-creation, art as perversity, author-hero dynamics, exile and nostalgia, bilingualism and translation, the violence of linguistic play, the manipulation of narrative desire; modernism and postmodernism.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Russian & East European Studies

RUSS 2418 - REPRESENTATION AND THE AGE OF REASON: POLITICS AND AESTHETICS IN THE REIGN OF CATHERINE II

Minimum Credits: 3
Maximum Credits: 3
This course considers the long reign of Catherine II (1762-1796) with particular attention paid to the interplay between the era's shifting political cultures and the attendant possibilities for cultural production. Topics of interest include enlightened absolutism; Russia's Age of Reason; normative aesthetics; cultural imports; representations of imperial statehood and court life in multiple media; royal patronage and the arts; and the evolution of the Russian literary language as both an aesthetic and political process. The course begins with an examination of Catherine II's predecessors in Russia's century of female rule and surveys the cultural milieux generated during the reigns of Anna Ioannovna and Elizaveta Petrovna. Following a sustained examination of Catherine II's reign, the course concludes with historical appraisals of the Age of Catherine in subsequent periods. Students will become better-acquainted with such literary movements as Russian Neoclassicism, Sentimentalism, and early Romanticism in a comparative and intermedial context, and will have an opportunity to deepen their understanding of such generic forms as the ode, elegy, friendly epistle, tragedy, comedy, and travelog.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

RUSS 2425 - PHILOSOPHY AND LITERATURE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

RUSS 2464 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
RUSS 2473 - EMPIRE AND NATION

Minimum Credits: 3
Maximum Credits: 3
Empire and nation examines selected literary and visual texts over four centuries with a concern for their engagement with social crises, specifically multiple collapse of the imperial structure and the so-called emergence of the nation state. Secondary texts include Gellner, Hroch, Anderson and Jameson.

RUSS 2474 - NEOLIBERALISM AND CULTURAL PRODUCTION

Minimum Credits: 3
Maximum Credits: 3
We will examine this contested term as it circulates in debates about cultural practice since the late 1970s. Course segments are likely to include contrastive models of the concept; their ascribed affinities to Marxist and Weberian traditions; distinctive concepts ("shock doctrine," "thought collective," Comaroff's "occult"); key historical figures and institutions (Kojève, Polanyi, Schumpeter, Hayek, Mont Pelerin); and the term's contradictory symptoms under different ideological systems, such as post-socialist modernity. The intent is to move beyond two tendencies in current debates: 1.) The deployment of the term exclusively as moral judgment; and 2.) Its explanatory capacity for All the Things. Core texts will include Morowski, Harvey, and Klein, as well as critiques of Harvey (Abercrombie, Hindess). The course will ask participants to bring their fields of expertise (both regional and disciplinary) to these debates, situating their own departmental investments in relation not only to textual content, but also to production, distribution, and exhibition. While cinema (e.g. Jia Zhangke, Ken Loach, Aleksei Balabanov) may be a core cultural emphasis, the course welcomes contributions from the fields of art history, literature, music, as well as sociology, history, and anthropology.

RUSS 2621 - RUSSIAN DRAMA

Minimum Credits: 3
Maximum Credits: 3
Covers the history and development of Russian drama from the 17th century to symbolism, including analysis of the best Russian plays of Pushkin, Gogol, Chekhov et al.

RUSS 2624 - RUSSIAN LITERATURE IN MUSIC

Minimum Credits: 3
Maximum Credits: 3
This course explores Russian literature as interpreted in music. Students will read works of Russian poetry and prose, then examine the "transposition" of the works into media such as opera, ballet, and song cycle. The syllabus includes (among others) such authors as Mussorgsky, Tchaikovsky, Rimsky-Korsakov, and Desiatnikov.

RUSS 2638 - RUSSIAN AND SOVIET CINEMA 1896-1934: LUMIERE TO LENIN
Although the Russian film industry does not begin to take shape until Aleksandra Drankov's Sten'ka Razin (1907), moving images were first introduced to the Russian empire in May 1896, when the Lumiere brothers both screened the first films in the empire and arranged to shoot the first film footage in the country - the coronation of Tsar Nikolai II. The course will examine the history of the russo-soviet film from 1896 through the displacement of the cult of Lenin by Stalin's image in the late 1930s. Films to be screened include Chardynin's and Protazanov's adaptations of queen of spades (1910 and 1917), Bauer's the revolutionary (1917), room's bed and sofa (1927), Alexandrov's circus (1936), and Kalatozov's Chkalov (1941). Special emphasis will be placed on the work of the soviet directors associated with "soviet expressive realism": Kuleshov, Eisenstein, Pudovkin, Vertov, and Dovzhenko.

**RUSS 2639 - SOVIET CINEMA 1934-1953: STALIN AT THE MOVIES**

The imposition in 1934 of socialist realism as the exclusive method available to soviet cultural producers and the release of the "Vasil'ev brothers", Chapaev later that year permanently transformed the soviet film industry. Stalin established total control of the industry both by appointing his personal representatives to control all stages of film production and by consolidating himself as "spectator number one," not only prescreening all films prior to their release, but eventually by establishing himself as a dominant presence on the silver screen. Films to be screened include Alexandrov's circus (1934), Kozintsev and Trauberg's "maxim trilogy" (1934-38), Dovzhenko's Aerograd (1935), Dzigan's we are from Kronstadt (1936), Rmm's Lenin in October (1937), Lukov's two soldiers (1943), Eisenstein's Alexander Nevsky (1938) and Ivan the terrible (1944-46), pyr'ev's cossacks of the Kuban (1949), and Chiaureli's trilogy devoted to comrade Stalin (1946, 1949, and 1951).

**RUSS 2640 - POST STALINIST CINEMA**

Stalin's death (1953) and the start of Khrushchev's destalinization campaign (1956) not only disrupted the stability of the pre-existing interdependence between the ruling political elite and the national film industry, but also fundamentally altered the interrelationship between the film industry and the Russo-Soviet viewing public. The course will examine the changes in this triangular model through the four major periods in Russo-Soviet history since the death of Stalin: 1953-64 (the thaw), 1964-1985 (stagnation), 1986-1991 (perestroika), and post-1991 (the re-emergence of the Russian national state). Films to be screened include Kalatozov's The Cranes are Flying (1957), Chukhrai's Ballad of a Soldier (1959), Tarkovskii's Ivan's Childhood (1962), Askol'Dov's Commissar (1967; 1987), Pichul's Little Vera (1988), Lungin's Taxi Blues (1990), Mikhalkov's Burnt by the Sun (1994), and Balabanov's Cargo 200 (2007).

**RUSS 2641 - CENTRAL ASIAN CINEMA**

This course will examine central Asian cinema between 1990 and the present. Although the course will examine films and the film industry in all five central Asian republics (Kazakhstan, Kryguzia, Tadzikistan, and Uzbekistan), the focus will be on the underlying aesthetics of regional cinema, rather than on a series of national cinemas.
RUSS 2645 - RUSSIAN FILM SYMPOSIUM

Minimum Credits: 3
Maximum Credits: 3
In addition to analyzing recently released Russian films, the course will have a heavy concentration on the professional training of graduate students. This will include selecting a week-long schedule of films to be screened, handling arrangements for visa applications and airline tickets, hotel reservations, the writing of program notes, and much more. By the end of the course, students will be able to handle the logistics of inviting individual speakers to campus, as well as organizing a week-long conference that includes dozens of participants.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Attributes: Film Studies

RUSS 2670 - COLD WAR AND ITS REVENANTS

Minimum Credits: 3
Maximum Credits: 3
This course will look at the Russo-Soviet cultures of the Cold War, both during its original four decades (1945-1985) and during its contested revisitation (arguably 2007-2022). Texts are likely to include policy and journalistic writings, short stories, films, postage stamps, television shows, photographs, maps, and posters, as well as holidays, art exhibits, film festivals, and commemorative practices. What is at stake in the contemporary debates about a “new cold war”? How would we claim to know and who benefits from this debate? Are we witnessing the redivision of space between two superpowers and three "worlds"? What new financial instruments shape the process this time round? The seminar welcomes students from diverse disciplines.

RUSS 2700 - MEDIEVAL RUS'

Minimum Credits: 3
Maximum Credits: 3
This graduate course is a survey of old Russian literature beginning with the primary chronicle and concluding in the late 16th and early 17th centuries. Readings will include both primary materials and modern Russian translations of old Russian texts.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Medieval & Renaissance Studies, Russian & East European Studies

RUSS 2704 - SOVIET LITERATURE 1917-1958

Minimum Credits: 3
Maximum Credits: 3
This course covers the history of Soviet literature over a forty year period, in connection with the party's policy and influence on soviet cultural life. This is a graduate course conducted in Russian.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

RUSS 2710 - CULT & CULT CINEMA

Minimum Credits: 3
Maximum Credits: 3
While "cult" is usually a term of religious opprobrium, "cult cinema" suggests the opposite: exaggerated enthusiasm for films that may-despite initial failure-gain long-lasting recognition. What defines the cult film? Its passionate audience? Its thematic transgression? Its exclusion from mainstream distribution (through censorship or ridicule)? Its circulation as a set of citations? Its exhibition practices? Its inscrutability? Its responsiveness to a social context? With screenings of US, British, Iranian, Russian, Armenian-Georgian, and French films, we will examine several theories of cult
texts, with underlying curiosity about what the category could mean beyond cinema (in relation to painting, statuary, literature, and other cultural artifacts).

Academic Career: Graduate

Grade Component: Grad Letter Grade

RUSS 2780 - STALINISM: HISTORY, IDEOLOGY, CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course will examine Stalinism as a complex historical, ideological, and cultural phenomenon that crucially shaped Russia's destiny through the twentieth century and up to the present moment. Giving due attention to its dark sides, we will aim beyond popular stereotypes about this dramatic period (blood-thirsty tyrant; miserable and terrorized population; total propaganda; ersatz art). We will consider major issues in the historiography of Stalinism; the role and nature of ideology in Stalinist society; the doctrine of socialist realism; landmark phenomena and artefacts of Stalinist culture (both official and popular).

RUSS 2970 - TEACHING OF RUSSIAN

Minimum Credits: 3
Maximum Credits: 3
This course provides graduate student teaching assistants/fellows/instructors with the knowledge and skills needed to teach an elementary- or intermediate-level foreign language class in an institution of higher education (i.e., language and literature departments at the University of Pittsburgh). Students will learn about contemporary theories and research on foreign and second language learning and acquisition, but much of the course content will focus on praxis and strategies related to classroom-based language teaching. Topics will include contextualized language instruction, communicative and task-based instruction, content-based instructional methods, equitable and inclusive teaching practices, and strategies for teaching grammar, vocabulary, and linguistic competencies (reading, writing, listening, speaking). Students will be assessed via practice-based projects and self and peer evaluations. This course is taught in English, but speakers of all linguistic backgrounds are welcome, and examples will be taken from a wide variety of languages offered at Pitt. Pre-requisites: None, but students should have graduate standing in a language and literature department at the University of Pittsburgh. Other students interested in this course should contact the instructor directly.

SLAV 2050 - COMPUTATIONAL METHODS IN HUMANITIES

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the use of computational modeling and programming to conduct text-based research in the humanities. Course goals include 1) learning how to identify research questions in the humanities that are amenable to computational analysis and processing and 2) designing and implementing xml-based computational systems to explore those questions. No prior programming experience or knowledge of foreign languages required.
Academic Career: Graduate

SLAV 2210 - OLD CHURCH SLAVIC

Minimum Credits: 3
Maximum Credits: 3
This course is intended to enable the student to read old church literature which had a particularly great influence on the Russian literary language. The course embraces the relationship of old church Slavic, to Protopslavic, external history and sources of old church Slavic, its phonology, morphology and syntax. The classes will be devoted to reading, translation, and analysis of the texts.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies

SLAV 2802 - IMAGINATIVE GEOGRAPHIES
Traced from Said's orientalism (part two, chapter one), this term alternates in academic discourse with "imagined geographies" and "imaginary geographies." Relatively indifferent to these distinctions, the seminar moves from Said, to (in all likelihood) in Derek Gregory (geographical imaginations), O.R. Dathorne (imagining the world), Michel de Certeau ("walking in the city"), Michel Foucault (on heterotopias), then to Samuel Huntington (clash of civilizations) and Halford Mackinder ("the geographical pivot of history"). Some primary/secondary readings will be specific to Slavic (the Petersburg text; Iurii Lotman's semiosphere); other primary/secondary readings will be tailored to the participants' disciplinary expertise. The seminar's key questions concern the ways in which apparently inert and straightforward accounts of geography are marshalled for projects of social coordination, ideological division, and narratives of belonging.

## Social Welfare

### SWWEL 2020 - CHILD AND FAMILY ADVOCACY

**Minimum Credits:** 3  
**Maximum Credits:** 3

This is a practical skills course in legal advocacy for non-lawyers. The emphasis is on practical techniques and courtroom skills to enhance the professional effectiveness of social workers in the courtroom setting. Typical areas of discussion include rules of evidence, legal procedure, expert witnesses, interview techniques, cross-examination, law reform, case review and readings and the legal rights of children.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWRES 2021 and SWGEN 2098 and SWBEH 2063 and SWWEL 2081

### SWWEL 2035 - GLOBAL PERSPECTIVES SOCIAL WORK

**Minimum Credits:** 3  
**Maximum Credits:** 3

This seminar-style course is designed to provide students an opportunity to engage in an introductory exploration of global social issues/problems/developments and to global approaches to address these issues.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWWEL 2081

### SWWEL 2039 - SOCIAL POLICY AND GERONTOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course is designed to examine the dynamics and procedural steps in social policy making and implementation first in a general context and then more specifically in relation to the older population. The last half of the course is devoted to the identification of major issues in social policy for the aged and intensive analysis of selected policy decisions.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

### SWWEL 2051 - ECONOMICS AND SOCIAL WORK

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course provides an understanding of basic economic theory, and discusses its application to social welfare policy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWRES 2021 and SWGEN 2098 and SWBEH 2063 and SWWEL 2081

### SWWEL 2056 - HEALTH SYSTEMS AND PUBLIC POLICY
Building on a background knowledge in social welfare, this course focuses on issues and problems in the U.S. healthcare system including the historical development of health care, the structure and function of the healthcare system, current and proposed financing mechanisms and the social, political and ethical issues which shape healthcare policy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

### SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Historical development of mental health policies and the structure of the mental health delivery system and the policies and legal base that guide it. Special emphasis is given to how policies affect the care of persons with chronic mental illness.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

### SWWEL 2059 - CHILD AND FAMILY POLICY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- The responsibility of society for the well-being of all its children and families is the basis for a vast body of public policy, enormous public expenditures, and extensive public debate. This course will examine the interaction between public child welfare policies and other child and family oriented policies in our society; the history of services for children and their families; federal and state legislation, court decisions, and regulations regarding child protection, child welfare, and juvenile justice; racial disparity in child serving systems; public and private programs and services in existence or needed to provide for the welfare of children; the roles of social workers and other professionals in child serving systems; changing family patterns and the policy implications of these changes; the major needs of families to which family policies are or should be addressed; and the vehicles for formulating and implementing child and family policies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

### SWWEL 2081 - SOCIAL WELFARE

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- The course focuses on the historical development of the field of social welfare including major legislation. Current issues of poverty and related problems, the health care delivery system, and criminal justice are discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

### SWWEL 2087 - ORGANIZATIONS AND PUBLIC POLICY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Introduced as a new course in the COSA concentration in community practice, this seminar emphasizes and examines relationships between public policy and organizational behavior. Particularly attentive to the influence of political and economic variables on human service institutions. The course examines selected historical phenomena in order to better understand future prospects.

**Academic Career:** Graduate
SWWEL 3030 - EVAL OF AMERICAN SOCIAL WELFARE

Minimum Credits: 3
Maximum Credits: 3
Emphasizes a conceptual and analytical approach to the study of American social welfare. Extending from the Elizabethan poor laws to the 1930s new deal, and to the present, it deals with social welfare in relation to a number of central themes in American society, including the interaction among the ideologies of individualism, voluntarism, and collectivism; the conflict between opportunity-mobility and security objectives; and the nature of the social reform and social control processes in a pluralistic society.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWWEL 2081; SBPLAN: COSA (Social Work-MS)

SWWEL 3037 - SOCIAL POLICY ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a basic understanding of the dimensions of public social policy and the acquisition of the skill required to use a conceptual model to analyze policy. Particular attention is paid to the value and ideological dimensions of social welfare policy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWWEL 3059 - CHILD AND FAMILY POLICY

Minimum Credits: 3
Maximum Credits: 3
This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWWEL 3060 - CHILD AND YOUTH POLICY

Minimum Credits: 3
Maximum Credits: 3
This course addresses key issues in child and youth policy through the critical analysis and application of social, cultural, philosophical, psychological, and biological theory. Starting from work of John Rawls, students will develop an understanding of various philosophical frameworks pertaining to issues of equality, distribution, and liberty and will use these principles to articulate a conception of social justice to guide child and youth policy. The class will then move to consider the role of psychological and biological theories and their relationship to and meaning for child and youth policy. Following this discussion, the class will turn to critical social and cultural theories and will debate the implications of these perspectives for the ways in which we think about and treat young people.

Academic Career: Graduate

Social Work Continuing Educ
SWCED 2004 - INTRODUCTION TO INTERGENERATIONAL PROGRAMS

Minimum Credits: 2
Maximum Credits: 2
This course is an on-line, interactive experience based on the 13-year success of generations together intergenerational training program at the University of Pittsburgh. The on-line course is designed to help you develop the skills needed for success in the intergenerational field. Students read course materials, do on-line assignments, discuss the content with fellow students and instructors, and follow step-by-step procedures to complete the individual units. After you have completed the course, you will have a better understanding of skills needed to develop intergenerational programs and how to apply them and be able to: explain the rationale for intergenerational programs as a social intervention model. Formulate a design/plan for an intergenerational program. Develop a process to engage community support for intergenerational programming. Develop the basic skills to implement intergenerational program components. Recruit, train, and manage participants and staff in intergenerational programming. Evaluate an intergenerational program.

Social Work General

SWGEN 2005 - POVERTY AND INCOME INEQUALITY: SOCIAL RESPONSES

Minimum Credits: 3
Maximum Credits: 3
The course focuses on the nature and extent of poverty and income inequality in the United States including its causes and consequences as well as the resulting political and public policy debates and governmental efforts to combat it. The course provides a broad social science approach to understanding the intersection of gender, race, and class with poverty and income inequality. Competing theories of poverty are discussed and their relationship to different policies are assessed. The course continues with the analysis of a range of social policy debates and reform options that might further reduce poverty and income inequality. The course concludes with a discussion about the nature of social and economic justice and the role social workers and professional social work currently play and could play in taking a social action role to addressing poverty and income inequality.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SUBPLAN: Direct Practice

SWGEN 2007 - SOCIAL WORK AND THE LAW

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of the law, legal processes, and legal systems as they relate to social work practice and an introduction to the field of forensic social work. The course will challenge students to think about the variety of ways that social work practice, social policy, and law intersect. In particular, it will focus on specific aspects of the intersection between law, policy, and practice, including: the significance of courts and case law to issues of social justice, the intersection of social work and law on issues of significance to social workers, models of legal reasoning/decision making, the role of social workers in legal proceedings, the role of social workers in using the law for social reform or protection of civil rights, the use of social science by courts, legal regulations and case law that influence social work practice, and tensions between the law and social work values and ethics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2010 - SOCIAL WORK WITH SERVICE MEMBERS, VETERANS, AND THEIR FAMILIES

Minimum Credits: 3
Maximum Credits: 3
This generalist practice course is for social work students and other helping professional students interested in working with service members, veterans, and their families. It will provide an overview of the policies and programs, resources, culture, treatment issues, and special needs of
these populations, especially at this time and in the wake of our military conflicts. This course will address the following areas identified in the NASW Standards for Social Work Practice with Service Members, Veterans, and their Families: social work policies and programs; social work values, ethics, and cultural competencies, treatment and practice issues; families and children issues; community, organizational, and policy advocacy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

**SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on issues of cultural diversity and oppression. Students are prepared to practice with, and on behalf of, diverse populations using empowerment as a guiding frame of reference.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWGEN 2058 - FEMINIST SOCIAL WORK**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on gender and social work, beginning with a critical examination of the concept of feminist practice, with attention to oppression, power, and privilege in helping relationships and in women's lives more broadly. It explores meanings of gender as it intersects with race/ethnicity, class, sexuality, age, and ability in the lives of women in general and specifically as social workers and clients. Taught in a seminar format, this course examines topics such as work, welfare, family, violence, justice system involvement, health, mental health, and women as agents of change and is appropriate for students concentrating in micro or macro levels of practice.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081  
**Course Attributes:** Gender, Sexuality & Women's St

**SWGEN 2062 - ADVOCACY AND LOBBYING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an overview of how a nonprofit organization can engage in effective public policy advocacy and lobbying on behalf of its mission and the people it serves. Advocacy includes a broad range of activities, which attempt to influence a specific policy, legislative, regulatory or implementation outcome. Social workers play critical roles in the advocacy process, policy analysis, issue development, public education, constituency organizing, lobbying, voter engagement, and creating an entire advocacy campaign. This course will focus on the best practices to deepen your understanding of advocacy tools, processes, and models.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWGEN 2080 - RACE AND SOCIAL PROBLEMS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the history and evolution of the role of race in the economics, politics, media portrayals, educational systems, law enforcement, and overall social fabric of the United States. The course details historical eras and major mechanisms of racial oppression, including: slavery, reconstruction-era terror and voter disenfranchisement, 20th century economic policies, mass incarceration, and frames of political and social thought
that have shaped and perpetuate the racial hierarchy of the US today. This course strives to help students understand why we see the current racial inequalities that we do in the contemporary US, particularly given the rich civic and cultural histories of West African and Native American societies. It also challenges students to develop ways to address racial injustices where they exist. Enrollment preference is given to social work students, but registrants from across the university are welcome with approval of the instructor.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2088 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
Given the changing nature of social work practice and social welfare policy, the MSW program occasionally offers courses in new and/or unique content. When offered, this course is designed to provide skill and knowledge content not covered in other MSW courses.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWGEN 2097 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
A student-initiated educational experience, guided by a faculty member that significantly supplements the social work curriculum and conforms to academic course content expectations.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWGEN 2098 - GENERALIST SOCIAL WORK PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to serve as foundation for specialization by providing students with the knowledge, values, and skills needed to engage in the generalist practice of social work. Professional social work activity related to various social problems (poverty, racism, sexism), system size (individual, family, group, organization, community, society), and locations of practice (host setting, the urban environment, for example) will be emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 2099 - GENERALIST FIELDWORK

Minimum Credits: 1
Maximum Credits: 6
This practicum will provide students with opportunities to develop an awareness of self in process of intervention; gain experience in application of knowledge, value and ethics, and practice skills; use oral and written communication consistent with language of the profession; and use professional supervision to enhance learning.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: CREQ: SWGEN 2098

SWGEN 3025 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
A doctoral course in which the student defines the topic area and obtains approval for it from a member of the faculty who serves as his/her mentor.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWGEN 3039 - COMPREHENSIVE STUDY

Minimum Credits: 1
Maximum Credits: 9
This would be limited to students who have completed all courses but have not yet passed the exam, or have two or fewer courses to take and need to be full-time. Students may register for up to nine credits, and may register twice at most. The advisor will serve as faculty of record.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

SWGEN 3044 - THEORY 1

Minimum Credits: 3
Maximum Credits: 3
The general issues involved in applicability of social science theory provides a framework for an exploration of selected social psychological theories. Concepts from role theory, interrelated with socialization and behavioral theories, are presented and analyzed. Students will then apply selected theoretical concepts to a social problem area of their choice, in order to assess the theory's contribution to an understanding of the problem.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWGEN 3053 - THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This course covers macro social science perspectives relevant to social work: economic, organizational and social control aspects of society. Classical theories (Marx, Weber, and Durkheim) are studied and applied to particular social problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWGEN 3066 - SEMINAR IN SOCIAL WORK EDUCATION

Minimum Credits: 3
Maximum Credits: 3
History of social work education, accreditation, and design of foundation curriculum. Selecting educational objectives, teaching methods, evaluation of student performance, and careers in social work education.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 3088 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
The Ph.D. program occasionally offers courses/seminars on research, theory, and/or policy in specific substantive areas. These are areas in which
there is significant current research and practice energy that extends beyond the regular curriculum. Typically, these offerings reflect the research and scholarship program of the faculty sponsor.

**Academic Career:** Graduate

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SU3 Basis

### Social Work Research

**SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
This course is the second level, required research course for all COSA students. Examination of variables which influence organizational development and maintenance, adaptation and change, integration and innovation, and goal setting and planning will provide the focus for the course.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PREQ: SWRES 2021; CREQ: SWCOSA 2099; SBPLAN: COSA (Social Work-MS)

**SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
This course is designed to familiarize students with the basic elements of research and their implication for social work practice. Students will gain knowledge of the various components of research methodology, including the formulation of a researchable question, strategies of research design, questionnaire construction, and data analysis and interpretation. Lab sessions will allow students to develop their skills in the various topics covered in lecture.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Social Work students only.

**SWRES 2023 - DIRECTED STUDY IN RESEARCH**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
A supervised experience in designing, implementing, and reporting an individually defined empirical research project. This course provides research experience for advanced research students.

**Academic Career:** Graduate

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SU3 Basis

**SWRES 2033 - EVALUATIVE RESEARCH SOCL SERVS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
This course explores major issues and knowledge needed for evaluating the effects of social programs. Links to practice issues of accountability, program monitoring, and program planning will be emphasized.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

**SWRES 2040 - DP ADVANCED APPLIED RESEARCH**
Minimum Credits: 3
Maximum Credits: 3
This course builds on Generalist Social Work Research. Students who are in the Direct Practice specialization track who are completing this course will be equipped to understand frameworks, goals, methods, approaches, and principles of applied research. They will gain knowledge and skills to conduct and consume research that employs quantitative, qualitative, and/or mixed methods. The course will provide deeper knowledge and understanding of Program Evaluation and CBPR frameworks and processes to conduct applied research that engages stakeholders, research partners, and participants to produce information designed to impact knowledge, practice, decision making, and policy. The course objectives are the following: Build on knowledge and skills as a researcher and consumer of research. Deepen understanding of a range of epistemologic and ontologic orientations of research and the need for reflexivity of the researcher. Understand how to evaluate "fit" between core questions and methods, including focus on the potential contributions of quantitative, qualitative, and mixed method approaches. Understand dynamics of working in research partnerships and be cognizant of power dynamics that may undermine research integrity and reproduce oppressive processes and structures.

Academic Career: Graduate
Course Component: Lecture

Understand how to evaluate "fit" between core questions and methods, including focus on the potential contributions of quantitative, qualitative, and mixed method approaches. Understand dynamics of working in research partnerships and be cognizant of power dynamics that may undermine research integrity and reproduce oppressive processes and structures.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

SWRES 2045 - QUALITATIVE RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to selected methods of qualitative research. These methods are applicable to investigating questions which arise in social work practice situations and can be used to evaluate interpersonal practice. Qualitative designs, data acquisition strategies, and analytic techniques, including the use of computers, will be examined through both formal descriptions and studies that exemplify their use.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2047 - COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 3
Maximum Credits: 3
This course is intended for students primarily focused on community organizing who want to better understand theories, principles and methods of applied, action research with communities and community partners, as well as how Community-based Participatory Research (CBPR) is used in community planning and organizing to address local issues and social needs. This course is proposed to be coordinated with COSA field placements in the east end of Pittsburgh, especially Homewood, and will serve as an integrated field seminar for these students.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work
SWRES 2051 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the feasibility of using single-subject methodology to evaluate effectiveness in social work practice. Single-subject research designs are examined in terms of self-monitoring and external monitoring approaches. Different social work contexts are illustrated in order to demonstrate contextual situations to which single-subject designs may be applied. Each student is expected to carry out a self-monitoring project or use single-subject research in work with a client.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 3020 - RESEARCH METHODS 1

Minimum Credits: 3  
Maximum Credits: 3  
Basic design issues are explored and related to specific survey research skills, such as sampling, questionnaire construction, and measurement, issues, and data collection. Alternative research designs will also be explored. The relationship of research design and methods of casual inference will be emphasized.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Social Work students only.

SWRES 3021 - MULTIVARIATE ANALYSIS

Minimum Credits: 4  
Maximum Credits: 4  
A class research project will be designed and implemented. Alternative data analysis strategies will be learned and applied to the project data.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Social Work students only.

SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1

Minimum Credits: 1  
Maximum Credits: 1  
Research Capstone 1 involves instruction in the developmental process and refining of a research question and conceptualization attached to (1) data collected as part of the students' GSA experience, or (2) secondary data available to the student. If neither of these sources of data is relevant, the student should register for 2-3 credits of directed study to enable the collection of new data that will be the basis for later data analysis and manuscript preparation to be conducted in research capstone 2 (SWRES 3023, 3 credits, Spring term). The Capstone 1 experience involves implementation of skills in the preparation and writing of an introduction section for an APA-style empirical research paper. The end product for this term is a well-written introduction for the study that will be completed in the Capstone 2 course.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Social Work students only.

SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2

Minimum Credits: 3  
Maximum Credits: 3  
In the Spring term of the capstone sequence, the student will complete the data analysis and write the method, results, and discussion sections of the manuscript. Included in this will be instruction in the preparation of tables and figures in APA style and format. Some lecture time may be devoted to
statistical and psychometric procedures. Some instruction will be individualized to address the specific methodological and analytic issues raised within each student's study purpose. Each section of the manuscript will be reviewed and evaluated with feedback guiding subsequent drafts resulting in a submission-ready paper. The goal of Capstone 2 is to have a final paper ready for submission to a peer-review journal by the end of the term.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3024 - DIRECTED STUDY-RESEARCH PRACTCM

Minimum Credits: 3
Maximum Credits: 3
Provides students an opportunity to work with faculty on research projects carrying out specific research skills leading to publication of findings.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWRES 3029 - INFERNTL STAT SOCL WORKERS

Minimum Credits: 3
Maximum Credits: 3
This course deals with bivariate statistical procedures (e.g. t-tests, one-way analysis of variance, correlation and regression) applied to social work and social research problems. Solutions to the research/statistical problems are achieved by use of both mainframe computer (primarily SPSSX) and microcomputer programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3040 - DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 9
The doctoral dissertation represents a new, creative effort at a level higher than that expected in the competency paper. A doctoral student may register for dissertation research credits after successful completion of the competency, during any semester in which he/she is working on a dissertation and has completed course requirements.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Sociology

SOC 2035 - RACE & ETHNICITY

Minimum Credits: 3
Maximum Credits: 3
This course introduces graduate students to race and ethnicity. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2036 - BODY AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2101 - SOCIOLOGICAL THEORY CLASSICAL

Minimum Credits: 3
Maximum Credits: 3
The course provides an opportunity for in-depth study of selected writings of Karl Marx, Max Weber, Emile Durkheim and at least one other of the "classical originators" of the sociological discipline (Georg Simmel or Alexis de Tocqueville, for example). With appropriate flexibility depending on the "fourth figure" selected, the primary issues chosen for comparative examination are conceptions of the nature of knowledge, modes of theoretical reasoning, and principal substantive concerns addressed by these writers over the course of their lives.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2102 - SOCIOLGCL THRY POST CLASSICAL

Minimum Credits: 3
Maximum Credits: 3
This course surveys the major works of post-classical and contemporary sociological theory. These are discussed from the standpoint of how they built upon, revised and extended the classics and how they are relevant to us today. Relevant selections from classical sociological theory are also covered.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2201 - INTRODUCTION TO SOCIAL STATISTICS

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to social statistics. Topics include descriptive statistics, frequency distributions, hypothesis tests, bivariate associations, and data visualization. This course emphasizes the application of statistics to the social sciences and requires no prior knowledge of statistics. Students will leave the course with a broader understanding of how statistics can be utilized in social scientific research.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2202 - QUANTITATIVE METHODS

Minimum Credits: 3
Maximum Credits: 3
Complementing courses on qualitative methods, computer methods and statistics, this course will provide an overview of quantitative research methods in the social sciences. Topics will include specification of research able questions, experimental and quasi-experimental research designs, and will concentrate on survey research issues such as sampling, measurement, questionnaire construction and item writing, and collection and organization of data. The issues will be illustrated by sociological literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2203 - QUALITATIVE METHODS
Minimum Credits: 3
Maximum Credits: 3
This course deals with the methods of qualitative social inquiry. Students study specific qualitative techniques, such as the interview. Participant observation, analysis of documents, and unstructured observation, problems of doing research in natural settings are also considered.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2204 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course studies the set of statistical methods called regression analysis. It solidifies and extends students quantitative and statistical data analysis skills. The course focuses primarily on linear regression, including modeling techniques for continuous, binary, ordinal, and count data. Students will leave the course with the tools necessary to analyze a variety of social science data. This course assumes some knowledge of statistics (descriptive statistics, frequency distributions, hypothesis tests, and bivariate associations). To register, students must have taken Introduction to Social Statistics (SOC 2201) or an equivalent class.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2205 - RESEARCH DESIGN

Minimum Credits: 3
Maximum Credits: 3
Sociology uses many forms of research methods. These range from large scale quantitative surveys to in depth qualitative participant observation studies. Designing a research project involves selecting methods appropriate for the research problem, taking account of resources, what is already known, and other factors. This course will cover the conceptual, philosophical, and technical issues that sociologists must deal with to design a research project.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2251 - THEORIES OF GENDER AND SEXUALITY

Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of important tendencies and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship as well as foundational readings. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines (including anthropology, history, law, economics, philosophy, and literary studies) and sampling a range of methodologies, this course will work through some of the key movements and problems that have shaped and continue to shape contemporary thinking about gender and sexuality. Readings are likely to include works by Lila Abu-Lughod, Judith Butler, Nancy Chodorow, Patricia Hill Collins, R.W. Connell, Michel Foucault, Nancy Fraser, Linda Gordon, Judith Halberstam, Chandra Mohanty, Uma Narayan, and Joan Scott.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Attributes: Gender, Sexuality & Women's St

SOC 2301 - ENVIRONMENTAL SOCIOLOGY

Minimum Credits: 3
Maximum Credits: 3
The course seeks an understanding of the evolution of human societies in their physical environments and resource bases. The ways in which humans use energy and matter is crucial. The time frame for the course is that of human history. Harsh and benign environments will be considered as well as
the rise and fall of civilizations. Throughout, the role of technology will be kept central in an understanding of the interface between a society and its environment.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**SOC 2303 - POLITICAL SOCIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
The variety of political arrangements in the twenty-first century presents a number of puzzles that will make up the subject matter of this course. Are differing forms of government to be explained by levels of economic development, institutional histories, the actions of social movements, transnational constraints or slow-changing national political cultures? Is the state an autonomous actor or the creature of other social forces? Is "legitimacy" a useful concept? Why has it been difficult to agree on what "democracy" is? Are regime changes consequences of some sort of "structural" change, effective actions by regime opponents, or simply consequences of rulers' blunders?

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Russian & East European Studies

**SOC 2306 - SOCIOLOGY OF REVOLUTION**

Minimum Credits: 3  
Maximum Credits: 3  
An inquiry into various theories, frameworks and models elaborated by social scientists to explain the origins, dynamics and outcomes of this most complex matrix of social change.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Latin American Studies, Russian & East European Studies

**SOC 2309 - CULTURE AND POWER**

Minimum Credits: 3  
Maximum Credits: 3  
This graduate seminar will explore the power of culture and the culture of power through different theoretical perspectives. We are especially interested in issues of cultural resistance, transformation, domination, hierarchy, and colonialism. We will also explore how culture and power shape collective and individual identities especially in societies undergoing radical transition. Our discussion will include cases from Japan, India, Germany, England, and others.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**SOC 2311 - POLITICS AND CULTURE**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces graduate students to politics and culture. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**SOC 2314 - SOCIOLOGY OF EDUCATION**
Minimum Credits: 3
Maximum Credits: 3
This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

SOC 2341 - SOCIAL MOVEMENTS

Minimum Credits: 3
Maximum Credits: 3
Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements, their development over time and what changes, if any, are brought about to the social system in which the movements occurred.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Russian & East European Studies

SOC 2342 - CULTURAL SOCIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course involves discussion of the main trends in the sociological consideration of systems and patterns of beliefs, values and symbols and the social vehicles in terms of which culture is produced, sustained and interrupted. It is particularly concerned with the theoretical issue of the place of culture in sociological analysis, on the one hand, and interpretations of contemporary cultural phenomena, on the other. Thus the course has both theoretical and empirical components.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2350 - GENDER AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's St

SOC 2402 - ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This course introduces graduate students to organizations. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2403 - KNOWLEDGE AND SOCIETY: SEX, GENDER, SEXUALITY, AND THE BRAIN SCIENCES
Minimum Credits: 3
Maxium Credits: 3
This course surveys scientific theories of biological sex, sex/gender/sexual difference, and their intersections with feminist and queer approaches to gender and sexual diversity, with specific application to the biomedical and behavioral brain sciences. We will attend closely to the interplay of diverse bodies, scientific approaches, and social institutions with regards to concepts, methods, theories, and empirical findings. In addition to some historical background, we will explore debates over sex/gender and sexual differences and diversity as conceived, discovered, imaged, explained, and treated in late-20th and early-21st century neurosciences and their discontents.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2429 - SOCIOLOGY OF GENDER

Minimum Credits: 3
Maxium Credits: 3
This graduate seminar surveys the Sociology of Gender as terrain of study, research, and theory.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2432 - GENDER EQUALITY AND THE UNITED NATIONS

Minimum Credits: 1.5
Maxium Credits: 1.5
In this year-long transdisciplinary course, students will collaborate directly with the United Nations Development Program (UNDP) and other partner institutions on policy-relevant research on gender inequality in public institutions worldwide. Students will develop their skills in data collection, analysis, and reporting. Students' research will feed into an ongoing Pitt-UNDP collaboration and support gender equality as part of the United Nations 2030 Agenda for Sustainable Development. Students will have professional opportunities to interact with policymakers and practitioners at international and national levels, and are expected to present their research at the UN Secretariat in New York City during the spring semester. This course operates in conjunction with an internship program that places select students as junior researchers in partner institutions during the summer following the course.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2465 - SOCIOLOGY OF GLOBALIZATION

Minimum Credits: 3
Maxium Credits: 3
The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline that portrays human society as a nested collection of interdependent societies. In particular, the course draws from world-systems analysis, world society, and other relevant approaches as well as from related disciplines such as anthropology, geography, and political science to consider how the 'development project' of the 20th century has evolved over time. The impacts of global economic integration on cultural and institutional change, gender relations, inequality, climate change, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how globalization and global institutions like the World Bank, IMF, and United Nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2902 - DIRECTED STUDY FOR MA STUDENTS

Minimum Credits: 1
Maxium Credits: 12
Registration is limited to students in good academic standing who wish to study or carry out a project in an area not normally available in a regular
course. The work must be under the direct supervision of a faculty member.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**SOC 2971 - GRADUATE WRITING FOR PUBLICATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate course will focus on practical advice for successfully turning master's thesis, seminar papers, and dissertations into journal articles and books. Students enrolled in the course will learn skills for writing and revision and gain understanding of the publishing process for academic journals and presses, as well as ideas for developing a successful work process and setting achievable writing goals. Course will be organized to allow students to work intensively on a writing project, with the goal of having a publishable article or manuscript by end of term.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Sociology(MA)

**SOC 2990 - INDEPENDENT STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 12  
All graduate study not under the direct supervision of a specific faculty member. Especially intended for those who must be registered to fulfill TA/TF requirements but no longer need formal course work. Must be approved by the student's formally validated committee chairperson at the time of registration.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**SOC 3191 - SOCIAL STRATIFICATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 3291 - TOPICS IN POLITICS AND CULTURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores selected topics in politics and culture. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 3292 - TRADITIONS AND SOCIAL CHANGE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course explores one of the least explored areas of social theory, namely the idea of "tradition" from a global and comparative perspective. It combines both theoretical and empirical materials from different societies and different time periods. It asks questions about how dynamics of social changes are affected by specific traditions; the extent to which traditions are real or imagined social realities; how "traditional" people debate their own traditions; the factors that make something new appear tolerable; and the way by which trajectories of social change are affected by various traditions. The goal is to contribute to a comparative global understanding of modernization processes, as well as explore factors that are tied to what
we call novelty, creativity, and innovation.

**SOC 3391 - TOPICS IN SOCIOLOGY OF CULTURE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- This course explores selected topics in sociology of culture. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.

**SOC 3398 - TOPICS IN SOCIAL MOVEMENTS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- The specific content of this course will vary from term to term. This course will focus on intensive study of important areas of social movement research and theory. Examples of such content are strategic action in social movements; the structure-agency debate in social movements; new theorizing in social movements; gender and social movements; and race and social movements. Background requirements, if any, will be announced with each offering of the course.

**SOC 3400 - QUANTITATIVE ANALYSIS FOR PUBLICATION**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- This course is a research practicum, where students work intensively on a research project using quantitative methods. Students may enter the class with their own research question and data to analyze, or they may work with other students and/or the instructor on a collaborative project. This course is designed to advance students' skills in research design, data analysis, and writing up quantitative results. The course goal is for students to develop a sole- or co-authored manuscript for publication.

**SOC 3493 - TOPICS IN SOCIOLOGY OF RACE & ETHNICITY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

**SOC 3591 - TOPICS IN SOCIOLOGY OF GENDER**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- This course explores selected topics in sociology of gender. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.
Grade Component: Grad LG/SNC Basis
Course Attributes: Gender, Sexuality & Women's St

SOC 3593 - TOPICS IN GLOBAL & TRANSNATIONAL SOCIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course explores selected topics in global and transnational sociology. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3595 - TOPICS IN ORGANIZATIONAL SOCIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course explores selected topics in organizational sociology. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3597 - TOPICS IN URBAN SOCIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course explores selected topics in urban sociology. The specific content of this course will vary from term to term. Background requirements, if any, will be announced with each offering of this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3902 - DIRECTED STUDY FOR PHD STUDENTS

Minimum Credits: 1
Maximum Credits: 12
Registration is limited to students in good academic standing who wish to study or carry out a project in an area not normally available in a regular course. The work must be under the directed supervision of a faculty member. The student is required to fill out departmental form outlining the study program and have it approved by the appropriate faculty person.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

SOC 3903 - CMPRHNSV EXAMINATION PREPARATION

Minimum Credits: 1
Maximum Credits: 6
Comprehensive examination preparation.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

Spanish
SPAN 2224 - SPECIAL TOPICS IN CULTURAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course allows students to do in-depth research in various aspects of contemporary culture.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Latin American Studies

SPAN 2225 - SEMINAR: SPECIAL TOPICS CULTURAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course provides students with the opportunity to do in-depth research in various aspects of contemporary culture and to present it both orally and in written form.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2226 - READING IN CRITICAL THEORY

Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/knowledge, desire and the subject. Each year a different area or topic is chosen.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Attributes: Global Studies, Latin American Studies, West European Studies

SPAN 2300 - PROFESSIONAL WRITING: PROSPECTUS, PAPERS, GRANTS

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the formulation of individual research problems in preparation for thesis research. Course requirements center around the development of a dissertation prospectus, and will include research design, review of area and theoretical literature, and significance of the proposed project. Additionally, the preparation of conference papers and articles for publication, as well as how to prepare grant proposals for funding agencies will be explored.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2307 - METHODS OF TEACHING SPANISH

Minimum Credits: 3
Maximum Credits: 3
This course provides graduate student teaching assistants/fellows/instructors with the knowledge and skills needed to teach an elementary- or intermediate-level foreign language class in an institution of higher education (i.e., language and literature departments at the University of Pittsburgh). Students will learn about contemporary theories and research on foreign and second language learning and acquisition, but much of the course content will focus on praxis and strategies related to classroom-based language teaching. Topics will include contextualized language instruction, communicative and task-based instruction, content-based instructional methods, equitable and inclusive teaching practices, and strategies for teaching grammar, vocabulary, and linguistic competencies (reading, writing, listening, speaking). Students will be assessed via practice-based projects and self and peer evaluations. This course is taught in English, but speakers of all linguistic backgrounds are welcome, and examples will be taken from a wide variety of languages offered at Pitt. Pre-requisites: None, but students should have graduate standing in a language and literature department at the University of Pittsburgh. Other students interested in this course should contact the instructor directly.
SPAN 2404 - PRE-COLUMBIAN TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with specific topics on various aspects of the Mayan, Aztec and Quechuan cultures.

SPAN 2410 - DISCOVERY AND CONQUEST

Minimum Credits: 3  
Maximum Credits: 3  
This course offers an introductory survey of the Spanish and Latin American literature of the sixteenth and early seventeenth centuries through some of the main texts of the period.

SPAN 2422 - COLONIAL TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with the basic texts of the Cronistas and other writers of the Colonia, concentrating on an in-depth study of their ideological points of view.

SPAN 2428 - LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with various topics ranging from romanticism to positivism to modernism, in an attempt to develop a concept of the changing cultural and economic climates in which literature was produced in the second half of the nineteenth century.

SPAN 2429 - SEM LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This seminar offers students the opportunity to do original research in the various areas of romanticism, positivism and modernism, in an attempt to develop a better understanding of the various ideological currents in which Latin American literature developed in the second half of the nineteenth century.
SPAN 2445 - SEMINAR: VANGUARD

Minimum Credits: 3
Maximum Credits: 3
This course offers students the opportunity to do research in various aspects of vanguard literature and thought.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2450 - CONTEM LATIN AMERICAN NARRATIVE

Minimum Credits: 3
Maximum Credits: 3
This course deals with Latin American narrative since 1945, treating in depth the narrative production of the boom and the post-boom periods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Latin American Studies

SPAN 2452 - CONTEM latin american film

Minimum Credits: 3
Maximum Credits: 3
This course surveys a representative sampling of recent Latin American film, primarily feature films made for commercial distribution, but also socio-political documentary.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2460 - LATIN AMERICAN DRAMA

Minimum Credits: 3
Maximum Credits: 3
This course studies representative examples of contemporary Latin American drama from a literary as well as a sociocultural point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2461 - LATIN AMERICAN NOVEL

Minimum Credits: 3
Maximum Credits: 3
This course deals with the theory and development of the novel as seen through various exemplary texts of several periods, with emphasis on the boom and post-boom periods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: Latin American Studies

SPAN 2462 - LATIN AMERICAN POETRY
Minimum Credits: 3  
Maximum Credits: 3  
This course will deal with representative contemporary poets of various Latin American countries as well as specific movements and tendencies of the twentieth century.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Latin American Studies

**SPAN 2463 - LATIN AMERICAN SHORT STORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the origins and development of the short story in Latin American literature through the analysis of selected texts from romanticism to the post boom.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**SPAN 2464 - LATIN AMERICAN 20THC TOPICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will deal with specific topics of contemporary Latin American culture, using primarily literary but also other types of texts, including periodicals, film and television productions.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Attributes: Latin American Studies

**SPAN 2465 - SEMINAR: 20TH CENTURY TOPICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will allow students to do research in topics of interest to them, involving primarily literary texts but not necessarily restricted to these types of documents.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**SPAN 2585 - BEYOND THE REVOLUTION: ARTS, LITERATURE AND PERFORMANCE IN POST-REVOLUTIONARY CUBA 1959-PRESENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course will analyze the development of the Cuban cultural field under the Revolution's socio-political project. The analysis will focus on the dialogue established between fundamental literary texts, visual art, and performance, and the specific historical circumstances.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**SPAN 2634 - BAROQUE TOPICS**

Minimum Credits: 3  
Maximum Credits: 3
This course deals in-depth with various Baroque topics and builds on a prior survey of baroque literature.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Latin American Studies, West European Studies

**SPAN 2635 - SEMINAR: BAROQUE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals in-depth with various Baroque topics.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2657 - 19TH CENTURY TOPICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with various nineteenth century topics, including romanticism, positivism and early modernism, with special emphasis on national and continental movements and tendencies.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2695 - SEMINAR: 20TH CENTURY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals in depth with various topics of the literature and culture of the Franco and post-Franco periods.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2704 - SPEC TOPICS LITERARY CRITICISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2705 - SEMINAR: LITERARY CRITICISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals in-depth with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2902 - MA DIRECTED STUDY**
Minimum Credits: 1
Maximum Credits: 3
Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

SPAN 2910 - COMPREHENSIVE EXAMINATION MA

Minimum Credits: 3
Maximum Credits: 3
This course is intended for students taking the ma comprehensive/Ph.D. preliminary examination.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

SPAN 2950 - SPANISH TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 6
This practicum provides graduate students in the department of Hispanic languages and literatures the opportunity to gain teaching experience at another institution of education. In addition to teaching, the student will evaluate the approach/method used at the institution in question and meet at regular intervals with the Spanish language coordinator at the University of Pittsburgh to discuss his/her experiences and observations.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

SPAN 2990 - MA COMPREHENSIVE INDEPENDENT

Minimum Credits: 1
Maximum Credits: 3
Students work independently on projects or areas of their own definition in preparation for the ma comprehensive examination and the PhD preliminary examination.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Attributes: West European Studies

SPAN 3000 - PHD DISSERTATION

Minimum Credits: 1
Maximum Credits: 12
Students work individually under the guidance of their dissertation director in preparation for and during the writing of the dissertation.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Attributes: West European Studies

SPAN 3902 - PHD DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Attributes: West European Studies

SPAN 3905 - TEACHING APPRENTICESHIP

Minimum Credits: 1
Maximum Credits: 12
Available to Ph.D. students who will work with a faculty member in teaching an upper level literature, language or civilization course.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

SPAN 3910 - COMPREHENSIVE EXAMINATION, PH.D

Minimum Credits: 1
Maximum Credits: 6
This course is intended for Ph.D. candidates the term they present themselves for their Ph.D. comprehensive examination.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Attributes: West European Studies

SPAN 3990 - PHD INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
Students work independently on projects or areas of their own definition to develop their dissertation topic and in preparation for the dissertation overview.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Attributes: West European Studies

Sports Medicine

SPMED 2000 - ANATOMICAL BASIS SPORTS MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Course will include dissection of the human cadaver and will emphasize the musculoskeletal, articular, nervous, and vascular systems. Dissection experiences will be supplemented with classroom lectures. The role of anatomical structures as they relate to athletic injury mechanism, evaluation, and rehabilitation will be emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Sports Medicine (Health and Rehabilitation Scs-MS)

SPMED 2010 - PATHOKIN ORTHOPADC/ATHL INJURIES

Minimum Credits: 3
Maximum Credits: 3
Course will provide a detailed and sequential approach to the assessment and treatment procedures utilized for management of orthopedic related athletic injuries. Course is divided into regional techniques appropriate for management of specific athletic injuries. Course will present techniques which should be utilized to functionally assess the athlete's readiness to return to preinjury activities following rehab of the orthopaedic injury.

Academic Career: Graduate
SPMATH 2020 - MUSCULOSKELETAL ASSESSMENT AND INJURY PREVENTION

Minimum Credits: 3  
Maximum Credits: 3  
The first part of the course will present the assessment and evaluation techniques necessary to accurately diagnose and prevent musculoskeletal injury. The student will be presented with the necessary information regarding the tissue(s) involved (anatomy/functional anatomy); the signs and symptoms in relation to the injury and tissue(s); and the evidence for determining the most sensitive and specific assessment evaluation and assessment techniques/tools. The second part of the course will include lecture/demonstrations by the students enrolled in the course. Students will select a specific condition or pathology and lead a lecture and lab demonstration providing an overview of the objectives related to the course content.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SUBPLAN: Sports Medicine

SPMATH 2030 - INJURY EPIDEMIOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This introductory course in injury epidemiology will address injury epidemiology, and concepts in basic epidemiology and biostatistics related to injury surveillance, prevention and control. The epidemiological perspective of injuries will address the concepts in the Haddon's matrix and classic epidemiologic triad; current injury epidemiology research needs and injury as a public health issue. Topics addressed will include epidemiology of injuries in developed and developing countries, and injuries in vulnerable populations.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Sports Medicine (MSSPM-SP)

SPMATH 2040 - SEMINAR IN SPORTS MEDICINE

Minimum Credits: 3  
Maximum Credits: 3  
Course designed to address a variety of current issues and technical advancements in sports medicine. Course divided into three units including a medical, legal, and ethical issues in sports medicine unit. The second unit will focus on the unique and newly developed technical advances in the field supported by the current research. Final unit will address the research and clinical application of isokinetic testing devices.

Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPMATH 2626 - SPECIAL TOPICS IN EATING BEHAVIOR

Minimum Credits: 3  
Maximum Credits: 3  
This class will introduce students to a range of eating behaviors, eating disturbances and body weight issues in the general populations. A primary aim of the course is expose students to the many factors that influence eating behaviors including lifestyle, environment, sport, and pathology. A second aim is to enable students to synthesize and evaluate current research on disordered eating in the general population, and in athletes, with the goal of coming to understand the role of the scientific literature in evidence-based practice. A third aim of this course is to empower students to develop, implement and evaluate presentations and programs on special topics related to eating behavior.

Academic Career: Graduate  
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**SPMED 2628 - NUTRITION AND PERFORMANCE WITH LAB**

Minimum Credits: 3
Maximum Credits: 3
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise. Topics presented include energy release and substrate utilization, energy metabolism during exercise, fluid intake and athletic performance, body composition, vitamins and minerals, nutrition for training and competition, sports specific considerations, fitness and nutrition assessment in athletes, and special issues, such as vegetarian diets, and environmental obstacles.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**SPMED 2650 - EXERCISE PHYSIOLOGY**

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**SPMED 3000 - RESEARCH SEMINAR SPORTS MEDICINE**

Minimum Credits: 3
Maximum Credits: 3
Course is designed to introduce student to critical review of research in sports medicine. Students will critique research problems, methodology, analysis and clinical application of published manuscripts. Course will provide student with an opportunity to present and discuss paradigms and specific research proposals that are being developed for completion of thesis and dissertation requirements.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HRS-MS (MSSPM-SP), HRS-MS (MSSPSC-SP) Restricted to MS-Sports Medicine and MS-Sports Science students only.

**SPMED 3010 - LABORATORY TECHNIQUES 1**

Minimum Credits: 3
Maximum Credits: 3
Course is designed to provide an overview of clinical research paradigms within sports medicine. Student will be introduced to lab testing techniques related to neuromuscular mechanisms associated with sport and orthopedic injuries and develop lab proficiency with components on neuromuscular profiling. Will provide student with acquire data management and analysis techniques and develop research related writing skills necessary to complete thesis and dissertation requirements as well as provide a basis for future scholarly activities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: HRS-MS (MSSPM-SP), HRS-MS (MSSPSC-SP), SPRTSCI-MS or SPRTMED-MS Restricted to MS-Sports Medicine and MS-Sports Science students only.
SPMED 3020 - LABORATORY TECHNIQUES 2

Minimum Credits: 3
Maximum Credits: 3
Advance graduate level course into the mechanical, neuromuscular and anatomical bases of human movement. Course is to expand the prerequisite knowledge in basic biomechanics as applied to sports medicine. Students will learn quantitative techniques in kinematics, inverse dynamics, and energetic of human movement. Students will also expand on their basic knowledge of programming so as to be able to process data in an autonomous manner.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

Sports Science

SPSCI 2020 - MUSCULOSKELETAL ASSESSMENT AND INJURY PREVENTION

Minimum Credits: 3
Maximum Credits: 3
The first part of the course will present the assessment and evaluation techniques necessary to accurately diagnose and prevent musculoskeletal injury. The student will be presented with the necessary information regarding the tissue(s) involved (anatomy/functional anatomy); the signs and symptoms in relation to the injury and tissue(s); and the evidence for determining the most sensitive and specific assessment evaluation and assessment techniques/tools. The second part of the course will include lecture/demonstrations by the students enrolled in the course. Students will select a specific condition or pathology and lead a lecture and lab demonstration providing an overview of the objectives related to the course content.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2030 - INJURY EPIDEMIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This introductory course in injury epidemiology will address injury epidemiology, and concepts in basic epidemiology and biostatistics related to injury surveillance, prevention and control. The epidemiological perspective of injuries will address the concepts in the Haddon's matrix and classic epidemiologic triad; current injury epidemiology research needs and injury as a public health issue. Topics addressed will include epidemiology of injuries in developed and developing countries, and injuries in vulnerable populations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2040 - SEMINAR IN SPORTS MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Course designed to address a variety of current issues and technical advancements in sports medicine. Course divided into three units including a medical, legal, and ethical issues in sports medicine unit. The second unit will focus on the unique and newly developed technical advances in the field supported by the current research. Final unit will address the research and clinical application of isokinetic testing devices.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
SPSCI 2100 - ADVANCED HUMAN PERFORMANCE AND TESTING

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with advanced knowledge in the field of human performance training and evaluation through classroom lectures and laboratory/field experiences. Topics include developing and testing strength, speed, power, agility, endurance, stability, and flexibility.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2110 - SPORTS SCIENCE PRACTICUM 1

Minimum Credits: 3
Maximum Credits: 3
This course will provide supervised practical experience in the area of sports science. It provides the students with the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate an increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. This course is the first of three courses which will provide sports science practical experience. In this course the initial skills required of a sports scientist will be mastered: sport/athlete assessment, performance testing, developing a training plan, athlete monitoring/tracking, and data management. During this course, the student will begin to develop and construct their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the field of sports science or the site's Sports Science/Performance Department's goals. This is a 3 term project that will continue into HRS 2627: Sports Science Practicum 2 and HRS 2630: Sports Science Practicum 3.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2120 - SPORTS SCIENCE PRACTICUM 2

Minimum Credits: 3
Maximum Credits: 3
This course is the second of three courses which will provide supervised practical experience in the area of sports science. It provides the students with the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. Students will be assigned to their same primary site as the fall term; however, selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2626 and will provide the students supervised practical experiences to develop and master new skills including calculating and assessing athlete data and training regimens. During this course, the student will continue their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the field of sports science or the site's Sports Science/Performance Department's goals. This is a three-term project that will build on the project content from HRS 2626.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2130 - SPORTS SCIENCE PRACTICUM 3

Minimum Credits: 3
Maximum Credits: 3
This course is the third of three courses which will provide supervised practical experience in the area of sports science. It provides the students with
the opportunity to apply their knowledge of sports science, performance, and testing/monitoring in an athletic setting. This involves planned learning experiences with an athletic team at various stages of the training program and season. Students will have the opportunity to observe and then model the functions of a performance specialist. Through the combination of planned learning activities and professional interaction, the students will demonstrate an increasing level of proficiency in providing and evaluating comprehensive training to athletes and teams within the athletic setting. Students will be assigned to their same primary site as the fall and spring term; however, selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2626 and HRS 2627 and will provide the students supervised practical experiences to develop and master new skills including interpreting athlete/team data, implementing training plans, and evaluating outcomes. During this course, the student will complete their Capstone project. This project will give each student the opportunity to work independently on a sports science or performance outcome with their practicum site. The project should focus on an area that is relevant to the site's Sports Science/Performance Department and/or the field of sports science. This is a three-term project that will build on the project content from HRS 2626 and HRS 2627.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2140 - SPORTS SCIENCE DATA ANALYTICS

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to statistical methods and computer programming that are essential for data scientists. This course covers fundamental statistics from the perspective of data science in sports and how to apply various statistical methods to data science. This course provides introduction to the two of the most widely used statistical programming tools in data science: R and Python. Prior experience in R and Python is not expected in this course, however, familiarity with basic statistical concepts and modern programming language will be very useful. The approach of this course is practical, hands-on and project oriented. The goal of the course is to provide students with skills of solving various problems in health informatics using R and Python.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2150 - APPLIED SPORTS SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of sports science and the role of a sports scientist in the applied setting. Topics covered will include training theory, needs analysis, athlete monitoring/assessment, managing data/analytics, and communicating information.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

SPSCI 2628 - NUTRITION AND PERFORMANCE WITH LAB

Minimum Credits: 3
Maximum Credits: 3
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise. Topics presented include energy release and substrate utilization, energy metabolism during exercise, fluid intake and athletic performance, body composition, vitamins and minerals, nutrition for training and competition, sports specific considerations, fitness and nutrition assessment in athletes, and special issues, such as vegetarian diets, and environmental obstacles.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

SPSCI 2650 - EXERCISE PHYSIOLOGY
The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### SPSCI 3000 - RESEARCH SEMINAR SPORTS MEDICINE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course is designed to introduce student to critical review of research in sports medicine. Students will critique research problems, methodology, analysis and clinical application of published manuscripts. Course will provide student with an opportunity to present and discuss paradigms and specific research proposals that are being developed for completion of thesis and dissertation requirements.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### SPSCI 3020 - LABORATORY TECHNIQUES 2

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Advance graduate level course into the mechanical, neuromuscular and anatomical bases of human movement. Course is to expand the prerequisite knowledge in basic biomechanics as applied to sports medicine. Students will learn quantitative techniques in kinematics, inverse dynamics, and energetic of human movement. Students will also expand on their basic knowledge of programming so as to be able to process data in an autonomous manner.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### Statistics

#### STAT 0200 - BASIC APPLIED STATISTICS

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression the analysis of variance, and contingency tables. Students will learn how to use a statistical computer package.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

#### STAT 1000 - APPLIED STATISTICAL METHODS

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is an intensive introduction to statistical methods. It is designed for students who want to do data analysis and to study further ideas in applied statistics beyond this course. The topics covered include descriptive statistics, elementary probability, random sampling, controlled experiments, hypothesis testing, regression and the analysis of variance. Emphasis will be placed on the statistical reasoning underlying the methods.
Students will also become proficient at the use of a statistical software package.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**STAT 1151 - INTRODUCTION TO PROBABILITY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents at both a theoretical and applied level the basic probability concepts required for statistical inference. Topics include set theory and basic probability, independence and Bayes' theorem, discrete random variables and their distributions--Bernoulli, Binomial, Poisson, and geometric, continuous random variables and their distributions--uniform, exponential, gamma, beta, and normal, transformation of random variables, moment and moment generating functions, multivariate discrete distribution, marginal and conditional distribution and independent variables.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: MATH 0230 or 0235 or 0240 or 0245

**STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces the elementary concepts of statistical inference. Topics include functions of random variable, sampling distributions, decision criterion, estimation, hypothesis testing, regression, analysis of variance, and non-parametric methods.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: STAT 1151

**STAT 2001 - RESEARCH AND THESIS FOR MS DEGREE**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**STAT 2020 - TEACHING SEMINAR**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis

**STAT 2131 - APPLIED STATISTICAL METHODS 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This introductory graduate level course on applied statistics covers a wide variety of problems. We begin with simple data description and go on to standard estimation and testing problems. We then study various types of linear models. We make extensive use of the computer; the student will learn BMDP and Minitab.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
STAT 2132 - APPLIED STATISTICAL METHODS 2

Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of STAT 2131.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2131

STAT 2200 - APPLIED NONPARAMETRIC STATISTICS

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course will be to prepare students to use standard nonparametric tests for problems that frequently occur in applications. The Wilcoxon, Fisher (sign), Ansari-Bradley, Miller (jackknife), Kruskal-Wallis, Kendall, and Kolmogorov-Smirnov tests will be discussed. Minitab subroutines will be used to facilitate computation. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2210 - APPLIED CATEGORICAL DATA ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide contingency table techniques for research workers in the social sciences, medical sciences and other areas where it is necessary to investigate relationships between qualitative variables. Course deals with the Chi-square test and standard 2x2 and RXC contingency tables, as well as log-linear and other special types of contingency tables analysis. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2220 - APPLIED REGRESSION

Minimum Credits: 3
Maximum Credits: 3
This course covers simple linear regression (one variable) and one way analysis of variance followed by more complicated regression models. More complex ANOVA models are treated if time permits. Some computer applications will usually be considered. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course is concerned with statistical methods for describing and analyzing multivariate data.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2240 - APPLIED SAMPLING
Minimum Credits: 3
Maximum Credits: 3
This course considers basic applied principles and approaches for conducting a sample survey. The following will be discussed: how to design a survey, how to analyze a survey with attention paid to different types of survey techniques and corresponding statistical methods. The course will provide survey skills for the social sciences, psychology, economics, marketing and management, and health sciences. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

STAT 2250 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course teaches students to design valid statistical experiments and to analyze them. Among the designs considered are: completely randomized designs, randomized block designs, Latin lemmas, factorial designs, and complete block designs. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 2250 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course is involved with statistical methods for quality and process control. It is intended for all students who will use statistics in an industrial setting. Introductory topics include probability models and statistical estimation for quality. The main focus will be on control charts and tolerances. Acceptance sampling will also be discussed. A final but quite important topic will be Taguchi methods. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2260 - PRINCIPLES OF DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is a gentle introduction to data science. Data science is an emerging interdisciplinary field stemming from statistics, mathematics and computer science. At its core, data science involves using automated methods to analyze massive amounts of data and to extract knowledge from them. The objective of this course is to provide students with a principled introduction to data science that properly combines inferential thinking and computational thinking. Students will learn the fundamental pipeline of data science, ranging from data acquisition, data clean-up, data exploration and visualization, modeling and inference, to professional reporting.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Graduate students in statistics or applied statistics.

STAT 2261 - SURVIVAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to cover the design and analysis of clinical trials.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
STAT 2270 - DATA MINING

Minimum Credits: 3
Maximum Credits: 3
Data mining is a collection of tools to discover patterns and relationships in data, often large observational databases. This course covers some of the main methods of data mining.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2280 - DATA SCIENCE WITH PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course is a gentle introduction to the field of data science and machine learning. You will learn how to import data, tidy and transform it, visualize it, and how to join data sets. You will also learn about training, tuning, and testing various machine learning models, and ultimately generating reproducible reports. Python as well as a collection of powerful, open-source tools will be explored and experienced within the context of solving data science problems: Jupyter notebook (creating reports) numpy (data structure) pandas (data wrangling) matplotlib (data visualization) scikit-learn (machine learning) Learning Objectives Workflow of Data Science Data Wrangling and Visualization Machine Learning Models Python and Jupyter Notebook By the end of the course, you should be able to get the data, explore it, formulate a research question, use tools and techniques in data science to explore the answer to the question, and share your findings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

STAT 2292 - TOPICS IN APPLIED STATISTICS 3

Minimum Credits: 3
Maximum Credits: 3
Various topics concerning the applications of statistics will be taught on an irregular basis depending on faculty interests and students' needs. Example of possible topics include re-sampling techniques in statistics; statistical graphics; cluster analysis; and classification methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2293 - TOPICS IN APPLIED STATISTICS 4

Minimum Credits: 3
Maximum Credits: 3
This course is a gentle introduction to the field of data science and machine learning. Major topics include data import, data wrangling, data visualization, training, tuning, and testing various machine learning models, and generating reproducible reports. Python basics and a collection of packages, such as Jupyter Notebook, NumPy, Pandas, Matplotlib, and Scikit-Learn, will be studied within the context of solving data science problems.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

STAT 2300 - STATISTICAL PACKAGES

Minimum Credits: 3
Maximum Credits: 3
This course will cover a variety of topics concerning computing and statistics. Basic statistical analysis packages such as BMPD, SPSS, Minitab, and IMSL will be discussed and compared. Other computational issues that will be discussed include simulation, graphics, elementary database management, and certain stand-alone statistical programs. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2301 - STATISTICAL COMPUTING AND INTRODUCTION TO DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the basics of statistical programming. Students will be introduced to basic machine learning topics as well as the basics of optimization. Examples from data science will be used throughout the course for demonstration.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2310 - APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
We start with the basic concepts of regression and correlation. After developing the necessary linear algebra, we will study the multivariate normal and then go on to do one or more of the following: cluster analysis, discriminant analysis, directional data, and factor analysis. We will make use of the Minitab and BMDP computer packages. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2320 - APPLIED TIME SERIES

Minimum Credits: 3
Maximum Credits: 3
The objective of the course is to present at the elementary level, a unified and reasonably complete exposition of statistical methods used in time series analysis. Serious consideration is given to both time and frequency domain approaches. Real data from a number of subject fields will be analyzed as they occur in the exposition. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2220

STAT 2321 - APPLIED ADVANCED TIME SERIES

Minimum Credits: 3
Maximum Credits: 3
This course is an attempt to provide a uniform coverage of both time domain and frequency domain time series methods which can be easily understood by students with varied backgrounds.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2360 - STATISTICAL LEARNING AND DATA SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a broad introduction to the field of data science and to expose students to many of the statistical tools most commonly used by modern data scientists. We will explore a wide variety of models and algorithms in a data-driven fashion. Topics will include modeling techniques ranging from classic statistical modeling (e.g. linear and logistic regression) to modern statistical learning (e.g. regularization and lasso) to fundamental machine learning (e.g. random forests and support vector machines). Particular attention will be given to the sorts of scientific questions that can be asked and answered within the different frameworks. Students will have the opportunity to utilize modern, interesting datasets to both provide data-driven analytical solutions and also to formally assess the uncertainty in making such determinations. The R language
will be used extensively for statistical computing. Some prior knowledge or experience with R or related programming languages is helpful but not essential.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### STAT 2381 - SUPERVISED STATISTICAL CONSULTING

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
In this course students will consult with clients in the consulting center. The consulting will be under the supervision of experienced consultants. Students will be taught how to provide statistical methods in conjunction with real problems and how to analyze and report the results.

**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: STAT 2132

### STAT 2391 - ADVANCES IN APPLIED STATISTICS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Foundations as well as recent developments in applied statistics will be discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### STAT 2392 - ADVANCES IN APPLIED STATISTICS 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Foundations as well as recent developments in applied statistics will be discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### STAT 2521 - TIME SERIES 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course focuses on the theoretical aspects of time series analysis. In this course we discuss the probabilistic foundations of time series in both the time and frequency domains. Students should have a strong background in mathematical statistics, but the course does not assume a prior knowledge of time series analysis.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### STAT 2611 - THEORY OF MULTIVARIATE ANALYSIS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course covers both classical and modern theoretical developments in multivariate statistical analysis. Topics include multivariate distributions, estimation, testing, classification, principal components, correlation analysis, dimensionality reduction, and factor analysis. Time permitting, statistics on manifolds and other special topics will be discussed.

**Academic Career:** Graduate  
**Course Component:** Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2131 and 2132 and STAT 2631

STAT 2630 - INTERMEDIATE PROBABILITY

Minimum Credits: 3
Maximum Credits: 3
This course is the first half of a two term sequence in mathematical statistics intended for undergraduate students and graduate applied statistics majors. Topics to be covered include probability concepts, random variable, discrete and continuous variables, joint distributions, functions of random variables, and some sampling distributions.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2631 - THEORY OF STATISTICS 1

Minimum Credits: 3
Maximum Credits: 3
This is an introductory graduate course in the theory of statistical estimation. The following topics will be covered. The use of orthogonal transformations in statistical distribution theory, distribution of quadratic forms, the theory of linear estimation, the general theory of estimation and estimation from a decision theoretic point of view.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL

Minimum Credits: 3
Maximum Credits: 3
This course is the second half of a two term course. Topics to be covered include estimation, inference, linear models, and an introduction to bayesian estimation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS

Minimum Credits: 3
Maximum Credits: 3
A careful study of some standard asymptotic techniques in statistics and their modern refinements. Topics include stochastic convergence, delta method, M-estimators, contiguity, local asymptotic normality, concepts of efficiency, projection and U-statistics, likelihood ratio tests, bootstrap, Bayes procedures along with some empirical process methods.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2650 - INTRODUCTION TO BAYESIAN STATISTICS

Minimum Credits: 3
Maximum Credits: 3
This course will give an introduction to Bayesian statistics. Topics to be covered include prior and posterior distributions, multi-level models, model checking and selection, stochastic simulation by Markov Chain Monte Carlo.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
STAT 2651 - BAYESIAN ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Introduction to the foundations of Bayesian inference, its practical applications in diverse areas, and the computational algorithms developed for the Bayesian inference.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2660 - LINEAR REGRESSION

Minimum Credits: 3
Maximum Credits: 3
The topics to be covered include: fitting a straight line, examination of residuals, two independent variables, polynomial models, selection procedures, and model building.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2661 - LINEAR MODELS THEORY 1

Minimum Credits: 3
Maximum Credits: 3
This course will follow a co-ordinate free approach to the general linear model. As much as possible proofs will be done from a geometric perspective. Topics include matrix theory for statistics, estimation, hypothesis testing, distribution theory, generalized inverses.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2691 - NONPARAMETRIC THEORY

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the statistical analysis of data when no parametric assumptions are made.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2711 - PROBABILITY THEORY 1

Minimum Credits: 3
Maximum Credits: 3
This course begins with an introduction to Lebesque integral. Then distribution functions, probability measures and random variables are introduced. Convergence concepts and topics from the laws of large numbers and random series are also covered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2712 - PROBABILITY THEORY 2

Minimum Credits: 3
Maximum Credits: 3
This is the continuation of STAT 2711.
Academic Career: Graduate
STAT 2730 - STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to stochastic processes and its applications. The major topics are Markov chains, Poisson processes, Brownian motion, and branching processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: 2711

STAT 2751 - RELIABILITY THEORY 1

Minimum Credits: 3
Maximum Credits: 3
This course will cover basic concepts in reliability theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2900 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
Under faculty supervision, the student will participate in a statistics project.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

STAT 2991 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

STAT 3001 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

STAT 3131 - TOPICS APPLIED STATISTICS 1

Minimum Credits: 3
Maximum Credits: 3
Foundations as well as recent developments in applied statistics will be discussed.
Academic Career: Graduate
STAT 3132 - TOPICS APPLIED STATISTICS 2

Minimum Credits: 3
Maximum Credits: 3
Foundations as well as recent developments in applied statistics will be discussed.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (STAT 2131 or 2132) and (STAT 2630 or 2640)

STAT 3341 - ADVANCED MODERN STATISTICAL COMPUTING 1

Minimum Credits: 3
Maximum Credits: 3
Topics include: nonparametric regression modeling, generalized additive models, robust statistical methods, general applications of randomization and resampling techniques.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: [(STAT 2131 and 2132) or (BIOST 2049)] and [(STAT 1631 and 1632) or (STAT 2630 and 2640) or (STAT 2631) or (BIOST 2043 and 2044)]

STAT 3611 - TOPICS MULTIVARIATE ANALYSIS 1

Minimum Credits: 3
Maximum Credits: 3
An introduction to biological 'omic' data and data analysis. We will consider SNP, bulk and single cell RNAseq, DNA methylation, microbiome, and metabolomic data. Statistical topics will include high dimensional factor analysis, multiple hypothesis testing, empirical Bayes, adjusting for latent confounds, missing data, and biological networks, among others.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 3691 - TOPICS IN ADVANCED STATISTICS 1

Minimum Credits: 3
Maximum Credits: 3
This is a PhD level topic course on multiple hypothesis testing, variable selection, and high-dimensional models. The course will start from multiple testing problems, and introduce a range of methods for controlling family-wise error rate (FWER) and false discovery rate (FDR). Several examples including needles in a haystack problem and sparse mixture models will be studied in detail. In the second part, we will formulate the variable selection problem for linear models as a multiple testing one, and build connections between model selection criterions and multiple comparison results for special design matrices. At the same time, we will also introduce the recently developed knockoff framework for FDR control and discuss its applications in genetics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 3692 - TOPICS IN ADVANCED STATISTICS 2

Minimum Credits: 3
Maximum Credits: 3
This is a topic course in advanced statistics. In this course we will review some recent developments in high-dimensional statistical estimation
problems including high-dimensional (non)linear estimation, covariance/precision matrices estimation, graphical models, low rank matrices estimation and sparse PCA/CCA. If time permits, we also review some general nonparametric estimations results in Gaussian sequence models. An overview of tools in high-dimensional statistics such as empirical process theory, concentration of measure, and random matrix theory will be introduced throughout the semester.

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
- Self designed elective course in strategic planning.
BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course covers theory, conceptual frameworks, and tools used to formulate strategies for commercializing new technologies. The analytical frameworks cover elements of commercialization strategy that are equally critical to start-ups and to corporate technology ventures. In addition, we discuss some of the key challenges that differ for start-ups versus established firms. The primary deliverable in the course is a professional quality project which evaluates the commercialization alternatives for an emerging technology. Your project team will be paired with a local inventor, unless you prefer to evaluate a technology of special interest to your team. Experienced entrepreneurs and experts in financing new technology ventures will also address the class.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER

Minimum Credits: 1.5
Maximum Credits: 1.5
This course addresses the critical role of a firm's top management in guiding a firm toward more positive innovation outcomes. We specifically focus on the role of executive leadership in developing a firm's capability for breakthrough innovation - a primary source of sustained competitive advantage and economic growth. We distinguish between what leaders need to do during invention and innovation, and emphasize barriers that hinder established firms' capabilities to produce breakthrough innovations. We examine how strategic leaders can augment a firm's ability to 'innovate smarter' by better utilizing the diversity of expertise that resides within the organization and within the firm's partnerships. The concepts we'll discuss are grounded in decades of research on creativity and technological innovation, as well as strategic management, leadership, and teams. We'll discuss how strategic leaders apply these concepts today.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course focuses on strategic management in business contexts of high uncertainty and extreme complexity created by the interaction of (i) the inevitability of increasing globalization, (ii) the importance of innovation to ensure sustainable competitive advantage and (iii) the emerging social and economic imperative of building business models that focus on shared value. The business of humanity project at the KATZ graduate school of business has researched the responses of businesses across the world to these challenges. The course will cover (i) the radically different strategic planning processes and analytical techniques, (ii) the new rules of strategy, (iii) the dynamic organizational structures and (iv) the new leadership models that are responsive to the imperative and potential of meeting fundamental human and societal needs. These processes, rules, techniques and models have been demonstrated to be effective in dealing with technological disruptions, extreme price-point pressures in growth sectors, rising societal expectations and wicked problems.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BSEO 2407 or BSPP 2409; PROG: Joseph M. Katz Grad Sch Bus
Course Attributes: MCSI - Sustainability Focused

BSPP 2409 - STRATEGIC MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2

"Strategy" in the context of management, focuses on creating a harmonious relationship between separate units within an organization, and between a firm and its environment. The core strategic management course explores this classic concept of strategy and how it can be adapted to today's changing and turbulent environments. While the course adopts the perspective of a general manager (e.g. Head of a strategic business unit), it provides critical insight to functional managers who must align their departments' activities with the firm's overall objectives and approach to creating and capturing value (i.e. Its competitive strategy). The strategic management course employs a multi-method pedagogy. Students learn a set of perspectives, conceptual frameworks, and tools - drawn from industrial organization economics and the behavioral sciences and sociology, with which to understand the opportunities and challenges involved in developing world-class capabilities for competing effectively in globally-linked economies. Through case studies, we explore how a firm's competitive strategy shapes the way it engages customers, suppliers, competitors, and others comprising its value net. Through project assignments, we investigate how competitive advantage can be quantified using publicly available data. Together, the multiple modes of inquiry will provide insight into why competitive advantage is fundamental to a firm's long-term success; how the various activities in a firm's value chain can contribute to competitive advantage; and why, although industries support many competitive strategies, each firm tends to employ only one at a time.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (BACC 2401 and BECN 2401) and (BFIN 2006 or BFIN 2409 or BMKT 2411 or BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BSPP 3010 - INDEP STUDY STRATGC PLNNG POLICY

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

BSPP 3011 - STRATEGIC PLANNING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Analyzes the strategic planning process in terms of the varying combinations of subsystems which may be required for different organizational purposes. Research regarding both the design and evaluation of planning systems will be studied with the objective of developing improved models of the underlying processes.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BSPP 3012 - RESEARCH IN COMPETITIVE STRATEGY

Minimum Credits: 3
Maximum Credits: 3
This course draws on a growing body of theoretical and empirical research which examines relationships between an organization's environment, its strategy, and performance outcomes. Topics include theoretical concepts of the environment and their empirical counterparts, market definitions, strategic alliances, competitive information flows, competitive interactions and responses, industry evolution, and the role of environmental analysts. Special attention is given to competitive intelligence processes. There is an explicit balance of theoretical and practitioner material. The course complements the research in corporate strategy seminar by focusing on business level competitive dynamics.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 3013 - FOUNDTNS OF STRATEGY RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Examines various streams of research which have contributed to our understanding of competitive behavior at both the business unit and corporate levels of diversified organizations. Prior studies are critiqued as a means of developing proposals for improved research designs.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 3014 - RESEARCH IN CORPORATE STRATEGY

Minimum Credits: 3
Maximum Credits: 3
In this course we will focus on a core sub-field of strategy, corporate strategy, which has the following defining question: "what businesses should the firm compete in, and how should resources be allocated across those businesses?" Corporate strategy comprises an inter-related set of three key phenomena and associated research; value creation (e.g., Diversification and vertical integration), scope (e.g., Mergers and acquisitions), and execution (e.g., Role of the corporate office). While corporate strategy is often studied purely as a "content" field, we will adopt an integrative content-process orientation in this course. Our approach will also be evidence-based, in that we'll make a conscious attempt to understand and use systematic review tools, such as meta-analyses, to arrive at a sophisticated understanding of the corporate strategy literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 3018 - THEORY BUILDING IN MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
The development and analysis of theory is a critical skill for academic scholars to develop. In this course we will explore the components of a theory, discuss the latest developments in theory development, and apply theory analysis to the field of management. The course is designed to complement research design and statistics courses.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 3019 - SEMINAR IN ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
Study of entrepreneurship research literature to develop an understanding of and appreciation for the key concepts, theories, issues, debates, contributions, and research streams in this literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BSPP 3099 - READINGS STRATEGIC PLANNING & POLICY

This seminar covers practical frameworks for strategic problem solving and develops analytical and communication skills for addressing complex projects in consulting and other industry contexts. Using projects to tackle complex strategy or performance-improvement challenges shouldn't just be the domain of a few thousand highly-paid strategy consultants. Projects are increasingly at the center of problem-solving and innovation for all executives. This seminar will focus on key fundamentals of the end-to-end consulting (project) process. Students will be exposed to a variety of cutting edge analytical tools and techniques. Particular emphasis will be put on best practices in structured problem-solving, work planning, and executive communication - capabilities that are at the core of the top strategy houses' own internal training and development programs. This course will be of interest to future management consultants, but also more broadly to professionals who might expect future internal strategic projects or task force assignments.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BSEO 2033 - MANAGING THE NATURAL ENVIRONMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on the management of strategic and compliance issues related to the natural environment of the business firm.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2034 - SUSTAINABILITY AND CORPORATE RESPONSIBILITY

Minimum Credits: 1.5
Maximum Credits: 1.5
This course will address such topics as managerial approaches to the ESG issues and opportunities that occur across business processes, sustainability and social responsibility as business opportunities, environmental management systems (the 14001 standards), social responsibility guidance (ISO 26000) and reporting, and methods of dealing with stakeholders concerned about the firm’ ESG performance. It introduces students to sustainable business management practices and to the role of the private sector in global sustainability development and environmental initiatives. Throughout the course, the emphasis will be on real-world managerial experience and guidance, based on numerous current cases.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Attributes: MCSI - Sustainability Focused

BSEO 2315 - BUSINESS LAW

Minimum Credits: 3
Maximum Credits: 3
The primary objectives of this course are: (1) to identify the many types of business actions which require decision makers to analyze ethical issues; and (2) to teach students when, why, and how ethical issues should be made a part of the decision-making process.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BSEO 2316 - BUSINESS LAW

Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to discuss key topics of business actions and topics central to the objective of today's executive.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Minimum Credits: 2
Maximum Credits: 2
This course examines concepts, issues, and tools related to the management of ethics and social responsibility in business. Students learn how to recognize and respond to ethical problems, to understand their personal responsibilities as business managers, to evaluate various ethical frameworks, to apply a process of moral decision making to ethical problems, to grasp relationships between ethical behavior and organizational structure and processes and to manage the ethical and social problems and opportunities arising from dimensions of the business environment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BSEO 2407 - STRATEGIC MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
At the end of the course, students will be able to: (1) do a strategic assessment of the firm and its environment (2) identify the various strategic choices a firm can make given the strategic assessment (3) implement processes and methods to enact strategic choices.

Academic Career: Graduate
Course Component: Lecture

BSEO 2500 - BENCHTOP TO BEDSIDE

Minimum Credits: 3
Maximum Credits: 3
This 10-week course is designed to teach research scientists how to navigate the path necessary to bring a basic science discovery out of the university and into the clinic. Participants will learn the criteria used by the private sector to assess the potential of discoveries that have therapeutic or diagnostic applications. They will understand how proof-of-concept and validation experiments define the application, increase value, and reduce risk. The course will focus on the importance of intellectual property protection as the engine that creates a barrier to entry for competition and also enables investment from the private sector to fund the climb over regulatory and reimbursement hurdles to reach patients. This course is open to all scientific researchers and those interested in gaining knowledge of the commercial development process. The core faculty for the course will include OED staff members, and numerous guest speakers and panelists from the scientific and entrepreneurial community.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2506 - COMPETING EMERGING ECONOMIES

Minimum Credits: 2
Maximum Credits: 2
This course will introduce students to concepts and frameworks designed to help managers make decisions critical to formulating and implementing global strategies, such as Ghemawat's cage model and 3a global strategy framework, porter's national diamond model, and Khanna's work on institutional voids. Through a combination of case studies and country overviews, students will analyze specific companies, industries, and countries in order to develop recommendations pertaining to whether, when, and how to enter a particular country, and how to prepare for management challenges associated with implementing a firm's competitive strategy in a new country. The course will specifically introduce students to the opportunities and challenges associated with transferring competitive strategies established in developed markets to emerging economies, such as Brazil, China, India and Russia. Hands-on homework assignments will assure that students become familiar with valuable sources of information on emerging markets.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2509 - BUSINESS AND POLITICS

Minimum Credits: 2
Maximum Credits: 2
The financial crisis, international negotiations toward a climate change agreement, and crises in such industries as pharmaceuticals and even toy manufacturing have highlighted the increasing interdependence of business and government, as well as the means by which business gains strategic benefits from government regulation. This course will examine methods and patterns of business influence on government, policy-making on issues affecting business, the performance of regulatory agencies, and the behaviors of groups and trade associations in politics. The course begins with an extended case study that asks, what caused the current financial crisis that some call "the great recession"? The crisis had multiple, often interacting causes, and involved both public sector and private sector failures. Besides examining the bases of the crisis, we will ask what institutional reforms, and what critical decisions, might have ameliorated the crisis, and might prevent a future crisis. The course will examine both regulatory failure patterns and the means by which firms gain strategic, competitive advantage through shaping government decisions and programs. In examining
techniques of lobbying, the course will focus on the U.S. setting and identify both effective and ineffective methods of lobbying. By the end of the course, students should have obtained a good working knowledge of the U.S. regulatory system, the major instruments of regulation, and the typical interactive patterns of regulators and regulated parties.

**BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Given the frequency and magnitude of mergers and acquisitions (M&A) activity, most Pitt MBAs can expect their careers to be impacted by M&A transactions sooner or later - whether as analysts in the pre-merger, phase, as managers or consultants in charge of implementing the merger, or simply as professionals whose career trajectories are inevitably shaped by the event. In order to help you prepare for these roles, acquisitions and divestment will address the strategic and organizational challenges of integrating companies so as to realize the promise of value creation. Building on the premise that the real work of M&A begins after the deal is signed, this course will utilize current research findings, case studies, and practitioner experiences to equip you with a working knowledge of effective post-merger integration. At a time that most companies realize that M&A's have a poor track record of success precisely due to poor post-merger integration, the educational experience in this course will provide you with a valuable skill set. The course should be of special interest to students interested in management consulting careers, or who expect to have significant general management responsibilities in their jobs, or who want to be knowledgeable about M&A events that are likely to affect their careers sooner or later.

**Academic Career:** Graduate

**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BSEO 2570 - FUNDAMENTALS OF MANAGEMENT CONSULTING**

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course will be focused on the fundamentals of what is known in Strategy Consulting as the "delivery" portion of a strategy (problem-solving) project. All aspects of the consulting delivery process will be introduced, but primary attention will be given to those elements most unique and essential to strategy consulting delivery: Problem definition; work planning (including hypothesis generation and analytical tool selection); and client management (including executive communication). Students participating in a future Katz Consulting Field Study (KCFS) should consider this course a recommended prerequisite. More broadly, the consulting skill set is a valuable addition to your resume. Those planning a post-MBA/MS career in consulting, external or internal, will find this course beneficial. Consulting companies (global and boutique) are active recruiters of MBAs and MS graduates in areas as diverse as Strategy, IT, Supply Chains, Organizational Performance, Analytics and Project Management. Even students taking line management roles will find the strategy consulting skill set to be relevant for future short-term problem-solving or task force assignments.

BSEO 2578 - SUSTAINABLE BUSINESS STRATEGY

Minimum Credits: 1.5  
Maximum Credits: 1.5
This course is designed to enhance your ability to understand current challenges and opportunities in sustainability worldwide. Sustainability is of great interest to multiple stakeholders including customers, employees, investors, regulators and activists. Much of the recent attention to sustainability is attributable to its "business case" or the notion that when done right, sustainability initiatives can not only affect positive social or environmental change but also contribute to competitive advantage, reputational gains, etc., and overall to a company's bottom line in the process. Although this kind of - triple bottom line - thinking is powerful and would benefit both businesses and society immensely, achieving this symbiotic relationship between business, society and the environment requires a strategic understanding of when, why and how sustainability initiatives create value. The Sustainable Business course will provide you with the requisite knowledge so that you emerge as leaders who will leverage the power of business to create social and environmental value. The course will blend theory and practice in a way that emphasizes both critical thinking and experiential learning. This will be accomplished through multiple components. First, through case studies and articles, you will be exposed to theories and principles that can be applied to formulate, implement and evaluate sustainability initiatives through the entire value chain - from procurement to disposal. The second, interrelated component will highlight experiential learning. Via a series of projects and mini-workshops, you will analyze the sustainability performance of companies to discover firsthand the mechanisms by which sustainability initiatives yield both business and social returns.

Supply Chain Management

BUSSCM 1760 - DATA MINING

Minimum Credits: 3
Maximum Credits: 3
Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminate analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. This course is methods-oriented, as opposed to being methodology-oriented, so students learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: STAT 1100 and BUSQOM 1080; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

Surgery

SURG 5100 - MD-OMS RESIDENCY (7 MONTHS)

Minimum Credits: 0
Maximum Credits: 0
This program is multi-disciplinary incorporating basic physiology, pharmacology, microbiology, histology, anatomy and physical diagnosis. This rotation permits the medical student oral and maxillofacial surgery resident to gain insight as to how the basic sciences effect the overall body with emphasis on the head and neck region. Early exposure to ambulatory patients stresses the underlying pathophysiologic process of the presenting disease. Student evaluation is based on several written examinations and participation in small group problem-based conferences.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 1

SURG 5323 - PLASTIC SURGERY PRECEPTORSHIP

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will provide the student with a preliminary exposure to the specialty of plastic and reconstructive surgery. This preceptorship allows an opportunity to observe and have minor involvement in the clinical care of patients on the service. In addition to direct attending and resident interaction, education is obtained from weekly teaching conferences. Emphasis will be placed on the scope and interaction of plastic surgery with other specialties and the various methods of reconstruction available for each type of deformity. Areas to be experienced will include reconstructive techniques in traumatic, congenital, neoplastic and cosmetic deformity as well as the basic biology of wound healing and wound management

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5345 - SURGERY CLERKSHIP REPEAT

Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5360 - ORAL-MAXILLOFACIAL SURGERY

Minimum Credits: 0
Maximum Credits: 0
Four-week junior clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, first surgical assist, primary management of post-operative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conferences held by the department of plastic and oral-maxillofacial surgery.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5371 - SURGERY AND PERIOPERATIVE CARE

Minimum Credits: 0
Maximum Credits: 0
Eight-week rotation with students participating in general surgery and anesthesiology. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

SURG 5372 - SURGERY AND PERIOPERATIVE CARE CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
Six-week rotation with students participating in general surgery. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct
diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties. Registration must accompany registration in MSANE 5372

**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### SURG 5375 - SURGICAL SPECIALTIES

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four-week course designed to teach the essentials, knowledge and skills in the management of common diseases in the specialties of otorhinolaryngology, orthopedics, ophthalmology and urology. Learning accomplished through didactic lectures, prepared written syllabi, case reports, multi-media computerized instruction and clinical experience in offices of university faculty. Assessment of student performance accomplished through a multiple-choice examination, objective evaluation of clinical skills, and estimation of clinical expertise in the ambulatory setting.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 3

### SURG 5401 - SURGERY ACTING INTERNSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four-week clerkship, conducted as an acting internship in general surgery. Responsibilities: patient evaluating, primary management of pre- and postop care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. Daily rounds with house staff and attendings. Attend postgrad teaching rounds and conferences held by the department of surgery.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

### SURG 5402 - EXTRAMURAL ACTING INTERNSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Students will register for this course when participating in a surgery acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU5  
**Course Attributes:** School of Medicine Year 4

### SURG 5403 - SURGERY ACTING INTERNSHIP FOR MD/ORAL MAXILLOFACIAL PROGRAM

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This four-week course is conducted as an acting internship on the endocrine service. Students eligible to register for this course will be participants in the professional medicine/oral maxillofacial surgery combined program (md/oms). Participants will have responsibility for patient evaluating, primary management of pre- and post-op care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. There will be daily rounds with housestaff and attendings. Attendance at the postgrad teaching rounds and conferences held by the department of surgery is expected.  
**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4
SURG 5410 - GENERAL SURGERY ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
Four-week clerkship offered at a private area medical facility student works directly with a surgical resident and attending surgeons. Responsibilities: preoperative diagnosis, intraoperative surgical assisting and post-op care. Daily rounds with house staff and attendings. Attend surgical conference and is requested in advance to participate by way of case presentation or prepared problem discussion. Student "night call" approximately every fourth night corresponding to the surgical resident on service.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

SURG 5420 - COMMUNITY HOSPITAL CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0
Four-week elective provides student with exposure to general surgery as practiced outside the university environment, in suburban or rural community hospital. Elective is structured as a preceptorship. Student will evaluate patient problems, be involved in daily patient management, assist in operating room, and attend outpatient office hours with precepting surgeon. Room and board is provided at hospital outside Pittsburgh.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

SURG 5430 - NEOPLASTIC DISEASE ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
Four-week elective in oncology. Through the national surgical adjuvant breast project headquartered at Scaife Hall, student will study in depth, contemporary theories of tumor biology from clinical and laboratory perspective. Outpatient clinics and/or exposure, but major focus is conducting cooperative clinical studies regarding the management of patients with breast or colon cancer.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

SURG 5440 - PEDIATRIC SURGERY ELECTIVE

Minimum Credits: 0
Maximum Credits: 0
Four-week elective tailored to fully integrate a student into a specific position of the house staff. Student serves as an intern, with participation in all clinics, rounds, conferences and capabilities. Time spent each week seeing patients. Special adaptations of program to particular requests can be made, including part pediatric medicine and part pediatric surgery. Will learn differences between childhood and adult diseases, take pediatric history and do complete physical.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

SURG 5482 - RENAL, PANCREATIC AND LIVER TRANSPLANTATION

Minimum Credits: 0
Maximum Credits: 0
This is a four (4) week elective for medical students interested in learning about renal, pancreatic or liver transplantation. The student will have an opportunity to participate as a member of a busy transplant team. They will be involved in the evaluation and treatment of a large number of patients
referred here with hepatic or renal disease for consideration of resection or transplantation therapy, or patients with type i diabetes mellitus for pancreas transplantation. They will attend the various conferences and, if possible, pre-and post-transplant clinics. Students will be offered the opportunity to scrub in the operating room on both living and deceased donor transplants. There will be no mandatory call; however, students should be aware of the fact that many transplantations occur at night or on the weekends. The student can participate in the post-operative care of transplant patients, including experience in the surgical ICU. Both through selected reading materials that offer an introductory exposure to transplantation, and through participation in patient care and rounds, students will learn the basic principles of evaluation and management both pre- and post-transplantation, immune-suppression, and infectious prophylaxis.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**SURG 5485 - BIOLOGICAL AND GENE THERAPY**

| Minimum Credits: 0 |  |
| Maximum Credits: 0 |  |

This 4-week elective will provide an opportunity to study contemporary theories of tumor biology and tumor immunology both from a clinical and laboratory perspective. While outpatient clinics will be part of the experience, the major focus will be the rewards and challenges of conducting clinical studies regarding the management of patients with various tumors managed with biologic therapies.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**SURG 5486 - SURGICAL SPECIALTIES**

| Minimum Credits: 0 |  |
| Maximum Credits: 0 |  |

This is a four week course. The student may select two areas of special interest, and will spend two weeks on each selected specialty. Available specialties are: cardiothoracic surgery, orthopedics, neurological surgery, plastics & reconstructive surgery, urological surgery, vascular surgery, and magee surgical oncology. The student will gain clinical exposure through attending clinics, participating in daily inpatient rounds, and in the operating rooms. Instruction will be by the residents and attending surgeons on the selected services. Performance will be evaluated on a number of criteria including knowledge, patient evaluation and management planning, motivation, responsibility, and interpersonal actions. The purpose of this course is to allow students to explore possible areas of interest for which they might not get exposure in the standard curriculum. The student is expected to learn to perform a basic history and physical evaluation of patients as required by each specific service. Each student should be able to discuss the service specific approach to patient management.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**SURG 5490 - ORAL-MAXILLOFACIAL SURGERY**

| Minimum Credits: 0 |  |
| Maximum Credits: 0 |  |

Four-week clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, evaluation, first surgical assist, primary management of postoperative care, emergency room call for m/f trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conference held by the department of plastic and oral-maxillofacial surgery.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

**SURG 5650 - SURGICAL SPECIAL STUDIES**
An individualized course of study may be arranged with the department of surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

**Academic Career:** Medical School

---

**SURG 5700 - SURGICAL LIFE SCIENCES**

Minimum Credits: 0  
Maximum Credits: 0  
A four week elective combining anatomic dissection, imaging modalities, and clinical pathology in a systematic manner. The course will be divided into four areas, each lasting one week. Thoracic anatomy, digestive tract anatomy, musculoskeletal and gynecological/genitourinary anatomy. The course includes lectures in anatomy, pathology and imaging modalities and precepted anatomical dissections. Exposures will vary and include seeing patients and follow their evaluation and treatment.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**SURG 5750 - GET READY FOR RESIDENCY BOOT CAMP - SURG**

Minimum Credits: 0  
Maximum Credits: 0  
GRADING FOR THIS COURSE IS SATISFACTORY/UNSATISFACTORY ONLY. This elective is an intensive preparation for students who are about to enter residency. Students will be provided with a combination of general and specialty-specific, clinically relevant content in a variety of modalities. The focus will be on content that will prepare the student to function at the starting level of an intern (and meet the expected intern-level milestones) after graduation. Students will be asked to select from one of the following tracks: Internal Medicine, Pediatrics, Emergency Medicine, OBGYN, Anesthesia, Surgery, or Psychiatry. Because we are unable to offer specialized tracks covering all possible specialties, students entering specialties other than those offered are encouraged to select the track that they find most relevant. The majority of the course content will be relevant to all students, regardless of specialty. Teaching modalities will include simulation, small group sessions, skills workshops, standardized patient cases, and a limited number of high-yield lectures.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** S/U Basis

---

**SURG 5884 - HISTORY OF MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
Four-week elective. Student examines various aspects of the history of medicine, from the beginning of medical practice into the 1980s, read selected group of historical monographs and participate in in-depth discussions with members of a group of interested senior faculty, and write a short research paper.

**Academic Career:** Medical School  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U  
**Course Attributes:** School of Medicine Year 4

---

**SURG 5885 - SURGICAL RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0
Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.

**Academic Career:** Medical School  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U  

**SURG 5900 - EXTRAMURAL GENERAL SURGERY**

Minimum Credits: 0  
Maximum Credits: 0  
A clinical experience in general surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.  

**Academic Career:** Medical School  
**Course Component:** Lecture  
**Grade Component:** H/HS/S/LS/U  

**SURG 5902 - INDEPENDENT STUDY**

Minimum Credits: 0  
Maximum Credits: 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.  

**Academic Career:** Medical School  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U  

**Teaching, Learning and Leading**

**TLL 2002 - INTRODUCTION TO URBAN EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
Students will explore the systemic issues unique to urban education historically as well as uncover how urban education is/can be a vehicle for social justice and equity in our country. The course will include the impact of policies, national movements, systemic racism, and their implications for students in urban schools over time in the united states as well as a deep understanding of the condition of students today with a focus on race, socioeconomic status, equity, etc.  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  

**TLL 2003 - UNDERSTANDING TEACHING THROUGH A SOCIAL WORKERS LENS**

Minimum Credits: 3  
Maximum Credits: 3  
One critical key to being an effective teacher is being able to delve deep into seeing and understanding people's lived experiences. To do so well, requires that one adopt the 'lens' of a social worker in addition to that of a teacher. Diverse urban school students often have experiences that our predominately white, suburban, middle class teaching force haven't, the knowledge of which can assist teachers in better interpreting behaviors and contextualizing their work. Such topics as trauma, health, family dynamics, violence, and poverty are addressed. This course is a collaboration with the school of social work faculty.  

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
TLL 2004 - RELATIONSHIP BUILDING: STUDENTS, FAMILIES AND COMMUNITIES

Minimum Credits: 3
Maximum Credits: 3
Students will learn ways to develop and nurture meaningful relationships with the students, families and communities they serve. This course provides opportunities and assignments designed to actively engage in the relationship development process as well as document it along with evidence of studying about demographics and historical content and contexts that provide the anchor for their work with and perspectives of the urban spaces in which they learn and educate.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2005 - URBAN SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This seminar series provides a deep dive into some of the most salient issues of teaching in urban schools. It is designed to take the students on a journey that begins in the summer with an examination of identity, their own as well as a lens in which to see and understand their students in personal and contextualized ways. The fall seminar takes their newfound understanding and wraps it into meaningful relationship building between the self and student as the foundation for developing classrooms as communal learning spaces for all to thrive. Doing such work in understanding identity and relationships with students in urban spaces includes an explicit look at power and privilege in powerful ways that helps teachers understand their and their students lived experiences in ways that lead to opportunities to more clearly see where inequities lie in our educational and broader systems. This then builds to be the foundation for the spring seminar that provides framing and support in becoming a change agent in educational institutions in ways that disrupt such aspects of the environment, such as systemic institutionalized racism.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis

TLL 2006 - CULTURALLY RESPONSIVE TEACHING

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2007 - STEAM: TRANSDISCIPLINARY LEARNING APPROACHES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on STEAM-based instructional approaches, which includes the ways in which teachers structure the classroom environment, tasks, and resources to facilitate deep learning. These instructional approaches include problem-based, student-driven, authentic tasks, and technology integration, as well as support for equitable participation (the ways in which the classroom facilitates access and engagement in learning for all students, with specific attention to abilities and resources).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2008 - STEAM: INSTRUCTIONAL DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the instructional content of STEAM, which includes subject-matter alignment (the ways in which teachers present material from multiple disciplines or content areas in clear and connected ways), discipline integration (the selection of material across disciplines - including concepts, methods, and approaches - as well as how they are synthesized to support deeper learning), and ways to employ problem-solving skills. These skills include cognitive skills (modeling, analyzing, interpreting), collaborative skills (communication, problem-solving), and creative skills
(designing, creating) necessary for 21st century learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2009 - STEAM: ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
This course focuses on assessment practices that support learning. This includes the iterative process of refining instruction and evaluating learning in real-world contexts using multiple forms of data. Assessment types explored include formative and summative assessment and ways to make assessments authentic, embedded, with regular feedback that drives adjustments to teaching. Another key component of this course is peer supports including peer review and self-reflection.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2010 - STEAM: IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3
This course investigates the ways to implement STEAM teaching and develop collegial support outside of the classrooms. Participants will implement STEAM practices and critically reflect on ways to refine teaching. The course utilizes peer evaluation from other instructors, peer and instructor feedback, and encourages refining teaching practice during implementation of the unit.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2041 - INTRO TO EARLY CHILDHOOD ED

Minimum Credits: 3
Maximum Credits: 3
The course is a general introduction to the theoretical, political, economic, and social issues that are inherent in the conduct and development of services for young children. The primary thrust is intended to provide students with both an overview of current issues and a basis for assessment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2042 - LANGUAGE AND LITERATURE FOR THE YOUNG CHILD

Minimum Credits: 3
Maximum Credits: 3
An introduction to language and literacy for children birth through grade 4. Includes applied theories and stages of language development, transitions from oral to written expression, family literacy, and guidelines for the selection and use of quality literature.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2045 - YOUNG ENGLISH LANGUAGE LEARNERS

Minimum Credits: 3
Maximum Credits: 3
Prospective early childhood education teachers will identify, investigate and assess impacts of a variety of social agencies, organizations and current issues in early childhood education through planned interviews as well as class lectures, discussions and reports.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2047 - INTEGRATED CURRICULUM PRE-K-4

Minimum Credits: 3
Maximum Credits: 3
The second half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2086 - CURRICULUM IN SCHOOLS

Minimum Credits: 5
Maximum Credits: 5
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2091 - SUPERVISED RESEARCH - SCIENCE

Minimum Credits: 1
Maximum Credits: 3
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

TLL 2093 - SUPERVISOR CURRICULUM AND INSTRUCTION INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
The practicum reviews the field based clinical experience of curriculum and instruction students for state certification.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2097 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 12
Each candidate for an educational leadership certification in pa is linked with schools/ for 360 hours of university supervised and principal-mentored internship/fieldwork experiences over the 12-month lifecycle of the school. Mentors are from various geographical locations at all levels; elementary, middle, and secondary. Candidates register for one credit of internship for each of the four consecutive terms of the k-12 principal program.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

TLL 2098 - DIRECTED STUDY - SCIENCE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

TLL 2101 - PENNSYLVANIA SCHOOL LAW

Minimum Credits: 3
Maximum Credits: 3
The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2115 - SUPERVISION AND TEACHER LEARNING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on skills and strategies school leaders need to know to supervise teachers and develop structures for ongoing teacher learning and development. Students study the history of supervision and how it continues to evolve. They analyze their own district's induction and professional development plans and design supervision models appropriate for a differentiated teaching staff.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2117 - DIFFERENTIATED INSTRUCTIONAL PRACTICES

Minimum Credits: 3
Maximum Credits: 3
This course is designed to give practitioners a strong theoretical background in differentiated modes of instruction and the skills needed to work with teachers as they strive to improve and expand their pedagogy. Discussions and readings will explore classroom strategies that improve student achievement, the elements of effective instruction, instructional design related to state standards, and ways to use assessment to drive instruction. Finally, the course will discuss ways that school leaders can work with teachers to enhance their instruction and student learning.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2203 - LANGUAGE AND LANGUAGE SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of literacy research and instructional approaches that relate to language and language systems with emphasis on the historical development of English, linguistic and sociocultural perspectives on second language learners and speakers of dialects, and instructional approaches for encoding and decoding.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2208 - READING/WRITING METHODS 1: PRE K - GRADE 1

Minimum Credits: 3
Maximum Credits: 3
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the first in a two-course sequence that focuses on classroom
teaching methods for literacy. It is also part of a set of courses that focus on literacy development and instruction. Other courses in the set include reading/writing methods 2: grades 2-4, language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 1 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) oral language development, (b) emergent literacy, (c) concepts about print, (d) comprehension, and (e) writing. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in pre-kindergarten - grade 1.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2209 - READING WRITING METHODS 2: GRADE 2-4

Minimum Credits: 3
Maximum Credits: 3
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the second in a two-course sequence and builds on concepts introduced in reading/writing methods 1. It is also part of set of courses that focus on literacy development and instruction. Other courses in the set include language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 2 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) word study-decoding, spelling, and vocabulary, (b) comprehension, and (d) composition, including handwriting. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in grades 2-4.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2211 - COMPREHENSION AND VOCABULARY

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth consideration of reading processes related to comprehension and learning from text, and instructional approaches that support student text comprehension, including vocabulary instruction.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2216 - LITERACY ASSESSMENTS AND INTERVENTION MODELS

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of reading processes and assessments of those processes with a focus on phonology, fluency, vocabulary, and comprehension. The course also provides an introduction to the response to intervention model and its application in various contexts.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2217 - LITERACY PRACTICUM WITH ELEMENTARY STUDENTS

Minimum Credits: 3
Maximum Credits: 3
This course engages candidates in working with students in kindergarten through grade 3 to assess students' literacy abilities in decoding, spelling, vocabulary, fluency, and comprehension, and to design instruction targeted to support students' literacy development. The course is also an opportunity for candidates to videotape and analyze their interactions with students.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

TLL 2218 - LITERACY PRACTICUM WITH ADOLESCENT STUDENTS

2902
Minimum Credits: 3
Maximum Credits: 3
This course involves working with middle school students who are experiencing difficulties with reading. The course takes place at a school site for 3 weeks, 9:00-12:00, Monday through Friday, students meet at the University of Pittsburgh, 9:00-12:00, for three specific dates to prepare for the practicum sessions.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

TLL 2219 - DISCIPLINARY LITERACY

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the literacy development of adolescents with particular attention to the demands of discipline-specific reading and writing.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2226 - SPECIAL TOPICS - WRITING

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2228 - SUMMER INSTITUTE FOR TEACHERS

Minimum Credits: 6
Maximum Credits: 6
An intensive, teacher-centered, teacher-led professional development program in the teaching of writing, based on the highly successful national writing project model. Open to teachers in all grade levels (k-16) and all content areas.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

TLL 2230 - TEACHING AND LEARNING IN SECONDARY ENGLISH 1

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to secondary English language arts pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of English classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with state standards. This course also focuses on constructing a transformative learning environment.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2235 - THEORY AND PRACTICE IN TEACHING LANGUAGE, GRAMMAR AND USAGE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this seminar is to teach students current best practices for the teaching of language, grammar and usage in multicultural and
multilingual secondary English language arts classes. The course will introduce students to basic linguistic concepts and will help students understand how language and grammar are intertwined with all four language arts (reading, writing, listening and speaking). Students will practice developing language and grammar curriculum that is imbedded in reading and writing instruction and developmentally appropriate, explaining grammar and usage concepts clearly and appropriately, and assessing students’ understanding of language, grammar, and usage concepts.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2239 - THEORY AND PRACTICE IN TEACHING NEW MEDIA AND LITERACIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Teaching new literacies, multimodal forms of expression and technology in the English classroom will be the emphasis of the course. Students will follow a media literacy framework to learn theory into practice as they review and research current literature on digital tools such as wikis, blogs, social networking sites, and digital audio and video production applications. Methods for incorporating new literacies in the classroom will be explored and shared by the students.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2240 - THEORY AND PRACTICE: ASSESSMENT IN ENGLISH EDUCATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will be a survey of the range of assessment tools and practices appropriate for use in evaluating student learning in the secondary English classroom. Students will explore the purposes, methods, and uses of classroom assessment as well as state and national assessments. Topics explored in this course will include standardized testing, formative and summative assessments, designing writing and project-based assessments and rubrics, providing feedback on student writing, analyzing the results of assessments in order to guide instruction, and other topics related to the design and use of assessments.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**TLL 2243 - THEORY & PRAC IN TCHNG WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar critically studies various approaches to the teaching of writing from both theoretical and applied perspectives. Students are expected to have had some experience teaching writing.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**TLL 2246 - THRY & PRAC: MULTI-CULTURAL LIT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to provide teachers with a multicultural philosophical perspective, criteria for selecting multicultural literature, and strategies and techniques for infusing literature from diverse cultures into a literature program.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Global Studies

**TLL 2250 - TECHNOLOGY IN FOREIGN LANGUAGE EDUCATION**
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Attributes: Asian Studies

TLL 2251 - INTRODUCTION TO FOREIGN LANGUAGE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
A basic introduction course dealing with the most current issues in foreign language education in elementary, middle and secondary schools.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2252 - TEACHING AND LEARNING IN PK-12 WORLD AND HERITAGE LANGUAGE EDUCATION 1

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to instructional practices that are essential for effective world language teaching. A practice-based approach is utilized to allow students to deconstruct, co-plan, and rehearse strategies that foster equitable development of target language and cultural proficiency.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Global Studies

TLL 2253 - PRIN/PRA FRGN LANG TESTNG ASSMNT

Minimum Credits: 3
Maximum Credits: 3
In this course, students become familiar with the most current language testing and assessment principles and procedures through discussion and hands-on practice. Topics covered include test usefulness, validity, reliability, practicality, impact, interactivity, and so on. Student's practice creating tools ranging from multiple choice and short answer to portfolio and performance assessments.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2254 - TEACHING & LEARNING IN K-12 FOREIGN LANGUAGE 3

Minimum Credits: 3
Maximum Credits: 3
In this course, students discuss a variety of issues that relate to the actfl national standards for foreign language learning. In addition, teaching techniques that address these issues are modeled and practiced.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

TLL 2255 - TECHNQ/PROCDR FOREIGN LANG TCH

Minimum Credits: 3
Maximum Credits: 3
The course will present strategies and techniques for teaching the four skills (listening, speaking, reading and writing), culture, and generic principles
for effective proficiency-oriented instruction. The emphasis of this course is on practical applications.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2256 - ISSUES IN FOREIGN LANGUAGE ED**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The course deals with current issues in foreign language teaching. Issues are determined by the current concerns and research in the field.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Global Studies

**TLL 2257 - TEACHING ENGLISH LANGUAGE LEARNERS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will explore strategies for teaching English language learners (ELLs) in formal and informal education settings. Students will be introduced to foundational theories and current research on the social and academic factors that influence ELLs' learning experiences. The class will include a video component so students can observe instructional approaches for working with linguistically and culturally diverse ELLs.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Asian Studies, Learning Sciences

**TLL 2258 - TEACHING & LEARNING IN SECONDARY FOREIGN LANGUAGE 2**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
In this course, students discuss and practice a variety of teaching techniques and assessment tools that support the ACTFL national standards for foreign language learning. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2260 - TEACHING & LEARNING IN SECONDARY SOCIAL STUDIES 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course introduces students to secondary social sciences pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of social sciences classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with state standards. This course also focuses on constructing a transformative learning environment.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Asian Studies

**TLL 2265 - ISSUES IN HISTORY EDUCATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Students will explore the historical development of approaches to teaching US history and world history.
TLL 2268 - SOCIAL STUDIES METHODS PRE-K - 4

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.

TLL 2269 - SPECIAL TOPICS: SOCIAL STUDIES

Minimum Credits: 3  
Maximum Credits: 3  
Students will research social studies topics of special interest. Content varies based on professional expertise and students' needs.

TLL 2270 - INTEGRATED ART & MUSIC IN ELEMENTARY SCHOOL

Minimum Credits: 3  
Maximum Credits: 3  
To introduce preservice classroom teachers to art and music contents and processes with relevance to their expected role in integrating authentic arts learning experiences in their instruction. Emphasis placed on developmental aspects of children's' responsive and expressive skills in art and music.

TLL 2277 - COMPARATIVE AND GLOBAL PERSPECTIVES ON EDUCATION

Minimum Credits: 3  
Maximum Credits: 3  
This course, held on the campus of the University of cape town in cape town, South Africa, explores and compares the 20th century human/civil rights-related histories of the united states and South Africa, and examines implications these histories have had on the education systems (particularly in a context of social studies education) of each country. In their comparative survey of historical, social, and educational contexts, instructors will place special emphases on the philosophies, work, and legacies of key historical individuals including Mohandas K. Gandhi, Dr. Martin I. King, Jr., Nelson Mandela, among others. Study will incorporate a critical analysis of the universal declaration of human rights (1948), lectures by noted historical experts, visits to sites of historical significance, visits to schools and other learning environments, and group discussions of relevant texts and experiences.

TLL 2278 - PRACTICUM IN SECONDARY SOCIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 1  
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

TLL 2281 - LEADERSHIP SCHOOL LITERACY PROGM

Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership of the school literacy program. Leadership skills are defined and applied. Leadership theory and research as related to literacy curriculum and instruction are discussed; example of how reading specialists and others (principals, teachers) can fulfill a leadership role as described. Course combines theory with practical application.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2282 - FOREIGN LANGUAGE IN ELEMENTARY SCHOOL

Minimum Credits: 3
Maximum Credits: 3
This purpose of this course is to introduce students to the various types of elementary foreign language programs, to review and apply instructional practices that are appropriate for young foreign language learners, and to discuss topics that are unique to teaching foreign language in K-8 school settings.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2290 - RESEARCH SEMINR FOR MED STUDENTS

Minimum Credits: 3
Maximum Credits: 3
The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2291 - SUPERVISED RESEARCH - READING

Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 2296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Minimum Credits: 1
Maximum Credits: 9
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Full Time Dissertation
Grade Component: Grad SN Basis

TLL 2298 - DIRECTED STUDY - READING
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2391 - SUPERVISED RESEARCH IN ENGLISH
Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in carrying out a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2398 - DIRECTED STUDY IN ENGLISH
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2402 - HEALTH, MENTAL HEALTH AND SAFETY
Minimum Credits: 2
Maximum Credits: 2
Within the leader as learner block in leadership initiative for transforming schools (lifts), a K-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2403 - TEACHER SUPERVISION AND EFFECTIVENESS
Minimum Credits: 2
Maximum Credits: 2
The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2405 - INTRODUCTION TO ACTION RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to action research as a method of improving their practice. Students will learn what action research is, how it is carried out, and where it falls in the spectrum of research methodologies. The role of literature in supporting practitioners and their action research and how to develop a literature review will be addressed. Students will design an action research project on a topic relevant to their own practice.
Academic Career: Graduate
TLL 2408 - POSITIVE BEHAVIOR SUPPORT

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2409 - MULTI-TIERED SYSTEM OF SUPPORT

Minimum Credits: 3
Maximum Credits: 3
In this course, students learn about Ci3T, a multi-tiered system of support or MTSS, "to address academic, behavioral, and social-emotional domains for a comprehensive approach to student support and school improvement" (Lane, Oakes, & Menzies, 2014, p. 4). Through required readings and class assignments, students first develop an understanding of the core principles of Ci3T/MTSS and acquire many of the leadership skills necessary for implementation in the school environment: Understand a multi-tiered, preventative approach to schoolwide supports for all students. Gain knowledge about the foundational principles, critical components, and implementation procedures of Ci3T/MTSS. Learn to use practical tools associated with effective implementation and evaluation of Ci3T/MTSS. Understand how to use data to increase the fidelity and effectiveness of Ci3T/MTSS practices in the school environment. Next, we study racial disproportionality in school discipline as an exclusionary practice before moving to preferred inclusionary practices, motivational interviewing, and coaching techniques. This is not a special education course on inclusion for students with disabilities. However, students with disabilities related to emotional and behavioral challenges especially benefit from the strategies we will focus on in this course: coach teachers in evidenced-based Tier 1 and other classroom interventions - help teachers understand how to support students with mental health issues and mental health conditions - show teachers how to observe their own attitudes when faced with troublesome behaviors - guide teachers to understand classroom social dynamics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2410 - INSTITUTIONAL LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

TLL 2412 - LEADERSHIP FOR INCLUSIVE SCHOOLS

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2413 - SCHOOL LAW

Minimum Credits: 3
Maximum Credits: 3
This course is designed for students in the K-12 Principal Certification Program. The purpose of this course is to prepare students with the knowledge, skills, and dispositions to be transformational instructional leaders as practicing principals. In order for a school building to reach its
potential as a place of learning, it is imperative that principals place the learning of students as the top priority of the school. This requires the principal to be the Lead Learner in the school. Concepts included in this course include instructional supervision, equitable learning environments, coaching for change, professional learning communities, professional development design, lesson and assessment design, and launching successful learning initiatives.

**TLL 2415 - INSTRUCTIONAL LEADERSHIP**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed for students in the K-12 Principal Certification Program. The purpose of this course is to prepare students with the knowledge, skills, and dispositions to be transformational instructional leaders as practicing principals. In order for a school building to reach its potential as a place of learning, it is imperative that principals place the learning of students as the top priority of the school. This requires the principal to be the Lead Learner in the school. **Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2430 - TEACHING & LEARNING IN SECONDARY SCIENCE 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces students to secondary science pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of science classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with science standards. This course also focuses on constructing a transformative learning environment.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2433 - MATH METHODS FOR PreK-4 STUDENTS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course investigates methods for teaching mathematics to elementary school children of diverse backgrounds. The course is intended to contribute to your development as a critical, equity-oriented, anti-racist, reflective, and effective elementary teacher of mathematics. We will use readings, assignments, projects, and our classroom discussions to facilitate your understanding of important issues related to equitable mathematics teaching and learning. We will focus on topics such as number sense, growth mindset, mathematics identity, equitable pedagogical and assessment practices, culturally relevant pedagogy, social justice pedagogy, and building relationships with students and their families. You will work in small groups, partnerships, and individually in class and for your assignments and projects. Our class community will support each other's progress toward the course learning goals.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2434 - SCIENCE METHODS FOR PREK-GRADE 4 STUDENTS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
How do teachers assist elementary children in doing science and understanding science concepts? What environment facilitates elementary children's understanding in science? What equitable and just methods can teachers employ to ensure all elementary children can access and engage with science? These are just a few of the questions we will be addressing over the course of this semester. You will explore these ideas through thinking
about yourself as a science learner; by demonstrating reflective teaching practices; and through examining how elementary science teaching and learning can be integrated across disciplines.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 2445 - ASSESSMENT AND EVALUATION IN MATH EDUCATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course we will examine current assessment practices in mathematics education, both historically and in terms of their forms and purposes in today's educational and political climate. Most importantly, however, we will focus on improving current assessment practices to support students' learning in the mathematics classroom. Based on an integrated view of assessment and instruction, students will be expected to employ ideas from the course to improve their own assessment practices.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 2452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

**Minimum Credits:** 1  
**Maximum Credits:** 1  
In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### TLL 2470 - REASONING AND PROVING IN SECONDARY MATH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on addressing three overarching questions: 1) what is reasoning-and-proving? 2) How do secondary students benefit from engaging in reasoning-and-proving? 3) How can teachers support the development of students' capacity to reason-and-prove? Teachers explore these questions through engagement in a variety of activities that include: solving and discussing challenging mathematical tasks; analyzing narrative cases that make salient the relationship between teaching and learning and the ways in which student learning can be supported; examining and interpreting student work that features a range of solution strategies, representations, and misconceptions; and making connections to their own teaching practice.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 2473 - MATH FOR ELEMENTARY TEACHERS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will improve their mathematics knowledge of concepts and skills in numeration systems, integers, rationales, geometry, probability/statistics, and other selected topics.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
TLL 2474 - PROPORTIONAL REASONING IN MIDDLE SCHOOL MATHEMATICS

Minimum Credits: 3
Maximum Credits: 3
Focuses on developing teacher's ability to reason proportionally and capacity for designing instructional experiences that foster's child understanding of proportional relationships. Includes solving math tasks related to proportional reasoning and analyzing teaching and learning situations that highlight pedagogical approaches that support student learning in this domain.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2476 - TEACHING AND LEARNING IN SECONDARY MATH 1

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to secondary mathematics pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. The course focuses on how to create lessons that are engaging, relevant, and aligned with mathematical standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2484 - MATH PROBLEM SOLVING K-12

Minimum Credits: 3
Maximum Credits: 3
Students will become familiar with various theories of problem solving. They will solve challenging mathematical problems, discuss strategies, and identify ways to translate what they learn into their own mathematics classrooms.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2491 - SUPERVISED RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 2495 - INTERNSHIP - MATH

Minimum Credits: 1
Maximum Credits: 9
Interns (mat program) work with cooperating teachers in a school setting to master teaching skills and to enhance their professional attitudes. Responsibility includes half-day teaching.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2496 - INTERNSHIP - SCIENCE

Minimum Credits: 1
Maximum Credits: 9
Interns assume half-time teaching in a secondary school working with cooperating teachers and supervisors to master concepts, skills and professional attitudes. Career goal orientation is rigorously tested.

**Academic Career:** Graduate  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

### TLL 2498 - DIRECTED STUDY - MATH

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  

The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2500 - FOUNDATIONS OF SPECIAL EDUC

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Course provides an overview of the field of special education. It includes such topics as 1) identification; 2) placement; 3) programming; 4) inclusion; 5) advocacy; and other topics relating to individuals with disabilities, and gifted and talented individuals. The course examines the various philosophical views of exceptionality.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Attributes:** Learning Sciences

### TLL 2501 - STUDENT W/DISAB IN ELEM CLSSRM

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Course is an introduction to teaching students with disabilities in elementary general education classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding inclusive educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, and (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2502 - STUDNT W/DISAB IN SECNDRY CLSSRM

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Course is an intro to teaching students with disabilities in sec level general EDUC classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding INCL educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges, & adapting instruction & curricula.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2503 - STUDENT TEACHING FOR DUAL CERTIFICATION IN SECONDARY SCHOOLS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3
Student teaching for dual certification in secondary schools teacher candidates engage in fieldwork five days a week in secondary school sites for 14 weeks. Teacher candidates will collaborate with both content area and special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the term, assume responsibility for the majority of provided instruction and classroom management. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

TLL 2504 - STUDENT TEACHING SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 7
Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2505 - AUTISM: CHARACTERISTICS AND INTERVENTIONS

Minimum Credits: 3
Maximum Credits: 3
This course will present information on the characteristics of and intervention approaches for children with autism spectrum disorders (ASDS). Introductory material will include diagnosis criteria and characteristics of ASDS. Current research on theories of etiology will be explored and analyzed. Screening tools and assessments specific to this population will be examined in detail. Intervention approaches (e.g., LBI/Discrete Trial, ABLLS, precision teaching, teach) will be described and analyzed in terms of basic premises, research base, associated curricula, and evaluative guidelines from the autism society of America and national institute of mental health. Representatives from local education and behavioral health systems serving children with ASDS will present services/intervention models available in the area.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2506 - SOCIAL AND COMMUNICATIVE INTERVENTIONS: AUTISM

Minimum Credits: 3
Maximum Credits: 3
The course will consider programming and strategies for facilitating the communication and social development of young children with autism. Communication strategies will include a focus on nonverbal children, echolalic, and verbal children. Strategies will include sign language, picture systems, developmental approaches, naturalistic teaching, and discrete trial formats. Social interventions will examine play, peer interactions, and peer relationships. For both areas, assessment tools and strategies; published curricula; and a range of intervention procedures will be covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505

TLL 2507 - EARLY INTERVENTION CONSULTATION

Minimum Credits: 1
Maximum Credits: 1
This module focuses on providing students with skills for consulting with families, childcare providers, related service personnel, other teachers and paraprofessionals, to assist them in carrying out interventions for young children with autism, in homes, inclusive classrooms, and the community. The class will place special emphasis on classroom-based services. The module emphasizes a collaborative approach to consultation. Communication and interpersonal skills, relationship-building, the inclusion of families in all consultations, and techniques for assisting others to carry out
interventions are considered. Finally issues related to interagency collaborations with emphasis on strategies to overcome challenges that occur in the daily life of a consulting professional in a variety of settings will be investigated.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**TLL 2509 - APPLD BHVR ANAL/POSTV BHVR SUPRT**

Minimum Credits: 3  
Maximum Credits: 3  
The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group and classroom-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills and providing positive behavior support for changing behaviors.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**TLL 2511 - CURR PRG DVLP-LOW INCDNC DISABS**

Minimum Credits: 3  
Maximum Credits: 3  
This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community, vocational, and functional academics.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**TLL 2512 - ASSMNT INSTRUC-HIGH INCDNC DISAB**

Minimum Credits: 3  
Maximum Credits: 3  
Course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with mild disabilities, with emphasis on assessment for teaching reading, written language and mathematics. Course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness.

**Academic Career:** Graduate

**Course Component:** Clinical

**Grade Component:** Grad Letter Grade

**TLL 2513 - INSTRNL METH-HIGH INCIDNC DISABS**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the methods and procedures for developing literacy for students with learning disabilities, mild mental retardation, and behavioral disorders. The focus of the first 5 sessions is on learning to teach young students who have extraordinary difficulty; the next sections address the literacy needs of older students.

**Academic Career:** Graduate

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**TLL 2514 - SUPPORTING STUDENTS WITH DISABILITIES IN INCLUSIVE CLASSROOMS**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on understanding challenges faced by students with disabilities in inclusive settings and examines the responsibilities of educational professionals for all students. Students will develop skills in adapting instruction, ensuring access to curriculum, positive behavior
Equitable instruction includes recognizing and honoring the literacies of all students while also supporting their development of new literacies. This course is designed to prepare pre-service secondary educators to: 1) support the literacies of students with disabilities; and 2) support the disciplinary literacies of all students.

**TLL 2515 - SUPPORTING LITERACIES IN INCLUSIVE CLASSROOMS**

Minimum Credits: 3  
Maximum Credits: 3

Focuses on knowledge and recognition of normal and abnormal gross motor development of children, aged birth to 5, with an emphasis on analysis and facilitation of movement, handling and positioning, adaptive equipment, and safety.

**TLL 2518 - POSITIONING, HANDLING AND MOBILITY: YOUNG CHILDREN WITH DISABILITIES**

Minimum Credits: 1  
Maximum Credits: 1

Provides an overview of medical, motor, sensory, psychological and social aspects of feeding children. The class reviews the development of normal oral motor and self-feeding skills and the impact that disabilities may have on these processes. Use of descriptive, criterion-referenced evaluations and clinical observations to identify a child's level of oral motor control will be reviewed. Students will have an opportunity to use assessment procedures and devise treatment plans to address oral motor and feeding needs of children.

**TLL 2519 - ORAL MOTOR AND FEEDING STRATEGIES: YOUNG CHILDREN WITH DISABILITIES**

Minimum Credits: 1  
Maximum Credits: 1

General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their secondary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general secondary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

**TLL 2520 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETTINGS IN SEC CLSSRM**

Minimum Credits: 3  
Maximum Credits: 3

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade
TLL 2521 - PROACTIVE STRATEGIES FOR A POSITIVE CLASSROOM

Minimum Credits: 3  
Maximum Credits: 3
This course focuses on the support of all students with positive, proactive strategies in academic settings. The central theme will focus on the development and implementation of effective strategies that promote positive student outcomes, both academic and behavioral and improve interpersonal relationships. Evidence-based approaches as well as practices required by the Individuals with Disabilities Education Improvement Act will be emphasized.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2522 - ED STDNT EMOTIONAL DISTURBANCE

Minimum Credits: 3  
Maximum Credits: 3
The course provides knowledge of curriculum content, teaching techniques and instructional materials for children and youth with emotional disturbance through a focus upon academic content areas and social skills. The utilization of instruction as therapeutic programming will be the central theme.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2523 - LITERACY ASSESSMENT & INSTRUCTION FOR CHILDREN WITH DISABILITIES IN INCLUSIVE SETNGS IN ELEM CLSSRMS

Minimum Credits: 3  
Maximum Credits: 3
General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their elementary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general elementary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2524 - LEVEL 2 STUDENT TEACHING PRACTICUM IN VISUAL IMPAIRMENTS

Minimum Credits: 5  
Maximum Credits: 5
This course is required by the PA department of education for certification to become a teacher of students with visual impairments. Placements for this clinical experience are arranged by faculty in the Program in Visual Impairments and Blindness, and may be conducted in the student's home area. The approximate length of the placement is 14-weeks serving children who are blind or visually impaired ages three to 21-years.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad HSU Basis

TLL 2525 - TECHNOLOGY FOR CHILDREN WITH VI
Minimum Credits: 3
Maximum Credits: 3
This course evaluates many facets of assistive technology for individuals who are blind or visually impaired. Coursework includes projects and a weekend workshop for direct experiences with adapted software, hardware, and peripheral devices.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2527 - LEVEL 1 OBSERVATIONAL PRACTICUM: VI

Minimum Credits: 1
Maximum Credits: 2
This clinical experience requires students to engage in observations of practitioners serving a wide range of needs of individuals who are blind or visually impaired.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

TLL 2529 - BRAILLE

Minimum Credits: 3
Maximum Credits: 3
This course places emphasis on reading and writing braille. It emphasizes proficiency in reading and writing contracted and uncontracted braille, as well as teaching pre-braille and braille readiness to individuals who are blind or visually impaired.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2530 - INTRODUCTION TO THE EYE AND LOW VISION

Minimum Credits: 3
Maximum Credits: 3
This course presents an overview on the anatomy and physiology of the eye. It also presents information about visual pathology and its effect upon learning and function.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2531 - EDUCATION OF CHILDREN WITH VI 1

Minimum Credits: 3
Maximum Credits: 3
This methods course reviews the concepts and philosophies of educating children who are blind or visually impaired. It presents information on serving the needs of children in public schools, with emphasis on the itinerant model of delivery. This methods course examines assessment, programming, instructional materials and methods, and their theoretical and research basis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2532 - EARLY INTERVENTION FOR CHILDREN WITH VI

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the topics unique to children aged birth through five who are blind and visually impaired and their families. Focus will be on typical and atypical development as a basis for assessing the child's needs and designing appropriate interventions and family supports. The course includes individual and collaborative work in the areas of family-centered practices and collaboration among professional
agencies across disciplines. Emphasis will be placed on assessment and intervention in the areas of sensory, cognitive, motoric, and communicative development as well as providing developmentally appropriate orientation and mobility.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2533 - ORIENTATION AND MOBILITY FOR THE TVI**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to prepare teachers of the visually impaired with the knowledge and skills to provide initial level sensory, cognitive, and motor skill development to children who are blind or visually impaired. Students will learn the basic skills of sighted guide and self-protective techniques including assessment and remediation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2535 - COMMUNICATION SKILLS FOR STUDENTS WITH VISUAL IMPAIRMENTS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed for SOE students in the Program for Visual Impairments, and will cover instruction, techniques, and strategies of literacy and communication skills for students with visual impairments. Topics will include instruction for children with visual impairments in the emergent literacy stage, instruction in formal literacy for students who use braille, supporting classroom instruction for students with low vision who use print and large print, and the use of specialized materials, methods, and technology for supporting literacy instruction for all students with visual impairments. Special topics will include instruction of students who are visually impaired and have additional disabilities, students who have CVI, and students who are dual media learners or who have been print readers now acquiring braille skills. Pre-Requisite course is IL 2529, Braille.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2540 - FOUNDATIONS OF ORIENTATION AND MOBILITY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This fully on-line course is taken prior to IL 2750. It integrates relevant aspects of the process of teaching O&M (I. E., Sensory, cognitive) to individuals who are blind or with visually impaired who may also possess additional disabilities. In addition the history, philosophy, and aspects of professional ethics are covered. Service delivery models are discussed along with O&M resources, supervision, and program administration.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2541 - PROGRAM DEVELOPMENT: ORIENTATION AND MOBILITY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This fully on-line is taken prior to IL 2752. This course builds upon the knowledge students acquired in IL 2540 to understand assessment and instructional strategies for teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Aspects related to research in the field of O&M are also presented.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2542 - WEB CURRNT ISSUES & TRENDS SP ED**
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** Online

**TLL 2545 - EDUCATION OF CHILDREN WITH VI 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course builds on the concepts presented in IL 2531 for developing teaching methodologies and adaptation techniques for children who are blind or visually impaired who may also possess additional disabilities. Curricular and classroom adaptations and modifications are stressed with emphasis placed on teaching academic and functional skills.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2547 - NEMETH CODE/ABACUS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide instruction in the mathematical braille code (Nemeth code) as well as the Cranmer abacus. Students will be instructed in arithmetic computation and mathematical problem solving using both systems. Students will also learn instructional strategies to assist students who are blind or visually impaired to obtain mathematical literacy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 2548 - SPECIAL TOPICS SPECIAL EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**TLL 2552 - STUDENT TEACHING-SPECIAL EDUCATION IN SECONDARY SCHOOLS**

Minimum Credits: 3  
Maximum Credits: 3  
Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

**TLL 2561 - PROGRAMMING IN EARLY INTERVENTION**
Minimum Credits: 3
Maximum Credits: 3
Focuses on the development of curriculum and instructional strategies for children under five years of age with disabilities and their implementation in a variety of settings, including inclusive classrooms, home-based programs, and clinical settings.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2562 - ASESMT YOUNG CHLDNR DISABLTY

Minimum Credits: 3
Maximum Credits: 3
Focuses on the identification and assessment of children with disabilities under five years of age and the use of assessment information to plan programs for children in partnership with families and other professionals.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2563 - SEM: INCLUSION EARLY CHILDHOOD

Minimum Credits: 2
Maximum Credits: 3
This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals from other disciplines.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

Minimum Credits: 3
Maximum Credits: 3
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2

Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behaviors, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES
Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

TLL 2567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

TLL 2568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN APPLIED BEHAVIORAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

TLL 2569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACH) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2575 - TRANSITION PROCESSES AND SPECIAL EDUCATION PROCEDURES

Minimum Credits: 3
Maximum Credits: 3
Course covers critical information related to transition and special education services for students with disabilities in secondary settings.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

**TLL 2577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4**

 Minimum Credits: 2
 Maximum Credits: 3
 This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

**TLL 2578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS**

 Minimum Credits: 3
 Maximum Credits: 3
 This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in ABA I through ABA V. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and 2565

**TLL 2579 - TREATMENT FIDELITY AND COACHING: AUTISM**

 Minimum Credits: 3
 Maximum Credits: 3
 This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505

**TLL 2581 - CRITICAL HISTORIES OF EDUCATION**

 Minimum Credits: 3
 Maximum Credits: 3
 This course provides a critical introduction to historical moments, movements, and concepts that have characterized education and schooling, primarily in the US. The course focuses on histories of both self-determined and colonial education, with attention to eras and movements (e.g., maternalism and the boarding or residential schools; Freedom Schools and the complexities of law and desegregation). Students will engage topics such as labor, migration, and militarism. Students will learn how these larger forces have shaped contemporary schooling. Students will also study historical examples of anti-/de-colonial and freedom-based collective educational work that transformed dominant educational practices and institutions and cultivated autonomous organizations and schools.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
**TLL 2582 - WORKING WITH FAMILIES**

Minimum Credits: 3  
Maximum Credits: 3  
Course focuses on understanding family systems theory and its application to early intervention, including the development of individualized family service plans. Family centered practices, cultural, ethnic, racial, educational, and economic diversity among families, and accessing community resources will be covered.  
Academic Career: Graduate  
Course Component: Seminar  
Grade Component: Grad Letter Grade

**TLL 2583 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces issues of freedom and liberation and considers frameworks of access, equity, and inclusion in relation to school contexts. We do this by providing an overview of sociocultural and sociopolitical aspects of education and inviting students to situate themselves and their own educational histories within a broader understanding of the role(s) of schools in society. Students will examine significant knowledge traditions (e.g., Black Radical Tradition, Indigenous Knowledge Systems, Feminisms, Queer, Borderland Epistemologies) and learn how the educational praxes of knowledge traditions and language shape sociocultural and sociopolitical systems. This course takes culture as a key conceptual component for understanding: the traditions themselves; how structural, systemic responses to these traditions create repressive conditions; and how cultural knowledge is used to shape liberatory systems. This study of culture will be anchored in schools and counterpart learning contexts and will help students understand the networks of systems and knowledges within which schooling operates.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**TLL 2584 - CRITICAL PEDAGOGIES AND PRAXES**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces students to key critical pedagogical traditions and praxes for the secondary classroom. Students learn and practice lesson design and instructional scaffolding and sequencing. The course includes strategies for liberatory and just student and course evaluation. It also attends to critical praxis in relation to required state, district, and other assessments. Students consider and develop just classroom community-building approaches that move toward freedom and away from dehumanizing management and discipline frameworks.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**TLL 2585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: IL 2505

**TLL 2586 - AUTISM INTERVENTIONS IN SCHOOL AND COMMUNITY SETTINGS**

Minimum Credits: 3  
Maximum Credits: 3
This course is designed to prepare graduate students to teach school-aged students with ASD in a range school and community settings, with a particular focus on interventions and strategies appropriate for inclusive classrooms. Through readings, presentations, class discussions, and activities, students will acquire information and skills needed to implement evidence-based interventions approaches to assessment and intervention for students with ASD. As part of the final project, students will develop and deliver an assessment-based intervention for one of the suggested outcome areas.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: IL 2505

**TLL 2587 - SPECIAL TOPICS - INCLUSION**

Minimum Credits: 3  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**TLL 2590 - RESEARCH SEMINAR IN SPECIAL EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**TLL 2591 - LITERACY TUTORING**

Minimum Credits: 1  
Maximum Credits: 1  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**TLL 2594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1**

Minimum Credits: 1  
Maximum Credits: 3  
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**TLL 2595 - CULTURES, KNOWLEDGE TRADITIONS, AND SOCIAL SYSTEMS OF SCHOOLING 2**

Minimum Credits: 3  
Maximum Credits: 3  
This capstone course draws on the topics covered in Cultures, Knowledge Traditions, and Social Systems of Schooling I and other education...
coursework focused on developing equitable and just approaches to secondary teaching and learning. Advanced theoretical understandings of issues of cultures, knowledge traditions, and systems of schooling will be addressed, and students will be given opportunities to link these concepts to their own developing teaching praxis.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 2596 - INTERNSHIP IN SPECIAL EDUCATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.  
**Academic Career:** Graduate  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis

### TLL 2598 - DIRECTED STUDY IN SP ED

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2690 - RESEARCH SEMINAR ONLINE

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a required three-credit course for graduate level students in education. It offers opportunities for students to investigate research questions, collect and interpret data and present research documents. Overall, students will be expected to write and submit a research proposal, conduct the research described in the proposal, and use information in the proposal to write a research paper that describes their research. Students will also write an abstract of their research paper.  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2691 - SUPERVISED RESEARCH - EARLY CHILDHOOD

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### TLL 2698 - DIRECTED STUDY - EARLY CHILDHOOD

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis
TLL 2700 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues in or about the arts that are of concern to educators.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2701 - FIELD SEMINAR: PRIMARY PLUS

Minimum Credits: 1
Maximum Credits: 1
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2702 - ADVANCED PRACTICUM IN FOREIGN LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Attributes: Asian Studies

TLL 2707 - FIELD SEMINAR IN EARLY CHILDHOOD EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2710 - ADVANCED SOCIAL STUDIES METHODS

Minimum Credits: 3
Maximum Credits: 3
This course explores and examines theoretical discourses and advanced methods and materials for improving social studies instruction in the secondary (grades 7-12) social studies classroom. Course content, procedures, and activities focus on effective strategies for engaging and teaching learners from diverse backgrounds and developmental levels. Approaches include investigation and analysis of constructionist ideas, student empowerment, historical thinking, historiography, global citizenship, real-world connectedness, and various technologies as they apply to teaching and learning in the secondary social studies classroom.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2711 - SPECIAL TOPICS - FOREIGN LANGUAGE EDUCATION
TLL 2712 - HISTORICAL THINKING AND HISTORIOGRAPHY: SECONDARY SOCIAL STUDIES CLASSROOM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 2722 - PRACTICUM IN FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 3
Prospective teachers experience the reality of teaching the foreign languages in a public school setting.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

TLL 2725 - PRACTICUM IN SECONDARY ENGLISH EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design lessons and set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

TLL 2729 - PRACTICUM IN K-12 FOREIGN LANGUAGE 1

Minimum Credits: 1
Maximum Credits: 1
In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction. In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
TLL 2740 - PRACTICUM IN SECONDARY MATHEMATICS

Minimum Credits: 1  
Maximum Credits: 1  
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

Academic Career: Graduate  
Course Component: Practicum  
Grade Component: Grad HSU Basis

TLL 2750 - TECHNIQUES OF ORIENTATION AND MOBILITY 1

Minimum Credits: 3  
Maximum Credits: 3  
This first part of this two part methods course, which is offered on-campus in summer two, is designed to introduce the student to the elementary level travel skills (e.g., Use of human guidance) and procedures (e.g., Sensory development) used when teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Students begin their knowledge of teaching travel skills indoors and gradually transition to the introductory level outdoor environment. Students wear simulation materials designed to fully or partially occlude vision while traveling.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2751 - SPECIAL EDUCATION PROCEDURES AND TRANSITION PROCESSES

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students entering the teacher preparation program in mental and physical disabilities. Instruction concerning how to prepare for instruction, write lesson plans, and implement lessons is provided. Field observations and micro-teaching experiences are also provided.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2752 - TECHNIQUES OF ORIENTATION AND MOBILITY 2

Minimum Credits: 3  
Maximum Credits: 3  
This second part of a two part methods course, which builds upon the knowledge gained in IL 2750, is offered on-campus in summer two. It introduces the student to developing instructional strategies for teaching more complex o & m travel skills (e.g., Use of public transportation systems) and procedures (e.g., Use of tactile maps) to individuals who are blind or visually impaired who may also possess additional disabilities who travel in a variety of indoor and outdoor environments. The course also covers teaching strategies for serving the o & m needs of children as well as adults through simulated teaching activities.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2753 - ORIENTATION AND MOBILITY FOR DIVERSE POPULATIONS

Minimum Credits: 3  
Maximum Credits: 3  
The focus of this online course is on designing assessment and instructional strategies for various populations of individuals who are blind or visually impaired. Specific populations to be examined include: persons with low vision, individuals with dual sensory loss (deaf blindness), infants and preschoolers, school-aged students, individuals with cognitive impairments, students with cortical visual impairments, and dog guide users.

Academic Career: Graduate
TLL 2780 - AUTISM ENDORSEMENT PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
As part of this practicum course, students will get practical experience working with students with ASD of various age groups in different educational and community settings. They will also get an in-depth experience at their primary practicum placement by working closely with a mentor teacher and a University supervisor on a variety of application-based projects. All practicum activities will be completed at an approved practicum site (E.G., Autistic support classroom in a public school; general education classroom). Students will acquire competencies related to assessment, intervention, and collaboration with professionals, families, and community organizations. The practicum meetings will be used for group supervision and sharing of the experiences, ideas, and challenges with a team of peers.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505 and 2586

TLL 2791 - SUPERVISED RESEARCH -FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2800 - STUDENT TEACHING-EARLY CHLDHD ED

Minimum Credits: 1
Maximum Credits: 10
Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

TLL 2803 - STUDENT TEACHING SEMINAR - PRIMARY PLUS

Minimum Credits: 1
Maximum Credits: 1
This course supports student teaching. Students work on topics such as instructional management, behavior management, lesson planning, addressing student needs for the department of education.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad HSU Basis
TLL 2804 - STUDENT TEACHING - PRIMARY PLUS

Minimum Credits: 2
Maximum Credits: 5
This is a 14-week student teaching experience under the guidance of a mentor teacher and a supervisor from the university. Students are expected to learn to plan for and teach all four elementary subject areas for an extended period of time during the course of the term. Towards the end of the term, the student teachers are also expected to take on primary teaching responsibility for all subject areas for two weeks.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2822 - INTERNSHIP IN FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 10
Full-time practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

TLL 2824 - STUDENT TEACHING SEMINAR

Minimum Credits: 1
Maximum Credits: 3
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2826 - STUDENT TEACHING SEMINAR-FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 2
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Attributes: Global Studies

TLL 2828 - STUDENT TEACHING SEMINAR-SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 2
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

TLL 2834 - SPECIAL TOPICS - FOREIGN LANGUAGE
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2842 - STUDENT TEACHING SEMINAR-MATHEMATICS

Minimum Credits: 1
Maximum Credits: 3
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2843 - STUDENT TEACHING SEM - SCIENCE

Minimum Credits: 1
Maximum Credits: 2
A seminar for student teachers in the certification field which emphasizes collaborative problem solving of practical teaching problems and continued professional development.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2845 - PRACTICUM IN SECONDARY SCIENCE

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis

TLL 2850 - PRACTICUM - PRESCHOOL

Minimum Credits: 1
Maximum Credits: 3
This course involves direct contact with preschoolers with disabilities. Students are placed in various types of supervised community settings where preschoolers with disabilities and their families are served. A seminar will be held weekly.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

TLL 2852 - PRACTICUM - INFANTS & TODDLERS

Minimum Credits: 1
Maximum Credits: 3
This course involves direct contact with infants and toddlers with disabilities. Students are placed in various types of supervised community settings where infants and toddlers with disabilities and their families are served. A seminar will be held weekly.
TLL 2853 - STUDENT TEACHING - STUDENTS WITH HIGH INCIDENCE OF DISABILITIES

Minimum Credits: 2
Maximum Credits: 6
Teacher candidates engage in fieldwork five days a week in school sites with students with high incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

TLL 2854 - STUDENT TEACHING WITH LOW INCIDENCE OF DISABILITIES

Minimum Credits: 3
Maximum Credits: 3
Teacher candidates engage in fieldwork five days a week in school sites with students with low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices in the school context.

TLL 2857 - LEVEL 3 INTERNSHIP PRACTICUM - ORIENTATION AND MOBILITY

Minimum Credits: 6
Maximum Credits: 6
Full or part-time clinical experience, minimum 350 clock hours of direct instruction is necessary to fulfill this course requirement. Students must be supervised by an on-site, full-time ACVREP certified O&M specialist, with supplemental support provided by university faculty. Placements are arranged by the vision studies program faculty. Students must be able to demonstrate teaching competence with a variety of individuals who are blind and visually impaired (i.e., Ages, cognitive level), as well as teaching competence in a variety of environments (i.e., Simple as well as complex travel settings) successfully in order to apply to take the national certification exam in O&M.

TLL 2858 - STUDENT TEACHING SEMINAR - SPECIAL EDUCATION TEACHER PREPARATION

Minimum Credits: 2
Maximum Credits: 2
This weekly seminar is offered concurrently with the full-time student teaching requirement. The seminar permits teacher candidates to discuss and process situations and problems as they arise in the field and assists teacher candidates in the completion of program and student teaching requirements. A focus on the preparation of a professional portfolio prepares teacher candidates for the job search and interview process.

TLL 2860 - PRACTICUM IN SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher. Teacher candidates will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment, and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

**TLL 2861 - PRACTICUM IN SECONDARY SPECIAL EDUCATION - SPECIAL EDUCATION TEACHER PREPARATION**

Minimum Credits: 1
Maximum Credits: 1

Teacher candidates engage in fieldwork two days a week in secondary school sites. Teacher candidates will collaborate with a special education mentor teacher and will be expected to observe and support instruction. Fieldwork includes conducting and interpreting assessment and planning and delivering one-on-one and small group instruction for students with disabilities. Teacher candidates will follow guidance provided by the mentor teacher to support iep implementation in appropriate areas. This practicum experience will support the completion of assignments from coursework as well as prepare teacher candidates for the full-time student teaching experience.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad SN Basis

**TLL 2870 - TEACHING & LEARNING IN PK-12 WORLD AND HERITAGE LANGUAGE 2**

Minimum Credits: 3
Maximum Credits: 3

In this course, students deconstruct, discuss, and practice a variety of planning, teaching, and assessment strategies that support the World-Language Readiness Standards. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 2871 - TEACHING AND LEARNING IN SECONDARY ENGLISH 2**

Minimum Credits: 3
Maximum Credits: 3

This course focuses on learning contexts to support secondary students' English teaching. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that support inquiry-based and relevant instruction.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 2872 - TEACHING AND LEARNING IN SECONDARY SOCIAL STUDIES 2**

Minimum Credits: 3
Maximum Credits: 3

This course introduces students to secondary social sciences pedagogy, including lesson design. Drawing on critical theories of instruction, students learn to design and evaluate lesson plans. Teacher candidates will learn the characteristics of social sciences classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. The course focuses on how to create lessons that are engaging, relevant, and aligned with state standards. This course also focuses on constructing a transformative learning environment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
TLL 2873 - TEACHING AND LEARNING IN SECONDARY SCIENCE 2

Minimum Credits: 3  
Maximum Credits: 3

This course focuses on learning contexts to support secondary students' engagement in science practices. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that engage students in scientific practices that support inquiry-based instruction, high-leverage practices, and collaboration. This course also focuses on how to authentically assess students. Emphasis is placed on multiple knowledge types for assessment.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2874 - TEACHING AND LEARNING IN SECONDARY MATH 2

Minimum Credits: 3  
Maximum Credits: 3

This course focuses on learning contexts to support secondary students' engagement in mathematical practices. Drawing on critical theories of instruction, teacher candidates learn to design and implement unit plans that engage students in mathematical practices that support multiple ways of solving problems, high-leverage practices, and collaboration. Teacher candidates will learn the characteristics of science classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for youth. This course also focuses on how to authentically assess students. Emphasis is placed on multiple knowledge types for assessment.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade

TLL 2881 - INTERNSHIP-ENGLISH OR COM EDUC

Minimum Credits: 1  
Maximum Credits: 9

School-based practicum for graduate students seeking teacher certification and the master of arts in teaching degree. Requires a half-time placement for the entire year under the supervision of a mentor. Interns observe, analyze, and practice basic teaching skills in different grade levels and subject fields.

Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad LG/SU3 Basis

TLL 2882 - INTERNSHIP - FOREIGN LANGUAGE

Minimum Credits: 1  
Maximum Credits: 7

In this course, students engage in supervised field work in a local school district. Students co-plan with their assigned mentor teacher and receive feedback from a university supervisor.

Academic Career: Graduate  
Course Component: Internship  
Grade Component: Grad HSU Basis  
Course Requirements: PLAN: Instruction and Learning (MAT)  
Course Attributes: Global Studies

TLL 2883 - INTERNSHIP - SOCIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 9

School-based practicum for students seeking teacher certification and the master of arts in teaching degree. Requires placement for the entire school academic year under the supervision of a mentor teacher. Interns observe, analyze, and practice basic teaching skills while teaching the social studies at the secondary level.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 2890 - ADVANCED TEACHING PRACTICUM

Minimum Credits: 1
Maximum Credits: 9
Course designed for students seeking additional field teacher certification. Includes a school-based practicum in accordance with the student's experience and interests.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 2891 - SUPERVISED RES - SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 2892 - PRACTICUM IN K-12 FOREIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

TLL 2898 - DIRECTED STUDY - SOCIAL STUDIES

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 2905 - TEACHING INFANTS, TODDLERS AND PRESCHOOLERS

Minimum Credits: 3
Maximum Credits: 3
This course provides the foundation for teaching infants, toddlers, and preschoolers, in group settings in centers outside the home. Topics include developmentally appropriate curriculum and instruction, program design and implementation, legal compliance and program enhancement, family and community relations, professionalism, and advocacy.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 2906 - COMMUNITY RESOURCES SEMINAR: YOUNG CHILDREN AND FAMILIES
This interdisciplinary course focuses on the role of the professional in supporting families of young children with and without disabilities by linking them with formal and informal community resources. The course explores rationale; family-centered principles; models and practices for supporting families; and considerations in the development of community resources. It surveys available resources through guest speakers, on-site visits, and the development of a resource directory.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

**TLL 2907 - COLLABORATIVE PARTNERSHIPS WITH FAMILIES AND THE COMMUNITIES**

This course will focus on the role of the professional in supporting families of young children (pre-k - grade 4), including families of children with disabilities and other diverse characteristics. Students will learn about family systems, including how family characteristics affect the development of children, how to communicate, interact, and collaborate with families in school settings, and how to link families with formal and informal community resources.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 2928 - WEB LEGL & LEGISLTV FDS OF SP ED**

This web-based course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Online

**TLL 2990 - RESEARCH SEMINAR FOR MAT INTERNS**

The student proposes, carries out, and prepares a careful report of a study germane to the student's professional role.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

**TLL 3002 - CLASSROOM DISCOURSE**

The purpose of this course is to introduce students to the theoretical underpinnings, methodological concerns, and pedagogical implications of the study of classroom discourse - the study of who can say what to whom, when and where, for what purposes, under what conditions, and with what outcomes in a range of classroom contexts. The course critically reviews empirical research on classroom discourse (both recent and classical investigations), and covers the accepted methods for conducting research on classroom discourse including different approaches to collecting, recording, and analyzing both verbal and nonverbal discourse. A range of theoretical approaches to analyzing discourse are also covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 3003 - RESEARCH INTERVIEWING**
This course is designed to introduce doctoral students to the theories and methodologies of research interviewing in the social sciences. The course introduces students to aspects of research interviewing such as designing research questions that can be answered through interview data, identifying potential participants, creating interview protocols, transcribing interviews, coding interviews, and recognizing the role/bias of the interviewer. The course will also teach students how to critically analyze the representation and use of interview data in educational research. Students are expected to read published studies, collect and analyze data from interviews, and critically evaluate various approaches in light of their own research questions.

**TLL 3004 - IDENTITY IN EDUCATIONAL SETTINGS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Recent approaches to conceptualizing and studying identity in complex social environments will be reviewed through course readings and discussions. The historical background of this work will also be addressed. Particular attention will be paid to the identity development of students who are often marginalized in educational settings. Qualitative and interpretive methods for studying identity will also be covered. Students will be expected to actively participate in discussions and complete a term project (either a review of the literature or a small-scale study of identity formation).

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 3007 - CULTURE AND COGNITION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to the field of cultural psychology and its perspective on the language and thinking of children, adolescents, and adults. Research conducted from a cultural psychology perspective will be reviewed and applied to the assessment of the thinking, speaking, and acting of people from diverse ethnic, racial, economic, and national backgrounds. Instructional practices that have been employed with multicultural populations will be reviewed and evaluated. Students will be expected to actively participate in discussions and complete several short papers and one in-class presentation.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 3008 - EDUCATIONAL POLICY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**TLL 3009 - LEARNING SCIENCES AND POLICY WRITING SEMINAR**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**TLL 3011 - THE STUDY OF TEACHING**
Minimum Credits: 3
Maximum Credits: 3
Advanced graduate course for students interested in research on teachers and teaching. Covers mainstream and alternative paradigms, including behavioral, cognitive, and ethnographic modes of pedagogical inquiry. Offers a critical analysis of recent studies on the nature of expertise in teaching, and new approaches to teacher performance assessment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 3012 - CRITICAL READING IN LANGUAGE LITERACY AND CULTURE 1**

Minimum Credits: 3
Maximum Credits: 3
This course is part of a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**TLL 3013 - CRITICAL READINGS IN LANGUAGE, LITERACY, AND CULTURE 2**

Minimum Credits: 3
Maximum Credits: 3
This course is the second in a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**TLL 3014 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 1**

Minimum Credits: 3
Maximum Credits: 3
This course is the first in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 3015 - THEORETICAL PERSPECTIVES IN LANGUAGE, LITERACY AND CULTURE 2**

Minimum Credits: 3
Maximum Credits: 3
This course is the second in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 3016 - PHD WRITING SEMINAR**
TLL 3020 - INFORMAL LEARNING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3021 - LEARNING SCIENCES AND EDUCATIONAL CHANGE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

TLL 3080 - DIRECTED STUDIES - LSAP

Minimum Credits: 1
Maximum Credits: 6
Student pursues study of various topics under direction of faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

TLL 3081 - DOCTORAL DISSERTATION RESEARCH IN LSAP

Minimum Credits: 1
Maximum Credits: 18
Student plans and completes a doctoral dissertation under the guidance of the dissertation advisor.
Academic Career: Graduate
Course Component: Full Time Dissertation
Grade Component: Grad SN Basis

TLL 3088 - COMPETENT KNOWLEDGE MANAGEMENT AND UTILIZATION

Minimum Credits: 3
Maximum Credits: 3
Knowledge management considers knowledge as a strategic asset within emerging contexts. Using technologies and systems, KM deals with the policies, tools and practices that an organization uses to classify, produce, implement, and safeguard information. Contemporary school districts and non-profit organizations are increasingly dedicating resources to knowledge management in their educational, business, technology, and human resource operations. Knowledge management focuses on organizational goals such as improved student performance, data management, organizational development and innovation.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
TLL 3091 - SUPERVISED RESEARCH - SCIENCE

Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

TLL 3093 - INTERNSHIP IN CENTRAL OFFICE ADMINISTRATION

Minimum Credits: 1
Maximum Credits: 3
Provides an opportunity for the student to gain practical experience and demonstrate the knowledge, skills, and competencies obtained during the process of the training program in educational administration. It also furnishes the context of reality within which the student may acquire additional knowledge skills, and competencies as theory translated in the working world of the school system.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

TLL 3096 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course examines ideas that lie at the intersection of research in mathematics and science education, curriculum research, and education policy. Specifically, the course will focus on research that is or will become relevant for the new policy climate created by the common core state standards (CCSS) and the next generation science standards (NGSS). We will begin by examining the CCSS and NGSS, analyzing their similarities and differences from past standards, and chronicling the assessment and curricular activities that have followed in their wake. We will then identify ways in which research conducted during past standards-based eras (e.g., the first and second cycles of NCTM standards; state standards in the NCLB era) can inform the direction of state and district policies surrounding curriculum and assessments.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3097 - SUPERVISED RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Student demonstrates ability to apply research skills by planning and completing a research project under the direction of an appropriate faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 3098 - DIRECTED STUDY - SCIENCE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis

TLL 3099 - DOCTORAL DISSERTATION RESEARCH - SCIENCE
Minimum Credits: 1  
Maximum Credits: 15  
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  

### TLL 3101 - COMPETENT MANAGEMENT OF FISCAL RESOURCES

Minimum Credits: 3  
Maximum Credits: 3  
This is a required course for all students in administrative studies which reviews and analyzes major issues and the means for managing institutional resources in education. Emphasis is placed on fiscal, human, and physical resources in both basic and higher education.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  

### TLL 3102 - TEACHING PRACTICUM

Minimum Credits: 3  
Maximum Credits: 3  
Practicum will entail curriculum planning; co-teaching; office hours; grading; weekly planning for course activities coinciding with course readings; and facilitating in-class discussions.  
**Academic Career:** Graduate  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  

### TLL 3114 - COMPETENT MANAGEMENT OF STUDENT PERSONNEL SERVICES

Minimum Credits: 3  
Maximum Credits: 3  
Schools have a responsibility for students' health and safety while they are at school. Students who successfully complete this course will demonstrate their knowledge of research-based approaches to apply in accordance with Pennsylvania law in the areas of health, mental health, safety, and crisis management.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  

### TLL 3116 - COMPETENT MANAGEMENT OF HUMAN RESOURCES

Minimum Credits: 3  
Maximum Credits: 3  
This course presents a review of organization theories as they apply to schools and universities. Topics include organizational typologies, competing models of organizational structure, organization-environment linkages, and the evaluation of organizational effectiveness.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  

### TLL 3248 - SPECIAL TOPICS-LANGUAGE AND LITERACY

Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.  
**Academic Career:** Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 3291 - SUPERVISED RESEARCH-LANGUAGE, LITERACY, AND CULTURE

Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 3295 - DIRECTED STUDY IN LANGUAGE, LITERACY, AND CULTURE

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 3296 - DOCTORAL DISSERTATION RESEARCH - LANGUAGE LITERACY AND CULTURE

Minimum Credits: 1
Maximum Credits: 9
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Full Time Dissertation
Grade Component: Grad HSU Basis

TLL 3298 - DIRECTED STUDY - READING

Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

TLL 3299 - DOCTORAL DISSERTATION - READING

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

TLL 3391 - SUPERVISED RESEARCH IN LLC

Minimum Credits: 1
Maximum Credits: 9
The student works collaboratively with a sponsoring faculty member in carrying out a research project.

**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

**TLL 3398 - DIRECTED STUDY IN LLC**

Minimum Credits: 1  
Maximum Credits: 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**TLL 3399 - DOCTORAL DISSERTATION RES IN ENG**

Minimum Credits: 1  
Maximum Credits: 18  
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad HSU Basis

**TLL 3452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES**

Minimum Credits: 1  
Maximum Credits: 1  
In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis

**TLL 3470 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
In this course students will draw on the research literature and their own professional experiences to examine current practices of large- and small-scale assessment and teacher evaluation in mathematics and science education - both historically and in terms of their forms and purposes in today's educational and political climate. Current research and practice will be examined with respect to equity, theories of learning, methodology, and policy.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**TLL 3471 - INSTRUCTIONAL ISSUES IN MATH AND SCIENCES EDUCATIONS**

Minimum Credits: 3  
Maximum Credits: 3
The aim of this course is to introduce students to current approaches to understanding and studying instructional practices in mathematics and science education. A historical perspective on the use of observations to document effective teaching will be reviewed. Students will be introduced to recent research on increasing students' agency, authority, and accountability through classroom discourse. Additional topics will include: the impact of high cognitive demand tasks on student learning and fostering equity in instruction. Students will apply course readings to the analysis of classroom artifacts and videotapes.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 3474 - COLLEGE SCIENCE TEACHING PRACTCM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Issues associated with higher education in the science disciplines are explored to develop a perspective for the college science instructor. Supervised teaching handout preparation, cognitive patterns of the adult, and evaluation of learning are studied.  
**Academic Career:** Graduate  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

**TLL 3475 - PROFESSIONAL LEARNING IN MATH-SCIENCE EDUCATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**TLL 3476 - ASSESSMENT & EVAL IN MATH & SCIENCE EDUCATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3
International, national, and local perspectives on mathematics assessment will be presented. Areas include classroom and large-scale assessment and curriculum and program evaluation.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**TLL 3491 - SUPERVISED RESEARCH - MATH**

**Minimum Credits:** 1  
**Maximum Credits:** 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**TLL 3498 - DIRECTED STUDY - MATH**

**Minimum Credits:** 1  
**Maximum Credits:** 9
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis
TLL 3499 - DOCTORAL DISSERTATION RESEARCH - MATH

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes
the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

TLL 3501 - WEB FINANCING SPECIAL EDUCATION

Minimum Credits: 1
Maximum Credits: 1
This web-based course is designed to provide prospective special education supervisors with an overview of the development and content of
mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special
education budget.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Attributes: Online

TLL 3509 - ADV SEMINAR: EARLY INTERVENTION

Minimum Credits: 3
Maximum Credits: 3
This course will acquaint students with the latest research in early education and will apply those findings to infants, toddlers and preschoolers with
disabilities.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

TLL 3526 - PRACTICUM IN COLLEGE TEACHING

Minimum Credits: 1
Maximum Credits: 3
Students prepare and teach a course under the direct super vision of a faculty member.
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad Letter Grade

TLL 3536 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3
Maximum Credits: 3
Course covers single subject research methodology applied in studies involving exceptional populations.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

TLL 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
To develop successful educational innovations, a systems view must be taken, analyzing instructional goals, constraints and resources, considering
alternative approaches to conveying ideas, motivating students, and guiding students to instructional objectives. Students will work in teams to enact an innovative educational design process with real projects and real clients. In the past, educational systems being (re)designed included museum exhibits, high school robotics units, afterschool digital literacy workshops, college lab courses, processes for selecting student assessments tools, and a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 3541 - WEB INSTRNL PRACTICES SP EDUC

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This web-based course focuses on the most current research on instructional practices for students with disabilities and prepares the prospective supervisor for what should be happening in special education classrooms and in the provision of special education services.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** Online

### TLL 3542 - WEB CURRNT ISSUES & TRENDS SP ED

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Attributes:** Online

### TLL 3548 - SPECIAL TOPICS-SPEC EDUCATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within program.

**Academic Career:** Graduate  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### TLL 3564 - APPLIED BEHAVIORAL ANALYSIS 1: FUNDAMENTALS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### TLL 3565 - APPLIED BEHAVIORAL ANALYSIS 2: FUNDAMENTALS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3566 - APPLIED BEHAVIORAL ANALYSIS 3: APPLICATIONS IN DEVELOPMENTAL DISABILITIES

Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3567 - APPLIED BEHAVIORAL ANALYSIS 4: EMOTIONAL BEHAVIORAL DISABILITIES OF CHILDREN AND ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3568 - APPLIED BEHAVIORAL ANALYSIS 5: CURRENT DEVELOPMENTS IN ABA

Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3569 - APPLIED BEHAVIORAL ANALYSIS PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACB) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as
well as to seek support and ideas from classmates.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad HSU Basis

TLL 3571 - SUPERVISION AND FINANCING OF SPECIAL EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course reviews problems and practices in special education supervision. Emphasis is placed in increasing interpersonal skills and developing technical skills in observing, planning and evaluating instruction. The course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Attributes: Online

TLL 3577 - BRIDGE COURSE: BCBA CURRICULUM EDITION 3 TO 4

Minimum Credits: 2
Maximum Credits: 3
This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

TLL 3578 - APPLIED BEHAVIORAL ANALYSIS 6: ETHICS

Minimum Credits: 3
Maximum Credits: 3
This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in aba i through aba v. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 3564 and 3565

TLL 3579 - TREATMENT FIDELITY AND COACHING: AUTISM

Minimum Credits: 3
Maximum Credits: 3
This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2505
TLL 3585 - TECHNOLOGY-BASED INTERVENTIONS: AUTISM

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

TLL 3590 - RESEARCH SEMINAR IN SPECIAL EDUCATION

Minimum Credits: 3
Maximum Credits: 3
This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

TLL 3591 - SUPRVSD RESEARCH IN SPECIAL EDUC

Minimum Credits: 1
Maximum Credits: 9
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis

TLL 3592 - SUPERVISION PRACTICUM IN SP ED

Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional supervision skills. This practicum may be completed in conjunction with the professional sequence of coursework in supervision at approved educational sites.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

TLL 3593 - RESEARCH PRACTICUM IN SPEC EDUC

Minimum Credits: 1
Maximum Credits: 3
Course is a field-based internship in research methodology. Purpose of the course is to provide opportunities for students to get hands-on experience and direct supervision in the development, implementation and dissemination of educational research.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

TLL 3594 - INTERDISCIPLINARY LEADERSHIP SEMINAR DEVELOPMENTAL DISABILITY 1
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad Letter Grade

**TLL 3595 - SPECIAL TOPICS**

Minimum Credits: 3
Maximum Credits: 3
Students will address selected topics for study.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

**TLL 3596 - INTERNSHIP IN SPECIAL EDUCATION**

Minimum Credits: 1
Maximum Credits: 3
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.
Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis

**TLL 3598 - DIRECTED STUDY IN SP ED**

Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

**TLL 3599 - DOCTRL DISSER RES - SPECIAL ED**

Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

**TLL 3702 - SPECIAL PROJECT FOREIGN LANGUAGE EDUCATION PHD**

Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis  
Course Attributes: Asian Studies

TLL 3791 - SUPERVISED RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1  
Maximum Credits: 6  
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis

TLL 3798 - DIRECTED STUDY - FOREIGN LANGUAGE

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

TLL 3799 - DOCTORAL DISSERTATION RESEARCH - FOREIGN LANGUAGE

Minimum Credits: 1  
Maximum Credits: 15  
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.  
Academic Career: Graduate  
Course Component: Thesis Research  
Grade Component: Grad LG/SU3 Basis

TLL 3891 - SUPERVISED RES - SOCIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 6  
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.  
Academic Career: Graduate  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis

TLL 3898 - DIRECTED STUDY - SOCIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: Graduate  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

TLL 3899 - DOCTRL DISSER RES-SOCIAL STUDIES

Minimum Credits: 1  
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**TLL 3928 - WEB LEGL & LEGISLTV FDS OF SP ED**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Telecommunications**

**TELCOM 2000 - INTRODUCTION TO TELECOMMUNICATIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to telecommunications for non-TELCOM majors. Top-down orientation relates networking technologies to organizational goals and needs. Data communications and internet technologies and basic system performance analysis. TCP/IP, LANs, WANs, internetworking, and signals and communications media.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Information Science (MSI) or Telecommunications (MST)

**TELCOM 2010 - COMPUTER NETWORKING LABORATORY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and wlan performance and management, ip address planning and management, ip router configuration including RIP, OSPF,BGP, MPLS protocols, TCP connection control, stateful packet filtering, network monitoring and management, signaling protocols for voip services, and web-based services configuration.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2011 - TELECOMMUNICATIONS SEMINAR**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Exposure to the latest issues in the telecommunications industry and research through talks by invited experts.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)
TELCOM 2100 - FUNDAMENTALS OF TELECOMMUNICATIONS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2110 - NETWORK DESIGN

Minimum Credits: 3
Maximum Credits: 3
Methods and techniques for the design of computer/telecommunication networks. Management and business perspectives on network design, estimation of traffic demand and application requirements, network cost analysis, topological design, capacity assignment, graph theory and optimization based design algorithms, virtual network design, network design tools, wireless network design issues, availability analysis and survivable network design.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications TELCOM-MST/TCOMM-MST or Telecommunications Certificate TELCOM-AC/TCOMM-AC or Info Science PHD w/TELE option PHDTEL-TR)

TELCOM 2120 - NETWORK PERFORMANCE

Minimum Credits: 3
Maximum Credits: 3
Introduction to techniques for performance modeling and analysis of computer systems and communication networks. Analysis of measurements, discrete event simulation and queuing theory.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course explores networks as a primary metaphor and mechanism for a variety of information-related phenomena. The advancement of interconnected information and communication technologies has made networks one of the dominant ways of analyzing the use and flow of information among individuals, institutions, and societies. The course starts with the basics of graph theory and moves to understand network structures such as social networks, ecological webs, it and infrastructure systems, telecommunications networks, and market distribution and allocation structures. As a prerequisite, students should have a command of mathematics through linear and matrix algebra at the Undergraduate level.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/ TELE option (PHDTEL-TR)

TELCOM 2215 - UNIFIED COMMUNICATIONS
After describing how humans communicate orally and visually, this course goes on to describe the technology and network architectures that provide audio and video telecommunications using conventional circuit-switched telephony, newer packet-switched "internet telephony" (VoIP), and streaming video over the internet. Basic knowledge of the physical layer is helpful, but students must be familiar with TCP/IP.

**TELCOM 2227 - INTERNET TELEPHONY**

Minimum Credits: 3  
Maximum Credits: 3  
Technology for offering telephony over an internet including: voice-over-IP end points and protocols, end-to-end delay, telephony signaling protocols, gateways and network components, telephone service provision, multi-point, network issues, and the future. Presents market, policy, and economic issues; differentiates VoIP on public or private internets.

**TELCOM 2310 - APPLICATIONS OF NETWORKS**

Minimum Credits: 3  
Maximum Credits: 3  
Foundational principles, architectures, and techniques employed in computer networks. Protocols and mechanisms used in the internet TCP/IP protocol suite, including the operation of both wide-area and local-area networks. Special emphasis on analysis of network and transport layer protocols.

**TELCOM 2321 - WIDE AREA NETWORKS**

Minimum Credits: 3  
Maximum Credits: 3  
Basic principles of broadband networks. Protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and SMDS. Design issues for high speed networks including network characterization, application performance guarantees, traffic policing and congestion control.

**TELCOM 2326 - ADVANCED TOPICS IN DATABASE MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Advanced graduate course on database systems. Key issues that typically arise in the context of large-scale enterprise database management in heterogeneous wide-area environments including distributed and non-relational database systems, network-centric data management, web-based
information systems, heterogeneous databases, information integration, and wireless data management.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: INFSCI 2710 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

## TELCOM 2420 - PROJECT MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Techniques and tools to assist in the managing process. Uses case study approach.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

## TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
For students with a basic background of telecommunications who are not for telecom majors. Principles of wireless communications and how they differ from wired communications. Fundamental concepts including: transmission and mitigation techniques (e.g., Modulation and coding, propagation, interference and antennas) for wireless systems, multiplexing techniques, wireless system architectures, mobility management, security, protocols and location technology. Systems include: cellular phone networks (e.g., Cdma2000, umts), wireless local area networks (e.g., leee 802.11G), personal area networks (e.g., Bluetooth), fixed point broadband wireless (e.g., WiMAX) and satellite systems.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

## TELCOM 2727 - APPLICATION DEVELOPMENT FOR MOBILE DEVICES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Focus on information system applications that run on top of wireless infrastructure such as multimedia messaging, mobile inventory control, location aware services including wireless technologies (gsm, cdma2000, umts, 802.11, Bluetooth), mobile information systems and applications (m-business, location-based services, wireless crm), wireless information system challenges and architectures (security, reliability, mobility, power conservation, gateways, proxies), mobile application protocols (SMS, ems, mms, wap), thin and thick client mobile application development (wml, vxml, Java, j2me, j2ee, .Netcf, c#), and business case studies of mobile applications.  
**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: [(INFSCI 0017 or 0015 or CS 0401) and INFSCI 1052] or [PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Information Science PHD (ISCI-PHD)]

## TELCOM 2810 - INFORMATION SECURITY AND PRIVACY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Fundamental issues and first principles of security and information assurance (confidentiality/privacy, integrity, authentication, identification, authorization, availability, access control). Business issues of risk analysis and management of resources. Issues in information systems security; analysis, design, and coding of information systems/ networks for security; techniques for building secure organizational systems; e-commerce related security issues; policy, legal and ethical issues in security.

2957
TELCOM 2811 - INNOVATING FOR PUBLIC IMPACT

Minimum Credits: 3
Maximum Credits: 3
This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions. This course was formerly titled HACKING FOR DEFENSE.

TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3
Maximum Credits: 3
Security management in information systems and networks. Intrusion detection systems, anomaly detection, network forensics, application logging, auditing and data management, contingency planning, digital immune systems; alarm and responses; security standards; ethical and legal issues in information; cyber-evidence.

TELCOM 2820 - CRYPTOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (des, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (rsa, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC).

TELCOM 2821 - NETWORK SECURITY

Minimum Credits: 3
Maximum Credits: 3
Principles of network security and management. Review of network vulnerabilities, security at the link, network and transport layers; dial-up security (pap, chap, radius, diameter), ipsec, ssl, and vpns. Email security (PGP, S/MIME); Kerberos; x.509 Certificates; AAA and Mobile IP; SNMP security; firewalls; filters and gateways; policies and implementation of firewall policies; state full firewalls; fire wall appliances.

2958
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2810 or 2820 or INFSCI 2150) and (TELCOM 2000 or 2100 or IS 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2825 - INFORMATION SYSTEMS AND NETWORK INFRASTRUCTURE PROTECTION

Minimum Credits: 3
Maximum Credits: 3
Techniques for the protection and survivability of information systems and networks. Critical infrastructure definition, risk management, vulnerability and risk analysis, fault and attack trees, availability analysis, traffic restoration schemes and survivable network design and management techniques; critical infrastructure simulation, CIP policy and legal issues, SCADA systems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2000 or 2100 or 2810 or INFSCI 1070 or 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2829 - ADVANCED CRYPTOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
Algorithm complexity, advanced number theory (Galois fields, quadratic residues, zero knowledge schemes, one-time signatures), efficient implementation of encryption schemes in hardware and software and other advanced topics in cryptography.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2820 or INFSCI 2170) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2830 - CAPSTONE IN SECURITY

Minimum Credits: 3
Maximum Credits: 3
Integrative class for master's students in their final semester of the SAIS track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2810 or INFSCI 2150) and TELCOM 2821 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2921 - INDEPENDENT STUDY IN NETWORKING

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2922 - INDEPENDENT STUDY IN COMMUNICATION SYSTEMS

Minimum Credits: 1
Maximum Credits: 3
TELCOM 2923 - INDEPENDENT STUDY: COMPUTER COMMUNICATION
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2924 - INDEPENDENT STUDY: TELECOMMUNICATIONS ADMINISTRATION
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2925 - INDEPENDENT STUDY: TELECOMMUNICATIONS ECONOMICS AND POLICY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2926 - INDEPENDENT STUDY: HUMAN COMMUNICATION
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2927 - INDEPENDENT STUDY IN WIRELESS COMMUNICATION
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2928 - INDEPENDENT STUDY SECURITY ASSURED INFORMATION SYSTEMS
Minimum Credits: 1
Maximum Credits: 3
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2931 - SPECIAL TOPICS IN NETWORKING
Minimum Credits: 3
Maximum Credits: 3
Selected relevant subjects in networking, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2937 - SPECIAL TOPICS IN WIRELESS NETWORKS

Minimum Credits: 3
Maximum Credits: 3
Selected relevant subjects in wireless telecommunications, either as traditional course or as survey of new literature. Content varies depending on student and instructor interest.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2940 - PRACTICUM

Minimum Credits: 1
Maximum Credits: 3
For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad SN Basis

TELCOM 2941 - MASTER'S THESIS

Minimum Credits: 3
Maximum Credits: 6
The thesis is a report of original, theoretical, or laboratory work suitable for publication.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

TELCOM 2982 - TELECOMMUNICATIONS COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

Theatre Arts

THEA 2000 - RESEARCH AND THESIS MASTER'S DEGREE

Minimum Credits: 1
Maximum Credits: 12
Individual research designed by the MA students in connection with their Master's Degree Thesis.

**Academic Career:** Graduate  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**THEA 2100 - PEDAGOGY AND PROFESSIONALIZATION**

- Minimum Credits: 3  
- Maximum Credits: 3  
- **Academic Career:** Graduate  
- **Course Component:** Seminar  
- **Grade Component:** Grad Letter Grade

**THEA 2110 - SECONDARY EMPHASIS - PEDAGOGY**

- Minimum Credits: 1  
- Maximum Credits: 3  
- The student will focus on an area of specialization designed to supplement foundational performance pedagogy. Under supervision and advisement from faculty, the student will choose an area of specialization (which may include voice, movement, advanced acting techniques, stage combat, directing, etc.) Based on their own present experiences and create a strategy and timeline for completion of chosen goals. The quantity of knowledge and experience to be achieved will be discussed between the advisor and student at the beginning of the course. The student will meet with their advisory on a regular basis and write a research or response paper summarizing and analyzing their experience.  
- **Academic Career:** Graduate  
- **Course Component:** Directed Studies  
- **Grade Component:** Grad Letter Grade

**THEA 2120 - PRODUCTION MENTORSHIP**

- Minimum Credits: 1  
- Maximum Credits: 6  
- The student will serve as actor, director, coach or other supportive function of a main-stage production at the University of Pittsburgh. This role will include active mentorship and teaching of undergraduate performers. Under supervision and advisement from faculty, the student will create a syllabus outlining their own research questions for their mentorship role on the production and how it may inform their own pedagogical practices. The student will write a research or response paper summarizing and analyzing their experience.  
- **Academic Career:** Graduate  
- **Course Component:** Directed Studies  
- **Grade Component:** Grad Letter Grade

**THEA 2135 - COURSE DEVELOPMENT**

- Minimum Credits: 3  
- Maximum Credits: 3  
- Course content to be decided between teacher and student.  
- **Academic Career:** Graduate  
- **Course Component:** Practicum  
- **Grade Component:** Grad Letter Grade

**THEA 2145 - DIRECTED STUDY-DRAMATURGY**

- Minimum Credits: 1  
- Maximum Credits: 3  
- Faculty directed supervision in the study of the dramaturgy in the theatre.  
- **Academic Career:** Graduate  
- **Course Component:** Directed Studies  
- **Grade Component:** Grad Letter Grade
THEA 2147 - TECHNIQUES PERFORMANCE PEDAGOGY

Minimum Credits: 3
Maximum Credits: 3
Techniques in Performance Pedagogy is designed for graduate students to address the unique needs of teaching theatre performance at the college level. Students will examine various Stanislavski-based training methods and compare those methods with physical and/or ensemble-based methodologies as they apply to university training programs (in a BA, BFA or MFA program). Students will formulate their own style and teaching philosophy as they develop lesson plans, create innovative pedagogical exercises, conduct warm up sessions, coach acting scenes and develop methods of grading performance work. In addition, students will create a sample master class in order to be competitive on the academic job market.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2149 - PROFESSIONAL ORIENTATION

Minimum Credits: 1
Maximum Credits: 3
Experimental learning credits based outside of the university. Focus on some aspect of performance that substantiates the pedagogical experience.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2150 - DIRECTED STUDY-ACTING

Minimum Credits: 1
Maximum Credits: 3
Faculty directed supervision in the study of the theory, preparation and execution of acting in the theatre.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2155 - DIRECTED STUDY - PEDAGOGY

Minimum Credits: 1
Maximum Credits: 3
Faculty directed supervision in the study of the theory and practice of education in the theatre.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2156 - DIRECTED STUDY - PLAYWRITING

Minimum Credits: 1
Maximum Credits: 3
With a mentor, students design an individualized plan of study focused on developing their knowledge and skills of playwriting.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2160 - DIRECTED STUDY-DIRECTING

Minimum Credits: 1
Maximum Credits: 3
Faculty directed supervision in the study of the theory, preparation and execution of directing in the theatre.

Academic Career: Graduate
THEA 2168 - NEW PLAY PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
New Play Practicum is a course in critiquing and revising student scripts, testing them in rehearsal for pacing and blocking and motivation, and then trying them before an invited audience. It provides opportunity to write, direct, act, and critique. The course benefits from those who are both writers and performers but an ideal grouping would be as much as four writers, four directors, and six to eight performers.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2170 - DIRECTED STUDY-SET, COSTUME, LIGHTS

Minimum Credits: 1
Maximum Credits: 9
Faculty directed supervision in the study of theory, preparation, and execution of design for the theatre.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2187 - DIRECTED STUDY - OBSERVATIONS IN PERFORMANCE PEDAGOGY

Minimum Credits: 1
Maximum Credits: 3
Directed Study - Observations in Performance Pedagogy

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2194 - DIRECTED STUDY - CAREER DEVELOPMENT IN PERFORMANCE PEDAGOGY

Minimum Credits: 1
Maximum Credits: 3
Directed Study - Career Development in Performance Pedagogy

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2200 - DIRECTED STUDY-HISTORY,LITERATURE,CRITICISM,THEORY

Minimum Credits: 1
Maximum Credits: 12
Faculty directed supervision in the study of history, literature, criticism and theory of the theatre.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2201 - MATERIALS AND METHOD RESEARCH FOR THEATRE

Minimum Credits: 3
Maximum Credits: 3
Materials and Methods aims to introduce the research methods and tools appropriate for scholarly work in theatre and performance studies. Throughout the semester, students will be introduced to several of the primary genres of scholarly writing in the field and significant theoretical orientations current and controversial.

**Academic Career:** Graduate
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**THEA 2202 - THEORIES OF THEATRE AND DRAMA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers a specialized topic in Theatre Arts. Topics vary every semester. Current course descriptions can be found in the notes section.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**THEA 2204 - THEORIES OF ACTING AND DIRECTING**

**Minimum Credits:** 3  
**Maximum Credits:** 5  
Students hone, diversify and/or solidify their directing craft through tude staging assignments and personalized, practical projects designed in consultation with the instructor. Students will engage with foundational director-driven, directing and devising texts in our field, from Brecht, Artuad, and Growotski to Aikalitis, Bogart, and others, with particular attention to both practical and pedagogical application as well as critical evaluations of methods, cultural institutions, and representation. Students will gain facility with expectations of academic institutions and programs including, but not limited to: moving between roles of director, coach and acting teacher in production; scaffolding connections between rehearsal, performance and studio work; collaborating within an academic department; mobilizing community-academic and/or interdisciplinary engagement through production work; practice as research; and standards for documenting, narrating and framing directorial work across institutional environments and positions (ie, as an MFA, a PhD, an MFA-PhD; at R1, liberal arts and/or community colleges).

**Academic Career:** Graduate
**Course Component:** Practicum
**Grade Component:** Grad Letter Grade

**THEA 2205 - WORLD THEATRE: 500 BC - 1640**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
World Theatre 500 BCE to 1640 is the first in a three-part world theatre history sequence designed to explore the development of dramatic forms, theatre practices, and performances from the 5th century BCE to today. World Theatre 500 BCE to 1640 investigates histories of theatre and performance (scripts, embodiment, design, audiences, conventions, cultural functions, etc.) within local and global social, artistic and political contexts. The course focuses on evidence and interpretation as well as historical causation. Within each survey section, we will analyze and compare representative case studies to better understand performance as a practice and as a site of history making, with particular attention to questions of race, gender, sexuality, and class. Throughout the semester, we will explore a variety of theatre and performance forms, including Roman comedy, early Sanskrit drama, medieval commemorative drama, and Japanese theatre forms including Noh and Kabuki, among others. We will investigate world theatre history from a historiographical perspective. This means that we will examine our material not only for content, but also for how it conveys that content. In our exploration of how theatre history is crafted, we will develop critical historical skills and tools, including how to ask historical questions, assess primary sources, critique narratives, and clearly communicate our historiographical ideas and arguments. Students will produce historical knowledge about theatre and performance with respect to questions of racial, gender, sexual, and class diversity throughout the semester.

**Academic Career:** Graduate
**Course Component:** Lecture
**Course Attributes:** Medieval & Renaissance Studies, West European Studies

**THEA 2206 - WORLD THEATRE: 1640 TO 1890**
This course is the second in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to the present. In World Theatre: 1640 to 1890 we will discuss the history of theatre arts which includes looking at drama, design, performance traditions and audiences--from the comedies of Restoration England to emerging realism of Buchner, Zola and Ibsen. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. In addition, we will discuss some contemporary scholarship examining these theatrical events.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Medieval & Renaissance Studies, West European Studies

**THEA 2207 - WORLD THEATRE: 1890-Present**

This is the third in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to 1970. In world theatre: 1890 to 1970, we will discuss the history of the theatrical arts which includes looking at drama, design, performance traditions and audiences' from the late dramas of Ibsen to the plays of Beckett and Pinter. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. Our focus will be on western theatre with occasional references to non-western forms of performance and production. In addition, we will discuss some contemporary scholarship examining these theatrical events.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** West European Studies

**THEA 2216 - ADVANCED THEORY AND METHODOLOGY**

This course covers a specialized topic in Theatre Arts. Topics vary every semester. Current course descriptions can be found in the notes section.

**Academic Career:** Graduate  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Attributes:** Asian Studies

**THEA 2220 - PLAYWRITING 2**

Playwriting II advances beyond and builds upon the craft exercises and 20 page one acts of Playwriting I to workshop students' ongoing projects. This work might take the form of a brace or trio of one acts, an hour long portion of a full length play, or other projects to be approved by the instructor. Workshop method. Revision required.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**THEA 2980 - COMPREHENSIVE EXAM PREP**

This course is designed to prepare students for comprehensive exams. Topics vary every semester. Current course descriptions can be found in the notes section.

THEA 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 12
The instructor and the student will work together concerning the course content.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis

THEA 2991 - PROFESSIONAL INTERNSHIP-PLAYWRITING

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2992 - PROFESSIONAL INTERNSHIP-DRAMATURGY

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2993 - PROFESSIONAL INTERNSHIP-DIRECTING

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2994 - PROFESSIONAL INTERNSHIP-ACTING

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2995 - PROFESSIONAL INTERNSHIP-DESIGN

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
THEA 2996 - PROFESSIONAL INTERNSHIP-STAGE MANAGEMENT

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2997 - PROFESSIONAL INTERNSHIP-THEATER BUSINESS MANAGEMENT

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2998 - PROFESSIONAL INTERNSHIP-TECHNOLOGY

Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 3000 - DISSERTATION RESEARCH PHD DEGREE

Minimum Credits: 1
Maximum Credits: 12
Individual research designed by the Ph.D. student in connection with his or her dissertation.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Urology

URLGY 5321 - UROLOGIC ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0
This four-week elective is intended for the less experienced medical student to provide a hands-on experience in a surgical specialty. Students will be exposed to the urology service working closely with both attending and resident staff. Time will be spent in the outpatient clinic, operating room, and on the inpatient floors to provide exposure to all aspects of the practice of urologic surgery. The focus is on urologic oncology but students will also have exposure to patients with a wide range of general urologic diseases. The course objectives are: to learn to take a urologic history and perform a focused urologic physical examination; to develop experience in the performance of basic urologic procedures, possibly even to include cystoscopy; to become familiar with the proper evaluation and treatment of common urologic diseases such as prostate cancer, bladder cancer, benign prostatic
hyperplasia, and urolithiasis; and to develop expertise in the role and interpretation of a wide array of imaging studies utilized in urology.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 3

URLGY 5470 - UROLOGICAL SURGERY (ADULT)

Minimum Credits: 0
Maximum Credits: 0
Four-week clinical clerkships in urology. Rotations through more than one hospital may be elected. The clerkship stresses inpatient and outpatient experience as an acting intern.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

URLGY 5471 - PEDIATRIC UROLOGICAL SURGERY

Minimum Credits: 0
Maximum Credits: 0
Four-week clinical elective. Student closely involved in evaluation and care of both inpatient and outpatient. Weekly pediatric urology/pediatric surgery/radiology conference will be attended in addition to weekly conferences. Student may participate in lab research.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

URLGY 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

URLGY 5810 - UROLOGY RESEARCH

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student to gain valuable experience in urological surgery. The student will be given the opportunity to learn research techniques and to participate in research in progress.
Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

URLGY 5899 - INDEPENDENT STUDY IN UROLOGY

Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U
Course Attributes: School of Medicine Year 4

URLGY 5900 - EXTRAMURAL UROLOGIC SURGERY

Minimum Credits: 0
Maximum Credits: 0
A clinical experience in urologic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U
